Population Division, UN DESA
6-7 September 2022

School enrollment, secondary (% gross)

UNESCO Institute for Statistics (uis.unesco.org). Data as of June 2022.

Where are we?

- Over **250 million** children, adolescents and youth of primary and secondary school age are out of school in LMICs.
- **12 million** girls are married before the age of 18 each year and **150 million** girls likely to marry by 2030
- **21 million** girls aged 15–19 years in LMICs become pregnant
- **12 million** girls aged 15–19 years and at least **777,000** girls under 15 years give birth each year in LMICS

25 million child marriages have been prevented due to progress in the past decade

25
MILLION

← Of these, **7 million** were expected based on the prior trends

← And **18 million** were due to an acceleration of progress.

UNICEF

Proportion of young women aged 20-24 who were married before age 18

This figure shows the proportion of women aged 20–24 who married before age 18 in 44 countries.

One-third of girls were married before the age of 18 in 44 countries (EGER 2021)

Proportion of young women aged 20-24 who were married before age 18, by educational level

- Close links between girls' age at marriage and educational attainment
- Lower levels of educational attainment are associated with child marriage
- Girls who complete secondary school are less likely to marry by 18 compared to girls who complete primary or have no education

(EGER 2021)

Proportion of young women aged 20-24 who gave birth before age 18, by marital status

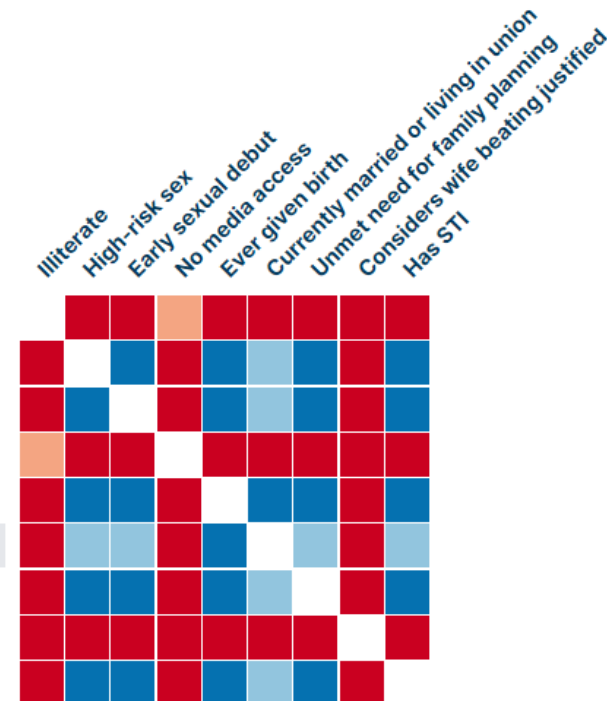

- In more than half of the countries, 20% or more had begun childbearing by age 18
- Most occur in the context of marriage

How are child marriage, education, and early pregnancy related in Ethiopia?

- Girls, 15-19 years old
- 2016 Demographic and Health Survey

Illiterate
 High-risk sex
 Early sexual debut
 No media access
 Ever given birth
Currently married or living in union
 Unmet need for family planning
 Considers wife beating justified
 Has STI

- Child marriage (currently married or living in union) and illiteracy = **Not linked**
- Child marriage (currently married or living in union) and early pregnancy (ever given birth) = **Highly linked**
- Illiteracy and early pregnancy (ever given birth) = **Not linked**

