Heading

- 1 - Implementation & objectives
- 2 - Characteristics & information
- 3 - Data use & evaluation of results
- 4 - Main challenges

“Innovative collaborations, tools, and policies to improve the quality of service and care”

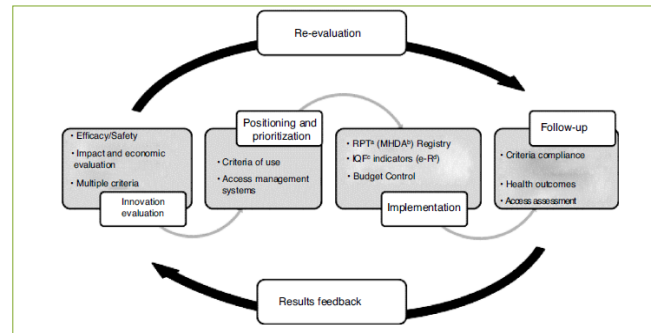

1 – Implementation & objectives

Centralized and mandatory registry for all public hospitals in Catalonia (n=65).

Designed in 2012 - 3 main objectives:

- Monitor the use of drugs linked to a diagnosis
- Find out the adherence to clinical criteria set by the **Pharmacotherapeutic Harmonization Program (PHP)**
- Assess health outcomes

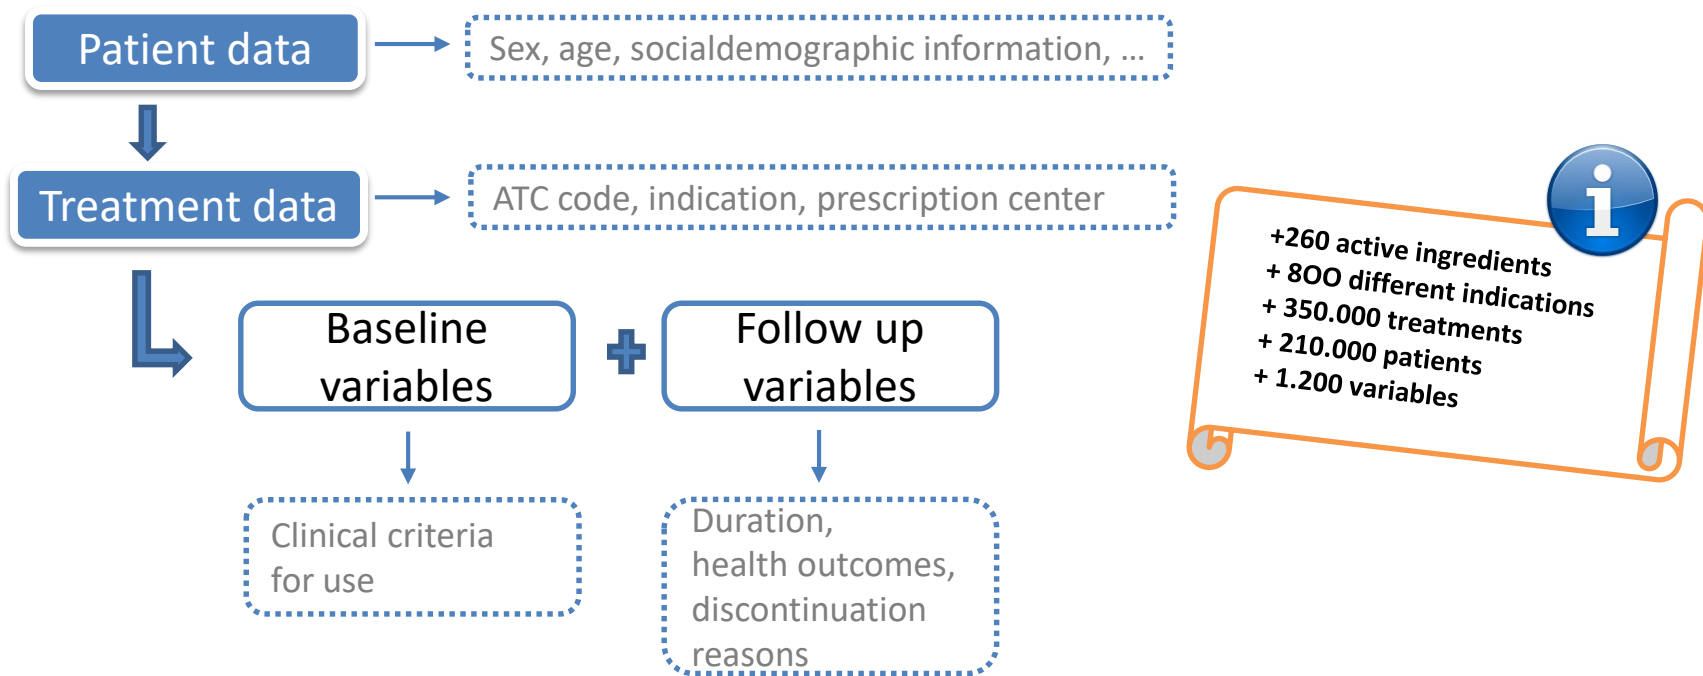

PHP - Appraisal of new drugs and proposal of the criteria for use and prioritization

