

# Does milling one-piece titanium dental implants induce osteocyte and osteoclast changes?

Submitted by Emmanuel Lemoine on Tue, 06/10/2014 - 11:23

Titre	Does milling one-piece titanium dental implants induce osteocyte and osteoclast changes?
Type de publication	Article de revue
Auteur	Russe, P. [1], Pasaretti-Grizon, Florence [2], Aguado, Eric [3], Goyenvalle, Eric [4], Filmon, Robert [5], Baslé, Michel-Félix [6], Chappard, Daniel [7]
Editeur	Elsevier Masson
Type	Article scientifique dans une revue à comité de lecture
Année	2011
Langue	Anglais
Date	2011/06
Numéro	309
Pagination	51 - 59
Volume	95
Titre de la revue	Morphologie
ISSN	1286-0115
Mots-clés	Bone histomorphometry [8], Chaleur [9], heat [10], Histomorphométrie osseuse [11], Implant monobloc [12], One-piece implant [13], osteocyte [14] SummaryOne-piece dental implants avoid adverse effects sometimes associated with the traditional implant-abutment interface and may provide a suitable alternative to two-piece implants; however, one-piece implants often need in situ milling, which may exacerbate cell apoptosis from excessive heat at the bone-implant interface and induce secondary crestal bone loss. Twelve implants were placed in the metaphyses of two sheep under general anesthesia. Six implants were milled with a diamond bur while the other six implants remained intact. Animals were euthanized after four days, and bone blocks were harvested. Bone samples were studied without decalcification. Osteocytes were stained with Hoechst 33342 and osteoclasts by the TRAcP reaction. Both cell types, in the cortical and trabecular bone around the implant's cervical region, were counted utilizing morphometric methods. Values were compared to areas at a distance from the cervical region. No difference was observed between milled and unmilled implants, which suggested that the amount of generated heat did not provoke osteocyte loss or induce osteoclastogenesis. Intraoral abutment preparations did not increase cellular apoptosis at the bone-implant interface after four days in the ovine model.
