

Therapeutic management of allergic diseases

Submitted by Emmanuel Lemoine on Thu, 10/16/2014 - 14:06

Titre	Therapeutic management of allergic diseases
Type de publication	Article de revue
Auteur	Watelet, Jean-Baptiste [1], Gillard, Michel [2], Benedetti, Margherita Strolin [3], Leli�vre, B�n�dicte [4], Diquet, Bertrand [5]
Editeur	Informa Healthcare
Type	Article scientifique dans une revue � comit� de lecture
Ann�e	2009
Langue	Anglais
Date	2009/07/15
Num�ro	3
Pagination	301 - 343
Volume	41
Titre de la revue	Drug Metabolism Reviews
ISSN	0360-2532
R�sum� en anglais	<p>Allergic diseases are characterized by the activation of inflammatory cells and by a massive release of mediators. The aim of this chapter was to describe succinctly the modes of action, indications, and side effects of the major antiallergic and antiasthmatic drugs. When considering the ideal pharmacokinetic characteristics of a drug, a poorly metabolized drug may confer a lower variability in plasma concentrations and metabolism-based drug interactions, although poorly metabolized drugs may be prone to transporter-based disposition and interactions. The ideal pharmacological properties of a drug include high binding affinity, high selectivity, and appropriate association and dissociation rates. Finally, from a patient perspective, the frequency and route of administration are important considerations for ease of use.</p>
