

CVAF: SERVICE DOG KENNEL CONSTRUCTION

PHASE 1

PHASE 2

PHASE 3

**PRESENTED BY:
LUKE TERRIO &
SPENCER ALLEN**

The California Veterans Assistance Foundation Service Dog Kennel Construction project helped give back to our local veterans by constructing new kennels for service dogs that accompany those in need. A team of two Cal Poly Construction Management students consisting of Spencer Allen and Luke Terrio worked to design, estimate, coordinate, and construct a new kennel structure for the site. The project was successful in overcoming challenges during each phase such as communicating an effective design, organizing material procurement, and working around conflicting schedules. The new kennel will provide a secure place for service dogs to live for years to come.
