Titre	Isotropic collision-induced scattering by CF ₄ in a Raman vibrational band
Type de publication	Article de revue
Auteur	Godet, Jean-Luc [1], Elliasmine, A. [2], Le Duff, Yves [3], Bancewicz, Tadeusz [4]
Pays	Etats-Unis
Editeur	American Institute of Physics
Type	Article scientifique dans une revue à comité de lecture
Année	1999
Langue	Anglais
Date	Jan-01-1999
Numéro	23
Pagination	11303
Volume	110
Titre de la revue	The Journal of Chemical Physics
ISSN	00219606
Résumé en anglais	Light-scattering intensities and depolarization ratio data have been recorded at room temperature for gaseous tetrafluoromethane in the collision-induced band of the Raman vibrational line $\nu_1=908\text{cm}^{-1}$. For the first time, binary isotropic intensities of the ν_1 -Raman band are reported in absolute units for Stokes frequency shifts up to 110cm^{-1} . From comparison with theoretical semiclassical computations of the dipole-multipole spectrum contributions, evaluations of the first derivatives of the successive dipole-multipole polarizability tensors are provided. These results are coherent with those obtained from corresponding depolarized intensities. Moreover, the agreement with ab initio quantum-chemistry calculations of the CF ₄ multipolar polarizabilities is satisfactory.
