Volume	23
Titre de la revue	Discrete Event Dynamic Systems
ISSN	0924-6703
Mots-clés	(max,+)-linear Systems [4], controller synthesis [5], discrete event systems [6]
Résumé en anglais	In this paper, we develop a new control technique for discrete event dynamic systems subject to synchronization phenomena. We propose a feedback controller for (max,+)-linear systems which delays input events as little as possible while constraints on internal or output events are satisfied. The synthesis is mainly based on new results about fixed points of antitone (i.e., order reversing) mappings.
