1996 Fiscal Year Final Research Report Summary

Community and Network System

Research Project

Project/Area Number

07451044

Research Category

Grant-in-Aid for Scientific Research (B)

Allocation Type

Single-year Grants

Section

一般

Research Field

社会学(含社会福祉関係)

Research Institution

Kanazawa University

Principal Investigator

USUI Takashi The faculty of letters, Kanazawa University Professor, 文学部, 教授 (40079447)

Co-Investigator(Kenkyū-buntansha)

YAMAGUCHI Yoh The faculty of letters, Kanazawa University Assistant, 文学部, 助手 (00262543)

IWAMOTO Takeyoshi The faculty of letters, Kanazawa University Assistant Professor, 文学部, 助教授 (50211066)

MIZOBE Akio The faculty of letters, Kanazawa University Assistant Professor, 文学部, 助教授 (90127142)

HASHIMOTO Kazuyuki The faculty of letters, Kanazawa University Professor, 文学部, 教授 (80031798)

Project Period (FY)

1995 – 1996

Keywords

network / region / organization

Research Abstract

We have studied fundamental theories of social networks, and surveyed social networks on regional societies.

1. Study in fundamental theories of social networks. Social network theories in a wide area of social science were reviewed. And a vision of 'network sociology' was presented. Here, systematic typology of social network analysis was constructed by combining a typology of network units (personal, community, organization, and national) and a typology of spreads of networks (personal, community, organization, national, and global). (chapter.1 by Usui.)

2. Surveys of social networks on regional societies. We made three surveys of social networks, of which units were 'personal', and of which spreads were 'personal--national, and global'. those surveys were (1) 'Wajima City Survey' (Sep.1996), (2) 'Kanazawa-Suzu-Neagari Survey' (Nov.1995), and (3) A survey of databases of scientific articles.

The relationships between 'participation in festival' and 'neighboring' (chapter.2 by Mizobe and Yamaguchi), and relationships between 'educational aspiration' and 'kinship' (chapter.3 by Yamaguchi and Mizobe) were shown by Wajima City Survey. The relationships between 'the qualities and the quantities of personal networks' and 'social attributes' were shown by Kanazawa-Suzu-Neagari Survey (chapter.4 by Manabe and Hashimoto). Then, databases of scientific articles play the role of 'nodes' in the national or global networks of scientists. From this perspective, various databases of sociological articles were introduced (chapter.5 by Iwamoto).
