## Elearning, Communication and Open-data: Massive Mobile, Ubiquitous and Open Learning

<b>Deliverable Title</b>	D3.5 Report on ECO social network integration features
Deliverable Lead:	UNED
Related Work package:	WP3
Author(s):	Javier Viñuales, Jorge Driesner, Sara Tejera, Alessandra Tomasini, Kjeld Loozen, Vitor Rocio, Felix Bohuschke, Stefaan Ternier
Dissemination level:	Public (PU)
Due submission date:	31 July 2015
Actual submission:	31 July 2015

Abstract	This document describes how integrations with social networks are being developed in ECO platforms. With these new features, participants will be able to share results and other contents through Facebook, Twitter, Google plus.
Keywords	Technology, platform, social network, integration, sharing, facebook, g+, twitter

## Executive Summary

This document describes the improvements that have been made to each component within the ECO architecture with regard to social features required to support creation of sMoocs. A general user profile has been created on EcoPortal and its data is also available on each connected platform. The user's dashboard on EcoPortal provides quick access to each enrolled course and provides progress information.

Social Sharing have been implemented on EcoPortal and most platforms.

A total of 15 social requirements that were proposed by WP2, like activity streams, microblogging karma and badges, were analysed and when technical possible implemented on the MOOC platforms. This deliverable reports on the implementation of each of those requirements.

## 1. Introduction

In order to comply with the social requirements that our pedagogical work package (WP2) set some months ago in the deliverable 2.6 “Web 2.0 requirements analysis”, the ECO platforms providers have analysed and developed a series of social features, so that MOOC creators will be able to adjust their courses following the pedagogical model set in ECO and create authentic sMOOCs.

ECO platforms now offer new ways of communication among the participants of our MOOCs by using the new social features. In this way, the course designers will be able to engage participants to the social interactions and provide them with richer and more stimulating learning experiences.

ECO platforms also offer new ways of increasing motivation such as karma, reputation and badges features.

In section 3 of the present document, WP3 aim to describe how each ECO platform and the ECO Portal comply with the fifteen social requirements set by WP2, which are listed and described in section 2.

## 2. Requirements

From the pedagogical framework, the essential requirement for achieving a real sMOOC is to provide a networked learning, interaction, communication, dialogue and peer feedback.

For that, in the section 8.1 “Affordances for social learning and gamification” of the deliverable D2.6 “Web 2.0 requirements analysis”, the WP2 listed a series of requirements that our ECO platforms must comply:

Req. code	Short Description	Description
REQ1	Rich user profiles	<p>The learner is the owner and decides what information of the profile is made available to whom.</p> <ul style="list-style-type: none"> <li>• A template for a rich user profile, containing at the minimum the demographic details, such as name, age, gender, avatar or picture, but also interest, educational background, expertise, occupation, context information, communication style preferences and learning ambitions, and ways to contact them.</li> <li>• A mechanism to import profile information from social network sites, like Facebook, LinkedIn.</li> <li>• A mechanism to view profiles of other learners.</li> <li>• An option to see who is enrolled in the course.</li> <li>• A mechanism to collect contact, at a minimum displaying name, date, and contact details, and preferably a picture.</li> <li>• Social connections - follow (like Twitter), friend (like Facebook), circle (like Google+).</li> <li>• A record of historical actions, gathered in an activity stream that can be filtered on date and person, and is localised to context.</li> <li>• Own content published could also be aggregated in the profile page.</li> </ul>
REQ2	List of members	<p>An option to see who is enrolled in the course.</p> <ul style="list-style-type: none"> <li>• Search for people based on several criteria, such as name, similar or same course, location, interest.</li> <li>• Geo-localisation to assist in finding people near them.</li> </ul>
REQ3	Activity stream	<p>A record of historical actions, gathered in an activity stream that can be filtered on date and person, and is localised to context.</p>
REQ4	Personal Blog	<p>A personal writing space (blog or equivalent) is required to allow learners to create contributions. A course blog can be used in addition, but learners should have access to a personal blog as well. When learners already have an active blog outside the platform, they should be able to integrate that via a blog aggregator or RSS feed. Commenting and rating/linking should be possible.</p>
REQ5	Course Blog	<p>A course blog can be used, when the design of the course asks for it, but preferably learners should be allowed to use their personal blog, either internal in the platform or external.</p> <ul style="list-style-type: none"> <li>• Personal blogs should be aggregated into the course blog.</li> <li>• A blogroll should be used to list all blogs.</li> <li>• Blogpost can be filtered on topic, poster and date.</li> <li>• Comments to blogposts should be possible.</li> </ul>

