## ■ Bachelor of Arts/Bachelor of Education (Early Childhood) (IF81)

**Award title:** Bachelor of Arts/Bachelor of Education

**CRICOS code:** 020316C

**Location:** Gardens Point, Kelvin Grove and Carseldine

**Course duration (full-time):** 4 Years

**Total credit points:** 384 (192 in the BA; 192 in the B Ed)

**Standard credit points per semester (full-time):** 48

**Standard credit points per semester (part-time):** 24

**Course coordinator:** Dr I. Childs (Arts); Dr G. Tait (Education)

**Course Structure - Continuing Students**

BA Course Structure and Requirements

Students are required to complete at least one of the four interdisciplinary professional majors (1 core introductory unit plus 6 units in the major):

- International and Global Studies
- Society and Change
- Ethics and Human Rights
- Community Studies

It is recommended that students take HHB116 Applied Skills and Scholarship in their first year.

Students are required to maintain a minimum fifty percent enrolment in units from the BA program until they have completed eight of those units.

In their remaining units, students may:

- develop a Major or Minor (48 credit points) in another of the interdisciplinary professional areas;
- develop a Major or Minor (48 credit points) in a disciplinary major or in another QUT course;
- develop of Minor (48 credit points) in Foundation units for Early Childhood;
- take a series of elective units.

Students are required to complete 16 units in the BA component of the double degree. Of these, 12 must be BA units (ie HHB coded units).

**Course Structure - Commencing Students**

BA Course Requirements (Years 1 and 2)

Students are REQUIRED to complete:

- One Interdisciplinary Professional Major (1 core introductory unit + 6 units in the major)

It is SUGGESTED that they complete the Core Units Program consisting of the following:

- Four core units in first semester (from a selection of core introductory units and core skills units)

(Note: one of the core introductory units will sit within the chosen Interdisciplinary Professional Major)

- Two core units in second year (2 research methods units)

**Course Structure - Commencing Students (cont.)**

Students planning to complete a full language sequence (6 units) will need to discuss their program with the relevant Course Coordinator to ensure that their language studies begin in semester one and continue into their third year.

Students wishing to complete a Workplace Internship will need to discuss their program with the relevant Course Coordinator in order to ensure that the Internship can be located in their third year.

NB Students are required to complete 16 units in the BA component of the double degree. Of these 12 must be BA units ie HHB coded units.

**Key Terms in the BA - Commencing Students**

**Professional Major** - one of four interdisciplinary study sequences in the BA degree (International & Global Studies, Society and Change, Ethics and Human Rights, Community Studies), consisting of one core unit plus six further units from the appropriate list (making a total of 84 credit points). Students must complete at least one of these to fulfil the requirements of the degree.

**NB** - a unit may not be counted in more than one professional major, discipline sequence, or Minor.

**Discipline Sequence** - a set of six units (72 credit points) in a given discipline (Geography, History, Languages, Social Science). In Languages, this consists of six sequenced units in one Language. In other disciplines the six units must include one introductory unit to the discipline.

**Minor Study Sequence** - a study sequence of any four units (48 credit points) in a given subject area.

**Interdisciplinary Professional Majors**

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

**Discipline Sequences**

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

**Minor Study Sequences**

For details, refer to the Co-Majors listed in the Bachelor of Arts (HH01) entry in the Humanities and Human Services section as any of these are able to be taken as Minors.

## Core Program - Commencing Students

The core program for the degree consists of the following selection of units:

### First Year Core: Core Units for Professional Majors

	INTERNATIONAL AND GLOBAL STUDIES
HHB110	Introduction To International And Global Studies
HHB107	World Regions
	SOCIETY AND CHANGE
HHB105	Interpreting Change
HHB104	Understanding Society: Introduction to Sociology
	ETHICS AND HUMAN RIGHTS
HHB114	Introduction To Human Rights And Ethics
HHB115	Human Identity And Change
	COMMUNITY STUDIES
HHB106	Australian Society And Culture
HHB103	Contemporary Social And Community Issues

### First Year Core: Skills Units

HHB116	Applied Skills And Scholarship
HHB117	Introduction To Social Research Methods

### Second Year Core: Research Methods Units

HHB224	Qualitative Research Methods
HHB232	Survey Methods
HHB121	Interpreting The Past
HHB312	Geographical Research Design

## Education Component

### Year 3, Semester 1

EDB001	Teaching and Learning Studies 1: Teaching in New Times
EAB442	Motor And Social Development In Early Childhood
EAB347	Early Childhood Curriculum: Early Mathematical Explorations
EDB422	Early Childhood Professional Practice: Preschool/kindergarten

### Year 3, Semester 2

SPB001	Human Development And Education
EAB345	Early Childhood Curriculum: Language Education
EAB443	Cognition And Language In Early Childhood
EDB421	Early Childhood Professional Practice: Lower Primary

### Year 4, Semester 1

SPB002	Psychology Of Learning And Teaching
EAB348	Early Childhood Curriculum: Arts
EDB420	Early Childhood Professional Practice: Child Care
EAB413	Management Of Early Childhood Services

### Year 4, Semester 2

CLB306	Understanding Educational Practices
EAB444	Inclusive Practices In Early Childhood
EDB423	Early Childhood Professional Practice: Choice
EAB346	Early Childhood Curriculum: Science, Society And The Environment

## ■ Bachelor of Arts/Bachelor of Education (Early Childhood) (IX11)

**Award title:** Bachelor of Arts/Bachelor of Education

**Location:** Gardens Point, Kelvin Grove and Carseldine

**Course duration (full-time):** 4 years

**Total credit points:** 384 (192 in the BA; 192 in the B Ed)

**Standard credit points per semester (full-time):** 48

**Standard credit points per semester (part-time):** 24

**Course coordinator:** Dr I. Childs (Arts); Dr G. Tait (Education)

### Course Structure - Commencing Students

BA Course Requirements (Years 1 and 2)

Students are REQUIRED to complete:

- One Interdisciplinary Professional Major (1 core introductory unit + 6 units in the major)

It is SUGGESTED that they complete the Core Units Program consisting of the following:

- Four core units in first semester (from a selection of core introductory units and core skills units)

(Note: one of the core introductory units will sit within the chosen Interdisciplinary Professional Major)

NB One of core introductory units will sit within the chosen Interdisciplinary Major.

### Course Structure - Commencing Students (cont.)

Students must maintain a 50% enrolment in units from the BA program until they have completed 8 of those units (96 credit points).

Students may wish to

- develop a Minor (48 credit points) in one of the interdisciplinary professional areas
- develop a Minor (48 credit points) in Foundation units for Early Childhood
- develop a Minor (48 credit points) in a disciplinary study sequence or in another QUT course
- take a series of elective units

Students wishing to complete a full discipline studies sequence (6 units) will need to amend their core units program.

Students planning to complete a full language sequence (6 units) will need to discuss their program with the relevant

Course Coordinator to ensure that their language studies begin in semester 1.

NB Students are required to complete 16 units in the BA component of the double degree. Of these 12 must be BA units ie HHB coded units.

### Key Terms in the BA - Commencing Students

Professional Major - one of four interdisciplinary study sequences in the BA degree (International & Global Studies, Society and Change, Ethics and Human Rights, Community Studies), consisting of one core unit plus six further units from the appropriate list (making a total of 84 credit points). Students must complete at least one of these to fulfil the requirements of the degree.

NB - a unit may not be counted in more than one professional major, discipline sequence, or Minor.

Discipline Sequence - a set of six units (72 credit points) in a given discipline (Geography, History, Languages, Social Science). In Languages, this consists of six sequenced units in one Language. In other disciplines the six units must include one introductory unit to the discipline.

Minor Study Sequence - a study sequence of any four units (48 credit points) in a given subject area.

### Interdisciplinary Professional Majors

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

### Discipline Sequences

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

### Minor Study Sequences

For details, refer to the Co-Majors listed in the Bachelor of Arts (HH01) entry in the Humanities and Human Services section as any of these are able to be taken as Minors.

**■ Bachelor of Arts/Bachelor of Education (Primary) (IF82)**

**Award title:** Bachelor of Arts/Bachelor of Education

**CRICOS code:** 020316C

**Location:** Gardens Point, Kelvin Grove and Carseldine

**Course duration (full-time):** 4 Years

**Total credit points:** 384

**Course coordinator:** Dr Iraphne Childs (Arts); Dr Gordon Tait (Education)

**Career Outcomes**

The Arts component provides an excellent general education for future primary specialists. The Bachelor of Education (Primary) prepares students to teach at all levels of primary school. They may also complete a discipline/content studies major in one of the key learning areas of the Queensland school curriculum. Students may pursue language studies in this course. This degree provides a valuable foundation for careers in government, diplomacy, teaching, higher education, journalism, media relations or publishing. Opportunities in tourism, translation, and the hospitality industry are open to those with language studies.

**Course Structure - Continuing Students**

BA Course Requirements (Years 1 and 2) (Continuing Students)

Students should have completed the following components of the degree:

The first year requirements (8 units) which include:

- HHB116 Applied Skills and Scholarship
- Two Foundation Units (for students who did not complete two Faculty Foundation Units in Year 1
- Two to three Course Foundation Units
- Two to three Elective Units

NB a minimum of four of these eight units must be chosen from units offered from the BA component of your course.

In second year, a further 8 units to complete:

One Major Study Sequence chosen from the BA component of your course

AND

One Minor Study Sequence from those offered in the BA component of your course or from other Minor Study Sequences offered elsewhere within QUT.

Students must ensure that a minimum of 12 of the 16 units be chosen from units in the BA.

**Course Structure - Commencing Students**

BA Course Requirements (Years 1 and 2)(Commencing Students)

Students are REQUIRED to complete:

- One Interdisciplinary Professional Major (1 core introductory unit + 6 units in the major)  
It is SUGGESTED that they complete the Core Units Program consisting of the following:
- Four core units in first semester (from a selection of core introductory units and core skills units)  
(Note: one of the core introductory units will sit within the chosen Interdisciplinary Professional Major)
- Two core units in second year (2 research methods units)  
NB One of core introductory units will sit within the chosen Interdisciplinary Major.

Students must maintain a 50% enrolment in units from the BA program until they have completed 8 of those units (96 credit points).

Students may wish to

- develop a Minor (48 credit points) in one of the interdisciplinary professional areas
- develop a Minor (48 credit points) in a disciplinary study sequence or in another QUT course
- develop a Minor (48 credit points) in major Foundation units for Primary Teachings
- take a series of elective units

Students wishing to complete a full discipline studies sequence (6 units) will need to amend their core units program.

Students planning to complete a full language sequence (6 units) will need to discuss their program with the relevant Course

Coordinator to ensure that their language studies begin in semester one and continue into their third year.

NB Students are required to complete 16 units in the BA component of the double degree. Of these 12 must be BA units ie HHB coded units.

### Key Terms in the BA - Commencing Students

Professional Major - one of four interdisciplinary study sequences in the BA degree (International & Global Studies, Society and Change, Ethics and Human Rights, Community Studies), consisting of one core unit plus six further units from the appropriate list (making a total of 84 credit points). Students must complete at least one of these to fulfil the requirements of the degree.

NB - a unit may not be counted in more than one professional major, discipline sequence, or Minor.

Discipline Sequence - a set of six units (72 credit points) in a given discipline (Geography, History, Languages, Social Science). In Languages, this consists of six sequenced units in one Language. In other disciplines the six units must include one introductory unit to the discipline.

Minor Study Sequence - a study sequence of any four units (48 credit points) in a given subject area.

### Interdisciplinary Professional Majors - Commencing Students

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

### Discipline Sequences - Commencing Students

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

### Minor Sequences - Commencing Students

For details, refer to the Co-Majors section of the Bachelor of Arts (HH01) entry in the Humanities and Human Services section as any of these may be taken as Minors.

### Core Program - Commencing Students

The core program for the degree consists of the following selection of units:

#### First Year Core: Core Units for Professional Majors

INTERNATIONAL AND GLOBAL STUDIES  
HHB110 Introduction To International And Global Studies  
HHB107 World Regions

#### SOCIETY AND CHANGE

HHB105 Interpreting Change  
HHB104 Understanding Society: Introduction to Sociology  
ETHICS AND HUMAN RIGHTS  
HHB114 Introduction To Human Rights And Ethics  
HHB115 Human Identity And Change  
COMMUNITY STUDIES  
HHB106 Australian Society And Culture  
HHB103 Contemporary Social And Community Issues

#### First Year Core: Skills Units

HHB116 Applied Skills And Scholarship  
HHB117 Introduction To Social Research Methods

#### Second Year Core: Research Methods Units

HHB224 Qualitative Research Methods  
HHB232 Survey Methods  
HHB121 Interpreting The Past  
HHB312 Geographical Research Design

### Education Component

#### Year 3, Semester 1

EDB001 Teaching and Learning Studies 1: Teaching in New Times  
MDB450 Primary Mathematics Curriculum  
EDB430 Primary Professional Practice 1: Classroom Management  
CLB376 Studies Of Society And Environment Curriculum

#### Year 3, Semester 2

KKB914 Visual And Performing Arts Curriculum 1  
SPB001 Human Development And Education  
MDB383 Using Technology In The Curriculum  
EDB431 Primary Professional Practice 2: Curriculum Decision Making

#### Year 4, Semester 1

SPB002 Psychology Of Learning And Teaching  
EDB432 Primary Professional Practice 3: The Inclusive Curriculum  
HMB307 Health And Physical Education Curriculum (Primary)  
CLB413 Programming And Assessment In Language And Mathematics

#### Year 4, Semester 2

CLB306 Understanding Educational Practices  
MDB384 Science Education  
EDB433 Primary Professional Practice 4: Beginning Teaching  
CLB454 Language And Literacy Curriculum

#### NOTE

Students with an approved LOTE background in their undergraduate degree who wish to undertake CLB334 Primary LOTE Curriculum Studies in place of CLB413 should contact the Student Affairs office on 3864 3947. CLB334 is offered internally in semester 2.

## ■ Bachelor of Arts/Bachelor of Education (Primary) (IX12)

**Award title:** Bachelor of Arts/Bachelor of Education

**Location:** Kelvin Grove and Carseldine

**Course duration (full-time):** 4 years

**Total credit points:** 384

**Standard credit points per semester (full-time):** 48

**Course coordinator:** Education - Dr Gordon Tait; Humanities - Dr Irahne Childs

### Course Structure - Commencing Students

BA Course Requirements (Years 1 and 2)(Commencing Students)

Students are REQUIRED to complete:

- One Interdisciplinary Professional Major (1 core introductory unit + 6 units in the major)  
It is SUGGESTED that they complete the Core Units Program consisting of the following:
- Four core units in first semester (from a selection of core introductory units and core skills units)  
(Note: one of the core introductory units will sit within the chosen Interdisciplinary Professional Major)
- Two core units in second year (2 research methods units)  
NB One of core introductory units will sit within the chosen Interdisciplinary Major.

### Course Structure - Commencing Students (cont.)

Students must maintain a 50% enrolment in units from the BA program until they have completed 8 of those units (96 credit points).

Students may wish to

- develop a Minor (48 credit points) in one of the interdisciplinary professional areas
- develop a Minor (48 credit points) in a disciplinary study sequence or in another QUT course

### Core Program - Commencing Students

The core program for the degree consists of the following selection of units:

#### First Year Core: Core Units for Professional Majors

INTERNATIONAL AND GLOBAL STUDIES

HHB110 Introduction To International And Global Studies

HHB107 World Regions

SOCIETY AND CHANGE

HHB105 Interpreting Change

HHB104 Understanding Society: Introduction to Sociology

ETHICS AND HUMAN RIGHTS

HHB114 Introduction To Human Rights And Ethics

HHB115 Human Identity And Change

COMMUNITY STUDIES

HHB106 Australian Society And Culture

HHB103 Contemporary Social And Community Issues

#### First Year Core: Skills Units

HHB116 Applied Skills And Scholarship

HHB117 Introduction To Social Research Methods

#### Second Year Core: Research Methods Units

HHB224 Qualitative Research Methods

HHB232 Survey Methods

HHB121 Interpreting The Past

HHB312 Geographical Research Design

### Education Component

#### Year 3, Semester 1

EDB002 Teaching and Learning Studies II: Development and Learning

EDB021 Primary Field Studies I: Development and Learning in the Field

CLB006 Primary Curriculum and Pedagogies: Language and Literacies 1

MDB002 Primary Curriculum and Pedagogies: Mathematics 1

#### Year 3, Semester 2

EDB003 Teaching and Learning Studies III: Practising Education

EDB022 Primary Field Studies II: Practising Education in the Field

EDB008 Primary Curriculum and Pedagogies Interdisciplinary Primary Curriculum Studies

#### Year 4, Semester 1

EDB004 Teaching and Learning Studies IV: Inclusive Education

EDB023 Primary Field Studies III: Immersion in Inclusive Educational Practices

EDB009 Primary Curriculum and Pedagogies: Interdisciplinary Primary Curriculum Studies II

#### Year 4, Semester 2

EDB005 Teaching and Learning Studies V: The Professional Work of Teachers

EDB024 Primary Field Studies IV: Professional Work of Teachers: Induction into the Field

EDB025 Internship (Primary)

SPB035 Primary Curriculum & Pedagogies: Integrated Primary and Middle Years Curriculum Project

## ■ Bachelor of Arts/Bachelor of Education (Secondary) (IF70)

**Award title:** Bachelor of Arts/Bachelor of Education

**CRICOS code:** 020316C

**Location:** Gardens Point, Kelvin Grove and Carseldine

**Course duration (full-time):** 4 Years

**Total credit points:** 432

**Course coordinator:** Humanities Coordinator: Dr Iraphne Childs; Education Coordinator: Dr Gordon Tait

### Note

Restricted intake in 2003.

The Bachelor of Arts/Bachelor of Education (Secondary) IF70 course has been replaced by a newly coded Bachelor of Arts/Bachelor of Education (Secondary) IX01 course with effect from 2003. There will be no new intake into this course in 2003

with the exception of students commencing their studies with significant advanced standing from previous tertiary level study.

### Course Structure

Students will complete 240 credit points in units offered in the BA component of the double degree plus 192 credit points in units offered by the Faculty of Education.

The teaching areas which may be studied are English, Geography, History, LOTE, Social Science, Film and Media (limited places).

Students are REQUIRED to complete the following BA components of the degree in Years 1, 2, and 3 - Semester 1:

- First Year Requirements:
  - HHB116 Applied Skills and Scholarship
  - two Foundation Units
  - two to three Course Foundation Units
  - two to three Elective units
- Note: In first year students must complete a minimum of four of the eight units within the BA component of the double degree.
- One approved BA study sequence of at least 96 credit points as a first teaching area; plus
- Approved studies of at least 48 credit points as a second teaching area.

Students must ensure that a minimum of 12 of the 20 units in the BA component of the course must be chosen from those offered within the BA component of the double degree.

Students must complete the following four Education units: Psychology of Learning and Teaching; Language, Technology and Education; Education in Context; Human Development and Education, in the first five semesters of the course. Students are advised to complete the units in Semesters 2 to 5 (and not in Semester 1). In the final semester, students may undertake the Middle Years of Schooling Pathway developing the knowledge, skills and understanding required to participate fully in the middle schooling reform movement.

### Education Component

Students are required to complete the following four Education units in the first five semesters of the course. It is recommended that students complete the units in semesters 2 to 5 and not undertake one in semester 1.

- EDB001 Teaching and Learning Studies I: Teaching in New Times
- SPB001 Human Development and Education
- SPB002 Psychology of Learning and Teaching
- CLB341 Language Technology and Education

Following are the approved Bachelor of Arts study sequences:

- English
- Geography
- History
- LOTE (French, German, Indonesian, Japanese and Mandarin)
- Social Sciences

In addition the Bachelor of Arts component offers a second teaching area in Film and Media Studies at Gardens Point campus (a limited number of places available).

### ■ Bachelor of Arts/Bachelor of Education (Secondary) (IX01)

**Award title:** Bachelor of Arts/Bachelor of Education

**Location:** Gardens Point, Kelvin Grove and Carseldine

**Course duration (full-time):** 4 years

**Total credit points:** 432

**Course coordinator:** Humanities Coordinator: Dr Iraphne Childs; Education Coordinator: Dr Gordon Tait

#### Note

IX01 replaces IF70 for commencing students in 2003, and is subject to final approval.

Applicants to the IF70 course who have six units of credit of more should contact the faculty of education.

#### Course Structure

Students will complete 240 credit points in units offered in the BA component of the double degree plus 192 credit points in units offered by the Faculty of Education.

The teaching areas which may be studied are English, Geography, History, LOTE, Social Science, Film and Media (limited places).

Students are REQUIRED to complete the following BA components of the degree in Years 1, 2, and 3 - Semester 1:

- First Year Requirements:
  - HHB116 Applied Skills and Scholarship
  - two Foundation Units
  - two to three Course Foundation Units
  - two to three Elective units

Note: In first year students must complete a minimum of four of the eight units within the BA component of the double degree.

- One approved BA study sequence of at least 96 credit points as a first teaching area; plus
- Approved studies of at least 48 credit points as a second teaching area.

Students must ensure that a minimum of 12 of the 20 units in the BA component of the course must be chosen from those offered within the BA component of the double degree.

#### Career Outcomes

During the Arts component students specialise in two teaching areas relevant to the secondary school curriculum. The

Education component prepares graduates to teach both areas across years 8-12. This degree provides a valuable foundation for careers in government, diplomacy, teaching, higher education, journalism, media relations or publishing.

Opportunities in tourism, translation and the hospitality industry are open to those with language studies.

## ■ Bachelor of Arts/Bachelor of Laws (IF43)

**Award title:** Bachelor of Arts/Bachelor of Laws

**CRICOS code:** 027276E

**Location:** Gardens Point and Carseldine

**Course duration (full-time):** 5 Years

**Total credit points:** 528

**Standard credit points per semester (full-time):** 48

**Standard credit points per semester (part-time):** 24

**Course coordinator:** Dr John Synott

### Professional Recognition

The Bachelor of Laws degree covers the areas of law required for the purposes of admission to practise as a Solicitor and/or Barrister in all Australian states and territories.

### Course Structure BA component - Continuing Students

BA REQUIREMENTS (Years 1 and 2)

Students should have completed the following components of the degree:

- The first year requirements (8 units) which include:
- HHB116 Applied Skills and Scholarship
- Two Foundation Units (if you have not already completed 2 Faculty Foundation Units in Year 1
- Two to three Course Foundation Units
- Two to three Elective Units

NB A minimum of 4 of these 8 units must be chosen from the BA component of your course.

In second year, a further 8 units are to be completed:

- One Major Study Sequence chosen from those offered in the BA component, and
- One Minor Study Sequence chosen from those offered in the component of your course or from other minor Study Sequences offered elsewhere within QUT.

Students must ensure that a minimum of 12 of the 16 units must be chosen from units in the BA.

### Course Structure BA component - Commencing Students

BA Course Requirements (Years 1 and 2)(Commencing Students)

Students are required to complete:

- One Interdisciplinary Professional Major (1 core introductory unit + 6 units in the major)

It is suggested that students complete the Core Units Program consisting of the following:

- Four core units in first semester (from a selection of core introductory units and core skills units)  
(Note: one of the core introductory units will sit within the chosen Interdisciplinary Professional Major)
- Two core units in second year (2 research methods units)

### Course Structure - Commencing Students (cont.)

Students must maintain a 50% enrolment in units from the BA program until they have completed 8 of these units (96 credit points).

Students may wish to

- develop a Minor (48 credit points) in one of the Interdisciplinary Professional areas
- develop a Minor (48 credit points) in a disciplinary study sequence or in another QUT course
- take a series of elective units

Students wishing to complete a full discipline studies sequence (6 units) will need to amend their core units program.

Students planning to complete a full language sequence (6 units) will need to discuss their program with the relevant Course Coordinator to ensure that their language studies begin in semester one and continue into their third year.

NB Students are required to complete 16 units in the BA component of the double degree. Of these 12 must be BA units ie HHB coded units.

### Key Terms in the BA

Professional Major - one of four interdisciplinary study sequences in the BA degree (International & Global Studies, Society and Change, Ethics and Human Rights, Community Studies), consisting of one core unit plus six from the appropriate list (making a total of 84 credit points). Students must complete at least one of these to fulfil the requirements of the degree.

NB: a unit may not be counted in more than one professional major, discipline sequence, or Minor.

Discipline Sequence - a set of six units (72 credit points) in a given discipline (Geography, History, Languages and Social Science). In Languages, this consists of six sequenced units in one Language. In other disciplines it must include one introductory unit to the discipline.

Minor Study Sequence - a study sequence of any four units (48 credit points) in a given subject area.

### Interdisciplinary Professional Majors - Commencing Students

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

### Discipline Sequences

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

### Minor Sequences

For details, refer to the Co-majors section of the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

### CORE PROGRAM - BA Students

This core program for the degree consists of the following selection of units:

#### First Year Core: Core Units for Professional Majors

	INTERNATIONAL AND GLOBAL STUDIES
HHB110	Introduction To International And Global Studies
HHB107	World Regions
	SOCIETY AND CHANGE
HHB105	Interpreting Change
HHB104	Understanding Society: Introduction to Sociology
	ETHICS AND HUMAN RIGHTS
HHB114	Introduction To Human Rights And Ethics
HHB115	Human Identity And Change
	COMMUNITY STUDIES
HHB106	Australian Society And Culture
HHB103	Contemporary Social And Community Issues

#### First Year Core: Skills Units

HHB116	Applied Skills And Scholarship
HHB117	Introduction To Social Research Methods

#### Second Year Core: Research Methods

HHB224	Qualitative Research Methods
HHB232	Survey Methods
HHB121	Interpreting The Past
HHB312	Geographical Research Design

### Course structure - Example of Full-time Course Structure

#### Year 1, Semester 1

- Introductory Core unit (Major)
- 1st Year Core Skills unit (HHB116)
- Introductory Core unit (2nd Major or Minor)
- Elective Unit (General)

#### Year 1, Semester 2

- Elective Unit (Major)
- Elective Unit (Major)
- Elective Unit (Minor)
- Elective Unit (General)

#### Year 2, Semester 1

- Elective Unit (Major)
- Elective Unit (Major)
- Elective Unit (Minor)

Elective Unit (General)

#### Year 2, Semester 2

- Elective Unit (Major)
- Elective Unit (Major)
- Elective Unit (2nd Major or Minor)
- Elective Unit (General)

#### BA Core Program

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

#### Professional Major Study Sequences

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

#### Discipline Sequences

For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

#### Minor Study Sequences in other QUT Courses

For details of Minor Study Sequences available, refer to the Co-Majors section of the Bachelor of Arts (HH01) entry in the Humanities and Human Services section as any of these are able to be taken as Minors.

## ■ Bachelor of Business (Accountancy and Economics)/Bachelor of Education (Secondary) (IF72)

**Award title:** Bachelor of Business (Study Area A)/Bachelor of Education

**CRICOS code:** 020321F

**Location:** Gardens Point and Kelvin Grove

**Course duration (full-time):** 4 Years

**Total credit points:** 432

**Standard credit points per semester (full-time):** 54 (average)

**Course coordinator:** Mr Andrew Paltridge (Business); Dr Gordon Tait (Education)

**Discipline coordinator:** Dr John Sweeting (Accountancy); Mr Eugene McCann (Economics)

### Course Design

Students are required to complete 240 credit points in units from the Faculty of Business plus 192 credit points in units offered by the Faculty of Education. The following four units are to be undertaken over the first five semesters of the course:

- EDB001 Teaching and Learning Studies I: Teaching in New Times
- SPB001 Human Development and Education
- SPB002 Psychology of Learning and Teaching
- CLB341 Language, Technology and Education

Teaching areas for students completing this award are Accounting and Economics. In the final semester, students may undertake the Middle Years of Schooling Pathway developing the knowledge, skills and understanding required to participate fully in the middle schooling reform movement.

### Course structure - Accountancy and Economics component

#### Year 1 Semester 1

BSB110	Accounting
BSB113	Economics
BSB119	International And Electronic Business
BSB122	Business Information Analysis And Communication

#### Year 1, Semester 2

AYB121	Financial Accounting
BSB111	Business Law And Ethics
EFB101	Data Analysis For Business
EFB102	Economics 2
	One Education Studies Unit (See List)

#### Year 2, Semester 1

AYB220	Company Accounting
EFB202	Business Cycles And Economic Growth
EFB210	Finance 1
EFB211	Firms, Markets And Resources
	One Education Studies Unit (See List)

#### Year 2, Semester 2

AYB221	Computerised Accounting Systems
AYB225	Management Accounting

EFB314 International Trade And Economic Competitiveness  
 EFB323 Financial And Monetary Economics  
 One Education Studies Unit (See List)

**Year 3, Semester 1**

AYB301 Auditing  
 BSB114 Government, Business And Society  
 BSB115 Management, People And Organisations  
 BSB126 Marketing  
 One Education Studies Unit (See List)

**Education Component**

**Course Structure**

EDB001, SPB001, SPB002 and CLB341 must be completed in the first five semesters of the course.

EDB001 Teaching and Learning Studies 1: Teaching in New Times  
 SPB001 Human Development And Education  
 SPB002 Psychology Of Learning And Teaching  
 CLB341 Language, Technology And Education

**Year 3, Semester 2**

EDB450 Secondary Professional Practice 1: Classroom Management  
 EDB451 Secondary Professional Practice 2: Curriculum Decision Making

CLB359 Economics Curriculum Studies 1  
 CLB355 Accounting/business Management Curriculum Studies 1

**Year 4, Semester 1**

CLB306 Understanding Educational Practices  
 EDB452 Secondary Professional Practice 3: The Inclusive Curriculum  
 CLB356 Accounting/business Management Curriculum Studies 2  
 CLB360 Economics Curriculum Studies 2

**Year 4, Semester 2**

EDB453 Secondary Professional Practice 4: The Beginning Teacher  
 Education Studies Elective (See List 3)  
 Education Studies Elective (See List 3)  
 Curriculum Studies Elective (See List 4)

**Alternative Year 4, Semester 2: Middle Years Pathway**

EDB443 Professional Internship Of Associate Teaching  
 SPB008 The Middle Years Of Schooling  
 SPB022 The Middle Years Curriculum  
 EDB453 Secondary Professional Practice 4: The Beginning Teacher

**Education Studies Elective Units**

See List 3 in Bachelor of Applied Science/Bachelor of Education (Secondary) (IF71) for details.

**Curriculum Studies Electives**

See List 4 in Bachelor of Applied Science/Bachelor of Education (Secondary) (IF71) for details.

**■ Bachelor of Business**

**(Accountancy)/Bachelor of Laws (IF37)**

**Award title:** Bachelor of Business (Accountancy)/Bachelor of Laws

**CRICOS code:** 006386F

**Location:** Gardens Point

**Course duration (full-time):** 5 Years

**Total credit points:** 540

**Standard credit points per semester (full-time):** 60 (years sem 1-5); 48 (sem 7 & 8); 56 (sem 6,9,10)

**Course coordinator:** Mr Andrew Paltridge (Business); Director, Undergraduate Programs (Law), 3864 2707

**Discipline coordinator:** Dr John Sweeting (Accountancy)

**Professional Recognition**

For information on the academic requirements of the Solicitors' or Barristers' Board of Queensland please refer to the section on professional recognition in the Bachelor of Laws course entry in the Faculty of Law section of the QUT Handbook. The Bachelor of Business (Accountancy) component satisfies the academic requirements for membership of the Institute of Chartered Accountants in Australia and CPA Australia.

**Course structure**

**Year 1, Semester 1**

BSB110 Accounting

## ■ Bachelor of Creative Industries (Communication Design)/Bachelor of Information Technology (IF90)

**Award title:** Bachelor of Creative Industries (Communication Design)/Bachelor of Information Technology

**CRICOS code:** 040317C

**Location:** Gardens Point and Kelvin Grove

**Course duration (full-time):** 4 years

**Total credit points:** 384

**Standard credit points per semester (full-time):** 48

**Course coordinator:** Debra Polson (Comm Design); Dr Alan Tickle (Info Tech)

### Professional Recognition

Graduates of the Bachelor of Information Technology component meet the knowledge requirements for admission to the Australian Computer Society (ACS).

### Course structure

#### Year 1, Semester 1

KIB801	Foundations Of Communication Design 1
KIB807	Media Technology 1
ITB111	Software Development 1
ITB113	Introduction to Computer Architecture and System Software

#### Year 1, Semester 2

KIB802	Foundations Of Communication Design 2
KIB808	Media Technology 2

## ■ Bachelor of Creative Industries (Dance)/Bachelor of Education (Secondary) (IF75)

**Award title:** Bachelor of Creative Industries (Dance)/Bachelor of Education

**CRICOS code:** 040314F

**Location:** Kelvin Grove

**Course duration (full-time):** 4 Years

**Total credit points:** 432

**Standard credit points per semester (full-time):** 54 (average)

**Course coordinator:** Education Coordinator: Dr Gordon Tait;  
Creative Industries: Mr Evan Jones

**Note**

Restricted intake in 2003.

The Bachelor of Creative Industries (Dance)/Bachelor of Education (Secondary) IF75 course has been replaced by a newly coded Bachelor of Creative Industries (Dance)/Bachelor of Education (Secondary) IX05 course with effect from 2003. There will be no new intake into this course in 2003 with the exception of students commencing their studies with significant advanced standing from previous tertiary level study.

**Course Structure**

Students are required to complete 240 credit points in units offered by the Faculty of Arts plus 192 credit points in units offered by the Faculty of Education. The following four Education units are taken over the first five semesters: Language, Technology and Education; Teaching and Learning Studies I: Teaching in New Times; Human Development and Education; and Psychology of Teaching and Learning. Second Teaching areas which may be studied are Drama, Music, Visual Arts, English, Film and Media (limited places), Geography, History and LOTE. In the final semester, students may undertake the

Middle Years of Schooling Pathway developing the knowledge, skills and understanding required to participate fully in the middle schooling reform movement.

### Dance with STA other than Drama, VisArts, Music, LOTE

#### Year 2, Semester 1

- KDB117 Dance In Education  
 KDB182 Dance Technique Studies 3  
 KDB125 Deconstructing Dance In History  
 KDX144 Choreographic Studies 2  
 Second Teaching Area (List C)

#### Year 2, Semester 2

- KDB183 Dance Technique Studies 4  
 KDB106 The Analysis Of Modern Dance  
 Second Teaching Area (List C)  
 Choose two of the following units:

- KDB172 World Dance  
 KDX145 Choreographic Studies 3  
 KDB176 Popular Dance Styles  
 KDB221 Integrated Professional Skills

#### Year 3, Semester 1

- KDB117 Dance In Education  
 Second Teaching Area (List C)  
 Education Unit (See Faculty of Education Component - recommended SPB002)  
 Education Unit (See Faculty of Education component - recommended CLB341)  
 Choose one of the following units:

- KDB171 Theatre Dance Styles  
 KSB011 Music Theatre Skills  
 KDX104 Architecture Of The Body

 HHB109 Australian Historical Studies  
 Korean Culture and Societies

#### Geography (48 credit points)

Up to 24 credit points from introductory units:

HHB227 Environment And Society  
 HHB107 World Regions  
 HHB228 Environmental Hazards  
 HHB251 Australian Resource Management  
 No less than 24 credit points from Advanced units:  
 HHB250 Australian Geographical Studies  
 HHB229 Windows On Japan  
 HHB269 Ethics, Technology And The Environment

#### Languages Other than English (LOTE)

Indonesian

HHB073 Indonesian 3  
 HHB074 Indonesian 4  
 HHB075 Indonesian 5  
 HHB076 Indonesian 6

Japanese

HHB083 Japanese 3  
 HHB084 Japanese 4  
 HHB085 Japanese 5  
 HHB086 Japanese 6

French

HHB063 French 3  
 HHB064 French 4  
 HHB065 French 5  
 HHB066 French 6

German

HHB093 German 3  
 HHB094 German 4  
 HHB095 German 5  
 HHB096 German 6

#### Film & Media (48 Credit Points)

Units from FTV Production

KWB111 Media Writing

KPB141 Film And Television Language  
 KPB155 Media Production  
 KPB260 Community And Educational Video  
 KPB314 Media Business  
 KPB118 Fundamentals Of Photography  
 OR

KPB358 Documentary Theory And Practice  
 Plus two units from the following Screen Studies Units

KPB130 Media Text Analysis  
 KPB209 Australian Television  
 KPB233 Television Cultures  
 KPB343 Australian Film  
 KPB147 Film And Television Genres  
 KPB305 American Film: Genres and Directors  
 KPB307 Feminist Screen Studies  
 KPB359 Film History  
 KPB344 International Cinema  
 KPB311 Asian Film And Media

### Education Component

#### Course Structure

EDB001, SPB001, SPB002 and CLB341 must be completed in the first five semesters of the course.

EDB001 Teaching and Learning Studies 1: Teaching in New Times  
 SPB001 Human Development And Education  
 SPB002 Psychology Of Learning And Teaching  
 CLB341 Language, Technology And Education

#### Year 3, Semester 2

EDB450 Secondary Professional Practice 1: Classroom Management  
 EDB451 Secondary Professional Practice 2: Curriculum Decision Making

**■ Bachelor of Creative Industries (Drama)/Bachelor of Education (Secondary) (IF76)**

**Award title:** Bachelor of Creative Industries (Drama)/Bachelor of Education

**CRICOS code:** 040315E

**Location:** Kelvin Grove

**Course duration (full-time):** 4 Years

**Total credit points:** 432

**Standard credit points per semester (full-time):** 54 (average)

**Course coordinator:** Education: Dr Gordon Tait, Creative Industries: (Acting) Ms Christine Comans; Ms Judith McLean

**Note**

Restricted intake in 2003.

The Bachelor of Creative Industries (Drama)/Bachelor of Education (Secondary) IF76 course has been replaced by a newly coded Bachelor of Creative Industries (Drama)/Bachelor of Education (Secondary) IX06 course with effect from 2003. There will be no new intake into this course in 2003 with the exception of students commencing their studies with significant advanced standing from previous tertiary level study.

**General**

This four-year double degree qualifies students to teach Drama in schools in Australia and overseas. In the first two years students undertake units in Drama, blending practice with theoretical concepts strongly focused on developing artistic, organisational and communication skills. In addition to Drama, students study a second teaching area selected from Dance, Music, Visual Art, English, Film and Media Studies, Geography, History and Languages. In the second two years, students concentrate on teacher preparation, equipping students, through drama curriculum units, with the skills necessary to be effective drama educators.

**List A: Creative Industries Core Units**

See Bachelor of Creative Industries (Creative Writing)/Bachelor of Laws (IF93) for details.

**Creative Industries Faculty Elective List for 2003**

See Bachelor of Creative Industries (Creative Writing)/Bachelor of Laws (IF93) for details.

**List of Languages**

The same language must be studied for at least four levels and unit codes are sequential (eg. French HHB670, HHB671, HHB672, HHB673), except French 7 (HHB678) and French 8 (HHB677). With the permission of the Major Coordinator, and where available, languages must be taken, including languages studied at another university. International students must take a language that is not their native tongue. The language units are as follows:

**French**

1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:

HHB061	French 1
HHB062	French 2
HHB063	French 3
HHB064	French 4
HHB065	French 5
HHB066	French 6

2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:

HHB063	French 3
HHB064	French 4
HHB065	French 5
HHB066	French 6
HHB067	French 7
HHB068	French 8

**Indonesian**

1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:

HHB071	Indonesian 1
HHB072	Indonesian 2
HHB073	Indonesian 3
HHB074	Indonesian 4
HHB075	Indonesian 5
HHB076	Indonesian 6

2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:

HHB073	Indonesian 3
HHB074	Indonesian 4
HHB075	Indonesian 5
HHB076	Indonesian 6
HHB077	Indonesian 7
HHB078	Indonesian 8

**Japanese**

1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:

HHB081	Japanese 1
HHB082	Japanese 2
HHB083	Japanese 3
HHB084	Japanese 4
HHB085	Japanese 5
HHB086	Japanese 6

2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:

HHB083	Japanese 3
HHB084	Japanese 4
HHB085	Japanese 5
HHB086	Japanese 6
HHB087	Japanese 7
HHB088	Japanese 8

**German**

1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:

HHB091	German 1
HHB092	German 2
HHB093	German 3
HHB094	German 4
HHB095	German 5
HHB096	German 6

2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:

HHB093	German 3
HHB094	German 4
HHB095	German 5
HHB096	German 6
HHB097	German 7
HHB098	German 8

## ■ Bachelor of Creative Industries (Media and Communication)/Bachelor of Laws (IF10)

### Creative Industries Faculty Elective List for 2003

See Bachelor of Creative Industries (Creative Writing)/Bachelor of Laws (IF93) for details.

## ■ Bachelor of Creative Industries (Visual Arts)/Bachelor of Education (Secondary) (IF78)

**Award title:** Bachelor of Creative Industries (Visual Arts)/Bachelor of Education

**CRICOS code:** 040316D

**Location:** Kelvin Grove

**Course duration (full-time):** 4 Years

**Total credit points:** 432

**Standard credit points per semester (full-time):** 54 (average)

**Course coordinator:** Dr Gordon Tait (Education); Assoc Prof Dave Hawke (Creative Industries)

### Note

Restricted intake in 2003.

The Bachelor of Creative Industries (Visual Arts)/Bachelor of Education (Secondary) IF78 course has been replaced by a newly coded Bachelor of Creative Industries (Visual Arts)/Bachelor of Education (Secondary) IX08 course with effect from 2003. There will be no new intake into this course in 2003 with the exception of students commencing their studies with significant advanced standing from previous tertiary level study.

### General

This four-year double degree qualifies graduates to teach as art teachers in secondary school Art in Australian schools. In the first two years students undertake practical and theoretical introductory studies about artistic ideas, concepts and aesthetic judgements as well as working in two- and/or three-dimensional media. Studio areas include Painting, Printmaking, and Sculpture with supporting areas of Drawing and Photography. Students study a second teaching area selected from Dance, Drama, Music, English, Film and Media Studies, Geography, History and Languages. In the final two years, students concentrate on teacher preparation, equipping them, through art curriculum units, with the skills to be effective art educators.

### Students with STA areas other than Dance, Drama, Music or LOTE

#### Year 1, Semester 1

KVB740	Studio Art Practice 1
KVB702	Australian And Indigenous Art Visual Arts Elective - List B Creative Industries Core Unit - List A

#### Year 1, Semester 2

KVB741	Studio Art Practice 2 Education Unit (See Faculty of Education Component) Second Teaching Area - List C Visual Arts Elective - List B
--------	--

#### Year 2, Semester 1

KVB742	Studio Art Practice 3
--------	-----------------------

KVB444 Contemporary Asian Visual Culture  
Second Teaching Area - List C  
Education Unit (See Faculty of Education Component)

**Year 2, Semester 2**

KVB701 Modernism  
Creative Industries Faculty Core Unit - List A  
Visual Arts Elective - List B  
Visual Arts Elective - List B  
Second Teaching Area - List C

**Year 3, Semester 1**

Education Unit (See Faculty of Education Component)  
Education Unit (See Faculty of Education Component)  
Visual Arts Elective - List B  
Second Teaching Area - List C

**With STA area in Dance**

**Year 1, Semester 1**

KVB740 Studio Art Practice 1  
KVB702 Australian And Indigenous Art  
KDX104 Architecture Of The Body  
Creative Industries Core Unit - List A

**Year 1, Semester 2**

KVB741 Studio Art Practice 2  
KDB114 Australian Dance  
Education Unit (See Faculty of Education Component)  
Visual Arts Elective - List B

**Year 2, Semester 1**

KVB742 Studio Art Practice 3  
Creative Industries Core Unit - List A  
Education Unit (See Faculty of Education component)  
Dance Technique Studies 1

**Year 2, Semester 2**

KVB701 Modernism  
Visual Arts Elective - List B  
Visual Arts Elective - List B  
KDX143 Choreographic Studies 1  
KDB106 The Analysis Of Modern Dance

**Year 3, Semester 1**

Education Unit (See Faculty of Education Component)  
Education Unit (See Faculty of Education Component)  
Visual Arts Elective - List B  
KDB117 Dance In Education

**With STA in Music**

**Year 1, Semester 1**

KVB740 Studio Art Practice 1  
Creative Industries Core Unit - List A  
KVB702 Australian And Indigenous Art  
KMB638 Sound And Image

**Year 1, Semester 2**

KVB741 Studio Art Practice 2  
KMB619 Music And Sound Technology  
Education Unit (See Faculty of Education component)  
Visual Arts Elective - List B

**Year 2, Semester 1**

KVB742 Studio Art Practice 3  
KMB632 Core Musicianship 1  
Creative Industries Core Unit - See List A  
Education Unit (See Faculty of Education component - recommended CLB341)

**Year 2, Semester 2**

KVB701 Modernism  
Visual Arts Elective - List B  
Visual Arts Elective - List B  
KMB633 Core Musicianship 2  
KMB621 Sound Recording And Acoustics

**Year 3, Semester 1**

Education Unit (See Faculty of Education component)  
Education Unit (See Faculty of Education component)  
Education Unit (See Faculty of Education component)

KMB623 Conducting

OR

Music Elective - Choose one of the following units:

KMB634 Contemporary Art Music Musicianship  
KMB636 Cross Cultural Musicianship  
KMB638 Sound And Image  
KMB631 World Music  
KMB616 Ensemble Project A  
KMB618 Soundtracks For Film And Television

**With STA in Drama**

**Year 1, Semester 1**

KVB740 Studio Art Practice 1  
Creative Industries Core Unit - List A  
KVB702 Australian And Indigenous Art  
KTB257 Studies In Acting 1

**Year 1, Semester 2**

KVB741 Studio Art Practice 2  
Education Unit (See Faculty of Education Component)  
KTB251 20th Century Stages  
KTB304 Forming Knowledge

**Year 2, Semester 1**

KVB742 Studio Art Practice 3  
Creative Industries Core Unit - List A  
Education Unit (See Faculty of Education component)  
KTB214 Process Drama

**Year 2, Semester 2**

KVB701 Modernism  
Visual Arts Elective - List B  
Visual Arts Elective - List B  
Visual Arts Elective - List B

KTB280 Drama As Social Action

**Year 3, Semester 1**

Education Unit (See Faculty of Education Component)  
Education Unit (See Faculty of Education Component)  
KSB278 Technical Theatre  
Visual Arts Elective - See List B

**With STA in LOTE**

**Year 1, Semester 1**

KVB740 Studio Art Practice 1  
Creative Industries Core Unit - List A  
KVB702 Australian And Indigenous Art  
STA Language Studies

**Year 1, Semester 2**

KVB741 Studio Art Practice 2  
Education Unit (See Faculty of Education Component)  
STA Language Studies  
Visual Arts Elective - List B

**Year 2, Semester 1**

KVB742 Studio Art Practice 3  
Creative Industries Core Unit - List A  
Education Unit (See Faculty of Education component)  
STA Language Studies

**Year 2, Semester 2**

KVB701 Modernism  
Visual Arts Elective - List B  
Visual Arts Elective - List B  
STA Language studies  
STA Language studies

**Year 3, Semester 1**

Education Unit (See Faculty of Education Component)  
Education Unit (See Faculty of Education Component)  
Visual Arts Elective - List B  
Visual Arts Elective - List B

**List A Creative Industries Core Units**

See Bachelor of Creative Industries (Creative Writing)/Bachelor of Laws (IF93) for details.

**Visual Arts Electives**

KVB447 Drawing  
KVB457 Sculpture  
KVB503 Clay Materials  
KVB507 Painting  
KVB509 Photographic Media

**List C. Second Teaching Area Units**

See Bachelor of Creative Industries (Dance)/Bachelor of Education (Secondary) (IF75) for details.

**Education Component**

**Course Structure**

EDB001, SPB001, SPB002 and CLB341 must be completed in the first five semesters of the course.

EDB001 Teaching and Learning Studies 1: Teaching in New Times  
SPB001 Human Development And Education  
SPB002 Psychology Of Learning And Teaching  
CLB341 Language, Technology And Education

**Year 3, Semester 2**

- EDB450 Secondary Professional Practice 1: Classroom Management  
 EDB451 Secondary Professional Practice 2: Curriculum Decision Making  
 KVB412 Art Curriculum Studies 1  
 Curriculum Studies 1 (Second Teaching Area)

**Year 4, Semester 1**

- CLB306 Understanding Educational Practices  
 EDB452 Secondary Professional Practice 3: The Inclusive Curriculum  
 KVB413 Art Curriculum Studies 2  
 Curriculum Studies 2 (Second Teaching Area)

**Year 4, Semester 2**

- EDB453 Secondary Professional Practice 4: The Beginning Teacher  
 Education Studies Elective (See List 3)  
 Education Studies Elective (See List 3)  
 Curriculum Studies Elective (See List 4)

**Alternative Year 4, Semester 2: Middle Years Pathway**

- EDB443 Professional Internship Of Associate Teaching  
 SPB008 The Middle Years Of Schooling  
 SPB022 The Middle Years Curriculum  
 EDB453 Secondary Professional Practice 4: The Beginning Teacher

**Curriculum Studies - Second Teaching Area**
**Curriculum Studies 1**

- KDB421 Dance Curriculum Studies 1  
 KTB414 Drama Curriculum Studies 1  
 KMP423 Music Curriculum Studies 1  
 CLB325 English Curriculum Studies 1  
 CLB327 Film And Media Curriculum Studies 1  
 CLB361 Geography Curriculum Studies 1  
 CLB363 History Curriculum Studies 1  
 CLB329 LOTE Curriculum Studies 1

**Curriculum Studies 2**

- KDB429 Dance Curriculum Studies 2  
 KTB415 Drama Curriculum Studies 2  
 KMP431 Music Curriculum Studies 2  
 CLB326 English Curriculum Studies 2  
 CLB328 Film And Media Curriculum Studies 2  
 CLB362 Geography Curriculum Studies 2  
 CLB364 History Curriculum Studies 2  
 CLB330 LOTE Curriculum Studies 2

**Education Studies Elective Units**

See Bachelor of Applied Science/Bachelor of Education (Secondary) (IF71) for details.

**Curriculum Studies Electives**

See Bachelor of Applied Science/Bachelor of Education (Secondary) (IF71) for details.

## ■ Bachelor of Creative Industries (Visual Arts)/Bachelor of Education (Secondary) (IX08)

**Award title:** Bachelor of Creative Industries (Visual Arts)/Bachelor of Education

**Location:** Kelvin Grove and Carseldine

**Course duration (full-time):** 4 years

**Total credit points:** 532

**Standard credit points per semester (full-time):** 54 (Average)

**Course coordinator:** Dr Gordon Tait (Education); Assoc Prof Dave Hawke (Creative Industries)

**General**

This four-year double degree qualifies graduates to teach as art teachers in secondary school Art in Australian schools. In the first two years students undertake practical and theoretical introductory studies about artistic ideas, concepts and aesthetic judgements as well as working in two- and/or three-dimensional media. Studio areas include Painting, Printmaking, and Sculpture with supporting areas of Drawing and Photography. Students study a second teaching area selected from Dance, Drama, Music, English, Film and Media Studies, Geography, History and Languages. In the final two years, students concentrate on teacher preparation, equipping them, through art curriculum units, with the skills to be effective art educators.

**Students with STA areas other than Dance, Drama, Music or LOTE**
**Year 1, Semester 1**

- KVB740 Studio Art Practice 1  
 KVB702 Australian And Indigenous Art  
 Visual Arts Elective - List B

CLB031 History Curriculum Studies 2  
CLB037 LOTE Curriculum Studies 2  
KMB202 Music (Secondary) Curriculum Studies 2  
KMB102 Music (Primary/Instrumental) Curriculum Studies 2

**Curriculum Studies 3**

KTB203 Drama Curriculum Studies 3  
CLB020 English Curriculum Studies 3  
CLB026 Film and Media Curriculum Studies 3  
CLB029 Geography Curriculum Studies 3  
CLB032 History Curriculum Studies 3  
CLB038 LOTE Curriculum Studies 3  
KMB203 Music (Secondary) Curriculum Studies 3  
KMB103 Music (Primary/Instrumental) Curriculum Studies 3

**List C. Second Teaching Area Units**

See Bachelor of Creative Industries (Dance)/Bachelor of Education (Secondary) (IF75) for details.

**■ Bachelor of Engineering (Electrical and Computer Engineering)/ Bachelor of Applied Science (Mathematics) (IF21)**

**Award title:** Bachelor of Engineering (Electrical and Computer Engineering)/ Bachelor of Applied Science (Mathematics)

**CRICOS code:** 020329J

**Location:** Gardens Point

**Course duration (full-time):** 5 Years

**Total credit points:** 480

**Standard credit points per semester (full-time):** 48

**Course coordinator:** Dr Mohammed Bennmoun (Electrical);  
Assoc Prof Helen MacGillivray (Mathematics)

**Career Outcomes**

Electrical and computer engineers design, install and maintain electrical, electronic, telecommunications and computing systems on behalf of governments and private companies. A stronger training in mathematics and statistics enhances their capabilities in modelling, analysis and design.

**Professional Recognition**

This degree meets the requirements for membership of The Institution of Engineers, Australia, and the coursework requirements for accredited graduate membership of the Australian Mathematical Society (GAustMS). Students may also become a member of the Statistical Society of Australia.

**Minors**

Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

**Special Course Requirements**

A candidate for the degree of Bachelor of Engineering (Electrical and Computer Engineering)/Bachelor of Applied Science (Mathematics) must obtain at least 60 days of industrial experience in an engineering environment approved by the course coordinator.

**Course structure - For students with four semesters of Senior Mathematics B and Senior Mathematics C**

For students with four semesters of both Senior Mathematics B and Senior Mathematics C (or equivalent) with an exit assessment of at least Sound Achievement in both subjects.

**Year 1, Semester 1**

EEB112 Electrical And Computer Engineering 1  
MAB111 Mathematical Sciences 1B  
MAB112 Mathematical Sciences 1C  
PCB136 Engineering Physics 1C

**Year 1, Semester 2**

BNB007 Professional Studies 1  
EEB212 Electrical And Computer Engineering 2  
MAB210 Statistical Modelling 1  
MAB220 Computational Mathematics 1

**Year 2, Semester 1**

EEB312 Analog And Digital Electronics  
EEB340 Introduction To Telecommunications  
MAB101 Statistical Data Analysis 1  
MAB312 Linear Algebra

**Year 2, Semester 2**

EEB412 Advanced Electronics And Embedded Systems  
EEB440 Classical Signal Processing  
MAB413 Differential Equations  
MAB420 Computational Mathematics 2

**Year 3, Semester 1**

EEB311 Electrical Measurement And Machines  
EEB560 Digital Communications  
MAB311 Advanced Calculus  
MAB314 Statistical Modelling 2

**Year 3, Semester 2**

EEB411 Classical Control And Power Systems  
EEB640 Digital Signal Processing  
MAB414 Applied Statistics 2  
MAB422 Mathematical Modelling

**Year 4, Semester 1**

EEB511 Modern Control And Power Electronics  
EEB584 Introduction To Design  
Computing elective  
or  
MAB380 Introduction to Supercomputing  
Mathematics elective (Level 3)

**Year 4, Semester 2**

EEB684 Advanced Design  
Electrical Engineering elective  
Electrical Engineering elective  
Mathematics elective (Level 3)

**Year 5, Semester 1**

EEB889/1 Project  
Electrical Engineering elective  
Electrical Engineering elective  
Mathematics elective (Level 3)

**Year 5, Semester 2**

EEB889/2 Project  
Electrical Engineering elective  
Electrical Engineering elective  
Mathematics elective (Level 3)

For students with four semesters of Senior Mathematics B (or equivalent) only, with an exit assessment of at least Sound Achievement

**Year 1, Semester 1**

EEB112 Electrical And Computer Engineering 1  
MAB100 Mathematical Sciences 1A  
MAB101 Statistical Data Analysis 1  
PCB136 Engineering Physics 1C

**Year 1, Semester 2**

EEB212 Electrical And Computer Engineering 2  
MAB111 Mathematical Sciences 1B  
MAB112 Mathematical Sciences 1C

**Year 2, Semester 1**

EEB312 Analog And Digital Electronics  
EEB340 Introduction To Telecommunications  
MAB220 Computational Mathematics 1  
MAB312 Linear Algebra

**Year 2, Semester 2**

EEB412 Advanced Electronics And Embedded Systems  
EEB440 Classical Signal Processing  
MAB210 Statistical Modelling 1  
MAB413 Differential Equations

**Year 3, Semester 1**

EEB311 Electrical Measurement And Machines  
EEB560 Digital Communications  
MAB311 Advanced Calculus  
MAB314 Statistical Modelling 2

**Year 3, Semester 2**

EEB411 Classical Control And Power Systems  
EEB640 Digital Signal Processing  
MAB414 Applied Statistics 2  
MAB420 Computational Mathematics 2

**Year 4, Semester 1**

EEB511 Modern Control And Power Electronics  
EEB584 Introduction To Design  
Computing elective  
Or  
MAB380 Introduction to Supercomputing  
Mathematics elective (Level 3)

**Year 4, Semester 2**

EEB684 Advanced Design  
Electrical Engineering elective  
Electrical Engineering elective  
Mathematics elective (Level 3)

**Year 5, Semester 1**

EEB889/1 Project  
Electrical Engineering elective  
Electrical Engineering elective  
Mathematics elective (Level 3)

**Year 5, Semester 2**

EEB889/2 Project  
Electrical Engineering elective  
Electrical Engineering elective  
Mathematics elective (Level 3)

**Electrical Engineering Electives**

EEB904 Advanced Topics In Electrical Engineering A  
EEB905 Advanced Topics In Electrical Engineering B  
EEB911 Electrical Energy Systems  
EEB941 Modern Signal Processing  
EEB960 Wireless Communications  
EEB961 RF And Applied Electromagnetics  
EEB976 Advanced Industrial Electronics  
EEB992 VLSI Circuits And Systems

Not all electives may be offered. At the discretion of the course coordinator, students may be allowed to select an elective from any advanced topics offered by the University. Also potential honours students may, with the approval of the course coordinator, select an elective from the postgraduate degree courses offered by the School of Electrical and Electronic Systems Engineering.

**Mathematics Electives (Level 3)**

MAB521 Applied Mathematics 3  
MAB522 Computational Mathematics 3  
MAB523 Introduction to Quality Management  
MAB524 Statistical Inference  
MAB526 Statistical Science 3  
MAB613 Partial Differential Equations  
MAB621 Discrete Mathematics  
MAB624 Applied Statistics 3  
MAB672 Advanced Mathematical Modelling

Note: Some deviations from the above course structure may be possible with the permission of the course coordinator. This is more likely to apply in the later years than the earlier years of the course.

## ■ Bachelor of Engineering (Electrical and Computer Engineering)/Bachelor of Business (IF28)

**Award title:** Electrical and Computer Engineering)/Bachelor of Business (Study Area A)

**CRICOS code:** 027278C

**Location:** Gardens Point

**Course duration (full-time):** 5 Years

**Total credit points:** 480

**Standard credit points per semester (full-time):** 48 (average)

**Course coordinator:** Dr Mohammed Bennamoun (Engineering); Mr Andrew Paltridge (Business),

**Discipline coordinator:** Dr John Sweeting (Accountancy); Ms Gayle Kerr (Advertising); Mr John Polichronis (Banking and Finance); Mr Eugene McCann (Economics); Ms Sherrena Buckby (Electronic Business); Dr Kate Hutchings (Human Resource Management); Mr Simon Ridings (International Business); Dr Glenda Maconachie (Management); Ms Cathy Neal (Marketing); Ms Robina Xavier (Public Relations)

### Special Course Requirements

A candidate for the degree of Bachelor of Engineering must obtain at least 60 days of industrial employment/practice in an engineering environment approved by the course coordinator, before graduating.

### Professional Membership

This degree meets the requirements for membership of The Institution of Engineers, Australia. Students completing the Bachelor of Business degree may, subject to choice of major, extended major and elective units, satisfy the academic requirements for membership of: CPA Australia, Institute of Chartered Accountants in Australia (ICAA), Australasian Institute of Banking and Finance (AIBF), Economic Society of Australia (Queensland Division), Australasian Institute of Export, Advertising Institute of Australia, Society of Business Communicators, Public Relations Institute of Australia, Australian Human Resources Institute, Australian Institute of Management, Australian Institute of Training and Development, Australian Marketing Institute, Market Research Society of Australia or American Marketing Association.

### Built Environment & Engineering Minors

Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

### Course structure - Accountancy

#### Year 1, Semester 1

EEB112 Electrical And Computer Engineering 1

MAB180 Engineering Mathematics 1

OR

MAB131 Engineering Mathematics 1A

BSB110 Accounting

BSB113 Economics

\*MAB180 Engineering Mathematics 1 is to be taken by those students not obtaining a SA or better in Queensland Mathematics C

#### Year 1, Semester 2

EEB212 Electrical And Computer Engineering 2

MAB132 Engineering Mathematics 1B

AYB121 Financial Accounting

BSB111 Business Law And Ethics

#### Year 2, Semester 1

EEB340 Introduction To Telecommunications

MAB134 Electrical Engineering Mathematics 3

PCB136 Engineering Physics 1C

EFB101 Data Analysis For Business

#### Year 2, Semester 2

EEB440 Classical Signal Processing

MAB135 Electrical Engineering Mathematics 4

BSB115 Management, People And Organisations

BSB119 International And Electronic Business

#### Year 3, Semester 1

EEB311 Electrical Measurement And Machines

EEB312 Analog And Digital Electronics

BSB126 Marketing

Double Major/Extended Major/Specialisation Unit

#### Year 3, Semester 2

EEB411 Classical Control And Power Systems

EEB412 Advanced Electronics And Embedded Systems

AYB221 Computerised Accounting Systems

BSB114 Government, Business And Society

#### Year 4, Semester 1

EEB584 Introduction To Design

Electrical and Computer Engineering elective unit

AYB220 Company Accounting

Double Major/Extended Major/Specialisation Unit

#### Year 4, Semester 2

EEB684 Advanced Design

Electrical and Computer Engineering elective unit

AYB225 Management Accounting

Double Major/Extended Major/Specialisation Unit

## ■ Bachelor of Engineering (Electronics)/Bachelor of Information Technology (IF59)

**Award title:** Bachelor of Engineering (Electronics)/Bachelor of Information Technology

**CRICOS code:** 006384G

**Location:** Gardens Point

**Course duration (full-time):** 5 Years

**Total credit points:** 480

**Standard credit points per semester (full-time):** 48

**Course coordinator:** Dr Vinod Chandran (Engineering)

### Professional Recognition

This course is accredited by The Institution of Engineers, Australia, as meeting the training requirements for admission to graduate membership of the institution. Graduates of the Bachelor of Information Technology Component meet the knowledge requirements for admission to the Australian Computer Society (ACS).

### Minors

Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

### Special Course Requirements

A candidate for the degree of Bachelor of Engineering (Electronics)/Bachelor of Information Technology must obtain at least 60 days of industrial experience in an engineering environment approved by the course coordinator.

### Full-time Course structure

**Year 1, Semester 1**

ITB111	Software Development 1
ITB114	Introduction to Network Technologies
PCB136	Engineering Physics 1C
MAB180	Engineering Mathematics 1
	OR

MAB131 Engineering Mathematics 1A  
\*MAB180 Engineering Mathematics is to be taken by those students not obtaining a SA or better in Queensland Mathematics C (or equivalent).

**Year 1, Semester 2**

BNB007	Professional Studies 1
EEB213	Electrical Circuits And Measurements
ITB112	Software Development 2
MAB132	Engineering Mathematics 1B

**Year 2, Semester 1**

EEB312	Analog And Digital Electronics
ITB118	Systems Life Cycle
ITB420	Computer Architecture
MAB134	Electrical Engineering Mathematics 3

**Year 2, Semester 2**

EEB412	Advanced Electronics And Embedded Systems
ITB421	Software Development 3
ITB424	Software Engineering Principles
MAB135	Electrical Engineering Mathematics 4

**Year 3, Semester 1**

EEB311	Electrical Measurement And Machines
EEB340	Introduction To Telecommunications
EEB512	Industrial Electronics And Digital Design
ITB448	Object Technology

**Year 3, Semester 2**

EEB411	Classical Control And Power Systems
EEB440	Classical Signal Processing
ITB427	Concurrent And Distributed Systems
ITB433	Programming Languages

**Year 4, Semester 1**

EEB560	Digital Communications
EEB584	Introduction To Design
ITB432	Advanced Programming Laboratory
ITB469	Unix Systems Programming And Administration
	OR
	Computing Elective
	*Students are required to take either ITB469 OR ITB470 (see below).

**Year 4, Semester 2**

EEB640	Digital Signal Processing
EEB684	Advanced Design
ITB470	Windows 2000 System Programming And Administration
	OR
	Computing Elective
	*Students are required to take either ITB469 OR ITB470.
	Computing Elective

**Year 5, Semester 1**

EEB781	
EEB889/1	Project
	OR
ITB844/1	Computing Project
	Electrical Engineering Elective
	Elective

**Year 5, Semester 2**

EEB889/2	Project
	OR
ITB844/2	Computing Project
	Elective
	Elective
	Elective

**Elective Units**

EEB904	Advanced Topics In Electrical Engineering A
EEB905	Advanced Topics In Electrical Engineering B
EEB941	Modern Signal Processing
EEB960	Wireless Communications
EEB976	Advanced Industrial Electronics
EEB992	VLSI Circuits And Systems

At the discretion of the Course Coordinator, students may be allowed to select an elective from any advanced topics offered by the University. Also potential honours students may, with the approval of the Course Coordinator, select an elective from the from the postgraduate degree courses offered by the School of Electrical and Electronic Systems Engineering. Computing and Electrical Engineering Electives may be interchanged provided at least one elective is chosen from each discipline.

**Computing Electives**

ITB434	Parallel Computing
ITB441	Graphics
ITB442	Foundations Of Artificial Intelligence
ITB447	Project
ITB456	Graphic User Interfaces
ITB458	Java And Extensible Programming
ITB461	Foundations Of Neurocomputing
ITB463	Pattern Recognition
ITB464	Modern Compiler Construction
ITB466	Component Technology
ITB468	Software Engineering Project

**Industrial Experience**

Students must obtain at least 60 days industrial experience in an engineering environment approved by the Course Coordinator.

**Notes**

- 1) Students must take one of the two units ITB469 Unix Systems Programming or ITB470 Window Systems Programming.
- 2) EEB781 Professional Studies 2 can be taken earlier if desired subject to completion of BNB007 Professional Studies 1.

- 3) The six electives can be taken in any ratio of EE to IT in order to emphasize either the EE or the IT component of the double degree provided at least one elective is chosen from each, with the approval of the Course Coordinator.
- 4) Core units at the third or fourth year of single Engineering degrees are acceptable as EE electives and a student may enrol in them provided pre-requisites are satisfied.

## ■ Bachelor of Health Science (Health Information Management)/Bachelor of Information Technology (IF85)

**Award title:** Bachelor of Health Science (Health Information Management)/Bachelor of Information Technology

**CRICOS code:** 031577B

**Location:** Gardens Point and Kelvin Grove

**Course duration (full-time):** 4 Years

**Total credit points:** 432

**Course coordinator:** Ms Melinda Service (Health); Dr Alan Tickle (InfTech)

**Discipline coordinator:** Ms Josie Di Donato (Health Information Management)

**Course structure**
**Year 1, Semester 1**

ITB106	Foundations Of Computing
ITB225	Introduction To Databases
PUB106	Introduction To Health Information Management
PUB251	Contemporary Public Health

**Year 1, Semester 2**

BSB115	Management, People And Organisations
ITB310	Organisational Information Systems
ITB510	Data Communications
PUB233	Communication, Information And Education For Health

**Year 2, Semester 1**

ITB232	Database Systems
ITB111	Software Development 1
LSB142	Human Anatomy and Physiology
LSB361	Fundamentals of Medicine
PUB220	Medical Terminology

**Year 2, Semester 2**

ITB118	Systems Life Cycle
ITB222	Business Systems Analysis
LWS001	Medicine And The Law
PUB356	Clinical Classification 1

**Year 3, Semester 1**

ITB227	Web Applications
PUB298	Health Information Management 2
PUB314	Epidemiology And Statistics
PUB456	Clinical Classification 2

**Year 3, Semester 2**

ITB113	Introduction to Computer Architecture and System Software
PUB380	Casemix Management
PUB480	Health Administration Finance
	IS Subject Area Elective Unit
	IS Subject Area Elective Unit

**Year 4, Semester 1**

ITB229	Information Systems Specification
PUB511	Health Policy, Planning And Evaluation
PUB599	Health Information Management 3
	IS Subject Area Elective Unit

**Year 4, Semester 2**

ITB228	Enterprise Systems
PUB553	Professional Experience
PUB619	Health Information Management 4
PUB875	Professional Practice
	Public Health Elective
	IS Subject Area Elective Unit

**Information Systems Subject Area Units (4 units to be selected)**

	Database Systems Area
ITB234	Information Analysis
ITB263	Web Intelligence For E-Commerce
ITB243	Knowledge-Based Systems
ITB267	Data Warehousing For Decision Support
	E-Commerce Area
ITB243	Knowledge-Based Systems
ITB257	Multimedia Systems

ITB260	E-Commerce Site Development
ITB263	Web Intelligence For E-Commerce
E-Commerce Technology Area	
ITB263	Web Intelligence For E-Commerce
ITB262	E-Commerce Technologies
ITB267	Data Warehousing For Decision Support
Enterprise Systems Strategy Area	
ITB241	Information Technology Management
ITB233	Enterprise Systems Applications
ITB264	Information Systems Consulting
Enterprise Systems Technical Area	
ITB263	Web Intelligence For E-Commerce
ITB245	R/3 Systems Administration
ITB258	ABAP Programming
ITB267	Data Warehousing For Decision Support
Information Management Area	
ITB266	Principles Of Information Management
ITB322	Information Resources
ITB330	Information Issues
ITB341	Strategic Information And Knowledge Management
Information Technology Consulting Area	
ITB241	Information Technology Management
ITB264	Information Systems Consulting
ITB322	Information Resources
ITB341	Strategic Information And Knowledge Management
Modelling Area	
ITB223	4GL Systems
ITB234	Information Analysis
ITB236	Object-Oriented Analysis And Design
ITB254	Interactivity Design
Multimedia Area	
ITB243	Knowledge-Based Systems
ITB254	Interactivity Design
ITB257	Multimedia Systems
ITB260	E-Commerce Site Development
Programming Area	
ITB223	4GL Systems
ITB254	Interactivity Design
ITB258	ABAP Programming
ITB260	E-Commerce Site Development

## ■ Bachelor of Information Technology/Bachelor of Education (Secondary) (IF79)

**Award title:** Bachelor of Information Technology (Study Area A)/Bachelor of Education

**CRICOS code:** 022136B

**Location:** Gardens Point, Kelvin Grove and Carseldine

**Course duration (full-time):** 4 Years

**Total credit points:** 432

**Course coordinator:** Dr Gordon Tait (Education), Mr Mike Roggenkamp (InfTech)

### Course Structure

Students are required to complete 240 credit points in units offered by the Faculty of Information Technology plus 192 credit points offered by the Faculty of Education. Four of these units from Education are undertaken over the first five semesters of the course: EDB001 Teaching and Learning Studies I: Teaching in New Times; SPB001 Human Development and Education; SPB002 Psychology of Learning and Teaching; CLB341 Language, Technology and Education. Teaching areas will be Computing with English, Business Communication and Technologies, Social Science, History, Geography, Accounting/Business Management, Economics, Legal Studies, Science\*, Mathematics\*. In the final semester, students may undertake the Middle Years of Schooling Pathway developing the knowledge, skills and understanding required to participate fully in the middle schooling reform movement.

\* Available only when students are able to demonstrate that they will have covered sufficient breadth of studies to support teaching in these areas.

### Course structure

#### Year 1, Semester 1

ITB106	Foundations Of Computing
ITB225	Introduction To Databases
ITB410	Software Development 1
ITB412	Technology Of Information Systems

#### Year 1, Semester 2

EDB001	Teaching and Learning Studies 1: Teaching in New Times
ITB107	Programming Laboratory
ITB310	Organisational Information Systems
ITB510	Data Communications
SPB001	Human Development And Education

#### Year 2, Semester 1

ITB411	Software Development 2
ITB229	Information Systems Specification
ITB222	Business Systems Analysis
CLB341	Language, Technology And Education Second Teaching Area Unit

#### Year 2, Semester 2

ITB424	Software Engineering Principles Computing Science Elective Unit IT Elective Unit
SPB002	Psychology Of Learning And Teaching Second Teaching Area Unit

#### Year 3, Semester 1

Second Teaching Area Unit
Second Teaching Area Unit
IT Elective Unit
IT Elective Unit
IT Elective Unit
IT Electives should be chosen from units offered within the Bachelor of Information Technology, subject to fulfilling prerequisite requirements. Students should check with IT Course Coordinator.

### Education Component

#### Note

CLB305, SPB001, SPB002 and CLB341 must be completed in the first five semesters of the course.

#### Year 3, Semester 2

EDB450	Secondary Professional Practice 1: Classroom Management
EDB451	Secondary Professional Practice 2: Curriculum Decision Making
MDB329	Computing Curriculum Studies 1 Curriculum Studies 1 (See List 1)

#### Year 4, Semester 1

CLB306	Understanding Educational Practices
EDB452	Secondary Professional Practice 3: The Inclusive Curriculum
MDB330	Computing Curriculum Studies 2 Curriculum Studies 2 (See List 2)

#### Year 4, Semester 2

EDB453	Secondary Professional Practice 4: The Beginning Teacher Education Studies Elective (See List 3) Education Studies Elective (See List 3) Curriculum Studies Elective (See List 4)
--------	--

#### Alternative Year 4, Semester 2: Middle Years Pathway

EDB443	Professional Internship Of Associate Teaching
SPB008	The Middle Years Of Schooling
SPB022	The Middle Years Curriculum
EDB453	Secondary Professional Practice 4: The Beginning Teacher

### Curriculum Studies 1 and 2

#### List 1

CLB355	Accounting/business Management Curriculum Studies 1
CLB357	Business Communications And Technologies Curriculum Studies 1
CLB359	Economics Curriculum Studies 1
CLB325	English Curriculum Studies 1
CLB361	Geography Curriculum Studies 1
CLB363	History Curriculum Studies 1
CLB365	Legal Studies Curriculum Studies 1
MDB333	Mathematics Curriculum Studies 1
MDB337	Science Curriculum Studies 1
CLB367	Social Science Curriculum Studies 1

#### List 2

CLB356	Accounting/business Management Curriculum Studies 2
CLB358	Business Communications And Technologies Curriculum Studies 2
CLB360	Economics Curriculum Studies 2

CLB326	English Curriculum Studies 2
CLB362	Geography Curriculum Studies 2
CLB364	History Curriculum Studies 2
CLB366	Legal Studies Curriculum Studies 2
MDB334	Mathematics Curriculum Studies 2: Senior Mathematics
MDB338	Science Curriculum Studies 2
CLB368	Social Science Curriculum Studies 2

### Education Studies Elective Units

See Bachelor of Applied Science/Bachelor of Education (Secondary) (IF71) for details.

### Curriculum Studies Electives

See Bachelor of Applied Science/Bachelor of Education (Secondary) (IF71) for details.

## ■ Bachelor of Information Technology/Bachelor of Education (Secondary) (IX09)

**Award title:** Bachelor of Information Technology/Bachelor of Education

**Location:** Gardens Point, Kelvin Grove and Carseldine

**Course duration (full-time):** 4 years

**Total credit points:** 432

**Course coordinator:** Dr Gordon Tait (Education), Mr Mike Roggenkamp (InfTech)

### Note

IX09 replaces IF79 for commencing students in 2003, and is subject to final approval.

Applicants to the IF79 course who have six units of credit of more should contact the faculty of education.

### Entry Requirements

Applicants must have completed Year 12 (or equivalent).  
Assumed Knowledge: English (4 SA) and Maths B (4 SA).

### Course Structure

Students are required to complete 240 credit points in units offered by the Faculty of Information Technology plus 192 credit points offered by the Faculty of Education. Teaching areas will be Computing with English, Business Communication and Technologies, Social Science, History, Geography, Accounting/Business Management, Economics, Legal Studies, Science\*, Mathematics\*.

\* Available only when students are able to demonstrate that they will have covered sufficient breadth of studies to support teaching in these areas.

### Course structure

#### Year 1, Semester 1

ITB111	Software Development 1
ITB113	Introduction to Computer Architecture and System Software
ITB115	Introduction to Databases
ITB116	Professional Studies 1
EDB001	Teaching and Learning Studies 1: Teaching in New Times

#### Year 1, Semester 2

ITB112	Software Development 2
ITB114	Introduction to Network Technologies
ITB117	Professional Studies 2
ITB118	Systems Life Cycle Second Teaching Area Unit

#### Year 2, Semester 1

EDB002	Teaching and Learning Studies II: Development and Learning

MDB023	Mathematics Curriculum Studies 3
MDB029	Science Curriculum Studies 3
CLB041	Social Science Curriculum Studies 3

### IX09 - Faculty of Information Technology Elective Units

#### Information Systems

ITB233	Enterprise Systems Applications
ITB234	Information Analysis
ITB235	Distributed Object Information Systems
ITB236	Object-Oriented Analysis And Design
ITB241	Information Technology Management

ITB243	Knowledge-Based Systems
ITB245	R/3 Systems Administration
ITB254	Interactivity Design
ITB257	Multimedia Systems
ITB258	ABAP Programming
ITB259	Advanced Multimedia Technologies
ITB260	E-Commerce Site Development
ITB262	E-Commerce Technologies
ITB263	Web Intelligence For E-Commerce
ITB264	Information Systems Consulting
ITB267	Data Warehousing For Decision Support

#### **Software Engineering**

ITB441	Graphics
ITB442	Foundations Of Artificial Intelligence
ITB454	Software Quality Assurance
ITB456	Graphic User Interfaces
ITB457	Windows Programming
ITB458	Java And Extensible Programming
ITB466	Component Technology
ITB469	Unix Systems Programming And Administration
ITB470	Windows 2000 System Programming And Administration
ITB471	Software Development For The Web

#### **Data Communications**

ITB533	Comparative Network Systems
ITB551	Network Planning
ITB564	Application Services
ITB565	Network Management
ITB566	Introduction To Cryptology
ITB568	Wireless Networks
ITB569	Network Security For E-Commerce

## ■ Bachelor of Information Technology/Bachelor of Laws (IF38)

**Award title:** Bachelor of Information Technology/Bachelor of Laws

**CRICOS code:** 006385G

**Location:** Gardens Point

**Course duration (full-time):** 5 Years

**Total credit points:** 528

**Course coordinator:** IT: Dr Alan Tickle; Law, Director, Undergraduate Programs

### **Professional Recognition**

The Bachelor of Information Technology component meets the knowledge requirements for membership of the Australian Computer Society. The Bachelor of Laws component covers the areas of law required for the purposes of admission to practise as a Solicitor and/or Barrister in all Australian states and territories.

### **Course structure**

#### **Year 1, Semester 1**

ITB111	Software Development 1
ITB113	Introduction to Computer Architecture and System Software
ITB115	Introduction to Databases
ITB116	Professional Studies 1

#### **Year 1, Semester 2**

ITB112	Software Development 2
ITB114	Introduction to Network Technologies
ITB117	Professional Studies 2
ITB118	Systems Life Cycle

#### **Year 2, Semester 1**

ITB218	Applications Programming
ITB222	Business Systems Analysis
ITB229	Information Systems Specification
LWB141	Legal Institutions And Method
LWB142	Law, Society And Justice

#### **Year 2, Semester 2**

ITB227	Web Applications
ITB228	Enterprise Systems
LWB143	Legal Research And Writing
LWB144	Laws And Global Perspectives

#### **Year 3, Semester 1**

ITB232	Database Systems
	IS Subject Area Elective Unit
LWB136	Contracts A
LWB138	Fundamentals Of Torts

LWB238	Fundamentals Of Criminal Law
--------	------------------------------

#### **Year 3, Semester 2**

ITB240	Project (Information Systems)
LWB137	Contracts B
LWB139	Select Issues In Torts
LWB239	Criminal Responsibility

#### **Year 4, Semester 1**

LWB231	Introduction To Public Law
LWB236	Real Property A
LWB240	Principles Of Equity
LWB333	Theories Of Law

#### **Year 4, Semester 2**

LWB235	Australian Federal Constitutional Law
LWB237	Real Property B
LWB241	Trusts
LWB334	Corporate Law

#### **Year 5, Semester 1**

LWB332	Commercial And Personal Property Law
LWB431	Civil Procedure
LWB432	Evidence
LWB434	Advanced Research And Legal Reasoning Electives

#### **Year 5, Semester 2**

LWB331	Administrative Law
LWB433	Professional Responsibility Electives

### **Information Systems Subject Area Units (1 unit to be selected)**

#### **Database Systems Area**

ITB234	Information Analysis
ITB243	Knowledge-Based Systems
ITB263	Web Intelligence For E-Commerce
ITB267	Data Warehousing For Decision Support

#### **E-Commerce Area**

ITB243	Knowledge-Based Systems
ITB257	Multimedia Systems
ITB260	E-Commerce Site Development
ITB263	Web Intelligence For E-Commerce

#### **E-Commerce Technology Area**

ITB235	Distributed Object Information Systems
ITB262	E-Commerce Technologies
ITB263	Web Intelligence For E-Commerce
ITB267	Data Warehousing For Decision Support

#### **Enterprise Systems Strategy Area**

ITB233	Enterprise Systems Applications
ITB241	Information Technology Management
ITB264	Information Systems Consulting
ITB267	Data Warehousing For Decision Support

#### **Enterprise Systems Technical Area**

ITB245	R/3 Systems Administration
ITB258	ABAP Programming

### List A Creative Industries Core Units

See Bachelor of Creative Industries (Creative Writing)/Bachelor of Laws (IF93) for details.

### Creative Industries Faculty Elective List for 2003

See Bachelor of Creative Industries (Creative Writing)/Bachelor of Laws (IF93) for details.

### List of Languages

The same language must be studied for at least four levels and unit codes are sequential (eg. French HHB670, HHB671, HHB672, HHB673), except French 7 (HHB678) and French 8 (HHB677). With the permission of the Major Coordinator, and where available, languages must be taken, including languages studied at another university. International students

must take a language that is not their native tongue. The language units are as follows:

#### French

1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:

HHB061	French 1
HHB062	French 2
HHB063	French 3
HHB064	French 4
HHB065	French 5
HHB066	French 6

2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:

HHB063	French 3
HHB064	French 4
HHB065	French 5
HHB066	French 6
HHB067	French 7
HHB068	French 8

#### Indonesian

1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:

HHB071	Indonesian 1
HHB072	Indonesian 2
HHB073	Indonesian 3
HHB074	Indonesian 4
HHB075	Indonesian 5
HHB076	Indonesian 6

2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:

HHB073	Indonesian 3
HHB074	Indonesian 4
HHB075	Indonesian 5
HHB076	Indonesian 6
HHB077	Indonesian 7
HHB078	Indonesian 8

#### Japanese

1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:

HHB081	Japanese 1
HHB082	Japanese 2
HHB083	Japanese 3
HHB084	Japanese 4
HHB085	Japanese 5
HHB086	Japanese 6

2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:

HHB083	Japanese 3
HHB084	Japanese 4
HHB085	Japanese 5
HHB086	Japanese 6
HHB087	Japanese 7
HHB088	Japanese 8

#### German

1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:

HHB091	German 1
HHB092	German 2
HHB093	German 3
HHB094	German 4
HHB095	German 5
HHB096	German 6

2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:

HHB093	German 3
HHB094	German 4
HHB095	German 5
HHB096	German 6
HHB097	German 7
HHB098	German 8

## ■ Bachelor of Journalism/Bachelor of Laws (IF07)

**Award title:** Bachelor of Journalism/Bachelor of Laws

**CRICOS code:** 040313G

**Location:** Gardens Point and Carseldine

**Creative Industries Faculty Elective List for 2003**

See Bachelor of Creative Industries (Creative Writing)/Bachelor of Laws (IF93) for details.

**■ Bachelor of Mass Communication (IF27)**

**Award title:** Bachelor of Mass Communication

**CRICOS code:** 037542J

**Location:** Gardens Point

**Course duration (full-time):** 3 Years

**Course duration (part-time):** 6 years (Many units in this degree will only be offered in daytime mode).

**Total credit points:** 288

**Standard credit points per semester (full-time):** 48

**Standard credit points per semester (part-time):** 24

**Course coordinator:** Creative Industries: Dr Christina Spurgeon

**Discipline coordinator:** Creative Industries - Media Communication: Ms Jillian Clare; Television: Ms Helen Yeates; Journalism: Mr Roger Patching; Business - Advertising and Public Relations: Ms Robina Xavier

**Degree Structure**

Students commencing the Bachelor of Mass Communication must complete 24 units of equal weighting totalling 288 credit points comprised of a. Faculty Core (eight faculty core units) b. Major Core (two majors of six units each) and c. Electives (four units).

Although studies can be tailored to meet a specific career goal or create a wide variety of career choices, there is a set of recommended combinations of majors. Students are not required to take these combinations, however they do represent the more common and logical choices within a mass communication qualification.

The recommended combinations are:

- Public Relations and International Journalism
- Public Relations and Media and Communication
- Advertising and Television
- International Journalism and Media and Communication.

**Professional Recognition**

Graduates of the Bachelor of Mass Communication (depending on their choice of majors) may satisfy the academic requirements for membership of the Advertising Institute of Australia, the Society of Business Communicators and the Public Relations Institute of Australia.

**General Course structure****FACULTY CORE UNITS - 8 units required**

 KPB265 Corporate Production  
 Elective

\* Students may enrol in KJB335 Professional Media Practice  
 instead of KJB337 subject to approval of the Journalism  
 Discipline Coordinator

## ■ Bachelor of Music/Bachelor of Education (Secondary) (IF77)

**Award title:** Bachelor of Music/Bachelor of Education

**CRICOS code:** 020319M

**Location:** Kelvin Grove

**Course duration (full-time):** 4 Years

**Total credit points:** 432

**Standard credit points per semester (full-time):** 54 (average).  
(Note that the minimum enrolment for full-time status varies each year).

**Course coordinator:** Education Coordinator: Dr Gordon Tait, Creative Industries; Assoc Prof Adrian Thomas

### Note

Restricted intake in 2003.

The Bachelor of Music/Bachelor of Education (Secondary) IF77 course has been replaced by a newly coded Bachelor of Music/Bachelor of Education (Secondary) IX07 course with effect from 2003. There will be no new intake into this course in 2003 with the exception of students commencing their studies with significant advanced standing from previous tertiary level study.

### General

This four-year professional double degree prepares students to teach secondary school Music in Australian schools. In the first two years you may specialise in a range of performance and production areas (refer to Bachelor of Music). In addition students may opt to take a second teaching area selected from Dance, Drama, Visual Art, English, Film and Media Studies, Geography, History and Languages, or alternatively, study instrumental music teaching or primary specialist music teaching. Students taking the instrumental music strand are also encouraged to take second study instruments. In the final two years students concentrate on teacher preparation with Music curriculum units equipping students with the skills necessary to be effective Music educators.

### B Music/B Ed (Secondary) Secondary Classroom Music with Instrumental Music as STA

#### Year 1, Semester 1

- KMB651 Music Performance Studies 1  
OR  
KMB657 Music Production Studies 1  
KMB632 Core Musicianship 1  
KMB619 Music And Sound Technology  
Creative Industries Core Unit - List A  
Choose one unit from:  
KMB640 Sex Drugs Rock N Roll  
KMB631 World Music  
KMB618 Soundtracks For Film And Television  
KMB616 Ensemble Project A

#### Year 1, Semester 2

- KMB652 Music Performance Studies 2  
OR  
KMB658 Music Production Studies 2  
KMB633 Core Musicianship 2  
KMB621 Sound Recording And Acoustics  
Creative Industries Core Unit - List A  
Choose one unit from:  
KMB622 Second Study 1  
KMB638 Sound And Image  
KMB626 Music And Sound For Multimedia  
KMB616 Ensemble Project A

#### Year 2, Semester 1

- KMB653 Music Performance Studies 3  
KMB637 Jazz And Popular Music Musicianship  
OR  
KMB636 Cross Cultural Musicianship  
KMB630 Music Textures  
Education Unit (See Faculty of Education Component)  
KMB623 Conducting

 Choose one unit from:  
 KMB623 Conducting  
 KMB640 Sex Drugs Rock N Roll

KMB631 World Music  
 KMB618 Soundtracks For Film And Television  
 KMB616 Ensemble Project A

#### *Year 2, Semester 2*

KMB654 Music Performance Studies 4  
 OR  
 KMB660 Music Production Studies 4  
 KMB635 Sound Media Musicianship  
 OR  
 KMB634 Contemporary Art Music Musicianship  
 Second Teaching Area Unit  
 Choose one unit from:  
 KMB638 Sound And Image  
 KMB617 Arranging  
 KMB648 The Music Scene

### **List A Creative Industries Core Units**

See Bachelor of Creative Industries (Creative Writing)/Bachelor of Laws (IF93) for details.

### **Education Component**

#### *Year 3, Semester 2*

EDB002 Teaching and Learning Studies II: Development and Learning  
 EDB031 Secondary Field Studies I: Development and Learning in the Field  
 KMB201 Music (Secondary) Curriculum Studies 1  
 Curriculum Studies 1Y

#### *Year 3, Semester 2*

EDB003 Teaching and Learning Studies III: Practising Education  
 EDB032 Secondary Field Studies II: Practising Education in the Field  
 KMB202 Music (Secondary) Curriculum Studies 2  
 Curriculum Studies 2Y

#### *Year 4, Semester 1*

EDB004 Teaching and Learning Studies IV: Inclusive Education  
 EDB033 Secondary Field Studies III: Immersion in Inclusive Educational Practices  
 KMB203 Music (Secondary) Curriculum Studies 3  
 Curriculum Studies 3Y

#### *Year 4, Semester 2*

EDB005 Teaching and Learning Studies V: Professional Work of Teachers  
 EDB034 Secondary Field Studies VI: Professional Work of Teachers: Induction into the Field  
 EDB035 Internship (Secondary)  
 Education Elective

### **Curriculum Studies - Second Teaching Area**

#### *Curriculum Studies 1*

KVB301 Visual Art Curriculum Studies 1  
 KTB201 Drama Curriculum Studies 1  
 CLB018 English Curriculum Studies 1  
 CLB024 Film and Media Curriculum Studies 1  
 CLB027 Geography Curriculum Studies 1  
 CLB030 History Curriculum Studies 1  
 CLB036 LOTE Curriculum Studies 1  
 KMB101 Music (Primary/Instrumental) Curriculum Studies 1

#### *Curriculum Studies 2*

KVB302 Visual Art Curriculum Studies 2  
 KTB202 Drama Curriculum Studies 2  
 CLB019 English Curriculum Studies 2  
 CLB025 Film and Media Curriculum Studies 2  
 CLB028 Geography Curriculum Studies 2  
 CLB031 History Curriculum Studies 2  
 CLB037 LOTE Curriculum Studies 2  
 KMB102 Music (Primary/Instrumental) Curriculum Studies 2

#### *Curriculum Studies 3*

KVB303 Visual Art Curriculum Studies 3  
 KTB203 Drama Curriculum Studies 3  
 CLB020 English Curriculum Studies 3  
 CLB026 Film and Media Curriculum Studies 3  
 CLB029 Geography Curriculum Studies 3  
 CLB032 History Curriculum Studies 3  
 CLB038 LOTE Curriculum Studies 3  
 KMB103 Music (Primary/Instrumental) Curriculum Studies 3

### **List C. Second Teaching Area Units**

See Bachelor of Creative Industries (Dance)/Bachelor of Education (Secondary) (IF75) for details.

Section Four  
Unit Synopses

Unit Coding and Numbering ..... 460  
Unit Synopses..... 461

## UNIT CODING AND NUMBERING

---

This section provides synopses of the units offered in the academic programs section.

The synopses are presented in alpha-numeric order according to their codes.

### UNIT CODING AND NUMBERING

The unit code is of the format XXX999. The first two characters indicate the faculty or school administering the unit. The third character indicates the level of the course in which the unit is normally taught.

### UNIT CODING

- AD Design and Built Environment
- AM Advertising, Marketing and Public Relations
- AR Design and Built Environment
- AY Accountancy
- BN Built Environment and Engineering
- BS Business
- CE Civil Engineering
- CL Cultural and Language Studies in Education
- CN Construction Management
- DB Design and Built Environment
- EA Early Childhood
- ED Education
- EE Electrical and Electronic Systems Engineering
- EF Economics and Finance
- GS Brisbane Graduate School of Business
- HH Humanities and Human Services
- HL Health
- HM Human Movement Studies
- IB International Business
- IF Interfaculty Courses
- IT Information Technology
- JS Justice Studies
- KC Media Communication
- KD Dance
- KF Fashion
- KI Communication Design
- KJ Journalism
- KK Creative Industries Faculty
- KM Music
- KP Film and Television
- KS Acting and Technical Production
- KT Theatre Studies
- KV Visual Arts
- KW Creative Writing and Cultural Studies
- LP Legal Practice
- LS Life Science
- LW Law
- MA Mathematical Sciences
- MD Mathematics, Science and Technology Education
- ME Mechanical, Manufacturing and Medical Engineering
- MG Management and Human Resource Management
- MM Mechanical, Manufacturing and Medical Engineering
- NR Natural Resource Sciences
- NS Nursing
- OP Optometry
- PC Physical Sciences
- PS Planning, Landscape Architecture and Surveying
- PU Public Health
- PY Psychology and Counselling
- QC QUT International College

- SC Science
- SP Learning and Professional Studies

### LEVEL INDICATORS

- X = Certificate, Associate Diploma, Associate Degrees, Diploma
- B = Degree
- D = University Diploma
- F = Foundation Program
- P = Graduate Diploma
- N = Masters Degree
- R = Doctoral
- S = Special Units
- Z = Offshore Offering

### PREREQUISITE AND COREQUISITE UNITS

For definitions of the terms prerequisite and corequisite unit(s), refer to Rule 12 of the Student Rules section.

### Disclaimer

Some schools have indicated the availability of their units for semester 1 (1), semester 2 (2), or Summer Program (3). These indications are preliminary only and are subject to change.

► **ADB001 ARCHITECTURAL DESIGN 1**

Introduction to design theory. Develop exercises for enhancement of fundamental aesthetic perception, developmental exercises in graphic/presentation skills with an emphasis on orthographic and paraline drawing systems. The major design project introduces students to a range of issues and provokes exploration, development of students' comprehension of fundamental spatial and formal values and enhances sensibilities concerning architectural qualities.

**Courses:** BN31, AR48  
**Contact hours:** 8 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB002 ARCHITECTURAL DESIGN 2**

Introduction to critical design theory. Developmental exercises in graphic/presentation skills with emphasis on model making and perspective drawing. With a focus on the contextual, the major project in this unit encourages ideas that are developed out of analysis of understanding of a particular place.

**Courses:** BN31, AR48 **Prerequisites:** ADB001  
**Contact hours:** 8 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB003 ARCHITECTURAL DESIGN 3**

Design theory: physical context, landscape, social context, ethics and values. Integration of contextual studies, technology, specifically building construction and design for climate. Projects are generally of domestic scale.

**Prerequisites:** ADB002  
**Corequisites:** ADB011, ADB013  
**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB004 ARCHITECTURAL DESIGN 4**

Design theory: physical context, landscape, social context, ethics and values. Integration of contextual studies and of technology, specifically building construction, design for climate. Projects are generally of domestic scale.

**Courses:** BN31, AR48 **Prerequisites:** ADB003  
**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB005 ARCHITECTURAL DESIGN 5**

Design theory, sustainability, sociological and contextual concerns related to particular design problems. The unit will often include a 'community service' project, generally a collaborative, participatory design with selected community groups as 'client'.

**Courses:** BN31, AR48  
**Prerequisites:** ADB004 **Corequisites:** ADB913  
**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB006 ARCHITECTURAL DESIGN 6**

Design theory, urban sustainability, sociological and contextual concerns related to particular design problems.

**Courses:** BN31, AR48 **Prerequisites:** ADB005  
**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB007 ARCHITECTURAL DESIGN 7**

The content of the unit is project-dependent.

**Courses:** AR48 **Prerequisites:** ADB006  
**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB008 ARCHITECTURAL DESIGN 8**

The content of the unit is project-dependent.

**Courses:** AR48  
**Prerequisites:** ADB007 **Corequisites:** ADB026  
**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB009 ARCHITECTURAL DESIGN 9**

Design projects and associated lectures and presentations relevant to developing the unit objectives. A high degree of resolution is expected in design projects in intellectual conceptualisation and strategy, spatial organisation, form, detail and technical understanding. Building economics, services, construction technology, theory and critical analysis will be integrated into the unit.

**Courses:** AR48 **Prerequisites:** ADB008  
**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB011 CONTEXTUAL STUDIES 1**

The course will cover the emergence of modern architecture in Europe and America in the late nineteenth and early twentieth century, and the development of the ideas and proposals arrived at through the heroic phase of the 1920s and 30s. The dominance of modern architecture following the war and the early critiques will be examined. An analysis of the emergence of postmodern thought and the various architectural directions being pursued throughout the world in the late twentieth century to find viable and meaningful designs will be present.

**Courses:** BN31, AR48 **Prerequisites:** ADB931  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB012 CONTEXTUAL STUDIES 2**

Australian and Oceanic architecture is examined from pre-European settlement times to the present. The work is looked at in the context of European and American influences and the Asian-Oceanic context. The examples are studied in relation to broad social, historical and aesthetic backgrounds. Course work will include an introduction to research of local architectural history, and visits to key buildings.

**Courses:** BN31, AR48 **Prerequisites:** ADB931  
**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB013 CONTEXTUAL STUDIES 3**

This unit consists of two parts: 1. The Asian Architectural Culture: The Asian architecture component of the unit covers the architectural traditions of the diverse cultures of Asia and urban history. The course examines how traditional architecture is shaped by culture and society. It focuses on the geographic regions of the orient including China, Japan and Korea and that of South Asia including India, Nepal and Sri Lanka. 2. Design and Cities: Cities across geographic regions, including Europe, America, Australia and Asia are studied from an historical and contemporary perspective to understand city form, culture, politics, economics and function, ecology and sustainability. Material covered includes: the origin and role of cities; the nature of city formation and change; examples of the history of cities across various cultures; the nature of contemporary cities; the role of architecture in the city; cities and culture; theories for contemporary and future cities.

**Courses:** AR48  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB014 CONTEXTUAL STUDIES 4**

Contemporary Thinking and Architectural Culture. This unit aims to consolidate for students a theoretical contemporary framework in which to locate key moments in contemporary, architectural and cultural production from diverse contexts. It introduces students to contemporary debates and endeavour to de-mystify the language of contemporary architectural ideas and aesthetics in order to promote self-directed interest in contemporary theory and criticism.

**Courses:** AR48  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB021 TECHNOLOGY AND SCIENCE 1**

A study of the properties and behaviour of common building materials and the historical development of building technologies. Basic structural systems; behaviour of structures and members under load; application of knowledge in design exercises and models.

**Courses:** BN31, AR48 **Prerequisites:** ADB921  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB022 TECHNOLOGY AND SCIENCE 2**

Detailed consideration of domestic scale building; basic design for climate; energy conservation. The implications of the principles of the subject on the form and fabric of buildings are illustrated.

**Courses:** BN31, AR48 **Prerequisites:** ADB021  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB023 TECHNOLOGY AND SCIENCE 3**

Detailed consideration of domestic scale building; design for natural ventilation, lighting, acoustics and solar controls; implications of principles of the subject on the form and fabric of buildings are illustrated.

**Courses:** BN31, AR48 **Prerequisites:** ADB022  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB024 TECHNOLOGY AND SCIENCE 4**

Building construction: an overview of construction systems used in low to medium rise industrial and commercial buildings. Structures: overview of structural considerations in steel and reinforced concrete structural systems.

**Courses:** BN31, AR48 **Prerequisites:** ADB023  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB025 TECHNOLOGY AND SCIENCE 5**

Building Construction: an overview of construction systems used in medium to high-rise commercial buildings, including analysis of principles, advantages, disadvantages and details of such systems. Services: an integrated overview of medium to high-rise building services including hydraulics, lighting, electrical services, mechanical equipment and vertical transportation.

**Courses:** AR48 **Prerequisites:** ADB024  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB026 TECHNOLOGY AND SCIENCE 6**

Topics include a case study of the building type being studied in ADB007, working with engineering consultants and the programming of work.

**Courses:** AR48 **Prerequisites:** ADB025  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB031 PROFESSIONAL STUDIES 1**

Theory: analysis of various concepts of professionalism, characteristics of professions, discussion of various contemporary critiques of architectural practice. Estimating: choice of technique, accuracy, square and cube rates, cost control, feasibility, quantity surveying. Specification: role of specification.

**Courses:** AR48  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB033 PROFESSIONAL STUDIES 3**

Self-paced national course (BPA 2) prepared by the Royal Australian Institute of Architects as a Continuing Education program which will attract certification from the RAIA. The course will cover ethical, administrative and management issues in relation to architectural practice.

**Courses:** AR48 **Prerequisites:** ADB932  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB051 ARCHITECTURAL RESEARCH 1**

Unit will provide students with an overview of research methodology. Students will examine the differences between various research methods and product. A number of issues will be addressed in the elected area of research including, definition of study area; research aims and objectives, initial proposition, structuring research approach, analysis and preliminary conclusions based on literature review.

**Courses:** AR48  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **ADB052 ARCHITECTURAL RESEARCH 2**

Students continue their studies on an approved topic commenced in Architectural Research 1. By means of a thesis presentation students will demonstrate their ability to define and logically argue propositions, and to conduct research to prove its validity by means of a well-constructed research project including critical analysis.

**Courses:** AR48 **Prerequisites:** ADB051

## UNIT SYNOPSES

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

► **ADB053 ARCHITECTURAL PROJECT**

The major project selected by students and approved by the Unit Coordinator, will have a focus work study that demonstrates the particular skills and interests of the individual. This work should be completed to a highly developed and resolved standard.

**Courses:** AR48            **Prerequisites:** ADB052  
**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB061 ARCHITECTURAL APPLICATIONS 1**

The unit will be used to increase the students' experience in applying theory to architectural problems. Study of materials; anthropometrics and ergonomics, and architectural ideas through drawings and models.

**Courses:** BN31  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB062 ARCHITECTURAL APPLICATIONS 2**

The unit will be used to increase the student's experience in applying theory to architectural problems. Study of materials, structures, and architectural ideas through drawings and models.

**Courses:** BN31            **Prerequisites:** ADB061  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB063 ARCHITECTURAL APPLICATIONS 3**

The unit will be used to increase the student's experience in applying theory to architectural problems, including site analysis, levels and contours; practical experiments in Design Science; construction detailing and documentation through drawings, models and computer simulation.

**Prerequisites:** ADB062  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB064 ARCHITECTURAL APPLICATIONS 4**

This unit will be used to increase the student's experience in applying theory to architectural problems. A series of exercises in construction detailing and documentation.

**Prerequisites:** ADB063  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB065 ARCHITECTURAL APPLICATIONS 5**

The unit will be used to increase the student's experience in applying theory to architectural problems. A series of exercises in construction detailing and documentation.

**Prerequisites:** ADB064  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB066 ARCHITECTURAL APPLICATIONS 6**

The unit will be used to increase the student's experience in applying theory to architectural problems. A series of exercises in construction detailing and documentation.

**Prerequisites:** ADB065  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB067 ELECTIVE ARCHITECTURAL APPLICATIONS**

This unit provides an opportunity for students to develop and strengthen areas of interest in a program of their choice, to be approved by the Course Coordinator, for example: develop Architectural Research 2 program to the presentation of a dissertation; or enhance knowledge and skills in other subject areas.

**Courses:** AR48  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB101 INTERIOR DESIGN 1**

Through exercises involving physical, historical, social and cultural constraints; person-environment analysis; and personal reflection, there is the opportunity to integrate material from

associated units and to begin to develop a basic awareness of a designer's role and responsibilities.

**Courses:** BN31  
**Contact hours:** 7 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB102 INTERIOR DESIGN 2**

Content includes: the visual and physical attributes of form; perceptual principles of organisation; person-environment interaction with a focus on the physical, social and temporal aspects of environment; and aesthetics and its relevance to person-environment interaction.

**Courses:** BN31            **Prerequisites:** ADB101  
**Contact hours:** 7 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB103 INTERIOR DESIGN 3**

The content covered in this unit includes: an introduction to the theoretical constructs of person-environment interaction and modes of interaction incorporating theories from disciplines including philosophy, psychology, social science and cultural and communication studies; other conceptual frameworks will be introduced and explored including modernism, post-modernism, feminism and pluralism; issues of designing incorporating site, values, activities and technology.

**Courses:** BN31  
**Prerequisites:** ADB102  
**Corequisites:** ADB123

**Contact hours:** 6 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB104 INTERIOR DESIGN 4**

The content covered in this unit includes: ethics and topical social issues; the responsibilities of a designer in a contemporary context; application and development of an integrated design approach explicitly informed by theory, philosophy, ethics and current demands and considerations.

**Courses:** BN31            **Prerequisites:** ADB103  
**Corequisites:** ADB124  
**Contact hours:** 6 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB105 INTERIOR DESIGN 5**

The content covered in this unit includes: designing as practice; law as it relates philosophically and conceptually to the built environment and people's relationship with the built environment; the work of national and international designers: a critical approach; tools for fostering alternative ways of thinking and imagining person-environment interaction; and futuristic material.

**Courses:** BN31            **Prerequisites:** ADB104  
**Corequisites:** ADB125  
**Contact hours:** 6 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

► **ADB106 INTERIOR DESIGN 6**

The content covered in this unit includes: major aspects covered in the course to date; content identified by the student as significant in their response to the project.

**Prerequisites:** ADB105  
**Corequisites:** ADB126  
**Contact hours:** 6 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB122 INTERIOR TECHNOLOGY 1**

Content includes: domestic building construction processes and materials; manufacturing processes and performance; introductory technical drawing; measurement and recording of building environments; and application of recorded material. CAD as a construct and its role in practice.

**Courses:** BN31            **Prerequisites:** ADB921  
**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB123 INTERIOR TECHNOLOGY 2**

The content covered in this unit includes: documentation; analysis and recording of small-scale commercial interiors; building regulations and their relationship to public responsibility; building materials; and sustainability.

**Courses:** BN31            **Prerequisites:** ADB122  
**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB124 INTERIOR TECHNOLOGY 3**

The content covered in this unit includes: documentation techniques; sustainable design and

construction; services; and consultants, codes and standards.

**Courses:** BN31            **Prerequisites:** ADB123  
**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB125 INTERIOR TECHNOLOGY 4**

The content covered in this unit includes: theoretical analysis of interior construction and materials; analysis of partition and furniture systems; comparative analysis of building types; CAD documentation; basic estimating and quoting; introductory specification writing.

**Courses:** BN31            **Prerequisites:** ADB124  
**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB126 INTERIOR TECHNOLOGY 5**

The content covered in this unit includes: documentation; critical investigation of interior construction processes; environmental system analysis; the interface with consultants, builders and contractors; leasing and other tenancy occupation issues.

**Courses:** BN31            **Prerequisites:** ADB125  
**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB132 DESIGN IN SOCIETY 1**

Issues of the international design community will be explored. The historical framework will be reassessed in relation to changing technology, communication, transport systems and the advent of shifts in space and time such as virtual reality. The merging of cultures and understandings of design will be critiqued in the light of its potential to influence the contemporary and future designer. Specific attention will be given to interior design. Other aspects involved include belief systems and their influence on design and design practice (eg economic rationalism, capitalism, modernism, etc).

**Courses:** BN31  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **ADB133 DESIGN IN SOCIETY 2**

Issues to be covered include: the current context of the contemporary Australian interior designer; theoretical perspectives and exploration of their limitations and potential; relevant legal issues, ethics and professionalism.

**Courses:** BN31  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB151 DRAWING AS COMMUNICATION**

Addresses the theoretical aspects of communication generally and in relation to drawing. It will focus on the relationship between drawing and the design processes of imagining, representing and testing and it will introduce students to various drawing techniques and media.

**Courses:** BN31  
**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **ADB152 LIGHT AND COLOUR STUDIES**

Content includes: the interdependence of light and colour; the physical properties of colour; the psychological and cultural dimensions of colour; and colour and its relationship with expression and aesthetics.

**Courses:** BN31  
**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

► **ADB153 MATERIAL STUDIES**

Content to be addressed includes: textile manufacture and application; interior decorative finishes; building codes and standards relevant to material quality and performance; documentation and specification of finishes and fittings; the relationship between design technology and material selection; and the role of contextual frameworks on designers' decisions in regard to materials.

**Courses:** BN31  
**Corequisites:** 12  
**Credit points:** 3 hour per week  
**Campus offered:** GP            **Semester:** 2

► **ADB154 FURNITURE STUDIES**  
Content to be addressed includes: a focus on visual cues, psychological responses and other interaction factors through an historical analysis of the role of furniture design; furniture and contemporary and future trends; and furniture design and documentation approaches.  
**Courses:** BN31  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB201 INTRODUCTORY INDUSTRIAL DESIGN 1**  
Major topics include basic design elements and principles; three-dimensional visualisation of objects; design concept development; drawing as a design and communication tool, with an emphasis on marker rendering techniques and sketching techniques; design presentation; and engineering drawing basics.  
**Courses:** BN31  
**Corequisites:** ADB241  
**Contact hours:** 7 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB202 INTRODUCTORY INDUSTRIAL DESIGN 2**  
Introduction to basic Industrial design elements and principles, three-dimensional visualisation and Industrial design, concept development of simple products, product aesthetics, drawing as a design tool and communication tool, with an emphasis on perspective sketching techniques, engineering drawing basics.  
**Courses:** BN31  
**Prerequisites:** ADB201  
**Contact hours:** 7 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB203 INDUSTRIAL DESIGN 1**  
The studio exercises to which most of the time is devoted are aimed at a range of different product designs. The following theoretical topics are associated with them: scope of problem solving theory, special characteristics of design problems, design and application transfer, design heuristic, creativity on innovation and general psychological theories of creativity, visual thinking and the design process, design ethics and culture, and designer's responsibilities toward the environment.  
**Courses:** BN31  
**Prerequisites:** ADB202  
**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB204 INDUSTRIAL DESIGN 2**  
The studio exercises to which most of the time is devoted will aim at a range of different product designs. The following theoretical topics are associated with them: methodological issues of design, design process and creative thinking, creativity and product innovation, design ethics and culture, and designer's responsibilities toward the environment. The complexity and depth of the design project will increase systematically according to the semester level.  
**Courses:** BN31  
**Prerequisites:** ADB203  
**Corequisites:** ADB224  
**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB205 INDUSTRIAL DESIGN 3**  
The studio exercises to which most of the time is devoted will aim toward design of products or systems in depth. The emphasis is on integration of knowledge and skills acquired in the previous semesters. The following theoretical topics are associated with them: methodological issues of design, design process and creative thinking, creativity and product innovation, working with an industry client, interdisciplinary teamwork, design ethics and culture, and the designer's responsibilities toward the environment.  
**Courses:** BN31  
**Prerequisites:** ADB204  
**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB206 INDUSTRIAL DESIGN 4**  
The studio exercises aim toward design of products or systems in depth. The emphasis is on integration of knowledge and skills acquired in the previous semesters. The following theoretical topics are associated with them: methodological issues of design, design process and creative thinking, creativity and product innovation, work

with an industry client, interdisciplinary teamwork, design ethics and culture, and designer's responsibilities toward the environment.  
**Courses:** BN31  
**Prerequisites:** ADB205  
**Corequisites:** ADB226, ADB236  
**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB212 ERGONOMICS FOR INDUSTRIAL DESIGNERS**  
The principles of ergonomics and human factors as applied to industrial design, hand tool design, environmental factors, human-information processing, ergonomic methods, display and control design, interface design, designing for safety and product usability.  
**Courses:** BN31  
**Prerequisites:** ADB911  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB224 INDUSTRIAL DESIGN HISTORY THEORY AND CRITICISM 1**  
Pre-historical artifacts and their evolutions; innovations in Asia; arts and crafts movement; development of mass-production and its impact to the society; social and cultural changes influenced by design; design and politics; ideology of industrialisation.  
**Courses:** BN31  
**Corequisites:** ADB204  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB226 INDUSTRIAL DESIGN HISTORY THEORY AND CRITICISM 2**  
Product evolution; Australian inventions; contemporary design; social and cultural changes influenced by design; design and politics; ideology of industrialisation; the meaning of products; designers' responsibilities toward the users and environment; design activity and design knowledge.  
**Courses:** BN31  
**Prerequisites:** ADB224  
**Corequisites:** ADB206  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB232 DESIGN TECHNOLOGY AND SOCIETY**  
Introduction to applied technologies and how they relate to industrial design and society in general, renewable and non-renewable resources, social change and life styles, use of resources and ecosystems, sustainability and its relation to industrial design, alternative technologies as related to industrial design; and the relationship between social and technological change and industrial design.  
**Courses:** BN31  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB233 MANUFACTURING TECHNOLOGY 1**  
Application of engineering mechanisms to products or systems, analysis of the performances of mechanical, electrical, hydraulic and pneumatic mechanisms in relation to particular functions, modelling methods and techniques for determining the behaviour of a system or product. Introduction to electronics, plastics manufacturing techniques, the relations between the properties of material and the industrial processes available for their fabrication. Introduction to technical documentation and communication.  
**Courses:** BN31  
**Prerequisites:** ADB921  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB234 MANUFACTURING TECHNOLOGY 2**  
Electronics, plastic, production techniques in relation to different materials, various methods for different finishing operations, various methods for forming, automatic and semi-automatic assembly quality control methods, production cost, field studies consist of site visits to selected manufacturing industries, technical documentation and communication.  
**Courses:** BN31  
**Prerequisites:** ADB233  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB235 MANUFACTURING TECHNOLOGY 3**  
Product analysis, product development strategies, industrial production economics, organisation, planning and technologies required for advanced manufacturing and its impact to product design solutions.  
**Courses:** BN31  
**Prerequisites:** ADB234  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB236 MANUFACTURING TECHNOLOGY 4**  
Value analysis, technical documentation and communication. Field studies compliment the lecture series.  
**Courses:** BN31  
**Prerequisites:** ADB235  
**Corequisites:** ADB206  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB241 INDUSTRIAL DESIGN APPLICATIONS**  
Introduction to application of basic industrial design skills and knowledge, industrial design case studies and field studies  
**Courses:** BN31  
**Corequisites:** ADB201  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB244 COMPUTER AIDED INDUSTRIAL DESIGN 1**  
Overview of the development of the use of Computer Aided Industrial Design by industrial designers in the design process, application of CAID to 3D solid modelling concepts, 3D spatial relationships, design documentation, 3D model to 2D engineering drawings, development of skills in the use of Computer Aided Industrial Design (CAID) for evaluating, documenting and presenting design proposals through computer rendered and animated images.  
**Courses:** BN31  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADB245 COMPUTER AIDED INDUSTRIAL DESIGN 2**  
Introduction to 3D surface modelling concepts for complex form development and documentation, introduction to NURBS based surface modelling, case studies on CAID as applied to industrial design, application of complex 3D Surface modelling techniques, as applied to design form evaluations and form refinement using rapid prototyping, further development of shading techniques, advanced animation, design documentation.  
**Courses:** BN31  
**Prerequisites:** ADB244  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB795 PRACTICE EXPERIENCE A**  
The practice experience partnership with the architectural profession will enable the students to increase their skills in the practical application of theory in 'real life' architectural projects.  
**Courses:** AR48  
**Credit points:** 36 **Semester:** 1, 2

► **ADB796 PRACTICE EXPERIENCE B**  
Under the practice experience partnership with the architectural profession the advanced student will progressively become an understudy of the architect and be exposed to all aspects of the profession.  
**Courses:** AR48  
**Credit points:** 60 **Semester:** 1, 2

► **ADB911 HUMAN ENVIRONMENT 1**  
Contemporary environmental issues: global warming, population explosion, pollution, energy conservation, sustainability; anthropometrics and statistics, basic ergonomic principles; and requirements of special needs groups.  
**Courses:** BN31, AR48  
**Corequisites:** ADB101, ADB921  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **ADB912 HUMAN ENVIRONMENT 2**  
The unit focuses on the following: psychosocial issues and privacy, perception, personal space, territoriality, cognition, way finding and cultural diversity.

## UNIT SYNOPSES

**Courses:** BN31      **Prerequisites:** ADB911  
**Corequisites:** ADB013 (Arch),  
 ADB123 (IntDes)  
**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADB913 HUMAN ENVIRONMENT 3**

Theories of cultural development and social change; consideration of the role of designed artifacts in those processes; political and social theories pertaining to design and development of the built environment; contemporary theories of post-industrialism, post-colonialism and multiculturalism; implications for design for the built environment; the roles and responsibilities of design professionals, historically and in contemporary society.

**Courses:** BN31, AR48      **Prerequisites:** ADB912  
**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADB921 TECHNOLOGY AND SCIENCE FOUNDATION**

Introduction to physical principles relevant to the built environment design disciplines, including mechanics, statics, electricity, fluids, light and colour, heat and sound; basic chemical properties of materials; mathematics as related to the design disciplines; discipline applications.

**Courses:** BN31, AR48  
**Corequisites:** ADB911, ADB101  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADB931 INTRODUCTION TO HISTORY, THEORY AND CRITICISM**

This unit is a survey course of principal developments in the history and theory of design and the built environment from the earliest civilisation to the closing of the 19th century. Lectures will examine key buildings, ideas and artefacts and the aesthetic, technological, environmental, socio-cultural and political factors that related to their production. Examples are drawn from European and non-European (notably Asian) contexts.

**Courses:** BN31, AR48  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 2

► **ADB932 PROFESSIONAL STUDIES 2**

Unit offers a self-paced national course (BPA 1) prepared by the RAIAs as a basis for the formal examination for registration as an Architect. Covers the context of profession, professional ethics, and the range of professional services from engagement to completion of a project. Completion of course will attract RAIAs certification.

**Courses:** AR48  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADB941 ELECTIVE 1**

The student will choose elective units to extend and expand an area of knowledge or experience to develop in depth a particular professional expertise. These units may be drawn from an existing range of units available within the School. The electives are to be approved by the Course Coordinator.

**Courses:** BN31  
**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADB942 ELECTIVE 2**

The student will choose elective units to extend and expand an area of knowledge or experience to develop in depth a particular professional expertise. These units may be drawn from an existing range of units available within the School, Faculty or University. The electives are to be approved by the Course Coordinator.

**Courses:** BN31  
**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADB943 ELECTIVE 3**

Elective units chosen will extend and expand an area of knowledge or experience to develop in depth a particular professional expertise. Units may be drawn from an existing range of units available within the University and must be approved by the Course Coordinator.

**Courses:** BN31, AR48

**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADB944 ELECTIVE 4**

Elective units chosen will extend and expand an area of knowledge or experience to develop in depth a particular professional expertise. Units may be drawn from an existing range of units available within the University and must be approved by the Course Coordinator.

**Courses:** BN31, AR48  
**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADP107 INTERIOR DESIGN 7**

This unit provides students with the opportunity to pursue a topic of personal and professional relevance in consultation with staff. The topic will form the focus of a major design/research project incorporating this unit and ADB108. The unit covers topic identification, qualification and substantiation, context exploration and consolidation.

**Courses:** AR62  
**Prerequisites:** ADB106      **Corequisites:** ADP161  
**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADP108 INTERIOR DESIGN 8**

This unit provides students with the opportunity to develop an in-depth understanding of an area of interior design of personal and professional relevance in consultation with staff. The unit covers project development and the exploration of associated issues.

**Courses:** AR62  
**Prerequisites:** ADB107      **Corequisites:** ADP162  
**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADP114 PROFESSIONAL STUDIES 1**

This unit addresses the interior design profession, its organisation and theoretical and practical relationship with other professions and disciplines; professionalism incorporating ethics, industry product safety standards and continuing education; specific responsibilities involving brief development; and post-occupancy evaluation.

**Courses:** AR62  
**Prerequisites:** ADB913, ADP106  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADP155 INTERIOR AS A CONSTRUCT 1**

Designers require a deep conceptual understanding of the relationship between artefact and culture and they need a vehicle for supporting this development. The focus in this unit is on the conservation of historic interiors and includes: historic interior exemplars; social and cultural identity; conservation; preservation and restoration; and relevant charters and policies.

**Courses:** AR62  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADP156 INTERIOR AS A CONSTRUCT 2**

In this unit, stage design will be used as a frame-of-reference for exploring various aspects of person-environment interaction such as play and imagining. In addition, the unit provides a basis for exploring notions of temporary, transitory space and virtual reality.

**Courses:** AR62      **Prerequisites:** ADP155  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 2

► **ADP161 INTERIOR RESEARCH 1**

This unit provides methodological support for the major project in ADP107. It covers empirical research with an emphasis on qualitative research relevant to person-environment interaction; research rigour incorporating attention to validity, reliability and generalisation; advanced information retrieval; literature searching and review.

**Courses:** AR62  
**Prerequisites:** ADB106 or equivalent  
**Corequisites:** ADP107  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADP162 INTERIOR RESEARCH 2**

This unit provides methodological support for the major project in ADP108. The ability to undertake empirical research is considered an inte-

gral aspect of responsible designing. The unit content covers data collection, analysis and reporting.

**Courses:** AR62  
**Prerequisites:** ADB107 or equivalent  
**Corequisites:** ADP108  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADP207 INDUSTRIAL DESIGN 5**

The studio exercises to which most of the time is devoted will aim toward design of products or systems in depth. The emphasis is on integration of knowledge and skills acquired in the previous semesters. The following theoretical topics are associated with them: design process and creative thinking; applied research, creativity and product innovation, work with a client, multidisciplinary teamwork, product integration and development, design ethics and culture, and designer's responsibilities toward the environment.

**Courses:** AR61  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADP217 PROFESSIONAL PRACTICE AND MANAGEMENT**

The role of professional practice management; management of design projects; type of contracts, design documentation; role of design administration; liability; design law; intellectual property; designer-client relationships.

**Courses:** AR61  
**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADP218 ADVANCED ERGONOMICS**

Basics of cognitive ergonomics, product useability evaluation methods and their applications, case studies.

**Courses:** AR61  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 2

► **ADP247 ADVANCED COMPUTER AIDED INDUSTRIAL DESIGN**

Introduction to parametric based modelling, introduction to hybrid based modelling, application of rapid prototyping and rapid tooling to the design process, application of concurrent engineering to the design process.

**Courses:** AR61  
**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **ADP267 INDUSTRIAL DESIGN RESEARCH 1**

The unit consists of the applied research topic selected by a student approved and supervised by the industrial design staff. External specialists may be involved as requires.

**Courses:** AR61  
**Contact hours:** 5 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADP268 INDUSTRIAL DESIGN RESEARCH 2A**

This unit depends on the topic selected by a student in the previous semester. Students are responsible for the program as a part of their project work, which will be approved and supervised by the industrial design staff.

**Courses:** AR61  
**Prerequisites:** ADP207, ADP267  
**Corequisites:** ADP269  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADP269 INDUSTRIAL DESIGN RESEARCH 2B**

This unit depends on the topic selected by a student in the previous semester. Students are responsible for the program as a part of their project work, which will be approved and supervised by the industrial design staff.

**Courses:** AR61  
**Prerequisites:** ADP207, ADP267  
**Corequisites:** ADP268  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **ADP932 PROFESSIONAL STUDIES 2**

Unit offers a self-paced national course (BPA 1) prepared by the RAIAs as a basis for the formal examination for registration as an Architect.

Covers the context of profession, professional ethics, and the range of professional services from engagement to completion of a project. Completion of course will attract RAI A certification.

**Courses:** AR62 **Prerequisites:** ADP114  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **ADP943 ELECTIVE 3**

The student will choose elective units to extend and expand an area of knowledge or experience to develop in depth a particular professional expertise. These units may be drawn from an existing range of units available within the Faculty and University. The electives are to be approved by the Course Coordinator.

**Courses:** AR61  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **AMB200 CONSUMER BEHAVIOUR**

This unit provides students with the fundamental theories and models to develop a sound understanding of consumers, their needs, and behaviours. It provides a detailed examination of the consumer decision process and the internal and external influences on this core decision process. The unit also assists students in applying this knowledge to the development, implementation and evaluation of marketing activities within an organisation.

**Courses:** BS50, BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB126  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB204  
**Semester:** 1, 2, 3

► **AMB201 MARKET AND AUDIENCE RESEARCH**

This unit provides an introduction to the conduct and evaluation of marketing and audience research. Students explore how field studies, survey and experimental research are employed in strategic planning and evaluation to support advertising, marketing and public relation information needs. The unit provides a thorough grounding in research process, research design, and the development and presentation of research proposals. The unit explores in detail, methods of gathering and analysing data. Students also explore issues related to research ethics and the management of client briefings.

**Courses:** BS50, BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB126  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB305  
**Campus offered:** GP **Semester:** 1, 2, 3

► **AMB202 INTEGRATED MARKETING COMMUNICATION**

In past decades many marketers separated the various marketing and promotional functions. They planned and managed them separately with separate budgets, separate goals and objectives, and separate views of the market. Today many companies recognise the concept of integrated marketing communication, which coordinates the various promotional elements along with other marketing activities that communicate with customers. Integrated marketing communication requires a 'total' approach to planning marketing and promotion programs and coordinating communication functions.

**Courses:** BS50, BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB126  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** COB207  
**Campus offered:** GP **Semester:** 1, 2

► **AMB203 INDEPENDENT STUDY**

An opportunity for advanced level undergraduate students to undertake individual research in an area which is complementary to their course work.

**Courses:** BS56  
**Prerequisites:** Prior approval from the Head of School  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** COB206  
**Campus offered:** GP **Semester:** 1, 2

► **AMB220 ADVERTISING THEORY AND PRACTICE**

This unit serves as an introduction to later units in the advertising major and gives learners an overview of the advertising industry and the management of the advertising function. The unit traverses the interrelationship of the institutions of advertising, the advertisers, the advertising agencies and the media. It introduces research and details methods of determining advertising objectives, budgets, establishing target audiences, interpreting audience ratings and circulation figures, and enables learners to gain a preliminary understanding of the creative functions of the advertising industry. It also shows the ethical and legal side of advertising and its important role in society and the economy.

**Courses:** BS50, BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF 61, IF62  
**Prerequisites:** BSB126; or 48 credit points of approved prior study for non-Bachelor of Business students only

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** COB308  
**Campus offered:** GP **Semester:** 1, 2

► **AMB221 ADVERTISING COPYWRITING**

This unit is an important base for further study in advertising and is one of the foundation areas of advertising. Students are introduced to the principles, theory, research and practice relating to the creation of advertisements. The unit begins with an understanding of the creative process and its role in developing creative strategy. The duties of the advertising copywriter are examined as is the relationship between advertising copy and art. Practical work involves the writing, setting and presentation of copy for print advertising for manufacturers, service industries and the retail sector. Case briefs for assignments are presented to students by advertisers or advertising agency executives. Finished presentations are then made to these professionals.

**Courses:** BS50, BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB220  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** COB304  
**Campus offered:** GP **Semester:** 1, 2

► **AMB222 MEDIA PLANNING**

This unit introduces the qualitative and quantitative factors affecting media selection and use by advertisers. It covers the costing and scheduling of media, market targeting, measuring media exposure, media comparisons and trends. In-depth analysis of advertising media will allow learners to develop an understanding of the characteristics of each. The application of the concepts of media decision making, media strategy and research to the development of a media plan will be emphasised.

**Courses:** BS50, BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB220  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** COB317  
**Campus offered:** GP **Semester:** 1, 2

► **AMB230 INTERNET PROMOTION**

This unit addresses an important new area of business activity and explores the way in which the Internet is changing marketing communication practice. It examines the nature, history and social implications of the Internet and mobile technology, including ethical and legal issues and security as they apply to business practices. The impact of the Internet on consumer behaviour and how this translates into the marketing mix and marketing communications is analysed. Learners will develop skills in strategic planning, creative strategy and design, media planning, research and campaign evaluation.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62  
**Prerequisites:** BSB119; or 48 credit points of approved prior study for non-Business students only

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** COB218  
**Campus offered:** GP **Semester:** 1, 2

► **AMB231 MARKETING COMMUNICATIONS REGULATIONS AND ETHICS**

This unit uses a case study approach and starts from the fundamentals of legal compliance through trade practices and fair trading legislation, then moves to the adoption and adherence of the variety of industry based and professional codes. It examines regulatory models in sunrise industries such as broadcasting and telecommunications as well as the problems of cross-jurisdictional regulation posed by Internet based commerce. It offers students the opportunity to develop generic attributes in critical thinking, problem solving, and ethical sensitivity.

**Courses:** BS50, BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF61, IF62  
**Prerequisites:** AMB220 or AMB240 or AMB260

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** COB307  
**Campus offered:** GP **Semester:** 2

► **AMB240 MARKETING PLANNING AND MANAGEMENT**

This unit extends the student's knowledge of the fundamental marketing concepts and theories introduced in the Faculty Core unit in Marketing, by adding further breadth and depth of knowledge of marketing and developing skills in the application of this knowledge to marketing planning and management within the business environment. Emphasis is on the role of the marketing manager at the product management level in undertaking analysis, planning, implementation and control of marketing activities. Application skills are learned through the development of a marketing plan incorporating the pivotal steps of: environmental analysis; sales forecasting and budgeting; market segmentation, targeting and positioning; consumer analysis; setting marketing objectives; product development and management; promotion; distribution; pricing and the various implementation and control issues.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB126  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB217  
**Campus offered:** GP **Semester:** 1, 2

► **AMB241 E-MARKETING STRATEGIES**

E-Business and mobile commerce technologies have emerged as defining technologies for companies in the 21st century. This unit focuses on e-marketing applications and strategies and the marketer's role in developing solutions that integrate new and old economies. Drawing on their knowledge of marketing principles, students will examine the diverse applications of technology in product and service design; product distribution/service delivery and logistics; promotional strategies and other marketing components. The unit also explores the role of emerging electronic models and the use of e-marketing strategies to achieve global competitive advantage.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB240  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB224  
**Campus offered:** GP **Semester:** 1, 2

► **AMB250 BUSINESS TO BUSINESS MARKETING**

This unit addresses the special characteristics of Business markets and Business-to-Business (B2B) marketing programs. It involves the study of organisational buyer behaviour and the special customer/client relationships that form an important part of the Business-to-Business marketing process. Business markets constitute a powerful and essential part of the world economy, being a preliminary source for retailing and manufacturing operations and the force behind major services sectors in supplying government and non-government services including health and education both domestically and internationally.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62  
**Prerequisites:** AMB240

## UNIT SYNOPSES

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** MIB220  
**Campus offered:** GP                      **Semester:** 1

### ► AMB251 INNOVATION AND MARKET DEVELOPMENT

This unit covers the dynamics of product innovation and market development within the mix of core marketing activities in organisations operating in both national and international markets. Products are defined in the broadest sense to include both tangible and intangible and the various categories of consumer, industrial, services, events and so on. The course covers such areas as product market analysis, the product development process, design, innovation, research and testing, branding and packaging, and investment analysis. The learning methodology will be mostly experiential and may include some hands-on computer usage, visits to industry where relevant and specific practical exercises.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62  
**Prerequisites:** BSB126

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** MIB227  
**Campus offered:** GP                      **Semester:** 1, 2

### ► AMB260 PUBLIC RELATIONS THEORY AND PRACTICE

This unit introduces the student to the theory and research that serves as the foundation of the practice of public relations. The unit surveys the history of the discipline, the theories on which the discipline is based, and current models of practice. The unit focuses on understanding how to research and analyse the opinions of organisational publics in order to develop mutually beneficial relationships with those publics.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB126; or 48 credit points of approved prior study for non-Bachelor of Business students only

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** COB325  
**Campus offered:** GP                      **Semester:** 1, 2

### ► AMB261 MEDIA RELATIONS AND PUBLICITY

This unit will reflect the strong emphasis within public relations practice of media relations. It will introduce students to the theory of media effects and the role of mass media in public opinion formation and how these concepts contribute to campaign planning. It will also provide students with practical instruction in the development of media tools including media releases, media kits and media plans, and the use of publicity events in campaigns. New/interactive media will also be addressed.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB260

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** COB329  
**Campus offered:** GP                      **Semester:** 1, 2

### ► AMB262 PUBLIC RELATIONS WRITING

This unit will introduce students to a range of public relations writing needs. With heavy practical emphasis, the students will create a substantial portfolio of writing across controlled and uncontrolled media. Writing for print and electronic forms will be covered as well as new/interactive media. The writing process will be examined from the perspective of audience needs and emphasis will be placed on the research components of writing exercise as well as the writing/rewriting cycle.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB260

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** COB326  
**Campus offered:** GP                      **Semester:** 1, 2

### ► AMB280 MARKETING LOGISTICS

Marketing Logistics provides an introduction to the study of logistics and its role in marketing. Marketing logistics is concerned with the planning, development, maintenance and control of the system of supply and distribution activities

that place the organisation's product or service in the hands of its customers. The subject is designed to enable students to understand the importance of logistics, and make improvements that will increase customer service and reduce distribution costs. The subject involves the application of models and techniques concerned with product flow from producer to consumer and covers: purchasing and procurement, manufacturing and distribution strategies, quality, inventory costs and control, warehousing and transportation, location, and international logistics issues. Plant visits are an important part of the learning process.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB126

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** MIB215  
**Campus offered:** GP

### ► AMB281 PROMOTIONAL STRATEGY

This unit introduces students to theories of promotional strategy within the marketing mix and more contemporary concepts of integrated marketing communication are reviewed in this subject. An analysis of the corporate and marketing strategies and decisions serves as the basis for studying branding, positioning and unique selling propositions as they affect promotional strategy and the choice of promotional mediums, tactical solutions and related planning. The development of integrated marketing communications strategies within organisations including planned communication, management of unplanned messages and other marketing functions, which contribute to brand image, are initially examined. More focused studies of the contemporary roles of public relations, advertising, sales promotion, personal selling and direct marketing are then undertaken.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB126

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** MIB228  
**Campus offered:** GP

### ► AMB310 INTERNSHIP

Provides the student with experience of professional practice in a suitable company where they actively work on a part-time basis. Students undertake a preferred study program within the Advertising, Marketing or Public Relations framework. Students are required to submit a number of reports reflecting the theoretical concepts acquired during the degree program, and how they might be applied in practice. Students must obtain the approval of the Major Coordinator prior to enrolling in this unit.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61

**Prerequisites:** AMB221 and AMB222 or AMB241 or AMB261 and AMB262 and subject to the approval of the Major Coordinator  
**Corequisites:** AMB320 or AMB340 or AMB360

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** COB320 or COB321, or MIB308

**Campus offered:** GP                      **Semester:** 1, 2

### ► AMB320 ADVERTISING MANAGEMENT

This unit takes the perspective of the Advertising Manager and addresses the use of research in developing, implementing, managing, and assessing a successful advertising campaign. In Advertising Management, learners use the case method of learning to examine the advertising process from its place in the marketing mix to the formulation of objectives, strategy and budget to the development of creative and media tactics and their ongoing evaluation. In addition, issues that impinge upon the advertising campaign management process such as legal and ethical issues, globalisation and the client-agency relationship are discussed.

**Courses:** BS50, BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB221 and AMB222

**Contact hours:** 3 per week    **Credit points:** 12

**Incompatible with:** COB306

**Campus offered:** GP

**Semester:** 1, 2

### ► AMB321 ADVERTISING CAMPAIGNS

This co-capstone advertising unit draws from all the theoretical, analytical, and applied material developed throughout the advertising major, and applies it to a client brief. Students develop advertising solutions that incorporate all aspects of an advertising campaign, including objectives, budgeting, message development, message delivery, and measurement. The key emphasis is on the use of research to develop sound advertising strategy, which is then executed as creative and media ideas and evaluated through ongoing benchmarks.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB221 and AMB222

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** COB303  
**Campus offered:** GP                      **Semester:** 1, 2

### ► AMB330 ADVERTISING STRATEGY AND PLANNING

This advanced unit builds on the theoretical perspectives and applied skills introduced to students in copywriting, media and advertising management. It explores important issues such as the contribution of research to the creation of advertising; the hierarchical development of strategy from marketing and IMC strategy through to advertising, media and creative strategy; the role of the strategic planner in advertising and the use of planning to deliver more effective advertising solutions. Using problem-based learning, students establish benchmarks to evaluate advertising copy, type and design and devise strategies for on-time and on-budget process management. Students apply this advanced understanding and skills to their chosen field of advertising management, media or creative.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB221 and AMB222

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** COB300  
**Campus offered:** GP                      **Semester:** 1

### ► AMB331 DIRECT MARKETING

The discipline of direct marketing has grown in importance because of its precise targeting, comparative ease of accountability, its foundation role in integrated marketing communication (IMC) and its increasing share of the marketing communication budget. This unit focuses on the principles of direct marketing and the role of the database in locating prospects, understanding their needs, tracking customers and building stakeholder relationships. It examines the components of direct marketing - telemarketing, personal selling and direct response advertising. As the main communication discipline of direct marketing, the emphasis is on direct response advertising, as students analyse the strategy, creative, media and testing and evaluation of direct marketing campaigns.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB220 or AMB202

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** COB315  
**Campus offered:** GP                      **Semester:** 1

### ► AMB340 SERVICES MARKETING

The services sector accounts for around three quarters of GDP and over 80% of Australia's workforce reflecting global trends in the growth of the sector. This unit explores the special characteristics of services that distinguish the marketing of services from goods. Topics include the distinctive aspects of consumer decision-making relative to services and the implications for marketing strategy formation; the management of demand and supply; customer services and its influence on service satisfaction; service quality management and measurement; internationalisation of the service sector and distribution modes for services which reflect the significant impacts of new technologies on service delivery. The subject provides students with core disciplinary knowledge required in diverse marketing contexts such as professional service firms and con-

## UNIT SYNOPSES

sultancies, finance and banking, public sector services eg Education, Health and the Tourism and Hospitality sector.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB240

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIB311

**Campus offered:** GP

**Semester:** 1, 2

### ► AMB341 STRATEGIC MARKETING

Strategic Marketing is the capstone marketing unit which further extends the knowledge and skills introduced and developed in previous marketing units. Emphasis is on the role of the marketing manager at the corporate and strategic business unit/division levels. Students are exposed to a variety of strategic marketing techniques and issues through lectures and case studies and learn how to adopt and apply these in the business environment at the higher levels of corporate planning and management. Students will develop their knowledge and skills of strategy through using various tools of analysis and strategic decision making. These include: developing and critiquing strategic marketing planning models; analysing internal and external environmental factors; determining what marketing strategy can realistically accomplish for a business; identifying underlying factors that must be considered in developing marketing strategy; discussing problems and their related solutions to achieve strategic marketing success; recognising the importance of a customer focus in developing marketing strategy; and, organising for successful strategy implementation.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF37, IF41, IF48, IF56, IF62, IF72

**Prerequisites:** AMB240

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIB315

**Campus offered:** GP

**Semester:** 1, 2

### ► AMB350 RELATIONSHIP AND SALES MANAGEMENT

Theories related to marketing exchange and the concepts of consumer transactions and relationships and their relative importance in different marketing contexts (eg retail versus business-to-business markets, services and goods) are examined. The growth of customer relationship management including the transition of consumers along the transaction-relationship continuum and the development of accompanying marketing strategies is highlighted. A discussion of the relative emphasis on transactions and/or relationships in interfacing with the market provides a platform for examining the approach to sales management, including personal selling principles and ethics, the setting of sales objectives, selling logistics, account and territory management, sales force planning, recruitment and motivation and evaluation of sales performance.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB240 or AMB202

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIB230

**Campus offered:** GP

**Semester:** 1

### ► AMB351 TOURISM MARKETING

This unit examines the tourism system and the unique characteristics of tourists, segmentation bases for tourist markets, the nature of the tourist destination mix and how marketing is applied within elements of that mix. Services marketing concepts and theories of tourist behaviour are utilised in the analysis of the tourism experience; processes of destination and product development to meet market needs; and, strategy development to accommodate domestic and international tourism marketing environments. Macro-environmental issues impacting on tourism such as sustainability of the industry and environment, the socio-political context in which marketing occurs and global trends in travel are also explored for their marketing implications.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB240

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIB321

**Campus offered:** GP

**Semester:** 2

### ► AMB352 MARKETING DECISION MAKING

The nature of decisions and decision models in specific strategic and tactical areas of marketing management are examined in this unit. Decisions related to sales forecasting, market analysis, product planning, pricing, promotion and distribution are viewed from quantitative and qualitative perspectives. Students are exposed to computer software and analysis skills that aid the marketing decision process and build their analytical skills of direct relevance in marketing practice. The unit also embraces the analysis and application of marketing information systems including database marketing and the Internet as a marketing information resource.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB240

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIB320

**Campus offered:** GP

**Semester:** 2

### ► AMB353 RETAIL MARKETING

This unit focuses on the dynamics of the retailing industry. It provides students with detailed knowledge of the various approaches to how retail marketing is conducted nationally and internationally from both an operational and a strategic perspective. The unit provides a balance of theory and application in topics such as retail institutions and the retail life cycle, store location analysis, store layout, planning and design, merchandising, promotion and stock planning, franchising and industry trends.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB240

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIB229

**Semester:** 2

### ► AMB354 EVENTS MARKETING

Events have become significant strategic marketing tools for positioning products/services, industries, destinations and community interests at the local, national and global levels. Events are both a service product experience and a powerful integrated marketing tool for their private and public sector stakeholders. The unit initially explores various typologies, roles and objectives of events and the profile and motives of event markets and stakeholders. Key topics that are subsequently covered include: processes of attracting or developing the event experience including bidding processes; partnership creation with sponsors, media and community (including volunteers); venue selection and design relative to market/stakeholder needs; ticketing/pricing or access management and imaging the event from an integrated marketing communication perspective. A range of local and international cases is used to illustrate all elements of events marketing strategy.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB240 or AMB202

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIB319

**Campus offered:** GP

**Semester:** 1

### ► AMB360 CORPORATE COMMUNICATION MANAGEMENT

The unit explores the corporate communication management function within an organisation and identifies how decisions about the use of various corporate communication solutions are made. Emphasis will be placed in this unit on the role of corporate communication in management systems, the nature and processes of information management in corporate communication and environmental analysis. The unit will also draw on contemporary issues in corporate communication management including issues management, ethical and legal considerations in practice and the role of corporate communication in organisational change.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB261 and AMB262

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** COB324, AMB382

**Campus offered:** GP

**Semester:** 1, 2

### ► AMB361 PUBLIC RELATIONS CAMPAIGNS

This unit focuses on the public relations campaign planning process from problem identification and research through to strategy development, campaign development and evaluation. It is designed to meet the students' interests in understanding how various campaign elements come together and to test their ability to integrate their prior learning in the introductory theory and practice units. To service the practice elements of public relations implementation, the unit incorporates a number of client service aspects. Students will be expected to research, develop and present their plans. This unit incorporates real world clients to enhance the students' portfolios.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB261 and AMB262

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** COB323, AMB381

**Campus offered:** GP

**Semester:** 1, 2

### ► AMB370 PUBLIC RELATIONS CASES

This unit will provide students with an understanding of a wide range of public relations challenges in order to build a better range of experience with management level organisational issues. Australian and international cases will be used to explore different components of public relations practice.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB261, AMB262

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► AMB371 CORPORATE COMMUNICATION STRATEGIES

This unit provides students with an understanding of the development and analysis of communication strategy in public relations and corporate communication. Students learn theory and practice for systematic analysis of the 'fit' between environmental factors and organisational resources, the resulting communication problems and development of communication strategies. Students integrate theory and research in such areas as media effects, organisational change, diffusion, and persuasion for analysis and development of communication strategy.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62,

**Prerequisites:** AMB261, AMB262

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► AMB381 PUBLIC RELATIONS CAMPAIGNS

A specialist public relations unit allowing students to integrate the tactical subjects taken throughout the public relations course, in a strategic and focused manner. It is practice-based and the lecture program consists of topics covering client relations, use of research, objectives-setting, the managing of campaigns, problem-solving, planning and organising special events and media relations. Specialist practitioners are invited to impart their experience in the field. The major assignment is a campaign for a community organisation which is conducted with students working in small groups.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** AMB382

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** COB323, AMB361

**Campus offered:** GP

**Semester:** 1

### ► AMN400 CONSUMER BEHAVIOUR

This unit provides an introduction to the area of consumer behaviour and a forum for discussion of theory and research in the field. The current state of consumer behaviour research will be reviewed and the identification of some of the emerging trends in the area will be explored through several avenues of assessment. The unit provides the environment for students to conduct their own research in areas that are relevant, of

## UNIT SYNOPSES

interest to them and reflect the interdisciplinary nature of consumer behaviour.

**Courses:** BS39, BS63, BS92, BS93, GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN419

**Campus offered:** GP **Semester:** 1, 2

### ► AMN401 INTEGRATED MARKETING COMMUNICATION

Integrated marketing communication (IMC) is a new discipline that seeks synergistic effect from integrating traditional marketing communication disciplines. This unit explores the development of IMC, looking at reasons for growth, barriers to implementation and organisation issues. Students are introduced to the strategic foundations of IMC, for the communication process to the campaign evaluation. The disciplines of advertising, public relations, direct response and sales promotion are then explored to highlight how each contributes to IMC planning.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** COB421

**Campus offered:** GP **Semester:** 1, 2

### ► AMN403 MARKETING AND SURVEY RESEARCH

This unit provides a detailed overview of marketing research to support decision making in the area of advertising, marketing and public relations. The primary focus of the unit is to build an advanced understanding of the use of survey research to support the descriptive, diagnostic, and predicative information needs of management in such areas as consumer opinions about products and organisational issues, target audience information processing, mass media effects, and public opinion. Students will undertake an in-depth exploration of issues related to survey research design, questionnaire development and administration, sampling, measurement, data analysis including descriptive and multivariate statistics, and the development and presentation of research proposals and results.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN413

**Campus offered:** GP **Semester:** 1, 2

### ► AMN404 READINGS IN INTEGRATED MARKETING COMMUNICATION

The unit provides participants with the opportunity to make a detailed exploration of the literature on a particular topic or problem in the area of Integrated Marketing Communication under the direction of a supervisor. The readings integrate and consolidate theory and research related to IMC and from other studies undertaken in the course. Students undertake a formal and systematic review of literature in a particular problem area of IMC related to their interests, project or thesis. Students may also explore work covered in other specialisations.

**Courses:** BS93 **Prerequisites:** PG only

**Contact hours:** Supervision only

**Credit points:** 12

**Incompatible with:** CON416

**Campus offered:** GP **Semester:** 1, 2, 3

### ► AMN405 CASE STUDIES IN INTEGRATED MARKETING COMMUNICATION

This unit provides students with the opportunity to explore a range of topics related to the integration of the elements of the promotional mix—advertising, personal selling, reseller support, publicity, direct marketing, and sales promotion. Through the use of intensive case study analysis and discussion, students will refine conceptual understanding and analytical skills to explore such IMC topics as brand equity and IMC, IMC approaches to promotions management, organisational issues related to structuring corporate IMC functions, environmental analysis and database marketing to inform IMC planning, and IMC strategies and the development of corporate advantage.

**Courses:** BS39, BS63, BS92, BS93

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

### ► AMN420 ADVERTISING MANAGEMENT

Empowers students to make effective management decisions within the advertising process. It examines the setting of advertising objectives, and the need for coordination of these with marketing, communication and organisational objectives. It develops a sound understanding of advertising regulations and ethics, budgeting, research and campaign coordination. It further examines management's participation in the creative, media and production processes, and the contribution of advertising management to the cohesion and creativity of the agency.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON417

**Campus offered:** GP **Semester:** 1, 2

### ► AMN421 CONTEMPORARY ISSUES IN ADVERTISING

Surveys the intellectual foundations of a number of contemporary issues emerging within the advertising discipline and provides sophisticated, systematic explanations of their societal implications and consequences.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON412

**Campus offered:** GP **Semester:** 1, 2

### ► AMN422 MEDIA STRATEGY

One of the ultimate determinants of the effectiveness of any advertising campaign is the media strategy. This unit examines ways to improve efficiency in media planning, buying, coordination and research. It examines concepts of media decision making, market targeting through the creative use of media, and strategic planning. It explores current media campaigns, and encourages the development of a more creative and integrated approach to media.

**Courses:** BS72, BS88, BS93, BS39

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON418

**Campus offered:** GP **Semester:** 1

### ► AMN423 STRATEGIES FOR CREATIVE ADVERTISING

This unit explores the substantive body of academic research on creative advertising. It follows the creative process, beginning with the development of creative strategy and concluding with campaign evaluation. Through cases and presentations, student examine how copywriters think, the illumination of the big idea and its execution across the very diverse advertising media.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON419

**Campus offered:** GP **Semester:** 2

### ► AMN424 ADVERTISING PLANNING

This unit allows students to integrate their knowledge of advertising acquired through prior studies and professional experience. The unit helps learners develop the skill and perspective to understand and critically analyse the process of planning for the development of advertising campaigns. In addition to learning about the advertising planning process, learners will develop an advertising campaign, including the strategy behind the campaign, its objectives, message and media strategies, investment levels, and methods of evaluation.

**Courses:** BS39, BS72, BS88, BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON419

**Campus offered:** GP **Semester:** 1

### ► AMN442 MARKETING MANAGEMENT

The study of marketing, marketing systems and marketing management and marketing planning within contemporary structure of social, cultural, political, economic, business and organisational environment. Concepts are applied through the

study and construction of a marketing plan, which involves market and sales analysis, target market strategies, tactical decision planning, and implementation and control. Marketing management concepts are applied to virtual and physical markets and attention is given to the range of financial, human resources, informational and other skills needed by marketing managers in these markets.

**Courses:** BS39, BS63, BS92, BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN422

**Campus offered:** GP **Semester:** 1, 2

### ► AMN443 PRODUCT AND SERVICE INNOVATION

This unit examines the dynamics of innovation and development within the mix of core marketing activities of organizations. Once establishing the integral role innovation plays in organizations, the unit also reviews the key stages in the process of creating, developing and implementing new product and service concepts including product, service and market analysis, design, innovation, evaluation and testing of ideas, branding and packaging, market testing and investment analysis.

**Courses:** BS39, BS63, BS92, BS93, GS30,

GS31, GS38, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN423

**Campus offered:** GP **Semester:** 1

### ► AMN444 SERVICES MARKETING

This unit emphasises the services, which comprise three-quarters of developed economies. In services, relationships with customers have a large role, and so this unit concentrates on establishing or identifying valuable customers and maintaining relationships with them. Issues include: segmenting services markets, developing and measuring relationships, long run networks versus one-off transactions, service quality management in various industries such as retailing and tourism and innovations in services distribution.

**Courses:** BS30, BS39, BS63, BS92, BS93,

GS10, GS11, GS13, GS85, GS86, GS87, GS90,

GS91, GS92

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN424

**Campus offered:** GP **Semester:** 1

### ► AMN445 STRATEGIC MARKETING MANAGEMENT

This is a capstone unit which aims to ensure students can manage the complete marketing function at a senior level within a corporation, and includes assessing the marketing function's performance with appropriate tools to diagnose, assess, track and evaluate performance and to modify processes to improve the function. Links between the marketing function and other functions of a business such as accounting, operations and human resources will be drawn, so that the student would be in a position to move into top management if the opportunity arose.

**Courses:** BS30, BS39, BS63, BS92, BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN424

**Campus offered:** GP **Semester:** 2

### ► AMN447 CONTEMPORARY ISSUES IN MARKETING

Advances in communication technology, virtual network systems and the global knowledge base are making the world a smaller place in which to do business. The future of marketing and business operations is being affected significantly by these changes. This unit offers advanced study of these and other topical issues and emerging trends in national and international marketing, thus complementing and extending knowledge gained in other more fundamental units in the postgraduate marketing degree program. The unit offers the opportunity to keep up-to-date with issues and forces of change that are impacting worldwide on contemporary marketing practice and theory. Students research the current status

## UNIT SYNOPSES

of issues that have emerged in recent years, as well as observing and analysing up-to-the-minute issues on a global basis as they are reported each week of the semester. Industry guests and site visits are used where possible to complement the learning process.

**Courses:** BS39, BS63, BS92, BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN407

**Campus offered:** GP

**Semester:** 2

### ► AMN448 MARKETING FOR ONLINE SERVICES

Online technologies open up a new marketplace and communication medium involving ideas, information, entertainment and commerce. With a changing marketplace, organisation and the people they employ need to acquire the skills to develop and work with new types of interactive products and services. It requires the understanding of the opportunities to approach markets locally, regionally and globally and to develop new markets previously unreachable. This entails a re-think of the existing paradigm for the marketing of goods and services and a development of a process for analysing the changing marketplace.

**Courses:** BS39, BS92, BS93

**Prerequisites:** PG only

**Incompatible with:** MIN438

**Campus offered:** GP

### ► AMN460 CORPORATE AND INVESTOR RELATIONS

Reviews all aspects of the public relations function in communicating with corporate audiences. Specific focus is placed on how corporate entities meet both regulatory and promotional requirements in communicating with special interest groups including shareholders and employees. Suitable communication tools will be examined for use in ongoing communication programs.

**Courses:** BS72, BS88, BS93, BS39

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON409

**Campus offered:** GP

**Semester:** 2

### ► AMN461 CORPORATE MEDIA STRATEGY AND TACTICS

Examines theories underpinning mass media and links these with the practice of public relations media tactics. Students analyse techniques and skills used in liaison with electronic media, print media, trade media and news media. Producing and evaluating communication materials such as news releases, features and media kits forms an important part of this unit. Students will develop strategic thinking through analysis of contemporary media case studies.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON424

**Campus offered:** GP

**Semester:** 1, 2

### ► AMN463 PUBLIC OPINION AND PUBLIC RELATIONS

This unit provides a detailed overview of the theoretical foundations and empirical research on public opinion. The overview includes a detailed examination of the role of mass media in the development and change of public opinion. The unit addresses the central problems of measuring and interpreting public opinion. An additional focus of the unit is to examine the role of public relations in efforts to shape and manage public opinion. Finally, the unit builds an advanced understanding of the use of survey research to support the descriptive, diagnostic, and predicative information needs of corporate management related to public opinion.

**Courses:** BS39, BS72, BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► AMN464 PUBLIC COMMUNICATION

Explores the scope and context of public communication campaigns - how they are constructed, their assumptions and research methods underpinning them, and asks students to consider whether campaign planning and evaluation is as

effective as it might be. The unit also explores community activities to develop a public issue, and community consultation as a process.

**Courses:** BS72, BS88, BS93, BS39

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON414

**Campus offered:** GP

### ► AMN465 PUBLIC RELATIONS MANAGEMENT

This unit provides learners with an overview of the theory and research that constitute the foundations of public relation practice. The unit provides a detailed inspection of communication processes necessary for the management of organisational relationships with publics. The unit focuses on such topics as issues management, organisational change, public opinion, and mass media effects in order to explore the foundations of contemporary public relations management.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON415

**Campus offered:** GP

**Semester:** 1, 2

### ► AMN466 CORPORATE COMMUNICATION STRATEGY

This unit provides learners with an understanding of the development and analysis of communication strategy in public relations, advertising, and organisational communication. Students explore case studies to treat issues related to competitive and corporate advantage based on analysis of the 'fit' between environmental factors and organisational resources. Case study analysis includes identification of communication problems and development of communication strategies. The primary outcomes for the unit focus on the refinement of analytical skills for strategic communication planning and management.

**Courses:** BS63, BS72, BS88, BS92, BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON406

**Campus offered:** GP

### ► AMN467 PUBLIC RELATIONS CAMPAIGNS

This unit provides a systematic exploration of the planning, management and evaluation of public relations campaigns and programs. The primary goal of the unit is to build a detailed understanding of existing theory and research that informs the development and evaluation of public relations campaigns. The unit focuses on key problem areas of campaign management including strategy, design and evaluation.

**Courses:** BS39, BS72, BS93

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► AMN468 ISSUES AND CRISIS MANAGEMENT

Examines the strategic management of crisis communication including for organisations. A strategic planning approach will be covered including organisation analysis, issues identification, audience prioritisation, strategy formulation, tactical planning and implementation and evaluation. Pre-crisis issues in management will be addressed as well as proactive and defensive communication strategies during crisis. The unit will demonstrate the application of general communication tools to a specialised area.

**Courses:** BS93, BS39, BS72

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CON408

**Campus offered:** GP

**Semester:** 1

### ► AMN482 MARKETING FOR THE NONPROFIT SECTOR

The theory and application of strategic marketing in the public and nonprofit sector is studied in this unit. The unit reviews key topics such as: stakeholder analysis; marketing research; cause related imaging and competitive positioning; marketing mix formulation and campaign development. Issues and characteristics that differentiate nonprofit marketing, allegiances to multiple markets and an increasingly competitive fundraising environment are discussed. Within the

not-for-profit marketing mix, topics examined by students encompass the social cause as service/product, contemporary fundraising strategies, service delivery options (off-line and online) and integrated marketing communication including database marketing and relationship management.

**Courses:** BS39, BS93, BS94, BS95, BS98, GS10

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN439

**Campus offered:** GP

**Semester:** 2

### ► ARB081 HISTORY, THEORY AND CRITICISM OF URBAN DESIGN

Analysis of urban forms and systems in the pre-industrial, industrial and post-industrial periods. Specific history topics include urban activities, urban culture and diversity, urban services and urban form. This unit addresses concepts of 'good theory' of urban design in relation to the work of a number of theoretical writers and schools. Specific theoretical topics include the 'kunstlerischen Grundsätzen' of Camillo Sitte, the Garden City movement, Le Corbusier and modernism, the counter-modern influences of the townscape movement, Jane Jacobs, Kevin Lynch and the Responsive Environments approaches, Christopher Alexander, Rapoport, phenomenological approaches, and recent movements such as 'the new urbanism'.

**Courses:** BN73, DB73

**Campus offered:** GP

**Credit points:** 12

**Semester:** 1

### ► ARB082 URBAN DESIGN STUDIO B

This studio covers identification and classification of approaches to urban design, the setting of objectives, urban design rationales, the adoption of a method and the testing of implications for a particular urban design problem type. This unit will typically involve a theory based preparation of an urban design proposal for an urban/suburban/town area, and/or an urban design issue. Where applicable, work in other units of study will be incorporated into this unit. The 24 credit points allows focus, depth and, where appropriate, joint/complementary project work with senior students in other Faculty courses. Field work will be incorporated.

**Courses:** BN73, DB73

**Campus offered:** GP

**Credit points:** 24

**Semester:** 1

### ► ARB083 URBAN DESIGN MASTERS STUDIO

An advanced level urban design project, supported by seminars presented by staff, students and visiting lecturers and distinguished practitioners. This studio will focus on changes in the production and consumption of the city, including the effects of globalisation, space-time compression, economic rationalism, and the privatisation of space, services and professional activities.

**Courses:** BN73, DB73

**Prerequisites:** Completion of Graduate Diploma coursework

**Credit points:** 24

**Campus offered:** GP

**Semester:** 3

### ► ARB801 FIRE TECHNOLOGY AND SCIENCE

Topics covered include chemistry and physics of fire; heat transfer mechanisms; combustion processes; fire behaviour of materials; fire initiation and development; fire growth and spread; flash-over; management of fire; theory of fire extinguishment; detection and extinguishment systems; fire brigade involvement.

**Courses:** AR65

**Campus offered:** GP

**Credit points:** 12

**Semester:** 1

### ► ARB802 HUMAN BEHAVIOUR AND FIRE

Effects of fire on life and property and community costs; human studies and response models; hazardous fire environments; egress calculations and models; human behaviour: occupant characteristics, behaviour during emergencies, response times; risk management-Probabilistic fire models.

**Courses:** AR65

**Campus offered:** GP

**Credit points:** 12

**Semester:** 2

## UNIT SYNOPSES

### ► ARB803 FIRE AND BUILDING LEGISLATION

Society's expectations for life safety and asset protection; traditional prescriptive approach; performance principles and methodology; state legislation (administrative framework); PBCA 96 and Australian Standards (technical framework); legal issues related to PBCA process and procedural matters; integrated approval (dangerous goods, health care, etc)

**Courses:** AR65 **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► ARB804 FIRE SAFETY SYSTEM DESIGN

Mechanics of smoke and fire spread in buildings; smoke and fire management; external fire spread and heat radiation; fire load and severity; building structural fire performance (materials and structure); fire modelling; application of fire growth models to fire protection problems; fire protection; methodology for fire safety risk assessment; estimation of fire safety performance parameters; case studies.

**Courses:** AR65 **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► AYB121 FINANCIAL ACCOUNTING

Financial Accounting provides an examination of the accounting concepts and procedures relevant to both Partnership and Corporate Structures within the context of: the accounting profession's conceptual framework; the relevant accounting standards and Corporations Law requirements. Topics include: the formation, operation, financial reporting and disclosure for both Partnerships and Companies, accounting for leases; and the professional role of accountants. The emphasis is on the effect of the different forms of ownership on the financial statements.

**Courses:** BS50, BS56, ED50, IF37  
**Prerequisites:** BSB110

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AYB111, ACB115, ACB210, AC3001, AC3014

**Campus offered:** GP **Semester:** 1, 2

### ► AYB122 GOODS AND SERVICES TAX

This unit introduces students to goods and services tax (GST). In particular, the unit provides an examination of the rules governing an entity's GST liabilities and entitlements, the rules on how entities are to account for these liabilities and entitlements, special rules that relate to particular entities, the rules that apply to particular transactions, and the anti-avoidance provisions of the GST law.

**Courses:** BS56  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

### ► AYB220 COMPANY ACCOUNTING

This unit includes: the preparation of consolidated financial statements; an overview of the statutory requirements that dictate the format and content of published financial reports of companies; the requirements of the Corporations Act 2001 and the major disclosure orientated accounting standards; accounting for income tax; accounting for the acquisition of assets (including entities); accounting for investments in associates; accounting for foreign currency transactions arising from international trading and financing; and the translation of the results of foreign operations.

**Courses:** BS50, BS56, ED50, IF37, IF72, IF48  
**Prerequisites:** AYB121

**Contact hours:** 3.5 per week **Credit points:** 12  
**Incompatible with:** AYB112, ACB212, ACB412, AC3003, AC3016

**Campus offered:** GP **Semester:** 1, 2, 3

### ► AYB221 COMPUTERISED ACCOUNTING SYSTEMS

This unit provides an examination of the concepts, processes and issues relevant to computerised accounting systems including accounting information systems; internal controls; design and development of computerised accounting systems including general ledger and reporting cycle, revenue cycle, expenditure cycle, payroll cycle and production cycle; computer fraud, security and crime; accessing accounting information; and accounting in an electronic

environment. Practical application of these concepts is enhanced by the use of accounting software such as MYOB, spreadsheet software such as Excel, databases and software such as Access, and interactive multimedia software such as Accounting Information Systems Cycles.

**Courses:** BS50, BS56, ED50, IF37, IF72  
**Prerequisites:** BSB110

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AYB222, AYB101, ISB492, AC3010, AC3033

**Campus offered:** GP **Semester:** 1, 2

### ► AYB223 LAW OF BUSINESS ASSOCIATIONS

The unit is intended to equip students with a basic understanding and knowledge relevant to the environment of legal entities, particularly corporations. It also seeks to provide students with sufficient basic understanding of the legal structure of business associations to enable them to recognise the appropriate structure for particular commercial situations.

**Courses:** BS50, BS56  
**Prerequisites:** BSB111

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** ALB122, ACB240, LW3002, LW3014

**Campus offered:** GP **Semester:** 1, 2

### ► AYB225 MANAGEMENT ACCOUNTING

This unit introduces students to accounting systems and techniques which provide management at all levels with information for use in planning, controlling and decision making. This can be contrasted with financial accounting, which provides summary financial information principally for external users (ie shareholders, creditors, banks etc). Emphasis is placed on developing a range of accounting systems (in particular product costing) which may be used in manufacturing firms, although the principles and concepts used to develop such systems can be adapted to service organisations.

**Courses:** BS50, BS56, ED50, IF28, IF30, IF37, IF40, IF41, IF47, IF48, IF60, IF72, IT20

**Prerequisites:** BSB110  
**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYB224, FNB123, ACB220, AC3004, AC3017

**Campus offered:** GP **Semester:** 1, 2

### ► AYB227 INTERNATIONAL ACCOUNTING

International Accounting provides students with the knowledge of international accounting crucial for achieving proper understanding of international business communications. International accounting was once a specialist field of inquiry. Today it is an integral feature of the global business and financial scene. This unit is designed to provide students with an insight into, and an appreciation of, many of the accounting problems and issues faced in an international business environment. Issues examined include: comparative international accounting systems and practices; cultural influences on accounting; international financial reporting issues such as international business combinations, intangibles, foreign currency transactions and translation, comparative international analysis of financial statements; and global accounting issues in the twenty-first century.

**Courses:** BS56 **Prerequisites:** BSB110  
**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► AYB301 AUDITING

This unit enables students to comprehend the key concepts of auditing as a discipline, to demonstrate the relationship between auditing and the systems of accountability and to demonstrate the differences between manual and EDP audit processes. The unit builds on the knowledge of accounting and accounting standards acquired in prior units by enabling students to understand in detail the audit process (including professional auditing standards and techniques) which leads to the auditor providing an opinion on the financial reports of various types of entities.

**Courses:** BS50, BS56, ED50, IF28, IF30, IF37, IF47, IF62, IF72

**Prerequisites:** AYB220

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AYB210, ACB311, AC3005, AC3018

**Campus offered:** GP **Semester:** 1, 2

### ► AYB305 COMPANY LAW AND PRACTICE

Advanced topics in company law including: protection of minority interests; dividend policy; insider trading, takeovers and buy-backs, law relating to financially troubled companies.

**Courses:** BS50, BS56 **Prerequisites:** AYB223  
**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ALB120

**Campus offered:** GP **Semester:** 2

### ► AYB309 COMPUTER SECURITY AND AUDIT

The impact of Computer Information Systems (CIS) on controls and auditing, general controls, application controls, generalised audit software, static and concurrent computer-assisted audit techniques, and special CIS environments. A focus on the audit of the SAP R/3 system will be provided.

**Courses:** BS50, BS56 **Prerequisites:** AYB301  
**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYB212

**Campus offered:** GP **Semester:** 2

### ► AYB310 COMPUTERISED ACCOUNTING APPLICATIONS

Use of software to build various accounting applications and discusses issues related to the use of such applications. Database software will be used to build parts of an accounting information system (for example, general ledger, accounts receivable ledger or accounts payable ledger). Macros will be utilised in spreadsheets software to build automated accounting-related models. Issues and recent developments in accounting information systems will also be examined.

**Courses:** BS50, BS56 **Prerequisites:** AYB221  
**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYB218

**Campus offered:** GP **Semester:** 2

### ► AYB311 FINANCIAL ACCOUNTING ISSUES

Introduces the nature of accounting theory, and integrates theory with accounting practice to assist in the understanding of major accounting issues involving the measurement of profits, assets and liabilities; history of accounting theory; positive accounting theory and capital markets research; external reporting framework including the standard setting process and the conceptual framework. Definition, recognition, measurement and classification of assets, liabilities, owner's equity, revenue and expenses. An overview of contracting cost theory is provided to help explain why companies would choose one accounting policy over another. Accounting for long term construction contracts, general insurers and superannuation funds; revaluation of non-current assets, accounting for goodwill and intangibles and accounting for the extractive industries; debt versus equity, off-balance sheet finance, accounting for financial instruments, leases, employee entitlements (such as share options) and superannuation plans.

