Titre	The newsvendor problem under multiplicative background risk
Type de publication	Article de revue
Auteur	Sévi, Benoît [1]
Type	Article scientifique dans une revue à comité de lecture
Année	2010
Langue	Anglais
Date	2010
Numéro	3
Pagination	918 - 923
Volume	200
Titre de la revue	European Journal of Operational Research
Mots-clés	derived [2], expected [3], multiplicative [4], newsvendor [5]
Résumé en anglais	<p>This note studies the single-period newsvendor problem when the newsvendor faces a multiplicative neutral independent background risk in an expected utility framework. It is shown that multiplicative risk vulnerability is a sufficient condition to guarantee a decrease in the optimal order. A weaker sufficient condition which has more interpretability is also provided and discussed. This result sheds light on situations where exchange, tax or inflation rates risks, which apply multiplicatively to the final wealth, are at work.</p>