**ECO: Elearning, Communication and Open-data: Massive Mobile, Ubiquitous and Open Learning**  
D3.5 Report on ECO social network integration features

REQ6	Microblogging	<p>Microblogging (like Twitter) or updates (like Facebook or Google plus). Again, preferably learners can integrate existing tools, for example via a Twitter feed or RSS feed.</p> <ul style="list-style-type: none"> <li>• If microblogging is not possible within the platform, a good integration with at least one of these networks is desirable.</li> </ul>
REQ7	Wiki	<ul style="list-style-type: none"> <li>• Wiki to allow joint production and collaboration.</li> <li>• Depending on course design a course wiki or an assignment wiki.</li> </ul>
REQ8	Group creation	<ul style="list-style-type: none"> <li>• Possibility for group creation by participants or by course organizers to support group tasks.</li> <li>• Joint group area populated with communication and collaboration tools.</li> <li>• Search for people based on several criteria, such as name, similar or same course, location, interest</li> <li>• Geo-localisation</li> </ul>
REQ9	Evaluation	<ul style="list-style-type: none"> <li>• Annotation all kinds of activities, resources, people/contacts, contributions (blog, wiki, etc) own and made by others.</li> <li>• Rate or like all kinds of activities, resources, people/contacts, contributions (forum, blog, wiki, twitter, etc)</li> <li>• Tag all kinds of activities, resources, people/contacts, contributions (forum, blog, wiki, twitter, etc)</li> <li>• Bookmark all kinds of activities, resources, people/contacts, contributions (forum, blog, wiki, twitter, etc)</li> </ul>
REQ10	Sharing	<ul style="list-style-type: none"> <li>• Share all kinds of activities, resources, people/contacts, contributions (forum, blog, wiki, twitter, etc) to others e inside and outside the platform.</li> <li>• Comparable to Add it icons.</li> <li>• Recommending all kinds of activities, resources, people/contacts, contributions (forum, blog, wiki, twitter, etc) to others e inside and outside the platform.</li> <li>• Applies also to resources, people, contributions created outside the platform and/or MOOC, thus importing.</li> </ul>
REQ11	Content syndication	<ul style="list-style-type: none"> <li>• Option to import RSS feeds, twitter feeds.</li> <li>• Blog aggregator.</li> </ul>
REQ12	User dashboard	<ul style="list-style-type: none"> <li>• User dashboard: to aggregate their publications or those of the people that they follow. Own content published could also be aggregated in the profile page.</li> <li>• Aggregating and organising annotations, ratings, likes, bookmarks.</li> </ul>
REQ13	Progress bar	<p>A progress bar is visible to all students during the course. Course designers can assign percentages of completion for each unit and activity, so users can monitor their progress in a motivational way.</p>
REQ14	Achievement/badges system	<p>Learners earn badges by completing certain units or doing certain activities, or depending on grade. Once the learners obtain a certain number of basic badges/achievements they can opt to get a non-academic but official certificate of successful course completion.</p>
REQ15	Karma/reputation system	<p>A level or karma system that allows learners to gather different user karma and overall points.</p>

### 3. Description of integration

#### 3.1. EcoPortal

Though the requirements from WP2 are focussing on MOOC platform requirements, some of these requirements are also used to improve the usability of EcoPortal.

##### Req1: User profile

A user can maintain his general ECO profile on EcoPortal. Supported items include name, nickname, gender, profile picture, geographic information, bio, social network url's and interests.

The screenshot shows a user profile form titled "My profile" for user "Kjeld Loozen". The form contains the following fields and values:

- Nickname: Kjeld
- Firstname: Kjeld
- Middle name: (empty)
- Last name: Loozen
- Gender: Male
- Birthdate: 19-05-1971
- My preferred language: English
- Postal code: 6994CA
- City: De Steeg
- Country: Netherlands
- Website: https://www.reimeritsolutions.nl
- Twitter: https://twitter.com/KjeldLoozen
- Facebook: https://www.facebook.com/KjeldLoozen
- LinkedIn: https://nl.linkedin.com/pub/kjeld-loozen/0/46/7743
- Bio: (empty)
- My interests: Educational science, Social sciences, Humanities, Natural sciences and Mathematics, Biomedical Sciences, Technological sciences

An "Update" button is located at the bottom of the form.