**Courses:** BS50, BS56, ED50, IF37  
**Prerequisites:** AYB220

**Contact hours:** 3.5 per week **Credit points:** 12  
**Incompatible with:** AYB113, ACB310, AC3007, AC3023

**Campus offered:** GP **Semester:** 1, 2

### ► AYB312 FINANCIAL INSTITUTIONS LAW

This unit deals with the regulation of banks and non-bank financial institutions, the financial institutions' scheme, banker-customer relationship, laws relating to cheques and other negotiable instruments, negligent advice by financial institutions and other possible grounds of liability in its dealings with customers.

**Courses:** BS50, BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62

**Prerequisites:** BSB111  
**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ALB103

**Campus offered:** GP **Semester:** 1

## UNIT SYNOPSES

### ► AYB313 GOVERNMENT ACCOUNTING

This unit is designed to expose students to the context and operation of accounting in the public sector. Government accounting and budgeting practice is reviewed, and a comparison is made to private sector practice. This unit will examine several practical aspects of public sector accounting.

**Courses:** BS56

**Prerequisites:** BSB110

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► AYB321 STRATEGIC MANAGEMENT ACCOUNTING

This unit develops a theory of organisations that provides an understanding of the information requirements of management to facilitate the strategic planning, decision-making and control necessary for the achievement of their objectives. This unit prepares students for a world of unstructured problem-solving and develops skills in managerial decision-making. The unit commences with an overview of the nature of organisations and the potential for human behaviour to impede the achievement of organisational objectives. The theory is then extended into a consideration of how organisational structures and operational technologies have evolved to resolve this problem. These include the management of control systems, performance evaluation and compensation incentives and decision-making in regard to cost, profit and investment centres. New management accounting practices around the world, including activity based costing, balanced scorecard; and economic value added are discussed as techniques for adding value to the firm.

**Courses:** BS50, BS56, ED50, IF37, IF48

**Prerequisites:** AYB225

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** FNB124, ACB321, AC3009, AC3025

**Campus offered:** GP **Semester:** 1, 2

### AYB323 TAX PLANNING

Application of income tax and other revenue laws to specific tax planning situations, including employment, business structures, restructuring; and broad consideration of related issues, such as government incentives, the professional responsibilities of the tax practitioner and the statutory provisions, case law and professional standards relating to tax avoidance and evasion.

**Courses:** BS50, BS56

**Prerequisites:** AYB328 or as a corequisite

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ALB131

**Campus offered:** GP **Semester:** 2

### ► AYB325 TAXATION LAW

This unit introduces student to the statutory framework of the Australian taxation system. Elements in the determination of taxable income and the levy of income tax are examined including general and specific categories of accessible income and allowable deductions, capital gains tax and administration aspects of the tax system. The taxation of fringe benefits is also briefly examined. The unit concludes with a brief overview of the taxation of partnerships, trusts and companies and the goods and services tax. Emphasis is placed on developing students' skills in problem solving through research and analysis of taxation issues.

**Courses:** BS50, BS56 **Prerequisites:** AYB223

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ALB132, ACB340, LW3004, LW3015

**Campus offered:** GP **Semester:** 1, 2

### ► AYB328 TAXATION LAW 2

This unit examines the principles governing the taxation treatment of various business entities from a domestic and international perspective. The taxation processes for partnerships, companies, trusts and superannuation funds will be analysed so that students are able to advise clients on the tax effectiveness of various business structures from a commercial and professional aspect. The unit is taught within the context of the recent tax reform process including the consolidation and entity tax regime effective as at 1

July 2001. Emphasis is placed on developing skills in problem solving through research and analysis of taxation issues.

**Courses:** BS50, BS56 **Prerequisites:** AYB325

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYB326, ALB133

**Campus offered:** GP **Semester:** 1, 2

### ► AYB331 AUDITING AND PROFESSIONAL PRACTICE

The audit approach; planning an audit; verification of the balance sheet and profit and loss statement, trade debtors, inventory, non-current assets, cash, investments, taxation, capital and retained profits; audit sampling theory techniques and applications; CIS auditing; legal liability; and other issues of current professional interest.

**Courses:** BS56

**Prerequisites:** AYB301 **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► AYB334 PRINCIPLES OF SUPERANNUATION

The nature of superannuation; types of plans and their advantages and disadvantages; Australia's superannuation regulatory system; record keeping for superannuation funds; accounting for superannuation plans and employee entitlements; audit of superannuation plans; taxation of superannuation; contemporary issues in superannuation.

**Courses:** BS56

**Prerequisites:** BSB110 and BSB111

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► AYB335 PRINCIPLES OF PERSONAL FINANCIAL PLANNING

The nature of financial planning; ethical and legal obligations of practitioners; risk assessment financial planning for personal exertion income and personal expenditure, superannuation; taxation of superannuation benefits; forms of direct and indirect investment; family law implications for financial planning; succession planning; planning for declining physical and mental capacity; evaluating investment options and assessing financial planning needs; eligibility for selected social security benefits and preparing a simple financial plan.

**Courses:** BS50, BS56 **Prerequisites:** BSB111

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► AYN405 ADVANCED TAX PLANNING

Application of technical expertise in income tax and other revenue laws to specific tax planning situations including employment, retirement, investment, business and professional practice; the professional responsibilities of tax advisers.

**Courses:** BS70, BS94 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ALN101

**Campus offered:** GP **Semester:** 1

### ► AYN406 CAPITAL GAINS TAX

Analysis of the capital gains tax regime, a discrete area of taxation law that is complex in nature and has far-reaching commercial ramifications. The focus is on specific issues that have significant practical relevance.

**Courses:** BS70, BS94 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ALN102

**Campus offered:** GP **Semester:** 1

### ► AYN410 BUSINESS LAW AND ETHICS

Introduction to business law and to morality in the business context involving interpretation of statutes, law of torts, contract law, consumer protection and agency; morality and how it works as an aspect of the business community; the origins of moral belief, and the motives which lead people to abide by what they believe to be morally right and to persuade others to do likewise with special emphasis on business aspects of morality.

**Courses:** BS30, BS89 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ALN103

**Campus offered:** GP **Semester:** 1

### ► AYN411 COMPANY AUDITING

The audit environment; legal liability of auditors; professional ethics; study and evaluation of audit planning and programming, evidence, internal control theory and review techniques; audit program applications; revenue, receivables, cash; inventory; audit in CIS environment and evaluation of CIS controls; computer-assisted audit techniques; computer fraud; audit sampling techniques; and audit reporting.

**Courses:** BS89

**Prerequisites:** PG only; plus AYN417

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYN120

**Campus offered:** GP **Semester:** 1

### ► AYN412 COMPANY LAW

The law relating to the establishment, operation and dissolution of business associations, the forms of business associations; partnerships, trusts, companies and voluntary associations. A focus on companies: incorporation requirements, classification, share capital and management issues.

**Courses:** BS89

**Prerequisites:** PG only; plus AYN410

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► AYN413 COMPUTER AUDITING

The impact of Computer Information Systems (CIS) on controls and auditing, general controls, application controls, generalised audit software, static and concurrent computer-assisted audit techniques, and special CIS environments. A focus on the audit of the SAP R/3 system will be provided.

**Courses:** BS70, BS94 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYN109

**Campus offered:** GP **Semester:** 2

### ► AYN414 COST ACCOUNTING

Introduction to management accounting; the role of the management accountant; cost concepts; job and process costing systems budgeting; direct and absorption costing; cost volume profit analysis.

**Courses:** BS89, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only; AYN416

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► AYN416 FINANCIAL ACCOUNTING 1

An introduction to accounting; recording business transactions; adjusting the accounts and preparing financial statements; completion of the accounting cycle; accounting systems and specialised journals; cash and cash journals; accounting for receivables and payables; accounting for merchandising operations and inventories; non-current assets; partnerships; companies; statement of cash flows; analysis and interpretation of financial statements.

**Courses:** BS30, BS89, GS70, GS81

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYN112

**Campus offered:** GP **Semester:** 1

### ► AYN417 FINANCIAL ACCOUNTING 2

The preparation of consolidated financial statements; an overview of the statutory requirements that dictate the format and content of published financial reports of companies; the requirements of the Corporations Act 2001 and the major disclosure orientated accounting standards; accounting for income tax; accounting for the acquisition of assets and re-organisation of the corporate structure through the subsidiaries; the termination of a company's life and the accounting procedures necessitated by winding up/liquidation; and accounting for foreign currency transactions arising from international trading and financing.

**Courses:** BS30, BS89, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only; plus AYN416

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYN113

**Campus offered:** GP **Semester:** 2

## UNIT SYNOPSES

### ► AYN418 FINANCIAL ACCOUNTING 3

This unit is designed to introduce students to the nature and development of accounting theory, and to the application of theory to practice. The course includes an overview of the nature and history of accounting theory; positive accounting theory and capital markets research; the external reporting framework including the standard setting process and the conceptual framework. An overview of contracting cost theory is provided as a rationale for accounting policy choices. The definition, recognition, measurement and classification of: assets, liabilities, equity, revenues and expenses is covered. Specific accounting issues covered include: revaluation of non-current assets; goodwill; research and development; intangible assets; extractive industries; debt defeasance; off-balance sheet financing; debt v equity; financial instruments; employee entitlements; and leases.

**Courses:** BS30, BS89, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only; plus AYN417

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYN114

**Campus offered:** GP **Semester:** 1

### ► AYN424 INTERNATIONAL ACCOUNTING

This unit is designed to provide students with an insight into, and an appreciation of, many of the accounting problems and issues faced in an international business environment. This unit examines issues including: accounting systems in the global environment; international patterns of accounting development including cultural influences on accounting; comparative international accounting systems and practices; the pressures for international accounting harmonisation and disclosure; international disclosure trends and financial analysis; global accounting issues into the twenty-first century.

**Courses:** BS70, BS94 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYN119

**Campus offered:** GP **Semester:** 2

### ► AYN430 MANAGERIAL ACCOUNTING ISSUES A

This unit is an advanced managerial accounting unit. It investigates at an advanced level some selected issues from undergraduate studies. In addition, a number of new approaches that have become popular in practice in recent times are studied, and advanced mathematical approaches to decision-making are investigated.

**Courses:** BS70, BS94 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** FNN110

**Campus offered:** GP **Semester:** 1

### ► AYN432 PUBLIC SECTOR ACCOUNTING ISSUES

This unit is designed to expose students to a number of contemporary issues in accounting for the public sector. Readings from both the research and professional literature will be used to enhance student's understanding of the context and operation of accounting in the public sector. This unit will examine several conceptual and practical aspects of public sector accounting.

**Courses:** BS70, BS94 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** FNN111

**Campus offered:** GP **Semester:** 1

### ► AYN433 SPECIAL TOPIC IN ACCOUNTING A

In this unit, students research an accounting topic chosen by the student in consultation with the lecturer. Initially the student investigates at least two areas of potential research in conjunction with the lecturer and gives a class presentation on an aspect of these. Subsequently, under the supervision of the lecturer, the students develop one of the topics into an essay of the approximate length of an academic article in a journal of accountancy. Essays of high distinction will be considered for inclusion in the School of Accountancy's Working Paper Series. Subjects may be chosen from a broad variety of topics including accounting theory, financial accounting, management accounting, auditing, financial and

business analysis, international accounting, accounting history, business law and taxation.

**Courses:** BS70, BS94, BS92

**Prerequisites:** PG only; BSN507

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► AYN438 TAXATION LAW AND PRACTICE

This unit introduces students to the statutory framework of the Australian taxation system. Elements in the determination of taxable income and the levy of income tax are examined including general and specific categories of assessable income and allowable deductions, capital gains tax and administration aspects of the tax system. The taxation of fringe benefits is also briefly examined. The unit concludes with a brief overview of the taxation of partnerships, trusts and companies and the goods and services tax. Emphasis is placed on developing students' skills in problem solving through research and analysis of taxation issues.

**Courses:** BS30, BS89

**Prerequisites:** PG only; plus AYN412

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► AYN439 MANAGEMENT ACCOUNTING

This unit covers planning and control; decision-making and relevant costs; responsibility accounting; cost allocation; pricing techniques; transfer pricing; performance evaluation; operations research techniques; and contemporary management accounting issues such as activity based costing, value-added management, just-in-time systems, total quality management and strategic management accounting.

**Courses:** BS89, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only; plus AYN414

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► AYN442 SUPERANNUATION

Government retirement income policy; an evaluation of superannuation; inquiries into superannuation; taxation of superannuation; types of plans and their advantages and disadvantages; Australia's superannuation regulatory system; critical evaluation of same; accounting for superannuation plans and employee entitlements; audit of superannuation plans; critical evaluation of same; performance evaluation of superannuation plans; contemporary issues in superannuation.

**Courses:** BS70, BS94 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► AYN443 ELECTRONIC COMMERCE CYCLES

This unit provides an examination of the concepts, processes and issues relevant to computerised accounting systems including accounting information systems; internal controls; design and development of computerised accounting systems including general ledger and reporting cycle, revenue cycle, expenditure cycle, payroll cycle and production cycle; computer fraud, security and crime; accessing accounting information; and accounting in an electronic environment. Practical application of these concepts is enhanced by the use of accounting software such as MYOB, spreadsheet software such as Excel, database software such as Access and interactive multimedia software such as Accounting Information Systems Cycles.

**Courses:** BS89, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only; plus AYN416 or GSN404

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AYB221, AYN303, AYN402

**Campus offered:** GP **Semester:** 2

### ► AYN445 GOODS AND SERVICES TAX

Introduction to the statutory framework of the Australian Goods and Services Tax (GST) system; elements in the determination of taxable supplies, creditable acquisitions; analysis of GST-free supplies and input taxed supplies, consideration of transitional issues and the adminis-

trative framework for the implementation of the GST.

**Courses:** BS70, BS94

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► AYN446 THE LAW OF E-COMMERCE

This unit introduces students with no formal studies in law to legal issues associated with electronic business ('e-business'), in particular electronic commerce. Key legal issues in e-business are identified and broad legal principles are applied to e-business situations. The ways in which compliance programs can be used to manage legal issues in e-businesses are discussed. Legal, jurisdictional and enforcement issues that arise with international e-business transactions are also considered.

**Courses:** BS70, BS94, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► AYN447 ISSUES IN ELECTRONIC COMMERCE

This unit is concerned with investigating and showing students how different organisations are accepting and using various Electronic Commerce (EC) applications. Accordingly, students will visit sites on the Internet to ascertain what EC application the sites are using and why. Students will be exposed to a business cost-benefit decision-making framework. Students will be shown how this framework explains why different organisations might make use of different EC applications.

**Courses:** BS70, BS94 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► AYN448 MANAGEMENT OF ELECTRONIC BUSINESS PROCESSES

This unit is concerned with managing the information technology and telecommunications functions within a modern organisation. The focus is predominately on the management, political, and business issues and problems underlying the use of high technology in modern organisations. Through much of the discussion and case analysis, the point of view of the senior executive responsible for IT and T in the organisation will be assumed. In this way, students will gain an understanding of the issues and problems uniquely involved in managing IT and T in modern organisations. Such exposure will be useful to student who may find themselves having to deal with IT and T senior executives in firms.

**Courses:** BS70, BS94, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► AYN449 ENTERPRISE SYSTEMS A

The nature of enterprise resource planning systems (ERP), advanced study of accounting information system cycles linking concepts to the SAP R/3 FI - Financial Accounting Module functionality, general ledger accounting, subledger accounts, accounts receivable and accounts payable, authorisations for the FI Module, customising the FI Module, integration with other modules.

**Courses:** BS70, BS94 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► AYN450 ENTERPRISE SYSTEMS B

Advanced study of accounting information system cycles linking concepts to the SAP R/3 CO - Controlling Module, cost centre accounting, internal order accounting, customising the CO Module, integration with other modules.

**Courses:** BS70, BS94

**Prerequisites:** PG only, Prior studies in accounting

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► AYN505 ACCOUNTING HONOURS - A

This unit covers certain types of empirical and analytic accounting research. It examines theo-

## UNIT SYNOPSES

retical empirical research into accounting information utilisation both within the firm and as prepared for external stakeholders. This leads into an application of the theory of the firm to gain an understanding of the role that accounting and auditing play, in contracting and governance processes. Specific topics that may be covered include; transaction cost economics; accounting aspects of corporate governance; behavioural research in auditing; risk evaluation and internal control assessment.

**Courses:** BS63, BS70, BS94

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► AYN506 ACCOUNTING HONOURS - B

This unit prepares students for a world of unstructured problem-solving and develops skills in managerial decision-making by the use of current research articles and case studies. The unit commences with an overview of the nature of organisations and the potential for human behaviour to impede the achievement of organisational objectives. Organisation issues examined to ascertain how managers can design organisations to motivate individuals to make choices to increase firm value include; the management of control systems; performance evaluation and compensation incentives; decision-making in regard to cost, profit and investment centres; transfer pricing and international transfer pricing disputes. New management accounting practices, including activity, based costing, the balanced scorecard, and economic value added, are evaluated, using the latest research, as techniques for adding value to the firms.

**Courses:** BS63, BS70, BS92, BS94

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► AYN507 BUSINESS LAW HONOURS

This unit examines the law governing the operation of capital markets in Australia. In particular, it examines the theoretical and policy bases for Australian capital markets' law and makes extensive use of law and economics' literature. The extent to which efficiency, investor protection and public interest concepts are balanced in the law is also considered.

**Courses:** BS63, BS70, BS94

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► BNB007 PROFESSIONAL STUDIES 1

The unit seeks to introduce students to the concept of professionalism and core components of professional practice; social responsibility, personal (interpersonal and cross cultural) responsibility; environmental; engineering writing; technical presentation; graphics and generic computing skills. The unit provides opportunities to apply understanding to case study scenarios and develop problem based learning skills. It focuses on the roles and responsibilities of engineers and specifically, the engineer as communicator, collaborator and negotiator, in changing national and international contexts.

**Courses:** CE33, CE44, CE45, EE41, EE42, EE48, ME40, ME41, ME42, IF21, IF50, IF59, EE46, EE47

**Contact hours:** 7 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### BSB110 ACCOUNTING

Accounting data is the basis for decision making in any organisation. Accordingly, the aim of this unit is to provide you with some basic knowledge of modern financial and managerial accounting theory and practice so that you can understand how accounting data is used to help make decisions in organisations. The unit covers financial procedures and reporting for business entities; analysis and interpretation of financial statements; planning, control and business decision making.

**Courses:** BS50, BS56, ED23, ED50, IF26, IF37, IF41, IF52, IF54, IF56, IF60, IF72, IT20, PU40

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AYB100, AYB110, AYB105, AC3013, ACB110, AC3000, ACB111

**Campus offered:** GP, CA **Semester:** 1, 2

### ► BSB111 BUSINESS LAW AND ETHICS

This unit integrates the concepts and principles of business law with the theories and applications of business ethics. The unit makes extensive use of cases in law and ethics to develop knowledge and skills which enable students to analyse, apply and evaluate the legal principles and ethical decision-making processes relevant to modern business practice.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62, IF72

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, CA **Semester:** 1, 2

### ► BSB113 ECONOMICS

Introduces students to the key economic concepts and their practical applications. It comprises twelve topics each focusing on a current economic issue. These issues relate to the economics of the standard of living, inflation and unemployment, money and banking, saving and investment, the balance of payments and international trade, and microeconomic behaviour and reform.

**Courses:** BS56, ED50, IF26, IF28, IF30, IF37, IF41, IF47, IF48, IF56, IF60, IF61, IF62, IF72

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EPB116 and EPB172, EPB140 and EPB150

**Campus offered:** GP, CC **Semester:** 1, 2

### ► BSB114 GOVERNMENT, BUSINESS AND SOCIETY

Provides a basic grounding in the principles, institutions and functions of government, and their interactions with business and society. Its principal focus is the structure and key features of Australia's constitutional and government framework including the judicial and administrative processes, especially as they affect business. Students also will develop a comparative appreciation of the principles, institutional arrangements and practices of contemporary government in a global context. This will include consideration of law-making and policy processes and the impact of the changing national and international environment.

**Courses:** BS50, BS56, IF26, IF28, IF30, IF37, IF41, IF47, IF48, IF56, IF60, IF62, IF72

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EPB124, MNB181, AD3049

**Campus offered:** GP, CA **Semester:** 1, 2, 3

### ► BSB115 MANAGEMENT, PEOPLE AND ORGANISATIONS

This unit provides a basic grounding in the principles, institutions and processes of government. It provides a context for understanding the social and political environment in which business operates both internationally and in Australia. The unit links theory to practice through current events of business, government and society. Students are provided with a comparative dimension of the interactions and relationships between government, business and society, as a means of understanding the international political and social environment.

**Courses:** BS50, BS56, ED50, IF26, IF28, IF30, IF37, IF41, IF47, IF48, IF56, IF60, IF61, IF62, IF72, IT20, LS50, ME36, PU40

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** BSB102, MNB351, MNB412, AD3048

**Campus offered:** GP, CA **Semester:** 1, 2, 3

### ► BSB119 INTERNATIONAL AND ELECTRONIC BUSINESS

This unit integrates two rapidly expanding areas of business studies, international business and ebusiness. Doing business across international borders is facilitated by ebusiness technologies. This unit explores the nature and models of international business and ebusiness, how ebusiness technologies facilitate international business and add value to the business. It develops the skills and understanding to identify and respond to the opportunities, challenges and risks of conducting business across politically, economically and culturally diverse country environments.

**Courses:** BS56, IF05, IF09, IF27, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IF72

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP, CC **Semester:** 1, 2, 3

### ► BSB122 BUSINESS INFORMATION ANALYSIS AND COMMUNICATION

This unit is designed to introduce students to the need for gathering business information and the techniques involved in analysing and presenting that information to a relevant audience. Topics covered include business problem identification, research design, data collection, data analysis, and communication skills. In the context of business computing environments, students will also have hands-on experience using computer software for data analysis.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF72

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** GP, CA **Semester:** 1, 2, 3

### ► BSB126 MARKETING

This introductory subject examines the role and importance of marketing to the contemporary organisation. Emphasis will be given to understanding the basic principles and practices of marketing such as the marketing concept, market segmentation, management information systems and consumer behaviour. The unit will explore the various elements of the marketing mix, with special reference to product, price, distribution, promotion, including advertising and public relations. By way of introduction only, key issues relating to services marketing, e-marketing and strategic marketing will also be canvassed.

**Courses:** BS56, IF05, IF09, IF27, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IF72

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** BSB116

**Campus offered:** GP, CA **Semester:** 1, 2

### ► BSB212 ELECTRONIC BUSINESS APPLICATIONS

Looks at the ways in which organisations adopt and use various Electronic Business applications in areas of e-commerce, business-to-consumer, business-to-business and intra-business relations. Business models and their impact in various industries are analysed, enabling students to assess the underlying business case, and determine the model's viability in a competitive environment. Applications of Electronic Business to areas such as marketing and advertising are introduced.

**Courses:** BS56, IF26, IF28, IF30, IF37, IF41, IF47, IF48, IF57, IF60, IF62, IF72

**Prerequisites:** BSB112 or BSB119 or equivalent

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AYB333

**Campus offered:** GP **Semester:** 1

### ► BSB213 LEGAL ISSUES IN ELECTRONIC BUSINESS

This unit introduces students with no formal studies in law to legal issues associated with electronic business. Key legal issues in e-business are identified and broad legal principles are applied to e-business situations. The ways in which compliance programs can be used to manage legal issues in e-businesses are discussed. Legal, jurisdictional and enforcement issues that arise with international e-business transactions are also considered.

**Courses:** BS56, IF26, IF28, IF30, IF37, IF41, IF47, IF48, IF57, IF60, IF62, IF72

**Prerequisites:** BSB112 or BSB119 or 96 credit points of approved study

**Contact hours:** 3 per week **Credit Points:** 12  
**Incompatible with:** AYB120, AYB332

**Campus offered:** GP **Semester:** 2

### ► BSB310 BUSINESS AND BIOTECHNOLOGY

This unit develops business skills that will enhance the ability of those operating within Biotechnology firms to capitalise on their research and development efforts. In essence this unit provides the skills-based mechanisms to develop graduates who are effective catalysts in recognising, developing and commercialising opportunities in Biotechnology.

**Courses:** LS50 **Prerequisites:** MGB218

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

## UNIT SYNOPSES

### ► BSB311 RESEARCH, DEVELOPMENT AND COMMERCIALISATION STRATEGIES

Students will study strategies and approaches used in industry and government organisations for the research, development and commercialisation of biotechnology innovations. The unit offers the opportunity to read widely as well as in depth about the commercialisation of molecular biology and biotechnology research and theoretical concepts are integrated with prepared case studies prior to guest speaker seminars.

**Courses:** LS50 **Prerequisites:** BSB310  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► BSB313 BUSINESS STRATEGY AND TECHNOLOGY

This unit introduces the conceptual tools needed to make strategic decisions, and for understanding complex system changes in the E-Business era. Critical assessment is made of the impact of new information technologies on business strategy. Issues such as surveillance, privacy, the erosion of community and unemployment are discussed, and implications for business are examined. The impact on business strategy, virtual networks, consumption, marketing and advertising are discussed.

**Courses:** BS56, IF26, IF28, IF30, IF37, IF41, IF47, IF48, IF57, IF60, IF62, IF72  
**Prerequisites:** BSB212 or AYB333  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► BSD110 ACCOUNTING

Provides a study of the basic accounting processes—financial and managerial; and an introduction to the interpretation of accounting information. This unit covers financial procedures and reporting for sole traders, partnerships and companies; analysis and interpretation of financial statements; planning, control and business decision-making.

**Courses:** BS40, IF06  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** BSB110  
**Campus offered:** KG **Semester:** 1, 2, 3

### ► BSD113 ECONOMICS

Introduces students to the key economic concepts in an intuitive and applied fashion. It comprises 12 modules each focusing on a current economic issue. These issues relate to the economics of the environment, the standard of living, inflation and unemployment, money and banking, saving and investment, international trade, the business cycle and stabilisation policy.

**Courses:** BS40, IF06  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** BSB113  
**Campus offered:** KG **Semester:** 1, 2, 3

### ► BSD114 GOVERNMENT, BUSINESS AND SOCIETY

Provides a basic grounding in the principles, institutions and functions of government, and how they interact with business and society. Its principal focus is the structure and key features of Australia's constitutional and governmental framework including the judicial and administrative processes, especially as they affect business. Students will also develop a comparative appreciation of the principles, institutional arrangements and practices of contemporary government in a global context. This unit includes law-making, policy processes, the impact of a changing national and international environment, and relationships between government, business and society.

**Courses:** BS40, IF06  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** BSB114  
**Campus offered:** KG **Semester:** 1, 2, 3

### ► BSD115 MANAGEMENT, PEOPLE AND ORGANISATIONS

Provides an introduction to the theories and practice of management and organisations. Emphasis is on the conceptual and people skills that will be needed at all levels of management and in all areas of organisational life. The unit acknowledges that organisations exist in an increasingly international environment where the emphasis

will be on information, the ability to learn, to change and to innovate. Organisations are viewed from individual, group, corporate and external environmental perspectives.

**Courses:** BS40, IF06  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** BSB115  
**Campus offered:** KG **Semester:** 1, 2, 3

### ► BSD119 INTERNATIONAL AND ELECTRONIC BUSINESS

Integrates two rapidly expanding areas of business studies, international business and ebusiness. Doing business across international borders is facilitated by ebusiness technologies. This unit explores the nature and models of international business and ebusiness, how ebusiness technologies facilitate international business and add value to the business. It develops the skills and understanding to identify and respond to the opportunities, challenges and risks of conducting business across politically, economically and culturally diverse country environments.

**Courses:** BS40, IF06  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** BSB119  
**Campus offered:** KG **Semester:** 1, 2, 3

### ► BSD126 MARKETING

Introductory unit which examines the role and importance of marketing to the contemporary organisation. Emphasis will be given to understanding the basic principles and practices of marketing such as the marketing concept, market segmentation, management information systems and consumer behaviour. The unit will explore the various elements of the marketing mix, with special reference to product, price, distribution, promotion including advertising and public relations. By way of introduction only, key issues relating to services marketing, e-marketing and strategic marketing will also be canvassed.

**Courses:** BS40, IF06  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** BSB126  
**Campus offered:** KG **Semester:** 1, 2, 3

### ► BSN404 PROJECT 1

Designed to permit the student to undertake a research project, subject to the approval of the Course Coordinator.

**Courses:** BS30, BS91, BS93, BS94, BS98  
**Prerequisites:** PG only  
**Credit points:** 12  
**Incompatible with:** MKN101, MKN102, MKN103  
**Campus offered:** GP **Semester:** 1, 2, 3

### ► BSN405 PROJECT 2

Designed to permit the student to undertake a research project, subject to the approval of the Course Coordinator.

**Courses:** BS93, BS94 **Prerequisites:** PG only  
**Credit points:** 12  
**Incompatible with:** MKN101, MKN102, MKN104  
**Campus offered:** GP **Semester:** 1, 2, 3

### ► BSN406 PROJECT

Students undertake a detailed examination of a theoretical or empirical problem in one of the disciplines of advertising, marketing, public relations, or integrated marketing communication. The study is based on the published journal literature of the discipline and can involve primary research and analysis. Students can develop a short empirical research study, refine a theoretical problem develop a communication audit of an organisation or develop a case study related to an organisation or product. Project supervision will be arranged by the Unit Coordinator through consultation with the student and available staff members.

**Courses:** BS88, BS93  
**Prerequisites:** PG only; plus 96 credit points of approved prior study  
**Credit points:** 24 **Incompatible with:** CON405  
**Campus offered:** GP **Semester:** 1, 2, 3

### ► BSN409 RESEARCH PROJECT

A major piece of applied research. The research project provides the opportunity to apply and reinforce the education and knowledge gained from the course by research report, case study or

application of technology. The final project must demonstrate an ability to identify and research a complex business problem in accounting, banking and finance, business and taxation law, electronic business or related discipline.

**Courses:** BS94  
**Prerequisites:** PG only; plus BSN506 or BSN507  
**Credit points:** 24  
**Campus offered:** GP **Semester:** 2

### ► BSN411 PROJECT

Students undertake an in-depth independent investigation of the efficacy of deployment practices in an organisation or across organisations. The aim of the unit is for students to integrate course work via an analysis of the practical application of quality in a real world situation. Project reports will be data based and soundly based on relevant literature.

**Courses:** BS93  
**Prerequisites:** PG only **Credit points:** 24  
**Incompatible with:** BSN150, BSN149, BSN410  
**Campus offered:** GP **Semester:** 1, 2, 3

### ► BSN412 QUALITATIVE RESEARCH AND ANALYTICAL TECHNIQUES

This unit provides a detailed overview of qualitative research to support decision-making in business disciplines. The primary purpose of the unit is to develop a detailed understanding of the theoretical contexts in which qualitative research has developed and the techniques that define its use. Areas of study include research paradigms, problem identification, research design, qualitative research proposals and results. The unit also provides and exploration of analytical practices associated with data-mining as a method of gathering information from database resources and data warehouses to support decision-making for integrated marketing communication.

**Courses:** BS63, BS88, BS92, BS93, BS95  
**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** CON500  
**Campus offered:** GP **Semester:** 1, 2

### ► BSN501 DISSERTATION

Students undertake a study of an issue as the culmination of their honours program. The dissertation must have a well-developed conceptual foundation and include a primary research component.

**Courses:** BS63  
**Prerequisites:** PG only **Credit points:** 48  
**Campus offered:** GP **Semester:** 1, 2

### BSN502 RESEARCH METHODOLOGY

The purpose of this study is to provide students with a range of ideas and methods that will enable them to analyse, evaluate and conduct research in discipline areas related to business. It provides an essential and basic preparation for the development of a thesis or dissertation proposal. Areas of study include: research paradigms; analysis and criticism; research design; data collection; data manipulation and interpretation and presentation.

**Courses:** BS63, BS92  
**Prerequisites:** PG only  
**Contact hours:** Flexible Mode  
**Credit points:** 12  
**Incompatible with:** BSB400  
**Campus offered:** GP **Semester:** 1

### ► BSN503 RESEARCH SEMINAR

The aim of this unit is for the student to prepare a detailed review of the literature relevant to the thesis or dissertation proposal. Students will be required to prepare and present a detailed seminar paper describing and explaining the results of their review, and its relevance to the thesis or dissertation proposal. The unit is structured into two parts: the first provides a series of lectures from staff advising as to the requirements of a thorough, well-directed literature search and review; the second consists of a series of seminars from students presenting their findings.

**Courses:** BS63, BS92 **Prerequisites:** PG only  
**Contact hours:** Flexible Mode **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

## UNIT SYNOPSES

### ► BSN506 ECONOMETRIC METHODS

This unit provides a comprehensive grounding in the econometric methods necessary for conducting research using such methods and for understanding recent contributions to the econometric literature

**Courses:** GS30, GS31, GS38, GS85, GS86  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** BSN500  
**Campus offered:** GP **Semester:** 1

### ► BSN507 RESEARCH METHODS

The subject provides an introduction to the methodology of social research. The unit begins with a consideration of some different views from the philosophy of science about what constitutes the appropriate way to do social research. This part of the unit includes some common sense issues about how to conduct practical research projects. The unit then focuses on quantitative research methods. Questions of design, measurement, techniques and analysis are covered. Qualitative research issues are considered next, focusing on their counterparts in quantitative research, ie design, technique and analysis. Finally the unit closes with coverage of some ethical and political issues in social research.

**Courses:** BS63, BS70, BS92, BS93, BS94, BS95, IF49  
**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit Points:** 12  
**Incompatible with:** AYN102, BSN500  
**Campus offered:** GP **Semester:** 1

### ► BSN600 THESIS

This is the major component of a research Masters and consists of a substantial study of an applied or theoretical issue. Students are expected to present a seminar each semester on their progress to date and, in the final semester, on the outcomes of their study. The thesis is expected to have a sound conceptual and theoretical foundation for the exploration of a significant communication topic using primary research data. The thesis report should be of approximately 50 000 words.

**Courses:** BS92  
**Prerequisites:** PG only **Credit points:** 96  
**Campus offered:** GP **Semester:** 1, 2, 3

### ► CEB109 ENGINEERING MECHANICS 1

Introduction to statics, forces, moments and couples; resolution and resultant of forces acting on a particle or rigid body; equilibrium of particle or rigid body under forces and/or moments; analytical methods for plane truss analysis; shear force and bending moment in beams; the properties of sections. Dynamics (for electrical engineering students).

**Courses:** CE44, CE45, CE46, EE41, EE42, EE44, EE45, EE48, ME36, ME40, ME41, ME42, ME43, ME45, ME48  
**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

### ► CEB110 ENGINEERING MECHANICS 2

Principles of structural mechanics, stress, strain and elasticity; second moment of area; indeterminate structures and compatibility; simple beam theory including the flexure formula and the shear stress formula; shear force and bending moment diagrams; hydrostatics, stress and strain transformation, Mohr circle beam deflections (virtual work), geomechanics applications of 2D stresses, buckling.

**Courses:** CE44, CE45, CE46  
**Prerequisites:** CEB109  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2, 3

### ► CEB207 PROFESSIONAL STUDIES 2

The delivery of the unit will be centred on an initial problem statement. Students will develop and define the problem statement and be encouraged to develop their own creative solutions through the semester. This will introduce students to many aspects of project work and prepare them for their professional lives. The development of student projects will be facilitated by the introduction of some technical material including: Architectural and project issues; including aesthetics, fitness for purpose, constructability. Geotechnical: site investigation, earthworks and compaction, and soils classifica-

tion. Structural: structural design, origin of loads, load paths, load factors, capacity reduction factors, time dependent loads, structural capacity and stability, rules of thumb will be used for sizing detailing. Strength of materials: basic characteristics of structural timber, material selection. Surveying: basic surveying principles will occupy 12 hours of class time.

**Courses:** CE44, CE45, CE46  
**Prerequisites:** CEB110, BNB007  
**Contact hours:** 5 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 1

### ► CEB208 MATERIALS SCIENCE

The unit provides students with a sound and practical approach to material properties and selection so that they may adapt to scientific and technological changes in the variety of products entering the market. They will understand where the engineer fits in a quality assurance program and be aware of the numerous components of quality assurance and the costs generated by quality control and assurance. They will obtain an awareness of the effect of the working environment on different engineering materials. Among other things they will study the behaviour of concrete from the time it is manufactured to the end of its life, develop knowledge of the parameters involved in manufacturing good, and the consequences of delivering poor concrete.

**Courses:** CE44, CE45, CE35  
**Prerequisites:** MMB131  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► CEB209 GEOTECHNICAL ENGINEERING 1

Soil mechanics is a part of geotechnical engineering, soil types, their description, classification and engineering properties. Granular and cohesive soil classification systems. Volume and mass components, density and air voids. Determination of soil geostatic vertical pressures, pore water pressures and effective stress; permeability theory and fluid seepage in soil, with erosion and piping analysis. Soil shear strength assessment and application to retaining wall lateral pressures, retaining wall design, slope stability analysis and stabilisation. Computer simulation and analysis programs used where appropriate.

**Courses:** CE44, CE45, CE35  
**Prerequisites:** CEB110 **Corequisites:** CEB207  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 3

### ► CEB213 ENVIRONMENTAL SCIENCE

This unit is designed to provide students with the fundamental understanding of how the earth's physical and environmental systems normally function and the challenges imposed on the environment as a result of human activity. This understanding is developed through the study of relevant principles of physical geology, ecology, chemistry, microbiology, energy, resources, pollution, and the interaction among population, resources and the environment. The unit also prepares students to undertake further studies in civil and environmental engineering.

**Courses:** CE44, CE45, CE46, CE35  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► CEB214 PROFESSIONAL STUDIES 3

The knowledge and skills associated with assessing, investigating, and managing the economic, social and environmental impacts of developmental projects are essential for today's civil and environmental engineers. So too is an appreciation of the skills needed to work with and communicate with interdisciplinary teams to develop balanced solutions to environmental problems associated with development. This unit of the Professional Studies strand develops students' capabilities to practice in a civil engineering project environment.

**Courses:** CE44, CE45, CE35  
**Prerequisites:** CEB207, CEB213  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► CEB215 STRUCTURAL ENGINEERING 1

Most structures found in practice are statically indeterminate and they need to be analysed in

order to design them. The method of moment distribution, which is a simple hand calculation method, will be developed and applied for analysing statically indeterminate structures such as continuous beams and simple frames. Effects of moving loads on structures such as bridges and crane girders are important in their design. The study of influence line diagrams will be directed towards this end and this will be extended and applied to establish 'pattern loads' in statically indeterminate structures. Reinforced concrete is a common and popular material used in construction. This unit deals with the fundamentals of reinforced concrete analysis and design and its behaviour in bending, shear and carrying axial loads. Analysis and design of beams, slabs and columns will be treated.

**Courses:** CE44, CE45, CE46, CE35  
**Prerequisites:** CEB207, CEB208, CEB110  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► CEB216 PROJECT ENGINEERING 1

The unit commences with the development of the construction techniques common to site investigation, earthworks, pile driving, deep foundations, reinforced and pre-stressed concrete and steel erection. This operational understanding is extended into a study of the practices used to estimate cost and to administer contracts, including planning and legal implications of operating in a commercial environment. The unit concludes with the issues surrounding the uncertainty of weather and of operating in remote environs.

**Courses:** CE44, CE45  
**Prerequisites:** CEB208, CEB207  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► CEB217 HYDRAULIC ENGINEERING 1

Units and Properties of Fluids; Pressure and Pressure Measurement; Forces in Static Fluids, Buoyancy and Accelerating Fluids; Kinematics, Continuity and Flow Nets; The Energy Equation; The Momentum Equation; Experimental Fluid Mechanics; Lift and Drag; Fluid Flow in Pipes and the Application of Pipe Resistance Formulae; Fitting Losses; Pipes in Series and Parallel; Pipe Network Analysis; Hydraulic Analysis of Pump and Pipe Systems; Pump Types, Characteristics and Selection.

**Courses:** CE44, CE45, CE46, CE35  
**Prerequisites:** CEB109, MAB131  
**Contact hours:** 4 per week **Credit points:** 12  
**Semester:** 2, 3

### ► CEB218 GEOTECHNICAL ENGINEERING 1A

Soil mechanics is a part of geotechnical engineering, soil types, their description, classification and engineering properties. Granular and cohesive soil classification systems. Volume and mass components, density and air voids. Determination of soil geostatic vertical pressures, pore water pressures and effective stress; permeability theory and fluid seepage in soil, with erosion and piping analysis. Soil shear strength assessment and application to retaining wall lateral pressures, retaining wall design, slope stability analysis and stabilisation. Computer simulation and analysis programs used where appropriate.

**Courses:** CE44, CE45, CE35  
**Prerequisites:** CEB110  
**Corequisites:** CEB207  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 3

### ► CEB219 STRUCTURAL ENGINEERING 1A

Most structures found in practice are statically indeterminate and they need to be analysed in order to design them. The method of moment distribution, which is a simple hand calculation method, will be developed and applied for analysing statically indeterminate structures such as continuous beams and simple frames. Effects of moving loads on structures such as bridges and crane girders are important in their design. The study of influence line diagrams will be directed towards this end and this will be extended and applied to establish 'pattern loads' in statically indeterminate structures. Reinforced concrete is a

## UNIT SYNOPSES

common and popular material used in construction. This unit deals with the fundamentals of reinforced concrete analysis and design and its behaviour in bending, shear and carrying axial loads. Analysis and design of beams, slabs and columns will be treated.

**Courses:** CE35, CE44, CE45, CE46

**Prerequisites:** CEB207, CEB208, CEB110

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► CEB222 HYDRAULIC ENGINEERING 1A

Units and Properties of Fluids; Pressure and Pressure Measurement; Forces in Static Fluids, Buoyancy and Accelerating Fluids; Kinematics, Continuity and Flow Nets; The Energy Equation; The Momentum Equation; Experimental Fluid Mechanics; Lift and Drag; Fluid Flow in Pipes and the Application of Pipe Resistance Formulae; Fitting Losses; Pipes in Series and Parallel; Pipe Network Analysis; Hydraulic Analysis of Pump and Pipe Systems; Pump Types, Characteristics and Selection.

**Courses:** CE35, CE44, CE45, CE46

**Prerequisites:** CEB109, MAB131

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2, 3

### ► CEB230 ENGINEERING MATERIALS AND THE ENVIRONMENT

This unit will provide the information about engineering materials required before they are applied in the design context. The course begins with an in depth presentation of the material properties and their application of civil engineering projects. An engineer requires in-depth knowledge of the concepts and principles involved but also the ability to apply them in real life. An emphasis on environmental implication will be discussed as part of the requirements.

**Courses:** CE46

**Prerequisites:** MMB131

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► CEB232 GEOTECHNICAL ENGINEERING 1 AND THE ENVIRONMENT

Geomechanics (soil mechanics & rock mechanics) and their application to geotechnical engineering is one of the most important areas of study for civil engineers. It is concerned with the use of soil and/or rock as an engineering material and includes a wide range of activities such as: site investigation and design for building, bridge and other foundations; materials selection, design and construction control for dams, road pavements and embankments; landslide stabilisation and tunnel excavation and support. The course will emphasise environmental issues such as acid sulfate soils and their effects on geotechnical designs, landfill leachate control and how they impact on the design of landfills.

**Courses:** CE46

**Prerequisites:** CEB110

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► CEB233 ENVIRONMENTAL PROFESSIONAL STUDIES 3 (IMPACTS OF PROJECTS AND SUSTAINABLE DEVELOPMENT)

The knowledge and skills associated with assessing, investigating, and managing the social and environmental impacts of developmental projects are essential for today's civil and environmental engineers. Environmental engineers need to be trained to conduct and manage investigative studies related to assessing air, water, soil, and noise pollution, and to understand and address the social implications. They also need the breadth of studies required to work with and communicate with interdisciplinary teams designing balanced solutions to environmental problems associated with development.

**Courses:** CE46

**Prerequisites:** CEB213

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► CEB259 ENGINEERING DESIGN FOR LAND DEVELOPMENT

This unit introduces the student to the basic civil engineering design processes and procedures associated with the development of subdivided urban/rural land for residential, industrial or

commercial purposes. The unit covers : (1) Sub-divisional road design types, hierarchy, longitudinal and cross sections, earthworks; (2) Stormwater design basic urban hydrology, catchment properties, Rational Formula, pipe/gully parameters, pipe and open channel flows; (3) Water reticulation system features; (4) Sewer reticulation system features and basic design procedures. Modern trends in the above (including sustainability considerations) together with the general construction procedures and basic costings will be introduced.

**Courses:** PS47, PS48

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► CEB292 INDUSTRIAL EXPERIENCE 2

Students should engage in at least five weeks employment, approved by the Head of School. For details see the School's Industrial Experience Handbook.

**Courses:** CE42, CE43, IF42

**Contact hours:** 5 weeks

### ► CEB317 PROFESSIONAL STUDIES 4

Civil engineers as professionals are responsible for the delivery of major transport infrastructure items through the stages of inception, planning, design, development, maintenance and management. The purpose of such projects is to improve the quality of life of the community by offering safe and efficient access to activity locations and mobility between locations. In delivering such infrastructure it is imperative that social, economic, and environmental impacts and benefits are considered and addressed. This unit offers students an opportunity to explore the role of the civil engineer in the preparation of a feasibility design study for a road as a major transport infrastructure item.

**Courses:** CE44, CE45, CE46

**Prerequisites:** CEB207, CEB214, BNB007

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► CEB318 STRUCTURAL ENGINEERING 2

Limit states design of steel structures, buckling and ultimate strength behaviour of steel structures, tension members, compression members, local and global buckling (flexural and flexural torsional buckling modes) concepts as applied to compression members and beams, effective lengths of compression members and beams, design of beams, effect of lateral restraints on buckling, web stresses including web crippling and buckling, beam-columns, bolted and welded connections, asymmetric bending of beams including principal second moments of area, Shear stresses in beams of thin-walled open cross-sections and their shear centres. Most cold-formed steel sections are unsymmetrical and hence the latter topics are useful in steel design.

**Courses:** CE44, CE45

**Prerequisites:** CEB207, CEB110

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► CEB319 WATER ENGINEERING

The main topics to be covered in this unit are: the hydrologic cycle and its application to the estimation of runoff from small catchments; probability and risk and the selection of design floods; hydrologic data; estimation of peak runoff using the Rational Formula; estimation of runoff hydrographs using rainfall-runoff routing models; the hydraulic characteristics of open channels, uniform flow, gradually varied flow and rapidly varied flow; the hydraulic characteristics of culverts and retention basins; and the operation of urban drainage systems.

**Courses:** CE44, CE45, CE46

**Prerequisites:** CEB217

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► CEB320 PROFESSIONAL STUDIES 5 (STEEL AND CONCRETE STRUCTURE DESIGN)

The analysis and design of steel and concrete structures is central to much of Civil Engineering. This unit will build on material covered in the structural engineering subjects and apply these principles to typical whole-of-building de-

sign projects on steel and concrete structures. Students will develop additional technical skills in structural design, and enhance their understanding of the context in which structural design occurs. This unit of the Professional Studies strand will further students' professional capabilities, with emphasis on professional responsibility, independent learning, and commercial skills.

**Courses:** CE44, CE45

**Prerequisites:** CEB317, CEB215, CEB318, CEB207

**Contact hours:** 6 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► CEB321 WATER AND WASTEWATER TREATMENT

The provision of safe, wholesome and adequate supply of water and the proper treatment, disposal, and reuse of wastewater are essential for protecting human health and well-being. Water and wastewater treatment are required for the control of water-borne diseases and the provision of proper sanitation for urban, rural, and recreational areas. Water and wastewater treatment engineering is a major field of civil and environmental engineering and is manifested by sound principles and practice in terms of solving sanitation problems.

**Courses:** CE44, CE45, CE46

**Prerequisites:** CEB213, CEB217

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► CEB322 GEOTECHNICAL ENGINEERING 2

Further study on the behaviour of soil and rocks. Determination of subsurface pressures from surface loadings. Soil settlement including time related clay consolidation settlement and immediate settlements on sand and clay as related to shallow foundations. Assessment of bearing capacity and allowable bearing pressures under shallow foundations. Pile foundation systems and analysis for capacity and settlement. Rock mass behaviour, classification and joint shear strength applied to slope stability assessment and stabilisation measures.

**Courses:** CE44, CE45, CE46

**Prerequisites:** CEB209

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► CEB323 TRANSPORT ENGINEERING 1

The transport system is an essential part of our physical infrastructure. It is imperative that civil engineers are able to undertake typical road and traffic engineering investigations, analysis and designs. This requires an understanding of the intent of individual road system elements, how they operate, and how they are delivered and managed, which will be developed in this unit. Further, it is important that civil engineers are able to undertake multi-modal transport surveys to gain an understanding of the operation of a particular transport system.

**Courses:** CE44, CE45 **Prerequisites:** CEB317

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► CEB328 INVESTIGATION PROJECT

This unit gives the student the opportunity to gather a body of information relating to a selected topic from the available literature, and to reach conclusions by critical analysis of this material. The investigation may include analysis and experimental work. The results will be presented as a written report supported by a seminar presentation.

**Courses:** CE35

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1, 2

### ► CEB330 ENVIRONMENTAL MANAGEMENT FOR ENGINEERS

This unit provides the foundation for this learning. It is designed to help students identify and develop these skills. It focuses on the roles and responsibilities of the engineer and specifically, the engineer as a project manager. This may involve decision making to direct and manage environmental management aspects of a major project. This unit aims to help develop and encourage life long learning processes throughout their career as environmental engineers.

## UNIT SYNOPSES

**Courses:** CE46      **Prerequisites:** CEB233  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **CEB409 PROFESSIONAL STUDIES 6 (CIVIL PROJECTS DESIGN)**

Major developments require input from a range of professions including civil engineers. This unit will develop the student's understanding of the role of the civil engineer within a development project, including the various technical activities undertaken overall project management, and an understanding of communities expectations. A major development project will be used as the basis for development of students' design skills with the sub-disciplines of civil works, environmental, transport, hydraulic and public health engineering. As part of the Professional Studies strand, this unit will develop students' professional capabilities through working in a team to produce engineering designs that integrate within the overall project according to a schedule.

**Courses:** CE44, CE45, CE46  
**Prerequisites:** CEB317, CEB319, CEB321, CEB322, CEB323  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **CEB411 THESIS PROJECT A**

Thesis A is a written review report of the literature on an area of civil engineering practice where research and development has been undertaken and reported in the literature. Students will demonstrate skills in problem definition, work planning, critical analysis of the study material information retrieval and appropriate citation procedures. Report writing and seminar presentation is a major feature. Guided instruction and exercises will be given on information retrieval and bibliographic listing and citation.

**Courses:** CE44, CE45  
**Prerequisites:** Unit can only be taken by final year students  
**Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **CEB412 PROJECT ENGINEERING 2**

The unit builds on the understanding of the physical aspect of construction gained in Project Engineering 1 to develop the skills needed to manage a project. Further studies in estimating, contracts administration and cost control provide support for a major computer simulation exercise based on the construction management of a complex industrial project. This experiential component provides a framework for the exploration of issues in the legal, managerial and technical areas which form the basis for the professional presentations that conclude the unit.

**Courses:** CE44, CE45  
**Prerequisites:** CEB216, CEB317  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **CEB413 STRUCTURAL ENGINEERING 3**

This final structural engineering unit is intended to equip structural engineers with a knowledge and capability in some of the important advanced structural engineering topics. Most structural analysis programs, such as Space Gas, or Microstas, are based on the stiffness method. This method will be developed and illustrated by application to some structures. Structures need to carry loads beyond their elastic limits and the maximum load bearing capacity of a structure and the failure mechanism under over-loads is required. Plastic analysis and the concept of plastic hinge will be introduced and applied. Many structures are subjected to dynamic loads. Basic structural dynamics will be introduced and some simple illustrative examples will be provided. Principles of earthquake engineering, aesthetics in bridge design, load paths in structures and approximate methods in the analysis of complex structures will be treated.

**Courses:** CE44, CE45  
**Prerequisites:** CEB215, CEB318  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 2

► **CEB414 PROFESSIONAL STUDIES 7 (CAPSTONE PROJECT DESIGN)**

The planning, design and construction of major infrastructure projects are commonly managed by civil engineers and require input from a range of professions. This unit will develop the student's understanding of the role of the civil engineer in developing a feasibility study for a major infrastructure project, in context of the individual civil engineering sub disciplines and affiliated disciplines involved in delivering major infrastructure items. This unit provides the culmination of the civil engineering degree and thus will enable students to apply the capabilities they have developed in preceding sub-disciplinary theory and practice units, and in particular the professional capabilities developed through the Professional Studies backbone of the course. The unit will require students to work in a realistic team environment and interact with other professionals during the development of their project. As well as overall project management and investigation skills, the students will further develop their analytical, design and communication skills.

**Courses:** CE44, CE43, IF42  
**Prerequisites:** CEB409, CEB412  
**Credit points:** 12  
**Campus offered:** GP      **Semester:** 2

► **CEB415 THESIS PROJECT B**

Thesis B is an optional elective and extension of Thesis A (CEB411). Various avenues of investigation will have been identified from Thesis A and students will undertake a program of investigation which could have experimental, design and analysis aspects. A written report with critical analysis of results and conclusions is prepared, and a seminar presented.

**Courses:** CE44, CE43, IF50  
**Prerequisites:** Unit can only be taken by final year students.  
**Credit points:** 12  
**Campus offered:** GP      **Semester:** 1, 2

► **CEB416 ENVIRONMENTAL LAW AND ASSESSMENT**

The adverse consequences of human activity has resulted in the adoption of various international treaties, enactment of stringent legislative requirements, and a growing demand for improved management practices. Engineers need to be aware of the way in which the law works, be able to communicate with lawyers and to recognise the legal and political implications of their projects. An understanding of the local, state, and federal government power to regulate development, the legal and planning requirements and assessment procedures are essential for professional engineering practice.

**Courses:** CE44, CE43, IF50      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **CEB417 ENVIRONMENTAL PROFESSIONAL STUDIES**

Engineers can no longer overlook the social and environmental impacts of engineering design and practice. In today's and future professional engineering practice, engineers are required to consult with the community and deal with structured controversies involving the media, the wide community, special interest groups, and government and non-government organisations. The environmental engineering practice is multidisciplinary. Environmental engineers are required to work closely with professionals from many other disciplines and the community. As such, it is essential that engineers develop intuitive awareness of human factors in engineering projects and the skills to communicate with the community, the media, and other professionals.

**Courses:** CE44, CE43, IF42      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 2

► **CEB418 WASTE RESOURCE MANAGEMENT**

Management of solids and hazardous wastes generated from domestic, commercial, and industrial is concerned with: (1) protecting human health and the environment from actual and potential threats posed by the waste material; and optimisation of resource management. Wastes from such sources must be managed in an ecologically sustainable manner which requires waste minimisation; promotion of efficient use of resources; promotion the use of waste through recycling and energy production; viewing waste as a resource; reducing the mass, volume and toxicity of the waste; and if necessary disposing off the waste in a socially and environmentally acceptable manner. This approach is recognised internationally and involves a hierarchy of practices which are based on: waste avoidance which is the most favourable option; recycling; energy production; treatment; and disposal which is the least favourable option. Waste management is an important aspect of civil and environmental engineering education.

**Courses:** CE44, CE43, IF42      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 2

► **CEB419 ENVIRONMENTAL TRANSPORT & INFRASTRUCTURE MANAGEMENT**

The environmental engineer must be familiar with the role of each transport mode in the overall transport task, along with current issues associated with each mode. This must be overarched by an understanding of the system for planning and management of transport projects and systems, particularly in context with economic, environmental and social attributes. This final year core unit provides students who wish to pursue a career in environmental engineering with such an understanding in the above mentioned disciplines. The unit will also include case studies covering the environmental impacts for some of the urban and rural transport and infrastructure projects especially in the area of Community Consultation.

**Courses:** CE46  
**Prerequisites:** CEB214, CEB323  
**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 2

► **CEB507 FINITE ELEMENT METHODS**

The Finite Element Method is easily the 20th century's answer for treating complex problems, which had hitherto remained impossible to solve, in several areas of engineering such as structural, geotechnical, hydraulic, electrical, heat conduction, etc. It is a powerful computer based procedure which is undergoing continuous development and improvement. For example the displacements and stresses in dams, deep beams with openings, shell structures, soil-anchors, etc, can only be obtained by finite element analysis. To use a finite element program engineers need to understand the basic theory and some of the important features of the method, such as engineering actions, modelling, choice of elements, boundary conditions, input data and interpretation of results. This unit aims in providing the necessary theory and modelling skills in order to use the finite element method effectively and to apply the method to problems in structural, geotechnical and water engineering.

**Courses:** CE44, CE45  
**Prerequisites:** CEB413      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **CEB508 TRANSPORT ENGINEERING 1**

This is a final year elective Unit to prepare students for a career in transportation engineering, as well as to provide them with an understanding of the analytical processes involved in urban transport planning. It covers all transport modes and places emphasis on the planning and evaluation of transport systems. The unit is designed to highlight the economic, environmental and social impacts of transportation projects. The unit complements CEB323 Transport Engineering 1, by dealing in-depth with urban transportation planning and evaluation.

**Courses:** CE44, CE45  
**Prerequisites:** CEB323      **Credit points:** 12  
**Campus offered:** GP      **Semester:** 1

► **CEB509 PROJECT MANAGEMENT AND ADMINISTRATION**

This unit provides a foundation of some of the issues relating to the management of construction projects from both practical and theoretical points of view. Topics relating to: Leadership and management of organisations and people; Planning of a project; Engaging of consultants,

## UNIT SYNOPSES

subcontractors and suppliers; Co-ordination of project activities; Cost control and claims; Legal and insurance issues; Information Technology issues; Written and verbal communication skills; Problem solving, and Managing and preventing disputes will be covered in the semester. Assessment will be practical and progressive during the semester, with a final examination.

**Courses:** CE44, CE43

**Prerequisites:** CEB216, CEB412

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► CEB513 ADVANCED CONSTRUCTION PRACTICE

Professional engineers generally work in a highly stressed commercial environment with competing pressures. A student in final year should be exposed to realistic experiences. This subject integrates what has already been taught in the specific civil engineering disciplines and requires the student to prepare and submit a commercial tender for a construction project. Teams of students competitively bid for the project. In addition, relevant legal and commercial issues associated with the tender and subsequent administration of the particular construction contract are covered so that the student appreciates the realities associated with a construction project.

**Courses:** CE44, CE45 **Prerequisites:** CEB216

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► CEB514 PROJECT CONTROL

Contemporary engineering demands that the practising engineer needs to master not only basic design and construction concepts but also a strong background in current management practices. Engineers, whether they are in construction, design or maintenance need to understand the effect that economic decisions made at federal and state level have on their organisations and to realise that everyone has a different leadership style that must be fitted into the organisations management structure. The subject is designed to provide an insight into the requirements, precepts and problems of project management of interdisciplinary projects.

**Courses:** CE44, CE45, **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► CEB516 MASONRY DESIGN

A structural engineer must have the ability to analyse and design engineering components and systems which use masonry as load bearing and in-fill non-structural panels. This course develops a basic understanding of Masonry Technology and Design using the Australian Standard 3700. This unit will provide an understanding of the differences in the material properties of clay, concrete, calcium silicate bricks and blocks. This unit also provides an understanding of workmanship, site practices and construction details of masonry. Students will develop the design skills needed for the design of masonry walls, reinforced or un-reinforced and discuss the difference in design procedures for the different masonry materials.

**Courses:** CE42, CE43, IF42 **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► CEB517 ADVANCED ENGINEERING STUDIES

This unit will provide an opportunity to learn how practicing engineers design cold-formed steel and composite structures, to develop an understanding of the design process and how it interacts with the fundamental knowledge of materials and structural analysis, to utilise advanced computer tools for analysis and design and to work as part of a design team present written reports. Students in groups of two will participate in Projects to analyse and design cold-formed steel and composite structures.

**Courses:** CE44 CE45 **Credit points:** 12

**Semester:** 1, 2

### ► CEB518 RIVER AND COASTAL ENGINEERING

Many civil engineers are involved in the analysis and design of engineering works in the river and coastal environment. An understanding of the physical processes taking place is also a funda-

mental requirement if engineers are to take an active role in the management of this dynamic environment. This unit will build on the fundamental principles of fluid behaviour covered in Hydraulic Engineering CEB217 and Water Engineering CEB319 and extend these principles to the river and coastal environment. It relies on a prior understanding of physics, mathematics and solid mechanics, and basic hydraulic engineering principles.

**Courses:** CE44, CE45

**Prerequisites:** CEB319

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► CEB522 GEOTECHNICAL ENGINEERING PRACTICE

The unit is concerned with the use of soil and/or rock as an engineering material and includes a wide range of activities such as: site investigation and design for building, bridge and other foundations; materials selection, design and construction control for dams, road pavements and embankments; landslide stabilisation and tunnel excavation and support. Following on from the work done in Geotechnical Engineering 1 and Geotechnical Engineering 2, this elective strengthens the understanding of geomechanics, and develops geotechnical investigation, design and construction skills. Three case studies will be undertaken, selected from soil reinforcements, lateral loading on piles, embankments on soft soil rockslope stabilisation, or house foundations on expansive soils.

**Courses:** CE44, CE45 **Prerequisites:** CEB322

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► CEB523 ENVIRONMENTAL GEOTECHNOLOGY

Graduates may work as part of a team investigating, designing and constructing solutions to waste containment and soil and groundwater pollution problems. This subject prepares them for this work by developing an understanding of the engineering concepts and processes and also by introducing them to specialist techniques, such as contaminant transport modelling, which will be used by more specialist members of these teams. It also prepares them for further post-graduate study in these specialist areas.

**Courses:** CE44, CE43, IF42

**Prerequisites:** CEB209, CEB213

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► CEB551 ADVANCED STRUCTURAL DESIGN

Emphasis on the design of more complex structures. Normally two projects are studied involving some or all of: design in new materials, new analytical techniques, new codes of practice, novel structures.

**Courses:** CE42, CE43, IF42

**Prerequisites:** CEB201, CEB306, CEB355,

CEB304, CEB406, CEB202

**Corequisites:** CEB405

**Credit points:** 8

### ► CEP 143 BIOLOGICAL TREATMENT PROCESSES

The design and operation of water and waste water treatment systems, focusing on conventional and advanced biological treatment processes. Current practice and development.

**Courses:** CE74, CE62, CE64

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► CEP011 RAILWAY BUSINESS AND ENGINEERING

The unit is offered entirely in distance education mode via the continuing professional development unit NRE001. The five modules cover: Railway Business (railway types and attributes, clients and needs, revenue sources, owner requirements, legislations, competition policy, strengths and weaknesses, organisational structures, business planning and supply of labour, material and technology); Railway Access (role of owner and manager, earning revenue by operators, selling access, maintenance and upgrading for efficient use); Project Management (principles, assessing and understanding tasks, developing and evaluating options, breaking

tasks down, estimation of time, resources and costs, planning charts, managing project interfaces, monitoring and controlling, reporting and post-completion audits); Infrastructure (task and layout of railway infrastructure, wheel/rail interface, maintenance and renewal, incidental infrastructure, bridges, contribution of infrastructure to railway business, management of track and related fixed infrastructure); Rolling stock (types and design parameters, vehicle configuration and structural layout, suspension and wheel/rail interface, locomotive design, rail vehicle sub-systems, rail vehicle maintenance).

**Courses:** CE62

**Credit points:** 12

**Semester:** 2

### ► CEP012 RAILWAY MANAGEMENT OPERATION AND SAFETY

The unit is offered entirely in distance education mode via the continuing professional development unit NRE002. The four modules cover: Railway Management (elements of railway business management, vision, strategy, policy and procedures, needs of stakeholders); Railway Operation (planning for service specification and delivery, coordination by operator, optimising service); Railway Safety Management (broader aspects of rail safety, safety awareness, guidance for the inter-disciplinary manager); Railway Signalling and Telecommunications (signalling and telecommunications systems as important safety elements, selection and use of systems, level of safety, operational flexibility and asset utilisation required by railway owners operators and regulators, accident case histories).

**Courses:** CE62

**Credit points:** 12

**Semester:** 1, 2

### ► CEPI27 ROAD AND TRAFFIC ENGINEERING

The Municipal Engineers' task involves the provision of a safe and effective road system. This unit is included in the course to ensure that students have an effective and comprehensive understanding of the principles of road construction and road traffic management. The aim of this unit is to provide the student with not only the techniques to be used but also the principles behind these techniques. A secondary aim is to provide students with an understanding of when a technique is more appropriate. The objectives of the unit are to develop skills in the analysis and design of intersections, analysis of urban networks, and freeways.

**Courses:** CE62, CE64, CE74, CE75

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► CEPI41 STUDIES IN ENVIRONMENTAL ENGINEERING

Various studies related to waste and resource management and risk analysis. Waste management topics include waste avoidance and minimisation, recycling and reuse; waste exchange; energy production; treatment; and disposal. Risk analysis studies include risk posed by waste material to human health and the environment and optimisation of resource management.

**Courses:** CE74, CE75, CE62, CE64

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► CEPI42 WATER POLLUTION CONTROL

Various studies related to waste and resource management and risk analysis. Waste management topics include waste avoidance and minimisation, recycling and reuse; waste exchange; energy production; treatment; and disposal. Risk analysis studies include risk posed by waste material to human health and the environment and optimisation of resource management.

**Courses:** CE62, CE64, CE74, CE75

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► CEP143 BIOLOGICAL TREATMENT PROCESSES

The design and operation of water and waste water treatment systems, focusing on conventional and advanced biological treatment processes. Current practice and development.

**Courses:** CE62, CE64, CE74 **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

## UNIT SYNOPSES

### ► CEP151 ROAD SAFETY AUDIT - PRINCIPLES AND PRACTICE

Road safety auditing is a specialised skill that is developed from an understanding of the principles involved and practical examples. This course provides this understanding and practice and enable graduates to become accredited auditors. The unit can be taken by people with a large range of backgrounds and education levels.

**Courses:** CE62, CE64, CE74, CE75

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► CEP175 PAVEMENT MAINTENANCE REHABILITATION AND RECYCLING

The unit describes difference ways a pavement exhibits both structural and non-structural distress. The modes of distress, including disintegration, distortion, cracking and fracture are described together with problems relating to safety and damage caused by operational factors. A range of evaluation techniques are presented which can be used to assess the condition of a pavement with respect to serviceability, structural capacity and safety. Restoration techniques using granular materials, full depth asphalt and concrete and structural overlays are described along with the role and use of absorbing layers. The unit concludes with the economic evaluation of alternative maintenance strategies using whole of life costing techniques.

**Courses:** CE62, CE64, CE74, CE75

**Credit points:** 12

**Campus offered:** GP

### ► CEP201 PROCESS MODELLING

Role of models in engineering design and investigation. Principles of modelling techniques and their uses, limitations and relevant applications.

**Courses:** CE62, CE64, CE74, CE75

**Contact hours:** 3 per week

**Credit points:** 12

**Campus offered:** GP, EXT

**Semester:** 2

### ► CEP216 ADVANCED TRAFFIC ENGINEERING

Traffic flow theory and traffic management. Analytical and computer analysis routines for urban intersection design, their background and applications.

**Courses:** CE62, CE64, CE74, CE75

**Contact hours:** 3 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► CEP218 TRANSPORTATION ENGINEERING

This unit is presented to provide students an advanced understanding within the transport engineering discipline, with emphasis on both the qualitative and quantitative processes involved in urban and regional transport engineering and planning. Emphasis is placed on the planning, operation, management and evaluation of transport projects and systems, particularly in context with economic, environmental and social attributes.

**Courses:** CE74, CE75, CE62, CE64

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► CEP291 ENVIRONMENTAL LAW AND ASSESSMENT

Introduction to environmental law. Commonwealth and state legislation. Development controls. Trends in environmental control. The framework for environmental assessment. Description of the environmental setting. Impact assessment and analysis.

**Courses:** CE62, CE64, CE74, CE75

**Contact hours:** 4 per week

**Credit points:** 12

**Semester:** 1

### ► CEP292 ENGINEERING PRACTICE 2

This subject is designed to teach the basic precepts in site management and to provide to the student an insight into the requirements, precepts and problems of construction management. Good engineering requires much more than a demonstrated ability in project management or design specialisation. It required engineers that possess vision, organisation, but more importantly it requires the skill to be able to deal with the personnel problems that arise on any project.

**Courses:** CE62, CE64, CE74, CE75

**Credit points:** 12

**Campus offered:** GP

### ► CEP293 PAVEMENT DESIGN

The unit includes investigatory and design procedures as outlined in the AUSTRROADS Pavement Design Manual. A section on materials discusses specification requirements and the testing procedures used by authorities to assess the quality of pavement materials and to predict their performance. Other topics deal with the collection and analysis of traffic data, empirical and mechanistic design procedures, maintenance and rehabilitation, and an introduction to pavement management systems; sourced from conference proceedings and industry. The background information on the history of pavement design and the origin of pavement design theories is also discussed.

**Courses:** CE62, CE64, CE74, CE75

**Credit points:** 12

**Semester:** 1

### ► CEP294 ENGINEERING CONTRACT DEVELOPMENT AND ADMINISTRATION

Good engineering requires much more than a demonstrated ability in project management or design specialisation. It requires engineers that possess vision, strategy, communication and the ability to make other work together as an effective organisation. To achieve this financial and legal knowledge is necessary. Contemporary engineering demands that the practising engineer not only masters basic concepts in either design or construction but there must be a strong background in current engineering approaches to contract management methods.

**Courses:** CE62, CE64, CE74, CE75

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1, 2

### ► CEP295 CIVIL ENGINEERING MANAGEMENT IN A PROJECT ENVIRONMENT

Contemporary engineering demands that the practising engineer not only master basic concepts in either design or construction but that there exists a strong background in current engineering approaches and management methods. The course will provide an insight into the requirements, precepts and problems of engineering management of interdisciplinary projects.

**Courses:** CE62, CE64, CE74, CE75

**Credit points:** 12

### ► CEP997 PROJECT 1/2

Professional engineers must be able to define and solve problems in areas which are not covered in textbooks and manuals of good practice. An aid to definition and solution is the critical assessment of research and development work. The obtaining of this information and its study will need a plan of action. As the credit point weighting suggests Project is a significant and important component of the course. Students enrol in this unit over two semesters, completing 12cp in each semester. The guidelines noted in this unit outline are designed to help students complete their project on time whilst producing work of a high academic standard. The aim of this unit is to help the student to develop skills in literature review and reporting on their area of investigation. As each project will have its own needs, the tasks shown below are indicative only. The milestones shown may be completed within 2 semesters. The timelines need to be proportionately extended in all other cases. The main tasks are required by the 'proposed' deadlines (agreed milestones are to be agreed with individual supervisor directly).

**Courses:** CE44, CE46, CE74, CE75

**Credit points:** 24

**Campus offered:** GP

**Semester:** 1, 2, 3

### ► CLB001 RECORDS MANAGEMENT

The paper-based and electronic records and information systems operating within and between organisations; the impact that changes in communication technology have had on these systems.

**Courses:** ED50

**Contact hours:** 3 per week

**Credit points:** 12

**Incompatible with:** COB121

### ► CLB002 TEXT FORMATTING

The use of technology for document preparation, analysis of underlying principles of skills acquisition, traditional and technological perspectives

on: document design, document formatting, business correspondence, tabulation, financial statements, business forms, and document formatting for specialised businesses.

**Courses:** ED50

**Contact hours:** 3 per week

**Credit points:** 12

**Incompatible with:** COB119

### ► CLB003 OFFICE PROCEDURES

An analysis of business environments in a variety of industries: communication practices, communication flows, functions and operational procedures, and the influence and impact of communication technology.

**Courses:** ED50

**Corequisites:** COB173

**Contact hours:** 3 per week

**Credit points:** 12

**Incompatible with:** COB122

### ► CLB004 INTEGRATED FOUNDATION STUDIES 1: VISUAL AND VERBAL LANGUAGE AND LITERACIES

This unit examines literacy from contemporary perspectives. Literacy education has tended to make an artificial divide between the printed word and visual information. Increasingly, contemporary literate practices combine multiple text forms employing a range of media and technologies to communicate. Texts are spoken, written, visual imagery and other symbolic forms, and presented in multimedia combinations and digital interactive contexts. This unit examines the complex simultaneity of texts, delivery modes and media that have specific and more general, social and cultural meaning.

**Courses:** ED91, ED51

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► CLB005 INTEGRATED FOUNDATION STUDIES 3: WELLNESS AND ACTIVE CITIZENSHIP

This unit explores the links between a holistic notion of health and wellness and the practice of active citizenship. It investigates the connections between human wellness, behaviour and particular social, cultural, civic, economic and environmental relationships that characterise communities at particular times and places. Students are encouraged to critically analyse such connections and utilise their knowledge and understanding to develop a sense of purpose about wellness and active citizenship in an increasingly globalised world.

**Courses:** ED91

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► CLB006 PRIMARY CURRICULUM AND PEGAGOGIES: LANGUAGE AND LITERACIES 1

New basics emerge in literacy education. The privileged status of print as the almost exclusive basis to literacy has diminished. Postmodern media culture is powerful and pervasive, and knowledge communication today is as much through multimedia as it is through the single medium of print. This unit acknowledges that children now form their early concepts about literacy from textual environments that are considerably more complex than for those of their predecessors. Contemporary language and literacy education must base its practices on texts from a range of technologies, involving different media, and in recognition of diverse contexts and social purposes for communicating. The unit also recognizes the need to acknowledge the significant differences existing between students' experiential backgrounds, between maturation and ability levels, and between social and cultural backgrounds in literacy education.

**Courses:** ED91

**Campus offered:** KG

**Semester:** 2

### ► CLB301 POWERFUL TEACHERS, POWERFUL STUDENTS

Thematic questions about teaching: understanding the current notion of teacher/student power; ways of understanding teacher/student power and teaching through powerful and empowering teaching/learning models; the practical knowledge needed to empower beginning teachers.

## UNIT SYNOPSES

**Courses:** ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB302 IDENTIFYING AND RESPONDING TO STUDENT DIFFERENCE

The range of perceptions and reactions to individual difference; the psychological explanations for the sociocultural contexts of difference in schools; perspectives on the identification and classification of special educational needs. From a commitment to social justice and equity, it examines policy initiatives which impact on learners and teachers; identifies appropriate strategies.

**Courses:** ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB304 CONTEXT OF ADULT AND WORKPLACE EDUCATION

Investigates and analyses of the contemporary contexts of workplace and community education. Specific attention is given to the changing nature of such contexts and to the implications of this for the workplace and communities. For example, changes in the global and national economy, the labour market and work, technology, the family and community, demographics, and policy are explored through an historical and critical approach. Issues raised by such changes (for example: access, equity and participation, credentialing, competency recognition, and the unintended consequences of policy) are key points of investigation.

**Courses:** ED54, ED26

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB305 EDUCATION IN CONTEXT

This unit investigates and analyses the contemporary contexts of education and schooling. Specific attention is given to the postmodern and culturally diverse nature of such contexts and to the implications of this for professional educators. Topics such as individualism, youth, globalisation, the new work order, marketisation, ethnic diversity, social class, sexualities, Indigenous Australian cultures and rural communities are all explored through an historical and critical approach.

**Courses:** ED43, ED50, ED51, ED52, ED55, ED56, ED57, IF70-79, IF81, IF82, IF83, IF84

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB306 UNDERSTANDING EDUCATIONAL PRACTICES

The social, cultural, historical and political contexts of schooling; technologies, practices and strategies employed by schools; the curriculum as a contested site; the place of schooling in the modern state. Critical reflection by students is encouraged, allowing them to engage with others as co-theorists in pedagogical work.

**Courses:** ED26, ED50, ED51, ED52, ED53, ED55, ED56, ED57, IF70-79, IF81-84

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB308 INDIGENOUS CULTURE AND IDENTITY IN THE AUSTRALIAN

Issues and positions arising from Australian Indigenous cultural contexts and identity; theoretical ways of understanding cultural identity formations and their social impact; critical analysis of the key issues in reconciliation; processes of cultural understanding, research, critique and communication methods explored from the Aboriginal and Torres Strait Islander perspectives.

**Courses:** ED50, ED51

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB320 STUDIES IN LANGUAGE

The language basis in current approaches to the teaching of English; nature and function of language; dynamics involved in interactive situations; appropriateness of language forms used in various social contexts; educational implications of linguistic diversity within the community; recognition of the developmental features of adolescent language.

**Courses:** ED50

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB321 WRITING WORKSHOP

The student, as writer, uses all the language modes in social contexts (either genuine or simu-

lated) to lead to writing in a range of situations. Engagement in these writing situations is designed to bring about personal understanding of the following: the nature of the writing process; the influence of audience and purpose on the final written product; the range of genres (or forms) falling within the writing activity.

**Courses:** ED50, ED51, ED52, ED43

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB322 LITERATURE IN TEACHING

Literature teaching in historical perspective; recent developments in theory; poetry in the senior school; teaching drama in the senior school; teaching the novel in the senior school; shorter works (novellas, short stories) and their use in the English curriculum.

**Courses:** ED50

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB323 TEACHING ADOLESCENT LITERATURE

The scope and nature of young adult literature; strategies for evaluation and selection; recent research into adolescents reading needs, interests and responses; using young adult books in the curriculum.

**Courses:** ED50

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB325 ENGLISH CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75-79

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB326 ENGLISH CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75-79

**Prerequisites:** CLB325

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB327 FILM AND MEDIA CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75-78

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB328 FILM AND MEDIA CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75-78

**Prerequisites:** CLB327

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB329 LOTE CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75-78

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB330 LOTE CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75-78

**Prerequisites:** CLB329

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB334 PRIMARY LOTE CURRICULUM STUDIES

This unit introduces concepts and skills in LOTE curriculum and methodology and prepares appropriately qualified students to teach French, German, Indonesian or Japanese in the upper primary school.

**Courses:** ED50, ED51, ED56, IF82, IF84

**Prerequisites:** Six language units or equivalent

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** CLB449, CLB450

### ► CLB339 ADULT LITERACY AND SECOND LANGUAGE LEARNERS

Explores the special literacy needs of second language learners and investigates teaching approaches which recognise these needs and develop cross-cultural awareness and communication strategies. Topics include a comparison of first and second language literacy; the relationship between second language oracy and literacy; issues in cross-cultural communication; the literacy impact for non-English speaking background learners of current policy initiatives and workplace practices needs analysis in second language literacy course design.

**Courses:** ED54

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB341 LANGUAGE, TECHNOLOGY AND EDUCATION

Foundation unit concerned with language, literacies and technology in educational and worldwide contexts. Contemporary views of language and technological literacies as social activities are explored. Educational implications of the interconnections between technology, language discourse and power are applied to educational setting. The uses of language discourse and power are applied to educational settings. The use of language and technology in instruction is introduced. The unit is offered by the Schools of Cultural and Language Studies in Education and Mathematics, Science and Technology Education.

**Courses:** ED50, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB346 CASE STUDIES IN ADULT AND FAMILY LITERACY

Principles and practices of assisting adults who have less than adequate literacy knowledge and abilities; assisting literacy development of family members; development and use of practical and effective teaching resources and strategies; development, maintenance and reporting of case histories in adult and family literacy.

**Courses:** ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB347 TEACHING STUDENTS FROM NON-ENGLISH SPEAKING BACKGROUNDS

This elective unit for students in all teaching specialisations will develop understanding of specific language and learning needs of students for whom English is a second language. It deals with differences in first and second language development, professional implications of significant policy initiatives related to second language learners, and issues in analysis, assessment and cross-cultural communication. Participants will also investigate language demands of their own

## UNIT SYNOPSES

area of specialisation and develop appropriate teaching techniques and resources.

**Courses:** ED43, ED50, ED51, ED52, ED54, ED55, IF70 -79

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB348 LANGUAGE AND LITERACY CURRICULUM 1

This unit is the first of two curriculum units in language and literacy education for Primary BE students. The unit is organised into two modules. The first concerns both print and digital literacy, and specifically planning for the teaching of reading, spelling and writing in the early years, and the links between oral language and literacy. The second module engages with a genre and functional grammar approach to reading and writing.

**Courses:** ED51

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB349 LANGUAGE AND LITERACY CURRICULUM 2

This unit is the second language and literacy curriculum unit for Primary BE students, and is organised into two modules. The first focuses on planning for critical literacy practices in Years 1-7 classrooms, with emphases on texts in the print and electronic environments, their purposes and audiences, and on critique. The second module explores ESL teaching and learning within the context of a multicultural society.

**Courses:** ED51

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB350 ENGLISH FOR TEACHERS

This unit is designed to help non-native English speaking primary teachers to develop skills in English which will enable them to undertake their teaching and professional roles effectively whilst in Australia and once they are teaching in the English as a Foreign Language (EFL) context.

**Courses:** ED05, ED26, ED43, ED52, ED61

**Credit points:** 12

### ► CLB351 TEACHING METHODOLOGY FOR ENGLISH AS A FOREIGN LANGUAGE 1

This unit is designed to help participants to develop a range of understandings so that they can implement effective English as a Foreign Language Programs for young learners, managing the classroom as a complex social environment for teaching and learning.

**Courses:** ED05, ED26, ED43, ED52, ED61

**Prerequisites:** CLB350

**Corequisites:** CLB353

**Contact hours:** 3 per week **Credit Points:** 12

### ► CLB352 TEACHING METHODOLOGY FOR ENGLISH AS A FOREIGN LANGUAGE 2

In this unit, participants explore current issues and emerging trends in curriculum teaching areas. It requires students to reflect upon their own philosophy of teaching, and to build up an extensive repertoire of advanced teaching strategies and appropriate teaching resources. It will also deal with assessment and evaluation.

**Courses:** ED05, ED26, ED43, ED52, ED61

**Prerequisites:** CLB351

**Contact hours:** 3 per week **Credit Points:** 12

### ► CLB353 MATERIALS AND CURRICULUM DEVELOPMENT FOR ENGLISH AS A FOREIGN LANGUAGE

This unit helps participants to gain understandings and skills that will enable them to maximise learning opportunities for young learners through the principled use of class textbooks and EFL classroom materials. This will involve developing skills in designing tasks and activities, and for planning for short term and long term English language learning.

**Courses:** ED05, ED26, ED43, ED52, ED61

**Contact hours:** 3 per week **Credit Points:** 12

### ► CLB355 ACCOUNTING/BUSINESS MANAGEMENT CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit

planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED50, ED54, ED55, ED19, IF79, IF72

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB356 ACCOUNTING/BUSINESS MANAGEMENT CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF79, IF72

**Prerequisites:** CLB355

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB357 BUSINESS COMMUNICATIONS AND TECHNOLOGIES CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF79

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB358 BUSINESS COMMUNICATIONS AND TECHNOLOGIES CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF79

**Prerequisites:** CLB357

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB359 ECONOMICS CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF79, IF72

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB360 ECONOMICS CURRICULUM STUDIES 2

Continuation of CLB359. Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF79, IF72

**Prerequisites:** CLB359

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB361 GEOGRAPHY CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75, IF76, IF77, IF78, IF79

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB362 GEOGRAPHY CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assess-

ment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75-79

**Prerequisites:** CLB361

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB363 HISTORY CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75-79

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB364 HISTORY CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF75-79

**Prerequisites:** CLB363

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB365 LEGAL STUDIES CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning applied to Legal Studies; and teaching strategies and resources designed to promote a range of learning experiences.

**Courses:** ED19, ED50, ED54, ED55, IF79

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB366 LEGAL STUDIES CURRICULUM STUDIES 2

Continuation of PRB365. Curriculum development within the context of contemporary policies, frameworks and agencies; advanced teaching strategies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF79

**Prerequisites:** CLB365

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB367 SOCIAL SCIENCE CURRICULUM STUDIES 1

Assists students to develop those competencies needed for planning and teaching in selected curriculum areas. Content includes: the nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF79

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► CLB368 SOCIAL SCIENCE CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF70, IF79

**Prerequisites:** CLB367

**Contact hours:** 3 per week **Credit points:** 12

## UNIT SYNOPSES

### ► **CLB369 SOCIAL AND ENVIRONMENTAL FOUNDATIONS**

Explores from an interdisciplinary perspective a number of thematic questions about teaching: the historical development of social and environmental foundations in the study of society; the current sociocultural context of social and environmental education; culture and beliefs as an influence on social and environmental activity; the quality of natural and social systems in the world; resources: conservation and development; place and space, continuity and change, key skills and competencies, critical and creative thinking, perceptions, attitudes and values in social and environmental studies.

**Courses:** ED43, ED51, ED52

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB370 ADVANCED CURRICULUM: ENVIRONMENTAL EDUCATION**

Designed to assist the beginning teacher to implement the Queensland Department of Education's environmental policy in primary schools. The major goal is to develop expertise in the design and delivery of class programs and activities.

**Courses:** ED51

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB371 KNOWING YOUR ENVIRONMENT**

An interdisciplinary social science approach to explore the origins, nature and impact of various environmental issues which threaten the continuing viability of our planet. Its aim is to develop a sound skills and knowledge base enabling students to analyse, synthesise and respond positively to many of the controversial and vital environmental problems at a local, national and global level.

**Courses:** ED52, ED51, ED43

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB372 THE CONSUMER, SOCIETY AND THE ENVIRONMENT**

Designed to enhance the knowledge and skills of the individual in one of the most important roles in a market oriented economy. Content includes: the role and functions of consumers in the Australian economy; the interrelationship between consumers, business and government; consumer protection laws and the need for them; ways of developing pro-active consumerism; and consuming for the environment - the green consumer.

**Courses:** ED52, ED51, ED43

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB373 FUTURE SOCIETIES AND ENVIRONMENTS - AUSTRALIA, ASIA AND THE PACIFIC**

Provides a futures approach in the study of the rapidly changing Asia-Pacific region. An introduction to the study of the future is made through an analysis of principal methods and contemporary contributors such as Toffler and Jones. Methods and models that are applied are relevant to Australia, Asia and the Pacific, involving such themes as: population and migration; international relations; political institutions and systems; resource allocation and utilisation; sustainable development; environment issues and structural change.

**Courses:** ED52, ED51, ED43

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB374 STUDIES OF SOCIETY AND ENVIRONMENT**

An investigation of the Key Learning Area of Studies of Society and Environment disciplinary versus interdisciplinary approaches; analysis of key strands; values; curriculum perspectives including gender perspectives; Aboriginal and Torres Strait Islander perspectives, multicultural perspectives, global perspectives, futures perspectives, technology and VET perspectives.

**Courses:** ED50, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB375 ENVIRONMENTAL FIELD STUDIES**

Designed to identify and value a wide range of field study resources and venues. Extensive involvement with field study experiences will as-

ist students in developing appropriate skills for investigating environmental issues and concerns as well as helping students reflect and refine the usefulness and value of field experience in developing effective environmental education programs.

**Courses:** ED51

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB376 STUDIES OF SOCIETY AND ENVIRONMENT CURRICULUM**

This unit provides an opportunity for students to investigate the philosophical and pedagogical characteristics of this teaching area. Ways of translating syllabus requirements into worthwhile curriculum units, and teaching sequences, are considered. It will enable students to gain an understanding of significant societal and environmental problems.

**Courses:** ED26, ED51, ED56, IF82, IF84

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB377 BUSINESS EDUCATION STUDIES**

Enables students to develop those competencies needed for planning and teaching Business Education subject areas which are additional to their two major curriculum areas. A selection of three areas will be made from Accounting, Business Communication and Technology Education, Business Organisation and Management, Economics and Legal Studies. Competencies covered will include a basic knowledge of curriculum planning, appropriate teaching strategies and resources, and assessment planning and implementation.

**Courses:** ED50, ED55, ED19, IF70 - 79

**Prerequisites:** 24 credit points in Business Education Curriculum units.

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB401 CULTURAL DIVERSITY AND EDUCATION**

Explores the multicultural nature of Australian society and its educational approaches to addressing the needs of cultural diversity. Participants will analyse the role of the school and the teacher with respect to schooling and pluralism. Students will learn how to identify and challenge various forms of discrimination, and recognise the kinds of social, curriculum, and classroom management policies which are sensitive to the needs of students from diverse socio-cultural backgrounds.

**Courses:** ED26, ED43, ED50, ED51, ED52, ED53, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB402 ISSUES IN INDIGENOUS EDUCATION**

Factors influencing the position of Aborigines and Torres Strait Islanders in Australian society; government policies; indigenous cultures and education; current initiatives; participation of indigenous communities in policies and programs.

**Courses:** ED26, ED43, ED50, ED51, ED52, ED53, ED54, ED55, IF70-IF79

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB403 GENDER AND SEXUALITY ISSUES FOR TEACHERS**

Gender and sexualities in cultural and school contexts; historical overview of gender relations; theoretical frameworks for gender and current debates in Australia about gender and equity; femininity and masculinity as social constructs; sexuality and the body; violence and gender; debates about boys' behaviour and performance in Australian schools.

**Courses:** ED26, ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB405 ENVIRONMENTAL EDUCATION**

Valuable for all educators concerned with communicating environmental knowledge, concepts, skills, attitudes and values in formal and informal learning situations. Participants are encouraged to pursue the objectives of environmental education within their own subject specialisations.

**Courses:** ED26, ED54, NS48

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB411 INTRODUCTION TO PRODUCTION PRACTICE IN FILM AND MEDIA CURRICULUM**

The relevance of media studies across the curriculum is reflected in the recently developed range of state and national curriculum documents that draw attention to the study of the media. The senior Board subject Film and TV requires that teachers are technologically literate and competent users of audio visual technologies in the production practice and production design aspects and dimensions of the curriculum. This unit aims to equip teachers with the skills they require to teach this complex aspect of their subject area (75% of senior Film and Television is practically based) and builds on previous discipline units, which are more industry based. The unit also relates directly to the competencies required of the pre-service teacher on practicum and to their role as practising teachers of Film and Media studies.

**Courses:** ED50, ED55, IF70-79

**Prerequisites:** CLB327, CLB328

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► **CLB412 ADVANCED STUDIES IN ENGLISH, ESL CURRICULUM**

Focuses in more depth on selected issues related to the teaching of English and English as a Second Language in the secondary school. Topics will include: literature and popular culture in the classroom; materials development for non-native speakers of English; language, multiculturalism and ideology; school to work transition programs; contemporary issues in language education, linguistics and cultural studies.

**Courses:** ED50, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB413 PROGRAMMING AND ASSESSMENT IN LANGUAGE AND MATHEMATICS**

The unit has two main components: a lecture sequence which provides generic information on State and National initiatives and practices in assessment and intervention in both language and mathematics; and, two practical strands in which students will plan for unit development, assessment and intervention in both language and mathematics.

**Courses:** ED18, ED51, ED56, IF82, IF84

**Prerequisites:** Language and Mathematics Curriculum Sequences (or equiv)

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB414 ADVANCED TOPICS IN LANGUAGE EDUCATION**

Provides students with the opportunity of exploring in more detail literature and language-related curriculum issues in the primary school. Topics will include literature and popular culture in the classroom; language and gender; language, multiculturalism and ideology; the student as linguistic ethnographer.

**Courses:** ED51

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB440 TRENDS IN THE TEACHING OF WRITING**

Development of writing in the light of the language in use model, recent research, and classroom practice. It is designed for the P-12 teacher. Students are expected to develop their own folio of writing, an understanding of current approaches to writing curriculum, and writing programs for their classrooms.

**Courses:** ED26

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB441 CHILDREN'S LITERATURE**

Provides students with the opportunity to extend their knowledge of children's literature written by both Australian and overseas writers; examines traditional and emerging genres; develops critical approaches to texts; considers ways of using children's literature in the classroom.

**Courses:** ED26, ED51, ED52, ED53, ED43

**Contact hours:** 3 per week **Credit points:** 12

### ► **CLB443 TRENDS IN THE TEACHING OF READING**

Provides students with the opportunity to extend their understanding of the reading process; exam-

ines current views about reading in order to identify key concepts of the theory; implications for classroom practice are drawn; identifies factors which influence readers and texts; the roles these play in the understanding of the meanings made; develops learning situations based on these understandings.

**Courses:** ED26, ED50, ED53, ED55, IF70-79  
**Contact hours:** 3 per week **Credit points:** 12

► **CLB446 UNDERSTANDING TEXTS AND WRITING**

Over the past twenty years, linguistic studies have increasingly informed the development of language curriculum, the assessment of language, and the processes of language and literacy learning in schools. Over the same time the need for teachers to have systematic knowledge of language and how it works has been recognised. In much of Australia this systematic approach to describing language comes principally from the systemic functional school of linguistics. This unit provides an organised, contextualised introduction to that linguistic model through workshop sessions involving the writing and reading of a range of genre. In this unit, students will learn to critically evaluate texts, their purposes and the language resources employed by writers. In this way, the 'workshop' elements provide experience in writing in such a way that it can be applied to the students' own writing development, to an understanding of texts and grammars and to a consideration of the implications of this experience and knowledge for the teaching of writing.

**Courses:** ED50, ED90, ED51, ED52, ED43  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 2

► **CLB447 ENGLISH AS A SECOND LANGUAGE CURRICULUM STUDIES 1**

Introduction to the design and development of curriculum, materials and resources to meet the general and specific needs of learners who are non-native English speakers and who require higher English language proficiency levels for study purposes.

**Courses:** ED19, ED50, ED55  
**Contact hours:** 3 per week **Credit points:** 12

► **CLB448 ENGLISH AS A SECOND LANGUAGE CURRICULUM STUDIES 2**

Continuation of LAB447 showing students how curriculum materials and resources are implemented through appropriate approaches, methodologies and techniques for individuals, groups or whole classes of learners who are non-native speakers of English.

**Courses:** ED19, ED50, ED55  
**Prerequisites:** CLB447  
**Contact hours:** 3 per week **Credit points:** 12

► **CLB449 PRIMARY LOTE CURRICULUM STUDIES 1**

Current theory and practice in LOTE teaching/learning in the primary school with particular emphasis on the intellectual, physical, emotional and social needs of young learners and the need for teaching approaches drawn from general educational theory together with an understanding of second language acquisition.

**Courses:** ED19, ED55  
**Contact hours:** 3 per week **Credit points:** 12

► **CLB450 PRIMARY LOTE CURRICULUM STUDIES 2**

Continuation of CLB449. Content, processes and materials appropriate to the planning and implementation of LOTE programs in the primary school which integrate culture and language, articulate with the rest of the primary curriculum and in which learners become more interested in, and aware of, languages and cultures other than their own.

**Courses:** ED19, ED55 **Prerequisites:** CLB449  
**Contact hours:** 3 per week **Credit points:** 12

► **CLB451 STORYTELLING: CULTURAL PERSPECTIVES**

Provides students with the opportunity to develop confidence in their ability to tell stories; explores a wide range of oral and traditional story genres; investigates cultures and their sto-

ries; promotes ways for using storytelling across the curriculum.

**Courses:** ED51, ED52, ED26  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** LAP517

► **CLB452 MEDIA LITERACY AND THE SCHOOL**

The unit aims to equip future teachers with an understanding of media literacy which they can apply to their own professional growth in addition to incorporating the concepts in an educational environment. Aspects of media techniques and practices, relationships between culture and meaning; nature of an audience, and concepts of agents and industry will be explored.

**Courses:** ED51, ED52  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** LAP513

► **CLB453 NEW LITERACIES AND TECHNOLOGIES ACROSS THE CURRICULUM**

This unit provides students who have successfully completed CLB341 Language, Technology and Education the opportunity of further developing across-the-curriculum approaches to new technologies and literacies in education. Students will undertake negotiated school-based projects to develop learning resources by applying new technologies and literacies in actual classroom contexts.

**Courses:** ED50, ED55, IF70-79  
**Prerequisites:** CLB341 **Credit points:** 12

► **CLB454 LANGUAGE AND LITERACY CURRICULUM**

Following an introduction which points out how particular language and literacy theories underpin curriculum in Years 1-7 classrooms, the unit is constructed in three modules. The first explores planning for teaching reading, spelling and writing. The second module engages with a genre approach to reading and writing. The third module concerns planning for a critical approach to literacy education.

**Courses:** ED26, ED56, IF82, IF84  
**Contact hours:** 3 per week **Credit points:** 12

► **CLN601 CYBERLEARNING: INFORMATION & KNOWLEDGE IN THE DIGITAL AGE**

Cyberlearning occurs in digitally navigable environments which shape and are shaped by a variety of discourses: social, cultural, political, institutional, technological and economic. Current pedagogical issues and evolving epistemologies pertaining to information creation and knowledge construction need to be addressed by educators and other learners who will participate in cyberlearning experiences in their professional and personal lives. This unit addresses the essential elements for understanding potential new pedagogical practices and epistemologies which will inevitably be shaped by the changing nature of communications technologies.

**Courses:** ED13  
**Campus offered:** EXT **Semester:** 1

► **CLN602 DIVERSITY AND MULTILITERACIES**

Amongst literacy researchers and policymakers in education systems in Australia and internationally, there is fundamental agreement that the digital revolution in communication and information technologies has created new forms of literacy. Everyday literate practices involve multiple text forms, employ a range of media and various technologies to communicate. Texts are spoken, written, produced as visual art and other symbolic forms, and often in multimedia combinations and digital interactive contexts. This unit examines new literacies in education contexts through contemporary perspectives and in acknowledgement of the multiliteracies that exist within a complex of social and cultural groups in society.

**Courses:** ED13  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

► **CLN603 DESIGNING SPACES FOR LEARNING**

New information and communications technologies have altered understandings of time and space for learning and teaching. However, many educators are engaged with learners in traditional physical spaces newly occupied by a variety of technologies and are required to negotiate changing, and often technology-driven approaches to learning and teaching in both geographic and virtual spaces. This unit provides an essential foundation for understanding the complex relationships between space, place and learning pedagogies appropriate for future-oriented educational contexts, and recognises the role of the educator in the design of learning spaces.

**Courses:** ED13  
**Campus offered:** EXT **Semester:** 2

► **CLN604 GLOBALISATION & EDUCATIONAL CHANGE**

This unit provides theoretical understandings of the key debates surrounding globalisation. It examines globalisation's impact on North/South relations, on national and local societies, on the environment and education. It develops an understanding of the challenges presented by globalisation for education's traditional role of building citizenship. By encouraging the use of 'multiple perspectives' it encourages students to extend their awareness of the public role of education in formulating alternative educational visions.

**Courses:** ED13  
**Contact hours:** Block **Credit points:** 12  
**Campus offered:** KG **Semester:** 1

► **CLN605 INTERCULTURAL PEDAGOGIES: COMPARATIVE PERSPECTIVES**

As part of their transition from being nation-centres to institutions engaged with a more interconnected world, schools and universities need to prepare students to live and work in a more interdependent world. This unit prepares educators for engaging with diversity in the curriculum, school or wider educational setting. Using a comparative and transcultural perspective, it discusses major issues that affect school curricula, and the nature of policy initiatives designed to resolve them.

**Courses:** ED13  
**Campus offered:** KG **Credit points:** 12  
**Semester:** 2

► **CLN608 SECOND LANGUAGE ACQUISITION**

Research into second language acquisition is providing new insights into the complex processes involved in natural and instructed language development. This unit extends participants knowledge of research into, and theories of, second language acquisition, and explores pedagogical implications and the relevance of research and theories to the enhancement of second language acquisition and learning.

**Courses:** ED14, ED77  
**Contact hours:** 3 per week **Credit points:** 12

► **CLN609 LANGUAGE, LITERACIES AND LEARNING**

Provides an understanding of the historical, theoretical, conceptual and research bases of program development and classroom instruction in English language and literacy.

**Courses:** ED11, ED13 **Credit points:** 12

► **CLN611 ADULT AND WORKPLACE LITERACY AND NUMERACY**

An exploration of how the field of adult literacy and numeracy has evolved; the changing nature and roles of literacies and numeracies in contemporary societies; how literacy and numeracy practices are embedded in particular settings, for example workplaces, and how cultural, political and economic factors impinge on adult literacy and numeracy learning in different contexts.

**Courses:** ED13, ED11, ED61 **Credit points:** 12

► **CLN612 PRINCIPLES OF SECOND LANGUAGE METHODOLOGY**

The range of approaches to second language learning and the theories of language and learning which underpin them. Theories of language and learning and their implications for TESOL;

## UNIT SYNOPSES

the social context of learning and its impact on methodological decision-making; current approaches and methods in TESOL; the roles of teachers and learners in the TESOL classroom.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN613 SECOND LANGUAGE CURRICULUM DESIGN OPTIONS

The factors which influence teachers in the development of language programs. Includes analysis of the following areas: learner profiles and needs; aims and objectives; processes and criteria for selecting methodology; content selection and sequencing; choice and evaluation of materials and resources.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN614 RESEARCH METHODS IN SECOND LANGUAGE EDUCATION

Introduces students to methods and techniques which are used by classroom teachers and language educators to undertake small and large scale research projects and to report research findings in journals and other publications.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN615 DIRECTED READING IN SECOND LANGUAGE EDUCATION

Provides an opportunity for teachers and others involved in TESOL to review current research articles to gain an overview of developments in TESOL/Applied Linguistics and to explore one or two personal interest areas in greater depth.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN616 LANGUAGE ASSESSMENT AND PROGRAM EVALUATION IN TESOL

Theories and practices in program evaluation, language testing and proficiency assessment. It examines and evaluates standardised tests and instruments which are used to assess the English language proficiency of speakers for whom English is a second language.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN617 PERSONALISED LANGUAGE DEVELOPMENT

Language learning is a lifelong task. This unit allows teachers to take a program of language development aimed at improving their level of proficiency and enhancing their cultural awareness. Students wishing to take this unit should discuss options with the coordinator.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN618 TECHNOLOGY AND SECOND LANGUAGE LEARNING

The twentieth century saw a rapid change in the technology available to language teachers. An exploration of the creative teaching potential of this technology in areas such as computer enhanced language learning (CELL), interactive multimedia (including CD-ROM and video disc) and the use of linear video, word processing and audio materials. The unit will also explore access to and pedagogical uses of electronic communication such as e-mail, list servers and bulletin boards.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN619 FUNCTIONAL GRAMMAR AND DISCOURSE

When we use language to enact our everyday lives, to teach and to learn, we use discourses to do so. Through this unit, students develop both the knowledge and the tools to analyse how discourses, comprising texts, make meaning linguistically. Students will analyse and discuss how meaning is constructed through interacting socio-cultural contexts and texts. Studies include the relationships among discourse, genre, register and text, involving the role of coherence and cohesion in text level meaning, of transitivity, mood and theme/rheme in clause level meaning, and of nominal, verbal and prepositional groups in group level meaning. Significant linguistic

features of written and spoken language are identified and discussed.

**Courses:** ED14, ED77

**Credit points:** 12

### ► CLN620 LANGUAGE AND CULTURE

Explores the relationship between language and culture drawing on insights from linguistics, sociolinguistics and cultural theory. It analyses the co-constitutive nature of language and culture, and examines how this relationship can be explored in the TESOL context.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN623 INVESTIGATING LANGUAGE AND LITERACY TEACHING AND LEARNING

Modules enabling students to tailor investigations into language and literacy theory and practice to fit their area of specialisation. Accordingly, students will be equipped with techniques and tools for analysing, interpreting, critiquing and evaluation theorised and responsible inquiry within their chosen language and literacy field.

**Courses:** ED11, ED13, ED61

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN624 LITERACY/ESL PROGRAMMING AND ASSESSMENT

The unit begins with a generic module for all students enrolled in the unit. Here students investigate current theory and practice in programming and assessment in state and national contexts. Students then select from three possible modules engaging in programming and assessment issues for Primary, ESL, and adult contexts. Students undertake analysis and critique of programs in current use, and in negotiation with the lecturer in charge of the module. The unit involves a case study which centres on students' particular interests.

**Courses:** ED13, ED11, ED61

**Credit points:** 12

### ► CLN625 NEW LITERACIES AND TECHNOLOGIES

The modules in this unit introduce current theories and debates about new forms of literacy practice emerging in the current age of electronic information and communication. Students will experience and experiment with educationally relevant aspects of design or practice in language and literacy education using electronic information and communications applications, and develop strategies for appropriate selection and use of new technologies for particular educational settings and learners.

**Courses:** ED13, ED11

**Credit points:** 12

### ► CLN626 PRIMARY LANGUAGE AND LITERACY CURRICULUM

The unit is constructed of three modules: skilling students for literate acts; teaching/learning through a genre and critical approach; and catering for different learners in the language and literacy program. The unit approaches the teaching-learning cycle through a problem-solving approach, and through case studies and scenarios typical of classrooms which include a range of learners including ESL students and those who have different learning styles and abilities.

**Courses:** ED18

**Contact hours:** 3 per week **Credit points:** 12

### ► CLN631 POLICIES AND PRACTICES FOR INCLUSIVE EDUCATION

Explores how difference, in terms of disability, has been socially produced, conceptualised and theorised. The historical, socio-cultural, organisational, curriculum and pedagogical contexts of education must be taken into account if inclusive education is a political contested issue, demanding constant negotiation and requiring profound changes in the culture of schools. Social justice and equity considerations in policy and practice are a major focus of curriculum call for a supportive, whole school approach.

**Courses:** ED13, ED11

**Credit points:** 12

### ► CLN632 YOUTH FOCUSED BEHAVIOUR MANAGEMENT AND SCHOOLS

Examines the social and contextual causes and consequences of young people's behaviour in schools, and in particular, investigates student behaviour from a 'whole school' perspective rather than in the individual classroom context. It provides analytical frameworks for understanding how the category of 'youth' is constructed and maintained, and how this translates into student behaviour. It focuses on building protective and supportive environments in schools and communities as a preventative rather than a reactive strategy for behaviour management. The intention is to provide participants with the opportunity to examine and develop practices which minimise the probability of the development of 'at risk' behaviour in schools, especially secondary schools.

**Courses:** ED13, ED61, ED11

**Credit points:** 12

### ► CLN640 SOCIO-LINGUISTICS

An introduction to sociolinguistics, the study of language as social process and practice. Topics covered include: language functions and varieties; regional and social dialects, styles and registers; pidgin and Creole languages; language as social practice; discourse; speech communities; language and power; sociolinguistics and language teaching.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit Points:** 12

### ► CLN641 FROM THEORY TO PRACTICE -PRACTICAL APPLICATIONS IN THE TESOL CLASSROOM

Focuses on Communicative Language Teaching (CLT). Extends students' knowledge of the general trends in methodology learned in CLN612, by providing a theoretical basis for CLT and various opportunities to apply the theoretical framework to classroom practice.

**Courses:** ED14, ED77

**Prerequisites:** CLN612 **Corequisites:** CLN612

**Contact hours:** 3 per week **Credit Points:** 12

### ► CLN642 GRAMMAR FOR TEACHERS

Assists language teachers develop a better understanding of grammar and its place in the teaching and learning of a second language. Participants will develop their own language awareness as well as explore a range of strategies and techniques for the effective integration of grammar instruction into language programs.

**Courses:** ED14, ED77

**Prerequisites:** CLN608, CLN612

**Corequisites:** CLN608, CLN612

**Contact hours:** 3 per week **Credit Points:** 12

### ► CLN643 ENGLISH LANGUAGE TEACHING MANAGEMENT

Examines a range of issues of relevance for ESL program directors and managers, such as organizational cultures, educational leadership and human resource management in TESOL; the role of teachers in the TESOL service industry; legal and industrial contexts of TESOL in Australia; TESOL marketing, promotion and funding; and the implications of globalised English language teaching.

**Courses:** ED14, ED77

**Contact hours:** 3 per week **Credit Points:** 12

### ► CLP501 SOCIO-CULTURAL ISSUES IN EDUCATION

Examines socio-cultural contexts of schooling; the pastoral care and special needs industries; resistance and disruption in schools; disability and integration.

**Courses:** ED28, ED61

**Contact hours:** 3 per week **Credit points:** 12

### ► CLP509 DIRECTED STUDY

An individually designed unit which allows students, under the staff supervision, to increase their knowledge relevant to teacher-librarianship.

**Courses:** ED25

**Credit points:** 12

## UNIT SYNOPSES

### ▶ CLP518 VISUAL LITERACY AND RESOURCE DESIGN

Visual literacy; learning styles; interpretation; design and evaluation of visually-based resources.

**Courses:** ED25

**Credit points:** 12

### ▶ CLP527 LEARNING IN THE INFORMATION AGE

Offers educators a theoretical and practical context for exploring how technology is used in learning. This entails understanding how current societal and institutional changes are redefining the relationship between learning and technology in what has been called 'the information age'. Opportunities for reflective practice on learning about, through, and with technology will be provided.

**Courses:** ED25, ED61

**Credit points:** 12

### ▶ CLP528 LITERARY AND POPULAR RESOURCES FOR LEARNING

Addresses issues related to resourcing the curriculum and to prepare educators to cater for the recreational needs and interests of young people. Students are required to read widely and critically contemporary literature written for young people, to become familiar with and critique educational resources in a variety of print and electronic formats, to be alert to the learning resource implications of changing curricula, and to consider the resource needs of students that extend beyond the classroom, yet influence their learning.

**Courses:** ED25, ED61

**Credit points:** 12

**Campus offered:** EXT

**Semester:** 1

### ▶ CLP529 COMMUNICATION WITHIN AN INFORMATION ENVIRONMENT

Theories and practice of interpersonal communications, management and leadership issues which professionals can apply and evaluate in managing information within their own work environment.

**Courses:** ED25, ED61

**Credit points:** 12

### ▶ CLP530 ACCESSING INFORMATION SOURCES

The search process and search strategies; effective utilisation of library catalogues and other services for the retrieval of information; basic reference and information sources; effective searching the World Wide Web; evaluation of information and of methods of finding it.

**Courses:** ED25, ED61

**Credit points:** 12

### ▶ CLP531 FIELD PROGRAM

Principles and practice of school library resource centre administration and management, including study of library environment, administrative systems and staff management; study of the literature of the field, and of work practices through experience in at least two sites.

**Courses:** ED25

**Credit points:** 12

### ▶ CLP532 BIBLIOGRAPHIC ORGANISATION

Library systems for the organisation of information; development of effective, user-friendly catalogues, with automation where appropriate; study of SCIS (School Catalogue Information Service)/AACR (Anglo-American Cataloguing Rules) cataloguing guidelines, SCIS subject headings, and Dewey Decimal Classification; study indexing and other bibliographic helps to accessing information in books and other library holdings.

**Courses:** ED25

**Credit points:** 12

### ▶ CLP534 CONTEMPORARY PUBLISHING: TRENDS AND PRACTICES

This unit will provide students with a knowledge of contemporary publishing trends in print and digital formats from cultural, educational and commercial perspectives. The unit will also enable students to develop appropriate skills for the critical evaluation, design and production of a range of publications for both in-house and wider distribution.

**Courses:** ED25

**Credit points:** 12

### ▶ CNB101 CONSTRUCTION 1

An introduction to the discipline of construction highlighting the role of construction in society and the role and requirements of local authorities

for both domestic and residential construction projects. Construction concepts to be covered include foundation and footings; timber framed structures; masonry and other claddings; roofing construction and materials; internal linings; joinery; site preparation; drainage systems; and landscape retaining walls. The unit extends to residential multilevel units considering issues such as suspended ceilings; suspended concrete floors; acoustic and fire safety requirements; and timber framed multi-level construction. The unit includes drafting of construction details and specifications for residential construction.

**Courses:** CN51, CN53

**Corequisites:** CNB102

**Contact hours:** 5 per week

**Credit points:** 12

**Semester:** 1

### ▶ CNB102 BUILDING TECHNOLOGY 1

This unit comprises an integrated study of material science in two parts. The first is a study of the major structural materials used in construction - timber, masonry, steel and concrete. The second part deals with the non-structural materials used in construction and includes non-ferrous metals, adhesives; sealants, PVC, coatings, board products, glass, bitumen and asphalt. The topics covered include manufacture; physical properties, acoustic and thermal properties and issues such as cleaning, maintenance, corrosion protection, fire protection, deterioration and ageing. Sustainable development and material recycling are also considered. The bias is towards those characteristics that affect a constructor rather than a designer. Practical laboratory sessions are undertaken to introduce the students to a range of standard tests and to demonstrate material behaviour.

**Courses:** CN51, CN53

**Corequisites:** CNB101

**Contact hours:** 4 per week

**Credit points:** 12

**Semester:** 1

### ▶ CNB105 SURVEYING AND DATA ANALYSIS

This unit comprises two components - land studies and surveying, and data analysis. The land studies and surveying component will provide a basic coverage on land issues such as permits of land; ownership and possession; estates and interests in land; easements; party walls, boundary walls, fences and encroachments. Concepts of surveying and measuring: revision of trigonometry; functions of levels and levelling; reading and recording observations; 2-peg test; linear measurement; correction to measurements; the theodolite; angles and bearings; traverses and traverse calculations; setting out; contour and volumes; maps; cadastre. The data analysis component is an introduction to maths and includes unit conversions, manipulation of equations, estimation of accuracy and errors; trigonometry; vectors and their applications. Introduction to statistics including population and samples, descriptive statistics, uncertainty and probability, sampling and distribution, frequency distribution, confidence limits, hypothesis testing for proportions and normal and Student's distributions, introduction to linear regression.

**Courses:** CN51, CN53

**Contact hours:** 3 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ▶ CNB106 TECHNICAL COMMUNICATIONS

This unit comprises two components - professional writing and communications, and introduction to computing. The professional writing and communication component examines the writing and learning processes; library techniques; grammar and styles; drafting processes; report writing; proposals and instructions; presentation strategies and skills. The introduction to computing component provides a general introduction to computing, computing at QUT, information literacy and information skills, use of word processing packages, use of presentation packages, essential skills with spreadsheet packages.

**Courses:** CN51, CN53

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ▶ CNB107 CONSTRUCTION 2

This unit includes a study of the materials, methods and construction of industrial and low-rise commercial buildings including site management techniques, temporary works and plant requirements. These building types are examined with regard to environmental, structural and aesthetic requirements taking into account constraints such as cost, dimensional requirements, statutory regulations and erection requirements. General topics to be examined include site management; construction plant, labour and temporary works; in-ground construction including footings, slabs and basements; and external treatments including landscaping and pavements. Specific topics related to low-rise commercial buildings include reinforced concrete construction and management; structural framing forms and actions; load-bearing masonry; cladding; services co-ordination and internal fitout. Specific topics related to industrial buildings include structural frame forming forms and actions; bracing and stability; cladding and services. Tilt panel construction is also examined in detail.

**Courses:** CN51, CN53

**Prerequisites:** CNB101

**Corequisites:** CNB108

**Contact hours:** 5 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ▶ CNB108 BUILDING TECHNOLOGY 2

A study of the physical behaviour of structural members by an examination of tension, compression, bending, shear and the concepts of stability, equilibrium, and load paths. Domestic structural design is introduced through the use of TRADAC publications. The unit involves a level of quantitative technique but the emphasis is on qualitative and approximate methods.

**Courses:** CN51, CN53

**Prerequisites:** CNB102

**Corequisites:** CNB107

**Contact hours:** 3 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ▶ CNB109 PROFESSIONAL STUDIES 1

This unit is based on a single project in which the students are required to prepare a full design of a single level brick-veneer type dwelling to a standard appropriate for submission to a local authority. In addition to this design, the students are also required to investigate construction and materials costs and prepare a time plan for the construction of the dwelling. The student is encouraged to make use of all information sources, both within and outside the University, and to communicate with the community, professionals, practitioners and government officials. The specific study areas covered within this unit include architectural design, structural design, construction materials, building services design, measurement and costing and construction planning and site layout.

**Courses:** CN51, CN53

**Prerequisites:** CNB101

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ▶ CNB110 MEASUREMENT 1

This unit introduces the role of the Quantity Surveyor and the use of Bills of Quantities. It also covers the measurement of sample work sections. An introduction to the scope of the traditional and developing role of the Quantity Surveyor. The tendering process and the bill of quantities. The Australian Standard Method of Measurement, rules, taking off methodology, mensuration and formulae. The measurement of various work sections to a domestic scale, including finishes, roofing, partitions, woodwork, metalwork, painting, doors, windows, glazing, hardware, suspended ceilings, access floors, masonry and stonework.

**Courses:** CN51, CN53

**Contact hours:** 5 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ▶ CNB120 ECONOMICS IN THE

CONSTRUCTION INDUSTRY  
The unit explores the economic aspects of the property and construction activity. In order to appreciate the commercial nature of property and construction activity, it is essential that students develop a broad understanding of the economic framework surrounding these industries. On completion of this unit generic skills in general

## UNIT SYNOPSES

problem solving and specific attributes including a body of economics knowledge as it applies to the construction industry will be developed.

**Courses:** CN53

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

### ► CNB190 INTRODUCTORY STUDIES

This subject is divided into four distinct but inter-related areas: (a) It examines tertiary learning and the processes necessary for effective and successful study, (b) It satisfies the need of professionals to complement their technical expertise with excellent writing and oral presentation skills, (c) Introduces the student to the versatility of the modern desktop computer and software packages and how they may be used to assist in the provision of professional services, (d) Introduces students to information retrieval techniques in accord with current Information Literacy program development.

**Courses:** CN54

**Credit points:** 12  
**Incompatible with:** CNB181  
**Campus offered:** GP                      **Semester:** 1

### ► CNB191 PROPERTY LAW 1

Topics covered within the content of this unit are: Legal principles and process, the legal system and process; sources and divisions of the law; rules of precedence; interpretation of statutes and regulations; legal practice and procedure; elements of law of property, including ownership and possession, estates and interests in land; easements, rights and restrictive covenants; party walls, boundary walls, fences and encroachments.

**Courses:** CN54

**Credit points:** 12  
**Incompatible with:** CNB183  
**Campus offered:** GP                      **Semester:** 1

### ► CNB192 BUILDING STUDIES 1

The unit introduces students to the principles and methods of domestic construction. For each of the building types covered, common construction faults and defects are also addressed. Drafting tutorials are used to reinforce the lecture material and as a means of teaching to the students to read and understand building documents. The opportunity is taken at this time to introduce such issues as how to measure building areas and how to examine the interrelationship between the documents prepared by the various building consultants. In order to provide an additional self directed learning process, and to bring the lectures into three dimensional reality, each student is required to visit relevant building sites and to photograph and report on the construction methods and techniques being used.

**Courses:** CN54

**Credit points:** 12  
**Incompatible with:** CNB182  
**Campus offered:** GP                      **Semester:** 1

### ► CNB193 PROPERTY LAW 2

This subject covers legal aspects of the auctioneer and agents act, residential tenancies act, land sales act, building unit and group titles act, laws of principle and agents, body corporate management, law of partnership, company law and bankruptcy and liquidation, the law of torts, fair trading and misrepresentation.

**Courses:** CN54

**Prerequisites:** CNB191  
**Credit points:** 12 **Incompatible with:** CNB283  
**Campus offered:** GP                      **Semester:** 2

### ► CNB194 PRINCIPLES OF PROPERTY VALUATION

This subject will be structured to assist student learning across the three component areas of: the market; the profession; and the methods. This will be achieved through coverage of the following topics : character of the property market and open market value; legal interests in property and property types; valuation process and methods for freehold property interests; data collection; factors influencing open market value; report writing and oral presentation; codes of professional practice; and the identification of other legal entities of landed interests.

**Prerequisites:** BSB113

**Corequisites:** EFB102  
**Credit points:** 12 **Incompatible with:** CNB180  
**Campus offered:** GP                      **Semester:** 2

### ► CNB201 CONSTRUCTION 3

This unit provides an introduction to the unique character of high-rise construction and the significance of construction management. The unit includes a detailed appraisal of the techniques used for deep excavation and foundations with the implications of uncertainty on the management of cost and time. The unit provides a progressive development of the structure from the basement to the roof, emphasising the cyclical nature of the process and the specialised equipment required. Construction studies continue with alternative forms of external cladding and the attendant access and waterproofing problems of each and conclude with the services, internal outfitting and maintenance facilities peculiar to high-rise buildings.

**Courses:** CN51, CN53

**Prerequisites:** CNB107  
**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1

### ► CNB202 BUILDING TECHNOLOGY 3

This unit comprises two components - structural principles and formwork. The structural principles component extends the basic design knowledge developed in Building Technology 2 to allow you to undertake basic structural member design of timber, steel and concrete members in tension, compression, bending and shear loads. The emphasis is on approximate or 'first order of magnitude' techniques suitable for estimating or checking purposes. The behaviour of other structural systems such as trusses and retaining walls is also introduced, together with construction stability and an examination of structures such as cranes, shoring, scaffolding and slings. The emphasis will be qualitative rather than quantitative. The formwork component examines the structural, quality and construction requirements for both single level and multi-level formwork. Formwork types and issues to be considered include materials and components; surface finish; wall, column, stair, soffit and beam forms; permanent formwork, construction cycle requirements and assembly issues.

**Courses:** CN51

**Prerequisites:** CNB102  
**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1

### ► CNB203 BUILDING SERVICES

The unit studies the services required in low rise and high rise buildings commencing with a study of community supplied services, the provision of headworks and the temporary services required during construction and moves to permanent water supply, fire protection and waste disposal systems. The unit continues with types of ventilation, air-conditioning systems and heating with a bias to installation procedures and the issue of confined spaces. Electrical services are studied through theoretical concepts and the first-order matching of electrical equipment to demand and cover the topics of terminology and symbols used to describe electrical circuitry, statutory codes and regulations and the responsibilities of building owners and developers. Vertical transportation systems are studied through planning implications, preliminary cost forecasting and the effect on construction practices and access. The unit concludes with studies of the internal environment and health issues including noise and vibration assessment and reduction, electrical energy management and commissioning responsibilities.

**Courses:** CN51, CN53

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1

### ► CNB204 MEASUREMENT 2

This unit consists of measurement of various work sections to more complex works, in accordance with the Australian Standard Method of Measurement. Work sections to include concrete, formwork, reinforcement, groundworks, underpinning, tanking, structural steelwork, exterior elements and demolition. The development and application of Builders' quantities.

**Courses:** CN51, CN53

**Prerequisites:** CNB110  
**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1

### ► CNB206 LAW 1

This unit consists of three components: Safety Management and the Law, Law of Torts, and Contract Law. Safety management and the law: A study of the Workplace Health and Safety Act 1989/1990, the regulations that apply and Codes of Practice. The application of this legislation to the production of a Site Safety Management Plan. Case Studies in addressing safety on building sites. Law of tort: Negligence, professional negligence, duty of care, liability, occupier liabilities, nuisance, fraud and conversion. Contract Law: Elements of contract, offer, acceptance, certainty and consideration, content of a valid contract, misrepresentation, collateral contract, implied terms; formal requirements and part performance; contract documents and their interpretations; remedies for breach of contract; recovery of payment for work done, concept of entire contract, substantial performance and quantum meruit.

**Courses:** CN51, CN53

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

### ► CNB207 PROFESSIONAL STUDIES 2

The aim of the unit is to provide the opportunity for students to experience the type of decisions met in professional practice and to acquire the investigating skills needed to support a rational approach to problem solving. The lecturing program is limited to a few sessions dealing with topics new to the students and relevant to the project. These will normally be related to environmental matters and special construction techniques. Each project is set to develop self-learning skills in the areas of environmental issues, construction practice, planning, community negotiations, commercial decisions and statutory responsibilities.

**Courses:** CN51, CN53

**Prerequisites:** CNB109  
**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

### ► CNB208 CONSTRUCTION BUSINESS MANAGEMENT 1

Examination of a range of general business management practices and issues as they relate to the construction industry. Specific topics to be examined include understanding individuals and organisations; personality and attitudes; personal and professional business ethics; motivation and employee performance; managing stress, conflict, change, power and politics; communication; group functions; decisions making processes. Further, this unit examines industrial relations including the impact of industrial relations in the construction industry; the role of unions; labour management; health and safety; workplace reform and workplace agreements.

**Courses:** CN51, CN53

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

### ► CNB209 THE ENVIRONMENT AND THE QUANTITY SURVEYOR

The professional environment including image and status, scale of fees and charges, codes of ethics, terms of engagement, indemnity insurance, quality assurance, the APC and CPD. Facilities economics including, premises audit, energy and maintenance audits and asset registers. Environmental economics and sustainable development including, cost benefit analysis, environmental impact statements, policy initiatives, development guidelines and legislation.

**Courses:** CN53

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1

### ► CNB227 APPLIED COMPUTING

The unit consists of three major components: the advanced application of spreadsheet and databases; the application of construction management packages; and the integration of computer software in a construction management environment. A range of computer products will be introduced to cover construction management topics such as project scheduling, project control, estimation, and cost monitoring.

**Courses:** CN52, CN53

**Contact hours:** 4 per week    **Credit points:** 12  
**Incompatible with:** CNB304

Campus offered: GP

Semester: 2

► **CNB290 BUILDING STUDIES 2**

Building Studies 2 continues to develop the students' construction knowledge with reference to larger commercial and high-rise buildings. Lectures provide a general overview of advanced construction methods while developing students appreciation of such issues as material finishes, interior fit-outs, typical problems and solutions and interior and exterior component finishes, and fault identification and remedy. The unit examines the history and need for cost control, comparisons between cost planning and approximate estimating. NPWC cost control systems. Effect of height, shape and building efficiency upon cost and value. Functional requirements and cost implications of construction methods. Influence of site and market conditions and economics of prefabrication and industrialisation. Building cost databases and indices, cost checking and analysis. Value management and life cycling costing. Introduction to tax depreciation and tax effective design. No drawing is undertaken in the semester, but students are regularly exposed to consultants' drawings of major commercial buildings and are required to prepare information on areas, finishes, partition types, etc and to consider such issues as suitability of the building for change of occupancy.

Courses: CN54

Credit points: 12

Incompatible with: CNB282

Campus offered: GP

Semester: 1

► **CNB291 URBAN ECONOMICS**

The unit builds on the student's previous exposure to economic theory and applies that knowledge to assist the student's appreciation of the economic imperatives which drive and shape urban development. Topics covered will include: economic processes in spatial and land use development; urban growth theory; competing land use; supply and demand in the pricing of urban property; The concept of the 'rent bid curve'; business location theory; the impact of land based communications corridors on price; technology and footloose location theory; planning and government control on free market pricing; environmental and heritage issues; and local government regulation and by-laws.

Prerequisites: BSB113, EFB102

Credit points: 12 Incompatible with: CNB184

Campus offered: GP

Semester: 1

► **CNB292 PROPERTY INVESTMENT VALUATION**

This unit develops further the basic property valuation principles introduced in CNB194, Principles in Property Valuation. The emphasis now moves to the valuation of income producing property assets which are more commonly termed 'investment properties'. Topics covered include the mathematics of freehold and leasehold property valuation utilising the time value of money formula as exhibited in the capitalisation of net income and discounted cash flow approaches.

Courses: CN54

Credit points: 12

Incompatible with: CNB286

Campus offered: GP

Semester: 1

► **CNB293 REAL ESTATE ACCOUNTING AND TAXATION**

Financial accounting: period versus project income determination, inventory valuation and costs of goods sold, introduction of asset valuation theories, depreciation, intangible asset determination, effects of taxation. Analysis and interpretation of financial statements; multiple factors in interpretation of financial statements; multiple factors in interpretation, analysis principles for business brokerage. Asset valuation: conventional bases for valuation, current cost, replacement cost general price level changes, effects in depreciation and taxation. Business structures: sole trader, partnerships, companies and appropriate accounting procedures. Business analysis and assessment of value for business brokerage. Project accounting, contracts, payments, interim project determination, development costs. The implications of current taxation regimes on; investment and development profitability and project funding. Interpretation

of income and capital gains tax and the GST. Deductions and allowances, gearing (negative gearing), depreciation and building amortisation.

Courses: CN54

Credit points: 12

Incompatible with: CNB280

Campus offered: GP

Semester: 1

► **CNB294 REAL ESTATE AGENCY AND MARKETING**

Real Estate Agency Practice introduces management techniques required to operate a real estate practice, and the establishment, or the purchasing, of an agency or rent roll. Consumer and business ethics are covered together with the implications of the Trade Practice and Fair Trading Acts. Issues affecting real estate practice and the associated responsibilities are linked to real estate practice viability, profitability, risk management and professional indemnity.

The subject covers the requirements of the Australian National training body competency standards to ASF 5+6+7 incorporating units 1, 2, 3, 7.18, 11, 12, 19, 20, 21. The student will be introduced to the concepts of perception, motivation, personality development, group dynamics, leadership styles, employee selection, negotiation, dispute resolution, as well as examining in detail the real estate agency industry structure, procedures, documentation and codes of ethics and the marketing of freehold and leasehold residential, commercial and specialised real estate investment properties.

The property marketing element of the subject cover the requirements and standards set down in the Australian National Training Body Guidelines (2nd edition) 1993 (and amendments if any) to competency levels ASF 3, 4 for the Real Estate Industry, incorporating field units 6, 17, in ASF 3 and field units 5, 14, 15, 16, 8, 9, 10, 13, 20, 21 in ASF 4 covered during the course lecture. Deliveries of some elements interlink with Law 1, Accounting, and Property Management.

Courses: CN54

Prerequisites: CNB191

Credit points: 12

Incompatible with: CNB185, CNB281

Campus offered: GP

Semester: 2

► **CNB295 PLANNING THEORY AND PROCESSES**

Development of land use in most western democracies is a controlled and regulated activity. This unit examines the history and morphology of planning control in the Queensland context and its impact on property markets. Topics covered will include: Introduction to the emergence of fundamental principles of urban planning control and regulation in Queensland; the statutory planning process and current Queensland legislation; urban and regional planning on matters of equity and social responsibility; types of planning controls; detailed coverage of current development planning approval and appeals processes; conservation and heritage protection and its impact on development and land use rights and economic value, and the concepts and impact of regional planning and special development zones.

Courses: CN54

Prerequisites: CNB291

Credit points: 12 Incompatible with: CNB380

Campus offered: GP

Semester: 2

► **CNB296 CONTEMPORARY ISSUES**

This unit is deliberately open ended and flexible with regard to content. Issues facing the property industry can be varied, wide-ranging and arrive as an issue as rapidly as it can fade. Content therefore is likely to vary from year to year as issues gain prominence and then recede. Current topics which may be covered might include: Native Title; Heritage; Contamination; Environmental and Sustainability; Professional Issues; Internationalisation of Property Markets; Water Rights; Demographics; Regional and Rural Issues, and Common Property Rights.

Courses: CN54

Credit points: 12

Incompatible with: CNB285

Campus offered: GP

Semester: 2

► **CNB302 CONTRACT ADMINISTRATION**

This unit consists of the following: Duty to the contract vs. duty to the client and employer. Standard form contracts vs. uniquely drafted

conditions; Special conditions of contract, contract addenda, contract documentation, Bills of Quantities, Precedence of documents. Procurement Systems. Tender Code, Insurances. Sub-contractors and nominated sub-contractors, adjustment of provisional sums, variations, interim claims and certificates of payment, forms of security, bank guarantees and retention, counting of days, delays, extensions of time, liquidated and ascertained damages, prolongation costs, practical completion, completion, defects liability, warranties, collateral warranties, final accounts.

Courses: CN51, CN53

Contact hours: 3 per week Credit points: 12

Campus offered: GP

Semester: 1

► **CNB303 CONSTRUCTION BUSINESS MANAGEMENT 2**

The nature and scope of economics is studied which includes production, demand, supply, equilibrium and disequilibrium, theory of the firm, macroeconomic theory and the nature of the construction industry. Accounting theory and practice is introduced covering financial accounting (recording accounting information and basic financial statements, company accounts, cash flow statements, interpretation of accounts), cost and management accounting (basic cost accounting procedures, direct and indirect costs, marginal and standard costing, product costing systems and budgetary control) and financial management (cost of capital, managing working capital, share values, mergers, takeovers, and buyouts).

Courses: CN51, CN53

Contact hours: 3 per week Credit points: 12

Campus offered: GP

Semester: 1

► **CNB305 CONSTRUCTION ESTIMATING**

The unit commences with an introduction to the relationship of the professions involved in estimating and to the techniques available to quantify cost. Studies of the fundamental elements of cost follow leading to detailed methods of evaluating labour, materials and equipment to realistic levels of accuracy. The unit continues with development of the use of rates and constants in assessing base estimates for major building trades and the assessment of offers from sub-contractors.

The student's understanding is broadened by the introduction of the concept of functional estimating and the significance of construction methods to the assessment of non-standard work. The unit continues with the role of management in the appraisal of estimates, the evaluation and offsetting of risk, the significance of competition, the determination of profit and the benefit to both parties of tender letters. Negotiating practices prior to the award of contract and the application of estimating techniques to variations and to profit monitoring conclude the study.

Courses: CN51, CN53

Contact hours: 4 per week Credit points: 12

Campus offered: GP

Semester: 1

► **CNB306 CONSTRUCTION BUSINESS MANAGEMENT 3**

This unit introduces the process of structuring construction budget documents to provide control mechanisms or cost monitoring and purchasing. The issues surrounding dealings with sub-contractors during the initial negotiations and through the subsequent execution of the contract are studied. Dealing with the client on variations in the physical work and the consequences on time are developed. The Construction Safety Act, the Workers Compensation Act and the Environmental Protection Act are studied in detail and the consequences on site operations are explored. The unit concludes with a study of the techniques for the prediction of profitability and the procedures for claiming final payment and finalising the contract.

Courses: CN51

Contact hours: 3 per week Credit points: 12

Campus offered: GP

Semester: 1

## UNIT SYNOPSES

### ► CNB307 BUILDING ECONOMICS AND COST MANAGEMENT

The principles of cost management, including cost planning and cost control, within various procurement systems. Alternative approaches and formats to cost reporting. The application of design and production economics including cost modelling, life cycle costing, tax depreciation, sinking funds, value management and production costs. An analysis of risk management in cost planning and cost control.

**Courses:** CN51, CN53  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► CNB308 PROFESSIONAL STUDIES 3

In the first stage of the unit students are introduced to the 'Committed' computer simulation in which they make decisions relating to a construction management contract for a complex industrial project while monitoring profitability and time. In stage two the students advance to decisions related to the overall management of a building company using the computer simulation 'Arousal' in the areas of staffing, tendering policy and tactical positioning. The concepts in the simulations are supported by discussion groups and role playing.

**Courses:** CN51, CN53 **Prerequisites:** CNB207  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► CNB309 LAW 2

This unit consists of: Sale of goods; hire purchase; negotiable instruments; insurance law; partnership law. Principles of company law; effects of incorporation, limited liability, limits of the separate entity doctrine. Bankruptcy and liquidation; Arbitration, the agreement, comparison with actions at law, reference by consent, appointment of an arbitrator, conduct of an arbitrator, powers and duties, rules of evidence, enforcement of an award, costs. Alternative dispute resolution and mediation.

**Courses:** CN51, CN53 **Prerequisites:** CNB206  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► CNB310 MEASUREMENT 3

The measurement of building services including hydraulics, drainage, mechanical and electrical services. An introduction to basic techniques in computer modelling, simulation and computer-aided design. The impact of these technologies on traditional measurement and quantity surveying in general.

**Courses:** CN53 **Prerequisites:** CNB204  
**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► CNB335 TIME MANAGEMENT

This unit introduces the concept of time and construction scheduling and emphasises their importance in the control of construction projects. The unit includes an in-depth study of project time and resource planning techniques such as bar charts, critical path networks (precedence, time scales, and activity on arrows), line of balance, resource allocation and levelling, schedule updates and progress control.

**Courses:** CN51, CN53  
**Contact hours:** 4 per week **Credit Points:** 12  
**Incompatible with:** CNB304  
**Campus offered:** GP **Semester:** 1

### ► CNB390 PROFESSIONAL PRACTICE

Professional experience forms an integral part of the property course. This unit seeks to provide students with a fully supervised work experience in support of their academic program, in a University approved placement. The unit is fully supported by the Australian Property Institute and the Institute plays a key role in monitoring student/host interaction to ensure students receive the best quality experience possible.

**Courses:** CN54  
**Prerequisites:** Completion of year 1 & 2 units  
**Credit points:** 24  
**Campus offered:** GP **Semester:** 1

### ► CNB391 STATUTORY AND APPLIED VALUATION

Valuers are often called upon to perform valuations of special use properties and for statutory

purpose and to represent those valuations as an expert witness. Contact includes. Valuations for tax and taxation of capital gains; statutory rating purposes under relevant legislation including computer assisted mass appraisal; appeals procedure; compulsory acquisition. Assessment of compensation resulting from acquisition, resumption and damage. Evidence: the expert witness and professional liability; moot court and an introduction to the valuation of special purpose properties and businesses as a going concern.

**Courses:** CN54 **Credit points:** 12  
**Incompatible with:** CNB382  
**Campus offered:** GP **Semester:** 1

### ► CNB392 PROPERTY INVESTMENT ANALYSIS

Topics covered will be: the principles and strategies of investment; alternative forms of investment; real estate as an investment medium; the real estate investment process; property ownership structures; initial feasibility analysis; detailed cash flow analysis involving NPV and IRR analysis; the modified internal rate of return (MIRR) approach; sensitivity and probability analysis; market analysis and real estate cycles; institutional property investment; risk analysis and risk management.

**Courses:** CN54 **Credit points:** 12  
**Incompatible with:** CNB381  
**Campus offered:** GP **Semester:** 2

### ► CNB393 PROPERTY AND ASSET MANAGEMENT

Property Management provides a detailed insight into all aspects of property management, from residential management progressing through to the more specialised industrial, commercial and retail centre management. In addition, this subject will address life cycle analysis and incorporate units of competency standards ASF 16, 17, 18, 19. Upon completion of this subject students will be competent in property management theory at all levels and will have an understanding of: 1. Promotion of rental property, 2. Tenant selection and application of client instructions, 3. Documentation preparation and drafting, 4. Completion of Statutory Documentation, 5. Tenancy transaction recording and management, 6. Property inspections and security, 7. Property maintenance and management, 8. Lease renewal and negotiation, 9. Termination of tenancies, 10. Corporate Management, and 11. Dispute and conflict resolution in management of property.

**Courses:** CN54  
**Prerequisites:** CNB191, CNB191, CNB192, CNB290, CNB293, CNB292  
**Credit points:** 12 **Incompatible with:** CNB386  
**Campus offered:** GP **Semester:** 2

### ► CNB394 PROPERTY DEVELOPMENT

Data will be provided on the Australian urban economic environment to enable students to gain knowledge of the various development sectors. Students will be exposed to various planning, building, legal, financial and environmental acts and conditions. Knowledge gained will be applied to a range of case studies across various development sectors.

**Courses:** CN54  
**Prerequisites:** CNB292 **Corequisites:** CNB392  
**Credit points:** 12 **Incompatible with:** CNB380  
**Campus offered:** GP **Semester:** 2

### ► CNB395 RESEARCH METHODS

The student selects a real estate related topic (approved by an appointed supervisor) for research and dissertation writing. Note: Students who do not qualify to proceed to the research project phase choose a third elective in lieu of this unit. Student who are permitted to proceed may opt to take a third elective instead of the research project after consultation with the Course Coordinator.

**Courses:** CN54 **Credit points:** 12  
**Incompatible with:** CNB383  
**Campus offered:** GP **Semester:** 2

### ► CNB402 INVESTMENT THEORY

This unit introduces the concepts of valuation, types of landed property, income, and ownership costs and capitalisation rates. The unit also examines investment theory covering a range of concepts including NPV, IRR and MIRR.

**Courses:** CN51, CN53

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► CNB407 PROFESSIONAL INVESTIGATION AND REPORTING

Introduces a range of applied methodologies and designs as appropriate, within the context of the construction industry, to both business reports and research dissertations. The unit considers both qualitative and quantitative investigations, data analysis, hypotheses formulation and applied information retrieval. A short research report will be developed which will, in conjunction with the theory presented in the unit, prepare the student for the formal in-depth Research Report (CNB413).

**Courses:** CN51, CN53  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► CNB408 ADVANCED BUILDING AND CIVIL CONSTRUCTION

The unit introduces students to the different demands of the building and the civil engineering approach to construction and highlights the significance of temporary works and the inherent need for planning and safety. Detailed studies cover the methods and equipment employed in the execution of earthworks, heavy foundations, steel fabrication and erection, marine, water retaining structures, roadworks and bridges, mechanical erection and process plants. The unit concludes with the broader issues of environmental management, construction weather forecasting and the issues associated with work in remote locations.

**Courses:** CN51, CN53  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► CNB409 PROFESSIONAL PRACTICE 1

To ensure that relevant professional experience is gained prior to graduating, students are required to obtain a minimum of 100 days approved employment. A verified log book and diary is maintained by the student and forms the focus of discussion during meetings with the units coordinator at the student's place of work. The student is also required to draw from their experience in order to identify a suitable topic to form the basis of a case study.

**Courses:** CN51, CN53  
**Prerequisites:** To be taken in final year of course

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► CNB410 DEVELOPMENT PROCESSES

The unit examines data on the Australian urban economic environment enabling students to gain knowledge of the various development sectors. The unit will examine various planning, building, legal, financial and environmental acts and conditions. The knowledge developed will be used to analyse a range of case studies across various development sectors.

**Courses:** CN51, CN53  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► CNB413 RESEARCH REPORT

The research report provides the student with an opportunity to apply and reinforce knowledge gained from the course. The report must reflect the student's ability to conceptualise, theorise and implement an appropriate program of research. The student may choose, within certain guidelines, a topic of their choice and will be individually supervised throughout the duration of the unit.

**Courses:** CN51, CN53 **Prerequisites:** CNB407  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► CNB420 CURRENT CONSTRUCTION ISSUES

This unit is an integrative study area with two main strands of integration: the integration, under the construction management umbrella, of areas already studied; and the integration of recent and topical developments in the area of construction management. Study areas covered by this unit will vary from year to year as advances

## UNIT SYNOPSES

are made in construction and construction management, but may include quality management; buildability; value analysis; case studies; computer applications and selection; information systems; international construction management; recent developments in law; cultural influences in construction; and new construction technologies and methodologies.

**Courses:** CN51

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

### ► CNB423 PROFESSIONAL PRACTICE 2

The unit is a continuation of Professional Practice 1 (CNB 409). The requirement for a verified log book and diary is maintained and forms part of the final submission. A written report based on the development of the case study identified in CNB409 is also required. The student must attend evening and weekend workshops designed to assist the preparation of the verbal presentation of the case study and further evenings or weekend sessions to make the presentation.

**Courses:** CN51, CN53

**Prerequisites:** To be taken in final year of course.

**Contact hours:** 3 per week    **Credit points:** 12

### ► CNB433 DISSERTATION A

Introduces a range of applied methodologies and designs as appropriate, within the context of the construction industry, to both business reports and research dissertations. The unit considers both qualitative and quantitative investigations, data analysis, hypotheses formulation and applied information retrieval. A short research report will be developed which will, in conjunction with the theory presented in the unit, prepare the student for the formal in-depth Research Report (CNB413).

**Courses:** CN51, CN53

**Contact hours:** 3 per week    **Credit points:** 12  
**Semester:** 1, 2

### ► CNB434 DISSERTATION B

The research report provides the student with an opportunity to apply and reinforce knowledge gained from the course. The report must reflect the student's ability to conceptualise, theorise and implement an appropriate program of research. The student may choose, within certain guidelines, a topic of their choice and will be individually supervised throughout the duration of the unit.

**Courses:** CN51, CN53    **Prerequisites:** CNB433

**Contact hours:** 3 per week    **Credit points:** 12  
**Semester:** 2

### ► CNB490-1/2 RESEARCH DISSERTATION

Student will embark on a research project culminating in the presentation of written dissertation on a topic of their choice. Progression will be closely monitored and assistance provided by individual supervisors who will guide the student through the process.

**Courses:** CN54

**Prerequisites:** CNB395    **Credit points:** 24  
**Incompatible with:** CNB387    **Semester:** 1, 2

### ► CNB491 RURAL VALUATION

The unit utilises skills and knowledge learned from earlier units and applies these attributes to the valuation of rural assets. In particular this unit examines the physical and economic factors of rural land and its development, land utilisation and degradation, farm management and productivity, and extraneous factors influencing rural valuations. Rural sales, and valuation procedures are analysed and physical inspections organised to assist the student with gaining practical experience.

**Courses:** CN54

**Prerequisites:** CNB492  
**Credit points:** 12    **Incompatible with:** CNB184  
**Campus offered:** GP                      **Semester:** 2

### ► CNB492 BUSINESS AND SPECIALIST VALUATION

Knowledge and skills developed in earlier units are applied to the process of valuing special purpose properties and going concerns. Content includes applications of the profits method of valuation, valuation of business assets; tangible, intangible and technical plant and machinery

valuation; valuation of licensed premises, hotels and resorts. Valuation of regional shopping areas; heritage valuations and valuation of transferable development rights. Valuation of terminable interests. Public sector and institutional investment valuation.

**Courses:** CN54

**Prerequisites:** CNB292  
**Credit points:** 12    **Incompatible with:** CNB382  
**Campus offered:** GP                      **Semester:** 2

### ► CNB493 ADVANCED PROPERTY VALUATION AND ANALYSIS

The unit will explore and analyse a variety of contemporary property valuation and analysis techniques as well as techniques used in connection with other asset classes to assess their relevance to investment property analysis. Special attention will be paid to a study of the effects of taxation and finance and the analysis methods associated with net of tax and finance investment performance measurement. The concept of sensitivity analysis introduced in earlier units will be further developed with the introduction of probability modelling methods such as Monte Carlo Simulation. A major case study centred on a primary complex investment property will form the cornerstone of the unit. Portfolio Property investment in terms of the distributional characteristics of real estate returns, diversification and constructing a property portfolio will also be investigated.

**Courses:** CN54

**Prerequisites:** CNB392  
**Credit points:** 12    **Incompatible with:** CNB385  
**Campus offered:** GP                      **Semester:** 2

### ► CNB494 ADVANCED MARKET RESEARCH ANALYSIS

This unit will re-acquaint students with published property market data sources and methods of interpretation. It will however go further to develop the students' skills to source, analyse, interpret and report on primary property market data using appropriate statistical analysis methods. Students will be introduced to statistical software packages as a tool to assist the data analysis process. The unit will not focus exclusively on the property market, its content or methodologies broader demographic, social, political and economic issues as they effect the property industry will also be investigated. Specific content will include: A review of pricing theories, applied property and urban economics, the effects of economic cycles on the property market, use and interpretation of ABS aggregated demographic data, primary data collection method and analysis, statistical software packages including probability analysis packages such as Monte Carlo Simulation, a review of current commercial analysis and valuation software packages.

**Courses:** CN54

**Prerequisites:** CNB392  
**Credit points:** 12    **Incompatible with:** CNP55  
**Campus offered:** GP                      **Semester:** 1

### ► CNB495 STRATEGIC PROPERTY AND FACILITIES MANAGEMENT

This unit develops knowledge and skills from previous property management and related units and allow students to understand the broader strategic property management issues of property as a component of investment portfolios and as an integral element of business operations. Economic environment and property management issues. Base theory: portfolio analysis and management; asset management and property/tenancy management; facilities management - concentrating on issues of organisation in relation to the identification, provision and management of property assets to support core business delivery. Changes to the use of real property and emerging issues: demographic/social; business and commerce structure/practices; design and location; environmental, legal etc; operational. Applying and integrating management to provide a holistic approach to property asset and facilities management in support of performance management planning, implementation and monitoring of property held for investment and occupational purposes.

**Courses:** CN54

**Prerequisites:** CNB393    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

### ► CNB496 PROJECT MANAGEMENT

An introduction to project management as a growing discipline/profession. This unit will focus on theories related to project definition, project scope, project tools and implementation. Key aspects covered include professional development, organisation design and project structure, communication, managing change and performance measurement (time, cost and quality).

**Courses:** CN54    **Incompatible with:** CNP520  
**Campus offered:** GP                      **Semester:** 1

### ► CNB497 PROJECT COST AND RISK MANAGEMENT

The unit will identify: fundamental project management principles that relate to economics, cost and risk management and the key elements of pro-active cost management and the implementation of risk evaluation. It will revisit the macro-economic and micro-financial contexts of project, construction and property management and provide students with and understanding of the practical applications of responsibility, accountability, motivation, reporting and implementation of project cost management. Furthermore it will cover the area of risk management analysis functions, techniques and theories as well as cost management systems applicable to design cost, value management and project life cycle management. It will apply risk management operations of risk analysis, cost estimating and systematic risk reduction to specific projects and promote a professional attitude towards project cost and risk management issues relating to both construction and property. It will further seek to enhance an educated view of assessment and control measures that can lead to appropriate contractual arrangements and investigate integrate project risk and cost management concepts in order to ameliorate project management effectiveness.

**Courses:** CN54

**Prerequisites:** CNB290, CNB394

**Credit points:** 12    **Incompatible with:** CNP521  
**Campus offered:** GP                      **Semester:** 1

### ► CNB498 PROJECT HUMAN RESOURCE MANAGEMENT

Effective project delivery requires effective utilisation of all project resources. The cornerstone of the project management process is management of the diverse professional team brought together complete the project on time to specification and within budget. Topics covered will include: Principles of Human Behaviour; Aspects of Personal Development and Motivation; Communication skills. Characteristics and styles of leadership; Group dynamics and interactions; Conflict management and arbitration; An integral part of the unit is a field trip the aim of which is to increase their understanding and skills of human processes relevant to project management. The trip seeks to contribute to self awareness; understanding behaviour, understanding and refining effective communication skills; learning the art of good listening; developing questioning skills; ascertaining and experiencing the 'comfort zone'; goal setting; planning in the workplace; problem solving; approaches to conflict resolution; assertion; group conflicts; team development; developing an efficient and effective culture; setting values.

**Courses:** CN54

**Prerequisites:** CNB496  
**Credit points:** 12    **Incompatible with:** CNP551  
**Campus offered:** GP                      **Semester:** 2

### ► CNB499 INTERNATIONAL PROJECT DEVELOPMENT MANAGEMENT

The unit develops concepts of project development management introduced to the student in CNB496 and places them in an international, or more specifically, Asia-Pacific, regional context. To this end the content will be similar to CNB496 with a focus on theories related to project definition and scope, project implementation and termination, and the latest developments affecting the practice of project management in organisations. The following are some of the key aspects covered in the core unit: Project management skills—professional development; Project management as a conscious process, making use of various concepts and techniques to

achieve a successful project outcome—defining project brief/scope and boundaries; Project management as an organisational tool, forming the most appropriate project structure and project team—organisation design and project communication; Project management as an integrative process, from planning to execution and managing change—performance measurement (time, cost and quality).

**Courses:** CN54 **Prerequisites:** CNB394  
**Credit points:** 12 **Incompatible with:** CNP534  
**Campus offered:** GP **Semester:** 2

► **CNN442 DISSERTATION 1/2**

Students develop the skills necessary for conducting independent research by completing a dissertation on a chosen topic under the guidance of an appointed supervisor. The approved research topic must be in an area related to project management or property development. The unit also incorporates lectures in Research Methodology, and information retrieval skills.

**Courses:** CN77, CN92 **Credit points:** 48  
**Campus offered:** GP **Semester:** 1, 2

► **CNP520 PROJECT MANAGEMENT**

An introduction to project management as a growing discipline/profession. This unit will focus on theories related to project definition, project scope, project tools and implementation. Key aspects covered include professional development, organisation design and project structure, communication, managing change and performance measurement (time, cost and quality).

**Courses:** CN64, CN77, CN81  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** CNP431  
**Campus offered:** GP **Semester:** 1

► **CNP521 PROJECT COST AND RISK MANAGEMENT**

Central to project and construction management is the identification of project risk and the control of project cost. The major objective of this unit is to educate students in the theory and application of the economics and management of project cost and risk. The unit covers techniques and tools essential for proactive project and cost management, and the fundamentals of risk evaluation associated with project implementation.

**Courses:** CN64, CN77, CN81  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **CNP532 INNOVATION AND TECHNOLOGY MANAGEMENT**

This unit introduces key concepts in better understanding the role of innovation and technology and its efficient management, to build and maintain a competitive edge in business. Innovation and Technology Management links engineering, science and management principles to identify, choose and implement the most effective means of attaining compatibility between an organisation and its competitive, economic and social environment.

**Courses:** CN64, CN77, CN81  
**Contact hours:** Block **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **CNP533 PROJECT MANAGEMENT LAW**

Aims to create awareness of the legal environment in which the project manager operates. The project manager in the construction industry is exposed to a variety of legal situations on a day-to-day basis. It is important that the manager has the information on which to base decisions which reduce the risk of legal entanglement. The unit covers key principles of Tort, Contract and Construction law from an Australian and international perspective. Dispute resolution processes and mediation are also studied from an Australian and International perspective.

**Courses:** CN64, CN77, CN81  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** CNP433  
**Campus offered:** GP **Semester:** 2

► **CNP534 INTERNATIONAL PROJECT MANAGEMENT**

Introduces key concepts, and furthers the understanding of international issues in project man-

agement from the perspective of the Australian project manager. It compares technical, managerial, economic and cultural concepts and trends related to project management in the competitive global marketplace. Material is covered from a market viewpoint as well as from the viewpoint of a single project and firm. Emerging opportunities and misconceptions are discussed, with particular reference to the Asia-Pacific region.

**Courses:** CN64, CN77, CN81  
**Contact hours:** Block **Credit points:** 12  
**Incompatible with:** CNP406  
**Campus offered:** GP **Semester:** 2

► **CNP545 PROJECT DEVELOPMENT**

Focuses on issues relating to feasibility assessment of property development opportunities and the development process. Topics covered include evaluation of project feasibility - financial, social and legal aspects; marketing, project team formation, contract and procurement options.

**Courses:** CN64, CN77, CN81  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** CNP426  
**Campus offered:** GP **Semester:** 2

► **CNP547 PROPERTY INVESTMENT**

Property (or real estate) is one of a number of competing investments available in the investment market. The unit covers principles and strategies of property investment and evaluation techniques. Basic concepts of value and detailed financial viability studies are studied, including equity and cash flow models.

**Courses:** CN64, CN77, CN81  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** CNP402, CNP438  
**Campus offered:** GP **Semester:** 1

► **CNP551 PROJECT HUMAN RESOURCE MANAGEMENT**

The most valuable and possibly expensive resource a project manager has is people. The manager needs to know how to maximise this resource by working with all those involved in the project. This unit introduces the student to theory and skills in project management as they are applied to managing the people aspects of projects. Theories will be examined as they apply to practical issues. In addition to lectures on the human aspects of project management, an important component of this unit is experiential learning through group dynamics and workshops.

**Courses:** CN64, CN77, CN81  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** CNP431, CNP437  
**Campus offered:** GP **Semester:** 1

► **CNP552 CURRENT ISSUES**

The unit introduces current areas of importance in project management and integrates these areas within the framework established in other units. This unit incorporates case studies, workshops and discussions. Areas may include: procurement practices, industry development, quality management, buildability, value analysis, case studies, arbitration and benchmarking. This unit provides the opportunity for students to become familiar with current research activities within the School and its partners.

**Courses:** CN64, CN77, CN81  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** CNP430  
**Campus offered:** GP **Semester:** 1

► **CNP554 ADVANCED LAND DEVELOPMENT**

This unit focuses on the overall development process appropriate to the use of land in a variety of environments. It considers the drivers of development and the correct processes that should be followed to ensure both an economic and a functional result. It looks at land development within the Central Business District (CBD), suburban commercial, residential and industrial areas.

**Courses:** CN64, CN77, CN81  
**Prerequisites:** CNP545  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** CNP404  
**Campus offered:** GP **Semester:** 2

► **CNP555 PROPERTY MARKET ANALYSIS**

This unit covers the principles of property economics and market research methodology focusing in surveys and hypotheses testing, property market data available in Australia, supply and demand studies of property.

**Courses:** CN90, CN91, CN92  
**Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **CNP556 PROPERTY MANAGEMENT AND CONTRACTS**

This unit covers property contracts, especially leases, partial rights and purchase and sale; lease management, rent statements and accounting procedures, computer based property management programs, property type differentials and property portfolio management.

**Courses:** CN90, CN91, CN92  
**Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **CNP557 PROPERTY PORTFOLIO ANALYSIS**

This unit examines the performance of Australian based property portfolios. It considers the application of modern portfolio theory to property portfolios. The performance of direct and indirect property investment vehicles are analysed in relation to benchmarks and other assets classes.

**Courses:** CN90, CN91, CN92  
**Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **DBB646 SURVEYING COMPUTATIONS**

The use of advanced scientific calculators and their application for geometric computations. Solution of road and area problems; missing data closes; simple curve problems. Solution of more difficult problems, including the three point problem, interrupted bases and various types of curve problems. Introduction to spherical trigonometry and the solution of spherical triangles. The use of spherical trigonometry to determine position and direction on the Earth's surface from observation to astronomical objects. Practical exercises to determine position and direction.

**Courses:** PS47, PS48  
**Corequisites:** PSB424 **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **DBB656 GLOBAL POSITIONING SYSTEMS**

Concepts and theory of Global Positioning Systems including the space segment, control segment and user segment. Satellite signal structures and the importance of precise timing. Introduction to global and local coordinate systems and heights. Error sources and accuracy in GPS; temporal and spatial variation. Mission planning and data collection management. Navigation and data collection techniques; point positioning and analysis. Introduction to broadcast Differential GPS positioning methods. Small group practical exercises.

**Courses:** PS47, PS48 **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **DBP001 CRITERIA OF DESIGN FOR AGEING**

This unit is focused on providing you with an understanding of standards, codes, instruments, procedures, principles, and techniques of importance to design for ageing. It is mostly based on Australian sources and, where appropriate, on a selection of internationally recognised material from other countries. You will gain a broad knowledge of core aspects that govern the physical and care environments. On completion, you should be able to critically appraise key fundamentals and their contextual significance.

**Courses:** DB60  
**Credit points:** 12 **Semester:** 1

► **DBP002 PERFORMANCE OF DESIGN FOR AGEING**

This unit is focused on providing you with a holistic awareness of therapeutic environments, especially in relation to aged care facilities. On completion, you should be able to demonstrate sensitivity to the needs, wants and capabilities of heterogeneous older consumers, and attain an

## UNIT SYNOPSES

insightful perspective of how to develop and benefit from therapeutic environments and products.

**Courses:** DB60

**Credit points:** 12

**Semester:** 1

► **DBP003 EVALUATION OF DESIGN FOR AGEING**

This unit is focused on providing you with an understanding of the post-occupancy evaluation process. On completion, you should be able to demonstrate a comprehension of environment-behaviour research methods, and undertake a post-occupancy evaluation of an aged care facility.

**Courses:** DB60

**Credit points:** 12

**Semester:** 2

► **DBP004 REALISATION OF DESIGN FOR AGEING**

This unit is focused on providing you with the opportunity to select a challenging design/research project of personal interest and professional relevance. On completion, you should be able to demonstrate a thorough familiarity of the chosen design for ageing topic, as well as proficiently integrate theory and practice through a professionally competent approach.

**Courses:** DB60

**Credit points:** 12

**Semester:** 2

► **DBP401 URBAN AND SITE ANALYSIS**

Planning students need to understand the various issues relating to city development as well as learning site planning processes for the development of urban land. This planning unit is designed to assist students develop basic skills of urban and site analysis.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **DBP402 PLANNING PROCESSES**

Graduate students from other disciplines learn how to develop and apply reflexive planning processes applicable to a variety of situations and scales. This involves understanding how land uses are generated and the processes by which they may be planned. As environmental and community planners, they will need to understand how land uses are generated, the processes by which they may be planned, and the research methods appropriate for their study. The unit examines and explains the logic, role and methods of successive stages of the planning process, from objective formulation, information and resource analysis through policy and strategy development to evaluation, development of proposals and monitoring.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **DBP403 DESIGN COMMUNICATION**

Students entering the course from non-design disciplines require basic skills in graphic communication for use in planning practice and design units. This unit, which is normally, taught intensive mode preceding the start of semester has two elements. Perception and Basic Design includes how and what we see, design vocabulary and comparative models of design. Planning Graphics introduces students to different forms of representation, methods, presentation, visual imagery, and graphic tools for analysis and synthesis.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 3

► **DBP404 ECONOMIC AND SOCIAL FOUNDATIONS OF PLANNING**

This is an introductory unit which deals with the economic, social and technological processes that have shaped and still shape our communities and settlements. Urban and regional planners need to appreciate these processes in order to understand their impacts and to utilise them in planning human settlements.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **DBP405 URBAN DESIGN**

Urban Design is the field that brings together the contributions of the various built environment professions toward shaping the urban form and quality of life offered by our cities and towns. This unit provides an introduction to key urban

design ideas, using existing urban areas as the vehicle for analysis and understanding. Urban design is presented as a collaborative interdisciplinary activity that involves the coordinated input of a range of built environment professionals.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **DBP406 COMPUTER APPLICATIONS IN PLANNING**

Planning professionals need both a conceptual understanding, and concrete skills, in the application of computers to analyse and interpret digital and spatial information that forms the basis of decision making. Across both government and private sectors, information is communicated within the digital environment, and as the associated technology, software and methods rapidly develop, planners need to possess the necessary computer skills to continue using digital tools effectively.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **DBP407 ENVIRONMENTAL PLANNING AND MANAGEMENT**

This unit seeks to introduce students to the theories, processes and tools of environmental planning and management. The unit provides the student with a basic understanding of a range of environmental issues and concerns relevant to planning issues and problems. It addresses the broad range of planning decisions that affect the environment.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **DBP408 PLANNING IMPLEMENTATION AND LAW**

Professional competence in planning requires a detailed understanding of the theory and implementation of planning procedure, planning law and other related legislation. This unit in planning implementation and law is designed to give students basic skills and knowledge of planning law and its associated procedures.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **DBP409 URBAN PLANNING PRACTICE**

Planners need the skills to understand and analyse local issues and develop plans and strategies to address them. This will involve the preparation of integrated local area plans in consultation with local communities and stakeholders. This unit, normally consisting of a real world project conducted in conjunction with local governments and communities, provides students with these skills of integrated local area planning.

**Courses:** PS70, PS72

**Credit points:** 12

**Prerequisites:** DBP402

**Semester:** 1

► **DBP410 RESEARCH METHODS IN PLANNING**

This unit introduces students to the range of research methods available to them as planners and provides a critical format in which they can assess the efficacy and suitability of these methods. It also provides practical experience in using relevant methods and techniques to address current planning issues.

**Courses:** PS70, PS72

**Prerequisites:** DBP402

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **DBP411 COMMUNITY PLANNING**

Planners work with wide range of communities and therefore need to understand and address a diverse range of concerns. This unit applies knowledge and skills acquired elsewhere in the course to help students understand and interrelate a wide range of community concerns including land use and development assessment, employment, human services, environmental quality, urban design, access and culture. In exploring the practices and theories of community planning, particular emphasis is placed on community involvement, consultation and conflict resolution.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **DBP412 PLANNING THEORY AND ETHICS**

Students learn about the conceptual basis to their profession and are inculcated with a sound basis of professional ethics. This unit explores the theoretical underpinnings of urban and regional planning through an investigation of a variety of ideas about planning. It also links ideas about the nature and purpose of planning with ideas about professional ethics. Because it is based on utilising students' previous experience it comes in a later semester of the course.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **DBP413 REGIONAL PLANNING PRACTICE**

This unit provides the opportunity to develop and apply wide-ranging skills of analysis and synthesis in a real world problem-solving situation, linked to policy formulation issues explored in parallel in DBP414. As the second of two practice-focused units, Regional Planning Practice concentrates on the broader regional and metropolitan scales to develop skills in dealing with larger scale, strategic-level planning.

**Courses:** PS70, PS72

**Prerequisites:** DBP409

**Corequisites:** DBP414

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **DBP414 REGIONAL AND METROPOLITAN POLICY**

Relevant and effective regional and metropolitan policies must draw upon a wide range of knowledge and skills integrating regionalism, demography, economics, human activities, central place theory, regional resource evaluation, social organization and public administration. These operate and need to be understood at both global and regional scales. The resulting synthesis must be applied within specific regions. In order to achieve this, the unit is designed to focus and apply material from diverse disciplines and locations to current regional and metropolitan policy issues in South East Queensland.

**Courses:** PS70, PS72

**Prerequisites:** DBP402

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **DBP415 PROFESSIONAL PRACTICE OR RESEARCH PROJECT**

This unit will offer students the choice of undertaking a supervised individual research project or a structured period of professional practice. The two are offered in the one unit in order to encourage synthesis between research and professional activities. Both activities are most appropriate in the final semester of the course, allowing students to build on and integrate their previous experience. This unit also provides a stepping stone for students continuing on to the Master of Urban and Regional Planning by providing either a first stage to an advanced research project or an introduction to an advanced professional practice project.

**Courses:** PS70, PS72

**Prerequisites:** DBP410, DBP409

**Credit points:** 12

► **DBP416 ELECTIVE**

This unit enables students to choose an elective from the offerings of any course in QUT or another university, provided that it will enhance learning in the core discipline. Selection requires the approval of the course coordinator.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **DBP417 COMPARATIVE PLANNING**

This unit focuses the comparative dimension within the course by introducing students to the practice of urban and regional planning in specific locations and contexts either through attendance on a field course or at an approved conference.

**Courses:** PS70, PS72

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1, 2

► **DBP501 SPECIALISATION**

This unit enables students to extend their knowledge in areas supporting their main area of practice or research interest. This personalised unit may incorporate study in specific programs offered within the School or from advanced units

## UNIT SYNOPSES

within QUT or another university, or through specialist guidance by staff in their areas of expertise and approved by the Head of School on the recommendation of their research project supervisor.

**Courses:** PS70 **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► DBP502 PROFESSIONAL PRACTICE OR RESEARCH DISSERTATION

This unit is the central element of the Master of Urban and Regional Planning. Because the Masters is intended for students with advanced professional or advanced academic intentions, this unit allows either for professional development through a period of mentored professional practice or research development through supervised individual advanced research. The two are combined into a single unit in order to encourage synthesis between research and professional activities. The unit is an extension of the study completed in DBP415 Professional Practice or Research Project in the Graduate Diploma in Urban and Regional Planning. The unit will normally be linked to the student/staff seminars in DBP503 Masters Seminar.

**Courses:** PS70 **Credit points:** 24  
**Prerequisites:** DBP415 **Campus offered:** GP **Semester:** 1

### ► DBP503 MASTERS SEMINAR

In order to derive full benefit from their advanced studies Master students need to exchange views on theory and practice with each other and with experienced practitioners and academics. They also need to explore the significance of their studies for issues of major planning significance. This unit thus provides an integrated forum as a communicative core to the Masters Program, linking individual dissertations and professional practice experience to a wider contemporary context.

**Courses:** PS70 **Credit points:** 12  
**Prerequisites:** DBP502, DBP414 **Campus offered:** GP **Semester:** 1

### ► EAB001 EARLY CHILDHOOD FOUNDATIONS 1: HISTORICAL AND COMPARATIVE PERSPECTIVES OF EARLY CHILDHOOD EDUCATION

This unit examines the historical development of early childhood services in Australia, and explores a range of comparative perspectives on the care and education of young children in different socio-cultural contexts in Australia and in other cultures. To come to understand early childhood education, it is important to consider the evolution of key ideas that have influenced the development of the field over the past 150 years in western societies (Britain, Europe, the United States and Australia). The unit encourages students to critically reflect on the changing beliefs and practices in relation to young children and families in Australia over the twentieth century and to begin to formulate a personal philosophy of early childhood care and education.

**Courses:** ED92, ED82 **Credit points:** 12  
**Contact hours:** 3 per week **Campus offered:** KG **Semester:** 1

### ► EAB002 EARLY CHILDHOOD FOUNDATIONS 2: FAMILIES AND CHILDHOODS IN EARLY CHILDHOOD EDUCATION AND CARE

Early childhood education and care interface with the lives of children and families in diverse contexts. This unit deals with the social constructions of families and childhoods, the social practices they adopt and the services in which they participate. An understanding of these conditions is necessary for early childhood educators to teach and lead effectively.

