FROM LOCAL ADAPTATION TO RANGE SIZES

Ecological and evolutionary
consequences of dispersal

The research reported in this thesis was carried out at the Theoretical Research in Evolutionary Life Sciences group (TRÊS), which is part of the Groningen Institute for Evolutionary Life Sciences (GELIFES) of the University of Groningen (The Netherlands), according to the requirements of the Graduate School of Sciences (Faculty of Mathematics and Natural Sciences, University of Groningen), and Terrestrial Ecology Unit (TEREC) of the faculty of Sciences, Ghent University (Belgium).

The research was supported by the Ubbo Emmius Fund and the SPEEDY (BelSpo) project. The printing of this thesis was partly funded by the University of Groningen and the Faculty of Science and Engineering (University of Groningen).

From local adaptation to range sizes

Ecological and evolutionary consequences of dispersal

PhD thesis

To obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans

and

to obtain the degree of PhD at
Ghent University
on the authority of the
Rector Prof. R. Van de Walle

Double PhD degree

This thesis will be defended in public on

Friday 16 November 2018 at 16:15 hours

by

Adriana Alzate Vallejo

born on 25 August 1982
in Cali, Colombia

Supervisors

Prof. R.S. Etienne

Prof. D. Bonte

Assessment committee

Prof. L. Lens

Prof. O. De Clerck

Prof. F. Altermatt

Prof. J. van de Koppel

Contents

Chapter 1	03
Introduction and outline of the thesis	
Chapter 2	13
Experimental island biogeography demonstrates the importance of island size and dispersal for the adaptation to novel habitats	
Chapter 3	35
Interspecific competition counteracts negative effects of dispersal on adaptation of an arthropod herbivore to a new host	
Chapter 4	61
A simple spatially explicit neutral model explains range size distribution of reef fishes	
Chapter 5	87
Dispersal-related traits explain variation in geographic range size of reef fishes in the Tropical Eastern Pacific	
Chapter 6	107
Synthesis
