On the missing links between the epidemiology and pathophysiology of *Staphylococcus aureus*

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans

and

to obtain the degree of PhD at the
University of Greifswald

Double PhD degree

This thesis will be defended in public on

Monday 8 October 2018 at 09.00 hours

By

Solomon Abera Mekonnen

born on 15 March 1984

in Ambo, Ethiopia

Supervisors

Prof. J.M. van Dijk

Prof. U. Völker

Assessment Committee

Prof. F. Götz

Prof. J.A.G. van Strijp

Prof. J. Kok

Prof. J.W.A. Rossen

Table of contents		page
Chapter 1	General introduction and scope	7
Chapter 2	Signatures of cytoplasmic proteins in the exoproteome distinguish community and hospital-associated methicillin-resistant <i>Staphylococcus aureus</i> USA300 lineages	33
Chapter 3	Metabolic niche adaptation of community- and hospital-associated methicillin-resistant <i>Staphylococcus aureus</i>	69
Chapter 4	Prolonged intra-neutrophil survival as an adaptive strategy of <i>Staphylococcus aureus</i> USA300 in the hospital environment	89
Chapter 5	Summary, conclusions and future perspectives	125
Appendices	Nederlandse samenvatting	135
	Biography	146
	List of publications	147
	Acknowledgements	148