**Courses:** ED92, ED82 **Credit points:** 12  
**Contact hours:** 3 per week **Campus offered:** KG **Semester:** 2

### ► EAB003 DEVELOPMENT AND LEARNING IN EARLY CHILDHOOD 1

This unit examines the major theories, features and processes of early development. The pace and direction of development are shaped by biological predispositions and personal attributes, as well as by the interactions and experiences af-

forded to the child. Knowledge of contexts, their impact on individual development, and an awareness of the interrelationships between each area of development is necessary in order to develop an understanding of how children think and learn. Early childhood teachers also require a range of skills for observing and analysing behaviour in order to plan and organise appropriate educational opportunities in early childhood settings.

**Courses:** ED92, ED82 **Credit points:** 12  
**Contact hours:** 3 per week **Campus offered:** KG **Semester:** 2

### ► EAB008 EARLY CHILDHOOD LANGUAGE AND LITERACIES AND COMMUNICATION 1

This is an introductory unit in which you will examine literacies from contemporary perspectives. The focus is on young children learning literacies in family and community contexts in the years prior to formal schooling. You will be encouraged to appreciate each child's journey as they encounter a range of multimodal practices that constitute literacies.

**Courses:** ED92, ED82 **Credit points:** 12  
**Contact hours:** 3 per week **Campus offered:** KG **Semester:** 1

### ► EAB011 EARLY CHILDHOOD CURRICULUM: ARTS 1

We are surrounded by visual images, in many cases much more powerful than any other form of communication. It is important that we are aware of how these images are working on us, and for that, we need to be visually literate. Childhood cultures are made up of interwoven narratives and commodities. The arts enable young children to give form to thought, to develop multiliteracies for exploring and expressing ideas and feelings through representation. This unit examines the characteristic features of the early childhood arts curriculum, its philosophical and theoretical underpinnings, beliefs about the nature of the learner, the child/teacher relationship and the educational process.

**Courses:** ED92, ED82 **Credit points:** 12  
**Campus offered:** KG **Semester:** 2

### ► EAB308 HISTORY CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF70-IF79 **Credit points:** 12  
**Prerequisites:** CLB363 **Contact hours:** 3 per week

### ► EAB345 EARLY CHILDHOOD CURRICULUM: LANGUAGE EDUCATION

Pertinent theories and research in language and literacy education for children in early childhood settings; development of specific teaching and interactive practices for working with children's development of literacy, and for teaching reading and writing; planning appropriate learning environments using a wide range of literary and other resources; introduction to English syllabus.

**Courses:** ED43, ED44, ED52, ED53, ED57, IF81, IF83 **Credit points:** 12  
**Contact hours:** 4 per week

### ► EAB346 EARLY CHILDHOOD CURRICULUM: SCIENCE, SOCIETY AND THE ENVIRONMENT

Teacher's knowledge and understanding of science and its influences and applications; broad, multidisciplinary approaches to scientific, social and environmental issues in order to create just and sustainable futures; development of scientific knowledge and related social perspectives in programs for young children; practical activities arising from observations of children's interest and needs.

**Courses:** ED26, ED43, ED44, ED52, ED53, ED57, IF81, IF83 **Credit points:** 12  
**Contact hours:** 4 per week

### ► EAB347 EARLY CHILDHOOD CURRICULUM: EARLY MATHEMATICAL EXPLORATIONS

Theories and understanding of children's conceptual development; application of active inquiry processes to further concept development in mathematics; foundational concepts in mathematics and the development of appropriate learning and teaching opportunities; use of language in children's concept of number; role and use of technology in processes for learning and understanding.

**Courses:** ED26, ED43, ED44, ED52, ED53, ED57, IF81, IF83 **Credit points:** 12  
**Contact hours:** 4 per week

### ► EAB348 EARLY CHILDHOOD CURRICULUM: ARTS

Introductory principles, practices, philosophies and theories in the visual and performing arts as they relate to young children in various early childhood contexts; the arts as a way of knowing and expressing; creativity vs artistry; overview of artistic development from birth to adolescence; the arts, culture, education and the young child; elements and concepts in the visual arts, music, drama, movement and dance with specific emphasis on the visual arts; the development of the visual arts for children in early childhood settings; assisting artistry with children under five years of age and with school-aged children.

**Courses:** ED43, ED44, ED52, ED53, ED57, IF81, IF83 **Credit points:** 12  
**Contact hours:** 4 per week

### ► EAB349 ADVANCED EARLY CHILDHOOD CURRICULUM: ARTS

Application of principles, practices, philosophies and theories in the areas of music, drama, movement and dance, with specific emphasis on how these arts provide unique opportunities for knowing and understanding; assisting children's development through music, dance and drama in preschool and primary school early childhood settings; integration of the arts in relation to unique and shared elements and concepts across various domains; advocacy in the arts.

**Courses:** ED43, ED52 **Prerequisites:** EAB348 **Credit points:** 12  
**Contact hours:** 4 per week

### ► EAB350 ADVANCED EARLY CHILDHOOD CURRICULUM: LITERACY AND NUMERACY IN THE EARLY YEARS

Observation, assessment and diagnosis of the literacy and numeracy abilities of young children in early childhood education settings; planning, implementing and evaluating programs to foster optimal development in literacy and numeracy; addressing literacy and numeracy needs of all children equitably and justly; critical examination of teaching approaches and resources in literacy and numeracy education.

**Courses:** ED43, ED52 **Prerequisites:** EAB345, EAB347 **Credit points:** 12  
**Contact hours:** 4 per week

### ► EAB351 FAMILY STUDIES AND EARLY CHILDHOOD EDUCATION

Current social contexts and issues affecting families with young children, including employment patterns, unemployment, poverty, inequality and social justice, ideology of family, cultural diversity, particularly from the perspectives of Aborigines and Torres Strait Islanders, and the influence of technology; reciprocal social and family influences.

**Courses:** ED43, ED44, ED52, ED53 **Credit points:** 12  
**Contact hours:** 3 per week

### ► EAB360 EARLY CHILDHOOD DRAMA IN EDUCATION

Drama is a developmental process that assists young children's understanding of themselves and their ability to use language to shape and communicate their thoughts and feelings. Drama also plays a significant role in a child's ability to put themselves imaginatively into someone else's situation, explore roles and relationships and reflect upon their own and other's behaviour. Drama in the context of early childhood can be interpreted in several ways. This unit will explore some of these interpretations from the very informal to the highly formal. It will examine

## UNIT SYNOPSES

drama as a way of knowing and learning for young children and explore the modes, elements and concepts of drama through an experiential base.

**Courses:** ED52

**Contact hours:** 3 per week **Credit Points:** 12

► **EAB361 STORYTELLING IN EARLY CHILDHOOD**

A major consideration for the teacher of early childhood is to provide children with rich experiences of 'storying'. This unit will introduce students to the value of storytelling with young children; the selection of appropriate children's literature suitable for storytelling; various storytelling strategies in terms of their impact on a young audience; the use of appropriate props for storytelling; and ways of integrating storytelling across the curriculum.

**Courses:** ED52

**Contact hours:** 3 per week **Credit Points:** 12

► **EAB362 ETHICAL RESPONSIBILITIES IN EARLY CHILDHOOD**

In depth examination of ethical responsibilities of early childhood educators; historical overview of changing trends in legislation and practice relating to young children; current issues in children's rights; professional ethics and the responsibility of early childhood educators to children, parents, the community, society, colleagues and the profession; advocacy for young children; case studies relating to children's rights and ethical dilemmas.

**Courses:** ED52

**Contact hours:** 3 per week **Credit Points:** 12

► **EAB363 CREATING CURRICULUM WITH YOUNG CHILDREN**

The concept of curriculum in early childhood education evokes much discussion and debate. In this unit more encompassing concepts of curriculum for young children will be considered in the light of theories and research which suggest that children construct their own knowledge. Ways in which teachers and children can work together in creating a curriculum that is meaningful to children while meeting the expectations of parents and society in relation to child care, kindergarten/preschool and lower primary settings will be considered. Practical strategies for setting up supportive learning environments and methods for evaluating teaching and learning will be included.

**Courses:** ED52

**Credit points:** 12

► **EAB364 ACADEMIC AND PROFESSIONAL COMMUNICATION**

Develops an understanding of the general processes of communication in an academic and professional contexts; application of information literacy skills to a range of print and electronic sources; conventions for communicating using a range of academic text-types using print and electronic media; key concepts relating to the study topic: Families in Context.

**Courses:** ED43, ED44, ED53

**Contact hours:** 3 per week **Credit Points:** 12

► **EAB410 EARLY EDUCATION: DECIDING THE CURRICULUM**

Features of curriculum decision making in child care centres, kindergartens, first years of school; focus on processes used to create curriculum that is responsive to young children's abilities and family aspirations; issues associated with multi-age grouping, play, parent partnerships, child study and shared ownership in learning; investigation of current practices and reflection on personal professional knowledge.

**Courses:** ED20, ED26

**Contact hours:** 3 per week **Credit points:** 12

► **EAB411 EARLY EDUCATION: LITERACY**

A study of current understandings about the nature of literacy, literacy development in early childhood and the ways in which this development can be fostered both within the home and at a range of educational and care settings. The broad topic areas addressed comprise language foundations, processes and patterns of development, the classroom context and program development. Students are expected to build on their

preservice studies in the area of language and literacy development and learning.

**Courses:** ED26

**Contact hours:** 3 per week **Credit points:** 12

► **EAB412 ADVANCED INTEGRATED EARLY CHILDHOOD CURRICULUM**

Examination of key ideas informing holistic curriculum approaches; theories and practices associated with play in the curriculum in all early childhood settings, and particularly the lower primary school; implications of implementing an inclusive curriculum; issues of equity and social justice reviewed in relation to the transacting the curriculum in early childhood settings; critical analysis of approaches to designing curriculum for the expanding range of services for young children and families in Australia.

**Courses:** ED43, ED52, ED53

**Contact hours:** 4 per week **Credit points:** 12

► **EAB413 MANAGEMENT OF EARLY CHILDHOOD SERVICES**

General management theory and practice; organisational and leadership styles; management of various early childhood services; setting policies and planning for services; implementing day-to-day tasks and operations; managing and working with people; collective and collaborative approaches to management; teamwork and decision-making; ethical issues and conduct; advocacy of early childhood services for young children from all cultural and social contexts.

**Courses:** ED20, ED43, ED44, ED52, ED53, ED57, IF81, IF83

**Contact hours:** 3 per week **Credit points:** 12

► **EAB414 RESEARCH IN EARLY CHILDHOOD DEVELOPMENT AND EDUCATION**

Research design and methodology; qualitative and quantitative research; ethical issues in the conduct of the research process with young children and the adults involved with them; awareness and understanding of the research process from development of proposal, through conduct of some aspects of data collection and analysis to writing parts of the thesis. Introduction to and involvement in processes of self-evaluation. Students will be involved with a practising researcher who will act as mentor.

**Courses:** ED43, ED52

**Contact hours:** 4 per week **Credit points:** 12

► **EAB415 RESOURCE/SUPPORT PROGRAMS IN EARLY CHILDHOOD**

Community programs which support children and families outside the mainstream early childhood settings; visits to programs such as those for Aboriginals and Torres Strait Islanders, as well as for children and families of other cultures; awareness of effects of cultural diversity, geographical isolation, etc; establishing resource files for teaching and referral; models of parent-professional communication; evaluation of community programs; careers in early childhood services and education.

**Courses:** ED43, ED52

**Contact hours:** 4 per week **Credit points:** 12

► **EAB416 EARLY CHILDHOOD ART EDUCATION**

Historical and contemporary trends in art education; philosophy and practice in early childhood visual arts education; in-depth exploration of young children's artistic development and learning; assessment and evaluation of visual arts in early childhood; methods of reporting and record-keeping; studio art experiences; curating children's art exhibitions; public information about children's artistry; advocacy for improving options for young children in the visual arts.

**Courses:** ED43, ED52

**Contact hours:** 4 per week **Credit points:** 12

► **EAB418 STUDIES IN NARRATIVE FOR YOUNG CHILDREN**

Critical analysis of central themes and issues relevant to the range and uses of narrative with young children; selection and evaluation of stories and narratives (spoken and in print) for use in a multicultural society; desirable qualities in narrative resources and materials; story-telling and story-reading techniques; narrative as a

means of reflecting on human issues for the individual and for society; use of narrative in early childhood programs generally and for linking curriculum areas.

**Courses:** ED43, ED52

**Contact hours:** 4 per week **Credit points:** 12

► **EAB419 MUSIC EDUCATION FOR DIVERSE LEARNERS**

This unit provides advanced exposure to music education and explores ways in which music programs for young children can be established on experiential, self-chosen and guided bases. Students will acquire a understanding of musical concepts and elements to enable them to interact with, and make decisions about, sound and to apply specific teaching strategies and techniques to guide children's conceptual understanding, knowledge, skills and socio-cultural awareness of music.

**Courses:** ED43, ED52

**Contact hours:** 4 per week **Credit points:** 12

► **EAB420 CHILDREN, TEACHERS AND THE ENVIRONMENT**

Teachers positions in relation to community concerns on socio-environmental issues; socially just and ecologically sustainable programs; environmental education; exploring a range of environmental issues and dilemmas.

**Courses:** ED43, ED52

**Contact hours:** 4 per week **Credit points:** 12

► **EAB421 EVERYDAY FOOD LEARNING**

Exploring a food cycle approach to learning; consideration of space, time, resources and teaching strategies; current early childhood policies and practices affecting the food and health of children from birth to eight years of age; staff health in relation to early childhood program delivery.

**Courses:** ED43, ED52

**Contact hours:** 4 per week **Credit points:** 12

► **EAB422 TECHNOLOGY AND THE YOUNG CHILD**

Selection, use and critical evaluation of computers and associated software, and related technologies in early childhood programs, linking technology and problem-solving; applications and use of computers and associated software for language, number and problem-solving; creating teaching materials.

**Courses:** ED43, ED52

**Contact hours:** 4 per week **Credit points:** 12

► **EAB423 MUSEUMS: PLACES OF LEARNING**

Designed to assist preservice teachers understand the nature of children's, students' and visitors' experiences in out-of-school settings such as, museums, science centres, art galleries, zoos, and aquaria. Explores the nature and character of 'museum learning' and examines ways which teachers might optimise students' and children's experiences in and beyond museum settings.

**Courses:** ED43, ED50, ED51, ED52, ED54, ED55, IF70 - 79

**Contact hours:** 3 per week **Credit Points:** 12

► **EAB440 WORKING WITH PARENTS AND COMMUNITY**

Parental roles in childhood; review of research on child rearing; the use of interpersonal skills in relating to parents; planning for parent involvement; parent involvement approaches; resources for parents; meeting the needs of parents and programs; future trends.

**Courses:** ED20, ED23, ED26

**Contact hours:** 3 per week **Credit points:** 12

► **EAB442 MOTOR AND SOCIAL DEVELOPMENT IN EARLY CHILDHOOD**

The role of observation and child study in the practice of early childhood teachers and an introduction to a range of observational techniques; the phases and patterns in the development of fine and gross motor skills in the early years and the biological and environmental influences on skill acquisition; emotional development including self-regulation, temperament and attachment; societal and cultural influences on the development of self identity including self-esteem, self-efficacy, and gender identity; early relationships,

## UNIT SYNOPSES

social competence and prosocial behaviour; the role of play in fostering children's physical, motor and social development and the early childhood teachers' role in facilitating engagement in play.

**Courses:** ED43, ED52, ED57, IF81, IF83  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EAB341, EAB343

► **EAB443 COGNITION AND LANGUAGE IN EARLY CHILDHOOD**

Processes and features of language, perceptual and cognitive development of children from birth to eight years; language acquisition and communication; interrelationships between language and thought; the knowledge base and perceptual and cognitive processes; analysis of observational data to plan for children linguistically, perceptually and cognitively.

**Courses:** ED26, ED43, ED52, ED57, IF81, IF83  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EAB341, EAB342

► **EAB444 INCLUSIVE PRACTICES IN EARLY CHILDHOOD**

The historical and philosophical background to early childhood special education; legal, ethical and empirical bases for inclusive programs; the nature of special needs in intellectual, sensory, physical and social-emotional domains; observation and record-keeping in inclusive early childhood programs; assessment practices across disciplines and ethics in reporting information; theoretical principles and practices in an inclusive early childhood curriculum, incorporating behavioural and developmental approaches; practices and environmental design that support children's play and engagement with materials and peers; communicating and working with families to meet children's and families' needs; working with professionals across discipline areas to use community resources and support agencies effectively.

**Courses:** ED20, ED43, ED44, ED52, ED53, ED57, IF81, IF83  
**Contact hours:** 3 per week **Credit points:** 12

► **EAB445 APPLIED STUDIES OF CHILDREN IN EARLY CHILDHOOD CONTEXTS**

Synthesis of individual students knowledge from the previous foundation units; development of skills in preparation and conduct of debates and case study reporting; children with special needs; social, personal, and professional issues in the provision of early childhood education and services.

**Courses:** ED43, ED52  
**Prerequisites:** EAB442, EAB443, EAB444  
**Corequisites:** EAB444  
**Contact hours:** 4 per week **Credit points:** 12

► **EAN601 EARLY CHILDHOOD TEACHERS KNOWLEDGE IN ACTION**

Critical reflection on knowledge in action as teachers work in early childhood programs; history of the development of key ideas influencing early childhood curriculum and teaching; methods for studying teachers at work in different early childhood programs; analysis of research that examines issues related to teaching in early childhood programs.

**Courses:** ED13, ED11 **Credit points:** 12

► **EAN602 LEADING EARLY CHILDHOOD SERVICES AND POLICIES FOR FUTURE GENERATIONS**

Analyses of the theoretical bases for inquiring into the contexts of early childhood policy and service provisions; understanding of leadership and management processes for developing and delivering responsive and instrumental early childhood services; knowledge of change theories that inform leadership and advocacy for future-oriented early childhood policies and services.

**Courses:** ED13, ED11 **Credit points:** 12

► **EAN603 DEVELOPMENT IN EARLY CHILDHOOD CONTEXTS**

Development of skills for critical evaluation of current developmental research in early childhood; knowledge of a broad range of methodo-

logical approaches for research in early childhood development in family and educational contexts; critical discussion of the findings of developmental research and the implications of this knowledge for early childhood education.

**Courses:** ED13, ED11 **Credit points:** 12

► **EAN604 YOUNG CHILDREN, FAMILIES AND COMMUNITY**

Analysis of family diversity; the interactions between young children, families and the wider social and cultural community; key issues facing families within community contexts; and the analysis of transactions involving professionals, young children, families and community.

**Courses:** ED13, ED11 **Credit points:** 12

► **EAN607 CONSULTATION AND TEAMWORK**

Analysis of typical professional consultancy and teamwork contexts within education and early childhood services, including contributions from other disciplines (for example medicine, psychology, therapies, social welfare, law) and agencies (for example health, community services, police); theoretical and practical understanding of intra- and interpersonal qualities which affect consultancy and teamwork; theory and application of group development processes related to effective task accomplishment. Factors impinging on the quality of interdisciplinary and interagency teamwork; strategies for reviewing and improving consultation and teamwork.

**Courses:** ED13, ED11 **Credit points:** 12

► **EAN608 CONSTRUCTIONS OF CHILDHOOD AND EARLY EDUCATION**

Critical analysis of the social constructions of childhood and early education across the twentieth century and how those constructions are linked to social, political and economic change. Application of a range of theoretical perspectives enables exploration and analysis of assumptions held with respect to childhood and early education; consideration of how conflicting ideas within early childhood education are understood.

**Courses:** ED13, ED11 **Credit points:** 12

► **EAN609 INCLUDING CHILDREN WHO HAVE DISABILITIES IN EARLY CHILDHOOD PROGRAMS**

Critical analysis of policies that impact on the provision of early childhood services for children who have disabilities; examination of the ethical and pragmatic arguments for inclusion and evaluation of the research on inclusive practices; evaluating inclusive programs and knowledge of a range of resources that support inclusion.

**Courses:** ED13, ED11 **Credit points:** 12

► **EAN610 EARLY CHILDHOOD LANGUAGE AND LITERACY CURRICULUM**

Effective teachers of literacy and language in early childhood settings are comfortable with using a wide range of observations and monitoring activities in order to plan appropriate learning programs for young children. Teachers also understand the theories that underpin their teaching practices and assessment processes so that they are able to integrate classroom and individual learning experiences across curriculum areas and age differences.

**Courses:** ED17 **Credit points:** 12

**Contact hours:** 3 per week **Credit points:** 12

► **EAN611 EARLY CHILDHOOD MATHEMATICS, SCIENCE AND TECHNOLOGY CURRICULUM**

The study of the concepts and processes that underpin the curriculum applications of mathematics, science and the use of technology in early childhood contexts. Ways in which early childhood environments can be organised to support active learning, inquiry and problem-solving to support learning of young children.

**Courses:** ED17 **Credit points:** 12

**Contact hours:** 3 per week **Credit points:** 12

► **EAN612 ADVANCED LITERACY AND NUMERACY IN EARLY CHILDHOOD**

Observation, assessment and the diagnosis of the literacy and numeracy abilities of young children in early childhood settings. Planning, implement-

ing and evaluating programs to foster optimal learning and understandings in literacy and numeracy. Addressing the needs of children from all social groups and cultural backgrounds. Developing a sensitivity for the needs of all children from a variety of perspectives.

**Courses:** ED17 **Credit points:** 12

**Contact hours:** 3 per week **Credit points:** 12

► **EAN613 EARLY CHILDHOOD CURRICULUM PRIORITIES**

Curriculum theories and practices are examined from an early childhood education perspective. Topics include child study, working in partnership with parents, environments that teach, and maintaining a balance between concerns for content to be taught and for the quality of the learning experience. Outcomes for students include critical awareness of decision making priorities that will result in child and family responsive curriculum.

**Courses:** ED17 **Credit points:** 12

**Contact hours:** 3 per week **Credit points:** 12

► **EAP533 CHANGE IN CHILDREN: BIRTH TO EIGHT YEARS**

Techniques for observing and analysing child behaviour and development; major theories of child development; cognitive, language, social, physical and emotional development in children birth to age eight.

**Courses:** ED20, ED44, ED53 **Credit points:** 12

**Incompatible with:** EAP528

► **EAP534 CURRICULUM IN EARLY CHILDHOOD 1**

The development of problem solving, explanation, investigation, self-expression, originality, divergent thinking and risk-taking in young children in relation to communication, movement, the expressive arts, mathematics, science, social studies and health curriculum; approaches and suitable materials for these curriculum areas within various early childhood settings; analysis of teaching strategies.

**Courses:** ED20 **Credit points:** 12

**Incompatible with:** EAP529

► **EAP535 CURRICULUM IN EARLY CHILDHOOD 2**

Planning and evaluating early childhood programs for children birth to 8 years; organisation and administration of programs for young children; examination of approaches to teaching; early intervention programs; interdisciplinary teamwork and support services; strategies for working with parents and community agencies; professional behaviour and ethics.

**Courses:** ED20 **Corequisites:** EAP534 **Credit points:** 12 **Incompatible with:** EAP525

► **EAP536 CURRICULUM IN EARLY CHILDHOOD 3**

Current approaches to the teaching of literacy and numeracy in the early years; diagnosis and assessment in early literacy and numeracy; the expressive arts and the sciences as modes of learning and teaching in the early years; applications of technology with young children; planning and teaching for individual and group needs.

**Courses:** ED20 **Prerequisites:** EAP534, EAP535 **Credit points:** 12 **Incompatible with:** EAP526

► **EAP537 CONTEXTS OF EARLY CHILDHOOD EDUCATION**

Examination of the bases and scope of education in early childhood, the role of psychological theories, curriculum models, policies and programs; case studies of early childhood programs.

**Courses:** ED20 **Credit points:** 12 **Incompatible with:** EAP530

► **EAP538 RESEARCH IN EARLY CHILDHOOD**

Examination of the research literature in development and learning; research techniques in early childhood; and their application; application of research techniques to research proposals; experimental research in one aspect of development and learning of children aged three to eight years; contributions to early childhood research from other fields.

## UNIT SYNOPSES

**Courses:** ED20

**Credit points:** 12 **Incompatible with:** EAP531

► **EAP539 TRANSACTIONS IN EARLY CHILDHOOD EDUCATION**

Examination of the implications of social, cultural and geographical factors for early childhood education; consideration of the effects of technology and media, and ethical and legal obligations; analysis of procedures and techniques for case studies; formulating a personal philosophical statement.

**Courses:** ED20, ED23

**Credit points:** 12 **Incompatible with:** EAP532

► **EDB001 TEACHING AND LEARNING STUDIES 1: TEACHING IN NEW TIMES**

Teaching today is being practiced in a changing world. The emergence, in recent decades, of new forms of culture and society alongside new and more globalised diagrams of economy, power and government is having an enormous impact on teaching, schooling and education. It is vital, therefore, for preservice students to develop a knowledge of the historical and contemporary contexts in which teaching, schooling and education are practiced and an understanding of the different social identities and capacities that are specified within them (eg, childhood, youth, gender and class). This unit challenges students to develop an insightful and research-based conceptual framework, drawn from social theory and cultural studies, so that they may respond to these transformations in an informed, ethical and professional manner.

**Courses:** ED55, ED56, ED57, ED90, ED91, ED92, IF79

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1, 2

► **EDB006 LEARNING NETWORKS**

This unit explores the concept of learning networks: interacting social and technical systems that lead to collective sense-making and knowledge construction. Topics include: the nature and use of Information and Communication Technologies (ICTs); learning theories and technologies; and socio-technical practices in learning networks.

**Courses:** ED90, ED91, ED92, ED82

**Contact hours:** 3 per week **Credit Points:** 12  
**Semester:** 1

► **EDB007 CULTURE STUDIES: INDIGENOUS EDUCATION**

Numerous government reports and recent discussions about reconciliation have called for an increased commitment to Indigenous education in Australia. Teachers are increasingly being asked to improve their skill, knowledge and understanding to teach Indigenous students, and to teach curricula which incorporates Indigenous viewpoints on social, cultural and historical matters. This unit will begin with an analysis of your own cultural place in the Australian context, and will afterwards move towards an understanding of Aboriginal and Torres Strait Islander perspectives on history and contemporary issues, and an understanding of why Aboriginal and Torres Strait islander students have been so disadvantaged by the Australian education system.

**Courses:** ED90, ED91, ED92

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

► **EDB400 FIELD EXPERIENCE 1**

Part 1 (On-Campus) provides a background for students about to engage in field experience. The focus is on learning styles, types of knowledge, accelerated and integrated learning, the mentoring process, preparing portfolios of work and self-directed learning. In Part 2 (In-Field), students learn how to plan and promote a learning program. It involves identifying the needs of a target group, and the planning and promotion of appropriate training strategies.

**Courses:** ED54

**Contact hours:** 10/20 day placement; pre- and post-tutorials 1-3 hrs/wk for 7 weeks

**Credit points:** 12

► **EDB401 FIELD EXPERIENCE 2**

In Part 3 (In-Field), students learn how to deliver training sessions as part of a training program.

They also learn the requirements for planning, delivering and reviewing training on a one-to-one or small group basis. Part 4 (In-Field) enables students to learn how to record data on training and to use this to assess the effectiveness of training.

**Courses:** ED54

**Prerequisites:** EDB400 **Corequisites:** EDB400

**Contact hours:** 20 day placement; pre- and post-tutorials

**Credit points:** 12

► **EDB402 FIELD EXPERIENCE 3**

In Part 5 (In-Field), students learn how to implement a training program for a target group. This involves planning a series of training sessions to meet the requirements of a target group. During Part 6 (In-Field), students learn the requirements for planning assessment in a specific context, how to determine evidence requirements, select appropriate assessment methods and develop assessment tools in specific contexts. Students also learn how to employ the above components in practice.

**Courses:** ED54

**Prerequisites:** EDB400

**Contact hours:** 20 day placement; pre- and post-tutorials

**Credit points:** 12

► **EDB403 FIELD EXPERIENCE 4**

In Part 7 (In-Field), students learn how to review assessment procedures in specific contexts, such as those stated in Part 6; check the consistency of the assessment decision; and report review findings. During Part 8 (Private Study), students reflect upon what they have learnt from Parts 2-7, how they overcame barriers/problems of learners in the training/education context; and how these experiences should assist them to become effective trainers/educators.

**Courses:** ED54

**Prerequisites:** EDB400, EDB401, EDB402

**Contact hours:** 20 day placement; pre- and post-tutorials

**Credit points:** 12

► **EDB410 INTRODUCTION TO RESEARCH METHODS IN EDUCATION**

This unit provides a foundation for understanding research design and methods in education. It focuses on reading, understanding and evaluating educational research both within and across different paradigms and on enabling students to develop their own plan for a small-scale research project. Includes the development of skills in understanding, appreciating, and using the processes and techniques of research. Students will be made aware of the variety of research cultures and theoretical perspectives, and to be informed consumers of the research findings of others.

**Courses:** ED50, ED51, ED52 **Credit points:** 12  
**Incompatible with:** EDN611, SPB009

► **EDB411 DISSERTATION**

This unit builds on the understandings developed in the unit Introduction to Research Methods in Education (EDB410). The Dissertation represents an individual piece of research completed under the guidance of an academic supervisor. It should make a contribution to knowledge within a particular educational context through the critical analysis and evaluation of existing knowledge, and the investigation of a research focus or question within a particular educational context. The conclusions of the research should include the relevance for educational practice. This unit provides students with an excellent base on which to build their future academic study.

**Courses:** ED50, ED51, ED52

**Prerequisites:** EDB410 **Credit points:** 36

► **EDB420 EARLY CHILDHOOD PROFESSIONAL PRACTICE: CHILD CARE**

This unit aims to develop an understanding of the socio-historical and contemporary contexts for children under three years of age in child care settings. Students explore a range of programming issues for this context, including observing children and planning for them, the use of play, exploration, communication and problem solving by children of this age. Twenty days of practicum.

**Courses:** ED43, ED52, ED57, IF81, IF83

**Contact hours:** 2.5 per week **Credit points:** 12  
**Incompatible with:** EAB351

► **EDB421 EARLY CHILDHOOD PROFESSIONAL PRACTICE: LOWER PRIMARY**

Development of planning and teaching strategies, with particular focus upon children aged five to eight years; planning from observations; discourse practices and classroom management; working in groups; policies, syllabi and resources in curriculum generation and provision; handwriting; twenty days in lower primary classrooms.

**Courses:** ED52, ED53, ED57, IF81, IF83

**Contact hours:** 2.5 per week **Credit points:** 12  
**Incompatible with:** EAB352, PRB340

► **EDB422 EARLY CHILDHOOD PROFESSIONAL PRACTICE: PRESCHOOL/KINDERGARTEN**

Planning and implementation of teaching strategies appropriate for children attending preschools and kindergartens; management of problems arising between children; classroom management practices; record-keeping; reporting to and relationships with parents and professional colleagues; twenty days of supervised practice.

**Courses:** ED43, ED52, ED57, IF81, IF83

**Contact hours:** 2.5 per week **Credit points:** 12  
**Incompatible with:** EAB353

► **EDB423 EARLY CHILDHOOD PROFESSIONAL PRACTICE: CHOICE**

Refining strategies for teaching and working collaboratively with children, parents and colleagues in early childhood contexts; students reflection on development of own practices; roles of early childhood educators with regard to ethics, advocacy for young children, policy development and administration; curriculum vitae and resume; 20 days of supervised practice in an early childhood setting of the student choice.

**Courses:** ED43, ED52, ED53, ED57, IF81, IF83

**Prerequisites:** EDB420, EDB421, EDB422  
**Contact hours:** 2.5 per week **Credit points:** 12  
**Incompatible with:** EAB354

► **EDB430 PRIMARY PROFESSIONAL PRACTICE 1: CLASSROOM MANAGEMENT**

Provides an introduction to professional practice in education and gives a foundation for further development in the areas of specialisation and/or specific subject curriculum areas. The role of the teacher is examined with reference to the teacher as communicator, planner, manager and facilitator of learning. It provides an opportunity for approaches, strategies and skills associated with the teachers role to be introduced and applied with classroom management. Includes 10 single days in a primary school.

**Courses:** ED51, ED56, IF82, IF84

**Contact hours:** 3 per week **Credit points:** 12

► **EDB431 PRIMARY PROFESSIONAL PRACTICE 2: CURRICULUM DECISION MAKING**

Examination of aspects of curriculum decision making to acquire the knowledge, skills and processes necessary for short-term and long-range planning. Curriculum development, curriculum implementation and curriculum evaluation are investigated to refine daily, weekly and term programs. Particular attention is given to co-operative teaching of an integrated unit of work. Includes 20 days of practice teaching in a primary school.

**Courses:** ED51, ED56, IF82, IF84

**Prerequisites:** EDB430

**Contact hours:** 2 per week **Credit points:** 12

► **EDB432 PRIMARY PROFESSIONAL PRACTICE 3: THE INCLUSIVE CURRICULUM**

Addresses the social, political and material relations that exist in differing classroom curriculum practices, examining both the constraining and enabling factors that impact on and generate possibilities within the conceptualising and operationalising of the inclusive curriculum. This will be done with the support of practising teachers, and critical self-analysis of classroom practices

and possibilities. Includes 20 days of practice teaching in a primary school.

**Courses:** ED51, ED56, IF82, IF84

**Prerequisites:** EDB431

**Contact hours:** 12 per week **Credit points:** 12

► **EDB433 PRIMARY PROFESSIONAL PRACTICE 4: BEGINNING TEACHING**

Students synthesise the range of skills, attitudes and knowledge sources that they have experienced to ensure an effective transition into professional practice as beginning teachers, taking responsibility for the shaping of educational practice from their own perspective and those of the learners. Emphasis will be on planning and implementation of the total program. Includes 30 days of practice teaching in a primary school.

**Courses:** ED51, ED56, IF82, IF84

**Prerequisites:** EDB432

**Contact hours:** 1 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 1, 2

► **EDB440 INDEPENDENT STUDY**

Self-initiated and self-directed academic study in an area of educational management interest which allows study either to a depth not possible in electives, or in an area not covered by the course; for requirements see the Independent Study Guide.

**Courses:** ED23, ED26, ED43, ED50, ED51,

ED52, ED54, ED55, ED61, IF70-79

**Credit points:** 12

► **EDB442 INTEGRATED PROFESSIONAL SEMINARS**

Designed to operate in conjunction with the training provided to educational advisors by the Queensland Department of Education. Students compile a portfolio based on a survey of professional development literature and an in-service activity which they design and implement with classroom teachers. A report is compiled in which students describe their work and reflect on its effectiveness.

**Courses:** ED26, ED61 **Credit points:** 12

► **EDB443 PROFESSIONAL INTERNSHIP OF ASSOCIATE TEACHING**

The Professional Internship is a period of associate teaching in schools under the guidance of a teacher mentor. Authorisation to teach is provided by the Qld Board of Teacher Registration provided that all academic studies and professional practice units have been completed. Student Interns are prepared for the experience in weekly one hour seminars. Includes 30 days of Associate Teaching in a school.

**Courses:** ED50-52, ED55, IF70-79

**Prerequisites:** Successful completion of all professional practice units and coursework; GPA: 5.0 or above

**Contact hours:** 1 per week **Credit points:** 12

► **EDB450 SECONDARY PROFESSIONAL PRACTICE 1: CLASSROOM MANAGEMENT**

Examines the role of the teacher with reference to the concepts of the teacher as communicator, planner, manager and facilitator of learning. It provides an opportunity for associated approaches, strategies and skills to be introduced and applied within the ambit of classroom management in practical settings. Includes 10 single days in a school.

**Courses:** ED50, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

► **EDB451 SECONDARY PROFESSIONAL PRACTICE 2: CURRICULUM DECISION MAKING**

State and federal initiatives in curriculum are examined to interpret curricula for the needs and capabilities of learners. The practice component provides opportunities to design, test and refine personal decision-making models, approaches, strategies and programs. Includes 20 days practice teaching in a secondary school.

**Courses:** ED50, ED55, IF70-79

**Prerequisites:** EDB450

**Contact hours:** 2 per week **Credit points:** 12

► **EDB452 SECONDARY PROFESSIONAL PRACTICE 3: THE INCLUSIVE CURRICULUM**

Addresses the social, political and material relations in differing classroom curriculum practices, with a view to examining both the constraining and enabling factors that impact on and generate possibilities within the conceptualising and operationalising of the inclusive curriculum. Critical analysis of classroom practices and possibilities is effected in the professional practice component. Includes 20 days of practice teaching in a secondary school.

**Courses:** ED50, ED55, IF70-79

**Prerequisites:** EDB451

**Contact hours:** 2 per week **Credit points:** 12

► **EDB453 SECONDARY PROFESSIONAL PRACTICE 4: THE BEGINNING TEACHER**

Students synthesise the range of skills, attitudes and knowledge sources that they have experienced to ensure an effective transition into professional practice as beginning teachers, taking responsibility for the shaping of educational practice from their own perspective and those of the learners. Emphasis will be on planning and implementation of the total program. Includes 30 days of practice teaching in a secondary school.

**Courses:** ED50, ED55, IF70-79

**Prerequisites:** EDB452

**Credit points:** 12

► **EDN602 ADVANCED SEMINARS**

Provides for the special needs and interests of students. Small groups of students interact at an advanced level with specialists or visiting scholars in seminars, conferences and research projects.

**Courses:** ED13, ED11, ED61 **Credit points:** 12

► **EDN603 INDEPENDENT STUDY**

Allows individual students to follow their own particular needs/interests and/or to take advantage of specialised lecturer expertise through working autonomously on relevant topics of interest under the supervision of individual lecturers.

**Courses:** ED13, ED14, ED11, ED61, ED77

**Credit points:** 12

► **EDN608 PROJECT**

A minor research project that provides students with an opportunity to extend, synthesise and analyse knowledge from core and elective units through, for example, a critical literature review, the development of appropriate educational resources, or a project of change in their workplace.

**Courses:** ED13, ED14, ED61, ED77

**Prerequisites:** EDN611 **Credit points:** 24

► **EDN611 UNDERSTANDING EDUCATIONAL RESEARCH**

The foundation unit for studying research methods in education. It focuses on reading, understanding and evaluating educational research both within and across different paradigms used in educational research.

**Courses:** ED13, ED11, ED61 **Credit points:** 12

► **EDN612 CONDUCTING EDUCATIONAL RESEARCH**

Building on the understandings developed in EDN611, this unit focuses on developing the skills and knowledge necessary to design and conduct educational research. Structured to enable students to pursue in-depth studies in selected designs and methods with a view to producing an initial research proposal.

**Courses:** ED13, ED11, ED12

**Prerequisites:** EDN611 OR equivalent OR permission of Coordinator

**Credit points:** 12

► **EDN620 DISSERTATION**

Designed to enable students to develop their research potential through following up a research design developed in the unit Advanced Research, to produce a significant piece of written research in the form of a dissertation.

**Courses:** ED13

**Prerequisites:** EDN612 **Credit points:** 36

► **EDN621 PROFESSIONAL PRACTICE 1: LEARNERS AND TEACHERS IN CONTEXT**

Integration of knowledge of learning, development and contexts, with knowledge of the curriculum, in order to plan and implement learning episodes that are responsive to the needs of individual learners. The central role of communication in successful implementation of planned learning activities will be explored. A practicum (5 single days and 10 days block) in the Area of Specialisation (Early Childhood, Primary, Secondary) will provide first hand experience of the curriculum and of specific teaching and learning contexts.

**Courses:** ED17, ED18, ED19

**Contact hours:** 3 per week **Credit points:** 12

► **EDN622 PROFESSIONAL PRACTICE 2: CLASSROOM MANAGEMENT AND INTRODUCTION TO PROFESSIONAL PRACTICE**

This unit builds on the first Professional Practice unit. It affords an opportunity for approaches, strategies and skills associated with the practising teacher's role to be introduced and applied within the ambit of classroom management with reference to the concepts of the teacher as communicator, planner, manager and facilitator of learning. In both campus-based and field-based components, the principle of reflective action is paramount in the unit. Includes 25 days of practice teaching.

**Courses:** ED17, ED18, ED19

**Prerequisites:** EDN621

**Contact hours:** 3 per week **Credit points:** 12

► **EDN623 PROFESSIONAL PRACTICE 3: CHANGE, DIFFERENCE AND INCLUSIVITY**

This unit will critically consider both the constraining and enabling factors impacting on the conceptualisation and implementation of change processes with respect to inclusive curriculum and practices. This will be done through a practicum using a number of learning modes including literature reviews, presentation of current research in the field and critical analysis of research findings in order to enhance existing practices, case studies and, with the support of practising teachers, critical reflections upon classroom practices and possibilities. Includes 20 days of practice teaching.

**Courses:** ED17, ED18, ED19

**Prerequisites:** EDN622

**Contact hours:** 3 per week **Credit points:** 12

► **EDN624 PROFESSIONAL PRACTICE 4: CURRICULUM DECISION MAKING AND CURRICULUM LEADERSHIP**

The development, planning and evaluation of curricula may take place within a variety of teaching and learning contexts and with learners that are culturally, socially and materially positioned in learning that requires a responsiveness to difference. Responsive and inclusive curriculum decision making and curriculum leadership must integrate current policy initiatives, curriculum theorising of one's emerging curriculum practices and a sound understanding of the changing nature of teacher's work. This unit will emphasise the complexities of planning, implementing and monitoring of integrated programs of learning generated by cooperative decision making specific to local sites and the needs of learners within particular educational contexts. Includes 20 days of practice teaching.

**Courses:** ED17, ED18, ED19

**Contact hours:** 3 per week **Credit points:** 12

► **EDN625 PROFESSIONAL INTERNSHIP AND MINI CONFERENCE**

This unit is a six week school-based professional development program designed to prepare students about to graduate for the exigencies of beginning teaching by offering them opportunities to practice over an extended period of time as if they were beginning teachers; support and guidance are provided by experienced mentor teachers in collaboration with university advisers. The unit will conclude with an intensive mini-conference.

## UNIT SYNOPSES

**Courses:** ED17, ED18, ED19

**Prerequisites:** EDN624

**Contact hours:** 3 per week **Credit points:** 12

► **EDN626 LEARNING AND TEACHING IN HIGHER EDUCATION**

Focuses on theories of teaching and learning as they have evolved to the present day. It encourages a critical approach to pedagogical/andragogical theories.

**Courses:** ED13, ED61 **Credit points:** 12

► **EDN627 CONTEXTS AND ISSUES IN HIGHER EDUCATION**

Explores the context that affords and constrains teaching and learning in higher education. It is important for graduates of a course in higher education that they understand the dynamics of the sector in which they work and can analyse their own practice as teachers in the broader context of the political, social, cultural, organisational and economic issues which have affected post-compulsory education at international, national and institutional levels.

**Courses:** ED13, ED61 **Credit points:** 12

► **EDN628 POSTGRADUATE RESEARCH SUPERVISION**

This unit is designed to enhance new and experienced supervisors' knowledge of different approaches to supervision, the teaching and learning processes involved in effective supervision, the generic skills research graduates need to develop during their candidature, and the policy context within which supervisors operate in your universities and within the global higher education sector.

**Courses:** ED13, ED61 **Credit points:** 12

► **EDN629 PRESENTATION AND DELIVERY MODES IN HIGHER EDUCATION**

Teachers in higher education need a range of presentation approaches appropriate to the needs of their various student groups, and the learning styles of individual students. This unit aims to hone your skills in presentation and delivery, and allow you to critically appraise the values and theoretical frameworks which underpin each mode of delivery, and the effectiveness of various modes as revealed through research and practice.

**Courses:** ED13, ED61 **Credit points:** 12

► **EDN630 HIGHER EDUCATION: CURRICULUM DESIGN, ASSESSMENT AND EVALUATION**

This unit will introduce participants to key concepts underpinning contemporary curriculum design, development, assessment and evaluation in rapidly changing higher education contexts. Students will be required to critique, reconstruct and theorise curriculum thinking and practices in specific contexts at the levels of design, development, assessment and evaluation.

**Courses:** ED13, ED61 **Credit points:** 12

► **EDP508 PRACTICUM IN EARLY CHILDHOOD 1**

Observation; planning, implementation and evaluation of curriculum for children in early childhood; communication with children, parents and colleagues; the demonstration of organisational and administrative skills in an early childhood setting. Includes ten continuous days of practicum.

**Courses:** ED20 **Prerequisites:** EAP533

**Corequisites:** EAP534, EAP535

**Credit points:** 6

► **EDP509 PRACTICUM IN EARLY CHILDHOOD 2**

Observation; design, implementation and evaluation of programs for children in the early childhood age range; communication with children, parents and colleagues; increased responsibility for control and management in the early childhood setting; catering for children in the early childhood age range. Includes 10 days of practicum.

**Courses:** ED20

**Prerequisites:** EDP508

**Credit points:** 6

► **EDP514 FIELD PROJECT**

An applied action research project focusing on the development of a management-oriented pro-

gram; the delivery and evaluation of the program within an existing educational service.

**Courses:** ED23

**Credit points:** 12 **Incompatible with:** EDP516

► **EDP516 EXTENDED FIELD PROJECT**

An applied action research project focusing on the development of a management-oriented program. The delivery and then evaluation of the program within an existing educational service occurs. The Extended Field Project includes a research report with greater breadth and depth than the 12 credit point Field Project.

**Courses:** ED23

**Credit points:** 24 **Incompatible with:** EDP514

► **EDR702 THESIS (1-9)**

Provides students with an opportunity to extend and synthesise knowledge from the coursework section; allows the coursework to be applied as it may be used in future work situations; provides a means of extending the skills and understandings gained from formal units to investigate in-depth some aspects of the student's professional practice. Focuses on the extension of acquired knowledge to increase the understanding and competence of skilled professional educators; facilitates the application of innovative research but grows out of the professional coursework. All candidates will proceed through the three required steps. Namely, Step (A) Thesis Preparation; Step (B) Thesis Confirmation of Candidature; and Step (C) Thesis Implementation.

**Courses:** ED11 **Prerequisites:** EDR703

**Credit points:** 216 (24 each)

► **EDR703 INTERDISCIPLINARY EDUCATION STUDIES (ADVANCED SEMINARS)**

A reading and seminar program that aims to broaden and deepen the student's initial perspective to include elements derived from theoretical perspectives drawn from a number of disciplines; seeks to provide a context of learning for educators who seek the personal and professional benefits that the broadening and deepening of their professional knowledge affords.

**Courses:** ED11

**Credit points:** 24

► **EDR704 THESIS (1-9)**

Provides students with an opportunity to extend and synthesise knowledge from the coursework section; allows the coursework to be applied as it may be used in future work situations; provides a means of extending the skills and understandings gained from formal units to investigate in depth some aspects of the student's professional practice. Focuses on the extension of acquired knowledge to increase the understanding and competence of skilled professional educators; facilitates the application of innovative research but grows out of the professional coursework. All candidates will proceed through the three required thesis steps. Namely, Step (A) Thesis Preparation; Step (B) Thesis Confirmation of Candidature; and Step (C) Thesis Implementation.

**Courses:** ED11 **Credit points:** 108 (12 each)

► **EEB112 ELECTRICAL AND COMPUTER ENGINEERING 1**

The unit comprises two modules: Electric Circuits and Introductory Computing. The first module covers fundamental quantities in circuits and network laws, response to sinusoidal sources, and circuit measurements. The second module covers fundamentals of problem solving using computers and programming, techniques for writing correct and efficient programs.

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59

**Contact hours:** 5 per week **Credit points:** 12

**Semester:** 1, 2

► **EEB130 INTRODUCTION TO AVIONICS**

The unit introduces students to Avionics in a non-technical way. It focuses primarily on aviation navigation and provides a basic understanding of avionics. A complete flight system is studied at an introductory level. It also gives an overview of the electronics inside an aircraft, the aircraft environment, and flight simulation.

**Courses:** EE48

**Contact hours:** 4 per week **Credit points:** 12

**Semester:** 1

► **EEB212 ELECTRICAL AND COMPUTER ENGINEERING 2**

The unit comprises three modules: Network Theory, Engineering Computing, and the Laplace Transform. The first module covers network laws, ac power calculations, three-phase systems, series and parallel resonance, magnetic coupling and linear transformer, and using PSPICE to solve and analyse complex circuits. The second module covers an introduction to Software Engineering and Design. The basics of Laplace transforms are taught in the third module.

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59

**Prerequisites:** EEB112

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2, 3

► **EEB213 ELECTRICAL CIRCUITS AND MEASUREMENTS**

The unit covers fundamental electrical quantities, Kirchoff's laws, direct current and alternating current, response of RLC circuits to dc and sinusoidal sources, Thevenin and Norton equivalents, power transfer, three-phase systems, series and parallel resonance, mutual inductance and transformers, computer-aided analysis of circuits using PSPICE, electrical measurement and analysis in practical laboratory experiments.

**Courses:** IF59, EE46, EE47

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **EEB220 ELECTRICAL ENGINEERING 2M**

The unit covers basic network laws, response to sinusoidal sources, real and reactive power calculation, power factor improvement, electric and magnetic fields, three-phase system, transformer theory, dc and ac rotating machines and their applications, basic electronic circuits, filters, PLC and operational amplifier circuits and applications.

**Courses:** ME36, ME41, ME42, ME48, IF57

**Prerequisites:** EEB112

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **EEB311 ELECTRICAL MEASUREMENT AND MACHINES**

The modules Electrical Measurements and Instrumentation and Introduction to Magnetic Circuits and Electrical Machines introduce the principles of electrical measurements and instrumentation and magnetic circuits, development of theory of single phase and three phase transformers, sensors, PLC's, DSC, and industrial networks. Single phase and three phase transformers, electric machines (motors) including electromechanical energy conversion, reluctance motors, induction motors, D.C. machines, stepper motors, P.C. motors, motor control and heating and cooling.

**Courses:** EE41

**Prerequisites:** EEB212 or EEB213

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **EEB312 ANALOG AND DIGITAL ELECTRONICS**

Module Electronics A provides a basic understanding of the characteristics and operation of discrete semiconductor components. Electronic circuit design is introduced with emphasis on the small signal low and high frequency response of those circuits. Module Digital Electronics gives students a good grounding in the basic principles of digital design, with particular regard to the fundamentals of digital number systems, Boolean algebra, combinational and sequential logic design.

**Courses:** EE41, EE46, EE47

**Prerequisites:** EEB212 or EEB213

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **EEB340 INTRODUCTION TO TELECOMMUNICATIONS**

Telecommunications systems and the principles underlying their operations are introduced starting from mathematical preliminaries such as the Fourier series and the Fourier transform. Analog modulation techniques (AM and FM), systems and circuits for generation and demodulation,

## UNIT SYNOPSES

analog to digital conversion, pulse modulation and baseband digital data communication techniques are studied using time and frequency domain analyses.

**Courses:** EE41, EE46, EE47

**Prerequisites:** MAB132

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► EEB411 CLASSICAL CONTROL AND POWER SYSTEMS

The unit is a core unit with the modules Control Systems and Power Systems. It instills the foundation of feedback control theory for engineers and introduces the student to basic classical feedback control theory, analysis and synthesis. The second module covers power generation, and energy sources, electricity market operation, fault calculations, basic protection, and power system operation, in particular real and reactive power control.

**Courses:** EE41, EE42

**Prerequisites:** EEB311, MAB132

**Corequisites:** EEB440

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 2

### ► EEB412 ADVANCED ELECTRONICS AND EMBEDDED SYSTEMS

The two modules of this unit provide a basis for electronic circuit design in general but also in connection with microprocessor systems. Operational amplifiers and comparators for use in signal conditioning and instrumentation amplifiers are presented as well as integrated circuits as building blocks for system design. Students are given a good grounding in the basic principles and practical use of embedded microprocessor/microcontroller systems.

**Courses:** EE41, EE46, EE47

**Prerequisites:** EEB312

**Contact hours:** 5 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 2

### ► EEB435 CLASSICAL FLIGHT CONTROL SYSTEMS

The unit consists of the modules Control Systems A and Introduction to Space Technology. It instills the foundation of feedback control theory for engineers and introduces the student to basic classical feedback control theory, analysis and synthesis. The second module covers the synthesis and analysis of launch trajectories and simple planetary and satellite orbits.

**Courses:** EE48

**Prerequisites:** EEB130, EEB212, MMB251

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 2

### ► EEB440 CLASSICAL SIGNAL PROCESSING

The unit covers the area of Signals in Linear Systems for which a detailed study of Fourier theory applied to analog signals and to the analysis of linear systems will be given. Systems will be represented in time as well as in frequency and various characteristics and relationships in the two domains will be discussed. Furthermore, circuits and filters will be introduced such as the Butterworth and Chebyshev type. Sampling and discrete-time signal processing will be briefly introduced at the end of the unit.

**Courses:** EE41, EE46, EE47

**Prerequisites:** EEB340, MAB134

**Corequisites:** MAB135

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 2

### ► EEB511 MODERN CONTROL AND POWER ELECTRONICS

The unit comprises the modules Control Systems B and Power Electronics. Control Systems B introduces students to discrete-time control by extending the conventional control into the discrete-time domain. As a second part of Control Systems B, the state model oriented approach for designing control systems is introduced. The second module covers power rectification, controlled rectification, inverters, AC and DC drives, uninterrupted power supplies, power switching components.

**Courses:** EE41, EE42   **Prerequisites:** EEB411

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► EEB512 INDUSTRIAL ELECTRONICS AND DIGITAL DESIGN

Modules Electronics C and Digital Systems Design provide a basic understanding of linear and switch applications in industrial electronics. Practical knowledge associated with interfacing and design are developed. Students will also study the theory and design of advanced embedded digital systems and practical implementation. The practical application of these circuits including interfacing and environment factors will be considered.

**Courses:** EE41, EE46   **Prerequisites:** EEB412

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► EEB521 DIGITAL SYSTEMS AND CONTROL

The unit comprises the modules "Control Systems B" and "Digital Systems Design. Control Systems B introduces to discrete-time control by extending the conventional control into the discrete-time domain. As a second part of Control Systems B, the state model oriented approach for designing control systems is introduced. As second module, it provides the theory and design of advanced digital systems and practical implementation.

**Courses:** ME40

**Prerequisites:** EEB411, EEB412

**Contact hours:** 4 per week   **Credit Points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► EEB535 MODERN FLIGHT CONTROL SYSTEMS

The modules of this unit are Control Systems B and Flight Control Systems. The unit provides students with an understanding of control system design and analysis for discrete time control systems as well as using the state space approach. Furthermore, it introduces students to different aspects of flight control including factors affecting the performance and simulation. Specific topics such as artificial stability and MILSTDs are also covered.

**Courses:** EE48

**Prerequisites:** EEB412, EEB435

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► EEB560 DIGITAL COMMUNICATIONS

Revolutionary developments in the field of Digital Communication Technology have enabled improvement in the characteristics of communication systems in order to meet the performance requirements for transmission of information for private, business and industrial applications. This unit which covers Elements of a Digital Communication System aims at providing the students with an in-depth understanding of the theory and applications of digital communication systems and technology.

**Courses:** EE41, EE46, EE47

**Prerequisites:** EEB440

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► EEB566 REAL-TIME COMPUTER-BASED SYSTEMS

Real-time system requirements, operating system internals, concurrent processes, mutual exclusion, deadlock, memory management, file systems, device drivers, process scheduling, real-time scheduling algorithms, execution time prediction, characteristics of real-time operating systems and real-time languages, real-time system design.

**Courses:** EE46

**Prerequisites:** EEB412, ITB421

**Contact hours:** 4 per week   **Credit points:** 12

### ► EEB584 INTRODUCTION TO DESIGN

Introduction to general principles of electronic circuit and electrical equipment design and realisation; design and implementation of basic electronic circuits; experience in undertaking engineering projects, in report writing, and working in teams. The unit gives students the opportunity to apply their theoretical knowledge to real-life engineering problems.

**Courses:** EE41, EE42, EE48, EE46, EE47

**Prerequisites:** EEB412

**Contact hours:** 1 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1, 3

### ► EEB585 AEROSPACE SYSTEMS DESIGN

This the first of three aerospace engineering design units for the course. Aerospace design is always carried out in teams and the design is done according to a strict industry-standard systems engineering methodology. In this unit the students will be taught the design methodology itself and will work as a team in order to undertake preliminary design work such as a feasibility study. The design exercise may be associated with one of the school's aerospace projects. Students are expected to participate in review presentations and to prepare formal design reports.

**Courses:** EE48

**Contact hours:** 1 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► EEB612 SOFTWARE SYSTEMS DESIGN

The unit introduces students to Software Engineering by considering a whole Software Lifecycle. Each step of the lifecycle is treated in detail, such as concept phase, requirement definition, software design, human-computer interaction, implementation, audits, and maintenance. Software design principles and techniques are presented as well as real-time system design. CASE development tools are briefly introduced as well as object oriented programming for which a structured Object Oriented Analysis and Design are considered.

**Courses:** EE41, EE46

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 2

### ► EEB640 DIGITAL SIGNAL PROCESSING

The unit comprises the area of Digital Signal Processing and provides students with the fundamentals of discrete-time signal processing; discrete Fourier transform; discrete convolution; digital filters and spectral estimation, with examples and applications arising from various disciplines, so as to prepare the student to solve practical problems.

**Courses:** EE41, EE46, EE47

**Prerequisites:** EEB440, MAB135

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 2

### ► EEB641 FIELDS TRANSMISSION AND PROPAGATION

Fundamental concepts of static and time varying electromagnetic fields; Maxwell's equations and the characteristics of their solution, such as wave equations, losses in various media and energy flow; numerical methods; transmission line theory, terminated line, Smith Circle Chart usage and lattice diagram; propagation modes in waveguides and optical fibre; free-space propagation, reflection, refraction, diffraction; basic antenna theories and antenna parameters, Frii's transmission equation, half-wave dipole, two-element array.

**Courses:** EE41, EE47   **Prerequisites:** MAB135

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► EEB650 POWER SYSTEMS ANALYSIS

Power system economics: costs of losses, tariffs, plant selection, the National Electricity Market. Power flow calculation algorithms. Protection systems: transformer protection motor protection, feeder protection. Setting of IDMT relays. Quality of electricity supply. Surge phenomena in lines and machines. Switching and lightning surges solution by EMTF. Harmonic analysis of interconnected networks. Electrical safety: earth electrodes, evaluation of step and touch potentials.

**Courses:** EE41, EE42   **Prerequisites:** EEB511

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 2

### ► EEB666 COMMUNICATION ENVIRONMENTS FOR EMBEDDED SYSTEMS

Computer networks, network programming, open network foundations, embedded systems, client/server, bus architectures, network controllers, distributed systems in automation and process control, embedded Java, distributed objects, distributed databases, distributed operating systems.

**Courses:** EE46

## UNIT SYNOPSES

**Prerequisites:** EEB412, ITB421, EEB566  
**Contact hours:** 4 per week **Credit points:** 12

► **EEB684 ADVANCED DESIGN**

Detailed design and realisation of typical electronic subsystems used in all areas of electrical and electronic systems engineering. The unit enhances the student's ability in solving complex engineering problems. The design builds on the theoretical knowledge gained in other units. The student is required to write a detailed technical report and also give an oral presentation on her/his design.

**Courses:** EE41, EE42, IF21, IF28, IF59, EE46, EE47

**Prerequisites:** EEB584

**Contact hours:** 1 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EEB685 ADVANCED AEROSPACE DESIGN**

Detailed design and realisation of typical electronic subsystems used in all areas of electrical and electronic systems engineering. The unit enhances the student's ability in solving complex engineering problems. The design builds on the theoretical knowledge gained in other units. The student is required to write a detailed technical report and also give an oral presentation on her/his design.

**Courses:** EE48 **Prerequisites:** EEB585  
**Contact hours:** 1 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EEB686 INDUSTRY PRACTICE**

Industry Practice provides high achieving students the opportunity to participate in a co-operative education environment created by a partnership between the student, industry and the University. The unit aims at developing knowledge of, and experience in, the practices and procedures in the workplace environment. Students will apply for paid employment with an industry partner registered for this program. The process will be open and competitive, and an interview will be conducted as for a typical job application process. The duration of the employment is expected to be from 4 to 6 months, with 24 to 40 per week, and must overlap the teaching period of semester 2. Students will participate in a number of professional development workshops delivered on campus. These workshops are designed to present professional topics which students then contextualise in terms of their workplace experience, reflect upon and then communicate to the group. Each student will keep a personal portfolio containing documented job objectives, experiences, critical reflection, and personal and professional development activities. The portfolio is to be maintained in keeping with IEAust competency assessment guidelines.

**Courses:** EE41, EE42

**Prerequisites:** Completion of the first two years of the full-time course

**Contact hours:** 1 per week **Credit points:** 24  
**Campus offered:** GP **Semester:** 2

► **EEB760 AEROSPACE RADIO AND RADAR SYSTEMS**

Radio and radar systems provide the backbone and arteries of all aerospace and avionics systems. A knowledge of the effects of electromagnetic compatibility and interference and the standards which apply as well as a detailed knowledge of the theory and techniques of ground, air and space based radio and radar systems is essential for all avionics engineers. Radio and radar systems are an integral part of the safe and efficient operation of aircraft movements and must be considered as part of the system as a whole.

**Courses:** EE48 **Prerequisites:** EEB560, EEB641  
**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 1

► **EEB766 COMMUNICATION TECHNOLOGIES**

The unit provides an overview of various communication technologies that are used in point to point and point to multi-point wired and wireless communications. The content includes Telephony and Telecommunication switching system, Fibre Optic Transmission system including

Wavelength Division Multiple Access and Synchronous Optical Network (SONET), Satellite communication, Microwave Terrestrial communication, Integrated Services Digital Network (ISDN), Broadband ISDN and ATM, High speed modems, Last miles solutions including ADSL, VDSL and wireless local loops, Cable technologies, Digital Audio and Video broadcasting, Ad hoc radio transmission such as the Bluetooth and Home RF, Wireless LANs including wireless infrared transmission and IEEE8012.11 standard, Speech, image, audio and video coding standards.

**Courses:** EE47 **Prerequisites:** EEB560  
**Contact hours:** 4 per week **Credit points:** 12

► **EEB781 PROFESSIONAL STUDIES 2**

The unit covers the basics of accounting practice, types of companies, marketing principles, business plans, intellectual property and statutory obligations on company managers. There should be adequate skills for young professional engineers to start or be an active partner in a small business. Personnel management skills are developed including assertion training, interpersonal relationships, organisational change, professional ethics and negotiation.

**Courses:** EE41, EE42, EE48, IF59, EE46, EE47  
**Prerequisites:** BNB007

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP

► **EEB782 AEROSPACE PROJECT**

An engineering project on a specified topic is completed; the work will require design, computing, construction, experimental work and practical testing with the submission of appropriate reports; the topic is selected from any area which involves electronics, computing, control, communication, signal processing, and power and may include programming, circuit and system design.

**Courses:** EE48

**Prerequisites:** Student must have completed the first three years of the course.

**Corequisites:** The unit must be done in the final year of the course.

**Contact hours:** 1 per week **Credit points:** 24  
**Campus offered:** GP **Semester:** 1, 2

► **EEB831 MILITARY COMBAT ELECTRONICS**

Sound generation propagation and analysis in the military environment; principles and application of lasers to sighting and guidance systems; principles of detection of submarines using magnetometers; infra red propagation and its use in detection and weapons guidance. ECM/ECCM, Sonar Processing, Laser Processing and Guidance, Radar Guidance/Sighting, Gun Sights, Weapons Control Systems, IFF/Transponders, Command and Control, Magnetic Anomaly Detection, Tactical Navigation Systems, Infra Red. Some ethical, social and moral aspects concerning military systems will be discussed.

**Courses:** EE48

**Prerequisites:** EEB435, EEB560, EEB640, EEB641

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **EEB832 SPACE FLIGHT DYNAMICS**

General introduction to space flight dynamics and related applications. Coordinate systems and time references used within space flight dynamics. Discussion of rocket trajectories and spacecraft dynamics. Detailed description and discussion of Two Body (Keplerian) orbits, orbit representation by Orbital Elements, state vector and Two Line Elements. Orbit prediction and methods for orbit determination. Attitude aspects for rockets and spacecrafts.

**Courses:** EE48

**Prerequisites:** EEB130

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EEB834 SATELLITE APPLICATIONS**

Design of Communication systems for spacecraft applications. Detailed description, evaluation and analysis of spacecraft and ground stations and overall system performance. Modulation methods, wide-band multiple access, synchronisation, noise effects, Orbit determination and ranging,

Telemetry and command, antennas and TV satellite broadcasting.

**Courses:** EE48

**Prerequisites:** EEB560, EEB640, EEB641

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EEB860 NAVIGATION SYSTEMS FOR AIRCRAFT AND SPACE**

Avionics navigation systems have been paramount in the development of safe and efficient aircraft operations. The unit covers the various categories of navigation in use in aviation and satellite environments, including navigation equations, multisensor navigation, radio and satellite based navigation systems, inertial navigation, Doppler and altimeter radars, celestial navigation systems, landing systems, air traffic management and avionics interfaces and navigation displays.

**Courses:** EE48

**Prerequisites:** EEB560, EEB641

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 2

► **EEB889 PROJECT**

An engineering project on a specified topic is completed; the work will require design, computing, construction, experimental work and practical testing with the submission of appropriate reports; the topic is selected from any area which involves electronics, computing, control, communication, signal processing, electrical power, or aerospace/avionics. The project may include programming, circuit and system design.

**Courses:** EE41, EE42, IF21, IF28, IF59, EE46, EE47

**Prerequisites:** The student must have completed the first three years of the course

**Corequisites:** This unit must be done in the final year of the course

**Contact hours:** 1 per week **Credit points:** 24  
**Campus offered:** GP **Semester:** 1, 2

► **EEB904 ADVANCED TOPICS IN ELECTRICAL ENGINEERING A**

This unit introduces students to the current technology based on research that is the expertise of visiting specialists or staff within the School. It runs as an elective in the final year of the course subject to availability of staff and relevance of the topic

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59  
**Credit points:** 12 **Semester:** 1

► **EEB905 ADVANCED TOPICS IN ELECTRICAL ENGINEERING B**

This unit introduces students to the current technology based on research that is the expertise of visiting specialists or staff within the School. It runs as an elective in the final year of the course subject to availability of staff and relevance of the topic

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59

**Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EEB911 ELECTRICAL ENERGY SYSTEMS**

This subject consists of 3 modules drawn from 6 covering Transmission and Distribution Compensators structure and controls, Quality and reliability of electricity supply, energy utilisation in buildings, lifts fire systems standby generation, lighting, communication, air conditioning, Renewable energy options, characteristics and utilisation of alternate sources. The electricity market, distribution automation, data communications for distribution networks, earthing and soil resistivity, switchgear and protection, insulation coordination.

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59

**Prerequisites:** EEB511, EEB584

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 1

► **EEB941 MODERN SIGNAL PROCESSING**

This unit gives a comprehensive introduction to the representation and processing of signals distorted or corrupted by noise, and the systems needed to process them. Techniques for estimating signal parameters for the detection of signals in the presence of noise will be discussed. The

methods presented will be tested on real data drawn from different engineering applications, such as: wireless communications; biomedical EEG signals and brain models; speech and music synthesis, and radars.

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59  
**Prerequisites:** EEB640  
**Contact hours:** 4 per week **Credit points:** 12  
**Semester:** 1

► **EEB960 WIRELESS COMMUNICATIONS**

Cellular Mobile Radio System Concepts, Mobile Radio Propagation, Spread spectrum techniques and CDMA, Speech coding modulation and channel coding techniques for GSM and CDMA, Fading mitigation through diversity, Inter-symbol interference mitigation, the GSM and CDMA standards. The WAP and the GPRS, Introductions to UMTS/IMT2000, Introduction to personal communications, Introduction to blue tooth technology, Other wireless systems including Wireless LAN, Wireless Local loop, Microwave local multipoint distribution systems (LMDS) and LEO satellite communication.

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59, EE47  
**Prerequisites:** EEB560  
**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 2

► **EEB961 RF AND APPLIED ELECTROMAGNETICS**

Lumped and distributed microwave and RF circuits, including [y], [t] and [s] parameters. Impedance matching techniques. Passive and active microwave devices. RF circuit design techniques. Microwave and RF measurement techniques. Linear antennas and microwave antennas. Analysis and synthesis of antenna arrays. Specialised antennas and antenna measurements. EMC definition, standards and regulations; test plan; measurements; interference coupling; susceptibility; EMC design techniques, component selection, circuit layouts, grounding, shielding, filters, suppressors, isolation and safety; EMC management; propagation of electromagnetic fields in electrical materials; application of numerical methods.

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59  
**Prerequisites:** EEB641  
**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 1

► **EEB976 ADVANCED INDUSTRIAL ELECTRONICS**

Two of the following modules will be offered each year: 1. Switching converters, variable speed drive control, power system compensation converters, uninterruptible power supplies, transformer switched mode power supplies, resonant power supplies. 2. Basic microprocessor systems, M68332 CPU, architecture, assembly language, MC6832 modules, system integration, queued serial communications, time processor unit, peripheral devices and interfacing, parallel/serial communications, ADC's, DAC's, waveform synthesisers. 3. RF systems, transmitters and receivers, superheterodyne, antenna, filters, LNA, mixer, LO, IF amplifier, demodulator, duplexer, RF switches, impedance matching, high frequency effect on components, microstrip techniques, CAD RF design, interference control.

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59  
**Prerequisites:** EEB412  
**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 2

► **EEB992 VLSI CIRCUITS AND SYSTEMS**

Introduction to microelectronic circuits and systems, MOS transistor fundamentals, fabrication processes, mask layout rules, VLSI logic gates, combinational logic circuits, sequential logic circuits, memory structures. System and subsystem design, semi-custom design, circuit modelling and performance, circuit verification, testability, case studies. CAD Tools for VLSI, VHDL system specification, modelling and verification. Major design project.

**Courses:** EE41, EE45, EE48, IF21, IF28, IF59  
**Prerequisites:** EEB412  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 2

► **EET101 ALGORITHMS FOR CONTROL AND ENGINEERING**

Solution of equations using numerical analysis methods and computer algorithms; differential and difference equations, numerical approximations and computational flow diagrams. Computer control of closed-loop systems, continuous and discrete systems, system hardware, sampled data systems design techniques, system simulation; state-space theory, and system performance optimisation; state equation, transformations, state equation solution, closed-loop system pole-placement design, performance criteria, dynamic optimisation methods; spectral analysis and digital filtering; discrete time adaptive filters; an introduction to neural networks and to fuzzy logic.

**Courses:** EE65, EE66, EE76  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **EET102 UNIX AND C FOR ENGINEERS**

Introduction to Operating Systems; commonly used commands, the file structure, the Shell, the vi Editor, Shell script; Types, operators and expressions, control flow, functions, pointers and arrays, structures, input and output. Applications of C and Unix in real time signal processing and control.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **EET103 COMPUTER HARDWARE AND INTERFACING**

State-of-the-art digital devices; design and implementation of digital systems; microprocessors and microcontroller systems and interfacing; computer architectures, subsystems and peripherals.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **EET104 REAL-TIME OPERATING SYSTEMS**

Definition and introduction: review of current commercial real time operating systems, including QNX and UNIX-like operating systems. Structure: management; input/output management; file management; resource allocation and scheduling; protection; job control and multitasking. Development of programming skills: structured programming techniques, modular programming techniques; documentation of programs; interrupt handling techniques.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EET120 NETWORKS AND DISTRIBUTED COMPUTING**

The Open System Interconnection model and the more common standards which support the model; layers 3-7 covered in depth, layers one and two covered by reference; computers, software packages; network topologies, software techniques, data transfer protocols; examples of local and wide area networks; hardware implementation of OSI layers and protocols; Modern High Performance Networking protocols such as FDDI and ATM, treated as extensions of the OSI model.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EET123 PROCESS CONTROL AND ROBOTICS**

Introduction to robotics; introduction to CNC machine tools; process control; controller tuning, plant characterisation and process optimisation; computer simulation and algorithms.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EET124 DATA COMMUNICATIONS**

This unit will provide an in-depth knowledge of data transmission channels; the various types of modems, their use and specifications; the different aspects of interfacing for data communications; coding; compression and encryption of

data; network models and other specialised topics.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **EET126 COMMUNICATIONS DIGITAL SIGNAL PROCESSING**

Source and channel coding; waveform coding; adaptive filtering in communication; applications of speech technology in communication; applications of DSP technology; real time DSP devices and their applications in communications.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **EET127 ADVANCED TOPIC B**

An advanced topic in the field of computers and communication engineering. This topic will change from year to year and is announced at the beginning of the semester.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **EET128 DETECTION AND ESTIMATION**

Introduction to the theory of random variables and probability; signal detection; hypothesis tests, Neyman-Pearson detectors; uniformly most powerful tests for Gaussian case. Examples of detection of: an unknown deterministic signal in Gaussian noise of known probability distribution; Matched-Filter interpreta image restoration; introductory mathematical morphology, boundary detection techniques and algorithms; image segmentation; shape description techniques; neighbourhood operators; and image representation by stochastic models.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EET129 IMAGE PROCESSING AND COMPUTER VISION**

A thorough investigation of digital image representations, image analysis and understanding and an exposure to some aspects of computer vision techniques and applications. Image representation and modelling; image enhancement; image restoration; introductory mathematical morphology, boundary detection techniques and algorithms; image segmentation; shape description techniques; neighbourhood operators; and image representation by stochastic models.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EET135 DIGITAL SIGNAL PROCESSING AND APPLICATIONS**

General properties of stationary processes; basic spectral properties of the processes; practical aspects of digital spectral estimation; identification of linear systems; digital higher-order spectral estimation; identification of non-linear systems; an update in the advances in digital signal processing.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EET137 ADVANCED TOPIC A**

An advanced topic in the field of computers and communication engineering. This topic will change from year to year and is announced at the beginning of the semester.

**Courses:** EE61, EE67, EE74, EE77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **EET201 FUNDAMENTALS OF POWER SYSTEM EARTHING**

Electrode resistance, potential gradient areas of common types of electrodes; multiple electrodes; stratified grounds electric shock, calculation of step and touch potentials; introduction to substation earthing: ground potential rise, connection of services, grid and mesh potentials; measurement of soil resistivity and electrode resistance; earthing of transmission lines: tower foot resistance, current division between ground and aerial earth wires, division of earth currents at substations; earth current distribution on faulted lines;

## UNIT SYNOPSES

distribution systems: MEN, SWER, safety during faults; flow of lightning currents to ground.

**Courses:** EE60, EE78, EE82

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP

### ► EEP202 THERMAL RATINGS AND HEAT TRANSFER

Thermal conduction in simple geometries; forced and natural convection from plates and cylinders - common heat transfer correlations; radiation from hot surfaces; view factors; calculation of steady-state and time-varying temperatures in conductors; temperature measurement methods for high voltage equipment; thermal ratings of overhead lines - steady-state, cyclic and short-time ratings; cable rating - temperature rise due to step current, cyclic and emergency loads; temperature rise of power transformers - cooling methods, emergency overloads.

**Courses:** EE60, EE78, EE82

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP, EXT

### ► EEP203 TESTING AND CONDITION MONITORING

HV testing: DC, 50 Hz, and impulse - equipment, measurement systems, standard test methods, certification and traceability, evaluation of test reports; HV test methods for insulators, bushings, circuit breakers, isolators and surge arresters. Temperature rise testing of electrical equipment: lines cables, and switchgear. Current withstand testing; current interruption tests for fuses and circuit breakers. Evaluation of test reports - accuracy and traceability. Insulation testing: oil testing, DLA and PD tests. Condition monitoring systems: plant temperature, circuit breaker dynamics, insulation condition; in situ methods.

**Courses:** EE60, EE78, EE82

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP

### ► EEP204 POWER SYSTEM LOAD FLOW ANALYSIS

Data collection methods; p.u. revision; load flow algorithms: convergence criteria, multiple solutions, starting values, ordering and sparsity of matrices; single and three-phase models: transformers, tap changers, overhead transmission lines, underground cables, capacitors and filters, controlled reactive devices, generators and motors, load representation. Load flow applications: base case and contingency analysis in planning augmentation options, system operations contingency analysis; Load flow analysis methodology - use of load forecasts, establishment of 'base case'; Practice in analysis of transmission and distribution systems using an interactive package.

**Courses:** EE60, EE78, EE82

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP, EXT      **Semester:** 1, 2, 3

### ► EEP205 POWER SYSTEM FAULT CALCULATIONS

Representation of generators, lines, transformers in positive sequence equivalent circuits; balanced fault analysis; selection of source voltages from pre-fault conditions; unbalanced fault conditions; complete sequence representation of power system equipment: transformers, cables and lines (including mutual coupling of parallel lines); per unit positive, negative and zero sequence network diagrams; calculation of generator and transformer sequence equivalent circuits from manufacturer's test data; calculation of line sequence impedances from line layout and soil resistivity - inclusion of tower foot resistances in zero sequence models; residual currents in untransposed lines; interference with telecommunications circuits; short circuit calculations to AS3581 using an interactive computer package.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP204  
**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP

### ► EEP206 PROJECT MANAGEMENT

Principles of project management and the operation of project management packages. Emphasis on the practical application of PC packages based on exercises related to the electricity sup-

ply industry and aimed at promoting the increased use of such packages by engineering and technical staff in the normal course of their work. Details include activity networks, Gantt charts, time schedules, analysis of critical path, types of resources, resource profiles, resource scheduling, project monitoring and reporting.

**Courses:** EE60, EE78, EE82

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP

### ► EEP207 OVERHEAD LINE ROUTE SELECTION - ENVIRONMENTAL FACTORS

Overview of legislation, standards and guides: radio interference, electromagnetic fields, low frequency induction, touch potentials, structure earthing, electrolytic corrosion, clearances, land legislation, environmental impact statements. Current safety and environmental issues. Requirements of other public utilities - telcos, railways, roadworks, marine, water, gas, oil. Cost of environmental enhancements and alternative technologies. Right of way. Route selection principles: structure types, terrain shielding, identification of natural and man-made features.

**Courses:** EE60, EE78, EE82

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP

### ► EEP208 ECONOMIC ANALYSIS FOR POWER SYSTEM ENGINEERS

Principles of economic analysis for a tax paying entity. Various evaluation techniques are addressed including both discounted and non discounted techniques. The net present value approach is settled on as being the most appropriate approach. Issues such as the effect of interest and inflation on nominal cash flows are addressed. Cost benefit analysis for engineering decision making: econometric models for ESI, maintenance, refurbishment and replacement. Budgeting and cost control, budget preparation with spreadsheets, cash flows, monitoring expenditure and budget review, profit and loss and balance sheets. Risk analysis including WACC calculations.

**Courses:** EE60, EE78, EE82

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP, EXT

### ► EEP209 POWER SYSTEM HARMONICS

Generation of harmonics: converters, arc furnaces, SVC, inverters, electronic control; system response characteristics: resonance conditions, effect of load, typical system responses; effects of harmonics: motors, generators, power cables, capacitors, electronic equipment, metering, relaying, telephone interference; reactive power compensation and harmonic control: converter power factor, reactive power compensation, control of harmonic currents; measurement of harmonics; recommended practices including AS2279.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP205  
**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP, EXT

### ► EEP210 ABNORMAL SYSTEM VOLTAGES

Supply quality standards: review of criteria, statutory requirements, emergency and short term limits; 50 Hz voltage: cause of voltage deviations, voltages during faults, motor starting; negative phase sequence voltages: AS1359 requirements, voltage unbalance studies, modelling, measurement; voltage transients and flicker: AS2279 requirements, disturbing loads, remedial measures, transient disturbances and power system plant; Power system transient analysis: ATP studies.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP205

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP, EXT

### ► EEP211 BASIC POWER SYSTEM PROTECTION

Protection systems: Reliability and security. Methods of grading protection relays. Speed/sensitivity considerations. Comparison of 'unit' and 'non-unit' protection. Different causes and characteristics of the faults that occur

on power systems and the specific protection relays that are used to detect them. Examination of local back-up protection. Effects of substation configurations on protection system design and performance. Various types of relays - electromechanical and electronic. Current and voltage transformers - theory and specification for different applications, including interposing current transformers. Protection of high voltage buses. Transformer protection - basic overview of the different types, including differential protection overcurrent and earth fault protection. Inverse time relays. Setting overcurrent and earth fault relays to achieve a coordinated scheme. Instantaneous overcurrent relays. Directional overcurrent and earth fault relays. Reclosers, sectionalisers and fuses - application and coordination. Distance relays - theory and construction. Setting distance relays for simple applications. Field testing and operational analysis of protection. Commissioning and maintenance of protection systems. Performance of protection under fault conditions. Information available for the analysis of protection performance.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP205

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP, EXT

### ► EEP212 ADVANCED POWER SYSTEM PROTECTION

High impedance protection of power system plant (busbars, motors, generators, reactors and capacitors) including CT requirements, the application of shunt and series resistors, non-linear resistors, check schemes, back-up schemes and CT supervision. Protection of transformers, including biased and high impedance differential schemes as well as aspects related to earthing transformers. Feeder differential protection, including pilot wire, current differential and phase comparison schemes. Protection of high voltage capacitor banks, including consideration of in-rush currents, overcurrent, over voltage, balance, and differential protection schemes. Application of single and three pole autoreclosing schemes to HV and EHV transmission systems. Protection of large motors, including differential and earth fault protection, thermal overload considerations, starting and stalling currents and the effect of negative phase sequence currents. Protection of large generators, including stator and rotor earth fault protection, biased differential, high impedance differential, negative phase sequence, under frequency, over excitation, reverse power and out-of-step protections.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP211

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP, EXT

### ► EEP213 ADVANCED POWER SYSTEM PROTECTION

High impedance protection of power system plant (busbars, motors, generators, reactors and capacitors) including CT requirements, the application of shunt and series resistors, non-linear resistors, check schemes, back-up schemes and CT supervision. Protection of transformers, including biased and high impedance differential schemes as well as aspects related to earthing transformers. Feeder differential protection, including pilot wire, current differential and phase comparison schemes. Protection of high voltage capacitor banks, including consideration of in-rush currents, overcurrent, over voltage, balance, and differential protection schemes. Application of single and three pole autoreclosing schemes to HV and EHV transmission systems. Protection of large motors, including differential and earth fault protection, thermal overload considerations, starting and stalling currents and the effect of negative phase sequence currents. Protection of large generators, including stator and rotor earth fault protection, biased differential, high impedance differential, negative phase sequence, under frequency, over excitation, reverse power and out-of-step protections.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP211

**Contact hours:** 3 per week      **Credit points:** 4  
**Campus offered:** GP, EXT

**► EEP214 RISK ASSESSMENT IN THE ELECTRICITY SUPPLY INDUSTRY**

Identification of hazards; failure modes and effects analysis, failure modes effects and criticality analysis - outcomes from possible failure modes; hazard and operability studies; assessment of frequency - fault tree analysis, event tree analysis; assessment of consequences: consequence analysis, criticality assessment in terms of chance of failure and consequences, incident scenario, damage criteria, damage identification; legal and economic consequences; case studies including identification of hazards, assessment of risks, and consequences in ESI. Loss of load models in generation.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP215

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP, EXT

**► EEP215 RELIABILITY**

Basic reliability concepts. Reliability analysis methods. Reliability methods. Application of important distributions. Failure rate, repair time and mean time failure. Reliability of series, parallel and complex systems. Discrete Markov Chains. Continuous Markov processes. Frequency and duration in reliability. Application of Markov Chain in the reliability evaluation of repairable systems. Application of reliability evaluation in power distribution systems, inclusion of cost estimation. Reliability assessment in subtransmission system planning, including non-constant transition rate considerations. Study of single and double contingencies with switching to restore supply. Inclusion of maintenance in system modelling. Probability and frequency of loss of load. Unsupplied energy and average load at risk. Maximum load at risk. Average outage duration. Hours of loss of load.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP213

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP, EXT

**► EEP216 OVERHEAD LINE DESIGN - ELECTRICAL**

Electrical design of transmission lines with ratings of 33kV to 500kV; economic conductor size; characteristics of conductors; standard and new technology insulators: power frequency, impulse and switching flashover voltage, pollution and creepage, wet and dry flashover, mechanical characteristics; feasible structure types; tower footing resistance and counterpoise; Insulation coordination methodology: determination of overvoltage withstand, design for required outage; determination of RI using state of the art methods; design to ensure that electrostatic and electromagnetic fields do not exceed NH and MRC guidelines.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP201, EEP203, EEP205, EEP207, EEP210

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP

**► EEP217 OVERHEAD LINE DESIGN - MECHANICAL**

Conductor selection. Catenary theory. Sag-tension-temperature calculations. Requirements for survey data. Statutory and enterprise requirements for line layout: clearances, mechanical loading, safety criteria. Definition of loading conditions, structure capacities, layout clearances. Applied mechanics of strung conductors. Determination of everyday tensions from allowable stress or tension/mass ratio. Determination of vibration protection. Transmission line estimating techniques. Selection of structure type based on optimum capitalised costs. Line layout.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP208, EEP216

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP

**► EEP218 INTRODUCTION TO AUTOMATED SYSTEM CONTROL AND SUPERVISORY SYSTEMS**

SCADA fundamentals and protocols; SCADA equipment: master station, remote terminal units; transmission SCADA systems, distribution automation systems, distribution control systems,

PC software applications; alarm philosophy and control principles: definition of system displays, data logging, database point processing and attributes, master station configuration; specification of MMI: identification of system functional requirements; computer system platforms: computer technology fundamentals, computer hardware - processors, peripherals, display, user interfaces; communication system principles, communications bearer fundamentals, data networks and protocols; data communications and I/O capacities and types, I/O processing; application of SCADA systems to transmission and distribution systems; cost/benefits of alternative schemes.

**Courses:** EE60, EE78, EE82

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP

**► EEP219 HIGH VOLTAGE SUBSTATION EQUIPMENT: POWER TRANSFORMERS AND REACTIVE POWER PLANT**

Principles of power transformer design from distribution transformers to EHV transformers: ratings, windings, core structure and materials, insulation and cooling methods, insulation and lifetime; leakage and magnetising reactance; losses, harmonics and inrush currents; short circuit forces; tests to measure: ratio, losses, impedance, phasing, temperature rise, accuracy and traceability of tests, interpretation of test reports; surge phenomena in windings, RSG and impulse testing of power transformers, interpretation of test results; oil cooling systems; fire protection; tap changers and associated controls; analysis of transformer failure modes; In-phase and quad-boost regulators; series and shunt reactors; reactors for harmonic filters; SVCs: design considerations, equipment characteristics and equipment characteristics.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP203

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP

**► EEP220 DISTRIBUTION PLANNING**

Identify data and techniques used in load forecasting. Examine typical distribution network problems and identify performance limitations based on standards. Relate network problems to different configurations and the effects on customers. Study network reinforcement options on a simulation package. Options include regulators, series and shunt capacitors and reconductoring. Consider the above options to address a realistic network problem assessing line losses and voltage results. Analyse network reliability and assess the impact of ties, switches and various network configurations. Compare alternatives based on economic and technical considerations. Prepare a logical case which recommends one option in the form of a report.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP208, EEP211, EEP219

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP

**► EEP221 LIMITS TO POWER SYSTEM STABILITY**

Time domain models and characteristics of synchronous machines; induction generator models; assessment of model bandwidth for use in dynamic studies; excitation system models, turbine governor models, boiler models, hydraulic system models; characteristics of load plant; evaluation of small signal adequacy by eigenvalue analysis; determination of modes of electromechanical and control systems; identification of modes with insufficient damping, eigenvalue participating states and eigenvectors; establishment of transfer evaluation of gains/phases at identified model frequencies; time domain dynamic simulations of power system operation, identification of maintenance liabilities, identification of critical success factors to minimise life cycle costs, approval and dissemination of policy, policy review; maintenance planning: identification of constraints, review of existing maintenance programs, establishment of plans for periodic actions, documentation of procedures, design of reporting procedures; data re-

coding and analysis: registers of defects, design of data collection and reporting systems, preparation of control charts, computer systems, data base development; maintenance operations: identification of refurbishment needs, resource evaluations, design of work procedures, impact of Acts and regulations, identification of staff training needs, supervision, auditing of work practices; maintenance program evaluation: assessment against KPI, modification of programs to account for continuing defects and failures or to reflect changing technologies.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP214, EEP215

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP

**► EEP222 MAINTENANCE OF ELECTRICITY SUPPLY SYSTEMS**

Establishment of maintenance policies: review of failure rates, emergency spares, identification of maintenance liabilities, identification of critical success factors to minimise life cycle costs, approval and dissemination of policy, policy review; maintenance planning: identification of constraints, review of existing maintenance programs, establishment of plans for periodic actions, documentation of procedures, design of reporting procedures; data recording and analysis: registers of defects, design of data collection and reporting systems, preparation of control charts, computer systems, data base development; maintenance operations: identification of refurbishment needs, resource evaluations, design of work procedures, impact of Acts and Regulations, identification of staff training needs, supervision, auditing of work practices; maintenance program evaluation: assessment against KPI, modification of programs to account for continuing defects and failures or to reflect changing technologies.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP214, EEP215

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP

**► EEP223 LOAD FORECASTING**

Nature of load patterns: historical patterns, links between customers and loads and between energy and demand demographics. Categories of DSM, costs of DSM options, benefits, and limitations to DSM. Tariffs and their impact. Impact of economic trends on demand growth. Load manipulation. Load forecast methods: data collection and availability, weather correction, interpreting data, synthesising missing data, developing load forecast data, developing alternative scenario load forecasts. Establishment of base loads from: historical load data, customer load predictions, and other contributing factors. Prediction of growth rates. Generation of load forecasts.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP213

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP

**► EEP224 POWER SYSTEM OPERATION**

Frequency control and AGC under normal load conditions, operation under emergency and contingency conditions, black starting, load shedding philosophy; generation operation; contract fuel prices, variations, automatic generation control systems; analysis of power station operating costs; establishment of optimum operating costs; management of forced outages: management of resources to restore system to normal in minimum time, abnormality control to prevent plant damage and maintain personnel safety, logging and reporting of forced outages; coordination of planned outages including assessment of risks and contingency planning; control of reactive power and voltage levels under normal and abnormal conditions; load reduction - instantaneous, delayed and planned; maintenance of consumer services and records.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP202, EEP212, EEP214, EEP221, EEP223

**Contact hours:** 3 per week **Credit points:** 4

**Campus offered:** GP

## UNIT SYNOPSES

### ► EEP230 THESIS A

Students work in industry for 100 days of supervised practice. As part of this practical training, one or more linked topics are identified that are related to the work of the section in which the training is carried out. A Masters thesis is prepared describing results of studies done by the student during the practical training. It is expected that the thesis will demonstrate that students have a deep background knowledge of the topic, can apply advanced skills to formulation and solution of engineering problems, and have an understanding of the relationship of the work to the overall objectives of the workgroup. The thesis will be examined by internal and external examiners appointed by the University.

**Courses:** EE78

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP

### ► EEP231 THESIS B

Work done in this unit and the related unit EEP230 is examined by submission of a single Masters thesis.

**Courses:** EE78

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP

### ► EEP240 ORGANISATION AND FINANCIAL MANAGEMENT OF THE ESI

Financial reporting, including profit and loss and balance sheet; interpretation of financial data and commercial practices with respect to various line items in financial reports; key performance indicators, the derivation, interpretation and pitfalls; financing arrangements; taxation issues that affect the industry including income tax, repairs, tax effect of depreciation and capital gains tax; various asset management issues including inventory and fixed assets; cost volume profit analysis including breakeven, contribution margin and EBIT.

**Courses:** EE60, EE78, EE82

**Contact hours:** 3 per week    **Credit points:** 4  
**Campus offered:** GP

### ► EEP241 DISTANCE PROTECTION

Current transformers: transient performance, saturation factors, and effects on distance relay performance. Voltage transformers: transient performance and effects on distance relay performance. Distance protection: select a suitable relay characteristic based on an understanding of relay comparator operation (amplitude and phase angle comparators), implement non-switched distance protection schemes, implement switched distance protection schemes (including allowance for various starter characteristics), allow for the effects of mutual coupling with other feeders, design protection schemes and set relays for teed feeder systems and also for bridges or paralleled feeder configurations, allow for the effects of arc and/or fault resistance, ensure that load encroachment does not cause inadvertent tripping, ensure healthy phase fault currents do not degrade distance relay performance, develop a grading plan to ensure coordination with protection relays (including IDMT relays) elsewhere on the power system, understand relay functions such as switch-onto-fault logic, VT supervision, memory, power swing blocking and healthy phase polarising. Protection signalling: direct, series, permissive (overreaching and underreaching), distance acceleration and blocking inter-tripping.

**Courses:** EE60, EE78, EE8

**Prerequisites:** EEP211

**Contact hours:** 3 per week  
**Campus offered:** GP

### ► EEP242 EFFICIENT MARKETING AND UTILISATION OF ELECTRICITY: DEMAND AND SUPPLY SIDE SOLUTIONS

Assessment of future DSM options: state, national and international DSM programs assessed; local opportunities examined; impact of new and evolving technology; compare options and select for cost effectiveness, load impact and community acceptance; determination of avoidable costs; assessment of marginal cost of supply and identification of unavoidable and avoidable

costs; survey of customer needs and wants: conducting market research; application of existing tariffs or development of new tariffs; planning and estimating market potential for DSM: comparison of options to develop the optimum plan to meet customer needs and supply authority requirements; economic comparison of DSM and SSM options for a specific project including combined options; design and implement DSM program: targets, resources, in-house or contract; monitoring program performance; assessment of DSM on local and system load forecasts.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP208, EEP223

**Contact hours:** 3 per week    **Credit points:** 4  
**Campus offered:** GP

### ► EEP243 CONTRACT ADMINISTRATION

Categories of contracts: supply; supply, deliver and erect; performance guaranteed; services, for example, maintenance; period for supply of stock items or services; general conditions of contract: terms of payment and security deposit; quality assurance procedures; retention conditions; special conditions of contract: delivery and penalties for delay; technical provisions; penalty/bonus for such factors as efficiency, performance, maintenance and reliability; pre-tender acceptance negotiation practice; evaluation of tenders: tender adjustments; determination of the lowest comparatively priced offer on a total capitalised cost basis which conforms with the specified technical and commercial requirements; tender acceptance; contract correspondence; drawings - standards, amendment; contract law, dispute resolving procedures; contract progress monitoring; approval of drawings and documents; approval of delivery, erection, site testing. Acceptance, takeover, maintenance period, retention provisions.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP208

**Contact hours:** 3 per week    **Credit points:** 4  
**Campus offered:** GP

### ► EEP244 CIRCUIT BREAKERS - SWITCHGEAR

Basic switching theory for the main circuit breaker types: SF6, Vacuum, GIS, minimum oil, airbreak (11kV), bulk oil; characteristics and applications for these types at various voltage levels; circuit-breaking principles: interruption of load current, small inductive current, short-line faults and out-of-phase switching; TRV and ITRV concepts; direct and synthetic testing; technical specifications of circuit breakers: operating voltage; impulse withstand; rated current; interrupting capacity; switching duties; operating mechanisms - single or 3 pole; clearing time; environment; selection of circuit breakers: analysis of tenders on a whole of life basis; circuit breaker failures: failure modes for different types; catastrophic failures; cost estimating procedures; comparison of design/site options; whole of life cost comparison including capital and operative costs; environmental and public issues; identification of design parameters: voltages, ratings, protection, metering, SCADA, communication, operational - preparation of one-line diagram and general arrangement; design scope; review with other parties.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP202, EEP219, EEP244

**Contact hours:** 3 per week    **Credit points:** 4  
**Campus offered:** GP

### ► EEP245 INTRODUCTION TO SUBSTATION DESIGN

Preparation of design/site options: standard layouts (outdoor, indoor, GIS, package, single bus, 1.5 CB, etc) - cost, site, reliability lead time and communication factors; estimating procedures; comparison of design/site options; whole of life cost comparison including capital and operative costs; environmental and public issues; identification of design parameters: voltages, ratings, protection, metering, SCADA, communication, operational - preparation of one-line diagram and general arrangement; design scope; review with other parties.

**Courses:** EE60, EE78, EE82

**Prerequisites:** EEP202, EEP219, EEP244

**Contact hours:** 3 per week    **Credit points:** 4  
**Campus offered:** GP

### ► EEP246 CUSTOMER METERING

Tariff structures network and retail. Metered parameters kW, kWh, var, varh, VA, VAh, power factor, demand and the interrelationships between them. Electronic metering multifunction, measurement methods, advantages and limitations. HV metering, import/export metering, limitations, Blondel's theorem, safety aspects. Current and voltage transformers-theory of operation and accuracy limitations. Metering in the deregulated market viz Ch7 National Electricity Code. Single and polyphase electromechanical metering-method of operation and techniques used to measure reactive power. Electronic registers, summation registers and other techniques for customers with multiple points of supply. Communication methods in remote meter reading. Standards and regulatory bodies-Australian and international.

**Courses:** EE82, EE60, EE78

**Contact hours:** 3 per week    **Credit Points:** 4  
**Campus offered:** GP

### ► EEP248 INTRODUCTION TO ELECTRICITY MARKETS

Problems associated with monopoly utilities and the central planning model. Economic models of markets including perfect competition, monopoly and oligopoly. Deregulation of the electricity supply industry. Applied competition on electricity generation: the spot market. Theory of derivative instruments. Applied risk management: the electricity derivatives market. Electricity market simulation. Potential failures in the deregulation environment.

**Courses:** EEP248

**Contact hours:** 3 per week    **Credit Points:** 4  
**Campus offered:** GP

### ► EEP301 PROJECT 1/2

Students carry out research or development work on a project in specified areas. This can be done over two semesters.

**Courses:** EE74, EE77    **Credit points:** 24  
**Campus offered:** GP    **Semester:** 1, 2

### ► EEP302 RESEARCH COMPONENT 1

**Campus offered:** GP

### ► EFB101 DATA ANALYSIS FOR BUSINESS

The unit introduces the common statistical methods and tools for inference and decision making in business. It builds upon the concepts developed in BSB122 and covers important methods of data analysis with an emphasis on interpreting and understanding reported business and economic data. Topics include the concept of sampling error and sampling distributions, estimation and hypothesis testing, regression analysis, time series and an introduction to non-parametric statistical methods.

**Courses:** BS56, ED50, IF28, IF30, IF37, IF41, IF47, IF48, IF56, IF61, IF62, IF72

**Prerequisites:** BSB122

**Contact hours:** 4 per week    **Credit points:** 12  
**Incompatible with:** EPB109, EPB110,

MAB101, MAB347

**Campus offered:** GP    **Semester:** 1, 2, 3

### ► EFB102 ECONOMICS 2

Consumer behaviour, the role of the government in market intervention, allocative efficiency and market structure are some of the fundamental issues in microeconomics addressed in this unit. Business cycles and the related issue of macroeconomic stabilisation policy are analysed and explained within the Australian context. The significance of the international economy is described through a discussion of foreign exchange markets, the Australian dollar and the terms of trade.

**Courses:** BS50, BS56, ED50, IF28, IF30, IF37, IF41, IF48, IF60, IF62, IF72

**Prerequisites:** BSB113

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** EPB116 and EPB172;

EPB140 and EPB150 if both have been passed;

EFB103 and EFB104 if both have been passed

**Campus offered:** GP    **Semester:** 1, 2, 3

► **EFB200 APPLIED REGRESSION ANALYSIS**

Expands on the basic multiple regression model introduced in EFB101, by examining the practical problems encountered in using the single equation econometric model. In particular, the major problems encountered using real data, such as multicollinearity, serial correlation in time series data and heteroskedasticity in the case of cross-section data, specification error, and alternative functional form issues will be illustrated in the context of published Australian data. The unit includes extensive use of a commonly used computer package to allow the practical application of the various techniques.

**Courses:** BS50, BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62.  
**Prerequisites:** EFB101 or MAB101  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EPB102  
**Campus offered:** GP **Semester:** 1

► **EFB201 FINANCIAL MARKETS**

This unit introduces students to the institutional structure of global financial markets, and thereby complements the understanding of theoretical finance gained in either EFB206 or EFB210. Topics covered include the functions of financial markets, the banking and payments system, financial system deregulation, non-bank financial institutions, stock exchange operations, corporate and government debt markets, the Euromarket and markets for financial derivatives.

**Courses:** BS50, BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62  
**Prerequisites:** EFB206 or EFB210  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNB100  
**Campus offered:** GP **Semester:** 1

► **EFB202 BUSINESS CYCLES AND ECONOMIC GROWTH**

Develops an analytical framework in order to evaluate the macroeconomic performance of the Australian economy and the policy actions taken by government. Key issues addressed include business cycle stabilisation, unemployment, inflation; economic growth; the foreign debt; budget deficits; and national saving.

**Courses:** BS50, BS56, ED50, IF28, IF30, IF41, IF47, IF48, IF60, IF62, IF72  
**Prerequisites:** EFB102  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EPB141, EPB142  
**Campus offered:** GP **Semester:** 1

► **EFB210 FINANCE 1**

An introduction to the Australian institutional framework; terminology; debt and equity instruments. Financial mathematics applied to the pricing of debt and equity securities. A firm's investment decision; Net Present Value (NPV) and Internal Rate of Return (IRR); introduction to risk and uncertainty; Capital Asset Pricing Model (CAPM) and Weighted Average Cost of Capital (WACC).

**Courses:** BS50, BS56, IF28, IF30, IF37, IF41, IF47, IF48, IF56, IF60, IF62  
**Prerequisites:** BSB110 and BSB113  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNB107, FNB111, EFB206  
**Campus offered:** GP **Semester:** 1, 2

► **EFB211 FIRMS, MARKETS AND RESOURCES**

The unit introduces students to economic concepts that may be used beneficially in managerial decision-making. It is concerned with the economic analysis of the motivations, decisions and actions of consumers, firms, and governments in modern economies. It develops student understanding of that body of economics that is expressly concerned with the operations of, and inter-relationships between, the individual units of the economy. The unit is designed, not only to foster both clear thinking about the interplay between government, private firms, and consumers, but also to develop the student's ability to apply microeconomic concepts to economic problems that the student has not previously encountered.

**Courses:** BS56, ED50, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62, IF72

**Prerequisites:** EFB102

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EPB151, EPB152  
**Campus offered:** GP **Semester:** 1

► **EFB307 FINANCE 2**

The financing decision: capital structure, debt versus equity, lease versus debt, term structure versus default structure of interest rates. The dividend decision: dividends versus capital gains, franked versus unfranked income. Firm valuation: free cash flow model, evaluation of takeovers. Risk and Return: diversification, the CAPM model, its practical application and its relationship to efficient market hypothesis. Introduction to forwards, futures, options, warrants, convertibles and risk management using financial derivatives.

**Courses:** BS56, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62  
**Prerequisites:** EFB210  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNB112  
**Campus offered:** GP **Semester:** 1, 2

► **EFB308 FINANCE 3**

A study of contemporary finance research; CAPM; beta estimation; valuation theory; market efficiency; value at risk; use of finance research tools; anomalies and extension of finance theories; students are required to complete a research project combining theory and practice.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF60, IF62  
**Prerequisites:** EFB307  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNB113  
**Campus offered:** GP **Semester:** 2

► **EFB309 FINANCIAL DERIVATIVES**

Extends students' knowledge of financial derivatives as obtained in Finance 2, to gain a sound understanding of derivatives including options, forward, futures, and swaps and exotic options etc, as well as their utilisation in the management of risk and maximisation of value. Advanced option pricing models, advanced option trading strategies, exotic options, forward and futures pricing models, hedging commodities and equities by using futures, forward rate agreement and interest rate swaps, financial risk management issues.

**Courses:** BS50, BS56, IF28, IF30, IF41, IF45, IF47, IF48, IF60, IF62  
**Prerequisites:** EFB307  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **EFB310 FINANCIAL INSTITUTIONS - CONTROL**

Designed to familiarise students with the management considerations of a financial institution, particularly from a financial management perspective. Students will gain an understanding of the relevance of both qualitative and quantitative financial management within the financial institution.

**Courses:** BS50, BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62  
**Prerequisites:** EFB206 or EFB210  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNB124, FNB115  
**Campus offered:** GP **Semester:** 2

► **EFB311 FINANCIAL INSTITUTIONS - LENDING**

Finance theory and the lending function; cost of bank funds; the evaluation of retail loans, lending to small business; financial statement analysis; corporate lending and securities; financing international trade; problem loans and credit scoring.

**Courses:** BS50, BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62  
**Prerequisites:** EFB206 or EFB210  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNB114  
**Campus offered:** GP **Semester:** 1

► **EFB312 INTERNATIONAL FINANCE AND ECONOMICS**

Examines the theory and practice of international finance, including the mechanics and uses of the spot, forward, swap, futures and options markets in foreign exchange; the relationship between

domestic and international capital markets; interest rate and exchange rate determination; risk management of foreign exchange; international trade finance; evaluation of offshore investment (including country risk).

**Courses:** BS50, BS56, IF28, IF30, IF41, IF47, IF48, IF56, IF60, IF62  
**Prerequisites:** EFB206 or EFB210  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNB120, EFB212, EPB132  
**Campus offered:** GP **Semester:** 2

► **EFB314 INTERNATIONAL TRADE AND ECONOMIC COMPETITIVENESS**

The unit analyses the increasing globalisation of world trade and finance, and develops an analytical framework to assess the impact of these flows on the Australian economy, its businesses and its policy makers. It examines trade and capital flows, exchange rate.

**Courses:** BS50, BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62, IF72  
**Prerequisites:** EFB211, EFB202  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EPB130, EPB132, EFB212  
**Campus offered:** GP **Semester:** 2

► **EFB318 PORTFOLIO AND SECURITY ANALYSIS**

Management of investment portfolios; diversification; performance management; risk management; advanced theories on option pricing, efficient markets, futures trading (hedging) and asset pricing.

**Courses:** BS50, BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62  
**Prerequisites:** EFB307  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNB126  
**Campus offered:** GP **Semester:** 1

► **EFB323 FINANCIAL AND MONETARY ECONOMICS**

This unit emphasises the economics of financial markets and their interaction with the real sector of the economy. Major attention is devoted to the flow of funds, the theory and behaviour of interest rates, the structure and regulation of financial markets, the role of the central bank and the operation of monetary policy. The unit builds on the microeconomic and macroeconomic foundations laid in EFB202 and EFB211.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62, IF72  
**Prerequisites:** EFB202  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EFB215  
**Campus offered:** GP **Semester:** 2

► **EFB324 MACROECONOMICS OF GLOBAL FINANCIAL MARKETS**

This unit deals with Global Financial Markets, the various theoretical and policy approaches to the macroeconomy as they affect those markets in different countries. Particular markets dealt with include equity, bond and currency markets. It examines the comparative macroeconomic performance in different markets and different countries over time. The unit also examines the distinction between interventionist and laissez-faire policies, as well as the differences in traditions and approaches between English speaking and non-English speaking countries.

**Courses:** BS56, IF26, IF28, IF30, IF41, IF47, IF48, IF60, IF62  
**Prerequisites:** EFB202  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **EFB325 FINANCIAL MICROECONOMICS**

This unit addresses the theoretical microeconomic foundations of financial economics, focussing on how individuals and firms deal with uncertainty and situations involving strategic interactions. The theoretical concepts are illustrated with application from both the private and public sector. Contents include game theory and its economic applications, expected utility theory, risk analysis, intertemporal preferences, cost of capital, demand for capital, and asymmetric information.

**Courses:** BS56, IF26, IF28, IF30, IF41, IF47, IF48, IF60, IF61

## UNIT SYNOPSES

**Prerequisites:** EFB211

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

► **EFB326 APPLIED PORTFOLIO MANAGEMENT**

This unit introduces the student to the treasury environment in which financial institutions operate. The key to the unit is the raising of funds and the management of interest rate risk. This unique hands-on unit allows students to develop these skills by trading in a simulated environment of international economic uncertainty. Students have trading parameters within which they should operate. Students must make decisions concerning source of funds, term and duration, interest rate re-set, and risk management with derivatives. Trading will be conducted over a simulated four quarter year.

**Courses:** BS56, IF26, IF30, IF41, IF47, IF48, IF60, IF62.

**Prerequisites:** EFB210

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

► **EFB327 ECONOMETRICS OF FINANCIAL MARKETS**

The Econometrics of Financial Markets provides a comprehensive introduction to models of economic behaviour in financial markets, using the tools of discrete time-series analysis. It aims to give grounding in the necessary econometric methods before demonstrating how competing theoretical models may be tested. It provides illustrative empirical results from the stock, bond and foreign exchange markets.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62.

**Prerequisites:** EFB200

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

► **EFB328 PUBLIC ECONOMICS AND FINANCE**

This unit extends the economic theory introduced to students in the pre-requisite unit and applies these economic principles to a range of public finance issues. In particular, the role of government expenditure and finance in the areas of education, health and the environment is examined, with an emphasis on the critical analysis of economic arguments for and against government intervention. The topics in this unit are unified by a concern with the sources of market failure (problems of information, problems of market structure, externalities and public goods); their impacts on efficiency; the role, if any, of government in their presence; and the economic and financial instruments available to governments to improve the efficiency of resource allocation. The unit draws on theoretical and empirical examples in the economic and financial literatures on health, education, and the environment.

**Courses:** BS56, IF26, IF28, IF30, IF41, IF47, IF48, IF60, IF62.

**Prerequisites:** EFB211

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

► **EFN401 ADVANCED FINANCIAL INSTITUTIONS MANAGEMENT**

A practical analysis of the major risks facing financial institutions, the relevant regulatory environment and techniques for managing and mitigating these risks. Major topics covered include credit risk, market risk, interest rate risk, liquidity risk, systemic risk and the risk of off-balance sheet activities. Substantial use is made of case studies, which comprise a significant component of the course materials and assessment. The course is designed for non-specialists alike, and the material covered is also relevant for non-financial institutions and wider economy.

**Courses:** BS70, BS94, IF64

**Prerequisites:** PG only; with an UG degree with a major in Economics or Finance

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

► **EFN405 MANAGERIAL ECONOMICS**

Managerial decision making in an economic environment; an introduction to economics, demand analysis, cost analysis, market strategy and the macroeconomic environment; problems of

resource allocation at the firm, in industry and the economy; completion of an industry study by each student, and an analysis of the Commonwealth Budget strategy.

**Courses:** BS39, BS89, BS96, BS98

**Prerequisites:** PG only

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** EPN102, GSN203, GSN411, GSN414

**Campus offered:** GP                      **Semester:** 1

► **EFN406 MANAGERIAL FINANCE**

Introduction to the world of finance and financial management. Topics include: the finance function, the role of the financial manager; the Australian financial environment; sources of funds; present and future value; time value of money; financial mathematics; introduction to valuation; cost of funds; the firm investment decision; investment evaluation techniques; capital budgeting; portfolio theory; risk and return; capital asset pricing model; dividend policy; financial structure policy; futures; and options.

**Courses:** BS39, BS89, BS91, BS96, BS98, IF64

**Prerequisites:** PG only

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** FNN102, GSN413, GSN423

**Campus offered:** GP                      **Semester:** 1

► **EFN410 ECONOMIC AND FINANCIAL MODELLING**

Introduces students to the modelling techniques which are frequently used in a business and financial environment. Modelling is used as an aid to decision-making, as a means of forecasting important variables and as a planning and analysis tool. Various modelling exercises are used to illustrate the use of these modelling techniques in an economic and financial context.

**Courses:** GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** AYN419, EFN503, FNN103

**Campus offered:** GP                      **Semester:** 2

► **EFN412 ADVANCED MANAGERIAL FINANCE**

Expands on material introduced and developed in EFN406 Managerial Finance. Its objective is to examine the key decisions made by corporate financial managers (that is the investment, financing and dividend decisions). In addition, a number of topics of special interest to financial managers will also be covered, namely leasing, working capital management, risk management and takeovers.

**Courses:** BS39, BS91, BS96, BS98, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only; plus EFN406

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1

► **EFN413 SECURITIES LAW**

Examines the legal framework of those working in the securities industry. The unit looks at the system of law operating in Australia, provides a study of the law of contract and provides an introduction to the law of torts, particularly negligent misstatement. Corporations law as it affects dealers, advisors and participants of the securities industry is included. The law of business associations, takeovers and market offences are examined.

**Courses:** BS39, BS91, BS96, BS98

**Prerequisites:** PG only

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 2

► **EFN414 INTERNATIONAL FINANCE**

The theory and practice of international finance, the relationship between domestic and international financial markets, international parity conditions and arbitrage, foreign exchange risk management, interest rate, risk management, international trade finance, international portfolio investment, multinational cost of capital and capital structure, and international capital budgeting.

**Courses:** BS39, BS91, BS96, BS98, GS30, GS31, GS85, GS86

**Prerequisites:** PG only; plus EFN406

**Contact hours:** 3 per week    **Credit points:** 12

**Incompatible with:** EFB312 EFN417

**Campus offered:** GP                      **Semester:** 2

► **EFN415 SECURITY ANALYSIS**

A one-semester unit dealing with security analysis and portfolio management. The unit is both descriptive, dealing with a range of securities and the market they operate in, and theoretical, considering theories of the market and the equilibrium prices of securities. Topics covered include: portfolio theory and the capital asset pricing model; bond and equity portfolio management; market, industry, and company analysis; portfolio hedging; technical and fundamental analysis; active vs. passive investment strategies; and the evaluation of portfolio performance. The ultimate purpose of this unit is to provide the necessary tools for you to manage investment risk and return, select mispriced securities, design and administer investment portfolios, accomplish goals in portfolio management, and measure the performance of investment management.

**Courses:** BS39, BS91, BS96, BS98, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only; plus EFN406

**Contact hours:** 3 per week    **Credit points:** 12

**Incompatible with:** EFB318, EFN408

**Campus offered:** GP                      **Semester:** 2

► **EFN416 TREASURY AND PORTFOLIO MANAGEMENT**

Introduces the student to the treasury environment in which financial institutions operate. The key to the unit is the raising of funds and the management of interest rate risk. This unique hands-on unit allows students to develop these skills by trading in a simulated environment of international economics uncertainty. Students have trading parameters within which they should operate. Students must make decisions concerning source of funds, term and duration, interest rate re-set, and risk management with derivatives. Trading will be conducted over a simulated four quarter year.

**Courses:** GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only; with an UG degree in Economics or Finance or EFN406

**Contact hours:** 3 per week    **Credit points:** 12

**Campus offered:** GP                      **Semester:** 1

► **EFN417 AN INTRODUCTION TO INTERNATIONAL FINANCE**

This unit provides an introduction to international financial issues involved in managing the multinational corporation's (IMC) finance functions. Material covered includes: the theories and empirical evidence that are necessary for the sound understanding of MNC's international financial environment; the foreign exchange and other international financial markets; the key techniques for the management of international financial risks including exchange rate risk, country risk and interest rate risk, and the sourcing and investment of the MNC's funds both in the short-term and the long-term.

**Courses:** BS63, BS93, GS30, GS31, GS38, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week    **Credit points:** 12

**Incompatible with:** Cannot be undertaken after EFN414

**Campus offered:** GP                      **Semester:** 2

► **EFN418 INTRODUCTION TO FINANCIAL RISK MANAGEMENT**

This is a risk management unit at the intermediate level, which provides students with the ability to identify, assess and subsequently reduce common financial risks of business within an open economy. The role of the financial risk manager is central to this understanding, particularly in relation to how the manager makes decisions in relation to financial risks, which of those risks need to be controlled, the extent of mitigation, and the techniques used to neutralise them.

**Courses:** IF88

**Prerequisites:** PUN008 or BSB113 or equivalent

**Credit points:** 12

**Incompatible with:** EFN406

**Campus offered:** EXT                      **Semester:** 1, 2

## UNIT SYNOPSES

### ► EFN500 CONTEMPORARY MACROECONOMIC THEORIES

Introduces students to the latest theoretical developments in the field of macroeconomics using both qualitative and quantitative approaches. It places these theories in their historical, philosophical and societal contexts. This unit looks at New Classical and New Keynesian theoretical approaches to a range of issues. These include: expectation theories, supply side economics, theories of labour markets, monetary theories and growth theories (including the role of international trade). Also differences in the theoretical foundations of macroeconomic policies employed in different countries are highlighted.

**Courses:** GS30, GS31, GS38, GS85, GS86  
**Prerequisites:** PG only; with an UG degree with a major in Economics or Finance  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EPN111  
**Campus offered:** GP **Semester:** 1

### ► EFN501 CORPORATE AND COMMERCIAL LENDING

The study of advanced lending issues and structures for commercial applications. Examination of procedures for analysis of specialist lending; credit rating, leasing structures, venture finance.

**Courses:** BS70, BS94, GS80, IF64  
**Prerequisites:** PG only; with an UG degree with a major in Economics or Finance  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► EFN502 DEVELOPMENTS IN MICROECONOMIC THEORIES

Discussion of refinements in microeconomic theory such as consumer demand theory, labour supply, intertemporal demand, producer theory, market structure, theory of regulation, externalities, and public goods are considered in this unit. It explores refinements in microeconomic theory which have been contemporaneously used in the development of government policies in areas such as the environment, energy, public enterprises and industrial development.

**Courses:** BS63, BS70, BS92, BS94, GS30, GS31, GS38, GS85, GS86, IF64  
**Prerequisites:** PG only; with an UG degree with a major in Economics or Finance  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EPN108  
**Campus offered:** GP **Semester:** 1

### ► EFN504 FINANCE HONOURS

An advanced coverage of the theory of financial management, building on work done in the undergraduate course with reference to empirical evidence where available; topics include; capital markets, investment decisions, market equilibrium, the capital asset pricing model, arbitrage pricing theory, capital structure, dividend policy, efficient capital markets; provides a theoretical basis allowing for evaluating policy problems in the area of financial management, a prerequisite for further specialisation in this area.

**Courses:** BS63, BS70, BS92, BS94  
**Prerequisites:** PG only; with an UG degree with a major in Economics or Finance  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNN101  
**Campus offered:** GP **Semester:** 1

### ► EFN505 FINANCIAL RISK MANAGEMENT

The unit covers the main areas of modern risk management. The focus will be on measuring and managing risks in financial institutions, although some specific aspects of risk management in non-financial corporations will be considered. Particular attention will be paid to developing understanding of the analytical techniques employed in the construction of hedging strategies and the interrelations between the main areas of risk management. The unit will also emphasise empirical applications and assessment of risk management techniques. A self-contained introduction to the relevant probability concepts will be provided. The topics that will be covered include the current state of prudential regulation of financial institutions, measurement and management of market risks, hedging strategies with

derivatives, managing interest rate and exchange rate risks and the role of insurance.

**Courses:** BS39, BS63, BS70, BS91, BS92, BS94, BS98, IF64  
**Prerequisites:** PG only; EFN415 or equivalent (eg a recent UG degree with a major or specialisation in Finance).  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNN104  
**Campus offered:** GP **Semester:** 1

### ► EFN506 ADVANCED INTERNATIONAL FINANCE

A rigorous study of the major issues in international finance pertaining to the foreign exchange market, international parity conditions, hedging of foreign exchange risk, international asset pricing, international portfolio diversification, international cost of capital and capital structure, international capital budgeting and international financial markets integration.

**Courses:** BS70, BS94, GS30, GS31, GS38, GS85, GS86, IF64  
**Prerequisites:** PG only; with an UG degree with a major in Finance or EFN414  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** FNN105  
**Campus offered:** GP **Semester:** 2

### ► EFN507 ADVANCED CAPITAL BUDGETING

Topics covered include: capital investment analysis, the NPV rule, adjusted present value, replacement decisions, retirement decisions, unequal lives, optimal life, make or buy, cost of capital, estimating beta, capital rationing, valuation of new issues, mergers and takeovers, re-funding decisions, analysis of financial and leverage leases, the impact of recent taxation changes on the financing, dividend and investment decisions of the firm, capital budgeting in an international context. The course includes a series of case studies, problems and exercises, which require the student to apply the theory they have learned, to practical situations, not covered in normal undergraduate courses. A basic understanding of spreadsheets is assumed.

**Courses:** BS39, BS70, BS91, BS94, BS98, IF64  
**Prerequisites:** PG only; with an UG degree with a major in Economics or Finance or EFN412  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** EFN400, FNN100  
**Campus offered:** GP **Semester:** 2

### ► GSN111 APPLIED RESEARCH PROJECT

Each project has an identical synopsis. These projects enable students to undertake a piece of applied research where the emphasis is upon the link between theory and practice. Students should seek advice at an early stage from the Director MBA regarding their choice of topic. As a general guide, students undertaking the 24cp project may expect to spend approximately 25 per week on the project. Group projects may be undertaken, however the allocated research and tasks for each group member will require the equivalent workload of 25 per week for a 24cp project. Students undertaking one of these units may be required to attend a number of management research seminars which might be organised by the Brisbane Graduate School of Business or the Faculty of Business.

**Courses:** Not on offer to MBA students.  
**Prerequisites:** 48 credit points, Unit Coordinator approval, GPA greater than 5.5  
**Contact hours:** 3 per week **Credit points:** 24  
**Campus offered:** GP **Semester:** 1, 2, 3

### ► GSN207 ORGANISATIONAL ANALYSIS AND CONSULTING

The ability to analyse organisations and organisational functioning is critical to management effectiveness. It is important to be able to gather data about an organisation and its performance in order to better understand it and, where needed, to recommend and guide the implementation of change. Various theoretical models of organisation and organisational analysis, including action research models, are explored. This unit helps students to understand the role of the 'change agent' and equips them to perform the role of internal and/or external consultant from initial

contact with the client/organisation through to completion, including proposal and report writing. This unit is compulsory for students undertaking industry placement. Consulting from different disciplinary perspectives is examined.

**Courses:** GS30, GS31, GS38, GS97  
**Prerequisites:** 48 credit points from the core  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

### ► GSN223 APPLIED RESEARCH PROJECT B

Each project has an identical synopsis. These projects enable students to undertake a piece of applied research where the emphasis is upon the link between theory and practice. Students should seek advice at an early stage from the Director MBA regarding their choice of topic. As a general guide, students undertaking the 12 credit point project may expect to spend approximately 12 per week on the project. Group projects may be undertaken, however the allocated research and tasks for each group member will require the equivalent workload of 12 per week for a 12cp project. Students undertaking one of these units may be required to attend a number of management research seminars which might be organised by the Brisbane Graduate School of Business or the Faculty of Business.

**Courses:** GS30, GS31, GS38, GS97  
**Prerequisites:** 48 credit points, Unit Coordinator approval, GPA greater than 5.5  
**Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2, 3

### ► GSN224 CORPORATE PHILANTHROPY

The nature of the relationship between the for profit corporation and the nonprofit sector is invariably through corporate philanthropy. This unit examines five issues central to corporate philanthropy: legal and taxation, cause related alliances, corporate foundations, business giving models in Australia and corporate social responsibility. The unit is taught through case studies in Australian and international practice.

**Courses:** BS91, BS93, BS95, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► GSN225 BUSINESS DEVELOPMENT IN CREATIVE INDUSTRIES

This unit introduces the student to the issues involved in selecting and refining a concept/idea/new product in the creative industries. Topics include business opportunity recognition, screening for potential viability and sustainable competitive advantages; identifying and analysing strategic options, creating a marketing strategy, and outlining the production and operations, human resources, and financial plans for a selected creative industries venture. Thus, students will build the components of a business model for their selected creative concept and by the end of semester will be ready to write a formal business plan for that creative concept/product. Students will examine and critique the business models of a variety of existing businesses in the creative industries during the semester.

**Courses:** BS39, BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98, IF02, IF04

**Prerequisites:** PG only  
**Corequisites:** GSN401, GSN408  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► GSN226 ARTS POLICY AND STRATEGY

This unit analyses the function and processes of arts policy and its relationship to society, the arts organisation, and the profession of arts management. This includes an investigation of the status of the artist, public policy, funding processes, cultural economics, international perspectives and contemporary policy issues and strategies in the non-profit sector.

**Courses:** BS39, BS63, BS91, BS92, BS97, BS93, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98, IF02, IF04  
**Prerequisites:** PG only

## UNIT SYNOPSES

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MKP108, MIN400  
**Campus offered:** GP **Semester:** 1

► **GSN227 ARTS AND CULTURAL MANAGEMENT**

This unit provides students of arts and cultural management with an investigation and analysis of the management function of the not-for-profit arts organisation. It examines the strategic management approaches and operational procedures of arts organisations, including their relationships with the legal system, the media, business, the public, and the industrial provisions and human resources of the organisation.

**Courses:** BS39, BS63, BS91, BS92, BS93, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98, IF02, IF03, IF04

**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MKP109, MIN430  
**Campus offered:** GP **Semester:** 2

► **GSN228 MARKETING ARTS AND CULTURE**

This unit examines and applies theories of arts marketing for arts cultural organisations. The focus is on audience development, but product and service development models in the mission driven arts environment provide the context for students to develop marketing strategies, marketing plans and campaigns for arts and cultural management.

**Courses:** BS39, BS91, BS93, BS95, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF02, IF03, IF04

**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MKP107, MIN415  
**Campus offered:** GP **Semester:** 1

► **GSN229 PHILANTHROPIC AND NONPROFIT GOVERNANCE AND ECONOMICS**

The unit explores contemporary understandings of philanthropic and nonprofit governance in the context of social, economic and political systems. It locates these understandings in various theoretical and descriptive frameworks providing students with both the knowledge and analytical skills that are necessary to reflect critically on philanthropy and nonprofit governance systems. The paradigm of economics used in the governance process forms a significant part of the course.

**Courses:** BS39, BS91, BS93, BS95, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98

**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **GSN230 ETHICS AND MANAGEMENT FOR PHILANTHROPIC AND NONPROFIT ORGANISATIONS**

In the context of managing for excellence with integrity, this unit introduces students to the major management sub-disciplines of human resource management and industrial relations, governance, financial management, and marketing, and to the ethical issues which may confront Philanthropic and Nonprofit (PANFP) organisations, their managers and governing bodies. The unit recognises the distinctive mission and character of PANFP organisations, while seeking to provide an understanding of management excellence and integrity. Thus, the unit explores a range of management and ethical issues confronting the PANFP sector, and uses case studies to develop an understanding of the complexities of managing in this sector.

**Courses:** BS39, BS91, BS93, BS95, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98

**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** CON427, AMN480  
**Campus offered:** GP **Semester:** 2

► **GSN231 LEGAL AND ACCOUNTING ISSUES FOR PANFP ORGANISATIONS**

The unit introduces students to critical issues of philanthropic and nonprofit law, taxation and

accounting. The unit will examine the regulatory, taxation and governance framework of nonprofit organisations and philanthropic transactions in Federal and State jurisdictions. The unit also explores nonprofit external and internal accounting systems crucial to governance functions. The external financial reports provide financial information principally for external users such as members, patrons, funders, and regulators. The internal management accounts address techniques that provide management at all levels with information for use in planning, controlling and decision making.

**Courses:** BS39, BS91, BS93, BS95, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98

**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **GSN232 FUNDRAISING PRINCIPLES**

This unit applies the theories of marketing, consumer behaviour and management to the practices of fundraising and philanthropy. In this context it re-examines the principles of fundraising, case statement preparation, researching and establishing prospect bases, procedures of solicitation, public relations and relationship marketing, fundraising in society, the role of Boards, Foundations and volunteers, fundraising campaigns, and evaluation methods for fundraising.

**Courses:** BS39, BS91, BS93, BS95, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98

**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **GSN233 SPECIAL TOPIC IN PHILANTHROPY AND NONPROFIT STUDIES**

This unit will be developed around the visiting adjunct professors or visiting scholars to the Centre of Philanthropy and Nonprofit Studies. It provides students with access to contemporary issues and experts in the field and involves in-depth examination of an issue of importance.

**Courses:** BS91, BS93, BS95, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98

**Prerequisites:** PG only  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **GSN401 MANAGING IN THE GLOBAL BUSINESS ENVIRONMENT**

Competence in managing is the key to success for any organisation and for any person within that organisation. The knowledge and ability to manage within the global business environment are crucial requirements for today's and tomorrow's managers. This unit introduces the planning, leading, organising and controlling functions of management to elucidate current trends in management practice in the global environment.

**Courses:** BS91, BS97, GS30, GS32, GS33, GS34, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF01, IF02, IF03, IF04, IF13, IF15, IF18, IF19

**Prerequisites:** Must be taken in first semester of study

**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** GSN204, MGN409  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN402 STRATEGIC USE OF INFORMATION TECHNOLOGY**

This unit discusses the impact of the digital era on business strategy, emphasising the importance of the information sector of the economy, the growth of electronic commerce, and the displacement effects of technology to the global business environment. The convergence of communication technology and information technology (eg Internet) is an important force which managers need to understand. The business implications of the impacts of these shifts are also discussed in the global context. Students use e-mail and the Internet constantly in this unit as part of their project work.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS34, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19

**Prerequisites:** Must be taken in first semester of study

**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** GSN201  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN403 UNDERSTANDING DATA**

This unit is designed to provide students with a clear understanding of different types of data and techniques to present tackle real world problems relevant to business and managers. Students will be introduced to various techniques of organising, presenting and analysing economic and business data. Topics include probability theory, descriptive and inferential statistics.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS34, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19

**Prerequisites:** Must be taken in first semester of study

**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** EFN409  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN404 FINANCIAL STATEMENTS ANALYSIS I**

This unit introduces students to basic accounting concepts and financial statements, and then explores methods of analysing them to give an informed understanding of the financial well being of the entity. Throughout, it takes the perspective of the user of financial statements, and in this role, explores the information in financial statements, and how the three basic accounting statements are linked, and interdependent. The course guides students through the process of analysing financial statements, how to interpret findings and how to understand what the analysis and other contextual data tell them about the business.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19

**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** AYN416  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN405 STRATEGIC MANAGEMENT**

Strategy is the process of determining goals and moving towards the achievement of those goals in a business government, or not-for-profit setting. This unit introduces the concept of strategy and explores the basic tenets of the strategy process, competitive advantage, and strategic management in a changing global environment. It lays in the foundations for students in terms of understanding contemporary thinking in the strategy field. The learning process is enhanced by practical real-time examples of strategy in action utilising in the case study method of learning.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19

**Prerequisites:** GSN401 **Corequisites:** GSN401  
**Contact hours:** 3 per week **Credit points:** 6  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN406 HUMAN RESOURCE MANAGEMENT ISSUES**

This unit examines the challenges faced by managers in achieving effective human resource management in the contemporary business environment. An issues based approach is adopted to focus attention on the need for the individual managers to complement their technical expertise with knowledge and skills in people management. Specific attention will be given to the human resource management implications arising from the global business environment and the changing nature of organisations.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19

**Prerequisites:** GSN401, GSN409  
**Contact hours:** 3 per week **Credit points:** 6  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN407 BUSINESS COMMUNICATION**

Business Communication is an introductory unit that promotes effective written and spoken com-

munication skills in a range of situations encountered by managers. Students will better understand the principles of effective written and spoken communication through theory and undertaking several practical exercises and tasks.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS34, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** CON404  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN408 FUNDAMENTALS OF MARKETING MANAGEMENT**

This unit examines the role of marketing and its place within the firm operating in the global business environment. It examines key marketing decision areas, including the marketing concept, marketing information systems and marketing research, consumer behaviour, marketing segmentation, targeting and positioning, and marketing planning. It further examines the place of marketing planning within the strategic processes of the modern firm and the complexities brought about by an increasingly competitive international environment. In the process, students get the opportunity to evaluate, critically, the determinants of consumer behaviour, influences of external environments on the marketing process, marketing related functions within the firm and the strategic role of marketing in the organisation.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF01, IF02, IF03, IF04, IF13, IF15, IF18, IF19  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** GSN206  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN409 ORGANISATIONAL BEHAVIOUR 1**

Organisational Behaviour 1 is an introductory unit which analyses human behaviour at work with a focus on issues of personality, motivation, group interaction, occupational stress, and health and organisational change. The unit will examine issues related to aspects of the working environment and to the relationship between managerial strategies, organisational structures and their effects on performance, health and autonomy.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19  
**Corequisites:** GSN401  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** MGN412  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN410 ENTREPRENEURSHIP**

This unit introduces the student to the field of entrepreneurship and planning for new business initiatives in the global business environment. Topics include entrepreneurial attitudes, abilities and behaviours; developing an entrepreneurial culture; opportunity recognition and viability screening; first-mover advantages and disadvantages; risk recognition and risk reduction strategies; and intellectual property protection. Students will examine and critique several business plans and/or case studies during the semester.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF03, IF04, IF13, IF15, IF18, IF19  
**Prerequisites:** GSN408 **Corequisites:** GSN408  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** GSN300  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN411 ECONOMICS OF STRATEGY 1**

Competitive strategy requires an understanding of the market context in which the business firm is operating, and increasingly this means the global market context. This unit is concerned with the microeconomics of strategic business choices, such as acquiring a competitor, supplier, or major customer, or diversifying into similar and dissimilar markets, using economic concepts such as economies of scale, economies of scope, incremental costs and transaction costs. Topics include the economics of the firm, transactions costs, the economics of vertical integration,

'make or buy' decision, economies of scale and scope and agency theory.

**Courses:** BS91, BS89, BS97, GS97, GS30, GS31, GS32, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** EFN405 GSN203  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN412 BUSINESS LAW 1**

This unit provides managers with an overview of basic legal principles, which form the foundation of the laws of commercial transactions from the perspective, and with particular relevance to, managers. Students will learn key elements of the rules governing business dealings by the interaction of the laws of contract, agency and franchising, property law, securities and bailment, company law and consumer law. The unit also introduces students to the Australian legal and statutory structure and provides an overview of the legal nature of business entities.

**Courses:** GS30, GS31, GS32, GS33, GS34, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19  
**Prerequisites:** GSN401 **Corequisites:** GSN401  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** AYN410  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN413 FINANCIAL MANAGEMENT 1**

This unit introduces the student to the international financial environment in which business operates. The three major lessons in finance (time value, diversification and arbitrage) are introduced. Topics include time value of money, valuation, sources of funds, behaviour of firms and financial markets, introduction to investment evaluation, diversification, risk and return, and cost of capital.

**Courses:** GS30, GS31, GS32, GS33, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19  
**Prerequisites:** GSN403  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** EFN406  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN414 BUSINESS CONDITIONS ANALYSIS 1**

This unit provides managers with an understanding of some of the key factors affecting business conditions. Students are introduced to the most important economic concepts through a series of international case studies. These concepts include, among others, opportunity cost, supply and demand, elasticity, efficiency, comparative advantage, saving and investment, and gross domestic product (GDP). In the process, students have the opportunity to evaluate, critically, the determinants of market outcomes, environmental policy, international trade policy, competing indicators of economic welfare, and policy aimed at lifting national savings.

**Courses:** BS91, BS89, BS97, GS30, GS31, GS32, GS33, GS34, GS38, GS85, GS86, GS87, GS93, GS97, GS98, IF13, IF15, IF18, IF19  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** EFN405 GSN203  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN415 LEADERSHIP 1**

Leadership is the process of persuasion or example by which an individual influences others to pursue identified goals. The skills of leadership can be identified and learned. This unit explores the attributes, roles and tasks of leaders in contemporary business situations and the issues that impact on leadership, such as leader-follower interaction, ethics, leadership characteristics and leadership development. This unit will culminate in the development of leadership profiles of contemporary leaders with an exploration of their characteristics and how their leadership roles are exercised.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS38, GS85, GS86, GS87, GS93, IF13, IF15, IF18, IF19  
**Prerequisites:** GSN401  
**Contact hours:** 3 per week **Credit points:** 6  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN416 BUSINESS PLANS 1**

This unit prepares students for writing a formal business plan for a new business venture. Business planning is an intensive viability screening exercise in which the business planners must consider all strategic alternatives, choose a preferred 'business model' and analyse whether or not the proposed new venture appears to be viable. The business plan is a document that communicates this viability to an investor or other potential stakeholders in the new business. The structure and content of the business plan is thus crafted strategically according to its role in a multi-stage communication process with the target reader.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS34, GS38, GS85, GS86, GS93, GS97, GS98, IF13, IF15, IF18, IF19  
**Prerequisites:** GSN404, GSN408, GSN410  
**Contact hours:** 3 per week **Credit points:** 6  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN417 EFFECTIVE ADVOCACY FOR MANAGERS**

Effective Advocacy for Managers is an elective unit that builds upon work completed in GSN407. This unit is designed to enhance students' presentation skills. It covers the practical application of key theories on Speech Communication to create managers who are effective persuaders, opinion leaders, and facilitators of change in a business environment. Among the issues covered are: structuring and designing for an audience, developing a persuasive theme, using imagery and language effectively, developing presentations.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN407  
**Contact hours:** 3 per week **Credit points:** 6  
**Campus offered:** GP **Semester:** 2

► **GSN418 MARKETING STRATEGY DEVELOPMENT**

This unit builds upon the foundation provided by GSN408 and examines the managerial process involved in identifying and developing effective marketing strategies. It examines the role of marketing within the strategic processes of the modern firm and considers the process involved in strategic marketing in the global business context. It takes a case based approach to illustrating the effectiveness of key approaches to marketing strategy development and highlights the importance of new and emerging fields of marketing practice.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN408  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** GSN206  
**Campus offered:** GP **Semester:** 1, 2, 3

► **GSN419 ORGANISATIONAL BEHAVIOUR 2**

Organisational Behaviour 2 is an elective unit which builds upon work completed in Organisational Behaviour 1. The unit provides an extensive analysis of human behaviour with particular emphasis on behaviour in groups and the larger organisation. Topics include organisational structure and design, teamwork and group work, organisational culture, power and politics, communication, conflict and negotiation, and innovation and organisational development.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN409  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** MGN412  
**Campus offered:** GP **Semester:** 1, 2

► **GSN420 NEW VENTURE STRATEGY**

This unit considers competitive strategy and the requirements for resource-based sustainable competitive advantage in the context of new business ventures. Topics include generic competitive strategies; entry strategies; strategies to counter environmental threats and weaknesses; strategies to exploit firm strengths and opportunities; competitive strategies (cost leadership and differentiation); cooperative strategies (tacit collusion and strategic alliances); and global strate-

## UNIT SYNOPSES

gies. Students complete a Strategic Plan for a new venture as part of this unit.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98, IF03, IF04

**Prerequisites:** GSN405, GSN410

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 1, 2, 3

### ► GSN421 ECONOMICS OF STRATEGY 2

This unit continues the analysis introduced in GSN411 and develops in greater depth the economics of competitive strategy and competitive advantage in the global business context. Topics include exit and entry of firms, strategic positioning for competitive advantage, analysing cost and differentiation positions, methods of sustaining competitive advantage, the origins of competitive advantage.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN411

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 1, 3

### ► GSN422 BUSINESS LAW 2

Business Law 2 provides a continuing overview of key areas of commercial law in the Australian environment. The subject builds on the basic principles of contract, property law, securities and bailment, consumer law agency and franchising, company law principles, covered in Business Law 1. Students will focus on the essential elements of legal compliance programs and specific elements of the rules that impact on business operations in the areas of insurance law, law of torts and professional negligence, personal and corporate insolvency, environmental law, employment law and occupational health and safety and privacy law.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN412

**Contact hours:** 3 per week      **Credit points:** 6  
**Incompatible with:** AYN410  
**Campus offered:** GP              **Semester:** 2, 3

### ► GSN423 FINANCIAL MANAGEMENT 2

This unit builds on the material covered in GSN413 Financial Management 1. It extends the analysis of firms' decisions in the areas of investment, dividends and financing. Topics include capital budgeting and taxation, dividends and imputation, capital structures, risk management using options and futures, and an introduction to international finance.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN413

**Contact hours:** 3 per week      **Credit points:** 6  
**Incompatible with:** EFN406  
**Campus offered:** GP              **Semester:** 1

### ► GSN424 BUSINESS CONDITIONS ANALYSIS 2

This unit provides managers with an understanding of the key macroeconomic policy debates and how they are impacting upon business conditions. Students are introduced to these debates and their theoretical underpinning through a series of international case studies. A number of important concepts are introduced including the natural rate of unemployment, the underlying rate of inflation, aggregate demand and aggregate supply, monetary policy and fiscal policy, and the open economy. In the process, students get the opportunity to evaluate, critically, the virtues of the free market as opposed to government interventionism.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN414

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 2

### ► GSN425 LEADERSHIP 2

This unit builds upon GSN415 to develop leadership ability, utilising a conceptual framework for self-understanding and the development of the requisite knowledge, skills and attitudes required to lead successfully in contemporary society. It is designed to allow individuals a better understanding of their own capacities as leaders. It will use this understanding to design leadership de-

velopment strategies. Individuals will learn the principles of effective leadership and how their own style affects leadership, decision making, vision building, organisational culture, the use of power and teamwork. The focus is on the development of self-awareness and improvement of the individual's capacity to understand, communicate with the influence of others.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN415

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 1, 2, 3

### ► GSN426 BUSINESS PLANS 2

This unit is a continuation of GSN416 and culminates in the writing and presentation of a formal business plan. The business plan is a major component of a multi-part communication strategy between new venture management and the potential investor or other potential stakeholder. Effective presentation and defense of the business plan is also considered in this unit. As part of the assessment, students will complete a formal Business Plan for a new venture of their choosing, and present their plan to the class.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN416, GSN418, GSN427, GSN405 (or GSN420)

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 1, 2, 3

### ► GSN427 FINANCIAL STATEMENT ANALYSIS 2

This unit explores the meaning of financial statements and their application in managerial decision-making. Information from financial statements will be used to demonstrate how managers can understand and take control of the internal cost structure of their business. The unit introduces management accounting, basic costing concepts, cost behaviour and the cost-volume-profit model, budgeting and short-term decision-making.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN404

**Contact hours:** 3 per week      **Credit points:** 6  
**Incompatible with:** AYN416  
**Campus offered:** GP              **Semester:** 2

### ► GSN428 INTERNATIONAL STUDY TOUR

This unit involves a group excursion to one or more international countries for students interested in learning more about doing business with that (those) countries. Students will study the business environment and the underlying socio-political, geographical and historical aspects in that (those) countries in considerable detail. The international study tour would normally be scheduled during the semester break period, and involve 10-14 days overseas, accompanied by an Academic Advisor. The group will attend organised briefings, meetings, presentations and site visits in the host countries. Assessment will include attendance and participation at all events and the submission of a detailed Daily Journal.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** Subject to approval of the MBA Director

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 3

### ► GSN429 MARKETING PLANNING

Marketing Planning is concerned with the need for systematic and organised approach to marketing with particular emphasis on the special marketing needs of new and entrepreneurial businesses in international markets. New ventures face market ignorance much greater than that faced by new products of existing firms. Needs of potential customers must be analysed, and product offerings modified accordingly. Product design and prototypes must be developed in close contact with marketing research results. New marketing channels must be created or access to existing channels must be secured. Potential customers must be identified, informed, and persuaded to try the new product. Pricing is a major problem area, since there is a conflict be-

tween relatively low prices to encourage trial, and premium pricing because the new product better serves customer needs. These issues will be examined in this unit.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN410, GSN418

**Corequisites:** GSN418

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 1, 2, 3

### ► GSN430 NEW VENTURE RESOURCING

This unit is concerned with raising funds to establish, launch and grow a new business venture. Sources of funding considered include one's own resources, family and friends, 'social capital' transactions, business angels, venture capitalists, banks, and the public equity market. Methods of 'bootstrapping' and cash conservation, including agreements with suppliers, customers, and employees, are also considered. Pro-forma financial statements for the new venture, the financial valuation of the new venture, and the allocation of equity for intellectual property, seat equity, expenses incurred and funding provided are also examined.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN404, GSN410

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 1, 2, 3

### ► GSN431 NEW VENTURE GROWTH AND TRANSITIONS

Many new ventures start successfully but then flounder as rapid growth, often into international markets, causes problems with production, distribution, product quality, employee morale, cash flow, financing and management's ability to make the transition from the new and small firm to a rapidly growing company. If the firm is to survive and enjoyed continued success, the entrepreneur must navigate the transition from 'hands on' involvement in every aspect of the business to a more detached strategic planning and senior management role. Alternatively, the founder must hand over the CEO position to someone else while seeking out a more suitable for him/herself. This unit considers the issues involved in recognising the need for, planning for, and making that transition.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN410, GSN420 (or GSN405)

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 1, 3

### ► GSN432 NEW VENTURE LEADERSHIP AND HRM

The entrepreneur's ability to exercise leadership is a critical factor in the success of most new ventures, and thus the main purpose of this unit is to enhance entrepreneurial leadership skills. Human resource management issues, including international human resource and cross-cultural management, are introduced and applied to the new venture situation. Incentive remuneration schemes, including bonus and stock option schemes, are considered as a means of reducing current employee cost and reducing employee turnover, while allowing employees to participate in the upside potential of the venture.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN410, GSN415

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 2, 3

### ► GSN434 VENTURE CAPITAL

This unit considers, in the Australian and global financial market contexts, the operation of the venture capital industry and its rationing of relatively scarce risk capital among relatively abundant demands for new venture funding. Students will gain an understanding of how the venture capital industry works and the criteria by which funds are committed to the support of new ventures. Students will increase their ability to distinguish the less risky and more profitable investment opportunities from the more risky and less remunerative opportunities that may also be presented to venture capitalists.

## UNIT SYNOPSES

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN404, GSN410, GSN413, GSN420 (or GSN405)  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1, 3

### ► GSN435 ELECTRONIC COMMERCE

This unit provides an interdisciplinary introduction to business processes that are known collectively as electronic commerce. Current technologies for use in implementing electronic commerce will be examined and focus will be placed on strategies and methodologies for adopting the technology in a real world context. Students will analyse why electronic commerce is more easily used in some businesses and not in others, using a cost-benefit evaluative framework. As a component of this unit, students will increase their competence in using the Internet and World Wide Web. This exposure is essential for assignment work and to allow students to access necessary course materials.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN402  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1, 2, 3

### ► GSN438 PRODUCTION AND OPERATIONS MANAGEMENT 1

The pivotal concept of management is that the organisation is a dynamic system affected by both external and internal forces. Operations management narrows the focus of general management philosophies to consider the production/operations sub-systems. These sub-systems physically produce goods and services, which are the value-adds result of the transformation of inputs. Forecasting, process selection and design, layout and capacity planning, location planning and aggregate planning are considered. Issues of quality and efficiency and introduced analytically with respect to strategies and constraints.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN401  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 3

### ► GSN439 PRODUCTION AND OPERATIONS MANAGEMENT 2

The pivotal concept of management is that the organisation is a dynamic system affected by both external and internal forces. Operations management narrow the focus to the production/operations sub-systems, which physically produce goods and services. This unit follows on from GSN438, which introduced forecasting, process selection and design, layout and capacity planning, location planning, aggregate planning and quality control issues. Here, the means of procurement and application for production are considered. Inventory, materials requirements planning, manufacturing resource planning, supply chain management, scheduling, service operations, and current issues like enterprise resource planning are introduced. They are addressed analytically with respect to strategies and constraints.

**Courses:** BS91, GS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN438  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN440 RISK MANAGEMENT 1

This unit examines the role of risk management in contemporary management theory and practice. Key decision areas of risk (eg financial, human resource, physical - asset management etc) are considered in the context of the general management of the organisation.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN401  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN441 RISK MANAGEMENT 2

This unit is an extension of GSN440, and continues the approach of examining the role of risk management in contemporary management theory and practice. Key decision area of risk (eg

financial, human resource, physical - asset, etc) are considered in the context of the general management of the organisation.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN440  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2, 3

### ► GSN442 RISK MANAGEMENT 2

This unit is an extension of GSN440, and continues the approach of examining the role of risk management in contemporary management theory and practice. Key decision area of risk (eg financial, human resource, physical - asset, etc) are considered in the context of the general management of the organisation.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN440  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN443 PROJECT MANAGEMENT 2

Managers are increasingly placed in the position of project manager, to manage projects as diverse as construction of new facilities, expansion to global markets, implementation of change, information technology systems installation, or planning a major conference. This unit builds on the fundamental skills in both the operational and strategic aspects of project management, which are covered in GSN442. In distance mode, academic requirements are met through a minimum of fortnightly contact with the lecturer by each student, through reference to the text and associate publication, and through the preparation and presentation of a written project proposal.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN442  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2, 3

### ► GSN444 SPECIAL TOPICS 1

Offered to temporarily 'house' subject matter that is not routinely offered by the Graduate School of Business, but which is offered when specific subject matter is considered especially timely and/or in a semester when a visiting or adjunct professor is available with expertise that is not normally resident in the Faculty of Business.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** PG only  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1

### ► GSN445 SPECIAL TOPICS 2

Like GSN444 this unit is offered to temporarily 'house' subject matter that is not routinely offered by the Graduate School of Business. This unit is offered to students who have already taken GSN444 and who wish to take a second 'Special Topics' six credit point unit in the same award program.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** PG only  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1

### ► GSN446 APPLIED RESEARCH PROJECT A - INDIVIDUAL PROJECT

These projects enable students to undertake a limited piece of applied research where the emphasis is upon the link between theory and practice. Students should seek advice at an early stage from the Director MBA regarding their choice of topic. As a general guide, students undertaking the six credit point project may expect to spend approximately six per week on the project. Group projects may be undertaken, however the allocated research and tasks for each group member will require the equivalent workload of six per week for a six credit point project. Students undertaking one of these units may be required to attend an number of management research seminars which might be organised by the Brisbane Graduate School of Business or the Faculty of Business.

**Courses:** GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** 48 credit point, Unit Coordinator approval, GPA>5.5

**Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1, 2, 3

### ► GSN447 STRATEGIC INTERNET MARKETING 1

Strategic Internet Marketing 1 introduces students to the key concepts and issues involved in using the Internet in marketing. The unit explains how, why and when to incorporate the internet into marketing activities. Specific area investigated include the role of new technologies in changing and complementing traditional marketing practices, internet based market research and consumer behaviour.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN402, GSN418  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2, 3

### ► GSN448 STRATEGIC INTERNET MARKETING 2

Strategic Internet Marketing 2 focuses on the practical implications of the issues and concepts discussed in Strategic Internet Marketing 1. It explains how the basic tools of marketing are applied in the online environment. Specifically it will address issues relating to pricing including both monetary and non-monetary costs to the consumer, the Internet as part of the promotional mix and a promotional medium, an evaluation of product types most suited to Internet marketing and the value of the Internet as a distribution channel.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN447  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN449 PUBLIC SECTOR AND SOCIAL MARKETING 1

Marketing has rapidly expanded its application over recent years from being a primarily commercial practice, to being used to increase the effectiveness and efficiency of a range of non commercial activities. In particular, over the past decade marketing has been adopted by government agencies world wide to improve service standards and communicate with key audiences. This unit examines the problems and issues associated with the application of marketing concepts and techniques to the social, not for profit and public sectors focussing in particular on service delivery and the use of social marketing to facilitate social and individual change.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98, IF03, IF04  
**Prerequisites:** GSN408, GSN418  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN450 PUBLIC SECTOR AND SOCIAL MARKETING 2

Marketing has rapidly expanded its application over recent years from being used to increase the effectiveness and efficiency of a range of non-commercial activities. In particular, over the past decade marketing as been adopted by government agencies world wide to improve service standards and communication with key audiences. This unit applies the theory and models developed in Public Sector and Social Marketing 1 to a range of practical situations.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98  
**Prerequisites:** GSN449  
**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2, 3

### ► GSN451 CONTEMPORARY ISSUES IN THE INTERNATIONAL POLITICAL ECONOMY

This is an interdisciplinary unit which provides managers with a thorough grounding in a number of contemporary issues within the international political economy. Students are introduced to the key learning objectives through a series of international case studies on the European Union, the North American Free Trade Agreement, the East

## UNIT SYNOPSES

Asian economic crisis, and the transitional economies in Eastern Europe.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN414

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1

### ► GSN452 INTERNATIONAL HUMAN RESOURCE MANAGEMENT

This unit provides students with an understanding of some of the key factors affecting the management of human resources in an international environment. The integrating theme to studying this area of HRM is the management of expatriate managers. The topic is considered from the perspective of the international management generally, through the recruitment and selection of expatriates, their preparation, in-post support and eventual repatriation.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN406

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 3

### ► GSN453 ECONOMICS OF HEALTH & HEALTH CARE

This unit is concerned with applications of economics to problems of resource allocation in the health sector. The unit explores economic approaches to the production of health and health care services, as well as examining the special characteristics of health care markets. The role of insurance is considered and the various mechanisms for financing health care are investigated. The problem of market failure and the role of government in the health economy is a focal point in the unit.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN411 or GSN414

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN454 ECONOMICS OF INFORMATION AND E-COMMERCE

This unit explores ways in which the durable principles of information economics may be applied to analyse the network or 'information' economy. At a general level, the unit is concerned with the impact of high-speed communication and replication of information on the global business environment. More specifically, at the level of the firm, this unit is concerned with issues such as information pricing, product differentiation, the creation of network externalities, consumer lock-in and switching costs, scale and scope economies, strategic alliances, and other issues pertinent to firm strategy in the network economy. Importantly, the impact of the network economy on firms that participate in e-commerce as well as those that do not, is explored.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN411 or GSN414

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1, 2

### ► GSN455 SPECIAL TOPICS 3

Like GSN444 this unit is offered to temporarily 'house' subject matter that is not routinely offered by the Graduate School of Business. This unit is offered to students who have already taken GSN444 and GSN445 and who wish to take an additional 'Special Topic' unit in the same award program.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN456 PERSONAL DEVELOPMENT AND ETHICS FOR MANAGERS

This unit provides students with an opportunity to increase their understanding of themselves and how their interactions with others impact on their effectiveness as managers in a global environment. This unit also provides a framework of basic principles for ethical decision making. The roles of the individual and ethics in business decision making are explored through the use of international case studies. Students get the opportunity to evaluate, critically, the role of individual behaviour and ethical decision making, from not only a personal career perspective but as determinants of management and business effectiveness in an international context.

**Courses:** BS91, BS97, GS30, GS31, GS32, GS33, GS85, GS86, GS90, GS91, GS92

**Contact hours:** 3 per week      **Credit points:** 6  
**Incompatible with:** GSN208

**Campus offered:** GP                      **Semester:** 1

### ► GSN457 ORGANISATIONAL COMMUNICATION AND INFLUENCE

This unit focuses on how people relate with each other in modern organisational settings, from small businesses to multi-national organisations in the public and private sector. Drawing together theories of communication as they apply to workplace settings, the unit provides the opportunity to analyse and reflect on the role of communication in constructing the conditions for achieving effective leadership and participation in organisations.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN407

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 3

### ► GSN458 INTERCULTURAL BUSINESS COMMUNICATION

This unit examines the dimensions of intercultural business communication competence, including verbal and non-verbal strategies used by different cultural groups. By focusing on significant intercultural business communication issues, the unit provides the opportunity to analyse and reflect on the ways in which diversity enhances organisational effectiveness, and the difficulties that arise for organisational members in dealing with difference.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN407

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1

### ► GSN459 COMMUNICATION PLANNING FOR ORGANISATIONS

This unit focuses on the development and management of internal organisational communication programs required for effective strategic alignment of employees with organisational mission and goals. The unit examines the various ways in which strategic communication planning can facilitate change through the alignment of organisational members with the direction required by the organisation.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN407, GSN457

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1

### ► GSN460 CREATIVE PROBLEM SOLVING

This unit introduces the student to the field of creative thinking for new business initiatives in the global business environment. The problem solving methods presented also have application for 'intrapreneurs' in established firms. Topics include organisational issues for managing creativity; methods of thinking; formal analysis approaches; individual creative techniques; and group based problem solving. Candidates will apply specific techniques to case studies during the semester. Video records of tutorials will be used to facilitate feedback for improved learning outcomes.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN410, GSN415

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN461 MAKING CHANGE WORK

Making Change Work is a unit that builds on the material covered in both GSN401 (Managing in the Global Business Environment) and GSN409 (Organisational Behaviour 1), with the intent of making organisational change work optimally for organisations and for the people in them. As such, it relies on a general knowledge of management and its objectives and functions, as well as of individual and group behaviour.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS93, GS97, GS98

**Prerequisites:** GSN401, GSN409

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2, 3

### ► GSN462 NEGOTIATION STRATEGIES

This unit explores the theory and practice of business negotiation strategies. By focusing on distributive and integrative negotiation strategies and exploring business negotiation practices in various contexts, the unit provides students with the opportunity to develop understanding and skills of negotiation in general and business negotiation under selected contexts in particular.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN463 AUSTRALIAN E-COMMUNICATIONS POLICY

Australian E-Communications Policy is a unit that develops the understanding of managers about policies affecting new communications technologies. Students will be made aware of the factors involved in policy development for emergent communications media, and be better prepared to plan strategically for these new media. All tasks aim to develop the expertise of students in their chosen areas of interest.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN402

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN464 INTERNATIONAL E-COMMUNICATIONS POLICY

International E-Communications Policy carries on from GSN463, focusing on the international policy environment for e-commerce practice. The unit involves investigation of the legislative environment for information and communication technologies (ICTs) in the US, UK, Canada and in the Asia-Pacific region.

**Courses:** BS91, BS97, GS30, GS31, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN402

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN465 ADVANCED ELECTRONIC COMMERCE

This unit follows on from GSN435 Electronic Commerce, providing greater depth on the current technologies required to conduct electronic commerce. Discussion will focus on the application of these technologies to real world business problems and the consequences for management.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN435

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2, 3

### ► GSN466 TECHNOLOGY INFRASTRUCTURE MANAGEMENT

Technology Infrastructure Management will develop and appreciation of the complex issues with face today's Information Technology Managers.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN402

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 1

### ► GSN467 KNOWLEDGE MANAGEMENT

This unit follows on from GSN402 Strategic Use of Information Technology, exploring the rationale for knowledge management in a digitised workplace. Discussion will focus on the application of knowledge strategies and technologies to real world business problems.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN402

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP                      **Semester:** 2

### ► GSN468 PUBLIC AND COMMERCIAL POLICY IN THE ICT SECTOR

This unit examines the apparent strategies used to exercise leadership and influence in the 'new

## UNIT SYNOPSES

economy' through both formal and informal policy-making in public and commercial organisations. It explores the current Australian perspective of Government, Industry Associations and Corporation, by examining their published documentation and reported strategies as a means of identifying influence processes.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN402

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 1, 3

### ► GSN469 INTERNET APPLICATIONS

The purpose of the unit is to provide a managerial overview of the available and emerging technologies on the Internet and examine the business case for their use and application. It examines the various applications of the internet including email, mobile and internet telephony, streaming media, database and dynamic content, emerging protocols, instant communicators and newsgroups for their utility and value to business.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN402

**Contact hours:** 3 per week      **Credit points:** 6  
**Incompatible with:** GSN201

**Campus offered:** GP              **Semester:** 1, 3

### ► GSN470 E-BUSINESS

This unit introduces concepts, theories and issues in the development of an e-business organisation based on, or depending strongly on Information and Communication Technologies (ICTs). The unit will examine the nature of e-business, with particular emphasis on the variety of e-business strategies and will explore on how traditional management practices face difficulties in an electronic context.

**Courses:** GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Contact hours:** 3 per week

**Credit points:** 6

**Campus offered:** GP

**Semester:** 1, 3

### ► GSN471 E-PUBLISHING

E-Publishing will provide MBA students with the basic skills in electronic publishing. The unit will examine a range of e-publishing products, and will seek to provide students with the skills to determine which e-product is appropriate for a variety of markets. Web site development, scripting, security applications and setting up a business portal will be key components of the unit.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN402

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 2

### ► GSN472 PRINCIPLES OF CORPORATE GOVERNANCE

Principles of Corporate Governance provides an introduction to the increasingly important area of corporate governance, as practiced by the Boards of Directors of companies. This subject provides an overview of the main concepts and history of corporate governance as a global trend, the core legal principles that underpin corporate governance, and relationships between key stakeholders, corporate governance in different contexts including small proprietary companies and large listed and unlisted entities and current issues, and including arguments propounded for self regulation vs government intervention.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN412

**Contact hours:** 3 per week      **Credit points:** 6  
**Incompatible with:** GSN229

**Campus offered:** GP

**Semester:** 1

### ► GSN473 CORPORATE ACCOUNTABILITY

Boards of directors are increasingly looking at their policies and processes but often only after their companies fail. GSN473 focuses on the Board's role in setting and developing strategic direction of the Company together with management, how the board oversees and monitors management especially with respect to the financial well being of the Company and the role of the auditor and other experts, together with the

opportunity to undertake work-based projects to put 'theory into practice' in a significant way. The role of process and the design and implementation of effective compliance systems is critical to implementation of good corporate governance and often to establish defenses and 'safe harbours' at law. Cultural and other issues that hamper the establishment of a 'culture of compliance' within organisations will be canvassed together with suggested strategies to overcome these attitudes and impediments. Essential record keeping strategies are also canvassed as boards increasingly become aware of the importance of not only having policies in place but ensuring they are followed.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN472, GSN404, GSN405

**Contact hours:** 3 per week      **Credit points:** 6  
**Incompatible with:** GSN229

**Campus offered:** GP

**Semester:** 2

### ► GSN474 STRATEGY PLANNING & DEVELOPMENT

The understanding of Strategic Planning, Development and Implementation and the implications for the modern organisation underpin this unit. Based on the case study method of teaching, the unit discusses the strategy development process in the modern business context, and takes into account the various stakeholders and influences that determine the eventual success or failure of strategy initiatives.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN405

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 2

### ► GSN475 STRATEGIC ANALYSIS

Strategic analysis builds on the core understanding of the principles and foundations of strategic management. The capacity to critically analyse, to formulate options, and to recommend courses of action is an essential everyday tool for the strategist. The ability to analyse and present a point of view is the focus of the course: therefore, incorporating presentation skills with strategic analysis.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN405, GSN474

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 2

### ► GSN480 SUSTAINABLE DEVELOPMENT AND COMPETITIVE ADVANTAGE

This unit provides managers with an understanding of the factors impacting upon the long-term sustainability of business, and how this impacts upon competitive advantage. The theoretical framework is predicated upon four key concepts: radical resource productivity; biomimicry; service and flow economy; and investment in natural capital. This framework is applied in the analysis of a number of international case studies.

**Courses:** BS91, BS97, GS30, GS31, GS33, GS38, GS85, GS86, GS93, GS97, GS98

**Prerequisites:** GSN411 or GSN414

**Contact hours:** 3 per week      **Credit points:** 6  
**Campus offered:** GP              **Semester:** 2

### ► HHB050 MANDARIN FOR CHINESE

Students will receive instructions in listening and speaking Putonghua; reading and writing Pinyin Romanisation; reading and writing simplified characters; learn differences in structure and nuance between their native dialect and Putonghua.

**Courses:** All

**Credit points:** 12

**Incompatible with:** HUB450

**Campus offered:** GP

**Semester:** 3

### ► HHB051 INTRODUCTORY MANDARIN I

This unit introduces students who have little or no prior knowledge of Chinese Mandarin to the four macro skills of listening, speaking, reading and writing through an integrated communicative approach to teaching. Content will include: the Mandarin sound and tonal systems; the Pinyin Romanization system; introduction to Chinese

character writing, greetings and introductions; family, identification of nationalities, places and objects, locations and directions.

**Courses:** All

**Credit points:** 12 **Incompatible with:** HUB453

**Campus offered:** GP

**Semester:** 3

### ► HHB052 INTRODUCTORY MANDARIN 2

This subject continues to develop the four macro skills of listening, speaking, reading and writing through an integrated communicative approach. While there is further consolidation of a knowledge of the Pinyin Romanization system, greater attention is devoted to the reading and writing of characters. With acquisition of language, students receive further exposure to aspects and characteristics of Chinese culture.

**Courses:** All

**Prerequisites:** HUB453 or HHB051

**Credit points:** 12 **Incompatible with:** HUB454

**Campus offered:** GP

**Semester:** 3

### ► HHB053 INTERMEDIATE MANDARIN

**Campus offered:** GP

**Semester:** 3

### ► HHB054 ADVANCED MANDARIN

**Campus offered:** GP

**Semester:** 3

### ► HHB056 INTERNATIONAL INTENSIVE PROGRAM

Short period of intensive language study conducted at an approved institution in the country where the language is used; aims to enhance language skills and introduce students to the culture of the country in an immersion situation.

**Courses:** HH01, HU22, IF43, IF70, IF81, IF82, IF86, IF30, ED50, BS56, SS60

**Credit points:** 12

**Incompatible with:** HUB646

### ► HHB057 INTERNATIONAL SUMMER SCHOOL OR EQUIVALENT

Four to six weeks of concentrated learning at an approved institution.

**Courses:** BS50, ED50, HH01, HU20, HU22, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Credit points:** 24

**Incompatible with:** HUB647

### ► HHB058 IN-COUNTRY STUDY - A

An approved course of study at a designated foreign institution for one semester.

**Courses:** ED50, HH01, HU20, HU22, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Credit points:** 48

**Incompatible with:** HUB648

### ► HHB059 IN-COUNTRY STUDY - B

An approved course of study at a designated foreign institution for one semester.

**Courses:** HH01, HU22, HU20, IF43, IF70, IF81, IF82, IF86, SS60, IF30

**Credit points:** 48

**Incompatible with:** HUB461

### ► HHB060 FRENCH FOR THE TOURISM INDUSTRY

This unit should be of interest to anyone wanting to work in the tourism industry overseas or in Australia. It concentrates on the development of communicative skills with a special focus on the tourism and hospitality industry.

**Prerequisites:** French Immersion Program/In-country Program (following Senior French) or HUB673

**Corequisites:** HUB674 or HHB065 (for students wishing to take HUB675 French 6 in Semester 2)

**Contact hours:** 4 per week      **Credit Points:** 12  
**Incompatible with:** HUB452

**Campus offered:** GP

**Semester:** 1

### ► HHB061 FRENCH 1

Aims to give students who have not reached senior or equivalent the grounding necessary for the post-senior course. Videodisc technology using the 'French in Action' method allows students to develop conversational skills, and introduces them to reading and writing.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF70, SC30, IF30, SS60

**Contact hours:** 4 per week      **Credit points:** 12  
**Incompatible with:** HUB670

**Campus offered:** GP

**Semester:** 1

## UNIT SYNOPSES

### ► HHB062 FRENCH 2

Aims to give students who have not reached senior or equivalent the grounding necessary for the post-senior course. Videodisc technology using the 'French in Action' method allows students to develop conversational skills, and introduces them to reading and writing.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB670

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB671

**Campus offered:** GP **Semester:** 2, 3

### ► HHB063 FRENCH 3

The course concentrates on developing spontaneity in social conversations, with some work on reading and writing skills. The course encourages students to make contacts in the French speaking community in Brisbane.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** Year 12 French or equivalent

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB672

**Campus offered:** GP **Semester:** 1

### ► HHB064 FRENCH 4

This course expands on first semester, to allow students to discuss a number of current issues in French society. Magazine articles, news reports, the Internet, videos and a novel develop reading, writing, speaking and listening skills, as well as cultural awareness.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB672

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB673

**Campus offered:** GP **Semester:** 2

### ► HHB065 FRENCH 5

This unit has two components: a) An introduction to Business French. Students work on the skills necessary to the recruitment process; reading job offers, preparation of a CV and so on. b) The study of the French verbal system. Using a feature film on videodisc, students revise and expand their understanding of the French verb system. Skills are put into practice in the writing of a short story.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB673

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB674

**Campus offered:** GP **Semester:** 1

### ► HHB066 FRENCH 6

How do you argue in French? This course equips students to explain and debate issues, using written and video materials. Students prepare their own video report.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB674

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB675

**Campus offered:** GP **Semester:** 2

### ► HHB067 FRENCH 7

This advanced course in business French equips students for working in Europe or in French-speaking companies in Australia. Students have the option of sitting for the Certificat Pratique de Français Commercial et Economique.

