

Functional materials based on TTF amino-acids/peptides

Submitted by Emmanuel Lemoine on Tue, 02/04/2014 - 16:47

Titre	Functional materials based on TTF amino-acids/peptides
Type de publication	Communication
Type	Conf�rence invit�e
Ann�e	2008
Langue	Anglais
Date du colloque	2008
Titre du colloque	ICTON-MW 2008
Pagination	p. - 1
Auteur	El-Ghayoury, Abdelkrim [1], M�zi�re, C�cile [2], Zorina, Leokadiya [3], Simonov, Sergey [4], Batail, Patrick [5]
Pays	Maroc
Editeur	IEEE Computer Society
Ville	Marrakech
ISBN	978-1-4244-3484-8 / 978-1-4244-3485-5
Mots-cl�s	achiral glycine [6], Amino acids [7], band structure [8], Chemicals [9], chemistry [10], chiral alanine [11], crystal chemistry [12], Crystalline materials [13], crystallisation [14], electrocrystallisation [15], electrolyte [16], electrolytes [17], electronic properties [18], functional materials [19], Magnetic analysis [20], Magnetic cores [21], magnetic properties [22], molecular biophysics [23], oligopeptides [24], organic compounds [25], Peptides [26], peptidic intermolecular interactions [27], proteins [28], self-assembly [29], TTF amino-acids [30], TTF peptides [31], TTF-carboxylate anion [32], valine [33], X-ray structures [34], zwitterionic neutral radicals [35]
R�sum� en anglais	<p>We report the synthesis and crystal chemistry of a series of TTF derivatives bearing simple amino acids such as the achiral Glycine or the chiral Alanine or Valine. The amino acids are linked to the TTF cores via the amino group and the acid functionality is further deprotonated to yield a TTF-carboxylate anion. The latter acts as both a pi-donor and electrolyte in the electrocrystallisation experiments which deliver unprecedented zwitterionic (neutral) radicals. Their X-ray structures is analyzed and discussed in relation with their electronic and magnetic properties. This work is further extended to engage simple oligopeptides that can easily be linked to the TTF moiety. The preparation and the X-ray structures of both TTF-peptides and/or their zwitterionic radicals prepared by chemical or electrochemical methods will also be reported with an eye on how self-assembly via peptidic intermolecular interactions may be rationalized to direct the construction of novel pi-functional peptidic architectures.</p>
Notes	Date du colloque : 12/2008
