Relationship Between Knowledge of Toddler Posyandu Cadres About Toddler Posyandu Program With Posyandu Cadre Performance in Toddler Posyandu Program in Candikusuma Village in 2021

(xix + 69 Pages + 2 Pictures + 10 Tables + 7 Attachments)

ABSTRACT

Background: Posyandu is one of public health that is managed and organized by the community and for the community itself in health development. The success of a posyandu cannot be separated from the role and hard work of kader (people who run the posyandu's activities). To support the achievement of the quality of posyandu's activities, it is supported by increasing the knowledge of kader so that it is hoped that with increased the knowledge of kader, it also can improve kader's performance so that the quality and quality services are achieved. Problems that occur in the posyandu in Candikusuma village according to interviews with mothers of toddlers, there are cadres who are not on time, procedures are lacking, and interviews from health workers often result in many errors in posyandu services.

Objective : To examine the relationship between knowledge of posyandu cadres and performance of posyandu cadres in the Posyandu services for toddlers in Candikusuma village.

Methods: The research design used in this research is descriptive quantitative with a cross sectional research design. The population of this research were 49 and the number of samples were 49 respondents, the technique in this research was total sample technique. The research instrument used was a questionnaire, and the data analysis used univariate and bivariate analysis using the chi-square test..

Results: The results showed that the majority of Posyandu cadres in Candikusuma village had good knowledge about posyandu in the good category, namely 37 respondents (74.0%) and 13 respondents (26.0%). The majority of Posyandu cadres in Candikusuma Village have good performance in posyandu services, namely 37 respondents (74.0%) and 13 respondents (26.0%).
