Acknowledgements

Alhamdulillahirabbil'alamin. All praise to Allah SWT who granted me the courage, capability and opportunity to complete my PhD. It has been a long journey with hardship and many turns. I have received a lot of support, guidance, and kindness from people whom I met throughout this journey and for that it is a pleasure for me to express my gratitude for them.

Firstly, I would like to thank my supervisor Prof. Bert Poolman for giving me the opportunity to do the PhD in the Enzymology group. I highly appreciate your supervision, constant support, guidance, and encouragement throughout my PhD. I admire your hard work and your fast response in correcting my thesis. Thank you very much.

I also would like to express my gratitude to my co-supervisor Prof. Dirk J. Slotboom. Thank you for the countless times when you helped me with various kinds of things. You always have a minute for me and patiently answer to my questions. I really appreciate it. My special thanks to the reading committee members Prof. Jan Kok, Prof Dick Janssen and Prof. Lutz Schmitt.

I would like to thank the *Beasiswa Disertasi Indonesia* program, *Lembaga Pengelola Dana Pendidikan (LPDP)*, *Departemen Keuangan* Indonesia for taking part in providing me with the financial support to finish my PhD study. Special thanks to Ibu Bunga who helped me a lot with all the administration process in applying the scholarship.

My sincere thanks to people that contributed in my PhD study. Mrs. Margriet, thank you for your extremely kindness in helping me with various kinds of things. I will always remember you. Albert, you are a crystallographer savior, thank you for everything. You are very knowledgeable, reliable, and kind! I wish I met you earlier in my PhD study. To Soren, thank you for your effort in providing the molecular docking data. To Gea, eventually we were writing several papers together, thank you for the hard work! I really appreciate it. My special thanks to Dr. Ruud Scheek. You are probably the most sincere and the wise person that I ever met during my stay here, thank you for helping me with the Mathematica software. I highly appreciate your support.

I would like to thank my paranymp Sonja and Raj. Sonja, I first met you in the crystallography group. We both worked late setting-up crystallization plates using the mosquito robot. Back then you were still a visiting master student but you showed capable of hard work. I was surprised that you could speak Indonesian and eventually we became good friends. Thank you so much for willing to be my paranymp. I will be waiting for you to visit me in Indonesia).

I will take this opportunity to thank the former Enzymology members: Josy and Roonie, Tejas, Jacek, Siva, Jeanette, Pranav, Nobina, Erik, Karin, Astri, Justyna, Anton, Marysia, Petra, Whim, Duygu, Gemma, Nadia, Mac Donald, Akira, Inga, Karlien, and Armagan. I was having good times in the group because of our friendship and I shall remember all of our memories. Special thanks to Guus for letting me work with his ThiT and to finally see how beautiful membrane protein crystals could look like. To Andreja, we shared many difficult times together during membrane protein crystallizations. Thank you for your patience and your help during that time. I wish all the best for you and your family.

My office mates Franz, Raj, and Ruslan. It was funny how the three of us often ended working overtime or working during the weekend together. Thanks guys for your support and kindness. Also thanks to the rest of Enzymology members: Stephanie, Frans, Hendrik, Ria, Jonas, Arnold, and Weronika. Special thanks to Lotteke who helped me with the Dutch translation of my thesis summary.