**Courses:** BS56, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB675 (4 or better)

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB678

**Campus offered:** GP **Semester:** 1

### ► HHB068 FRENCH 8

This unit allows students to play with verbal and non-verbal aspects of French by studying puns; comic sketches; cartoons. Students write and present a short play at the end of the course.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF70, SC30, IF30, SS60

**Prerequisites:** HUB675

**Contact hours:** 2 per week **Credit points:** 12

**Incompatible with:** HUB677

**Campus offered:** GP **Semester:** 2

### ► HHB069 FRENCH 9

Advanced French unit available through cross-enrolment at the University of Queensland. See staff for details.

**Courses:** BS56, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB675

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB679

### ► HHB070 FRENCH 10

Practical introduction to French-English translation. Available through cross-enrolment in FH306 at the University of Queensland.

**Courses:** BS56, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB675

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB731

### ► HHB071 INDONESIA 1

This entry level unit aims to equip beginning students with elementary communicative competence in a variety of everyday situations. At the end of the year, students will have been exposed to around 2000 words and should be able to use most of the productive sentence patterns of Indonesian in comprehending and expressing information about basic needs in mostly familiar and predictable situations.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB650

**Campus offered:** GP **Semester:** 1

### ► HHB072 INDONESIA 2

This entry level unit aims to equip beginning students with elementary communicative competence in a variety of everyday situations. At the end of the year, students will have been exposed to around 2000 words and should be able to use most of the productive sentence patterns of Indonesian in comprehending and expressing information about basic needs in mostly familiar and predictable situations.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HHB071, HUB650 or equivalent

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB651

**Campus offered:** GP **Semester:** 2

### ► HHB073 INDONESIA 3

This level advances learners competence to intermediate level, with some analytical focus on sentence construction and word formation (the affix system). Authentic texts, especially reading materials, are increasingly used during this year, and by the end of the second semester, with the use of a dictionary, students can make good sense of straightforward Indonesian reading material from newspapers, books and magazines. An interview assignment each semester provides opportunities for interaction with native speakers.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB651, HHB072 or equivalent

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB652

**Campus offered:** GP **Semester:** 1

### ► HHB074 INDONESIA 4

This level advances learners competence to intermediate level, with some analytical focus on sentence construction and word formation (the affix system). Authentic texts, especially reading materials, are increasingly used during this year, and by the end of the second semester, with the use of a dictionary, students can make good

sense of straightforward Indonesian reading material from newspapers, books and magazines. An interview assignment each semester provides opportunities for interaction with native speakers.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB652, HHB073 or equivalent

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB653

**Campus offered:** GP **Semester:** 2

### ► HHB075 INDONESIA 5

At this level students view weekly audio-visual (tape-slide and video) programs produced in Indonesia for local consumption. Conversation, reading and writing classes reinforce and extend students ability to communicate on a range of everyday topics relevant to modern Indonesian society. Students give weekly classroom presentations in the language.

**Courses:** BS56, ED50, ED51, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB653, HH074 or equivalent

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB654

**Campus offered:** GP **Semester:** 1

### ► HHB076 INDONESIA 6

At this level students view weekly audio-visual (tape-slide and video) programs produced in Indonesia for local consumption. Conversation, reading and writing classes reinforce and extend students ability to communicate on a range of everyday topics relevant to modern Indonesian society. Students give weekly classroom presentations in the language.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB654, HHB075 or equivalent

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB655

**Campus offered:** GP **Semester:** 2

### ► HHB077 INDONESIA 7

At this level students are comfortable in using authentic Indonesian source materials dealing with a range of sophisticated and complex issues. Students have the opportunity to pursue in some depth topics of special interest and relevance to their individual vocational, career or research needs.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB655, HHB076 or equivalent

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB656

**Campus offered:** GP **Semester:** 1

### ► HHB078 INDONESIA 8

At this level students are comfortable in using authentic Indonesian source materials dealing with a range of sophisticated and complex issues. Students have the opportunity to pursue in some depth topics of special interest and relevance to their individual vocational, career or research needs.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Prerequisites:** HUB656, HHB077 or equivalent

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB657

**Campus offered:** GP **Semester:** 2

### ► HHB081 JAPANESE 1

Conversation and listening skills are developed using communicative methodology. Students study controlled natural language in authentic cultural settings using interactive videodisc programs. The hiragana and katakana scripts are taught from the outset and a total of 175 kanji are introduced.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB660

**Campus offered:** GP **Semester:** 1, 2

## UNIT SYNOPSES

### ► HHB082 JAPANESE 2

Conversation and listening skills are developed using communicative methodology. Students study controlled natural language in authentic cultural settings using interactive videodisc programs. The hiragana and katakana scripts are taught from the outset and a total of 175 kanji are introduced.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB660, HHB081 or equivalent  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB661  
**Campus offered:** GP **Semester:** 2, 3

### ► HHB083 JAPANESE 3

Begins with a review segment to consolidate skills of students as they merge from introductory units and school studies. Language skills are developed through a combination of communicative classroom activities and interactive videodisc based computer programs. 150 additional kanji are introduced and cultural aspects are integrated.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB661, HHB082, Year 12 Japanese or equivalent  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB662  
**Campus offered:** GP **Semester:** 1

### ► HHB084 JAPANESE 4

Students learn to express themselves on a variety of social and cultural topics. An additional 150 kanji are introduced and the use of computer programs are encouraged to reinforce kanji knowledge. Videodisc-based programs extend the ability to comprehend natural language in authentic cultural settings.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB662, HHB083  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB663  
**Campus offered:** GP **Semester:** 2

### ► HHB085 JAPANESE 5

The videodisc series is completed in this unit, incorporating the whole range of grammatical structures used in natural settings. More complex texts expose students to a variety of socio-cultural issues. A further 150 kanji are introduced and students are encouraged to consolidate their skills using the computer programs available.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB663 or HHB084  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB664  
**Campus offered:** GP **Semester:** 1

### ► HHB086 JAPANESE 6

A television drama series modified for classroom use will be the focus of listening and speaking activities in this unit. Reading/writing skills are extended and a further 150 kanji are introduced. Students are encouraged to consolidate their skills using the computer programs.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB664 or HHB085  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB665  
**Campus offered:** GP **Semester:** 2

### ► HHB087 JAPANESE 7

The focus of this unit is the media. Television news and documentary programs of social and cultural interest are made accessible through the use of an interactive CD-ROM. Reading/writing activities focus on newspaper articles. Students should be able to write 1000 kanji by the end of this unit.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB665 or HHB086

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HUB666

**Campus offered:** GP

**Semester:** 1

### ► HHB088 JAPANESE 8

Practical skills for use in a business or other work-related environment are developed. These include writing a CV and letter of application for a job using a Japanese word processor, making phone calls, going for an interview, understanding the structure of Japanese companies, using polite language and presenting a business plan in Japanese. Kanji knowledge is extended beyond 1000.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB666 or HHB087  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB667  
**Campus offered:** GP **Semester:** 2

### ► HHB091 GERMAN 1

In this introductory unit, students study authentic material using interactive videodisc technology and communicative class activities to equip them with basic communication skills for everyday use and for some workplace situations.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB735  
**Campus offered:** GP **Semester:** 1

### ► HHB092 GERMAN 2

In this introductory unit, students study authentic material using interactive videodisc technology and communicative class activities to equip them with basic communication skills for everyday use and for some workplace situations.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB735, HHB091 or equivalent  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB736  
**Campus offered:** GP **Semester:** 2

### ► HHB093 GERMAN 3

Consolidates speaking, listening, reading and writing skills using authentic video, interactive computer exercises, classroom communication activities, and written language and grammar assignments. Topics promote socio-cultural awareness and cover several areas of business and workplace language use.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB736 or HHB092  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB737  
**Campus offered:** GP **Semester:** 1

### ► HHB094 GERMAN 4

Central to this unit are videodiscs relating to the events of 1989 and their consequences for German society. There is an increasing emphasis on writing skills and the expansion of the social and linguistic skills necessary in a German-speaking workplace.

**Courses:** BS56, ED50, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB737, HHB093 or equivalent  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB738  
**Campus offered:** GP **Semester:** 2

### ► HHB095 GERMAN 5

Develops linguistic competence to a higher level through intensive study of syntax and vocabulary expansion exercises. More complex texts found in German work environments are analysed and students are introduced to German post-war cultural history through a variety of more demanding literary texts.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF70, IF30, SS60  
**Prerequisites:** HUB738, HHB094 or equivalent  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB739

**Campus offered:** GP

**Semester:** 1

### ► HHB096 GERMAN 6

Two streams: (1) Students expand their knowledge of German culture through legends, fairytales, songs and news broadcasts on interactive CD ROMS. (2) Study of German texts relating to business and the professions.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB739, HHB095 or equivalent  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB740  
**Campus offered:** GP **Semester:** 2

### ► HHB097 GERMAN 7

A survey of literary texts from Lessing to contemporary German writers forms a basis for grammatical stylistic and linguistic analysis and feature films are used to increase students' range of spoken registers and expression.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60  
**Prerequisites:** HUB740, HHB096 or equivalent  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB741  
**Campus offered:** GP **Semester:** 1

### ► HHB098 GERMAN 8

Students continue their journey in German literature but explore different genres. Computer and technology applications, tools and terminology increase competencies in this area.

**Courses:** BS56, ED50, ED51, HH01, HU20, HU22, IF36, IF39, IF70, SC30, IF30, IF43, IF70, IF81, IF82, IF30, IF86, SS60  
**Prerequisites:** HUB741, HHB097 or equivalent  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** HUB742  
**Campus offered:** GP **Semester:** 2

### ► HHB100 INTRODUCTION TO HUMAN SERVICES

This unit provides an introduction to human services and locates this within the broader context of the welfare state. It examines both the history, and global and national forces, which shape the current direction of welfare policy and the human service industry. The purpose of human service work and the various roles a human service worker may undertake or utilise will be explored. The unit challenges students to reflect on their own understandings of human services and human service work, and provides a foundation for detailed study in later years of the course.

**Courses:** HH02, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB110  
**Campus offered:** CA **Semester:** 1

### ► HHB101 THE WELFARE OF AUSTRALIANS

This unit provides a comprehensive demographic, political, social, economic, locational, indigenous and cultural portrait of Australia. It introduces concepts of power, class, authority, status, gender, race, location and culture and applies these to the Australian identity. The unit explores a number of topical social, economic and cultural issues. Students are encouraged to develop a critical analytical framework for the exploration of Australian society.

**Courses:** HH02  
**Contact hours:** 3 per week **Credit points:** 12

### ► HHB102 THE HUMAN CONDITION

This unit introduces students to a range of individual, familial and social conditions that impact on the lives and lifestyles of Australians. Attention is directed toward the impact of factors such as age, ability, gender, culture and class, and the identification and exploration of key processes in human growth and development. Students become informed about theories from a range of disciplines and develop a critical and reflective approach to understanding human development. By examining how societies define and respond to human need and adversity students develop a framework for examining the dynamic interaction of individual, interpersonal and social forces.

**Courses:** HH02

## UNIT SYNOPSES

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB121  
**Campus offered:** CC **Semester:** 2

► **HBB103 CONTEMPORARY SOCIAL AND COMMUNITY ISSUES**

This unit explores a number of contemporary social issues relating to social marginalisation and human disadvantage. It locates these issues in a theoretical and descriptive framework thus providing students with both knowledge and analytical skills that are necessary for the ongoing exploration of social issues. It explores the connection between forces at a macro level and human disadvantage and examines the value assumptions that sustain structural inequity. It encourages students to reflect on the implications of structural disadvantage for human service practice and the role of the human service worker as a participant in civil society.

**Courses:** HH02  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB122  
**Campus offered:** CC **Semester:** 2

► **HBB104 UNDERSTANDING SOCIETY: INTRO. TO SOCIOLOGY**

This unit introduces students to the way sociology approaches the understanding of the social world in general and Australian society in particular. The following important issues will be covered throughout the semester. Firstly, students will learn about the role and significance of sociology and sociological knowledge. The development of sociology and sociological knowledge will be outlined and students will learn about the major sociological themes and authors. Secondly, the importance and placement of sociology in the context of social science will be discussed. Thirdly, students will learn how to understand and utilize some of the central sociological concepts such as class/status, sex/gender, and race/ethnicity. It is essential that social science students have a good grasp of these concepts. Last but not least, the aim of this unit is to broaden your knowledge and to contribute to your skills as social scientists.

**Courses:** PU49, SS60, HH01, HU20, HU22, ED50, IF30, IF36, IF43, IF70, IF81, IF82, IF86  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HBB120  
**Campus offered:** CC **Semester:** 1

► **HBB105 INTERPRETING CHANGE**

As one of the core introductory units for the Society and Change major, Interpreting Change introduces you to ways of understanding the intersection of personal experience with social change. The unit will be organised around exercises that encourage you to place your personal experiences in the context of a bigger picture of societal, interpersonal and environmental change. The unit also introduces the conceptual analytical, information retrieval, problem-solving and communication skills that form the basis of the society and change major. The three themes in the society and change major are: Societies in Transition, Environment, Society and Change and The Individual and Society. This unit illustrates the key contributions made by these three aspects to an understanding of specific changes you have experienced.

**Courses:** HH01  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB146  
**Campus offered:** CA **Semester:** 2

► **HBB106 AUSTRALIAN SOCIETY AND CULTURE**

Historical, political, economic and cultural information about Australia and Australians; egalitarianism; religion, frontiers and rural Australia; the historical and future role of technology in Australia.

**Courses:** ED50, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF86, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB600  
**Campus offered:** CA **Semester:** 1

► **HBB107 WORLD REGIONS**

Overview of world regional geography. It highlights key themes in both physical and human geography within specific regions, such as hu-

man-environment interactions; resource management; natural hazards; population and culture; and economic development.

**Courses:** ED50, HH01, HU20, HU22, IF70, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB202  
**Campus offered:** CA **Semester:** 2

► **HBB108 AUSTRALIAN SOCIETY AND CULTURE FOR INTERNATIONAL STUDENTS**

This unit will provide students from overseas with experiences and knowledge that will enhance their understanding of contemporary Australian society. A number of social, cultural and political ideas, policies, and actions that have shaped the people of Australia will be studied.

**Courses:** All  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **HBB109 AUSTRALIAN HISTORICAL STUDIES**

Public access to history is increasing, but what is told about the past in books, plays, films, encyclopaedia, documentaries, museums, galleries and national celebrations is contested, uncertain, and controversial. Who should tell history, what should be told and what should be left out are hotly debated. History is no longer dominated by celebratory, chronological narratives. Multidisciplinary approaches, alternative viewpoints and a wide range of media are now used to project private, family, community and national myths and stories. Current Australian historical studies, research and teaching reflect these uncertainties.

**Courses:** HH01  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

► **HBB110 INTRODUCTION TO INTERNATIONAL AND GLOBAL STUDIES**

This unit introduces students to a range of important perspectives in understanding international and global social change. Students will identify trends in globalisation from historical and theoretical frameworks, analyse regional trends and issues, and investigate the workings of significant international organisations and operations. In this unit students will develop research and communication skills in print and electronic media.

**Courses:** HH01, HU20, HU22, SS60, IF30, IF36, IF43, IF70, IF81, IF82, IF86

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB221  
**Campus offered:** CA **Semester:** 1

► **HBB111 ISSUES IN INTERNATIONAL AND GLOBAL STUDIES**

The forces of internationalisation and globalisation represent a significant shift in the way people work, live and relate to each other in societies and cultures. To be 'globally literate' means to critically engage with the concepts and issues of contemporary social change. This unit provides students with opportunities to investigate and analyse these issues, their opportunities and their impacts and to develop skills in analysis, research and reporting, and online discussions.

**Courses:** HH01, HU20, HU22, SS60, IF30, IF36, IF43, IF70, IF81, IF82, IF86

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB222

► **HBB112 AUSTRALIAN POLITICS**

The political life of the Australian citizen; the democratic political traditions and institutional bases of Australian political life; the process by which political decisions get made at all levels of Australian politics.

**Courses:** HH01, HU20, HU22, IF36, ED50, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB694  
**Campus offered:** CA **Semester:** 2

► **HBB113 INTERPERSONAL COMMUNICATION**

Introduces skills and processes of interpersonal relating as modified by culture, gender and power. Microskills are developed including building rapport, reflective listening questioning to understand, facilitate and advocate for clients of human services. Interviewing skills and skills in group communication are highlighted. Collaborative models are emphasised and special application includes third party involvement in communication

**Courses:** HH02, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** PYB052, HSB052  
**Campus offered:** CA **Semester:** 2

► **HBB114 INTRODUCTION TO HUMAN RIGHTS AND ETHICS**

This unit locates human rights in a broad political, legal, social, cultural and economic context. The unit draws on a number of academic disciplines. It consistently connects academic considerations to contemporary international, regional and national human right events. Thus, students may examine human rights in particular countries, explore topics such as child soldiers and trafficking and investigate thematic issues concerning the human rights of women, children and indigenous peoples. Extensive use is made of the Internet and media. Assessment options allow students to present work in a variety of forms.

**Courses:** HH02  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB002  
**Campus offered:** CA **Semester:** 1, 2

► **HBB115 HUMAN IDENTITY AND CHANGE**

What it means to be human; ways human identities (for example cultural, sexual, professional) are created and transformed; issues of identity, morality and change confronting human units in their encounters with the demands of contemporary life.

**Courses:** HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB601  
**Campus offered:** CA **Semester:** 2

► **HBB116 APPLIED SKILLS AND SCHOLARSHIP**

This unit aims to introduce students to key aspects of important generic attributes which QUT graduates are expected to acquire across the period of their studies. The unit is organized into two broad sections: an initial six weeks module focussing upon a range of topics relating to both information literacy and technological literacy and a seven week module in which students apply these skills in a discipline specific context while also being introduced to important understandings about research techniques and academic literacy. The unit is assessed on a pass/fail basis.

**Courses:** HH01, HH02, HU22, IF43, IF30, IF70, IF81, IF82, IF86

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB000  
**Campus offered:** CA **Semester:** 1, 2

► **HBB117 INTRODUCTION TO SOCIAL RESEARCH METHODS**

Part of human service work involves the capacity to analyse, critique, and understand the logic and relationship to practice of research findings. The emphasis of the unit is on becoming a good consumer of research through the adoption of a critical approach to the reading and utilisation of research. This unit is also designed to develop basic research skills and to prepare students for post-graduate research. Social scientific knowledge, its uses and ethical implications in the human service context; research designs and methodologies, data collection techniques are discussed.

**Courses:** HH02, HH01, HU22, SS60, IF43, IF70, IF81, IF82, IF86, IF30  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB222

► **HBB120 ETHICS, LAW AND HEALTH CARE**

Nursing practice involves making decisions with and for others which necessarily involve making evaluations of what is in the best interest of others, what are nurses' obligations to others and what will best protect or enhance their well-being. Hence, decision-making in nursing practice is bounded by normative considerations and these normative considerations fall into two groups: those constituted by the law and those constituted by ethics. This unit has been designed to provide for nursing students and practitioners an opportunity to develop a reflective understanding of the place of law and ethics in nursing and a professional awareness of current legal statutes and ethical discussions as they apply to nursing practice.

**Courses:** NS40, NS48, HH01, HH03  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB009  
**Campus offered:** KG **Semester:** 2

► **HBB121 INTERPRETING THE PAST**

Examines how the History discipline deals with the past, including questions of evidence and interpretation. Investigates from a critical perspective the status and value of historical knowledge, its construction, dissemination and meaning.

**Courses:** ED50, HH01, HU20, HU22, HU21, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB649  
**Campus offered:** CA **Semester:** 1

► **HBB122 COLONIALISM AND INDEPENDENCE IN ASIA PACIFIC**

General introduction to the history and geography of the Asia-Pacific region with a focus on the impacts of western imperialism, nationalism and economic modernisation. The unit will also consider issues of population, the environment and urbanisation.

**Courses:** ED50, ED51, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB610  
**Campus offered:** CA **Semester:** 2

► **HBB200 WORKING IN HUMAN SERVICE ORGANISATIONS**

Service quality and the organisational dimension; industrialisation and development of human service work organisations; power based and empowering organisational paradigms; organisational cultures and gender; personal skills for human service workers including career, time and stress management; interpersonal skills for working collaboratively and resolving disagreement.

**Courses:** HH02, HH07  
**Prerequisites:** HSB110, HSB120  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB211  
**Campus offered:** CA **Semester:** 2

► **HBB201 INITIAL PROFESSIONAL PRACTICE**

Only enrolled Bachelor of Social Science (Human Services) students can undertake this unit. It provides students with an orientation to the human services industry and the organisational context of practice. A broad range of practice methods and approaches is introduced. Students undertake 200 hours of professional training consisting of an on-the-job, vocationally based experience supervised by an experienced practitioner. Attendance at seven university seminars is also required. The student and their agency supervisor devise an individual learning plan and work performance is assessed on six core competencies. Students assess their own suitability for the different types of human services practice.

**Courses:** HH02, HH07  
**Credit points:** 24 **Incompatible with:** HSB201  
**Campus offered:** CA **Semester:** 1

► **HBB203 AGED SERVICES: INTRODUCTION**

This unit focuses specifically on human service work with older adults. It introduces the developmental, social and cultural environment which impact on ageing, including aspects of intelligence, memory and learning and perspectives of work and retirement. In addition, the home environment and living with change, relations with family members and dealing with loss and grief are discussed.

**Courses:** HH02, HH07, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB213  
**Campus offered:** CA **Semester:** 1

► **HBB204 CHILD AND FAMILY SERVICES: INTRODUCTION**

This unit introduces students to child and family welfare studies and focuses on approaches to supporting families and promoting change. Students gain an overview of issues facing contemporary families that contribute to adversity and examine responses to the welfare needs of children and families, including indigenous families. Students examine characterisations of successful family relationships and causes and effects of domestic violence and child maltreatment. Principles and practices for working with families are discussed with an emphasis on rationales for and strategies associated with family-centred and empowering approaches. Dilemmas associated with working with children and families facing adversity are examined.

**Courses:** HH02, HS07, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB214  
**Campus offered:** CA **Semester:** 1

► **HBB205 CORRECTIVE SERVICES: INTRODUCTION**

Introduces students to the development and function of corrective services within the Australian criminal justice system. Examining the history and changing role and functions of prisons, and the emergence of community corrections, the unit assists students in understanding social and philosophical underpinnings about the purpose and function of prisons and community corrections. The unit also examines theories of deviance, and types of offenders.

**Courses:** HH02, HS07, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB215  
**Campus offered:** CA **Semester:** 1

► **HBB206 DISABILITY SERVICES: INTRODUCTION**

This unit links social justice, human rights and empowerment philosophies underpinning courses in the School. It examines the implications of these broad principles in the lives of people with disabilities. The unit explores the theoretical, social and political frameworks for analysing and understanding disability, the principles underpinning current service provision and their impact on the lives of people with disabilities using the service. Also explored are the cultural values and assumptions about disability, and the processes by which these values are translated into human service activity. Finally, the unit examines individual program planning and skill development practices.

**Courses:** HH02, HS07, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB216  
**Campus offered:** CA **Semester:** 1

► **HBB207 SERVICES TO YOUNG PEOPLE: INTRODUCTION**

This unit provides an introduction to human services practice with young people. It gives students an overview from both theoretical and operational perspectives. The various theoretical and popular understandings about 'youth' or 'adolescence' which condition human services provision to young people will be critically explored. Diversity and marginalisation amongst young people in relation to socio-economic status, gender, race and ethnicity, disability, sexual identity, and geographic location will be examined. The unit then briefly overviews contemporary policies, services, and practice

frameworks oriented to young people in respect of family, health, juvenile justice, accommodation, recreation/cultural life, housing, secondary education, vocational training and the labour market.

**Courses:** HH02, HS07, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB217  
**Campus offered:** CA **Semester:** 1

► **HBB210 INDIGENOUS AUSTRALIA: COUNTRY, KIN AND CULTURE**

This unit will build upon student's prior study of life in Indigenous communities. It aims to expand understanding of issues of importance to Indigenous people and to relate those issues to the practices in human service agencies. The Oodgeroo staff and leaders from the Indigenous community will work with staff from the School of Human Services in presenting this unit. Though no prerequisite unit is required it is strongly recommended that students undertake an introductory unit such as HUB703.

**Courses:** HH01, HS07  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB233  
**Campus offered:** CA **Semester:** 1

► **HBB211 CASEWORK AND CASE MANAGEMENT**

Casework and case management are the predominant human services practice methods and involve a range of processes and skills to ensure that service outcomes are effective and efficient. This unit compares and contrasts casework and case management strategies and approaches across a variety of practice contexts and scenarios. Students explore and analyse primary skills, tasks and roles including assessment, referral, brokering, review, advocacy, record keeping and workload management. Key learning strategies include problem based learning and the review, design and modification of a case management system for a particular practice context. Assessment is a scenario based exam and project paper.

**Courses:** HH02, HS07  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB230  
**Campus offered:** CA **Semester:** 2

► **HBB212 COMMUNITY WORK**

Community work as a distinct intervention skill is defined. The background to community work in Australia. Models of community work are introduced and analysed. Basic skills and techniques are developed: entering a community; building community involvement; developing community action; managing common problems.

**Courses:** HH02, HS07  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB320  
**Campus offered:** CA **Semester:** 1

► **HBB213 SOCIAL POLICY PROCESSES**

Conceptualising economic, structural change in Australia: understanding emergent ideas about state and society; identifying and contrasting alternative social policies and strategies. The major debates in Social Policy will be explored. Analyses of Australia's response and the impact on redistribution in the Welfare State. Current analyses of health, housing, income security, immigration and family policies at federal, state and local government level.

**Courses:** HH02, HS07  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB231  
**Campus offered:** CA **Semester:** 2

► **HBB214 GROUP PRACTICE AND TEAM PROCESSES**

A significant methodology used in human service work involves facilitating, supporting or consulting with various groups of people. This unit focuses on the development of skills to utilise this type of intervention appropriately. The unit aims to provide a basic understanding of the various uses to which group processes may be applied. Group work is located as an intervention process within the human service arena as distinguished from other processes at individual, community and societal level.

**Courses:** HH02, HS07  
**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HSB232

**Campus offered:** CA, CC **Semester:** 2, 3

► **HBB215 CRISIS AND CONFLICT RESOLUTION**

This unit identifies the physiological, psychological and social impacts of human crises and interpersonal conflict. It further aims to provide students with an understanding of such crises on individuals, social units and communities, and to prepare students for professional roles involving responses to crises services. It assists students to develop specific intervention skills for professional practice in a variety of settings requiring crisis intervention, family mediation, dispute resolution, grievance hearings, and critical incident debriefing skills.

**Courses:** HH02, HS07

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HSB234

**Campus offered:** CA **Semester:** 1

► **HBB216 THE HUMAN DIMENSIONS OF SPACE**

This unit is a component of the Community Studies major and will cover the role of space in contemporary societies; key types of spaces and patterns in their usage; spaces as sites for cultural and symbolic expression; understanding the way inequality can and is reproduced through the configuration and management of space; understanding of the way particular public spaces are used and experienced by particular sections of the community eg young people; key issues in public space configuration, management and policy eg enhancing social inclusion, safety and security, links between the economic and social, new urbanism; emerging theory and ideas about good practice in the development or reconfiguration of public and community accessed public spaces to achieve improved community outcomes.

**Courses:** HH01

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HSB235

**Campus offered:** CA **Semester:** 2

► **HBB220 INTERVENTION THEORIES AND METHODS**

Sound human services practice involves the assessment of complex social and client issues and the application of relevant theories and practice frameworks to implement effective change strategies and processes. In this unit students apply and integrate theory with practice realities and dilemmas. Problem based learning is a major feature along with exploration and analysis of relevant theoretical perspectives and models. Students are assisted toward the development of their initial framework for human services practice. The influences of ideologies, values, ethics, cultural diversity and practice contexts upon service delivery options are explored. Assessment includes an oral presentation and two exams.

**Courses:** HH02, HS07

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** HSB218

**Campus offered:** CA **Semester:** 1

► **HBB221 INTERVENTION PROCESSES AND ETHICS**

This unit focuses on knowledge and skills for human services practice. Its particular focus is enabling students to apply core human services processes (such as engagement, assessment, intervention, case management, closure), and to develop skills in considering the ethical and cultural dimensions of human service practice. Critical examination of these will further assist students in the ongoing development of their own practice framework especially in respect of the dynamic interplay between personal and professional influences. The unit plays an important role in preparing students to undertake their Professional Practice Placement in third year.

**Courses:** HH02, HS07

**Prerequisites:** HSB218

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HSB228

**Campus offered:** CA **Semester:** 2

► **HBB221 INTERVENTION PROCESSES AND ETHICS**

This unit focuses on knowledge and skills for human services practice. Its particular focus is enabling students to apply core human services processes (such as engagement, assessment, intervention, case management, closure), and to develop skills in considering the ethical and cultural dimensions of human service practice. Critical examination of these will further assist students in the ongoing development of their own practice framework especially in respect of the dynamic interplay between personal and professional influences. The unit plays an important role in preparing students to undertake their Professional Practice Placement in third year.

**Courses:** HH02, HS07

**Prerequisites:** HSB218

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HSB228

► **HBB222 HUMAN SERVICE PRACTICE: LEGAL DIMENSION**

This unit focuses on the connection between the law, judicial and legal systems, and human service practice. It provides a detailed description of the legal, criminal and judicial systems and processes in Australia and Queensland. It includes a critical analysis of the relationship between the law and justice exploring the notion of law as a social construct reflecting differentials in power. Throughout, an emphasis is placed on those aspects of law and legal processes that have particular application for human services and human service practice.

**Courses:** HH02, HS07

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HSB 229

**Campus offered:** CA **Semester:** 2

► **HBB224 QUALITATIVE RESEARCH METHODS**

Introduces students to the logic/s, techniques and contributions of qualitative methods. First, it focuses on the processes and logics involved in qualitative research, paying particular attention to theory construction, the inductive method and issues of reliability and validity. The unit looks at these processes with respect to the contribution and logic of the qualitative case study. Students will then acquire both conceptual and hands on skills in the application of a number of qualitative research techniques. These include ethnography and observational methods, accessing documents through internet search techniques and some approaches to analysing them, the analysis of spoken interaction through conversation analysis and Goffman's concept of footing, and techniques for conducting and analysing qualitative interviews.

**Courses:** HH01, PY07, SS60, HU20, HU22,

IF30, IF36, IF43, IF70, IF81, IF82, IF86, ED50

**Prerequisites:** SSB969 or HUB133

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB140

**Campus offered:** CA **Semester:** 2

► **HBB225 POLITICAL SOCIOLOGY**

This unit examines a variety of sociological themes which might broadly be termed political. Central to the unit will be an examination of sociological conceptions of power. Typically, sociologists have examined power in connection with the state; power has frequently been regarded as flowing from the state. We shall examine these debates, and move on to recent theorisations which have begun to detach power from the state. We shall take some case studies to make these distinctions clearer, including the construction of an Australian administrative elite, the notion of police in seventeenth and eighteenth century Europe, and the compulsory education as the sphere of the reproduction of social relationships.

**Courses:** HH01, HH03, HU22, SS60, HU20,

IF30, IF36, IF70, IF81, IF82, IF86

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB134

► **HBB226 CONSUMING CULTURES**

Consumption is usually understood in economic terms as the 'flip-side' to production. However, the act of consuming can also be considered as a

practice which has particular cultural/social connotations. Additionally, while the social relations of consumption and the way in which consuming practices are read culturally are often understood in local or community terms, much contemporary debate centres on the implications of globalisation in the (re)formulation of cultures and cultural values. For example, does globalisation and its associated mass production of goods and services imply increasingly homogenised consumer cultures or are there other processes at work which act to challenge or unsettle such homogenising tendencies? Are the forces of globalisation more unstable and diverse than previously imagined? Might globalised digital networks act to refashion consumer cultures in more ecologically sustainable ways? How are the new global virtual consumer cultures to be understood? This unit explores some of these issues.

**Courses:** HH01, HU22, SS60, IF43, IF30, IF70,

IF81, IF82, IF86

**Contact hours:** 3 per week **Credit points:** 12

► **HBB227 ENVIRONMENT AND SOCIETY**

A geographical, systems approach to investigations of the natural and social environments, and human-environmental interactions. The emphasis is on explaining spatial patterns and variability in social and natural landscapes through the understanding of physical, social and cultural processes and systems at regional and local spatial scales. Through practical sessions, the acquisition of basic geographical field and mapping skills is fostered.

**Courses:** ED50, HH01, HU20, HU22, IF36,

IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30,

SS60

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB201

**Campus offered:** CA **Semester:** 1

► **HBB228 ENVIRONMENTAL HAZARDS**

The nature of hazard, risk and disaster; origins of hazards; nature of disaster; influences on the perception of risk; disaster prediction, preparation, response and recovery strategies.

**Courses:** ED50, HH01, HU20, HU22, IF70,

IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86,

IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB207

**Campus offered:** CA **Semester:** 2

► **HBB229 WINDOWS ON JAPAN**

The focus of this unit is contemporary Japan and Japanese people. Topics include a geographical overview of Japan, its natural resources and population; contemporary political, social and environmental change; Japan's role in the Asia Pacific region.

**Courses:** ED50, HH01, HU20, HU22, IF36,

IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30,

SS60

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB220

► **HBB230 POLITICAL BEHAVIOUR**

Topics covered include political socialisation and party identification, political culture and ideology, old and new political values, support for minor political parties, political campaigns and political issues, party leaders and local candidates, connections between elite and mass political behaviour and political participation.

**Courses:** SS60, HH01, HU22, HU20, IF30,

IF36, IF43, IF70, IF81, IF82, IF86

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB126

► **HBB231 HEALTH, SOCIETY AND ENVIRONMENT**

Provides sociological analysis of the health care models and institutions, healing relationships (between patients, nurses and doctors), theories of disease causation, and relationships in illness situations and illness behaviours. Covers sociology of the body including exploration of the experience of illness and professional practice from the patient's perspectives. Influence of gender, age, ethnicity, social class and disability in their experience. Importance of social and cultural approach to environmental health issues.

## UNIT SYNOPSES

**Courses:** SS07, HH01, HU20, HU22, SS60, NS40, NS48, IF30, IF36, IF70, IF81, IF82, IF86  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB127  
**Campus offered:** CA **Semester:** 1

### ► HHB232 SURVEY METHODS

Introduces students to the principles and procedures of survey research using a practical, applied approach stressing the uses of survey research for investigating a range of different social problems and social science questions. It covers the fundamentals of designing and conducting surveys and then introduces students to the basics of how to analyse survey data once they have been collected. No prior knowledge of or experience with survey research or statistics is assumed.

**Courses:** SS07, SS60, HH01, HU20, HU22, IF30, IF36, IF43, IF70, IF81, IF82, IF86  
**Prerequisites:** HUB120, HHB104 or SSB000  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB130  
**Campus offered:** CA **Semester:** 1

### ► HHB233 SEX, GENDER AND SOCIETY

Focuses on the history of feminist thought and contemporary perspectives with reference to issues of sociological inquiry. It examines the significance of perspectives from critical theory, structuralism, post-structuralism and action approaches in the development of feminist theory. The implications of feminist perspectives for research strategies will be considered with reference to feminist philosophers of science and metatheorists such as Sandra Harding and Dorothy Smith.

**Courses:** SS07, SS60, HH01, HU22, HU20, IF30, IF36, IF43, IF70, IF81, IF82, IF86  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB131  
**Campus offered:** CA **Semester:** 1

### ► HHB234 SOCIOLOGICAL THEORY

Examines the relationship between sociological theories and sociological analysis. It covers a range of theoretical approaches and looks at their application in specific case studies. Students are encouraged to see the social world as an explorable milieu which can be approached from a variety of research strategies. The range of topics will be explored in relation to theories of classical sociological authors such as Karl Marx, Georg Simmel, Max Weber and Emile Durkham, as well as many contemporary authors.

**Courses:** SS07, HH01, HU20, HU22, SS60, IF30, IF36, IF43, IF70, IF81, IF82, IF86  
**Prerequisites:** HUB120 or HHB104  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB133  
**Campus offered:** CA **Semester:** 1

### ► HHB235 IDENTITIES: THE BODY, TECHNOLOGY & CYBERSPACE

The question of social identities emerging in late modernity represents one of the most crucial aspects of contemporary social theorising and development. Students will gain insight into the contemporary debates on identity, covering a range of topics such as: loss of tradition, identity politics and identity representation.

**Courses:** HH01, HH03, IF70, IF36, IF82, IF84, IF43  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CC

### ► HHB236 VIRGINS, SAINTS AND SINNERS: SOCIOLOGY OF RELIGION

This unit explores the role which religions and various forms of spirituality play in contemporary social processes. It will discuss how religious movements are gaining instead of losing social significance (eg. religious fundamentalisms) and explain why and how they are diversifying. Students will be given insights into a variety of themes, including new religious movements, civil religion, sex and Christianity, the ideas of sin, apocalypse, and many more. Religious phenomena will be explored in a manner sensitive to believers but also in a critical, relativist and value-neutral fashion.

**Courses:** HH01, HU20, HU22, SS60, IF36, IF43, IF70, IF30, IF81, IF82, IF86  
**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB145

**Campus offered:** CA **Semester:** 1

### ► HHB237 BRISBANE IN THE TWENTIETH CENTURY

A study of local history often serves to highlight in a more immediate way, trends which are apparent at the national and international level. This unit focuses on key turning points in the history of Brisbane. It examines sources for and approaches to the study of the history of Brisbane and district and then applies these ideas to selected case studies.

**Courses:** HH01, HH03  
**Credit points:** 12  
**Campus offered:** CC **Semester:** 3

### ► HHB238 ASIAN CULTURES AND SOCIETIES

This is an introductory survey of Asian societies and cultures. It presents the diverse array of cultures, languages and peoples that comprise the many identities of the Asia Pacific region. It aims to introduce students to the environment, the cultures, and the societies of the Asia Pacific at the current time. Focus will be placed on the nature of economic and political development in the region and the costs and benefits of that experience.

**Courses:** HH01, IF43, IF70, IF30, IF81, IF82, IF86  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB331

### ► HHB239 KOREAN CULTURE AND SOCIETIES

Korea has important trading, historical and cultural links with Australia. In this introductory unit on Korea, students will examine the histories, culture and societies of South and North Korea, with foundations in pre-modern history and the philosophies of shamanism, Taoism, Buddhism and Confucianism. The unit will examine the experiences in Korea of colonialism, communism and modernization. Students will critically evaluate contemporary politics, society and social relations in Korea, the impacts of globalisation and Korea's place in regional and world affairs.

**Courses:** HH01, HU20, HU22, SS60, IF36, IF43, IF70, IF81, IF82, IF86, IF30  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB332

### ► HHB240 SOCIOLOGY OF CRIME AND DEVIANCE

Crime, justice and deviance are central features of our social and political lives. A sociological approach to the study of crime and deviance takes it for granted that social values, processes and institutions shape the form and the content of crime and deviance. Students will learn about the causes of crime and deviance, and the unit will give students some of the theoretical and methodological skills necessary to collect, interpret and evaluate information about crime and deviance. While this unit is offered as an elective in the sociology major, it deals with one of the core concerns in sociology. It is extremely useful for students for a variety of career options (policing, corrections, social policy, private security, etc). It is intended to be a relevant unit for students studying in other Humanities and Social Science majors, especially Politics, Applied Ethics, Gender Studies, Human Services and Psychology.

**Courses:** HU20, HU22, HH01, SS60, HH03, IF43, IF36, IF30, IF81, IF82, IF86  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB150

### ► HHB241 GENDER AND GLOBALISATION

This unit challenges existing notions of development. It evaluates current models of development and aid in terms of their implications for women. It suggests that real development for women and their dependents requires a woman-centred approach: one that acknowledges the needs and desires of the women involved and utilises the existing skills and networks of women themselves.

**Courses:** HH01, HH03  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CC **Semester:** 1

### ► HHB242 PACIFIC CULTURE CONTACT

Key concepts including mobility, religion, morality, leadership, civilisations, society, change and continuity; develops an appreciation of culture and sensitivity towards cultural heritage; case studies and comparative analysis focus on the people of the Pacific at the time of initial European contact.

**Courses:** HH01, HH03, ED50, IF36, IF43, IF70, IF81, IF82, IF86  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CC **Semester:** 2

### ► HHB243 THE PACIFIC SINCE 1945

This unit examines national identity and nationhood in the context of contemporary events in the Pacific Islands, including indigenous and external attempts to create a regional identity. The major themes are cultural transformation, the invention of tradition, neo-colonialism, sovereignty and independence. Through an overview of the events that are important in the lives of Pacific Island people, the unit will present key concepts including mobility, adaptation, change, tradition, continuity, conflict and independence.

**Courses:** HH01, HH03  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CC

### ► HHB244 SOUTH-EAST ASIA IN FOCUS

Australia's interaction with South-East Asia, including our most populous nearest neighbour, Indonesia, has increased dramatically over the last fifty years. This unit examines aspects of South-East Asian geography, environment, society and culture in a contemporary framework.

**Courses:** HH01, HH03  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CC **Semester:** 1

### ► HHB245 AUSTRALIA AND THE SOUTH PACIFIC

Critical analysis of the history of Australian bilateral and multilateral links with the Pacific islands region, including Pacific frontier theory, sub-imperialism, colonial rule and contemporary dialogue over aid, trade, regionalism, defence, cultural exchange and migration.

**Courses:** HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF86, SS60  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB627

### ► HHB246 MODERN CHINA

A historical survey of China during the nineteenth and twentieth centuries. The primary focus will be on the decline of the traditional Chinese state and the impact of foreign imperialism. Stress is placed on the growth of nationalism and the Chinese revolution. The modernisation of Chinese culture, the position of women and the forces which have brought China to resume its place as the major Asian force will be studied.

**Courses:** HH01, HH03  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CC **Semester:** 1

### ► HHB248 THE USA AND THE ASIA PACIFIC REGION

Despite claims that it was not a colonial/imperial power, the USA had extensive territories - Hawaii, Philippines, Samoa, Micronesia - and historically was active in China, Vietnam, Korea, Taiwan and was the occupation force in post-war Japan. How did the USA acquire this interest in the Asia-Pacific, how was it administered and why did the USA withdraw? How did Asia-Pacific peoples react to USA control? What role did Asia play in the USA's concept of their Manifest Destiny, the Open Door policy, the Nixon Doctrine and the Cold War? How is the USA situated now in Asia-Pacific? This unit addresses these questions from a global, regional and historical perspective.

**Courses:** HH01, HU22, SS60, IF30, IF43, IF70, IF81, IF82, IF86  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► HHB249 SOCIAL MOVEMENTS IN AUSTRALIA

New social movements in Australia since the 1960s; includes green, women's, peace, indige-

## UNIT SYNOPSES

nous and Third World development movements; comparison with overseas and old social movements.

**Courses:** ED50, HH01, HU20, HU22, SS13, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF70, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB682

### ▶ HHB250 AUSTRALIAN GEOGRAPHICAL STUDIES

The unit systematically describes and explains the geography of Australia by analysing the distinctive spatial patterns and processes that constitute the Australian landscape. Topics include: the state of the environment, land-use patterns, the rural crisis, settlements and cities, population and societal change, and economic/regional development. Emphasis is on contemporary, issue-based themes.

**Courses:** ED50, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB683  
**Campus offered:** CA **Semester:** 1

### ▶ HHB251 AUSTRALIAN RESOURCE MANAGEMENT

Describes the principles of Ecologically Sustainable Development and environmental resource management and outlines their practical applications to environmental planning, development and conservation issues in Australia. Institutional, political, social, economic and technological processes affecting environmental resource management are critically discussed with examples drawn from contemporary Australian experiences.

**Courses:** ED50, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB685

### ▶ HHB253 CONSPIRACY AND DISSENT IN AUSTRALIAN HISTORY

Case studies reflect conspiracies as well as protest movements in nineteenth and twentieth century Australia; includes nineteenth century land grab conspiracies; Aboriginal resistance; the Petrov affair; the 1975 Dismissal and the Hilton bombing.

**Courses:** ED50, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB692  
**Campus offered:** CA **Semester:** 2

### ▶ HHB254 INDIGENOUS AUSTRALIAN CULTURE STUDIES

An appreciation of the two distinct indigenous cultures of Australia; how external forces to Aboriginal and Torres Strait Islander cultures caused social, economic and political changes; traditional family life and organisation.

**Courses:** ED50, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB700  
**Campus offered:** CA **Semester:** 1

### ▶ HHB255 INDIGENOUS POLITICS AND POLITICAL CULTURE

Examines issues and influences underlying the world of indigenous politics: political representation; land rights; health; education; community development; criminal justice; culture and heritage. An Australian focus with New Zealand and North American comparisons.

**Courses:** ED50, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB703  
**Campus offered:** CA **Semester:** 2

### ▶ HHB256 EUROPE SINCE 1945

Uses historical and literary perspectives to highlight major themes in the development of European society and culture since 1945.

**Courses:** ED50, HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB720

### ▶ HHB257 THE CLASSICAL WORLD

The emergence and development of European society from earliest times to 500 AD; it examines the major political, social and economic trends in classical Greek and Roman society.

**Courses:** HH01, HH03, ED50, IF70, IF81, IF82, IF43, IF86

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CC **Semester:** 2

### ▶ HHB258 FOUNDATIONS OF MODERN EUROPE

The formation of modern Europe from the late Middle Ages to the end of the eighteenth century; the emergence of secularism and the rise of the nation states.

**Courses:** HH01, HH03  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CC **Semester:** 2

### ▶ HHB259 WAR AND REVOLUTION IN EUROPE 1914-1945

Examines political, social, economic and intellectual developments in Europe from 1914-1945.

**Courses:** HH01, HU22, HU20, IF30, IF43, IF70, IF81, IF82, IF86, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB723

### ▶ HHB260 NATIONS AND NATIONALISM IN MODERN EUROPE

This unit selectively examines political, social, economic and intellectual developments in modern Europe from the French Revolution to the era before the Great War of 1914-18.

**Courses:** HH01, HU22, HU20, IF43, IF30, IF70, IF81, IF82, IF86, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB743

### ▶ HHB261 MEDIEVAL EUROPE

The Middle Ages constitute a crucial period in the formation of a European identity. The breakdown of the Roman world saw the gradual emergence of a Christian civilisation of striking originality. At the same time, it gave rise to political fragmentation, as well as to the national characteristics and antagonisms which are still part of the European scene today.

**Courses:** HH01, HH03, ED50, IF70  
**Contact hours:** 12  
**Campus offered:** CC **Semester:** 1

### ▶ HHB262 POLITICAL IDEOLOGIES

The political spectrum of the traditional Left-Right-Centre ideologies including Fascism; Conservatism; Liberalism; Socialism; Communism; Anarchism are discussed, along with cross-spectrum ideologies such as Feminism; Imperialism; Racism; Environmentalism. The course concludes with reference to post-modernist politics and its implications for the traditional ideological spectrum.

**Courses:** HH01, HU20, HU22, IF36, ED50, IF30, IF70, IF43, IF81, IF82, IF86, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB772

### ▶ HHB263 POLITICS OF GLOBALISATION

Political economy of production; form of economic calculation and theories of value, profit and interest; ownership and control of production in market and non-market situations.

**Courses:** HH01, HU20, HU22, IF36, ED50, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB802

### ▶ HHB264 PUBLIC AND PROFESSIONAL ETHICS

Discusses the ethical dimensions of public and professional life; the ethical rights and responsibilities of the individual citizen and the state within a liberal democracy; the ethical responsibilities of institutional and professional agencies and the roles and ethical responsibilities of individual citizens in such agencies.

**Courses:** HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB751

### ▶ HHB265 THE JUST SOCIETY

Explores the notions of justice and concepts such as equity, justice and concepts such as equity in various ethical and political traditions are applied to recent policy debates about affirmative action, the criminal justice system, political practice, health and the environment.

**Courses:** HH01, HU20, HU22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB752

### ▶ HHB266 ETHICAL DECISION MAKING

Examines the ways in which various decision-making practices can be normally grounded; the practical value of such procedures for human transformation and emancipation; the ways in which decision-making practices either sustain or subvert moral communities.

**Courses:** HH01, HU20, HU22, IF36, IF39, IF43, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB753

### ▶ HHB267 FEMINISM AND ETHICS

Discusses the impact of the feminist movement on ethical and political theory; what does it mean to say the differences between men and women are natural or socially cultivated? What are the normative implications of these differences? What counts as equality between the sexes? Do women think differently about ethical situations than men?

**Courses:** HH01, HU20, HU22, IF36, IF43, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB754

### ▶ HHB268 VULNERABLE IDENTITIES

Considers vulnerability and the experiences of persons who are vulnerable due to exploitation, abandonment, confusion or suffering and other unethical practices; ways of relating with the vulnerable; students develop a richer appreciation of others as well as themselves.

**Courses:** HH01, HU20, HU22, IF36, IF43, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB755

### ▶ HHB269 ETHICS, TECHNOLOGY AND THE ENVIRONMENT

Examines how decisions about new technologies and the environment are based not solely on factual evidence but also on ethical judgements; ethical aspects of issues such as genetic engineering, free-riding problems with 'caring for' the environment, human obligations toward non-human animals, whether wilderness areas have value independent of their value to humans, and whether a proper concern for the environment requires a new 'environment or ecological ethic'.

**Courses:** HH01, HU20, HU22, IF36, IF43, IF81, IF82, IF83, IF84, IF86, IF30, SS60

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB757

### ▶ HHB270 GENE TECHNOLOGY AND ETHICS

Gene technology is poised to revolutionise science, technology, the practice of medicine, and the global economy. Social and public policies must keep up with the science and with public sentiments. Ethical inquiry must identify acceptable rules of public conduct. Processes are called for to balance the vastly divergent perspectives and interests. The introductory unit mirrors the interdisciplinary nature of gene technology and is open to students from all faculties. The unit will discuss the nature of ethics and gene technology. It will present select topics of relevance to medical genetics, the environment and the biotechnology industry. Finally, it will discuss Federal and State Government Policy and Strategy.

**Courses:** All courses  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB831

► **HHB271 ETHICAL THEORY**

Students will be exposed to some of the most common approaches to ethical theorising, including deontology, utilitarianism, egoism and virtue theory. These theories will be introduced via both historical and contemporary proponents. Students will also be made aware of how these broad categories are related to a range of standard theories about political theorising, such as contractarian liberalism or the utilitarianism implicit in much welfare state theorising or economic theorising about justice. Furthermore, students will be familiarised with some of the standard positions regarding the question of objectivity in ethics, versus moral or cultural relativism about ethical questions. Finally, some standard criticisms of the whole idea of theorising about ethics will be introduced.

**Courses:** HH01, HH03, IF70, IF81, IF82, IF30, IF43  
**Contact hours:** 3 per week **Credit points:** 12  
**Semester:** 1

► **HHB272 COMPOSING IDENTITIES: THE ARTISTRY OF LIVING**

This unit provides an opportunity to examine the practices of accounting for and constituting who we are - our identities. It examines the inseparability between composing our lives and living our lives, between artistry and identity, and considers the significance of this fusion for our, and others, well-being. The artistry of living is a practical endeavour which is often practiced through writing, especially autobiographical or 'self-life-writing'. The unit, therefore, considers the relationship between autobiography and identity and the different forms of living that emerge from these practices. Self-life artists' works/compositions to be considered include Socrates, Augustine, Montaigne, Simone de Beauvoir, Michel Foucault and 20th century Egyptian women writers Nawal al-Sa'dawi and Latifa al-Zayyat.

**Courses:** HH01, HH03, IF70, IF81, IF82, IF30, IF43, IF86  
**Contact hours:** 3 per week **Credit points:** 12  
**Semester:** 1

► **HHB273 RESHAPING LIFE AND DEATH**

The unit will cover the following areas: new technologies of birthing including the medicalisation of birth, pre-natal screening, and artificial reproductive technologies; the human genome project, emerging possibilities, health and social implications; the technologies of life support, the definition of death, issues of organ cultivation; cultural and ideological features of the new 'life' technologies.

**Courses:** HH01, HH03, IF70, IF81, IF82, IF30, IF43, IF86  
**Contact hours:** 3 per week **Credit points:** 12  
**Semester:** 1

► **HHB274 HUMAN RIGHTS: INTERNATIONAL AND REGIONAL ACTIVISM**

This unit encourages students to consider the transformative nature of human rights activism at the international and regional level. It examines the international human rights system giving particular attention to the social, political, gender and cultural dimensions of the development of international and regional human rights norms. It critically reviews the effectiveness of the international and regional human rights system in the protection, promotion and realization of civil, political, economic, social, cultural and development rights. Academic deliberations are located in a number of concrete human rights issues and situations. The unit places significant emphasis on the development of analytical capacities and interventionist skills essential for those engaged in human rights activism at the international and regional level. Extensive use is made of the internet and media. Assessment options allow students to present work in a variety of forms.

**Courses:** HH01  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB003

► **HHB275 HUMAN RIGHTS: AUSTRALIAN ACTIVISM**

This unit encourages students to consider the transformative nature of human rights activism within the Australian domestic context. It examines the relationship between the international human rights system and the domestic human rights regime. The unit gives particular attention to the social construction of rights and examines Australian human rights from political economy, gender, power, cultural and indigenous perspectives. It critically reviews the effectiveness of the domestic human rights system in the protection, promotion and realization of civil, political, economic, social, cultural and development rights. The unit places significant emphasis on the development of analytical capacities and interventionist skills essential for those engaged in human rights activism at the domestic level.

**Courses:** HH01  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB005

► **HHB300 CURRENT DEVELOPMENTS IN HUMAN SERVICES**

This unit identifies major forces influencing the direction and nature of the welfare state. It explores the impact of change in welfare state for the contemporary human service industry. The unit identifies emerging trends in human service organisation and delivery and examines the implications for human service practitioners, service providers, and consumers.

**Courses:** HH02, HS07  
**Contact hours:** 2 week block  
**Credit points:** 12 **Incompatible with:** HSB300

► **HHB301 ADVANCED PROFESSIONAL PRACTICE**

Only enrolled Bachelor of Social Science (Human Services) students can undertake this unit. Students prepare for employment by developing and refining their assessment and intervention skills while undertaking a 400 hour vocationally based practice experience supervised by an experienced practitioner. Demonstrated sound and ethical practice abilities are expected of students during an intensive exposure to a range of practice methods, issues and dilemmas. Students and their agency supervisor devise a learning plan, which assesses work performance in six core competencies and a flexible assessment item. Students attend university workshops and complete university requirements including a job application and reflective assignment.

**Courses:** HS07  
**Prerequisites:** HSB201, HSB218, HSB228, HSB211, HSB229  
**Credit points:** 26 **Incompatible with:** HSB301

► **HHB303 AGED SERVICES: ADVANCED**

This unit builds on the knowledge, skills and abilities developed in Aged Services: Introduction. Issues around the health and wellness status of older people are explored and there is an emphasis on investigation and addressing the needs of this group as they grow older in the Australian environment. Specific issues to be discussed include: health behaviours, physical changes associated with ageing, nutrition, physical exercise, sexuality, substance abuse, dementia, care-giving and advocacy.

**Courses:** HH02, HS07, SS60  
**Prerequisites:** HSB213  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB323

► **HHB304 CHILD AND FAMILY SERVICES: ADVANCED**

Work with disadvantaged parents, foster carers and adoptive parents; human services responses by women; parents and women's participation in services; service characteristics consistent with user rights, empowerment and social justice; parents and families involuntarily receiving services; application of skills in ethical decision-making, policy development, interpersonal processes and group work.

**Courses:** HH02, HS07, HH03, SS60  
**Prerequisites:** HSB214  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB324

► **HHB305 CORRECTIVE SERVICES: ADVANCED**

Designed to enhance students' knowledge and understanding of contemporary issues currently facing corrective services based on analysing the students field education experiences. From this understanding students will be assisted in developing their critical thinking and problem solving skills, and undertake strategies to prepare for employment opportunities in corrective services.

**Courses:** HH02, HS07, HH03, SS60  
**Prerequisites:** HSB215  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB325

► **HHB306 DISABILITY SERVICES: ADVANCED**

This unit builds on concepts and issues introduced in the Disability Services: Introduction unit and is designed to promote understanding of the knowledge required to undertake policy and service development activities within the disability sector. It explores the range of service models relevant to people with a disability across their lifespan. Additionally, it examines the quasi-legal and policy aspects of working in disability service organisations, along with some of the ethical dilemmas inherent in human service provision with particular relevance to people with a disability.

**Courses:** HH02, HH03, HS07, SS60  
**Prerequisites:** HSB216  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB326

► **HHB307 SERVICES TO YOUNG PEOPLE: ADVANCED**

Many of the positions available in the human services industry and oriented to young people, require specific knowledge, skills and understandings. This unit will involve an in-depth exploration of contemporary and emerging areas of direct and indirect practice with young people. Included are early intervention and prevention, youth policy analysis and development, juvenile justice practice, youth and family work, youth health practice, public space practice, accommodation and housing practice, and the interface between human services practice and schools. The unit will also examine the legal and ethical dimensions of direct practice as an integral part of the unit.

**Courses:** HH02, HH03, HS07, SS60  
**Prerequisites:** HSB227, HSB310  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSB327

► **HHB310 GLOBALISATION AND SOCIAL THEORY**

Examines a range of social theory which has had an increasing impact on sociological work in the last decade or so. The unit will concentrate on the so-called 'post-Marxist' tradition (Althusser, Poulantzas, Bourdieu), on poststructuralism and postmodernism (Lyotard, Baudrillard, Derrida, Foucault), on German critical theory (Habermas), and on theories of the breakdown of modernity and the birth of the risk society (Giddens, Beck). This social theory will be introduced with an emphasis on its practical uses for the empirical sociologist.

**Courses:** HH01, SS07, SS60, HU20, HU22, IF30, IF36, IF43, IF70, IF81, IF82, IF86  
**Prerequisites:** HUB133 or HHB234  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB139

► **HHB312 GEOGRAPHICAL RESEARCH DESIGN**

The unit develops skills in geographical field techniques and data analysis, and provides a foundation in advanced research design for geographical studies. Information capture and analysis focuses on local-region investigations, and the use of geographical software and databases including resources from the Australian Bureau of Statistics, Bureau of meteorology and local government

**Courses:** ED50, HH01, HU20, HU22, IF70, IF36, IF43, IF70, IG81, IF82, IF83, IF84, IF86, IF30, SS13, SS60  
**Contact hours:** 3 per week **Credit Points:** 12  
**Incompatible with:** HUB688

► **HBB315 SEX AND DRUGS IN SOUTH-EAST ASIA**

This unit focuses on the social, cultural, economic and political impacts of the drug trade and the sex trade in Southeast Asia including both the historical dimensions of these phenomena as well as their contemporary aspects. The unit will examine the progress of the trades, the nature of the traders and the political and economic dimensions of these activities, both legal and illegal.

**Courses:** HH01, HU22, IF30, IF43, IF70, IF81, IF82, IF86, HH03  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB633

► **HBB320 INDEPENDENT PROJECT 1**

Designed to develop research and writing skills, the unit will enable students to engage in a small-scale research project.

**Courses:** HH01, HU20, HU22, SS60, HH03  
**Credit points:** 12  
**Incompatible with:** HUB954

► **HBB321 INDEPENDENT PROJECT 2**

Designed to develop research and writing skills, the unit will enable students to engage in a small-scale research project.

**Courses:** HH01, HU20, HU22, HH03, SS60  
**Credit points:** 12  
**Incompatible with:** HUB955

► **HBB328 RESEARCHING APPLIED ETHICS**

Examines the different methods which characterise contemporary research in Applied Ethics. The historical emergence of Applied Ethics, the key assumptions which underpin the various methodologies, and the current critical debates on method are key topics considered in this unit.

**Courses:** HH01, HU20, HU22, HU21, NS40, NS48  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HUB758

► **HBB330 INTERNSHIP PROGRAM**

Opportunity for students to be placed in an appropriate off-campus situation in work related to their studies. This unit may be taken over one semester or extended to cover two. Able to be taken either in semester 1, 2 or 3.

**Courses:** HH01  
**Credit points:** 24  
**Incompatible with:** HUB952

► **HBB400 HUMAN SERVICES RESEARCH THESIS 1-5**

This unit involves the design and initial development of the dissertation topic. This includes the literature review. HBB400 4-5 involve further research and completion of honours dissertation under the direction of a supervisor. Seminars provide a formal forum and opportunity for the discussion of research projects and problems associated with research and writing and enable staff and students to share the outcomes of their scholarly activities.

**Courses:** HH22, HS14  
**Contact hours:** 12 per component  
**Incompatible with:** HSP413

► **HBB402 RESEARCH COLLOQUIUM**

Provides a forum for the discussion of problems associated with research and writing. Allows students to share with each other the outcomes of their scholarly activities. Invited researchers will provide insights into the research process.

**Courses:** HH23, SS13  
**Contact hours:** 2 per week **Credit points:** 12  
**Incompatible with:** HUB124

► **HBB403 LITERATURE REVIEW**

A supervised program in the Honours student's chosen area of specialisation. An assessed critical paper on literature relevant to the Honours dissertation topic will be prepared.

**Courses:** HH21, HH23, HU21, SS13  
**Prerequisites:** HU20, HU22, SS60, SS07 or equivalent  
**Credit points:** 12  
**Incompatible with:** HUB901

► **HBB404 HONOURS DISSERTATION 1**

Supervised design and initial development of Honours dissertation leading to completion of a thesis outline, including synopses and projected

chapters, and a statement of objectives, methods and sources

**Courses:** HH21, HH23, HU21, SS13  
**Prerequisites:** HU20, HU22, SS60, SS13 or equivalent

**Credit points:** 12  
**Incompatible with:** HUB902

► **HBB405 HONOURS DISSERTATION 2 (1-2)**

Supervised research and writing of dissertation.

**Courses:** HH21, HH23, HU21, SS13  
**Prerequisites:** HU20, HU22, SS60, SS07 or equivalent, HUB901 and HUB902

**Credit points:** 36  
**Incompatible with:** HUB903

► **HBB410 LOGIC OF SOCIAL INQUIRY**

This unit assists students to address crucial questions of research design and methodology in the formulation and conduct of both qualitative and quantitative research projects. The students are guided through tasks such as identifying the purpose and contribution of their work, designs appropriate for theory construction and theory testing, hypothesis construction, issues and techniques pertaining to operationalising their concepts, and addressing issues of reliability and validity. These are then applied to specific methodologies such as case study, comparative research, experimental research and the analysis of qualitative and quantitative data. Attention is also given to the logic and contribution of conceptual work in the case of theoretical research projects.

**Courses:** HH31, HH21, HH23, HU21, SS13, PY09, PY20  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** PYB454

► **HHP003 AGED SERVICES - GRADUATE STUDIES**

This unit engages students in analysing national and international developments in the broad field of aged services through comparative study of policies, practices and processes. Students will examine issues affecting the well-being of older adults and their families; critically evaluate approaches to services provision for older people and to research in gerontology; and explore a range of impacts on service design and delivery.

**Courses:** HH30, HH31, HH32, HS13, HS15, HS16  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSP425

► **HHP004 CHILD AND FAMILY SERVICES - GRADUATE STUDIES**

In this unit students conduct a comparative analysis of Australian and international policies, practices and processes in services for children and families and identify the impact of socio-cultural, political and economic processes on the design and delivery of child and family services. Students will identify and critically evaluate the application of selected concepts underpinning service design and delivery (such as choice and participation), thoroughly investigate the evidence base for selected practices, and have the opportunity to explore concerns arising from practice contexts.

**Courses:** HH31, HSH15, HH32, HS16, HH30, HS13  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSP424

► **HHP006 DISABILITY SERVICES - GRADUATE STUDIES**

This unit offers you the opportunity to extensively analyse, evaluate and respond to developments in the disability area. Your ability to reflect on and make considered responses to current Australian developments will be enhanced as you engage in in-depth analysis and collaborative critique of national and international provisions made to address issues concerning people with disabilities. Exploring areas of interests will promote your skills of critical analysis and your ability to apply current research and debate within the disability arena.

**Courses:** HH32, HH32, HH30, HS15, HS13, HS16  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSP426

► **HHP007 YOUTH SERVICES - GRADUATE STUDIES**

This unit equips students to evaluate and respond to developments in services to young people through comparative analysis of changes and continuities in policies and practices. Students will discern key human service concepts and identify how these operate in selected service contexts in both national and international settings. Issues associated with evidence building for policy and service developments are addressed. Students will identify their own knowledge needs and explore concerns arising in contexts they know about in order to enhance skill development and transfer, in particular the informed application of research.

**Courses:** HH32, HH31, HH30, HS13, HS16, HS15  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSP427

► **HHP011 CRITICAL ISSUES IN THE HUMAN SERVICES**

Identifies critical contemporary issues impacting upon the human services industry in particular. The contemporary environment in which the human services exists is creating sets of tensions which have the potential to both seriously challenge and radically reorder and reconstruct service delivery and professional practice. The unit is designed to explore and develop comprehension of the issues, and their implications for the specific domains of service delivery of the proposed research projects and/or areas of interest of participants.

**Courses:** HH22, HH31, HS14, HS15  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSP411

► **HHP012 LEADERSHIP IN THE HUMAN SERVICES**

Explores conceptions of and skills in leadership to enable participants to provide effective leadership in human service contexts. It reflects an increasing awareness that leadership is of central importance in the development and management of governments and community organisations, and in energising and enabling community groups to identify and meet their needs. Underlying this unit is the notion that leadership, as currently conceptualised, is not simply the task of those in positions of responsibility but all involved in the development and delivery of services.

**Courses:** HH31, HH32, HS15, HS16  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSP412

► **HHP013 MANAGING HUMAN SERVICE ORGANISATIONS**

This unit will create an awareness of the issues and challenges faced by the human service manager and improve knowledge of the functions and techniques of management. As well as developing an understanding of the application of these management techniques to human services, it will recognise the influence between the quality of management and the quality of service provided to service users. It will build competency in becoming effective human service managers.

**Courses:** HH31, HH32, HS15, HS16  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** HSP421

► **HHP014 MANAGED CARE AND CASE MANAGEMENT**

Develops high level analysis and skills in the emerging context of managed care. Case management is becoming the dominant mode of service delivery in the community service industry. While the conceptual genesis of case management resides within human service bodies or practice knowledge, it is being applied across a range of service delivery systems. While some of the processes involved in case management are taught in human service education programs, there is little opportunity for employees and managers to comprehensively explore case management as a discreet mode of intervention.

**Courses:** HH31, HH32  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CC

## UNIT SYNOPSES

### ► HHP015 SKILLS FOR THE CONTRACT REGIME

Service delivery systems in the community services industry are in the process of being restructured. The primary dynamic carrying the process is the imperatives of understanding performance and accountability between purchasers (governments) and providers (non-state agencies). Contracts are an important part of these changes. To date, there is little experience in the industry of the management of a contract regime or its implications for service delivery outcomes. This unit is designed to convey key skills in managing contracts from both the purchaser and provider side of the equation.

**Courses:** HH31, HH32, HS15, HS16

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HSP423

### ► HHP020 HUMAN SERVICES PRACTICE RELATED RESEARCH 1-2

Students explore an issue from their practice or the field using research and scholarship.

**Courses:** HH32, HS16

**Credit points:** 48 (24 each)

**Incompatible with:** HSP020

### ► HLN405 QUALITATIVE RESEARCH

This unit addresses a range of qualitative methodologies and methods which represent alternative approaches to the application of the quantitative paradigm in Health Science research. The predominance of the natural sciences in nursing/health research has come into question in recent times and thus the unit introduces students to the origins of such challenges, to the knowledge bases of the alternative approaches to investigating the microsocio world of health/illness and to the relevant research methods. The unit comprises a series of lectures, seminar presentations and relevant readings.

**Courses:** HL88, HL50, HL52, HL55, NS85, NS64, PU65, PU69

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG, EXT **Semester:** 1, 2

### ► HLN700 THESIS

The thesis provides an opportunity to formally extend and synthesise knowledge gained in earlier semesters of the program. This study represents an independent and original piece of research completed with the guidance of a supervisor. The thesis provides an opportunity for coursework conducted in the area of specialisation to be applied in a practical manner reflecting your specific interest in health science. The thesis may be a report on research which makes a contribution to knowledge, or a study in which you critically analyse and appraise existing knowledge and produce observations and conclusions of value to the field concerned.

**Courses:** HL88, PU85

**Prerequisites:** Completion of course work

**Credit points:** 48

**Campus offered:** KG, EXT **Semester:** 1, 2, 3

### ► HLN701 INDEPENDENT STUDY

Independent Study allows students to study a topic which is not otherwise available as a formal unit. Students have the opportunity to pursue their studies relatively independently and to develop and practice skills in problem identification, evaluation and/or critical thinking. The study may be for example a critical literature review, an examination of guidelines or an evaluation. The process and outcomes are negotiated in a contract with a supervisor.

**Courses:** HL90

**Credit points:** 12

**Campus offered:** KG, EXT **Semester:** 1, 2

### ► HLN703 PROJECT A

An important aspect of postgraduate development is the opportunity for students to engage in research and/or project work in their specialist field of study in industry or as a component of consultancy work. Working in industry or within a health-related agency locally or internationally can provide students with valuable work experience and develop skills and expertise that advances their profession or the particular industry with whom they are involved. The research option in this unit enables students to undertake an independent and original piece of work completed with the guidance of a supervisor. The

research work may be a report on research that makes a contribution to knowledge, or a study in which the student critically analyses and appraises existing knowledge and produces observations and conclusions of value to the field concerned.

**Courses:** HL88

**Credit points:** 24

**Campus offered:** KG, EXT **Semester:** 1, 2

### ► HLN704 PROJECT B

An important aspect of postgraduate development is the opportunity for students to engage in research and/or project work in their specialist field of study in industry or as a component of consultancy work. Working in industry or within a health-related agency locally or internationally can provide students with valuable work experience and develop skills and expertise that advances their profession or the particular industry with whom they are involved. The research option in this unit enables students to undertake an independent and original piece of work completed with the guidance of a supervisor. The research work may be a report on research that makes a contribution to knowledge, or a study in which the student critically analyses and appraises existing knowledge and produces observations and conclusions of value to the field concerned.

**Courses:** HL88

**Prerequisites:** HLN703

**Credit points:** 24

**Campus offered:** KG, EXT **Semester:** 1, 2

### ► HLN705 INTRODUCTION TO QUANTITATIVE RESEARCH METHODS

The content of this unit emphasises the practical aspects of quantitative research methods design, with the aim of exposing students to important concepts in the design of research studies, and in the assessment of the research of others. There is a strong emphasis on applying concepts through critical reading of the literature and the development of a comprehensive research proposal as the main practical exercise.

**Courses:** HL68, HL88, PU60, PU85

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** PUB316 or equivalent

**Campus offered:** KG, EXT **Semester:** 1

### ► HLN706 ADVANCED QUANTITATIVE RESEARCH METHODS

The content of this unit builds on the basic statistics background assumed of students. A unifying theme is the concept of sources of variation in collected data - how proper design of study and measurement instruments minimises some sources of variation (error), how analytical techniques account for other sources, and finally the issue of introduced error that cannot be accounted for, but must be addressed in discussion of results. Analytical strategies for modelling health data are compared, and practical experience focuses on the analysis and interpretation of various data sets.

**Courses:** HL68, HL88, PU60, PU85

**Prerequisites:** PUN105 or equivalent

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► HLN708 PROJECT

This 48 credit point project extends the range of applied investigative options for the Master of Health Science students to undertake. The project is designed to be a workplace-based units that enables students to undertake a concentrated applied project in a specific areas of interest in the workplace and to combine work and study requirements. It enables students to concentrate on a specific area of interest and to apply intellectual rigour to that area to complete a project of work at an advanced level.

**Courses:** HL88

**Credit points:** 48

**Campus offered:** KG, EXT **Semester:** 1, 2

### ► HLN750 THESIS

Part-time students enrol in this unit. It is conducted part-time over two semesters. Provides students with an opportunity to formally extend and synthesise knowledge gained in earlier semesters of the course. The study represents an independent and original piece of research completed under the guidance of a supervisor.

**Courses:** HL88, PU85

**Prerequisites:** Completion of course work

**Credit points:** 48

**Campus offered:** KG

**Semester:** 1, 2

### ► HLP101 ADVANCED DISCIPLINE READINGS

This unit is a compulsory component of the Faculty of Health Honours programs. It provides the opportunity for students to identify and review the literature relevant to their selected research topic. A one day seminar in advanced information retrieval skills is included in the unit.

**Courses:** HL50, HL52, HL55

**Corequisites:** HLP103

**Credit points:** 12

**Campus offered:** KG

### ► HLP102 RESEARCH SEMINARS

This unit is a compulsory component of the Faculty of Health Honours programs. Content includes the preparation and completion of a seminar presentation in a professional and scientific manner plus attendance at scheduled seminars.

**Courses:** HL50, HL52, HL55

**Prerequisites:** HLN706 or HLN405 (nursing students must complete both)

**Corequisites:** HLP101

**Credit points:** 12

**Campus offered:** KG

### ► HLP103 DISSERTATION

This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor. A written report in the form of a dissertation proposal must be submitted by the end of Week 6 in the semester in which enrolment in the dissertation commences.

**Courses:** HL50, HL52, HL55

**Corequisites:** All other units in the program

**Credit points:** 48

**Campus offered:** KG

### ► HLR710 RESEARCH PROJECT

The Doctor of Health Science prepares graduates to be leaders in their professions. The degree incorporates a large research component which may be a single large research project or a portfolio of approved related smaller projects. The research is designed to be strongly grounded in the students' professional practice in order to enhance and extend critical thinking, synthesis, application of theoretical frameworks and the development of new knowledge at an advanced level in a relevant field. The research can be interdisciplinary but should apply concepts and principles acquired and developed through the coursework component of the degree.

**Courses:** HL90

**Prerequisites:** Completion of course work component of Doctorate program

**Credit points:** 192

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► HMB171 FITNESS HEALTH AND WELLNESS

The dimensions and interrelationships of health, physical activity and wellness are studied; basic principles of conditioning and exercise prescription necessary to demonstrate the impact of physical activity on lifestyle diseases, health behaviours and wellness are examined; principles and theory of behaviour change are employed.

**Courses:** ED43, ED50, ED51, ED52, HL 40, HL42, HL44, HM42, IF62, IF73

**Contact hours:** 3-4 per week **Credit points:** 12

**Campus offered:** CA **Semester:** 1, 2, 3

### ► HMB172 NUTRITION AND PHYSICAL ACTIVITY

An introduction to principles of nutrition in relation to the physical activity setting, the role of nutrition and physical activity in weight management. This unit also covers the essential elements of child growth and development (auxology) in relation to nutrition and health. The unit is designed to underpin studies in exercise physiology and sports nutrition.

**Courses:** HM42, IF73, IF62, HL44, IF62, HL40

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** CA

## UNIT SYNOPSES

### ► HMB271 FOUNDATIONS OF MOTOR CONTROL, LEARNING AND DEVELOPMENT

Introduces students to the behavioural and neural bases of movement control through an examination of the central nervous and neuromuscular systems, hierarchical control, human information processing and dynamical systems. Covers elements of sensory mechanisms related to movement. Foundations of motor learning and adaptation will be introduced, linking underlying mechanisms of learning with principles that may be applied in teaching, coaching and rehabilitation. Major changes in the capacity for movement over the life-span will be covered, including those in infancy, childhood, adulthood and senescence.

**Courses:** ED50, ED51, HL40, HL42, HL44, HM42, IF46, IF73

**Prerequisites:** LSB131, LSB231

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► HMB272 BIOMECHANICS

The application of mechanics as they apply to Human Movement including: kinematics and dynamics of human body models; quantitative analysis; impact; work and power; fluid dynamics; material properties.

**Courses:** HL40, HL42, HL44, HM42, IF62, IF73, PU40

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2, 3

### ► HMB273 BIOENERGETICS AND MUSCLE PHYSIOLOGY IN EXERCISE

Together with its companion (HMB381), this unit focuses on central theory and practice in exercise physiology. It is integrated around the theme of energy supply and utilisation and deals with the relationship between metabolism (aerobic and anaerobic) and muscle power during exercise. The theory is addressed within the contexts of age, health, disease and athletic performance. Practice complements theory and involves the measurement of mechanical work and power, muscle strength and endurance, energy expenditure during exercise, as well as aerobic and anaerobic capacities.

**Courses:** ED50, HL40, HL42, HL44, HM42, IF46, IF62, IF73

**Prerequisites:** LSB231 or equivalent

**Contact hours:** 3-4 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► HMB274 FUNCTIONAL ANATOMY

Surface anatomy of the trunk and upper and lower limb; morphological and mechanical properties of bone, muscle-tendon units with implications for physical activity; joint structure and function; analyses of movement tasks including walking and running; cinematography and electromyography in functional anatomy of movement tasks.

**Courses:** ED50, ED51, HL40, HL42, HL44, HM42, IF62, IF73

**Prerequisites:** LSB131

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► HMB275 EXERCISE AND SPORT PSYCHOLOGY

Introduction to the psychological factors which influence performance, participation and adherence to both sport and exercise programs; personality and the athlete; attention and arousal; relaxation theory and practice; aggression and psycho-social development, leadership and team cohesion.

**Courses:** ED50, HL40, HL42, HL44, HM42, IF62, IF73

**Prerequisites:** PYB012 or equivalent

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► HMB276 RESEARCH IN HUMAN MOVEMENT

Principles of research: purposes, philosophy, applications. Quantitative research: principles of test construction and administration; basic statistics; basic research design hypothesis testing. Qualitative research: methodology; data collection; theory building. Research presentation: writing a research report; developing conclu-

sions. Application of research; examples in human movement; related literature. Computer data analysis and information retrieval.

**Courses:** ED50, HL40, HL42, HL44, HM42, IF62, IF73

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► HMB277 EXERCISE AND SPORT NUTRITION

Considers the relationship between nutrition and exercise and physical activity. Areas covered include dietary and energy requirements in exercise and sport and substrate utilisation at the cellular level during exercise. The influence that nutrition has on performance via changes in body composition, fuel utilisation, blood biochemistry and ergogenic aids will also be covered. Nutritional supplements and water and electrolyte balance in exercise and sport is also part of this unit.

**Courses:** HL42, HM42, IF46, IF73, PU43

**Prerequisites:** HMB172

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► HMB305 PERSONAL HEALTH

An examination of the range of factors influencing personal health including lifestyle and a range of social, economic and environmental factors. A holistic perspective on personal health.

**Courses:** ED50, ED51

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► HMB307 HEALTH AND PHYSICAL EDUCATION CURRICULUM (PRIMARY)

The unit provides teachers for the years 1-10 Health and Physical Key Learning Area, with appropriate learning experiences based on current philosophy and knowledge focused to assist children in meeting development needs. Health and Physical Education (HPE) can add significantly to this development by providing physical, emotional, social and intellectual support. It is necessary for Primary teachers to understand the syllabus and the implications it contains to enable them to develop modern units and lesson plans.

**Courses:** ED26, ED51, ED56, IF84

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** CA **Semester:** 1

### ► HMB310 PHYSICAL EDUCATION CURRICULUM STUDIES 1

The nature of physical education as an applied curriculum area. Insights into relevant Queensland syllabus and curriculum documents are provided; competencies in planning and teaching are developed and close links are made with teaching practice.

**Courses:** ED50, ED54, IF73

**Prerequisites:** EDB323 and at least 48 credit points in the relevant discipline area

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► HMB313 SOCIO-CULTURAL FOUNDATIONS OF PHYSICAL ACTIVITY

Lays a foundation in the disciplines of the socio-cultural areas which underpin the study of human movement. It serves as an introduction to the historical, sociological, philosophical, anthropological and cultural foundations of sports, games and leisure activities.

**Courses:** ED50, ED51, HL42, HL44, HM42, IF46, IF62, IF73

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► HMB314 PERFORMANCE SKILLS 1

Involves the application of movement principles to the analysis and development of techniques in all major swimming strokes, water rescue methods, and track and field events. Students explore teaching strategies, motivational, conditioning and training activities, the development of learning experiences for various ability levels and event rules application.

**Courses:** ED50, ED51, ED52, IF73

**Contact hours:** 6 per week **Credit points:** 12

**Incompatible with:** PRB344, PRB345, PRB346  
**Campus offered:** CA **Semester:** 1, 2

### ► HMB315 PERFORMANCE SKILLS 2

Various game forms are analysed in order to identify fundamental game skills and problem areas in skill development. Emphasis is placed on the application of relevant movement knowledge and skills to suit game situations and on learning appropriate strategies for teaching and coaching selected games.

**Courses:** ED50, ED51, ED52, IF73

**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1, 2

### ► HMB316 PERFORMANCE SKILLS 3

Basic movement principles fundamental to the performance and teaching of gymnastics and dance will be explored; physical fitness and basic biomechanical principles in gymnastics; routines incorporating a variety of gymnastic and dance skills on floor/apparatus; safe and unsafe practices will be addressed.

**Courses:** ED50, ED52, IF73

**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1, 2

### ► HMB332 HEALTH RELATED FITNESS

Provides a forum for a review of selected classic and recent literature representing the growing body of evidence and the arguments supporting the relationships between physical activity and chronic disease and the relationships between physical activity, fitness and optimal health. Special attention is given to the question of How much is enough? to achieve health enhancement. Application of this knowledge is made within the school, community and personal lifestyle contexts.

**Courses:** ED50, ED51, IF73

**Prerequisites:** HMB171 or PUB327

**Contact hours:** 3-4 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► HMB333 CHILD AND ADOLESCENT HEALTH

Child and adolescent health and the wide range of factors that impact on the health of individuals in these two crucial stages of life. An analysis is made of skills required for health-enhancing behaviours and experience provided in some of the skills needed to assess and maintain the health status of children.

**Courses:** ED50, ED51, ED52, IF73

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► HMB337 ORGANISATION AND MANAGEMENT IN PHYSICAL EDUCATION AND SPORT

School physical education departments and sporting associations are medium-sized organisations requiring direction for servicing a large client base. Students examine the role of administrators and the administration of monies, facilities and human resources in a school physical education and sports setting.

**Courses:** ED50, IF73

**Prerequisites:** HMB314, HMB315 or consent of Unit Coordinator

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► HMB341 SPORTING AND OUTDOOR EDUCATION ADMINISTRATION

The primary school physical educator and class teacher is responsible for the organisation of educational programs both at school and in other education and sporting settings. This unit assists students in understanding and organising a variety of sporting tournaments, carnivals and outdoor education.

**Courses:** ED51

**Prerequisites:** HMB307, HMB315 or consent of Unit Coordinator

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► HMB342 THE DEVELOPMENT OF TEACHING SKILLS IN PRIMARY PHYSICAL EDUCATION

Designed around micro-teaching and involving student teachers, children and their working environment in schools, this unit promotes excellence in teaching, preparation and planning with

## UNIT SYNOPSES

an emphasis on active learning and research. Physical education teacher education students develop a greater understanding of their prospective working environment.

**Courses:** ED50, ED51, IF73

**Prerequisites:** HMB310, HMB370 or consent of Unit Coordinator

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 2

### ► HMB361 FUNCTIONAL ANATOMY 2

A project-based unit designed to enable students with a background in Functional Anatomy to develop greater expertise in one or a combination of the following areas: electromyography, orthopaedic biomechanics, kinesiology of sport and work, comparative functional anatomy, locomotion and posture and research techniques in functional anatomy.

**Courses:** HM42, IF73   **Prerequisites:** HMB274

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 2

### ► HMB362 BIOMECHANICS 2

Measurement techniques within biomechanics; analysis of force systems; photographic, goniometric and electrographic analysis of movement; an introduction to viscoelasticity and biological materials; material properties; mass and inertial characteristics of the human body; applied aspects of biomechanics undertaken from a research project perspective

**Courses:** HM42, ME46, IF46, IF73

**Prerequisites:** HMB272, HMB274

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 1

### ► HMB363 INDEPENDENT STUDY

To meet the specific interest of students beyond content offered within existing units; conceptualise, plan and execute a research study including survey of literature, development of an action plan, reflection on a practice or situation, and proposal for future action. The student works at an advanced level and autonomously under the supervision of a lecturer.

**Courses:** ED50, HM42, IF46, IF73

**Prerequisites:** Consent of Course Coordinator

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 1, 2

### ► HMB364 SEMINARS IN HUMAN MOVEMENT

Offered to capitalise on the expertise of resident or visiting staff, special needs and interests of students, and to create flexibility in unit offerings. These may include special expertise, high quality limited period research projects, seminars, conferences and new initiatives by staff and students. An interest group will study the area chosen cooperatively.

**Courses:** ED50, ED51, HM42, IF46, IF73

**Prerequisites:** Consent of Course Coordinator

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 1, 2

### ► HMB370 PHYSICAL EDUCATION CURRICULUM STUDIES 2

The focus of this unit is divided between issues and directions of current trends in curriculum development and advanced strategies used to achieve variety in the implementation of indoor and outdoor lessons.

**Courses:** ED50, ED54, IF73

**Prerequisites:** HMB310

**Contact hours:** 5 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 1

### ► HMB371 MOTOR CONTROL AND LEARNING 2

This is an advanced unit which provides an in-depth view of theories and concepts in motor learning and control - how we control actions in both everyday and skilled behaviours, and how this capability is acquired. This course provides a multidisciplinary perspective, drawing on research from psychology, neuroscience, biomechanics, robotics, neural networks and medicine. Included in the unit will be the effects on the capacity for movement of changes in the nervous system (resulting from development, aging, disease or injury). The unit is organised around the theme of sensorimotor integration. To explore this theme a small number of specific actions

will be examined, such as posture and balance, locomotion, reaching and grasping, throwing and catching.

**Courses:** ED50, HM42, IF46

**Prerequisites:** HMB271

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 2

### ► HMB374 PSYCHOLOGY OF REHABILITATION

Factors that predispose to injury and behavioural change; the psychological process of rehabilitation; teaching specific psychological rehabilitation and coping strategies; the grief process; the rehabilitation psychologists role in the rehabilitation team; disabled athletes.

**Courses:** ED50, HM42, IF46, IF73

**Prerequisites:** HMB275, HMB372

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 1

### ► HMB375 ADAPTED PHYSICAL ACTIVITY

Adapt physical activity for a variety of physical, sensory and intellectually disabling conditions and chronic diseases; design and implement programs suitable for these people to improve levels of motor skills and general health and wellness; participate in, and design programs for disabled athletes.

**Courses:** ED50, ED51, ED52, HM42, IF46, IF73

**Prerequisites:** HMB271

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 2

### ► HMB376 MOTOR DEVELOPMENT IN CHILDREN

Theoretical perspective of normal and abnormal motor development, incorporating maturational, descriptive and behavioural aspects; underlying sensory, perceptual, neurological and cognitive changes which influence motor development in children. A theoretical understanding of developmental differences and development delay in children with intellectual, sensory or physical disability. Experience will be obtained in developmental and adapted physical activity programs.

**Courses:** ED50, ED51, ED52, HM42, IF46, IF73

**Prerequisites:** HMB271 or at lecturer's discretion

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 1

### ► HMB377 CHILDREN IN SPORT

Physical development of the young athlete; physical maturation; benefits of participation in sport and physical activity; psycho-social issues: positive and negative effects of participation including competitive stress; injuries to the growing skeleton; overtraining, overuse injuries; strength training in childhood and adolescence; promotion of safety in sport; accreditation of teachers and coaches, policy guidelines for junior sport, Aussie sport program.

**Courses:** ED50, HM42, IF46, IF73

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 1

### ► HMB379 DISORDERS OF HUMAN MOVEMENT

This unit introduces a selection of disorders and disease states that limit or alter the capacity for movement and physical activity. Each will be described in terms of relevant epidemiology and pathophysiology, with an emphasis on understanding the relationship between each disorder on one hand, and movement or activity on the other, together with factors that affect this relationship. The purpose of the unit is to provide students with a basic knowledge of a selection of movement-related disorders, and to provide a foundation for subsequent applications, whether in working with special populations, in rehabilitation, or other clinical settings. The unit is also intended to give students the skills necessary to read about and understand the relationship between movement and other diseases and disorders not specifically covered. The disorders introduced are not intended to be exhaustive, but represent conditions that effect significant numbers of individuals, account for much movement

and activity-related morbidity and/or mortality, and represent the various physiological systems underlying movement (ie cardiorespiratory, metabolic, musculoskeletal, neuromuscular and central nervous system).

**Courses:** ED50, ED51, HL40, HM42, IF46, IF62, IF73, HL42, HL44

**Prerequisites:** HMB271, HMB272, HMB273, HMB274

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 1

### ► HMB381 CARDIOVASCULAR AND PULMONARY PHYSIOLOGY IN EXERCISE

A companion unit to HMB273, and continues the theme of energy supply and utilisation during exercise around which aspects of cardiovascular and pulmonary physiology are integrated. These aspects include the control and distribution of blood flow through the macro- and microvasculature, the heart and haemodynamics, the control and function of the pulmonary system, and concludes with an integration of the physiology covered in the unit and HMB273 within the context of exercise in the heat. The theory is also addressed with the contexts of age, health, disease and athletic performance. Practice complements theory and includes the measurement of heart rate, blood pressure and lung function, as well as exercise capacities such as the 'anaerobic threshold' and maximal oxygen consumption.

**Courses:** ED50, HM42, IF46

**Prerequisites:** HMB273

**Contact hours:** 3-4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 2

### ► HMB382 PRINCIPLES OF EXERCISE PRESCRIPTION

Students examine the physiological principles and methods used in training and conditioning programs at all levels of physical activity. The integration of fitness assessment and exercise prescription is a major component of the unit, introducing the student to these requirements in the context of aerobic conditioning, resistance training, weight loss and flexibility. There is a strong emphasis on putting theory into practice, including the development and utilisation of appropriate practical skills in both fitness assessment and exercise prescription.

**Courses:** HM42, IF73, IF46, IF62, HL44, HL42, HL40

**Prerequisites:** HMB273

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 2

### ► HMB383 WORKPLACE HEALTH

The historical and current position of workplace health as one emerging focus of occupational health and safety. Issues, laws, policies, programs and union, employer and employee perspective are analysed in conjunction with the role of workplace health professionals. The planning, development, promotion, implementation, administration and evaluation of programs from a fitness counsellors perspective.

**Courses:** ED50, HM42, IF46, IF73

**Prerequisites:** HMB171 or HMB332

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 2

### ► HMB384 INJURY PREVENTION AND REHABILITATION

Epidemiology and nature of common injuries that occur at home, school, work and during sporting activities. Current philosophies of preventative measures and strategies for the treatment and rehabilitation of injuries. The role of health training, exercise and fitness in injury prevention, treatment and rehabilitation regimes. The pathology of injuries and repair processes highlighted by examining specific examples.

**Courses:** ED50, HM42, IF46, IF73

**Prerequisites:** HMB379

**Contact hours:** 3 per week   **Credit points:** 12  
**Campus offered:** CA                   **Semester:** 2

### ► HMB390 HEALTH EDUCATION CURRICULUM STUDIES 1

The nature of health education as an applied curriculum area. Insights into relevant Queensland syllabus and curriculum documents are provided; competencies in planning and teaching are de-

## UNIT SYNOPSES

veloped and close links are made with teaching practice.

**Courses:** ED50, ED54, IF73

**Prerequisites:** EDB323 and at least 48 credit points in the relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA **Semester:** 2

### ► HMB395 HEALTH EDUCATION CURRICULUM STUDIES 2

The focus in this unit is divided between issues and directions associated with current trends in curriculum development and advanced teaching strategies used to achieve a variety of health education outcomes. An enquiry based approach incorporating a social view of health will be emphasised in relation to current syllabuses in Health Education.

**Courses:** ED50, ED54, IF73

**Prerequisites:** HMB390

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA **Semester:** 1

### ► HMB470 PRACTICUM 1

The BAppSc (HMS) course is designed to prepare Human Movement professionals for work in a wide range of areas in the field of physical activity. In order to become competent practitioners, students need opportunities to apply classroom learned knowledge and skills via supervised practice in real world settings. Such practice should develop students confidence, attitudes, values and understanding of professional issues while providing opportunities to interact with Human Movement practitioners. As this unit is the first formal one of the practicum program, the first and second year program being part of core units, it involves students in a number of placements to enable them to compare professional strands and evaluate the fit of personal skills in different worksites. It is designed to prepare students for their final 9 weeks full time in the workforce the following year.

**Courses:** HL40, HL42, HL44, HM42

**Prerequisites:** Successful completion of Years 1 and 2 of the HM42 academic program, PLUS successful completion of Years 1 and 2 HM42 practicum requirements, OR by agreement with the Course Coordinator

**Credit points:** 12

**Campus offered:** CA **Semester:** 1, 2

### ► HMB471 PROJECT 1

Students in the Bachelor of Applied Science are required to undertake a project in Year 4. Students work in small groups on original topics. Work includes: a literature review and the presentation of experimental hypotheses, research methodology and analysis procedures. Groups present a formal colloquium.

**Courses:** HL42, HL44, HM42

**Prerequisites:** 4th year status **Credit points:** 12

**Campus offered:** CA **Semester:** 1, 2

### ► HMB472 PROJECT 2

The implementation of the plan, the analysis of results and publication of a report. Groups present a formal colloquium.

**Courses:** HL42, HL44, HM42

**Prerequisites:** HMB471 **Credit points:** 12

**Campus offered:** CA **Semester:** 1, 2

### ► HMB475 PRACTICUM 2

A comprehensive vocational experience undertaken as a supervised full-time internship. Student are supervised in the performance of operational tasks including management and administration and further develop independent professional skills and knowledge. The internship is followed by a comprehensive reflective analysis of the experience.

**Courses:** HL42, HM42

**Prerequisites:** Satisfactory completion of years 1-3 practicum requirements and seven semesters of coursework

**Credit points:** 36

**Campus offered:** CA **Semester:** 1, 2

### ► HMB480 ADVANCED EXERCISE PRESCRIPTION

A companion unit to HMB382, and extends the understanding of how fitness assessment and exercise prescription can be applied to an individual. A number of different disease states, spe-

cial populations and scenarios are used to examine the potential role of physical activity and appropriately prescribed exercise to maintain and improve functional capacity. A strong emphasis is placed on identifying the problems faced in fitness assessment and exercise prescription for special cases and conditions, and finding appropriate solutions.

**Courses:** HM42, HL38, HL68, HL88, IF46

**Prerequisites:** HMB382

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** CA **Semester:** 1

### ► HMB615 EXERCISE PHYSIOLOGY

Bioenergetics; exercise metabolism; hormonal response to exercise; muscle structure and function; circulatory adaptations, respiration and acid-base balance during exercise; temperature regulation, training and conditioning; body composition and nutrition; fitness testing and assessment procedures.

**Courses:** ME46

**Contact hours:** 3 per week **Credit points:** 8

**Campus offered:** CA **Semester:** 1

### ► HMB617 WORKPLACE HEALTH

History of workplace health; legal aspects; role of associated professionals; trends in mortality and morbidity; workplace health promotion agencies and programs; planning, development, promotion, implementation and evaluation process.

**Courses:** ME46

**Contact hours:** 3 per week **Credit points:** 8

**Campus offered:** CA **Semester:** 2

### ► HMN201 DEVELOPING TEACHING AND LEARNING INITIATIVES FOR THE HEALTH AND PHYSICAL EDUCATION KEY LEARNING AREA

Critically analyse outcomes based education and the relationship of the Years 1-10 HPE syllabus to the context of broader agendas of 1-10 school education in Australia; apply key concepts of the Years 1-10 HPE syllabus to whole of school curriculum development, planning and implementation; (re)design programs for successful student achievement and evaluation of the achievement of the outcomes of the Years 1-10 HPE syllabus; and identify relationships between the Years 1-10 HPE syllabus, Senior PE and HE syllabuses.

**Courses:** ED13, HL88 **Credit points:** 12

**Campus offered:** CA **Semester:** 1

### ► HMN202 DEVELOPING AND ASSESSING HIGHER ORDER THINKING SKILLS IN SCHOOL PHYSICAL EDUCATION

Examine contemporary theories of teaching and learning and knowledge frameworks for school PE; evaluate current models of teaching and learning and existing personal practices in PE in the context of learning theories and knowledge frameworks; and create new and alternative approaches to teaching and learning for the development and assessment of higher order thinking skills in school PE.

**Courses:** ED13, HL88 **Credit points:** 12

**Campus offered:** CA **Semester:** 1

### ► HMN203 APPLICATION OF THE SCIENCES TO TEACHING AND LEARNING IN PHYSICAL EDUCATION AND SPORT

Identify the key knowledge from the biophysical and socio-cultural sciences that pertain to the improvement of performance in physical activities and sports; analyse the relationship between the sciences and improvement of performance in selected physical activities and sports; design teaching and learning or coaching programs that promote understanding of the relationship between the sciences and performance in physical activity and sport; and use selected software and technology to enhance the teaching and learning or coaching programs that promote understanding of the relationship between the sciences and performance in physical activity and sport.

**Courses:** ED13, HL88 **Credit points:** 12

**Campus offered:** CA **Semester:** 2

### ► HMN205 HEALTH EDUCATION CURRICULUM ACCROSS THE SCHOOL YEARS

Understand how current issues and emerging trends can shape the principles and practices of health education in schools; develop higher order mastery of the principles of curriculum design, implementation and evaluation for health education; reconstruct teaching and learning programs and assessment practices promote higher order thinking by students of health education; and critically reflect on the impact of this unit on personal practice in the classroom and on the broader role of teaching.

**Courses:** ED13, HL88 **Credit points:** 12

**Campus offered:** CA **Semester:** 2

### ► HMN206 DESIGNING PHYSICAL ACTIVITY EXPERIENCES FOR SPECIAL POPULATIONS

Identify key issues, educational policies and legal obligations considered in designing physical activity programs for specific populations; understand how physical education syllabi can incorporate adapted programs and practices; critically evaluate and review existing programs designed for specific populations; design physical activity experiences that are sensitive toward and encouraging of participation among individuals with specific needs; and demonstrate teaching and developmental support strategies which are responsive to the learning needs of students within an inclusive physical education curriculum.

**Courses:** ED13, HL88 **Credit points:** 12

**Campus offered:** CA **Semester:** 2

### ► HMN601 EXERCISE AND HEALTH ACROSS THE LIFESPAN

Physical activity is almost universally accepted as being relevant to health, although the pattern of activity (nature, intensity, frequency and duration of individual exercise bouts, cumulative years of participation) required to induce maximum health benefits remains uncertain. Exercise throughout the lifespan and the implications for good health.

**Courses:** HL88, HL68, HL38

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA **Semester:** 1

### ► HMP380 SPORT ACCROSS THE LIFESPAN

This unit is a multidisciplinary overview of contemporary issues in sport. Using a life-span framework the unit will examine topics in children's through to Master's sport, including the scientific and ethical issues involved in talent identification for specific sports in children, factors affecting participation, and the special needs of older athletes. Students will be assigned extensive reading and will be expected to contribute fully to discussions of each topic.

**Courses:** HM38

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** CA **Semester:** 2

### ► HMP383 SPORT STUDIES PROJECT

The project provides students with an opportunity to conduct a study, or to apply a coaching technique, administrative procedure, assessment method or other innovative practice in a sports setting. The project topic should build on knowledge and skills acquired in other units. It will be chosen and approved after discussion with an academic supervisor, and with the agreement of any participating organisation. Students will prepare a report on the project and its outcomes.

**Courses:** HM38 **Credit points:** 12

**Campus offered:** CA **Semester:** 2

### ► HMP385 SPORT PRACTICUM

Students will undertake a practicum placement in an approved sports setting. The tasks undertaken as well as the practicum site will be determined by agreement between the student, the academic supervisor, and the practicum site supervisor. Placements will be chosen so as to extend and broaden the professional experience students may already have had in sport, thus placements may be in a sport or activity other than the student's principal area. Students will meet regularly with supervisors, maintain a diary and prepare

reports on and evaluations of the activities undertaken during the placement.

**Courses:** HM38 **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

► **HMP389 ASSESSMENT IN SPORT**

This unit will acquaint students with contemporary methods used in sports assessment, focusing on physiological and biomechanical measures. Students will acquire practical skills in assessment methods through laboratory classes. In addition, lectures will provide an overview of the theoretical basis of different tests, as well as knowledge concerning the rationale for each assessment, its application and interpretation. Consideration will be given to issues such as the suitability of assessment methods for various sports and populations, and the use made of test data for decision-making.

**Courses:** HM38 **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

► **IBB101 BUSINESS IN AUSTRALIA**

This unit will introduce international students and students new to Australia to the business environment of Australia. Students will examine historical, socio-cultural, geographical, economic, political and other factors and contemporary issues that impinge upon doing business in Australia. Learning activities include computer simulations, field studies and industry analysis. Generic skills addressed include teamwork, report writing and presentation skills.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB101

**Campus offered:** GP **Semester:** 1, 2, 3

► **IBB202 BUSINESS AND THE WORLD ECONOMY**

Firms operating across borders are exposed directly to the discontinuities between international and national financial and regulatory systems. In this unit students analyse the way international operations and performance of business can be put at risk by changing financial and regulatory conditions and determine how best to manage the exposure to this risk. This unit examines the evolution of the international financial system, the foreign exchange market, the types of foreign exchange rate exposures, managing exchange, translation and consolidation risks, assessing foreign direct investment targets, comparing the performance of foreign affiliates, operations exposure to regulatory risk of tax, investment and competition policy changes, country risk assessment and managing country risk exposure.

**Courses:** BS50, BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF56, IF61, IF62, IF72

**Prerequisites:** BSB113 and BSB119  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB202

**Campus offered:** GP **Semester:** 1, 2

► **IBB205 CROSS-CULTURAL COMMUNICATION AND NEGOTIATION**

This unit analyses the complexities of the interaction when modern organisations enter cultures different to that of their home base. The unit explores and analyses the interdependence among cultures, management philosophies, corporate strategies and business negotiations. It is designed to develop skills in negotiating in the international environment. The unit will assess the relationships among values and managerial and corporate negotiation and communications behaviour in diverse environments.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** BSB119 and BSB122; or 48 credit points of approved prior study for non-Bachelor of Business students only

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB205

**Campus offered:** GP **Semester:** 2

► **IBB208 EUROPEAN BUSINESS DEVELOPMENT**

This unit focuses on the major factors involved in the development of European business practices, organisational structures and government/business relations. Topics covered will

include: demographic change; agriculture; trade and colonisation; transport and communications; financial institutions and capital accumulation; intellectual and religious movements; economic theories; the role of government; war and revolution; industrialisation; big business; the Great Depression; social change. Various countries will be used as case studies to illustrate the topics.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** BSB119  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB208

**Campus offered:** GP **Semester:** 1

► **IBB210 EXPORT MANAGEMENT**

This unit presents students with information critical for the successful planning, organisation, implementation and control of export operations. The unit is highly applied and covers practical aspects of the production, dispatch and distribution of products for international markets. Specifically the unit addresses legal, documentary, physical and financial challenges to the delivery of goods and services, and to the assured receipt of payment in return for that delivery. The processes of planning, market analysis, information gathering, cooperative arrangements with government and other firms are considered. Developments in technological applications and business practices are illustrated.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** BSB119  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB210

**Campus offered:** GP **Semester:** 1

► **IBB211 GLOBALISATION AND BUSINESS**

This unit examines the forces of globalisation, the debates about the process and the practical implications of globalisation for business firms and business practice. The unit builds upon the Faculty core unit to explore how country environments differ, the impact these differences have on how business is conducted and the theories of why and how firms choose to do business in foreign locations. The unit will provide an understanding of the differences in the political economy of countries, the architecture and governance of the international economy and the operational challenges of doing business in different cultures.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** BSB119  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB211

**Campus offered:** GP **Semester:** 1, 2

► **IBB213 INTERNATIONAL MARKETING**

The aim of this unit is to provide students with a thorough understanding of the multiplicity of issues which impact on the development of international marketing strategies and plans and their operational implementation. The unit is highly applied and provides students with an opportunity to analyse global international firms, their marketing strategies and various international marketing issues in a variety of geographic and industry contexts; to evaluate methodologies and new practices for handling problems and issues typical of global and international markets and competition; to develop an operationally sound international marketing plan. Explicit attention is focussed on key issues such as global brand management versus international brand management; the exploitation of market potential and growth; learning from lead markets; the unique characteristics of the different types of markets such as mature and emerging markets; and, how to pressure international competitors.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF40, IF41, IF47, IF48, IF60, IF61, IF62

**Prerequisites:** BSB119  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB213

**Campus offered:** GP **Semester:** 2

► **IBB217 ASIAN BUSINESS DEVELOPMENT**

This unit gives students an understanding of the historical foundations of the development of business in East and South East Asia. Material presented will include the traditional economic and social institutions in Asia and their changing impact on business since East Asia's integration into the international economy. Topics studied will include: the evolution of local firms and firm structures; the impact of western business and economic influences; local ideology and development policies; the rapid growth of Northeast Asia, the Asian NICs and ASEAN. The changing impact of the international economy upon business development within selected East Asian economies is a unifying theme of this unit.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** BSB119  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB200

**Campus offered:** GP **Semester:** 1

► **IBB223 EMERGING TECHNOLOGIES AND INTERNATIONAL BUSINESS**

Globalisation and technology innovation are accelerating at a pace that will make them even more important in the new century. International business environment and business activities themselves are reshaped by new emerging technologies. This unit is designed to give students an understanding of how emerging technologies drive globalisation and how emerging technology becomes an asset for enterprises' global operations. Topics covered include the process of innovation, changes to the production paradigm, technology transfer and the management of emerging technologies.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** BSB113  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB223

**Campus offered:** GP **Semester:** 1

► **IBB231 BUSINESS IN COUNTRY X STUDY TOUR**

This unit is available for staff and visiting scholars to offer a specialised program of study. Students undertake a practical investigation of the issues pertaining to doing business in The People's Republic of China (PRC). The unit involves a two-week stay at a university in PRC including a range of industry visits as well as presentations by Australian managers working in China. The unit is designed to build strong links between theoretical learning and practical application of their business studies. In addition students will be required to participate in activities both before and after the excursion to develop and present research projects relevant to their own program of study and discipline area.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB116, BSB119  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **IBB300 INTERNATIONAL BUSINESS STRATEGY**

This unit aims to develop student competencies in the analysis of issues and problems encountered by international firms in the formulation and implementation of business strategies. The unit emphasises the connection between core competencies, strategy and corporate performance and will use case studies to analyse the strategic behaviour of successful global companies. Issues examined include: the forms of international involvement and entry mode strategies; organisational structures, control and cultural diversity; multinational versus global competitive strategies; using international business to build competitively valuable competencies and capabilities; the formulation and implementation of strategies of international cooperation and strategic alliances; small and medium enterprise (SME) strategies to compete in global markets.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

## UNIT SYNOPSES

**Prerequisites:** IBB211 or 96 credit points of approved study

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** BSB300, MGB330

**Campus offered:** GP **Semester:** 1, 2

### ► IBB303 INTERNATIONAL LOGISTICS

This unit examines international logistics through the concepts of international distribution channels and international supply chain management. Strategy in managing international logistical constraints is emphasised with practical studies of contemporary international supply chain management in international industries. Traditional costs and financial aspects of supply chain management are considered. Contemporary issues are incorporated including: the impact of ebusiness on international logistics; the evolution of new technologies for 'smart' packaging, warehousing and international stock control; the combination of international services with goods products; recent technological developments in international transportation and product quality control.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** IBB210

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB303

**Campus offered:** GP **Semester:** 2

### ► IBB304 GLOBAL INDUSTRY ANALYSIS

The aim of this unit is to analyse the nature and structure of industry in national and international contexts to provide a suitable framework that can be used by students in the study of specific industries. Topics examined include: inter-industry dependencies; international location advantages; regional and interregional linkages; demand analysis; international transactions in information, goods, services and other products; analysing strategies to control markets through price and product positioning, and applying these principles to specific Australian industries conducting international business.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** IBB212 or MGB206 or MGB208

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MGB309, MIB212

**Campus offered:** GP **Semester:** 2

### ► IBB308 CONTEMPORARY BUSINESS IN EUROPE

Building upon the historical understandings established in the prerequisite unit, this unit analyses contemporary issues relevant to business in Europe. Areas of study include: the growth of regional cooperation in Europe; business and regional cooperation; European Union policies and impacts; challenges of doing business in the emerging markets of Central and Eastern Europe. Case studies of contemporary business activities in Europe including entry to European markets will be used in the analysis.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** IBB208 or 96 credit points of approved study

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB300

**Campus offered:** GP **Semester:** 2

### ► IBB312 SPECIAL TOPIC - INTERNATIONAL BUSINESS

An 'open-ended' unit where the opportunity will be available for staff and visiting scholars to offer a specialised program of study.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** IBB211

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MIB312

**Campus offered:** GP **Semester:** 1, 2

### ► IBB317 CONTEMPORARY BUSINESS IN ASIA

This unit gives students an understanding of the practical challenges of doing business in East and South East Asia. It explains the current cultural, social, institutional and regulatory considerations that influence the conduct of modern enterprises in Asia. The unit analyses specific country markets to inform business decisions

pertaining to: business strategy; production and procurement; and, distribution and marketing. The unit addresses important contemporary business trends throughout the region including: market access; corporate governance; consumer demographics and tastes; the structure and competitiveness of local and foreign firms in the region; the integration of new business technologies; and the rapid economic and legal reform taking place in East Asia.

**Courses:** BS56, IF05, IF09, IF28, IF30, IF41, IF48, IF60, IF61, IF62

**Prerequisites:** IBB217 or 96 credit points of approved study

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIB317

**Campus offered:** GP **Semester:** 2

### ► IBB400 GLOBAL INDUSTRY ANALYSIS

This unit provides students with a detailed understanding of the particular industry or industries within which their organisation operates. A sound understanding of the nature of an industry requires the development of appropriate conceptual, analytical and operational skills. This unit provides the framework within which these dimensions are developed and applied to industries selected by the students for their major assignment.

**Courses:** BS63, BS93 **Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** BSN400

**Campus offered:** GP **Semester:** 1

### ► IBB403 BUSINESS IN ASIA

The aim of this unit is to enable an intensive study of business and markets in Asia. The development of the major industries will be examined, together with major intra-regional patterns of trade, commerce and finance. Significant economic, political and social factors determining developments will be focussed upon, as well as regulatory restraints governing market access. The student will be required to undertake a project, which requires the application of knowledge of the region to a business issue.

**Courses:** BS30, BS39, BS63, BS92, BS93, GS30, GS31, GS85, GS86, IF64

**Prerequisites:** PG only; plus GSN101 or GSN204 or IBN408

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN403

**Campus offered:** GP **Semester:** 1

### ► IBB404 BUSINESS IN EUROPE

This unit enables a more intensive study of business and markets in Europe. The development of the major industries will be examined, together with intra-regional patterns of trade, commerce and finance. A particular focus will be the development of a single European market and its international implications. Significant economic, political and social factors determining developments will be focussed upon, as well as regulatory restraints governing market access. The student will be required to undertake a project which requires the application of knowledge of the region to a business issue.

**Courses:** BS30, BS39, BS63, BS92, BS93, GS30, GS31, GS85, GS86, IF64

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN404

**Campus offered:** GP **Semester:** 1

### ► IBB408 GLOBAL BUSINESS OPERATIONS

This core unit examines the forces of globalisation, the diversity of international environments and their impact on business functions at the operational level. It examines the processes and challenges of internationalising the business operations as firms strive to compete successfully in the global marketplaces. Areas of study include the growth of international business and globalisation, international business motives and forms, the nature and challenges of the diversity of environments, and managing and controlling business operations. An international business simulation game is used to facilitate the understanding of business as a system of integrated operations and environments.

**Courses:** BS30, BS39, BS93, GS31, GS86

**Campus:** GP

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** GSN101, BSN408

**Prerequisites:** PG only **Semester:** 1

### ► IBN409 NEGOTIATING ACROSS BORDERS

Analyses the complex interdependence between cultures, management philosophies, corporate strategies and business negotiations. It is designed to develop skills in negotiating in the international environment, in particular, across different cultures. The unit will also develop managerial communications skills appropriate to, and effective in diverse environments. It will discuss negotiation and management problems; and deal with socio-cultural issues and behaviours which impact upon international firms. Subject to final approval.

**Courses:** BS64, BS65, BS66

**Contact hours:** 3 per week **Credit points:** 12

**Prerequisites:** PG only **Semester:** 1

### ► IBN410 INTERNATIONAL LOGISTICS MANAGEMENT

This unit presents an introduction to international logistics functions and develops a strategic approach to international business transactions and integration focussing on supply chain management. The unit will introduce traditional and contemporary logistics concepts and describe international logistics operations including global transport systems, inventory management, materials handling and information management. Global supply chain management cases and strategies are integrated throughout the unit. Subject to approval.

**Courses:** BS64, BS65, BS66

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► IBN411 INTERNATIONAL BUSINESS FIELD STUDY

The unit involves a four-week visit to another country, preceded by five seminars and a guided readings component. During the visit students will receive lectures from local academics, briefings from managers working in the country, and participate in industry visits to local and international firms operating in that country. From these activities students will develop an understanding of the country and, in particular, the issues, regulations and environmental factors affecting business operations or market entry. Subject to approval.

**Courses:** BS66

**Prerequisites:** PG only, 48 credit points of approved PG study

**Contact hours:** 3 per week **Credit points:** 24

**Campus offered:** GP, KG

### ► IBN412 INTERNATIONAL BUSINESS INTERNSHIP

The student is placed in a selected host organisation for a period of approximately sixteen weeks performing the role of an international business professional. The internship generally will take place in the later stages of the program after two semesters of class-based studies. The placement will be with an organisation in Australia or overseas. It is desirable that the placement is in a country other than the student's country of origin. Placements are assigned to match the background, skills and aspirations of the student and the host organisation's expectations of the task content and performance. The assessment is conducted jointly by and academic supervisor and the internship host. Subject to approval.

**Courses:** BS66

**Prerequisites:** PG only, 48 credit points of approved PG study

**Credit points:** 48

**Campus offered:** GP

### ► IBN421/2 MARKETING INTERNATIONALLY

Students are exposed to the theoretical and planning aspects of marketing internationally. Through an applied approach, theoretical issues such as segmentation of international markets, life cycle, contingency and network approaches to international market entry choice and market development and extension are addressed. Plan-

## UNIT SYNOPSES

ning issues cover the strategic marketing processes involved, including international market research, and their application to regions and countries primarily in the Asia/Pacific region or Europe. Students are trained in the practical application of these theoretical and planning aspects through the development of an extensive international marketing plan. Subject to final approval.

**Courses:** GS30, GS31, GS85, GS86

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

### ► IBN426 SPECIAL TOPIC - INTERNATIONAL BUSINESS

An 'open-ended' unit where the opportunity will be available for staff and visiting scholars to offer a specialised program of study.

**Courses:** BS30, BS39, BS63, BS92, IF64

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN426

**Campus offered:** GP **Semester:** 1, 2

### ► IBN435 BUSINESS IN AUSTRALIA

This unit will introduce students to the business environment in Australia. Students will examine the geographical, historical, socio-cultural, political, regulatory, demographic, economic, legal, locational and other factors that have influenced, or still impinge upon, doing business in Australia in the current international environment. Learning activities include factory visits and industry analysis.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only; plus available only to students new in Australia

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MIN435

**Campus offered:** GP **Semester:** 1, 2

### ► IFN001 ADVANCED INFORMATION RETRIEVAL SKILLS

Provides postgraduate research students with the skills to implement a thorough literature search in their research area and to contribute to life-long learning skills by improving students information literacy. The seven modules which form this unit include: the literature review, developing a search strategy; using the QUT and other libraries, database services, the Internet and its uses; developing a current awareness strategy; personal file management; evaluating information.

**Courses:** CN75, SC60, SC80, IF49, LW50

**Contact hours:** 12 in total **Credit points:** 4

**Campus offered:** GP, KG **Semester:** 1, 2

### ► IFN100 FULL-TIME MASTERS RESEARCH

Provides full-time postgraduate research students with study in a relevant area leading to the development of a thesis. The thesis shall be not less than 50 000 words and shall constitute a substantial contribution to knowledge and understanding in the area of the research.

**Courses:** JS52, LW52

**Credit points:** 48

**Campus offered:** GP, KG **Semester:** 1, 2

### ► IFN101 FULL-TIME MASTERS RESEARCH (EXTENSION)

Provides full-time postgraduate research students with study in a relevant area leading to the development of a thesis. The thesis shall be not less than 50 000 words and shall constitute a substantial contribution to knowledge and understanding in the area of the research.

**Courses:** JS52, LW52

**Credit points:** 48

**Campus offered:** GP, KG **Semester:** 1, 2

### ► IFN200 PART-TIME MASTERS RESEARCH

Provides part-time postgraduate research students with study in a relevant area leading to the development of a thesis. The thesis shall be not less than 50 000 words and shall constitute a substantial contribution to knowledge and understanding in the area of research.

**Courses:** JS52, LW52

**Credit points:** 24

**Campus offered:** GP, KG **Semester:** 1, 2

### ► IFN201 PART-TIME MASTERS RESEARCH (EXTENSION)

Provides part-time postgraduate research students with study in a relevant area leading to the

development of a thesis. The thesis shall be not less than 50 000 words and shall constitute a substantial contribution to knowledge and understanding in the area of research.

**Courses:** LW52, JS52

**Credit points:** 24

**Campus offered:** GP, KG **Semester:** 1, 2

### ► ITB111 SOFTWARE DEVELOPMENT 1

Students will be introduced to the fundamental concepts of procedural programming and the place of programming in the Software Development lifecycle. Students will acquire the skills to design, implement, execute and debug a small application program, and learn the basic syntax of Java as well as some essential object oriented concepts which are required to support the use of Java for the development of programs. (Subject to final approval)

**Courses:** IT21, IF29, IF38, IF48, IF58, IF59, IF79, IF90

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB410

**Campus offered:** GP, CA **Semester:** 1, 2, 3

### ► ITB112 SOFTWARE DEVELOPMENT 2

Students will learn to add a new data type (Set) to the Java programming language in two different ways, and separate the definition of the Set from its implementations; and the concept of generic set members; with the experience from Set, classical sequential abstractions such as Stack and Queue will be shown in implementation by arrays. Specifying ADT and implementing it via array technology and related concepts; alternative linked implementations of Stack and Queue and DataSet; binary search tree algorithms. (Subject to final approval)

**Courses:** IT21, IF29, IF38, IF58, IF59, IF79, IF90

**Prerequisites:** ITB111 or ITB410

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB411

**Campus offered:** GP, CA **Semester:** 1, 2, 3

### ► ITB113 INTRODUCTION TO COMPUTER ARCHITECTURE AND SYSTEM SOFTWARE

In this unit you will learn about computer hardware components and architecture; operating systems; networking fundamentals; researching and evaluating emerging technologies. (Subject to final approval)

**Courses:** IT21, IF29, IF38, IF48, IF58, IF79, IF90

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB412

**Campus offered:** GP, CA **Semester:** 1, 2

### ► ITB114 INTRODUCTION TO NETWORK TECHNOLOGIES

In this unit students will learn about the physical components of networks; TCP/IP networking; network operating systems. (Subject to final approval)

**Courses:** IT21, IF29, IF38, IF48, IF58, IF59, IF79, IF90

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB510

**Campus offered:** GP, CA **Semester:** 1, 2

### ► ITB115 INTRODUCTION TO DATABASES

Students will learn basic database concepts and terminology; the creation and modification of a relational database schema using SQL; the retrieval and modification of the contents of a relational database using SQL; and the development of a database system in Access (a database management program). Students will also develop an understanding of the theory of the design of a new database; the basics of designing user-interfaces; three-level architecture; integrity constraints; security and privacy issues; transaction processing and embedded SQL. (Subject to final approval)

**Courses:** IT21, IF29, IF38, IF48, IF58, IF79, IF90

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB225

**Campus offered:** GP, CA **Semester:** 1, 2

### ► ITB116 PROFESSIONAL STUDIES 1

This unit introduces students to the technology and information systems supporting a business.

Students should acquire skills in basic IT project management, in analysis and design; these should lead to creative web design and web site construction. The unit also focuses on developing professional skills in report writing, oral communication, and visual communication. In addition, the unit assists students to understand themselves as both a team member and a learner, providing effective strategies in each domain. Further issues in ethical and professional practice as an IT professional are also covered. (Subject to final approval)

**Courses:** IT21, IF38, IF48, IF79, IF90

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** ITB310

**Campus offered:** GP, CA **Semester:** 1, 2

### ► ITB117 PROFESSIONAL STUDIES 2

Interwoven with building products (one fixed and one selected from a range of options), you will also continue to develop further skills in team work and a better understanding of group dynamics. Each product will be formally presented and have appropriate documentation. Thus, this unit extends skills in report writing, oral and visual communication and teamwork. (Subject to final approval)

**Courses:** IT21, IF38

**Prerequisites:** ITB116

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** KWB1010

**Campus offered:** GP, CA **Semester:** 2

### ► ITB118 SYSTEMS LIFE CYCLE

Students will be introduced to the organisational and social contexts of Information Communication and Technology Systems. The life cycle of such systems (that is the series of stages that the system passes through from the beginning to the end of its useful life), and the roles of all the participants in that life cycle will be explored. The impact that the development of systems has on an organisation and the importance of analysis of risks involved in the Systems Life Cycle will be addressed. Alternative systems architectures and alternative approaches to the development of systems will also be considered. (Subject to final approval)

**Courses:** IT21, IF29, IF38, IF48, IF58, IF79, IF90

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB107

**Campus offered:** GP, CA **Semester:** 1, 2

### ► ITB218 APPLICATIONS PROGRAMMING

Rapid Application Development (RAD) tools are increasingly dominating the development of commercial applications. This unit introduces students to development methods for commercial information systems, the principles of using structured design techniques and the implementation of such systems using Object Oriented Event Driven Programming (OOED) using Visual Basic.Net (VB.Net), a programming environment that is used extensively in industry. VB.Net is the latest development of the Visual Basic Programming language with complete Object Oriented Programming environment using Common Language Runtime. Information Technology graduates are required to understand these new developments, features and trends in relation to implementing rapid and appropriate, timely business applications and deploying those applications in an organisation.

**Courses:** IT21, IF38, IF48

**Prerequisites:** ITB111, ITB115

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB219, ITN218

**Campus offered:** GP **Semester:** 1, 2

### ► ITB222 BUSINESS SYSTEMS ANALYSIS

This unit develops basic systems development skills by teaching a methodology and techniques of systems analysis and design. This unit gives an introduction to all the phases of the classical systems development life cycle. The aim is to give students a balanced overview of the process of analysing and designing information systems, while ensuring that students develop the necessary skills to apply the major techniques to simple problems. Emphasis is placed on the practical application of techniques to real-world problems.

**Courses:** IT21 **Prerequisites:** ITB111, ITB115

## UNIT SYNOPSES

**Contact hours:** 3 per week    **Credit Points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB223 4GL SYSTEMS**

Characteristics of 4GL development environments; Database creation and manipulation in a 4GL environment; Principles of report and screen design; Development of information systems in a 4GL environment.

**Courses:** IF33, IF38, IT20, IT21, IF48, IF58

**Prerequisites:** ITB229

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB227 WEB APPLICATIONS**

I) Design Elements for Interactive Web Front Ends II) Architecture of web-enabled database applications III) Database Design for web-enabled database applications

**Courses:** IT21, IF38, IF48

**Prerequisites:** ITB115, ITB116

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB228 ENTERPRISE SYSTEMS**

I) ES Management, II) Technical Architecture of SAP R/3 as an exemplar Enterprise System III) A process walk through functional boundaries (spanning FL,MM,PP,CO) IV) The ES Lifecycle V) Implementation Processes VI) Implementation Issues VII) Integration with other systems (legacy and specialist) VIII) Systems Evolution IX) Case Study critique X) Future of Enterprise Systems

**Courses:** IT21, IF38, IF48

**Prerequisites:** ITB116

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB229 INFORMATION SYSTEMS SPECIFICATION**

Analysing an information model: the static, transition, process and computational views of information; ORM notation and application; Z notation and application; developing the model; relationship of these skills with other popular and/or proprietary methods such as ER. Practical application to a range of small to large problems.

**Courses:** IT21, IF38, IF48

**Prerequisites:** ITB115

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB230 PROJECT**

Systems analysis, design and implementation; testing; documentation; communication of results; management of time and resources.

**Courses:** IF33, IF38, IT20, IT21

**Prerequisites:** Completion of at least 72 credit points from the Information Systems major.

**Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB232 DATABASE SYSTEMS**

The unit introduces the theoretical foundations of databases, system implementation techniques, and gives an overview of emerging database technologies and applications.

**Courses:** IT20, IT21, IF33, IF48

**Prerequisites:** ITB115

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN232

**Campus offered:** GP                      **Semester:** 1, 2

► **ITB233 ENTERPRISE SYSTEMS APPLICATIONS**

I) Enterprise Systems Management, The SAP Example, The Enterprise Systems Lifecycle, II) The main modules of Enterprise Systems, Accounting (Financial Accounting, Controlling), Human Resource Management, Logistics (Materials Management, Production Planning and Control, Sales and Distribution), Integration of this modules, III) E-Commerce and Customer Relationship Management

**Courses:** IT21, IF38

**Prerequisites:** ITB228 Enterprise Systems (for IT students), BSB112 Introduction to Electronic Commerce (for Business Students), and BNB007 Professional Studies (for Engineering students)

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB234 INFORMATION ANALYSIS**

Construction of the input to conceptual design. Formal and semantic techniques. The normalisa-

tion process. The integrity of relational databases. Modelling of non typical data.

**Prerequisites:** ITB229

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN234

**Campus offered:** GP                      **Semester:** 1

► **ITB235 DISTRIBUTED OBJECT INFORMATION SYSTEMS**

Object-oriented fundamentals, distributed environments, and distributed technologies.

**Prerequisites:** ITB115, ITB111

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1

► **ITB236 OBJECT-ORIENTED ANALYSIS AND DESIGN**

This unit extends the materials in Systems Analysis and Design. It focuses on the dynamic aspects of the Object Model which are required in order to develop complex systems. Object-oriented methodologies and methods are reviewed in order for the student to acquire some understanding of formal systems development. Design issues are then introduced, which covers object design, systems design and data storage. Students are required to complete a real life project using the above techniques.

**Courses:** IT20, IT21, IF48

**Prerequisites:** ITB222

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN236

**Campus offered:** GP                      **Semester:** 2

► **ITB240 PROJECT (INFORMATION SYSTEMS)**

Systems analysis, design and implementation; testing; documentation; communication of results; management of time and resources.

**Courses:** IT20, IT21, IF38, IF48

**Prerequisites:** Successful completion of at least 72 credit points from the Information Systems Major

**Contact hours:** 3 for Weeks 1, 2, thereafter by arrangement with Supervisor

**Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB241 INFORMATION TECHNOLOGY MANAGEMENT**

System Selection Processes, Business Process in IT, Change Management, Implementation Issues, Project Management, Strategic IT, Knowledge Management, Outsourcing, Enterprise Wide Systems, e-Business, Disaster Recovery Planning.

**Courses:** IF33, IF38, IT20, IT21, IF48

**Prerequisites:** ITB116

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB243 KNOWLEDGE-BASED SYSTEMS**

Propositional and Predicate logic, knowledge representation, AND/OR graphs, semantic consequence, natural deduction, resolution.

**Courses:** IT20, IT21, IF38

**Prerequisites:** ITB229

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN231, ITN243

**Campus offered:** GP                      **Semester:** 1, 2

► **ITB245 R/3 SYSTEMS ADMINISTRATION**

Basic systems administration; Architecture of an R/3 system; Using the Computer Centre Management System (CCMS) to monitor the system; Concepts of database administration, backup and recovery, Use of the SAPDBA, BRBACKUP, and BRARCHIVE utilities for database administration functions; Management of Users, Authorisations and Profiles, Use of automated system administration tools provided with R/3.

**Courses:** IT20, IT21

**Prerequisites:** ITB232

**Contact hours:** 3 per week    **Credit points:** 12

**Incompatible with:** ITN245

**Campus offered:** GP                      **Semester:** 1, 2

► **ITB254 INTERACTIVITY DESIGN**

Introduction to interactivity design and the usability engineering lifecycle; human cognition and perception and their effect on user interactivity; introduction to contextual analyses; the usability engineering life cycle; usability goal setting; planning and carrying out evaluation of interface designs; structured interactivity design

methods; guidelines and standards for interface design; testing and evaluation interface designs; basics of support printed manuals, demonstration and discussion of prototypes.

**Courses:** IT21

**Prerequisites:** ITB227 or permission of Unit Coordinator

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB257 MULTIMEDIA SYSTEMS**

Multimedia Authoring; Cognitive aspects of multimedia; The Media Elements; Still images, vector images and text; Video and animation; Sound (wave form, MIDI, voice); Compression and transmission of multimedia; Hypermedia; Client/Server considerations for multimedia delivery; Programming development for multimedia; Combining media; The Future in Multimedia.

**Courses:** IT20, IT21, IF48

**Prerequisites:** ITB227

**Contact hours:** 3 per week    **Credit points:** 12

**Incompatible with:** ITN257

**Campus offered:** GP                      **Semester:** 1, 2

► **ITB258 ABAP PROGRAMMING**

Characteristics and features of the ABAP Workbench environment; ABAP data modelling tools; ABAP language basics; Principles of report and screen design; Development of reports and dialogue screens in ABAP; Coding transactions in ABAP.

**Courses:** IT21

**Prerequisites:** ITB219 or knowledge of SQL

**Contact hours:** 3 per week    **Credit points:** 12

**Incompatible with:** ITN258, ITN281

**Campus offered:** GP                      **Semester:** 1, 2

► **ITB259 ADVANCED MULTIMEDIA TECHNOLOGIES**

Multimedia Design and Authoring; Cognitive aspects of multimedia; Human-Computer interaction; The Media Elements; 3D and Virtual Reality; Compression and transmission of multimedia; Client/Server considerations for multimedia delivery; Development frameworks for multimedia; The Future of Multimedia.

**Courses:** IT21

**Prerequisites:** ITB227, ITB257

**Contact hours:** 3 per week    **Credit points:** 12

**Incompatible with:** ITN259

**Campus offered:** GP                      **Semester:** 2

► **ITB260 E-COMMERCE SITE DEVELOPMENT**

The aims of an electronic commerce site. The business objectives. Issues in a site: design, software, databases, payment, staffing, hosting and maintenance. Applications development over the Internet. Producing and evaluating site.

**Courses:** IT21, IF38

**Prerequisites:** ITB257 or ITB524

**Contact hours:** 3 per week    **Credit points:** 12

**Campus offered:** GP                      **Semester:** 1, 2

► **ITB262 E-COMMERCE TECHNOLOGIES**

This unit provides an introduction to some of the information technologies being used to support electronic commerce. In particular, it will cover (1) Java-based technologies, including JDBC, servlets, and Java Server Pages, and (2) XML-based technologies, including XSL. The unit will also cover a number of applications of electronic commerce, including electronic services, catalogues, negotiation and trading.

**Courses:** IT21, IF38

**Prerequisites:** ITB115 or ITB225 and ITB111 or ITB410

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP                      **Semester:** 1, 2

► **ITB263 WEB INTELLIGENCE FOR E-COMMERCE**

The notions of agency, a taxonomy of intelligent agents, agent communication languages, the Belief-Desire-Intention agent model, web-based intelligent information agents, agent-mediated electronic-commerce, collaborative filtering in Recommender systems, data mining methods for web content analysis, statistical approaches for web users' profiling, automated negotiation in electronic market-places.

**Courses:** IT21, IF38    **Prerequisites:** ITB111

## UNIT SYNOPSES

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

### ► ITB264 INFORMATION SYSTEMS CONSULTING

This unit examines the strategic and operational environment of an IS consulting firm. It looks at the lifecycle of an IS consulting engagement and the issues involved at each stage of that lifecycle. The marketplace for IS consulting firms is appraised to give students a better understanding of their positioning and the role of consultants within the different market sectors. Context is provided by examining specific IS consulting practices such as large scale software implementation, systems integration and development and IS Strategic Planning.

**Courses:** IT21, IF38, IF48

**Prerequisites:** ITB116 or ITB310

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ► ITB265 MANAGEMENT OF INFORMATION PROGRAMS

Application of management techniques at different levels to information services, in particular libraries and library procedures; administrative structuring of libraries and the corporate environment; library technical and service divisions and the application of staff development, automation, performance evaluation and financial control to specific work areas; communication processes within libraries and between staff and users; leadership and professionalism in the context of libraries; human resource and financial planning; strategic planning.

**Courses:** IT21, IF38, IF48

**Prerequisites:** ITB116 or ITB310

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ► ITB266 PRINCIPLES OF INFORMATION MANAGEMENT

To introduce concepts of management of information resources in organisational contexts. The effective management of information assets and utilisation of external information resources influences organisational performance. The various stages involved in the development of in-house information strategies, policies and systems are explored with reference to information as a resource. Approaches to the successful integration of technical and business skills for the tasks of information management are explored.

**Courses:** IT21, IF38, IF48

**Prerequisites:** ITB310 or ITB116

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN266  
**Campus offered:** GP            **Semester:** 1

### ► ITB267 DATA WAREHOUSING FOR DECISION SUPPORT

Taxonomy of Management Information Systems (FIS, EIS, GIS, MIS etc), Data Driven Decision Support Systems, Building Data Warehouses for Decision Support, Online Analytical Processing (OLAP) Interfaces, Data Mining for Decision Support.

**Courses:** IT21, IF38, IF48

**Prerequisites:** ITB225 or ITB115 and ITB232

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITB242  
**Campus offered:** GP            **Semester:** 1, 2

### ► ITB272 INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Project Scoping, Benefits Realisation, Organisational Cultures, Group Dynamics and Communication within Teams, Risk Assessment and Quality Management, Projects Scheduling and Contingency Management.

**Courses:** IF33, IF38, IT20, IT21, IF48

**Prerequisites:** Completion of at least 192 credit points

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

### ► ITB322 INFORMATION RESOURCES

Managing information; database structure, basic searching; online industry; searching and the searching process; search strategies; online sources, Dialog etc, CD-ROMs; the Internet historical background and searching tools; management aspects of using external search

services; and legal information sources; research and development information sources; demographic data; government resources; marketing information sources; patents, standards; census data, company annual reports; people as sources of information; ethics of information gathering.

**Courses:** IT20, IT21, IF38, IF48

**Prerequisites:** ITB116

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

### ► ITB330 INFORMATION ISSUES

Concepts that relate to information and the adoption of information technologies create fundamental issues for both the individual and society. Consequently, this unit explores the development of the information society concept and related policies that need to be addressed at both the government, corporate, and individual levels - with reference to issues such as information ownership, access to information, and protection of information. Subject focus creates awareness of both direct and indirect impacts of information and associated technology, including potential abuse of expert power, information overload, pornography and internet addiction. A framework for ethical use of information in organisations, with a particular focus on privacy and other related issues is offered. Also examined are issues of professional responsibility and ethics in information professions, including roles of such bodies as The Australian Computer Society, the Australian Library and Information Association, and other professional agencies. Subject has general appeal for wide range of IT and other information professionals.

**Courses:** IF52, IF54, IT20, IT21, IF38, IF48

**Prerequisites:** ITB116

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN330  
**Campus offered:** GP            **Semester:** 1, 2

### ► ITB335 DIGITAL LIBRARIES

The development of automated library systems based upon analysis of subsystems such as acquisitions, circulation, cataloguing, reference and information retrieval and special materials control; standards for description, distribution and retrieval of information in such systems; integration of subsystems; linking of systems into networks and organisation of document delivery, access to digital collections, knowledge representation and information retrieval from databases and resource discovery within a coordinated framework; digitisation programs and their management.

**Courses:** IT21

**Prerequisites:** ITB222

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN335  
**Campus offered:** GP            **Semester:** 2

### ► ITB337 INFORMATION ORGANISATION 1

Principles and strategies for organising information; the nature of information; theory of indexing and classification; the structure of bibliographic databases and bibliographic records; international standards for information organisation; subject heading lists; library catalogues; indexing and abstracting services; library networks; adopting a client-approach to knowledge organisation; developing personal heuristics for approaching unfamiliar technologies.

**Courses:** IT21

**Prerequisites:** ITB116

**Contact hours:** 3                    **Credit points:** 12  
**Incompatible with:** ITP327  
**Campus offered:** GP            **Semester:** 1

### ► ITB338 INFORMATION RESOURCE PROVISION

An introduction to the concept of information and the relationship of information resource provision to community information needs and wants. The various media and formats used for recording of information as well as the content itself are analysed in terms of how well these meet the requirements of a variety of information end-users. The characteristics of the range of media producers/publishers are investigated from the point of view of how these media may be acquired and the equipment resource implications entailed. Topics related to the purchase and

retention of resources are tackled in the light of possible alternative sources of provision and the information needs of the immediate clientele as well as the needs of the wider Australian community. The development of a collection policy document, collection evaluation, procedures for maintaining collection currency and the legal and ethical dimensions of information resource provision are also highlighted.

**Courses:** IT21                    **Prerequisites:** ITB116

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN338  
**Campus offered:** GP            **Semester:** 2

### ► ITB339 PROFESSIONAL PRACTICE

This unit provides both an opportunity for students to spend a period of time in the professional working environment, and an opportunity to examine through a seminar series many of the issues that have an impact upon professionals working in information agencies with particular reference to libraries. It will provide a contemporary perspective of the role of libraries and information agencies; alternative approaches and technologies for information provision and dissemination; processes and techniques of communication; social and legal framework affecting information provision; the role of librarians and information professionals. Students will complete two fieldwork placements of fifteen days each. Their fieldwork placements are to be organised by the students, in conjunction with a faculty supervisor.

**Courses:** IT21                    **Prerequisites:** ITB322, ITB337

**Contact hours:** 2 per week, plus 2 placements each of 3 weeks

**Credit points:** 12    **Incompatible with:** ITN339  
**Campus offered:** GP            **Semester:** 2

### ► ITB341 STRATEGIC INFORMATION AND KNOWLEDGE MANAGEMENT

The course attempts to describe the major approaches and the practical techniques that students are likely to encounter in formulating and implementing information and knowledge based strategic plans in a typical business organisation within a competitive environment. Students are guided systematically in acquiring the analytical and managerial skills required to develop information and knowledge based strategic plans that are aligned with organisational strategies, with a view to achieving organisational goals. It also deals with functions and practices of management that relate to provision of information and knowledge services, and utilisation of technology to support them.

**Courses:** IT52, IF54, IT20, IT21

**Prerequisites:** ITB116

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ► ITB420 COMPUTER ARCHITECTURE

This unit encompasses: The organisation of simple computer systems and the way in which hardware provides the basic facilities for the machine, Programming at the assembly language level (80x86 assembly language is used). The programming of input-output operations including the use of the interrupt mechanism which underlies operating system organisation of uni-processor systems.

**Courses:** IT20, IT21, IF58, IF59

**Prerequisites:** ITB113

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN413  
**Campus offered:** GP            **Semester:** 1, 2

### ► ITB421 SOFTWARE DEVELOPMENT 3

The unit makes use of the C programming language as a tool for expressing abstraction and modular programming. Advanced table abstractions (balanced trees and hashing) are introduced along with the graph ADT, its implementation, and several common graph algorithms. Formal specification of programs is considered essential for abstract reasoning about data types and is integrated into the unit, as in the prerequisites.

**Courses:** IT20, IT21, IF59, IF90

**Prerequisites:** ITB112

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITN414  
**Campus offered:** GP            **Semester:** 1, 2

► **ITB424 SOFTWARE ENGINEERING PRINCIPLES**

This unit presents the principles of software engineering and the associated techniques and tools for producing software systems that are reliable, within budget, fully documented, and well tailored to requirements.

**Courses:** IT20, IT21, IF59, IF79, IF90

**Prerequisites:** ITB112 (A knowledge of Java is recommended)

**Contact hours:** 2.5 **Credit points:** 12

**Incompatible with:** ITN424

**Campus offered:** GP **Semester:** 1, 2

► **ITB427 CONCURRENT AND DISTRIBUTED SYSTEMS**

Unit is intended to provide students with an understanding of the process management, process communication and functions of modern operating systems, of notions of concurrency and parallelism, and of the nature and functions of distributed systems. Unit focuses on contemporary operating systems, UNIX windows, including use of Java and addresses related theoretical principles upon which such systems rely. Emphasis is on practical work, involving selected programming principles and algorithms used widely in development of system software for both large and small computer systems. Assignment work includes use of threads and remote method invocation for distributed programming. Other practical work covers scheduling, protection and UNIX process communication.

**Courses:** IT21, IF29, IF58, IF59

**Prerequisites:** ITB421, ITB113

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **ITB432 ADVANCED PROGRAMMING LABORATORY**

This unit is designed to allow a team of students to develop their own solution to a large project acting as clients of an industry based partner. A software engineering approach is taken with the development of system documentation to support the system software that is developed.

**Courses:** IT21, IT38/IT45

**Prerequisites:** ITB424, ITB448 (IT38/IT45: ITN424, IT35/IT40: ITN415 and ITN 424)

**Contact hours:** 3 per week **Credit points:** 12

► **ITB433 PROGRAMMING LANGUAGES**

General language overview: syntax, semantics, and types. Study of a modern functional language: types, higher-order routines, polymorphism, algebraic data types, and I/O. Language processing: scanners, parsers, translators, interpreters and compilers, grammars, abstract vs concrete syntax, type rules and abstract machines. Examples, simple arithmetic expressions and a mini-programming language: EBNF and recursive descent parsing, interpretation, compilation, translation and simple type checking. Networking programming language processing.

**Courses:** IT21, IF58, IF59, IF79

**Prerequisites:** ITB112

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN433

**Campus offered:** GP **Semester:** 1, 2

► **ITB441 GRAPHICS**

This is a general introduction to the area of computer graphics. It includes topics on: geometric modeling (how to construct an object to be displayed); 2D and 3D transformation (how to move the object around); hidden surface removal, illumination and shading (how to make the object look realistic); the software that will enable this process to be implemented; and an understanding of the way the hardware (specifically the display technology) effects the graphical output of the software.

**Courses:** IF52, IF59, IT20, IT21

**Prerequisites:** ITB421

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN440

**Campus offered:** GP **Semester:** 1

► **ITB446 PROJECT WORK (CORE CS EXTENDED MAJOR)**

**Courses:** IT21

**Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **ITB448 OBJECT TECHNOLOGY**

This unit builds on students' basic understanding of software engineering principles by considering the object-oriented paradigm for the design and implementation of a solution to a given software engineering problem. The implementation component builds on students' knowledge of the C programming language by teaching the C++ programming language.

**Courses:** IT20, IT21, IF90

**Prerequisites:** ITB421

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN415

**Campus offered:** GP **Semester:** 1, 2

► **ITB457 WINDOWS PROGRAMMING**

The unit starts by using MFC (in Visual C++) to introduce the theory and practice of developing windows applications. Throughout the unit, MFC is contrasted with Visual Basic; comparing factors such as expressiveness, efficiency and ease of use. Emphasis will be placed on concepts that are common to all windows development environments, namely general windowing concepts, the underlying MS Windows API they are built from, and the event-based style of programming they require. The unit will also introduce a number of cutting-edge technologies such as ActiveX and component based development. MFC will be contrasted with other development environments, such as Borland C++Builder, Delphi, Java AWT, ASP, and DHTML. The new Microsoft .NET environment will also be introduced.

**Courses:** IT21

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **ITB458 JAVA AND EXTENSIBLE PROGRAMMING**

An introduction to the Java language, its standard libraries, the theoretical models underpinning the design decisions of language and libraries, the creation of Java applications and applets. Broader issues of runtime extensibility and the relationship to distributed connectivity. The unit is divided into three major modules: Object-Oriented Programming in Java (weeks 1-5); Advanced Language Features (weeks 6-9); and Distributed Connectivity (weeks 10-13).

**Courses:** IT20, IT21, IT38/IT45, IF58, IF59

**Prerequisites:** ITB421

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **ITB460 SOFTWARE ENGINEERING AND GAMES DESIGN**

The different games genre and playing perspectives and how these impact on social issues; games design through such strategies as storyboarding and character creation; the complementary roles of AI, graphics, geometric modeling and animation in games design; the use of artificial life in the design of games; user interface design and game control; networking techniques for multi-user environments; the different hardware associated with games design and how sound and music are used in games.

**Courses:** IF90

**Prerequisites:** ITB441, ITB442

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **ITB464 MODERN COMPILER CONSTRUCTION**

Regular expressions and context free grammars are introduced as convenient notations for formally specifying programming languages. The mechanical recognition of such languages is considered from a formal and a practical/implementation point of view. Attribute grammars are discussed as a way of extending these simple recognisers into useful language translation tools. Intermediate forms such as abstract syntax trees and intermediate languages are examined as a bridge to machine code. Code generation for a realistic RISC machine is studied to give concrete results. The separate, but not independent compilation of modules will be discussed together with an introduction to code optimisation. Compiler-generator tools will also be discussed.

**Courses:** IT21, IF58 **Prerequisites:** ITB421

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **ITB469 UNIX SYSTEMS PROGRAMMING AND ADMINISTRATION**

Unit introduces students to the inner workings of the UNIX operating system. The unit commences by examining the requirements of administering a simple LINUX system, including a study of UNIX shell scripting. This is followed by a broad examination of the architecture of the UNIX operating system. Topics covered include: UNIX kernel, structure of file subsystem, process management, Scheduling, device I/O and inter-process communication (IPC). Finally, the unit concludes with an introduction to the security aspects of LINUX/UNIX operating system.

**Courses:** IT21, IF48, IF29, IF59

**Prerequisites:** ITB427

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **ITB470 WINDOWS 2000 SYSTEM PROGRAMMING AND ADMINISTRATION**

This unit builds on the general principles of operating systems gained in an earlier unit to provide specific knowledge and skills for programming and administering of computer installations consisting of multiple workstations using the Microsoft Windows 2000 Operating System

**Courses:** IT21, IF59, IF58, IF29

**Prerequisites:** ITB427

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN470

**Campus offered:** GP **Semester:** 2

► **ITB471 SOFTWARE DEVELOPMENT FOR THE WEB**

The web is the most important computer system. However the web is rather different from traditional PC systems and this has important effects on software development. For example the web comprises of many loosely coupled machines which are heterogeneous in nature; the web is unreliable and is not centrally administered. This unit covers the theory and practice for developing software for web based systems. A particular practical emphasis is the Microsoft .NET system.

**Courses:** IT21

**Prerequisites:** ITB448 or a similar level of proficiency in object oriented programming

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **ITB523 DATA SECURITY**

IT systems are increasingly used to store, process and exchange information. This unit enables students to identify security issues with information systems used by entities ranging from a single user to a large organisation. Upon completion of the unit, students should be able to understand major information security goals, describe and identify threats to information security and demonstrate knowledge of available counter measures and controls.

**Courses:** IT20, IT21 **Prerequisites:** ITB114

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN523

**Campus offered:** GP, CC **Semester:** 1, 2, 3

► **ITB524 INTERNETWORKING**

This unit covers in some detail the theory of operation of the TCP/IP protocol suite, including the routing of IP packets, the operation of TCP, and the role of the major auxiliary protocols. The unit has a significant hands-on component.

**Courses:** IT21 **Prerequisites:** ITB114

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN524

**Campus offered:** GP **Semester:** 1, 2

► **ITB525 NETWORK ADMINISTRATION**

Network Administration introduces you to the responsibilities and skills required by a local area network (LAN) administrator. You will be encouraged to develop your own approach to solving problems encountered in installing and managing a multi-user networked environment in a diverse and rapidly changing world. The skills you will acquire will enable you to efficiently administer a LAN as a world class IT professional.

**Courses:** IT20, IT21 **Prerequisites:** ITB524

**Contact hours:** 3 per week **Credit points:** 12

## UNIT SYNOPSES

**Incompatible with:** ITN525, ITB535

**Campus offered:** GP **Semester:** 1, 2

### ► ITB527 NETWORK TECHNOLOGIES

The unit covers a detailed study of Internetworking technologies available to the wide area network (WAN). Contemporary issues in networking will also be visited in discussing the choice of technologies available for use in the wide area Network. Because of the rapidly changing nature of the field, an opportunity to discuss latest developments in Data Communications is allowed for at the end of the semester.

**Courses:** IT21 **Prerequisites:** ITB524

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN527, ITB538

**Campus offered:** GP **Semester:** 1, 2

### ► ITB529 NETWORK SERVICES

This unit develops your practical knowledge of the design, implementation and operation of web based network services by using scripting programming languages. The unit involves the study of network protocols, models of client-server systems, CGI script programming, middleware, super-servers, and the security of client-server systems.

**Courses:** IT20, IT21

**Prerequisites:** ITB112, ITB524

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN529

**Campus offered:** GP, CA **Semester:** 1, 2

### ► ITB533 COMPARATIVE NETWORK SYSTEMS

In this unit, students will complete laboratory exercises as a Microsoft Windows network administrator. Topics include: performance, fault, configuration and security management, registry management, customisation of off-the-shelf products, file systems, printing, user administration and interfacing with other networks, such as Novell NetWare and Unix. This unit should assist those who are interested in becoming a Microsoft Certified Systems Engineer (MCSE).

**Courses:** IT20, IT21 **Prerequisites:** ITB524

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN533

**Campus offered:** GP **Semester:** 1

### ► ITB551 NETWORK PLANNING

Strategic planning and network technology; networked business applications; analysing and assessing networking opportunities; determining networking requirements; local and wide area network design issues; future planning.

**Courses:** IT21 **Prerequisites:** ITB527

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN551

**Campus offered:** GP **Semester:** 2

### ► ITB564 APPLICATION SERVICES

The unit describes the role of networked object-oriented applications for data communications in a modern technological environment and examines their design and implementation. It covers basic concepts and terminology; the standards used by industry; client server design methodologies; client software and server software for object-oriented data communications involving distributed data and distributed processing on networks; and collaborative computing.

**Courses:** IT20, IT21

**Prerequisites:** ITB529 or ITB458

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN564

**Campus offered:** GP **Semester:** 2

### ► ITB565 NETWORK MANAGEMENT

Management of a large network is significantly more difficult than the administration of a small network, and requires significant additional knowledge and skills. Many Data Communications graduates will be required to manage such networks. This unit will introduce the student to the essential issues in network management, and provide appropriate experience in the configuration and operation of network management systems.

**Courses:** IT20, IT21 **Prerequisites:** ITB525

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN565

**Campus offered:** GP **Semester:** 1, 2

### ► ITB566 INTRODUCTION TO CRYPTOLOGY

This unit provides students with a background in the fundamental concepts of cryptology, both in the areas of cryptography and cryptoanalysis. Topics include: classical, modern and public key ciphers; practical cryptology.

**Courses:** IF23, IT20, IT21, MA34, SC30, SC60

**Prerequisites:** MAB177 or equivalent

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN566

**Campus offered:** GP **Semester:** 1

### ► ITB568 WIRELESS NETWORKS

Wireless communications is rapidly becoming a more and more important part of everyday life. This unit aims to give the students the skill to be able to design and manage different types of wireless communication systems. Technologies to be covered include GSM, CDMA, Bluetooth, IEEE 802.11, WAP and Third Generation wireless networks. A demonstrative and experimental approach will be taken to assist with developing the student's understanding. Students will also learn through undertaking small projects in the area.

**Courses:** IT21 **Prerequisites:** ITB527

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN568

**Campus offered:** GP **Semester:** 2

### ► ITB569 NETWORK SECURITY FOR E-COMMERCE

Network Security is required for all inter-networked information systems. This advanced unit builds upon prior knowledge in data security and develops your practical knowledge of e-commerce security. Implementation of security at every level of the current network models and architectures are investigated. From this, the development of policies and procedures will be formed, which will provide the structure for the implementation of secure e-commerce systems.

**Courses:** IT21 **Prerequisites:** ITB523

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN569

**Campus offered:** GP **Semester:** 1

### ► ITB742 PRINCIPLES OF ARTIFICIAL INTELLIGENCE

A tertiary programming subject.

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► ITB823 WEB SITES FOR ELECTRONIC COMMERCE

Systems analysis and design for e-commerce systems. The use of databases to store, alter and retrieve information. Creation of Internet based web pages using commonly available authoring tools.

**Prerequisites:** BSB112

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

### ► ITB825 ELECTRONIC BUSINESS INFORMATION SYSTEMS

This unit introduces students to information technology in organisations, the way in which information systems technologies support key organisational functions, what information resources are available to them, and how various organisations' staff are involved in the systems development process. How organisations use these technologies and how they plan for, develop and implement technology applications are considered.

**Courses:** BS56, IF26, IF28, IF30, IF37, IF41,

IF47, IF48, IF57, IF60, IF62, IF72

**Prerequisites:** BSB112

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

### ► ITB826 INTRODUCTION TO DATABASES

The use of databases to store, alter and retrieve information. Introduction to SQL for update, retrieval, and database schema creation and maintenance. Database attributes including domains, primary and foreign keys, and the use of views. Update anomalies. The first three normal forms of relational database theory. Application development using a fourth generation database

management system. Privacy, security and integrity.

**Courses:** PU40

**Contact hours:** 3 per week

**Credit points:** 12

**Campus offered:** GP

### ► ITB840 SOFTWARE DEVELOPMENT 1

The basis of the major computing topics to be covered in later units especially programming. All students in the area of information technology need to be aware of a range of problem solving techniques and how these can be used to solve various problems using a procedural programming language. Introduces the student to the need for software quality management and control during software development.

**Courses:** MA34, SC30

**Contact hours:** 4 per week **Credit points:** 12

### ► ITB844 PROJECT (IF59)

Students in IF59, either individually or in small groups, undertake a substantial project relevant to the needs of industry and designed to provide insight into industrial requirements. Each project is carried out under the supervision of a staff member whose interests lie in the field of the project. Before work commences on the project, the student(s) and supervisor must agree on the topic and the scope of the work to be attempted. This unit is offered over two semesters.

**Courses:** IF59

**Prerequisites:** Completion of 72 credit points in Software Engineering

**Credit points:** 24

**Campus offered:** GP **Semester:** 1, 2

### ► ITB848 SOFTWARE PRINCIPLES

This unit will cover: a review of programming fundamentals in C; advanced programming techniques—recursion, dynamic memory allocation and pointer-linked structures, file input/output; the Abstract Data Type (ADT) concept and its expression in C: standard abstractions—stack, queue, sequence, table—and their implementations—arrays, linked lists, binary search trees, hash tables; algorithm analysis—complexity measures, the big-O notation; software engineering - analysis, specification, design coding, test planning and testing, documentation, life cycle.

**Courses:** ME40

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► ITB849 INTRODUCTION TO TECHNICAL COMPUTING

The unit introduces the student to the techniques and concepts required in order to produce solutions to scientific problems using computers. The unit provides students with a disciplined and structured approach to algorithm design and implementation in a high-level matrix-oriented programming language.

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

### ► ITB851 ADVANCED TECHNICAL COMPUTING

The major concept in this unit is 'abstraction' and its application to the solution of technical/engineering computational problems. Students will learn how to use the C data structuring tools of structures, arrays and pointers. Students will learn how to hide the complexity of underlying data structures using a collection of carefully designed functions, to facilitate development of well designed and effective programs. The unit then introduces C++ and Object Programming concepts. The program design and implementation components build on students' knowledge of the C and C++ programming languages. Students will be exposed to engineering type problem solving using C/C++.

### ► ITB906 INDUSTRIAL TRAINING EXPERIENCE

Consists of a one year work experience program. For more information about this program, refer to the Co-operative Education Program.

**Courses:** IT21, IF29, IF38, IF48, IF58, IF59,

IF79, IF90

**Credit points:** 12 **Campus offered:** GP

### ► ITD107 PROGRAMMING LABORATORY

Reinforces the fundamental programming concepts already introduced in Software Develop-

ment 1 through a series of practical exercises. Introduces students to another programming language. Develops practical programming skills in writing, testing, and debugging well-structured and well-documented software.

**Courses:** IT10 **Prerequisites:** ITD410  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** ITB107  
**Campus offered:** KG **Semester:** 1, 2, 3

► **ITD225 INTRODUCTION TO DATABASES**

Introduces students to the use of databases to store, alter and retrieve information; introduction to SQL for update, retrieval, and database schema creation and maintenance; database attributes including domains, primary and foreign keys, and the use of views; update anomalies; the first three normal forms of relational database theory; application development using a fourth generation database management system; privacy, security and integrity.

**Courses:** IT10 **Prerequisites:** ITD410  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** ITB225  
**Campus offered:** KG **Semester:** 1, 2, 3

► **ITD410 SOFTWARE DEVELOPMENT 1**

Introduces the techniques and concepts required to provide solutions to problems using computers. The unit provides students with a disciplined and structured approach to algorithm design and implementation in a high-level object-oriented programming language. This process is understood within the context of the software development lifecycle.

**Courses:** IT10 **Prerequisites:** ITD410  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** ITB410  
**Campus offered:** KG **Semester:** 1, 2, 3

► **ITD411 SOFTWARE DEVELOPMENT 2**

Examines how quality software development is increasingly reliant upon design using existing or custom-built re-useable library modules, with abstract data types chosen to reflect the data and operations required by the application. This course provides the foundations of module specifications and design, stressing the importance of separation of the application's programming interface (API) from the underlying implementation. The approach is illustrated through the realisation of a series of fundamental data types and associated algorithms within a modular programming language.

**Courses:** IT10 **Prerequisites:** ITD410  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** ITB411  
**Campus offered:** KG **Semester:** 1, 2, 3

► **ITD412 TECHNOLOGY OF INFORMATION SYSTEMS**

Focuses on number systems, data formats, the Little Man Computer model, the CPU and memory, instructions in the computer programming tools, input/output, computer peripherals, overview of operating systems, user view of operating system, and the internal operating system and file management.

**Courses:** IT10 **Prerequisites:** ITD410  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** ITB412  
**Campus offered:** KG **Semester:** 1, 2, 3

► **ITD510 COMMUNICATION NETWORKS**

Introduces students to telecommunications and data communication networks with specific reference to the World Wide Web (WWW), Local Area Networks (LANs), (eg Ethernet), Wide Area Networks (WANs), and communications architectures (eg TCP/IP) and provides an overview of network management and network security issues.

**Courses:** IT10 **Prerequisites:** ITD410  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** ITB510  
**Campus offered:** KG **Semester:** 1, 2, 3

► **ITN100 RESEARCH METHODOLOGY**

In this unit students are introduced to the research process, research quality control, research project management, and research methodology. Students examine how to source relevant litera-

ture, critique results, manage a research project, and how to write a research proposal.

**Courses:** IT30, IT31, IT35, IT40, IT60, IF49  
**Corequisites:** ITN110 (corequisite for Honours only) or equivalent  
**Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **ITN110 PROJECT (HONOURS)**

This unit is a research project. Normally, the unit will be followed by an honours dissertation (24 credit points). The unit itself complements ITN100, and gives students the opportunity to pilot one phase of the proposed research program. This unit allows students to acquire necessary skills in a problem domain, review the applications of other researchers, and to implement a component of the proposed research. The unit also exercises students in preparing a well written research report.

**Courses:** IT30 **Prerequisites:** ITN100  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **ITN122 DISSERTATION (IS)**

Designed to enable a student to undertake research work in a particular area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT30 **Prerequisites:** ITN100, ITN110  
**Credit points:** 24  
**Campus offered:** GP **Semester:** 1, 2

► **ITN124 DISSERTATION 2 (CS)**

Designed to enable a student to undertake research work in an area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT30 **Prerequisites:** ITN100, ITN110  
**Credit points:** 24 **Campus offered:** GP

► **ITN125 DISSERTATION 2 (DC)**

Designed to enable a student to undertake research work in an area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT30 **Prerequisites:** ITN100, ITN110  
**Contact hours:** 1 per week **Credit points:** 24

► **ITN132 DISSERTATION (IS) (PART TIME)**

Designed to enable a part-time student to undertake research work in a particular area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT30 **Prerequisites:** ITN100, ITN110  
**Credit points:** 24

► **ITN134 DISSERTATION 2 (CS)**

Designed to enable a part-time student to undertake research work in a particular area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT30 **Prerequisites:** ITN100, ITN110  
**Credit points:** 24

► **ITN135 DISSERTATION 2 (DC)**

Designed to enable a part-time student to undertake research work in a particular area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT30 **Prerequisites:** ITN100, ITN110  
**Contact hours:** 1 per week **Credit points:** 24

► **ITN142 MAJOR PROJECT (IS) FULL-TIME**

An appropriately sized problem is formulated in consultation with one or more project supervisors in either the School of Information Systems or the School of Computing Science and Software Engineering, and is usually associated with one of the research interests within the School. Student and supervisor must agree on a topic, scope and semester plan for the work to be attempted. At the end of the semester, the outcome of the investigation is presented to the School both orally and in written form.

**Courses:** IT40 **Prerequisites:** ITN100  
**Contact hours:** By arrangement with the supervisor of the project. Minimum contact should consist of one meeting per week.  
**Credit points:** 48

► **ITN144 MAJOR PROJECT (CS) FULL-TIME**

An appropriately sized problem is formulated in consultation with one or more project supervisors in either the School of Information Systems or the School of Computing Science and Software Engineering, and is usually associated with one of the research interests within the School. Student and supervisor must agree on a topic, scope and semester plan for the work to be attempted. At the end of the semester, the outcome of the investigation is presented to the School both orally and in written form.

**Courses:** IT40 **Prerequisites:** ITN100  
**Contact hours:** By arrangement with the supervisor of the project. Minimum contact should consist of one meeting per week.  
**Credit points:** 48

► **ITN145 MAJOR PROJECT (DC)**

Designed to enable a student to undertake significant research work in a particular area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT40 **Prerequisites:** ITN100 and 84 credit points in relevant postgraduate units  
**Contact hours:** 1 per week **Credit points:** 48

► **ITN152 MAJOR PROJECT (IS) PART-TIME**

An appropriately sized problem is formulated in consultation with one or more project supervisors in either the School of Information Systems or the School of Computing Science and Software Engineering, and is usually associated with one of the research interests within the School. Student and supervisor must agree on a topic, scope and semester plan for the work to be attempted. At the end of the semester, the outcome of the investigation is presented to the School both orally and in written form.

**Courses:** IT40 **Prerequisites:** ITN100  
**Contact hours:** By arrangement with the supervisor of the project. Minimum contact should consist of one meeting per week.

**Credit points:** 48 (24 per semester in consecutive semesters)  
**Campus offered:** GP **Semester:** 1, 2

► **ITN154 MAJOR PROJECT (CS) PART-TIME**

An appropriately sized problem is formulated in consultation with one or more project supervisors in either the School of Information Systems or the School of Computing Science and Software Engineering, and is usually associated with one of the research interests within the School. Student and supervisor must agree on a topic, scope and semester plan for the work to be attempted. At the end of the semester, the outcome of the investigation is presented to the School both orally and in written form.

**Courses:** IT40 **Prerequisites:** ITN100  
**Contact hours:** By arrangement with the supervisor of the project. Minimum contact should consist of one meeting per week

**Credit points:** 48 (24 per semester in consecutive semesters)

► **ITN155 MAJOR PROJECT (DC)**

Designed to enable a part-time student to undertake significant research work in a particular area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT40 **Prerequisites:** ITN100 and 84 credit points in relevant postgraduate units  
**Contact hours:** 1 per week **Credit points:** 48

► **ITN160 RESEARCH PLAN (MIT BY RESEARCH)**

This unit is a research project. Normally, the unit will be followed by a masters thesis (96 credit points). The unit itself complements ITN100, and gives students the opportunity to pilot one phase of the proposed research program. It allows students to acquire necessary skills in a problem domain, review the applications of other researchers, and to implement a component of the proposed research. The unit also exercises students in preparing a well written research report.

## UNIT SYNOPSES

**Courses:** IT60

**Prerequisites:** ITN100

**Contact hours:** 3 per week   **Credit Points:** 12

### ► ITN162 PROJECT (IS)

An appropriately sized problem is formulated in consultation with one or more project supervisors, in either the School of Information Systems or the School of Computing Science and Software Engineering, and is usually associated with one of the research interests within the School. Student and supervisor must agree on a topic, scope and semester plan for the work to be attempted. At the end of the semester, the outcome of the investigation is presented to the School both orally and in written form.

**Courses:** IT35/IT40

**Prerequisites:** Minimum of 48 credit points in course units

**Credit points:** 24

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN164 PROJECT (CS)

An appropriately sized problem is formulated in consultation with one or more project supervisors, in either the School of Information Systems or the School of Computing Science and Software Engineering, and is usually associated with one of the research interests within the School. Student and supervisor must agree on a topic, scope and semester plan for the work to be attempted. At the end of the semester, the outcome of the investigation is presented to the School both orally and in written form.

**Courses:** IT35/IT40

**Prerequisites:** Minimum of 48 credit points in course units

**Credit points:** 24

### ► ITN165 PROJECT (DC)

Designed to enable a student to undertake research work in an area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT35/IT40

**Prerequisites:** 48 credit points in relevant post-graduate units

**Contact hours:** 1 per week   **Credit points:** 24

### ► ITN172 PROJECT (IS) (PART-TIME)

An appropriately sized problem is formulated in consultation with one or more project supervisors, in either the School of Information Systems or the School of Computing Science and Software Engineering, and is usually associated with one of the research interests within the School. Student and supervisor must agree on a topic, scope and semester plan for the work to be attempted. At the end of the semester, the outcome of the investigation is presented to the School both orally and in written form.

**Courses:** IT35/IT40

**Prerequisites:** Minimum of 48 credit points in course units

**Credit points:** 24 (12 per semester in consecutive semesters)

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN174 PROJECT (CS) PART-TIME

An appropriately sized problem is formulated in consultation with one or more project supervisors, in either the School of Information Systems or the School of Computing Science and Software Engineering, and is usually associated with one of the research interests within the School. Student and supervisor must agree on a topic, scope and semester plan for the work to be attempted. At the end of the semester, the outcome of the investigation is presented to the School both orally and in written form.

**Courses:** IT35/IT40

**Prerequisites:** Minimum of 48 credit points in course units

**Credit points:** 24 (12 per semester in consecutive semesters)

### ► ITN175 PROJECT (DCC)

Designed to enable a part-time student to undertake research work in a particular area of information technology. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT35/IT40

**Prerequisites:** 48 credit points in relevant post-graduate units

**Contact hours:** 1 per week   **Credit points:** 24

### ► ITN185 MAJOR PROJECT (DC)

Each student will undertake a substantial project relevant to the needs of commerce or industry. Ideally, the project will be set in the student's workplace. Supervision of the Major Project will be provided by a QUT academic in collaboration with a responsible person from the organisation for whom the project is being undertaken.

**Courses:** IT50, IT95

**Contact hours:** 1 per week   **Credit points:** 48

### ► ITN186 MAJOR PROJECT (DC)

Each part-time student will undertake a substantial project relevant to the needs of commerce or industry. Ideally, the project will be set in the student's workplace. Supervision of the Major Project will be provided by a QUT academic in collaboration with a responsible person from the organisation for whom the project is being undertaken.

**Courses:** IT50, IT95

**Contact hours:** 1 per week   **Credit points:** 48

### ► ITN211 SYSTEMS ANALYSIS AND DESIGN

Systems Development Life Cycle, Systems Development Methods, Information Gathering, Process and Data Modelling, Automated Tools, Design techniques and Guidelines, Prototyping, Quality Assurance in information systems.