This user profile information is accessible for all MOOC platforms via the API of the ECO IDP. This API also offers a method to update a user's profile. In this way, a user could update his/her profile from a MOOC platform and these updates are transferred to the common user profile on the EcoPortal. This mechanism is illustrated in the figure below.

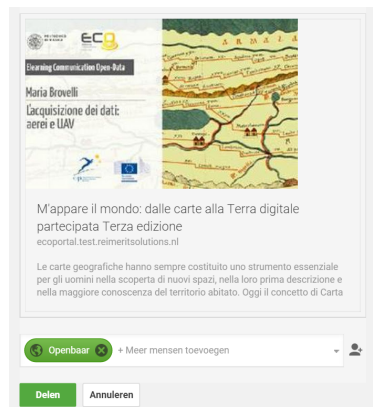

**Req10: Sharing**

EcoPortal offers the possibility of sharing a course on the social networks Facebook, Twitter and Google+. “Share buttons” are available in the course details of the course catalog and also on the user’s dashboard. When a course is shared, a dedicated preview is added to the user’s personal message by showing the course image, title and description.

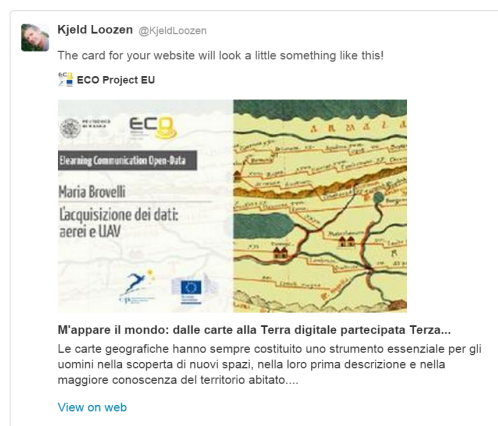

Facebook:

Google+:

Twitter:

# ECO: Elearning, Communication and Open-data: Massive Mobile, Ubiquitous and Open Learning

## D3.5 Report on ECO social network integration features

The shared url starts EcoPortal in a special 'course highlight mode' in which the details of the course are shown and allows the user to go to the course. Technical details of this mechanism are being described in D3.4 (2nd edition).

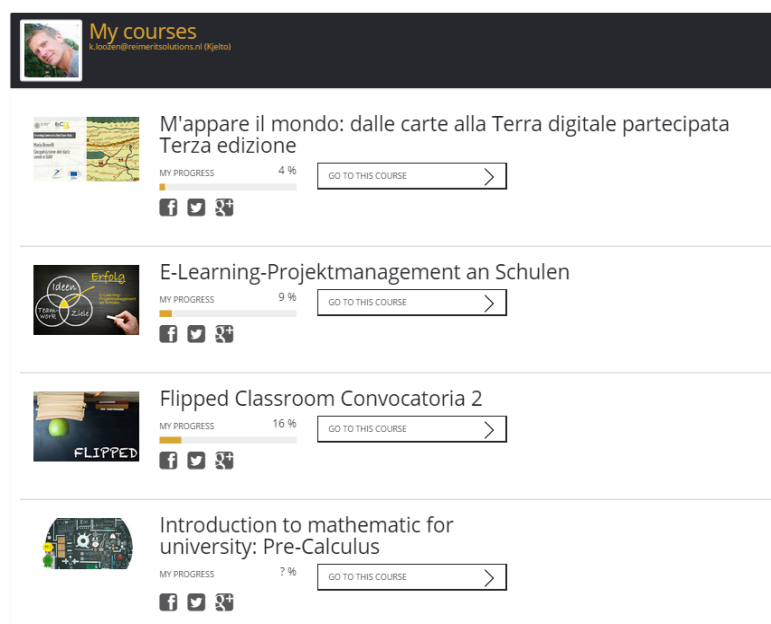

This course highlight page on EcoPortal is shown in the image below.

