Correction to: Cardiovascular Drugs and Therapy (6999)

<https://doi.org/10.1007/s10557-020-06999-7>

Certain paragraph of the article should be written as follows:

MI surgery increased the myocardial expression of atrial natriuretic peptide (ANP) and brain natriuretic peptide (BNP) and increased the relative expression of foetal (β -MHC) compared to with that of adult (α -MHC) myosin heavy-chain isoform (i.e. β -MHC/ α -MHC ratio), as markers for foetal gene reprogramming in heart failure (Fig. 2d). The mRNA levels of cardiac fibrosis markers collagen, type I, alpha 1 (COL1A1) and tissue inhibitor of metalloproteinases 1 (TIMP1) were also significantly increased in the hearts of rats following MI, compared with that in the hearts of sham rats (Fig. 2e). Apixaban treatment had no effect on ANP, BNP, β -MHC/ α -MHC ratio, COL1A1 or TIMP1 mRNA levels (Fig. 2d, e).

The original version of this article was revised.