**Courses:** IT35/IT40, IT25, IT38/IT45

**Contact hours:** 3 per week   **Credit points:** 12

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN212 INFORMATION MODELLING FOR DATABASES

A database system may be viewed as a computer model that is composed of complex, long-lived information structures. This unit introduces the idea that, to be properly understood, a computer model must be formally specified. A specification language, in the form of the Z notation, is used to formulate unambiguous requirements for an information model. The entity-relationship (ER) approach is used to provide a graphical perspective on the model, which will be implemented via SQL. This is a foundation unit for the further study of database and information systems theory and practice.

**Courses:** IT38/IT45

**Contact hours:** 3 per week   **Credit points:** 12

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN218 APPLICATIONS PROGRAMMING

Rapid Application Development (RAD) tools are increasingly dominating the development of commercial applications. This unit introduces students to development methods for commercial information systems, the principles of using structured design techniques and the implementation of such systems using Object Oriented Event Driven Programming (OOED) using Visual Basic.Net (VB.Net), a programming environment that is used extensively in industry. VB.Net is the latest development of the Visual Basic Programming language with complete Object Oriented Programming environment using Common Language Runtime. Information Technology graduates are required to understand these new developments, features and trends in relation to implementing rapid and appropriate, timely business applications and deploying those applications in an organisation.

**Courses:** IT35/IT40, IT38/45

**Prerequisites:** ITN212, ITN410 (or equivalent)

**Contact hours:** 3 per week   **Credit points:** 12

**Incompatible with:** ITB218, ITN219

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN220 MAJOR ISSUES IN INFORMATION TECHNOLOGY

This unit explores aspects of Information Systems Technology judged to be of current or potential importance. These include matters relating to standards, emerging technologies as well as social and ethical considerations.

**Courses:** IF64, IT35/IT40, IT38/IT45

**Contact hours:** 3 per week   **Credit points:** 12

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN227 WEB APPLICATIONS

I) Design Elements for Interactive Web Front Ends. II) Architecture of web-enabled database applications. III) Database Design for web enabled database applications

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITN212

**Contact hours:** 3 per week   **Credit points:** 12

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN228 ENTERPRISE SYSTEMS

I) ES Management, II) Technical Architecture of SAP R/3 as an exemplar Enterprise System III) A process walk through functional boundaries (spanning FI,MM,PP,CO) IV) The ES Lifecycle V) Implementation Processes VI) Implementation Issues VII) Integration with other systems (legacy and specialist) VIII) Systems Evolution IX) Case Study critique X) Future of Enterprise Systems.

**Courses:** IT35/IT40,IT38/IT45

**Prerequisites:** IT35/IT40: Nil, IT38/IT45: Completion of Block 1

**Contact hours:** 3 per week   **Credit points:** 12

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN232 DATABASE SYSTEMS

The unit introduces the theoretical foundations of databases, system implementation techniques, and gives an overview of emerging database technologies and applications.

**Courses:** IT38/IT45, IT35/IT40

**Prerequisites:** ITN212

**Contact hours:** 3 per week   **Credit points:** 12

**Incompatible with:** ITB232

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN233 ENTERPRISE SYSTEMS APPLICATIONS

I) Enterprise Systems Management, The SAP Example, The Enterprise Systems Lifecycle, II) The main modules of Enterprise Systems, Accounting (Financial Accounting, Controlling), Human Resource Management, Logistics (Materials Management, Production Planning and Control, Sales and Distribution), Integration of this modules, III) E-Commerce and Customer Relationship Management

**Courses:** IT38/IT45,IT35/IT40

**Prerequisites:** ITN228 (for IT38/IT45 students), BSB112 (for Business students), and BNB007 (for Engineering students)

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** GP                   **Semester:** 1, 2

### ► ITN234 INFORMATION ANALYSIS

Construction of the input to conceptual design. Formal and semantic techniques. The normalisation process. The integrity of relational databases. Modelling of non typical data.

**Courses:** IT38/45

**Prerequisites:** ITN212

**Contact hours:** 3 per week   **Credit points:** 12

**Incompatible with:** ITB234

**Campus offered:** GP                   **Semester:** 1

### ► ITN235 DISTRIBUTED OBJECT INFORMATION SYSTEMS

Object-Oriented fundamentals, distributed environments, and distributed technologies.

**Courses:** IT35/40,IT38/45

**Contact hours:** 3 per week   **Credit points:** 12

**Campus offered:** GP                   **Semester:** 1

### ► ITN236 OBJECT-ORIENTED ANALYSIS AND DESIGN

This unit extends the materials in Systems Analysis and Design. It focuses on the dynamic aspects of the Object Model which are required in order to develop complex systems. Object-oriented methodologies and methods are reviewed in order for the student to acquire some understanding of formal systems development. Design issues are then introduced, which covers object design, systems design and data storage. Students are required to complete a real life project using the above techniques.

**Courses:** IT35/40, IT38/45

**Prerequisites:** IT35/40: Nil, IT38/45: ITN211

**Contact hours:** 3 per week   **Credit Points:** 12

**Incompatible with:** ITB236,ITN221

**Campus offered:** GP                   **Semester:** 2

► **ITN243 KNOWLEDGE-BASED SYSTEMS**

Propositional and Predicate logic, knowledge representation, AND/OR graphs, semantic consequence, natural deduction, resolution.

**Courses:** IT38/IT45

**Prerequisites:** ITN212

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN231

**Campus offered:** GP **Semester:** 1, 2

► **ITN245 R/3 SYSTEMS ADMINISTRATION**

Basic systems administration; Architecture of an R/3 system; Using the Computer Centre Management System (CCMS) to monitor the system; Concepts of database administration, backup and recovery, Use of the SAPDBA, BRBACKUP, and BRARCHIVE utilities for database administration functions; Management of Users, Authorisations and Profiles, Use of automated system administration tools provided with R/3.

**Courses:** IT30, IT35/IT40

**Prerequisites:** ITN232 (or equivalent)

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **ITN246 MINOR PROJECT 1 (IS)**

Students may pursue a specialised area or broaden their knowledge in an area of relevance to their employment. Topic is decided by agreement between the student and a staff member acting a supervisor. A short 20 minute demonstration and/or presentation will be required before the due date for submitting the report in last week of the semester.

**Courses:** IT35/IT40

**Prerequisites:** At least 48 credit points completed

**Contact hours:** By arrangement with the supervisor of the project. Minimum contact should consist of one meeting per week.

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **ITN248 MINOR PROJECT 2 (IS)**

Students may pursue a specialised area or broaden their knowledge in an area of relevance to their employment. Topic is decided by agreement between the student and a staff member acting a supervisor. A short 20 minute demonstration and/or presentation will be required before the due date for submitting the report in the last week of the semester.

**Courses:** IT35/IT40

**Prerequisites:** At least 48 credit points completed

**Contact hours:** By arrangement with the supervisor of the project. Minimum contact should consist of one meeting per week.

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **ITN252 PROCESS ENGINEERING**

I) Process Management: Business Process (Re)Engineering, Process Innovation, The Process Life-Cycle, Process Modelling with ARIS, The SAP Reference Models. II) Organisational Units in SAP R/3: MM, SD, FI, CO. III) Implementing Enterprise Systems: A Process-oriented Approach, SAP IMG, ValueSAP, ARIS for mySAP.com, Solution Maps. IV) Benefits Realisation: RBE, PPM

**Courses:** IT30, IT35/IT40, IT38/IT45

**Prerequisites:** ITN220

**Contact hours:** 3 per week

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **ITN253 CASE STUDIES IN ENTERPRISE SYSTEMS**

Topics include: system selection processes; process engineering; outsourcing; implementation issues (such as business process reengineering, benefits realisation and change management), alignment issues, relationship management.

**Courses:** IT30, IT35/IT40, IT38/IT45

**Prerequisites:** ITN220

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN282

**Campus offered:** GP **Semester:** 1, 2

► **ITN254 INTERACTIVITY DESIGN**

Introduction to interactivity design and the usability engineering lifecycle; human cognition and perception and their effect on user interactivity; introduction to contextual analysis; the usability engineering life cycle; usability goal setting; planning and carrying out evaluation of interface designs; structured interactivity design methods; guidelines and standards for interface design; testing and evaluating interface designs; basics of support printed manuals, demonstration and discussion of prototypes.

**Courses:** IT30, IT35/IT40, IT38/IT45

**Prerequisites:** ITN211, ITN227 or equivalent or permission of Unit Coordinator.

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB254

**Campus offered:** GP **Semester:** 1, 2

► **ITN255 KNOWLEDGE MANAGEMENT**

The unit focuses primarily on three main areas of understanding: knowledge management fundamentals; the management of knowledge in consulting and advisory firms; and knowledge management as it relates to information management, strategic management, large scale information systems such as ES and the operation of software and hardware support organisations.

**Courses:** IT38/IT45, IT35/IT40

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB255

**Campus offered:** GP **Semester:** 1

► **ITN257 MULTIMEDIA SYSTEMS**

Multimedia Authoring; Cognitive aspects of multimedia; The Media Elements; Still images, vector images and text; Video and animation; Sound (wave form, MIDI, voice); Compression and transmission of multimedia; Hypermedia; Client/Server considerations for multimedia delivery; Programming development for multimedia; Combining media; The Future in Multimedia.

**Courses:** IT38/IT45, IT30/IT45

**Prerequisites:** ITN227

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB257

**Campus offered:** GP **Semester:** 1, 2

► **ITN258 ABAP PROGRAMMING**

Characteristics and features of the ABAP Workbench environment; ABAP data modelling tools; ABAP language basics; Principles of report and screen design; Development of reports and dialogue screens in ABAP; Coding transactions in ABAP.

**Courses:** IT38/IT45, IT35/IT40

**Prerequisites:** IT38/IT45: ITN223, IT35/40: Nil

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB258

**Campus offered:** GP **Semester:** 1, 2

► **ITN260 E-COMMERCE SITE DEVELOPMENT**

The aims of an electronic commerce site. The business objectives. Issues: design, software, databases, payment, staffing, hosting and maintenance. Applications development over the Internet. Producing and evaluating site quality.

**Courses:** IT38/IT45, IT35/IT40

**Prerequisites:** ITN257 or ITN524

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB260

**Campus offered:** GP **Semester:** 1, 2

► **ITN262 E-COMMERCE TECHNOLOGIES**

This unit provides an introduction to some of the information technologies being used to support electronic commerce. In particular, it will cover (1) Java-based technologies, including JDBC, servlets, and Java Server Pages, and (2) XML-based technologies, including XSL. The unit will also cover a number of applications of electronic commerce, including electronic services, catalogues, negotiation and trading.

**Courses:** IT38/IT45, IT35/IT40

**Prerequisites:** IT35/IT40: Nil, IT38/IT45:

ITN212 and ITN410

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **ITN263 WEB INTELLIGENCE FOR E-COMMERCE**

The notions of agency, a taxonomy of intelligent agents, agent communication languages, the Belief-Desire-Intention agent model, Web-based intelligent information agents, agent-mediated electronic-commerce, collaborative filtering in Recommender systems, data mining methods for web content analysis, statistical approaches for Web users' profiling, automated negotiation in electronic market-places.

**Courses:** IT38/IT45, IT35/IT40

**Prerequisites:** Basic knowledge in sets, functions, and predicates (eg by completing ITN243 or ITN212); and basic Java 2 programming skill

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **ITN264 INFORMATION SYSTEMS CONSULTING**

This unit examines the strategic and operational environment of an IS consulting firm. It looks at the lifecycle of an IS consulting engagement and the issues involved at each stage of that lifecycle. The marketplace for IS consulting firms is appraised to give students a better understanding of their positioning and the role of consultants within the different market sectors. Context is provided by examining specific IS consulting practices such as large scale software implementation, systems integration and development and IS Strategic Planning.

**Courses:** IT35/IT40, IT38/IT45

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** GP **Semester:** 1

► **ITN265 MANAGEMENT OF INFORMATION PROGRAMS**

Application of management techniques at different levels to information services, in particular libraries and library procedures; administrative structuring of libraries and the corporate environment; library technical and service divisions and the application of staff development, automation, performance evaluation and financial control to specific work areas; communication processes within libraries and between staff and users; leadership and professionalism in the context of libraries; human resource and financial planning; strategic planning.

**Courses:** IT38/IT45

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB265

**Campus offered:** GP **Semester:** 2

► **ITN266 PRINCIPLES OF INFORMATION MANAGEMENT**

To introduce concepts of management of information resources in organisational contexts. The effective management of information assets and utilisation of external information resources influences organisational performance. The various stages involved in the development of in-house information strategies, policies and systems are explored with reference to information as a resource. Approaches to the successful integration of technical and business skills for the tasks of information management are explored.

**Courses:** IT35/40, IT38/45

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB266

**Campus offered:** GP **Semester:** 1

► **ITN267 DATA WAREHOUSING FOR DECISION SUPPORT**

Taxonomy of Management Information Systems (FIS, EIS, GIS, MIS etc), Data Driven Decision Support Systems, Building Data Warehouses for Decision Support, Online Analytical Processing (OLAP) Interfaces, Data Mining for Decision Support.

**Courses:** IT35/40, IT38/45

**Prerequisites:** ITN212, ITN232

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITN242

**Campus offered:** GP **Semester:** 1, 2

► **ITN271 WORKFLOW MANAGEMENT**

Workflow Management as a perspective on Process Engineering, Benefits, Success Factors, Selection and Implementation, Workflow Modelling, Petri Nets, Workflow Patterns, Organisational Modelling, Workflow Architectures and

## UNIT SYNOPSES

Workflow solutions, Workflow-based process Controlling, Workflows on the Web.

**Courses:** IT38/IT45, IT35/IT40

**Prerequisites:** ITN252

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► ITN272 INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Project Scoping, Benefits Realisation, Organisational Cultures, Group Dynamics and Communication within Teams, Risk Assessment and Quality Management, Projects Scheduling and Contingency Management

**Courses:** IT35/IT40, IT38/IT45

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► ITN322 INFORMATION RESOURCES

Managing information; database structure, basic searching; online industry; searching and the searching process; search strategies; online sources, Dialog etc, CD-ROMs; the Internet historical background and searching tools; management aspects of using external search services; and legal information sources; research and development information sources; demographic data; government resources; marketing information sources; patents, standards; census data, company annual reports; people as sources of information; ethics of information gathering.

**Courses:** IT38/IT45

**Prerequisites:** To have completed units in programming, rational database theory and systems analysis and design techniques

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB322

**Campus offered:** GP **Semester:** 2, 3

### ► ITN330 INFORMATION ISSUES

Concepts of information and associated information technology create fundamental issues for society, particularly in the political and social arenas. This unit explores the development of the information society concept and policy issues in both public and private organisations as well as professional bodies such as the Australian Computer Society and Australian Library and Information Association. Representative issues addressed are: information ownership, equity in information access, protection of information, Internet censorship and pornography, information overload, and other IT-related issues. Also examined are issues of professional responsibility and ethics in the information professions, a framework for ethical use of information in organisations, and the influence that legislation may have on information policy.

**Courses:** IT38/IT45

**Prerequisites:** To have completed units in programming, rational database theory and systems analysis and design techniques

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB330

**Campus offered:** GP **Semester:** 1, 2

### ► ITN335 DIGITAL LIBRARIES

The development of automated library systems based upon analysis of subsystems such as acquisitions, circulation, cataloguing, reference and information retrieval and special materials control; standards for description, distribution and retrieval of information in such systems; integration of subsystems; linking of systems into networks and organisation of document delivery, access to digital collections, knowledge representation and information retrieval from databases and resource discovery within a coordinated framework; digitisation programs and their management.

**Courses:** IT38/IT45, IT25

**Prerequisites:** ITN211

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB335 **Semester:** 2

### ► ITN336 INFORMATION SOURCES 1

Different media and the publishing process; primary, secondary and tertiary published information resources; lead-in tools, general reference tools, abstracting and indexing services (print and electronic); characteristics of resources in business, law, government, science, technology, health and medicine, humanities and social sciences; conducting a client interview; selecting a

database; selecting a database provider; developing a search strategy; designing a search query; the proliferation of Internet resources; web organization; search engines; digital reference services; reference, instruction and information literacy; management of the reference process, the value of information literacy competencies.

**Courses:** IT25

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► ITN337 INFORMATION ORGANISATION 1

Principles and strategies for organising information; the nature of information; theory of indexing and classification; the structure of bibliographic databases and bibliographic records; international standards for information organization; subject heading lists; library catalogues; indexing and abstracting services; library networks; adopting a client-approach to knowledge organization; developing personal heuristics for approaching unfamiliar technologies.

**Courses:** IT25

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► ITN338 INFORMATION RESOURCES PROVISION

An introduction to the concept of information and the relationship of information resource provision to community information needs and wants. The various media and formats used for the recording of information as well as the information content itself are analysed in terms of how well these meet the requirements of a variety of information end-users. The characteristics of the range of media producers/publishers are investigated from the point of view of how these media may be acquired and the equipment resource implications entailed. Topics related to the purchase and retention of resources are tackled in the light of possible alternative sources of provision and the information needs of the immediate clientele as well as the needs of the wider Australian community. The development of a collection policy document, collection evaluation, procedures for maintaining collection currency and the legal and ethical dimensions of information resource provision are also highlighted.

**Courses:** IT25

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB338

**Campus offered:** GP **Semester:** 2

### ► ITN339 PROFESSIONAL PRACTICE

This unit provides both an opportunity for students to spend a period of time in the professional working environment, and an opportunity to examine through a seminar series many of the issues that have an impact upon professionals working in information agencies with particular reference to libraries. It will provide a contemporary perspective of the role of libraries and information agencies; alternative approaches and technologies for information provision and dissemination; processes and techniques of communication; social and legal framework affecting information provision; the role of librarians and information professionals. Students will complete two fieldwork placements of fifteen days each. Their fieldwork placements are to be organised by the students, in conjunction with a faculty supervisor.

**Courses:** IT25 **Prerequisites:** ITN336, ITN337

**Contact hours:** 2 per week, plus 2 placements of three weeks

**Credit points:** 12 **Incompatible with:** ITB339

**Campus offered:** GP **Semester:** 2

### ► ITN350 INFORMATION CONTEXTS

Survey research methods; proposal writing; ethics in the provision of information resources and information services; marketing of information services; user education; referral services; an overview of programs providing information resources and services for persons with special needs; developing reliable and valid measuring instruments for program evaluation.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** Completion of IT25

**Credit points:** 12 **Campus offered:** GP

### ► ITN361 INFORMATION USER INSTRUCTION

This unit introduces students to principles and techniques for designing, implementing and evaluating instruction which will enhance their client's ability to work within contemporary information environments. Different approaches to information literacy and information literacy education will be considered, and ways of conceiving teaching and learning will be explored.

**Courses:** IT25, IT38/IT45, IT35/IT40

**Prerequisites:** ITN336, ITN337

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► ITN410 SOFTWARE PRINCIPLES

This unit will cover: a review of programming fundamentals in C; advanced programming techniques—recursion, dynamic memory allocation and pointer-linked structures, file input/output; the Abstract Data Type (ADT) concept and its expression in C; standard abstractions—stack, queue, sequence, table—and their implementations—arrays, linked lists, binary search trees, hash tables; algorithm analysis—complexity measures, the big-O notation; software engineering—analysis, specification, design coding, test planning and testing, documentation and life cycle. This unit provides students with practical experience in designing, implementing and testing software.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** Previous one-semester tertiary level programming unit using a modern block-structured language (eg Pascal, Modula, Ada, C, Java)

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

### ► ITN412 TECHNOLOGY OF INFORMATION SYSTEMS

Topics include: Number systems, data formats, the CPU and memory, instructions in the computer, programming tools, input/output, computer peripherals, the user view of operating systems, the internal operating system and file management.

**Courses:** IT38/IT45

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB113, ITB412

### ► ITN413 COMPUTER ARCHITECTURE

This unit encompasses: The organisation of simple computer systems and the way in which hardware provides the basic facilities for the machine, Programming at the assembly language level (80x86 assembly language is used). The programming of input-output operations including the use of the interrupt mechanism which underlies operating system organisation of uni-processor systems

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITB412 or ITB113

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB420

**Campus offered:** GP **Semester:** 1, 2

### ► ITN414 SOFTWARE DEVELOPMENT 3

The unit makes use of the C programming language as a tool for expressing abstraction and modular programming. Advanced table abstractions (balanced trees and hashing) are introduced along with the graph ADT, its implementation, and several common graph algorithms. Formal specification of programs is considered essential for abstract reasoning about data types and is integrated into the unit, as in the prerequisites.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITB411 or ITB112

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB421

### ► ITN415 OBJECT TECHNOLOGY

This unit builds on students' basic understanding of software engineering principles by considering the object-oriented paradigm for the design and implementation of a solution to a given software engineering problem. The implementation component builds on students' knowledge of the C programming language by teaching the C++ programming language.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** Knowledge of the C language and Abstract Data Types eg ITB421 or ITN410

## UNIT SYNOPSES

**Contact hours:** 3 per week    **Credit Points:** 12  
**Incompatible with:** ITB448

### ► ITN424 SOFTWARE ENGINEERING PRINCIPLES

This unit presents the principles of software engineering and the associated techniques and tools for producing software systems that are reliable, within budget, fully documented, and well tailored to requirements.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITB112 or ITN410 and ITB106 (A knowledge of Java is recommended)

**Contact hours:** 2.5 per week    **Credit points:** 12  
**Incompatible with:** ITB424

### ► ITN427 CONCURRENT AND DISTRIBUTED SYSTEMS

Unit is intended to provide students with an understanding of the process management, process communication and functions of modern operating systems, of notions of concurrency and parallelism, and of the nature and functions of distributed systems. Unit focuses on contemporary operating systems, UNIX windows, including use of Java and addresses related theoretical principles upon which such systems rely. Emphasis is on practical work, involving selected programming principles and algorithms used widely in development of system software for both large and small computer systems. Assignment work includes use of threads and remote method invocation for distributed programming. Other practical work covers scheduling, protection and UNIX process communication.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITN414 and ITN412 or equivalent units

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP    **Semester:** 1, 2

### ► ITN432 ADVANCED PROGRAMMING LABORATORY

This unit is designed to allow a team of students to develop their own solution to a large project acting as clients of an industry based partner. A software engineering approach is taken with the development of system documentation to support the system software that is developed.

**Courses:** IT38/45, IT35/40

**Prerequisites:** IT38/45: ITN424, IT35/40: ITN415 and ITN424

**Contact hours:** 3 per week    **Credit points:** 12

### ► ITN433 PROGRAMMING LANGUAGES

General language overview: syntax, semantics, and types. Study of a modern functional language: types, higher-order routines, polymorphism, algebraic data types, and I/O. Language processing: scanners, parsers, translators, interpreters and compilers, grammars, abstract vs concrete syntax, type rules and abstract machines. Examples, simple arithmetic expressions and a mini-programming language: EBNF and recursive descent parsing, interpretation, compilation, translation and simple type checking. Networking programming language processing.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITB112 Software Development 2

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITB433

### ► ITN440 GRAPHICS

This is a general introduction to the area of computer graphics. It includes topics on: geometric modeling (how to construct an object to be displayed); 2D and 3D transformation (how to move the object around); hidden surface removal, illumination and shading (how to make the object look realistic); the software that will enable this process to be implemented; and an understanding of the way the hardware (specifically the display technology) effects the graphical output of the software.

**Courses:** IT38/IT45, IT35/IT40

**Prerequisites:** ITN410 Software Principles

**Contact hours:** 3 per week    **Credit Points:** 12  
**Incompatible with:** ITB441    **Semester:** 1

### ► ITN446 MINOR PROJECT 1 (CS)

Students may pursue a specialised area or broaden their knowledge in areas of relevance to their employment. Topic is decided by agree-

ment between the student and a supervising staff member.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** 48 credit points in relevant post-graduate units

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP    **Semester:** 1, 2

### ► ITN449 MINOR PROJECT 2 (CS)

Students may pursue a specialised area or broaden their knowledge in an area of relevance to their employment. Topic is decided by agreement between the student and a supervising staff member.

**Courses:** IT35/IT40

**Prerequisites:** 48 credit points in relevant post-graduate units

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP    **Semester:** 1, 2

### ► ITN450 COMPILER LABORATORY

Students will work individually or in small groups on a project based around the .NET or JVM version of GP Component Pascal.

**Courses:** IT60, IT35/IT40, IT38/IT45

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP    **Semester:** 1

### ► ITN457 WINDOWS PROGRAMMING

The unit starts by using MFC (in Visual C++) to introduce the theory and practice of developing windows applications. Throughout the unit, MFC is contrasted with Visual Basic; comparing factors such as expressiveness, efficiency and ease of use. Emphasis will be placed on concepts that are common to all windows development environments, namely general windowing concepts, the underlying MS Windows API they are built from, and the event-based style of programming they require. The unit will also introduce a number of cutting-edge technologies such as ActiveX and component based development. Finally, MFC will be contrasted with other development environments, such as Borland C++Builder, Delphi, Java AWT, ASP, and DHTML. The new Microsoft .NET environment will also be introduced.

**Courses:** IT38/IT45, IT35/IT40

**Corequisites:** ITN448

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITB457

**Campus offered:** GP    **Semester:** 2

### ► ITN458 JAVA AND EXTENSIBLE PROGRAMMING

An introduction to the Java language, its standard libraries, the theoretical models underpinning the design decisions of language and libraries, the creation of Java applications and applets. Broader issues of runtime extensibility and the relationship to distributed connectivity. The unit is divided into three major modules: Object-Oriented Programming in Java (weeks 1-5); Advanced Language Features (weeks 6-9); and Distributed Connectivity (weeks 10-13).

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITB421 or equivalent knowledge of Data Structures and C or ITN410 or ITN414

**Contact hours:** 3 per week    **Credit Points:** 12

**Incompatible with:** ITB458

### ► ITN464 MODERN COMPILER CONSTRUCTION

Regular expressions and context free grammars are introduced as convenient notations for formally specifying programming languages. The mechanical recognition of such languages is considered from a formal as well as practical/implementation point of view. Attribute grammars are discussed as a way of extending these simple recognisers into useful language translation tools. Intermediate forms such as abstract syntax trees and intermediate languages are examined as a bridge to machine code. Code generation for a realistic RISC machine is studied to give concrete results. The separate, but not independent compilation of modules will be discussed together with an introduction to code optimisation. Compiler-generator tools will also be discussed.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITN414

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP    **Semester:** 1

### ► ITN469 UNIX SYSTEM PROGRAMMING AND ADMINISTRATION

Unit introduces students to the inner workings of the UNIX operating system. The unit commences by examining the requirements of administering a simple LINUX system, including a study of UNIX shell scripting. This is followed by a broad examination of the architecture of the UNIX operating system. Topics covered include: UNIX kernel, structure of file subsystem, process management, Scheduling, device I/O and inter-process communication (IPC). Finally, the unit concludes with an introduction to the security aspects of LINUX/UNIX operating system.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITN426 or ITN427

**Contact hours:** 3 per week    **Credit Points:** 12

### ► ITN470 WINDOWS 2000 SYSTEM PROGRAMMING AND ADMINISTRATION

The unit comprises four main blocks: Windows 2000 architecture and functional objectives; Windows 2000 input output architecture and networking support; Performance monitoring and troubleshooting and; System configuration and resource management

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITN427

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP    **Semester:** 2

### ► ITN510 DATA COMMUNICATIONS

An introduction to telecommunications and data communications networks with specific reference to the World Wide Web (WWW), Local Area Networks (LANs) (eg Ethernet), Wide Area Networks (WANs), and communications architectures (eg TCP/IP). An overview of network management and network security issues.

**Courses:** IT35/IT40, IT38/IT45

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITB510

### ► ITN523 DATA SECURITY

IT systems are increasingly used to store, process and exchange information. This unit enables students to identify security issues with information systems used by entities ranging from a single user to a large organisation. Upon completion of the unit, students should be able to understand major information security goals, describe and identify threats to information security and demonstrate knowledge of available counter measures and controls.

**Courses:** IT38/IT45, IT35/IT40

**Prerequisites:** IT38/IT45: ITN510

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITB523

**Campus offered:** GP    **Semester:** 1, 2

### ► ITN524 INTERNETWORKING

This unit covers in some detail the theory and practice of internetworks through an understanding of the operation of the TCP/IP protocol suite, including the routing of IP packets, the operation of TCP, and the role of the major auxiliary protocols. Other features and functions of internetworks are also considered. The unit has a significant hands-on component.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** IT35/IT40: Nil, IT38/IT45:

ITN510

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITB524

**Campus offered:** GP    **Semester:** 1, 2

### ► ITN525 NETWORK ADMINISTRATION

Network Administration introduces you to the responsibilities and skills required by a local area network (LAN) administrator. You will be encouraged to develop your own approach to solving problems encountered in installing and managing a multi-user networked environment in a diverse and rapidly changing world. The skills you will acquire will enable you to efficiently administer a LAN as a world class IT professional.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITN524

**Contact hours:** 3 per week    **Credit points:** 12  
**Incompatible with:** ITB525, ITB535

**Campus offered:** GP    **Semester:** 1, 2

## UNIT SYNOPSES

### ► ITN527 NETWORK TECHNOLOGIES

The unit covers a detailed study of Internetworking technologies available to the wide area network (WAN). Contemporary issues in networking will also be visited in discussing the choice of technologies available for use in the wide area Network. Because of the rapidly changing nature of the field, an opportunity to discuss latest developments in Data Communications is allowed for at the end of the semester.

**Courses:** IT30, IT35/IT40, IT38/IT45

**Prerequisites:** ITN524

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB527, ITN540, ITB538

**Campus offered:** GP **Semester:** 1, 2

### ► ITN529 NETWORK SERVICES

This unit develops your practical knowledge of the design, implementation and operation of web based network services by using scripting programming languages. The unit involves the study of network protocols, models of client-server systems, CGI script programming, middleware, super-servers, and the security of client-server systems.

**Courses:** IT35, IT38, IT40, IT45

**Prerequisites:** IT38, IT45: ITN524, ITN410;

IT35, IT40: ITN524

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB529

**Campus offered:** GP **Semester:** 1, 2

### ► ITN531 NETWORK SECURITY

This unit considers the security and control aspects of distributed data networks with particular reference to both global and national information infrastructures. Underlying security technologies are considered within a broader legal and standards environment for the protection of enterprise networks, particularly as electronic commerce activities gather pace. Research topics in this area will also be identified.

**Courses:** IT30, IT35/IT40, IT38/IT45

**Prerequisites:** ITN566 or ITN569

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► ITN533 COMPARATIVE NETWORK SYSTEMS

In this unit, students will complete laboratory exercises as a Microsoft Windows network administrator. Topics include: performance, fault, configuration and security management, registry management, customisation of off-the-shelf products, file systems, printing, user administration and interfacing with other networks, such as Novell NetWare and Unix. This unit should assist those who are interested in becoming a Microsoft Certified Systems Engineer (MCSE).

**Courses:** IT35/IT40 **Prerequisites:** ITN525

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB533

**Campus offered:** GP **Semester:** 1

### ► ITN536 TOPICS IN SECURITY

Puts the role of security services and mechanisms into perspective; demonstrates how security services can form part of a secure system; makes use of case studies to illustrate real-world problems; typical case studies may include: secure electronic mail, electronic commerce, security of medical information, secure mobile communications, satellite TV; each student will conduct their own case study of a particular application.

**Courses:** IT30, IT35/IT40, IT38/IT45

**Prerequisites:** ITB523/ITN523\* or

ITB566/ITN566\*

**Corequisites:** \*Unit can be taken as a corequisite

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► ITN551 NETWORK PLANNING

Strategic planning and network technology; networked business applications; analysing and assessing networking opportunities; determining networking requirements; local and wide area network design issues; future planning.

**Courses:** IT35/IT40 **Prerequisites:** ITN527

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB551

**Campus offered:** GP **Semester:** 2

### ► ITN556 ADVANCED TOPICS IN CRYPTOLOGY

Design and cryptanalysis of ciphers; in-depth study of methods for forming secure ciphers and attacking various ciphers; secret sharing schemes; crypto-protocols, including zero knowledge systems; current topics in cryptology.

**Courses:** IT30, IT35/IT40

**Prerequisites:** ITN566

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► ITN564 APPLICATION SERVICES

The unit describes the role of networked object-oriented applications for data communications in a modern technological environment and examines their design and implementation. It covers basic concepts and terminology; the standards used by industry; client server design methodologies; client software and server software for object-oriented data communications involving distributed data and distributed processing on networks; and collaborative computing.

**Courses:** IT35/IT40, IT38/IT45

**Prerequisites:** ITN529 or ITN458

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB564

**Campus offered:** GP **Semester:** 2

### ► ITN565 NETWORK MANAGEMENT

Management of a large network is significantly more difficult than the administration of a small network, and requires significant additional knowledge and skills. Many Data Communications graduates will be required to manage such networks. This unit will introduce the student to the essential issues in network management, and provide appropriate experience in the configuration and operation of network management systems.

**Courses:** IT35/IT40 **Prerequisites:** ITN525

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB565

**Campus offered:** GP **Semester:** 1, 2

### ► ITN566 INTRODUCTION TO CRYPTOLOGY

This unit provides students with a background in the fundamental concepts of cryptology, both in the areas of cryptography and cryptanalysis. Topics include: classical, modern and public key ciphers; practical cryptology.

**Courses:** IT35/IT40, IT38/IT45

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB566

**Campus offered:** GP **Semester:** 1

### ► ITN568 WIRELESS NETWORKS

Wireless communications is rapidly becoming a more and more important part of everyday life. This unit aims to give the students the skill to be able to design and manage different types of wireless communication systems. Technologies to be covered include GSM, CDMA, Bluetooth, IEEE 802.11, WAP and Third Generation wireless networks. A demonstrative and experimental approach will be taken to assist with developing the student's understanding. Students will also learn through undertaking small projects in the area.

**Courses:** IT35/IT40 **Prerequisites:** ITN527

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB568

**Campus offered:** GP **Semester:** 2

### ► ITN569 NETWORK SECURITY FOR E-COMMERCE

Network Security is required for all internet-networked information systems. This advanced unit builds upon prior knowledge in data security and develops your practical knowledge of E-Commerce security. Implementation of security at every level of the current network models and architectures are investigated. From this, the development of policies and procedures will be formed, which will provide the structure for the implementation of secure E-commerce systems.

**Courses:** IT38/IT45, IT35/IT40

**Prerequisites:** ITN523

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** ITB569

**Campus offered:** GP **Semester:** 1

### ► JSB131 FRAMING SOCIAL JUSTICE

The Justice Studies degree is about producing competent justice professionals. In order to achieve this purpose, this degree combines knowledge of the criminal justice system with an understanding and appreciation of the complexities of social justice. The purpose of this unit is to introduce students to the structural parameters of social justice.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB101, JSB011

### ► JSB132 PROFESSIONAL SKILLS

The effectiveness of justice professionals is measured by their ability to communicate and investigate, and it is these two skills which form the basis for much of the day to day work performed by justice studies students and justice professionals. This unit introduces basic skills in research and written and oral communication in order to lay a successful foundation for academic and professional achievement.

**Courses:** JS31, LW42, LW41

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB012 and JSB014

### ► JSB133 LAW AND GOVERNMENT

The justice professions have as their common factor an involvement in the process of law, and particularly the administration of law and law enforcement. The increasing role of governments in law-making is a significant feature of modern times. This unit introduces you to the concepts of law and government. It examines the role of government in making and administering the law and encourages you to start thinking critically and analytically about legal, political and justice issues. Law and government provides those of you who intend to work in the justice system with a foundation framework of key legal and political information and knowledge. You will use this knowledge throughout your studies and in your future professional careers.

**Courses:** JS31

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB103, JSB013

### ► JSB134 SOCIAL ETHICS AND THE JUSTICE SYSTEM

It is essential for those working in the justice system to be able to competently and confidently work at the borders between ethics and the law. Ethical ability will enable practitioners to critically assess the moral status of current laws, to interpret acceptable standards of behaviour in situations not covered by the laws, as to develop shared understandings of moral responsibility in justice organisations and the wider community.

**Courses:** JS31, LW42, LW41

**Contact hours:** 3 per week **Credit points:** 12

### ► JSB135 UNLOCKING CRIMINAL JUSTICE

The Justice Studies Degree is about producing competent Justice Professionals. In order to achieve this purpose, this degree combines knowledge of the criminal justice system with an understanding and appreciation of the complexities of social justice. This unit in particular focuses on the theoretical and practical relationship between social justice and criminal justice by examining not only the concepts of human rights, equality, social justice and citizenship, but asking students to apply this knowledge to a series of practical situations. This application happens throughout the lectures and tutorials as well as within the assessment.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB202, JSB015

### ► JSB136 FORENSIC PSYCHOLOGY AND THE LAW

Forensic Psychology is readily acknowledged as one of the fastest growing areas of psychology in the world. The domain of forensic psychology concerns itself with the behaviour of people involved in the justice system, in particular, the criminal and civil components of the legal justice system. By its very nature forensic psychology draws from a wide multi-disciplinary base for the application of its specialised knowledge. Hence, you will need a broad introductory appreciation

and critical perspective on what forensic psychology involves and has to offer in relation to the Law and the practice of it by a range of practitioners within the legal justice system.

**Courses:** JS31, LS42, L41

**Contact hours:** 3 per week **Credit points:** 12

► **JSB137 POLITICS OF LAW**

In the Politics of Law you will develop your knowledge and understanding of legal and criminal justice processes. This knowledge is important because it will inform your study in other units in the course and equip you with the necessary understandings to enter employment in the Justice System. The unit will also provide you with knowledge necessary to act responsibly as an informed citizen in Australian society. In addition to an understanding of criminal justice related issues, this unit helps you to build on your understanding of the relationship between law and society, as well as develop problem-solving skills appropriate to a legal and justice context.

**Courses:** JS31

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB216, JSB017

► **JSB138 CRIMES OF VIOLENCE**

Justice students work, or hope to work as justice professionals in areas related to the criminal justice system or human rights. They need an understanding of fundamental principles of criminal law and of social justice issues related to criminal law. Of particular importance for these students is an understanding of issues pertaining to violent crimes as such crimes will play a focal role in their work.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB201, JSB022

► **JSB231 UNDERSTANDING CRIMINOLOGY**

This unit deals with formal criminological theories of crime and crime control. Particular attention is drawn to various concepts, assumptions and propositions contained in criminological theories and the contribution which criminological knowledge has made to advancing our understanding of crime and crime control. Criminological theories are viewed as integral to a range of governmental practices aimed at ensuring the regulation and control of particular 'problem populations'. The unit develops an analytical framework in order to critically assess the epistemological claims and justifications found in all formal articulations of criminological theory. Knowledge derived from this unit is applicable to a critical understanding of all professional and popular theories of crime.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB107, JSB018

► **JSB232 YOUTH JUSTICE**

This unit is concerned with the way in which a 'youth crime problem' is constructed and the implications of this for particular cohorts of young people in contemporary Australia. It is also concerned with the administration and management of youth crime through formal systems designed to prevent and reduce unlawful acts. Particular attention is drawn to the historical development of youth justice in Australia and to the changing nature of youth crime control across jurisdictions. Contemporary articulations of youth crime control are examined in relation to Queensland's system of youth justice, particularly as this relates to young indigenous people, young women and those from various social classes and ethnic groups. Theoretically, the unit takes as its starting point a genealogical analysis that focuses on questions of knowledge, power, regulation and discipline. These are discussed in relation to the contemporary government of young people in Australia and other 'western' countries.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB041

► **JSB233 CRIME AND COMMUNITY CORRECTIONS**

Prisons are the visible tip of the iceberg of punishment and correction in our society - Community Corrections is the beneath-the-surface bulk. The ratio of persons in prison to persons on Community Corrections Orders, across Australian jurisdictions, is approximately 1 to 3. Even though a significant proportion of those under Community Correction supervision are fine defaulters (and have committed only minor offences), it remains the case that a significant majority of those labelled 'deviant' by our police and judicial systems never go to prison. How did we arrive at this situation? We need to study the philosophical and ideological evolution of probation, parole and other alternative sanctions if we are to understand current community corrections systems.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB317, JSB073

► **JSB241 INTRODUCTION TO INVESTIGATIONS AND POLICING**

As a consequence of the changing nature of society and the criminal justice system various investigatory agencies have been established to deal with the designated investigations as well as possible breaches of any accompanying legislation. As the police make up a major part of the Criminal Justice System, it is the police who predominantly instigate criminal justice procedures which follow-on to involve other components of the Criminal Justice System. Due to the diversity of both public and private agencies becoming involved in the investigative process it is important that students grasp an understanding of the machinery of this process. Also it is considered important that students are aware of and understand the development of policing up to and including the modern democratic state, the relationship between the State, the police and justice administration, and the concepts of 'enforcement - service'.

**Courses:** JS31, LW42, LW41

**Contact hours:** 3 per week **Credit points:** 12

► **JSB242 CRIMINAL LAW IN CONTEXT**

Justice students work, or hope to work as justice professionals in areas related to the criminal justice system or human rights. They need an understanding of fundamental principles of criminal law and of social justice issues related to criminal law. Those students undertaking the Investigations, Intelligence and Policing major need to understand issues of criminal procedure and due process as well as specific contexts of criminal law.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB204, JSB024

► **JSB243 INTELLIGENCE LED INVESTIGATIONS**

Intelligence Led Investigations is the final unit for the Major in Investigation, Intelligence and Policing. Intelligence is increasingly taking a leading role in investigations with analysts setting a direction for criminal investigation teams. The unit exposes students to the essentials of the intelligence system, the intelligence process and creative problem solving skills. Intelligence professionals are also concerned with support to government, the private sector and the community. Intelligence offers an advantage through the provision of accurate and timely advice. Intelligence requires proficiency in thinking strategies and skills, interpersonal effectiveness skills, teamwork and application of intelligence process methodologies in a variety of cultural contexts.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB211, JSB061

► **JSB251 POLICY, GOVERNANCE AND JUSTICE**

Many important public policies concern issues of law and justice. As justice professionals, you may very likely be involved in your future careers in the development, analysis or implementation of criminal and social justice policies. Your involvement may be directly through government or through the community sector and interest groups. A theoretical and practical un-

derstanding of good policy making and the role of law and policy in governance will be an advantage for your career and citizenship roles.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB081

► **JSB252 CITIZENSHIP AND JUSTICE**

Society demands certain responsibilities from people once they become adults. Legal rights and responsibilities apply to adult citizens in our society whenever they engage in social relations. Some of the most important of these rights and responsibilities involve the law and occur in the areas of property, family, employment and social welfare. This subject is concerned with an analysis of the legal rights and responsibilities of adult citizens in Australia in terms of owning property, being involved in relationships, being employed or unemployed, and receiving welfare from the government.

**Courses:** ED50, JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSS005, JSB082

► **JSB253 WATCHDOGS: WARRIORS, WIMPS AND WITCH-HUNTS**

Recent growth of government activity and regulation means that strong powers have been granted to non-elected officials and the agencies they are employed by, often to perform an oversight role on public administration. Justice professionals need to know the range of agencies with such watchdog roles, and their powers and responsibilities. A good understanding of the theoretical and political framework within which the investigative and other powers of oversight agencies are exercised and utilised is important for those who may carry out, evaluate or critique the powers of such watchdogs. Citizens and justice professionals need to understand the proper use of these powers by organs of the State, as well their role, power and responsibilities in terms of public accountability. A critical perspective allows examination of whether watchdogs are toothless tigers or determined dingoes, necessary understanding for anyone concerned with accountable public administration.

**Courses:** JS31, LW42, LW41

**Contact hours:** 3 per week **Credit points:** 12

► **JSB331 PRISONS AS INDUSTRY**

The modern Western prison has a two hundred year history. That history follows no Darwinian pattern of evolutionary logic. Instead, it fits and starts, it lurches forward and leaps backwards, seemingly often at the individual whim of powerful bureaucrats rather than in response to any dominant public discourse of the time.

What does the near future hold? More prisons, less prisons or none? The technological push, increasing privatisation and expanding captive labour forces all have implications for the future of the prison. To what extent will political and economic imperatives, rather than social discourse, dictate the future of our prisons? This unit sets out to examine the future of punitive incarceration.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** JSB318, JSB074

► **JSB332 CRIME CONTROL AND GOVERNANCE**

This unit deals with the way in which crime control is administered in western neo-liberal states, with specific reference to Australia. Based on a critical criminological perspective, the unit considers contemporary 'cultures of crime control' as part and parcel of a governmental approach to the attempted management of 'problem populations' in the neo-liberal state. The key questions to be addressed in this unit are: How can we understand the current nature and extent of crime control in a country like Australia? How might a genealogical perspective assist us in developing such an understanding? How and why are cultures of crime control changing? What are the major present-day rationalities of punishment? What are the prospects for crime and punishment in the twenty-first century? How might 'globalisation' impact on such developments?

**Courses:** JS31, LW41, LW42

## UNIT SYNOPSES

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSB304, JSB021

### ► JSB333 RESPONDING TO CRIME

Current directions in research on the 'crime problem', based in developmental and cognitive psychology, outline a complex web of intervention in the lives of 'at risk' populations. This shift from a reactive crime control model to a pro-active crime prevention model, has been embraced by governments at both state and federal level in Australia and elsewhere. Students intent upon working in the criminological field need to fully understand both the strengths and weaknesses of this new way of understanding crime. Most important however, will be the implications of such a major shift in the control of 'criminal populations', which is well beyond the scope of the traditional criminal justice system.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSB044

### ► JSB341 INVESTIGATIONS, EVIDENCE AND POLICE POWERS

Students endeavouring to undertake employment within the Justice System need to be introduced to a core component of that System, namely, the criminal law particularly Police Powers and evidence. This unit of study will provide a comprehensive knowledge base of some of the principles, rules and concepts of police powers and selected evidentiary components. This together with an understanding and application of these principles, concepts and rules to selected situations will ensure a better analysis and appreciation of the workings of the Criminal Justice System as a whole.

**Courses:** JS31, LW42, LW41

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSB031, JSB051

### ► JSB342 ORGANISED CRIME

The apparent growth of organised crime, both nationally and internationally, in recent years has resulted in a deepening commitment on the part of law enforcement agencies to its suppression. Although not confined to the association with illicit drugs, the so-called drug trade is a major enterprise behind the proliferation of organised crime. Another consequence of organised crime is the development of corruption through the diverse levels of society. Students therefore will gain an understanding of the historical development, social perceptions and consequences and the perceived extent of organised crime. Students will also consider the strategies employed to combat organised crime including the extent of investigations and/or Commissions of Inquiry documented to date.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSB310, JSB053

### ► JSB343 FUTURE POLICING STRATEGIES

The role of policing has changed considerably since its inception. The last decade or so has been particularly transient. The enforcement emphasis that was previously promulgated has been refocused towards service to the community and problem solving in collaboration with the community, not wholly resting with the police agencies. In addition, the advancements in technology and overall societal changes have also impacted on the role of policing within contemporary society. On this basis students undertaking this unit will be exposed to some of the issues that require further debate and analysis as we move into the 21st century.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSB054

### ► JSB351 ADMINISTRATIVE JUSTICE

It is essential that justice professionals know and understand the rules of administrative law as well as the underlying philosophy of administrative justice so that those working in the public sector understand the rules that guide their decision making as well as the avenues of appeal from any decision they make. Those working in the community sector need to know how to question administrative decisions and actions and be

able to challenge the power of government when it contravenes principles of administrative justice. The unit is organised around theoretical perspectives of democracy, specifically participation and accountability, and examines mechanisms of State accountability, their philosophy and practice so as to provide a strong working knowledge of the administrative justice system and its legal, social and political environment.

**Courses:** ED50, JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSB083

### ► JSB352 INDIGENOUS JUSTICE

It is essential that justice professionals know and understand the rules of administrative law as well as the underlying philosophy of administrative justice so that those working in the public sector understand the rules that guide their decision making as well as the avenues of appeal from any decision they make. Those working in the community sector need to know how to question administrative decisions and actions and be able to challenge the power of government when it contravenes principles of administrative justice. The unit is organised around theoretical perspectives of democracy, specifically participation and accountability, and examines mechanisms of State accountability, their philosophy and practice so as to provide a strong working knowledge of the administrative justice system and its legal, social and political environment.

**Courses:** JS31, LW42, LW41

**Contact hours:** 3 per week **Credit points:** 12

### ► JSB353 GLOBAL JUSTICE

Debates over the protection and enforcement of human rights norms within the Australian social, legal and political landscape are increasingly prevalent. The influence and impact of human rights standards in the enactment of legislation, policy and public administration needs to be understood by all justice professionals, particularly since moves by the High Court in the last decade to increasingly recognise and incorporate international human rights norms into Australian law. Similarly, knowledge and understanding of Australia's international, regional and domestic human rights obligations and activities are vital for all justice professionals. An understanding of the theoretical and practical frameworks of human rights norms and their influence in global justice is necessary to foster a critical appreciation of Australia's position and role in the enhancement of global justice.

**Courses:** ED50, JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSB314, JSB084

### ► JSB401 APPLIED CRIMINOLOGY

Expands knowledge of theories of criminality and an understanding of criminology as a discipline. In particular, the unit examines key and emerging debates within criminology and invites students to apply theoretical knowledge to contemporary, practical situations. Issues to be canvassed will include fear of crime, crime prevention strategies, white collar crime, criminal careers and the over-representation of indigenous people in the criminal justice system.

**Courses:** JS40

**Credit points:** 12

### ► JSB405 JUSTICE ORGANISATIONS

In justice organisations, whether they are government or non-government, dynamics operate that mark the organisation as more or less effective, efficient or accountable. The culture of a particular organisation underpins much of what occurs both internally and in its external relationships. The dynamics and the culture can be understood from a variety of perspectives. It is important that serving professionals or those seeking entry into such organisations have some understanding of the issues that impact on organisational culture and attitudes as it relates to justice organisations.

**Courses:** JS40

**Contact hours:** 3 per fortnight **Credit points:** 12

### ► JSB406 THESIS 2

Students are required to submit a research thesis of approximately 15000 words. It is expected that the thesis will be based upon an empirical

study of a particular field related to the Justice professions.

**Courses:** JS40

**Prerequisites:** JSB404

**Credit points:** 36

### ► JSB407 THESIS 3

Part-time students are required to submit a research thesis of approximately 15000 words. It is expected that the thesis will be based upon an empirical study of a particular field related to the Justice professions.

**Courses:** JS40

**Prerequisites:** JSB404

**Credit points:** 12

### ► JSB408 THESIS 4

Part-time students are required to submit a research thesis of approximately 15000 words. It is expected that the thesis will be based upon an empirical study of a particular field related to the Justice professions.

**Courses:** JS40

**Prerequisites:** JSB404

**Credit points:** 24

### ► JSB411 THEORIES OF JUSTICE 1

Arguments concerning perceived problems of justice and injustice usually reveal conflicting ideas about what justice actually means both theoretically, and in practice. Students who are to graduate with honours in a Bachelor of Justice require a sophisticated level of understanding of theories of justice in a social and criminal context if they are to effectively apply in practice the content knowledge they have acquired in the course of their study.

**Courses:** JS40

**Contact hours:** Regular meetings with supervisor

**Credit points:** 12 **Incompatible with:** JSN001

### ► JSB412 LITERATURE REVIEW

Employment as a researcher in government departments and justice agencies and the successful undertaking of higher degree study require an ability to independently design and execute complex research projects. The Honours year is often the first time that students have been required to research independently. An integral part of good research is the establishment of parameters within which their research should proceed. Knowledge of the literature in and around the chosen topic is vital to establishing the basis of a good research project. This unit will provide students with an opportunity to become thoroughly familiar with the bibliography of specialised literature relevant to their nominated field of research and to appreciate the significance of literature reviews to larger research projects.

**Courses:** JS40

**Contact hours:** 3 per week **Credit points:** 12

### ► JSB413 COLLOQUIUM

To engender support for on-going projects and to enlist the co-operation and/or collaboration of peers and superiors it is necessary for researchers to be able to make effective oral and multi-media presentations about their work. Students embarking upon an honours year of specialised research, require support, a collegial atmosphere for their work, regular contact with peers and supervisors and the opportunity to discuss their research, defend its parameters and to acquire skills of critique and analysis.

This unit will offer honours students an opportunity to acquire these skills in a supportive and collegiate atmosphere.

**Courses:** JS40

**Contact hours:** 3 per fortnight **Credit points:** 12

### ► JSB414/1 THESIS 1

A research thesis is the major component of the Honours course. It provides students with an opportunity to conceive, design and execute a major research project with specialist supervision. This unit in conjunction with thesis 2, 3 and 4 is a major part of the Honours program and begins the process of thesis conceptualisation and formulation. Together with the unit, Literature Review, this unit provides the first semester preparation for the honours dissertation.

**Courses:** JS40

**Contact hours:** Regular meetings with supervisor

**Credit points:** 12 **Incompatible with:** JSB404

## UNIT SYNOPSES

### ► JSB414/2 THESIS 2

This unit comprises the further research and writing of the honours dissertation, under the direction of the supervisor. The production of the honours dissertation is the main objective of the honours program. Justice Studies students successfully completing the honours year will have acquired high level research and writing skills relevant to both higher degree study and a career in the justice professions.

**Courses:** JS40

**Prerequisites:** JSB414/1

**Contact hours:** Regular meetings with supervisor

**Credit points:** 12 **Incompatible with:** JSB406

### ► JSB414/3 THESIS 3

This unit comprises the further research and writing of the honours dissertation, under the direction of the supervisor. The production of the honours dissertation is the main objective of the honours program. Justice Studies students successfully completing the honours year will have acquired high level research and writing skills relevant to both higher degree study and a career in the justice professions.

**Courses:** JS40

**Prerequisites:** JSB414/1, JSB414/2

**Contact hours:** Regular meetings with supervisor

**Credit points:** 12 **Incompatible with:** JSB407

### ► JSB414/4 THESIS 4

This unit comprises the further research and writing of the honours dissertation, under the direction of the supervisor. The production of the honours dissertation is the main objective of the honours program. Justice Studies students successfully completing the honours year will have acquired high level research and writing skills relevant to both higher degree study and a career in the justice professions.

**Courses:** JS40

**Prerequisites:** JSB414/1, JSB414/2, JSB414/3

**Contact hours:** Regular meetings with supervisor

**Credit points:** 12 **Incompatible with:** JSB408

### ► JSB931 INDEPENDENT STUDY

In the course of their study, Justice Studies students may discover an area that is of particular interest to them, or which has specific relevance to their intended professional orientation. This unit gives students the opportunity to extend aspects of their coursework or professional interests in more depth as well as to continue the process of refining and developing research skills.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSB312, JSB092

### ► JSB932 ALTERNATIVE JUSTICE PROCESSES

Conflict is inevitable in society. A major aim of any justice system must be to manage and resolve conflict through efficient, effective and equitable processes. This unit will equip you with the knowledge, understanding and skill needed to work effectively as a professional in the Justice system. You will develop an understanding of concepts of conflict and critically examine a number of models of conflict resolution from the formal adjudication of the legal system, to the less structured forum of mediation, to the process of negotiation. The unit will also help you to develop the professional and interpersonal skills necessary for you to manage conflict effectively in a variety of contexts relevant to the Justice system.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSB032

### ► JSB933 CRIME RESEARCH METHODS

It is essential that students undertaking research projects both professionally and academically, have a solid knowledge and understanding of research design and analysis. This subject builds upon research skills acquired in first and second year study and is thus intended to provide advanced knowledge and skills in research design and methodology for use in the fields of criminal justice, justice administration and criminology.

**Courses:** JS31, LW41, LW42

**Contact hours:** 3 per week **Credit Points:** 12  
**Incompatible with:** JSB043

### ► JSB934 PROFESSIONAL PLACEMENT

In order to operate effectively in the workplace students will need to be able to connect and apply the knowledge and theory they have gained from the other units in the course to the practice of the profession in which they gain employment.

**Courses:** JS31, LW42, LW41

**Corequisites:** 240 credit points and minimum GPA of 5

**Credit points:** 12

### ► JSB935 CONTRACTUAL JUSTICE

We are surrounded, in our day to day adult lives, with legally binding promises. These can range from relatively simple promises like purchasing a train ticket to far more complex million dollar deals. It is through the law of contract that we can understand these promises and the ways in which they become legally binding. It is important that legal and justice studies students understand the nature of contractual promises as they will be particularly involved with them in their working lives, and will need to be aware of what characterises contractual promises, how they are interpreted, how they affect us once validated, how they can be invalidated or discharged and what sorts of remedies arise from them. Such promises follow us through life, not only at work, but also as consumers and increasingly even in our family relationships. Hence an understanding of contract in a broad sense, encompassing quasi-contracts and more recently trade practices law, will guide us in our business and family dealings. This unit provides the foundation for an understanding of this crucial area of law and legal obligations.

**Courses:** ED50, JS31

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSS002, JSB086

### ► JSB936 COMPENSATION AND REPARATION

The appropriateness of compensation as a remedy is a very important topic and it is important that we understand the boundaries to compensation, as well as the reasons that we may have to pay compensation and the many types of conduct that provoke compensation claims. This unit provides the foundation for an understanding of this crucial area of law and legal obligations

**Courses:** ED50, JS31

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** JSS003, JSB087

### ► JSB937 FORENSIC SCIENTIFIC EVIDENCE

This unit is designed for students of science and law, who seek a knowledge of uses of science in law. The unit emphasises the fundamental links between, science, social justice and the legal system while outlining the various rules of evidence in Australian courts. Professionals involved in science, law enforcement and justice administration need a clear understanding of the fundamental rules and legal principles relating to the investigation of, and admissibility of evidence. The rationale is to provide knowledge that equips students to work in this area.

**Courses:** SC01, JS31, LW42, LW41

**Contact hours:** 3 per week **Credit points:** 12

### ► JSN002 THEORETICAL CRIMINOLOGY

Examines the development of criminological theory through the prism of governmentality. Attention is paid to the emergent contexts of criminological theories, and the contribution these have made to advancing our understanding of crime and its attempted management.

**Courses:** JS51, LW51

**Contact hours:** 2 per week **Credit points:** 12

### ► JSN005 THEORIES OF JUSTICE 2

Extends and develops the framework introduced in Theories of Justice I. The focus of the unit is on the interface between public policy and the Law as an instrument of social transformation in a Liberal Democratic Society. Initially, the unit explores the development of emotional and

moral reasoning as a backdrop to the larger analysis of various public policies. The unit provides the opportunity for students to carry out advanced research into various justice models and their implications/applications as well as to produce a range of evaluative criteria against which to judge the degree of 'justice' in relation to a particular social problem within the realm of legal and public policy.

**Courses:** JS51, LW51 **Prerequisites:** JSN001  
**Contact hours:** 2 per week **Credit points:** 12  
**Semester:** 2

### ► JSN015 WOMEN AND THE AUSTRALIAN LEGAL SYSTEM

It is important for any student studying a degree in a law or justice related discipline to acquire an understanding of the cultural and contextual background and the experiences of women in the criminal justice and other parts of the legal system. The primary aim of this unit is to provide students with an alternative perspective on the legal system, particularly in relation to the experience of women in both the criminal and civil justice areas.

**Courses:** JS51 **Contact hours:** 3 per week  
**Credit Points:** 12 **Semester:** 3

### ► JSN016 INTELLIGENCE, JUSTICE AND ACCOUNTABILITY

The unit focuses on intelligence and security activities relative to the rights of individuals, their 'need to know' and their 'right to know'. It examines relationships and responsibilities of intelligence and security professionals and organisations in Australian society, specifically: the nature, roles of intelligence, counterintelligence and security; laws and other instruments which protect individuals and their activities against unlawful intelligence and security actions and operations; human rights issues; perspectives of public and private morality; and, the media's right to disclose intelligence and security matters.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CA **Semester:** 1

### ► JSN017 INTELLIGENCE AND DECISION MAKING

Intelligence professionals offer support to government, the private sector and the community, where they offer an advantage through the provision of accurate and timely advice. Intelligence is, however, largely wasted if it is not communicated effectively to the appropriate decision maker. This unit is concerned with the delivery of intelligence to decision makers. It recognises the need for intelligence managers to be attuned to the context and environment in which they are operating. The unit examines client needs against proven principles. It acknowledges the importance of focussing reporting and examines the specific needs of client groups. Finally, it looks at the processes to develop appropriate intelligence products.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CA **Semester:** 2

### ► JSN018 ADVANCED CRIME RESEARCH METHODS

This subject is intended to extend students understanding of the research process fundamental to effective criminal justice research with a particular focus on the structure and organization of theses. Emphasis will be placed upon the whole research process, through an understanding of the logic of social science research design and methodology. This unit will offer students a comprehensive account of the variety of research design models, data collection techniques and data analysis strategies. It will extend students understanding of both quantitative and qualitative research and it will enable students to appreciate the importance of a focused literature review and clear structure in the establishment of a successful research project.

**Courses:** JS51 **Contact hours:** 3 per week  
**Credit Points:** 12 **Incompatible with:** JSB933  
**Campus offered:** CA **Semester:** 1

► **JSN131 JUVENILE JUSTICE**

This unit critically examines the nature, extent and social construction of a 'youth crime problem' in western countries (especially Australia) and to establish how and why the youth justice system takes the governmental form it does. It is concerned with the way in which a 'youth crime problem' is constructed and the implications of this for particular cohorts of young people in contemporary Australia. It is also concerned with the administration and management of youth crime through formal systems designed to prevent and reduce unlawful acts. Particular attention is drawn to the historical development of youth justice in Australia and to the changing nature of youth crime control across jurisdictions. Contemporary articulations of youth crime control are examined in relation to Queensland's system of youth justice, particularly as this relates to young indigenous people, young women and those from various social classes and ethnic groups. Theoretically, the unit takes as its starting point a genealogical analysis that focuses on questions of knowledge, power, regulation and discipline introduced in Foundations in Criminology and Crime, Control and Governance. These are discussed in relation to the contemporary government of young people in Australia and other 'western' countries.

**Courses:** JS51

**Incompatible with:** JSP131, JSB232

► **JSN132 FOUNDATIONS IN CRIMINOLOGY**

Criminological theories of crime and crime control are socially and historically dynamic and integral to legal and social policy. They are also central to the ways in which prisons, policing and crime prevention more generally is organised in society. This unit deals with formal criminological theories of crime and crime control. However, rather than simply outlining the theories, particular attention is drawn to the central concepts, assumptions and propositions contained in criminological theories and the contribution which criminological knowledge has made to advancing our understanding of crime and crime control. Knowledge derived from this unit is applicable to a critical understanding of all professional and popular theories of crime. Importantly, the criminological theories introduced in this unit are viewed as integral to a range of governmental practices aimed at ensuring the regulation and control of particular 'problem populations', especially the notion of at risk youth which is central to the strategy

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP132, JSB231

**Campus offered:** CA

**Semester:** 1

► **JSN133 CRIME PREVENTION**

This unit discusses in detail the complex relationship which exists between the crime problem, the creation of criminality and traditional responses to crime. Second, it will discuss crime prevention strategies that are broader than the traditional criminal justice response as well as explore the appropriateness or otherwise of blanket responses to crime. Finally, it will consider the issue of how the interests of victims of crime may be adequately addressed both within and outside the criminal justice system. Building on the theoretical knowledge gained in Foundations in Criminology and Crime Control and Governance, this unit critically discusses current directions in research on the 'crime problem'. Based in developmental and cognitive psychology, such a shift outlines a complex web of intervention in the lives of 'at risk' populations. This shift from a reactive crime control model to a pro-active crime prevention model, has been embraced by governments at both state and federal level in Australia and elsewhere. Students intent upon working in the criminological field need to fully understand both the strengths and weaknesses of this new way of understanding crime. Most important however, will be the implications of such a major shift in the control of 'criminal populations', which is well beyond the scope of the traditional criminal justice system.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP133, JSB333

**Campus offered:** CA

**Semester:** 2

► **JSN134 CRIME CONTROL AND GOVERNANCE**

This unit deals with the way in which crime control is being administered in late modernity with specific reference to Australia. Attention is drawn to the changing roles played by various state sponsored agencies and organisations in the management, prevention and reduction of crime, as well as the various governmental rationalities that underpin the workings of the criminal justice system. Building on Foundations in Criminology, the unit considers contemporary cultures of crime control as part and parcel of a governmental approach to the attempted management of problem populations in the neo-liberal state. Power, discipline, regulation and classification are integral to this project. Key issues to be considered include the changing culture of crime control; the present day rationalities of crime control and punishment and the prospects of crime and punishment in the twenty-first century. Such discussion lays the foundation for the specific examples of youth and the expanding framework of crime prevention as the central crime strategy in western society. The unit critically examines and assesses the changing contexts, modalities, administration and distribution of crime control and rationalities of punishment in western neo-liberal states, with specific reference to Australia.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP134, JSB332

**Campus offered:** CA

**Semester:** 2

► **JSN141 ORGANISED CRIME AND CORRUPTION**

Organised crime activities have burgeoned exponentially throughout the world in the last ten to twenty years. Drug importation and trafficking, fraud, money laundering and people smuggling are all examples of criminal activities that are diverting billions of dollars from legitimate businesses and into the hands of criminal syndicates. The aim of this unit is to provide you with knowledge and understanding of organised crime activities. You will gain an understanding the theoretical nature of organised crime and its functional structure and operations and be able to critically analyse the nature and impact of organised crime on society.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP141, JSP053, JSB342

**Campus offered:** CA

**Semester:** 1

► **JSN142 FORENSIC INVESTIGATION METHODS AND STRATEGIES**

Organised crime and corruption are not new phenomena but their magnitude and sophistication have increased dramatically in the last decade. The aspects of these activities which distinguish them from more traditional crimes mean that reliance on traditional law enforcement techniques and powers will usually be an inadequate response. The distinguishing features of organized crime and corruption include the development of multi-layered hierarchical organizations, the reliance on advice and services of legal and financial professionals, the use of digital commercial and communication systems to plan activities and disperse the proceeds, the globalised nature of some of their activities, the blending of criminal activities with legitimate business ventures and the involvement of corrupt officials who have an intimate knowledge of law enforcement methods. In recognition of the challenges these more complex and sophisticated crime groups pose, State and Federal governments in Australia have passed legislation giving police officers and crime and corruption commissions powers more far reaching than those usually granted to police services. These powers will need to be exercised in collaborative arrangements between the various agencies and in some cases private sector organizations. Lawyers, investigators and intelligence and financial analysts wishing to work in this expanding field

need an understanding of these new powers and an appreciation of the different strategies and conceptualizations needed to combat organized crime and corruption. This unit will develop such an understanding by analysing the statutory powers and examining creative and innovative strategic methods of applying these tools.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** CA

**Semester:** 1

► **JSN143 PROCEEDS OF CRIME AND MONEY LAUNDERING**

Unlike some other crimes, the primary motive for organised crime and official corruption is profit. Organised crime syndicates generate huge profits that they launder through various means and re-invest in further crime and/or legitimate businesses. By taking away the proceeds of crime both the motivation and the means to commit further crime may be decreased. The prosecution of money laundering offences augments this crime prevention strategy. Equally, by following the money trail, the movement of the proceeds of crime, law enforcement agencies can identify criminal organisations and move against them. The aim of this to provide you with an understanding and critical appreciation of the policy and legislation, both internationally and in Australia, that regulates the confiscation of the proceeds of crime, the prosecution of money laundering offences, and the reporting of suspect and significant financial transactions and international funds transaction reports.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** CA

**Semester:** 2

► **JSN144 EVIDENCE IN ORGANISED CRIME INVESTIGATIONS**

In recognition of the limitations of traditional law enforcement methods in dealing with organised crime and corruption, the Commonwealth and some State governments have granted more extensive powers to their police services and created inquisitorial commissions equipped with special coercive powers. Investigators and lawyers need to understand the issues of the law of evidence that arise in this context. The aim of this unit is firstly, to assist investigators and other professionals to appreciate the impact of rules of evidence in this specific context. Secondly, to understand how these new powers can be more effectively exercised. Thirdly, to inform those representing persons who are the subject of such exercise on how best they can protect the rights of their clients.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** CA

**Semester:** 2

► **JSN151 POLICY, GOVERNANCE AND JUSTICE**

This unit will enable you to become familiar with policy-making practices and wider issues of governance. The unit aims to introduce the theory and practice of public policy with an emphasis on policy issues relevant to criminal and social justice. It analyses processes in policy development such as policy formation, writing, implementation and evaluation. You will gain tools for participating in policy development processes in both the public and community sectors.

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP151, JSB251

**Campus offered:** CA

**Semester:** 1

► **JSN152 ADMINISTRATIVE JUSTICE**

It is essential that justice professionals know and understand the rules of administrative law as well as the underlying philosophy of administrative justice so that those working in the public sector understand the rules that guide their decision making as well as the avenues of appeal from any decision they make. Those working in the community sector need to know how to question administrative decisions and actions and be able to challenge the power of government when it contravenes principles of administrative justice. The unit is organised around theoretical perspectives of democracy, specifically participation and accountability, and examines mechanisms of State accountability, their philosophy

and practice so as to provide a strong working knowledge of the administrative justice system and its legal, social and political environment.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSB351, JSP152

**Campus offered:** CA

**Semester:** 1

► **JSN153 WATCHDOGS: WARRIORS, WIMPS AND WITCH-HUNTS**

Recent growth of government activity and regulation means that strong powers have been granted to non-elected officials and the agencies they are employed by, often to perform an oversight role on public administration. Justice professionals need to know the range of agencies with such watchdog roles, and their powers and responsibilities. A good understanding of the theoretical and political framework within which the investigative and other powers of oversight agencies are exercised and utilised is important for those who may carry out, evaluate or critique the powers of such watchdogs. Citizens and justice professionals need to understand the proper use of these powers by organs of the State, as well their role, power and responsibilities in terms of public accountability. A critical perspective allows examination of whether watchdogs are toothless tigers or determined dingoes, necessary understanding for anyone concerned with accountable public administration. The aim of this unit is to provide you with a critical, analytical and practical understanding of the range and role of watchdog agencies, and their protective and investigative powers and responsibilities.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSB253, JSP153,

**Campus offered:** CA

**Semester:** 2

► **JSN154 HUMAN RIGHTS AND GLOBAL JUSTICE**

The aim of this unit is to provide you with the necessary theoretical and practical knowledge and understanding of human rights standards and their impact on the Australian social, legal, justice and political landscape so as to enable you to enhance your contribution as a justice professional. You will also gain a critical perspective on these matters that will allow you to understand and apply the constraints and guidance provided by international human rights norms.

**Courses:** JS51

**Semester:** 1

► **JSN162 MANAGING INTELLIGENCE**

The unit is concerned with the management of intelligence organisations, personnel and operations. It recognises the need for managers to be attuned to the context and environment in which they are operating. The unit examines organisational structures against proven principles. It acknowledges the importance of people, and examines the specific needs of personnel systems in an intelligence environment. Finally, it looks at the processes to plan and conduct efficient operations. The subject concentrates on applying established principles and procedures to the unique needs of intelligence organisations.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP162, JSP067

**Semester:** 1

► **JSN163 INTELLIGENCE RESEARCH ISSUES & METHODOLOGY**

As the importance of intelligence to government and organisation decision making continues to grow the management of knowledge increasingly becomes the key factor in deciding who wins and who loses in international relations, business and war. This unit addresses intelligence research methodologies (strategies and tactics) that appropriately provide a real world picture to support intervention and change. This unit has three aims: first, to develop a higher level understanding of the theoretical basis of intelligence research; second, to assist you to develop an understanding of the role of research in intelligence in government and organisation decision making; and third, to develop a practical knowledge of the application of research methodologies to intelligence research.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP163

**Campus offered:** CA

**Semester:** 2

► **JSN164 INTELLIGENCE AND NATIONAL SECURITY**

The unit critically examines the notions and concepts of national security. It explores functions, roles and responsibilities for national security in the Australian context. The basic tenet informing teaching in the unit is that intelligence is a support function that ensures the safety, security and quality of life within a nation. The concepts of national security and intelligence, the essentials of an intelligence system, and multidisciplinary factors are applied to issues related to environment, economy and society. The principal focus will be on issues that constitute actual and potential threats to national security in Australia in this century, and on examination of the means available and obstacles to support threat management.

**Courses:** JS51

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP164

**Campus offered:** CA

**Semester:** 2

► **JSN165 INTELLIGENCE AND NATIONAL SECURITY**

The unit critically examines the notions and concepts of national security. It explores functions, roles and responsibilities for national security in the Australian context. The basic tenet informing teaching in the unit is that intelligence is a support function that ensures the safety, security and quality of life within a nation. The concepts of national security and intelligence, the essentials of an intelligence system, and multidisciplinary factors are applied to issues related to environment, economy and society. The principal focus will be on issues that constitute actual and potential threats to national security in Australia in this century, and on examination of the means available and obstacles to support threat management.

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP165, JSP065

**Campus offered:** CA

**Semester:** 2

► **JSP131 JUVENILE JUSTICE**

This unit critically examines the nature, extent and social construction of a 'youth crime problem' in western countries (especially Australia) and to establish how and why the youth justice system takes the governmental form it does. It is concerned with the way in which a 'youth crime problem' is constructed and the implications of this for particular cohorts of young people in contemporary Australia. It is also concerned with the administration and management of youth crime through formal systems designed to prevent and reduce unlawful acts. Particular attention is drawn to the historical development of youth justice in Australia and to the changing nature of youth crime control across jurisdictions. Contemporary articulations of youth crime control are examined in relation to Queensland's system of youth justice, particularly as this relates to young indigenous people, young women and those from various social classes and ethnic groups. Theoretically, the unit takes as its starting point a genealogical analysis that focuses on questions of knowledge, power, regulation and

discipline introduced in Foundations in Criminology and Crime, Control and Governance. These are discussed in relation to the contemporary government of young people in Australia and other western countries.

**Courses:** JS25, JS27

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP041, JSB041, JSB232

**Campus offered:** CA

**Semester:** 1

► **JSP132 FOUNDATIONS IN CRIMINOLOGY**

Criminological theories of crime and crime control are socially and historically dynamic and integral to legal and social policy. They are also central to the ways in which prisons, policing and crime prevention more generally is organised in society. This unit deals with formal criminological theories of crime and crime control. However, rather than simply outlining the theories, particular attention is drawn to the central concepts, assumptions and propositions contained in criminological theories and the contribution which criminological knowledge has made to advancing our understanding of crime and crime control. Knowledge derived from this unit is applicable to a critical understanding of all professional and popular theories of crime. Importantly, the criminological theories introduced in this unit are viewed as integral to a range of governmental practices aimed at ensuring the regulation and control of particular 'problem populations', especially the notion of at risk youth which is central to the strategy of crime prevention.

**Courses:** JS25, JS27

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSB231

**Campus offered:** CA

**Semester:** 1

► **JSP133 CRIME PREVENTION**

This unit discusses in detail the complex relationship which exists between the crime problem, the creation of criminality and traditional responses to crime. Second, it will discuss crime prevention strategies that are broader than the traditional criminal justice response as well as explore the appropriateness or otherwise of blanket responses to crime. Finally, it will consider the issue of how the interests of victims of crime may be adequately addressed both within and outside the criminal justice system. Building on the theoretical knowledge gained in Foundations in Criminology and Crime Control and Governance, this unit critically discusses current directions in research on the 'crime problem'. Based in developmental and cognitive psychology, such a shift outlines a complex web of intervention in the lives of at risk populations. This shift from a reactive crime control model to a pro-active crime prevention model, has been embraced by governments at both state and federal level in Australia and elsewhere. Students intent upon working in the criminological field need to fully understand both the strengths and weaknesses of this new way of understanding crime. Most important however, will be the implications of such a major shift in the control of 'criminal populations', which is well beyond the scope of the traditional criminal justice system.

**Courses:** JS25, JS27

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** CA

**Semester:** 2

► **JSP134 CRIME CONTROL AND GOVERNANCE**

This unit deals with the way in which crime control is being administered in late modernity with specific reference to Australia. Attention is drawn to the changing roles played by various state sponsored agencies and organisations in the management, prevention and reduction of crime, as well as the various governmental rationalities that underpin the workings of the criminal justice system. Building on Foundations in Criminology, the unit considers contemporary cultures of crime control as part and parcel of a governmental approach to the attempted management of problem populations in the neo-liberal state. Power, discipline, regulation and classification are integral to this project. Key issues to be considered include the changing culture of crime

control; the present day rationalities of crime control and punishment and the prospects of crime and punishment in the twenty-first century. Such discussion lays the foundation for the specific examples of youth and the expanding framework of crime prevention as the central crime strategy in western society. The unit critically examines and assesses the changing contexts, modalities, administration and distribution of crime control and rationalities of punishment in western neo-liberal states, with specific reference to Australia.

**Courses:** JS25, JS27

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSB332

**Campus offered:** CA

**Semester:** 2

► **JSP141 ORGANISED CRIME AND CORRUPTION**

Organised crime activities have burgeoned exponentially throughout the world in the last ten to twenty years. Drug importation and trafficking, fraud, money laundering and people smuggling are all examples of criminal activities that are diverting billions of dollars from legitimate businesses and into the hands of criminal syndicates. The aim of this unit is to provide you with knowledge and understanding of organised crime activities. You will gain an understanding of the theoretical nature of organised crime and its functional structure and operations and be able to critically analyse the nature and impact of organised crime on society.

**Courses:** JS25, JS29

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** JSP053, JSB053, JSB342

**Campus offered:** CA

► **JSP142 FORENSIC INVESTIGATION METHODS AND STRATEGIES**

Organised crime and corruption are not new phenomena but their magnitude and sophistication have increased dramatically in the last decade. The aspects of these activities which distinguish them from more traditional crimes mean that reliance on traditional law enforcement techniques and powers will usually be an inadequate response. The distinguishing features of organized crime and corruption include the development of multi-layered hierarchical organizations, the reliance on advice and services of legal and financial professionals, the use of digital commercial and communication systems to plan activities and disperse the proceeds, the globalised nature of some of their activities, the blending of criminal activities with legitimate business ventures and the involvement of corrupt officials who have an intimate knowledge of law enforcement methods. In recognition of the challenges these more complex and sophisticated crime groups pose, State and Federal governments in Australia have passed legislation giving police officers and crime and corruption commissions powers more far reaching than those usually granted to police services. These powers will need to be exercised in collaborative arrangements between the various agencies and in some cases private sector organizations. Lawyers, investigators and intelligence and financial analysts wishing to work in this expanding field need an understanding of these new powers and an appreciation of the different strategies and conceptualizations needed to combat organized crime and corruption. This unit will develop such an understanding by analysing the statutory powers and examining creative and innovative strategic methods of applying these tools.

**Courses:** JS25, JS29

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** CA

**Semester:** 1

► **JSP143 PROCEEDS OF CRIME AND MONEY LAUNDERING**

Unlike some other crimes, the primary motive for organised crime and official corruption is profit. Organised crime syndicates generate huge profits that they launder through various means and re-invest in further crime and/or legitimate businesses. By taking away the proceeds of crime both the motivation and the means to commit further crime may be decreased. The prosecution of money laundering offences aug-

ments this crime prevention strategy. Equally, by following the money trail—the movement of the proceeds of crime—law enforcement agencies can identify criminal organisations and move against them. The aim of this to provide you with an understanding and critical appreciation of the policy and legislation, both internationally and in Australia, that regulates the confiscation of the proceeds of crime, the prosecution of money laundering offences, and the reporting of suspect and significant financial transactions and international funds transaction reports.

**Courses:** JS25, JS29

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** CA

**Semester:** 2

► **JSP144 EVIDENCE IN ORGANISED CRIME INVESTIGATIONS**

In recognition of the limitations of traditional law enforcement methods in dealing with organised crime and corruption, the Commonwealth and some State governments have granted more extensive powers to their police services and created inquisitorial commissions equipped with special coercive powers. Investigators and lawyers need to understand the issues of the law of evidence that arise in this context. The aim of this unit is firstly, to assist investigators and other professionals to appreciate the impact of rules of evidence in this specific context. Secondly, to understand how these new powers can be more effectively exercised. Thirdly, to inform those representing persons who are the subject of such exercise on how best they can protect the rights of their clients.

► **KCB101 COMMUNICATION IN THE NEW ECONOMY**

This unit introduces the student to foundational ideas in the study of communication, drawing on examples of communication practice from contemporary society, and the historical development of both the media of mass communication and ways of theorising its development, to present theories of communication in the context of topical debates. The idea of the 'new' economy is the organising motif of the unit. The unit both introduces and problematises the discipline of communication as it confronts, engages and interpenetrates the new economy. Communication is treated as a social process wherein important symbolic forms are created, apprehended and used. The pivotal social processes of the new economy (cultural commodification, corporatisation, the rise of networks and technological change and identity transitions) are used as themes to illustrate key concepts from the discipline of communication. Using this approach the unit aims to impart an understanding of communication ecologies, processes, systems, and modes in the context of contemporary society.

**Courses:** KC32, IF09, IF10, IF27, KK32  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **KCB140 MEDIA AND SOCIETY: FROM PRINTING PRESS TO INTERNET**

Innovations in media and communication technologies have been deeply implicated in the evolution of human society from ancient times to the present. This unit explores the enabling capacities of media and communications, as well as

other aspects of media power from a variety of perspectives, in the development of the modern nation state, consumer culture and the global information economy.

**Courses:** KC32, IF09, IF10, Creative Industries Open elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB140  
**Campus offered:** GP **Semester:** 1

► **KCB150 MEDIA AND COMMUNICATIONS INDUSTRIES**

This unit provides an introduction to media and communications industries, with particular reference to the Australian media and communications industries and associated issues. The course will examine aspects of telecommunications, broadcasting, magazines and publishing, popular music, the Internet and games industries, from social, industrial and cultural perspectives. You will be involved in discussion of current issues and media features.

**Courses:** KC32, IF09, IF10, IF27, Creative Industries Open elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB150  
**Campus offered:** GP **Semester:** 2

► **KCB204 GLOBALISATION AND NEW MEDIA**

The globalisation of economic, political and cultural organisations and relations is one of the central dynamics of 21st century societies. While the causes, significance and impacts of globalisation are widely debated, it has been strongly connected to the development of new media, most notably media content delivered through cable and satellite technologies, and through the Internet. This unit will provide students with a clear understanding of globalisation, its relationship to new media technologies, and strategies for dealing with such changes that have been adopted by corporations, governments, communities, knowledge institutions, and the institutions and networks of civil society.

**Courses:** KC32, IF09, IF10, Creative Industries Open elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB204  
**Campus offered:** GP **Semester:** 2

► **KCB213 STRATEGIC SPEECH COMMUNICATION**

This is a unit with equal emphasis on theory and practice. It is based in rhetorical and group communication theories, as a base for developing professionals who are articulate presenters, probing but empathic interviewers and interviewees, and good team players. Theory and practice are interrelated to develop understanding and self-reflexivity within students concerning their own communication skills, and to guide them to become effective leaders in the Communication Industries professions. Practice in simulated work situations will allow growth and learning in the laboratory of the classroom.

**Courses:** KC32, KK32, KJ32, IF09, IF10, IF27  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **KCB295 VIRTUAL CULTURES**

This unit provides both a critical and conceptual introduction to the issues arising from the emergence of online communications, or 'virtual communities', and a practical introduction to the skills and competencies required for the development and maintenance of successful virtual communities. It considers issues arising from the development of online communications from the perspectives of corporate cultures, public or civic action, and questions of community, identity and social inequality in Internet culture, conflict management, and ethical and privacy issues on the Web.

**Courses:** KC32, IF09, IF10, Creative Industries Open elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB295  
**Campus offered:** GP **Semester:** 1

► **KCB311 POLITICAL COMMUNICATION**

This unit provides an overview of the theory and practice of political communication and the role

of discursive strategies in the social construction of meaning, with particular reference to media and communications industries. The unit will examine political campaigns in Australia and internationally from the perspective of discourse analysis. Students will critically examine theories of media influence, as well as notions of crisis management, rhetorical models, persuasion theory and the use of images as a power resource to succeed in a political campaign. The unit will also look at how survey research helps the planning and development of political campaigns, and students will be involved in developing a political campaign strategy.

**Courses:** KC32, KK32, IF09, IF10, IF27  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** COB158, COB311  
**Campus offered:** GP **Semester:** 1

► **KCB334 MEDIA AND COMMUNICATION RESEARCH METHODS**

The research process (define problem, collect relevant information, analyse information, formulate conclusions/outcomes) underlies many decisions that confront media and communication professionals. This subject introduces foundational research skills and contextualises them with a number of media and communication problems. The unit will involve qualitative and quantitative research methods including observation, focus groups, case studies, survey research and experiments studied in the context of media and communication problems and issues. Students will carry out research using some of these methods, analyse the results and present their conclusions and recommendations.

**Courses:** KC32, IF09, IF10, IF27  
**Prerequisites:** KCB150  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **KCB335 MANAGING COMMUNICATION RESOURCES**

A fundamental element of communication practice is developing the resources that organisations use to communicate with their audiences (such as brochures, booklets, information kits, promotional materials and web sites). An understanding of controlled media (ie media in which the communicator, rather than a gatekeeper, controls the final content), in both print and electronic forms, is critical for professional communicators; controlled media resources remain the most common tools developed during communication campaigns. This unit develops students' ability to devise effective resources for clients. Students will develop practical skills in managing projects, researching the audience, writing and designing resources, testing their work, and seeing the product through to final production. The unit involves desktop publishing training, and offers students an opportunity to develop a print or electronic resource for a client.

**Courses:** KC32, IF09, IF10, IF27  
**Prerequisites:** 96 credit points of prior study  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **KCB336 NEW MEDIA TECHNOLOGIES**

This unit examines the relationship between new technologies and media production in their social and cultural context. It evaluates the impact of digitisation and convergence on work, leisure, film, TV, print media and other areas of cultural production; and considers the contribution of media theory to insights about the cultural, economic and political impacts of new media technologies.

**Courses:** KC32, IF09, IF10, IF27, Creative Industries Open elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB336  
**Campus offered:** GP **Semester:** 2

► **KCB348 APPLIED MEDIA COMMUNICATION**

In this unit students explore ways in which their knowledge of media industries, audiences and texts finds application in employment contexts. Students also develop and consolidate an applied understanding of databases in the process of maintaining and developing an online directory

## UNIT SYNOPSES

of media and related organisations serving the greater Brisbane area. Questions of professional practice in online and workplace environments are also discussed, with particular reference to matters of freedom of expression, accuracy and fairness, access and equity, cultural difference, privacy, security and intellectual property.

**Courses:** KC32

**Prerequisites:** Available to Media Communication students only.

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB348

**Campus offered:** GP **Semester:** 2

### ► KCB349 MEDIA AUDIENCES

A knowledge of and ability to research audiences is essential to a detailed and comprehensive understanding of the media. The ability to undertake quantitative and qualitative research into various audience groupings, the use of associated analytical tools and the ability to critically analyse academic and industry based audience research are important skills for students undertaking research in Media Communication and those seeking employment in media industries.

**Courses:** KK32, IF09, IF10, IF27

**Prerequisites:** 96 credit points of undergraduate study. Available to Media & Communication majors only.

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB349

**Campus offered:** GP **Semester:** 1

### ► KCB351 MEDIA AND COMMUNICATIONS INDUSTRY PLACEMENT 1

This unit involves students applying the conceptual knowledge, research techniques and project management skills acquired during their degree to a specific project or projects on behalf of a media and communications organisation. Working in teams and in conjunction with a nominated media and communications organisation students will develop, implement and report on a project or series of projects for that organisation. This unit may be taken individually in order to develop a small-scale project over the course of a semester, or it may be taken in conjunction with Media and Communications Industry Placement 2 to develop a larger scale project(s) over the course of one or two semesters.

**Courses:** KC32, IF10, IF27

**Prerequisites:** 144 credit points of undergraduate Creative Industries study

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► KCB352 MEDIA AND COMMUNICATIONS INDUSTRY PLACEMENT 2

This unit involves students applying the conceptual knowledge, research techniques and project management skills acquired during their degree to a specific project or projects on behalf of a media and communications organisation. Working in teams and in conjunction with a nominated media and communications organisation students will develop, implement and report on a project or series of projects for that organisation. This unit is taken as an extension of Media and Communication Industry Placement 1 (either in separate semesters or concurrently) to develop a larger scale project(s) over the course of one or two semesters.

**Courses:** IF09

**Prerequisites:** 144 credit points of undergraduate Creative Industries study

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► KDB053 GENDER ISSUES IN THE VISUAL AND PERFORMING ARTS

This unit introduces students to the ways in which the arts contribute to, or challenge, concepts of femininity and masculinity in Western European culture. Areas covered include; an overview of various strands of feminist thought; discussion of key issues in the sex/gender debate; analysis of the representations of gender in both historical and contemporary examples of dance, drama, music and visual arts.

**Courses:** CI Open Elective

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB053

**Campus offered:** KG **Semester:** 1

### ► KDB106 THE ANALYSIS OF MODERN DANCE

Further development of the analysis of dance through a concentration on the dance as text; a study of various historical contexts of dance as art. Focus on modern dance.

**Courses:** CI Open Elective

**Prerequisites:** KDB125

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB106

**Campus offered:** KG **Semester:** 2

### ► KDB114 AUSTRALIAN DANCE

A study of the ritual, artistic and social functions of dance in contemporary Australian society.

**Courses:** CI Open Elective

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB114

**Campus offered:** KG **Semester:** 2

### ► KDB117 DANCE IN EDUCATION

A practical introduction to philosophies and practices in dance education. The areas of choreography, performance and appreciation will be explored as students develop basic teaching and reflective practice skills. Appropriate for students planning to teach dance in the primary, secondary, community or studio context.

**Courses:** IF75, IF76, IF77, IF78, KD32

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB117

**Campus offered:** KG **Semester:** 1

### ► KDB125 DECONSTRUCTING DANCE IN HISTORY

Introduction to the analysis of dance through a concentration on the dance as text; a study of various historical contexts of dance as art. Focus on ballet.

**Courses:** CI Open Elective

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB125

**Campus offered:** KG **Semester:** 1

### ► KDB158 DANCE AND TECHNOLOGY 1

Modes of choreographic communication: discussion of aesthetic questions that have emerged out of the last major choreographic movements; collaborative practices encouraged with specific focus on digital technologies.

**Courses:** KD25, KD32

**Prerequisites:** KDX145

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 1

### ► KDB159 DANCE AND TECHNOLOGY 2

Major choreographic project for public performance. Exploration of aesthetic and artistic values in collaborative processes of making new work with technology.

**Courses:** KD25, KD32

**Prerequisites:** KDB158

**Contact hours:** 1 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► KDB171 THEATRE DANCE STYLES

Character, jazz and tap styles—essential steps and various combinations.

**Courses:** KD15, IF75, KD25, KD32

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB171

**Campus offered:** KG **Semester:** 1

### ► KDB172 WORLD DANCE

Exposure to a range of culturally specific dance styles through practical workshops; a theory component providing contextual background to the styles taught.

**Courses:** CI Open Elective

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB172

**Campus offered:** KG **Semester:** 2

### ► KDB176 POPULAR DANCE STYLES

History and sociology of jazz and popular dances; examination of dance in musical theatre and other commercial contexts; basic technique and steps in a range of jazz and popular dance styles.

**Courses:** CI Open Elective

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB176

**Campus offered:** KG

**Semester:** 2

### ► KDB180 DANCE TECHNIQUE STUDIES 1

IF75 course code: 3 ballet classes and 2 contemporary classes per week for the first half of the semester. 3 contemporary and 2 ballet classes per week for the second half of the semester; plus 1 alignment class per week. KD15, KD25, KD32 course codes: 4 ballet and 4 contemporary classes per week.

**Courses:** IF75, KD25, KD32, KD15

**Contact hours:** IF75: 9 per week; KD15, KD25, KD32: 12 per week

**Credit points:** 12 **Semester:** 1

**Campus offered:** KG

### ► KDB181 DANCE TECHNIQUE STUDIES 2

IF75, KD32 course codes: 4 ballet classes per week. Performing Reflective Practice component with online tutorials. KD15, KD25 course codes: 4 ballet and 4 contemporary classes per week.

**Courses:** IF75, KD25, KD32, KD15

**Contact hours:** IF75, KD32: 6 per week; KD15, KD25: 12 per week

**Credit points:** 12 **Semester:** 2

**Campus offered:** KG

### ► KDB182 DANCE TECHNIQUE STUDIES 3

IF75, KD32 course codes: four contemporary classes per week plus one alignment class per week. KD15, KD25 course codes: four ballet and four contemporary classes per week.

**Courses:** IF75, KD25, KD32, KD15

**Contact hours:** IF75, KD32: 7.5 per week;

KD15, KD25: 12 per week

**Credit points:** 12 **Semester:** 1

**Campus offered:** KG

### ► KDB183 DANCE TECHNIQUE STUDIES 4

IF75, KD32 course codes: four contemporary classes per week. Teaching Reflective Practice component with online tutorials. KD15, KD25 course codes: four ballet and four contemporary classes per week.

**Courses:** IF75, KD25, KD32, KD15

**Contact hours:** IF75, KD32: 6 per week; KD15, KD25: 12 per week

**Credit points:** 12 **Semester:** 2

**Campus offered:** KG

### ► KDB189 DANCE ASSESSMENT AND REPORTING

Relates current theoretical issues in assessment to the unique challenges of dance assessment. Students will explore a range of assessment procedures, methods and strategies to support quality and equity in dance assessment at all levels.

**Courses:** KD05, KD06, KD16, KD17

**Credit points:** 12 **Incompatible with:** AAB189

**Campus offered:** EXT **Semester:** 1, 2

### ► KDB190 PROFESSIONAL PRACTICE AND BUSINESS ADMINISTRATION FOR DANCE TEACHERS

This unit will consider the implications of Dance Industry Code of Ethics (1987) for teaching and learning in dance. This unit also includes practical and useful materials for the effective and efficient operations of a business in the dance teaching by relating current small business management practices to the specific organisational needs and requirements for dance teaching businesses.

**Courses:** KD05, KD06, KD16, KD17

**Credit points:** 12 **Incompatible with:** AAB190

**Campus offered:** EXT **Semester:** 1, 2

### ► KDB191 DANCE TEACHING METHODOLOGIES

Provides students with the opportunity to investigate and explore dance teaching issues relevant to their own teaching context. The unit materials will include strategies and models for planning and implementing dance lessons and curriculum, catering for the diverse learning needs of students and managing the classroom as a complex social environment.

**Courses:** KD05, KD06, KD16, KD17

**Credit points:** 12 **Incompatible with:** AAB191

**Campus offered:** KG **Semester:** 1, 2

## UNIT SYNOPSES

### ► **KDB192 STAGECRAFT AND COSTUME FOR DANCE**

Provides opportunities to investigate the principles of design as they relate to the visual environment of a dance performance/production. Considers principles and theoretical issues relevant to design for stage and video, stimulating and innovative examples of visual designs for dance performance and practical information for production/planning and budgeting.

**Courses:** KD05, KD06

**Credit points:** 12 **Incompatible with:** AAB192  
**Campus offered:** EXT **Semester:** 1

### ► **KDB193 DANCE PROJECT 1A**

This unit is designed for those students who wish to investigate their practice as a dance performer and/or creator. Students construct and execute their own project from a choice of 3 models. All projects require a proposal, execution and reflective practice paper of the project outcome. Interdisciplinary and collaborative projects are encouraged and may take place on campus or in industry settings.

**Courses:** KD25

**Prerequisites:** 3rd year Bachelor of Fine Arts students only; approval of project by Unit Coordinator

**Credit points:** 12

**Campus offered:** KG **Semester:** 1

### ► **KDB195 DANCE TEACHING STUDIES 1**

This unit examines basic theoretical understandings and practical skills to support and enhance students' ability to plan for, manage and promote effective and safe learning in dance classes.

**Courses:** KD05, KD06, KD16, KD17

**Contact hours:** 1 week full-time residency in summer semester

**Credit points:** 12 **Incompatible with:** AAB180

**Campus offered:** KG **Semester:** 3

### ► **KDB196 DANCE TEACHING STUDIES 2**

This unit covers the theory of choreography and the basic skills of crafting choreography will form the basis of study in this unit. This unit also provides students with the opportunity to investigate current research relating to the teaching for performance. Issues such as psychology of performance and pacing of dance training will be addressed.

**Courses:** KD05, KD06, KD16, KD17

**Contact hours:** 1 week full-time residency in summer semester

**Credit points:** 12 **Incompatible with:** AAB181

**Campus offered:** KG **Semester:** 3

### ► **KDB197 DANCE ANALYSIS AND DANCE HISTORIES**

This unit examines aesthetic theory and analysis models that will assist students to respond to and reflect upon dance. Students will apply this understanding to the research and analysis of dances in context.

**Courses:** KD05, KD06, KD16, KD17

**Credit points:** 12 **Incompatible with:** AAB197

**Campus offered:** EXT **Semester:** 1, 2

### ► **KDB198 SAFE DANCE PRACTICE**

This unit provides students with the knowledge and understanding of the information regarding safe dance practices. Practical activities will focus on the implications of current research in safe dance practice to dance teaching and learning. The content of this unit reflects a holistic approach to training in dance by considering a diverse range of issues such as basic anatomy and physiology, the use of imagery in dance training, injury prevention and management strategies, nutrition and lifestyle management.

**Courses:** KD05, KD06, KD16, KD17

**Credit points:** 12 **Incompatible with:** AAX104

**Campus offered:** EXT **Semester:** 1, 2

### ► **KDB199 DANCE PROJECT 1B**

This unit is designed for those students who wish to investigate their practice as a dance performer and/or creator. Students construct and execute their own project from a choice of 3 models. All projects require a proposal, execution and reflective practice paper of the project outcome. Interdisciplinary and collaborative projects are encouraged and may take place on campus or in

industry settings. This unit may include a proposal which is an extension of Dance Project 1A.  
**Courses:** KD25

**Prerequisites:** 3rd year Bachelor of Fine Arts students only; approval of project by Unit Coordinator

**Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► **KDB221 INTEGRATED PROFESSIONAL SKILLS**

An integrated program building specific practical, psychological and physical skills and strategies for career development and enhancement.

**Courses:** KD32, KD25

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► **KDB421 DANCE CURRICULUM STUDIES 1**

Focuses on the implementation of Dance Curriculum documents. Students develop strategies for dance teaching that cater for diverse learning needs of students and assist in the management of safe dance learning environments.

**Courses:** ED32, ED37, IF75, KD33

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** AAB421

**Campus offered:** KG **Semester:** 2

### ► **KDB429 DANCE CURRICULUM STUDIES 2**

Advanced practical applications in assessment, curriculum planning and teaching/learning strategies relevant to dance education.

**Courses:** ED37, IF75, IF76, KD33, KT33

**Prerequisites:** KDB421

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** AAB429

**Campus offered:** KG **Semester:** 1

### ► **KDN002 PROFESSIONAL PRACTICE PROJECT**

This unit aims to provide a context for students to apply and extend their developed teaching practices. As they devise, implement and evaluate a project relevant to their teaching context, students will actively engage their skills and understandings as a teacher artist. Students will also be supported to enhance their skills as a reflective practitioner as they critically analyse and evaluate their professional practice.

**Courses:** KD42

**Credit points:** 24

**Campus offered:** KG **Semester:** 1, 2

### ► **KDP104 SAFE DANCE PRACTICE**

This unit provides students with the knowledge and understanding of the information regarding safe dance practices. Practical activities will focus on the implications of current research in safe dance practice to dance teaching and learning. The content of this unit reflects a holistic approach to training in dance by considering a diverse range of issues such as basic anatomy and physiology, the use of imagery in dance training, injury prevention and management strategies, nutrition and lifestyle management.

**Courses:** KD35, KD36

**Credit points:** 12 **Incompatible with:** AAP104

**Campus offered:** EXT **Semester:** 1, 2

### ► **KDP105 DANCE ANALYSIS AND DANCE HISTORIES**

This unit examines aesthetic theory and analysis models that will assist students to respond to and reflect upon dance. Students will apply this understanding to the research and analysis of dance in context.

**Courses:** KD35, KD36

**Credit points:** 12 **Incompatible with:** AAP125

**Campus offered:** EXT **Semester:** 1, 2

### ► **KDP180 DANCE TEACHING STUDIES 1**

Examines theoretical understandings and practical skills to support and enhance students' ability to plan for, manage and promote effective and safe learning in dance classes.

**Courses:** KD35, KD36

**Contact hours:** 1-week full-time residency in summer semester

**Credit points:** 12 **Incompatible with:** AAP180

**Campus offered:** KG **Semester:** 3

### ► **KDP181 DANCE TEACHING STUDIES 2**

The theories of choreography and the skills of crafting choreography will form the basis of

study in this unit. This unit also provides students with the opportunity to investigate current research relating to the teaching for performance. Issues such as psychology of performance and pacing of dance training will be addressed.

**Courses:** KD35, KD36

**Contact hours:** 1-week full-time residency in summer semester

**Credit points:** 12 **Incompatible with:** AAP181

**Campus offered:** KG **Semester:** 3

### ► **KDP189 DANCE ASSESSMENT AND REPORTING**

Relates current theoretical issues in assessment to the unique challenges that dance assessment provide. Students will explore a range of assessment procedures, methods and strategies to support quality and equity in dance assessment at all levels.

**Courses:** KD35, KD36

**Credit points:** 12 **Incompatible with:** AAP189

**Campus offered:** EXT **Semester:** 1, 2

### ► **KDP190 PROFESSIONAL PRACTICE FOR DANCE TEACHERS**

As small business owners, dance teachers require a diverse range of skills to manage and operate their businesses. This unit will consider the implications of the Dance Industry Code of Ethics for teaching and learning in dance. This unit also includes practical and useful materials for the effective and efficient operations of a business in dance teaching by relating current small business management practices to the specific organisational needs and requirements of dance teaching businesses.

**Courses:** KD35, KD36

**Credit points:** 12 **Incompatible with:** AAP190

**Campus offered:** EXT **Semester:** 1, 2

### ► **KDP191 DANCE TEACHING METHODOLOGIES**

Provides students with the opportunity to investigate and explore dance teaching issues relevant to their own teaching context. The unit materials will include strategies and models for planning and implementing dance lessons and curriculum, catering for the diverse learning needs of their students and managing the classroom as a complex social environment.

**Courses:** KD35, KD36

**Credit points:** 12 **Incompatible with:** AAP191

**Campus offered:** EXT **Semester:** 1, 2

### ► **KDP192 STAGECRAFT AND COSTUME FOR DANCE**

Provides opportunities to investigate the principles of design as they relate to the visual environment of a dance performance/production. Considers principles and theoretical issues relevant to design for stage and video, stimulating and innovative examples of visual designs for dance performance and practical information for the production/construction/budgeting for design.

**Courses:** KD35, KD36

**Credit points:** 12 **Incompatible with:** AAP192

**Campus offered:** EXT **Semester:** 1, 2

### ► **KDX104 ARCHITECTURE OF THE BODY**

Focuses on experiential awareness of the body, including an introduction to a working knowledge of anatomy, kinesiology and the movement potential of the body, both in theory and practice. For students in KI25 and KF25, a component of the course explores the creative potential of movement through compositional tasks.

**Courses:** KD15, KD25, KD32, KF25, IF75, IF76, KI25

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 1

### ► **KDX111 PERFORMANCE 1**

Designated unit. Study of selected repertoire pieces; duo work; rehearsal of individual aspects of the repertoire work; performance of all or part of the selected repertoire; preparation for rehearsals and performance; technique and dress rehearsals; critical evaluation during season and post-performance evaluation.

**Courses:** KD15, KD25

**Contact hours:** 6 per week **Credit points:** 12

**Incompatible with:** AAX111

**Campus offered:** KG **Semester:** 1

## UNIT SYNOPSES

### ► KDX112 PERFORMANCE 2

Designated unit. Continuation of studies initiated in KDX111.

**Courses:** KD15, KD25  
**Prerequisites:** KDX111  
**Contact hours:** 6 per week **Credit points:** 12  
**Incompatible with:** AAX112  
**Campus offered:** KG **Semester:** 2

### ► KDX141 PERFORMANCE 3

Designated unit. Continuation of studies initiated in KDX112.

**Courses:** KD15, KD25  
**Prerequisites:** KDX112  
**Contact hours:** 6 per week **Credit points:** 12  
**Incompatible with:** AAX141  
**Campus offered:** KG **Semester:** 1

### ► KDX142 PERFORMANCE 4

Designated unit. Continuation of studies initiated in KDX141.

**Courses:** KD15, KD25  
**Prerequisites:** KDX141  
**Contact hours:** 6 per week **Credit points:** 12  
**Incompatible with:** AAX142  
**Campus offered:** KG **Semester:** 2

### ► KDX143 CHOREOGRAPHIC STUDIES 1

Introduction to crafting skills and choreographic devices used in process of making dance work. Presentation of short solo and group work.

**Courses:** KD15, KD25, IF75, IF76, KD32  
**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 2

### ► KDX144 CHOREOGRAPHIC STUDIES 2

Practice and performance of choreographic work employing choreographic skills in creation of movement material, form and style. Clarity of intention is major focus.

**Courses:** KD15, KD25, KD32, IF75  
**Prerequisites:** KDX143  
**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 1

### ► KDX145 CHOREOGRAPHIC STUDIES 3

Development of Advanced Choreographic skills. Presentation of work 5-8 minutes in studio or site-specific context.

**Courses:** KD15, KD25, KD32, IF75  
**Prerequisites:** KDX144  
**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 2

### ► KFB056 PROFESSIONAL STUDIES (FASHION)

This subject prepares final year students for their first steps into the profession and facilitates a smooth and confident transition from undergraduate experiences to working life.

**Courses:** KF25  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB056  
**Campus offered:** KG **Semester:** 2

### ► KFB401 DESIGN STUDIO 1

This sequence of six units is fundamental to the course and focus on the integration of design principles with the practical skills and understandings of pattern technology, garment design and construction.

**Courses:** IF25  
**Contact hours:** 12 per week **Credit points:** 12  
**Incompatible with:** AAB401  
**Campus offered:** KG **Semester:** 1

### ► KFB402 DESIGN STUDIO 2

See KFB401.

**Courses:** IF25  
**Contact hours:** 12 per week **Credit points:** 12  
**Incompatible with:** AAB402  
**Campus offered:** KG **Semester:** 2

### ► KFB403 DESIGN STUDIO 3

See KFB401.

**Courses:** KF25  
**Contact hours:** 12 per week **Credit points:** 12  
**Incompatible with:** AAB403  
**Campus offered:** KG **Semester:** 1

### ► KFB404 DESIGN STUDIO 4

See KFB401.

**Courses:** IF25  
**Contact hours:** 12 per week **Credit points:** 12  
**Incompatible with:** AAB404  
**Campus offered:** KG **Semester:** 2

### ► KFB405 DESIGN STUDIO 5

See KFB401.

**Courses:** IF25  
**Contact hours:** 20 per week **Credit points:** 24  
**Incompatible with:** AAB405  
**Campus offered:** KG **Semester:** 1

### ► KFB406 DESIGN STUDIO 6

See KFB401.

**Courses:** IF25  
**Contact hours:** 20 per week **Credit points:** 24  
**Incompatible with:** AAB406  
**Campus offered:** KG **Semester:** 2

### ► KFB407 1/2 TEXTILES

The aim of this unit is to initiate an understanding of each stage of the textile development process and the methods of evaluating textile performance.

**Courses:** IF25  
**Contact hours:** 2 per week **Credit points:** 6  
**Incompatible with:** AAB407 1/2  
**Campus offered:** KG **Semester:** 1

### ► KFB407 2/2 TEXTILES

The aim of this unit is to initiate an understanding of each stage of the textile development process and the methods of evaluating textile performance.

**Courses:** IF25  
**Contact hours:** 2 per week **Credit points:** 6  
**Incompatible with:** AAB407 2/2  
**Campus offered:** KG **Semester:** 2

### ► KFB408 FASHION IN CONTEXT

In this unit students will analyse fashion trends and learn the influence of various factors that affect changes in fashion, including major designers.

**Courses:** IF25  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB408  
**Campus offered:** KG **Semester:** 2

### ► KFB410 1/2 RESEARCH SEMINAR

In this unit students will expand their knowledge and experience through exposure to the work of specialists in the field while extending their knowledge of the national and international fashion world.

**Courses:** IF25  
**Contact hours:** 2 per week **Credit points:** 6  
**Incompatible with:** AAB410 1/2  
**Campus offered:** KG **Semester:** 1

### ► KFB410 2/2 RESEARCH SEMINAR

In this unit students will expand their knowledge and experience through exposure to the work of specialists in the field while extending their knowledge of the national and international fashion world.

**Courses:** IF25  
**Contact hours:** 2 per week **Credit points:** 6  
**Incompatible with:** AAB410 2/2  
**Campus offered:** KG **Semester:** 2

### ► KFB411 ADVANCED TEXTILES

This unit builds on the knowledge of the materials, skills and acquired in KFB407 and is planned for the design student who wishes further studies in the field of textile development and/or embellishment.

**Courses:** IF25  
**Contact hours:** 6 per week **Credit points:** 12  
**Incompatible with:** AAB411  
**Campus offered:** KG **Semester:** 1, 2

### ► KFB412 APPLIED PLANNING

In this externally focused unit graduating students will draw together acquired skills and knowledge in order to develop plans for work in industry, within community-based projects or as independent designers.

**Courses:** IF25  
**Contact hours:** 2 per week **Credit points:** 12  
**Incompatible with:** AAB412  
**Campus offered:** KG **Semester:** 2

### ► KFB413 INTRODUCTION TO FASHION DESIGN

This unit will provide a basic interdisciplinary knowledge of the evolution of contemporary design movements and explore the relationship of fashion design to these design principles.

**Courses:** IF25  
**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB413

**Campus offered:** KG **Semester:** 1

### ► KFB414 CROSS MEDIA DESIGN APPLICATIONS

This unit is aimed for the student who wishes to work collaboratively with students in other Creative Industries disciplines on a design project.

**Courses:** IF25  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB414  
**Campus offered:** KG **Semester:** 1, 2

### ► KFB415 DESIGN PROJECT

This unit is aimed for the student who wishes to further advance non-traditional approaches to textile design or who wishes to continue collaboration with students in other Creative Industries disciplines on a design project.

**Courses:** IF25  
**Prerequisites:** KFB411 or KFB414  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB415  
**Campus offered:** KG **Semester:** 1, 2

### ► KIB056 PROFESSIONAL STUDIES

This unit aims to facilitate a smooth and confident transition from undergraduate experiences to life in the workforce. Exploration of current issues in the creative industries, and development of professional skills including portfolio development, networking strategies, industry practices and career management.

**Courses:** AA81, KI25, KI32  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB056  
**Campus offered:** KG **Semester:** 2

### ► KIB800 PROFESSIONAL PRACTICE

In this unit, a secondment to professional organisations, final year students gain insights into the practical aspects of their coursework. National and international staff connections provide students with exciting options for professional placement and employment.

**Courses:** KI25, KI32  
**Prerequisites:** KIB807 (KKB818), KIB816  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB800  
**Campus offered:** KG **Semester:** 2

### ► KIB801 FOUNDATIONS OF COMMUNICATION DESIGN 1

This unit provides an introduction to the languages and processes associated with image making and compositional design principles as they relate to communications technologies.

**Courses:** KI25, KI32  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB801  
**Campus offered:** KG **Semester:** 1

### ► KIB802 FOUNDATIONS OF COMMUNICATION DESIGN 2

This unit further develops design skills for communications technologies including design priorities, visual systems, refinement of concepts, project analysis and problem solving through presentation models.

**Courses:** KI25, KI32 **Prerequisites:** KIB801  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB802  
**Campus offered:** KG **Semester:** 2

### ► KIB803 TEMPORAL MEDIA

Introduction to video production concepts and techniques. Development of original project ideas and investigation of sequence design and media integration methods.

**Courses:** KI25, KI32  
**Prerequisites:** KIB808, KIB802 or KIB811  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB803  
**Campus offered:** KG **Semester:** 1

### ► KIB804 3-D ANIMATION 1

This unit stresses the creative issues related to modelling and rendering three-dimensional computer graphics and animation including high-end computer visualisation and special effects for film and television.

**Courses:** KI25, KI32, KI42  
**Prerequisites:** KIB808  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB804  
**Campus offered:** KG **Semester:** 1

## UNIT SYNOPSES

### ► KIB805 DESIGN PROJECT A

This unit will investigate the theoretical foundations and creative processes underpinning interdisciplinary new media projects by analysing the recursive relationships between design, narrative, science and technology.

**Courses:** KI25, KI32

**Prerequisites:** KIB803 or KIB804, KIB809 or KIB810

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB805

**Campus offered:** KG

**Semester:** 1

### ► KIB806 DESIGN PROJECT B

A critique forum for individual final projects. Each student is required to produce a final project indicative of their field of studies.

**Courses:** KI25, KI32 **Prerequisites:** KIB805

**Contact hours:** 3 per week **Credit points:** 24

**Incompatible with:** AAB806

**Campus offered:** KG

**Semester:** 1, 3

### ► KIB807 MEDIA TECHNOLOGY 1

Introduction to visual design and illustration using computer graphics including a practical introduction to authoring software and network applications.

**Courses:** KI25, KI32

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB807

**Campus offered:** KG

**Semester:** 1

### ► KIB808 MEDIA TECHNOLOGY 2

Exploration of media development and design concepts and practices. Investigation of cinematic language and interactive media design principles. Exploration of graphical interface design for computer screens and computer programming with authoring languages. Animation, video and audio are introduced in the context of software development, interactivity and applications of digital media.

**Courses:** KI25, KI32, KI42

**Prerequisites:** KIB807 or KKB818

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB808

**Campus offered:** KG

**Semester:** 1

### ► KIB809 INTERACTION DESIGN 1

This unit provides an introduction to the field of interaction design including human computer interface design concepts, principles and methodologies involved in the design and development of interactive media.

**Courses:** KI25, KI32, KI42

**Prerequisites:** KIB808, KIB802 or KIB811

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB809

**Campus offered:** KG

**Semester:** 1

### ► KIB810 INFORMATION ARCHITECTURE

This unit provides an introduction to Web application design and computer network communication. It emphasises computer programming and object orientated analysis and design.

**Courses:** KI25, KI32

**Prerequisites:** KIB808, KIB802 or KIB811

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB810

**Campus offered:** KG

**Semester:** 1

### ► KIB811 VISUAL INTERACTIONS

This unit will analyse how we represent our experience and communicate our intentions through both the reading of images and the process of image making. Students will investigate the relationship between language, image and technology whilst tracing the human experience with visuals from passive engagement to immersive interactions. By focusing on the mutual development of technology and creative practices through the investigation of past and current shifts in the representation of image the unit provides a foundation for further studies in the field of Communication Design and the broader Creative Industries.

**Courses:** KI32, Creative Industries elective

**Prerequisites:** Prior exp with using Windows and/or Mac operating systems; word processing

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG

**Semester:** 1

### ► KIB813 CONTEMPORARY ISSUES IN TECHNOLOGY DESIGN

As inhabitants of cultures increasingly driven by technology, it is in all interest to be aware of processes and implications of technological change. This unit is designed to encourage students to reflect upon and analyse current interconnections between technology, design and society, and to provide tools to perform these activities effectively.

**Courses:** CI Open Elective

**Prerequisites:** KIB814, KIB816

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB813

**Campus offered:** KG

**Semester:** 1

### ► KIB814 APPLICATIONS OF DESIGN TECHNOLOGY

As creative practitioners within a highly networked technological society it is important to develop a critical understanding of how the application of technology influences modes of communication, production processes and creative practices, particularly within the Creative Industries. This unit provides an introductory overview of the philosophies underlying applications of technology and critically examines current applications in order to explore creative environments of future technology. This material is covered through lectures, many presented by prominent industry professionals and practitioners, combined with workshops and tutorials focusing on computer mediated communication.

**Courses:** CI Open Elective

**Prerequisites:** KKB818 or KIB807

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB814

**Campus offered:** KG

**Semester:** 2

### ► KIB815 INTERACTION DESIGN 2

This unit follows on from KIB809 Interaction Design 1 continuing study in the field of Interaction Design including human computer interface concepts, principles and methodologies involved in the design and development of interactive media.

**Courses:** KI25, KI32 **Prerequisites:** KIB809

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB815

**Campus offered:** KG

**Semester:** 1

### ► KIB816 INTERACTIVE WRITING

This unit addresses on theoretical issues associated with non-linear story structures and interactive narratives through the analysis of game structures, the creation of original game ideas and the application of techniques of information design to the structuring of non-narrative content. Addressing the creative and analytical roles of writers, conceptual designers and information designers in the context of interactive digital media and the Creative Industries.

**Courses:** CI Open Elective

**Prerequisites:** KKB818 or KIB807

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB816

**Campus offered:** KG

**Semester:** 1

### ► KIB817 PROJECT MANAGEMENT

This unit serves as an introduction to project management as a growing discipline/profession and how it relates to software development and new media production. It focuses on project management skills and professional development, and project management as a conscious process, making use of various concepts and techniques to achieve a successful project outcome - defining project brief/scope and boundaries. This is the prerequisite unit to the BFA (Honours) Communication Design.

**Courses:** KI25, KI32 **Prerequisites:** KIB824

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB817

**Campus offered:** KG

**Semester:** 1

### ► KIB819 ELECTRONIC PUBLISHING

This unit provides an introduction to the theories, concepts and methodologies that underpin electronic publishing, emphasising the conceptual and analytical skills required to develop successful 'on line' publications within the context of Creative Industries.

**Courses:** CI Open Elective

**Prerequisites:** KKB818 or KIB807

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB819

**Campus offered:** KG

**Semester:** 1, 2

### ► KIB820 3-D ANIMATION 2

This unit addresses theory and practice in the area of advance three-dimensional computer graphics, including: concept development; character animation; advanced modelling animation and rendering techniques; and production techniques.

**Courses:** KI25, KI32 **Prerequisites:** KIB804

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB820

**Campus offered:** KG

**Semester:** 1

### ► KIB821 VIRTUAL REALITY

This unit investigates the field of Virtual Reality looking at the history and related theory of this emerging interactive media. This material supports practical activities that directly address current practice in the field.

**Courses:** KI25, KI32

**Prerequisites:** KIB809, KIB804

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB821

**Campus offered:** KG

**Semester:** 1

### ► KIB822 INTERACTION DESIGN 3

This unit finds a focus on the production of interactive projects, informed by the filmic processes developed in KIB803 and interaction design as covered in KIB809/KIB815. KIB822 looks at devising interactive, nonlinear approaches that draw upon these skills, with a focus upon concept development; creative and design processes; interactive techniques and styles; and advanced digital video/media production and post production.

**Courses:** KI25, KI32

**Prerequisites:** KIB815, KIB803, KIB804

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB822

**Campus offered:** KG

**Semester:** 1

### ► KIB823 DESIGN PRACTICE

With the approval of the Unit Coordinator, the student undertakes activity within the context of a group project in the field of Communication Design. Access to this unit is reserved for students who have demonstrated an outstanding level of self-directed learning and high level of requisite skills.

**Courses:** KI25, KI32

**Prerequisites:** KKB818/KIB807 and a GPA of 5 OR approval from Unit Coordinator

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB823

**Campus offered:** KG

**Semester:** 1

### ► KIB825 HISTORY OF ANIMATION

The unit is an introductory examination of the development of animation. It addresses social, cultural, economic and technological themes that have shaped notable practitioners and established animation as a significant medium for the expression of popular culture, artistic experiment and philosophical, social and political comment.

**Courses:** CI Open Elective

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB825

**Campus offered:** KG

**Semester:** 2

### ► KIB826 3-D ANIMATION 3

The unit provides the student with the opportunity to pursue advanced studies in three-dimensional modeling and animation, in the context of the creation of synthetic characters, after successful completion of KIB820.

**Courses:** KI25, KI32 **Prerequisites:** KIB820

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB826

**Campus offered:** KG

**Semester:** 1

### ► KIN808 INTRODUCTION TO COMMUNICATION DESIGN

The major topics of this unit involve the acquisition of design knowledge through demonstration and application, the development of aesthetic responses through involvement in project production and the development of foundations for a personal philosophy through research and lectures. Emphasis is placed on the relationship between image, text, time and space preparing the student for various new media productions.

## UNIT SYNOPSES

**Courses:** KI42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN808

**Campus offered:** KG

**Semester:** 1

### ► KIN809 INTERACTION DESIGN

This unit provides an introduction to the field of interaction design including human computer interface design concepts, principles and methodologies involved in the design and development of interactive media.

**Courses:** KI42

**Prerequisites:** KIN818, KIN808

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN809

**Campus offered:** KG

**Semester:** 1

### ► KIN810 INFORMATION ARCHITECTURE

This unit provides knowledge of concepts in Information Architecture and their application to the production of large Internet web sites. The concept of information architecture forms the basis for an understanding of the application of advanced multimedia in the design of dynamic web sites. This unit focuses on design supported by practical experience in the production dynamic interactive systems using advanced web technologies. In this unit, students learn to understand and apply the principles of a well designed and structured Web site; an advanced data base driven web site; the information architecture behind dynamic web sites; and advanced Web design technologies.

**Courses:** KI42

**Prerequisites:** AAN181, AAN808

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN810

**Campus offered:** KG

**Semester:** 1

### ► KIN816 INFORMATION DESIGN

This unit aims to develop understanding of the creative and analytical roles of writers, conceptual designers and information designers in New Media productions, and practice in the application of their relevant skills. On completion of this Unit, students will be able to analyse traditional (linear), non-linear and interactive narrative structures, create original narratives in appropriate script format, understand theoretical issues associated with branching story structures and interactive narratives, identify and analyse game structures, create original game ideas in appropriate script formats, and apply techniques of information design to the structuring of non-narrative content.

**Courses:** KI42 **Prerequisites:** KIN818, KIN808

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN816

**Campus offered:** KG

**Semester:** 1

### ► KIN817 PROJECT MANAGEMENT

Project management is a core requirement in the on-time, on-budget completion of project, whether building a bridge, launching a new product or developing a web site. Project management and its use of an associated customised methodology is paramount in successfully seeing a project to fruition. It is the roadmap by which all associated team members will travel. Without a methodology and the role of project manager held by someone within the team, the likelihood of success is slim. The aim of this unit is to develop within the student the ability to scope the needs of a digital media project, including its solution, and then to understand how to manage the client and project resources through its methodology to the project's completion.

**Courses:** KI42

**Prerequisites:** KIN824

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN817

**Campus offered:** KG

**Semester:** 2

### ► KIN818 INTRODUCTION TO DIGITAL MEDIA TECHNOLOGIES

This unit provides an introduction to theories and skills underpinning the application of multimedia technology with the Creative Industries, providing a foundation of conceptual and practical skills related to contemporary modes of electronic hypermedia production, communication and publishing.

**Courses:** KI42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN818

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KIN819 ELECTRONIC PUBLISHING

This unit provides an introduction to designing Internet web sites for publication and commerce. There is a practical "hands on" introduction to the design of dynamic interactive systems followed by analytical study of design elements of these systems for effectiveness. Concepts related to trust, security, privacy, fulfillment, digital cash and commercial transactions are introduced in an analytical, practical way. This unit provides students with some historical and conceptual knowledge as well as introductory practical knowledge. Tutorial and lab times are scheduled to ensure that students have a substantial piece of work developed by the end of the semester. The unit is based primarily on the process of web design and production, but also covers advanced issues related to interactivity, servers and publishing systems, and internet programming.

**Courses:** KI42

**Prerequisites:** KIN818

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN819

**Campus offered:** KG

**Semester:** 1

### ► KIN824 PROJECT ADMINISTRATION

Project administration is a vital component of project management. Administration of a project consists of the development of all project documentation, including budgets, schedules and client correspondence. While the documentation must revolve around a sound methodology, the implementation of the methodology is only as successful as the administration of its documentation components and client interface. The Project Manager must have a sound working knowledge of both. The aim of this unit is to develop within the student the ability to create the documentation templates used within the project methodology, as well as write the content for many of the documents that require client review and approval. In addition, the student will create the documents required for successful client interaction.

**Courses:** KI42

**Prerequisites:** KIN818, KIN816, KIN817

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN824

**Campus offered:** KG

**Semester:** 1

### ► KIN851 1/4 DESIGN PROJECT

Students enrolled in the Master of Communication Design are required to undertake a major project or an industry-related thesis. The creative project should have an industry or arts focus, and demonstrate an ability to apply academic and creative knowledge innovatively. This unit also provides the tools required (via frequent seminars) for students to be properly prepared to finish their major project and are able to complete a related thesis. Weekly discussion and presentation related to the major project are also required.

**Courses:** KI42 **Prerequisites:** KIN818, KIN816

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN851 1/4

**Campus offered:** KG

**Semester:** 1, 2

### ► KIN851 2/4 DESIGN PROJECT

Students enrolled in the Master of Communication Design are required to undertake a major project or an industry-related thesis. The creative project should have an industry or arts focus, and demonstrate an ability to apply academic and creative knowledge innovatively. This unit also provides the tools required (via frequent seminars) for students to be properly prepared to finish their major project and are able to complete a related thesis. Weekly discussion and presentation related to the major project are also required.

**Courses:** KI42 **Prerequisites:** KIN818, KIN816

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN851 2/4

**Campus offered:** KG

**Semester:** 1, 2

### ► KIN851 3/4 DESIGN PROJECT

Students enrolled in the Master of Communication Design are required to undertake a major project or an industry-related thesis. The creative project should have an industry or arts focus, and demonstrate an ability to apply academic and creative knowledge innovatively. This unit also provides the tools required (via frequent seminars) for students to be properly prepared to finish their major project and are able to complete a related thesis. Weekly discussion and presentation related to the major project are also required.

for students to be properly prepared to finish their major project and are able to complete a related thesis. Weekly discussion and presentation related to the major project are also required.

**Courses:** KI42 **Prerequisites:** KIN818, KIN816

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN851 3/4

**Campus offered:** KG

**Semester:** 1, 2

### ► KIN851 4/4 DESIGN PROJECT

Students enrolled in the Master of Communication Design are required to undertake a major project or an industry-related thesis. The creative project should have an industry or arts focus, and demonstrate an ability to apply academic and creative knowledge innovatively. This unit also provides the tools required (via frequent seminars) for students to be properly prepared to finish their major project and are able to complete a related thesis. Weekly discussion and presentation related to the major project are also required.

**Courses:** KI42 **Prerequisites:** KIN818, KIN816

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN851 4/4

**Campus offered:** KG

**Semester:** 1, 2

### ► KIN852/1 DESIGN PROJECT

Students enrolled in the Master of Creative Industries (Communication Design) are required to undertake a project or an industry-related thesis. The creative project should have an industry or arts focus, and demonstrate an ability to apply academic and creative knowledge innovatively. This unit also provides the tools required (via frequent seminars) for students to be properly prepared to finish their major project and are able to complete a related thesis. Weekly discussion and presentation related to the major project are also required.

**Courses:** KI43

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KIN852/2 DESIGN PROJECT

Students enrolled in the Master of Creative Industries (Communication Design) are required to undertake a project or an industry-related thesis. The creative project should have an industry or arts focus, and demonstrate an ability to apply academic and creative knowledge innovatively. This unit also provides the tools required (via frequent seminars) for students to be properly prepared to finish their major project and are able to complete a related thesis. Weekly discussion and presentation related to the major project are also required.

**Courses:** KI43

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KJB101 JOURNALISM INFORMATION SYSTEMS

Acquaints students with the uses journalists make of computers in their work: for word-processing, personal information management, time management, and gathering information for stories by searching online and CD-ROM databases, by analysing public records with spreadsheets and by using email to interview sources found on Internet Bulletin Boards and in Newsgroups, Usergroups, and Listservers.

**Courses:** open elective

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB101

**Campus offered:** GP

**Semester:** 1, 2

### ► KJB120 NEWSWRITING

Students learn to think like journalists, to evaluate events for their potential news value, to interview and perform other reporting tasks and to write news stories; the evolution and theories of reporting.

**Courses:** CI Open Elective

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** COB217, MJB120

**Campus offered:** GP

**Semester:** 1, 2

### ► KJB121 JOURNALISTIC INQUIRY

This unit will develop the basic skills learnt in Newswriting: generating story ideas, researching, conducting interviews, and finding news values and news angles, and apply them in a practical context. Students will also learn about how practical newswriting skills fit into an online envi-

## UNIT SYNOPSES

ronment. Students will be introduced to the rigours of deadlines and will have opportunities to write stories related to different news rounds throughout the semester.

**Courses:** IF05, IF07, KJ32  
**Prerequisites:** KJB120, KJB101  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB121  
**Campus offered:** GP **Semester:** 1, 2

### ► KJB224 FEATURE WRITING

Students conduct interviews and other research, which they use to write internet, newspaper and magazine articles that profile personalities or that treat processes, events and places to exploit their human-interest value. Undergraduate students may enrol in KJB224, while postgraduate students must take KJP224.

**Courses:** IF05, IF07, KJ32, KK32, KW32  
**Prerequisites:** KJB120  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB224, KJP224  
**Campus offered:** GP **Semester:** 1, 2

### ► KJB232 RADIO AND TELEVISION JOURNALISM 1

Should be combined with KJP232. The practical and theoretical aspects of radio and television media are studied and applied through production of broadcast news programs. Students learn broadcast style and usage and the evaluation of television and radio products. Strong emphasis is placed on current affairs knowledge.

**Courses:** IF05, IF07, KJ32, KJ36  
**Prerequisites:** KJB121 and KJB155. Available to JOU majors only.  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB232  
**Campus offered:** GP **Semester:** 2

### ► KJB239 JOURNALISM ETHICS AND ISSUES

QUT Journalism supports the development of socially responsible, ethical journalists. KJB239 is a core journalism unit. It begins with an overview of western and eastern moral philosophical traditions and moves on to examine current journalistic practice in the context of Australian and international news media operations, regulatory bodies and the stance of professional journalism organisations. Students generate ethical dilemmas and work through them individually, making difficult decisions about issues such as invasion of privacy, protection of sources and conflict of interest. The impact of developing information and communication technologies is also addressed.

**Courses:** IF05, IF07, KJ32, KJ36  
**Prerequisites:** KJB121  
**Corequisites:** KJB121  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB239  
**Campus offered:** GP **Semester:** 1

### ► KJB280 INTERNATIONAL JOURNALISM

This unit identifies, compares and analyses the diversity of journalistic practice in different countries and regions. In this unit, students will look at historical conditions that have led to variations in journalism across the world, how different politico-economic systems affect journalistic activity, and how and why different news media take distinct approaches to covering world issues. Students will develop the cross-cultural awareness and background knowledge required to identify story ideas, relate to sources and produce news reports in different countries and cultural environments. A seminar program will include papers for assessment on topics such as, significance of news coverage during international crises; development news; profiles of correspondents as residents or itinerants; or new media in international communication, through news services or in private use. For their assessment, students will have the opportunity to study and report on chosen countries or regions and current news issues of international relevance. Some students may choose to complete some portions of the assessment through praxis abroad including placements in international news organisations.

**Courses:** IF05, IF07, KJ32, KJ35, KJ36

**Prerequisites:** KJB121  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB280  
**Campus offered:** GP **Semester:** 2

### ► KJB303 NEWS PRODUCTION

This advanced unit examines the activities of media industries and media firms. It addresses practical issues such as managing deadlines; planning and decision-making in the newsroom; leadership and motivation. Work is done in online journalism, newspaper production, radio and television.

**Courses:** IF05, IF07, KJ32  
**Prerequisites:** KJB322, KJB338  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB303  
**Campus offered:** GP **Semester:** 2

### ► KJB322 DESKTOP PUBLISHING AND EDITING

Introduction to the basic copy editing and design principles for newspapers. These skills are incorporated with the latest electronic publishing technology with specific reference to newspapers. Students use agency copy from worldwide sources, and local reports in news and feature page design exercises. Exercises are provided in desktop publishing.

**Courses:** IF05, IF07, KJ32  
**Prerequisites:** KJB224  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB322  
**Campus offered:** GP **Semester:** 1, 2

**► KJB337 PUBLIC AFFAIRS REPORTING**  
 Advanced reporting unit stressing the watchdog role of the news media and utilising investigative techniques, including computer-assisted reporting, Internet and other online searching. Students write news feature stories for possible publication, and engage in case study/role play exercises for understanding public events/processes and their relationships to news media. The unit is taught in three hour blocks over the first nine weeks of semester.

**Courses:** IF07, IF05, KJ32  
**Prerequisites:** KJB224. Available to JOU majors only.  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB337  
**Campus offered:** GP **Semester:** 2

### ► KJB338 RADIO AND TELEVISION JOURNALISM 2

Philosophy and formulation of radio and television news and current affairs, anchor techniques, radio and television news production using computers.

**Courses:** IF05, IF07, KJ32  
**Prerequisites:** KJB232  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB338  
**Campus offered:** GP **Semester:** 1

### ► KJP105 THEORIES OF JOURNALISM

A summary of the body of literature pertaining to the theories of journalism; identification of individual research interests; attention to the empirical traditions; summary of issues at an advanced level from journalists perspectives through close reading of core texts.

**Courses:** KJ35, KJ36, KK51, KK53  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJP105  
**Campus offered:** GP **Semester:** 1

### ► KJP120 NEWSWRITING

Should be combined with KJB120. Students learn to think like journalists, to evaluate events for their potential news value, to interview and perform other reporting tasks and to write news stories; the evolution and theories of reporting.

**Courses:** KJ35  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJP120  
**Campus offered:** GP **Semester:** 1, 2

### ► KJP224 FEATURE WRITING

Students conduct interviews and other research, which they use to write internet, newspaper and magazine articles that profile personalities or that treat processes, events and places to exploit their human-interest value. Undergraduate students

may not enrol in KJP224; instead they can take KJB224.

**Courses:** KJ35, KJ36  
**Prerequisites:** Enrolment in KJ35, KJ36 or any other postgraduate course  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJP224, KJB224  
**Campus offered:** GP **Semester:** 1, 2

### ► KJP232 RADIO AND TELEVISION JOURNALISM 1

Should be combined with KJB232. The practical and theoretical aspects of radio and television media are studied and applied through production of broadcast news programs. Students learn styles and usage and the evaluation of television and radio products. Strong emphasis is placed on current affairs knowledge.

**Courses:** KJ35  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJP232  
**Campus offered:** GP **Semester:** 2

### ► KKB018 CREATIVE INDUSTRIES

This unit provides an overview of the creative industries as a major element of the global knowledge economy. It critically analyses issues such as the rise of a knowledge-based economy, technological convergence, globalisation, intellectual property, and the relationship between creative and artistic practice and the commercial market place. Such issues are critical for creative industries professionals and practitioners. This unit prepares them for the perpetually changing, portfolio- and project-based workplace they are likely to encounter.

**Courses:** CI Core Unit  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, KG **Semester:** 1, 2

### ► KKB055 PROFESSIONAL PRACTICE

This unit offers final-year students the opportunity to immerse themselves within the professional culture of their chosen field through secondment to professional organisations and companies. These secondments will enable the students to gain insights into the practical application of their course work and also establish valuable professional contacts for their future employment. Access to this unit will be reserved for students who have demonstrated an outstanding level of self-directed learning and a high level of requisite skills.

**Prerequisites:** 3rd yr students (except Dance); GPA of 5 and above; approval by discipline co-ord

**Credit points:** 12  
**Incompatible with:** AAB055  
**Campus offered:** KG **Semester:** 1, 2

### ► KKB055 PROFESSIONAL PRACTICE

This unit offers final-year students the opportunity to immerse themselves within the professional culture of their chosen field through secondment to professional organisations and companies. These secondments will enable the students to gain insights into the practical application of their course work and also establish valuable professional contacts for their future employment. Access to this unit will be reserved for students who have demonstrated an outstanding level of self-directed learning and a high level of requisite skills.

**Credit points:** 12  
**► KKB057 INDEPENDENT STUDY**

This unit is designed for those students who wish to investigate an area of study not centrally covered in their course and who wish to have the opportunity to construct and execute their own project. The project may be either theoretical in the field of scholarship or comprise practical discipline work. Collaborative projects involving other students are encouraged.

**Prerequisites:** Third year students; GPA of 5 and above; approval of project by discipline co-ord

**Credit points:** 12  
**Incompatible with:** AAB057  
**Campus offered:** GP, KG **Semester:** 1, 2

### ► KKB218 CREATIVITY

This unit problematises notions of Creativity. It aims to promote an awareness of the implications

## UNIT SYNOPSES

of differing environments, conditions and cultures on the 'creative' individual. It takes into account creative process theories and applications. This unit underpins/introduces the analytical, critical, theoretical and practical approaches which will be expanded upon in a range of Creative Industries units.

**Courses:** CI Core Unit  
**Contact hours:** 3-4 per week **Credit points:** 12  
**Campus offered:** GP, KG **Semester:** 1, 2

### ► KKB275 CREATIVE INDUSTRIES LEGAL ISSUES

Introduces Creative Industries students to the law which applies to their professional practice and theoretical study. The unit aims to provide a foundational approach to general aspects of law as well as particular topics for students in these fields. The unit is based on a core set of lectures and tutorials which are offered in two strands: Strand 1 for Journalism and Media Communication; Strand 2 for other Creative practices.

**Courses:** CI Core Unit  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► KKB335 PROFESSIONAL MEDIA PRACTICE

An opportunity to observe and gain insight into the applications of theory to practice. The student is placed with an approved employer. The lecturer in charge of the unit obtains reports from the student at regular intervals. The student is required to contract the completion of a progressive assessment program. The students result is determined on the basis of reports, continuous assessment and the employers report.

**Courses:** Available to Journalism or FTV majors only. Not available to study abroad or cross institutional students.

**Prerequisites:** For Journalism majors KJB322 or KJB338; for FTV majors KPB155, KPB185  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB335  
**Campus offered:** GP **Semester:** 1, 2

### ► KKB390 SUPERVISED PROJECT

Students will undertake a project with the approval of the Head of Discipline in Film and Television, Journalism, Media Communication or in special cases only, in Creative Writing and Cultural Studies. In Media Communication this unit is available only if appropriate staff and resources are available.

**Courses:** Film and Television (BFA only), Journalism, Media Studies and Creative Writing majors only.

**Prerequisites:** 96 credit points of undergraduate study in the relevant discipline  
**Contact hours:** 3 per week for group projects  
**Credit points:** 12

**Incompatible with:** MJB390  
**Campus offered:** GP **Semester:** 1, 2

### ► KKB418 TRANSFORMING CULTURES

Within this unit the emphasis is on providing students with an understanding of the process of cultural transformation. The unit is organised around three major thematic blocks, each lasting four weeks. These themes are Time and Space, Bodies and Boundaries and Cultures and Contact.

**Courses:** Creative Industries Core Unit  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, KG **Semester:** 1, 2

### ► KKB618 WRITING FOR CREATIVE INDUSTRIES

Students are introduced to the practices and process skills necessary for writing successfully. The three foundational, transferable skills are acquiring information and ideas; organising the information and ideas; and writing appropriately for various audiences.

**Courses:** Creative Industries Core Unit  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, KG **Semester:** 1, 2

### ► KKB818 INTRODUCTION TO MULTIMEDIA TECHNOLOGY

This unit provides an introduction to theories and skills underpinning the application of multimedia technology within the Creative Industries, providing a foundation of conceptual and practical

skills related to contemporary modes of electronic hypermedia production, communication and publishing.

**Courses:** Creative Industries Core Unit, KI32  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB818  
**Campus offered:** KG **Semester:** 1, 2, 3

### ► KKB914 VISUAL AND PERFORMING ARTS CURRICULUM 1

The practical, intellectual, conceptual and aesthetic functions of the arts make it a unique and essential mode of learning to contribute to a broad, balanced and relevant curriculum which addresses individual aptitudes and abilities. This subject introduces students to the arts as a circle of disciplines which share similar processes and fulfil related roles in the curriculum

**Courses:** ED56, ED51, IF82  
**Prerequisites:** 12 **Incompatible with:** AAB914  
**Campus offered:** KG **Semester:** 2

### ► KKB916 ADV VISUAL AND PERFORMING ARTS CURRICULUM

The curriculum of dance, drama, music or visual arts to an advanced level; designing and implementing programs in one of the disciplines for the primary school; action research in the classroom to monitor and evaluate an arts curriculum project.

**Courses:** ED51  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► KKB918 ARTS FOUNDATION STUDIES

Foundation experiences introducing the art forms of dance, drama, music and the visual arts; the purposes and functions of the arts in society; practical workshops in each discipline; visits to galleries and theatres in a range of community contexts.

**Courses:** ED43, ED51, ED52  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► KKD018 CREATIVE INDUSTRIES

Provides an overview of the creative industries as a major element of the global knowledge economy. It critically analyses issues such as the rise of a knowledge-based economy, technological convergence, globalisation, intellectual property, and the relationship between creative and artistic practice and the commercial marketplace.

**Courses:** IF06  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** KKB018  
**Campus offered:** KG **Semester:** 1, 3

### ► KKD218 CREATIVITY

This unit is central to the Creative Industries program because it offers a basis in understanding the concept of 'creativity' and in the acquisition of skills that promote the creative process and practice throughout a variety of workplace environments and technologies. It is relevant for all working in the Creative Industries professions. Under review.

**Courses:** IF06  
**Contact hours:** 4 per week **Credit points:** 12  
**Semester:** 1, 3

### ► KKD618 WRITING FOR CREATIVE INDUSTRIES

Introduces students to the practices and process skills necessary for writing successfully. The three foundational, transferable skills are acquiring information and ideas; organising the information and ideas; and writing appropriately for various audiences.

**Courses:** IF06  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** KKB618  
**Campus offered:** KG **Semester:** 2

### ► KKN001 HONOURS PROJECT 1

Students enrolled in the Honours course are required to undertake a major project including a thesis component. The creative project should have an industry or arts focus, and demonstrate an ability to apply academic and creative knowledge innovatively.

**Courses:** KK52, KK53, KK54, KK55  
**Credit points:** 24 **Incompatible with:** AAB001  
**Campus offered:** GP, KG **Semester:** 1, 2

### ► KKN002 GRADUATE SEMINAR

Seminar program of formal presentations of arts research projects by Honours students. Students also attend weekly presentations in the Masters graduate seminar series.

**Courses:** KK52, KK53  
**Contact hours:** 3 per week **Credit points:** 12

### ► KKN003 HONOURS PROJECT 2

Students enrolled in the Honours course are required to undertake a major project including a thesis component. The creative project should have an industry or arts focus, and demonstrate an ability to apply academic and creative knowledge innovatively.

**Courses:** KK52, KK53, KK54, KK55  
**Prerequisites:** KKN001 **Credit points:** 36

### ► KKN006 INDEPENDENT STUDY

Independent work of an artistic or scholarly nature which is of limited scope compared with the research project. The student devises an outline of study and/or action in consultation with a staff supervisor. Artistic outcomes would normally be expected to be to the standard of public showing. Written presentation requires a minimum of 6000-10000 words, or equivalent if other media/reportage is used.

**Courses:** KK42  
**Credit points:** 12

### ► KKN007 1/8 RESEARCH PROJECT

Students enrolled part-time or full-time in KK51 Master of Arts (Research) undertake a research project as the major component of their studies.

This project may take the form of: EITHER a research thesis; OR a creative project accompanied by a written component. The creative project could include an exhibition of visual art; a performance (dance, drama, music); or choreography, script or score; or a book-length work of fiction or non-fiction; or a film or multi-media script or production. Units may be either taken one per semester or several per semester, depending on the enrolment pattern recommended by the School in the Course Summary Sheet, in accordance with the desired length of candidature, mode (full- or part-time), and entry qualifications (three or four year qualified).

**Courses:** KK51 **Contact hours:** 1 per week  
**Credit points:** 96 (12 each)  
**Incompatible with:** AAN007

### ► KKN011 ADVANCE PROFESSIONAL PRACTICE 1

An investigation of the student's professional practice through observation and research in consultation with the supervisor.

**Courses:** KK42  
**Contact hours:** 3 per week **Credit Points:** 12  
**Incompatible with:** AAN011  
**Campus offered:** KG **Semester:** 1, 2

### ► KKN012 ADVANCED PROFESSIONAL PRACTICE 2

Extension and elaboration of the student's professional practice through evaluation and analysis in consultation with the supervisor.

**Courses:** KK42  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAN012  
**Campus offered:** KG **Semester:** 1, 2

### ► KKN013 ADVANCED PROFESSIONAL PRACTICE 3

A significant artistic outcome as part of the student's skills development including research, rehearsal and preparation for an exhibition or performance.

**Courses:** KK42  
**Contact hours:** 12 per week **Credit points:** 24  
**Incompatible with:** AAN013  
**Campus offered:** KG **Semester:** 1, 2

### ► KKN014 DISCIPLINE STUDY

Working with other students from their home discipline this unit investigates issues of theory and practice in the visual and performing arts. It will address immediate problems of professional practice and the reflexive relationship between theory and practice.

**Courses:** KK42  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAN014  
**Campus offered:** KG **Semester:** 1, 2

## UNIT SYNOPSES

### ► KKN016 FRAMEWORKS FOR PERFORMANCE

Addresses issues in interpretation for the musical performer. Students will examine models and frameworks of interpretation with particular reference to their principal instrument.

**Courses:** KK42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN016

**Campus offered:** KG **Semester:** 2

### ► KKN020 RESEARCH METHODS IN VISUAL AND PERFORMING ARTS

Advanced information retrieval, academic writing and technical literacy, research proposal, literature review, project management for researchers and the politics, business and ethics of research in the visual and performing arts.

**Courses:** KK42, KK51

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN020

**Campus offered:** KG **Semester:** 1

### ► KKN058 ARTS RESEARCH

An introduction to current research methods and approaches in the arts, the unit addresses the issues of the status of the observer, as well as arts practice as research. This unit is a prerequisite for entry to Honours.

**Courses:** KD25, KS25, KS26, KT32, KM32, KV25, KV32

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN058

**Campus offered:** GP, KG **Semester:** 1

### ► KKP107 DISSERTATION

The culmination of the degree in Creative Writing Production, Film and Television Production, Journalism or Media Studies in that students apply the theory and research material covered in earlier units to explore in some depth an applied or theoretical topic in their chosen discipline area. The dissertation is normally based on information from secondary sources and consists of a written report of approximately 12000 to 15000 words. It is also possible to undertake a creative work such as a film or multimedia script or production. Students enrol in four sequential 12 credit point units (KKP107/1, KKP107/2, KKP107/3, KKP107/4) until they have completed 48 credit points. Normally, KKP107/1 will involve students beginning to apply the theory and research material covered in earlier units, to a chosen dissertation topic, in consultation with an approved supervisor. KKP107/2 will involve students consolidating the preparatory work begun in KKP107 /1 by preparing drafts of two chapters under structured supervision. KKP107/3 and KKP107/4 completes the sequence of dissertation units. Students complete the drafting of their dissertation and revise to a final copy for submission under supervision. Length will be 12000 to 15000 words or an equivalent in other media forms.

**Prerequisites:** Normally, KKP391 and one of KWP103, KPP104, KJP105, KCP110.

**Credit points:** 48 total

**Incompatible with:** MJP107 1-4

**Campus offered:** GP **Semester:** 1, 2

### ► KKP391 MEDIA RESEARCH METHODS

This unit will develop applied skills in research strategies and methodologies relevant to the disciplines of creative writing, film and television production, journalism and media studies, and to the study of media industries, texts, audiences and professional practice. It combines analysis of areas of media research, including organisational, policy, content, critical and creative practice research, with the development of appropriate methodologies and strategies for the development of research projects, and the application of information technology and generic research skills to these projects. The unit will also provide an overview of issues involved in research outside of the educational context, including work with professional groups, consultancy research and publication and career development strategies.

**Courses:** KK51, KK52, KK53, KK54

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJP391

**Campus offered:** GP **Semester:** 1

### ► KMB056 PROFESSIONAL STUDIES

This unit aims to facilitate a smooth and confident transition from undergraduate experiences to life in the arts workforce. Exploration of current issues in the arts, and development of professional skills including public speaking, meeting procedures and career management.

**Courses:** KM32

**Prerequisites:** KMB635 or KMB637

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB056

**Campus offered:** KG **Semester:** 2

### ► KMB616/1 ENSEMBLE PROJECT A

Students experience the cooperative interaction of music-making as a participant or a leader. Options include: leadership in one group, participation in two groups, or participation in one group and submission of a written research essay on an approved topic relating to music practice. As this is a year long unit, students must enrol in KMB616/2 in the second semester.

**Courses:** IF77, KM32

**Prerequisites:** Approval of Unit Coordinator

**Credit points:** 12 **Incompatible with:** AAB616

**Campus offered:** KG **Semester:** 1

### ► KMB616/2 ENSEMBLE PROJECT A

Students experience the cooperative interaction of music-making as a participant or a leader. Options include: leadership in one group, participation in two groups, or participation in one group and submission of a written research essay on an approved topic relating to music practice. As this is a year long unit, students must complete KMB616/1 in the first semester.

**Courses:** IF77, KM32

**Prerequisites:** Approval of Unit Coordinator

**Contact hours:** AAB616 **Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► KMB617 ARRANGING

Development of composition and arranging skills for instrumental/choral ensembles using music of various styles.

**Courses:** IF77, KM32

**Prerequisites:** AAB630, KMB630

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► KMB618 SOUNDTRACKS FOR FILM AND TELEVISION

Development of programmatic compositional skills with particular reference to the impact of music on moving pictures and an understanding of SMPTE and a study of film analysis with visual and/or thematic coding.

**Courses:** IF77, KM32

**Prerequisites:** KMB619 or KMB633 or equivalent

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB628

**Campus offered:** KG **Semester:** 1

### ► KMB619 MUSIC AND SOUND TECHNOLOGY

An introduction to the broad range of options available to the musician in the age of technology. Through the universal electronic language of MIDI students explore sequencers as a tool for composition as well as basics of sound.

**Courses:** KM32, IF77

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB619

**Campus offered:** KG **Semester:** 1, 2

### ► KMB621 SOUND RECORDING AND ACOUSTICS

An introduction to the fundamentals of the physical world of sound, basic signal flow, sound recording and acoustics.

**Courses:** IF77, KI25, KI32, KM32, KS25, KS26, KT32

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB621

**Campus offered:** KG **Semester:** 1, 2

### ► KMB622 SECOND STUDY 1

Widens the base of a student's practical skills through the study of a second instrument or voice. Students normally choose an instrument closely related to that of their Principal Study.

**Courses:** IF77, KM32

**Prerequisites:** Available only to Performance majors

**Contact hours:** 2 per week **Credit points:** 12

**Incompatible with:** AAB622

**Campus offered:** KG **Semester:** 2

### ► KMB623 CONDUCTING

Introduces students to a wide range of music and styles and assists them to achieve artistic objectives in music performance through conducting workshop activities including practical conducting, stylistic practices, repertoire and rehearsal and performance techniques.

**Courses:** IF77, KM32

**Prerequisites:** KMB633 or approval of Unit Coordinator

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB623

**Campus offered:** KG **Semester:** 1

### ► KMB626 MUSIC AND SOUND FOR MULTIMEDIA

This unit deals with studio recording techniques, computer-assisted composition, the role of music in non-linear structures, the effect and affect of sound in digital media productions, sound effects and Foley techniques, musical acoustics, and digital sound theory.

**Courses:** IF77, KM32

**Prerequisites:** KMB621 or KMB619

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB626

**Campus offered:** KG **Semester:** 1, 2

### ► KMB628 SECOND STUDY 2

Continues the development of a student's practical skills through the study of a second instrument or voice.

**Courses:** IF77

**Prerequisites:** KMB622

**Contact hours:** 2 per week **Credit points:** 12

**Incompatible with:** AAB628

**Campus offered:** KG **Semester:** 2

### ► KMB629/1 ENSEMBLE PROJECT B

Students experience the cooperative interaction of music-making as a participant or a leader. Options include: leadership in one ensemble, participation in two ensembles, or participation in one ensemble and submission of a written research essay on an approved topic relating to music practice. As this is a year long unit, students must enrol in KMB629/2 in the second semester.

**Courses:** AA91, F77, KM32

**Prerequisites:** KMB616 and approval of Unit Coordinator

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB629

**Campus offered:** KG **Semester:** 1

### ► KMB629/2 ENSEMBLE PROJECT B

Students experience the cooperative interaction of music-making as a participant or a leader. Options include: leadership in one ensemble, participation in two ensembles, or participation in one ensemble and submission of a written research essay on an approved topic relating to music practice. As this is a year long unit, students must complete KMB629/1 in the first semester.

**Courses:** AA91, IF77, KM32

**Prerequisites:** KMB616 and approval of Unit Coordinator

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB629

**Campus offered:** KG **Semester:** 2

### ► KMB630 MUSIC TEXTURES

An introduction to the concepts of texture in music. The study of textural design has been enriched by recent developments in music technology, enabling music to be heard as pure timbre in the sound media. This unit includes the techniques of orchestration, and other arranging techniques.

**Courses:** IF77, KM32

**Prerequisites:** KMB632 or approval of Unit Coordinator

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB630

**Campus offered:** KG **Semester:** 1

### ► KMB631 WORLD MUSIC

Through a series of lectures, demonstrations and tutorials the student will gain an awareness and better understanding of world music, its particu-

## UNIT SYNOPSES

lar significance within Australia and its impact upon contemporary music.

**Courses:** CI Open Elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB631  
**Campus offered:** KG **Semester:** 1

► **KMB632 CORE MUSICIANSHIP 1**

Students will develop strategies for problem solving techniques in creative musical thinking, and music making. Content includes aural training, composition techniques, contextual study, analysis, composition and improvisation presentations and the application of computer music printing software.

**Courses:** KM32, IF77  
**Contact hours:** 4.5 per week **Credit points:** 12  
**Incompatible with:** AAB632  
**Campus offered:** KG **Semester:** 1

► **KMB633 CORE MUSICIANSHIP 2**

Students will further develop skills in creative musical thinking and music making. Content includes aural training, keyboard lab, composition techniques, contextual study, analysis, composition and improvisation presentations.

**Courses:** KM32, IF77 **Prerequisites:** KMB632  
**Contact hours:** 4.5 per week **Credit points:** 12  
**Incompatible with:** AAB633  
**Campus offered:** KG **Semester:** 2

► **KMB634 CONTEMPORARY ART MUSICIANSHIP**

Music making processes have changed with developments in new media and media integration. This unit develops skills in this area such as sonic and psycho-acoustic thinking, synthesis, sampling and applying software applications.

**Courses:** KM32, IF77  
**Prerequisites:** KMB633  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB634  
**Campus offered:** KG **Semester:** 2

► **KMB635 SOUND MEDIA MUSICIANSHIP**

This unit offers an in-depth study of music as a sound phenomenon. It explores music through understanding the physics of sound, psycho-acoustics, spectro-morphology, and digital tools for sound manipulation. As a musicianship unit, this exploration involves analysis, research and composition.

**Courses:** KM32, IF77 **Prerequisites:** KMB633  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB635  
**Campus offered:** KG **Semester:** 2

► **KMB636 CROSS CULTURAL MUSICIANSHIP**

Music operates in a complex cultural environment fuelled by increased communication and technology. In this unit the student's ability to recognise, analyse and create music drawing from a diverse range of cultures is developed.

**Courses:** KM32, IF77 **Prerequisites:** KMB633  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB636  
**Campus offered:** KG **Semester:** 1

► **KMB637 JAZZ AND POPULAR MUSIC MUSICIANSHIP**

This unit offers a study of the development of jazz and contemporary popular music through analysis, composition and complementary aural and keyboard musicianship sessions.

**Courses:** KM32, IF77 **Prerequisites:** AAB632  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB637  
**Campus offered:** KG **Semester:** 1

► **KMB638 SOUND AND IMAGE**

Students explore why they are influenced and manipulated by the interaction of narrative, moving images, sound (including music) and their imagination. Through a discussion of classic and contemporary world examples students map this interplay through analysis, criticism and viewing.

**Courses:** CI Open Elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB638  
**Campus offered:** KG **Semester:** 1

► **KMB639/1 MUSIC DIRECTING**

Students experience the cooperative interaction of music-making as a participant or a leader.

Options include: leadership in one ensemble, participation in two ensembles, or participation in one ensemble and submission of a written research essay on an approved topic relating to music practice. As this is a year long unit, students must enrol in KMB639/2 in the second semester.

**Courses:** IF77, KM32  
**Prerequisites:** KMB630 and approval of the Unit Coordinator  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB639  
**Campus offered:** KG **Semester:** 1

► **KMB639/2 MUSIC DIRECTING**

Students experience the cooperative interaction of music-making as a participant or a leader. Options include: leadership in one ensemble, participation in two ensembles, or participation in one ensemble and submission of a written research essay on an approved topic relating to music practice. As this is a year long unit, students must complete KMB639/1 in the first semester.

**Courses:** IF77, KM32  
**Prerequisites:** KMB630 and approval of Unit Coordinator  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB639  
**Campus offered:** KG **Semester:** 2

► **KMB640 SEX DRUGS ROCK N ROLL**

Students will gain an insight into the musical, societal, artistic economic and political landscape of the innovative music of the 21st century including rock and pop music, world music, dance music, indigenous music and new age music.

**Courses:** CI Open Elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB640  
**Campus offered:** KG **Semester:** 2

► **KMB648 THE MUSIC SCENE**

The 1960s saw Australian music starting to break free from its colonial past. With this came an impetus to provide the necessary industry to support the developing music culture. In parallel, Australian popular and indigenous music was beginning to achieve some worldwide successes. Today with the increasing globalisation of the music industry, the local scene takes on new meanings. This unit will explore these relationships both musically and culturally.

**Courses:** KM32, IF77, CI Open Elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB648  
**Campus offered:** KG **Semester:** 1

► **KMB649 INTRODUCTORY MUSICIANSHIP**

Students will study improvisation and music production, undertake an extensive listening program and develop sound creative and conceptual skills. The unit is intended to stimulate both beginners and experienced musicians, adopting a fresh approach to the field.

**Courses:** All except AA91, KM32, IF77  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 1

► **KMB650 INTRODUCTORY ENSEMBLE**

This unit allows students to work in an ensemble or group activity. The cooperative interaction of performance and other music-making activities is an essential ingredient in the training of the mature musician and one which will enhance both the individual and the group. The benefits reach into daily life and assist the student to better work in groups.

**Courses:** All except AA91, KM32, IF77  
**Credit points:** 12 **Incompatible with:** AAB650  
**Campus offered:** KG **Semester:** 2

► **KMB651 MUSIC PERFORMANCE STUDIES 1**

This series of sequential units begins with the development of a secure and reliable technique on a principal instrument or voice. Content includes individual lessons and master classes, participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.

**Courses:** IF77, KM32  
**Contact hours:** 5 per week **Credit points:** 12

**Incompatible with:** AAB651

**Campus offered:** KG **Semester:** 1

► **KMB652 MUSIC PERFORMANCE STUDIES 2**

This series of sequential units begins with the development of a secure and reliable technique on a principal instrument or voice. Content includes individual lessons and master classes, participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.

**Courses:** IF77, KM32  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB652  
**Campus offered:** KG **Semester:** 2

► **KMB653 MUSIC PERFORMANCE STUDIES 3**

This series of sequential units begins with the development of a secure and reliable technique on a principal instrument or voice. Content includes individual lessons and master classes, participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.

**Courses:** IF77, KM32  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB653  
**Campus offered:** KG **Semester:** 1

► **KMB654 MUSIC PERFORMANCE STUDIES 4**

This series of sequential units begins with the development of a secure and reliable technique on a principal instrument or voice. Content includes individual lessons and master classes, participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.

**Courses:** IF77, KM32  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB654  
**Campus offered:** KG **Semester:** 2

► **KMB657 MUSIC PRODUCTION STUDIES 1**

Sequential units beginning with the development of a secure and reliable technique on a composition or production skill. Content includes small group learning work, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.

**Courses:** IF77, KI25, KM32, KV25  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB657  
**Campus offered:** KG **Semester:** 1

► **KMB658 MUSIC PRODUCTION STUDIES 2**

Sequential units beginning with the development of a secure and reliable technique on a composition or production skill. Content includes small group learning work, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.

**Courses:** IF77, KI25, KM32, KV25  
**Prerequisites:** KMB657  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB658  
**Campus offered:** KG **Semester:** 2

► **KMB659 MUSIC PRODUCTION STUDIES 3**

Sequential units beginning with the development of a secure and reliable technique on a composition or production skill. Content includes small group learning work, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.

**Courses:** IF77, KI25, KM32, KV25  
**Prerequisites:** KMB658  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB659  
**Campus offered:** KG **Semester:** 1

► **KMB660 MUSIC PRODUCTION STUDIES 4**

Sequential units beginning with the development of a secure and reliable technique on a composition or production skill. Content includes small group learning work, attendance and participa-

## UNIT SYNOPSES

tion in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.

**Courses:** IF77, KI25, KM32

**Prerequisites:** KMB659

**Contact hours:** 5 per week **Credit points:** 12

**Incompatible with:** AAB660

**Campus offered:** KG

**Semester:** 2

### ► KMB681 MUSIC PROJECT 1

The unit aims to develop to an advanced level the technical, interpretive, collaborative and creative skills acquired previously in the course, thus assisting the student's emerging practice as a musician. This is achieved through a substantially independent mode of learning involving project management. The unit further aims to develop students' musical abilities through the projects, seminars, workshops, events, performances, presentations, and work experience. Projects may fit into the following categories: performance, presentation, interdisciplinary/multidisciplinary project, or workplace secondment.

**Courses:** KM32, AA91

**Prerequisites:** 4 units from KMB651–KMB660 and one from KMB634–KMB637

**Contact hours:** 6 per week **Credit points:** 24

**Campus offered:** KG

**Semester:** 1, 2

### ► KMB682 MUSIC PROJECT 2

The purpose of this unit is to augment and/or develop the work undertaken in Music Project 1. This is achieved through a substantially independent mode of learning involving project management. The unit further aims to develop students' musical abilities through the projects, seminars, workshops, events, performances, presentations, and work experience.

**Courses:** KM32, AA91

**Prerequisites:** A pass or concurrent enrolment in KMB681

**Contact hours:** 6 per week **Credit points:** 24

**Campus offered:** KG

**Semester:** 1, 2

### ► KMN601 MUSIC PROJECT 1

This is the first in a sequence of self-directed project units. Students will undertake a music project of relevance to the creative industries. This will incorporate discovery, practice and reflection. This unit may be taken in the most appropriate location to ensure a successful outcome and the detail would be agreed with their supervisor.

**Courses:** AA95, KM35, KM36, KM42

**Contact hours:** 3 per week **Credit points:** 24

**Incompatible with:** AAN601

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KMN602 MUSIC PROJECT 2

This unit follows from KMN601 and enables students to further develop their project.

**Courses:** AA95, KM35, KM36, KM42

**Prerequisites:** KMN601

**Contact hours:** 3 per week **Credit points:** 24

**Incompatible with:** AAN602

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KMN603 MUSIC PROJECT 3

This unit follows from KMN602 and enables students to further develop their project.

**Courses:** AA95, KM35, KM36, KM42

**Prerequisites:** KMN602

**Contact hours:** 3 per week **Credit points:** 24

**Incompatible with:** AAN603

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KMN604 MUSIC PROJECT 4

This unit follows from KMN603 and enables students to further develop their project.

**Courses:** AA95, KM35, KM36, KM42

**Prerequisites:** KMN603

**Contact hours:** 3 per week **Credit points:** 24

**Incompatible with:** AAN604

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KMN605 MUSIC PROJECT 5

This unit follows from KMN604. In this unit the student will complete their project.

**Courses:** AA95, KM35, KM36, KM42

**Prerequisites:** KMN604

**Contact hours:** 3 per week **Credit points:** 24

**Incompatible with:** AAN605

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KMN606 ADVANCED DIGITAL RECORDING

Students will follow and integrated course of theory and practice. They will use industry standard software for digital recording to create a portfolio of recordings using either their own equipment or the music and sound labs at QUT.

**Courses:** AA95, KM35, KM36, KM42

**Prerequisites:** KMB619 OR KMB621

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN606

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KMN609 INDEPENDENT PROJECT

It is important for those students who wish to investigate an area of study not centrally covered in the compulsory units, to have the opportunity to construct and execute a project in an area of their own choice. The project may be in the field of scholarship and research or in creative work within music or in interdisciplinary work.

**Courses:** AA95, KM35, KM36, KM42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN609

**Campus offered:** KG

**Semester:** 1, 2, 3

### ► KMN611 MULTI-INSTRUMENTAL STUDIES 1

This unit is designed to widen the base of students' practical skills and to enhance career opportunities through the study of second instruments. Students will work through an intensive program in groups, on a variety of instruments, to obtain fundamental skills on those instruments which will develop and enhance their multi-instrument skills for teaching.

**Courses:** AA95, KM35, KM36, KM42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN611

**Campus offered:** KG

**Semester:** 3

### ► KMN612 MULTI-INSTRUMENTAL STUDIES 2

This unit is designed to deepen students' practical skills through the study of second instruments, and to have them engage with multi-instrumental pedagogical methods. Students will work through an intensive program, in groups on a variety of instruments to obtain fundamental skills on those instruments which will develop and enhance their multi-instrument skills for group instruction.

**Courses:** AA95

**Prerequisites:** KMN611 or equivalent

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN612

**Campus offered:** KG

**Semester:** 3

### ► KMN614 TEACHING MUSIC WITH TECHNOLOGY

Building on the established tradition of assisting learning with technologies, from blackboards to photocopiers, this unit will introduce students to the uses of contemporary technology in music education. Given the pace of technological change this unit will be useful for both pre-service teachers and for teachers updating their skills and knowledge. The unit provides a foundation for ongoing learning about music technologies by providing transferable pedagogical principles and practical skills.

**Courses:** AA95, KM35, KM36, KM42

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN614

**Campus offered:** KG

**Semester:** 3

### ► KMN615 ADVANCED CONDUCTING

This unit is designed to further acquaint Music students with a wide range of works and styles and to assist them to achieve artistic objectives in music performance through an intensive program conducting workshop activities.

**Courses:** AA95, IF77, KM32, KM35, KM36, KM42

**Prerequisites:** KMB623

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAN615

**Campus offered:** KG

**Semester:** 3

### ► KMN618 COMPOSING FOR MOVING PICTURES

Development of programmatic compositional skills with particular reference to the impact of music on moving pictures and an understanding

of SMPTE and a study of film analysis with visual and/or thematic coding.

**Courses:** IF77, KM32

**Prerequisites:** KMB619 or KMB633 or equivalent

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG

**Semester:** 1

### ► KMN626 MUSIC & SOUND FOR DIGITAL MEDIA

This unit deals with studio recording techniques, computer-assisted composition, the role of music in non-linear structures, the effect and affect of sound in digital media productions, sound effects and Foley techniques, musical acoustics, and digital sound theory.

**Courses:** IF77, KM32

**Prerequisites:** KMB621 or KMB619

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB626

**Campus offered:** KG

**Semester:** 1, 2

### ► KMN630 MATERIALS OF MUSIC

An introduction to the concepts of texture in music. The study of textural design has been enriched by recent developments in music technology, enabling music to be heard as pure timbre in the sound media. This unit includes the techniques of orchestration, and other arranging techniques.

**Courses:** IF77, KM32

**Prerequisites:** KMB632 or approval of

Unit Coordinator

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB630

**Campus offered:** KG

**Semester:** 1

### ► KMP423 MUSIC CURRICULUM STUDIES 1

Focuses on curriculum and methods of teaching music in the junior secondary school, with emphases on singing, aural training and music literacy. Philosophical bases for the development, implementation of principles and writing of individual lesson plans for use in teaching practice.

**Courses:** ED19, ED55, IF77

**Prerequisites:** 72 credit points in Music

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAP423

**Campus offered:** KG

**Semester:** 2

### ► KMP431 MUSIC CURRICULUM STUDIES 2

Advanced practical applications in assessment, curriculum planning and teaching and learning strategies relevant to secondary music education.

