

## Detection of Mean Shifts by Statistical Approaches. Part 2: Context of Non-Gaussian or Autocorrelated Observations

Submitted by Téodor Tiplica on Thu, 04/30/2015 - 09:49

Titre	Detection of Mean Shifts by Statistical Approaches. Part 2: Context of Non-Gaussian or Autocorrelated Observations
Type de publication	Article de revue
Auteur	Tiplica, Téodor [1]
Type	Article scientifique dans une revue à comité de lecture
Année	2015
Langue	Anglais
Numéro	81
Pagination	14-21
Titre de la revue	Asigurarea Calitatii - Quality Assurance
ISSN	1224-5410
Résumé en anglais	This article is the second part of a global overview of the research on the detection of mean shifts through statistical techniques. Various categories of control charts used in the field of Statistical Process Control (SPC) are reviewed in the particular context represented by autocorrelated observations or distributed under non-Gaussian distributions.
