Résumé en anglais	BACKGROUND: Hospital-acquired pneumonia is common after traumatic brain injury, and might be partly a result of traumatic brain injury-induced adrenal insufficiency. We tested the efficacy of low-dose hydrocortisone with fludrocortisone for the prevention of hospital-acquired pneumonia. METHODS: We did this double-blind, phase 3, placebo-controlled trial in 19 intensive care units in France. We enrolled patients aged 15-65 years in the first 24 h after severe traumatic brain injury (Glasgow coma scale score
