

## Molecular dynamics simulation of phase transitions in crystalline lead (II) fluoride

Submitted by Stéphane Chaussedent on Fri, 11/28/2014 - 10:51

Titre	Molecular dynamics simulation of phase transitions in crystalline lead (II) fluoride
Type de publication	Article de revue
Auteur	Monteil, André [1], Chaussedent, Stéphane [2], Guichaoua, Dominique [3]
Editeur	Elsevier
Type	Article scientifique dans une revue à comité de lecture
Année	2014
Langue	Anglais
Date	Jan-07-2014
Numéro	1-2
Volume	146
Titre de la revue	Materials Chemistry and Physics
ISSN	02540584
Résumé en anglais	Using classical molecular dynamics applied to crystalline PbF <sub>2</sub> , we have simulated transitions between cubic and orthorhombic phases and reciprocally. These transitions were induced by pressure and temperature treatments. The orthorhombic phase was evidenced by analysis of different distribution functions and XRD spectra drawn from the ions positions in the simulated samples. (C) 2014 Elsevier B.V.