**Courses:** ED19, ED55, IF77

**Prerequisites:** KMP423

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAP431

**Campus offered:** KG

**Semester:** 1

### ► KMP433 MUSIC CURRICULUM STUDIES 2A

Extension studies in methods of teaching and curricula relevant to specialist teachers of instrumental, secondary or primary music.

**Courses:** ED19, ED55, IF77, AA95

**Prerequisites:** KMP434, For AA95 only - 144 credit points in Music

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAP433

**Campus offered:** KG

**Semester:** 1

### ► KMP434 MUSIC CURRICULUM STUDIES 1A

A specialist extension study in curriculum for students planning a career as a primary, secondary or instrumental music specialist in schools; materials and appropriate methods of teaching related to music in the wider school curriculum outside the classroom.

**Courses:** ED55, IF77, ED19, AA95

**Prerequisites:** 144 credit points in Music

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAP434

**Campus offered:** KG

**Semester:** 2

### ► KPB118 FUNDAMENTALS OF PHOTOGRAPHY

This is an introductory unit that covers black and white and colour photography and computer image enhancement as the basis for composition. The unit examines the role of the photographer in society, the principles of visual perception and

## UNIT SYNOPSES

design, and photography both as art and craft. Topics examined include fashion photography; documentary and photojournalism; photo layout and design; the still camera; the creative use of the camera; printing techniques; and Adobe Photoshop 6.01/7 (for computer enhancement and manipulation of images). The assessment comprises of two photographic assignments, a (computer) digital assignment using Adobe Photoshop and an end of semester exam.

**Courses:** KK32

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB118

**Campus offered:** GP

**Semester:** 1, 2

### ► KPB130 MEDIA TEXT ANALYSIS

Acquaints students with a range of approaches, both traditional and contemporary, to the analysis of media texts. Equips students with practical methods of understanding the creation and structuring of social meaning through media. The strategies applied in the analysis of texts will be drawn from the following areas: Utilitarianism, New Criticism and the traditional legacy; Semiotics and Structuralism/Post-Structuralism; Marxism and Contextual/Historical Approaches, Feminism, Psychoanalysis, and Multi-Culturalism. The media texts chosen will include newspaper articles, cartoons, photographs, advertisements, films and television programs.

**Courses:** KK32, IF25, IF27, IF35, KP25, ED50

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB130

**Campus offered:** GP

**Semester:** 1

### ► KPB141 FILM AND TELEVISION

#### LANGUAGE

Surveys the processes by which meaning is constructed in film and television programs. This is studied in relation to the question of form, and attention is given to how films, narrative and non-narrative, and television programs, may be structured. The production of meaning is explored through an examination of mise-en-scene (movement and placement of actors, setting, lighting, and costume), cinematography (camera-angle, camera-distance, camera-movement and special effects), editing and sound.

**Courses:** KK32, KP25, IF25, IF27, IF35, ED50, IF75

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** MJB141

**Campus offered:** GP

**Semester:** 1

### ► KPB155 MEDIA PRODUCTION

Should be combined with KPP155. Basic design for informational, creative, corporate, documentary and drama productions. Exploration of the history and theory of design for media production. Introduction to the design of project management strategies, art and screen direction, images, sounds and sequences of audio visual montage at an introductory level. Introduction to project management; performance and screen direction; image capture and lighting design; sonic capture and audio design; visual montage and image mixing.

**Courses:** KP25, KK32, IF27, KP35, KP36, IF26, IF35

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB155

**Campus offered:** GP

**Semester:** 1, 2

### ► KPB185 INFORMATIONAL PRODUCTION

Should be combined with KPP185. Forms of training and educational materials development as they apply to informational media. Exploration of the historical and theoretical underpinnings of informational media. Training in management, direction, camera, sound and editing as they apply to moving image media at an introductory level. Practice in project management, performance and art direction; image capture and lighting design; sonic capture and audio design; visual montage and image mixing.

**Courses:** KP25, KK32, IF27, KP35, KP36

**Prerequisites:** MJB155/KPB155. This is a quota based unit with preference given to FTVP majors.

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB185

**Campus offered:** GP

**Semester:** 2, 3

### ► KPB190 CREATIVE PRODUCTION

Experimentation in the coverage of live movement events; the visual interpretation of sound; the sonic transformation of visual events. Exploration of the historical and theoretical underpinnings of experimental motion picture art. Training in management, direction, camera, sound and editing as they apply to moving image media at an advanced level. Practice in specialist roles on creative productions.

**Courses:** KP25

**Prerequisites:** KPB185, KPB155. Available to FTVP majors only.

**Contact hours:** 6 per week **Credit points:** 24

**Incompatible with:** MJB190

**Campus offered:** GP

**Semester:** 1

### ► KPB209 AUSTRALIAN TELEVISION

This unit explores the historical and global contexts that have determined the nature of Australian television. It also examines the television industry in terms of the differing imperatives shaping public and private television. The unit in addition canvasses the interaction between television and its audiences. This is followed by a critique of a number of important television texts and then a study of the probable and possible futures for television in Australia.

**Courses:** KP25, KK32, IF27, ED50, IF26, IF35

**Prerequisites:** 96 credit points of undergraduate study

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB209

**Campus offered:** GP

**Semester:** 1

### ► KPB233 TELEVISION CULTURES

Television genres and programs are important sources of entertainment and information for viewers. A viewer-centred approach is adopted to consider the pleasures and meanings TV viewers derive from watching television and from engaging with TV-related material in digital screen and print media. This involves examining the nature of the communication process between television viewers, the television programs they watch, and TV-related texts found in digital screen media (such as CD/video games and online fan-sites). Topics include television audiences, fans, cult-TV; TV related websites; the effects of watching television; and the cross-over of television programs into the movies.

**Courses:** KP25, IF27, KK32, IF26, IF35

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB233

**Campus offered:** GP

**Semester:** 1

### ► KPB260 COMMUNITY AND EDUCATIONAL VIDEO

New approaches to educational and community-focused video production using video cameras, editing equipment and computers; maximising outcomes using low-cost new wave technologies to produce magazine programs, oral histories, corporate promotional, educational and training videos. This unit is quota based with preferences given to Education and FTVP majors.

**Courses:** KK32, IF27, KP25, ED50

**Prerequisites:** KPB155

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB260

**Campus offered:** GP

**Semester:** 1, 2

### ► KPB265 CORPORATE PRODUCTION

Electronic field production and television studio production as they apply to business communication. Exploration of the historical and theoretical underpinnings of corporate television and video production. Training in management, direction, camera, sound and editing as they apply to corporate moving image media at an advanced level. Practice in specialist roles on corporate productions.

**Courses:** KP25, IF27

**Prerequisites:** KPB155, KPB185. Available to FTVP majors only.

**Contact hours:** 6 per week **Credit points:** 24

**Incompatible with:** MJB265

**Campus offered:** GP

**Semester:** 2

### ► KPB268 FILM AND TELEVISION DRAMA PRACTICE

This unit introduces students to directing methodologies in film and television drama. Students will be exposed to different approaches to direct-

ing actors. The unit will examine a number of case studies of seminal directors who encompass a variety of performance strategies and aesthetic techniques. In addition, the unit will familiarise students with a wide range of stylistic approaches to directing for film and television. Students will be expected to assimilate the principles outlined in the unit into their own creative work and will be formatively assessed on dramatic screenplays they write in the unit.

**Courses:** KP25

**Prerequisites:** KPB111, KPB155, KPB185, KPB190, KPB265.

**Contact hours:** 3 per week

**Credit points:** 12

**Incompatible with:** MJB268

**Campus offered:** GP

**Semester:** 1

### ► KPB270 FILM DRAMA PRODUCTION

Film or video production which uses actors as mediators in the communication of fictional events. Exploration of the historical and theoretical underpinnings of fictional motion picture art. Training in management, direction, camera, sound and editing at a professional level. Practice in a specialist role on short drama production/s.

**Courses:** KP25

**Prerequisites:** KPB111, KPB155, KPB185, KPB190. Available to FTVP majors only.

**Contact hours:** 6 per week **Credit points:** 24

**Incompatible with:** MJB270

**Campus offered:** GP

**Semester:** 2

### ► KPB305 AMERICAN FILM: GENRES AND DIRECTORS

A contextual study of American films across 50 years. It allows students to explore how films form part of and contribute to the ideologies current during the period of their production. The subject examines the refraction of the Great Depression and Roosevelt's New Deal in 1930s genre films; the post-war reconstruction and the reaffirmation of the family in 1940s films; the anti-communist hysteria and conservatism of the 1950s; the relation of 1960s films to various radical movements of the period; and the treatment of a range of social issues in 1970s and 1980s and 1990s films.

**Courses:** KK32, IF27, KP25, IF25, IF35, ED50

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB305

**Campus offered:** GP

**Semester:** 2

### ► KPB307 FEMINIST SCREEN STUDIES

The mass media play a significant role in constructing gendered and sexualised identities within our culture. Women and men are spectators, objects of the gaze, and creators of meaning. The gender/sexual politics of various cultural texts is integral to an understanding of cultural production. The subject is designed to examine critically the issue of gender, sexuality and the media within cultures. A range of media texts will be investigated from a feminist perspective, incorporating issues of race, class and age, as well as gender and sexuality.

**Courses:** KK32, IF27

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB307

**Campus offered:** GP

**Semester:** 2

### ► KPB311 ASIAN FILM AND MEDIA

This unit provides students with an introduction to the study of the following national cinemas - China and Japan and also to the study of media within Asia. China will be taken to include reference to the cinemas of the People's Republic of China and Taiwan. The films will be placed within their political, cultural and historical contexts. Thus Chinese cinema will include the study not only of the New Cinema which emerged from the filmmakers Chen Kaige, Wu Tianming, Zhang Yimou and Tian Zhuangzhuang but also that of the popular genres from Hong Kong and the Mainland. The Asian Media section of this unit will consider the media in countries such as Indonesia, and the role of the media in the Asian diaspora.

**Courses:** KK32, IF27

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB311

**Campus offered:** GP

**Semester:** 2

## UNIT SYNOPSES

### ► KPB314 MEDIA BUSINESS

The role of the producer and executive producer in the packaging and financing of film and television production including corporate, training and documentary, grant films, features telemovies and mini-series; matching television network programming needs and achieving balance in above-the-line, below-the-line and marketing costs. Sources of finance: PFTC, networks, corporate sponsors, corporate clients, investors, pre-sales, government grants, Film Finance Corporation; methods of obtaining finance, insurance, completion guarantees, legal and accounting requirements; social and ethical issues.

**Courses:** KP25, KK32, IF27

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB314

**Campus offered:** GP

**Semester:** 1

### ► KPB343 AUSTRALIAN FILM

A study of New Wave Australian films within their cultural and institutional contexts; issues facing the film industry today; the filmic construction and circulation of cultural discourses such as national identity, nationalism, gender, ethnicity and class; the Australian landscape in film; experimental and avant garde films; indigenous films; technological and global challenges.

**Courses:** KK32, ED50, IF75

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB343

**Campus offered:** GP

**Semester:** 1

### ► KPB344 INTERNATIONAL CINEMA

This unit examines a range of national cinemas from a global perspective. Key theoretical approaches to national/international cinemas are covered, along with significant historical, textual, representational and ideological issues. The critical challenges posed by productions from these different cultures to Hollywood mainstream productions are also explored.

**Courses:** KK32, KP25, IF26, IF35, ED50

**Prerequisites:** 96 credit points of undergraduate study.

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB344

**Campus offered:** GP

**Semester:** 2

### ► KPB358 DOCUMENTARY THEORY AND PRACTICE

This unit introduces students to the tradition of documentary production. Students will be exposed to the aesthetic, technical and ethical concerns of the documentary practitioner through history. The unit is a compulsory unit in the major for Media Studies students and Film and Television Production students, but will be available to other students. Film and Television and Creative Writing majors who have completed MJB111 will be expected to assimilate the principles outlined in the unit into their own creative work and will be formatively assessed on documentary screenplays they will write themselves. Media Studies students who have completed MJB111 and MJB141 will have a choice of either writing screenplays or analytical assignments addressing the theoretical underpinning of the unit in documentary theory. Media studies students who have not completed MJB111 will undertake the analytical assignments.

**Courses:** KP25, KK32, KP36, IF26, IF35

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB358

**Campus offered:** GP

**Semester:** 2

### ► KPB359 FILM HISTORY

The subject explores how narrative film has developed throughout the twentieth century and the relationship of this development to historical and technological change. It also examines what constitutes film history and the perspectives from which that history may be written. The following topics are treated: the development of early narrative and the Hollywood classical continuity style; Russian montage; neo-realism in post war Italy, and the 'kitchen-sink' films of Britain in the 60's; the 'long take' style; expressionism and film noir; the impact of colour and wide screen formats; the various 'new waves' of the 50's and 60's; Hollywood in the 70's; and the impact of new technologies and information systems.

**Courses:** KP25, KK32

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB359

**Campus offered:** GP

**Semester:** 2

### ► KPB360 DOCUMENTARY PRODUCTION

Video production concerned with the communication of non fiction events in science, the humanities and the arts. Exploration of the historical and theoretical underpinnings of non fictional motion picture art. Training in management, direction, camera, sound and editing as they apply to documentary production at a professional level. Practice in a specialist role on video documentary productions.

**Courses:** KP25

**Prerequisites:** KPB111, KPB155, KPB185.

**Contact hours:** 6 per week **Credit points:** 24

**Incompatible with:** MJB360

**Campus offered:** GP

**Semester:** 2

### ► KPP104 FILM AND TELEVISION PRODUCTION THEORY

This postgraduate unit equips students with the skills to strategically develop, market and plan their own film and television productions in the international marketplace. It addresses production strategies which are only marginally addressed at the undergraduate level. It also informs students about film laboratory procedures which have been modified by the introduction of digital technology. In addition, student will be acquainted with methodologies and theoretical underpinning for formulating their own aesthetic and developing a personal style.

**Courses:** KK53, KK52, KK51, KK54, KP35, KP36

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJP104

**Campus offered:** GP

**Semester:** 1

### ► KPP155 MEDIA PRODUCTION

Should be combined with KPB155. Basic design for informational, creative, corporate, documentary and drama productions. Exploration of the history and theory of design for media production. Introduction to the design of project management strategies, art and screen direction, images, sounds and sequences of audio visual montage at an introductory level. Introduction to project management; performance and screen direction; image capture and lighting design; sonic capture and audio design; visual montage and image mixing.

**Courses:** KP35

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJP155

**Campus offered:** GP

**Semester:** 1, 2

### ► KPP185 INFORMATIONAL PRODUCTION

Should be combined with KPB185. Forms of training and educational materials development as they apply to informational media. Exploration of the historical and theoretical underpinnings of informational media. Training in management, direction, camera, sound and editing as they apply to moving image media at an introductory level. Practice in project management, performance and art direction; image capture and lighting design; sonic capture and audio design; visual montage and image mixing.

**Courses:** KP35

**Prerequisites:** MJB155/KPB155, KPP185. This is a quota based unit with preference given to FTVP majors.

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJP185

**Campus offered:** GP

**Semester:** 2, 3

### ► KSB011 MUSIC THEATRE SKILLS

Provides students with an introduction to practical skills development in acting, dance and singing for music theatre.

**Courses:** KS25, KD15, KM32

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** AAB011

**Campus offered:** KG

**Semester:** 1

### ► KSB012 MUSIC THEATRE PROJECT

**Courses:** KS25

**Credit points:** 12

**Campus offered:** KG

**Semester:** 2

### ► KSB056 PROFESSIONAL STUDIES

This unit aims to facilitate a smooth and confident transition from undergraduate experiences to life in the arts workforce. Exploration of current issues in the arts and development of professional skills including career management.

**Courses:** KS25, KS26

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** AAB056

**Campus offered:** KG

**Semester:** 2

### ► KSB202 ACTING 1

Focuses on the actor and actress instrument, using a series of exercises that deal specifically with whatever impedes the actor and actress personal truth, and unblocking instrumental blocks to emotional expression. Work incorporates Stage and Camera requirements.

**Courses:** KS25

**Contact hours:** 14 per week **Credit points:** 12

**Incompatible with:** AAB202

**Campus offered:** KG

**Semester:** 1

### ► KSB203 ACTING 2

Continuation of the Instrument Work and the introduction of Craft Techniques, dealing with contemporary Naturalistic texts for Stage and Film and Television.

**Courses:** KS25

**Contact hours:** 21 per week **Credit points:** 12

**Incompatible with:** AAB203

**Campus offered:** KG

**Semester:** 2

### ► KSB204 VOICE AND MOVEMENT 1

Introduction to an organic approach to body and voice and their integration as the basis for all forms of dramatic expression. All voice and body work complements and supports the emotional freeing demanded in acting classes. Combat, connected speech, and singing are introduced.

**Courses:** KS25

**Contact hours:** 6 per week **Credit points:** 12

**Incompatible with:** AAB204

**Campus offered:** KG

**Semester:** 1

### ► KSB205 VOICE AND MOVEMENT 2

Continuation of the development of a free, responsive actors and actresses instrument. Combat, singing, mask work continue. Introduction to Naturalistic text.

**Courses:** KS25

**Contact hours:** 6 per week **Credit points:** 12

**Incompatible with:** AAB205

**Campus offered:** KG

**Semester:** 2

### ► KSB233 VOICE AND MOVEMENT 3

Explores naturalism to the area of heightened language. Focus is on the technical devices of Shakespearean text. Work developed will be performed both on the stage and for camera.

**Courses:** KS25

**Contact hours:** 6 per week **Credit points:** 12

**Incompatible with:** AAB233

**Campus offered:** KG

**Semester:** 1

### ► KSB234 VOICE AND MOVEMENT 4

Development of a vocal and physical technique that supports and serves the professional performer. Advanced classes in physical theatre will develop physical expressiveness, clarity and strength. Advanced studio work continues development in film and television techniques.

**Courses:** KS25

**Contact hours:** 6 per week **Credit points:** 12

**Incompatible with:** AAB234

**Campus offered:** KG

**Semester:** 2

### ► KSB235 VOICE AND MOVEMENT 5

Application of acting skills involving voice and movement is consolidated in production situations. Students are prepared for auditions for directors and agents.

**Courses:** KS25

**Contact hours:** 6 per week **Credit points:** 12

**Incompatible with:** AAB235

**Campus offered:** KG

**Semester:** 1

### ► KSB247 ACTING 3

Continuation of the development of a personal working process through rehearsal and performance of increasingly complex texts.

**Courses:** KS25

**Contact hours:** 20 per week **Credit points:** 12

**Incompatible with:** AAB247

**Campus offered:** KG

**Semester:** 1

## UNIT SYNOPSES

### ► KSB248 ACTING 4

**Courses:** KS26 **Prerequisites:** KSB247  
**Contact hours:** 20 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 2

### ► KSB251 MUSIC THEATRE PROJECT

The first in a series of three theatre history units, this examines the three major theatre movements of the twentieth century: Realism, Epic Theatre and Theatre of the Avant Garde.

**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB251  
**Campus offered:** KG **Semester:** 2

### ► KSB255 THEATRE PROJECT 1

Students participate in a season of semi-profiled performance projects, working as an ensemble performing roles for film and theatre.

**Courses:** KS25, KS26  
**Prerequisites:** KSB248 or KSB291 (KSB291 and KSB293 for TP students only)  
**Corequisites:** KSB294 (TP students only)  
**Contact hours:** 30 per week **Credit points:** 24  
**Incompatible with:** AAB255  
**Campus offered:** GP, KG **Semester:** 1

### ► KSB256 THEATRE PROJECT 2

A season of profiled performance projects, providing students with the opportunity to demonstrate their skills to potential employers in the industry.

**Courses:** KS25, KS26 **Prerequisites:** KSB255  
**Contact hours:** 30 per week **Credit points:** 36  
**Incompatible with:** AAB256  
**Campus offered:** GP, KG **Semester:** 1, 2

### ► KSB259 THE PERFORMANCE INSTRUMENT: BODY AND VOICE

Understanding vocal and physical patterns; application of integrated approach to body and voice in personal expression.

**Courses:** CI Open Elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB259  
**Campus offered:** KG **Semester:** 1

### ► KSB274 THEATRE CRAFT

Development of practical skills in workshop construction and pre-production areas of stage scenery, props and costumes.

**Courses:** KS25, KS26  
**Corequisites:** KSB289  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** AAB274  
**Campus offered:** KG **Semester:** 1

### ► KSB276 VISUAL THEATRE - DESIGN

Role of visual expression in theatrical events; elements of space; approaches to researching design elements; bearing of text and resources on events; Western and Eastern influences.

**Courses:** CI Open Elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB276  
**Campus offered:** KG **Semester:** 2

### ► KSB278 TECHNICAL THEATRE

**Courses:** KS25, KS26, open elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 1, 2

### ► KSB289 TECHNICAL PRODUCTION 1

Development of basic skills in theatrical lighting and sound operation and their integration into the overall production process.

**Courses:** KS26  
**Contact hours:** 6 per week **Credit points:** 12  
**Incompatible with:** AAB289  
**Campus offered:** GP, KG **Semester:** 1

### ► KSB290 TECHNICAL PRODUCTION 2

Continuation of creative use of lighting and sound in performances. Introduction to lighting and sound design.

**Courses:** KS26  
**Prerequisites:** KSB274 and KSB292  
**Contact hours:** 6 per week **Credit points:** 12  
**Incompatible with:** AAB290  
**Campus offered:** GP, KG **Semester:** 1

### ► KSB291 TECHNICAL PRODUCTION 3

Broadening of skills base in areas of lighting and sound into drama, contemporary dance, ballet, opera, musicals, concerts and television productions.

**Courses:** KS26

**Prerequisites:** KSB289, KSB290, KSB292, KSB293

**Corequisites:** KSB276

**Contact hours:** 21 per week **Credit points:** 12  
**Incompatible with:** AAB291  
**Campus offered:** GP, KG **Semester:** 2

### ► KSB292 STAGE MANAGEMENT 1

Introduction to coordination of a live theatre production including theatre layout and terminology, role of the stage manager, duties and responsibilities from pre-rehearsal to close of season, communication procedures, rehearsal room procedures.

**Courses:** KS26  
**Prerequisites:** KSB289  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** AAB292  
**Campus offered:** KG **Semester:** 2

### ► KSB293 STAGE MANAGEMENT 2

Introduction to the management issues in areas of stage mechanics, flying, props and wardrobe and preparation of students to undertake performance crew roles in these departments.

**Courses:** KS26  
**Prerequisites:** KSB289, KSB292  
**Corequisites:** KSB290  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** AAB293  
**Campus offered:** GP, KG **Semester:** 1

### ► KSB294 STAGE MANAGEMENT 3

Broadening the skills base for stage managers into opera, ballet, modern dance, concerts and television including the responsibilities of production management.

**Courses:** KS26  
**Prerequisites:** KSB289, KSB290, KSB291, KSB292  
**Corequisites:** KSB255  
**Contact hours:** 21 per week **Credit points:** 12  
**Incompatible with:** AAB294  
**Campus offered:** GP, KG **Semester:** 1

### ► KTB056 PROFESSIONAL STUDIES

This unit aims to facilitate a smooth and confident transition from undergraduate experiences to life in the arts workforce. Exploration of current issues in the arts, and development of professional skills including public speaking, meeting procedures and career management.

**Courses:** KD25, KS25, KS26, KT32, KM32, KV23, KV32, IF78, KI25, KI32  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB056  
**Campus offered:** KG **Semester:** 2

### ► KTB061 ARTS BUSINESS MANAGEMENT

An introduction to management techniques within the Australian arts environment, including company structures, cultural policy, strategic management and leadership in the arts, legal, ethical, economical and social requirements of arts, boards, entrepreneurial activity.

**Courses:** KD25, KS25, KS32, KT33, KM32, KV25, KV32  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB061  
**Campus offered:** KG **Semester:** 2

### ► KTB062 ARTS EVENT PROMOTION AND PUBLIC RELATIONS

The roles of publicist, promotion officer, marketing manager and public relations manager in arts organisations. Sponsorship, fundraising programs, membership drives. Planning the promotional and public relations campaign.

**Courses:** KD25, KS25, KS26, KT32, KM32, KV25, KV32  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB062  
**Campus offered:** KG **Semester:** 1

### ► KTB208 ELEMENTS OF DRAMA

Development of an understanding of drama theory and practice, and of their interrelation through an introduction to the basic elements of dramatic performance such as space, performer, audience, language, rhythm, action.

**Courses:** CI Open Elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB208  
**Campus offered:** KG **Semester:** 1

### ► KTB214 PROCESS DRAMA

This unit introduces the processual nature of drama and theatre through workshops involving role play, participant enrolment, leader-in-role and intervention; identification with role; negotiation, devising and consequent decision-making; dramatic tension and resolution; structuring for the theme and for the dramatic moment; distancing devices; reflection, re-enactment and remaking. A significant online component and a lecture series support the practical workshops.

**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB214  
**Campus offered:** KG **Semester:** 1

### ► KTB251 20TH CENTURY STAGES

One of three theatre history units, this examines three major theatre movements: Realism, Epic Theatre and Theatre of the Avant Garde.

**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB251  
**Campus offered:** KG **Semester:** 2

### ► KTB252 THE SOUND OF THEATRE

An introduction to the key features and major stages of development of the Western music theatre tradition. The importance of music as a fundamental resource of the theatrical event is explored through reference to a variety of theatre styles, practitioners and periods. There is an emphasis on contemporary forms, and on the role of technology in music theatre and/or performance.

**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB252  
**Campus offered:** KG **Semester:** 1

### ► KTB253 STAGING AUSTRALIA

Key concepts and practices pertaining to Australian theatre and drama of the twentieth century, including indigenous performance, post-colonialism, Bush Drama, tradition, and contemporary forms. Theatre practices are explored in relation to broader social and political concerns.

**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB253  
**Campus offered:** KG **Semester:** 1

### ► KTB257 STUDIES IN ACTING 1

Introduction to the work of Stanislavski and a number of his key interpreters including Cohen, Benedetti, Hagen, Adler and Moore. Exploration of acting styles including an examination of Brecht's theories of performance.

**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB257  
**Campus offered:** KG **Semester:** 1

### ► KTB258 STUDIES IN ACTING 2

Students will extend their understanding of the interpretative and acting skills required to perform Shakespeare. It will be of particular use to those interested in acting, directing, teaching or playwriting.

**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB258  
**Campus offered:** KG **Semester:** 2

### ► KTB271 STUDIES IN DIRECTING

History of the development of the role of the director; theoretical study of key innovative directors in the European tradition. Practical work includes selecting, adapting, rehearsing and performing an extract from a play and giving it an innovative 'treatment'.

**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB271  
**Campus offered:** KG **Semester:** 2

### ► KTB272 DRAMA AND COMMUNITY CULTURAL DEVELOPMENT

This unit introduces core concepts informing community cultural development practices, both local and international. Students develop skills through practical and theoretical enquiries into cultural action.

**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12

## UNIT SYNOPSES

- Incompatible with:** AAB272  
**Campus offered:** KG **Semester:** 2
- **KT B273 PERFORMANCE 1**  
 Introduction to a clearly defined rehearsal ethic through extended performance project. Text analysis, formal group discussion, role creation and rehearsal, live performance of a scripted drama before an audience.  
**Courses:** KS25, KS26, KT32, KT33, IF76  
**Corequisites:** KSB273  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB273  
**Campus offered:** KG **Semester:** 2
- **KT B275 UNDERSTANDING PERFORMANCE**  
 Paradigms of theatre/performance; Performance as trans-disciplinary practice; towards a poetics of Performance—live and mediated; the borders of Performance; politics and ethics in Performance; text, narrative and writing; site, time and place; body and voice; performance identity; audiences.  
**Courses:** KT32, KK32, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB275  
**Campus offered:** KG **Semester:** 1
- **KT B277 PHYSICAL THEATRE**  
 Students will experience a range of physical skills within the context of non-text based performance taught by professional theatre practitioners.  
**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** AAB277  
**Campus offered:** KG **Semester:** 1
- **KT B278 TECHNICAL THEATRE**  
 Introductory technical knowledge and skills in theatrical lighting and sound operation necessary to stage a production in a small theatre with a minimum of support staff.  
**Courses:** KS25, KS26, KT32, KT33, IF76, CI  
 Open Elective  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB278  
**Campus offered:** KG **Semester:** 1, 2
- **KT B280 DRAMA AS SOCIAL ACTION**  
 Combination of practical and theoretical investigation into the process of improvisation and the way drama can be used as a tool for critical enquiry and social change. Provides basis for further work in writing for performance and advanced improvisational skills.  
**Courses:** KS25, KS26, KT32, KT33, IF76  
**Prerequisites:** KSB214  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB280  
**Campus offered:** KG **Semester:** 2
- **KT B304 FORMING KNOWLEDGE**  
 Students will explore a range of paradigms of knowledge and knowing and their relationship to arts practice and theatre. It acknowledges the aesthetic field of experience in all human endeavour, relating it to concepts of human intelligence and knowing.  
**Courses:** KS25, KS26, KT32, KT33, IF76  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB304  
**Campus offered:** KG **Semester:** 2
- **KT B306 DIRECTING FOR THEATRE**  
 Analysis of the directors role in production management including play selection, resource auditing, pre-production analyses, time, budget and resource planning, design, technical effects, promotion and publicity and the responsibilities of health, safety and ethical issues.  
**Courses:** KS25, KS26, KT32, KT33, IF76  
**Prerequisites:** KTB271  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB306  
**Campus offered:** KG **Semester:** 1
- **KT B307 WRITING FOR PERFORMANCE**  
 Writing for Performance focuses on conceptualising, building and reading narrative for live performance. It blends theory and practice in the creation and critique of a short new work.  
**Courses:** KS25, KS26, K32, KT33, IF76, CI  
 Open Elective
- Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** AAB307  
**Campus offered:** KG **Semester:** 2
- **KT B308 PERFORMANCE 2**  
 Development of a performance piece through group devising with professional guidance.  
**Courses:** KS25, KS26, KT32, KT33, IF76  
**Prerequisites:** KSB273  
**Contact hours:** 8 per week **Credit points:** 12  
**Incompatible with:** AAB308  
**Campus offered:** KG **Semester:** 1, 2
- **KT B309 PERFORMANCE 3**  
 This final year elective unit provides Theatre Studies students with an opportunity to collectively manage and perform a public season of an original production or series of smaller performances. Students themselves take on the various roles of direction, dramaturgy, rehearsal, research, scripting, stage management, design, publicity, documentation, acting and so on.  
**Courses:** KS25, KS26 **Prerequisites:** KSB308  
**Contact hours:** 6 per week **Credit points:** 12  
**Incompatible with:** AAB309  
**Campus offered:** KG **Semester:** 2
- **KT B310 STUDIES IN ACTING 3**  
 This unit addresses the relationship between ideas and the way they are formed into action. It is designed to move the student into areas of advanced preparation for creating a performance by introducing major theoretical issues in contemporary cultural and performance analysis and developing advanced acting skills.  
**Courses:** KS25, KS26, KT32, KT33, IF76  
**Prerequisites:** KTB257  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB310  
**Campus offered:** KG **Semester:** 1
- **KT B414 DRAMA CURRICULUM STUDIES 1**  
 An introduction to the theoretical and practical knowledge, understandings and skills needed for effective Drama teaching. Students will be introduced to key Drama syllabus documents and acquire skills and understandings related to the classroom, the school and the school community.  
**Courses:** ED55, KT33, IF76  
**Prerequisites:** 96 credit points in each relevant discipline area  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB414  
**Campus offered:** KG **Semester:** 2
- **KT B415 DRAMA CURRICULUM STUDIES 2**  
 This unit extends on the work undertaken in KTB414 and focuses on: assessment in the drama curriculum; building units based on syllabus documents; deepening management and artistic leadership skills in the drama classroom; building awareness of contemporary educational imperatives and their relevance to Drama teaching; new technologies. It provides opportunities to develop skills as a reflective practitioner and to value and practice aesthetic teaching and learning in Drama.  
**Courses:** ED55, KT33, IF76  
**Prerequisites:** KSB414  
**Contact hours:** 5 per week **Credit points:** 12  
**Incompatible with:** AAB415  
**Campus offered:** KG **Semester:** 1
- **KT N001 PERFORMING NARRATIVES**  
 In this units, students will examine reviewing practices of storytelling and constructing narratives—the oral, the novelistic, the Dramatic, the filmic; post-linearity and multiform narrative; narrative in digital environments; narrative in a replay culture.  
**Courses:** KT35, KT36, KT42  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 2
- **KT N002 CONTEMPORARY PERFORMANCE**  
 Students will investigate the nature of the performance event; performance in everyday life; theatricality and performance; trans-disciplinary performance theory and practice; the body in performance; site and performance; live and mediated performance; spectator and audience.  
**Courses:** KT35, KT36, KT42
- Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 1
- **KT N003 APPLYING INFORMATION TECHNOLOGY IN THE DRAMA CLASSROOM**  
 Strategies for incorporating information and communication technology into the Drama classroom, performing arts specific software including graphics/imaging programs; video editing and scriptwriting programs; appropriate uses of the Internet; online communities, online improvisation and role-play; bulletin boards.  
**Courses:** KT35, KT36, KT42  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 3
- **KT N004 TEACHING DRAMA FROM 1-10**  
 In this unit, students will explore the conceptual and practical knowledge and understanding of the contribution Drama can make in a holistic primary education. It is an exploration of aesthetic learning and Drama as a way of knowing; experiential workshops to develop artistic and facilitation skills for Drama teaching; and an introduction to The Arts Years 1-10 Syllabus.  
**Courses:** KT35, KT36, KT42  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 1
- **KT N005 IMPLEMENTING DRAMA FROM 1-10**  
 This unit will introduce students to strategies for planning, managing and assessing of school and classroom work programs in Drama; cross curricula and Key learning Area applications, trans-disciplinary planning; and the Core Content relevant to Levels 1-6.  
**Courses:** KT35, KT36, KT42  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 2
- **KT N006 DRAMA PROJECT**  
 This unit will provide an opportunity for students to design and implement a classroom based project which applies the learnings in the course and requires fieldwork in their workplace.  
**Courses:** KT35, KT36, KT42  
**Contact hours:** 3 per week **Credit points:** 24  
**Campus offered:** KG **Semester:** 1, 2
- **KT N200 DRAMATURGY**  
 An investigation of the role of the dramaturge in Western cultures, particularly the emerging role of the dramaturge in Australian theatre; the methodologies of the dramaturge, the criteria used for script assessment, and a comparative study of the role of the script editor/story editor in the screen writing industry.  
**Courses:** KK42, KK52, KK53  
**Contact hours:** 2 per week **Credit points:** 12  
**Incompatible with:** AAN200  
**Campus offered:** KG **Semester:** 1
- **KVB004 CONTEMPORARY AESTHETIC DEBATES**  
 Introduction to modern aesthetic debates that inform contemporary art practice. The unit addresses philosophical discourse on art from Kant to postmodern theories.  
**Courses:** KK52, KK53, KK51  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB004  
**Campus offered:** KG **Semester:** 1
- **KVB005 READINGS IN VISUAL ARTS**  
 Concentrates on developing critical and analytical skills in reading and writing about the visual arts. It focuses on critical art-historical writings since 1968.  
**Courses:** KK52, KK53  
**Prerequisites:** Minimum course GPA of 5, and approval of Course Coordinator  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB005  
**Campus offered:** KG **Semester:** 2
- **KVB064 VISUAL AND PERFORMING ARTS OF ASIA**  
 Introductory overview to the influence of selected philosophical traditions on the visual and performing arts in Asia; contemporary arts practice in Asia; the impact of non-Asian ideas and art forms on selected Asian arts practices.

## UNIT SYNOPSES

**Courses:** KD25, KS25, KS26, KT32, KV25, KV32, KI25, KI32, KM32, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB064  
**Campus offered:** KG **Semester:** 1

► **KVB412 ART CURRICULUM STUDIES 1**  
 Students develop planning and teaching skills in selected Art curriculum areas. Content includes: the nature of the Art curriculum area/discipline; its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED50, ED54, IF78  
**Prerequisites:** 48 credit points in each relevant discipline area  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB412  
**Campus offered:** KG **Semester:** 2

► **KVB413 ART CURRICULUM STUDIES 2**  
 Extends KVB412; Art curriculum development within the context of contemporary policies, frameworks and agencies; principles of measurement, assessment and evaluation; teaching and learning strategies; directions in curriculum development.

**Courses:** ED50, ED54, IF78  
**Prerequisites:** KVB412  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 1

► **KVB444 CONTEMPORARY ASIAN VISUAL CULTURE**

Development of an understanding and awareness of non-Western art forms. The influences of historical visual arts, backgrounds, philosophical beliefs and trade on the symbolism, forms, techniques and uses of various artefacts.

**Courses:** KV25, KV32, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB444  
**Campus offered:** KG **Semester:** 2

► **KVB447 DRAWING**

Examination of conventional and contemporary drawing processes; investigation of materials for drawing, shape and volume, line as a means of expression and communication, perspective, rendering, perceptual organisation and expressive effects.

**Courses:** KV25, KV32, ED22, ED50, IF78, ED26, ED51, ED52  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB447  
**Campus offered:** KG **Semester:** 1, 2

► **KVB457 SCULPTURE**

This subject provides an introduction to the history and theory of sculpture and provides students with the opportunity to develop their ideas in relation to the exploration and manipulation of a range of materials and techniques used in the sculpture studio.

**Courses:** KV25, KV32, ED22, ED26, ED50, ED51, ED52, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB457  
**Campus offered:** KG **Semester:** 1, 2

► **KVB503 CLAY MATERIALS**

Develop ceramic knowledge, artistic concepts and practical/technical skills; investigation of selected historical ceramic eras; understanding of the relationship between ceramics and the makers culture; development of personal imagery and design.

**Courses:** ED22, ED26, ED50, ED51, KV25, KV32, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 1, 2

► **KVB507 PAINTING**

Introducing and developing an active awareness of both historical and contemporary issues in painting and drawing through studio practice and tutorials; the skills appropriate to the range of available media pursued in studio classes and professional practice.

**Courses:** ED22, ED26, ED50, ED51, KV25, KV32, IF78  
**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 1, 2

► **KVB509 PHOTOGRAPHIC MEDIA**

Photographic practice in Visual Arts, with emphasis on, but not limited to chemical black/white processes. Darkroom and camera skills, aesthetic and conceptual aspects of photography, history of art and photography, history of art and photography, personal approaches to photographic practice. Students must have access to a camera for this unit.

**Courses:** ED22, ED26, ED50, ED51, KV25, KV32, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 1, 2

► **KVB701 MODERNISM**

This unit provides an overview of the key concepts and movements that comprise twentieth-century modernism. Beginning with cubism, the unit will provide an understanding of terms, such as avant-garde, modernism and modernity. It will explain how modernism focuses upon the issue of representation and how this approach led to inter-disciplinary work, which engaged with film, photography, design, architecture and installation as well as the traditional visual arts.

**Courses:** KV25, KV32, ED50, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB701  
**Campus offered:** KG **Semester:** 2

► **KVB702 AUSTRALIAN AND INDIGENOUS ART**

This unit focuses upon Australian Art over the course of the twentieth century, including the contemporary period. It gives students an understanding of the national, cultural and social frameworks within which this art has been produced as well as introducing a number of artists, artistic movements and issues within Australian Art. It also considers the nature of indigenous art and its contribution to the complexity of Australian cultural identity. All of these issues will be presented in order to assist students in understanding the important role of Australian art as an expression of our cultural values throughout the twentieth century.

**Courses:** KV25, KV32  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** KG **Semester:** 1, 2

► **KVB703 VIDEO ART AND CULTURE**

Existing Visual Arts units examine a broad range of subjects addressing artistic media such as painting, sculpture and installation. The 'Video Art and Culture' unit will supplement these by instituting a specialised study of artistic and cultural practice that focuses on new mass media technology. The unit will therefore enhance, extend and update knowledge of recent art strategies in contemporary society.

**Courses:** KV25, KV32  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB703  
**Campus offered:** KG **Semester:** 1, 2

► **KVB704 THEORIES OF SPATIAL CULTURE**

This unit provides the necessary critical evaluation of issues and practices that relate to considerations of space in modern and contemporary art, new media and culture in general. It will provide a historical overview of key art practices that have focused their critical attention to the issue of space and the built environment. In order to function as an informed practitioner in the environment of public space a student must acquire such knowledge because it will form the critical-analytical background to current debates and theories in the field of spatial culture and public art.

**Courses:** KV25, KV32  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB704  
**Campus offered:** KG **Semester:** 1, 2

► **KVB712 CONTEMPORARY ART ISSUES**

Current practices in the visual arts are addressed by analysing and interpreting original works on exhibition, in stockrooms and in studios. By means of lectures, discussions and analysis of artworks and readings, the individuals awareness

of the conceptual, historical and philosophical contexts concerning artists and the artworks is heightened. (Prerequisite for entry to Honours.)

**Courses:** KV25, KV32, ED26, ED50  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB712  
**Campus offered:** KG **Semester:** 1

► **KVB740 STUDIO ART PRACTICE 1**

Designated unit. Development of an enquiry-based, self-sustaining art practice; fostering of appropriate research skills; encouragement of open flexible independent approach to formulating resolutions to conceptual and visual concerns; development of safe workshop practices, safe studio work habits and appropriate professional skills. Introductions to technological art forms.

**Courses:** KV25, KV32, IF78  
**Contact hours:** 12 per week **Credit points:** 24  
**Incompatible with:** AAB740  
**Campus offered:** KG **Semester:** 1

► **KVB741 STUDIO ART PRACTICE 2**

Designated unit. Continued development of concepts, skills and approaches to self-generated contemporary art practice established in Studio Art Practice 1. Maintaining responsible art practice; expansion of appropriate research skills; increased knowledge of safe workshop practices, safe studio work habits, appropriate professional skills.

**Courses:** KV25, KV32, IF78  
**Prerequisites:** KVB740  
**Contact hours:** 12 per week **Credit points:** 24  
**Incompatible with:** AAB741  
**Campus offered:** KG **Semester:** 2

► **KVB742 STUDIO ART PRACTICE 3**

In consultation with studio staff, students formulate a program of work for the semester which allows students to investigate their own personal artistic direction, formulate and develop self-generated enquiry and acquire working methods, resources, skills and knowledge necessary to realise concepts.

**Courses:** KV25, KV32, IF78  
**Prerequisites:** KVB741  
**Contact hours:** 6 per week **Credit points:** 12  
**Incompatible with:** AAB742  
**Campus offered:** KG **Semester:** 1

► **KVB743 STUDIO ART PRACTICE 4**

The conditions of current cultural practice, their production, reception and contribution to society are extremely diverse, increasingly complex and multi-layered. Sustained critical involvement and an increasing commitment to artistic conceptual pursuits will be underpinned by contemporary theoretical reference which includes investigation into a broad range of artists' practices. Students will be required to articulate a personal position in these issues.

**Courses:** KV25, KV32, IF78  
**Prerequisites:** KVB742  
**Contact hours:** 6 per week **Credit points:** 24  
**Incompatible with:** AAB743  
**Campus offered:** KG **Semester:** 2

► **KVB744 STUDIO PROJECT 1**

In consultation with studio staff students at this level are expected to undertake individual projects that lead to the development of a professionally organised and articulated body of work. Substantial research is expected in support of these projects.

**Courses:** KV25, KV32 **Prerequisites:** AAB743  
**Contact hours:** 6 per week **Credit Points:** 24  
**Incompatible with:** AAB744  
**Campus offered:** KG **Semester:** 1

► **KVB745 STUDIO PROJECT 2**

In consultation with studio staff students at this level are expected to undertake individual projects that lead to the development of a professionally organised and articulated body of work. Substantial research is expected in support of these projects.

**Courses:** KV25, KV32 **Prerequisites:** KVB744  
**Contact hours:** 6 per week **Credit points:** 24  
**Incompatible with:** AAB745  
**Campus offered:** KG **Semester:** 2

## UNIT SYNOPSES

### ► KVB751 EXTENDED STUDIO PRACTICE 1

Extension of practical studio units of core media studies or elective studio units.  
**Courses:** KV25, KV32, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB751  
**Campus offered:** KG **Semester:** 1, 2

### ► KVB752 EXTENDED STUDIO PRACTICE 2

Extension of practice studio units or core media studies or elective studio units.  
**Courses:** KV25, KV32, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB752  
**Campus offered:** KG **Semester:** 1, 2

### ► KVB753 EXTENDED STUDIO PRACTICE 3

Extension of practice studio units or core media studies or elective studio units.  
**Courses:** KV25, KV32, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB753  
**Campus offered:** KG **Semester:** 1, 2

### ► KVB754 EXTENDED STUDIO PRACTICE 4

Extension of practice studio units or core media studies or elective studio units.  
**Courses:** KV25, KV32, IF78  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB754  
**Campus offered:** KG **Semester:** 1, 2

### ► KVB755 FOUNDATIONS OF DRAWING FOR ANIMATION

This is a studio based unit that introduces students to media, processes, strategies and traditions of drawing and associated imagery for use in animated media. The development of critical/reflective frameworks of traditional and contemporary practice underpin studio development.  
**Courses:** KI25, KI32  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB755  
**Campus offered:** KG **Semester:** 1

### ► KVB756 FOUNDATIONS OF DRAWING FOR ANIMATION 2

This unit will develop individual knowledge, concepts and skills to enable students to articulate and present capabilities of motion through drawing for contemporary animation practices.  
**Courses:** KI25, KI32 **Prerequisites:** KVB755  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB756  
**Campus offered:** KG **Semester:** 2

### ► KVB757 1/2 DRAWING FOR FASHION 1

Drawing constitutes one of the key representational systems that enables the user to encode experience. The ability to utilise the language of drawing facilitates description, recording, synthesis, analysis, decoration, interpretation, reconstruction and response to visual form. Consequently, drawing in this industry incorporates conventions and interpretations of figures and materials to design, describe and promote fashion products. Core skills and knowledge of drawing provide an important foundation for existing and evolving modes for constructing and presenting fashion proposals.  
**Courses:** KF25  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** AAB757 1/2  
**Campus offered:** KG **Semester:** 1, 2

### ► KVB757 2/2 DRAWING FOR FASHION 1

Drawing constitutes one of the key representational systems that enables the user to encode experience. The ability to utilise the language of drawing facilitates description, recording, synthesis, analysis, decoration, interpretation, reconstruction and response to visual form. Consequently, drawing in this industry incorporates conventions and interpretations of figures and materials to design, describe and promote fashion products. Core skills and knowledge of drawing provide an important foundation for existing and evolving modes for constructing and presenting fashion proposals.  
**Courses:** KF25  
**Contact hours:** 3 per week **Credit points:** 6

**Incompatible with:** AAB757 2/2

**Campus offered:** KG **Semester:** 1, 2

### ► KVB758 1/2 DRAWING FOR FASHION 2

Developing understandings of explicit outcomes of drawing systems used in fashion design and promotion enables the user to encode experience within the constraints of the industry as well as traditional and contemporary media. The ability to utilise the language of figurative drawing in fashion facilitates description, recording synthesis, analysis, decoration, interpretation, reconstruction and response in visual form. The development of skills and knowledge of fashion drawing provides access to evolving modes for constructing and presenting images for diverse production.  
**Courses:** KF25 **Prerequisites:** KVB758  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** AAB758 1/2  
**Campus offered:** KG **Semester:** 1, 2

### ► KVB758 2/2 DRAWING FOR FASHION 2

Developing understandings of explicit outcomes of drawing systems used in fashion design and promotion enables the user to encode experience within the constraints of the industry as well as traditional and contemporary media. The ability to utilise the language of figurative drawing in fashion facilitates description, recording synthesis, analysis, decoration, interpretation, reconstruction and response in visual form. The development of skills and knowledge of fashion drawing provides access to evolving modes for constructing and presenting images for diverse production.  
**Courses:** KF25 **Prerequisites:** KVB757  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** AAB758 2/2  
**Campus offered:** KG **Semester:** 1, 2

### ► KVB759 FASHION ILLUSTRATION

The importance of drawing in fashion design is to visually communicate apparel design and pattern construction. Embedded in this communication process are the conventions and influences of historical, cultural, social and environmental sources that shape the traditions of drawing for fashion.  
**Courses:** KF25 **Prerequisites:** KVB757  
**Contact hours:** 3 per week **Credit points:** 6  
**Incompatible with:** AAB759  
**Campus offered:** KG **Semester:** 1, 2

### ► KVB759 FASHION ILLUSTRATION

The importance of drawing in fashion design is to visually communicate apparel design and pattern construction. Embedded in this communication process are the conventions and influences of historical, cultural, social and environmental sources that shape the traditions of drawing for fashion.  
**Courses:** KF25 **Prerequisites:** KVB758  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** AAB759  
**Campus offered:** KG **Semester:** 1, 2

### ► KWB010 COMMUNICATION FOR THE IT SPECIALIST

Students are introduced to, and instructed in, various forms of communication. These genres are explained to students and the role of each in the workplace made apparent. Students will be required to provide both written and spoken assessment items to test their ability to apply the materials from the course in a variety of situations. The unit is oriented exclusively towards the Information Technology specialist in terms of the examples, applications, and the skills developed in the unit.  
**Courses:** IT21,  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, CA **Semester:** 1, 2

### ► KWB111 MEDIA WRITING

This unit introduces students to the formats, terminology and protocols used in the preparation of proposal documents and short scripts. It will explore fundamental concepts including narrative structures, metaphors, point of view, plotting, character and voice. Students will examine a range of professional scripts and development documents and be asked to apply their knowledge of typical script problems and solutions to their own work.  
**Courses:** KP25, KP35, KP36  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MJB111  
**Campus offered:** GP **Semester:** 1, 2

### ► KWB229 FILM AND TELEVISION SCRIPTWRITING

This unit aims to produce writers who can operate competently as scriptwriters, especially of drama scripts, and facilitates practice in writing scripts for moving image media productions. Students receive workshops and individual con-

sultations and feedback on their work with industry professionals.

**Courses:** KW25, KW32, IF93

**Prerequisites:** Undergraduate: KWB111

or completion of 96 credit points;

Postgraduate: NIL

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB229

**Campus offered:** GP **Semester:** 1, 2

### ► KWB250 INTRODUCTION TO CREATIVE WRITING

This course develops creative, critical and analytical skills in reading and writing a variety of creative textual forms. Students will acquire an understanding of various forms of creative language forms, especially narrative and poetry. Students will therefore be introduced to key language theory and creative writing practice.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB250

**Campus offered:** GP **Semester:** 1

### ► KWB314 CORPORATE WRITING AND EDITING

This unit should provide a capstone for the knowledge and skills developed in other writing studies. Students expand their range of genres and acquire a more sophisticated understanding of writing fundamentals. This unit will develop the ability to identify and implement sophisticated writing genres; require students to investigate and report on a variety of writing issues; and to evaluate the efficacy of complex corporate and professional writing.

**Courses:** KW32

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► KWB315 PERSUASIVE WRITING

This unit teaches the use of persuasive writing in the workplace. The unit analyses a variety of writing genres to reveal how they persuade their audiences. The analysis is founded on critical discourse and semiotic theory. Students apply these learned techniques and theories to produce a portfolio of persuasive writing. It covers a range of genres such as Public Health Campaigns, Proposals, Speechwriting and Political Persuasion.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► KWB321 BODY MATTERS

The preoccupation with the body is a permanent feature of modern life, and increasingly so as the body intersects with technology and cyberspace. This unit examines a number of body matters in a range of discourses and through a number of literary and filmic texts.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► KWB350 CREATIVE WRITING: SHORT STORY

The emphasis is on writing the short story and narrative structure. The unit takes the perspective of the creative writing practitioner, and the emphasis is on writing for publication and for specific markets as well as for enjoyment. Editing and rewriting are viewed as integral to the writing process.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB350

**Campus offered:** GP **Semester:** 1, 2, 3

### ► KWB370 ELECTRONIC CREATIVE WRITING

An advanced unit for students working towards a vocation involving creative and professional writing and especially for majors in creative writing production. This unit builds on the practical skills and conceptual background acquired in first and second year Creative Writing units, and offers advanced techniques in professional writing and editing, especially web/electronic narrative writing, and advanced experimental narrative techniques.

**Courses:** KW25, KW32, IF93

**Prerequisites:** KWB350

## UNIT SYNOPSES

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB370

**Campus offered:** GP

**Semester:** 1

► **KWB380 CREATIVE NONFICTION: LIFE WRITING**

This unit covers the diversity of creative nonfiction life writing, but with an emphasis on contemporary biography and autobiography. While providing theoretical and critical context, the main focus of classes is to teach students practical biographical and autobiographical research and writing of their own, as well as review writing and family and local history writing.

**Courses:** KW25, KW32, IF93, KW35

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB380

**Campus offered:** GP

**Semester:** 2

► **KWB381 CREATIVE NONFICTION: ARTS, HUMOUR, TRAVEL**

This unit covers the acquisition of practical and analytical skills in creative nonfiction writing; in particular review writing on books, film, music, visual arts, fashion and food, as well as travel, scientific, essay, humorous and sports writing. The unit provides examples, techniques and practical exercises in nonfiction creative writing and editing, and the opportunity to develop individual work in the supportive context of in-class and small workshop groups. Potential publishing areas will be explored.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **KWB395 CREATIVE WRITING PROJECT 1 [12CP]**

This unit provides the opportunity for students to write a sustained piece of creative work, within the genre of their choice, including short fiction, poetry, creative non-fiction, hypertext and other multimedia interactive writing, under supervision. Such work will be written to a standard commensurate with being suitable to submit for publication to print or electronic publications. The students' final submission will also be written after familiarisation with industry demands, audience niche and marketing possibilities.

**Courses:** KW25, IF93

**Prerequisites:** Available to Creative Writing majors only.

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB395

**Campus offered:** GP

**Semester:** 2

► **KWB399 THE WRITING AND PUBLISHING INDUSTRY**

This unit provides a comprehensive introduction to the workings of book industry and to the professional practices of writers. By the use of value chain analysis the unit surveys: the production of the manuscript, its development, editing and publication. It then follows the public and commercial life of the book as it is distributed, consumed and its symbolic value circulated. Students gain experience in developing book ideas and analysing the book as a commodity.

**Courses:** KW25, KW32, IF93, KW35

**Prerequisites:** 96 credit points of undergraduate study.

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJB399

**Campus offered:** GP

**Semester:** 2

► **KWB625 AMERICAN STORIES**

In view of the close cultural, political and artistic ties between America and Australia, it is useful for students to study significant developments in American cultural texts. This unit provides a strong grounding in analysing a major branch of international writing and develops skills in textual and cultural analysis.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB625

**Campus offered:** KG

**Semester:** 1

► **KWB710 OZLIT**

This unit will provide students with opportunities to read, explore, discuss and evaluate a number of Australian texts written and published over the last twenty-five years. Upon completing this unit, students will be able to understand and critically

interrogate texts pertinent to contemporary Australian society and culture.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB710

**Campus offered:** GP

**Semester:** 1

► **KWB712 YOUTH WRITING**

Children's and adolescent novels within the cultural context of nineteenth and twentieth century Australia, England and America; focuses on textual analysis of major generic types; considers issues such as race, gender, class and regionalism in fiction for young Australians.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB712

**Campus offered:** GP

**Semester:** 2

► **KWB716 INTRODUCTION TO LITERARY AND CULTURAL STUDIES**

"The 'textualisation' of the world has been an important development in twentieth century theory in the West," (Fuery:57). What are texts? What do they mean? This unit will address these issues by providing students with an introduction to conceptual frameworks derived from some of the major critical discourses that have impacted on our world.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB716

**Campus offered:** KG

**Semester:** 1

► **KWB724 WONDERLANDS: LITERATURE AND CULTURE IN THE 19TH CENTURY**

When Alice meets Neo... This unit considers important contemporary cultural and social questions by way of readings in science fiction, fantasy fiction and fiction, class ideologies and revolutionary politics from a selection of novels and poetry of the 19th Century. The novels and poems examine political and social change in Europe between 1790 and 1900, with a view to making critical links between current ideologies and literary forms and their formulation in a nineteenth century text. As such, works ranging from Frankenstein to Alice in Wonderland are deployed to consider the textual representations of important cultural, social, and sexual issues.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB724

**Campus offered:** KG

**Semester:** 1

► **KWB729 SHAKESPEARE, THEN AND NOW**

Shakespeare is examined both in his own time and the present to analyse the dominance of this cultural icon; emphasises recent theoretical and performance strategies in Shakespearian genre studies.

**Courses:** KW25, KW32, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HUB729

**Campus offered:** GP, CA

**Semester:** 1, 2

► **KWP103 CREATIVE WRITING: GENRE AND THE NOVEL**

Examines the major theories underlying and informing the practice of writing sustained creative texts, including narrative prose, creative nonfiction and genre writing. Such theory and knowledge enhances critical awareness and writing strategies relevant to the production and future publication of a novel-length text.

**Courses:** KK51, KK54, KW35, KJ36, KP36

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MJP103

**Campus offered:** GP

**Semester:** 1

► **KWP104 EDITING AND DEVELOPING THE MANUSCRIPT**

Examines processes of editing and manuscript development from the viewpoint of both editor and writer. Students participate in the managed development of a manuscript or a range of manuscripts. Classes are taken in intimate seminar mode.

**Courses:** KK51, KK54, KJ36, KP36, KW36

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **LPP101 TRANSACTION SKILLS**

A competent legal practitioner is a skilful practitioner who has a commitment to professionalism and ethical practice in the provision of legal services. This unit seeks to develop a range of transactional lawyering skills and a general awareness of professionalism and ethical practice

**Courses:** LP41

**Contact hours:** 28

**Credit points:** 12

► **LPP102 DISPUTE RESOLUTION SKILLS**

A competent legal practitioner is a skilful practitioner who has a commitment to professionalism and ethical practice in the provision of legal services. This unit seeks to develop dispute resolution and advocacy skills and to develop an awareness of professionalism and ethical practice in the dispute resolution context..

**Courses:** LP41

**Contact hours:** 28

**Credit points:** 12

► **LPP103 BANKING AND FINANCE**

The legal profession plays a major role in facilitating borrowing, taking securities, enforcing securities and protecting the rights of borrowers and lenders. Persons seeking to become legal practitioners should have an understanding of the lawyer's role in financial arrangements. The unit will cover aspects of practice in the area of securities law, consumer credit and creditor's remedies.

**Courses:** LP41

**Prerequisites:** LPP101 and LPP102

**Contact hours:** 6 per week (on-campus mode) 2 per week (off-campus mode)

**Credit points:** 12

► **LPP104 COMMERCIAL LAW PRACTICE**

Lawyers are often called upon to advise clients on how to plan and structure commercial transactions and to advise on the legal effects of those transactions. In an economy such as Australia's, where the economic well being of many people depends on private commercial activities, lawyers must be prepared for their role in the facilitation and conduct of commercial transactions.

**Courses:** LP41

**Prerequisites:** LPP101, LPP102

**Contact hours:** 6 per week (on-campus mode) 2 per week (off-campus mode)

**Credit points:** 12

► **LPP105 FAMILY AND ESTATES PRACTICE**

Many people have their only contact with a lawyer when they have a will prepared or they become an administrator or a beneficiary of a deceased estate. Learning how to administer a deceased's estate is a good platform for developing legal drafting skills and the skill of giving legal advice in clear and concise terms. Family law practice is also one of the eight recommended areas of practice for pre-admission practical training specified by the Australasian Professional Legal Education Council.

**Courses:** LP41

**Prerequisites:** LPP101, LPP102

**Contact hours:** 6 per week (on-campus mode) 2 per week (off-campus mode)

**Credit points:** 12

► **LPP106 LITIGATION**

Civil litigation forms a major part of most legal practices. A knowledge of court procedures, litigation tactics and an ability to assist clients through the litigation process is essential for most lawyers. The unit focuses on practice in the courts. Other dispute resolution alternatives such as negotiation, mediation and counselling are dealt with in the Dispute Resolution Skills unit.

**Courses:** LP41

**Prerequisites:** LPP101, LPP 102

**Contact hours:** 6 per week (on-campus) 2 per week (off-campus)

**Credit points:** 12

► **LPP107 PROPERTY LAW PRACTICE**

Many lawyers are regularly involved in the purchase and sale of real property and the conveyance of real property. Most lawyers need an ability to advise clients in respect to contracts of sale of property and the effects on property

## UNIT SYNOPSES

transactions of legislation such as environmental and legislation planning.

**Courses:** LP41

**Contact hours:** 6 per week **Credit Points:** 12

### ► LPP108 PLACEMENT

A placement has always been regarded as a necessary part of the GradDipLegalPrac. Most pre-admission vocational training regimes for the legal profession in Australia require some workplace experience. This unit involves a placement of four weeks that will help students to experience the dynamics of a 'real' legal workplace.

**Courses:** LP41

**Contact hours:** 160 **Credit points:** 12

### ► LSB111 UNDERSTANDING DISEASE CONCEPTS

(Subject to final approval.) Introduction to structure and function of the body; review of body systems. Mechanisms of disease. Systems in detail: integumentary, skeletal, muscular, nervous, endocrine, blood, heart and circulation, lymphatic, immunity, respiratory, digestive, nutrition and metabolism, urinary, reproductive, concepts of growth and development, genetics. Examples of diseases: heart disease, cancers (lung, breast, skin, prostate, cervical), diabetes, hypertension, psychopathology (and genetic factors) of common mental disorders such as depression and schizophrenia.

**Courses:** IF47, PU40

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► LSB118 LIFE SCIENCE

An introduction to the study of life processes in all five groups of living organisms (bacteria, protists, fungi, plants and animals), and to the interactions between these organisms and their environment. Traditional topics in biology are integrated with recent research advances in molecular and cellular biology to provide a comprehensive foundation for later units in the medical, biotechnological and ecological sciences. The unit begins by constructing cells from the four quantitatively important groups of biological molecules (proteins, lipids, carbohydrates and nucleic acids). Molecular and evolutionary aspects of genetics are then introduced, with the great diversity of reproductive strategies found among organisms being emphasised. Finally, bioenergetics (photosynthesis and respiration) and its contemporary relevance to environmental issues is outlined.

**Courses:** ED50, IF86, LS37, LS50, PU43, SC01

**Contact hours:** 4 per week **Credit points:** 12

**Semester:** 1, 2

### ► LSB131 ANATOMY

Basic concepts of anatomy; overview of the structure of cells, body tissues, and body systems as well as aspects of surface anatomy which are relevant to human movement; musculoskeletal systems.

**Courses:** HL40, HL42, HM42, IF62, IF73

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB142 HUMAN ANATOMY AND PHYSIOLOGY

The aim of this unit is to provide grounding in the principles of human anatomy and physiology. Following an introduction to the structure of the cell and the organisation of tissues, each of the major systems that constitute the human body are examined by the integrated study of their anatomy and physiology.

**Courses:** ED50, ME48, PU40, SC01

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB145 ANATOMY 1 AND INTRODUCTORY PATHOLOGY

A study of human anatomy of the body as a whole, including a detailed study of the skeletal system. General principles of disease processes.

**Courses:** PH38

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB152 ANATOMY

Topics covered include the general structure and variation in cells, macroscopic and microscopic structure of primary tissues and the macroscopic morphology of the organs and structures of organ systems.

**Courses:** OP42

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB182 BIOSCIENCE 1

Develops an understanding of normal human structures in relation to their functions at the cellular, tissue and organ levels. This is an foundation course in anatomy and physiology for nursing students. Topics covered are: the cell, tissues; systems of the body and their functions, surface anatomy and body topography

**Courses:** NS40, NS48

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB231 PHYSIOLOGY

Covers the general physiological principles such as homeostasis and how all systems in the body contribute to it. Topics will include cells, transport processes, cardiovascular system, cardiac electrical activity, cardiac output, regulation of blood pressure, respiratory system, endocrine system, pulmonary ventilation and its function.

**Courses:** HL40, HM42, IF62, IF73

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB235 ADVANCED ANATOMY

An in-depth study of the systematic and regional anatomy of the lower limb will be undertaken with particular emphasis on osteology, arthrology, musculature, angiology and neurology.

**Courses:** PU40

**Prerequisites:** LSB131

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB238 CELL AND MOLECULAR BIOLOGY 1

Introduction at the cellular level to essential physiological and metabolic requirements fundamental to life processes. This unit will concentrate on basic cell biology concepts building from the simple levels of cell components and organelles to more complex concepts of organisation and expression of the genome, the cytoskeleton and extracellular matrix structures, information transduction, cell-cell interactions and cell specialisation.

**Courses:** ED50, LS37, LS50, SC01

**Corequisites:** Students must be enrolled in or have completed LSB118

**Contact hours:** 4 per week **Credit points:** 12

**Semester:** 2

### ► LSB245 ANATOMY 2 AND INTRODUCTORY PATHOLOGY

Lectures and practical exercises involving a basic, yet comprehensive study of the anatomy and physiology of the various body systems. Application of scientific methods to the study of the general principles of disease processes and the major diseases of the organ systems.

**Courses:** PH38

**Prerequisites:** LSB145

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB250 HUMAN PHYSIOLOGY

Topics examined include: basic mechanisms cells, fluids, electrolytes; energy metabolism; nutrients; transport mechanisms; blood; communication and control; excitable tissues; control systems nervous and endocrine; maintenance systems gastrointestinal; cardiovascular; respiratory; renal; integrated mechanisms sexual development; pregnancy; parturition; lactation; control of growth; food intake; organic metabolism; body temperature; ECF osmolality and volume; blood pressure and flow; respiration; response to tissue damage; adaptation to stress. This unit includes a practical program of two per week.

**Courses:** LS37, OP42

**Prerequisites:** LSB150 or LSB152

**Contact hours:** 6 per week **Credit points:** 12

### ► LSB255 HUMAN ANATOMY

The medically oriented biological scientist requires a detailed understanding and knowledge of human anatomy. This unit exposes the student to the theoretical and practical facets of both microscopic and macroscopic anatomy of the human body with the emphasis on the microscopic anatomy.

**Courses:** LS37, PU40, PU43

**Prerequisites:** LSB118 **Corequisites:** LSB250

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB258 HUMAN ANATOMY AND PHYSIOLOGY

The aim of this unit is to provide a grounding in the principles of human anatomy and physiology. Following an introduction to the organisation of

tissues, each of the major systems that constitute the human body are introduced by the integrated study of their anatomy and physiology.

**Courses:** LS50, SC01

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB275 BIOMOLECULAR SCIENCE

The structures and functions of proteins, carbohydrates, lipids and nucleic acids, basic enzymology, mechanisms of cellular energy production and the role of ATP; the metabolism of carbohydrates, lipids and amino acids and the fundamentals of protein biosynthesis and molecular biology.

**Courses:** OP42, PU40

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB282 BIOSCIENCE 2

Introduction to diseases, infections and treatments; the body defence systems and control of infection and considers in depth the respiratory and cardiovascular systems and diseases which affect these systems.

**Courses:** NS40, NS48 **Prerequisites:** LSB182

**Credit points:** 12

### ► LSB308 BIOCHEMISTRY

The basic biochemistry of amino acids, peptides and proteins, carbohydrates and nucleic acids; lipid biochemistry and membrane function; basic enzymology; energy production in cells: high energy molecules, thermodynamics and bioenergetics.

**Courses:** ED50, IF29, IF34, IF39, IF71, IF83,

IF84, IF86, IF87, SC01, SC30

**Prerequisites:** PCB242, LSB238

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB309 INTRODUCTION TO INTELLECTUAL PROPERTY LAW

Intellectual property protection is undoubtedly of paramount importance in the research, development and commercialisation of emerging technologies. Managers and researchers need to be aware of the different types of property that can be protected and how the property needs to be protected. There have also been significant developments in the field of intellectual property law in recent years. The concepts to be taught in Introduction to Intellectual Property Law are of significant relevance to persons intending to practice in the emerging fields of science.

**Courses:** LS50

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB321 SYSTEMATIC PATHOLOGY

Diseases of the organ systems: cardiovascular, respiratory, alimentary, urogenital, nervous musculoskeletal, endocrine, haematologic and skin.

**Courses:** PH38

**Prerequisites:** LSB221

**Contact hours:** 3 per week **Credit points:** 8

### ► LSB325 BIOCHEMISTRY

The study of cell biology and biochemistry, along with anatomy and physiology, provides the students with the knowledge required for the proper understanding of the functioning of the human body and its organ systems in health and disease, as a preparation for their clinical studies.

**Courses:** LS37, LS50

**Prerequisites:** PCB242 **Corequisites:** LSB338

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB328 MICROBIOLOGY 1

An introductory core unit in microbiology dealing with aspects of microbial diversity, ecology, classification and taxonomy, structure and function, nutrition and metabolism, growth and reproduction, genetics, control and host-microbe interactions.

**Courses:** LS37, LS50, SC01

**Prerequisites:** PCB242, LSB238

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB338 CELL AND MOLECULAR BIOLOGY 2

A continuation and expansion of the topics introduced in LSB238 Cell and Molecular Biology 1. This unit integrates gene structure and the architecture and organisation of eukaryote chromosomes with the basic cellular processes associated with gene expression, mutation, DNA repair, replication and recombination from a molecular genetic perspective. A contrast is made between the complex genomes of eukaryotes and the simple genomes of viruses and bacteria.

## UNIT SYNOPSES

**Courses:** LS37, LS50, SC01

**Prerequisites:** LSB238

**Corequisites:** LSB308 (SC01), LSB325 (LS37, LS50)

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB345 IMAGING ANATOMY 1

Focuses on the regional anatomy of the head, neck, upper limb, lower limb, and vertical column and the anatomy of the structures of the above regions which are visualised by medical imaging modalities.

**Courses:** PH38, PH90

**Prerequisites:** LSB241, LSB245

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB358 PHYSIOLOGY 1

The aim of this unit is to provide a thorough examination of the functional organisation of the human body. The subject provides a useful frame of reference for students enrolled in courses such as biology, biochemistry, microbiology, molecular biology, nutrition and human movements. The subject is offered in conjunction with LSB458 which runs in second semester and as a prelude to the third level subjects; LSB558 and LSB658.

**Courses:** SC01, PU40, PU43, HM42, ED50

**Prerequisites:** LSB131 or LSB142 or LSB258 or NRB270

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB361 FUNDAMENTALS OF MEDICINE

The theoretical basis for an understanding of the process of medical care. Students must understand the nature of disease processes and the clinicians response to them in order to: design appropriate and efficient health information services for all types of health care facilities; communicate effectively with other health professionals involved in the care of patients; assist in research and quality assurance programs in the health services. A review of the important and frequently encountered diseases and disorders of the major body systems.

**Courses:** PU40

**Prerequisites:** LSB142 **Corequisites:** PUB220

**Contact hours:** 3 per week **Credit points:** 12

### ► LSB365 PATHOLOGY

Pathology is the study of disease processes underlying the major specific diseases of the organ systems which are the focus in systematic pathology. Understanding general and systematic pathology is fundamental to the application of basic biomedical knowledge to clinically relevant states and the major diseases. The unit will incorporate practical training in diagnostic pathology.

**Courses:** LS37 **Prerequisites:** LSB250, LSB255

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB382 BIOSCIENCE 3

Topics covered in this third Bioscience unit include: the physiology, pathophysiology and diseases (including infectious diseases) of the nervous, gastrointestinal and renal system; diabetes; diseases of joints; musculoskeletal adaptations; posture control and balance; obesity and its effects on the body; physiological demands of exercise.

**Courses:** NS40, NS48 **Prerequisites:** LSB282

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB397 PLANT PHYSIOLOGY 1

A comprehensive overview of how plants grow and respond to the environment, based on mechanisms involving cellular and molecular events. Topics more-or-less follow the life history of the plant, and include: seed germination and the mobilisation of seed reserves; water and mineral-nutrient uptake; photosynthesis; responses to stresses (including water deficit, excess light, attacks by pests and pathogens); synthesis of unique chemicals; development of flowers and fruits. This is a foundation unit for continuation into plant biotechnology and ecology areas.

**Courses:** ED50, LS50, SC01

**Contact hours:** 4 per week **Credit points:** 12  
**Semester:** 2

### ► LSB408 METABOLISM

The basic pathways of metabolism of the major nutrient groups in mammals, including carbohydrates, lipids and amino acids; electron transport and oxidative phosphorylation; metabolic control mechanisms in relation to nutrient status, energy demand and the integration of specialised tissue functions.

**Courses:** ED50, SC01 **Prerequisites:** LSB308

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB409 READINGS IN BIOTECHNOLOGY

Knowledge of the practical aspects of developing a project for research and development is a fundamental aspect of real-world commercial biotechnology. In this unit, students will adopt a team approach to developing and designing a research project to be undertaken in LSB709 Biotechnology Research Project. Students will explore the roles of teams in assigning, performing and reporting on tasks related to the preliminary literature search and project inception, design, management and feasibility. Academic and industry mentors will guide student teams through the preliminary stages of project conceptualisation and monitor progress of activities.

**Courses:** LS50

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB415 MICROBIOLOGY

A course of lectures and practicals for the health professions which covers microbiological terminology, classification of living organisms, collection and manipulation of microbiological samples, public health concerns relating to microorganisms and report writing skills applying microbiological knowledge.

**Courses:** PU40, PU43

**Contact hours:** 6 per week **Credit points:** 12

### ► LSB425 QUANTITATIVE MEDICAL SCIENCE

This unit develops the understanding of basic theoretical and practical aspects of biochemistry and molecular biology in the context the clinical analysis laboratory, providing the background for the Clinical Biochemistry units.

**Courses:** LS37

**Prerequisites:** LSB325, LSB338, MAB141

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB428 MICROBIOLOGY 2

An extension of the core unit in microbiology dealing with further aspects of microbial diversity, ecology, classification and taxonomy with emphasis on human pathogens, action of and resistance to antimicrobial chemicals, microbial mechanisms of pathogenicity, foodborne pathogens and spoilage, examples of the industrial importance of microbes, and safe manipulation of pathogenic microbes.

**Courses:** SC01

**Prerequisites:** LSB328

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB435 DIAGNOSTIC MICROBIOLOGY 1

This unit builds upon foundation topics in Microbiology 1 and starts preparing the student for a career in a routine diagnostic microbiology laboratory in clinical practice. This unit emphasises a strong commitment to professional practice by: developing high level generic and specific skills in specimen processing, but focusing on the isolation and identification of key microbial agents of infectious disease, and in the interpretation and intelligent discussion of results and laboratory report writing. These advanced skills will assist in effective patient management in clinical practice.

**Courses:** LS37

**Prerequisites:** LSB328

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB438 IMMUNOLOGY 1

The mechanisms of the immune process including the nature of antigen, antibodies, antigen-antibody reactions, antibody formation, control of the humoral and cell-mediated immune responses, hypersensitivity and allergy, immunisation of humans against infections

**Courses:** SC01 **Prerequisites:** LSB328, LSB358

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB445 IMAGING ANATOMY 2

Focuses on the regional anatomy of the thorax and abdomen regions and the anatomy of the structures of the above regions which are visualised by medical imaging modalities.

**Courses:** PH38, PH90

**Prerequisites:** LSB241, LSB245, LSB345

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB451 HUMAN PHYSIOLOGY

A course of lectures and practicals, similar to LSB250.

**Courses:** PU43

**Prerequisites:** LSB131

**Contact hours:** 6 per week **Credit points:** 12

### ► LSB458 PHYSIOLOGY 2

The aim of this unit is to provide a thorough examination of the functional organisation of the human body. The subject provides a useful frame of reference for students enrolled in courses such as biology, biochemistry, microbiology, molecular biology, nutrition and human movements. The subject is offered in conjunction with LSB358 which runs in first semester and as a prelude to the third level subjects; LSB558 and LSB658.

**Courses:** ED50, HM42, PU40, PU43, SC01

**Prerequisites:** LSB131 or LSB142 or NRB270

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB465 HISTOPATHOLOGY 1

Histopathology and cytology are essential components of pathological diagnosis and major clinical disciplines in Medical Laboratory Science. The unit aims to impart a working knowledge of basic techniques used in clinical histopathology and research histology laboratories and the techniques involved in the current practice of diagnostic cytology.

**Courses:** LS37

**Prerequisites:** LSB255, LSB365, PCB243

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB468 MOLECULAR BIOLOGY

Techniques for the isolation, purification and genetic engineering of nucleic acids. Includes procedures for gene detection and analysis, gene isolation, cloning and amplification, and gene library construction and screening.

**Courses:** LS50, SC01

**Prerequisites:** LSB308, LSB338

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB475 DISEASE PROCESSES 4

Principles of the study of disease and dealing with the causes and nature of circulation disorders, degenerative processes, metabolic and nutritional disorders, disturbances of development and growth, inflammation, infections and infestations, regeneration and repair, and neoplasia. Includes: the applications of general pathology to the study of diseases of the heart and circulatory system, digestive system, respiratory system, urogenital system, endocrine system, nervous system, haematologic system and skin.

**Courses:** PU43

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB480 PROFESSIONAL PRACTICE

Introduces students to the workplace, that is a pathology laboratory. The student undertakes a two-four week work experience program in a city or country pathology laboratory during the summer vacation between semesters 4 and 5 of the full-time course and between semesters 8 and 12 of the part-time course.

**Courses:** LS37

**Corequisites:** LSB400, LSB410, LSB430, LSB450, LSB460

### ► LSB492 MICROBIOLOGY 3

An introductory core unit of microbiology for students of optometry: with cytology, nutrition, genetics, control of microbial populations and principles of taxonomy in relation to optometry.

**Courses:** OP42

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB497 PLANT MOLECULAR BIOLOGY

This is an intermediate level unit that will complement and extend the knowledge and skills obtained in the core biotechnology units to provide a basis for those intending to undertake more advanced plant biotechnology units. This unit will integrate the fundamentals of plant mo-

## UNIT SYNOPSES

lecular biology, biochemistry and cell culture to teach the molecular basis of plant development. Topics covered will include: basic plant molecular biology; the genetic basis of control of plant development; cell signalling in plants; model systems for studying gene function; plant genome maps; manipulation of plants *in vitro*; plant responses to biotic and abiotic stress.

**Courses:** LS50, SC01

**Prerequisites:** LSB338 **Corequisites:** LSB468  
**Contact hours:** 4 per week **Credit points:** 12

### ► LSB508 ADVANCED METABOLISM

Detailed information is provided on the catabolic and anabolic pathways for the major macromolecules in mammalian systems. Important aspects of non-mammalian metabolism are described. Advanced concepts in bioenergetics and thermodynamics are described in the context of cellular metabolism. Integration of metabolism including production of mixed conjugates of biological significance such as amino-sugars and lipopolysaccharides, and hormonal regulation of metabolism.

**Courses:** SC01

**Prerequisites:** LSB408

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB509 MEDICAL BIOTECHNOLOGY 1

Students undertaking Medical Biotechnology should have a thorough understanding of diagnostics and therapeutics in the commercial environment of biotechnology. LSB509 aims to increase the student's understanding of DNA and protein-based diagnostics and their use in genetic or biochemical mapping and identification of target genes, disease risks and traits, infectious diseases, identity testing and other forms of investigative analyses.

**Courses:** LS50, SC01 **Prerequisites:** LSB468

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB525 CLINICAL BIOCHEMISTRY 1

This course of study (along with LSB625 Clinical Biochemistry 2) provides the graduating scientists with sufficient biochemical knowledge and laboratory experience to work effectively in both the smaller general-purpose laboratory performing a limited number of biochemical tests and the larger specialised laboratory performing in-depth studies of all aspects of clinical biochemistry.

**Courses:** LS37

**Prerequisites:** LSB425

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB527 BIOMEDICAL RESEARCH TECHNOLOGIES

This unit complements the study of nucleic acid based research and diagnostic technologies studied in LSB598, by providing an understanding of the methodology and application of those protein based technologies which are important in biomedical research and diagnostic investigations.

**Courses:** SC01

**Prerequisites:** LSB308

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB528 ENVIRONMENTAL MICROBIOLOGY

A unit designed to provide students with an understanding of how the microbial world interacts with the environment. Topics covered include microbial ecosystems; symbiotic relationships (plants and microbes, animals and microbes); an introduction to biogeochemical cycles including microbial transformations (carbon cycles, methanogenesis, nitrogen cycle, sulphur cycles); plant and soil microbiology; water microbiology; bioaerosols; and bioremediation of plants, soil and water.

**Courses:** SC01

**Prerequisites:** LSB428

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB535 MICROBIAL IMMUNOLOGY

This unit builds on the concepts developed in Immunology 1 to introduce students to the life cycles of a variety of pathogens, particularly viruses, and the mechanisms employed by a host to avoid infection.

**Courses:** LS37 **Prerequisites:** LSB430, LSB438

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB537 GENETIC ENGINEERING

Genetic Engineering aims to impart an understanding of the manipulative skills involved in experiments aimed at recombining DNA molecules as well as an understanding of the analyti-

cal skills required in characterising target DNA molecules using the global online genetic databases. Genetic Engineering and its prerequisite LSB468 Molecular Biology together encompass all of the theoretical background and manual skills required by graduates to perform basic nucleic acid manipulations and to undertake investigative analysis using online and local facilities in clinical and research laboratories.

**Courses:** LS50, SC01 **Prerequisites:** LSB468

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► LSB547 BACTERIAL PATHOGENESIS AND DISEASE DIAGNOSIS

Clinical bacteriology dealing with the characteristics, isolation and identification of bacteria implicated in human disease; the collection and examination of clinical specimens; the use of computerised data bases in bacterial identification and antibiotic sensitivity tests on laboratory isolates; the interpretation and reporting of results. Key aspects of the strategies and mechanisms by which bacteria cause disease in human hosts is also addressed.

**Courses:** SC01

**Prerequisites:** LSB428

**Contact hours:** 5.5 per week **Credit points:** 12

### ► LSB555 HAEMATOLOGY 1

This unit introduces the discipline of haematology and the routine procedures performed in the haematology section of a pathology department, and introduces the concepts of anaemia and its investigation. This unit provides a detailed understanding of the common erythrocyte disorders. Diagnostic procedures, aetiology, pathophysiology, clinical manifestations and treatment of each disorder are included.

**Courses:** LS37

**Prerequisites:** LSB325, LSB365, LSB465

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB558 ADVANCED PHYSIOLOGY

Divided into 2 areas: a lecture course on recent advances in physiological knowledge and a practical component that introduces experimental design. Using an emphasis on current research developments, selected physiological areas including the cardiovascular and neurological systems, will be considered in depth to extend prior knowledge of physiology. The practical course introduces aspects essential for the correct design of scientific experiments.

**Courses:** SC01 **Prerequisites:** LSB358, LSB458

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB565 HISTOPATHOLOGY 2

Histopathology is an essential component of pathology and one of the major clinical disciplines in Medical Laboratory Science. Students are introduced to advanced techniques and methods of handling histopathological specimens. Students acquire scientific and technical expertise that enable them to carry out and understand a range of techniques used routinely in clinical histopathology and histology research laboratories.

**Courses:** LS37

**Prerequisites:** LSB255, LSB365, LSB465

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB568 ELECTRON MICROSCOPY

A theoretical and practical background to the operation and use of scanning and transmission electron microscopes in biological, materials and forensic science; basic principles of specimen preparation with emphasis on methods complementary to biology, microbiology and molecular biology; analytical capabilities of electron beam instruments.

**Courses:** SC01

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB577 PLANT BIOTECHNOLOGY 1

The potential of plant biotechnology can only be recognised as a result of the significant advances being made in technologies enabling the genetic manipulation of plants. Familiarity with the strategies, techniques and breadth of applications is essential as a basis for anyone planning a career in plant biotechnology. In this unit, students will be presented with an integrated picture of the current technology and applications used for the genetic manipulation of plants (including advanced cell and tissue culture and transforma-

tion technologies). The unit is designed with a significant emphasis on achieving technical expertise and to provide a basis for the more advanced applications presented in Plant Biotechnology II.

**Courses:** LS50, LS70, SC01

**Prerequisites:** LSB468 **Corequisites:** LSB537

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB578 VIROLOGY

Lectures and practical classes designed to introduce students to the basic concepts of virology. A range of viruses and virus diseases are examined and topics include viral morphology and composition, taxonomy and classification, replication, purification, diagnosis and assay, transmission and control.

**Courses:** SC01

**Prerequisites:** LSB428

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB605 PROTEIN ENGINEERING AND BIOPROCESSING

The ultimate goal of most biotechnology processes is the production of a viable organism or functional protein. This unit deals with the factors that determine success in achieving these goals. It builds on information delivered in Molecular Biology, Genetic Engineering and Genomics, defining the special considerations that apply to different expression systems and the unique difficulties of scale-up procedures for commercial development.

**Courses:** LS50, SC01

**Prerequisites:** LSB308 **Corequisites:** LSB468

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB607 PROTEIN PURIFICATION

Comprehensive project designed to integrate a number of specialist biochemical procedures including centrifugation, liquid chromatography, electrophoresis and spectrophotometry. Students participate in group projects where they are required to design and execute their own experimental protocols for the purification and analysis of selected proteins.

**Courses:** LS70, SC01 **Prerequisites:** LSB308

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB608 PROTEIN SCIENCE

Lectures, tutorials and practicals dealing with properties and analyses of proteins. Students will gain knowledge and experience of the forces that determine protein structure, and an understanding of the techniques for analysing and altering protein properties. Discussion will include methods of sequence analysis, algorithms for structure prediction, design and construction of synthetic proteins, and evolution and significance of structural motifs.

**Courses:** SC01

**Prerequisites:** LSB308

**Contact hours:** 5 per week **Credit points:** 12

### ► LSB609 MEDICAL BIOTECHNOLOGY 2

Students undertaking Medical Biotechnology should have a thorough understanding of diagnostics and therapeutics in the commercial environment of biotechnology. LSB609 aims to increase the student's understanding of cell-based strategies, approaches and applications used as therapeutic interventions in medicine. The unit will focus on current state-of-the-art applications within therapeutic biotechnology as directed to novel drug discovery and drug optimisation and to the development of novel therapeutic agents, such as genes for gene therapy, and proteins and peptides for immunotherapy.

**Courses:** LS50, SC01 **Prerequisites:** LSB509

**Contact hours:** 4 per week **Credit points:** 12

### ► LSB619 GENOMICS

The completion of the Human Genome project, along with similar projects on other eukaryote organisms, marks the beginning of a major revolution in fundamental biology that will, ultimately, reach into all corners of human life. Students undertaking any careers associated with the biotechnology, whether it be scientific investigation or related to the business or legal aspects of biotechnology require an appreciation of the concepts of and approaches to the science and technology behind genome projects.

**Courses:** LS50, LS70, LS80, SC01

**Prerequisites:** LSB537

**Contact hours:** 4 per week **Credit points:** 12

## UNIT SYNOPSES

### ► **LSB625 CLINICAL BIOCHEMISTRY 2**

This course of study (along with LSB525) provides the graduating scientists with sufficient biochemical knowledge and laboratory experience to work effectively in both the smaller general-purpose laboratory performing a limited number of biochemical tests and the larger specialised laboratory performing in-depth studies of all aspects of clinical biochemistry.

**Courses:** LS37 **Prerequisites:** LSB525  
**Contact hours:** 5 per week **Credit points:** 12

### ► **LSB628 FOOD MICROBIOLOGY**

A unit that covers the most significant areas of food microbiology at an advanced level. Topics include aspects of microbial ecology of foods, microbial spoilage and preservation, microorganisms of public health significance, food fermentations, and the isolation and identification of microbes often present in foods. A professional attitude towards work in a microbiology laboratory and an awareness of the dangers of working with pathogenic cultures will be established.

**Courses:** SC01 **Prerequisites:** LSB428  
**Contact hours:** 4 per week **Credit points:** 12

### ► **LSB635 DIAGNOSTIC MICROBIOLOGY 2**

This is an advanced level unit in clinical microbiology expanding on themes and concepts presented in Diagnostic Microbiology 1 and discusses aspects of direct relevance to graduating students in this discipline. Diagnostic Microbiology 2 thus completes the preparation of students for a career in a routine diagnostic microbiology laboratory by continuing to develop and refine advanced level generic and specific skills in specimen processing, isolation and identification of key microorganisms involved in infectious disease processes and in the interpretation and intelligent discussion of results and laboratory report writing, compilation and critical discussion.

**Courses:** LS37 **Prerequisites:** LSB435, LSB535  
**Contact hours:** 5 per week **Credit points:** 12

### ► **LSB647 CLINICAL MYCOLOGY AND PARASITOLOGY**

A third year unit in microbiology with aspects of fungal taxonomy, classification of clinical mycoses, collection of material for fungal isolation and identification of superficial, subcutaneous, systemic and opportunistic mycoses. Parasitology will include a systematic study of identification, life history, incidence, modes of infection, epidemiology and control of parasite infections in humans.

**Courses:** SC01 **Prerequisites:** LSB428  
**Contact hours:** 4 per week **Credit points:** 12

### ► **LSB648 MOLECULAR MICROBIOLOGY**

A third year unit in microbiology with aspects of microbial pathogenesis which includes microbial interactions with higher organisms, biological, cellular and molecular basis of infectious disease, human host defences, virulence factors of microorganisms, molecular phylogeny and taxonomy, methods for detection and typing of microorganisms, the structure of bacterial cells and mechanisms of antibiotic resistance.

**Courses:** SC01 **Prerequisites:** LSB428  
**Contact hours:** 4 per week **Credit points:** 12

### ► **LSB655 HAEMATOLOGY 2**

This unit provides a detailed understanding of the common leucocyte and coagulation disorders investigated by the haematology laboratory and reinforces knowledge acquired in the previous haematology units. Diagnostic procedures, aetiology, pathophysiology, clinical manifestations and treatment of each disorder are included in the discussion of the disorders.

**Courses:** LS37 **Prerequisites:** LSB555  
**Contact hours:** 5 per week **Credit points:** 12

### ► **LSB657 PERSPECTIVES IN LIFE SCIENCE**

Positive and negative aspects of humanity's utilisation of resources are critically analysed. Topics include humanity's food supply, humanity's profligate consumption of energy, global climate change, losses of soils and ecosystems and species, and contemporary aspects of biotechnology

such as the GM food debate, and ethical aspects of medical and corporate biotechnology.

**Courses:** ED50, SC01 **Prerequisites:** LSB118  
**Contact hours:** 4 per week **Credit points:** 12  
**Semester:** 2

### ► **LSB658 CLINICAL PHYSIOLOGY**

Students will explore the physiological basis, pathogenesis, clinical features and treatment rationale of the major disorders of the cardiovascular, respiratory, haematological, renal, gastrointestinal, nervous and endocrine systems. One of the objectives of the unit is to develop critical thinking and apply this to the discussion of pathophysiological cases.

**Courses:** SC01 **Prerequisites:** LSB358, LSB458  
**Contact hours:** 5 per week **Credit points:** 12

### ► **LSB665 IMMUNOHAEMATOLOGY**

This course is designed to provide students with an understanding of the antigens, immune mechanisms and clinical factors involved in blood transfusion and tissue transplantation.

**Courses:** LS37  
**Prerequisites:** LSB438, LSB535, LSB555  
**Contact hours:** 5 per week **Credit points:** 12

### ► **LSB677 PLANT BIOTECHNOLOGY 2**

This unit will expand on topics introduced in earlier units and will address the more advanced and more specialised areas of plant molecular biology and biotechnology. The unit is designed to give students an insight into the scope and future potential of plant biotechnology and include topics such as: advanced applications of transgenic plants, functional genomics and gene discovery, specific genes and gene families, molecular markers and mapping, and gene silencing.

**Courses:** LS50, LS70, SC01  
**Prerequisites:** LSB517  
**Contact hours:** 4 per week **Credit points:** 12

### ► **LSB698 MOLECULAR PATHOGENESIS 2**

This unit aims to increase students' understanding of the principles of basic science (biochemistry, cell biology, microbiology and genetics) by using significant human disease states to illustrate the mechanisms involved in the pathogenesis of disease. The emphasis will be on the understanding of the molecular mechanisms that underlie disease rather than the details of the particular disease.

**Courses:** SC01 **Prerequisites:** LSB598  
**Contact hours:** 5 per week **Credit points:** 12

### ► **LSB709 BIOTECHNOLOGY RESEARCH PROJECT**

Knowledge of the practical aspects of developing a project for research and development is a fundamental aspect of real-world biotechnology. This unit involves a small team research project based on the RandD proposal developed in LSB409 Readings in Biotechnology. The unit will guide student teams through the research process from the experimentation to the writing of an assessment of the project under the guidance of academic and industry mentors.

**Courses:** LS50  
**Contact hours:** 4 per week **Credit points:** 12

### ► **LSB850 RESEARCH STRATEGIES**

Seminars presented by staff of the School of Life Sciences and other research scientists on their area of expertise. A series of tutorials and lectures on such topics as library searches, oral communications, written communications and ethics. Two seminars are presented by the student covering the background literature relevant to the student's research project and the research findings.

**Courses:** SC60 **Credit points:** 12

### ► **LSB851 READINGS IN LIFE SCIENCE 1**

The preparation of a literature review of direct and associated relevance to the Honours research project under the guidance of the supervisor(s). Includes presentation of a grant proposal demonstrating a considerable knowledge, understanding and appreciation of the literature as well as a critical appraisal of future research requirements.

**Courses:** SC60 **Credit points:** 24

### ► **LSB852 PROJECT**

The preparation of a paper reporting the methods and results of investigations in the Honours re-

search projects. The paper also includes an introduction, analysis and discussion of the project in a style and length deemed to be appropriate by the Unit Coordinator. Students should relate this project work to published work already undertaken in the field.

**Courses:** SC60 **Credit points:** 60

### ► **LSN009 READINGS IN LIFE SCIENCE 4**

A review of literature in an area determined in consultation with the supervisor. The area can be associated with the research project topic and can be broadly or narrowly focused but should not include any significant material covered in LSN013. The review should cover the background to the area as well as recent advances and identify deficiencies and possible future research directions. The review should be a critical analysis of the area. Reviews should normally be approximately 5000 words.

**Courses:** SC80  
**Contact hours:** 1 per week **Credit points:** 12

### ► **LSN011 RESEARCH SEMINARS IN LIFE SCIENCE 1**

A 30-minute public seminar to include a presentation and question period addressing the background to the proposed research topic in the postgraduate degree and outlining the proposed directions of the research program. The seminar should normally be presented within 12 months (full-time) or 24 months (part-time) of commencement of the postgraduate program.

**Courses:** IF49, SC80 **Credit points:** 6

### ► **LSN013 READINGS IN LIFE SCIENCE 3**

A comprehensive and critical review of the background and current literature directly related to the research project topic. The review should identify major and minor deficiencies in the research literature and identify possible directions for future research. The review should be approximately 10 000 words and at least one draft should be presented to the supervisor prior to final submission.

**Courses:** IF49, SC80 **Credit points:** 24

### ► **LSN023 RESEARCH SEMINARS IN LIFE SCIENCE 3**

A 60-minute public seminar to include a presentation and question period outlining the results of the postgraduate research program as well as possible future research directions in this area.

**Courses:** IF49, SC80 **Credit points:** 12

### ► **LSN102 CELLULAR BASIS OF DISEASE**

Cell injury and stress mechanisms. Cellular communication. The responses of organelles, cells and tissues to injury and stress including: immune, inflammation, thrombosis, ageing and neoplastic responses. Transplantation and regeneration.

**Courses:** LS70, LS80  
**Contact hours:** 3 per week **Credit points:** 12

### ► **LSN159 ADVANCED PATHOLOGY**

The fundamentals of anatomy, physiology and pathology; emphasis on applied cross-sectional anatomy and integration of knowledge of pathological processes.

**Courses:** PH80  
**Contact hours:** 4 per week **Credit points:** 12

### ► **LSN160 EPIDEMIOLOGY FOR LIFE SCIENTISTS**

This unit aims to enable students to acquire knowledge and develop critical thinking in epidemiological research. Topics covered include general principles of Epidemiology; rates and ratios, standardisation; types of studies; ethical issues in study design and conduct; statistics as related to epidemiology; criteria for causal relationship; principles of screening tests; epidemiology of infectious diseases. Information is presented in informal interlinked lectures and tutorials. Epidemiological exercises are discussed. Students develop skills in using statistical capabilities in Excel.

**Courses:** LS70, LS80  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► **LSN710 PROJECT**

A supervised project in an area selected by the student. The project area may be novel, developmental or directed at an investigation of the

introduction of a new system into the laboratory. Other areas which are considered appropriate include epidemiological analyses, laboratory safety, laboratory design or the efficacy of laboratory service. Each student submits a written project report in a style to present the data, but according to specific guidelines.

**Courses:** LS80 **Credit points:** 48

► **LSN711 PROJECT 1**

See LSN710.

**Courses:** LS80 **Credit points:** 24

► **LSN712 PROJECT 2**

See LSN710.

**Courses:** LS80 **Credit points:** 24

► **LSP127 BUSINESS ASPECTS OF BIOTECHNOLOGY**

Commercial perspectives of a biotechnology company; funding for commercial research; research patents and intellectual property; GMAC/recombinant DNA guidelines and regulations; overview of Australian biotechnology companies; site visits to one or two biotechnology companies.

**Courses:** LS70, LS80

**Contact hours:** 5 per week **Credit points:** 12

► **LWB136 CONTRACTS A**

Formation of contracts; equitable estoppel; privity of contract; formalities; express and implied terms. An examination of promises which are legally binding, how contractual promises may be characterised and the significance of that characterisation.

**Courses:** LW33, LW42, LW65, LW70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB102, LWB132

**Campus offered:** GP, EXT **Semester:** 1, 2

► **LWB137 CONTRACTS B**

Discharge of contracts (performance, breach, agreement, frustration); remedies; vitiating factors (misrepresentation, mistake, undue influence, duress, unconscionable contracts, illegality). An examination of and how contractual promises may be discharged or invalidated. Topics include discharge; performance; agreement; frustration; remedies; vitiating factors (misrepresentation, mistake, undue influence, duress, unconscionable contracts, illegality).

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB136

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB102, LWB132

**Campus offered:** GP, EXT **Semester:** 2, 3

► **LWB138 FUNDAMENTALS OF TORTS**

The law of torts is of primary importance in understanding how the Australian legal system operates to compensate the physical and/or financial harm one person suffers as a result of another's wrongdoing. Almost all law schools and most professional admission authorities share this common view of the fundamental nature of this category of civil wrongs. Today the most significant area of the law of torts is that of negligence which is also the most commonly litigated tort action. Of particular importance is the large number of negligence actions which arise out of motor vehicle, work-related and similar types of accidents. However, a knowledge and understanding of the tort of negligence can only occur in the context of the development of the earlier torts such as trespass to the person, land and personal property. In this unit the principles and rules of the law of torts relating to negligence and trespass actions are also examined to ascertain whether they achieve outcomes which are consistent with contemporary legal and social values.

**Courses:** LW33, LW42, LW65, LW70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB103, LWB133

**Campus offered:** GP, EXT **Semester:** 1, 2

► **LWB139 SELECT ISSUES IN TORTS**

The law of torts is of primary importance in understanding how the Australian legal system operates to compensate the physical and/or financial harm one person suffers as a result of

another's wrongdoing. Almost all law schools and most professional admission authorities share this common view of the fundamental nature of this category of civil wrongs. In the unit Fundamentals of Torts the principles and rules relating to the torts of negligence and trespass were examined in the context of whether these torts achieve outcomes which are consistent with contemporary legal and social values. In this unit a wider range of torts and related issues are examined so that you may develop the knowledge, understanding and skills necessary to maintain in the future your abilities in this important area of legal practice.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB138

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB103, LWB133

**Campus offered:** GP, EXT **Semester:** 2, 3

► **LWB141 LEGAL INSTITUTIONS AND METHOD**

This unit aims to introduce students to the building blocks of law - fundamental principles, legal terminology, legal institutions, legal methodology, sources of the law, ways to interpret the law including an introduction to policy and international considerations. The material is presented as an integrated whole so that the students obtain a broad perspective and an ability to 'navigate the law' without artificially dividing any particular aspect. The unit also aims to emphasise the joint responsibility of the teacher and the student for learning and to foster the development of skills in communication, comprehension and analysis.

**Courses:** LW33, LW42, LW65, LW70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB101, LWB135

**Campus offered:** GP, EXT **Semester:** 1, 2

► **LWB142 LAW, SOCIETY AND JUSTICE**

This unit will examine the basic tenets of our democratic liberal legal system, particularly the central concept, the rule of law. The unit begins with an historical development of rights and the rule of law. It will look at how law and values intertwine and how society at a particular time shapes notions of legal personality, the recognition of 'family' and human rights in law. It will finally address the limitations of democratic liberalism and the rule of law by examining the reality of equality before the law in relation to such topics as gender and cultural neutrality, equal access to justice, and lawyers and the adversarial system.

**Courses:** LW33, LW42, LW65, LW70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB101, LWB131

**Campus offered:** GP, EXT **Semester:** 1

► **LWB143 LEGAL RESEARCH AND WRITING**

A 'learn by doing' unit in which students are introduced to the use of all common legal research tools, in both print and electronic form, as they research a legal problem from a totally unfamiliar area of law. Also introduces students to legal writing and citation style, with an emphasis on the use of plain English.

**Courses:** LW33, LW42, LW65, LW70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB141

**Corequisites:** LWB141

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB104, LWB134

**Campus offered:** GP, EXT **Semester:** 2

► **LWB144 LAWS AND GLOBAL PERSPECTIVES**

This unit is designed to give students an understanding of the global context in which Australia operates and the important impact of this context on Australian law and legal practice. The unit will introduce and explain the fundamental structures and principles of Comparative Law, Public International Law and Private International Law; and examine their relevance to contemporary legal practice in Australia.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB101, LWB131

**Campus offered:** GP, EXT **Semester:** 2

► **LWB231 INTRODUCTION TO PUBLIC LAW**

The basic institutions of government: the executive, the Parliament and the judiciary; the general principles to which legislative power is subject, and the principles by which executive decision-making is kept open and accountable.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB203, LWB311

**Campus offered:** GP, EXT **Semester:** 1

► **LWB235 AUSTRALIAN FEDERAL CONSTITUTIONAL LAW**

The constitutional arrangements effected by the Commonwealth Constitution; the structure and institutions of the constitution; the division of power between Commonwealth and states; and relations between the different levels of government; emphasis to Commonwealth legislative powers, executive and judicial powers.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB231 **Corequisites:** LWB231

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB203

**Campus offered:** GP, EXT **Semester:** 2

► **LWB236 REAL PROPERTY A**

Property, rights of ownership and title are institutions at the basis of contemporary Australian society. A sound knowledge of the general principles of property and real property law is essential for any lawyer. This unit, together with Real Property B, examines general principles concerning the nature of property and real property law. Topics covered include: the concept of property, land ownership in Australia, native title, ownership, possession and title, ownership rights, law and equity, land transactions, and the Torrens system.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB143, LWB240 or equivalent

**Corequisites:** LWB240 or equivalent

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB201, LWB233

**Campus offered:** GP, EXT **Semester:** 1

► **LWB237 REAL PROPERTY B**

This unit continues the examination of the general principles of real property law commenced in Real Property A. Topics include: co-ownership of land, leases, mortgages, easements, freehold covenants, and community titles schemes.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB236

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB201; LWB233

**Campus offered:** GP, EXT **Semester:** 2

► **LWB238 FUNDAMENTALS OF CRIMINAL LAW**

An understanding of the principles of Criminal Law is of fundamental importance as it impinges upon almost every aspect of domestic, commercial, corporate and public activity in Queensland. The aim of this unit is to provide an overview of the aims and sources of Criminal Law in Queensland and develop an understanding of the onus of proof in criminal matters. Additionally the unit explores the concept of fault elements, the criminal justice system and a selection of major offences while also developing advocacy skills.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB202, LWB232

**Campus offered:** GP, EXT **Semester:** 1

► **LWB239 CRIMINAL RESPONSIBILITY**

The aim of this unit is to build upon the principles and skills explored in LWB238 by developing an understanding of the way criminal responsibility is imposed through the complicity

## UNIT SYNOPSES

provisions of the Criminal Code and the common law and how the major defences and excuses operate. The unit also examines the major sentencing principles applied in Queensland.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB238

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB202; LWB232

**Campus offered:** GP, EXT **Semester:** 2

### ► LWB240 PRINCIPLES OF EQUITY

The principles of Equity were originally developed to ameliorate the harshness of the common law and have since become a fundamental component of our legal system. A knowledge and understanding of the major principles of equity is necessary to an understanding of how the Australian legal system operates and it is therefore located early in the LLB degree. The aim of this unit is to provide a coherent knowledge and understanding of equitable principles within the context of the Australian legal system as well as developing skills relevant to ongoing learning and professional practice.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB301, LWB234

**Campus offered:** GP, EXT **Semester:** 1

### ► LWB241 TRUSTS

Trusts are a fundamental institution of ownership of property in equity and they are used for various purposes including estate planning, commercial, and charitable purposes. A knowledge and understanding of the trust in its various forms and the equitable principles of property transfer are fundamental in understanding the impact of the principles of equity in the area of property ownership and rights. The aim of this unit is to provide a coherent knowledge and understanding of the law relating to trusts within the context of the Australian legal system as well as developing skills relevant to ongoing learning and professional practice.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB301, LWB234

**Campus offered:** GP, EXT **Semester:** 2

### ► LWB302 FAMILY LAW

The manner in which the law treats the special social relationships which exist among members of a family and transforms them into legal rights and duties. The family as a legal phenomenon; methods of dispute resolution in family law; annulment of marriages; dissolution of marriages; consequences of separation and divorce, such as maintenance, child support, adjustment of interests in property and parental responsibilities.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 1

### ► LWB307 INSOLVENCY LAW

Examines the insolvency of individuals and the Bankruptcy Act 1966 (Cth); winding up of companies, reconstructions and arrangements and voluntary administration as procedures other than winding up which may be open to an insolvent company; the law relating to receivership; and relevant provisions of the Corporations Law.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 1

### ► LWB308 INDUSTRIAL LAW

The employment relationship is one which affects us all, and in the light of recent legislative changes to industrial and employment law, will continue to have a profound effect on both our own lives and the lives of those with whom we come into professional contact. The study of Australian industrial law will draw on your knowledge of contract, tort and constitutional law and introduce the legislative and common law bases by which industrial relations are conducted in this country.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 1

### ► LWB309 SUCCESSION

Examines the law with respect to wills and probate and involves a study of the formalities required to execute a valid will; the intestacy provisions where someone dies without having made a will; the rights of a testator's family when they have not been named as a beneficiary in the deceased's will, as well as a detailed examination of the provisions of the Succession Act 1981 (Qld).

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 2 per week **Credit points:** 8

**Campus offered:** GP, EXT **Semester:** 2

### ► LWB313 DISCRIMINATION & EQUAL OPPORTUNITY LAW

An examination of the law and policy with respect to discrimination and equal opportunity in Australia; relevant international treaties and Australian legislation such as the Queensland Anti-Discrimination Act; the Anti-Discrimination Commission and procedures.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 1

### ► LWB331 ADMINISTRATIVE LAW

Examines the law relating to judicial review of administrative action public authorities, systems of merits appeal and the law of standing in public interest litigation.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB231

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB311

**Campus offered:** GP, EXT **Semester:** 2

### ► LWB332 COMMERCIAL AND PERSONAL PROPERTY LAW

Fundamental concepts of personal property law (including possession and ownership); transfers of and dealings in personal property; protection of personal property interests; agency; bailment; sale of goods; introduction to trade practices law.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB233 OR LWB236 only

**Corequisites:** LWB233 OR LWB236 only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB303

**Campus offered:** GP, EXT **Semester:** 1

### ► LWB333 THEORIES OF LAW

Legal practice requires an understanding and appreciation of its philosophical and theoretical foundations, as these guide the policies and inform changes to law through legislative and judicial action. Understanding the major theoretical and philosophical approaches assists with the resolution of novel and difficult legal problems. The unit content imparts both knowledge based content and process based competencies that will result in independent learning outcomes. Topics covered include Natural Law, Positivism, Dworkin, Social, Economic and Historical theories of law, Legal Realism, Sociological theories of law, Critical Legal Studies, Postmodern Legal Thought, Feminist Theories of Law, Critical Race Theory, Postcolonial Legal Theory.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB305

**Campus offered:** GP, EXT **Semester:** 1

### ► LWB334 CORPORATE LAW

The basic legal principles relating to registered companies; the principle of the veil of incorporation, internal functioning of a registered company including the operation of the constitution and replaceable rules; dealings with third parties; legal rules relating to share capital, dividends and loan capital; introduction to obligations of company officers and shareholder rights. Further specialised units such as Law of Corporate Governance will be offered for students who have completed Corporate Law and wish to concen-

trate some of their studies in the corporations and commercial area.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** LWB401

**Campus offered:** GP, EXT **Semester:** 2

### ► LWB356 ADVOCACY

Advocacy is the art of persuasion in Court and before Tribunals. This unit concentrates on developing the fundamental skills of a good advocate, namely analysis, preparation and performance. Students are required to participate in oral advocacy exercises and mock trials.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB432

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► LWB359 ADVANCED TAXATION LAW

Examines the taxation of business entities. The taxation processes for partnerships, trusts and companies will be analysed together with the implications for the taxation of individuals involved with business entities. These individuals include partners, beneficiaries, trustees and company shareholders. This unit builds on the principles developed in Introduction to Taxation law in relation to taxation of individuals in that the concepts of income, deductions, residence and so on are discussed in the context of business entities. Tax planning issues involving entities will also be critically analysed and reflected on together with the effect of the general anti-avoidance provisions in the taxation legislation. The general operation of the Goods and Services Legislation and Fringe Benefits legislation is also examined.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB364

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 2

### ► LWB363 INSURANCE LAW

Insurance is the payment of a premium by one to another to cover the risk that an unidentified event should occur, upon which a payment in the insured sum shall be made. The principles of insurance law are as relevant to the insurance of supertankers to cover the possibilities of an environmental catastrophe to the insurance of everyday household risks. This course prepares students to advise insureds and insurers alike on issues such as whether a policy covers the event which has occurred and whether there are grounds upon which all or part of a claim may be refused. It considers also the manner in which the conduct of an insured may prejudice his or her right otherwise to payment under the policy and the circumstances in which an insured may upon payment of the claim stand in the shoes of the insured to recover from other parties responsible for causing the loss. In addition to principles of general insurance, the course also covers selected aspects of professional indemnity insurance, directors and officers insurance and a detailed study of the statutory framework in Queensland for compulsory third party motor vehicle insurance and workers compensation.

Any one interested in litigation should study insurance law (indeed, well over half of litigation in Queensland involves acting for or against general or statutory insurers). Insurance law is otherwise relevant to most aspects of practice.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB136 & LWB137 or equivalent

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 2

### ► LWB364 INTRODUCTION TO TAXATION LAW

Examines the principles relating to the powers of the Australian government to impose income tax. This includes concepts of residence of individual tax payers for taxation purposes and source of income. Students will then consider the distinction between income and capital as this relates to the imposition of income tax and the concept of deductions as a means of reducing taxable in-

come. Taxation of capital gains particularly as this relates to a taxpayer's main residence, deceased estates and general transfers of assets is discussed in detail. The other major topic is a critical analysis of the need for the general anti-tax avoidance provisions and how they apply.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 1

► **LWB366 LAW OF COMMERCIAL ENTITIES**

The legal principles pertaining to a number of different structures found in commercial life. A brief consideration of corporations; more detailed examination of partnerships, unit trusts, joint ventures incorporated associations. A consideration is given to the definition of these structures, relationship with third parties, relationship of members inter se. This unit can be completed before or in conjunction with Corporate Law (LWB334).

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 1

► **LWB406 FUNDAMENTALS OF PUBLIC INTERNATIONAL LAW**

The legal rules which govern the activities of nations and the regulation of the activities of nations by international organisations, such as the UN. The creation of international law and its sources: treaties, customary law, general principles of law. The concept of international legal personality: statehood, self-determination, recognition. The effects of international law: sovereignty, international responsibility. The law of armed conflict.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 2

► **LWB410 COMPETITION LAW**

An overview of the anti-competitive practices which are proscribed by Part IV and Part XIB of the Trade Practices Act 1974 (Cth). It will also deal with the remedies available for contraventions of Part IV and the possibility of obtaining authorisation from the Australian Competition and Consumer Commission. The access provisions of Part III A and Part XIC will also be considered.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 2

► **LWB412 RESEARCH AND WRITING PROJECT**

A supervised piece of research on a legal topic, and the writing of a paper of approximately 6500 words on that topic. A student wishing to undertake the Research and Writing Project should discuss the matter as early as possible in the semester immediately before that in which he or she proposes to undertake it, preferably with the proposed supervisor of the student's own choosing. The written proposal must be approved by the proposed supervisor and must reach the Unit Coordinator, presently Associate Professor Phillip Tahmindjis, at least two weeks before the beginning of the teaching semester in which the project is undertaken so that the student can be notified of the acceptance or refusal of the proposal not later than the first day of that semester. This project offers an ideal opportunity for students to prepare topics of academic or career-related interest, and to produce an item of writing which might assist in scholarship, postgraduate and career-related applications.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** Completion of 192 credit points of law units

**Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **LWB413 QUEENSLAND PARLIAMENTARY INTERNSHIP PROGRAM**

This unit provides an opportunity for students to learn about the workings of the Queensland Parliament and undertake a piece of research of interest and use to a member or senior officer of Parliament. Places are limited and preference will be given to students with a good academic record. This unit is able to be undertaken in semester 2, and intending students should contact the Unit Coordinator in May of each year. Places are generally available only to students in their final year of study who have achieved a grade point average of at least 5.2 or have demonstrated other evidence of capacity for research and report writing.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** Completion of 192 credit points of law units

**Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **LWB417 MOOTS**

The aim of this unit is to give students a broad understanding and development of oral and written arguments and persuasive speaking, and an ability to apply these skills in a courtroom context. Additionally, students will become competent in electronic courtroom software.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** Completion of 1st & 2nd yr core

**Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **LWB418 COMPETITION MOOTS 1**

Competition Mooting is a challenging area of legal education. If you have completed the core units in first and second year, enjoy working under pressure and have participated in at least one moot as counsel, you may apply when applications are called for. Places are very limited, but if you are successful, you will be able to take your skills to the national and international arena, and experience mooting at the highest level. International and national moots require significant preparation and attention to detail, with a very high level of commitment, research, writing and discipline knowledge. Because of the timetabling of international moots throughout the year, you may be required to work on your competition moot from November to February. The number of competition moots offered will vary from year because of the high demand participation places on Law School resources.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** Completion of all 1st and 2nd year core law units plus participation in at least one Law School moot

**Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **LWB419 COMPETITION MOOTS 2**

This unit will allow a student to build on the skills they have learnt in LWB418 to give them a higher level of understanding of oral and written argument and persuasive speaking, and an ability to apply these skills in an international competitive context.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB418

**Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **LWB420 INTERNSHIP**

The aim of this unit, to be ideally undertaken in the later years of the LLB course, is to provide an opportunity for students to work in a functioning workplace environment with a broad public law focus and to enable students to engage in practical tasks, that require demonstration of legal analysis critical reflection and appropriate communication skills.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** Completion of 192 credit points of law units

**Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **LWB431 CIVIL PROCEDURE**

This core unit focuses on developing basic litigation skills. The following issues are examined: the adversarial system and alternative methods of dispute resolution, obligations to the client, the structures and processes of litigation conducted in the Supreme, District and Magistrates Courts, jurisdiction, originating process, notice of intention to defend, parties, service, ending proceedings early, pleading, disclosure, subpoenas, trial, appeals, costs and enforcement.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** LWB404  
**Campus offered:** GP, EXT **Semester:** 1

► **LWB432 EVIDENCE**

The law of Evidence concerns those rules and principles which govern the presentation and proof of facts and information in court proceedings, both civil and criminal. The unit covers both State and Federal jurisdictions.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** LWB402

**Campus offered:** GP, EXT **Semester:** 1, 2

► **LWB433 PROFESSIONAL RESPONSIBILITY**

The ethical principles upon which the practice of all professions is based; the principles which underpin the discipline of law and the workings of the legal profession; the history, nature, organisation and operation of the legal profession; including codes of conduct, trust accounts and professional legal ethics.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 2

► **LWB434 ADVANCED RESEARCH AND LEGAL REASONING**

Advanced skills of legal research, analysis, problem-solving, critical thinking, and writing for diverse purposes; topical developments in substantive areas of law.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB143 or equivalent, LWB333

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** LWB415  
**Campus offered:** GP, EXT **Semester:** 1

► **LWB451 ALTERNATIVE DISPUTE RESOLUTION**

Heralded as the new Equity, alternative dispute resolution processes, particularly mediation, are being utilised by all courts and most administrative tribunals to reduce the complexity, time and cost of adversarial dispute resolution. A knowledge of these processes and skills is therefore desirable, if not essential, for all legal practitioners. This unit builds on negotiation skills modules developed in first and second year core units and introduces the theory and skills of mediation.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 1, 2

► **LWB456 LEGAL CLINIC (ORGANISED PROGRAM)**

Students are provided with the opportunity to see law in action through being involved in the delivery of legal services to members of the community under the umbrella of Legal Aid Queensland, the Prisoners Legal Service Inc or the Aboriginal and Torres Strait Islander Corporation (QEA) for Legal Services. Students work in their placement is supplemented with a weekly seminar program which deals with such topics as legal interviewing, family and criminal law practice, professionalism and legal writing. This unit has a quota limit.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Credit points:** 12  
**Campus offered:** GP **Semester:** 2

## UNIT SYNOPSES

### ► LWB480 MEDIA LAW

This unit examines the regulation and non-regulation of freedom of speech exercised by the media. In this regard various limitations imposed by the common law, statute and self-regulation will be examined, such as defamation, restrictions on reporting courts and politics, contempt, privacy and confidentiality.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB138, LWB139 or equivalent

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 2

### ► LWB482 INTERNET LAW

It is vital for any participant in the digital age to gain a thorough knowledge of the structure, governance and regulation of the Internet, digital intellectual property, and risk management strategies for stakeholders.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** Intensive offering

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► LWB483 MEDICO-LEGAL ISSUES

Considers the regulation of health care as well as the relationship between the individual and the health care provider in terms of consent to treatment; negligence; the impact of the criminal law; abortion, removal from life support systems; mental illness; medical records and evidence; ownership and confidentiality of records; the duty to treat; complaints against hospitals and health care workers.

**Courses:** IF35, IF36, IF37, IF38, IF39, IF40, IF41, LW33, LW41, LW42, JS25

**Prerequisites:** LWB133 or equivalent

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 2

### ► LWB484 ELECTRONIC COMMERCE AND TECHNOLOGY CONTRACTS

This unit will allow a student to: examine and critique the law relating to electronic commerce and technology contracts; gain an awareness of the essential clauses in computer system acquisition agreements; understand essential clauses in software development, licensing and distribution agreements; appreciate civil and criminal liability and risk management strategies; and develop a focus of critique about the underlying design, content, and practice of electronic commerce.

**Courses:** LW33, LW42, IF07, IF10, IF35, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** GP, EXT **Semester:** 2

### ► LWB485 ENVIRONMENTAL LAW

An introduction to environmental law in Queensland; the sources, nature and development of environmental law in Queensland; the concepts of environmental law (for example property, administrative control, law and policy, planning, management); access to the environment; planning to prevent environment degradation and pollution; protecting the environment; managing the environment; conservation; ecologically sustainable development; enforcement of environmental law; the role of the Commonwealth.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 1

### ► LWB486 INTELLECTUAL PROPERTY LAW

This elective unit provides an introduction to the most significant of the legislative enactments creating or protecting intellectual property in Australia, including those governing copyright, designs, patents and trade marks. It also considers the application of relevant common law, particularly confidential information and passing off.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 2

### ► LWB492 SECURITIES

Examines security interests commonly taken by providers of credit when advancing money. One

of the more common securities obtained by lenders in practice is a mortgage over real property. Given the practical importance of this as a form of security, the nature of a Torrens title mortgage, the rights of the mortgagor and enforcement options of the mortgagee are examined for the first half of the course. Other securities examined are guarantees, bills of sale over personal property and possessory liens. Because the Consumer Credit Code regulates most transactions involving the provision of consumer credit, the impact of this legislation on securities will also be examined. Various provisions of the Trade Practices Act 1974 as they affect the validity and operation of securities will also be considered.

**Courses:** LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

**Prerequisites:** LWB233 or equivalent

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 2

### ► LWN022 BANKING AND FINANCE LAW

Topics include: the new regulatory scheme imposed by the Financial Services Reform Act 2001 (Cth) and the Australian Securities and Investments Commission Act 2001 (Cth); the commercial use of bills of exchange; statutory protection of financial institutions in relation to the payment and collection of cheques; the operation of bank accounts and payment mechanisms such as electronic funds transfers; select issues arising out of the banker-customer relationship: the banker's right of set-off, liens, combination of accounts, charge backs, appropriation of payments, the effect of orders for the redirection of debts and Mareva orders on financial institutions; and alternative dispute resolution under the revised Code of Banking Practice.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► LWN025 RESEARCH PROJECT 1A

A supervised research project of about 10000 words over one semester approved by the Teaching, Learning and Curriculum Committee. Students should refer to the relevant course rules for the maximum credit point limit of Research Project units allowed to be undertaken as part of their course.

**Courses:** LW51, LW60 **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 1, 2, 3

### ► LWN026 RESEARCH PROJECT 2A

A supervised research project of about 20000 words over one semester approved by a working party of the Law Faculty Teaching, Learning and Curriculum Committee. Students should refer to the relevant course rules for the maximum credit point limit of Research Project units allowed to be undertaken as part of their course.

**Courses:** LW51, LW60 **Credit points:** 24  
**Campus offered:** GP, EXT **Semester:** 1, 2

### ► LWN030 DISPUTE RESOLUTION/MEDIATION

A study of dispute resolution processes and in particular, mediation, looking at both the theory and practice. Students are expected to be involved in a number of class workshops to learn mediation skills. Issues include: mediation in Australia; theories of mediation; different forms of mediation, ie neighbourhood, family, commercial; the advantages and disadvantages of mediation; power imbalance; when mediation is not appropriate; ethical and professional issues relating to mediation.

**Courses:** LW50, LW51, LW60

**Contact hours:** 26 **Credit points:** 12  
**Campus offered:** GP

### ► LWN046 ADVANCED PLANNING LAW

A detailed study of town planning law with special emphasis on relevant Queensland legislation in particular the Integrated Planning Act 1997 and Regulations, and Legislation relevant to major/significant development projects. Particular emphasis will be placed on the integrated development assessment system, both transitionally and under full IDAS. Topics considered will include: Ecological Sustainability; Development; Application Stage; Information and Referral Stage; Notification Stage; Decision Stage; Minis-

terial IDAS Powers; Appeal Process; Integration with the Environmental Protection Act 1994, the Building Act 1975, the Transport Infrastructure Act 1994, the Vegetation Management Act 1999, the Water Act 2000, and other legislation to be integrated into IPA.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 1

### ► LWN047 LEGAL EDUCATION

This unit involves an introduction to the main schools of thought on legal education. A review of legal education from an historical and socio-political perspective together with consideration of the implications on legal education of schools of contemporary thought such as feminist legal theory will be made. The unit analyses the learning process and considers student approaches to learning, adult learning theory and learning styles; and a variety of teaching styles/techniques and the appropriateness and effectiveness of each. Consideration will be given to the matching of learning styles with teaching methods and the validity and effectiveness of such an approach, together with the role and implementation of training needs analyses and goal setting. The elements of objectives and aims and how to set them with a view to designing a teaching/training program will be analysed. Consideration will be given to the means of evaluating teaching/training effectiveness and the needs of adult learners.

**Courses:** LW51, LW60

**Contact hours:** 26 total **Credit points:** 12  
**Campus offered:** GP

### ► LWN048 ADVANCED LEGAL RESEARCH

The unit deals with the concepts, techniques, aims and methods of legal research and other research relevant to an interdisciplinary perspective. It includes extensive training in finding source material, the use of advanced technology in locating and organising source materials. The unit also deals at length with the presentation and defence of research including the respective roles of researcher and supervisor, structuring research material in support of a thesis, the diagnosis and remedy of structural problems. It deals with the conventions of presentation, assessment of research in terms of the differing criteria for refereeing and judging worth and quality and ethics of research. Different research objectives will be considered for attention, for example research in government or for law reform.

**Courses:** LW51, LW60

**Contact hours:** 26 over 5 days

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► LWN049 INTERNATIONAL ENVIRONMENTAL LAW

The development of international environmental law; its fundamental principles and rules; the creation of international environmental law; implementation and enforcement of international environmental law; international dispute resolution in the environmental field; current issues for international environmental lawyers including climate change, biodiversity and world heritage.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► LWN050 RESTRICTIVE TRADE PRACTICES LAW

Concerned with an analysis of those sections of the Trade Practices Act 1974 (Cth) dealing with the regulation of anti-competitive conduct and the regulation of access to services that are essential to compete in upstream and downstream markets. The main emphasis will be on the regulation of anti-competitive conduct including, anti-competitive horizontal agreements, horizontal joint ventures, horizontal mergers, exclusive dealing, resale price maintenance, intellectual property licences, franchising and taking advantage of market power. After considering the substantive prohibitions, the final part of the unit is concerned with remedies and defences and the role played by the Australian Competition and

## UNIT SYNOPSES

Consumer Commission, the Australian Competition Tribunal and the Courts.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 2

### ► LWN051 CONSUMER PROTECTION AND PRODUCT LIABILITY

This unit is divided into two main parts. The first part considers the statutory and common law actions which are available to protect consumers from misleading or deceptive conduct and unfair marketing practices. Emphasis is given to the role played by the Trade Practices Act in relation to conveyancing and land transactions, financial services and advertising. Unconscionable conduct is also considered. The second part of the unit is concerned with statutory and common law actions available when loss or damage is suffered as a result of defective products. Remedies and defences are considered throughout the course.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP, EXT

### ► LWN053 RESEARCH PROJECT 1B

See LWN025.

**Courses:** LW51, LW60

**Prerequisites:** LWN025 **Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 1, 2, 3

### ► LWN056 RESEARCH PROJECT 1C

See LWN025.

**Courses:** LW51, LW60

**Prerequisites:** LWN025, LWN053

**Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 1, 2, 3

### ► LWN057 RESEARCH PROJECT 1D

See LWN025.

**Courses:** LW51, LW60

**Prerequisites:** LWN025, LWN053, LWN056

**Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 1, 2, 3

### ► LWN058 RESEARCH PROJECT 2B

See LWN026.

**Courses:** LW51, LW60

**Prerequisites:** LWN026 **Credit points:** 24

**Campus offered:** GP, EXT **Semester:** 1, 2

### ► LWN060 ENVIRONMENTAL LEGAL SYSTEM

Analysis of the principles and concepts of environmental law in Queensland; understanding of the law in Queensland for the protection and conservation of the environment; examination of the way in which the law accommodates private interests and the public interest. Included are pollution control, environmental impact assessment, environmental management, conservation of the natural and cultural environments.

**Courses:** LW51, LW60

**Contact hours:** 26 over 5 days

**Credit points:** 12 **Campus offered:** GP

### ► LWN061 NATURAL RESOURCES LAW

The principles and concepts of natural resources law in Queensland dealing with the ownership and control of natural resources, providing access to these resources, controlling the operational side of the development of these resources, and recognising commercial structures for achieving these operational objectives; an assessment of a number of developed and evolving mechanisms for achieving these objectives such as policy objectives, management plans, incentives and inducements, market instruments and property rights. Examples include land, water and fisheries.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Incompatible with:** LWN014, LWN027

**Semester:** 2

### ► LWN062 FEDERAL ENVIRONMENTAL LAW

History of Commonwealth involvement in environmental management; the Inter-Governmental Agreement of 1992; relevant paragraphs of s. 51 of the Constitution; judicial interpretation of the paragraphs; impact of ss 90, 92 and 109 of the Constitution; federal legislation dealing with offshore development, marine environment protection, environmental impact assessment, national estate, wildlife conservation, Great Barrier

Reef, hazardous waste and industrial chemicals, world heritage, ozone protection, ecologically sustainable development, climate changes, and biological diversity.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP

### ► LWN063 COMPARATIVE ENVIRONMENTAL LAW

The principles of environmental regulation in other jurisdictions and the range of policy and legal instruments being utilised to achieve environmental objectives; jurisdictions include European countries such as the United Kingdom and Greece, the European Union, South Africa, India, New Zealand and the USA.

**Courses:** LW51, LW60

**Contact hours:** 26 over 5 days

**Credit points:** 12 **Campus offered:** GP

### ► LWN065 CONSTRUCTION AND ENGINEERING LAW

Standard contracts used in the Australian construction and engineering industries and the legal issues confronting users of these documents; the law of contract and legislation as it applies to the construction and engineering industries at an advanced level; issues of drafting in relation to the relevant standard forms.

**Courses:** LW50, LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP

### ► LWN083 ESTATE PLANNING

This unit considers estate planning from three perspectives: estate growth/wealth creation, estate protection from exigencies such as death, disablement and bankruptcy and estate distribution, either inter vivos or on death. Strategies employed and issues to be considered within each of these elements will be covered and the inter-relationship between each element will also be highlighted.

**Courses:** LW50, LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP

### ► LWN087 CONTEMPORARY ISSUES IN TORTS

Advanced level study of contemporary issues in torts enables a detailed consideration of selected matters at a time of change in this area of the law. The practical, theoretical and comparative analysis of the selected issues will extend understanding of this fundamental and significant part of general legal practice.

**Courses:** LW51, LW60

**Contact hours:** 26 **Credit points:** 12

**Campus offered:** GP

### ► LWN093 BORROWERS AND SECURED LENDERS - SELECT ISSUES

Considers topical issues in the area of secured lending both from the perspective of the borrower and the lender. Seminars will focus on issues arising from the execution of typical securities such as real property mortgages and guarantees, both personal and corporate, together with remedies of secured lenders and possible defences of borrowers. The focus of this unit is on current issues reflecting developments in statutory and case law in Australia impacting on borrower's rights and the practices and procedures of secured lenders.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► LWN094 ENERGY LAW

Natural resources law and its related subject environmental law have become significant areas of professional legal practice over the last decade or so. One of the particular areas of natural resources law for these purposes is energy law. Energy law is the law relating to the ownership, use, development and control of those natural resources which are used to produce energy for the benefit of the community. Areas covered in this unit include: the sources and history of energy law; the principles and concepts underlying energy law; the common law rules of ownership of sources of energy; statutory ownership of sources of energy; how the law regulates access to sources of energy; how the law controls the

development of sources of energy; how the law regulates and controls the production of energy; how the law controls the distribution of energy; how the law provides for the use of energy by the community; public sector structures for developing sources of energy; private sector structures for developing sources of energy; the relevant sources of energy include coal, liquid hydrocarbons, gaseous hydrocarbons, and water and for this purpose energy includes gas and electricity.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP

### ► LWN095 NATIVE TITLE LAW, POLICY AND PRACTICE

Examines the legal dimensions of native title from a range of perspectives. Native title is one of the most significant and topical areas of the law affecting the public and private sectors. This course covers theoretical and practical dimensions of the topic of native title, including: international dimensions, comparative perspectives, elements of native title and its federal and state regulation; implications for stakeholders in the public and private sectors; policy issues; and practical steps for advisers.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP

### ► LWN097 CORPORATE INSOLVENCY

Considers topics of commercial interest relevant to corporate insolvency. It concentrates on advanced areas pertinent to liquidation, receivers and other controllers, and voluntary administration in Australia. In particular, seminars will focus on issues likely to arise in practice, including problems associated with statutory demands, termination of deeds of arrangement, and insurer funding of litigation.

**Courses:** LW51, LW60

**Contact hours:** 26 hours over 4 days

**Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► LWN099 INTELLECTUAL PROPERTY LAW

A study of the concept of Intellectual Property and the principles and policies of intellectual property law. Topics covered include: copyright, designs, patents, innovation patents, trade marks, passing off, breach of confidence.

**Courses:** LW51, LW60

**Contact hours:** 26 over four days

**Credit points:** 12 **Campus offered:** GP

### ► LWN100 HONOURS DISSERTATION

A dissertation by students enrolled in the Master of Laws by Coursework who have completed 96 credit points. Limited to students with a GPA of 6 or higher. The dissertation is between 20000 and 30000 words in length.

**Courses:** LW51

**Credit points:** 48

**Campus offered:** GP, EXT **Semester:** 1, 2

### ► LWN111 PUBLIC LAW AND GOVERNMENT COMMERCIAL ACTIVITY

Examines the reach of public law remedies in the field of commercial activities in which government agencies are involved. Areas covered include corporatisation, out sourcing and privatisation.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 2

### ► LWN113 LAW OF GUARANTEES

Guarantees are an important area of practice for commercial lawyers as a substantial proportion of large commercial transactions involve the giving of guarantees. Guarantees are also significant for consumer finance. This unit will consider formation and validity, including comparison with other contracts; factors affecting validity, including disclosure, misrepresentation, mistake, unconscionable conduct, undue influence, s.51AB Trade Practices Act (Cth), s.70 Consumer Code; obligations of solicitor; liability, including principle of co-extensiveness and rules of construction; discharge of guarantee, including discharge by the determination of the principal transaction and discharge by reason of the

## UNIT SYNOPSES

creditor's conduct; termination, the enforcement of the guarantee; rights of the guarantor; guarantees in international trade.

**Courses:** LW51, LW60

**Contact hours:** 2 per week   **Credit points:** 12  
**Campus offered:** GP

### ► LWN117 LEGAL REGULATION OF THE INTERNET

This unit studies the law as it relates to the Internet; both existing legal principles being applied in the online environment and new law created due to the nature of the online environment, so called cyberlaw. A knowledge of cyberlaw is important in most areas of legal practice and particularly so in banking, intellectual property, litigation and media. This unit focuses on various Internet related topics and discusses and examines recent developments, in terms of case law, legislation and policy, in Australia and internationally. The broad areas covered in this unit include: an introduction to legal issues relating to the Internet and methods of regulation; creation and operation of websites; jurisdictional issues on the world wide web; liability of online service providers; content regulation; privacy; intellectual property issues (eg copyright and databases); domain names and methods of domain name dispute resolution; cybercrime and spamming; patenting electronic commerce; contracting on the Internet.

**Courses:** LW51, LW60

**Contact hours:** 2 per week   **Credit points:** 12  
**Campus offered:** GP                   **Semester:** 2

### ► LWN119 EMPLOYMENT LAW

Employment law is a foundation unit that allows students to survey at an advanced level the sources, components and relationships of employment law in Australia. Successful completion of this unit will provide students with the necessary background to continue on to undertake further advanced courses in more specialised areas of labour law, including public sector employment law and the law of trade unions.

**Courses:** LW50, LW51, LW60

**Contact hours:** 26                   **Credit points:** 12  
**Campus offered:** GP

### ► LWN120 SELECT ISSUES IN MEDIA LAW AND POLICY

This unit examines the concept of freedom of speech as exercised by the media and selected limitations on that freedom imposed by the common law and statute, limitations imposed upon media institutions represented by broadcasting law, and policy and legal issues affecting the functioning of the online media environment.

**Courses:** LW50, LW51, LW60

**Contact hours:** 2 per week   **Credit points:** 12  
**Campus offered:** GP

### ► LWN122 COMMERCIAL LEASES

The principles governing standard clauses of a modern Australian commercial lease in the light of recent case law and Queensland statutory provisions affecting such interests. Topics include: negotiation of leases, covenants for repair, user, assignment, quiet possession, options to renew and purchase, the phenomenon of default, remedies of lessor and lessee including those under the Trade Practices Act 1974, and retail shop leases in Queensland generally.

**Courses:** LW51, LW60

**Contact hours:** 2 per week   **Credit points:** 12  
**Campus offered:** GP                   **Semester:** 1

### ► LWN124 CONTEMPORARY FAMILY ISSUES

This unit will examine a number of complex issues which can and do confront families from time to time. The first part of the unit examines those legal principles concerned with the break down of de facto relationships and the distribution of property between partners. The laws on issues such as surrogacy arrangements, access to reproductive technology, abortion, adoption and enduring powers of attorney will be considered as well as the law relating to Australia's international obligations and the various ethical and social perspectives which impact on these issues. The criminal and quasi-criminal law also impact on aspects of family dynamics and, in this context, issues of domestic violence and stalking

will be examined. This unit facilitates a detailed consideration of these matters by practitioners wishing to expand their existing knowledge of the areas covered, as well as others wishing to consider the impact of these issues in and on society.

**Courses:** LW51, LW60                   **Contact hours:** 26  
**Credit points:** 12   **Incompatible with:** LWN003  
**Campus offered:** GP

### ► LWN125 ELECTRONIC COMMERCE LAW

This unit will consider the following topics: introduction to electronic commerce; contractual issues; electronic signatures; electronic monies; certification authorities; cyberbanking; payment mechanisms; taxation; and other legal issues in relation to legal requirements for information, including electronic information, time and place of dispatch and receipt of electronic communications and other issues.

**Courses:** LW50, LW51, LW60

**Contact hours:** Intensive  
**Credit points:** 12                   **Campus offered:** GP

### ► LWN127 ADVANCED INSURANCE LAW I

The unit will cover the nature and definition of insurance, utmost good faith, formation of contract, proposals, etc; scope of Insurance Contracts Act 1984 (Cth), non-disclosure and misrepresentation, brokers and agents; Insurance (Agents and Brokers) Act 1984 (Cth), or Financial Services Reform Act 2001 (Cth) if appropriate, third parties' rights and obligations; Section 54 Insurance Contracts Act.

**Courses:** LW51, LW60

**Contact hours:** 2 per week   **Credit points:** 12  
**Campus offered:** GP                   **Semester:** 1

### ► LWN129 CONTEMPORARY ISSUES IN SENTENCING LAW

This unit examines and critically evaluates the sources of current sentencing law in contemporary Australia, both at a theoretical and practical level. Specific issues which have arisen in this area are explored in detail, in order to build an integrated understanding of the discipline area as a whole. Topics include: sentencing rationales including the theories of punishment; the sentencing process including the roles that each party plays within the system (including victims); judicial discretion and sentencing, including recent trends to curb discretion; the role of public opinion and the media; and restorative justice.

**Courses:** LW51, LW60, JS51

**Contact hours:** 26                   **Credit points:** 12  
**Campus offered:** GP

### ► LWN131 QUEENSLAND STATE LANDS: LAW AND PRACTICE

As the unit examines a unique system of land tenures and dealings which is not studied in any great depth at undergraduate level, the focus of the unit will be on the current legislative scheme and current policies relating to non-freehold land in Queensland; contemporary issues within the context of the prevailing legislative and policy frameworks; and the development of generic skills including research skills and critical evaluation skills that may be applied in other areas of study.

**Courses:** LW50, LW60

**Contact hours:** 2 per week   **Credit points:** 12  
**Campus offered:** GP, EXT                   **Semester:** 1

### ► LWN134 REPRESENTATIVE ACTIONS

This course is designed to provide students with a complete examination on the law relating to Representative Actions in Australia. A significant focus of the unit are the legal requirements of commonality and similarity which are preconditions to the maintenance of such an action. However practical issues encountered in representative action litigation such as pleading, opt-out, costs and notification procedures and the conduct of a representative action are also examined. The unit also deals with the interface between the traditional rules as to compromise and security for costs and the special rules that apply to representative actions. Finally recent developments and law reform proposals concerning group litigation in Australia are considered.

**Courses:** LW50, LW51, LW60

**Contact hours:** 26                   **Credit points:** 12  
**Campus offered:** GP

### ► LWN135 LAW, JUSTICE AND NEW GENETIC TECHNOLOGIES

Our ability to test, screen and manipulate the human genome is made possible by recent technological breakthroughs in science. The science of genetics is not new, but its public profile has never been higher. Current initiatives in genetic knowledge have been described as an international voyage of scientific discovery. The scientific findings are prompting major rethinking of concepts of law and justice. The legal community faces a perpetual challenge in keeping pace of the revolution in genetics. This unit looks at some legal implications of this revolution and charts the major responses of our legal system to modern genetics and biotechnology. The rationale for this unit is that it is clear that lawyers of the next century will feel the impact of genetics across the broad sweep of their practice, in areas including criminal justice, human rights and intellectual property. Correspondingly, scientists of the next century will feel the impact of the law across their discoveries. All justice related professionals will benefit from advanced knowledge of the increasingly complex dimensions to the interaction between law and the modern genetics genie.

**Courses:** LW50, LW51, LW60

**Contact hours:** 2 per week   **Credit points:** 12  
**Campus offered:** GP

### ► LWN138 COMPARATIVE CULTURAL HERITAGE LAW

An examination of the concepts of culture and cultural heritage; the international law framework within which cultural heritage is managed and protected; an analysis of the ways in which a number of national jurisdictions approach the conservation of their cultural heritage. These include the USA., UK, the European Union, South Africa, China, New Japan, Malaysia, Zealand and Australia. The focus of the unit is upon cultural heritage values associated with land and land-related resources.

**Courses:** LW51, LW60

**Contact hours:** 2 per week   **Credit points:** 12  
**Campus offered:** GP

### ► LWN139 PRIVACY LAW

This unit covers an introduction to the concept of privacy, including both the historical development of privacy rights and the operation and implication of state and federal legislation and international obligations; detailed consideration of the Commonwealth private sector regime; consideration of the impact of privacy law on specific fields of practice such as health, employment, not-for-profit and banking/finance/insurance; issues relating to the internet; compliance and code development; international regimes.

**Courses:** LW51, LW60

**Contact hours:** Intensive  
**Credit points:** 12                   **Campus offered:** GP

### ► LWN141 WOMEN AND THE AUSTRALIAN LEGAL SYSTEM

The primary aim of this unit is to provide students with an alternative perspective on the legal system, particularly in relation to the experience of women in both the criminal and civil justice areas. In this unit you will acquire an understanding of how the legal process affects women and be able to critically analyse substantive laws having regard to their failure to embody women's experiences in both the civil and criminal justice systems.

**Courses:** JS51, LW51, LW60

**Contact hours:** 26 hours   **Credit points:** 12  
**Semester:** 1

### ► LWN142 EAST ASIAN LEGAL SYSTEMS

Because a country's legal system cannot be adequately understood by just discussing law in books, the aim of this unit is to introduce you to factors that shape a country's legal system such as its history, political systems, culture and language. It also examines key features of the constitutions of the countries and particular aspects

## UNIT SYNOPSES

of the legal system, which are unique or different from other countries.

**Courses:** LW51, LW60

**Contact hours:** 26 hours over 6 days

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► LWN143 INTERNATIONAL CRIMINAL JUSTICE

This subject covers one of the most significant and topical developments in international law and human rights today – the question of the international community's response to perpetrators who are responsible for gross violations of human rights. Accountability mechanisms, such as international and national criminal courts, Truth Commissions and extradition arrangements between nations have become more prominent in the last decade, and it is clearly the role of a Law Faculty to discuss and evaluate these developments. The unit will discuss and apply principles of international criminal law within a human rights and international legal framework, making it very useful for students interested or involved in careers relating to criminal law, human rights, international law and/or any related area.

**Courses:** LW51, LW60

**Contact hours:** 26 hours over 5 days

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► LWN144 CONTEMPORARY ISSUES IN CHILD LAW

This unit introduces you to selected contemporary legal issues affecting children in Australia. These issues present both legal and moral questions that have implications for legal practice and policy development. This unit gives you the opportunity to identify current legal positions about controversial issues in Australian law relating to children, and to apply advanced skills in legal research, analysis and writing to critically evaluate those positions.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP, EXT

**Semester:** 2

### ► LWN145 CORPORATE AND INVESTMENT REGULATION

Regulation is no longer solely a government issue any more, Enron, HIH and One Tel have taught us it is an issue that both the private and public sectors must embrace and learn quickly. Lawyers and corporate advisers must now think outside the square and keep abreast of an ever-changing legal and corporate environment. This unit will develop a forward thinking approach to corporate and investment regulation and promote practical and analytical appraisal of the issues arising in relation to the regulation of companies and investment.

**Courses:** LW51, LW60

**Campus offered:** GP

**Semester:** 1

### ► LWN146 INTERNATIONAL INTELLECTUAL PROPERTY LAW

The unit will provide you with an introduction to international intellectual property and policy issues and their connection with European Union (EU) efforts to create an internal market with a level playing field for the protection of intellectual property. The unit will also consider diverging perspectives on topics ranging from the protection of traditional knowledge and folklore to high technology.

**Courses:** LW51, LW60

**Contact hours:** 26 hours over 5 days

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► LWN147 PATENT LAW AND COMMERCIALISATION

This unit considers patent law in the context of information technology and biotechnology products. It will overview the fundamental elements of patent law and as well as introduce you to legal issues involved in the commercialisation of information technology and biotechnology.

**Courses:** LW51, LW60

**Contact hours:** 2 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► LWR003 THESIS

A dissertation undertaken by students enrolled in LW50 Doctor of Juridical Science. The dissertation should make a notable contribution to professional knowledge and practice which may be in the form of new knowledge or significant original adaptation, application and interpretation of existing knowledge and practice.

**Courses:** LW50

**Credit points:** 24

**Campus offered:** GP, KG

**Semester:** 1, 2

### ► LWS001 MEDICINE AND THE LAW

The impact of some important fields of law upon the medical profession and upon hospital staff, patients and visitors. Introduction to law and the legal system. The Federal and State systems; general principles of the law of tort; principles of negligence; liability of hospitals; issues of consent; legal aspects of medical practice; medico-legal investigations; abortion law; euthanasia and transplantation issues.

**Courses:** PU40

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG

**Semester:** 2

### ► LWS006 HEALTH, ETHICS AND THE LAW

The legal issues associated with the matter of public health and an appreciation of the legal and ethical implications of the work done by health care professionals in this area. Topics include: introduction to the Australian legal system; tort law and its impact on the public health system; workplace health and safety legislation; medical records and confidentiality; criminal law and the health care profession; transplantation of organs and tissues; complaints against hospitals and health care professionals.

**Courses:** HL88, NS64, PU65, PU69

**Contact hours:** 3 per week **Credit points:** 12

**Semester:** 1

### ► LWS400 LAW OF INFORMATION TECHNOLOGY

In this unit information technology students discover the legal rights and remedies associated with electronic commerce, software development and licensing. Topics include: contemporary issues (for eg. Napster, domain name litigation, piracy, cookies, CrimeNet); copyright; patents; trade marks; circuit layouts; software licensing and development agreements (shrinkwrap licenses); electronic commerce (legal frameworks, contract formation, standard terms and conditions, web-wrap agreements, jurisdictional issues, electronic banking and payment mechanisms, online gambling, consumer protection, and taxation issues); public and private security (confidentiality, digital signatures, and privacy); civil and criminal liability on the internet; and potential risk management strategies. You will also gain a basic understanding of the Australian legal system, contract law, licensing, tort law, and trade practices law as it relates to the development and implementation of information technology.

**Courses:** IT21, IT35, IT38, IT40, IT45,

**Contact hours:** 3 per week **Credit points:** 12

**Semester:** 2

### ► MAB100 MATHEMATICAL SCIENCES 1A

Functions: polynomial, trigonometric and exponential functions; properties and graphs. Differentiation and integration: Derivatives and integrals for common functions and rules for differentiation and integration of composite functions; integration techniques such as substitution, parts and partial fractions; modelling and solution of problems. Vectors and matrices: vectors interpreted as geometric relationships in space, matrices as representations of linear systems; aspects of vector algebra and unique, non-unique and non-existent solutions to systems of simultaneous equations. Complex numbers: Argand diagrams, complex arithmetic, solution of equations.

**Courses:** BS56, ED50, ED90, IF21, IF29, IF39, IF58, IF60, IF61, IF71, IF73, IF79, IF83, IF84, IF86, IT21, PS47, PS48, SC01, SC51

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1, 2

### ► MAB101 STATISTICAL DATA ANALYSIS 1

Collection and representation of data; explaining data with models; the normal (Gaussian) distribution; sampling distributions, properties of sample mean and sample variance; hypothesis testing re population mean, mean difference and variances, tests of independence; analysis of variance (ANOVA); aspects of design of experiments; modelling relationships between measurements using regression; extensions of regression; analysis of covariance; confidence intervals; estimating and tests of hypotheses about proportions and probabilities.

**Courses:** ED50, ED90, IF21, IF29, IF39, IF58, IF60, IF61, IF71, IF73, IF79, IF83, IF84, IF86, IF87, IT21, SC01, SC51

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** EFB101, MAB136,

MAB137, MAB138, MAB893

**Campus offered:** GP, CA **Semester:** 1, 2, 3

### ► MAB105 PREPARATORY MATHEMATICS

This unit is a substitute for Senior Mathematics B for those students who need the equivalent background for the successful study of units which assume it. Basic number facts, natural numbers, integers, rational numbers, real numbers and their operations; basic algebra; functions and equations, graphs, linear functions, equations and applications; systems of linear equations; quadratic, exponential, logarithmic and trigonometric functions, properties and applications; introduction to calculus: rates of change, derivatives, rules of differentiation, second derivatives, maxima and minima and applications; integration and applications.

**Courses:** SC01, any other appropriate course

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP, CA **Semester:** 1, 2, 3

### ► MAB107 INTRODUCTORY MATHEMATICS AND STATISTICS

Mathematics: introduction to the number system; algebraic operations. Properties of functions: representation by graphs; linear functions including simultaneous solution and applications; quadratic functions with applications; exponential and logarithmic functions with applications. Elementary trigonometric ratios with applications. Introduction to mathematics of finance. Statistics: exploration of data sets by graphical methods and descriptive statistics. Introduction to the concepts of statistical variation, samples, probability distributions and random variables. Discrete and continuous variables; types of distributions, particularly the Normal (Gaussian) distribution. Interval estimation (confidence intervals) and basic concepts underlying statistical tests of hypotheses; applying these concepts to the specific cases of tests for association, interval estimates and tests for Normal means, and introductory regression analysis.

**Courses:** CN54, any other appropriate course

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** MAB105, a prior unit in

statistics or data analysis

**Campus offered:** GP

**Semester:** 2

### ► MAB111 MATHEMATICAL SCIENCES 1B

Limits and continuity. Introduction to sequences and infinite series; divergence test; comparison test and ratio test. Product, quotient and chain rules for derivatives. Special techniques - parametric, implicit and logarithmic differentiation; inverses and their derivatives. Applications of differentiation to curve sketching. Rolles theorem, mean value theorem. Hyperbolic and trigonometric functions including inverses. L'Hopitals rule. Functions of more than one variable, partial derivatives, differentials and applications. Taylor series. Riemann sums. Fundamental theorems of integral calculus. Solids of revolution; applications.

**Courses:** BS56, ED50, ED90, IF21, IF39, IF58, IF60, IF61, IF71, IF73, IF79, IF83, IF84, IF86, SC01, SC51

**Contact hours:** 4 per week **Credit points:** 12

**Incompatible with:** MAB131, MAB180

**Campus offered:** GP

**Semester:** 1, 2

► **MAB112 MATHEMATICAL SCIENCES 1C**

Linear systems and matrices, vector algebra, coordinate systems; introduction to abstract algebraic systems; complex numbers; first and second order differential equations.

**Courses:** BS56, ED50, ED90, IF21, IF39, IF58, IF60, IF71, IF83, IF84, IF86, SC01, SC51  
**Corequisites:** MAB111  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **MAB131 ENGINEERING MATHEMATICS 1A**

Sine and cosine functions, logarithmic functions, exponential functions; revision of complex numbers; determinants; vector algebra in 2, 3 dimensions; derivatives and their applications; differentiation, chain rule, higher derivatives, integrals and their applications.

**Courses:** CE44, CE45, CE46, EE41, EE42, EE46, EE47, EE48, IF28, IF29, IF59, IF61, ME40, ME41, ME42, ME43, ME48, SC01  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB111, MAB180, MAB187  
**Campus offered:** GP **Semester:** 1, 2

► **MAB132 ENGINEERING MATHEMATICS 1B**

Vector calculus: differentiation of vectors, velocity and acceleration; relative velocity; vector algebra: equivalent systems of forces; functions of several variables: partial derivatives; hyperbolic functions; inverse functions: inverse trigonometric and hyperbolic functions; partial derivatives; numerical methods; differential equations; multiple integrals: areas and volumes. Laplace transforms. Fourier series.

**Courses:** CE44, CE45, CE46, EE41, EE42, EE46, EE47, EE48, IF28, IF29, IF59, IF61, ME36, ME40, ME41, ME42, ME43, ME48, SC01  
**Prerequisites:** MAB131 or MAB180  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB188  
**Campus offered:** GP **Semester:** 1, 2, 3

► **MAB133 ENGINEERING MATHEMATICS 2**

Polynomial approximations, divided differences and Newton's formula for polynomial approximation. Interpolation by cubic splines. Convergence of infinite power series. The use of Fourier series and harmonic analysis. Quadrature methods. Laplace transform methods for differential equations. Numerical solution of differential equations. Direct and indirect methods of solution of large scale systems of linear equations. Determination of eigenvalues and eigenvectors of large scale linear systems (power method, inverse iteration and acceleration of convergence techniques).

**Courses:** ME41, ME42, ME43, ME48  
**Prerequisites:** MAB132  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB487, MAB488  
**Campus offered:** GP **Semester:** 1

► **MAB134 ELECTRICAL ENGINEERING MATHEMATICS 3**

Mathematics: Laplace transform; Fourier series and transforms; vector operators grad, div and curl expressed in spherical polar and cartesian coordinates; line, surface and volume integrals of electric fields; divergence theorem and Stoke's theorem; field equations. Introduction to probability and distributional modelling: conditional probability; discrete and continuous random variables; Bernoulli, binomial and Poisson processes; introduction to queues and teletraffic; estimating probabilities. Electromagnetic theory: flux density, electromagnetic induction; magnetic circuits, force and field strength; magnetic hysteresis, magnetic fields around conductors; electric fields, Coulomb's Law; voltage, energy stored in an electric field.

**Courses:** EE41, EE42, EE47, EE48, IF28, IF29, IF59, IF61, ME40, SC01  
**Prerequisites:** MAB132  
**Corequisites:** PCB136 or first level Physics unit  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **MAB135 ELECTRICAL ENGINEERING MATHEMATICS 4**

Statistics and data analysis: presenting data, use of a statistical package; normal variation and relationships between variables; confidence intervals; hypothesis testing; regression; design of experiments; introduction to reliability. Mathematics: the simultaneous partial differential equations of Maxwell; solution in terms of Hertz vectors; the three dimensional wave equation; separation of variables leading to plane and spherical wave solution. Poynting's theorem and vector. Simple loci and regions in the complex plane. Functions of a complex variable. Analytic functions; Cauchy-Riemann equations; Laplace equation, conjugate harmonic functions. Complex mapping; impedance and admittance loci, basis for Smith Chart. Electrostatic problems treated by conformal mapping.

**Courses:** EE41, EE42, EE47, EE48, IF28, IF59, ME40  
**Prerequisites:** MAB134  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **MAB136 ENGINEERING STATISTICS**

Presentation of data; use of a statistical package; modelling data; relationships between variables; estimation; confidence intervals; tolerance limits; introduction to quality and SPC; hypothesis testing; fitting and investigating relationships; regression; design and analysis of experiments; reliability; further methods and applications of design and analysis of experiments.

**Courses:** ME41, ME42, ME48  
**Prerequisites:** MAB132  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB893  
**Campus offered:** GP **Semester:** 2

► **MAB137 SURVEYING MATHEMATICS 1**

Statistics: presentation of data; use of a statistical package; modelling data; relationships between variables; estimation; confidence intervals; hypothesis testing; fitting and investigating relationships; regression. Multivariate calculus: functions of several variables; definitions and uses, differentiation, multi-variable chain rule, application to error bounds. Plane Transformations: rotation, translation and scaling of the plane with application to cadastral surveying and mapping.

**Courses:** PS47, PS48  
**Prerequisites:** MAB100  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB893, MAB101  
**Campus offered:** GP **Semester:** 1

► **MAB138 ENGINEERING STATISTICS AND NUMERICAL METHODS**

Presentation of data; use of a statistical package; modelling data; relationships between variables; estimation; confidence intervals; hypothesis testing; fitting and investigating relationships; regression; design of experiments; introduction to reliability; introduction to quality and SPC. Numerical methods: function approximation; polynomial interpolation, cubic splines, power series. Numerical solution of ordinary differential equations. Linear systems.

**Courses:** CE44, CE45, CE46  
**Prerequisites:** MAB132  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB487, MAB893, MAB101  
**Campus offered:** GP **Semester:** 1

► **MAB139 COMPUTER ENGINEERING MATHEMATICS 3**

Revision and review of matrix algebra, solution of linear equations, numerical analysis; eigen-decomposition of matrices; Simpson's rule; Newton-Raphson method; singular value decomposition; minimisation of quadratic and Hermitian functions. Simple loci and regions in the complex plane. Functions of a complex variable. Limit, continuity, derivative; analytic functions; complex mappings; Cauchy-Riemann equations; impedance and admittance loci, basis for Smith Chart; non-linear transformations; conformal mappings. Laplace transform; Fourier series and transforms; Heaviside step function and applica-

tions. Delay theorems; periodic functions; convolution theorems; Dirac delta function. Introduction to probability and distributional modelling: conditional probability; discrete and continuous random variables; Bernoulli, binomial and Poisson processes; introduction to queues and teletraffic; estimating probabilities.

**Courses:** EE46 **Prerequisites:** MAB132  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB134, MAB485  
**Campus offered:** GP **Semester:** 1

► **MAB140 QUANTITATIVE METHODS FOR OPTOMETRY AND HEALTH SCIENCE**

Linear, quadratic, power law and exponential processes; techniques of differentiation, integration and applications to health science modelling; matrices. Data situations and types of variables; summary statistics and data features; introduction to a statistical package. Modelling data: random variables and distributions; some special distributions; sampling and sample statistics. Estimation; confidence intervals. Hypothesis testing; tests for means and proportions; p-values; tests for variances; test of independence in contingency table; goodness-of-fit tests. Fitting and investigating relationships: regression; residual analysis and diagnostics; multiple regression and curve-fitting. Design of experiments. Introduction to non-parametric procedures.

**Courses:** OP42  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB141, MAB251, MAB252, MAB258  
**Campus offered:** GP **Semester:** 1

► **MAB141 MATHEMATICS AND STATISTICS FOR MEDICAL SCIENCE**

Mathematics: types of functions; differentiation and integration; determination of an interpolant for discrete experimental data; Lagrange polynomial interpolation formula and cubic spline interpolation; applications; least squares applied to linear and non-linear functions; use of quadratic formula and iterative methods; numerical interpolation. Statistics: data collection and presentation; probability; binomial and Poisson distributions; hypothesis testing; confidence intervals; design of experiments; regression; control charts.

**Courses:** LS37  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB140  
**Campus offered:** GP **Semester:** 1

► **MAB177 MATHEMATICS FOR DATA COMMUNICATIONS**

Provides the basic mathematical background required for the study of data communication; network structures, cryptography and network performance.

**Courses:** IT21, IT38, IT45  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **MAB180 ENGINEERING MATHEMATICS 1**

Sine and cosine functions, logarithmic functions, exponential functions; complex numbers; determinants; vector algebra in 2, 3 dimensions; derivatives and their applications: differentiation, chain rule, higher derivatives; integrals and their applications.

**Courses:** CE44, CE45, CE46, EE41, EE42, EE46, EE47, EE48, IF28, IF29, IF59, IF61, ME40, ME41, ME42, ME43, ME48, SC01  
**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB111, MAB131, MAB187  
**Campus offered:** GP **Semester:** 1, 2

► **MAB210 STATISTICAL MODELLING 1**

Probability; independence, system reliability; using conditional probability in modelling; introductory Markov chains; random variables; special distributional models; Bernoulli process; Poisson process; exponential; introductory queuing processes; simulating processes; expected values and moments; distribution function; Q-Q plots; goodness-of-fit tests; measures of dependence; introductory bivariate and correlation properties; conditioning arguments; non-

parametric tests; assumptions and results in linear regression model.

**Courses:** BS56, ED50, ED90, IF21, IF39, IF58, IF60, IF71, IF83, IF84, IF86, IT21, SC01, SC51  
**Corequisites:** MAB111  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **MAB220 COMPUTATIONAL MATHEMATICS 1**

Sources of error; computer arithmetic; MAPLE programming; solution of nonlinear equations in one variable; solution of systems of linear equations; interpolation; finite differences; numerical differentiation and integration; solution of first order linear differential equations.

**Courses:** ED50, ED90, IF21, IF39, IF58, IF60, IF71, IF83, IF84, IF86, SC01, SC51  
**Corequisites:** MAB111 or MAB131 or MAB180

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **MAB311 ADVANCED CALCULUS**

Polar coordinates, parametric equations, conic sections, quadric surfaces, vector-valued functions. Fourier series. Functions of several variables: graphs, partial derivatives, total derivatives, extrema, Lagrange multipliers; Taylor series for multivariable functions; double and triple integrals, Green's theorems, line and surface integrals, divergence theorem, Stoke's theorem, applications.

**Courses:** ED50, ED90, IF21, IF39, IF50, IF58, IF60, IF71, IF83, IF84, IF86, SC01, SC51  
**Prerequisites:** (MAB111, MAB112) or (MAB131 or MAB180, MAB132)

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **MAB312 LINEAR ALGEBRA**

Matrix algebra, linear systems and an introduction to Maple; vector spaces; inner product spaces; eigenvalues and eigenvectors.

**Courses:** ED50, ED90, IF21, IF39, IF58, IF60, IF71, IF83, IF84, IF86, SC01, SC51  
**Prerequisites:** (MAB111, MAB112) or (MAB131 or MAB180, MAB132)

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **MAB313 MATHEMATICS OF FINANCE**

Interest rates; solution of problems in compound interest; applications of annuities; valuation of securities; quantitative techniques in business and finance.

**Courses:** ED50, ED90, IF39, IF50, IF58, IF60, IF71, IF83, IF84, IF86, SC01, SC51  
**Corequisites:** MAB111

**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB173  
**Campus offered:** GP **Semester:** 1

► **MAB314 STATISTICAL MODELLING 2**

Methods and models of stochastic and statistical processes with applications in engineering, information technology, finance, physical and life sciences; Markov chains; random walks; branching processes; queueing and other birth and death processes; teletraffic; long-term process behaviour; stochastic vs deterministic; process simulation; use of generating functions; bivariate and conditional distributions; transformations; beta, gamma distributions; probability transform and applications in simulations; order statistics, minimum, maximum, range.

**Courses:** ED50, ED90, EE44, EE45, EE48, IF21, IF28, IF39, IF50, IF58, IF59, IF60, IF71, IF83, IF84, IF86, IT21, ME40, SC01, SC51  
**Prerequisites:** (MAB101, MAB210, MAB111, MAB112) or (MAB134, MAB135)

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **MAB315 OPERATIONS RESEARCH 2**

General nature of operations research; formulating, solving and analysing linear programming models; transportation, transshipment and assignment models; shortest-route problems; project scheduling techniques (CPM and PERT); replacement and maintenance.

**Courses:** ED50, IF39, IF50, IF58, IF60, IF71, IF83, IF84, IF86, IT21, SC01, SC51  
**Prerequisites:** MAB112, MAB210

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **MAB380 INTRODUCTION TO SUPERCOMPUTING**

Materials covered in this unit include; background, concepts and trends in supercomputing; Amdahl's law, speed-up and efficiency; an introduction to high level scientific development environments through the exploration of multi-disciplinary case studies from science; introduction to MATLAB in a high performance scientific computing environment; solving computationally intensive case studies using supercomputing tools and techniques.

**Courses:** IF21, IF58, IT21, SC01, SC51  
**Prerequisites:** (ITB111 or ITB410), MAB111, ITB348 or ITN410 or ITB421

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **MAB413 DIFFERENTIAL EQUATIONS**

Introduction to mathematical modelling; linear differential equations; Euler-Cauchy equation; series methods; Laplace transform; transforms of derivatives and integrals; systems of differential equations; basic theory on linear systems; solution of linear systems with constant coefficients; matrix methods; special methods.

**Courses:** IF21, IF39, IF50, IF58, IF60, IF71, IF83, IF84, IF86, SC01, SC51  
**Prerequisites:** (MAB111, MAB112) or (MAB131 or MAB180, MAB132)

**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB133  
**Campus offered:** GP **Semester:** 2

► **MAB414 APPLIED STATISTICS 2**

Parametric estimation, such as maximum likelihood; estimating relationships via linear regression and linear models; analysis of the method of least squares; basic inference and model choice; introduction to time-dependent data and models; forecasting models and application; introduction to sampling methods in a practical context; models for categorical data; introduction to the design experiments; ANOVA.

**Courses:** ED50, EE44, EE45, EE48, IF21, IF28, IF39, IF50, IF58, IF59, IF60, IF71, IF83, IF84, IF86, ME40, SC01, SC51

**Prerequisites:** (MAB101, MAB111, MAB210 and recommended MAB112) or MAB893 or MAB135 or MAB136 or MAB137 or MAB138  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **MAB420 COMPUTATIONAL MATHEMATICS 2**

Direct methods for solving systems of linear equations; solution methods for special matrix systems; vector and matrix norms; iterative solution methods for large sparse matrix systems; approximating the eigenvalues and eigenvectors of a matrix.

**Courses:** IF21, IF39, IF50, IF58, IF60, IF71, IF83, IF84, IF86, SC01, SC51  
**Prerequisites:** MAB220, MAB312

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **MAB422 MATHEMATICAL MODELLING**

Models developed with the 'real world' description. These models are taken from the areas of cancer research, population growth and engineering. Emphasis is on mathematical modelling and not on the development of new mathematical content.

**Courses:** ED50, IF21, IF39, IF50, IF58, IF60, IF71, IF83, IF84, IF86, SC01, SC51  
**Prerequisites:** (MAB111, MAB112) or (MAB131 or MAB180, MAB132)

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **MAB481 VISUALISATION AND DATA ANALYSIS**

This unit covers; history and evolution of data visualisation, definition of data visualisation, impact of data visualisation; fundamentals of computer graphics and modern day visualisation environments; visualisation of 2D and 3D data; general visualisation techniques including filtering, colour map transformations, contouring,

height fields, coloured height fields, interpolation, Delauney triangulation, iso-surfaces, volume visualisation, probing, slicing, streamlines, streaklines and texture mapping; visualisation of multi-dimensional data, and other data types such as finite element, vector, molecular and scatter data.

**Courses:** IF58, IT21, SC01, SC51  
**Prerequisites:** MAB101, MAB380  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **MAB521 APPLIED MATHEMATICS 3**

Special functions: gamma, delta, Bessel and error functions, Fourier series, Legendre polynomials. Vector analysis and applications: vector algebra, vector calculus, fields, grad, div, curl, line and surface integrals, divergence theorem, Stoke's theorem, applications. Functions of a complex variable: analytic functions, contour integrals, Laurent series, residues.

**Courses:** IF21, IF39, IF44, IF50, IF58, IF60, IF71, SC01, SC51  
**Prerequisites:** MAB311

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **MAB522 COMPUTATIONAL MATHEMATICS 3**

Topics from: Approximation of data and functions; advanced integration and interpolation methods: Gaussian quadrature, multiple integrals; numerical determination of eigenvalues and eigenvectors: power method, similarity transformations, QR algorithm; solution of systems of non-linear equations: Newton's method, Broyden method, steepest descent; optimisation: line searches, introduction to multivariable optimisation; advanced solution methods for systems of ordinary differential equations and boundary value problems: Runge-Kutta, predictor-corrector, shooting and finite difference methods.

**Courses:** IF21, IF39, IF44, IF50, IF58, IF60, IF71, SC01, SC51, SC60

**Prerequisites:** MAB420, MAB311  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **MAB523 INTRODUCTION TO QUALITY MANAGEMENT**

Introduction to quality management principles and the quality improvement journey concept. Topics include quality assurance and the AS9000 series, TQM, quality costs, statistical process control, flow charts, cause and effect diagram, team decision techniques.

