

Why Should Art Education Be Funded?

Jackie Patton

Advisor: Dr. Vanessa Winn

Findings

- A well-rounded education that includes the arts is more desired than only having a STEM education.
- Early childhood art education can prompt creativity and help children develop proper ways to express and manage their emotions.
- Art can be utilized in all fields of study, for example, design in engineering.
- “... Art becomes personally meaningful and culturally relevant as students draw on their existing worldviews, engage in sense-making, and critique art from the perspective of their communities and cultures” (Overby et al., 2022, p. 20).