### Req 12/13: User dashboard, Progress bar

In EcoPortal a user can access his dashboard. This page shows the courses a user is enrolled in, his progress on each course and a direct link to go to those particular courses.

The course progress information is gathered by an ECO Backend function which in turn requests this information on each connected MOOC platform. Technical details of this mechanism is being described in D3.4 (2nd edition).

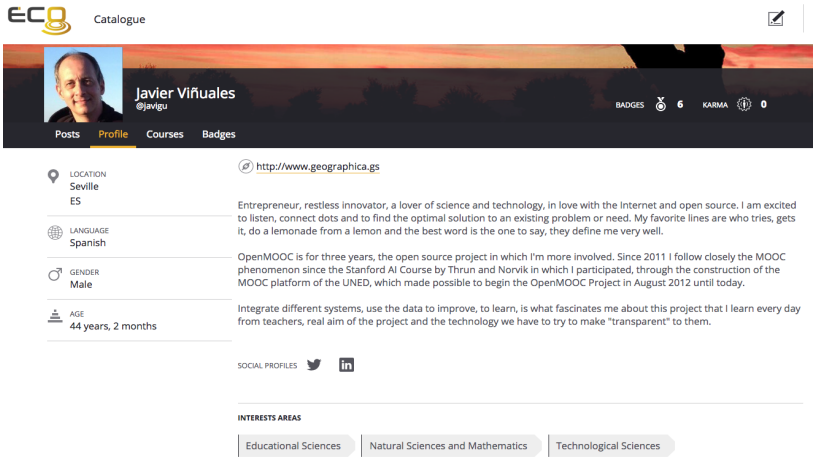

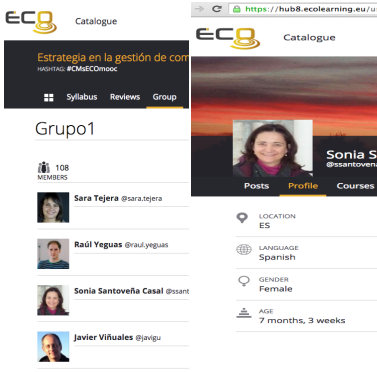

### 3.2. ECO MOOC platforms integration

#### WeMOOC:

CODE	Short description	How the requirement is fulfilled
REQ1	Rich user profiles	WeMOOC relies on the public profile available on the EcoPortal.
REQ2	List of members	Currently, a list of all enrolled members list can be activated by users with edition privilege. Administrators can inspect users enrolled in a MOOC, assign and unassign users from MOOCs.
REQ3	Activity stream	Social activities of users can be shown at hub and course levels.
REQ4	Personal Blog	Not available.
REQ5	Course Blog	Blog can be activated by users with edition privileges.
REQ6	Microblogging	Not available.
REQ7	Wiki	Wiki can be activated by users with edition privileges.
REQ8	Group creation	Not available.
REQ9	Evaluation	In WeMOOC, users can comment and rate message board threads, wiki pages, blog entries, uploaded documents and courses.
REQ10	Sharing	In WeMOOC, users can share message board threads, wiki pages, blog entries, uploaded documents and courses.
REQ11	Content syndication	Option to import RSS feeds, twitter feeds Blog aggregator
REQ12	User dashboard	WeMOOC relies on the user dashboard available on the EcoPortal.
REQ13	Progress bar	WeMOOC shows the progress in a percentage system, instead of representing a progress bar.
REQ14	Achievement/badges system	WeMOOC have his own badge/certification system, but relies on the badge features available on EcoPortal.
REQ15	Karma/reputation system	WeMOOC has currently a reputation system in the message board section. The specific user ranks are awarded based on the number of posted messages.

