

## LIST OF POSTERS

1. Abel Sebastian, Nybom Inna, Mäenpää Kimmo, Hale Sarah, Cornelissen Gerard, Akkanen Jarkko: Activated carbon in sediment remediation – adverse effects vs. remediation potential (p. 39)
2. Äijälä Cecilia, Leppäranta Matti, Arvola Lauri: Colour of Finnish inland waters in 1913 and 2014 (p. 39)
3. Aleshina Dina, Kurashov, Evgeny: Modern state of zooplankton in tributaries of Lake Ladoga (p. 40)
4. Axenrot Thomas E, Guillard Jean, Riha Milan: Applying and evaluating the European Standard Water quality – Guidance on the estimation of fish abundance with mobile hydroacoustic methods – experiences from three countries (p. 40)
5. Belicheva Lidia, Lukina Julia: Histopathological alterations in feral fish of Lake Onego - a baseline study for environmental monitoring purposes (p. 41)
6. Belkina Natalia, Kulik Natalia, Lozovik Petr, Efremenko Natalia: Trace elements in Lake Onega (p. 41)
7. Eronen Risto, Vainikka Anssi, Huuskonen Hannu, Kiljunen Mikko, Syväranta Jari, Kortet Raine: Diet of pikeperch (*Sander lucioperca*) in Lake Höytiäinen: stomach contents vs. stable isotope analysis (p. 42) CANCELLED
8. Fukushima Takehiko, Matsushita Bunkei, Oyama Youichi, Yoshimura Kazuya, Terrel Meylin, Kawamura Shimako, Takegahara Akito, Yang Wei: Semi-analytical prediction of Secchi depth using remote-sensing reflectance for lakes with a wide range of turbidity (p. 42)
9. Haberman Juta, Blank Kätlin, Laugaste Reet, Loigu Enn: The health of Lake Peipsi (Estonia/Russia): improvement stabilization or deterioration? (p. 43)
10. Haldna Marina, Möls Tõnu, Tammeorg Olga: Methods for testing the relationships between water and weather variables of the large shallow Lake Peipsi (p. 43)
11. Hiltunen Minna, Taipale Sami, Strandberg Ursula, Kahilainen Kimmo, Kankaala Paula: Fatty acid composition of Eudiaptomus spp. in boreal and subarctic lakes (p. 44)
12. Juvelius Juha, Auvinen Heikki, Marjomäki Timo, Peltonen Heikki, Degtev Andrei, Bergstrand Eva, Enderlein Olof: Fish density and fish length distribution in varying light conditions with single and split beam echo-sounding and trawling (p. 44)
13. Kangasniemi Ville, Mustonen Joni, Forsman Tero, Ikonen Ari T. K.: Element transfer to and distribution in signal crayfish (*Pacifastacus leniusculus*) in Lake Säkylän Pyhäjärvi SW Finland (p. 45)
14. Karjalainen Juha, Jokinen Linda, Keskinen Tapio, Knott Emily, Marjomäki Timo: The role of parental effect and relatedness on early development of coregonids in short and long winter (p. 45)
15. Kolari Irma, Eskelinen Päivi, Salmi Pekka, Mellanoura Junani, Hirvonen Esa: Water owners' attitudes towards ringed seal conservation in Lake Saimaa (p. 46)
16. Kuivalainen Jarmo: Autonomous measurement platform for monitoring lakes – LILA project (p. 46)

17. Lenters John, Blanken Peter, Spence Christopher, Gronewold Andrew, Kerkez Branko, Froelich Norma, Austin Jay, Xue Pengfei: The Great Lakes Evaporation Network (GLEN): Building an integrated observing system for large-lake flux measurements (p. 47)
18. Marenkov Oleg: The use of artificial spawning grounds for fish spawning in lake ecosystems (p. 47)
19. Mukhin Ivan, Dudakova Dina, Dudakov Mikhail: Integrated approach to the study of submerged surfaces community (p. 48)
20. Pellikka Katja, Räsänen Marjut: Changes in phytoplankton and water carbon concentration in the southern part of Lake Päijänne Southern Finland (p. 48)
21. Salmaso Nico, Milan Manuela, Bigler Christian, Szeroczynska Krystyna, Tolotti Monica: Effects of climate change and nutrients on the secular evolution of the planktonic community in Lake Garda (northern Italy): a multi-proxy approach (p. 49)
22. Seppänen Eila, Forsman Leena: Outliers form the majority of recreational fishers in the living area of the Saimaa ringed seal: Do the fishing regimes differ between outliers and locals? (p. 49)
23. Silander Jari, Kanninen Antti, Kahiluoto Joonas, Kaukonen Lari, Latva Mira, Sojakka Pekka, Savolainen Miia, Göransson Johanna, Koivuniemi Jenni, Vartiainen Minna: Developing mobile services for in-situ monitoring, data storing and sharing (HALIproject) (p. 50)
24. Soullignac Frédéric, Danis Pierre-Alain, Bouffard Damien, Chanudet Vincent, Dambrine Etienne, Guénand Yann, Guillermin Baptiste, Harmel Tristan, Kiefer Isabel, Trevisan Dominique, Uittenbogaard Rob, Anneville Orlane: Impacts of neglecting spatial heterogeneity in the water quality assessment of large lakes: evaluation on remote sensing and 3D-model data (p. 50)
25. Stepanova Anastasija, Voyakina Katerina: Effects of hydro-meteorological parameters on plankton community of the Valaam Archipelago coastal zone (Lake Ladoga) (p. 51)
26. Suito Hiroshi, Doi Shota, Morifuji Shin-ya, Ropponen Janne, Huttula Timo: Heterogenic wind field and lake circulation – atmospheric and aquatic modelling results (p. 51)
27. Susloparova O.N., Leonov A.G., Zuyev Yu.A, Ogorodnikova V.A., Tereshenkova T.V.: Spatial distribution and long-term dynamics of the basic biota communities in the southern part of Ladoga lake (p. 52)
28. Tamm Marju, Freiberg René, Tõnno Ilmar, Kangro Kersti, Nõges Peeter, Nõges Tiina: Phytoplankton pigments – a powerful tool for quantitative analysis of phytoplankton in lakes (p. 52)
29. Zamani Behnam, Koch Manfred: The role of bottom outlet in minimizing future ecological problems in a proposed dam reservoir using three-dimensional modeling (Abolabbas Dam) (p. 53)
30. Zhang Min, Straile Dietmar, Chen Feizhou, Cai Yongjiu, Yu Jinlei, Wenxia Wang, Kong Fanxiang: The shift and driving factors of phytoplankton composition and richness along productivity gradients (p. 53)
31. Zuyev Yury, Zuyeva Nadejda, Lapenkov Artem: Rocky littoral zone macrozoobenthos of Krestovyi bay (Lake Ladoga) (p. 54)
