Titre	Sudden death due to black esophagus: a case report
Type de publication	Article de revue
Auteur	Venara, Aurélien [1], Pavageau, Aude-Hélène [2], Rougé-Maillart, Clotilde [3], Jousset, Nathalie [4]
Editeur	Lippincott, Williams & Wilkins
Type	Article scientifique dans une revue à comité de lecture
Année	2013
Langue	Anglais
Date	2013 Mar
Numéro	1
Pagination	16-17
Volume	34
Titre de la revue	The American journal of forensic medicine and pathology
ISSN	1533-404X
Mots-clés	Aged, 80 and over [5], Death, Sudden [6], Esophagus [7], Forensic Pathology [8], Gastric Mucosa [9], Gastritis [10], Humans [11], Male [12], Mucous Membrane [13], Necrosis [14]
Résumé en anglais	Black esophagus, also known as acute esophageal necrosis syndrome, is a rare but often fatal pathology. It can be identified during autopsy examination and should be diagnosed by the forensic examiner via simple macroscopic examination. We report the case of an elderly man who was found dead, presenting with this pathology. A microscopic examination was carried out that confirmed the diagnosis. We consider that all forensic examiners should be made aware of this pathology to make the diagnosis quickly, in turn allowing the deceased to be returned promptly to their loved ones.
