

Dealing Automatically with Exceptions by Introducing Specificity in ASP

Submitted by Emmanuel Lemoine on Mon, 10/06/2014 - 18:24

Titre	Dealing Automatically with Exceptions by Introducing Specificity in ASP
Type de publication	Communication
Type	Communication avec actes dans un congrès
Année	2009
Langue	Anglais
Date du colloque	2009
Titre du colloque	10th European Conference, ECSQARU 2009
Titre des actes ou de la revue	Symbolic and Quantitative Approaches to Reasoning with Uncertainty
Volume	5590
Pagination	614 - 625
Auteur	Garcia, Laurent [1], Ngoma, Stéphane [2], Nicolas, Pascal [3]
Pays	Italie
Editeur	Springer
Ville	Vérone
ISBN	978-3-642-02905-9, 978-3-642-02906-6
Mots-clés	Artificial Intelligence (incl. Robotics) [4], Coding and Information Theory [5], Logics and Meanings of Programs [6], Mathematical Logic and Formal Languages [7], Mathematics of Computing [8], Theory of Computation [9]
Résumé en anglais	Answer Set Programming (ASP), via normal logic programs, is known as a suitable framework for default reasoning since it offers both a valid formal model and operational systems. However, in front of a real world knowledge representation problem, it is not easy to represent information in this framework. That is why the present article proposed to deal with this issue by generating in an automatic way the suitable normal logic program from a compact representation of the information. This is done by using a method, based on specificity, that has been developed for default logic and which is adapted here to ASP both in theoretical and practical points of view.
Notes	Date du colloque : 07/2009
