Structural characterization of ion translocation by the chimeric potassium uptake system KdpFABC

How a P-type ATPase hijacks an ion channel

Lisa Hielkema

Cover design: Monica de Boer & Lisa Hielkema

Printed by: Optima Grafische Communicatie B.V.

The work described in this thesis was performed in the Membrane Enzymology group of the Groningen Biomolecular Sciences and Biotechnology Institute (GBB) at the University of Groningen, the Netherlands.

Structural characterization of ion translocation by the chimeric potassium uptake system KdpFABC

How a P-type ATPase hijacks an ion channel

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
dinsdag 29 maart 2022 om 9.00 uur

door

Lisa Hielkema

geboren op 6 december 1989
te Groningen

Promotor

Prof. dr. D.J. Slotboom

Copromotor

Dr. C. Batista Paulino

Beoordelingscommissie

Prof. dr. A. Guskov

Prof. dr. A. Briegel

Prof. dr. A. Kortholt

Table of contents

Chapter 1	9
General introduction to the potassium uptake system KdpFABC	
Importance of ion gradients for cell viability	10
Superfamily of K ⁺ transporter proteins (SKT)	13
P-type ATPases	16
KdpFABC	20
K ⁺ transport in KdpFABC involves a unique mechanism	23
Regulatory inhibition by KdpB _{S162} phosphorylation	28
Outline of this thesis	30
References	30
Chapter 2	39
Introduction to cryo-transmission electron microscopy	
Abstract	40
Introduction	40
Principles and setups	41
Biomedical relevance	48
Parameters of image quality	50
Data processing	53
Conclusions	58
References	60
Chapter 3	67
Cryo-EM structures of KdpFABC suggest a K⁺ transport mechanism via two inter-subunit half-channels	
Abstract	68
Introduction	68
Results	70
Discussion	78
Methods	82
Data availability	86
References	86
Supplementary data	91
Supplementary references	106

Chapter 4	109
Deciphering ion transport and ATPase coupling in the intersubunit tunnel of KdpFABC	
Abstract	110
Introduction	110
Results	113
Discussion	122
Methods	127
Data availability	134
References	134
Supplementary data	140
Supplementary references	158
Chapter 5	161
Structural basis for KdpFABC inhibition involving an E1 off-cycle state	
Abstract	162
Introduction	162
Results	165
Discussion	176
Conclusion	180
References	187
Supplementary data	192
Supplementary references	210
Chapter 6	213
Summary and Perspectives	
Summary	213
Perspectives	217
References	220
Nederlandse Samenvatting	223
Curriculum vitae	231
Acknowledgements	235