OpenMOOC:

Code	Short description	How the requirement is fulfilled
REQ1	Rich user profiles	<p>We have improved the profile to get all the info from the EcoPortalu common profile of ECO</p>  <p>The OpenMOOC profiles has the following:</p> <ul style="list-style-type: none"> <li>• Demographic details, such as name, age, gender, avatar or picture, but also interests and a short bio space in which you can include your educational background, expertise, occupation, context information, and learning ambitions.</li> <li>• Your web and social profile in Facebook, Twitter and LinkedIn to open ways to contact with you.</li> <li>• Badges and karma you have earned.</li> <li>• Courses you are enrolled in.</li> <li>• Collection of posts you have written in the internal microblogging system.</li> </ul> <p>You can also see other learners in your group' profile</p>  <ul style="list-style-type: none"> <li>• A record of historical actions, gathered in an activity stream related with hastashes in your microblog posts that you filter clicking on the hashtag, person or doing a search against hashtag or a chain like these: <ul style="list-style-type: none"> <li><a href="https://hub8.ecolearning.eu/user/posts/hashtag/ECO_CAM">https://hub8.ecolearning.eu/user/posts/hashtag/ECO_CAM</a></li> <li><a href="https://hub8.ecolearning.eu/user/posts/search/marketing">https://hub8.ecolearning.eu/user/posts/search/marketing</a></li> </ul> </li> </ul>

List of members

You can access the complete list of learners or teachers using the administration interface of a course. You can access this interface either if you are a teacher of the course or you are marked as staff member of the platform.

The screenshot shows the course administration interface for 'Estrategia en la gestión de...' with the hashtag #CMSECOMOOC. The 'Lists' menu item is highlighted. Below the navigation menu, there is a table of members with the following data:

First name	Last name	Email	Course mark	View details
	Rivera Cerezo		7.29	Go
	Macón Gutiérrez		7.27	Go
	Rodríguez Regaña		7.25	Go
	Areños		7.16	Go
			6.97	Go
			6.90	Go
			6.81	Go
	Fernandez Mesa		6.79	Go
			6.73	Go
			6.46	Go

Below the table, it indicates 'Showing 1 to 10 of 1,457 entries' and navigation options for previous and next pages.

- You can search for people based on name, surname, email or course mark.
- The geo-localisation data is only available in the course administration panel form now. This info is anonymous, so you can see the number of learners per country and their points in a clickable map.

Demographic statistics

Students by country

Students by language

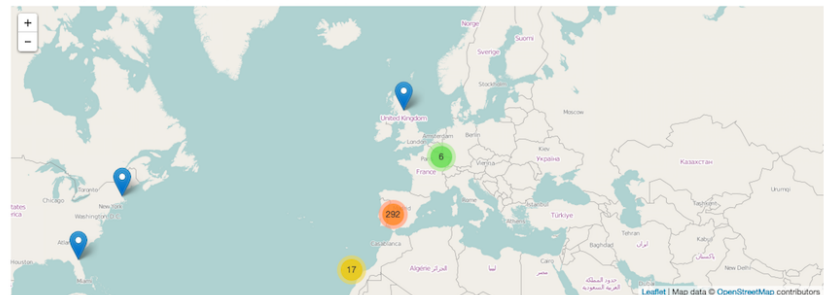

Students by gender

Students by age

Students by location (672 of 1457)