**Courses:** ED50, IF21, IF39, IF44, IF50, IF58, IF60, IF71, SC01, SC51

**Prerequisites:** MAB101, MAB210  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **MAB524 STATISTICAL INFERENCE**

Statistical estimation; linear models: ordinary least squares, generalised least squares, heteroscedasticity, autocorrelation; asymptotic theory: convergence in probability and distribution, weak law of large numbers, central limit theorems; maximum likelihood estimation; generalised linear models; quasi-likelihood estimation. Other topics which may be included are: multicollinearity; model selection; Bayesian estimation and Markov Chain Monte Carlo methods; nonlinear models. The computer package S-Plus is used.

**Courses:** IF21, IF39, IF44, IF50, IF58, IF60, IF71, SC01, SC51, SC60

**Prerequisites:** MAB314, MAB414  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

► **MAB525 OPERATIONS RESEARCH 3A**

Inventory theory: algorithms for linear programming; integer and mixed integer programming; travelling salesperson; vehicle routing problems; deterministic and stochastic dynamic programming.

**Courses:** IF39, IF50, IF58, IF60, IF71, IF83, IF84, IF86, SC01, SC51

**Prerequisites:** MAB315  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

## UNIT SYNOPSES

### ► MAB526 STATISTICAL SCIENCE 3

Fundamentals of time series analysis; time series models; nonstationary processes; seasonal ARIMA models; vector autoregression; long-range dependence and fractional ARIMA models; co-integration of non-stationary processes.

**Courses:** IF21, IF39, IF44, IF49, IF50, IF58, IF60, SC01, SC51, SC60

**Prerequisites:** MAB314, MAB414

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► MAB580 SCIENTIFIC COMPUTATION

Supercomputing development tools such as compiler options for parallel processing, available resources; profiling scientific algorithms to determine areas where speed-up can be obtained; optimisation of scientific models and algorithms for parallel computer architectures; a major case study from science that has elements in design, application and solution strategy in a supercomputing environment.

**Courses:** IF58, IT21, SC01, SC51

**Prerequisites:** MAB380, MAB481, and strongly recommended ITB412 or ITB113

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► MAB613 PARTIAL DIFFERENTIAL EQUATIONS

Derivation of certain partial differential equations; solution of partial differential equations by separation of variables, Laplace and Fourier transforms; Sturm-Liouville systems; special functions; Green's functions.

**Courses:** IF21, IF39, IF44, IF50, IF58, IF60, SC01, SC51, SC60

**Prerequisites:** MAB311, MAB413

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► MAB621 DISCRETE MATHEMATICS

Groups, rings and fields: additive groups, multiplicative groups; polynomial rings and finite fields. Modular arithmetic: property and rules, congruencies; countability and uncountability. Proof by mathematical induction, proof by contradiction. Isomorphisms and homomorphisms between groups and rings. Sets and relations: one-to-one and onto functions, logic, set operations, Boolean algebras. Number theory issues: gcd, lcm and theorems involving these; fundamental theorem of arithmetic; arithmetic functions, primitive roots; Fermat's theorems, Euler's theorem; Pythagorean triples and extensions.

**Courses:** ED50, IF21, IF39, IF44, IF50, IF58, IF60, IF71, IT21, SC01, SC51

**Prerequisites:** MAB112

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► MAB623 FINANCIAL MATHEMATICS

Quantitative techniques in business, economics and finance; theory and structure of interest rates - general accumulation and discounting functions, force of interest, discounting, varying interest, general annuities, varying annuities, continuous varying annuities; mathematical analysis of financial transactions in money and capital markets - yield rates, horizon analysis, duration, convexity, effects of taxation; life annuities and life assurances - the life table, basic life table functions, life annuities and assurances, policy values, paid up policy values, changes to policies; use of life table to study stationary and stable populations, population projections; multiple decrement tables; superannuation.

**Courses:** IF39, IF50, IF58, IF60, IF71, SC01, SC51

**Prerequisites:** MAB313

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► MAB624 APPLIED STATISTICS 3

Design of experiments for factorial investigations: two and three-level factors, Taguchi's approach, fractions and blocking, response surfaces. General linear model. Regression graphics. Multi-stratum designs and analysis. Repeated measures designs and analysis. Linear-logistic and log-linear models. Use of statistical software.

**Courses:** IF21, IF39, IF44, IF50, IF58, IF60, SC01, SC51

**Prerequisites:** MAB414

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► MAB625 OPERATIONS RESEARCH 3B

Phases of an operations research study: decision analysis; queuing theory; simulation; implementation in operations research; non-linear programming; heuristic techniques.

**Courses:** IF39, IF50, IF58, IF60, SC01, SC51

**Prerequisites:** MAB525

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► MAB640 INDUSTRY PROJECT

The student usually works in industry for a short period full-time, followed by part-time. The student is assisted to develop a suitable plan to manage the project using a Gantt chart or other flow or layout techniques. Students are expected to record progress and subsequently develop an accurate report and seminar presentation.

**Courses:** IF58, IF60, SC01, SC51

**Prerequisites:** MAB523

**Corequisites:** At least 36 credit points from 3rd level mathematical sciences units

**Credit points:** 24 **Incompatible with:** MAB960  
**Campus offered:** GP **Semester:** 2

### ► MAB672 ADVANCED MATHEMATICAL MODELLING

Models will be developed beginning with the description of 'real-world' problems. Emphasis will be on the mathematical modelling and not on the development of new mathematical techniques. Mathematical Modelling: model formulation, dimensional analysis and re-scaling. Curves of pursuit, bungee jumping. Modelling with systems of ordinary differential equations: Phase plane methods for analysing systems of ODEs. Bacterial growth in a chemostat. Predator-Prey models with harvesting. Limit cycles, oscillations and excitable media. Modelling with partial differential equations: Motion of a continuum. Continuity. Traffic flow. Aggregation of slime mould amoebae. Momentum. Ideal gas dynamics. Quasi-linear PDEs.

**Courses:** IF21, IF39, IF44, IF50, IF58, IF60, IF71, IF86, SC01, SC51, SC60

**Prerequisites:** MAB413, MAB422

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► MAB681 ADVANCED VISUALISATION AND DATA ANALYSIS

Advanced visualisation, virtual reality and data analysis, contemporary issues in data visualisation, introduction to advanced tools; completion of a project in advanced visualisation which demonstrates analysis, background research, investigation, development of project proposal, and presentation of the project outcomes.

**Courses:** IF58, IT21, SC01, SC51

**Prerequisites:** MAB481

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► MAB730 SURVEYING MATHEMATICS 2

Systems of linear equations, Gaussian elimination, matrix inversion, properties of inverses, partial pivoting, error propagation. Determinants, properties of determinants, rank. Compact (direct) and iterative (indirect) methods for solving linear systems. Eigenvalues of 2x2, 3x3 matrices, diagonalisation, quadratic forms, conic sections. Lagrange interpolation, divided differences, least squares methods, two-dimensional interpolation methods. Fixed-point iteration, Newton's method and Quasi-Newton methods.

**Courses:** PS47, PS48

**Prerequisites:** MAB137

**Contact hours:** 4 per week **Credit points:** 12  
**Incompatible with:** MAB496, MAB795  
**Campus offered:** GP **Semester:** 2

### ► MAB787/3 PROJECT

Project and thesis component of Honours course (SC60).

**Courses:** SC60

**Prerequisites:** Approval of Head of School

**Credit points:** 36  
**Campus offered:** GP **Semester:** 1

### ► MAN200 MATHEMATICAL FOUNDATIONS

This unit is intended to cater for students who may not have studied mathematics for some years and who are enrolled in postgraduate coursework in mathematical science. The unit is tailored to suit individual needs. Content is organised into modules and may also include material delivered in a workshop for industry participants.

**Courses:** MA65, MA75, MA85

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2, 3

### ► MAN201 MATHEMATICS

This unit caters for students who need more than one mathematics unit to provide the necessary background for studying more advanced units in postgraduate coursework in mathematical science. Students may use material from one first level undergraduate material with extension material or combine content from more than one first level unit.

**Courses:** MA65, MA75, MA85

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2, 3

### ► MAN700 PROJECT

This project is based on a problem from the student's workplace or interests.

**Courses:** MA65, MA75, MA85

**Prerequisites:** Permission from Course

Coordinator

**Credit points:** 24

**Campus offered:** GP **Semester:** 1, 2

### ► MAN717 MINOR PROJECT

This project may be related to that undertaken in MAN700 or in MAN787 or in a separate area. It must be self-contained and is assessed separately.

**Courses:** MA65, MA75, MA85, SC60

**Prerequisites:** Approval of Head of School

**Credit points:** 12

**Incompatible with:** MAB717

**Campus offered:** GP **Semester:** 1, 2

### ► MAN761 ANALYSIS

Convergence in  $\mathbb{R}$ ; uniform convergence; Lebesgue integral; convergence theorems;  $L_p$ -spaces; metric spaces; completeness and compactness; contraction mappings; normed and Banach spaces; dual spaces; linear operators; Hilbert spaces; Hilbert-adjoint operator; linear operator equations; spectrum of a linear operator.

**Courses:** MA65, MA75, MA85, SC60, SC71, SC80, IF49

**Prerequisites:** MAB311

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MAB761

**Campus offered:** GP **Semester:** 2

### ► MAN762 FIELD THEORY

Electrostatics; steady current theory; magnetism; Maxwell's equations; Hertz vectors; energy of the electromagnetic field; plane waves; spherical waves; treatment of special problems.

**Courses:** IF49, MA65, MA75, MA85, SC60, SC71, SC80

**Prerequisites:** MAB413, MAB521

(Recommended: MAB613)

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MAB762

**Campus offered:** GP **Semester:** 1

### ► MAN764 APPLIED MATHEMATICAL MODELLING

This unit will enable students to develop and practice mathematical modelling skills by considering topical problems from current research activities and beyond the discipline of mathematics. Some of the problems considered will include the dispersion of a pollutant in a river, waves of pursuit and evasion, Turing mechanisms and the generation of spatial patterns in biological or biochemical systems. A notable emphasis of this unit will be the collaborative development of mathematical models for novel problems.

**Prerequisites:** MAB613, MAB672

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MAB746

**Campus offered:** GP **Semester:** 2

## UNIT SYNOPSES

### ► MAN765 BAYESIAN DATA ANALYSIS

Basics of Bayesian statistical inference; frequentist and Bayesian inference for basic statistical models; multiparameter models and hierarchical Bayesian models; resampling and simulation; Markov chain Monte Carlo and related simulation methods; directed acyclic graphical models as probability models; use of BUGS software; model and simulation diagnostics; generalised linear models and mixed models; missing data models; spatial data models.

**Courses:** IF49, MA65, MA75, MA85, SC60, SC71, SC80

**Prerequisites:** MAB524

(Recommended: MAB624)

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MAB765

**Campus offered:** GP

**Semester:** 1

### ► MAN766 APPLIED TIME SERIES ANALYSIS

Spectral analysis of ARMA models; frequency estimation; fast algorithm for spectral analysis and frequency estimation; applications to speech and audio samples; non-linear spectral methods; non-linear time series models; chaos; tests for non-linearity; forecasting methods for non-linear models; non-parametric models; applications to business and financial time series.

**Courses:** MA65, MA75, MA85, SC60, SC71, SC80, IF49

**Prerequisites:** MAB526

(Recommended: MAB524)

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MAB766

**Campus offered:** GP

**Semester:** 2

### ► MAN768 ADVANCED TECHNIQUES IN OPERATIONS RESEARCH

Nature of operations research; inventory systems modelling, including lot-size problems, recent developments in inventory theory, material requirement planning, just-in-time production; production planning and scheduling, including static and dynamic methods, aggregate planning, LP/LDR/SDR techniques, heuristics; operations scheduling, including sequencing and balancing techniques, job shop scheduling, assembly line balancing; networks, including project management, network scheduling, resources allocation, NP-completeness.

**Courses:** MA65, MA75, MA85, SC60, SC71, SC80, IF49

**Prerequisites:** MAB625

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MAB768

**Campus offered:** GP

**Semester:** 1

### ► MAN769 MATHEMATICS OF FINANCE

Stock market theory; basic option theory; Black-Scholes analysis; Brownian motion and martingales; Markov processes; Ito stochastic integrals and stochastic calculus; Black-Scholes market model; option valuation formula; numerical solution of market models.

**Courses:** MA65, MA75, MA85, SC60, SC71, SC80, IF49

**Prerequisites:** MAB413

(Recommended: MAB623)

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MAB769

**Campus offered:** GP

**Semester:** 1

### ► MAN771 COMPUTATIONAL MATHEMATICS 4

A discussion of the conservation equations that describe fluid motion. Explicit and Implicit Finite Difference Solution Methods for the one-dimensional Generalised Diffusion Equation, Introduction to the Finite Volume Method with application to the one-dimensional Diffusion Equation, Treating advection/convection - Monotonicity arguments, stability, TVD schemes, upstream averaging, and a brief discussion of flux limiting. Extensions of the Finite Volume Method to higher dimensions on both structured and unstructured grids.

**Courses:** MA65, MA75, MA85, SC60, SC71, SC80, IF49

**Prerequisites:** MAB522, MAB613

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MAB771

**Campus offered:** GP

**Semester:** 2

### ► MAN774 PERTURBATION METHODS

Regular and singular perturbation expansions; asymptotic expansions, strained coordinates; boundary layer analysis and matched asymptotic expansions; selected examples from industrial applications and mathematics applied in medicine and biology.

**Courses:** IF49, MA65, MA75, MA85, SC60, SC71, SC80

**Prerequisites:** MAB413, MAB521

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MAB762

**Campus offered:** GP

**Semester:** 1

### ► MAN775 STATISTICAL INFERENCE WITH FINANCIAL APPLICATIONS

Statistical inference in actuarial contexts, including short term risk models, collective risk models over an extended period, stopping times and ruin, adjustment coefficients and reinsurance, projections over time. Modelling through quantiles, distributions from transformation families, applications in simulation studies, modelling and analysis.

**Courses:** IF49, MA65, MA75, MA85, SC60, SC71, SC80

**Prerequisites:** MAB524

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MAB765

**Campus offered:** GP

**Semester:** 1

### ► MAN778 APPLICATIONS OF DISCRETE MATHEMATICS

Graph Theory: Introduction; graph isomorphisms, Euler trails and circuits; planar graphs; Hamiltonian paths and cycles; graph colouring with applications to electrical networks, coding theory, operations research, computer programming and chemistry. Abstract Algebra: Advanced concepts of groups, rings and fields will be introduced. Applications will include the solvability by radicals of polynomial equations, ruler and compass constructions eg squaring the circle, elliptic curve cryptosystems.

**Courses:** IF49, MA65, MA75, MA85, SC60, SC71, SC80

**Prerequisites:** MAB621

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► MAN787 PROJECT

This project is research-based and involves writing a thesis and giving an oral presentation.

**Courses:** MA75, MA85, SC60

**Prerequisites:** Approval of Head of School

**Credit points:** 12 **Incompatible with:** MAB787

**Campus offered:** GP

**Semester:** 1, 2, 3

### ► MDB001 INTEGRATED FOUNDATIONS STUDIES 2: SCIENTIFIC AND QUANTITATIVE LITERACY

It is recognised that Mathematics and Science play crucial roles in the functioning of modern society through their contribution to our understanding of our physical, social and personal worlds, and their usefulness in solving problems a wide range of problems. As students engage with the content of the unit, for example, number, time, astronomy, navigation, measurement, geometry, probability, they will recognise that each is a discipline with a language and methods of thinking that have evolved in historical and social contexts. Knowledge of both areas is important for people to be critically reflective thinkers and active participants in society, and for their life long learning.

**Courses:** ED91

**Campus offered:** KG

**Credit points:** 12

**Semester:** 1

### ► MDB002 PRIMARY CURRICULUM AND PEDAGOGIES: MATHEMATICS 1

Mathematics is an essential key learning area of the primary school curriculum. It is considered to be one of the building blocks for education for work and life. Mathematics is closely linked to numeracy, but it extends beyond the day-to-day demands of society. Mathematics underpins and assists in the growth of technology, economics and finance, communication, and the new science of biotechnology. Its theories are based on the analysis of the structure of mathematics, the psychology of learning, and the social context in which the discipline is taught. The interplay between these three ever-changing forces is the

setting for mathematics education and the curriculum that is developed for primary schools. This unit focuses on the teaching of numbers, operations, and measurement and will consider the role of technology in these three strands.

**Courses:** ED91

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► MDB300 TEACHING IN THE INFORMATION AGE

The impact of information technology on education; the concept of an information society; the way in which what is defined as knowledge is contested and changed by information technology; strategies for learning and teaching using information technology. Practical skills using computer hardware and software communication technology and multimedia are developed with a view to appropriate implementation within the curriculum.

**Courses:** ED43, ED50, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MDB383, MDB385

### ► MDB320 DATABASE THEORY AND TECHNIQUES

The logical and physical models of information systems; characteristics; use of structured query language to query existing curriculum databases and construct new ones; the sociological implications of the utilisation of public and private databases.

**Courses:** ED50

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB321 INFORMATION SYSTEM MODELLING IN EDUCATIONAL CONTEXTS

Examines the modelling of information systems; relational systems; fact oriented approaches; conceptual schema design.

**Courses:** ED50

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB322 COMPUTER SYSTEMS FOR TEACHERS

Examination of single and multi-user operating systems; interaction with computer systems and management of stored information; definition and implementation of algorithms in suitable language; selection of computable representation for real world concepts and application in computer programs; hierarchy of levels of abstraction; adoption of abstracted views of real world information processing or problem-solving situations; capabilities and limitations of conventional, sequential processing machine architectures.

**Courses:** ED50

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB323 PROGRAMMING LANGUAGES FOR TEACHERS

Examines further software developments; techniques of program development; top-down design and modularity; computer programming using appropriate languages.

**Courses:** ED50

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB325 BIOLOGY CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF71, IF73

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB326 BIOLOGY CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF71, IF73

## UNIT SYNOPSES

**Prerequisites:** MDB325

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB327 CHEMISTRY CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF71

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB328 CHEMISTRY CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF71

**Prerequisites:** MDB327

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB329 COMPUTING CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF79

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB330 COMPUTING CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF79

**Prerequisites:** MDB329

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB331 EARTH SCIENCE CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF71

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB332 EARTH SCIENCE CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF71

**Prerequisites:** MDB331

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB333 MATHEMATICS CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED26, ED19, ED50, ED54, ED55, IF71, IF73, IF79

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB334 MATHEMATICS CURRICULUM STUDIES 2: SENIOR MATHEMATICS

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED26, ED50, ED54, ED55, IF71, IF73, IF79

**Prerequisites:** MDB333

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB335 PHYSICS CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF71

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB336 PHYSICS CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF71

**Prerequisites:** MDB335

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB337 SCIENCE CURRICULUM STUDIES 1

The nature of the curriculum area/discipline and its role and contribution as a medium for education; introduction to relevant syllabuses and curriculum documents; lesson and curriculum unit planning activities; and teaching strategies designed to promote a range of learning experiences in selected curriculum areas.

**Courses:** ED19, ED50, ED54, ED55, IF71, IF79

**Prerequisites:** Normally the completion of 48 credit points in each relevant discipline area

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB338 SCIENCE CURRICULUM STUDIES 2

Curriculum development within the context of contemporary policies, frameworks and agencies; general principles of measurement, assessment and evaluation; teaching and learning strategies; and issues and directions in curriculum development.

**Courses:** ED19, ED50, ED54, ED55, IF71, IF79

**Prerequisites:** MDB337

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB345 SOFTWARE DEVELOPMENT FOR EDUCATIONAL CONTEXTS

Algorithmic thinking and its implementation form a major component within the Information Processing and Technology syllabus now implemented in secondary schools. Prospective teachers of courses such as these require a sound foundation in the design and development of software along with the use of modern abstract procedural, data and object handling representations. Software design and development are closely bound to particular problems contexts. This unit is based on the design of educational software because this area is relevant to the students concerned and because there is a clear demand for such software. Students in this unit will employ a range of powerful programming techniques and structures in the development of educational computer software.

**Courses:** ED50

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB347 EXCURSIONS IN NUMBER

The study of numbers is filled with intrigue and challenge. This unit explores numbers; large and small, happy and sad, prime and not so prime, weird and wild, and many others in between. Historical highlights and practical investigations

with number are used to provide a background for the participants as well as a wealth of materials for the classroom.

**Courses:** ED51, ED52

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB349 MATHEMATICAL REASONING

The concept of thinking and intelligence; the nature of mathematical thinking during the first half of this century; modern ideas on the nature of mathematical thinking; the thinking skills movement and programs designed to foster thinking; analysis of children's thinking in solving mathematical problems; analysis of students' 'everyday cognition' together with their thinking in mathematical situations.

**Courses:** ED51, ED52

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB373 MATHEMATICS CURRICULUM 1

The mathematical processes and structures underlying: beginning mathematical ideas that are the foundation for number and measurement; number, numeration, and number sense related to whole numbers, decimal fractions and common fractions; the four operations (addition, subtraction, multiplication, and division) with particular focus on concepts, basic number facts, and computation (mental and paper and pencil), and measurement involving length, area, capacity, volume, mass, temperature and time. Recent theories on how children acquire concepts and skills related to number and numeration, operations and measurement are examined.

**Courses:** ED51

**Prerequisites:** MDB386

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB374 MATHEMATICS CURRICULUM 2

Addresses the topics of: spatial reasoning (concepts, models, constructions, and reasoning processes); chance and data (concepts, procedures, and reasoning processes; pre-algebra (arithmetical structure, expressions and equations); mathematical thinking (critical, reflective, creative, flexible, and logical reasoning; together with problem representation, construction, modelling, and solving); working effectively with technological tools (concepts, communication processes, and project development).

**Courses:** ED51

**Prerequisites:** MDB386, MDB373

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB375 COMPUTER TOOLS FOR EDUCATORS

The use of writing and publishing software, graphics design software, computer managed learning development tools, numerical software tools, personal and project management tools, communications technologies and computer peripherals used in the production of computer generated materials.

**Courses:** ED50, ED51

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB377 PROJECT PLANNING AND IMPLEMENTATION FOR EDUCATIONAL PURPOSES

The study of computing and its application in educational and other environments is very much associated with planned and sequenced implementation of tasks. A study and understanding of how tasks might be represented, sequenced and implemented is essential if technology is to be used effectively in education. The use of project work as a pedagogical technique is a popular strategy to promote independent learning and student autonomy. This unit provides students with a framework to evaluate this methodology.

**Courses:** ED50, ED51

**Prerequisites:** MDB375 or MDB392

**Contact hours:** 3 per week **Credit points:** 12

### ► MDB381 SCIENCE AND TECHNOLOGY IN THE COMMUNITY AND WORKPLACE

Development of an awareness of how science and technology pervade most aspects of our daily lives in communities and workplaces. The implications of a rapidly changing scientific and tech-

nological base of industry; increasing involvement of the public in national and international decision-making; the need for a scientifically literate society. Practical exercises and projects are also undertaken.

**Courses:** ED50, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

► **MDB383 USING TECHNOLOGY IN THE CURRICULUM**

Examination and analysis of relevant curriculum documents, for example National Technology Statement, Queensland Education Department. Guidelines for the Use of Computers in Learning, curriculum developed as a result of the Wiltshire Report. Content will include models for learning with information technology; models for learning about information technology; and managing information technology resources.

**Courses:** ED51, ED52, ED56, IF82, IF84

**Contact hours:** 3 per week **Credit points:** 12

► **MDB384 SCIENCE EDUCATION**

Science curriculum development and implementation will examine the growth of children's understandings of key concepts in science. The development of their scientific thinking and manipulative skills will also be investigated in conjunction with this. Extended sequences of learning experiences, or programs, will be planned and implemented.

**Courses:** ED26, ED51, ED56, IF82, IF84

**Contact hours:** 3 per week **Credit points:** 12

► **MDB385 INFORMATION TECHNOLOGIES IN EDUCATION**

A critical reflection on the history of technological development and the social impact of these developments combined with issues relating to the uses of information technologies in teaching and learning. Lecture sessions with workshop and laboratory sessions will assist students to become competent in applying information technologies to academic tasks accessing electronic information sources, creating documents, engaging in computer-based dialogues, analysing, evaluating.

**Courses:** ED43, ED51, ED52

**Contact hours:** 3 per week **Credit points:** 12

► **MEB036 SAFETY TECHNOLOGY 1**

This unit provides students with the skills to enable them to recognise the causes of and methods for preventing (or minimising) accidents, fires and explosions associated with engineering components, structures, plant and processes. Students will gain particular knowledge of hazards and control measures associated with the manufacturing, construction and mining industries.

**Credit points:** 12

**Semester:** 1

► **MEN101 RESEARCH METHODOLOGY**

Basic research methodology is an essential component for any student expected to undertake research. This unit will provide the basic knowledge of research, qualitative and quantitative research methodologies and a range of techniques to become critical users of existing knowledge as well as research findings.

**Courses:** CE75, EE77, ME80

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **MEN170 SYSTEMS MODELLING AND SIMULATION**

The concept of a model and model building; techniques for the solution of the models; examples of analytical models such as inventory models, Markov chains, queuing models; simulation as a decision making tool; modelling for simulation and practical exercises in simulation using computer simulation software in the areas of manufacturing systems and maintenance.

**Courses:** ME75, ME76

**Contact hours:** 3 per week **Credit points:** 12

► **MEN171 ADVANCED MANUFACTURING TECHNOLOGIES**

Overview of manufacturing systems engineering and applications of advanced computer aided drafting and design; implementation of CAD/CAM systems using three-dimensional modelling techniques; classification systems for part family formation for production and tooling;

benefits of computer aided process planning; introduction and installation of flexible manufacturing cells and systems including robotics, automated guiding vehicles, online computer aided inspection, automation integration, support technologies and planning for CIM.

**Courses:** ME75, ME76

**Contact hours:** 3 per week **Credit points:** 12

► **MEN172 COST ANALYSIS AND ASSET MANAGEMENT**

Provides students with skills to: analyse cost and understand different costing methods and their implications; evaluate engineering decisions under different cost allocation methods; appreciate the role of variance analysis as a management tool; estimate cash flows; make lease versus buy decisions and budgeting.

**Courses:** ME75, ME76

**Contact hours:** 3 per week **Credit points:** 12

► **MEN175 ENERGY AND ENVIRONMENTAL MANAGEMENT**

Properties and testing methods of solid, liquid and gaseous fuels; combustion calculations; flue gas analysis; energy tariffs and audits; major applications of energy management, for example buildings, process plant, compressed air systems, vehicle fleets; economic evaluation of energy projects; introduction and management of energy saving programs. Environmental aspects will be considered for each topic.

**Courses:** ME75, ME76

**Contact hours:** 3 per week **Credit points:** 12

► **MEN177 TOTAL QUALITY MANAGEMENT**

The aim is to provide students with an understanding of the underlying philosophy and practice of TQM including learning some basic tools for quality control. Topics covered include: quality as a competitive strategy; the evolution of quality management; elements of quality management; continual improvements; customer measurements; managing change; total employee participation; bench marking and TQM in modern economy.

**Courses:** ME75, ME76

**Contact hours:** 3 per week **Credit points:** 12

► **MEN190 PROJECT**

Substantial piece of work relevant to the course and carried out by each student on an individual basis; report is examined and marked by academic supervisor in consultation with industrial supervisor.

**Courses:** ME75, ME76

**Contact hours:** 3 per week **Credit points:** 12

► **MEN241 RELIABILITY AND MAINTENANCE MANAGEMENT**

Overview of maintenance responsibilities and tasks; organisation for maintenance; creating a maintenance plan with reliability; availability; maintainability; repair pools; spare parts inventory management; cost downtime; downtime reduction; planning shutdowns/turnarounds; performance measures; documentation and document control; configuration management; computer based maintenance management systems; total productive maintenance (TPM); condition monitoring; financial analysis for asset management.

**Courses:** ME75, ME76

**Contact hours:** 3 per week **Credit points:** 12

► **MEN272 ENTERPRISE RESOURCE PLANNING**

The aim of this unit is to provide students with an understanding of the underlying philosophy and practice of resources planning. Topics covered are functions and interrelationships between the major components - demand analysis, production and operations planning and control, resource planning and control - manufacturing requirements planning (MRPII); supply chain management; total enterprise approach to business management. Extension of these principles to processing and service industries such as mining, oil, chemical and food processing; enterprises such as hospitals and airports.

**Courses:** ME76, ME75

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MEN270

► **MEN280 ENGINEERING PROJECT MANAGEMENT**

The aim of this unit is to provide students with an understanding of the underlying philosophy and practice of project management. Topics covered are definition of project management; organisational structures; project planning; feasibility analysis; project organisation; contracts; project control; risk analysis and project termination.

**Courses:** BS93, ME75, ME76

**Contact hours:** 3 per week **Credit points:** 12

► **MGB007 ENGINEERING MANAGEMENT**

This unit introduces engineering students to the fundamentals of management so that they can perform a managerial role at a basic level, with the capacity to identify key issues and to develop themselves further as required. It covers the managerial functions of planning, organising and controlling and, in addition, gives emphasis to the involvement of people and their skills in a modern flexible organisation. It also considers briefly areas such as marketing and planning for new ventures as well as the management of change and conflict. It takes an integrated approach to quality in all aspects of management and introduces issues of service management, projects, technology and innovation.

**Courses:** ME41, ME42

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **MGB201 THE LEGAL CONTEXT OF EMPLOYMENT RELATIONS**

The unit provides an overview of the complex legal, social and political arrangements underpinning organisational life in Australia. A multi-disciplinary perspective is used to examine two specific areas. Social, economic and State contexts are explored to provide the wider context within which the law develops and changes. The broader implication of national membership of international bodies such as the International Labour Organisation and the United Nations, and the ratification of treaties is also examined. The employment relationship and its legal context is central to organisational operations, and the unit addresses the identification and analysis of the rights and responsibilities of people at the workplace, and the institutions governing the conduct of the different parties involved in the employment relationship. Current issues are examined from the perspective of the interactions between individual workers, unions, employers, employer groups, tribunals, government and international bodies to enable students to understand the broader context of the legal obligations of the parties.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB222

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB103

**Campus offered:** GP, CA **Semester:** 1

► **MGB202 EQUITY AND DIVERSITY MANAGEMENT**

The historical, legal and social perspectives on current issues surrounding equity and equality in diversity management particularly equal employment opportunity (including affirmative action and anti-discrimination initiatives) are investigated. Workplace implications of current approaches and the concepts and application of the principle of merit are explored in relation to the likely and possible impacts in making personnel-related decisions. In identifying strategic management approaches to diversity including implementing the EEO and AA processes identified by legislation, the unit questions and evaluates current management practices and research methods through investigating, analysing, and critiquing current EEO/AA approaches and plans.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF62

**Prerequisites:** BSB114

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB133

**Campus offered:** GP **Semester:** 2

## UNIT SYNOPSES

### ► MGB203 GOVERNMENT-MANAGEMENT INTERFACE

This unit will provide students with an essential understanding of the complex and dynamic relationship between government and management. The unit will focus upon the political context of management, government policies towards business, their processes of development and operational impacts, the politics of governance and management of the public/private sector interface. The unit will also examine the capacity of various business sectors to influence the political system of Australia in an international context.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF62

**Prerequisites:** BSB114

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** EPB125, EPN101

**Campus offered:** GP **Semester:** 2

### ► MGB207 HUMAN RESOURCE ISSUES AND STRATEGY

This unit identifies a range of contemporary human resource management issues facing Australian organisations. These are explored and analysed through examining a range of alternative human resource programs, policies, and strategies. This unit introduces a range of human resource functions and provides a foundation for the development of professional practice in HRM in later units. This unit provides students with knowledge and skills to address contemporary human resource issues in order to contribute to organisational efficiency and effectiveness.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62, PU40

**Prerequisites:** BSB115

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB131

**Campus offered:** GP **Semester:** 1, 2

### ► MGB209 OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT

This unit provides an overview of issues related to occupational health and safety. The unit acquaints students with the scope of the occupational health and safety problem in Australia as well as the legislative environment, and introduces them to analytical skills needed to manage these problems. The unit takes a strategic and multi-disciplinary approach to the management of occupational health and safety.

**Courses:** BS56, IF28, IF30, IF41, IF48, IF62

**Prerequisites:** BSB114

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB128

**Campus offered:** GP **Semester:** 1

### ► MGB210 PRODUCTION AND SERVICE MANAGEMENT

Production and Service Management extends general management approaches to the production operations subsystems of service and manufacturing organisations. The unit focuses on the deployment of productive resources in order to maximise the added value of services and products. Issues of quality and efficiency are considered analytically in terms of broader strategies and constraints. It considers the opportunities that new technology brings to operational strategies in both manufacturing and service. Project management principles are considered in relation to resource deployment and continuous improvement.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB220

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB129

**Campus offered:** GP **Semester:** 1, 2

### ► MGB211 ORGANISATIONAL BEHAVIOUR

The unit examines theory and research related to individual and collective human behaviour in organisations. A multi-level approach will be adopted that focuses on individuals, groups, the organisation as an entity, and the relationship among these elements. In addition, the unit will address major themes in the field and provide students with an opportunity to use the body of knowledge to diagnose, interpret and understand issues within these themes. This unit will help

students understand the role that people as individuals and in groups play in organisations and to apply this knowledge in creating more effective and humane work places.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62, PU40

**Prerequisites:** MGB220

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB130

**Campus offered:** GP **Semester:** 1, 2

### ► MGB216 MANAGING TECHNOLOGY, INNOVATION AND KNOWLEDGE

This unit explores the links between research, technical processes, product innovation and management structure, policy and practice. It examines the impact of changing technology, such as information technology, on organisations. This unit examines the internal operation of organisations, with particular respect to the management of human, material and financial resources; technological innovations; and social change. Other issues addressed in this unit include the nature of product and process innovation, technology transfer, intellectual property and licensing, government policy, and the role of research and development.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB222

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB140

**Campus offered:** GP **Semester:** 2

### ► MGB218 VENTURE SKILLS

Entrepreneurial management is becoming critical skill to have for small and medium sized enterprises (SMEs) who wish to grow rapidly and for small business units (SBUs) in large corporations. This unit examines and compares the venture growth processes for entrepreneurial managers. This unit focuses on the post start-up issues for the entrepreneurial venture. The unit considers the rapid growth issues in the identification, analysis and learning processes for SMEs.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62, LS50

**Prerequisites:** 96 credit points of approved studies

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MGB220 MANAGEMENT RESEARCH METHODS

This unit is designed to provide students with a conceptual map for conducting research and introduce them to basic qualitative and quantitative analysis techniques. The lecture and tutorial program proceeds through the general research process, moving from establishing a research question, determining a theoretical framework, collecting the data, conducting data analysis, drawing conclusions, and reporting research outcomes. An emphasis is placed on both quantitative and qualitative research methodologies.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB122

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MGB100, EPB109, EPB110, EPB163, COB334, COB203, AMB201

**Campus offered:** GP **Semester:** 1, 2

### ► MGB221 PERFORMANCE AND REWARD

This unit examines the key Human Resource Management functions of job analysis, performance management and compensation management from a strategic perspective with a view to optimising individual and organisational performance. A substantial level of analytical and professional competence is expected in this unit, which is a key to the integration of HR processes and organisational requirements.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB207

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MGB328, HRB105

**Campus offered:** GP **Semester:** 1

### ► MGB222 MANAGING ORGANISATIONS

This unit develops an understanding of the organisation in both its internal and external envi-

ronment, and the demands of managing the organisation's resources and performance. It raises contemporary issues in management and their implications for competitive advantage, focusing on various organisational sub-systems including HR, technology, structure and design. This unit provides a foundation of knowledge for the management and HRM majors. In this unit there will be a focus on strategy, leadership and internationalisation.

**Courses:** BS50, BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB115

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► MGB223 CREATING NEW ENTERPRISES

This unit deals with the development of a business plan for the potential launch of student business ideas. This unit is designed for those individuals interested in creating a new venture or working in industries as employees of venture owners or those that serve this sector. Students build a comprehensive plan of their business concept. Students can progress from this unit to carry out the business plan analysis in the unit MGB218 Venture Skills or advance from MGB218 to undertake this unit.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** 96 credit points of approved studies

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► MGB224 AUSTRALIAN INDUSTRIAL RELATIONS

This unit traces the evolution of current institutions and practices in Australian industrial relations, situating them within the broader context of social and industrial relationships. Issues are viewed from any perspectives, seeing them as a product of a range of political, social, economic legal and industrial experiences. The unit aims to provide an insight into the complexities of Australian industrial relations.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** BSB115

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MGB204, MGB320 and MGB332

**Campus offered:** GP **Semester:** 2

### ► MGB304 HUMAN RESOURCE INFORMATION MANAGEMENT

This unit focuses on Human Resource Information Management. Students will be coached to understand the storage, retrieval, and utilisation of data in HR operation. A substantial level of analytical and professional competence is expected in this subject, which is a key to the utilisation of HR information to aid decision-making. In addition, students will be introduced to the basic operation of a computerised Human Resource information system (HRIS) to appreciate the role of technology in HR information management.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB221

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MGB306 INDEPENDENT STUDY

Enables students to demonstrate an ability to direct their own learning, a key competence for professionals who must keep themselves up-to-date in their area of expertise. Either individually or in small groups, students undertake one or several learning activities with the approval of a supervisor. Appropriate activities include literature review, research (mini-thesis), project, practicum (work placement), or alternative deemed acceptable by the supervisor.

**Courses:** BS56

**Prerequisites:** 96 credit points of approved studies and permission of the Major Coordinator

**Contact hours:** Flexible Mode

**Credit points:** 12

**Incompatible with:** HRB151

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGB307 INTERNATIONAL HUMAN RESOURCE MANAGEMENT**

Overviews international business management, and develops a strategic appreciation of the role of human resources management in an international context. Specific human resource processes are detailed, including: expatriate selection, cross-cultural training, management and remuneration; global management; and the competencies required to manage a culturally diverse workforce, the relationship between international human resource management and international industrial relations, and contemporary research in international human resource management. The Asia-Pacific region will be a focus for discussions throughout this unit.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF62

**Prerequisites:** MGB207

**Contact hours:** Flexible Mode

**Credit points:** 12

**Incompatible with:** HRB117

**Campus offered:** GP

**Semester:** 2

► **MGB309 STRATEGIC MANAGEMENT**

This unit focuses upon developing manager's understanding of the strategy concept and placing the fundamental elements of strategy in a framework that can be used in the decision making process. The framework is developed within the particular context of Australia's economic development position. Taking the perspective that many managers make decisions that can have strategic implications, the emphasis is upon studying that process and content issues that can affect the strategic performance and positioning of the organisation. This will involve creating an understanding of the universal building blocks of competitive advantage at the business, corporate and international levels. To achieve this understanding, simple and relatively complex management decision processes are explored in an interdisciplinary setting involving the analysis of theories, concepts, and processes as a way of developing a generalist strategy framework. By understanding the nature and determinants of competitive and strategic advantages, students should enhance their professional competences and be well-positioned to take a more strategic and critical perspective towards changing management trends and organisational frameworks.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB222

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB125, MIB314

**Campus offered:** GP

**Semester:** 1, 2

► **MGB312 NEGOTIATION SKILLS**

This subject concentrates on the theory and practice of negotiation as applied to the basic concepts of integrative and distributive bargaining domestically and internationally. The process and phases of negotiation are practiced by students, culminating in their ability to negotiate an extensive and complicated collective bargaining agreement.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB211

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB102

**Campus offered:** GP

**Semester:** 1

► **MGB314 ORGANISATIONAL CONSULTING AND CHANGE**

Managing change is a fundamental skill required by prospective managers and professionals. This unit provides opportunities for students to develop a theory in practice orientation to consulting to individuals, groups, and organisations. Hence content theory and process theory will be addressed. The focus of this unit will be on human process issues and change. The unit will examine a range of human process interventions designed to improve organisational effectiveness. Attention will also be given to change strategies that are socially and culturally inclusive. Graduates of this unit should be able to be productive members of organisational change teams.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB211

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB119, COB102

**Campus offered:** GP, CA

**Semester:** 1, 2

► **MGB315 PERSONAL AND PROFESSIONAL DEVELOPMENT**

Develops personal, interpersonal and professional competencies (in both cognitive and affective domains) necessary in a human resource or management professional. Develops personal awareness and understanding, interpersonal competencies, and professional skills. Also examines influence processes, negotiation and conflict resolution and stress management. Throughout, it emphasizes the design of processes to achieve outcomes and skills of reflective practice. The focus is on developing skills to enhance individual competence and leadership skills to enhance effectiveness.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB211

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB104

**Campus offered:** GP

**Semester:** 1, 2

► **MGB320 ORGANISATIONAL CONSULTING AND CHANGE**

Managing change is a fundamental skill required by prospective managers and professionals. This unit provides opportunities for students to develop a theory in practice orientation to consulting to individuals, groups, and organisations. Hence content theory and process theory will be addressed. The focus of this unit will be on human process issues and change. The unit will examine a range of human process interventions designed to improve organisational effectiveness. Attention will also be given to change strategies that are socially and culturally inclusive. Graduates of this unit should be able to be productive members of organisational change teams.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB211

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB119, COB102

**Campus offered:** GP, CA

**Semester:** 2

► **MGB321 ADVANCED PRACTICE IN RECRUITMENT AND SELECTION**

This unit draws on conceptual foundations established in MGB320 Recruitment and Selection. The unit examines the theory and practice of advanced selection techniques. In addition, the application of selection techniques to a range of contexts and occupational groups will be explored including operatives, management, customer service, helping professions and other groups. A range of contemporary issues will be addressed. This unit focuses on strategy and professional practice skills.

**Courses:** BS56, IF28, IF30, IF41, IF48, IF62

**Prerequisites:** MGB320

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB134

**Campus offered:** GP

**Semester:** 2

► **MGB325 ADVANCED PRACTICE IN TRAINING AND DEVELOPMENT**

This unit focuses on designing, implementing and evaluating systems for individual and organisational learning as part of a strategic approach to human resource development. The unit will rely heavily on empirical and theoretical works to inform practice. Throughout the semester we will examine in-depth the key cognitive and motivational theories relating to training, examine advanced training methodologies, career development, focus on transfer of training and investigate how to evaluate the effectiveness of training programs using research designs. The unit will also highlight the important characteristics of a competent trainer.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF62

**Prerequisites:** MGB331

**Contact hours:** Flexible Mode

**Credit points:** 12

**Incompatible with:** HRB101

**Campus offered:** GP

**Semester:** 1

► **MGB331 TRAINING AND DEVELOPMENT**

This unit introduces students to theory and competencies required of a beginning or an occasional trainer: adult learning theory applicable to training in a vocational setting, research and competency development. Topics include national training framework; instructional models and theories of adult learning; training needs analysis; training objectives; training evaluation; training models; training aids/audiovisuals; training administration.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB207 or 96 credit points of approved studies

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** MGB217, HRB120

**Campus offered:** GP

**Semester:** 2

► **MGB334 MANAGING IN A CHANGING ENVIRONMENT**

This unit provides students with the conceptual and analytic tools required for managing changing environments. The emphasis is on developing an understanding of the management competencies required for managing flexibility, managing innovation and managing for change. The unit moves beyond a focus on 'dot.com companies' to examine how a range of organisations both small and large are engaging with issues associated with an increasing emphasis on technology.

**Courses:** BS56, IF26, IF28, IF30, IF37, IF41, IF47, IF48, IF57, IF60, IF62, IF72

**Prerequisites:** BSB212 or MGB222 or 96 credit points of approved studies

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** BSB312

**Campus offered:** GP

**Semester:** 1, 2

► **MGB335 RECRUITMENT AND SELECTION**

This unit draws on conceptual foundations established in MGB221. The unit examines the environment of recruitment and selection, with a particular emphasis on legal issues. Recruitment strategies are evaluated, and considered from the perspective of the organisation and the individual. Personnel selection techniques are examined in relation to technical issues of reliability, validity, fairness, and applicability. Practical skills in designing personnel selection techniques are developed, including the opportunity to develop skills in the interview process.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB221

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRB134

**Campus offered:** GP

**Semester:** 1

► **MGB336 ADVANCED MANAGEMENT RESEARCH METHODS**

This unit provides students with an advanced understanding of data applications necessary for higher level or postgraduate research projects. Preceding methods units introduced research methodology and examined the selection of research methods. This unit focuses specifically on the application of quantitative statistics to managerial decision-making and organisational research. At the conclusion of this unit, students will have a sound working knowledge of SPSS.

**Courses:** BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62

**Prerequisites:** MGB220

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **MGB337 SPECIAL TOPIC**

Allows students to undertake specialised study on a topic area relevant to particular needs. Content varies depending upon the issue examined, and the academic member(s) involved (including short-term visiting academics).

**Courses:** BS56

**Prerequisites:** 96 credit points of approved studies and permission of Major Coordinator

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1, 2, 3

► **MGN402 GOVERNMENT-BUSINESS RELATIONS**

Students will develop an understanding of the relationships between business and government in an historical, contemporary and comparative context. The course will focus on: the interaction between politics and the economy, particularly in Australia; the historical development of the relationships between the private and public sectors; and the impact that policies and actions each have on the operations of the other.

**Courses:** BS30, BS39, BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Incompatible with:** EPN101

**Campus offered:** GP

**Semester:** 1

► **MGN404 MANAGING AND ORGANISING GLOBAL FIRMS**

Aims to provide a detailed examination of the typical impacts of the international environment upon the organisation, its management, structure, operations and human resource capacities. In addition, the unit will discuss management issues to be faced by organisations entering into export markets.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** BSN401

**Campus offered:** GP

**Semester:** 1

► **MGN409 INTRODUCTION TO MANAGEMENT**

The functions and roles of managers; concepts and principles and their practical applications; the key management functions; areas of planning, organising, staffing, directing and controlling; production/operations management and the management of quality; entrepreneurship and business planning; important problems, opportunities and trends facing managers in Australia analysed from the viewpoint of relevant academic disciplines.

**Courses:** ED23, BS98, BS39

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRN104

**Campus offered:** GP

**Semester:** 1, 2

► **MGN410 LABOUR-MANAGEMENT RELATIONS**

Employee relations; employee and union action; the role of governments and industrial tribunals; alternative methods and pressures to change traditional Australian systems; the Australian system of labour-management relations; systems of regulation in the employment area; negotiating skills; the resources required for mobilising change in this area.

**Courses:** BS30, BS39, ED23, GS10, GS11, GS13

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRN105

**Campus offered:** GP

**Semester:** 2

► **MGN412 PEOPLE IN ORGANISATIONS**

This subject aims to provide a broad understanding of organisational behaviour as a base for future study and practice of management. The subject examines organisational behaviour at three levels - individual, group and the organisation as a whole. It moves from a micro perspective on individual behaviour through the interface between the individual and the organisation to overall characteristics of organisations which shape the behaviour of their members. The aim is to provide the student with an understanding of why employees feel and acts the way they do in organisations and methods for enhancing and promoting positive employee attitudes and behaviours and organisational effectiveness. The emphasis is on understanding basic assumptions and models, major theoretical issues, methods of measurement and practical implications.

**Courses:** BS30, BS39, ED23

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRN108

**Campus offered:** GP

**Semester:** 1

► **MGN413 QUALITY SYSTEMS MANAGEMENT**

Students are introduced to the debate about Standards and their implementation as systems supporting management. The unit covers the basics of total quality management, quality process improvement and the contribution quality systems can make the managerial process. It relates this material to concepts of best practice, benchmarking and business process re-engineering. It gives an overview of ISO9000 Standards for Quality, ISO14000 on Environmental Safety, and how these can be integrated into a single auditable management system. The unit establishes the link of operations and systems with the strategic management process. It considers some of the emergent regulatory requirements in Europe and the Asia-Pacific.

**Courses:** BS30, BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRP111

**Campus offered:** GP

**Semester:** 1

► **MGN421 STRATEGIC HRM**

HRM is concerned with the relationship between people management strategies and organisational goals and objectives. This capstone unit provides HRM students with the opportunity to apply their learning to this relationship in a systematic way. It requires them to produce high quality HRM advice that provides direction for practicing line managers consistent with organisational goals and objectives. The learning strategies in the unit challenge students to identify contemporary issues of organisation and management and to interpret these using the paradigms of HRM.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only, completion of MGN427 or undergraduate specialisation in HRM advisable

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **MGN422 CONTEMPORARY ISSUES AND PRACTICES IN EMPLOYEE RELATIONS**

This unit will provide human resource practitioners with skills and knowledge to cope with changing employee relations conditions and work practices in Australia. The focus of the unit is on issues relating to changes in industrial relations and how these impact on HR practice. The pressures to move to an EB system, negotiation of EB agreements, and related work practice issues such as the impact of these changes on health and safety, work and family responsibilities, workforce diversity and the increasing use of technology are addressed.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **MGN423 CONTEMPORARY STRATEGIC ANALYSIS**

This unit focuses upon developing manager's understanding of the strategy concept and placing the fundamental elements of strategy in a framework that can be used in the decision making process. Taking the perspective that many managers make decisions that can have strategic implications, the emphasis is upon studying those issues that can affect the strategic positioning of the organisation. This will involve creating an understanding of the universal building blocks of competitive advantage at the business, corporate and international levels. By understanding the nature and determinants of competitive and comparative advantages, students will be well-positioned to take a more strategic perspective in their organisational activities.

**Courses:** BS93

**Prerequisites:** PG only; with an UG specialisation in Business or Commerce, or equivalent entry to BS93

**Contact hours:** Flexible Mode

**Credit points:** 12

**Incompatible with:** BSN407, MGN504

**Campus offered:** GP

**Semester:** 2

► **MGN424 INTERNATIONAL DIMENSIONS OF HRM**

The course material considers the international dimensions of HRM, principally as they affect domestic organisations operating internationally, as well as multinational, global and transnational organisations. Special attention is given to those skills necessary to function efficiently and effectively at a strategic level in management, with particular emphasis on the skills and understanding necessary for operating in a cross-cultural environment. The knowledge and skills necessary for effective personal function in a cross-cultural setting are examined, as well as those necessary for managing others who are operating in such environments. Specifically, the unit is a major core unit in the Master of Business (HRM) program. Topics include: the competitive context of IHRM (corporate transnationalism); the strategic context of IHRM; the cultural context of IHRM (socialisation and structure); the developmental context (global leadership and development); the collaborative context (HRM in multinational cooperative ventures); the comparative context (expatriate management studies in different contexts); the globalisation context.

**Courses:** BS39, BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **MGN425 THE CONTEXT OF PUBLIC MANAGEMENT**

The aim of this unit is to acquaint students with the context within which public bureaucracies' function, particularly the special characteristics of public accountability, which distinguish these bureaucracies from private sector organisations. The primary focus is on the Australian scene, although students will draw comparisons from their own experience within or outside Queensland. Topics will include the role of interest groups, parties and external government actors' in the formulation of public policy; accountability requirements through parliamentary and other agencies; alternative mechanisms for service delivery; and inter-governmental relations, including the role of local governments in the federal system.

**Courses:** BS39, BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

► **MGN426 INTERNATIONAL TRENDS IN PUBLIC MANAGEMENT**

This unit examines major international trends and issues in public management, especially the impact of the New Public Management, focussed upon corporatisation and privatisation, plus regionalisation and devolution of decision-making. It discusses the evolution of institutional structures of administration and policy making under the pressure of global economic and political forces. The effect of international trends is examined with reference to the changing nature of public management within particular national contexts.

**Courses:** BS39, BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

► **MGN427 HUMAN RESOURCE MANAGEMENT**

This unit is designed to introduce students to the importance of human resource management for the effectiveness of organisations operating in complex and/or global environments and the quality of work life. The subject examines human resource management from multiple consistency, functional and strategic perspectives. It utilises an open systems model to introduce some of the key processes of personnel management, which are treated at a theoretical and skill level. The subject fosters knowledge, analytical and operational competencies.

**Courses:** GS30, GS31, GS85, GS86

**Prerequisites:** PG only

## UNIT SYNOPSES

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **MGN428 MANAGING NEW BUSINESSES**

This unit is designed for those interested in the processes of business start-up, specifically the unit has been designed for human resource managers, business people, professionals in IT, industrial design and engineering, advisors to business start-ups, those proposing to start a business and students interested in this area. Creating and growing a new venture is an activity that few are able to make happen, even though many seek to this end. This unit is based on an understanding and 'know how' of all functional areas of business and applies the tools and analytical techniques of these functional areas to the new business creation process. The added layer to this unit is the 'know who' that is the knowledge of the human resource network with whom the business owner is connected. Also Brisbane's leading entrepreneurs will be guest speakers in this program.

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **MGN500 ADVANCED READINGS IN HUMAN RESOURCE MANAGEMENT 1**

Explores in-depth advanced theory, research, and issues of practice in human resource management.

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN501 READINGS IN MANAGEMENT**

Examination in detail of advanced theory and issues from a chosen discipline area. The object is to have students explore the breadth of their discipline in contrast to the more narrow focus of their thesis work. Students select advanced readings in their field and submit a comprehensive criticism and review. This work is carried out in consultation with the supervisor.

**Courses:** BS63, BS92

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRN118

**Campus offered:** GP **Semester:** 1

► **MGN505 CONSULTING AND CHANGE MANAGEMENT**

The origins, nature and effect of social change on individuals, organisations and communities; theories and models of change will be used to explore planned and unplanned changes currently occurring, particularly as these relate to possible futures; emphasis will be on the strategies and skills required to initiate and participate in effective change management.

**Courses:** BS93, BS39

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **MGN506 CONTEMPORARY ISSUES IN HRM**

Postgraduate students need to be familiar with the contemporary issues and the current theoretical and practical developments within their field of specialisation. These matters need to be pursued at a level of intellectual rigour beyond that required for an undergraduate degree. The main objectives of this unit are to identify, analyse and report on contemporary issues in HRM and to research information relevant to identified topics. Content may vary according to which issues are current or predictably important in the future. Special expertise of staff, visiting scholars or distinguished HRM professionals may be utilised.

**Courses:** BS39, BS63, BS92, BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Incompatible with:** HRN115

**Campus offered:** GP **Semester:** 1

► **MGN507 CONTEMPORARY ISSUES IN MANAGEMENT**

Examines in detail advanced theory and issues from their chosen field of study. Such study may include an analysis of the historical developments in the field, interconnections with other fields, current significant issues and practices (including ethics), and advanced methodology and/or statistics relevant to the field. The content may vary according to which issues are significant at the time, according to the special expertise of the staff (including visiting scholars and distinguished business leaders) and according to specific needs from thesis proposals.

**Courses:** BS63, BS92

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRN119

**Campus offered:** GP **Semester:** 2

► **MGN508 CONSULTING AND CHANGE MANAGEMENT**

The origins, nature and effect of social change on individuals, organisations and communities; theories and models of change will be used to explore planned and unplanned changes currently occurring, particularly as these relate to possible futures; emphasis will be on the strategies and skills required to initiate and participate in effective change management.

**Courses:** BS93, BS39

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **MGN509 HUMAN RESOURCE MANAGEMENT PROJECT 1**

Provides the opportunity for students to undertake an approved project to develop and enhance learning associated with the coursework elements of human resource management.

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN510 HUMAN RESOURCE MANAGEMENT PROJECT 2**

Provides the opportunity for students to undertake an approved project to develop and enhance learning associated with the coursework elements of human resource management.

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN514 MANAGEMENT PROJECT 1**

Provides the opportunity for students to undertake an approved project to develop and enhance learning associated with the coursework elements of management.

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN515 MANAGEMENT PROJECT 2**

Provides the opportunity for students to undertake an approved project to develop and enhance learning associated with the coursework elements of management.

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN516 POLICY ANALYSIS**

Students develop skills in the analysis of policy content and policy process. It provides a basic methodological framework for the systematic development of those skills with two related objectives: (a) to examine a range of models of public policy processes with a view to determining their validity and utility, and (b) to develop a capacity for policy analysis, utilising a variety of conceptual frameworks. Topics include: policy design, formation and implementation, and theories of policy.

**Courses:** BS30, BS39, BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Incompatible with:** EPN104

**Campus offered:** GP **Semester:** 1

► **MGN517 PROGRAM MANAGEMENT AND EVALUATION**

This unit provides an understanding of program management and evaluation in the public sector, with an emphasis on skills development; theory and methodology of evaluation research; qualitative and quantitative tools and the application of these to a public sector program.

**Courses:** BS30, BS39, BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Incompatible with:** EPN106

**Campus offered:** GP **Semester:** 1

► **MGN524 SPECIAL TOPIC IN MANAGEMENT 1**

Students undertake specialised study on a topic area relevant to particular needs. It permits an in-depth examination of an issue of importance. The content varies depending on the issue examined, and the academic member(s) involved (including short-term visiting academics).

**Courses:** BS39, BS93, IF49

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN525 SPECIAL TOPIC IN MANAGEMENT 2**

Students undertake specialised study on a topic area relevant to particular needs. It permits an in-depth examination of an issue of importance. The content varies depending on the issue examined, and the academic member(s) involved (including short-term visiting academics).

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** Flexible Mode

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN526 ADVANCED READINGS IN MANAGEMENT 2**

Students explore in-depth advanced theory, research and issues of practice in management.

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** HRN118

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN527 ADVANCED READINGS IN HUMAN RESOURCE MANAGEMENT 2**

Students explore in-depth advanced theory, research and issues of practice in human resource management.

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN528 SPECIAL TOPIC IN HUMAN RESOURCE MANAGEMENT 1**

Students undertake specialised study on a topic area relevant to particular needs. It permits an in-depth examination of an issue of importance. The content varies depending on the issue examined, and the academic member(s) involved (including short-term visiting academics).

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week or Flexible Mode

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MGN529 SPECIAL TOPIC IN HUMAN RESOURCE MANAGEMENT 2**

Students undertake specialised study on a topic area relevant to particular needs. It permits an in-depth examination of an issue of importance. The content varies depending on the issue examined, and the academic member(s) involved (including short-term visiting academics).

**Courses:** BS93

**Prerequisites:** PG only

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2, 3

► **MMB004 INFOMECHATRONICS PROJECT**

Modern devices and systems are characterised by the use of digital computers to provide increased functionality and autonomy at decreased cost. The ability to integrate the mechanical, electrical and computing skills in solving a problem is an essential trait of an Infomechatronics engineer. The aim of this unit is to develop the student's capability to apply mechanical engineering and management principles in solving a real world industry problem. Students will be required to practice theoretical/analytical/experimental techniques taught in previous years of the course and also demonstrate practical skills in synthesis/design and manufacture as well as project management. Topics include: problem definition and solution; literature review and industry research; preparation of technical documentation; experimental verification of a constructed device or suggested solution; project management, presentation and reporting.

**Courses:** ME40

**Prerequisites:** As determined by Course Coordinator.

**Credit points:** 36

**Semester:** 1, 2

► **MMB112 DYNAMICS**

This unit concerns the motion of machines and structures that have to operate with high speeds and accelerations and the application of principles of mechanics, in particular dynamics. The principles are basic to the analysis and design of moving structures, ranging from ground and air vehicles to robotic devices and automatic control systems. The content includes fundamental equations of kinematics; Newton's law of motion; coordinate systems in plane motion; fundamental equations of particle kinetics; energy, power, impulse and momentum; kinematics of rigid bodies in plane motion, relative motion and motion relative to rotating axes; and kinetics of rigid bodies.

**Courses:** ME41, ME42, ME48

**Prerequisites:** MAB180 or MAB131, CEB109

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2, 3

► **MMB131 ENGINEERING MATERIALS**

This unit provides an introduction to Engineering Materials and Materials Science. Topic covered include: atomic bonding; thermodynamics of solids; state and phase changes; defects; elasticity, plastic deformation and fracture; recovery; recrystallisation; hot and cold deformation; creep and fatigue mechanisms; introductory corrosion; heat treatment; alloying and strengthening in metals, polymers and ceramics.

**Courses:** CE44, CE45, EE48, EE41, EE42, IF42, ME41, ME48, ME42, SC01

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **MMB191 INTRODUCTION TO ENGINEERING IN THE MEDICAL ENVIRONMENT**

The medical environment has its own culture, methodology and terminology to which the medical engineer must become accustomed. Similarly, engineering has its own terminology and means of communication. Content includes: the engineering profession and its disciplines in Australia and worldwide; Australian healthcare system; medical terminology; health technology and equipment; engineering and medical ethics case studies; engineering communication; engineering drawing.

**Courses:** ME48

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **MMB211 MECHANICS 1**

All engineering designs must possess an appropriate/adequate degree of stability before they can be considered safe and reliable in service. Mechanics 1 provides a synthesis of knowledge from the general principles of mechanics and demonstrates how these can be used to ensure design integrity and design assessment. The unit will introduce students to the theory of elasticity and elastic parameters such as stress and strain; analysis and design of pressurised thin walled

cylinders and spheres; deflection of beams; direct and shear stresses during beam bending; buckling of columns; combined loading of structures and machine members; yield criteria for safe elastic loading.

**Courses:** ME36, ME41, ME42, ME48,

**Prerequisites:** MAB132, CEB109

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **MMB212 MECHANICS 2**

Topics covered in this unit include: kinematic and dynamic analysis of planar linkages and mechanisms; link synthesis and its application to the design of mechanisms; determination of static and dynamic forces and torques due to inertia and other effects in mechanisms; kinematic analysis of gears and gear systems; introduction to energy methods and matrix methods for static analysis; stress analysis of axi-symmetrically loaded members; torsion of non-circular sections; introduction to experimental stress analysis.

**Courses:** ME41, ME42

**Prerequisites:** MMB211, MMB112

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **MMB232 MATERIALS TECHNOLOGY**

Topics covered in this unit include: industrial shaping of metals; solidification theory and phase transformations; casting - alloys and defects; sintering and powder metallurgy; fundamentals of ferrous metallurgy; non-ferrous metallurgy; welding and joining technologies; non-destructive testing; engineering with ceramics; processing and properties of polymers; composite materials; optical materials and optical properties.

**Courses:** ME36, ME41

**Prerequisites:** MMB131

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **MMB251 AERODYNAMIC PRINCIPLES**

Introductory concepts of fluid mechanics and thermodynamics; conservation of mass, energy and momentum, state properties of fluids, the standard atmosphere. Dimensional analysis; experimental aerodynamics and aerodynamic coefficients, Reynolds number and Mach number effects. Estimating aerodynamic forces and moments, fundamentals of aircraft performance; estimating range and endurance, take off and landing calculations, flight envelopes.

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **MMB252 THERMOFLUIDS**

Topics covered in this unit include: operation and testing of engines; first and second laws of Thermodynamics; properties of working fluids including equations and tables; heat engine cycles, compressors and expanders; multi stage compression; laboratory and interests; fluid properties, forces on stationary and moving fluids; flow behaviour, pressure drops, Reynolds number; theory and applications of energy equations; power transmissions in fluids; laboratory.

**Courses:** ME36, ME41, ME48, ME42

**Prerequisites:** MAB132, CEB109

**Contact hours:** 6 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **MMB281 FUNDAMENTALS OF MECHANICAL DESIGN**

This introductory design unit covers introduction to mechanical design, design procedure, system and functional approach to design, universal design and design for sustainability, concept development, engineering creativity, load analysis, development of computational scheme, general strength considerations, introduction to fatigue, shaft design, rolling bearing selection and analysis of forces in gear trains. Students also learn Computer-aided Design and Drafting software starting from simple shapes and advancing to 3D modelling.

**Courses:** ME41, ME42, ME48

**Prerequisites:** BNB007 or MMB191

**Corequisites:** MMB211

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **MMB292 BIOMATERIALS**

Topics covered in this unit include: an understanding of the relationships between the properties, failure mechanisms, processing and microstructures of various materials used for medical applications and their interaction with human tissues; an understanding of the fundamentals of the use of materials in a medical environment and an understanding of the fundamentals of materials properties and processing; and consideration of the following: metallic, ceramic, polymeric implant materials; composites as biomaterials; structure-property relationships of biomaterials; tissue response to implants; soft tissue replacements; hard tissue replacements.

**Courses:** ME48

**Prerequisites:** MMB131

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **MMB300 PROJECT 2T**

The aim of this unit is to provide students with the capability to understand mechanical engineering principles and apply them to the formulation and solution of specific engineering problems in design and development tasks. The unit involves the application of mechanical engineering principles and the communication of ideas orally and in the presentation of a formal report.

**Courses:** ME36

**Prerequisites:** As determined by Course Coordinator

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **MMB302 PROJECT 2T**

The aim of this unit is to provide students with the capability to understand mechanical engineering principles and apply them to formulate and solve specific engineering problems in design and development tasks. The task may involve investigation in applied research projects or industrial based projects. Students will acquire the ability to communicate solutions orally and in a formal report form.

**Courses:** ME36

**Prerequisites:** As determined by Course Coordinator

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

► **MMB311 MECHANICS 3**

This unit covers two separate Mechanical Engineering disciplines: (i) Study of vibration in machines and structures, (ii) Study of automatic plant control. Students will gain an understanding of transient behaviour of mechanical systems. In many instances it is the transient loads in machines or departures from the design operating condition in process plants which causes mechanical failure or unacceptable departure from product specifications.

**Courses:** ME41

**Prerequisites:** MAB133, MMB112

**Contact hours:** 6 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

► **MMB312 MECHANICAL MEASUREMENT**

This units deals with measurement techniques and instrumentation systems required in mechanical engineering applications. The unit covers (a) the basic knowledge of static and dynamic mechanical measurements with an emphasis on the measurement of position/velocity/acceleration, stress/strain, force/torque/power, vibration/noise and pressure/flow/temperature and (b) hands-on experience in measurement techniques and instrumentation.

**Courses:** ME36

**Prerequisites:** MAB105, EEB112, EEB220

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

► **MMB313 MECHANICAL ENGINEERING STUDIES**

The objectives of this unit are (1) to provide students with revision in basic knowledge in mathematics and an introduction to Laplace Transforms to enable smooth articulate into the advanced standing programs, (2) to provide stu-

## UNIT SYNOPSES

dents with basic concepts in stress analysis and its application to practical problems and (3) to provide sufficient background in the application of the knowledge in the later part of the course, in project work and instrumentation.

**Courses:** ME41

**Prerequisites:** Singapore Polytechnic Diploma  
**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

### ► MMB351 THERMODYNAMICS

Topics covered in this unit include: review of basics: steam cycles and plant; nozzles, impulse and reaction turbines; gas turbines - basic and refined cycles; mixtures and Dalton's Law; refrigeration cycles and plant; chemistry of combustion and water treatment; conduction, convection and radiation; condensation and boiling; forced and free convection; analysis of heat exchangers. Laboratory.

**Courses:** ME41, ME42

**Prerequisites:** MMB252, MMB352

**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► MMB352 FLUID MECHANICS

This unit provides students with an understanding of unsteady flow in closed conduits, performance of rotodynamic machinery used in fluid systems (including pumps, water turbines and hydraulic transmissions), incompressible flow around solid bodies (including potential flow and boundary layer flow), design and interpretation of hydraulic and pneumatic circuits (including graphical symbols, fluid logic, components of fluid systems) and basic compressible flow (including normal shock waves).

**Courses:** ME41, ME42

**Prerequisites:** MAB132, MMB211, MMB252

**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► MMB353 TRIBOLOGY

Tribology (friction, wear and lubrication) pervades all facets of our industry and is of vital importance in mechanical, manufacturing and medical engineering. Tribology is an integral component of the mechanical, manufacturing and medical engineering curriculum because the effective application of its principles can increase national productivity in terms of reduced energy costs, reduced material loss through reductions in wear, reduced operating costs through lower maintenance costs, lower equipment replacement costs, fewer machine breakdowns and longer machine life. Tribological principles are fundamental in the design of medical prostheses such as synovial joints. This unit builds upon the design units in the courses and by its inclusion in the third year of the degree programs, allows students to undertake final year projects in this area of mechanical engineering. Topics covered include: Introduction to tribology and fundamentals of dry contact mechanics, Specification and measurement of surface topography, Review of the fundamentals of friction and the modes of wear, Regimes of lubrication (hydrodynamic, hydrostatic, boundary and elastohydrodynamic), Properties of lubricants, including additives, Bearing design (fluid film journal and thrust pad bearings), Lubrication of gears, rolling element bearings, human and prosthetic joints, Lubricant degradation and reclamation, Rapidly biodegradable products and Advanced condition monitoring techniques.

**Courses:** ME40, ME41, ME42, ME43, ME48

**Prerequisites:** MMB381, MMB382

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► MMB362 BIOFLUIDS

This unit includes consideration of: the particular properties of the fluids that might be encountered in biomedical engineering and an introduction to techniques to analyse their behaviour; the properties of the fluids and their relation to biological function; the relevance of fluid properties to the design of associated equipment; continuity of flow; viscosity and its measurement; Newton's law of viscosity; non-Newtonian fluids; boundary layer theory; dimensional similarity; rheology of biofluids; haemodynamics; pumps and valves for biofluid systems; associated equip-

ment; biotribology and the function of biological joints.

**Courses:** ME48

**Prerequisites:** MMB252

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► MMB371 MANUFACTURING PROCESSES

Topics covered in this unit include: introduction to machining; chip formation; cutting forces, power, temperature and surface finish; concepts of orthogonal and oblique cutting, introduction to turning, milling, drilling and grinding operations; cutting fluid actions and applications; cutting tool materials, geometry and specification; tool life studies; selection of cutting conditions; non-traditional machining processes; introduction to engineering metrology; introduction to casting, welding and metal forming processes; metal forming principles and theories; metal forming analysis techniques, forging, extrusion, rolling and drawing processes; dead metal zone, extrusion defects, defects in rolling, limitations of forging, rolling, extrusion processes; sheet metal operations, press selection, blank layout, spring back, introduction to blanking die design, methods for minimising spring back, introduction to drawing and deep drawing processes.

**Courses:** ME36, ME41

**Prerequisites:** MAB132, MMB211

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► MMB374 DESIGN FOR MANUFACTURING I

Topics covered in this unit include: introduction to design for manufacturing in the context of concurrent engineering; principles of solid modelling, its importance in a concurrent engineering environment; the idea of rapid prototyping and tooling; introduction to the basic skills in the use of CAD/CAM software for rapid product development. Basic understanding of creating manufacturing specification.

**Courses:** IF57

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► MMB381 DESIGN OF MECHANICAL COMPONENTS AND MACHINES

This design unit covers the design of mechanical components and machines. In particular, materials selection in design, fasteners, power screws, riveted, welded and bonded joints, shafts and associated parts, gearing (spur, helical, bevel, worm, cyclo-, harmonic), clutches, couplings and brakes, cams, springs, frames and housings, design for manufacturability, selection of lubricants and methods of lubrication, machine components interrelationship (case studies). Students also learn solid modelling software and use it in design project to develop a solid model of a transmission.

**Courses:** ME41, ME42

**Prerequisites:** MMB281

**Contact hours:** 6 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► MMB382 DESIGN AND MAINTENANCE OF MACHINERY

This design unit covers design of special equipment (conveyors, cranes, feeding and orienting devices), design of mechanical structures, heavy machinery design, design of food processing equipment, design of agricultural equipment, design of machinery exposed to corrosive environmental and extensive heat, fundamentals of friction and wear, design for reliability, machine failure analysis, analysis of case studies of industrial failures, the use of the Anticipatory Failure Determination method for prediction and analysis of failures, practical application of fracture mechanics to failure analysis, machine condition monitoring, maintenance systems, styling and ergonomics in design, Occupational Health and Safety, intellectual property, quality assurance in design and engineering ethics.

**Courses:** ME41, ME42

**Prerequisites:** MMB281

**Contact hours:** 6 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► MMB391 BIOMECHANICAL ENGINEERING SYSTEMS

Topics covered in this unit include: an appreciation of the mechanics of the tissues of the joints (micro mechanics or tissue mechanics) and the function of the body during normal activities (macro-mechanics or biomechanics). This unit is designed to develop an understanding of the complex properties of the individual tissues and practical competencies in the evaluation of human function and performance from a biomechanical perspective. Biomedical engineers require the ability to analyse the mechanics of the human body for applications such as prosthetic design (both artificial limbs and replacement joints), design of assistive devices for people with disabilities, sporting performance, ergonomic tasks, and other health related areas.

**Courses:** ME48

**Prerequisites:** CEB109, MMB292, MMB211

**Contact hours:** 6 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► MMB392 BIOENGINEERING DESIGN 2

This unit is structured to further develop the engineering design skills of students, with particular emphasis on the role of computer-aided design (CAD), materials selection, manufacturing processes, assembly and maintenance in the design and management of bio-engineering devices. A knowledge of manufacturing processes, fundamentals of engineering design, engineering drawing and engineering materials is assumed. Content includes: design for manufacture, materials selection, computer-aided design and solid modelling; rapid prototyping techniques; maintenance and management of medical devices; case studies of selected medical devices.

**Courses:** ME48

**Prerequisites:** MMB281, MMB371

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► MMB400 INDUSTRY PROJECT

Professional engineers are required to manage projects and this unit provides a vehicle for students to undertake a structured, individual project program under supervision and within industry. The BE(Mech) course (like any engineering course) requires that students are capable of using their initiative to manage a major project to satisfactory completion. The project is to be a substantial piece of work relevant to the course and carried out by each student on an individual basis. It is to investigate and analyse a real technological or managerial problem in mechanical engineering and apply solutions that take into consideration both technological and economic factors. Students are required to present seminars and a final thesis.

**Courses:** ME41, ME42

**Prerequisites:** As determined by Course Coordinator

**Contact hours:** 40

**Credit points:** 48

**Semester:** 1, 2

### ► MMB401 PROJECT

Professional engineers are required to manage projects and this unit provides a vehicle for students to undertake a structured, individual project program under supervision. The BE(Mech) course (like any engineering course) requires that students are capable of using their initiative to manage a major project to satisfactory completion. The project is to be a substantial piece of work relevant to the course and carried out by each student on an individual basis. It is to investigate and analyse a real technological or managerial problem in manufacturing engineering and marketing and apply solutions that take into consideration both technological and economic factors. Students are required to present seminars and a final thesis.

**Courses:** ME41, ME42

**Prerequisites:** As determined by Course Coordinator

**Credit points:** 48

**Campus offered:** GP

**Semester:** 1, 2

### ► MMB409 PROJECT 1/2

Professional engineers are required to manage projects and this unit provides a vehicle for stu-

## UNIT SYNOPSES

dents to undertake a structured, individual project program under supervision. The BE(Medical) course (like any BE course) requires that students are capable of using their initiative to manage a major project to satisfactory completion. The project is to be a substantial piece of work relevant to the course and carried out by each student on an individual basis. It is to investigate and analyse a real technological or managerial problem in medical engineering and apply solutions that take into consideration both technological and economic factors. Students are required to present seminars and a final thesis.

**Courses:** ME48

**Prerequisites:** As determined by Course Coordinator

**Credit points:** 48

**Campus offered:** GP

### ► MMB411 ADVANCED AUTOMATIC CONTROL

Continuous automatic control of mechanical systems is fundamental to the automation of manufacturing and process plant. This subject exposes the student to the practical issues of design of automatic control systems using the 'classical control' theory taught in Mechanics 3.

**Courses:** ME41, ME42

**Prerequisites:** MAB133, MMB311

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MMB412 FINITE ELEMENT ANALYSIS

Design engineers must be exposed to modern techniques of analysis for design evaluation and optimization. The finite element method provides a means of achieving this goal. Topics covered in this unit include: introduction to the finite element method; introduction to simple models of material and structural behaviours; the Galerkin finite element approximation technique for model differential equations; finite element and their characteristics; interpolation and shape functions and their relevance in FEA. All students will be introduced to a commercial software package and will carry out analysis of engineering problems using the software.

**Courses:** ME41, ME42

**Prerequisites:** MMB311

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MMB413 INDUSTRIAL NOISE AND VIBRATIONS

The unit is concerned with the study of methods of noise and vibration measurement and control as experienced in industry. Students are required to have a basic understanding of the theories and be capable of modelling and predicting noise and vibration in an industrial environment. Topics covered in this unit include: instrumentation and measurement of noise and vibration; behaviour and analysis of sound waves, measurement of noise and noise criteria, attenuation from barriers and screens, behaviour of sound in room, sound transmission through partition and noise reduction through partition; vibration generation and transmission, measuring vibration and analysis, instrumentation and vibration condition monitoring, balancing of rotating machines and vibration damper and control.

**Courses:** ME41, ME42

**Prerequisites:** MMB311

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MMB430 ADVANCED MATERIALS

Topics covered in this unit include: materials selection for weight critical applications; light alloy - aluminium and its alloys, principles of age hardening, aluminium-lithium alloys, issues in processing aluminium; light alloys-magnesium alloys, titanium alloy groups and uses (including issues in processing and titanium metallurgy; fibre composite materials-Young's modulus, strength and fracture, major groups of fibre composites, design with composites; introduction to thin film deposition - physical vapour deposition, chemical vapour deposition, sol-gel deposition, thin film analysis and microstructure; ceramic structures and processing-classification of structures, structure-property relationships, defects in ceramics, ceramic processing; special

topic-related to current research in the field (eg case study in technology development: materials development for energy efficient windows).

**Courses:** ME41, ME42

**Prerequisites:** MMB232

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MMB450 AIR CONDITIONING

Topics covered in this unit include: detailed analysis of psychrometric and refrigeration cycles; calculation of building cooling loads; air conditioning and refrigeration plant machinery and heat exchangers; ductwork design; application in systems operation.

**Courses:** ME41, ME42

**Prerequisites:** MMB252

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MMB451 ENERGY MANAGEMENT

Topics covered in this unit include: the systematic process by which energy use is monitored and analysed; individual treatment of electricity, fuels and their properties, compressed air, buildings, cycle requirements, pinch technology, energy recovery equipment; financial analysis of proposals. Environmental aspects will be considered for each topic.

**Courses:** ME41, ME42

**Prerequisites:** MMB252

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► MMB461 PROCESS SYSTEMS DESIGN

This unit involves the design of various process plant equipment such as piping systems (including control of fluid flow via pumps and valving, support systems and pipe stressing), pressure vessels such as heat exchangers, cooling towers and introduces students to the pumping of slurries, according to relevant codes.

**Courses:** ME41, ME42

**Prerequisites:** MMB351, MMB352

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► MMB470 ENGINEERING ASSET MANAGEMENT AND MAINTENANCE

Engineers are often involved in the management of substantial amounts of plant, machinery and similar assets. In today's capital intensive industries, maintenance is a major cost element, and the efficiency of operations is heavily influenced by equipment reliability and maintenance effectiveness. The engineer needs to know how to organise maintenance and how to create and implement effective asset management and maintenance plans. This unit includes: engineering asset management policy statement; overhaul and replacement of engineering assets; organisation for maintenance; maintenance planning and control; failure mode and effect analysis, reliability, maintainability and availability analysis, risk assessment and spare parts inventory management.

**Courses:** ME41, ME42, ME43, ME48

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► MMB471 COMPUTER INTEGRATED MANUFACTURING

Topics covered in this unit include: introduction of the concepts of strategic planning for computer integrated manufacturing; concepts of advanced manufacturing technologies and the various components of computer integrated manufacturing system; the importance of concurrent engineering in the context of CIM; introduction to the principles of modelling and simulation techniques as a design and evaluation tool for manufacturing systems.

**Courses:** ME41, ME42

**Prerequisites:** MMB371 or a knowledge of basic manufacturing processes and statistics

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MMB474 COMPUTER CONTROL OF MANUFACTURING SYSTEMS

Topics covered in this unit include: overview of computer controls of manufacturing systems; principles of data communications in computer integrated manufacturing environment; applica-

tions of data structures in modern manufacturing environment; programmable logic controllers in shop floor environment; enterprise integration and networking in manufacturing; conditioning and process monitoring in process industries; digital and analogue control of manufacturing systems; several case studies and discussions on automation and networking of automobile and air craft industries.

**Courses:** IF57

**Prerequisites:** EEB220

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► MMB476 OPERATIONS MANAGEMENT

This unit develops students' ability in applying quantitative techniques in solving different types of industrial operations problems. Topics include: product mix, assignment and transportation models; location and layout decisions, job design analysis; project planning; quality control and the use of simulation in operations management.

**Courses:** ME41, ME42

**Prerequisites:** A knowledge of basic manufacturing processes

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MMB478 MECHATRONICS SYSTEMS DESIGN

This unit develops the student's ability in applying design for assembly manufacturing concepts and practical issues of design of automatic control systems for various applications. Topics are organised in two modules. Module 1: design for manufacturing processes and materials; sand casting; permanent mould casting; die casting and investment casting; design for forgings; sustainability in manufacturing; applications and programming of programmable controllers and computer based combinations in control of manufacturing and information systems in manufacturing. Module 2: essential components of hydraulic and pneumatic systems; hydraulic pumps, motors, valves, cylinders, accumulators; hydraulic system design and other related issues will be discussed.

**Courses:** ME40

**Prerequisites:** MMB371, MMB252

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► MMB492 HEALTH LEGISLATION AND THE MEDICAL ENVIRONMENT

This unit provides an introduction to the types of legislative control in the health and medical industries. It highlights the minimum requirements in relation to the role of medical engineers and their contribution to successful and ethical relationships with medical, health legislative and regulatory affairs professionals. Content includes: national and international legislative controlling bodies and codes (EC, TGA, FDA); structure and sources of legal system (State and Federal); Good Manufacturing Practice (GMP); ISO9000 Quality Systems; Total Quality Management; ethics committees and clearance; industry case studies.

**Courses:** ME48

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► MMB494 REHABILITATION EQUIPMENT DESIGN AND EVALUATION

Bioengineers working in the rehabilitation area require an understanding of the criteria associated with the needs and design of specific items of equipment for rehabilitation and the functionally impaired. The means of evaluating equipment performance in a clinical context is also needed because of the insight and feedback that it provides in the design cycle and the clinical implications of the design. This unit introduces students to many different areas of rehabilitation and the design of equipment to assist people with disabilities. There will be formal lectures and tutorials, some of which will be presented by practitioners from the different areas of rehabilitation. In addition, students will spend time on a

## UNIT SYNOPSES

clinical experience program working with a rehabilitation engineering team.

**Courses:** ME48

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ► MMB496 MODELLING AND SIMULATION FOR MEDICAL ENGINEERS

Computational modelling and simulation are widely used in engineering in general, and in specific areas of medical engineering. Modelling can be described as the process of determining analytical representations of physical elements for the purpose of investigating kinematic, kinetic and structural properties and performance. Content includes: introduction to MATLAB programming techniques; process of model creation; methods of analysis of determinate and indeterminate systems; simulation techniques and examples of advanced applications.

**Courses:** ME48

**Prerequisites:** MMB391

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ► MMB498 MEDICAL IMAGING AND IMAGE PROCESSING

To give the student medical engineer a broad introduction to the fundamentals of medical imaging and image processing. To provide the student with the skills to use personal computers and image processing software to optimise the display of medical images and extract quantitative information. Areas covered include: acquisition of medical images; image format and display; image reconstruction from projections, multiplanar reconstruction, 3D display, surface and volume rendering; image processing; image storage and transfer.

**Courses:** ME48

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** GP            **Semester:** 2

### ► MMB572 MANUFACTURING PLANNING AND CONTROL

This unit develops the student's ability in applying quantitative techniques in solving different types of manufacturing planning and control problems. Topics include: forecasting modelling, inventory control, materials requirements and plant capacity planning, production scheduling techniques and a study of modern manufacturing philosophies such as JIT.

**Courses:** IF57

**Credit points:** 12

**Campus offered:** GP            **Semester:** 2

### ► NRB100 ENVIRONMENTAL SCIENCE

General features of the aquatic, atmospheric, and terrestrial systems will be described. This will incorporate the main chemical, physical, and biological processes that influence their development. The evolution of these systems, and their interaction, will be considered. The human involvement is then examined, and its type, extent, and impact. To give some relevance to the global concepts presented, a range of examples will be given for the Australian environment and its resources, and human interaction with them.

**Courses:** ED50, SC01

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB230 PLANET EARTH

Focuses on geological principles, formation and classification of minerals, rocks and soil, the origin of the Earth and the solar system, stratigraphy, geological time, dating and geological history, fossils, structural geology and plate tectonics, and economic and applied geology.

**Courses:** ED50, SC01

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB232 ENVIRONMENTAL GEOLOGY

This unit covers landforms, their setting and distribution, and the weathered mantle of the earth, the regolith, and related to the various processes of physical and chemical weathering, erosion, mass wasting, subsidence and effects of climate. Drainage system morphology and patterns, catchment forms and processes within rivers are considered. Of major significance are the various types of hydrological processes, especially those at the land and water interface; the fundamentals

of groundwater occurrence are explained. Volcanic terrains are considered, as well as the distribution of volcanoes, type, products and impacts. Large scale factors such as global climate change and its implication are considered. The concepts of earth systems and scale are also considered. Other topics covered include coastal zones and estuaries, and general features of land management.

**Courses:** SC01

**Prerequisites:** NRB100 or NRB230, PCB142

**Corequisites:** PCB142 (with permission)

**Contact hours:** 4 per week    **Credit points:** 12

**Incompatible with:** NRB332

### ► NRB270 ANIMAL AND PLANT STRUCTURE AND FUNCTION

Emphasises the integration of major biochemical and physiological process within functioning organisms. Aspects of energy flow (photosynthesis and respiration) are considered. The structure of major organs and organ systems is described and related to their function. The regulation and coordination of organism function via biological feedback mechanisms, nervous and/or hormonal systems is outlined.

**Courses:** ED50, SC01

**Contact hours:** 4 per week    **Credit points:** 12  
**Semester:** 2

### ► NRB300 ENVIRONMENTAL MONITORING

Purpose, design and quality control of physical, chemical and biological monitoring programs. Fundamentals of data analysis. Methodologies of monitoring (variables, instruments, sampling strategies including location and frequency of observation, analytical protocols). Some principles of ecological monitoring.

**Courses:** SC01

**Prerequisites:** 72 credit points of science or health units

**Contact hours:** 4 per week    **Credit points:** 12  
**Semester:** 1

### ► NRB311 POPULATION ECOLOGY

A broad theoretical background in the major concepts of plant and animal ecology. Topics include: ecology of individuals, dynamics of single populations, life history and demography, interactions within and between populations, population regulation, behavioural ecology and plant ecology.

**Courses:** ED50, SC01

**Prerequisites:** NRB100 or LSB118

**Contact hours:** 4 per week    **Credit points:** 12

**Semester:** 1

### ► NRB312 EXPERIMENTAL DESIGN

Emphasises practical considerations of field and laboratory-based experimentation in ecology, and provides experience in problem assessment, definition, formulation of testable hypotheses and experimental design.

**Courses:** SC01

**Prerequisites:** MAB101

**Contact hours:** 4 per week    **Credit points:** 12

**Semester:** 1

### ► NRB331 SEDIMENTARY GEOLOGY

Types of sediments and their classifications and occurrence; textures; grain size and analysis; and sedimentary depositional environments. The analysis of maps and sedimentary successions is approached using sediment type, stratigraphy. Applications considered cover environmental studies, coastal and land management, and mineral, petroleum and other resource assessment.

**Courses:** SC01

**Prerequisites:** NRB230

**Corequisites:** NRB333

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB333 MINERALOGY

Crystallography, symmetry, Miller indices, axial ratios, crystal forms, classes, systems, lattices, unit cell, crystal chemistry, crystal growth and defects, atomic structure, periodic table, ions and packing, Pauling's rules, bonding and mineral properties, substitution, solid solution, polymorphism, pseudomorphism. Classification of minerals; systematic treatment of the physical, chemical and structural properties of minerals; techniques of mineral analysis; theory and identi-

fication of minerals in transmitted light; optical properties and identification of minerals in thin section, and grain mounts.

**Courses:** SC01

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB370 INVERTEBRATE BIOLOGY

The major focus of this unit will be examination of the diversity of invertebrate functional systems, behaviour, and life histories. These will be viewed in an evolutionary context. A brief overview of the diversity, phylogeny, and classification of invertebrates will be provided. Consideration will be restricted to the levels of superphylum and phylum.

**Courses:** SC01

**Prerequisites:** LSB118

**Contact hours:** 4 per week    **Credit points:** 12

**Semester:** 1

### ► NRB371 PLANT BIOLOGY

Ever wondered what the first plant to crawl out of the sea looked like? This unit will take you on a journey to show you how they looked and lived. We'll use your imagination, some great images and learning experiences to show you how plants evolved into some of the most enormous organisms on the planet. Ever wanted to visit a forest essentially unchanged for 80 million years? Join us for a virtual tour - we'll take you there. We'll talk about the distribution and abundance of the most successful of the invaders of terrestrial environments - the plants. We'll also discuss some of the unique adaptations of Australian plants to their environment. The time machine awaits - first stop - 440 million years ago, when our weather person reports a 20% chance of comets and heavy rain with intermittent volcanic activity - oh, and also the first plants to colonise the land.

**Courses:** ED50, SC01

**Prerequisites:** LSB118

**Contact hours:** 4 per week    **Credit points:** 12

**Semester:** 1

### ► NRB400 ENVIRONMENTAL SYSTEMS

Develops a view of the environment as a nested hierarchy of systems in which man-environment interactions are placed in perspective. The systems approach provides a framework of the environment that allows the environmental scientist to dismantle the environment for analysis and then reassemble it so that the results of analysis can be incorporated into an integrated synthesis. This systems approach recognises that changes in one compartment of the environment affect others. This unit provides a standardised approach to the study of environmental systems, focussing on mass and energy flows between them. It shows how fundamental thermodynamic laws, relating to the conservation of mass and energy, can be applied to environmental systems to improve understanding of environmental processes.

**Courses:** SC01

**Prerequisites:** 72 credit points of science units

**Contact hours:** 4 per week    **Credit points:** 12

**Semester:** 2

### ► NRB410 GENETICS AND EVOLUTION

This unit provides a basic understanding of the mechanisms of inheritance using Mendelian Genetics as a foundation. These principles are extended to develop a clear understanding of the mechanisms and processes that drive evolution in natural populations. Topics include the physical basis of heredity, Mendelian and non-Mendelian inheritance patterns, genotype/environment interactions, quantitative traits, evolutionary theory, adaptation and natural selection, sexual selection and the evolution of life histories.

**Courses:** ED50, SC01

**Prerequisites:** LSB118

**Contact hours:** 4 per week    **Credit points:** 12

**Semester:** 2

### ► NRB411 ECOLOGICAL METHODS

The theory and practice of methods to determine and measure important ecological parameters and characteristics. These methods are essential for the study of biological populations and communities. Content includes estimation of population size, survivorship and other demographic parameters, determination of dispersion patterns,

## UNIT SYNOPSES

detecting competition, and vegetation classification.

**Courses:** SC01

**Prerequisites:** NRB311, NRB312

**Contact hours:** 4 per week    **Credit points:** 12  
**Semester:** 2

### ► NRB434 STRUCTURAL GEOLOGY AND FIELD METHODS

Considers the deformation of geological materials and includes the geometry of map-scale structures. Covered in the unit are classes of structures: description and analysis of joints, faults, folds, boudinage, cleavage, foliations, and lineations. Also examined are principles of deformation: normal and shear stress, brittle fracture, strain and rigid motion, brittle and plastic deformation, measurement of strain, homogeneous and non-homogeneous strain, Mohr diagrams. Dynamic aspects are considered such as deformation mechanisms: rheological models and stress-strain relations, elastic limit, plastic deformation within crystals, pressure solution, recrystallisation, creep, fracture and brittle behaviour including the role of microcracks, pore-fluid pressure, preexisting fractures, heat and lithology. Practical work includes a series of assignments of increasing complexity, culminating with a course project which includes geological map interpretation and cross section construction. Field work consists of 3 trips of increasing difficulty designed for the construction of geological maps and analysis of deformed rocks. This includes a week long trip and preparation of geologic reports.

**Courses:** SC01

**Prerequisites:** MAB100, NRB230, NRB331

**Corequisites:** NRB432

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB435 ORE GENESIS

Focuses on the formation of ore deposits, and provides a basis for the exploration of mineral deposits. A wide variety of deposits are studied, with an emphasis on metallic ore deposits, their characteristics and environments of deposition. Ore forming processes are discussed, together with tectonic perspectives, modern ore formation, ore deposit models, and techniques of ore deposits.

**Courses:** SC01

**Prerequisites:** NRB430

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB436 INTRODUCTION TO IGNEOUS AND METAMORPHIC PETROLOGY

An introduction to the description, classification and origin of igneous and metamorphic rocks. Practical development of lithologic and petrographic abilities to identify mineral assemblages, classify rocks, and interpret textures. Field and theoretical constraints on the petrogenesis of rocks are discussed in lecture. Field study is an essential component of the unit.

**Courses:** SC01

**Prerequisites:** NRB333

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP    **Semester:** 1

### ► NRB437 STRATIGRAPHY AND DEPOSITIONAL ENVIRONMENTS

Focuses on advanced facies analysis of additional depositional environments and stratigraphic analysis including lithostratigraphy, biostratigraphy and chronostratigraphy. An introduction to sequence stratigraphy and subsurface geology utilising a variety of different data sets is also covered. Applications include both exploration in coal and hydrocarbon industries and hydrogeology and environmental geology areas.

**Courses:** SC01

**Prerequisites:** NRB331

**Contact hours:** 4 per week    **Credit points:** 12  
**Semester:** 2

### ► NRB440 ENVIRONMENTAL CHEMISTRY

Introduction to biogeochemical cycles. Natural water bodies - oceans, flowing and non-flowing surface water, ground water. Solutes and equilibria in natural water, chemistry of water pollutants. Indicators of water quality. The atmosphere - structure and energy balance, air pollutants.

Hazardous substances in the environment. Introductory ecotoxicology. Chemistry of the regolith and soils, biogeochemical weathering processes.

**Courses:** SC01

**Prerequisites:** 72cp of science units including PCB140 or PCB142

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB470 VERTEBRATE BIOLOGY

The core modules for this unit cover evolution and physiological capabilities (with particular emphasis on the brain). Other modules provide opportunities to enhance your knowledge of particular aspects of vertebrate biology of interest to you, or to learn how to identify Australian vertebrates.

**Courses:** ED50, SC01

**Prerequisites:** NRB270

**Contact hours:** 4 per week    **Credit points:** 12  
**Semester:** 2

### ► NRB500 ENVIRONMENTAL MODELLING

This unit builds the capacity to develop understanding of the interdependent relationships that characterise environmental systems via model building. Models will be developed to study the function of simple environmental processes by adopting a systems approach. This approach will be presented as a foundation for informed environmental management.

**Courses:** SC01

**Prerequisites:** NRB400

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB501 MAPPING AND MODELLING OF NATURAL RESOURCE DATA

An introduction to the concepts, theory and practice of GIS essential to the understanding of spatial data analysis methods in environmental and natural resource related applications. Key elements of GIS examined are: map projections, coordinate systems, geographic data structures, data acquisition, data visualisation, error handling, and environmental decision support. Practical work uses database software and a GIS package to solve spatial analysis problems within a natural resource management context. Critical analysis, problem solving, written communication and time management skills are embedded within the curriculum.

**Courses:** ED50, SC01

**Prerequisites:** 72 cp of Science units

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB510 POPULATION GENETICS

An extension of NRB410 Genetics and Evolution. Topics include: the genetic structure of populations and processes of evolutionary change; natural selection, inbreeding and adaptation, species and speciation theory; ecological genetics and the genetics of behaviour.

**Courses:** SC01

**Prerequisites:** NRB410

**Contact hours:** 4 per week    **Credit points:** 12  
**Semester:** 1

### ► NRB511 POPULATION MANAGEMENT

Develops the theoretical treatment of populations as a unit of study and integrates the content of previous ecology units into approaches for the management of biological populations. The unit focuses on those population/resource interactions that are relevant to conservation, harvesting and pest control.

**Courses:** SC01

**Prerequisites:** NRB311, NRB411

**Contact hours:** 4 per week    **Credit points:** 12  
**Semester:** 1

### ► NRB533 ADVANCED GEOLOGICAL MAPPING

A field excursion of approximately 3 weeks duration, conducted during the semester break. The excursion emphasises geological mapping skills in lithologically and structurally varied regions. Past excursions have focussed on the Mt Isa region and have been run in collaboration with the University of Queensland. Lectures and tutorials prior to the excursion review and develop mapping and geological interpretation techniques. Students are expected to cover their transport expenses to the field site, as well as accommodation and food costs during the excursion.

**Courses:** SC01

**Prerequisites:** NRB431

**Corequisites:** NRB530, NRB531

**Contact hours:** 1 per week plus 3 week field trip  
**Credit points:** 12

### ► NRB535 GEOLOGY OF FOSSIL FUELS

Focuses on: coal properties, classification, genesis, and analysis; coal hand specimen studies and microscopy; hydrocarbon generation from coal and oil shale; coalfield geology and subsurface mapping techniques; basin analysis; coal production and economics; origin and characteristics of petroleum fluids, including generation, accumulation and migration through time and space; study of structural and stratigraphic traps, and reservoir rock characteristics; application of drilling, logging, and geophysical and correlation techniques, including seismic stratigraphy; economics of petroleum production.

**Courses:** SC01

**Prerequisites:** NRB331

**Contact hours:** 4 per week    **Credit points:** 12

### ► NRB536 PETROLOGY AND GEOCHEMISTRY

Through lecture, discussion and problem solving exercises, this unit introduces the application of geochemistry, phase equilibria, and thermodynamics to understand the origin and evolution of igneous and metamorphic rocks. Problem-solving exercises synthesise field, petrographic and geochemical data to develop quantitative petrogenetic models and enhance critical thinking and written communication skills. Field study is an important component of this unit.

**Courses:** SC01

**Prerequisites:** NRB436

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP    **Semester:** 1

### ► NRB571 MARINE BIOLOGY

This unit gives a general overview of marine ecosystems and their importance to humankind. The unit aims to stimulate thought, and to generate ideas, by reviewing the range of approaches taken to manage, and conserve, marine resources. Emphasis will be given to Australian coastal marine systems: their importance, care, and abuse. The unit will involve a compulsory 3 day field trip to a local coastal ecosystem.

**Courses:** ED50

**Contact hours:** 4 per week    **Credit points:** 12  
**Semester:** 1

### ► NRB572 TERRESTRIAL ECOSYSTEMS

This unit examines the key physical and biological processes that influence the range of terrestrial ecosystems. It examines the geological, climatic and historical processes that have shaped the evolution and ecology of Australia's terrestrial ecosystems and the ecological properties of natural and human modified systems. Content includes the significant phases in the evolution of the Australian flora and fauna, principal components and adaptations of the modern Australian flora and fauna, theories pertinent to explanations of biogeographical distributions, soil formation, structure and biology, physical processes in terrestrial systems, structure and characteristics of terrestrial ecosystems, and terrestrial ecosystem case studies.

**Courses:** ED50, SC01

**Prerequisites:** NRB371 or NRB311

**Contact hours:** 4 per week    **Credit points:** 12  
**Semester:** 1

### ► NRB600 ISSUES IN ENVIRONMENTAL SCIENCE

This unit explores issues in environmental management, their multi-disciplinary nature and the processes of environmental management decision making. The role of science and ecologically sustainable development in the development of policy for environmental management provides a focus and the underlying themes for this unit. Environmental management aims for 'sustainability' which is multifaceted. Environmental policy must be founded on scientific knowledge about the environment, but to be effective, it must also be integrated with social, economic, political and technological policies. Therefore, this unit discusses contemporary environmental management issues and the associated

## UNIT SYNOPSES

linkage between these, scientific information and environmental decision-making.

**Courses:** ED50, SC01

**Prerequisites:** 12 credit points in Level 3 science units, NRB400 recommended

**Contact hours:** 4 per week **Credit points:** 12

### ► NRB610 ECOLOGICAL APPLICATIONS

This unit integrates the content of a number of previous and concurrent ecology units into applied approaches to the management of populations and systems. The unit employs concepts from Population Ecology, Population Management and Conservation Biology and builds methodologies and concepts necessary for an applied approach to conservation and pest management issues. A field trip provides the vehicle for developing these themes. Content includes the collection, collation and preparation of biological resource material relevant to a case study, the diagnostic features and identification of species of relevance, factors involved in the design of a large-scale field study, field techniques necessary to gain an understanding of species/habitat interactions, and the analysis and interpretation of large field data sets.

**Courses:** SC01

**Prerequisites:** NRB511 or NRB510

**Contact hours:** 4 per week **Credit points:** 12

**Semester:** 2

### ► NRB611 CONSERVATION BIOLOGY

Conservation Biology is the application of ecological theory and principles to the problem of the maintenance of viable populations of rare, threatened or endangered species, or ecological systems. The unit integrates ecological and genetic material covered in earlier units to provide an understanding of factors that enable the maintenance or enhancement of populations. The unit examines biodiversity and its determinants, the process of extinction, population viability analysis and the diagnosis and treatment of population declines, habitat fragmentation, metapopulation processes and the design of natural reserves, and conservation genetics.

**Courses:** SC01

**Prerequisites:** NRB311 and NRB410

**Contact hours:** 4 per week **Credit points:** 12

**Semester:** 2

### ► NRB633 HYDROGEOLOGY

Main focus on: the origin, occurrence and movement of groundwater; aquifer properties; chemistry and quality of groundwater; exploration methods for groundwater; drilling methods and equipment and well testing equipment; well hydraulics and testing, and flow calculations; assessment of groundwater problems - both supply and quality; modelling approach to groundwater assessment. Students will obtain practical experience with pump tests, chemical analysis of waters and will be given introduction to computer modelling. There will be interaction with government and private sector hydrogeologists, and field site visits.

**Courses:** SC01

**Prerequisites:** NRB232

**Contact hours:** 4 per week **Credit points:** 12

### ► NRB635 PLATE TECTONICS AND ADVANCED STRUCTURAL GEOLOGY

Considers geological observations in the context of a unifying theory. Examines lithospheric plates, plate geometries, Earth morphology, relative and absolute plate movements, stresses of plate interactions, types of plate boundaries, and orogenesis. Examines the development of the most important geologic theory of the 20th century.

**Courses:** SC01

**Prerequisites:** NRB331, NRB432, NRB434, NRB534

**Contact hours:** 4 per week **Credit points:** 12

### ► NRB636 STRATIGRAPHY AND BASIN ANALYSIS

Focuses on advanced stratigraphic and basin analysis primarily utilising subsurface data. Sequence stratigraphic models for the dominant depositional systems will be explored with emphasis on how they change owing to temporal shifts in tectonic, eustatic and climatic parameters. Integrated lithostratigraphic, biostrati-

graphic, geophysical, and geochemical data sets will be introduced as fundamental aspects of basin analysis.

**Courses:** SC01

**Prerequisites:** NRB333, NRB437

**Contact hours:** 4 per week **Credit points:** 12

**Semester:** 2

### ► NRB640 PHYSICAL CHEMISTRY OF THE ENVIRONMENT

Develops the more advanced aspects of physical and chemical processes in the ambient environment, with a specific focus on thermodynamics, chemical equilibria and kinetics. The emphasis will be on the development, validation and application of different analytical and numerical models.

**Courses:** SC01

**Prerequisites:** NRB440, PCB305

**Contact hours:** 4 per week **Credit points:** 12

### ► NRB672 MARINE AND FRESHWATER ECOSYSTEMS

This unit examines the structure and function of marine and freshwater ecosystems. Aquatic ecosystems cover the majority of the planet and their management is important in terms of maintaining water quality for human utilisation, harvesting resources, and for species conservation. The unit emphasises the physical and ecological properties that are common to all aquatic systems, but also identifies those properties that are unique to particular systems. Content will cover aquatic ecosystems, their different forms and extent, the chemical and physical properties of aquatic environments, circulation and transport processes in marine and freshwater systems, the structure and characteristics of the different aquatic environments and human impact and management in marine and freshwater systems.

**Courses:** ED50, SC01

**Prerequisites:** NRB311

**Contact hours:** 4 per week **Credit points:** 12

**Semester:** 2

### ► NRB720 PROJECT

A substantial project in the appropriate area of science undertaken in conjunction with a supervisor and through interaction with lecturing and technical staff of the School of Natural Resource Sciences. The unit provides the opportunity for students to identify and solve scientific problems logically and creatively. Students are required to relate the project research to published work in the field of study. Each project is assessed on the basis of an extensive written report and a formal seminar or scientific poster.

**Courses:** SC60

**Credit points:** 60

### ► NRB730 RESEARCH METHODS AND STRATEGIES

Two semester unit with its main focus to develop the research planning, abilities and skills of the student. The major assessable components are: literature review, seminars, informal presentations and discussions on subjects relevant to the research topic, and advanced skills workshops and exercises.

**Courses:** SC60

**Credit points:** 24

### ► NRB735 ADVANCED STUDIES IN RESOURCE SCIENCES

Provides an in-depth examination of a topic or synthesis of a subject through lectures, tutorials, discussions, independent study, practicals and/or field excursion. This unit has general structure, which can be developed to the specific requirements of each section of the school. An important aim is to develop inquiring and analytical thought at an advanced level. The unit may be conducted in the first part of semester 1, or could be conducted over two semesters.

**Courses:** SC60

**Credit points:** 12

### ► NRN100 READINGS IN NATURAL RESOURCE SCIENCES 1

A review of literature in an area of direct relevance to the research project. The review should be designed in conjunction with the supervisor and demonstrate: a broad appreciation of the literature, a critical appraisal of research to date

and the relevance of the research project within the framework of current understanding. Reviews should normally be approximately 5 000 words.

**Courses:** IF49, SC71, SC80

**Credit points:** 12

### ► NRN101 READINGS IN NATURAL RESOURCE SCIENCES 2

A companion unit to NRN100 that allows students to (a) prepare a review of a second area relevant to the research project or (b) consider a wider subject area in greater depth. If option (b) is chosen, a single review can qualify as total assessment for both NRN100 and NRN101. In this case, the review should normally be approximately 10 000 words and be a critical analysis of a substantial research area.

**Courses:** IF49, SC71, SC80

**Prerequisites:** NRN100

**Corequisites:** NRN100

**Credit points:** 12

### ► NRN102 SEMINARS IN NATURAL RESOURCE SCIENCES 1

A public seminar plus an extensive discussion period designed to provide positive feedback from staff and students on the proposed research project. The presentation should be designed in conjunction with the supervisor and include: background to the project area, specific objectives of the proposed project, methodology to be followed and possible outcomes. The seminar should normally be presented after the project outline has been developed and before any significant amount of research has been undertaken.

**Courses:** IF49, SC71, SC80

**Credit points:** 12

### ► NRN103 SEMINARS IN NATURAL RESOURCE SCIENCES 2

A public seminar plus an extensive discussion period designed to provide positive feedback from staff and students on the progress of the research project. The presentation should be designed in conjunction with the supervisor and include: project objectives, progress to date, preliminary data and problems for discussion. The seminar should normally be presented within 12 months (full-time) or 24 months (part-time) of commencement of the postgraduate program.

**Courses:** IF49, SC80

**Prerequisites:** NRN102

**Credit points:** 12

### ► NRN104 ADVANCED TOPICS IN NATURAL RESOURCE SCIENCES 1

Students develop an advanced understanding of a topic in the natural resource sciences that is highly relevant to the general area of their proposed research project. The structure and content is variable and can be tailored to the specific requirement of each project and the background of the student. A formal outline of the unit including objectives, content and assessment relevant to the individual course of study will be developed by the supervisor and approved by the Head of School. Content may include active participation in tutorials, workshops, laboratory/field techniques and components of advanced level undergraduate units. If components of advanced level undergraduate units are included, they should not contribute more than 70% of the total assessment.

**Courses:** IF49, SC71, SC80

**Credit points:** 12

### ► NRN105 ADVANCED TOPICS IN NATURAL RESOURCE SCIENCES 2

A companion unit to NRN104 that allows students to study a second area relevant to their area of study. The material presented in this unit must be distinct from that covered in NRN104. Students develop an advanced understanding of a topic in the natural resource sciences that is highly relevant to the general area of their proposed research project. The structure and content is variable and can be tailored to the specific requirement of each project and the background of the student. A formal outline of the unit outlining objectives, content and assessment relevant to the individual course of study will be developed by the supervisor and approved by the Head of School. Content may include active par-

## UNIT SYNOPSES

participation in tutorials, workshops and laboratory/field techniques and components of advanced level undergraduate units. If components of advanced level undergraduate units are included, they should not contribute more than 70% of the total assessment.

**Courses:** IF49, SC71, SC80

**Credit points:** 12

### ► NSB113 VALUES, CULTURE AND DIVERSITY

This unit will introduce students to the interrelationships between philosophical principles, cultural values, health behaviours and nursing. It will encourage students to consider their own values and the way in which these may impact on their interactions with patients/clients and will present a model for developing cultural safety within their nursing practice. A number of examples from contemporary Australian society will be drawn upon to enable students to understand health events and practices such as birth, health, illness, nutrition and communication from a range of perspectives.

**Courses:** NS40, NS48

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA **Semester:** 2

### ► NSB117 NURSING AND THE HEALTH CARE SYSTEM

The evolution of nursing as a discipline, contemporary roles of the nurse, the professional context of nursing practice, and caring and nursing practice are addressed in this unit. Content also includes health and wellness, the health-illness continuum, models of health and illness, and the structure and function of the Australian health care system including characteristics of Australia's health care system.

**Courses:** NS40, NS48

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► NSB118 HEALTH ASSESSMENT AND NURSING PRACTICE

This unit provides an introduction to critical thinking, problem solving and decision making in nursing practice; and the nursing process and nursing practice; and the nursing process and nursing practice. It considers the role, purpose and scope of nursing assessment for individuals and groups; principles and methods of data collection including symptom/problem exploration; frameworks for data collection; introduction to principles and methods of data analysis; and documentation and presentation of client data.

**Courses:** NS40, NS48, HL40, HL46

**Credit points:** 12

### ► NSB122 CLINICAL PRACTICE 1

This is the first in a series of five clinical practice units that provide the opportunity to experience the practice of nursing in real world settings and to develop the knowledge, attitudes and skills required for safe, competent practice as a beginning level registered nurse. This unit focuses on providing basic care to patients in hospital considering promoting a safe environment for patient care; managing basic care needs of patients and assisting with activities of daily living.

**Courses:** NS40, HL40, HL46

**Contact hours:** Includes 2 weeks off-campus clinical experience

**Credit points:** 12

### ► NSB212 CLINICAL PRACTICE 2

The main areas of content in this unit are: promoting a safe environment for client care, managing more complex patient care needs, and developing a professional approach to practice. Concepts addressed within these areas include; sterile techniques, barrier/reverse barrier nursing, principles of wound management, administration of parenteral medications; problem solving and decision making principles applied to the care of individuals with medical-surgical and mental health dysfunctions; clinical nursing therapeutics related to wound management, administration of fluid and nutritional therapies and techniques to promote oxygenation; principles of milieu, individual, group and family therapy in promoting mental health; values clarification and the provision of nursing care, legal and ethical dimensions

of practice, prioritisation of patient care and time management.

**Courses:** NS40, HL40, HL46

**Prerequisites:** NSB122

**Contact hours:** Includes 4 weeks off-campus clinical experience

**Credit points:** 12

**Campus offered:** CA

### ► NSB222 CLINICAL PRACTICE 3

This unit continues to develop skills in identifying health problems, developing plans of nursing care, delivering care, evaluating client outcomes and understanding of the role of the nurse in the health care team. Particular concepts addressed include: cytotoxic and radiation hazards in the patient care environment; complex wound management, clinical nursing therapeutics related to the administration of blood and blood products, management of colorectal and urinary diversionary procedures, urinary catheterisation, ostomy management; working as a member of the nursing team and management of care for assigned groups of patients.

**Courses:** NS40, HL40, HL46

**Prerequisites:** NSB212

**Contact hours:** Includes 2 weeks off campus clinical experience

**Credit points:** 12

**Campus offered:** KG

### ► NSB223 MENTAL HEALTH NURSING

Nurses need to be able to identify and care for people suffering from mental health problems. Topics addressed in this unit include the mental health continuum and major theoretical approaches to mental illness; understanding and nursing people across the lifespan who suffer from anxiety disorders, personality disorders, bipolar disorder, depression, schizophrenia, substance use and abuse, cognitive impairment disorders, eating disorders; the nurse's role with respect to treatment modalities and assessing mental status; and the experiences of persons living with a mental illness and families caring for someone with a mental illness.

**Courses:** NS40, NS48, HL40, HL46

**Contact hours:** 3 per week for 9 weeks

**Credit points:** 12

**Campus offered:** KG **Semester:** 1

### ► NSB224 RESEARCH APPROACHES IN NURSING

This unit provides an introduction and overview of research in nursing. It covers the purpose of research, the relationship between research and nursing practice, the notion of nursing knowledge, the process of research, ethical issues related to research and strategies for critiquing research reports. Particular emphasis will be placed on selected methodologies that are used to research nursing practice, and quantitative and qualitative data collection and data analysis.

**Courses:** NS40, NS48

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 1

### ► NSB225 PROMOTING HEALTH ACROSS THE LIFESPAN

Concepts addressed in this unit include the exploration of health and wellbeing for individuals throughout the lifespan, families and communities; nursing models of health promotion; factors that influence health beliefs and behaviours, and the capacity to maintain health; principles of health teaching; working with individuals and groups to promote health; the role of the nurse in promoting health with people of all ages (children, adolescents, adults and the elderly), families across the life cycle and groups; promoting health and well being for dying clients and their families.

**Courses:** NS40, NS48, HL40, HL46

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► NSB312 FAMILY AND COMMUNITY NURSING

Advances in health care provision and consumer participation in health care offers nurses the opportunity to practice in many contexts including the community. Community and family nursing practice interfaces with care provided to individuals in hospital care. Families are an integral

component of care in all contexts and so nurses need to focus care with individuals, the family and the community. Nurses working within a Primary Health care framework and approach to health care need to further develop nursing skills to work effectively with population groups, building and supporting the community in determining their own health care and lifestyles. The unit focuses on family assessment and intervention. Community assessment and intervention is also studied in the context of a Primary Health Care philosophy and health promotion framework that addresses the five action areas of the Ottawa Charter to provide an opportunity for students to develop knowledge and skills in the broadest context of health. The unit will provide students with a theoretical foundation as well as application opportunities through the use of a case study approach. The unit will be of particular interest to students who want to work in community practice areas and equally to those who want to further explore issues related to the integration of hospital and community care.

**Courses:** NS40

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► NSB321 PROFESSIONAL NURSING DEVELOPMENT

Highlights the explicit link between clinical practice and theoretical knowledge. Post-registration and final semester pre-registration students will be assisted to further develop skills in reflective practice and peer consultation as strategies to support a more critical approach to clinical practice. A variety of topics will be addressed through a combination of self-directed learning activities and small group discussion sessions.

**Courses:** NS40, NS48, HL40, HL46

**Prerequisites:** NSB501

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** KG, EXT **Semester:** 2

### ► NSB322 CLINICAL PRACTICE 4

This unit facilitates the development and application of knowledge and skills necessary for the provision of nursing care in medical/surgical health settings at an advanced level. The unit includes four weeks of off-campus placement. Emphasis is placed on students' communication skills, critical thinking and decision-making skills, technical skills and professional development skills, and the assumption of increased responsibility for patient care.

**Courses:** NS40, HL40, HL46

**Prerequisites:** NSB222

**Contact hours:** 4 weeks off-campus clinical practice

**Credit points:** 12

### ► NSB324 MEDICAL-SURGICAL NURSING 1

The unit explores nursing assessment, care planning and care evaluation necessary for the provision of sound, safe nursing care for people in hospital and home-based settings with health problems related to neurological, sensory, musculo-skeletal dysfunctions, and infectious and immune related disorders. Issues addressed will include peri-operative nursing; acute and chronic pain management; the unconscious patient, post-stroke rehabilitation, and degenerative neurological conditions such as multiple sclerosis, sensory impairment and orthopaedic problems. Principles of nursing people with infectious and immune related disorders will also be covered.

**Courses:** NS40, HL40, HL46

**Prerequisites:** NSB118

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► NSB333 CLINICAL PRACTICE 5

This final clinical unit is designed to enable consolidation of knowledge and skills necessary for the provision of safe, effective patient care in preparation for a successful transition to beginning level practice as a registered nurse. The unit includes eight weeks off-campus placement. Emphasis is placed on student's proficiency in clinical practice, particularly their communication skills, critical thinking and decision making/problem solving skills, technical skills,

## UNIT SYNOPSES

reflective skills, care management skills and awareness of professional attributes and values.

**Courses:** NS40, HL40, HL46

**Prerequisites:** NSB322

**Contact hours:** Includes 8 weeks off-campus clinical experience

**Credit points:** 24

**Campus offered:** KG

**Semester:** 2

### ► NSB421 INDEPENDENT STUDY

This unit provides students the opportunity to independently explore a body of literature and/or research relevant to an area of interest in nursing. The unit enables students to extend their knowledge and understanding of a topic that is not specifically addressed elsewhere in the course. The emphasis, in this unit, is on the development of independent research, study and analytical skills. These skills are demonstrated first, in an assimilation of a range of materials into a clearly formulated written argument and second, in an oral presentation and discussion of the study material.

**Courses:** NS40

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► NSB423 MEDICAL-SURGICAL NURSING 2

The content of this unit will cover nursing assessment, care planning and care evaluation necessary to provide sound, safe nursing care for people with in a variety of settings with acute and/or long term health concerns and issues related to the gastro-intestinal, endocrine, genitourinary and integumentary dysfunctions. Issues addressed will include diabetes mellitus, renal failure, inflammatory bowel disorders, burns and wound management.

**Courses:** NS40, HL40, HL46

**Prerequisites:** NSB324, NSB118

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► NSB424 NURSING THERAPEUTICS

Nurses have a central role in assisting individuals, families and/or groups of people to make informed decisions about their care, supporting them through stressful and traumatic experiences and facilitating them to effectively manage health problems in order to optimise recovery, rehabilitation and/or habilitation. This unit focuses on the development of knowledge, skills and personal attributes that are fundamental to establishing and maintaining therapeutic relationships, educating clients about health care matters and counselling patients and families to promote health and well being.

**Courses:** NS40, NS48, HL46

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► NSB500 MEDICAL-SURGICAL NURSING 3

The content of this unit will address nursing assessment, care planning and care evaluation necessary to provide sound, safe nursing care for people in a variety of settings with complex acute and/or long term health concerns and issues related to cardiovascular, respiratory and oncological dysfunctions. Particular emphasis will be placed on life threatening illnesses and the provision of high dependency and palliative nursing care. Contemporary research and 'best practice' guidelines will underpin the content of this unit.

**Courses:** NS40, HL40, HL46

**Prerequisites:** NSB324, NSB423

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► NSB501 POLITICS, TECHNOLOGY AND NURSING

This unit provides an opportunity for students to develop and extend their knowledge about issues that directly inform the role of the health care practitioner. The framework of the unit is the political nature of nursing and the unit content addresses key processes and factors that are impacting on and reshaping nursing practice and health care provision. The subject areas include the changing nature of health care and nursing organisational and educational structures and rapid changes in technology. These political and technological changes require nurse practitioners

to continually re-evaluate the contexts of their practice.

**Courses:** NS40, NS48, HL40, HL46

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► NSB600 INTRODUCTION TO NURSING CHILDREN AND CHILDBEARING FAMILIES

This unit provides an overview of the theoretical concepts and clinical application principles for practice in the areas in providing nursing and midwifery care for children and childbearing families. The emphasis is upon the childbearing process and the developmental stages of childhood and family dynamics. This is viewed as a normal process of growth and development, which will be affected by social, economic, legal and cultural factors. The focus will be on the promotion and maintenance of health.

**Courses:** NS40, HL40

**Prerequisites:** All 1st and 2nd year NS40 units

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► NSB602 PAIN MANAGEMENT AND CONTEMPORARY NURSING PRACTICE

Making decisions about patient's pain and its management is a key component of nursing practice across a wide variety of patient groups and clinical settings. This unit examines the concept of pain and explores aspects of the nurse's role in relation to pain relief. It builds on introductory concepts that have been addressed earlier in the program through more detailed exploration of, and reflection upon selected concepts.

**Courses:** NS40

**Prerequisites:** NSB500

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** EXT

**Semester:** 2

### ► NSB603 INTRODUCTION TO CARDIOTHORACIC NURSING

Cardiovascular disorders are commonly encountered by nurses practicing a variety of clinical settings. This unit provides an overview of cardiothoracic nursing and encompasses theoretical concepts specific to this specialty as well as related clinical skills. It builds on introductory concepts that have been addressed earlier in the program through more detailed exploration of and reflection upon selected concepts.

**Courses:** NS40, HL40

**Prerequisites:** NSB500

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► NSB604 INTRODUCTION TO DEMENTIA AND FAMILY CARE

The growing challenges of caring for increasing numbers of older people experiencing dementia is well documented. Through a focus on Alzheimer's Disease this unit will assist you to respond to the challenges of caring for older people with dementia, and their families, in a community health context.

**Courses:** NS40, HL40

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► NSB605 NURSING IN A TECHNOLOGICAL WORLD

Technology is of extraordinary importance to nursing and is significant to understanding and practicing within contemporary health care contexts. Nurses are responsible for an increasingly technological orientated health care system dominated by administrative and bureaucratic structures. Nurses in all specialties of practice are required to care for their patients and develop technical knowledge and skills. Nurses are required to not only manipulate machinery and interpret the world around us but take on increasingly varied and complex roles and responsibilities associated with the emergence of technology. Adequate insight into technology is vital for advancing nursing practice, research, theory and education. This unit is designed to establish insight into the link between technology, clinical practice and nursing knowledge, highlight the learning opportunities available in the changing workplace, and model a process of ongoing professional development. The unit

seeks to relate nursing practice to knowledge development associated with technology, the experience of patients and nurses, and the development of a professional and informed understanding of technology. Students gain insight into the relationship between nursing, technology, and the modern health care experience.

**Courses:** NS40, HL40

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

**Semester:** 2

### ► NSN002 KEY ISSUES IN CHILD AND YOUTH HEALTH NURSING

This unit addresses contemporary issues in child and youth health, to provide the basis for further study in this field. A Primary Health Care framework will be used to consider issues that impact on the health of children and young people. In addition key policy frameworks will provide direction for study in the unit. The unit will consider the impact of social determinants on child, youth and family health and examine current strategies to address such impacts. Students will have the opportunity to examine local programs and strategies aimed at improving health outcomes.

**Courses:** NS35, NS64, NS85

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

### ► NSN003 PRINCIPLES OF PAEDIATRIC, CHILD AND YOUTH HEALTH NURSING

Students in this unit are introduced to issues facing nursing when providing care for children and families in the acute and community service environment. The unit presents an overview of the contemporary health problems faced by the Australian child and family and explores nursing interventions that enhance adaptation and health.

**Courses:** NS35, NS64, NS85

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

### ► NSN004 ACUTE PAEDIATRIC NURSING

This unit is designed to provide registered nurses with advanced knowledge and skills to enable them to provide safe and competent care to children experiencing acute paediatric illness. This unit will focus on acute health problems in children, employing clinical assessment, problem solving and critical thinking skills. Following completion of this unit the registered nurse will be able to demonstrate knowledge and skills in the nursing management of acute and chronic health problems within paediatric clinical practice.

**Courses:** NS35, NS64, NS85

**Prerequisites:** NSN003

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

### ► NSN005 COMMUNITY CHILD AND YOUTH HEALTH NURSING

This unit is designed to provide a sound basis for nursing practice in the area of community child and youth health. Students will examine contemporary issues relating to their professional role in caring for children, youth and families within the community context. The unit adopts a primary health care approach to examine the nurses' role in primary and secondary prevention, in supporting families in the community and in health education and community development.

**Courses:** NS35, NS64, NS85

**Prerequisites:** NSN003

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

### ► NSN006 SPECIALISATION IN PAEDIATRIC, CHILD AND YOUTH HEALTH NURSING

This unit will provide students with clinical knowledge and understanding in a selected area of paediatric or child and youth health speciality. The unit is based on a learning contract that will include both theoretical and clinical learning activities and assessment.

**Courses:** NS35, NS64, NS85

**Prerequisites:** NSN003, NSN002

**Contact hours:** Negotiable

**Credit points:** 12

**Campus offered:** KG, EXT

## UNIT SYNOPSES

### ► NSN311 CLINICAL STUDIES IN MIDWIFERY A

This unit provides the opportunity for students to develop the clinical knowledge and skills in the areas of antenatal, postnatal assessment and care as well as an introduction to the assessment and care for the birthing woman. The focus in this unit is midwifery practice in the area of uncomplicated pregnancy and birth. Clinical activities and focused assessment will enable the student to incorporate theoretical, conceptual and practical knowledge, attitudes and skills required to care for the childbearing woman, her infant and family.

**Courses:** NS68, NS85

**Corequisites:** NSN321

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► NSN321 FOUNDATIONS OF MIDWIFERY PRACTICE

This unit provides a foundation in the theoretical concepts and clinically applied principles for practice as a midwife. Emphasis is placed on the childbearing process as a normal and non-pathological process, during which the midwife, in collaboration with the woman, family, and other health professionals, provides midwifery care.

**Courses:** NS68, NS85

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG

### ► NSN322 COMPLEX ISSUES FOR CHILDBEARING FAMILIES

This unit provides students with an opportunity to develop further and expand on the theoretical knowledge and skills gained in Foundation of Midwifery Practice and Clinical Studies in Midwifery A. The unit requires application of the principles and practices acquired in the prerequisite unit. While childbearing is assumed to be a normal non-pathological process, and inherently safe, it is acknowledged that specialised practitioners must be able to recognise and act on changing events. These changes reflect complications/deviations from the normal.

**Courses:** NS68, NS85

**Prerequisites:** NSN321, NSN311

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG

### ► NSN323 CLINICAL STUDIES IN MIDWIFERY B

This unit provides the opportunity for students to consolidate the professional knowledge and skills which they have acquired in other units. Students will be facilitated to incorporate theoretical, conceptual and practical knowledge, attitudes and skills required to care for the childbearing women, her infant and family.

**Courses:** NS68, NS85

**Prerequisites:** NSN321, NSN311

**Corequisites:** NSN322

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG

### ► NSN506 CLINICAL PROJECT

This unit offers students the opportunity to implement a project of clinical relevance and value to lead to the resolution of practical issues facing nursing. It advances and extends the student's learning from their clinical speciality and the supporting units.

**Courses:** NS85

**Contact hours:** Negotiated with Course Coordinator

**Credit points:** 24

**Campus offered:** KG, EXT

### ► NSN507 CONTEMPORARY PRACTICE ISSUES

This unit allow students to explore current issues and develop their understanding through application of relevant theoretical frameworks to nursing practice in selected speciality areas. Students undertaking this unit will examine social, political and economic factors that shape and have shaped nursing practice, analyse factors influencing the organisation of nursing practice, and critically apply a theoretical framework to current issues relevant to nursing practice.

**Courses:** NS64, NS85

**Contact hours:** Negotiated with Course Coordinator

**Credit points:** 12

**Campus offered:** KG, EXT

### ► NSN508 ADVANCED READINGS IN NURSING

This unit provides the opportunity for students to access and review a body of literature relevant to an area of individual interest in nursing. Students will extend their knowledge and understanding of a topic which is not specifically addressed elsewhere in the course. In addition, students undertaking this unit will have the opportunity to develop advanced skills information retrieval, critical analysis and writing for publication.

**Courses:** NS64, NS85

**Contact hours:** Negotiated with Course Coordinator

**Credit points:** 12

### ► NSN509 SPECIAL TOPIC

NSN509 Special Topic is a unit that provides students the opportunity to explore in-depth an area of special interest in health and the professions which may be available from local or visiting scholars. Further, the unit offers students learning experiences through a range of educational strategies, for example, individual learning contracts, group learning contracts, group learning encounters and distance mode. The unit enables students to capitalise upon important learning opportunities which otherwise might not be possible.

**Courses:** NS64, NS85, HL88, PU88

**Contact hours:** Negotiated with Unit Coordinator

**Credit points:** 12

### ► NSN515 CLINICAL LEADERSHIP AND MANAGEMENT

This unit aims to extend students' understanding of contemporary issues and trends in the development of leadership in professional practice, strengthen their abilities to provide effective leadership and further develop skills in peer consultation and reflective practice as strategies to support a critical approach to the provision of leadership in the workplace. The unit addresses strategic thinking and planning; organisational and interpersonal communication; decision making; team building; working effectively in teams; multidisciplinary teams; managing conflict; facilitating change; and creating growth-producing work environments. It also addresses nursing perspectives on human resource management; staff allocation; financial management; staff allocation; financial management; budgeting; cost centre management; project development and management; policy development and implementation; and promoting quality outcomes.

**Courses:** NS64, NS85, HL90

**Contact hours:** 3 per week **Credit points:** 12

### ► NSN516 SEXUAL REPRODUCTIVE HEALTH

This unit will bring together current research and evidence-based practice and information as well as, a health-oriented approach to the subject of sexuality and reproduction. The purpose of this unit is to highlight the fundamental issue that even through screening programs have emerged and improved women's health, women continue to have health problems that are unique to them as women. The aim of this unit is for the student to come to the understanding that a woman's sexual health encompasses not only the medical and physical components of sexual activity but a holistic understanding of physical and mental health. These are seen as being influenced by self-esteem, values, culture and socio-economic factors as well as societal influences. This unit aims to increase the knowledge of the student on all aspects of women's sexual health through the format of adult learning principles.

**Courses:** NS34, NS39, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

### ► NSN517 WOMEN'S HEALTH ISSUES

This unit provides students with opportunities to develop and expand their theoretical knowledge and skills in the area of women's health, and utilises the primary health care framework in considering the major objectives for helping

women achieve optimal health as documented in women's health policy. This unit aims to make primary health care professionals aware of the broader social context in which service, delivery and care take place.

**Courses:** NS36, NS64, NS85, HL88, PU88

**Contact hours:** 3 per week **Credit points:** 12

### ► NSN523 CLINICAL STUDIES

This unit aims to further develop and consolidate knowledge and skills in a selected clinical speciality. This unit will enable students to develop their skills in clinical judgement, and decision making in a speciality area of practice, as well as expanding their skills in establishing and maintaining effective relationships with clients and other health professionals. Students will be encouraged to demonstrate a reflective, self-evaluative approach to practice, and develop strategies that would enable the practitioner to facilitate change with respect to their speciality area of practice.

**Courses:** NS64, NS85

**Contact hours:** Negotiable

**Credit points:** 12

### ► NSN622 CONTEXTS OF COMMUNITY PRACTICE

This unit aims to provide students with a broad appreciation of the major components of community practice and the socio-political, economic and historical context within which it operates. Foundation principles of primary health care, including community participation, public health and health promotion are explored analysing the benefits and barriers of each. The student is then encouraged to articulate their vision for the community practice, explore their role within a multi-disciplinary interface, and examine cultural, legal and ethical issues which impact in the context of their own practice.

**Courses:** NS34, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

### ► NSN624 COLLABORATIVE PRACTICE IN THE COMMUNITY

This unit aims to enable students to recognise opportunities and niche markets for partnership development. The skills that the students will learn will assist with the development of partnerships using personal influence and political savvy with other stakeholders. With current finite resource allocation dictating that partnerships must be able to maximise utilisation and creativity in funding, different models of partnerships will be explored and analysed for appropriateness to the students practice needs. The benefits of collaborative relationships within and beyond multidisciplinary partnerships will be debated with visioning to achieve new goals in health care encouraged to result in better outcomes for the client and the community.

**Courses:** NS34, NS39, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

### ► NSN625 PROJECT MANAGEMENT FOR COMMUNITY PRACTICE

Students will achieve considerable insights into the complexity of community development processes in the broader socio-economic boundaries within the community. In developing skills in project management and program planning, implementation and evaluation, students will develop a practice-based foundation for intersectoral collaboration. Community development principles and practice issues which are analysed in application to an area of the students practice, will enable an appreciation of the value of community education and ownership.

**Courses:** NS34, NS39, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

### ► NSN626 DEMETIA AND FAMILY CARE

This unit aims to support aged care practitioners to respond to the challenges of caring for older people with Alzheimer's disease and their families in a community health context. The central focus of this package is a CD-ROM which employs an interactive case study approach to introduce learners to a family situation where an older relative with Alzheimer's disease is being cared for at home.

**Courses:** NS34, NS39, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN701 ADVANCED HEALTH ASSESSMENT**

This unit aims to develop an advanced understanding of health assessment in nursing practice. This will be achieved by exploring the theoretical, conceptual and practical knowledge required to effectively assess the individual, family and their environment to provide nursing care within the context of specialist practice.

**Courses:** NS30, NS31, NS33, NS36, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN721 KEY ISSUES IN ACUTE AND CRITICAL CARE NURSING**

This clinical unit aims to develop an understanding of nursing practice in a variety of clinical contexts. This will be achieved by exploring the theoretical, conceptual and practical knowledge required to provide effective nursing care within practice domains. Cancer Nursing: This unit covers topics including: cancer control policy and practice; cancer prevention and early detection; epidemiology of cancer; pathophysiological basis of cancer; psychosocial aspects of cancer; overview of major treatment modalities for cancer including surgery; radiotherapy; chemotherapy, biotherapy and transplantation. Intensive Care Nursing: This unit will cover mechanical ventilation, haemodynamic monitoring, advanced life support and pharmacology. Medical/Surgical Nursing: This unit will cover issues pertaining to the key aspects of nursing practice within the medical/surgical context.

**Courses:** NS30, NS31, NS33, NS41, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN722 PRINCIPLES OF ACUTE AND CRITICAL CARE NURSING**

This unit aims to develop students' understanding of the theory, process and practice of nursing in a designated speciality area of nursing, to enable them to effectively prevent and manage common health problems experienced by individuals and families within their speciality field. This will be achieved but further exploring the theoretical, conceptual and practical knowledge required to provide effective nursing care within clinical domains. Cancer Nursing: This unit will cover assessment, management and evaluation of common problems experienced by people with cancer including symptoms and side effects of treatment and psychosocial needs. In addition, acute problems such as oncological emergencies and care of the immuno-compromised patient will be addressed. Intensive Care Nursing: This unit will cover specific ICU patient populations such as sepsis, multiple organ failure, burns, liver failure, neurological disorders and specific treatment modalities such as advances in mechanical ventilation and renal replacement therapies. Medical/Surgical Nursing: This unit will cover nursing assessments, intervention and evaluation for common health problems experienced by people in medical/surgical settings.

**Courses:** NS30, NS31, NS33, NS64, NS85

**Prerequisites:** NSN701, NSN721

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN723 SPECIALISATION IN CRITICAL CARE NURSING**

This unit will provide the opportunity for students to further develop and consolidate prior learning in a critical clinical setting of their choice. Students will expand on their theoretical, professional and practical knowledge to assess patients, plan and implement nursing care in a particular critical care nursing environment. Specific areas of study may include intensive care, cardiac care and emergency care.

**Courses:** NS30, NS31, NS33, NS41, NS64, NS85

**Prerequisites:** NSN701

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN725 SPECIALISATION IN MEDICAL/SURGICAL AND CANCER NURSING**

This clinically based unit will provide the opportunity for students to further develop and consolidate prior learning in a clinical setting of their choice. This unit will enable students to discuss

issues and trends occurring in nursing practice in a selected medical/surgical or cancer care environment, and critically analyse the advanced concepts that underpin specialist nursing practice. Students will demonstrate clinical judgement and reflective skills through the application of theoretical concepts to common health problems experienced by clients in a selected medical/surgical or cancer care environment. They will also initiate plans of care to address common needs/problems experienced by clients in this specialist field. Cancer Nursing: Specific areas of study may include chemotherapy nursing practice or palliative care nursing. Medical/Surgical Nursing: This unit will enable students to study a specific area of medical/surgical nursing in more depth, to meet their own learning needs.

**Courses:** NS30, NS31, NS33, NS64, NS85

**Prerequisites:** NSN701

**Contact hours:** Negotiable

**Credit points:** 12

► **NSN801 HEALTH ASSESSMENT IN AGED CARE**

This unit provides aged care practitioners with learning opportunities to develop and expand their understanding of the health care assessment of older adults. Participants will be offered learning opportunities aimed at developing a strong theoretical foundation on which to assess the health care needs of older people. Theoretical knowledge of biophysical and psychosocial aspects of ageing will be applied to the assessment of client situations in order to develop a competent approach to aged care health assessment. The course has been specifically designed to complement health assessment tools which meet workplace needs in a variety of practice contexts - community and residential aged care.

**Courses:** NS39, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN821 KEY ISSUES IN AGED CARE**

This unit uses a Primary Health Care approach to examine issues related to the pursuit of healthy ageing. The goal of this unit is to emphasise how individuals, communities, and policy makers can work together to provide appropriate and reliable sources of support for older people in society. Identifying specific incidents and exemplars this unit also highlights the significance of flexible health/aged care policy and community based programs and services.

**Courses:** NS39, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN822 PRINCIPLES OF AGED CARE PRACTICE**

This unit critically examines aspects of pathological ageing with consideration of the wider social and policy implications of these morbidities. This unit examines a range of pathologies and associated practice interventions in caring for older people experiencing ill-health. Particular emphasis will be placed upon examining the following common pathologies; rheumatoid/osteoarthritis; fracture; chronic obstruction airways disease; congestive cardiac failure; confusion; delirium; depression; dementia (senile, multi-infarct) and Alzheimer's Disease. The following practice interventions associated with pathological ageing will be examined: constipation; incontinence; blindness; deafness; skin tears/pressure ulcers; diabetes; challenging behaviours associated with mental health conditions. Supporting older people experiencing multiple losses will be reviewed in relation to care strategies including family support. Finally, death and dying in later life is examined with a particular focus upon palliative care, advanced directives, resuscitation and euthanasia.

**Courses:** NS39, NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN825 THESIS (PART-TIME)**

This unit provides the student with the opportunity to formally extend and synthesise knowledge gained in earlier semesters of the course. The thesis represents an independent piece of research in the student's specific areas of interest in nursing, and is completed under guidance of a supervisor. Students are required as part of their assessment to present a seminar outlining their

research to date. The seminars are held in the second semester of each year.

**Courses:** NS85

**Credit points:** 48

► **NSN850 THESIS (FULL-TIME)**

This unit provides the student with the opportunity to formally extend and synthesise knowledge gained in earlier semesters of the course. The thesis represents an independent piece of research in the student's specific area of interest in nursing, and is completed under the guidance of a supervisor. Students are required as part of their assessment to present a seminar outlining their research to date. The seminars are held in the second semester of each year.

**Courses:** NS85

**Credit points:** 48

► **NSN901 MENTAL HEALTH ASSESSMENT**

This unit covers the principles of mental status examination, psychological testing and social assessment. It also considers the implications of various observational methods and diagnostic interviewing techniques on clinical judgement. On completion of the unit, students should be able to competently administer a set of systematic assessment procedures designed to detect a client's particular problem area(s) of psychosocial functioning; record and interpret assessment data in the standard form of a written appraisal; and comprehend the role of theory in test selection and resultant analysis and recommendations.

**Courses:** NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN921 KEY ISSUES IN MENTAL HEALTH NURSING**

This unit complements Mental Health Assessment by providing students with the opportunity to apply assessment skills in an acute mental health nursing practice environment. The unit consist of two components - one theoretical and one clinical. The theoretical component concentrates on two major clinical treatment modalities in the management of mental illness, namely psychopharmacology and therapeutic intervention strategies based on process theory. The traditional medical model will be utilised as a means of explaining abnormal or major maladaptive behaviour patterns. The two lecture themes of the program are divided into weekly one-hour sessions. The clinical component will take place at an acute in-patient facility which has a primary focus on mental health problems and mental disorders.

**Courses:** NS64, NS85

**Prerequisites:** NSN901

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN922 COMMUNITY PERSPECTIVES IN MENTAL HEALTH NURSING**

The mainstream of mental health services and provision of community based programs by multidisciplinary mental health teams continues to increase in Australia. An important aim of this unit therefore is to encourage students to understand the political, social and economic changes that are occurring in the delivery of mental health nursing care. Additionally, such expansion of community mental health services demands that nurses develop new and different skills for working with the mentally ill, their carers or family. Critical among these skills is the ability to assist in the development of consumer and carer centred services and outcomes. The clinical component of this unit will take place in a community mental health setting which has mental health problems and mental disorders as a primary focus.

**Courses:** NS64, NS85

**Prerequisites:** NSN921

**Contact hours:** 3 per week **Credit Points:** 12

► **NSN928 COUNSELLING IN MENTAL HEALTH NURSING**

This unit is designed for nurses seeking to develop further knowledge and skills in counselling. It will build upon the existing knowledge and skills which each participant brings. The unit is intended to be practical. The focus will be on integrating new knowledge into existing abilities and providing participants with an opportunity to

## UNIT SYNOPSES

increase their knowledge of the theoretical bases of a variety of counselling approaches.

**Courses:** NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

### ► NSN929 CLINICAL INTERVENTION MODALITIES IN MENTAL HEALTH NURSING

This unit is designed to provide an in depth analysis of current practices in the rehabilitation of people with serious mental health problems. It enables students to examine and utilise functional assessments and develop individual service plans. A major emphasis will be placed on the role of nurses as case managers and the importance of this for the adaptation of clients in the community.

**Courses:** NS64, NS85

**Contact hours:** 3 per week **Credit Points:** 12

### ► OPB250 OPTOMETRY 2

This subject covers the fundamental areas of ophthalmic optics, and optometry within the context of health care in Australia. It provides a basic understanding of the concepts of ophthalmic optics together with professional development, ethical responsibilities and the role of optometry.

**Courses:** OP42

**Prerequisites:** MAB140

**Corequisites:** PCB240

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► OPB350 OPTOMETRY 3

Ophthalmic optics is continued with the study of neutralisation, spectacle lens design and prescribing parameters of lenses and frames. The theory and practice of keratometry, optometers, ophthalmoscopy and retinoscopy are also studied.

**Courses:** OP42

**Prerequisites:** PCB240, OPB250

**Corequisites:** PCB340, OPB351

**Contact hours:** 6 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► OPB351 VISUAL SCIENCE 3

A study of the basic visual sciences that underpins the practice of optometry. It covers the optics of the eye, including its basic design, dimensions and retinal quality as well as the psychophysical principles of vision.

**Courses:** OP42

**Prerequisites:** LSB250, PCB240,

**Corequisites:** PCB340, OPB350, OPB352,

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► OPB352 OCULAR ANATOMY AND PHYSIOLOGY 3

The unit provides information on the ocular anatomy and physiology that underlies the functional measurements made in optometry and their interpretation. It includes the structure and function of the anterior eye and orbit.

**Courses:** OP42

**Prerequisites:** LSB250, LSB275

**Corequisites:** OPB351

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► OPB450 OPTOMETRY 4

This is a continuation of studies in OPB350, and introduces the theory and practice of clinical techniques used in the examination of the patient and assessing visual functions. The subject is also the initial introduction to the care of patients in the Optometry Clinic.

**Courses:** OP42

**Prerequisites:** OPB350, OPB351, OPB352

**Corequisites:** OPB451, OPB452

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► OPB451 VISUAL SCIENCE 4

This subject continues studies commenced in OPB351, and provides students with an understanding of spatial, temporal, colour and binocular vision, and their influence on visual performance.

**Courses:** OP42

**Prerequisites:** OPB351, OPB352, OPB350,

**Corequisites:** OPB450, OPB452

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► OPB452 OCULAR ANATOMY AND PHYSIOLOGY 4

This is a continuation of OPB352. The unit covers the posterior eye, orbit, neural pathways, eye movements, neurophysiology of vision and an introduction to electrophysiological techniques.

**Courses:** OP42

**Prerequisites:** OPB352, OPB351, OPB350

**Corequisites:** OPB451, OPB450

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► OPB550 DISEASES OF THE EYE 5

This unit provides students with a knowledge and understanding of relevant general diseases and those that affect the eye. It includes general disease principles and processes, referral procedures, genetics, congenital, dystrophic and degenerative eye disease, and the ocular manifestation of general disease.

**Courses:** OP42

**Prerequisites:** OPB450, OPB451, OPB452, LSB492

**Corequisites:** OPB551, OPB552, OPB553

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► OPB551 OPTOMETRY 5

The student gains an understanding of the theory and practice of essential clinical techniques required to examine patients' eyes and assess visual function. The subject contains vision measurement, objective and subjective refraction, accommodation anomalies and the development and management of refractive errors and binocular vision disorders.

**Courses:** OP42

**Prerequisites:** OPB450, OPB451, OPB452

**Corequisites:** OPB550, OPB552, OPB553

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► OPB552 ADVANCED OPTOMETRY 5

This unit introduces the student to the theory and practice of advanced clinical techniques of vision assessment. It integrates these with the basic methods learned in OPB350, OPB450 and OPB551 and will give the student a thorough knowledge of all aspects of routine patient management. The unit covers areas such as visual fields, colour vision, gonioscopy, indirect ophthalmoscopy and geriatric optometry.

**Courses:** OP42

**Prerequisites:** OPB450, OPB451, OPB452

**Corequisites:** OPB550, OPB551, OPB553

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► OPB553 CLINICAL PRACTICE 5

Clinical Practice 5 provides the vehicle for the application of examination techniques learned in previous and concurrent units. Emphasis will be placed on communicating with patients, the fabrication of spectacles, basic contact lens practice and the development of appropriate clinical routines in eye examination.

**Courses:** OP42

**Prerequisites:** OPB450, OPB451, OPB452

**Corequisites:** OPB550, OPB551, OPB552

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► OPB650 DISEASES OF THE EYE 6

This is a continuation of OPB550 and covers the ocular manifestations of general disease, neuro-ophthalmology, glaucoma, inflammations/infections, tumours and trauma.

**Courses:** OP42

**Prerequisites:** OPB550, OPB551, OPB552, OPB553

**Corequisites:** OPB651, OPB652, OPB653

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► OPB651 CONTACT LENS STUDIES

Contact lens design and fitting form the basis of this subject. Both soft and rigid contact lenses are covered together with lens materials, designs, manufacture, fitting assessments and appropriate clinical techniques. The subject also focuses on corneal physiology, patient management and advanced contact lens fitting.

**Courses:** OP42

**Prerequisites:** OPB550, OPB551, OPB552, OPB553

**Corequisites:** OPB650, OPB652, OPB653

**Credit points:** 12

**Campus offered:** KG

**Semester:** 2

### ► OPB652 PHARMACOLOGY

This subject covers both general and ocular pharmacology. It includes pharmacokinetic and pharmacodynamic principles, the mechanisms of action and therapeutic applications of drugs used in the treatment of general and ocular disease, and drugs used to assist in the diagnosis of ocular conditions.

**Courses:** OP42

**Prerequisites:** OPB550, OPB551, OPB552, OPB553

**Corequisites:** OPB650, OPB651, OPB653

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► OPB653 CLINICAL PRACTICE 6

The subject is a continuation of OPB553, and enables students to apply eye examination techniques in a clinical setting. There is an emphasis on advanced communication skills, patient management and clinical decision-making.

**Courses:** OP42

**Prerequisites:** OPB550, OPB551, OPB552, OPB553

**Corequisites:** OPB650, OPB651, OPB652

**Contact hours:** 6 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► OPB750 TOPICS IN OPTOMETRY 7

Students are required to choose a research topic, conduct a literature search on this topic, develop experimental hypothesis, plan and undertake a research project. Students will give oral presentations of their own research project. Presentations on advanced clinical care and decision making skills will include lecture and tutorial presentations and case summaries.

**Courses:** OP42

**Prerequisites:** OPB650, OPB651, OPB652, OPB653

**Corequisites:** OPB751, OPB752, OPB753

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** KG

### ► OPB751 ADVANCED OPTOMETRY 7

This unit provides students with a thorough knowledge of more specialised areas of patient management such as in low vision and paediatric patients.

**Courses:** OP42

**Prerequisites:** OPB650, OPB651, OPB652, OPB653

**Corequisites:** OPB750, OPB752, OPB753

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► OPB752 CLINICAL PRACTICE 7

This unit enables students to apply knowledge and skills gained in third year to patients presenting for eye examinations, and to make decisions in effective patient management

**Courses:** OP42

**Prerequisites:** OPB650, OPB651, OPB652, OPB653

**Corequisites:** OPB750, OPB751, OPB753

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► OPB753 SPECIALIST CLINICAL PRACTICE 7

This unit enables students to apply specialist clinical knowledge in the management of patients requiring contact lenses, vision training and low vision care.

**Courses:** OP42

**Prerequisites:** OPB650, OPB651, OPB652, OPB653

**Corequisites:** OPB750, OPB751, OPB752

**Contact hours:** 8

**Credit points:** 12

**Campus offered:** KG

**Semester:** 1

### ► OPB850 TOPICS IN OPTOMETRY 8

Students are required to analyse the results of their chosen research project and write a full report in manuscript form. Oral presentations of the project are given to their peers. Presentations on advanced clinical care and decision making

## UNIT SYNOPSES

skills will include lecture and tutorial presentations and case summaries.

**Courses:** OP42

**Prerequisites:** OPB650, OPB651, OPB652, OPB653

**Corequisites:** OPB751, OPB752, OPB753

**Contact hours:** 4 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► OPB851 ADVANCED OPTOMETRY 8

Optometry's role in health care; professional and ethical behaviour; relevant state and federal Acts; professional associations; types of practice; optometric practice and the law. Introduces the basic concepts of eye safety and visual ergonomics

**Courses:** OP42

**Prerequisites:** OPB750, OPB751, OPB752, OPB753

**Corequisites:** OPB850, OPB852, OPB853

**Contact hours:** 4 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► OPB852 CLINICAL PRACTICE 8

This unit enables students to consolidate skills developed in OPB752, to increase their knowledge base and achieve surety with decision making involving the management of patients' eye and vision problems.

**Courses:** OP42

**Prerequisites:** OPB750, OPB751, OPB752, OPB753

**Corequisites:** OPB850, OPB851, OPB853

**Contact hours:** 8

**Credit points:** 12

**Campus offered:** KG

**Semester:** 2

### ► OPB853 SPECIALIST CLINICAL PRACTICE 8

This unit continues to consolidate skills developed in OPB753 in specialised clinical areas of contact lenses, low vision and paediatric optometry.

**Courses:** OP42

**Prerequisites:** OPB750, OPB751, OPB752, OPB753

**Corequisites:** OPB850, OPB851, OPB852

**Contact hours:** 8

**Credit points:** 12

**Campus offered:** KG

**Semester:** 2

### ► PCB007 PATIENT CARE IN PROFESSIONAL PRACTICE

Introductory subject emphasising the ethical, legal and clinical accountability of the radiographer for patient care and interpersonal behaviour and skills.

**Courses:** PH38

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB101 PHYSICAL SCIENCE

Introduces students to some of the basic concepts in the Physical Sciences by integrating core topics into a number of occupational scenarios. Topics include matter; atomic and molecular structure; chemical reactions and equations; acids, bases, pH; oxidation and reduction; carbon chemistry; organic compounds; chemistry of biological processes; polymers, biomaterials; gases and gas laws; mechanics and motion; forces; momentum and collisions; mechanical energy; conservation laws; thermometry; thermal energy, energy transfer.

**Courses:** ED50, IF27, IF38, IF39, IF61, IF71, IF84, IF86, SC01

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** GP, CA

**Semester:** 1, 2

### ► PCB107 PHYSICS AND QUANTITATIVE TECHNIQUES

Data and error analysis, Geometrical optics: reflection, refraction, dispersion, image formation, optical instruments, photometry. Circuit theory and electronics: DC circuits, AC circuits, semi-conductors, rectifiers and transistors, digital electronics. Waves and acoustics: properties of waves, interference and diffraction of waves, sound waves, measurements of sound.

**Courses:** PH38, SC01

**Contact hours:** 4.5 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB136 ENGINEERING PHYSICS 1C

Introductory unit covering Dynamics (Motion in 1D, Vectors, Newton's Laws, Motion in 2D (in-

cluding circular motion), Uniform circular motion, Work, energy and power Potential energy and conservation of energy, Linear momentum and collisions), Waves, (Oscillatory motion, Wave Motion, Sound Waves, Superposition and standing waves), Geometrical Optics (Reflection, refraction, dispersion, Huygens' principle, Image formation by mirrors and lenses, optical instruments) and Physical Optics (Interference of light, Diffraction). Thermal physics (temperature, thermometry, thermal expansion, heat and thermal energy, heat capacity and specific heat, latent heat, heat transfer).

**Courses:** CE44, CE45, EE41, EE42, EE45, EE48, ME40, ME41, ME42, ME45, ME47

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1, 2

### ► PCB140 INTRODUCTORY CHEMISTRY

Matter and its classification; atomic and molecular composition of matter; structure of atoms and molecules and use of the Periodic Table to predict the behaviour of matter.

Chemical bonds and the nature of molecules, chemical composition, chemical reactions, chemical equations and chemical calculations. Representative chemistry of the main group elements, and specifically of carbon. Solution chemistry, acids bases, pH and chemical calculations using solutions. Equilibrium chemical reactions. Oxidation reduction and electrochemistry. Gaseous state of matter and gas laws.

**Courses:** HL42, IF39, IF71, IF84, PU40, SC01

**Credit points:** 12

**Incompatible with:** PCB142

**Campus offered:** GP, CA

**Semester:** 1, 2

### ► PCB141 CHEMISTRY FOR CLINICAL HEALTH PROFESSIONALS

General chemistry: the periodic table; chemical bonding; chemical reactions and stoichiometry; physical chemistry: chemical equilibrium; acids and bases; rates of reactions; energy and reactions; redox reactions and electrochemistry; organic chemistry: introductory organic chemistry, organic functional group chemistry, stereochemistry of organic compounds, heterocyclic chemistry; biologically important organic compounds.

**Courses:** HL43, OP42, PU43

**Contact hours:** 6 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB142 CHEMISTRY 1

Inorganic and general chemistry: nature of matter, chemical reactions and chemical equations, reactions in solution, acids bases and redox reactions; atomic and molecular structure, periodic table and periodicity, atomic electron configurations, chemical bonds and theories of chemical bonding. Physical chemistry: states of matter, gases, chemical equilibrium, equilibria in electrolyte solutions, acids and bases, buffer solutions, colligative properties, colloids, introductory electrochemistry.

**Courses:** ED50, IF29, IF39, IF61, IF71, IF83, IF84, IF86, IF87, LS37, LS50, PU40, PU43, SC01, SC51

**Contact hours:** 5 per week

**Credit points:** 12

**Incompatible with:** PCB140

**Campus offered:** GP

**Semester:** 1, 2

### ► PCB150 PHYSICS 1H

Basic physical measurements, mechanics, heat, waves, acoustics and optics, and the instrumentation used to measure physical parameters.

**Courses:** PU40, PU43, LS37, ED50, SC01, SC51

**Contact hours:** 5 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1, 2

### ► PCB172 PHYSICS FOR SURVEYORS

Measurement - Fundamental and derived quantities, SI units, significant figures and uncertainty in measurements and calculations. Kinematics - vector and scalar quantities, equations of motion. Statics - inertia and change of motion; forces in equilibrium; resolution of forces; application to connected bodies, tension and normal force; balancing. Dynamics - friction; centripetal force; the hoist; impulse and momentum; periodic motion; work and energy. Gravity - Circular motion, centripetal force, gravity, Kepler's Laws, orbits. Fluid Statics - Pressure, Pascal's principle, Archimedes's principle, barometry. Fluid Dynamics

- Fluid flow in pipes and channels; Equation of continuity, Bernoulli's principle, viscous flow and Poiseuille's equation. Flow measurement. Hydraulic models. Pumps and pump characteristics. Optical instruments - Reflection, refraction, total internal reflection, spherical mirrors, thin lenses, transits, theodolites, corner cubes, cameras.

**Courses:** PS47, PS48

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** GP

### ► PCB178 PRINCIPLES OF MEDICAL RADIATIONS

Principles of medical imaging and methods of detection, diagnosis and treatment of cancer.

**Courses:** PH38

**Contact hours:** 5 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB200 CHEMICAL TECHNOLOGY 1

The role of chemical technologist in industry; fundamentals of chemical technology; industrial pollution obligations and monitoring; generic issues eg quality assurance, industrial health and safety.

**Courses:** SC01, SC51

**Prerequisites:** PCB142

**Corequisites:** PCB142

**Contact hours:** 5 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB240 OPTICS 1

A study of selected topics in optics particularly related to aspects of optometry. Topics include geometrical optics in mirrors and lenses, including thick lenses, cylindrical, spherical and toric lenses, colour and colour measurement, photometry, lens aberrations and optical instruments.

**Courses:** OP42

**Contact hours:** 5 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB242 CHEMISTRY 2

Introductory organic chemistry; organic functional group chemistry; stereochemistry of organic compounds; biologically important organic compounds; heterocyclic chemistry; biologically important inorganic compounds; calorimetry - the underlying principle; speed control of chemical and biochemical processes.

**Courses:** ED50, IF29, IF39, IF61, IF71, IF83, IF84, IF86, IF87, LS37, LS50, OP42, PU42, PU44, SC01, SC51

**Corequisites:** PCB142

**Contact hours:** 6 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1, 2

### ► PCB250 PHYSICS 1

Introduces concepts of fields and potentials. General techniques such as the description of physical systems by differential equations and their solution are also covered. Specific topic areas to be covered include: calculus based kinematics and dynamics in one and two dimensions; accelerated frames of reference, 2nd order systems and the forced-damped-harmonic oscillator, gravitational and electromagnetic fields, Newton's law of gravity, Coulomb's law, potentials, static fields - point and distributed sources, Gauss's law, capacitors, Biot-Savart law and Ampere's law, electromagnetic induction and Faraday's law, Lenz's law.

**Courses:** ED50, IF29, IF39, IF61, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** PCB101 or PCB107

**Contact hours:** 5 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB260 PHYSICS 1A

Physical optics including interference, interferometry, Fraunhofer diffraction, Fourier methods, lasers and holograms. Atomic Physics including introductory quantum physics, spectra and the Bohr theory. Introduction to Special Relativity including time dilation and length contraction, Lorentz transformations, Minkowski diagrams and relativistic mass, momentum and energy.

**Courses:** ED50, IF29, IF39, IF61, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** (PCB101 or PCB107), and (MAB100 or SA in Senior Maths C)

**Contact hours:** 4 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

## UNIT SYNOPSES

### ▶ PCB263 PHYSICS 2E

Extension of PCB150 including fluids, AC, DC circuit theory, with emphasis on electronics and instrumentation, fields, modern and nuclear physics. Fluid mechanics. Biomechanics.

**Courses:** ED50, PU40

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ▶ PCB272 RADIATION PHYSICS 1

Electrostatics, electromagnetism, the production of X-rays and their interaction with matter.

**Courses:** PH38

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ▶ PCB276 GENERAL RADIOGRAPHY 1

A program of lectures relating to radiography of the skeletal system.

**Courses:** PH38

**Prerequisites:** LSB145, PCB178

**Corequisites:** LSB245, PCB277

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ▶ PCB277 RADIOGRAPHIC PRACTICE

A program of practical sessions relating to radiography of the skeletal system. A study of the processes involved in the production of a visible image in radiography.

**Courses:** PH38

**Corequisites:** PCB276

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ▶ PCB286 TREATMENT PLANNING 1

Introduction to the techniques of radiotherapy treatment planning.

**Courses:** PH38

**Prerequisites:** PCB178

**Contact hours:** 6 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ▶ PCB287 MEGAVOLTAGE THERAPY 1

Introduction to the basic techniques of radiotherapy treatment delivery including beam direction and beam defining devices.

**Courses:** PH38

**Prerequisites:** PCB178

**Corequisites:** LSB241

**Contact hours:** 6 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ▶ PCB305 PRINCIPLES OF PHYSICAL CHEMISTRY

Thermodynamics (first, second and third laws; entropy; free energy changes; real gases; heat engines); chemical kinetics (order, molecularity, reaction, mechanisms, Arrhenius equation; complex reactions); phase and colloid chemistry (phase equilibria; one and two component systems; distillation; colloidal dispersions; charged interfaces; sols and gels); macromolecules (molecular architecture; molar mass; solution and solid state properties; polymerisation); bonding (orbitals and energies of the hydrogen atom; many electron atoms; molecular orbitals).

**Courses:** ED50, IF29, IF39, IF71, IF83, IF84, IF86, IF87, SC01, SC51

**Prerequisites:** PCB142

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP

### ▶ PCB314 CONCEPTS IN ANALYTICAL CHEMISTRY

Classical analytical chemistry including titrimetric analysis (neutralimetry, precipitometry, compleximetry and redoximetry); gravimetric analysis; sample preparation; specialist reagents for analytical chemistry usage; instrumental analytical chemistry; absorptometric methods (for example UV-visible spectrophotometry); electroanalytical methods including (conductimetry, potentiometry and electrogravimetry); data handling.

**Courses:** ED50, IF39, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** PCB142

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB340 OPTICS 3

The application of geometrical optics to selected aspects of optometry including lens form and thickness, contact lenses, spectacle lens design and spherical surfaces; the wave nature of light

with emphasis on interference, interferometry, diffraction and polarisation; the specialised topics of optical processing, lasers and the evaluation of optical systems.

**Courses:** OP42

**Prerequisites:** PCB240

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB354 STRUCTURE AND MECHANISM IN ORGANIC CHEMISTRY

Organic stereochemistry: ion formation of cyclic compounds; chirality; absolute configuration; racemic and meso compounds. Importance of structure and stereochemistry in natural products such as terpenes, steroids and sugars. Carbohydrate chemistry: monosaccharides, disaccharides and polysaccharides. Applications in selected research areas of drugs, polymers and enzymes. Reaction mechanisms: acid/base theory, polarity, induction effects. Addition reactions; nucleophilic substitution and addition, electrophilic additions. Application to organic synthesis.

**Courses:** ED50, IF29, IF39, IF71, IF83, IF84, IF86, SC01, SC51

**Prerequisites:** PCB242

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB361 AC THEORY AND ELECTRONICS

Emphasis on the application of theory to practical tasks. Laboratory work will consist of introductory exercises followed by a series of topics to be investigated within the available laboratory times. Specific topics to be covered: steady state and transient AC passive-circuit analysis, power in AC circuits, applications of semiconductor devices, amplifiers and feedback theory, operational amplifiers - ideal and non-ideal properties, oscillators, Introductory digital electronics: gates, flip-flops and counters, active-circuit analysis, active and passive filters.

**Courses:** IF29, IF39, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** (MAB111 or MAB131) and PCB250

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB362 PHYSICS 2

Integrates and enhances the knowledge gained in earlier units with applications to more interesting and complex systems. Topics include: part A; classical mechanics, rotating systems, Lagrange's equations and Hamiltonian operators, precession. Part B; radiation physics, nuclear disintegration, equilibrium, interaction of radiation with matter, nuclear detectors. Part C; electromagnetism, electric fields, Gauss' law, dielectrics.

**Courses:** ED50, IF29, IF39, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** PCB250 and (MAB132 or MAB112)

**Corequisites:** MAB134

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB375/1 RADIOGRAPHIC EQUIPMENT

Discussion of design considerations of X-ray generators and specialist radiographic imaging equipment for fluoroscopy, mammography, tomography and mobile radiography.

**Courses:** PH38

**Prerequisites:** PCB272

**Contact hours:** 2 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB375/2 RADIOGRAPHIC EQUIPMENT

An introduction to computer hardware, binary numbers and the digital image. A study of the equipment used in digital fluoroscopy and computed radiography.

**Courses:** PH38

**Prerequisites:** PCB375/1

**Contact hours:** 2 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ▶ PCB377 GENERAL RADIOGRAPHY 2

An extension of topics introduced in PCB276 to include more advanced techniques of skeletal

radiography, ward and operating theatre radiography, and examinations using contrast media. A program of practical sessions in skeletal imaging.

**Courses:** PH38

**Prerequisites:** LSB245, PCB276, PCB277

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB379 CLINICAL RADIOGRAPHY 1

Clinical experiences in radiographic examinations introduced in PCB276 and PCB376. Experience is obtained in approved clinical departments.

**Courses:** PH38

**Prerequisites:** LSB245, PCB276, PCB277

**Corequisites:** PCB379

**Contact hours:** 160 (over 4 weeks)

**Credit points:** 6  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB389 CLINICAL RADIOTHERAPY 1

Clinical experience in radiotherapy related to topics introduced in PCB287 and PCB286. The programs are carried out in approved clinical departments.

**Courses:** PH38

**Prerequisites:** PCB286, PCB287

**Contact hours:** 160 (over 4 weeks)

**Credit points:** 6  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB396/1 RADIOTHERAPY PLANNING AND PHYSICS

An extension of the study of treatment planning introduced in PCB286 to the planning of complex techniques of photon therapy and electron therapy.

**Courses:** PH38

**Prerequisites:** LSB245, PCB286, PCB287

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB396/2 RADIOTHERAPY PLANNING AND PHYSICS

A study of the measurement and dosimetry of external beam radiotherapy including practical sessions. An introduction to the capabilities of computer hardware and software.

**Courses:** PH38

**Prerequisites:** PCB396/1

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ▶ PCB397 MEGAVOLTAGE THERAPY 2

The principles and applications of megavoltage therapy including techniques for specific sites. Practical exercises are performed in clinical departments.

**Courses:** PH38

**Prerequisites:** LSB245, PCB287

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

### ▶ PCB404 SCIENTIFIC PRINCIPLES OF SAFETY

Sources, hazards measurement and protection associated with noise safety, electrical safety and non-ionising and ionising radiation safety.

**Courses:** ED50, IF39, IF83, IF84, IF86, PU40, SC01

**Prerequisites:** PCB263 or PCB250

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

### ▶ PCB414 INDUSTRIAL AND ENVIRONMENTAL ANALYTICAL CHEMISTRY

Introduction to quality assurance in an analytical chemistry laboratory; international QA standards; analytical methods and method accreditation; sample traceability; calibration, validation and standards; sampling; instrumental techniques (including UV-visible spectrophotometry, fluorimetry, infrared spectroscopy (FT-IR), atomic spectroscopy); chromatography (GC and HPLC). Special Notes: Available both semesters, but for PU40 Semester 1 is preferred.

**Courses:** ED50, IF39, IF71, IF87, PU40, SC01, SC51

**Prerequisites:** PCB142

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

### ▶ PCB434 INORGANIC CHEMISTRY

Coordination chemistry; structure and bonding of metal complexes including crystal field and va-

lence bond theories; spectroscopic terms and electronic transitions; solution chemistry and complex equilibria; redox reactions Pourbaix diagrams; HSAB theory; reaction mechanisms of coordination compounds; chemistry of selected non-metals, lanthanides, actinides and precious metals, their extraction from ores and refining.

**Courses:** ED50, IF29, IF39, IF71, IF83, IF84, IF86, SC01, SC51

**Prerequisites:** PCB142

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB444 SPECTROSCOPY

Theory of spectroscopy: electromagnetic radiation, molecular energy levels, width and intensity of spectral lines, dispersive and Fourier transform spectrometers. Rotational spectra: Moment of inertia, diatomic molecules, microwave spectroscopy, selection rules. Rotational and vibrational-rotational spectra: diatomic molecules, anharmonicity, normal modes, selection rules, Born-Oppenheimer Approximation, polyatomic molecules, group frequencies. Electronic spectra: Franck-Condon Principle, vibronic structure, dissociation energies, fates of electronic excited states, laser action. Ultraviolet spectroscopy - electronic transitions,  $\lambda_{max}$  and  $\epsilon$ , chromophores, bathochromic and hypsochromic shifts, sampling. The application of infrared spectroscopy to organic compounds - Hooke's law, classification of vibrations, group frequency tables, fundamental absorption bands, structural influences, effects of molecular association, conjugation, cumulation,  $\alpha$ -substitution, ring and steric strain. Applications to functional group analysis. Sampling. Nuclear magnetic resonance - simple theoretical concepts, classification of nuclei, modern instrumentation, the shielding constant,  $^{13}C$  spectra - concept of magnetic environment, symmetry, advantages and limitations,  $^1H$  spectra, areas and integrals, chemical shifts, tabulated data, Shoolery's rules, coupling, analysis of 1st order spectra, deducing connectivity relationships, Sampling.

