

## IT Adoption in the Public Healthcare Sector: an Institutional Research Agenda

Submitted by Emmanuel Lemoine on Wed, 05/06/2015 - 16:14

Titre	IT Adoption in the Public Healthcare Sector: an Institutional Research Agenda
Type de publication	Article de revue
Auteur	Connolly, Regina [1], Gauzente, Claire [2], Dumoulin, R�gis [3]
Type	Article scientifique dans une revue � comit� de lecture
Ann�e	2012
Langue	Anglais
Date	2012
Num�ro	2
Pagination	101 - 116
Volume	7
Titre de la revue	International Journal on Computer Science and Information Systems
ISSN	1646-3692
Mots-cl�s	healthcare sector [4], institutional theory [5], IT Adoption [6]
R�sum� en anglais	<p>The study of IT adoption is a recurrent topic in IS research. In the healthcare sector and hospitals, the adoption of IT is predominantly justified by the desire to prevent medical errors and increase patients' safety (Menachemi et al., 2007). However, researchers such as Mc Kee and Healy (2002) have observed that hospital reorganisations have received far less attention from researchers in Europe than is the case in the United-States. Therefore, the objective of this paper is to develop a research agenda focused on IT adoption in European healthcare organisations and to bring the new insights that can be gained from a more sociological, institutional view of the adoption process.</p>