M. Roig Izquierdo et al. / Med Clin (Barc). 2020;154(5):185–191

“Innovative collaborations, tools, and policies to improve the quality of service and care”

2- Characteristics & information

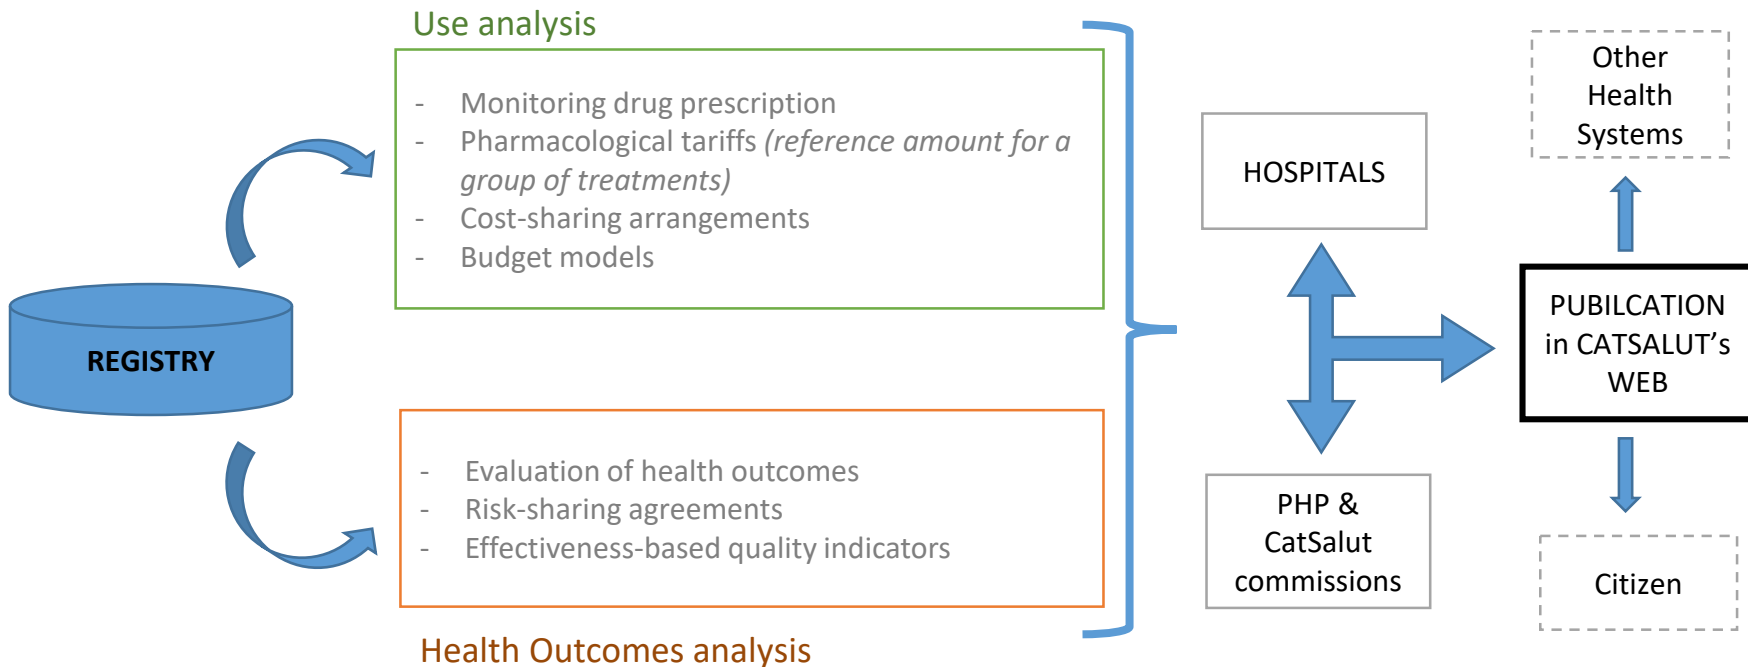

“Innovative collaborations, tools, and policies to improve the quality of service and care”

3 - Data use & evaluation of results

DECISION MAKING

“Innovative collaborations, tools, and policies to improve the quality of service and care”

3 - Data use & evaluation of results

DECISION MAKING

❖ Evaluation of health outcomes

Public outcomes reports

Characteristics of the treated patients,
Compliance with PHP recommendations,
Main treatment outcomes,
Summary of treatment costs.

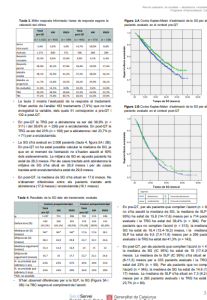

Benchmarking across hospitals level
Comparison with clinical trials

REPORTS ARE SHARED

PHP + prescribing physicians + hospital pharmacists + hospital managers

To identify and share best practices across different territories and teams

“Innovative collaborations, tools, and policies to improve the quality of service and care”

4- Main challenges – ongoing:

“Innovative collaborations, tools, and policies to improve the quality of service and care”

**Thank you
MOLTES
GRÀCIES**
