Magnesium-based supports for stem cell therapy of vascular disease

Mónica Echeverry Rendón

The research described in this thesis was performed under an agreement between the University Medical Center Groningen, University of Groningen and Universidad de Antioquia. The work was funded by Colciencias, Eurica and Groningen University Institute for drug exploitation (Guide), Graduate school of medical sciences. For publication of this thesis, financial support from the Graduate School of medical Science of the University of Groningen/ University Medical Center Groningen and Editekk, Inc is gratefully acknowledged

Magnesium-based supports for stem cell therapy of vascular disease

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on
 Wednesday 24 October 2018 at 12.45 hours

by

Mónica Echeverry Rendón

born on 31 August 1983
 in Medellin, Colombia

Supervisors

Prof. M.C. Harmsen

Prof. F. Echeverria

Co-supervisors

Prof. S. Robledo

Prof. G. Krenning

Assessment Committee

Prof. H.J. Busscher

Prof. A.R. Boccacini

Prof. H.G.D. Leuvenink

Paranimfen:

Daniela Jou-Valencia

Marloes Sol

CONTENTS

CHAPTER 1

Introduction: Contents and aim of the thesis 9

CHAPTER 2

Biodegradable Magnesium-Based Supports for Therapy of Vascular Disease a General View 15

PART I

Modification and characterization of Mg by plasma electrolytic oxidation

CHAPTER 3

Novel coatings for commercial pure magnesium obtained by plasma electrolytic oxidation through the addition of organic additives 43

CHAPTER 4

Improvement of corrosion resistance of commercial pure magnesium after its modification by single and two-step anodization. 62

CHAPTER 5

Sterilization procedures impact pure magnesium modified by plasma electrolytic oxidation 79

PART II

Biological validation of Mg modified by plasma electrolytic oxidation

CHAPTER 6

Plasma electrolytic oxidized magnesium adversely influences vascular cells types but not mesenchymal cells and monocytes 92

CHAPTER 7

Endothelial function after exposure to plasma electrolytic oxidized magnesium degradation products 111

CHAPTER 8

General discussion and future perspectives 125
