

**A COMPARATIVE STUDY OF THE PRINTED
AND HYPERTEXT NOVEL *10:01*
BY LANCE OLSEN**

by

LADAN MODIR

**Thesis submitted in fulfilment of the requirements
for the degree of
Doctor of Philosophy**

January 2015

ACKNOWLEDGEMENTS

I would like to thank God for providing this thesis as a space to contemplate my scholarly being in the world. I am heartily thankful to my supervisor, Professor Dr. Sohaimi Bin Abdul Aziz, whose encouragement, patience, and guidance throughout the process of writing has eventually led to a completed work. I cannot imagine how lost I would have been without his insight and critical eye. Thanks for being an appropriately tough and demanding supervisor through the many drafts of this thesis.

Not one word of this thesis would have ever made it on paper without the emotional and financial support of my family. So, I owe my profound gratitude to my father Mohammad Reza, my mother Maryam and my dear sister Leila who were always there to listen to me unconditionally. It's my honor to dedicate this thesis to my parents.

I would like to thank many authors of electronic literature namely, Lance Olsen, Nick Montfort, and Kate Pullinger who have inspired me and answered my questions considerably. It is pleasure to thank all my friends especially my best-friends Laili & Mohammad for always being there.

Lastly, I offer my regards and blessings to all of those who immensely supported me in my pursuit of truth, self-improvement, knowledge, and achievement of my academic goals through the completion of this work at the University Science Malaysia.

SATU KAJIAN PERBANDINGAN NOVEL *10:01* BERCETAK DAN HIPERTEKS KARYA LANCE OLSEN

ABSTRAK

Dalam era pascamoden, kesan daripada pengaruh timbalbalik antara novel bercetak dan media digital, telah menghasilkan antara naratif dengan persekitaran interaktif sehingga dapat melahirkan genre-genre baru seperti cereka hiperteks. Pengarang seperti Lance Olsen telah mengadaptasikan novel bercerita pascamodennya yang bertajuk *10:01* kepada cereka hiperteks yang bersifat digital dengan tajuk yang sama. Adaptasi ini telah menimbulkan beberapa persoalan; bagaimana struktur naratif cereka hiperteks ini berbanding dengan yang novel bercetak yang dihasilkannya? Seterusnya, apakah pengalaman estetik yang dialami oleh pembaca yang membaca kedua-dua bentuk cereka itu? Bagi menjawab persoalan-persoalan ini, kajian telah mengenalpasti dua objektif. Pertama; menganalisis persamaan dan perbezaan struktur naratif antara novel pascamoden yang bercetak dengan cereka hiperteks yang berbentuk digital. Kedua meneliti pengalaman estetik pembaca yang membaca kedua-dua bentuk cereka berkenaan. Kajian ini, adalah satu kajian perbandingan yang berasaskan kepada teori genre yang mengkaji perkembangan genre novel bercetak kepada novel hiperteks yang menggunakan medium digital. Kemudian teori hiperteks yang merupakan ekstensi kepada pascastrukturalisme digunakan untuk membandingkan struktur naratif kedua-dua bentuk cereka ini. Seterusnya, pengalaman estetik pembaca pula akan dianalisis dengan menggunakan teori skema di mana perhatian diberikan kepada bagaimana unsur-unsur multimedia telah memberi kesan kepada pengalaman estetik pembaca. Kajian ini mendapati bahawa setelah transformasi dilakukan terhadap novel bercetak

10:01, beberapa ciri-ciri cereka pascamoden dikekalkan dalam cereka hiperteks *10:01* tetapi dalam gaya yang berbeza. Kedua-dua novel, iaitu bercetak dan digital ini memperlihatkan persamaan dari segi desentraliti, multivokaliti dan keterbukaan teks, namun berbeza dari segi intertekstualiti dan multilinearitinya. Kajian ini juga mendapati perbezaan struktur naratifnya telah membawa kesan kepada perbezaan pengalaman estetik. Didapati bahawa cereka hiperteks *10:01* yang bersifat interaktif dan ditambah dengan penggunaan multimedia telah menjadikan cereka hiperteks ini lebih kompleks. Kewujudan pelbagai pautan dan unsur-unsur multimedia dalam ruang digital ini telah memberi kuasa kepada pembaca untuk membuat pentafsiran dalam mod yang lebih terbuka dan keterlibatan. Hal ini telah meningkatkan pengalaman diorientasi, interaktiviti dan keterlibatan (engagement) pembaca dalam konteks pengalaman estetikanya.

**A COMPARATIVE STUDY OF THE PRINTED AND HYPERTEXT NOVEL...
10:01 BY LANCE OLSEN**

ABSTRACT

In the postmodern era, the mutual impression between printed literature and digital media has embedded narratives into interactive environments and new genres like hypertext fiction are created. Lance Olsen has adapted his postmodern printed novel entitled *10:01* into the hypertext version which is in the digital form. Considering that both novels are postmodern literary works by the same author this adaptation has produced certain questions; how can the narrative structure of the hypertext fiction be compared to the printed one? The second question that arises is how can aesthetic experiences be different in the reading processes of both versions? To answer these questions, this study identified two objectives: first, analyzing similarities as well as differences between the narrative structures of the postmodern printed novel *10:01* and its hypertext fiction. Then, the second objective is to analyze and compare the aesthetic experience of reading both texts. This comparative study applied the genre theory to study the development of the printed novel into the digital novel. Further, utilizing the hypertext theory as an extension of poststructuralism to compare the concepts of narrative structures and readers in both novels has expanded the discussion. Lastly, the supplementary theory of schema is brought into play for analyzing reader's mental process and his/her required characteristics while meaning making within multimedia elements and experiencing immersion and engagement.

By close readings and outlining some particularly narrative strands and multimedia elements this study concluded that postmodern characteristics are retained in both novels, but they are preserved in different styles. The findings illustrate that, both versions have rather similar decenterality, multivocality, and