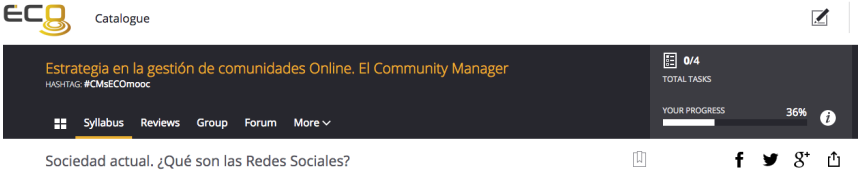

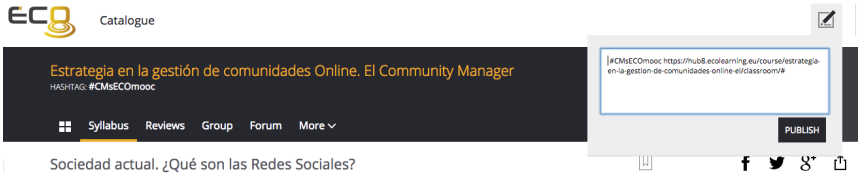

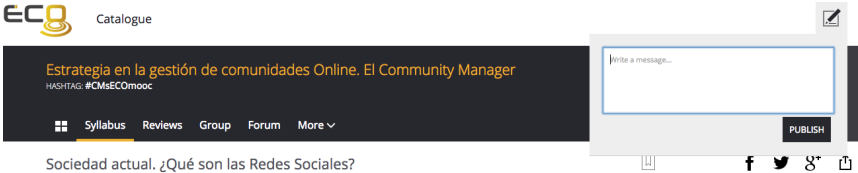

REQ2

## ECO: Elearning, Communication and Open-data: Massive Mobile, Ubiquitous and Open Learning

### D3.5 Report on ECO social network integration features

REQ3	Activity stream	OpenMOOC stores the historical actions and for now only the admin group can use this info in order to generate reports. Some info is shown in the teacheradmin panel of every course, as you can see in the REQs above described.
REQ4	Personal Blog	OpenMOOC has an internal microblogging system that can be used either to publish in your profile or share in other locations like the group wall or the dashboard (by using the group or the course hashtag, respectively).
REQ5	Course Blog	The same as above, using a different hashtag.
REQ6	Microblogging	<p>OpenMOOC has a powerful microblogging system that can be used from any location of the course, in order to share a comment related to the context</p>   <p>Or by clicking on the post icon near the avatar image.</p> 
REQ7	Wiki	Not available in OpenMOOC
REQ8	Group creation	Only the teachers team can create groups. You have to choose the number of members to create a group. OpenMOOC allows the learner to change from a group to another. All the activity is gathered to be used in the future, like the geolocalization to allow searching people near you by hand or automatically through a machine learning algorithm.
REQ9	Evaluation	Learners can do annotations and use a hashtag to publish in the microblog or in the forum.
REQ10	Sharing	You can share in your social networks any kind of content, from any location of a course, by using the sharing buttons.

REQ3	Activity stream	<p>Preparations are done. Currently, user activities are tracked and saved in the database. The visual representation of those activities is currently in development.</p> 
REQ4	Personal Blog	<p>A personal blog is currently not available. But every member of the Logi Assist platform has access to the wiki and message board in which personal pages can be created easily.</p>
REQ5	Course Blog	<p>Logi Assist offers a message board for all MOOCs.</p> 
REQ6	Microblogging	<p>Microblogging is currently not available. But every member of the Logi Assist platform has access to the wiki and message board in which personal pages can be created easily.</p>
REQ7	Wiki	<p>An portal wide wiki is available for all members of the Logi Assist hub.</p> 

# ECO: Elearning, Communication and Open-data: Massive Mobile, Ubiquitous and Open Learning

## D3.5 Report on ECO social network integration features

REQ8	Group creation	Currently group creation is not available. Group creation is currently in development.
REQ9	Evaluation	<p>Learners can access their personal education data and evaluated data like how many time was spent, how often a course was opened or how high the achieved progress is in a specific MOOC or over all MOOCs available in the Logi Assist hub.</p> <p>Additional learning activities are sent to the ECO learning locker, allowing to evaluate gathered data from all members. Data are gathered e.g. if a learner accesses a MOOC or a content of a MOOC.</p>  <p>Statistics Available courses   1 Completed courses   0 Available contents   33 Completed contents   7 Total time spent   - Total contents viewed   9</p> <p>Last unlocked</p> <ul style="list-style-type: none"> <li>[Wissenstest] Projektmanagement und Bedarfsanalyse E-Learning-Projektmanagement an Schulen 20/05/2015</li> <li>[Script] Projektmanagement und Bedarfsanalyse E-Learning-Projektmanagement an Schulen 20/05/2015</li> <li>[Text zum Video] Projektmanagement und Bedarfsanalyse E-Learning-Projektmanagement an Schulen 20/05/2015</li> </ul> <p>Last completed contents</p> <ul style="list-style-type: none"> <li>[Script] Grundlagen E-Learning E-Learning-Projektmanagement an Schulen 01/06/2015</li> <li>[Text zum Video] Grundlagen E-Learning E-Learning-Projektmanagement an Schulen 01/06/2015</li> <li>!WICHTIGE INFORMATION ZUM START!! E-Learning-Projektmanagement an Schulen 20/05/2015</li> </ul>
REQ10	Sharing	Logi Assist does not support content sharing in social media platforms as it is not applicable by the design of the platform.
REQ11	Content syndication	Currently, Logi Assist does not support content syndication.
REQ12	User dashboard	<p>Every learner has his own dashboard in which current MOOC statistics, last unlocked contents, last completed contents and an overall progress are displayed.</p>  <p>Statistics Available courses   1 Completed courses   0 Available contents   33 Completed contents   7 Total time spent   - Total contents viewed   9</p> <p>Last unlocked</p> <ul style="list-style-type: none"> <li>[Wissenstest] Projektmanagement und Bedarfsanalyse E-Learning-Projektmanagement an Schulen 20/05/2015</li> <li>[Script] Projektmanagement und Bedarfsanalyse E-Learning-Projektmanagement an Schulen 20/05/2015</li> <li>[Text zum Video] Projektmanagement und Bedarfsanalyse E-Learning-Projektmanagement an Schulen 20/05/2015</li> </ul> <p>Last completed contents</p> <ul style="list-style-type: none"> <li>[Script] Grundlagen E-Learning E-Learning-Projektmanagement an Schulen 01/06/2015</li> <li>[Text zum Video] Grundlagen E-Learning E-Learning-Projektmanagement an Schulen 01/06/2015</li> <li>!WICHTIGE INFORMATION ZUM START!! E-Learning-Projektmanagement an Schulen 20/05/2015</li> </ul> <p>Overall progress</p> <p>done   not started</p>
REQ13	Progress bar	<p>In Logi Assist the learner can inspect the achieved progress for every MOOC. Every MOOC has a progress bar in the MOOC Explorer which easily displays the current progress. In addition, in the dashboard, the learner can see his overall progress over all assigned MOOCs.</p>  <p>E</p> <p>E-Learning-Projektmanagement an Schulen</p> <p>Praktischer Leitfaden und Hintergrundwissen zu E-Learning an Schulen</p> <p>21.21%</p> <p>Overall progress</p> <p>done   79% not completed   not started</p>

