## **Reversible Conductance and Surface Polarity Switching with Synthetic Molecular Switches**

Sumit Kumar  
University of Groningen, Netherlands

Zernike Institute for Advanced Materials PhD series 2019-24  
ISSN: 1570-1530  
ISBN: 978-94-034-1868-1 (printed)  
978-94-034-1867-4 (electronic)

This project was carried out in the research group "Surface and Thin Films" of the Zernike Institute for Advanced Materials of the University of Groningen and supported by the Advanced Materials research program of the Zernike National Research Centre under the Bonus Incentive Scheme of the Dutch Ministry for Education, Culture and Science. The author benefited from the Svāgata 2013 Erasmus Mundus fellowship and was financially supported by the University of Groningen.

*Printed by:* Gildeprint - Enschede

*Front & Back:* The cover art was designed by Sumit Kumar and Saurabh Soni, shows artistic representations of a molecular punch card device encoded the ASCII character 'rcclab', a self-assembled monolayer and formation of an EGaIn tip (photos procured by Davide Fracasso).

# **Reversible Conductance and Surface Polarity Switching with Synthetic Molecular Switches**

## **PhD Thesis**

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. C. Wijmenga  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on  
Friday 27 September 2019 at 9.00 hours