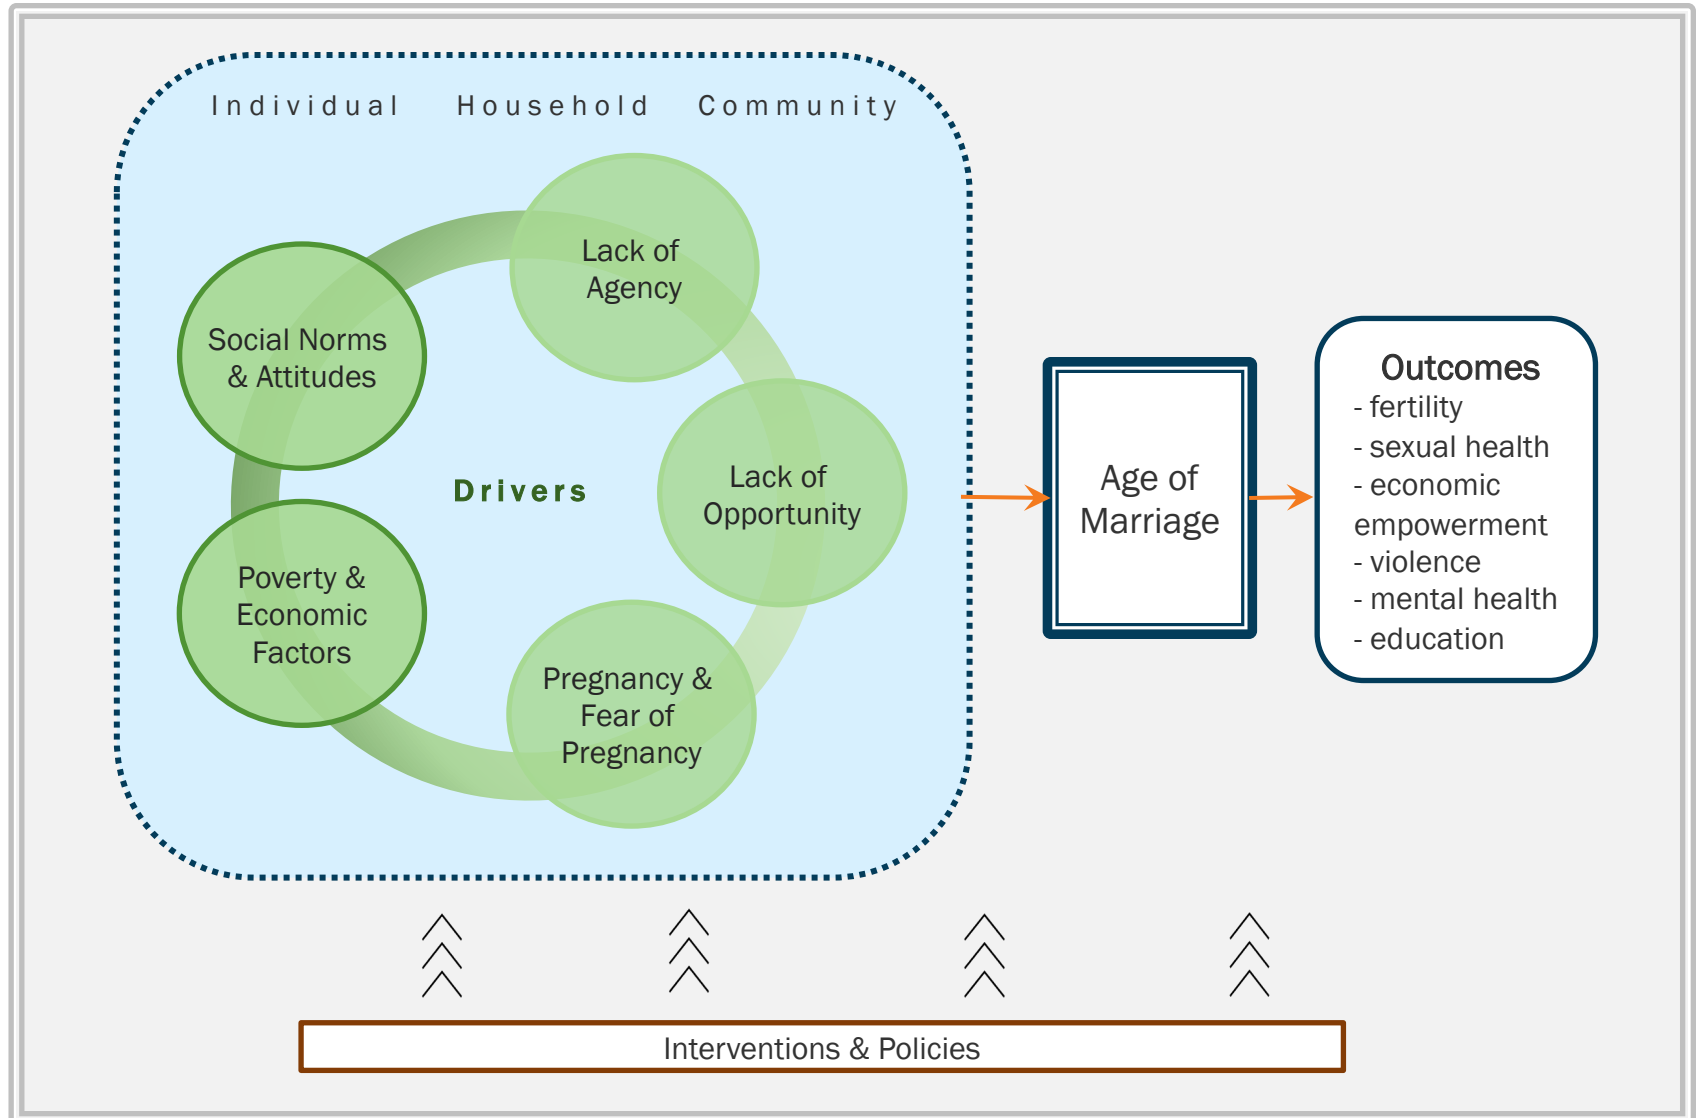

How are child marriage, education, and early pregnancy related in Burundi?

- Girls, 15-19 years old
- 2016 Multiple Indicator Cluster Survey

- Child marriage (currently married or living in union) and illiteracy = **Highly linked**
- Child marriage (currently married or living in union) and early pregnancy (ever given birth) = **Highly linked**
- Illiteracy and early pregnancy (ever given birth) = **Highly linked**

Framework to Guide Policies and Programs

- Empowerment is the most popular and most successful approach for reducing child marriage (and school enrollment)
- Interventions also improved schooling outcomes and lowered the risk of pregnancy/childbearing
- Very few studies reported the costs of implementing interventions

4 years after the program, there is still  in school enrollment,  in early marriage and pregnancy

*Among out of school girls at baseline

Programs or policies that work to improve school enrollment and educational attainment for girls

Addressing the cost of schooling
(e.g. through conditional cash transfers, scholarships, provision of school materials/uniforms)

Improving access to school
(e.g. through construction, community schools, transportation, access to remote learning)

Providing proper sanitation facilities in schools, especially sex-specific toilets

Providing food in school or as take-home rations

Programs that work when it comes to improving learning for both boys and girls

Improving pedagogy, for example, structured pedagogy, and competency grouping. Computer/instructional technology can be useful in aiding improved pedagogy when linked closely with the curriculum.

Remedial education or tutoring for girls who are falling behind in school

Improving school governance/ accountability

Ongoing teacher training or coaching

Merit-based scholarships

Teacher contracts

Providing food in school or as take-home rations

Key Points

- **Expand opportunities for adolescent girls and young women through investment in multi-sectoral/level empowerment interventions with longer duration.**
- **Look past global and national trends and analyze data through these interlinkages to identify gaps, whether they are for geographical hotspots or for marginalized populations.**
- **Understand the drivers (e.g., norms or poverty) of events for adolescents (e.g., school dropout and child marriage) and the pathways to effect change.**
- **Consider how the climate crisis, the pandemic, and global recession exacerbate the existing barriers to education and shifts livelihoods opportunities.**
