

## Parameter-dependent associative Yang-Baxter equation and Poisson brackets

Submitted by a.bergoend on Tue, 07/21/2015 - 11:33

Titre	Parameter-dependent associative Yang-Baxter equation and Poisson brackets
Type de publication	Article de revue
Auteur	Odesskii, Alexander [1], Roubtsov, Vladimir [2], Sokolov, Vladimir [3]
Editeur	World Scientific
Ville	Singapore, New Jersey
Type	Article scientifique dans une revue � comit� de lecture
Ann�e	2014
Langue	Anglais
Num�ro	9
Pagination	1460036
Volume	11
Titre de la revue	International Journal of Geometric Methods in Modern Physics
ISSN	0219-8878
Mots-cl�s	double Poisson structures [4], Poisson brackets [5], Yang-Baxter equations [6]
R�sum� en anglais	We discuss associative analogues of classical Yang-Baxter equation meromorphically dependent on parameters. We discover that such equations enter in a description of a general class of parameter-dependent Poisson structures and double Lie and Poisson structures in sense of M. Van den Bergh. We propose a classification of all solutions for one-dimensional associative Yang-Baxter equations.
