

Multi-actor platform design guide for improved natural resource governance at landscape level

Project Title: P662 - 5.2.1 Governing Shared Landscapes

Description of the innovation: This guide enables field practitioners and local government staff to undertake context-appropriate design and implementation of multiactor platforms, in three stages: (1) assessment of the governance context and selection from a menu of institutional design options; (2) implementation and strengthening of the platform through sustained and inclusive dialogue and action planning; (3) monitoring progress, assessing challenges, learning and adapting.

New Innovation: No

Stage of innovation: Stage 3: available/ ready for uptake (AV)

Innovation type: Social Science

Geographic Scope: Multi-national

Number of individual improved lines/varieties: <Not Applicable>

Country(ies):

- India
- Zambia
- Cambodia
- Uganda

Description of Stage reached: Results from the approach have been published and piloted in Cambodia, India, Uganda and Zambia.

Name of lead organization/entity to take innovation to this stage: CoRe - Collaborating for Resilience

Names of top five contributing organizations/entities to this stage:

- FES - Foundation for Ecological Security
- FCNY - Fund for the City of New York
- CoRe - Collaborating for Resilience
- Skoll Foundation

Milestones:

- 6 landscape level governance institutions are operational in 3 countries

Sub-IDs:

- 25 - More productive and equitable management of natural resources
- 46 - Increased capacity for innovation in partner development organizations and in poor and vulnerable communities

Contributing Centers/PPA partners:

- FCNY - Fund for the City of New York