---

**ECO: Elearning, Communication and Open-data: Massive Mobile, Ubiquitous and Open Learning**  
D3.5 Report on ECO social network integration features

---

REQ14	Achievement/badges system	A badge system is currently in development.
REQ15	Karma/reputation system	Logi Assist has currently a reputation system in the message board section. The specific user ranks are awarded based on the number of posted messages.

**ARLearn:**

code	Short description	How the requirement is fulfilled
REQ1	Rich user profiles	When a user logs in to the ARLearn authoring environment the following information is shown: <ul style="list-style-type: none"> <li>• personal profile picture</li> <li>• The user's name</li> </ul>
REQ2	List of members	ARLearn does not disclose all of it's members as this conflicts with their privacy. Note that ARLearn is a cloud based system, featuring only one installation with users that are not aware of the ECO context. Nevertheless, it is possible to list all open courses en to list the authors of this course. For a given course, we can list the members of the course using a web service.
REQ3	Activity stream	User activities are tracked and saved to learning locker
REQ4	Personal Blog	This does not apply to ARLearn
REQ5	Course Blog	This does not apply to ARLearn
REQ6	Microblogging	This does not apply to ARLearn
REQ7	Wiki	This does not apply to ARLearn
REQ8	Group creation	For courses, authors can create various "runs" with different groups.
REQ9	Evaluation	For a game and run, learners can access their data and evaluated data like which responses they gave to questions, the pictures they have taken of the answers they have given to questions.
REQ10	Sharing	This does not apply to ARLearn as within a game users do not generally share content beyond a game.
REQ11	Content syndication	No
REQ12	User dashboard	No
REQ13	Progress bar	No
REQ14	Achievement/badges system	ARLearn has an open badges integration that enables an author to define mozilla open badges as a reward for an action.
REQ15	Karma/reputation system	Mozilla open badges integration

#### 5. Conclusion

ECO platforms are now prepared with the necessary tools for creating real sMOOCs. Most of the features required in the deliverable D2.6 have been developed in one or more ECO platforms, so that ECO MOOCs provide the participants the mechanisms to social interacting among them and acquiring the knowledge through a more social learning model.

Besides, the access to the courses through the social networks has been improved. The EcoPortal has a new social functionality, therefore courses information can be easily shared through the main social networks.

The login and the sign on by using the social networks profiles is still a pending task. This is a desirable functionality that will be developed in the future but, due to its big complexity it is still in an analysis phase.
