groningen

Planning of Combined Make-to-Order and Make-to-Stock Production

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

donderdag 6 oktober 2016 om 14.30 uur

door

Bartholomeus Jacobus Beemsterboer

geboren op 20 juni 1985
te Wester-Koggenland

Promotor
Prof. dr. R.H. Teunter

Copromotor
Dr. M.J. Land

Beoordelingscommissie
Prof. dr. K.J. Roodbergen
Prof. dr. ir. R. Dekker
Prof. dr. G. Kiesmüller

Contents

1 Introduction **3**

1.1 Make-to-stock production 3
1.2 Make-to-order production 5
1.3 Which strategy to apply? 7
1.4 Hybrid production 9
1.5 Differences between MTO and MTS production planning 10
1.6 Literature on planning and control of hybrid production systems . 12
1.7 Contribution and outline 14
1.8 Journal publications 15

2 Hybrid MTO-MTS production planning: an explorative study **17**

2.1 Introduction 17
2.2 Literature review 19
2.3 Model formulation 22
2.3.1 Production system 22
2.3.2 Markov Decision Process 24
2.4 Policy structure 27
2.5 Numerical comparison 30
2.5.1 Experiments with varying demand parameters 31
2.5.2 Experiments with varying cost parameters 35
2.6 Conclusion 36

3 Flexible lot sizing in hybrid make-to-order/make-to-stock production planning **39**

3.1 Introduction 39
3.2 Model formulation 42
3.2.1 Production system 42
3.2.2 Markov Decision Process 44
3.3 Policy structure 47
3.4 Numerical investigation 50

3.4.1 Reference models . . . 51
3.4.2 Experimental design . . . 51
3.4.3 Results . . . 52
3.4.4 Effect of demand mix . . . 54
3.5 Conclusion . . . 54

4 Integrating make-to-order and make-to-stock in job shop control 57
4.1 Introduction . . . 57
4.2 Literature review . . . 59
4.3 Experimental design . . . 62
4.3.1 Production system . . . 62
4.3.2 Primary dispatching rule: Operation Due Dates . . . 64
4.3.3 Performance measures . . . 65
4.3.4 Integration methods . . . 66
4.3.5 Reference methods . . . 70
4.4 Simulation results . . . 71
4.4.1 Exploration of the production system . . . 72
4.4.2 Simulation results . . . 73
4.4.3 Examining the performance differences . . . 75
4.4.4 Sensitivity study . . . 78
4.4.5 Implications for practice . . . 80
4.5 Conclusion . . . 80

5 Two-product Storage-capacitated Inventory Systems: a Technical Note 83
5.1 Introduction . . . 83
5.2 System description . . . 86
5.3 Simple cycles . . . 86
5.3.1 Deriving optimal order quantities . . . 87
5.3.2 Selecting the base product and optimizing m or n . . . 89
5.4 Comparison to other methods . . . 90
5.4.1 Capacity partitioning . . . 90
5.4.2 Other approaches . . . 91
5.5 General cycles . . . 92
5.6 Conclusion and further research . . . 93

6 Conclusions and discussion 95
6.1 Summary of results . . . 95
6.2 Conclusion . . . 97
6.3 Future research . . . 98

A Transition probabilities of the Markov Decision Process in Chapter 2 101

B Transition probabilities of the Markov Decision Process in Chapter 3 105

C Proofs of Theorem 5.1 and Corollary 5.1 109

Bibliography 115

Samenvatting 121
