

Early Maladaptive Schemas among children: a new way to screen for depressed child

Submitted by Emmanuel Lemoine on Wed, 04/22/2015 - 16:57

Titre	Early Maladaptive Schemas among children: a new way to screen for depressed child
Type de publication	Article de revue
Auteur	Rusinek, S. [1], Charbonnier, E. [2], Boudoukha, Abdel-Halim [3], Graziani, Pierluigi [4], Dafonseca, D. [5]
Type	Article scientifique dans une revue à comité de lecture
Année	2013
Langue	Anglais
Date	2013
Numéro	2
Pagination	157-168
Volume	19
Titre de la revue	Psicoterapia Cognitiva e Comportamental
Mots-clés	children [6], Dépression [7], early maladaptive schemas [8], schemas [9]
Résumé en anglais	<p>How can children's schemas evolve into adult schemas that are responsible for depression? To answer this question, we translated Schmidt, Joiner, Young, and Telch's (1995) Early Maladaptive Schema Questionnaire into French and adapted it to children. We administered the questionnaire to two groups of children in years seven to ten (N = 252), one group containing children suffering from depression and the other containing children with no psychiatric disorders. The results provided insight into the structure of depression schemas. From a clinical perspective, we stress the possibility of using this tool to individually or collectively detect «normal» and «abnormal» schemas in children</p> <p>Early maladaptive schemas among children: a new way to screen for depressed child?</p>
