

Surgical resection of liver metastases from breast cancer

Submitted by Véronique Bourgeais on Tue, 06/23/2015 - 15:54

Titre	Surgical resection of liver metastases from breast cancer
Type de publication	Article de revue
Auteur	Lermite, Emilie [1], Marzano, Ettore [2], Chéreau, Elisabeth [3], Rouzier, Roman [4], Pessaux, Patrick [5]
Pays	Pays-Bas
Editeur	Elsevier
Ville	Amsterdam
Type	Article scientifique dans une revue à comité de lecture
Année	2010
Langue	Anglais
Date	Dec. 2010
Numéro	4
Pagination	e79-e84
Volume	19
Titre de la revue	Surgical Oncology
ISSN	1879-3320
Mots-clés	Breast Neoplasms [6], Female [7], Humans [8], Liver neoplasms [9], Prognosis [10], Survival Analysis [11], Treatment Outcome [12]
Résumé en anglais	The aim of this review is to define the relevance of surgical resection for liver metastasis of breast cancer. We report the rationale for hepatic surgery of liver metastasis, the survival prognosis factors for these patients, and the influence of liver resection on overall survival. The aim of this surgery is not only the local control, but also general control of the disease by preventing the selection of resistant tumor cell clones. Adjuvant therapies remain necessary for general control of the disease. While preoperative detection of small intra hepatic lesions remains difficult, MRI and preoperative ultrasound may help.