**Courses:** ED50, IF29, IF39, IF71, IF83, IF84, SC01, SC51

**Prerequisites:** PCB142, PCB354

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB460 INSTRUMENTATION AND COMPUTATIONAL METHODS

Lecture/tutorial program plus an integrated practical component. The topics include:- transducers, signal conditioning, sources of noise, guarding and shielding, analogue to digital and digital to analogue conversion, computer interfacing, data acquisition, sampling theorem, signal averaging, application of Fourier transforms, signal processing - digital filters, statistics of physical measurements, significance testing, least squares methods, interfacing microcontrollers to analogue circuits, numerical simulation techniques.

**Courses:** IF29, IF39, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** PCB361

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB462 THERMODYNAMICS AND SOLID STATE PHYSICS

Two of the main themes in physics. Part A: Thermodynamic equilibrium and zeroth, first and second laws of thermodynamics, equipartition principle and heat capacities, entropy, concept of irreversibility, Carnot cycle. Part B: Solid state physics, crystal

and lattice structures, reciprocal lattice, x-ray diffraction, Brillouin zones, amorphous materials, lattice dynamics, acoustical and optical phonons, thermal properties of solids, acoustic waves in solids and crystals. Statistical physics, microscopic and quantum approach to entropy, Maxwell-Boltzmann and Fermi-Dirac distributions, Fermi energy and Fermi surface, Bose-Einstein distribution function, Black body radiation.

**Courses:** IF29, IF39, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** PCB250 and (MAB134 or MAB311)

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB469 ASTROPHYSICS 1

History and development of modern astronomy. Physical principles of telescopes: radio, infrared, visible, UV, X-ray, gamma. Gravity wave and neutrino detectors. The sun, solar flares, solar wind, auroras, solar storms and their effects on satellites and communication. Space objects in the solar system: planets, comets, asteroids, meteors, etc. Stellar nuclear physics and classification of stars. Stellar evolution, interstellar medium and nebulae. Doppler measurement of celestial velocities (red and blue shifts). Measurement of astronomical distances. Large scale structure of the universe: galaxies, galactic clusters and super-clusters.

**Courses:** ED50, SC01

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB476 SPECIAL PROCEDURES

Specialised techniques of radiography: the skull, obstetrics, gynaecology, CNS, paediatrics and geriatrics.

**Courses:** PH38

**Prerequisites:** PCB377, PCB379

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB477 COMPLEMENTARY IMAGING TECHNIQUES

The physical principles, equipment and applications of medical ultrasound and nuclear medicine imaging.

**Courses:** PH38

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB479 CLINICAL RADIOGRAPHY 2

Clinical experience in approved departments in radiographic examinations discussed in PCB376.

**Courses:** PH38

**Prerequisites:** PCB379

**Corequisites:** PCB476

**Contact hours:** 200 (over 5 weeks)

**Credit points:** 6

**Campus offered:** GP **Semester:** 2

#### ► PCB489 CLINICAL RADIOTHERAPY 2

Clinical experiences in approved departments in techniques of radiation therapy.

**Courses:** PH38

**Prerequisites:** PCB397, PCB389

**Corequisites:** PCB497

**Contact hours:** 200 (over 5 weeks)

**Credit points:** 6

**Campus offered:** GP **Semester:** 2

#### ► PCB495 COMPUTER ASSISTED TREATMENT PLANNING 1

A study of planning hardware and software to include two-dimensional planning. Development of concepts to an advanced level of understanding of computer-assisted optimisation of isodose distributions.

**Courses:** PH38, PH90

**Prerequisites:** PCB386, LSB421

**Corequisites:** PCB497

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB497 MEGAVOLTAGE THERAPY 3

An extension of the topic introduced in PCB397 to include the full range of treatment by megavoltage therapy for cancer in specific sites. Consideration includes techniques, planning, patient positioning, outlines and measurements. Clinical experience is incorporated in this unit.

**Courses:** PH38

**Prerequisites:** PCB397, PCB389

**Corequisites:** PCB495

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB505 ADVANCED PHYSICAL CHEMISTRY

Dynamic electrochemistry, electrochemical processes including corrosion; advanced kinetics; quantum mechanics; surfaces and catalysts; statistical mechanics.

**Courses:** ED50, IF29, IF39, IF61, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** PCB305

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

#### ► PCB514 INSTRUMENTAL ANALYSIS

Provides theoretical and practical framework for analysis with advanced instrumental techniques: atomic spectroscopy; mass spectrometry; HPLC; auto-analysers and flow analysis; advanced methods of data analysis: multivariate analysis, pattern recognition, classification and prediction. Complementary practical program.

**Courses:** ED50, IF39, IF71, IF83, IF84, IF86, IF87, SC01, SC51

**Prerequisites:** PCB242, PCB414

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

#### ► PCB524 UNIT OPERATIONS

Energy balances; principles of particle mechanics and the unit operations used to process solids; principles of fluid mechanics and the unit operations used to process fluids; principles of heat transfer and the unit operations involving heat transfer; rationale for the design and operation of the many individual processes (or 'unit operations') which together make up a large part of any large scale process.

**Courses:** ED50, IF39, IF71, IF86, SC01, SC51

**Prerequisites:** PCB424

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

#### ► PCB548 MEDICAL PHYSICS

Medical imaging and radiation oncology are the two largest areas of employment for medical physicists who are expected to have an understanding of the physical principles and technologies used in these disciplines. Students will undertake a series of lectures that will be augmented by tutorials and laboratory sessions. Specific areas of study will include: imaging with x-rays; imaging with ultrasound; magnetic resonance imaging; nuclear medicine; radiation sources for photon and electron beam therapy; dose distributions including surface and build-up regions; treatment planning for photon beams; radiation dosimetry in radiotherapy.

**Courses:** IF39, IF71, IF83, IF84, IF86, SC01

**Corequisites:** PCB362

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

#### ► PCB554 SYNTHESIS AND REACTIVITY IN ORGANIC CHEMISTRY

The principles and practice of synthesis planning; synthetically-useful reactions for interconversions of the common functional groups; carbon-carbon bond formation using organometallic reagents and enolates; selectivity and protection; aromaticity and heterocyclic chemistry.

**Courses:** ED50, IF29, IF39, IF61, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** PCB354, PCB444

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

#### ► PCB561 QUANTUM AND CONDENSED MATTER PHYSICS

Quantum physics provides the basis for understanding the structure of nuclei, atoms, molecules and solids. Part A: (Quantum Mechanics) main postulates of quantum mechanics, uncertainty principle, measurements in quantum mechanics, principle of superposition, operators, mathematical approaches in quantum mechanics, Schrödinger equation and its solution, infinite potential well, potential barrier, tunneling effect, quantum oscillator, hydrogen atom, angular momentum, spin, spin-orbit interaction, Hartree theory of multi-electron atoms, electronic transitions in atoms, selection rules, identical particles, time-independent perturbation theory. Part B: (Condensed Matter Physics) Fermi energy, Fermi-Dirac distribution, density of states, electrical and thermal conduction, structure of Fermi surface, band structure of solids, Bloch functions, semiconductors, band gap, Hall effect, semiconductor devices, basic principles of superconductivity.

**Courses:** IF29, IF39, IF71, IF83, IF84, IF86, SC01

## UNIT SYNOPSES

**Prerequisites:** PCB462 and (MAB134 or MAB311)

**Contact hours:** 4 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► PCB562 PHYSICAL METHODS OF ANALYSIS

The theory and practice of important analysis techniques relevant to the materials sciences will be covered with some examples drawn from industrial processes. Specific topics to be covered: structure of crystals: types of lattice, unit cells, Miller indices, crystal diffraction, reciprocal space. X-ray diffraction, texture and stress analysis, X-ray fluorescence, electron microscopy.

**Courses:** IF29, IF39, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** (MAB112 or MAB132) and PCB462

**Contact hours:** 4.5 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► PCB567 ADVANCED RADIOGRAPHIC TECHNIQUE 1

A study of the principles and techniques used in advanced radiographic techniques including angiography, arthrography, sonography and sialography. A study of the appearances of pathology on medical images with particular emphasis on the radiographic image.

**Courses:** PH38

**Prerequisites:** PCB476, PCB479

**Contact hours:** 5 per week   **Credit points:** 12  
**Campus offered:** GP           **Semester:** 1

### ► PCB580/1 CLINICAL RADIOGRAPHY 3

Clinical experience in special radiographic procedures as introduced in PCB476, and general radiography.

**Courses:** PH38

**Prerequisites:** PCB476, PCB479

**Contact hours:** 240 (over 6 weeks)

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB580/2 CLINICAL RADIOGRAPHY 3

Clinical experience in advanced radiographic techniques as introduced in PCB567, and general radiography.

**Courses:** PH38

**Prerequisites:** PCB567, PCB580/1

**Contact hours:** 200 (over 5 weeks)

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB584 FORENSIC EXAMINATION OF PHYSICAL EVIDENCE

An overview of the crime scene: its investigation and management; detection and collection of physical evidence, blood splash evidence, fire investigation, bomb scene, forensic osteology; expert evidence. Forensic photography; fingerprinting; forensic applications of optical and electron microscopy. Substantial laboratory and workshop sessions complement the theory.

**Courses:** ED50, IF39, IF71, IF86, SC01

**Prerequisites:** PCB414

**Contact hours:** 4 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB587 SPECIALISED RADIOGRAPHY TECHNIQUE 1

A course of lectures and practical exercises on the specialised techniques of orthovoltage and superficial therapy. A study of radioactivity including methods of radiation detection, radioactive equilibrium and production of radioisotopes, the principles and application of brachytherapy.

**Courses:** PH38

**Prerequisites:** PCB489, PCB497

**Contact hours:** 6 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB590/1 CLINICAL RADIOOTHERAPY 3

Clinical experience in specialised radiotherapy technique as discussed in PCB587 and PCB595.

**Courses:** PH38

**Prerequisites:** PCB489

**Contact hours:** 240 (over 6 weeks)

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB590/2 CLINICAL RADIOOTHERAPY 3

Clinical experience in specialised radiotherapy technique as discussed in PCB587 and PCB595.

**Courses:** PH38

**Prerequisites:** PCB590/1

**Contact hours:** 200 (over 5 weeks)

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB593 DIGITAL IMAGE PROCESSING

This unit will provide students with a basic understanding of the computer and programming techniques used in image processing and reconstruction. Specific areas of study will include: the structure of a digital image; image display techniques; grey scale palettes and look-up tables; Fourier transform theory; convolution theory; image processing hardware; image processing techniques, eg analysis, enhancement and restoration; spatial filtering; Fourier space filtering; methods of image reconstruction; applications of image processing in medicine.

**Courses:** IF39, IF71, IF83, IF84, IF86, PH38, PH60, PH71, PH80, SC01

**Prerequisites:** MAB100 or PCB107

**Contact hours:** 4 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB595 COMPUTER ASSISTED TREATMENT PLANNING 2

The use of computers in the planning of non-standard and complex radiotherapy treatment including arc and rotation techniques, irregular field techniques and 3 dimensional plans. Use of 3D computer planning system is included.

**Courses:** PH38

**Prerequisites:** PCB495

**Contact hours:** 6 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB604 PROJECT

A variety of chemical problems reflecting teaching, research and consultancy interests of the staff.

**Courses:** ED50, IF39, IF71, IF86, SC01, SC51

**Prerequisites:** Two relevant prerequisites from PCB434, PCB505, PCB554, PCB514, PCB524

**Contact hours:** 5 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB605 BIOMEDICAL INSTRUMENTATION

Transducers; basic electronics, op amps, amplifiers, noise, and reduction techniques, isolation, analogues to digital techniques, computer interfacing, signal processing, and digital filters. Build your own ECG amplifier and try it out on yourself. Microprocessors, microcomputers, assembly language, interfacing microcontrollers to instruments, data analysis techniques.

**Courses:** ME46

**Contact hours:** 5 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB614 ADVANCED ANALYSIS

The theoretical and practical framework of advanced analytical techniques, emphasising the analysis of materials and more difficult samples than those covered in previous units; techniques include hyphenated mass spectrometry, analytical electron microscopy, thermal analysis and vibrational spectroscopy.

**Courses:** SC01, SC51

**Prerequisites:** PCB514

**Contact hours:** 4 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB624 CHEMISTRY IN INDUSTRY AND TECHNOLOGY

Industrial processes and technologies involved in the manufacture of materials of industrial and societal importance. Topics include mass transfer operations, metals and alloys, ceramics, inorganic polymers, biopolymers, natural fibres and high technology polymers. The unit includes field trips to various industrial sites and a group problem-solving exercise.

**Courses:** ED50, IF39, SC01, SC51

**Prerequisites:** PCB524

**Contact hours:** 5 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB634 ORGANOMETALLIC AND COORDINATION CHEMISTRY

Major topics covered are: organometallic chemistry, including metal-carbon bonding, main group and transition metal organometallics and applications of organometallic compounds in synthetic chemistry; bioinorganic chemistry and physical methods of structure determination, such as single crystal X-ray diffraction; chemical applications of group theory.

**Courses:** ED50, IF29, IF39, IF71, IF83, IF84, SC01

**Prerequisites:** PCB434

**Contact hours:** 5 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB644 FRONTIERS IN CHEMISTRY

A selection of topics in advanced chemistry from a range of evolving areas of relevance in modern chemistry and chemical technology such as: trace metal speciation in environmental and biological systems; free-radical chemistry; membrane science and technology but including the important issue of the societal and ethical implications of the profession of chemistry.

**Courses:** ED50, IF29, IF39, SC01, SC51

**Prerequisites:** PCB434, PCB505, PCB554

**Contact hours:** 4 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB648 APPLIED RADIATION AND HEALTH PHYSICS

Concepts of ionising and non-ionising radiation including aspects of environmental processes, radiation safety principles and measurement techniques will be developed through a series of lectures that will be supplemented by problem solving tutorials and laboratory sessions. Specific areas of study will include: natural radioactivity; technologically enhanced and artificially produced radioactivity; medical applications of radiation and radioisotopes; radiation gauges and their industrial applications; large gamma irradiation sources; mining and milling of radioactive ores; use of radioactive materials in research and teaching laboratories; ultraviolet, infrared, ELF, RF and microwave radiation; sources, hazards and measurement; measurement of radiation in air and soil samples; radiation surveys; personnel, area and contamination monitoring; dose assessment for workers and members of the public.

**Courses:** IF39, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** PCB362, PCB404

**Contact hours:** 5 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PCB661 EXPERIMENTAL PHYSICS

The content of experiments and projects will vary and be adapted to the interests of each student. Students will work independently on sophisticated laboratory experiments or project work with a minimum of staff direction. Skills developed during this unit include:- communication, problem solving, time management, written and oral presentation, reflective practice, technological literacy and working independently.

**Courses:** IF29, IF39, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** PCB361, PCB460

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB665 PHYSICS 3

This unit extends the content of previous units in electromagnetism and the application of Maxwell's equations, electromagnetic waves, polarisation, dielectric permittivity, transmission line theory, waveguides, optic fibre theory, antennae. The unit also includes a detailed study of magnetic resonance and laser physics, including applications of these topics.

**Courses:** IF29, IF39, IF71, IF83, IF84, IF86, SC01

**Prerequisites:** (MAB134 or MAB311) and PCB362 and PCB462

**Contact hours:** 4 per week   **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PCB667 ADVANCED RADIOGRAPHIC TECHNIQUE 2

An extension of topics in advanced radiographic technique. A course of lectures and practical ex-

## UNIT SYNOPSES

ercises on image interpretation including technical and diagnostic quality.

**Courses:** PH38

**Prerequisites:** PCB567

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCB669 ASTROPHYSICS 2

General theory of relativity, gravitation, gravitational waves, gravitational lensing, Space-time concept and singularities.

Gravitational collapse, black holes, quasars, neutron stars and pulsars. Cosmology, big bang, evolution of the universe, expanding universe, finite and infinite models of the universe.

Links between particle physics and astrophysics.

**Courses:** SC01

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCB672/1 PROJECT

A supervised project involving either application of existing theoretical practical knowledge or a literature survey of a selected relevant topic.

**Courses:** PH38

**Credit points:** 6

**Campus offered:** GP **Semester:** 1

### ► PCB672/2 PROJECT

A supervised project involving either application of existing theoretical practical knowledge or a literature survey of a selected relevant topic.

**Courses:** PH38

**Prerequisites:** PCB672/1

**Credit points:** 6

**Campus offered:** GP **Semester:** 2

### ► PCB675 RADIATION SAFETY AND QUALITY ASSURANCE

A study of the biological effects of ionising and non-ionising radiation and the philosophy and protocol in radiation protection. A study of the principles and techniques used in the quality assurance of medical imaging apparatus and ancillary equipment and image formation evaluation.

**Courses:** PH38

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCB681 COMPUTED TOMOGRAPHY IMAGING

Lectures, practical exercises and clinical experiences in CT imaging.

**Courses:** PH38

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PCB682 MAGNETIC RESONANCE IMAGING

Lectures, tutorial exercises in the physical principles and clinical techniques used in magnetic resonance.

**Courses:** PH38, PH60, PH71, PH80

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCB684 FORENSIC ANALYSIS AND TOXICOLOGY

This unit provides a theoretical and practical framework for forensic analysis and toxicology. It includes topics such as nature and abuse of drugs; introduction to pharmacology and toxicology; illicit drugs and poisons. Application of GC, HPLC, MS and hyphenated techniques as well as IR; examination of trace evidence. Substantial laboratory and workshop sessions complement the theory.

**Courses:** ED50, IF39, IF71, IF86, SC01

**Prerequisites:** PCB242, PCB514

**Contact hours:** 5 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCB687 SPECIALISED RADIOTHERAPY TECHNIQUE 2

A study of specialised radiotherapy techniques including techniques applicable to the child patient and patients with communicable disease, total body photon and electron therapy. A course of lectures on the principles, strengths and stage of development of techniques which are integral or complementary to the modern radiotherapy treatment of cancer.

**Courses:** PH38

**Contact hours:** 6 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCB695 ADVANCED TREATMENT PLANNING TOPICS

A study of the principles and techniques of medical imaging used in the detection of cancer including CT, MRI, U/S and NM. This study also covers future directions of three dimensional treatment planning.

**Courses:** PH38

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCB700 RESEARCH PROJECT

All students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project is assessed on the basis of an extensive written report and an oral presentation.

**Courses:** SC60

**Credit points:** 60

**Campus offered:** GP **Semester:** 1, 2

### ► PCB705 PROJECT

A research project in which the student initiates and undertakes an investigation of some magnitude and originality. Topics are related to research interests in the Centre for Medical and Health Physics, or the School of Physical Sciences.

**Courses:** SC60

**Credit points:** 48

**Campus offered:** GP **Semester:** 1, 2

### ► PCB706 QUANTUM MECHANICS

Review of operators and their role in quantum mechanics, different representations, Dirac notations and linear vector space, matrix approach to quantum mechanics, eigenvalues and eigenvectors, unitary transformations, R- and P-representations, tensor product of states, six postulates of quantum mechanics, concept of measurements, quantum entanglement, density matrix, general theory of angular momentum, two-level systems, non-relativistic theory of spin, spinors, hybrid orbitals and chemical bonding, theory of scattering, Born approximation, partial wave analysis, time-dependent perturbation theory.

**Courses:** SC60

**Prerequisites:** PCB561

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

### ► PCB707 ADVANCED MATERIALS

Amorphous and nanocrystalline structures; ceramics; metastable interstitial nitrides; composites; superconducting ceramics; fabrication techniques; testing and analysis of advanced materials; shock processing.

**Courses:** SC60

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

### ► PCB708 ADVANCED TOPICS IN PHYSICS

No more than three topics are included. The content is determined by current research advances, availability of appropriate staff, visiting academics, etc and may vary from year to year.

**Courses:** SC60

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

### ► PCB742 ELECTIVE STUDIES

The subjects are chosen to suit individual students but the topics studied would normally be in specific areas of physical chemistry, analytical chemistry, inorganic chemistry or organic chemistry and would be chosen from subjects presently offered in the masters program or other post graduate programs. Relevant material from other accredited courses may be included as part or all of the requirement for this subject as directed by the course coordinator and Head of School.

**Courses:** SC60

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PCB780 ADVANCED TOPICS IN CHEMISTRY 1

First semester component of a two-semester unit covering a selection of advanced topics in the areas of physical, organic and inorganic chemistry. The topics offered reflect the expertise of the

academic staff as well as the needs of the students.

**Courses:** SC60

**Contact hours:** 6 per week **Credit points:** 24  
**Campus offered:** GP **Semester:** 1, 2

### ► PCN112 MEDICAL IMAGING SCIENCE

Introduction to the MATLAB programming language; programming techniques and algorithms and digital image processing. The principles of display, perception and interpretation of medical images. Image quality. Imaging in nuclear medicine.

**Courses:** PH71, PH80, SC60

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCN113 RADIATION PHYSICS

Radioactivity and the interaction of ionising radiation with matter; applied radiation counting techniques; radiation detectors; radiation dosimetry.

**Courses:** PH71, PH80, SC60

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PCN114 MICROPROCESSORS AND INSTRUMENTATION

The capabilities and limitations of a given instrument; design of interfaces between microcomputers and transducers; signal conditioning and signal conversion circuits for data acquisition.

**Courses:** PH71, PH80, SC60

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PCN159 ULTRASONIC EXAMINATION 1

The normal and abnormal anatomy and functions related to gynaecology and obstetrics, the ultrasonic techniques used and the appearance of related images. A study of the technique used in the ultrasonic examination of the abdomen including the appearance on the ultrasound image of normal abdominal anatomy and its alteration by pathological processes.

**Courses:** PH71, PH80

**Corequisites:** PCN162, PCN197

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PCN162 PRINCIPLES OF MEDICAL ULTRASOUND

This unit is designed to provide students with a thorough understanding of the physical processes involved in producing an ultrasound image, the features of ultrasound equipment and the role and responsibilities of the sonographer in producing a diagnostic examination. Topics include; general scanning principles and considerations, care of equipment, physics of ultrasound, ultrasound equipment features, image production and processing, artefacts, image recording methods, quality assurance techniques, biological hazards and safety issues, care of the patient and communication issues.

**Courses:** PH71, PH75, PH80, PH85

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP, EXT **Semester:** 1

### ► PCN184 BREAST IMAGING

Medical imaging of the breast; principles of mammographic and sonographic imaging; breast anatomy and physiology; pathological conditions affecting the breast and their appearances; advanced mammographic techniques; mammographic and sonographic quality assurance.

**Courses:** PH60, PH71, PH80

**Prerequisites:** PCN162, PCN187

**Corequisites:** PCN397

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCN197 CLINICAL ATTACHMENT 1

A supervised practical program carried out in an approved medical imaging department. Students are required to undertake specified clinical practice as applicable to their area of specialisation and meet minimum requirements of clinical hours and case scope and numbers.

**Courses:** PH60, PH71, PH80

**Corequisites:** PCN159, PCN162

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

## UNIT SYNOPSES

### ► PCN211 PHYSICS OF MEDICAL IMAGING

The physical principles involved in the production of radiographic, ultrasonic and magnetic resonance images; quality control protocols.

**Courses:** PH71, PH80, SC60

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PCN212 RADIOTHERAPY PHYSICS

Overview of the application of physics to radiotherapy; theoretical and practical aspects of the major topics in radiotherapy physics.

**Courses:** PH71, PH80, SC60

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCN214 HEALTH AND OCCUPATIONAL PHYSICS

The philosophy, protocols and practices of safety in the medical and industrial fields; minimisation of hazards associated with radiation, acoustic, electrical and mechanical techniques.

**Courses:** PH71, PH80, SC60

**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PCN218 RESEARCH METHODOLOGY AND PROFESSIONAL STUDIES

In the rapidly changing technological environment of medical physics, medical imaging and medical ultrasound it is essential that students develop basic research skills, data interpretation skills and written communication skills. Topics include; the research process, data collection and analysis techniques, and writing and evaluating research reports. Students also require knowledge of the professional, basic management, legal and ethical issues involved in their particular speciality area. Topics include; the role and purpose of professional bodies, professional communication, legal and ethical issues, basic professional management techniques and issues.

**Courses:** PH71, PH75, PH80, PH85

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** EXT **Semester:** 2

### ► PCN259 CARDIAC ULTRASOUND 1

The field of medical ultrasound is scientifically based, in an environment that is rapidly changing and undergoing considerable technological advancement. A thorough understanding of the techniques used in the evaluation of the fetal, pediatric and adult heart is essential for professionals working in this field. Topics include; patient preparation and communication requirements, basic electrocardiograph (ECG) patterns, standard ultrasonic imaging planes, standard B-mode views, M-mode ultrasound, B-mode and M-mode calculations, basic hemodynamics and an introduction to Doppler physics and principles.

**Courses:** PH75, PH85

**Credit points:** 12

**Campus offered:** EXT **Semester:** 2

### ► PCN297 CLINICAL ATTACHMENT 2

A period of additional supervised clinical practice designed to expand and refine skills acquired in PCN197.

**Courses:** PH71, PH80

**Prerequisites:** PCN159, PCN197, PCN356

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PCN356 ULTRASONIC EXAMINATIONS 2

Ultrasound techniques used to examine the head, neck and peripheral organs and the ultrasonic appearance of normal and abnormal anatomy and pathology. Ultrasound techniques in advanced obstetrics and gynaecology and in the abdomen.

**Courses:** PH71, PH80

**Prerequisites:** PCN159, PCN162, PCN197

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► PCN359 CARDIAC ULTRASOUND 2

Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit extends and builds on the content of PCN259 by introducing concepts and techniques of the complex haemodynamic examinations and discussing the applications of the techniques described to com-

mon pathological clinical situations. Topics include; spectral and colour Doppler examinations, Doppler calculations, assessment of systolic function, introduction to trans-oesophageal echocardiography, echocardiographic assessment of pathological conditions of the heart, and systemic causes of heart disease.

**Courses:** PH75, PH85

**Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 1

### ► PCN397 CLINICAL ATTACHMENT 3

A supervised practical program carried out in an approved medical imaging department. Students are required to undertake specified clinical practice as applicable to their area of specialisation and meet minimum requirements of clinical hours and case scope and numbers.

**Courses:** PH60

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PCN459 ADVANCED CARDIAC ULTRASOUND

Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit extends and builds on the content of units PCN259 and PCN359 by introducing more advanced applications of echocardiography. The advanced areas of diastolic function, unusual pathologies, the assessment of congenital heart lesions in the fetus, and pediatric and adult patient, and new and evolving technologies will be covered. Additionally, an overview of other diagnostic methods of the heart will be presented in order to demonstrate the complementary nature of diagnostic testing.

**Courses:** PH75, PH85

**Credit points:** 12

**Campus offered:** GP, EXT **Semester:** 2

### ► PCN497 CLINICAL ATTACHMENT 4

The field of medical ultrasound is scientifically based, in an environment that is rapidly changing and undergoing considerable technological advancement. Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to all other units in the course. In this unit, basic echocardiographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff.

**Courses:** PH75, PH85

**Corequisites:** 12

**Campus offered:** EXT **Semester:** 1, 2

### ► PCN520 PROJECT (FT)

The project may take the form of research development, a design, a feasibility study, or the collation of scattered information on a given topic. The project can be undertaken externally under QUT supervision. Time spent on projects is one semester for full-time and two semesters for part-time students.

**Courses:** PH80

**Contact hours:** 18 per week **Credit points:** 48

**Campus offered:** GP **Semester:** 1, 2, 3

### ► PCN540 PROJECT (PT)

The project may take the form of research development, a design, a feasibility study, or the collation of scattered information on a given topic. The project can be undertaken externally under QUT supervision. Time spent on projects is one semester for full-time and two semesters for part-time students.

**Courses:** PH80

**Contact hours:** 9 per week **Credit points:** 48

(24 PT per semester)

**Campus offered:** GP **Semester:** 1, 2, 3

### ► PCN597 CLINICAL ATTACHMENT 5

Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to all other units in the course. This unit builds on skills, knowledge and

abilities gained in the unit PCN497. In this unit, basic skills are refined and expanded, and advanced echocardiographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff.

**Courses:** PH75, PH85

**Credit points:** 12

**Campus offered:** EXT **Semester:** 1, 2

### ► PCN640 PROJECT

The project may take the form of research development, a feasibility study, or the collation of disparate, scattered information. The project can be undertaken externally, under QUT supervision. The project would normally be undertaken part-time over 2 semesters.

**Courses:** PH85

**Credit points:** 12

**Campus offered:** EXT **Semester:** 1, 2

### ► PCN701 TOPICS IN ADVANCED CHEMISTRY 1

A series of lectures and/or a reading program and/or selected laboratory exercises designed to provide the student with the appropriate theoretical and practical background, at an advanced level, necessary for the completion of a research program.

**Courses:** SC80

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PCN705 RESEARCH METHODOLOGY

A guided program of literature surveys to provide the background information for the research project. This unit enables students to develop verbal and oral communication skills required for the successful conduct of a chemical research project. During the course students will be required to attend and participate in seminars. Students must present two seminars on their own research.

**Courses:** SC80

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PCN710 CHEMICAL INSTRUMENTATION

Chemical instrumentation and electronics required for advanced level operation of scientific instrumentation.

**Courses:** SC80

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PCN715 ADVANCED TOPICS IN PHYSICS 1

Provides a focused theoretical foundation for each students research program or other advanced topics in physics and develops a high level of theoretical understanding of the physical principles involved.

**Courses:** SC80

**Credit points:** 8

**Campus offered:** GP **Semester:** 1, 2

### ► PCN716 ADVANCED TOPICS IN PHYSICS 2

See PCN715

**Courses:** SC80

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PCN720 CHEMOMETRICS

The concepts of chemical data acquisition and interpretation; computational methods and existing software packages for statistical analysis in chemistry; statistical methods in quality and process control; sampling procedures; multivariate analysis and optimisation techniques.

**Courses:** SC80

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PCN730 ADVANCED PHYSICAL METHODS IN CHEMISTRY

The theoretical and practical principles of selected physical methods in chemistry.

**Courses:** SC80

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

## UNIT SYNOPSES

### ► PCN740 LABORATORY TECHNIQUES FOR PREPARATIVE CHEMISTRY

The experimental techniques for the preparation and isolation of pure substances.

**Courses:** SC80

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PCN801 TOPICS IN ADVANCED CHEMISTRY 2

See PCN701.

**Courses:** SC80

**Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PSB102 ELECTIVE STUDIES (L'SCAPE MAJOR)

**Courses:** BN31

**Contact hours:** 3 per week

**Campus offered:** GP **Semester:** 1

### ► PSB411 PLANNING/LANDSCAPE DESIGN 1

Theory: Basic design vocabulary, design principles, design tools, different approaches to design and problem solving. Studio: Projects to encourage an understanding of design - seeing design through the use of line, form, colour, texture, etc, using design principles, and developing critical and creative thinking towards design.

**Courses:** BN31

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► PSB412 COMPUTER SKILLS

Development of understanding, awareness, and appreciation of computers as an aid in data analysis and presentation, basic skills of input, manipulation and examination of output for statistical analysis of data in decision making; the range of information systems and appropriate data analysis software; utilisation as a professional tool.

**Courses:** BN31, PS47, PS48

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► PSB413 GRAPHICS

Graphics as a tool within the planning and design process; as a communicator of results; diagramming; lettering; layout; visual themes; different media and reproduction; scale; legibility; graphic organisation; realism and abstraction; axonometric; perspective; freehand and technical drawing.

**Courses:** BN31

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► PSB414 PROFESSIONAL SKILLS 1

Basic information retrieval skills and presentation; introduction to academic life; learning skills, time management; QUT library as a resource; writing process: types, formats, styles, bibliographic connections; indexing and abstract services; electronic information retrieval; personal file management; evaluating information

**Courses:** BN31, PS47, PS48

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► PSB421 PLANNING/LANDSCAPE DESIGN 2

Introduction to design processes and types of design at various scales; consolidating and extending the habits of visual and creative thinking; understanding and using the basic techniques of site surveying; introduction to the concept of cultural values and personal values. Introduction to understanding each profession in theory and by studio application; development of group interaction.

**Courses:** BN31

**Prerequisites:** PSB411

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► PSB422 ENVIRONMENTAL SCIENCE

The concept of landscape as interacting dynamic systems and processes; role of humans in these systems; awareness of the relevance of environmental issues in the professions. Basic scientific processes and concepts relating to the physical environment; ecosystems and landscape ecology; people in the landscape and sustainability; the built environment professions and environmental impact.

**Courses:** BN31, PS47, PS48

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► PSB423 GROUP DYNAMICS

Basic theories and concepts of psychology and human behaviour: role of self concept, locus of control in transactions, perception, learning processes, problem-solving, hierarchy, and dynamics of working with others. Group process skills: small group communication, verbal /non-verbal languages; listening, assertive and negotiating skills; values, personalities and cultural differences in-group functioning.

**Courses:** BN31

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► PSB424 LAND SCIENCE

This unit consists of 4 elementary modules, which are taken according to the needs of the discipline of study. Module A: spatial referencing, site measurement; use of maps and air photos. Module B: surveying. Module C: science. Module D: statistics. Disciplines: Surveying - Modules A and B. Landscape Architecture - Modules A and C. Urban and Regional Planning - Modules A and D.

**Courses:** BN31, PS47, PS48

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1, 2

### ► PSB431 PLANNING/LANDSCAPE DESIGN 3

Theory - reinforcement of the design process. Character - components, types and delineation. Place/use relationships. Practical - projects requiring application of knowledge and skills reacting to places and their uses, supported by relevant graphic and oral communication techniques. The projects are linked at an urban scale. These proposals are communicated through drawings and illustrated reports. The studio requires an increased emphasis on group work at the investigative stage.

**Courses:** BN31

**Prerequisites:** PSB421, PSB413

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** GP **Semester:** 1

### ► PSB432 HISTORY OF BUILT ENVIRONMENT

Lectures will cover the history of human occupation and use of the land, particularly the design and development of human settlements and the evolution of the professions involved in these activities in a global overview. The unit will cover the historical development of significant designed landscapes throughout the world, from earliest times to the present day, in their social and political contexts, emphasising current ideas and philosophies. This unit provides an introduction to the large body of knowledge, understanding and different interpretations about landscape and planning history.

**Courses:** BN31

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► PSB433 PLANNING PROCESSES (URP ONLY)

Planning as a creative and value-based activity. The problem-solving process which links places, activities and underlying values. Planning method as a progressive and cyclic process, incorporating the logic of conscious planning, identification of problems and issues, the roles and derivation of objectives, analysis and projection of activity systems, resource and issue analysis, synthesis in planning, decision-making, implementation, and evaluation. The emerging fields within community and land use planning. The examples will cover outputs dealing with spatial scale (regional, metropolitan, urban and local) and conceptual scale (strategic visions, program plans, projects, policies).

**Courses:** BN31

**Prerequisites:** PSB414, PSB423

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► PSB434 LANDSCAPE CONSTRUCTION A (L'SCAPE ONLY)

The units comprise three primary components: grading (manipulation of land surfaces); materials and construction elements (development of understanding of the properties and use of common construction materials relevant to landscape construction; introduction to structures (principles of structural mechanics). In all of these components attention will be paid to: development of appropriate technical drawing and documentation techniques for the preparation of construction documentation.

**Courses:** BN31

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► PSB435 SOCIAL AND CULTURAL RELATIONS

Introduction to some of the underlying social relationships and their structures in contemporary Western urbanisation. Application of sociological theories by way of analysis of an urban environment with respect to its socio-cultural functions. Theory of human functioning in urban environment: privacy, personal space, environmental meaning and cognition. Analysis of major concepts in urban life including; concepts and ideas of capitalism, the relation between production and current restructuring of production, social relationship.

**Courses:** BN31

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 1

### ► PSB441 PLANNING/LANDSCAPE DESIGN 4

Theory - reinforcement of site planning and techniques. Development and communication of vision statements, aims and objectives. Designing for sustainable futures ensuring a strong community participation facility. Using design science principles to ensure comfort and fit. The principles of designing for climate, the affects of topography, vegetation, structures, and surface materials are all considered as part of the design solution/s. Practical - the project is based on one location and always involves a specific community group. The project has three stages; analysis of the community structure and its needs, analysis of the settings and its physical potential and constraints and discipline orientated proposals for the community/location improvement. The studio requires a balance of individual and group work and is supported with tutorials on graphics and oral presentation techniques.

**Courses:** BN31

**Prerequisites:** PSB431

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► PSB442 PLANT STUDIES (L'SCAPE ONLY)

Plant Ecology: Resources for studying plants (established and personal herbariums, keys, other locally), classification and nomenclature, evolution of the plant kingdom, plant systematics, plant structure, plant anatomy, plant physiology, form and function, requirements for plant growth, plants and habitats, populations, ecosystems, disturbance, weeds, pattern and diversity. Horticulture: Design characteristics and criteria; use of plants as structural and design elements within the landscape; principles of planting design; scale; design for change, growth, replacement, and maintenance; planting design in typical locations such as streets, parks, urban forecourts, interiors, gardens, foreshores, and broad scale regeneration and stabilisation.

**Courses:** BN31

**Prerequisites:** PSB422

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** GP **Semester:** 2

### ► PSB443 POPULATION AND URBAN STUDIES

Population Studies: Demographic concepts and analytical methods, Demographic trends in Australian cities and its planning implications, Internal migration patterns in Australia, International migration and planning for multi-cultural cities. Urban Studies: Urban concepts and theoretical approaches to urban studies, Internal structure of

## UNIT SYNOPSES

cities and urban hierarchy, Economic restructuring and employment in cities, Small towns in Australia, Gentrification, Housing supply and demand, Residential patterns in Australian cities, Urban landscapes and city images, Sustainable urban development, Urbanisation and housing issues in developing countries.

**Courses:** BN31  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PSB444 LANDSCAPE CONSTRUCTION B (L'SCAPE ONLY)

The units comprise three primary components: grading (manipulation of land surfaces); materials and construction elements (development of understanding of the properties and use of common construction materials relevant to landscape construction); introduction to structures (principles of structural mechanics). In all of these components attention will be paid to: development of appropriate technical drawing and documentation techniques for the preparation of construction documentation.

**Courses:** BN31  
**Prerequisites:** PSB434  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PSB445 INFRASTRUCTURE PLANNING (URP ONLY)

Transport studies and the links between land uses and transport. The main modes of transport (eg private vehicle, bus, rail, bicycle) and their requirements and impacts. Methods of predicting future transport patterns. Traditional and innovative techniques of transportation planning and management. Land use planning approaches, which utilise transport management techniques. The effects of transport decision, policies and implementation on the physical, social and cultural environment. Introduction to the basic requirements of human settlements in terms of other 'hard' infrastructure, including planning for community services, water supply, sewerage, electricity, electronic communications and infrastructure financing. Introduction to basic human services planning. The impacts of changing materials and technology on infrastructure and settlements, as well as the possible changes which may occur in the foreseeable future.

**Courses:** BN31  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PSB451 PLANNING/LANDSCAPE DESIGN 5

Classes will be based on one or at most two projects. For each the work will be carried out for a client (who may be an individual or group) on a specific site. The design(s) will be taken to the concept stage for presentation to the client(s) and others. The project will be carried out through identifiable inter-disciplinary team work. The program for each project will involve developing an understanding of the context of the site and the project, development of clear directions for the project and a clear brief, site and project analysis, concept generation and development, and graphic, verbal and written communication of the proposal(s).

**Courses:** BN31  
**Prerequisites:** PSB441  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PSB452 PROFESSIONAL SKILLS 2

The sources and importance of systems of values. Appreciation of the diversity of values in modern Australian society. Exploration of relevant codes of professional conduct. Explorations of value based and ethical implications relevant to topical issues of the day, such as land development, conservation, government policies, changing technology, or cultural diversity. Identification of potential sources of conflict in communities and groups. Principles of conflict management. Conflict management processes and techniques related to relevant aspects of professional activity, including community consultation, working with groups, professional teams and the like. Approaches to effective and principled negotiation.

**Courses:** BN31

**Prerequisites:** PSB414  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PSB453 ELECTIVE 1

Elective Units may be offered by the School or through other Faculties within the University. All Electives are to be approved by the Course Coordinators

**Courses:** BN31  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PSB461 PLANNING/LANDSCAPE DESIGN 6

This unit requires individual work supported by informal workshops. The content is organised within a community and based upon an area, which has a complex array of uses, constraints and opportunities. Following an overview of the given area and a statement of broad directions for improving the quality of the physical and social environments, each student proposes an individual study topic. The topic theory is then researched and a study area analysis undertaken to develop a brief for development of subsequent proposals. Each student then carries through the brief by developing conceptual and detailed proposals for the study topic. The unit allows each student to interact personally with members of the community and to develop a climax project for their own folio of work.

**Courses:** BN31  
**Prerequisites:** PSB451  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PSB462 CONSERVATION AND MANAGEMENT

This is a composite unit containing two segments: heritage studies (conservation) and land use policies and evaluation (management). The conservation unit segment deals with the theory and practice behind the conservation of the built and natural environment. The lectures will include an introduction to the Australia ICOMOS' Burra Charter, and cover conservation principles and accepted procedures, methods of researching and recording, assessment of cultural and natural significance, and locally applicable protective heritage legislation. The management unit segment deals with the roles of different levels of government in Australia related to land use policy, explores why public policies are made and by whom, and the implementation and evaluation of land use policies.

**Courses:** BN31  
**Prerequisites:** PSB432  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PSB463 ELECTIVE 2

Elective units may be offered by the School or through other Faculties within the University. All Electives are to be approved by the Course Coordinators.

**Courses:** BN31  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PSB610 GOVERNMENT AND LAW

Study of Australian political institutions and how they affect land development.

**Courses:** PS47, PS48, BN31  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PSB611 INTRODUCTION TO URBAN AND REGIONAL ECONOMICS

Microeconomics (global and national macroeconomic forces as they affect firms will be outlined); a free market and its imperfections; market failure and the concepts of private and public interest, equity and the role of government; land as an economic concept; economic models of urban land use; valuation theory and concepts of land value, tenure, ownership, resumption, compensation, land use controls and zoning; economics of important town planning issues such as housing, infrastructure, and urban finance; economic growth and stability; optimal size and the problem of externalities; methodolo-

gies such as regional accounting and cost benefit analysis.

**Courses:** PS47, PS48, BN31  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PSB612 SPATIAL AND LAND INFORMATION MANAGEMENT

Spatial Information Science Application Areas: application areas; resource management; urban and rural planning; cadastral administration; facilities management. System Planning: system planning overview; functional requirements analysis; system evaluation; benchmarking. System Implementation: database creation; implementation issues; implementation strategies. Other Aspects: standards; legal issues; knowledge-based techniques.

**Courses:** PS47, PS48  
**Prerequisites:** PSB631  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PSB613 LAND DEVELOPMENT PRINCIPLES AND POLICIES

Principles and policies concerned with sustainability of land development from an economic, ecological and social perspective.

**Courses:** PS47, PS48, BN31  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PSB614 URBAN AND RURAL DESIGN PRINCIPLES

The history of land development, especially urban land development, in Australia and in Queensland. The effects of technology and social attitudes on urban land development. The physical, economic and social determinants of land use. Land development as an economic activity. Economic and social benefits of land development controls. Site analysis and assessment; opportunities and constraints, sieve mapping, GIS application. The site in its broader context. Spatial models; models for levels of activity and location of activities, optimising models. Elements of traffic planning, road capacities, road hierarchies. Geometric layout of rural and urban roads. Storm water and sewerage drainage for urban subdivisions. Subdivision design; lot geometry, and orientation, road hierarchies and access; open space systems, radburn. Provision and location of services. Detailed treatment of development controls affecting subdivisions - negotiations, applications, appeals. Preparations for Court, precedents.

**Courses:** PS47, PS48  
**Prerequisites:** PSB613  
**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PSB615 URBAN AND RURAL DESIGN PRACTICE

Further work on conventional and innovative subdivision design, integration of road and lot design with engineering works, especially drainage. Subdivision designs and procedures for canal estates, industrial estates, group title, building units and other strata titles. Costing and cash flow analysis for subdivision projects. Feasibility studies, designing to a budget. Preparation of a complete application for a local authority approval.

**Courses:** PS47, PS48  
**Prerequisites:** PSB614  
**Contact hours:** 4 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

### ► PSB620 CADASTRAL SURVEYING AND MAPPING

Land Title Systems, Reinstatement: An explanation of the options of land title systems, with particular reference to Customary Land Tenure, Private Deeds registration, Public Deeds Registration, and Registration of Title. An analysis of reinstatement of property boundaries as applicable to Queensland. Undertaking of a field survey to reinstate the boundaries of a section in the Brisbane Metropolitan area. Preparation of cadastral and detail survey plans for survey actions. The legal aspects of re-instatement of boundaries. Case law associated with re-instatement. Statutory requirements which relate to the zoning and development of land.

## UNIT SYNOPSES

**Courses:** PS47, PS48

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **PSB621 ADVANCED CADASTRAL SURVEYING**

The need for control in the use of resources. Property rights as a method of resource control. Creating and maintaining knowledge of property rights; including issues concerned with parcel identifiers, land tenure, land boundaries, land subdivision, land registration, changing rights through statutory changes, attitudes and responses of the public. Evidence of property rights, evolution from customary land tenures to land registration systems, and factors leading to breakdown of systems. Effects of technological change on land use, evolving property rights and obligations, and on information technology on land use controls. Procedures of the various departments including but not confined to, the Department of Lands, Resources Industries. Plan registration, Road closure, Resumption surveys, Conversion of Mining tenure to freehold, Conversion of pastoral tenures to freehold, Excision for and of reserves of various kinds. The undertaking of a cadastral survey of moderate complexity in accordance with Surveyors' Board's requirements for registration as a surveyor

**Courses:** PS47, PS48  
**Prerequisites:** PSB620

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **PSB630 CARTOGRAPHY AND DIGITAL MAPPING**

Digital data acquisition: types of digitisers and scanners; raster/vector conversions; digitising techniques; scanning problems; output devices; printers, plotters, scanner plotters, image setters. 3-D representation and precision plotting. Conditions for orthogonality, conformality, equivalence and equidistance Selection of suitable projection. Construction of map projections

**Courses:** PS47, PS48

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **PSB631 GEOGRAPHIC INFORMATION SYSTEMS 1**

This unit investigates the basic concepts of geographic information systems. Topics to be covered include components of GIS, spatial databases, data acquisition, reference frameworks, use of photographs and images, spatial analysis and graphic output design issues.

**Courses:** PS47, PS48, PS78, PS79

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **PSB632 PHOTOGRAMMETRY**

Basic elements of the photogrammetric mapping process; planning and execution of the project control for Photogrammetry. Mathematics for Photogrammetry, geometry and use of a stereo model; Space Resection of a Single Photograph. Aerotriangulation with Independent method. Block triangulation by bundle method GPS controlled photography. Principles of plotting with a stereoplottter, Rectification of Photographs. Acquisition of plan and height points, accuracy assessment. Digital Mapping and its relationship to Geographic Information Systems and Remote Sensing.

**Courses:** PS47, PS48

**Prerequisites:** PSB631, PSB642

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **PSB633 MAP PRODUCTION: PRINCIPLES AND PRACTICE**

Map design, map production principles; map production practice, map publishing; reprographics and printing methods; desktop publishing, colour system for cartographic drawing; colour separation, grid and gradicules and design layout, interactive mapping and selection of layers, generalisation and symbolisation.

**Courses:** PS47, PS48

**Prerequisites:** PSB632

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

► **PSB640 SURVEYING**

This unit will extend the theory and practice of PSB424 Land Science to provide: a foundation in field instrumentation and survey computations: framework for acquisition of a high level of knowledge and practical competence in plane survey computations, use of optical and electronic theodolites, EDM and total electronic station systems; focus on collection/presentation of pre-design contour and detail spatial information.

**Courses:** PS47, PS48

**Prerequisites:** PSB424 (PS47 only)

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2, 3

► **PSB641 ENGINEERING SURVEYING**

Horizontal and Vertical alignment for route surveys. Areas, volumes and earthworks. Surveying measurements and their assessment, Propagation of Variances, Pre-analysis of survey tasks, Least Squares adjustment methods for various functional and stochastic models.

**Courses:** PS47, PS48

**Prerequisites:** PSB640

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **PSB642 CONTROL SURVEYING AND ANALYSIS**

Reconnaissance for geodetic surveys - formulate mathematical models for the solution of linear and non-linear positioning in one, two and three dimensions. Geodetic observations techniques and reduction of observations. The three classical methods of geodetic surveying, that of triangulation, trilateration and traversing. Precise levelling including instrument testing. Properties of the meridian ellipse. Radii of curvature, meridian arc. Spheroid as a geodetic reference surface, latitude, longitude, geoid separation and ellipsoidal height. Mutual conversion of geodetic and Cartesian co-ordinates.

**Courses:** PS47, PS48

**Prerequisites:** PSB641, MAB730

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **PSB643 GEODESY**

Theory: Concept and classification of geodesy, the basic concepts of the earth's gravity field, level surfaces and plumb lines, heights, geoid, mean sea level, spherical harmonics etc, fundamentals of satellite geodesy, reference coordinate systems. GPS positioning models and algorithms, software, GPS field observing, various GPS applications in geomatics. Mapping terms and definitions; the mapping problem. Principles for deriving projections. The use of skew graticules. The UTM system

**Courses:** PS47, PS48

**Prerequisites:** PSB642

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

► **PSB644 ADVANCED GEODESY**

(a) Theory: GPS operation and navigation messages, GPS observable and error budget, differencing techniques, GPS positioning models and algorithms, software, GPS field observing, Static, Kinematic, RTK and various GPS applications in geomatics (b) Practicals: GPS Network

**Courses:** PS47, PS48

**Prerequisites:** PSB643

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

► **PSB645 SURVEYING AND MAPPING PRACTICE**

Field surveys for DTMs as-constructed surveys, associated specifications and standards. Mining surveying for surface and below surface mining activities. Hydrographic surveying for exploration and port management.

**Courses:** PS47, PS48

**Prerequisites:** PSB642

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **PSB650 PROJECT 1**

(1) Students will study an existing approved unit from within the School, Faculty or University. Students will study the chosen unit under the above elective code. Or (2) Students will study a special topic of interest such as a series of lec-

tures delivered by a specialist in that field, in which case a unit outline will be prepared and issued before the commencement of that unit. Students will study under the above elective code. Or (3) In the case of an approved stream of study, students may be allowed to enrol in the actual code of the unit being taken.

**Courses:** PS47, PS48

**Credit points:** 12

**Campus offered:** GP            **Semester:** 1

► **PSB651 PROJECT 2**

(1) Students will study an existing approved unit from within the School, Faculty or University. Students will study the chosen unit under the above elective code. Or (2) Students will study a special topic of interest such as a series of lectures delivered by a specialist in that field, in which case a unit outline will be prepared and issued before the commencement of that unit. Students will study under the above elective code. Or (3) In the case of an approved stream of study, students may be allowed to enrol in the actual code of the unit being taken.

**Courses:** PS47, PS48

**Credit points:** 12

**Campus offered:** GP            **Semester:** 2

► **PSB652 TOPICS IN LAND ADMINISTRATION**

Students will study Topics in Land Administration delivered by a specialist in that field. A unit outline will be prepared and issued before the commencement of that unit.

**Courses:** PS47, PS48

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **PSB653 TOPICS IN SURVEYING ENGINEERING**

Students will study a special topic in Surveying Engineering delivered by a specialist in that field.

**Courses:** PS47, PS48

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 2

► **PSB654 TOPICS IN SPATIAL INFORMATION SCIENCE**

Students will study Spatial Information Science through a series of lectures delivered by a specialist in that field.

**Courses:** PS47, PS48, PS78, PS79

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1

► **PSB655 REMOTE SENSING**

History and principals of remote sensing, Types of imagery, image interpretation, satellite systems. Supervised and unsupervised image classification. Interpretation, analysis and presentation of data. Applications in the earth sciences.

**Courses:** PS47, PS48, PS78

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

► **PSN211 RESEARCH PROJECT 1**

Ensures the understanding and demonstration of relevant research skills and their effective application in a project of genuine substance and significance. Each student will undertake a Research Project in one of the elected specialisations: Landscape Design, Landscape Planning, Landscape Theory, Landscape Practice, Landscape Management. Each student will be assigned to a supervisor approved by the Course Coordinator. In general, the supervisor will provide guidance on the selection of topic, investigation and research, and preparation of the proposals and submission. Research Project 1 will incorporate advanced Information Retrieval Skills. The output will be a proposal for the specific Research Project which outlines the relevant base theory, and clearly communicates the potential extent of the Research Project.

**Courses:** BN73, DB69, DB73, PS71

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** GP            **Semester:** 1, 2

► **PSN212 RESEARCH PROJECT 2**

Ensures the understanding and demonstration of relevant research skills and their effective application in a project of genuine substance and significance. Each student will undertake a Research Project in one of the elected specialisa-

tions: Landscape Design, Landscape Planning, Landscape Theory, Landscape Practice, Landscape Management. Each student will be assigned to a supervisor approved by the Course Coordinator. In general, the supervisor will provide guidance on the selection of topic, investigation and research, and preparation of the proposals and submission. Research Project 2 requires the completion, communication and presentation of the research project to professional standard.

**Courses:** BN73, PS71, DB73

**Prerequisites:** PSN211

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2, 3

► **PSN213 SPECIALISATION**

This Unit ensures personalised study which will support the student's elected Specialisation and contribute directly to the better understanding of the Research Project topic. Students will undertake study to develop specialised knowledge and skills related to the specific Specialisation and supporting the direction of the proposed Research Project topic. Study may be taken from specific programs offered by the School, or from advanced Units within the University or, where appropriate, through another university or through specialist studies offered by staff in their areas of expertise and approved by the Head of School on the recommendation of the student's supervisor.

**Courses:** PS71,

**Prerequisites:** Completion of any prescribed qualifying units.

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP

► **PSN214 ELECTIVE**

Allows development of depth in understanding of issues related to the elected specialisation. The School may offer specific programs in areas of specialisation or students will elect unit/s from within the University or, where appropriate, from other universities and approved by the Head of School on the recommendation of the student's supervisor and which will give breadth and/or depth within the student's specialisation.

**Courses:** PS69, PS70, PS71

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 1, 2

► **PSN221 ADVANCED SPECIALISATION**

The student develops further the approved specialised topic. Students may apply for approval for a specific Advanced Specialisation utilising units offered elsewhere in QUT or at another tertiary institution which must, for approval, be an extension of the specialisation studied in PSP510 Specialisation in an earlier semester. The Advanced Specialisation is normally linked to the PSN212 Research Project II. Areas of specialisation are Regional and Local Development, Urban Housing and Community Development, Urban Design, Environmental and Resource Planning and Special Topic.

**Courses:** PS70

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **PSN223 SPECIAL TOPICS IN PLANNING METHODS**

Offers support material appropriate to the specialisation the student is undertaking. For example, advanced computer models for economic and demographic forecasting; advanced Geographical Information Systems and advanced computer graphics; regional accounting and regional economic analysis; post-occupancy evaluation of the urban fabric; and possibly advanced presentation and communication techniques.

**Courses:** PS70

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** GP **Semester:** 2

► **PSP211 RESEARCH PROJECT 1 AND ADVANCED RESEARCH METHODS**

Literature reviews. Review of quantitative and qualitative research methodologies. Forecasting and analysis for planning and use of microcomputer statistics, information and analysis packages. Writing a research report. Preparation of a detailed research proposal with clear aims, an

established methodology, a satisfactory outline, and a coherent timeline. Completion of a focused, coherent research project.

**Courses:** PS70, PS72

**Contact hours:** 3 per week **Credit points:** 12

► **PSP261 LANDSCAPE CONSTRUCTION 1**

Introduction to basic equipment for site measurement recording of field data and the preparation of measured site drawings from recorded data. Definition of terms; structural units and types of structures; loadings and types (including wind loading). Manual techniques of land surface manipulation: Development of understanding of the properties of common construction materials and built elements and their application in landscape construction. Appropriate techniques for preparation of construction documents. Costing of broad development types.

**Courses:** PS66, PS71

**Credit points:** 12

► **PSP262 COMMUNICATION AND PRACTICE 1**

Roles and ranges of employment; organisation and activities of the professional Institute; and introduction to the range of professions associated with Landscape Architecture. The concept of professionalism and contemporary social expectation of the profession. Time and percentage measurement and costing related to the professional services of promotion, obtaining commissions, allocating time and resources to projects, the use of consultants; and units of management. A review of the Australian and Queensland Acts, Local Authority By-laws, and regulations of statutory authorities as they affect the profession; legal aspects of land and land transfer; planning, land use, and construction regulations; and an overview of environmental law. Processes of why, when, how and where we use the different forms of visual communication to suit our purposes; the physical processes ie the basic tools, materials and techniques (manual and computer aided). Formal writing techniques including reports, instructions, proposals (including CV/folio), specifications, correspondence, and text for publication. Formal oral communication techniques including meetings, conferences, interviews, professional presentations and other speeches (informative and persuasive). Advanced Information Retrieval skills and communications by email and the World Wide Web.

**Courses:** PS66, PS71

**Credit points:** 12

► **PSP263 LANDSCAPE ECOLOGY**

Structural relationships of spatial elements within land mosaics from continental to landscape scales as interpreted using maps, air photography and remotely sensed images; dynamic process, both natural and human. Fundamental principles of plant anatomy and physiology, plant identification, plant growth and development, sexual and vegetative propagation. Dynamics of individual organisms, populations, communities, functional groups, ecosystems and biomes.

**Courses:** PS66, PS71

**Credit points:** 12

► **PSP264 SPATIAL DESIGN THEORY**

Theories, values, rationales, and philosophies of place; design processes and dimensions; imageability and liveability factors; the role of context (natural, social, aesthetic) in site and urban development. Exploration of open space and place theory at regional to local scales. Theories of user/place relationships and the study of human functioning in environments; concepts of culturally and physically inclusive lifespaces and behaviour settings; techniques for the assessment or evaluation of the environment including observational techniques and the application of these ideas through the use of case studies, exercises, and personal experience in daily life.

**Credit points:** 12

► **PSP265 LANDSCAPE CONSTRUCTION 2**

Introduction to basic equipment for site measurement. recording of field data and the preparation of measured site drawings from recorded

data. Definition of terms; structural units and types of structures; loadings and types (including wind loading). Manual techniques of land surface manipulation: Development of understanding of the properties of common construction materials and built elements and their application in landscape construction. Appropriate techniques for preparation of construction documents. Costing of broad development types.

**Courses:** PS66, PS71

**Credit points:** 12

► **PSP266 COMMUNICATION AND PRACTICE 2**

Introduction to basic equipment for site measurement. recording of field data and the preparation of measured site drawings from recorded data. Definition of terms; structural units and types of structures; loadings and types (including wind loading). Manual techniques of land surface manipulation: Development of understanding of the properties of common construction materials and built elements and their application in landscape construction. Appropriate techniques for preparation of construction documents. Costing of broad development types.

**Courses:** PS66, PS71

**Credit points:** 12

► **PSP267 HERITAGE AND PLANT STUDIES**

Landscape Design History: The evolutionary development of designed landscapes (part of cultural landscapes - those created by human beings) within a global context, highlighting Australia; use of chronological, biographical and thematic approaches to understanding changes. The theory and practice behind the conservation of the built environment, and especially cultural landscape heritage; an introduction to the Venice Charter, the Florence Charter and Australia ICOMOS' Burra Charter; conservation principles and accepted procedures Plant Studies: The contemporary theory and practice behind the use of plants by landscape architects;

**Courses:** PS66, PS71

**Credit points:** 12

► **PSP268 SITE PLANNING**

Theory: introduction to the processes of site planning and detailed site design; role and objectives of survey and analysis phases; types of information required and the methods of processing the resultant data; data analysis, its scope and documentation. The use of data analysis to generate and evaluate possible problem solutions in conceptual form as a basis for strategic and master planning; and the value of these processes as a long term mechanism for adaptation of master planning to meet changing needs. Application of site planning principles and theory for different scales and types of projects;

**Credit points:** 12

► **PSP269 ADVANCED CONSTRUCTION AND PRACTICE 1**

Landscape Construction: theory and techniques of a range of types of landscape construction including platforms, land stability and stabilisation, clearing and demolition, earth dams, lakes and flood levees, sports facilities and swimming pools; hydrology - rainfall and runoff, flood estimation, water flow in streams; hydraulic structures - flood retention and detention, drains, culverts, water flow in pipes; design and construction of dams, weirs and other artificial water bodies; aquatic planting and stabilisation of stream banks; and construction site management. Documentation: the types of documentation used for the implementation of landscape works. Computer Support: Students will be required to apply skills using the computer aided drafting systems. Contracts: principles of contract law, forms of contract, standard conditions of contract and engagement; and specific requirements of contract documents. Management: principles of marketing, client analysis, and promotion.

**Courses:** PS66, PS71

**Credit points:** 12

► **PSP270 ELECTIVE**

The profession of landscape architecture is increasingly characterised by the breadth of activities in which its practitioners engage. Therefore,

## UNIT SYNOPSES

there is a need to provide mechanisms within the course for some specialisation in particular directions in addition to ensuring the acquisition of core competencies required for professional accreditation. This unit is intended to provide that flexibility. Social and Environmental Planning: is an elective stream offered within the Urban and Regional Planning Specialisations and is cross disciplinary with the postgraduate urban and regional planning programs in the school. Contemporary art issues: is an existing 12cp unit, KVB712 Contemporary Art Issues, offered by the Creative Industries Faculty. Virtual environments: in this area of specialisation the school will offer a multi-disciplinary program that utilises the virtual environments capacity of the Synthetic Laboratory to develop advanced skills in the application of these tools.

**Courses:** PS66, PS71, PS77

**Campus offered:** GP

**Semester:** 1, 2

### ► PSP271 ADVANCED LANDSCAPE DESIGN 1

Contemporary theories of urban design as they affect the range of urban landscapes from residential to inner city; and emerging theories and concepts of regional and local economic development as they relate to sustainable landscapes in terms of living and working environments. Application of theoretical frameworks to the studio project that will explore design or re-design of selected aspects of the urban environment, residential environments and broader urban issues of the contemporary urban context. Expectations of an advanced level of professional presentation will attach to the project output.

**Courses:** PS66, PS71

**Credit points:** 12

### ► PSP272 ADVANCED CONSTRUCTION AND PRACTICE 2

Landscape Construction: theory and techniques of a range of types of landscape construction including platforms, land stability and stabilisation, clearing and demolition, earth dams, lakes and flood levees, sports facilities and swimming pools; hydrology - rainfall and runoff, flood estimation, water flow in streams; hydraulic structures - flood retention and detention, drains, culverts, water flow in pipes; design and construction of dams, weirs and other artificial water bodies; aquatic planting and stabilisation of stream banks; and construction site management. Documentation: the types of documentation used for the implementation of landscape works. Computer Support: Students will be required to apply skills using the computer aided drafting systems. Contracts: principles of contract law, forms of contract, standard conditions of contract and engagement; and specific requirements of contract documents. Management: principles of marketing, client analysis, and promotion

**Courses:** PS66, PS71

### ► PSP273 LANDSCAPE PLANNING

Landscape planning theory: the theoretical framework of landscape planning: relevant theories, methods, and techniques for application in the landscape planning process.

Computer Modelling: types of GIS, potentials and problems, and current issues.

Advanced Landscape Ecology: Structure of landscapes, impacts of human settlement.

Studies will include medium to large scale projects involving a range of biophysical, cultural, and visual issues with a relatively high degree of complexity. The focus will be on assessment and evaluation of related landscape attributes and issues with emphasis on deriving landscape management options in the form of environmental plans, policies, guidelines, and implementation strategies.

**Courses:** PS66, PS71

**Credit points:** 12

### ► PSP274 ADVANCED LANDSCAPE DESIGN 2

Cultural Values: provides the theoretical background to an understanding of how cultural values influence place making through interpretations of place and the cultural landscape. Studio: Advanced Landscape Design 2 is the last design unit in the course. It follows Ad-

vanced Landscape Design 1 that introduced the complex multi-disciplinary approach required to study the public and private urban landscape. The studio project focus of this unit will provide the opportunity to develop a graduating landscape design project of the highest standard. The project will explore broadscale landscape design and strategic planning and planning guidelines as well as detailed design at a fine scale. Students will be expected to make time available outside studio hours to visit project site(s) and carry out such site surveys and client interviews as are necessary to establish project briefs and carry out the design project. Expectations of an advanced level of professional presentation will attach to the project output. Communication workshops: active workshops designed to explore communication options to achieve a sophisticated, effective and professional standard of presentation on large scale and/or complex work packages. Students unable to participate in the formally organised activity will be required to undertake an approved alternative activity of similar extent and objectives.

**Courses:** PS66, PS71

**Credit points:** 12

### ► PSP275 INTRODUCTORY DESIGN AND GRAPHICS

The modules in this Unit will introduce a basic understanding of design and perception theory, freehand and technical graphics necessary for meaningful participation in professional core studies. By the end of this unit students are expected to, understand basic concepts of perception and basic design techniques and theories, and to develop a design appreciation, design awareness, and a design vocabulary; develop an initial proficiency in freehand and technical drawing and to develop understanding of basic drawing conventions and processes; and develop adequate basic skills to generate confidence for individual progress with style and technique in later study.

**Courses:** BN73, DB69, DB73, PS69, PS69, PS71, PS75, PS76, PS77

**Credit points:** 12

**Semester:** 3

### ► PSP311 PROFESSIONAL PRACTICE MANAGEMENT

Business communication; letters, report writing, correspondence and administration for surveying projects. Oral communication involving interviews, meetings, workshops and seminar presentations. Office management, business operations and finance. Small business and the law including trade practice, contract, taxation, employment and workplace and safety legislation. Professional ethics, professional bodies, the Surveyors Act and Regulations, disciplinary procedures, relationships, clients and marketing. Survey integration and aspects of change in the practice of surveying.

**Courses:** PS68, PS73, PS74

**Contact hours:** 42

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PSP314 BOUNDARY DEFINITION SURVEYS 1

Land registration requirements; Cadastral history, field procedures and records; Reinstatement theory and practice related to urban and rural boundaries; Field survey work involving the re-definition of urban and rural boundaries; Office reinstatement exercises of increasing complexity to develop the necessary skills in assessing various types of survey problems. Office completion of project work including plan preparation using appropriate computer technology.

**Courses:** PS68

**Contact hours:** 42

**Credit points:** 12

### ► PSP316 SURVEY COMPUTING AND PROCESSING

Understand and use of the DOS operating system and computer programming; Word processing; project management, spreadsheets; Programmable calculators for field use; Surveying and draft-

ing packages; Management and technical applications.

**Courses:** PS68, PS73, PS74

**Contact hours:** 42

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PSP317 PROPERTY DEVELOPMENT SURVEYS

An examination of the legislation involved with the above. Detailed consideration of urban and rural subdivision design and requirements. Procedures involved with rezoning and subdivision applications. Detailed consideration of building units and group titles developments. Considerations of multiple use development.

**Courses:** PS68

**Contact hours:** 42

**Credit points:** 12

**Semester:** 1

### ► PSP323 PROJECT SITE SURVEYS

Detail surveying; methods, equipment, data requirements and data transfer; Preparation of specifications and estimates of costs; Detail survey field project work; Processing of field data, report and plan presentation. Types of construction and building control surveys and preparation of plans and specifications. Inspection of building construction sites are involved; Receipt of instructions, documentation and communication with contractors. Field procedures including high precision survey and error adjustment techniques involved with construction and building control surveys and construction site set out calculations.

**Courses:** PS68, PS73, PS74

**Contact hours:** 42

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PSP326 GIS AND GPS

Project work involving the total assessment, planning, costing and preparation of specifications for a comprehensive mapping task. Consideration to GPS theory and practical application of the methods to conventional surveying. Consideration of LIS/GIS Technology and its practical application in conventional surveying practice.

**Courses:** PS68, PS73, PS74

**Contact hours:** 42

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PSP327 ENGINEERING SURVEYING

Assessment of available technology, configuration of measuring systems and recording of data. Project definition and preparation of specifications including field methodology, documentation requirements of field records and determination and assessment of results. Management of engineering survey projects including determination of costing, preparation of submissions, working with other professionals and dealing with on-site variations. Consideration of specific requirements related to:- long-line survey control; road surveys; flood surveys; curves and batter staking and other marking for construction and road design.

**Courses:** PS68

**Contact hours:** 42 total

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PSP328 BOUNDARY DEFINITION SURVEYS 2

Reinstatement exercises becoming increasingly more complex and difficult. Field survey project work associated with difficult boundary definition. Field survey project work associated with boundary definition for easement surveys and mining lease surveys.

**Courses:** PS68

**Contact hours:** 42 total

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PSP329 URBAN DRAINAGE FOR SURVEYORS

Define problems and identify, evaluate, select and apply drainage problem solving skills and techniques in the design and management of an urban subdivision. Revision of hydrostatics and flow concepts, rainfall and run-off concepts, ur-

## UNIT SYNOPSES

ban and street drainage design. Preparation of a drainage design and specifications for a small (eg 20 Lot) urban subdivision.

**Courses:** PS68

**Contact hours:** 42 total

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PSP330 PROFESSIONAL PRACTICE MANAGEMENT 2

Apply principles involved in the running of a Surveying Practice such as project management, self-management and quality assurance. Contains - planning and organisation; business practices; human resource management; subordinate training; project management principles; self-management principles; quality assurance principles; project implementation.

**Courses:** PS68

**Prerequisites:** PSP311

**Contact hours:** 42 total

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PSP451 PRODUCTION AND USE OF THE BUILT ENVIRONMENT

This unit investigates the roles and combined effects of the initiators of the built environment, in the public, private and community sectors. The aim of the unit is to provide a synthesised understanding of how the city is created by the priorities and approaches of a variety of professionals, political decision-makers and informal participants. The property, finance and construction industries, the legal and administrative system, the roles and cultures of key professions (including property management, valuing, business, engineering, surveying, planning, architecture, landscape architecture). Urban design techniques such as charrettes and action planning workshops.

**Courses:** BN73, PS69, DB73, DB69

**Contact hours:** 3 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► PSP452 URBAN DESIGN STUDIO A

This studio focuses on the analysis of urban issues in a particular area, and the formulation of appropriate urban design proposals. Issues may include obsolescence, sense of place, conservation, infill, and the dynamism of local/regional/national/global contexts. Methods of urban design guidance, development briefing and control, through regulations and incentives. The development of skills in urban analysis related to the urban design process and effective communication of the results. Where applicable, the unit will incorporate field work, work in other units of the course, and joint/complementary projects with other courses in the Faculty. (NB: this unit will continue the current overlap with the post-graduate Landscape Architecture units PSP219 (12 credit points) and the 6 credit points Cultural Values component of PSP027).

**Courses:** BN73, PS69, DB73, DB69

**Contact hours:** 6 per week

**Credit points:** 24

**Campus offered:** GP

**Semester:** 2

### ► PSP453 URBAN SYSTEMS AND THE PHYSICAL ENVIRONMENT

The relationship between the urban system and the physical environment. Urban services including water, sewerage, drainage, power, telecommunications, transport; controlling authorities, service delivery bodies, planning requirements and controls relevant to urban design. Community services relevant to health, safety and welfare Urban design issues relating to pollution, congestion and mobility. This unit will draw, in part, on PSP504 Urban Systems and Infrastructure (GDURP program).

**Courses:** BN73, PS69, DB73, DB69

**Contact hours:** 3 per week

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► PUB104 INTRODUCTION TO HEALTH SERVICES MANAGEMENT

This is an important unit for students entering or planning to enter the health industry as it is designed to give a broad overview of systems of health care in Australia and their methods of operation. This unit introduces the role of health service managers as members of the health care team; the basic principles of health service man-

agement in health care facilities and beyond as well as the functions of health service managers.

**Courses:** HL46, IF47, PU40, PU43, NS45

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► PUB105 INTRODUCTION TO FAMILY STUDIES

An introduction to the social sciences (Sociology, Psychology and Anthropology) which underpin the study of the family. Special application to the provision of food, clothing and shelter on the basic need of individuals and families.

**Courses:** ED50

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► PUB107 SUSTAINABLE ENVIRONMENTS FOR HEALTH

A brief history of environmental health; the current role of environmental health officers within the public health agencies at all levels of government and the principal public health legislation in this state; development of an understanding of introductory law and environmental law, the complexity of environmental systems, the effects of pollutants on such systems and the interdisciplinary approaches needed to address these problems; communicable diseases and environmental health promotion.

**Courses:** IF87, PU40

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► PUB108 INTRODUCTION TO HEALTH INFORMATION MANAGEMENT

This unit gives an introductory overall view of the field of health information and its management. As well as being of general interest to health professionals, the unit provides a context for the study of contemporary health information and data management practice. The use of information as a strategic, organisational and management resource is highlighted, and a broad appreciation of information and data management procedures and philosophy are provided. Demands on health information managers occasioned by advances in information technology are highlighted.

**Courses:** PU40

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► PUB112 WORKPLACE HEALTH AND SAFETY

Introduces students to the basic concepts and theoretical framework of occupational health and safety such that they can identify health and safety problems in the workplace; be aware of strategies for dealing with such problems; and become familiar with the legislation, government agencies and health personnel associated with the working environment. Topics covered will include the physical, chemical and biological environments, and ergonomics. The students will also develop knowledge and skills associated with the actual measurement of the physical and chemical working environment and evaluation of the data collected.

**Courses:** PU40

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

**Semester:** 1, 2

### ► PUB118 COMPUTER SYSTEMS FOR HEALTH MANAGEMENT

This unit aims to provide an introduction to systems analysis and development. It explores the various technology platforms available (including telecommunications, and the internet) and develops data organisation and management skills relevant to systems within the health industry context.

**Courses:** PU40

**Contact hours:** 4 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► PUB201 FOOD AND NUTRITION

Introduction to the history of food and nutrition in Australia; the food system, the food supply: proteins, carbohydrates, fats, vitamins and minerals; food grouping systems; dietary guidelines; the recommended dietary intakes; nutrition through the life cycle; food and nutrition prob-

lems; nutrition as a public health issue; international nutrition issues.

**Courses:** ED50, HL42, HL46, PU40, PU43

**Contact hours:** 4 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► PUB203 PRIMARY HEALTH CARE

Introduces students to the principles, strategies and practice of primary health care with special reference to community, family and workplace settings. The importance of health promotion, prevention, empowerment and intersectoral collaboration in primary health care will be examined.

**Courses:** ED50, HL46, NA80, PU40, PU43

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

**Semester:** 2

### ► PUB209 HEALTH, CULTURE AND SOCIETY

This unit is concerned with the social and cultural dimensions of health and illness and how they relate to health status and patterns of behaviour. The unit will introduce students to thinking about health from sociological and anthropological perspectives, drawing on relevant concepts and theory to examine selected public health issues. Identifying and addressing social and cultural factors that shape people's health experiences of health, illness and health systems are integral parts of public health practice in terms of reducing health inequalities, delivering appropriate services and ultimately improving population health outcomes.

**Courses:** PU40

**Credit points:** 12

**Campus offered:** KG

**Semester:** 2

### ► PUB220 MEDICAL TERMINOLOGY

Exploration of the language of medicine; analyses medical terms into Latin and Greek word roots, prefixes, suffixes and combining forms. Medical terms which relate to specific body systems are defined, spelled and pronounced accurately; common abbreviations and symbols used in medicine are identified; abstracts from patient records are explained and interpreted in non-technical language.

**Courses:** IF85, PU40

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► PUB251 CONTEMPORARY PUBLIC HEALTH

Introduction to the philosophy and approach of public health; the traditional public health process; the multidisciplinary nature of public health; health policy and its impact on public health; some recent reformulations of traditional public health approaches including: health promotion, intersectoral action for health and healthy public policy. The role of public health in Australia and overseas, its main discipline components and some of the constraints faced by public health. Deals with groups with special needs and contemporary issues.

**Courses:** HL42, HL46, IF47, IF85, NA80, PU40, PU43, BOralHlth

**Contact hours:** 4 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

**Semester:** 1, 2

### ► PUB298 HEALTH INFORMATION MANAGEMENT 2

This unit builds on knowledge and skills developed in PUB106 in the area of medical record content and design, and medical record department functions. There is an emphasis on analysis and improvement of health information management throughout hospitals. The examination of health information services is broadened to encompass information services to wards, accident and emergency departments, outpatient allied health services, and other specialised hospitals services such as radiology, pharmacy and pathology. Skills in health data management, forms design, and statistical presentation of hospital or health services activities are also developed in this unit.

**Courses:** IF85, PU40

**Prerequisites:** PUB106

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

## UNIT SYNOPSES

### ► PUB308 ENVIRONMENTAL HEALTH FUNDAMENTALS

This unit builds upon introductory studies in environmental health and the physical sciences by applying their principles to the prevention of disease and the protection and maintenance of public health and safety. This 'theory to practice' is applied in the specific EH practice areas of water treatment, sewage management, dangerous goods management and construction.

**Courses:** IF87, PU40

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB312 HOME ECONOMICS CURRICULUM STUDIES 1

Provides students with a range of understandings and processes for analysing, interpreting and managing home economics classrooms in order to maximise learning. Long and short term planning is explored with an emphasis on planning, implementing and evaluating lessons using a variety of strategies, resources and assessment techniques. The nature of home economics and how this is manifest in curriculum documents is examined.

**Courses:** ED50

**Prerequisites:** 48 credit points in relevant discipline area

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► PUB313 DESIGN

Design has a relevance to both the teaching and learning process and the discipline of home economics. In the areas of textiles, food and shelter there is a role for the application of design as well as critical evaluation and communication of the products of design; provides students with generic design knowledge as well as experience in the application of this knowledge in the specific areas of home economics.

**Courses:** ED50

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB314 EPIDEMIOLOGY AND STATISTICS

Epidemiology is the study of the distribution and determinants of health and disease in the population. This unit examines ways in which epidemiology can identify various causes of health problems, and considers how epidemiology is useful in controlling or preventing the occurrence of disease and injury. The unit begins with the history of disease in human populations and examines how scientific concepts and methods changed our ability to predict, and ultimately to control, many diseases. Students are introduced to a wide range of study designs and measurement methods in areas such as clinical, environmental, genetic and behavioural epidemiology; and we examine how this science can be applied to solving problems in practical settings. One third of this unit focuses on statistical methods. We examine the basic assumptions underlying analysis of quantitative data and use a range of techniques to explore the analysis of information on health and human disease.

**Courses:** IF47, IF85, IF87, HL42, HL46, NS45, PU40, PU43

**Prerequisites:** PUB251

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG, EXT **Semester:** 1

### ► PUB316 RESEARCH METHODS

An understanding of research methodology is essential in the training of all Public Health professionals. This unit explores qualitative and quantitative methods in a variety of health research projects. Specific topics covered in the unit include: Theoretical background to qualitative research; naturalistic and participant observation; unstructured interviews and focus groups, and analysis of qualitative data. The unit examines the core elements of experimental and quasi-experimental designs, and various approaches to the analysis of existing data (secondary analysis, meta-analysis). Some attention is paid to measurement issues, especially assessment of health-related quality of life. The unit also has a practical focus for people who are considering research in the future; students will cover a full

range of issues, from problem formulation, hypothesis generation and ethics, to project planning, logistics, and budgeting. Students will prepare a formal research proposal and learn how to estimate the statistical power of quantitative research projects.

**Courses:** HL46, PU40, PU43

**Prerequisites:** PUB314

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG, EXT **Semester:** 2

### ► PUB321 TEXTILE STUDIES

Scientific understanding and aesthetic aspects of textiles, their selection, use and care, with reference to specific end uses; practical aspects of construction and surface design of textile articles applied to individual textile projects.

**Courses:** ED50

**Contact hours:** 5 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► PUB322 HOME ECONOMICS CURRICULUM STUDIES 2

Encourages students to make independent judgements about home economics curriculum decision-making, within syllabus guidelines and broader systems policies concomitant with national and international trends in education and society. Students are given the opportunity to explore current issues and emerging and future trends in home economics and to develop a confident approach to school-based curriculum development. Advanced teaching strategies and current assessment procedures are developed.

**Courses:** ED50

**Prerequisites:** PUB312

**Contact hours:** 5 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB324 PODIATRIC MEDICINE 1

This unit provides an introduction to clinical, theoretical and professional aspects of podiatry practice. Students entering the unit begin the transition to the unique and challenging role of clinician, as well as continuing academic learning. Students will be required to apply previous background knowledge, ie, advanced anatomy, biochemistry, physics, etc, in the clinical setting. Student will also be involved in the care of patients attending the University Clinic. The unit is particularly designed to encourage the development of essential graduate skills such as a self-directed approaches to learning, the ability to work as part of a team and the ability to engage in peer review.

**Courses:** PU43

**Prerequisites:** LSB235

**Corequisites:** HMB274

**Contact hours:** 16 (includes clinic work)

**Credit points:** 12

**Campus offered:** KG **Semester:** 1

### ► PUB329 FOUNDATIONS OF HEALTH STUDIES AND HEALTH BEHAVIOUR

The foundations of the discipline of health education, its theoretical framework and concepts of models of health, health education and health promotion. Theories of change are analysed in their application to health education and health promotion practice for a range of professionals.

**Courses:** ED50, HL46, PU40, BOralHlth

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB336 WOMEN'S HEALTH

Exploration of data and current health issues related to women's health; critically evaluates health-related policies, systems and practices in terms of their impact on women's health, internationally and in the Australian context. The social, economic, cultural and political influences on women's health, and the specific needs of sub-populations of women, and critical health issues to enhance women's health.

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► PUB341 NUTRITION EDUCATION

This unit explores the history and philosophy of nutrition education, the theoretical basis of nutrition education, the development, implementation and evaluation of nutrition education programs, the nutrition education for special groups, and the evaluation of nutrition education literature.

**Courses:** ED50, PU43

**Prerequisites:** PUB201

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB349 FAMILIES AND HOUSEHOLDS

Examination of the family and households in Australia and internationally. Perspectives considered include: structural functionalist, symbolic interactional, conflict and feminist.

**Courses:** ED50

**Prerequisites:** PUB105

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB354 OCCUPATIONAL HEALTH

Exploration of chemical hazards in the working environment, epidemiological principles and practice, and identification of special risk groups in the workforce. Topics include: the pathological bases of disease in humans; chronic occupational disease; occupational skin conditions; respiratory diseases; biological hazards in the work environment (bacteria, parasites, viruses, rickettsia and fungi); chemical and physical stresses and their physiological responses; physiological monitoring principles and practice; special risk groups; epidemiological principles and practice.

**Courses:** PU40

**Prerequisites:** LSB142

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB355 HOSPITALITY STUDIES

The use of relevant management principles, safe and hygienic work practices, effective communication skills, sound nutrition and mastery of techniques in food production and presentation.

**Courses:** ED50

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB356 CLINICAL CLASSIFICATION

This unit introduces the development of skills in one of the major specialities of health information management: clinical classification of diseases and procedures using the International Classification of Diseases, 10th Revision, Australian Modification (ICD-10-AM). Clinical classification responds to internal and external demands for medical information, for example, in-house research and education, ABS, hospital morbidity data collections, and casemix information systems.

**Courses:** IF85, PU40

**Prerequisites:** PUB220, LSB142, LSB361

**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► PUB361 TEXTILES 2

Continuation of PUB321. An understanding of textile consumer issues is developed by a study of relevant commercial enterprises and the implications for the consumer. Creativity is encouraged by students combining skills in pattern development with advanced techniques in constructing and applying designs to textile articles.

**Courses:** ED50

**Prerequisites:** PUB321

**Contact hours:** 5 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB380 CASEMIX MANAGEMENT

History and development of casemix classification systems; structure of DRGs; casemix applications in quality improvement, utilisation review, costing, planning and management; casemix and funding health care services; casemix classification systems for acute inpatients; data quality issues; casemix grouping software; current casemix initiatives and applications.

**Courses:** IF85, PU40

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG, EXT **Semester:** 2

### ► PUB400 ENVIRONMENTAL PROTECTION

The causes, effects, control measures, standards, legislation and management strategies relating to pollution and environmental protection; waste management and contaminated land.

**Courses:** IF87, PU40

**Prerequisites:** PUB107

## UNIT SYNOPSES

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 2

### ► PUB405 NUTRITION SCIENCE

Nutrition Science examines a range of nutrient and non-nutrient components in our food supply, including the biochemical pathways and physiological effects in the body, possible health implications of deficiency or toxicity and important dietary sources. It integrates nutritional knowledge with the science of biochemistry and clinical physiology and provides the foundation on which further studies in nutrition can be built.

**Courses:** HL42, PU40, PU43

**Prerequisites:** LSB308, PUB201

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 2

### ► PUB406 HEALTH PROMOTION STRATEGIES

This unit ties together the fundamental health promotion knowledge and constructs covered in earlier units in the Public Health subject area. It builds upon this basis to introduce students to the range of strategies available to a health promotion practitioner. The unit promotes an appreciation of the strengths and weaknesses of different approaches, as well as related administrative factors. This is an essential field of study for those students who wish to work in a health promotion or related field.

**Courses:** HL46, PU40

**Prerequisites:** PUB251

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 2

### ► PUB407 ENVIRONMENTAL POLLUTION

Measurement, management and control of air, noise and water pollution.

**Courses:** IF87, PU40

**Prerequisites:** NRB300

**Corequisites:** PUB400

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 2

### ► PUB408 PHYSICAL ERGONOMICS

Ergonomics is the scientific discipline concerned with the fundamental understanding of interactions among humans and other elements of a system and the application of appropriate methods theory and data to improve human well-being and overall system performance. Derived from the Greek ergon (work) and nomos (laws) to denote the science of work ergonomics is a systems-orientated discipline which now extends across all aspects of human activity. Ergonomics promotes a holistic approach in which considerations of physical social organisational environmental and other relevant factors are taken into account. Knowledge of current methods and techniques commonly used in ergonomics is essential for the occupational health and safety professional.

**Courses:** PU40

**Prerequisites:** LSB142

**Contact hours:** 3 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 2

### ► PUB409 COMMUNICABLE DISEASE: PREVENTION AND CONTROL

Public health practice was grounded in the study and prevention of communicable diseases, and whilst public health practice has widened in scope, reducing the incidence of both existing and emerging communicable diseases (nationally and internationally) remains one of the greatest challenges to public health practitioners. This unit will examine the influence environmental factors (eg vectors) has on the spread of communicable diseases and how they can be prevented. Immunisation strategies, vaccine preventable diseases, management of immunisation campaigns and communicable disease outbreak management processes will be covered.

**Courses:** IF87, PU40

**Prerequisites:** PUB314

**Corequisites:** LSB415

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 2

### ► PUB418 HEALTH COMPUTER SYSTEMS

Principles and applications of electronic data processing in health care settings. Computerised health information systems are analysed from a variety of viewpoints including the objectives of the system, specific methods employed to meet user needs, structure in an overall information system, the technology which makes it operative, the data base, and the various ways information is transferred and used in health facilities.

**Courses:** IF47, NS45, PU40

**Prerequisites:** BSB112

**Contact hours:** 3 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 2

### ► PUB424 PODIATRIC MEDICINE 2

This unit provides opportunities for the student to increase proficiency in examining and treating patients suffering from common foot conditions, and to continue to increase their awareness of the role of the podiatry profession in the community. The unit also aims to increase student understanding of foot problems by introducing concepts of clinical biomechanics of the lower extremity. The unit is structured to encourage the development of essential graduate skills such as a self-directed approach to learning, the ability to work as part of a team, the ability to engage in peer review and skills in accessing information about podiatry and medicine using various forms of information technology.

**Courses:** PU43

**Prerequisites:** LSB235, PUB324

**Corequisites:** LSB475

**Contact hours:** 16 (includes clinic work)

**Credit points:** 12

**Campus offered:** KG                      **Semester:** 2

### ► PUB456 CLINICAL CLASSIFICATION 2

Students will learn to abstract and interpret the information recorded in client/patient medical records and develop an understanding of the clinician's response to various disease processes and how this information presents in the medical record. A significant component of the unit will involve coding from hospital medical records. Students will become proficient in the art of clinical classification using ICD-10-AM.

**Courses:** IF85, PU40

**Prerequisites:** PUB356

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 1

### ► PUB474 FOOD STUDIES

The nature and properties of food ingredients and nutrients; their modification and manipulation during food preparation; evaluation of commercial and homemade foods. Interpretation of food standards, and food regulations.

**Courses:** ED50, HL42, PU40, PU43

**Contact hours:** 5 per week    **Credit Points:** 12

**Campus offered:** KG                      **Semester:** 1

### ► PUB480 HEALTH ADMINISTRATION FINANCE

Fund/accrual accounting; financial administration in Commonwealth and state government; financial management in the health industry; financial analysis; planning and budgeting, working capital management in the health industry; health care performance and evaluation.

**Courses:** IF47, IF85, NS45, PU40

**Contact hours:** 3 per week    **Credit Points:** 12

**Campus offered:** KG, EXT                      **Semester:** 2

### ► PUB486 ETHICS AND THE LAW IN HEALTH SERVICE DELIVERY

This unit enables students to develop an awareness of the ethical and legal issues associated with the public sector and health care in the pre-hospital care setting. This unit covers topics relating to the code of ethics, the code of conduct and the legislation unique to the emergency health services. The students will be required to apply content knowledge using the problem based learning strategy. Topics include: introduction to ethics; morality and ethical theory; bioethics; public sector ethics; overview of the Australian legal system; consent to and refusal of health care; duty of care; and confidentiality and record keeping.

**Courses:** PU40 Emergency Health Services Major Only.

**Prerequisites:** PUB112

**Credit points:** 12

**Campus offered:** EXT                      **Semester:** 2

### ► PUB501 APPLIED COUNSELLING FOR HEALTH PROFESSIONALS

In addition to having a sound knowledge of their specific area of speciality, health professionals also require specialised skills and techniques that will assist them in communicating with others. Furthermore they need to have an awareness and understanding of the process of helping. Throughout this unit students will explore a variety of approaches which could be used and will develop an awareness of their own strengths and weaknesses as a helper. It is not intended that students enrolled in this unit will become professional counsellors, rather they will develop counselling skills that can be applied by health workers in dealing with clients and client concerns.

**Courses:** HL42, PU43

**Corequisites:** PUB875 or another (discipline specific) professional practice unit

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 2

### ► PUB506 FOODSERVICE MANAGEMENT

Organisation and planning in the foodservice; the hospital environment; the menu and menu planning; purchasing and storage of food; kitchen planning and design; food production systems; food distribution systems; human resource management in foodservice; finance and costing, hygiene, maintenance and safety; information systems; total quality management.

**Courses:** HL42, PU40, PU43

**Prerequisites:** PUB474

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 1

### ► PUB509 NUTRITION

The measurement of the nutritional status of a community; nutrition monitoring and surveillance; food and nutrition policy at international, national and state levels, international nutrition issues, nutritional epidemiology; nutrition problems within Australia examination of the evidence; at risk groups; tools and their validity for measuring nutritional status and nutrition outcome at the population and group level; dietary intake methodology.

**Courses:** HL42, PU40, PU43

**Prerequisites:** PUB201, PUB314

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 1

### ► PUB510 LEGAL FRAMEWORK FOR ENVIRONMENTAL HEALTH PRACTICE

The purpose of this unit is to integrate the student's understanding of environmental health, statistics, microbiology, chemistry, physiology and biology to enable student's to apply their knowledge in professional practice. In particular, this unit will detail legislative and management tools for the control of public health nuisances and communicable diseases in different settings. Specific settings that will be covered include camping grounds, hairdressing premises and skin penetration premises. Prosecution processes and evidence gathering will be discussed. Specific environmental health roles under the Health Act will be discussed at length.

**Courses:** PU40

**Prerequisites:** LSB142, LSB415, PUB403

**Contact hours:** 4 per week    **Credit Points:** 12  
**Campus offered:** KG                      **Semester:** 1

### ► PUB511 HEALTH POLICY, PLANNING AND EVALUATION

This unit provides advanced undergraduate students with an opportunity to develop firstly, an understanding of the concepts of health policy, planning and evaluation. Secondly, a capacity for analysis using both theoretical and practical examination of current health-related policies, plans and evaluations. Thirdly, an opportunity to apply concepts learned in this unit to develop a proposal for a program plan and associated implementation and evaluation strategy.

**Courses:** HL46, IF47, IF85, NA80, NS45, PU38, PU40, BOralHlth

## UNIT SYNOPSES

**Prerequisites:** 144 credit points completed  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG, EXT **Semester:** 1

### ► PUB514 CONTRACT/PROJECT MANAGEMENT

This unit aims to prepare students for participation in contract and project management in the health sector. The unit provides advanced undergraduate students with an opportunity to develop an understanding of health project contract management using both theoretical and practical examination of current State and national contracts and projects.

**Courses:** HL46, IF47, NS45, PU40, PU32  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG, EXT **Semester:** 1

### ► PUB515 ENVIRONMENTAL TOXICOLOGY

Humans have always lived with health threats from a range of natural poisons be they the potentially lethal venoms of snakes and marine jellyfish or the many and varied powerful food borne toxins produced by a range of microbes, plants and animals. The public health significance of these natural toxins has been highlighted by recent outbreaks of food borne illness in Australia and many overseas countries. In addition to the natural toxins, there are now thousands of synthetic chemicals that are used on a daily basis in agriculture, manufacturing and indeed the home. While many of these synthetic chemicals have little or no adverse effects on either the environment or human health, others are powerful poisons that can disrupt ecosystems and cause human morbidity and mortality. Estimates indicate that more than 2000 people die each year as a result of current or past exposure to chemicals in the workplace. This unit will examine the health effects of both natural and synthetic toxins in terms of general environmental and specific occupational exposure.

**Courses:** PU40  
**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB516 OCCUPATIONAL HEALTH AND SAFETY PRACTICE 1

Field studies are used to provide students with a practical insight into the application of the principles to which they have been introduced in their previous studies. In addition students will examine the legislative and other standards which form the basis for the enforcement of occupational health and safety.

**Courses:** PU40  
**Prerequisites:** PCB404, PUB485, PUB354 (or PUB352)  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB517 FOOD HYGIENE STUDIES

Food hygiene standards, food borne illnesses, food hygiene audits, HACCP licensing systems, education, food borne illness investigation.

**Courses:** IF87, PU40  
**Prerequisites:** LSB415 (and CNB171 for PU40 EVH major students)  
**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB521 HEALTH SAFETY & ENVIRONMENT PRACTICE 1

The ability to apply the principles of occupational health and safety in the workplace is an essential skill of the occupational health and safety professional. This unit will enable students to integrate the knowledge and skills that they have gained over the initial two years of the course and apply this within the workplace. Accreditation will be obtained as a Workplace Health and Safety Officer (WHSO) accredited by the Division of Workplace Health and Safety. This WHSO accreditation will ensure that students meet the minimum legislative requirements as a trained officer for the construction manufacturing and service industry under the Workplace Health and Safety Act. The unit provides students with knowledge on management principles and practices as they may be applied to resolve workplace health and safety problems. As occupational health and safety professionals act as advisors to management and workers it is essen-

tial that they have an understanding of industrial relations and management principles as they may influence the implementation of occupational health and safety programs. The unit provides students with an understanding of the legislative framework as is relevant to occupational health and safety and social economic and political factors that have influenced the development of legislation as well as the content of existing legislation.

**Courses:** PU40  
**Prerequisites:** PCB404, PUB354  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB522 PODIATRIC ANAESTHESIOLOGY

Provides an understanding of the science of anaesthetics as applicable to the practice of podiatry. Students are required to understand the pharmacology of local anaesthetics and their clinical usage, and be competent in injection techniques, including local infiltration and local nerve block in the lower limbs.

**Courses:** PU43  
**Prerequisites:** PUB424  
**Corequisites:** PUB523, PUB525  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB523 MEDICINE

Following completion of this unit, students should be able to recognise and understand the clinical features, pathogenesis and significance of common conditions affecting the lower limbs, for example oedema, obesity, motor, sensory and trophic disturbances and their resultant effects in paralysis, ataxia, deformity and ulceration, intermittent claudication, vascular spasm and cramp are taught so as to emphasise their significance. Medical conditions with manifestations in the feet are given particular attention.

**Courses:** PU43  
**Prerequisites:** LSB451, LSB475  
**Corequisites:** PUB524, PUB525  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB524 PODIATRIC MEDICINE 3

Develops professional understanding of the general and specific effects of medical and surgical conditions on the human foot. Also expands the concept of total case management in terms of the interdisciplinary approach, including physical, mechanical and surgical techniques. Completion of this unit should enable students to consolidate the podiatrists role in the health care team across the spectrum of practice.

**Courses:** PU43  
**Prerequisites:** PUB303  
**Corequisites:** PUB523  
**Contact hours:** 16 (including clinical work)  
**Credit points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB525 PHARMACOLOGY

Designed to ensure students understand basic drug therapies their patients may be using, the groups of drugs used for specific diseases, their application and relevance to podiatry. Emphasis is placed on drug groups and their use for specific disease, rather than proprietary brands. Students learn to recognise the drug groups and know the system they are acting on in the body. In addition, differentiation between the different categories within one group of systemic drugs and why they are used for a condition is emphasised.

**Courses:** PU43  
**Prerequisites:** LSB275, LSB475  
**Corequisites:** PUB522  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB541 MEDICAL NUTRITION THERAPY 1

This unit incorporates the best of a multidisciplinary, 'whole client' view of health care. The goals of MNT in preventative care are to keep people healthy in their communities, to reduce the incidence and severity of preventable diseases, to improve health and quality of life and to reduce medical costs particularly in drug therapy, surgery, hospitalisation and extended care. A

sound understanding of the process of nutrition assessment enables students to undertake the assessment, planning, implementation and evaluation of dietary intervention in the more complex disease states.

**Courses:** HL42, PU43  
**Prerequisites:** LSB408, LSB458, PUB405  
**Contact hours:** 5 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB553 PROFESSIONAL EXPERIENCE

This unit is designed to extend the student's knowledge and level of understanding of health information management in health care facilities through direct observation and participation. Working in a health care facility provides an opportunity to apply theory to practice, and gives the student a greater understanding of the constraints which exist in implementing new approaches to health information management. Emphasis is placed on the managerial role of the health information services with medical, administrative and allied health professionals. Students will reinforce their clinical classification skills by coding from medical records.

**Courses:** IF85, PU40  
**Prerequisites:** 16 units in health information management major or equivalent, including PUB456  
**Contact hours:** 6 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► PUB557 HEALTH NEEDS OF INDIGENOUS AUSTRALIANS AND OTHER POPULATIONS

The unit examines the health needs of a range of populations groups, particularly the health needs of Indigenous Australians. A focus on population groups and their health concerns is important for a number of reasons. Health is viewed in its social and economic context. Second, it allows a recognition and focus on particular health concerns that might not be considered significant in an examination of broad patterns of health. Third, it forces a consideration of how strategies to improve health, including important questions of access and equity, might be targeted to sections of the population who have high patterns of mortality and morbidity. The unit provides public health students with an overall picture of patterns of health of Indigenous Australians and other specific populations in Australia. Introduces models of public health and health promotion as means of reducing actual differences in health status.

**Courses:** BORalHlth  
**Prerequisites:** PUB251  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB599 HEALTH INFORMATION MANAGEMENT 3

Health information systems outside acute care hospitals; special purpose health systems, ambulatory health record systems, and those used in health care facilities other than acute care hospitals, systems for the registration and notification of disease problems, clinical classification systems other than ICD-10-AM and nomenclatures, which may be used in specialised health settings; concepts and processes of quality assurance in health (for example accreditation, criteria audits, and so on).

**Courses:** IF85, PU40  
**Prerequisites:** PUB298 and successful completion of practical component  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUB604 POLICY AND MANAGEMENT PRINCIPLES FOR ENVIRONMENTAL HEALTH

Local government environmental health management (local laws and planning processes); Local Government Act; Queensland Health - public health management, environmental health promotion; indigenous environmental health issues, disaster management.

**Courses:** IF87, PU40  
**Prerequisites:** PUB510  
**Corequisites:** PUB630  
**Contact hours:** 4 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

## UNIT SYNOPSES

### ► PUB606 DIETETIC MANAGEMENT

History of dietetics and the role of management in dietetics; planning and organisation; leadership; peer review systems; total quality management; clinical costing; program evaluation and measuring effectiveness; information systems applied to dietetic management; managing change; casemix funding, management tools, marketing, planning community based programs; team building; managing role conflict.

**Courses:** HL42, PU43

**Prerequisites:** PUB506, PUB722

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB607 PROMOTING ORAL HEALTH

This unit aims to present oral health promotion as an emerging public oral health field of professional practice. The unit provides knowledge of both the theoretical and practical application of health promotion strategies in a range of contexts; it emphasises the links of oral health status with a number of socioeconomic variables, and provides an understanding of health promotion strategies that are appropriate to special groups. It also provides a sensitivity to, and an understanding of, cultural and gender-related issues in relation to oral health promotion.

**Courses:** NA80, BOralHlth

**Prerequisites:** PUB203

**Corequisites:** PUB203

**Contact hours:** 2 per week **Credit Points:** 12

**Campus offered:** EXT **Semester:** 2

### ► PUB609 HEALTH RESOURCE ALLOCATION

This unit aims to prepare students for participation in health sector decision making as underpinned by health economic evaluation activities. The unit provides students with a grounding in the methodologies of health economic evaluation.

**Courses:** IF47, NS45, PU38, PU40

**Prerequisites:** PUB433

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG, EXT **Semester:** 2

### ► PUB611 RISK MANAGEMENT

Provides students with the knowledge and skills for the assessment and quantification of risk in the workplace. It will investigate the various models available to investigate and analyse accidents and propose strategies to prevent similar incidents in the future. Various hazard identification techniques such as HAZOP, Fault Tree Analysis and FMEA will be discussed. The subject will provide students with the ability to position occupational health and safety within an organisation's strategic decision making process. Assessment will involve a half day presentation on the weekend. Some lectures may be presented in a one day seminar.

**Courses:** IF87, PU40

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** KG, EXT **Semester:** 2

### ► PUB616 HEALTH, SAFETY & ENVIRONMENTAL PRACTICE 2

This unit will build on the experience gained by students in Occupational Health and Safety Practice 1 by looking in more detail at the skills required to practice as a professional in the arena of occupational health and safety. A major focus will be the utilisation of auditing as an occupational health and safety management tool. Students will be required to attend lectures, practical sessions in the workplace and field trips. Students will investigate a wide variety of production processes and identify the hazards and control strategies associated with these. It is intended that the unit should act as a culminating experience for students who have undertaken the BHlthSc in Health Safety and Environment or Occupational Health and Safety.

**Courses:** PU40

**Prerequisites:** PUB516

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB619 HEALTH INFORMATION MANAGEMENT 4

This unit examines the role and function of the health information manager in the management of health care services; the principles and proc-

esses of management as applied to health information services; current issues in health information management and professional skills will be enhanced. Coding skills will be refined and enhanced using hospital patient records.

**Courses:** IF85, PU40

**Prerequisites:** PUB456, PUB599

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB623 DERMATOLOGY

This unit assist students to develop an appreciation of the many varieties of skin lesions and their particular relevance when found in the lower limbs. Lectures deal with classification of skin disease, vasculitis, ulcers, peripheral vascular disease, tumour, eczema, dermatitis, allergy, immunity, infections, psoriasis, squamous eruptions, nails and hair, skin manifestations of internal disease, pharmacology and general therapeutics. Clinical sessions give students the opportunity to see and diagnose these conditions.

**Courses:** PU43

**Prerequisites:** PUB523, PUB524

**Corequisites:** PUB624

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB624 PODIATRIC MEDICINE 4

Extends the student by way of a greater role in independent case investigation and clinical case presentations. Complex case histories and treatment interventions are pursued. The theory and treatment of paediatric disorders is studied. Introduction to specialist clinics in the podiatry facility and treatment of higher order cases. Students implement a wide range of treatments and should be able to consolidate skills acquired. Diagnostic skills are also developed with the wider range of patients being treated and the specialised study of disciplines such as dermatology and radiology further integrating academic and clinical studies.

**Courses:** PU43

**Prerequisites:** PUB524

**Corequisites:** PUB635

**Contact hours:** 16 (clinical work)

**Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB628 ADVANCED FOOD STUDIES

This unit provides students with an opportunity to acquire practical skills in the planning, preparation and delivery of nutrient-altered foods suitable for a wide range of therapeutic diets. Students evaluate the outcome of incorporating nutrient modified food products into dietary regimens. Food standards, relevant developments and issues are also considered.

**Courses:** HL42, PU43

**Prerequisites:** PUB474, PUB541

**Corequisites:** PUB641

**Contact hours:** 6 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB630 ENVIRONMENTAL HEALTH PRACTICE

Visits to various establishments studied in units relating to environmental health management, pollution sciences and food studies for the purpose of practical demonstration, evaluation and professional experience.

**Courses:** IF87, PU40

**Prerequisites:** PUB403, PUB510, PUB517

**Corequisites:** PUB604

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB632 INDEPENDENT STUDY

Independent Study allows students to study a topic which is not otherwise available as a formal unit. Students have the opportunity to pursue their studies relatively independently and to develop and practice skills in problem identification, evaluation and critical thinking. The study may be for example a literature review or a placement in a particular setting. The process and outcomes are negotiated in a contract with a supervisor.

**Prerequisites:** Completion of 192 credit points

**Credit points:** 12

**Campus offered:** KG, EXT **Semester:** 2

### ► PUB635 PODIATRIC SURGERY

Implementation of podiatric surgical techniques based on strong theoretical knowledge. On completion, students should understand the principles and techniques of lower limb surgery. Students will be taught minor surgical techniques as well as reviewing some of the more common major surgical procedures including the foot and ankle.

**Courses:** PU43

**Prerequisites:** PUB522, PUB523

**Corequisites:** PUB624

**Contact hours:** 3 per week (including surgical work)

**Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB636 OCCUPATIONAL HYGIENE

Occupational hygiene is described as the recognition evaluation and control of hazards in the workplace. Workplaces contain numerous substances that are potentially hazardous to the health of the workforce other occupants and the public. Students entering the unit with some grounding in chemistry some biological science and physics or mathematics have a practical opportunity to combine these skills into a viable and well regarded profession. Occupational hygiene spans a number of disciplines including toxicology science engineering and statistics. The student will need to develop strong investigative and analytical abilities and professional judgment. Students will also develop skills in evaluating the extent of workplace hazards. A preventative approach to dealing with occupational health problems is emphasised based on an understanding of the control hierarchy and the use of exposure standards.

**Courses:** PU40

**Prerequisites:** PCB142, PCB242, PCB263, PCB404

**Contact hours:** 4 per week

**Campus offered:** KG **Semester:** 2

### ► PUB637 RADIOGRAPHIC IMAGE INTERPRETATION

This unit is designed to give the student of podiatric medicine an understanding and ability to recognise normal and abnormal foot radiographs. It will also render the student the ability to utilise radiology as an important diagnostic tool in treating foot pathology.

**Courses:** PU43

**Prerequisites:** PUB523

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB641 MEDICAL NUTRITION THERAPY 2

Medical nutrition therapy 2 builds on the extensive knowledge base of the theory and application of dietary treatment to disease and the principles of nutritional assessment development in Medical Nutrition Therapy 1.

**Courses:** HL42, PU43

**Prerequisites:** PUB541

**Corequisites:** PUB628

**Contact hours:** 5 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB644 HEALTH PROMOTING SCHOOLS

This subject is designed to extend students' understanding of health promotion in a school setting. The learning objectives for this course are designed to reinforce the links between education and health, in relation to the planning, implementation and evaluation of a school-based health promotion intervention. It also addresses some of the management issues that underlie such an approach to the promotion of health and well-being in the school community. Case studies or activities offer a range of opportunity for reflection and investigation.

**Courses:** HL88, PU85

**Prerequisites:** 196 credit points

**Credit points:** 12

**Campus offered:** KG, EXT **Semester:** 2

### ► PUB695 INDUSTRIAL TRAINING EXPERIENCE

Ten to twelve months placement in paid employment related to Occupational Health and Safety under the joint supervision of an industry supervisor and an academic adviser. The aca-

## UNIT SYNOPSES

demic adviser obtains reports from the student and their work supervisor at regular intervals. The student is required to complete a progressive assessment program. Results are determined on the basis of reports, continuous assessment and the employers report.

**Courses:** PU40

**Prerequisites:** Completion of Years 1, 2 of the Degree and a GPA of 4.5 or above

**Credit points:** 24

**Campus offered:** EXT **Semester:** 1, 2

### ► PUB722 PRACTICE IN CLINICAL DIETETICS

Students are required to develop skills in the management of nutrition care of clients in the clinical setting, to a standard that allows entry to the Dietetics profession. This unit incorporates the basic strategies of the dietetic care process, ie, assessment, planning, implementation and evaluation of nutritional care, for clients who have a variety of disease states. Students also need to have the opportunity to demonstrate basic skills in research and evaluation in relation to clinical outcome.

**Courses:** HL42, PU43

**Prerequisites:** PUB875

**Credit points:** 12

**Campus offered:** KG **Semester:** 1

### ► PUB726 ORTHOPAEDICS

Emphasis on orthopaedic surgery; develops a detailed knowledge of general and specific orthopaedic conditions which have an effect on the lower limbs and the surgical treatment of systemic conditions as seen by the podiatrist, that is diabetes, provides an understanding of the special problems associated with children and specific lower limb conditions with emphasis on the surgical techniques used in their treatment.

**Courses:** PU43

**Prerequisites:** PCB313 or PUB637, PUB624, PUB635

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► PUB727 PHYSICAL MEDICINE

Introduction to a wide range of diagnostic and physical treatment modalities used in modern podiatric practice. Students gain understanding in uses, applications, contraindications and limitations of each modality studied in direct connection with ongoing clinical studies and theoretical components of podiatric medicine.

**Courses:** PU43

**Prerequisites:** PUB624

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► PUB728 CLINICAL MEDICINE 1

Students are expected to integrate knowledge and skills obtained from the specialist podiatry clinics at the university facility. They will undertake a leadership role with third year students by way of a mentor system in the specialist clinics. Students are expected to implement a range of complex treatments and a high level of patient care. Treatment for special needs groups is undertaken ie, children and adults with severe intellectual and physical disabilities, high risk patients with diabetes mellitus and peripheral vascular disease, immuno-suppressed patients. Students are introduced to advanced clinical care of paediatric foot disorders.

**Courses:** PU43

**Prerequisites:** PUB624

**Corequisites:** PUB729

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1

### ► PUB729 PROFESSIONAL INTERNSHIP 1

Students will undertake a placement through relevant podiatry departments to gain important experience in the management of complex problems which manifest in the lower extremity. Most importantly, students will observe and develop critical problem solving skills in the broader environment of private practice, hospitals and community health. This experience will also consolidate the multi-disciplinary nature of health care delivery and educate the student on the various roles of other health care providers. This will lead to more judicious approach to im-

plementing effective health care. Experience gained from the internship will be applied by the student in the specialist clinical environment during the four years of the program.

**Courses:** PU43

**Prerequisites:** PUB624

**Corequisites:** PUB728

**Contact hours:** 12 (includes clinic work)

**Credit points:** 12

**Campus offered:** KG **Semester:** 1

### ► PUB738 ADVANCED CLINICAL MEDICINE 1

The aim of this unit is to develop high level clinical skills and professionalism in a range of clinical settings. Increased understanding of the various clinical and non-clinical roles that podiatrists play in the community will be emphasised through external placements.

**Courses:** PU43

**Prerequisites:** PUB537, PUB538, PUB635, PUB638, PUB639

**Corequisites:** PUB739 **Credit points:** 12

**Incompatible with:** PUB728

**Campus offered:** KG

### ► PUB738 ADVANCED CLINICAL MEDICINE 1

The aim of this unit is to develop high level clinical skills and professionalism in a range of clinical settings. Increased understanding of the various clinical and non-clinical roles that podiatrists play in the community will be emphasised through external placements.

**Courses:** PU43

**Prerequisites:** PUB537, PUB538, PUB635, PUB638, PUB639

**Corequisites:** PUB739 **Credit points:** 12

**Incompatible with:** PUB728

**Campus offered:** KG

### ► PUB739 PODIATRIC MEDICINE 5

The aim of this unit is to provide you with the diagnostic and treatment skills necessary to manage patients with more complex conditions, introduce contemporary issues in podiatry including national and international issues, and to encourage you to critically evaluate the medical literature to inform your clinical decisions. (Not offered until 2006).

**Courses:** PU43

**Prerequisites:** PUB537, PUB538, PUB635, PUB638, PUB639

**Corequisites:** PUB738 **Credit points:** 12

**Campus offered:** KG

### ► PUB823 PRACTICE IN COMMUNITY NUTRITION

Involves a four week practical placement off-campus where students work on various projects and gain experience in the nutrition and health care of groups in a variety of community, workplace and school settings; provision of a nutrition education session to a community group and a practical examination at the end of the semester.

**Courses:** HL42, PU43

**Prerequisites:** Successful completion of all Year 3 units

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 1, 2

### ► PUB824 PRACTICE IN FOOD SERVICE MANAGEMENT

A four week practical component consisting of up to four separate placements in hospitals, nursing homes, correctional centres or other locations to gain experience in food service management.

**Courses:** HL42, PU43

**Prerequisites:** Successful completion of Year 3 units

**Credit points:** 12

**Campus offered:** KG **Semester:** 1

### ► PUB826 PROJECT AND PROFESSIONAL MANAGEMENT

Explains two key concepts. Firstly, how a professional practice may be set up and how a small practice can operate as a business enterprise. Methods of budgeting, finance and control are explained. Secondly, it develops an interest in podiatry research using scientific methods of investigation and presentation. Students are encouraged to publish these projects as original material in related professional journals.

**Courses:** PU43

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB827 SPORTS MEDICINE

The importance of a multidisciplinary approach to the diagnosis, evaluation and treatment of sports injuries. Students study the symptomatology of lower limb functional pathologies as related to specific sports and devise treatment programs. An understanding of the principles of human fitness and potential in relation to athletic injuries and expectations forms the foundation for further studies.

**Courses:** PU43

**Prerequisites:** PUB523, PUB624

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB828 CLINICAL MEDICINE 2

Students will be expected to further integrate and apply additional knowledge obtained from the final clinical rotation to the needs of specialist patients who attend the university podiatry clinic. In particular, elements of pre-, post- and intra-operative surgical considerations will be utilised. A specialist paediatric clinic will provide the student with specialist skills in the treatment of developmental disorders and conditions.

**Courses:** PU43

**Prerequisites:** PUB728

**Corequisites:** PUB829

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB829 PROFESSIONAL INTERNSHIP 2

Students undertake a rotating roster through relevant podiatry departments to gain important experience in the management of complex problems which manifest in the lower extremity. Students will observe and develop critical problem solving skills in the broader environment of private practice, hospitals and community health. This experience consolidates the multi-disciplinary nature of health care delivery and educates students on the roles of other health care providers. This leads to a more judicious approach to implementing effective health care. Experience gained is applied by the student in the specialist clinical environment during the four years of the program. Student will be designated for a three week period.

**Courses:** PU43

**Prerequisites:** PUB729

**Corequisites:** PUB828

**Contact hours:** 12 (clinical work)

**Credit points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUB875 PROFESSIONAL PRACTICE

This unit is undertaken by students in the public health, and nutrition and dietetics strands of the BHlthSc. It provides students with the opportunity of working in one or a number of placements in a professional capacity in an area of interest to the student. It provides an opportunity for students to apply the knowledge and skills acquired through their course to a practical problem or workplace situation.

**Courses:** HL42, HL46, PU40, PU43

**Prerequisites:** NUD, successful completion of all prior core units; All other majors, completion of 220 cp

**Contact hours:** 4 per week **Credit Points:** 12

**Campus offered:** KG **Semester:** 2

### ► PUN001 CONTEMPORARY RISK MANAGEMENT

An introduction to the risk management process as outlined in AS/NZS 4360 Risk management. The unit concentrates on the context of risk management and introduces the student to the concepts which will be explored further in the units PUN008, PUN009 and EFN418. The structure of the organisation, its environment and the potential loss exposures are examined in some detail.

**Courses:** HL38, HL68, HL88, IF88, PU65, PU60, PU85

**Credit points:** 12

**Campus offered:** KG, EXT **Semester:** 2

## UNIT SYNOPSES

### ► PUN008 RICK MANAGEMENT: IDENTIFICATION AND ASSESSMENT PROCEDURES

Provides the skills necessary to identify and assess risks. Qualitative, semi-quantitative and quantitative methods of risk analysis are investigated in the context of the major perils likely to be considered by an organisation. Various risk analysis techniques including HAZOP, FMEA, hazard indices, fault trees, event trees, reliability analysis, statistical analysis, and probability are discussed.

**Courses:** HL38, HL68, HL88, HL90, IF88, PU60, PU65, PU85

**Prerequisites:** PUN001

**Corequisites:** PUN001

**Credit points:** 12

**Campus offered:** KG, EXT

**Semester:** 2

### ► PUN009 RISK TREATMENT

Critical and systematic methods of making decisions on appropriate risk treatment options are investigated. Options considered include risk avoidance, risk acceptance, risk reduction, consequence reduction, risk transfer and risk retention.

**Courses:** HL38, HL68, HL88, IF88, PU60, PU85

**Prerequisites:** PUN008

**Credit points:** 12

**Campus offered:** KG

**Semester:** 1

### ► PUN103 ADVANCED EPIDEMIOLOGY

This unit's aim is the mastery of key principles and concepts of research design. There has been an increasing demand for evidence-based health research, and an increasing trend towards research that considers complex biological, environmental and societal inter-relationships. Recent developments in epidemiology have contributed novel research designs and statistical methods to complement these needs. Throughout this unit, students will be exposed to these more sophisticated designs and analytical methods. Such knowledge is mandatory for critical evaluation of the current research literature, for design of efficient research studies, and to inform appropriate interpretation of research results at a 'best practice' level.

**Courses:** HL88

**Prerequisites:** HLN705 or PUB316 or equivalent

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 2

### ► PUN105 HEALTH STATISTICS

Beyond a common core of statistical concepts, each discipline area emphasises its own set of descriptive and inferential statistical methods and even terminology. The content of this unit emphasises both core and health-specific statistical methods in the health sciences. Students will be provided with substantial practical experience in the application and interpretation of the most common statistical methods to health data, and will also be made aware of data management principles in preparation for analysis. There will be a strong emphasis on applying concepts through critical reading and discussion of the literature and worked examples from a range of topic areas.

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

**Semester:** 1

### ► PUN106 POPULATION HEALTH

This unit addresses some of the significant issues of population health including the complex relationship between health and social, economic, political and lifestyle factors and social disadvantage and health. It examines contemporary concepts of health and illness in the Australian context but also draws on international examples. Potential health issues facing Australia and the world, such as the aging of the population, the impact of genetic technology on health and the health of specific sub-populations are also discussed.

**Courses:** HL68, HL88, PU60, PU85

**Contact hours:** 3 per week

**Credit Points:** 12

**Incompatible with:** Completion of PU40/43 or PUB251 or PUB314 or PUP010 or NSN622

**Campus offered:** EXT

**Semester:** 1

### ► PUN301 OCCUPATIONAL HEALTH AND SAFETY LAW AND MANAGEMENT

Introduces students to the history of occupational health and safety and the impact on occupational health and safety practice of the law, and industrial relations. The theory and practice of occupational health and safety management is discussed.

**Courses:** HL68, HL88, PU60, PU65, PU85

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► PUN302 DETERMINANTS OF WORKPLACE INJURY AND DISEASE

Provides students with an understanding of the various models used to describe and determine the causes and distribution of injury and disease in the workplace. Students will investigate the use of various analytical, statistical and epidemiological tools useful for describing and determining the incidence and causes of injury and disease in the workplace.

**Courses:** HL38, HL68, HL88, PU60, PU65, PU85

**Prerequisites:** PUN301

**Corequisites:** PUN301

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG

**Semester:** 1

### ► PUN601 CONTEMPORARY HEALTH POLICIES

Health systems and their structure and functioning are outcomes of health policy. Critical to the success of public health initiatives is influencing policy. This unit critically evaluates the policy making process in health in both Australia and overseas countries. Topics include policy development, policy analysis, political influences on policy, health policy at national and international level, the role of consumers, pressure groups and lobbyists and the influence of the medical profession on health policy.

**Courses:** HL68, HL88, PU60, PU85

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

**Semester:** 2

### ► PUN602 HEALTH PLANNING, MANAGEMENT AND EVALUATION

This unit offers theoretical and practical understanding of strategic management issues associated with managing resources and managing people. The course is structured so that readings, activities and assessment items allow students to take a critical and analytical approach to an organisational issue within the context of current organisational, political, technological, and socio-economic developments. When examining the effects of organisational structures and change on individual and group performance in the workplace, the content draws structures and change on individual and group performance in the workplace, the content draws on perspectives from the fields of organisational theory, corporate strategy, psychology, and sociology. The unit is designed to facilitate analytic skills and understanding of a range of management decision-making principles and processes applicable to health management roles.

**Courses:** HL88, PU60, PU85

**Credit points:** 12

**Campus offered:** KG, EXT

**Semester:** 1

### ► PUN608 HEALTH ECONOMICS

This unit is designed to introduce students without any previous economics background to some microeconomic theory and its application to economic issues in the health sector. The unit starts with more theoretical topics such as demand and supply analysis, the production of health and market structures, and then moves onto more applied topics such as health insurance and economic evaluations. The aim of the unit is to encourage students to understand variables that influence resource allocation within the health sector and to consider subsequent implications. Assessment for this unit typically consists of assignment work.

**Courses:** PU60, PU85

**Prerequisites:** PU85 & PU60: PUN692; HL38, HL68, HL88, & HL90: Nil; PU38: PUN610

**Contact hours:** 3 per week

**Credit Points:** 12

**Incompatible with:** PUB433 Health Care Economics

**Campus offered:** KG, EXT

**Semester:** 2

### ► PUN609 HEALTH CARE FINANCE

This unit introduces students to essential conceptual frameworks that are fundamental to an understanding of the organisation of health care resources, within the health sector and of subsequent outcomes. The unit adopts the objectives of effectiveness, efficiency and equity with which to analyse health care delivery systems. The intention is to provide an understanding of some important intellectual apparatus that can be used to describe and understand health care delivery in a variety of settings and systems.

**Courses:** HL68, HL88, PU60, PU85

**Prerequisites:** PUN692

**Credit points:** 12

**Campus offered:** EXT

**Semester:** 1

### ► PUN610 HEALTH SERVICES MANAGEMENT

This unit offers theoretical and practical understanding of strategic management issues associated with managing resources and managing people. The course is structured so that readings, activities and assessment items allow students to take a critical and analytical approach to an organisational issue within the context of current organisational, political, technological, and socio-economic developments. When examining the effects of organisational structures and change on individual and group performance in the workplace, the content draws on perspectives from the fields of organisational theory, corporate strategy, psychology, and sociology. The unit is designed to facilitate analytic skills and understanding of a range of management decision-making principles and processes applicable to health management roles.

**Courses:** HL38, HL68, HL88, PU60, PU85

**Prerequisites:** PU85 & PU60: PUN692; HL38, HL68, HL88, & HL90: Nil; PU38: PUN692

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

**Semester:** 2

### ► PUN615 ADVANCED HEALTH SERVICE MANAGEMENT

This unit builds on prior studies in health service management. Theoretical frameworks previously studied are applied to specific contexts to extend the learning outcomes. Topics which are discussed at an advanced level include best practice in service delivery, leadership, quality and benchmarking applied in various settings of health service at the state, national and International level.

**Courses:** HL68, HL88, PU60, PU85

**Prerequisites:** PUN610

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** KG, EXT

**Semester:** 2

### ► PUN617 ENVIRONMENTAL HEALTH MANAGEMENT

This unit considers environmental health management as an important component in resolving health threatening hazards in the community. Topics include: introduction and development of environmental health research grants as a managerial tool; the role of environmental health risk management in decision making; the history of environmental and community health and the approaches to prevention; the professional role of environmental health practitioners throughout the world, and contemporary environmental health policy formulation and review.

**Courses:** HL38, HL68, HL88, PU60, PU85

**Contact hours:** 3 per week

**Credit Points:** 12

**Campus offered:** EXT

**Semester:** 2

### ► PUN620 CONCEPTS OF ENVIRONMENTAL HEALTH

This is a compulsory core in the specialist area of environmental health. Environmental Health professionals need to understand the inextricable link between human health and environmental problems. They must also understand the types of strategies available to control and minimise the risks associated with environmental health problems. This Unit will examine some basic principles and concepts of environmental health

## UNIT SYNOPSES

including sustainable development and environmental health promotion. It will apply these principles to areas such as air pollution, transport, green consumerism, ecotourism and relevant environmental health issues occurring at that time. The Unit will also discuss future threats to public health such as long term climate change and population growth.

**Courses:** HL38, HL68, HL88, PU60, PU85  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUN692 HEALTH CARE DELIVERY SYSTEMS

This unit adopts the broad objectives of effectiveness, efficiency and equity with which to analyse health care delivery systems. The unit consists of three separate modules which examine health care delivery systems from different perspectives. Module 1 is an introductory module which overviews the structural and functional components of health care delivery, and defines the concepts of effectiveness, efficiency and equity. The Australian health care system is compared with those operating in both developed and developing countries. Module 2 introduces economic concepts and tools of analysis which primarily consider efficiency aspects of health care delivery. Lastly module 3 analyses the management aspects of health care delivery within the context of change.

**Courses:** HL68, HL88, PU60, PU85  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG, EXT **Semester:** 1

### ► PUN702 SOCIAL AND BEHAVIOURAL DETERMINANTS OF HEALTH

This unit deals with the body of knowledge applicable to public health provided by the disciplines of social and behavioural science. Social determinants of health on living and working conditions conducive to health. The subject will offer a comprehensive analysis of lifestyles and living conditions conducive to health.

**Courses:** PU60, PU85  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** EXT **Semester:** 1

### ► PUN743 INTRODUCTION TO EPIDEMIOLOGY

This unit introduces the basic principles and methods of epidemiology as it is concerned with the identification, control and prevention of ill health in the community. It addresses specific aspects relating to the collection and interpretation of epidemiological data, issues of major public health importance both within Australia and overseas, and provides students with the essential skills for logical, scientific assessment of the health and medical literature.

**Courses:** PU60, PU85  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** EXT **Semester:** 1

### ► PUP032 INTERVENTION DESIGN AND THEORIES OF CHANGE

Examines theories of change as they impact on health promotion and health education practice and the development and implementation of interventions. It addresses the strengths and weaknesses of change theory into practice and explores the nature of individual, group and organisational change strategies in public health and health promotion.

**Courses:** HL38, HL68, HL88, PU60, PU85  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG, EXT **Semester:** 1

### ► PUP034 ADVANCED STUDIES AND PRACTICE IN HEALTH PROMOTION

This advanced unit identifies and utilises the repertoire of practice skills that health promotion students need to address health problems. It integrates needs identification, systematic planning and evaluation models into practice. Internal students will put this knowledge into practice through participation in a group based health promotion project. The process of developing and implementing a health promotion program develops an understanding of issues such as ethics, writing goals and objectives, resources and time management. External students will conduct a needs assessment and use the data to write a health promotion program proposal. These tasks

will provide the nexus between theory and practice that is critical for people working in the health promotion arena.

**Courses:** HL38, HL68, HL88, PU60, PU85  
**Prerequisites:** PUP035 or PUP036  
**Corequisites:** PUP035 or PUP036  
**Contact hours:** 3 per week **Credit Points:** 12  
**Incompatible with:** PUP023, PUN613  
**Campus offered:** KG, EXT **Semester:** 2

### ► PUP035 HEALTH PROMOTION STRATEGIES AND EVALUATION

Health promotion practitioners are likely to be engaged in the development, implementation and evaluation of health promotion programs to meet the needs of a diverse range of population groups. This unit will cover issues related to health promotion planning, implementation and evaluation. This will include needs assessment, program planning and planning models, development of program goals and objectives, selection of health promotion strategies, program implementation and management, and program evaluation. Health promotion strategies that are appropriate for particular target groups individuals, groups, organisations, communities and specific population groups will be discussed. There will also be a focus on the development of methods for useful and effective evaluation.

**Courses:** HL38, HL68, HL88, PU60, PU85  
**Contact hours:** 3 per week **Credit Points:** 12  
**Incompatible with:** PUP018 or PUP012  
**Campus offered:** KG, EXT **Semester:** 2

### ► PUP036 CONCEPTS AND SETTINGS FOR HEALTH PROMOTION

Health professionals wishing to broaden their understanding of public health need to be introduced to the concepts and recent developments internationally and nationally, in health promotion and its application across a wide range of settings, such as schools, workplaces, communities and health care settings.

**Courses:** HL38, HL68, HL88, PU60, PU85  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** EXT **Semester:** 1

### ► PUP116 ERGONOMICS

Explores the relationship between the worker, the work environment and the work space. Occupational ill-health and injury arise from a lack of fit between the capabilities of workers and the design of the working environment, the work processes and the physical and mental demands of the task. Insight into ergonomics can assist practitioners to enhance the workers safety and comfort, improve work efficiency and performance, and optimise work performance. Topics include: basic anatomy and physiology of body systems; occupational biomechanics; psychology.

**Courses:** HL68, HL88, PU60, PU65, PU85  
**Prerequisites:** PUN301  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► PUP250 OCCUPATIONAL HYGIENE

Lectures, practical work and industrial visits to instruct students so that they may recognise, evaluate and control the physical, biological and chemical environmental factors which can adversely affect the health, safety, comfort and efficiency of workers.

**Courses:** HL68, HL88, PU60, PU65, PU85  
**Prerequisites:** PUP415  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► PUP415 OCCUPATIONAL HEALTH

Explores chemical hazards in the working environment, epidemiological principles and practice, and identification of special risk groups in the workforce. Topics include: the pathological bases of disease in humans; chronic occupational diseases; occupational skin conditions; respiratory diseases; biological hazards in the work environment (bacteria, parasites, viruses, rickettsia and fungi); chemical and physical stresses and their physiological responses; physiological monitoring principles and practice; special risk groups; epidemiological principles and practice.

**Courses:** PU60, PU65, PU85  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 1

### ► PUR200 EMERGING ISSUES IN PUBLIC HEALTH

The field of Public Health is evolving rapidly with respect to the nature of the problems it must address, the methods it uses to understand and to influence population health, and the underlying philosophies that inform the field. As a consequence, it is important that all doctoral candidates develop an appreciation for new directions in Public Health to complement their solid foundations in more traditional practices.

**Courses:** HL90  
**Prerequisites:** 72 credit points at advanced Masters/Doctoral level  
**Contact hours:** 2 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► PUR201 ADVANCED PROFESSIONAL STUDIES

This unit is suitable for health science practitioners wishing to extend their studies to advanced post graduate level, in an area of interest particular to the individual student. There is a need to be able to develop advanced practitioner skills, to develop interdisciplinary approaches and to consolidate advanced skills in terms of health care delivery. This unit is designed to allow small groups of doctoral students to develop advanced skills in their chosen field, with the help and guidance of an academic mentor and to develop appreciation for these skills in other related disciplines.

**Courses:** HL90  
**Prerequisites:** 72 credit points at advanced Masters/Doctoral level  
**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** KG **Semester:** 2

### ► PYB000 APPLIED SKILLS AND SCHOLARSHIP (PSYCHOLOGY)

This is a compulsory first year unit. It focuses on the development of a number of generic competencies which are important outcomes of all QUT undergraduate courses. The unit provides a skill basis, developed within various discipline contexts, upon which subsequent units in the course will build. The unit is an essential first stage in the development of key skills and understandings at the tertiary level.

**Courses:** PY45, PY07  
**Contact hours:** 3 averaged over the semester  
**Credit points:** 12  
**Campus offered:** CA **Semester:** 1, 2

### ► PYB007 INTERPERSONAL PROCESSES AND SKILLS

Psychology is generally a people-based profession with many positions involving not only understanding and testing people but communicating with them. More broadly however in most areas of modern work, and indeed within personal relationships, people need developed interpersonal skills and the ability to conceptualise interactive processes. The microskills for communication are also the foundation for helping relationships and counselling.

**Courses:** PY45  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** PYB052, PYB086  
**Campus offered:** GP, CA, KG **Semester:** 1, 2

### ► PYB012 PSYCHOLOGY

The body of knowledge which defines Psychology as a discipline is basic to an understanding of human behaviour and interaction. Psychological theories, concepts and methods of investigation provide ways of evaluating personal and professional practice. Informed practice can then seek to meet the needs of individuals, groups and communities. All professional people need to have frameworks for understanding their own behaviour and that of others. This unit provides students with essential knowledge as a basis for their personal and professional effectiveness. It is the foundation for understanding further study in psychology and its many applications.

**Courses:** All courses  
**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** PYB071, PYB073  
**Campus offered:** GP, KG, CA **Semester:** 1, 2

### ► PYB054 PSYCHOLOGY AND GENDER

What is gender?; theories of gender; male and female; masculine and feminine; roles versus

## UNIT SYNOPSES

power; counselling issues; old and new paradigms; history of psychology of gender; sexuality; mothers and fathers; psychology constructs the female; psychology in patriarchal discourse; family therapy theory and feminist critiques; psychological constructs and the media; film and media; psychology of gender and power.  
**Courses:** PY45, PY07

**Prerequisites:** PYB012 or PYB101

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB057 APPLIED COGNITIVE PSYCHOLOGY

Overview of human information processing from the initial stage of sensory encoding, through the various mechanisms of information storage and retrieval, to the ultimate use of this information in higher level tasks such as reading. In addition, the unit highlights the application of this basic knowledge to Real World problems in the domain of human-computer interaction.  
**Courses:** All

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** PYB303  
**Campus offered:** KG **Semester:** 2

### ► PYB067 HUMAN SEXUALITY

This unit explores historical approaches to studying, explaining and regulating human sexuality with an awareness of the social nature of definitions of 'normal' or 'acceptable' sexual behaviours. Students will critically examine definitions of 'healthy' or 'morally acceptable' or 'normal' sexuality. Different models of sexuality are considered with an emphasis on contemporary critiques of the traditional paradigms of sexuality in the West.  
**Courses:** All

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB073 INTRODUCTION TO BEHAVIOURAL SCIENCES AND HEALTH CARE

An understanding of the behavioural sciences underlies much of the interaction of health professionals. Psychological and social factors that moderate human responses to health, disease, trauma and treatment, and the principles that underlie empathetic and effective intervention are the focus of study in this unit. A sound understanding of psychological and social concepts and principles is essential for the provision of contemporary, holistic nursing care for individuals and groups, and an important element in the development of effective relationships with clients, colleagues and other members of a multidisciplinary health care team.  
**Courses:** Nursing

**Contact hours:** 2 per week **Credit Points:** 12  
**Campus offered:** GP **Semester:** 1

### ► PYB086 INTERPERSONAL AND GROUP PROCESSES

People in many professions and in their own personal relationships need developed interpersonal skills and an ability to observe and conceptualise interactive processes. This applies to interpersonal relationships and small group settings, groups being a common structure for learning, working and socialising. Knowledge of relevant microskills is essential for those preparing to teach relationship skills so that students will be able to design skill development programs in educational settings in the future. This applies to the important area of human sexuality where personal comfort for teachers is especially necessary in discussion of biological, social and psychological aspects of sexual elements in relationships.

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** PYB007  
**Campus offered:** KG **Semester:** 2

### ► PYB101 INTRODUCTION TO PSYCHOLOGY 1A

Psychology is a broad-ranging and multifaceted discipline which encompasses the scientific study of human behaviour, and the systematic application of knowledge gained from psychological research to a broad range of applied issues. This unit focuses on the areas of

developmental psychology, social psychology, individual differences, and psychopathology.

**Courses:** PY45, PY07

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** PYB012, PYB073

**Campus offered:** CA **Semester:** 1

### ► PYB102 INTRODUCTION TO PSYCHOLOGY 1B

Introduction to Psychology 1B extends the introduction provided in Introduction to Psychology 1A to psychology as the scientific study of human behaviour. This unit introduces students to the basic biological and psychological processes underlying perception, memory, learning, problem solving, consciousness, and language. In addition, research participation experience is provided to the students.

**Courses:** PY45, PY07

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► PYB110 PSYCHOLOGICAL RESEARCH METHODS

An overview of the purposes and strategies of research; elementary research design; operationalising variables; descriptive statistics; distributions; measures of central tendency and spread; standard scores and percentiles. Understanding relationships between variables through correlation and regression. An introduction to hypothesis-testing procedures using t-tests.

**Courses:** PY45, PY07

**Contact hours:** 3 per week **Credit points:** 12  
**Incompatible with:** MAB237, MAB247

**Campus offered:** CA **Semester:** 1, 2

### ► PYB158 INTRODUCTION TO SUBSTANCE ABUSE IN AUSTRALIA

This unit introduces students to alcohol and drug use in the Australian context. The unit examines the terminology and definitions commonly associated with the alcohol and other drug field as well as providing an overview of models of drug use. This unit will compare and contrast current trends and patterns of substance use in Australia and critically examine the legitimacy of this focus. Australian substance use/abuse patterns will be positioned within a global context.

**Courses:** All

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CA **Semester:** 2

### ► PYB159 ALCOHOL AND OTHER DRUG STUDIES

This unit aims to give students an understanding of the extent of substance abuse in our community: who uses what, where and when; the models that have been advanced for understanding substance abuse; the intervention and therapeutic models utilised within the field; and the effects of substance abuse, physiologically, socially and psychologically.

**Courses:** All

**Prerequisites:** 96 credit points  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB201 PERCEPTION

This unit presents an overview of perceptual and sensory processes in humans and other animals. While most emphasis is placed on visual and auditory perception, the unit also explores the skin senses, the chemical senses, and the orienting senses. In each case, the topics covered include: the nature of the relevant physical stimuli, the physiology of the sensory modality, the phenomenology of the sensory modality, sensory dysfunction, and examples of applied research in the domain. The unit begins with a primer of psychophysics.

**Courses:** PY45, PY07

**Prerequisites:** PYB012, or PYB101, or PYB102  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► PYB203 DEVELOPMENTAL PSYCHOLOGY

An introduction to life span developmental psychology. This unit covers the major theories of life span development and includes biological, social and cognitive aspects of development from birth through to old age. It emphasises the interdependency of all aspects of development and on

the importance of the physical, family, socio-cultural and historical contexts within which development occurs. The unit aims to develop the student's understanding of general patterns of human development and of the ways in which the development of particular individuals and groups may vary from these general patterns.

**Courses:** PY45, PY07

**Prerequisites:** PYB101 or PYB102

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► PYB205 SOCIAL PSYCHOLOGY

People are social beings. Their thoughts, feelings and actions are influenced by the real, imagined or implied presence of others. To obtain greater insight into people's behaviour, it is essential to investigate scientifically the relationship between the individual and the group. The effects of the individual within the group and the group upon the individual will be studied.

**Courses:** PY45, PY07

**Prerequisites:** PYB012, or PYB101, or PYB102  
**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB206 PERSONALITY

This unit consists of an overview of some of the major theories of personality to provide the student with an understanding of contemporary approaches to normal personality function. Emphasis will be given to the methods of studying and conducting research in personality. By studying normal personality processes, this unit provides a foundation for advanced studies in psychopathology.

**Courses:** PY45, PY07

**Prerequisites:** PYB101, PYB012 or PYB102

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB210 RESEARCH AND DESIGN AND DATA ANALYSIS

This unit takes an hypothesis testing approach to data analysis. This means that statistical analysis is treated as one step in a larger process which also includes formulating theoretically sound predictions, designing a suitable experiment to test the predictions, selection of the appropriate statistics to test the predictions, calculation and interpretation of the required statistics, and reporting the outcomes in the correct way. The aim of the unit is to provide the student with the knowledge and skills required to do these tasks with respect to two types of prediction; differences between means and relationship between sets of scores.

**Courses:** PY45, PY07

**Prerequisites:** PYB110

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB215 FORENSIC PSYCHOLOGY AND THE LAW

Forensic Psychology is readily acknowledged as one of the fastest growing areas of psychology in the world. The domain of forensic psychology concerns itself with the behaviour of people involved in the justice system, in particular, the criminal and civil components of the legal justice system. By its very nature forensic psychology draws from a wide multi-disciplinary base for the application of its specialised knowledge. Hence, you will need a broad introductory appreciation and critical perspective on what forensic psychology involves and has to offer in relation to the Law and the practice of it by a range of practitioners within the legal justice system.

**Courses:** PY45, PY07

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CA **Semester:** 2

### ► PYB257 GROUP WORK

Provides an opportunity for experiential group learning, either intensively or in regular program times. It examines types of groups and varieties of group experiences; the importance and uniqueness of group medium; understanding behaviour in the group context; theories and models of group development; leader and member behaviours; planning, implementing and evaluating group methods; establishing groups and planning group approaches; the group as a

## UNIT SYNOPSES

therapeutic community; evaluating group work; ethical issues.

**Courses:** PY45, PY07

**Prerequisites:** PYB007, PYB052 or equivalent  
**Contact hours:** 1 week intensive between semesters

**Credit points:** 12

**Campus offered:** CA

**Semester:** 2

### ► PYB258 INTRODUCTION TO THEORY AND RESEARCH IN HYPNOSIS

This unit serves as an introduction to experimental hypnosis for those students who may wish to pursue postgraduate study in Clinical and Experimental Hypnosis. It covers socio-cognitive theories of hypnosis and interactive-phenomenological models and perspectives. The unit investigates research on: dissociation, hypnotisability, regression, responsiveness, consciousness, altered states, hypnotic dreams, and hallucinations, ideomotor signals, post-hypnotic amnesia and assessment of hypnotisability.

**Courses:** PY45, PY07

**Prerequisites:** 96 credit points

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA

**Semester:** 1

### ► PYB260 PSYCHOPHARMACOLOGY OF ADDICTIVE BEHAVIOUR

This unit will develop the student's understanding of behavioural pharmacology, with particular emphasis on the psychopharmacology of addictive behaviours. To establish a framework for learning, classes will initially include a review of neurobiology, introduction to pharmacokinetics, and discussion of research methods used to investigate psychopharmacological effects of drugs on behaviour. Subsequent classes will address the history and origin of the more commonly used addictive substances, routes of administration, patterns of distribution and excretion, neuropharmacology, and effects of acute and chronic administration. Substances covered will include those that are most widely associated with problems of dependence and addiction.

**Courses:** PY07

**Prerequisites:** PYB158 or PYB159

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** CA

**Semester:** 1

### ► PYB302 INDUSTRIAL AND ORGANISATIONAL PSYCHOLOGY

Participation in the workplace is an integral component in the lives of most people. It is important therefore to understand the behaviour of people, individually and collectively, within the workplace. Industrial and Organisational Psychologists are concerned with advancing the knowledge of the relationship between people and work, as well as using this knowledge to promote the effective organisation of human resources.

**Courses:** PY45, PY07

**Prerequisites:** PYB205, PYB110

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA

**Semester:** 1

### ► PYB303 COGNITIVE PSYCHOLOGY

This unit explores both the cognitive mechanisms involved in processing information and behavioural models of learning. The information processing component covers topics including: sensory storage, attention, pattern recognition, working memory, long-term memory, and applied psychology. The learning component deals with the phenomenology of behavioural learning paradigms including classical and operant conditioning. In both cases, the unit emphasises the need for critical analysis of theories and the experimental evidence supporting them.

**Courses:** PY45, PY07

**Prerequisites:** 36 credit points of 2nd or 3rd year Psychology units

**Contact hours:** 3 per week **Credit points:** 12

**Incompatible with:** PYB057

**Campus offered:** CA

**Semester:** 1

### ► PYB304 COGNITIVE NEUROPSYCHOLOGY

This unit aims to provide a broad introduction to the area of neuropsychology and discusses both the clinical and cognitive approaches in the field. Three broad areas will be covered, namely neuroanatomy, neuropathology, and the cognitive

analysis of resulting deficits. The student will extend their knowledge of major neuroanatomical structures and their interconnections, with an emphasis on how this information is applied in the clinical setting. They will also study a number of neuropsychological disorders in terms of their diagnosis, assessment and treatment, as well as the psychosocial effects such deficits have on the patients. The deficits themselves will be considered from a cognitive perspective, with a view not only to understand the nature of the dysfunction but also to further specify our knowledge regarding the functional architecture of the cognitive system. Disorders will include the more commonly occurring illnesses such as stroke and Traumatic Brain Injury, and some of the resulting cognitive deficits, such as aphasia, memory impairments, and the planning and execution of every day tasks.

**Courses:** PY09

**Prerequisites:** PYB303, PYB304, PYB311

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA

**Semester:** 1

### ► PYB305 APPLIED SOCIAL PSYCHOLOGY

Social Psychology is the scientific study of how people's thoughts, feelings and actions are influenced by the real, imagined or implied presence of others. To assess whether social psychology theories and models can offer insight into people's behaviour in an applied context, it is essential to investigate the utility of these theories when translated to applied social settings. The student will study the application of social psychology methods, theories, principles and research findings to understanding and solving social problems.

**Courses:** PY45, PY07

**Prerequisites:** PYB205, PYB210

**Contact hours:** 3 per week **Credit Points:** 12

**Incompatible with:** Nil

**Campus offered:** CA

**Semester:** 1

### ► PYB306 PSYCHOPATHOLOGY

The unit provides an introduction to problems in psychological functioning and reviews research and theory relating to the major classes of mental disorder identified in DSM-IV, the diagnostic and classification manual most frequently employed in Australia and the United States. An integrated approach to the understanding of psychopathology is emphasised, highlighting the reciprocal influence of biological, psychological and social factors on behaviour.

**Courses:** PY45, PY07

**Prerequisites:** PYB205

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA

**Semester:** 2

### ► PYB311 PSYCHOLOGICAL ASSESSMENT

Psychological assessment is a way of evaluating and understanding individuals. This unit is designed to introduce the student to the principles of psychological assessment. The different types of psychological assessments and issues involved in the assessment of normal and clinical populations will be examined. Topics include ethical, psychometric, procedural and interpretative issues in the assessment of children, adolescents and adults. Although the major emphasis is on assessment theory, the mainstream tests that are available to qualified psychologists are also discussed.

**Courses:** PY45, PY07

**Prerequisites:** 36 CP of 2nd or 3rd year psychology units

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA

**Semester:** 2

### ► PYB342 INDEPENDENT STUDY

This unit can only be undertaken with prior approval from the Head of School. Approval will only be given when all other options have been exhausted. It involves a guided set of readings and study in an approved area. Assessment will be negotiated with the relevant supervisor.

**Courses:** PY45, PY07

**Prerequisites:** 36 credit points of 2nd and 3rd year Psychology units.

**Contact hours:** 3 per week **Credit Points:** 12

**Campus offered:** CA

**Semester:** 1, 2

### ► PYB350 ADVANCED STATISTICAL ANALYSIS

The unit provides students with a thorough grounding in analysis of variance techniques and an introduction to multiple regression: data analysis tools used in a broad range of research designs in the social sciences. The unit extends the introduction to analysis of variance and regression provided in PYB210, considering more complex designs involving two or more independent variables. The unit is both theoretical (including the use of conceptual formulae to analyse simple data sets by hand) and practical (analysing data sets using the SPSS statistical package), with the aim of giving students a firm understanding of the principles underlying each analysis. The role of statistical analyses in the broader context of designing and interpreting valid research is emphasised.

**Courses:** PY45, PY07

**Prerequisites:** PYB210

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA

**Semester:** 2

### ► PYB353 OCCUPATIONAL AND VOCATIONAL PSYC

Psychological research underpins the focus of this unit. The first 8 weeks expand the student's understanding of selection systems. Topics covered include principles of selection, job analysis, final decisions and utility analysis. Beyond this there is a focus on 'tools' used such as work samples, psychological tests, interviews and bio-data. In later weeks, issues relating to career planning and choice are examined. Relevant theories surrounding human development, needs, interests, values, personality factors, social cognition and person-organisation fit are outlined. The focus then moves to tools available for career guidance. Again there is a focus on the intersection of theory and practice. For both parts of the unit, lectures will focus on research findings, while workshops will focus on the practical implications of such knowledge.

**Courses:** PY45, PY07,

**Prerequisites:** 36 credit points of second or third year psychology units

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA

**Semester:** 2

### ► PYB356 COUNSELLING THEORY AND PRACTICE 2

This unit focuses on the common facilitative factors within a counselling process paying attention to the person of the therapist and the counselling relationship. In order to respond appropriately and therapeutically to the needs of their clients, counsellors must have a clear understanding of the social and interactive processes which occur. Consideration of Verbal, non-verbal, social, emotional, gender, psychological and social dimensions enables counsellors to develop effective, functional and client-focused relationships and to control biases, needs and possible exploitive practices.

**Courses:** PY45, PY07

**Prerequisites:** PYB208

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA

**Semester:** 1

### ► PYB358 ADVANCED DEVELOPMENTAL PSYCHOLOGY

In this unit the focus is on child development, with an emphasis on the infant and child up to adolescence. Students will review images of children and the unfolding of their cognitive abilities within the cadre of theories of cognitive development. Among the areas that will be studied are the nature and development of memory, the development of numerical thinking, and children's ability to understand another's view of the world. In addition to these topics a substantial part of the unit will be concerned with the acquisition (both normal and atypical) of language, including also the acquisition of language in the bilingual child.

**Courses:** PY45, PY07

**Prerequisites:** 36 credit points of second level psychology units including PYB051 or PYB203 as one of the units

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA

**Semester:** 2

## UNIT SYNOPSES

### ► PYB359 INTRODUCTION TO FAMILY THERAPY

Family therapy, based on a systemic or relationship understanding of human problems, has been one of the most significant influences in the fields of counselling and psychology in recent times. With the increasing emphasis on the family as a focus for social policy, support services, research and intervention, it is important for counsellors and psychologists to have some familiarity with the basic concepts and skills of this broad approach. This unit focuses on providing basic skills and concepts from one particular approach which will be called 'Constructive Therapy', combining aspects of solution-focused therapy, possibility therapy, narrative therapy and reflecting team practice. Students will also be given opportunities to contrast this approach with other major models, and to examine its uses with particular kinds of family situations.

**Courses:** PY45, PY07

**Prerequisites:** PYB208

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► PYB360 INTERVENTIONS FOR ADDICTIVE BEHAVIOURS

Addictive behaviours, in the form of alcohol dependence, substance abuse and gambling, are recognised as major problems nationally and internationally. This unit focuses predominantly on psychological aspects of addictive behaviours. To establish a framework for learning, classes will initially review issues relating to psychological models of addiction and methods of studying addictive behaviours. Issues pertaining to the symptomatology, etiology and assessment of addictive behaviours, as well as the theoretical underpinnings of a range of therapeutic interventions will also be discussed. This unit encourages critical thinking and analysis with the aim of enhancing students' understanding of the complex issues relating to management of addictive behaviours.

**Courses:** PY45, PY07

**Prerequisites:** PYB260

**Contact hours:** 3 per week **Credit Points:** 12  
**Incompatible with:** PYB460

**Campus offered:** CA **Semester:** 2

### ► PYB371 INTRODUCTION TO ROAD SAFETY

This unit will introduce the key principles and practices in road safety. Special emphasis will be given to the broad context of road use/transport in society and the economic and social implications of road crashes. It will introduce the basics of information retrieval, road crash analysis and interpretation, and the strategic development of road safety countermeasures.

**Courses:** PY45, PY07

**Prerequisites:** 96 credit points

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB372 TRAFFIC PSYCHOLOGY AND BEHAVIOUR

This unit will review the wide range of factors that influence the behaviour of road users, particularly those that contribute to the incidence of road crashes or exacerbate their severity. It will consider all types of road users, including motor vehicle drivers and passengers, motorcycle riders, cyclists and pedestrians. The student will examine a range of theoretical models which have been used to explain the behaviour of road users.

**Courses:** PY45, PY07

**Prerequisites:** 96 credit points

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB374 APPLYING TRAFFIC PSYCHOLOGY

This unit will review the various strategies and programs designed to modify road user behaviour. Effective and ineffective approaches will be compared, in order to identify the key characteristics of successful programs. While this is a stand-alone unit, it extends many of the theoretical and practical issues covered in PYB372 - Understanding Road User Behaviour.

**Courses:** PY45, PY07

**Prerequisites:** One year of undergraduate study.

**Contact hours:** 3 per week **Credit Points:** 12  
**Campus offered:** CA **Semester:** 2

### ► PYB400 THESIS 1-4

This unit covers four parts (each of 12 credit points) which must be completed satisfactorily, leading to the submission of a research thesis. Students select a research topic and design and conduct a related research program using appropriate quantitative/qualitative methods of analysis. This research is reported in a written thesis in APA fourth edition format. Assessment of the thesis will be in accordance with University assessment procedures.

**Courses:** PY09

**Contact hours:** 3 per week **Credit points:** 12  
each part (48 in total)

**Campus offered:** CA **Semester:** 1, 2

### ► PYB401 ADVANCED RESEARCH METHODS

Provides the student with a firm understanding of a range of multivariate procedures as well as the skills to apply each analysis appropriately. In addition this unit aims to prepare students as critical consumers of psychological research.

**Courses:** PY09

**Prerequisites:** PYB350 or equivalent

**Contact hours:** 3 per week **Credit points:** 12

**Campus offered:** CA **Semester:** 1

### ► PYB402 COUNSELLING PSYCHOLOGY

This unit introduces the field of counselling psychology, one of the specialised professional Colleges within the Australian Psychological Society. The thematic focus is on the critical analysis, comparison, and evaluation of selected counselling orientations (for example, Solution-focused therapy, Narrative therapy, Cognitive-behavioural therapy, Psychodynamic therapy, etc) The comparison of these approaches involves a consideration of major contemporary issues relating to the integration of theory, research and ethical practice.

**Courses:** PY09, PY20

**Prerequisites:** PYB208 or equivalent

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB403 COGNITIVE NEUROPSYCHOLOGY

This unit aims to provide a broad introduction to the area of neuropsychology and discusses both the clinical and cognitive approaches in the field. Three broad areas will be covered, neuroanatomy, neuropathology, and the cognitive analysis of resulting deficits. The student will extend their knowledge of major neuroanatomical structures and their interconnections, with an emphasis on how this information is applied in the clinical setting. A number of neuropsychological disorders will also be examined in terms of their diagnosis, assessment and treatment, as well as the psychosocial effects such deficits have on the patients. The deficits themselves will be considered from a cognitive perspective, with a view not only to understand the nature of the dysfunction but also to further specify our knowledge regarding the functional architecture of the cognitive system. Disorders will include the more commonly occurring illnesses such as stroke and Traumatic Brain Injury, and some of the resulting cognitive deficits, such as aphasia, memory impairments, and the planning and execution of everyday tasks.

**Courses:** PY09

**Prerequisites:** PYB303, PYB304, PYB311

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB404 ISSUES IN SOCIAL DEVELOPMENT PSYCHOLOGY

This unit evaluates the contributions of social and developmental psychology to the understanding of human behaviour. The unit examines topics in social development, as they relate to families and individuals across the lifespan.

**Courses:** PY09

**Prerequisites:** 3 years of psychology and PYB203 or equivalent

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB405 ADVANCED ORGANISATIONAL PSYCHOLOGY

Students will explore the role of organisational psychologists as both internal and external consultants who are skilled psychological researchers. Special attention will be given to the interaction between organisation systems, community needs, and human beings in differing cultural, political and economic environments.

**Courses:** PY09

**Prerequisites:** PYB205, PYB302

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYB407 RESEARCH AND PROFESSIONAL DEVELOPMENT SEMINAR

This unit is intended to develop and extend students' understanding of research and practice issues in psychology. It will cover current debates and controversies within psychology and students will be encouraged to formulate critical responses to these topics. Attention will also be given to the issue of ethics in psychological research and practice. A case-based approach to the study of ethics will be used, with reference to the APS Code of Ethics as well as Codes from similar international organisations. Where possible guest speakers, including researchers and practising psychologists, will be invited to participate in seminars to develop and expand students' understanding of broader issues in psychological research and practice.

**Courses:** PY09

**Prerequisites:** PYB401

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 2

### ► PYB450 THESIS 1-3

Research project, listed as three separate 12 credit point units. To be completed as a group empirical research project.

**Courses:** PY20

**Credit points:** 12 each (36 in total)

**Campus offered:** CA **Semester:** 1, 2

### ► PYN000 COUNSELLING STUDIES 1

This unit is intended to provide the student with an initial overview of the field of counselling, before focusing on the theory and practice of one contemporary perspective called 'Constructive' or 'Time-Effective' Therapy. It is an approach based largely in social constructionist principles and promotes a view of counselling as a unique conversational process which attempts to both validate the client's experience, while pursuing possibilities for desired change. It also suggests a time-effective perspective, emphasising the possibility of working briefly and effectively with clients. Selected ideas and practices from several related approaches including Solution Focused Therapy, Possibility Therapy and Narrative Therapy will be integrated. Students will learn and practice foundational relationship-building and goal setting skills, as well as examining more advanced applications. In addition, students will be introduced to important concepts and skills from the area of crisis counselling.

**Courses:** PY12

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

### ► PYN001 PROFESSIONAL STUDIES 1

This is an introduction to the professional study of Counselling and the 'Common Factors' present in most Counselling approaches. These factors, which include the working relationship, the focus on client resources, and the instillation of hope, contribute greatly to the Counselling outcome. In order to respond appropriately and therapeutically to the needs of their clients, counsellors must have a clear understanding of the social and interactive processes that occur in counselling. Verbal, nonverbal, social, emotional, gender, psychological and cultural dimensions are all present in the counselling process. Consideration of these dimensions enables counsellors to develop effective, functional and client-focussed relationships and to control biases, needs and possible exploitative practices.

**Courses:** PY12

**Contact hours:** 3 per week **Credit points:** 12  
**Campus offered:** CA **Semester:** 1

## UNIT SYNOPSES

### ► PYN002 COUNSELLING STUDIES 2

The historical development of psychoanalysis and analytic therapy is examined as well as the utilisation of concepts derived from these approaches and from Process/Experiential work. Understanding of the differences between neurotic and psychotic behaviour, and of the need for appropriate referral, is highlighted.

**Courses:** PY12

**Prerequisites:** PYN000

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 2

### ► PYN003 GROUP STUDIES

The development of skills and approaches in organising and facilitating group work, in the context of personal support and therapeutic groups. Establishing group norms; facilitating stages of group development; responding to member behaviour and developing facilitator interventions; planning, implementing and evaluating ethical group work practices; dealing with defensiveness and hidden agendas; applying brief solutions-focused and reflecting team processes to groups; examining the motion of the therapeutic milieu.

**Courses:** PY12

**Prerequisites:** PYN001

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

### ► PYN004 COUNSELLING STUDIES 3

This unit is designed to provide both an experiential and skills-based approach to specific approaches. The unit is taught in two complementary strands. One strand is largely experiential which focuses on student's exploration of their own family of origin and family dynamics. The second strand extends the process into specific theoretical perspectives and skill development. The approaches build on some of the major orientations and skill areas covered in your previous units: constructive therapies (ie solution-focused therapy and narrative therapy), psychodynamic approaches, and reflecting team work.

**Courses:** PY12

**Prerequisites:** PYN002

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

### ► PYN006 PROFESSIONAL STUDIES 2

This unit provides an experiential introduction to the process of professional supervision. Supervision processes, roles, responsibilities, content, approaches and theories are reviewed. Each student will have the experience of being supervised using one of five major counselling supervision approaches: Solution-Oriented, Narrative, Process-Experiential, Analytic and Group-Developmental. Professional issues commonly addressed in supervision such as power, gender, culture, consent, duty of care etc are reviewed.

**Courses:** PY12

**Prerequisites:** PYN001

**Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

### ► PYN007 PROFESSIONAL STUDIES 3

Clinical supervision involves the development of a working alliance between a counsellor and another skilled professional in order to examine and reflect on the counsellor's work. The role of the supervisor ranges from an educative, advisory one through to a supportive, collaborative and consultative approach depending on the counsellor's level of professional development and competence. Supervision can occur individually or in groups and can take place 'in vivo+' (during actual counselling) or delayed (using self reporting or taped material).

**Courses:** PY12

**Prerequisites:** PYN006

**Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

### ► PYN008 PROJECT 1-3

Students undertake an individual project of theoretical and/or empirical research in a selected area of counselling. The project is supervised by a member of the teaching staff and progressive work is presented to other students. The completed project is to be presented in the form of a dissertation of not more than 15,000 words. Op-

portunity may be provided to work in the Family Therapy and Counselling Clinic as a way of achieving Project requirements. PYN008/1 is completed in semester 1, and PYN008/2 and PYN008/3 are completed in semester 2.

**Courses:** PY12

**Prerequisites:** PYN005

**Contact hours:** 3 per week equivalent

**Credit points:** 12 for each section

**Campus offered:** CA

### ► PYN013 ADVANCED COUNSELLING STUDIES

This elective unit is designed to allow students to build on these skills by pursuing counselling studies in two or more specialised areas. Students will select studies in two modules. Areas from which selections can be made might include: Experiential Therapy, Family Therapy, Narrative Therapy, Relationship Counselling, Depression, Loss and Grief and Group Work. Students may also complete one or both modules through approved forms of independent study (eg completion of approved workshops, courses or special areas of alternative study).

**Courses:** PY12

**Prerequisites:** PYN000

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 2

### ► PYN026 ADVANCED PSYCHOLOGICAL INTERVENTIONS1

This unit provides the fundamental theoretical and applied approaches of counselling psychologists. It includes three major approaches to counselling - psychodynamic solution focused/narrative and cognitive behavioural therapies. A wide range of therapeutic procedures suitable for clients who present typically for counselling are discussed, as well as encouraging students to constructively criticise and utilise the ever-increasing literature in counselling psychology. The unit focuses on individual clients who have experienced major traumatic or developmental concerns.

**Courses:** PY17

**Prerequisites:** PYB402

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

### ► PYN027 ADVANCED PSYCHOLOGICAL ASSESSMENT

This unit is designed to build on undergraduate training in psychometric assessment by reinforcing the understanding of theoretical perspectives in testing, increasing the range of tests with which the student is familiar, and developing competency in test administration, interpretation, and report writing in the counselling context.

**Courses:** PY17

**Prerequisites:** PYB311 or equivalent

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

### ► PYN030 ETHICAL, LEGAL AND SUPERVISION ISSUES IN COUNSELLING PSYCHOLOGY

Counselling psychology practice involves a unique process which requires an understanding of special roles, power relationships, boundaries and ethical principles in order to safeguard client rights. This unit presents an overview of ethical, legal and professional issues encountered in practice, and also emphasises the role of supervision in addressing these.

**Courses:** PY17

**Prerequisites:** PYN026

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 2

### ► PYN031 RESEARCH THESIS 1 - 4

In completing the thesis, students will be expected to demonstrate competency in critical and analytic thought, on the one hand, and research-related skills, on the other, in a context that may make a contribution to the literature of Counselling Psychology. The unit will be divided into four 12 credit point sections which will be PYN031/1, PYN031/2, PYN031/3, PYN031/4.

**Courses:** PY17

**Credit points:** 48

### ► PYN033 UNDERSTANDING AND TREATING POST TRAUMATIC STRESS DISORDER

The acceptance of Post Traumatic Stress Disorder (PTSD) as a diagnosis is indeed related to the effects of trauma in victims of Vietnam War. However, the pervasiveness of post traumatic stress disorder can be traced throughout human history. Currently the epidemiology, etiology diagnosis and treatment of PTSD is experiencing unprecedented interest by a whole range of therapeutic professions. This unit focuses upon the way counselling psychologists can be useful in the understanding and the treatment of trauma in general and PTSD in particular.

**Courses:** PY17

**Prerequisites:** PYN026

**Corequisites:** PYN029

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 2

### ► PYN035 SUPERVISED PRACTICUM

This unit provides students with exposure to settings where counselling is the most frequently used therapeutic procedure. This unit will consist of supervised client contact of up to 250 hours.

**Courses:** PY17

**Prerequisites:** PYN030

**Credit points:** 12

**Campus offered:** CA                      **Semester:** 1

### ► PYN036 SUPERVISED PRACTICUM 2

This unit is intended to expose students to further in-depth experience of counselling psychology by focusing on placements, continuing on from PYN035.

**Courses:** PY17

**Prerequisites:** PYN035

**Credit points:** 12

**Campus offered:** CA                      **Semester:** 2

### ► PYN037 SUPERVISED PRACTICUM 3

This core unit of the Master of Counselling Psychology course is intended to expose students to further in-depth experience of counselling psychology by focusing on placements.

**Courses:** PY17

**Prerequisites:** PYN036

**Credit points:** 12

**Campus offered:** CA                      **Semester:** 1

### ► PYN038 SUPERVISED PRACTICUM 4

This core unit of the Master of Counselling Psychology course is intended to expose students to further in-depth experience of counselling psychology by focusing on placements.

**Courses:** PY17

**Prerequisites:** PYN037

**Credit points:** 12

**Campus offered:** CA                      **Semester:** 2

### ► PYP301 HYPNOSIS: PROCESSES AND TECHNIQUES

Students are instructed how to apply the general techniques and processes to health practices in general, learn about ethics and problems that may arise in normal practice and how to ensure high standards of client care with both children and adults. The use of music in hypnosis-appropriate group inductions, ego-strengthening and direct suggestion, the role of hypnosis in psychosomatic medicine. Topics include: anxiety treatment, pain management, habit control, malleability of memory, smoking cessation, treating depression, help with eating disorders, stress management and self-hypnosis.

**Courses:** PY30, PY32

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

### ► PYP304 FOUNDATIONS OF EFFECTIVE CLINICAL RESEARCH IN HYPNOSIS

Describes the theories and models of hypnosis in the textbooks; demonstrates an understanding of various hypnotic phenomena; and describes ways in which hypnotic test scales can be utilised in research.

**Courses:** PY30

**Contact hours:** 3 per week    **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

### ► PYP306 DISSERTATION: CLINICAL RESEARCH REVIEW 1-3

PYP306/1: Designs the plan of the literature review within a specialised area and conducts an

## UNIT SYNOPSES

initial survey of the literature on an approved topic. PYP306/2: Develops the literature review by widening the breadth and depth of the searches and refining the earlier hypotheses and producing a draft of the review. PYP306/3: Students complete the review and write the final document under the direction of the supervisor.

**Courses:** PY30

**Contact hours:** 1 per week      **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1, 2

► **PYP307 CLINICAL CASE SUPERVISION (GROUP AND INDIVIDUAL)**

Develops effective and creative applications of the hypnotic techniques within the areas of clinical speciality of the students participating.

**Courses:** PY30, PY32

**Contact hours:** 2 per week      **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

► **PYP308 CLINICAL HYPNOSIS; FOUNDATIONS IN THEORY AND PRACTICE**

This unit develops the student's knowledge concerning the nature of hypnosis and its phenomena, its theoretical basis and the ethical and legal considerations that must be taken into account within a clinical practice in hypnosis.

**Courses:** PY30, PY32

**Contact hours:** 3 per week      **Credit Points:** 12  
**Incompatible with:** PYP300

**Campus offered:** CA                      **Semester:** 1

► **PYP401 INTRODUCTION TO ROAD SAFETY**

This unit will introduce the key principles and practices in road safety. Special emphasis will be given to the broad context of road use/transport in society and the economic and social implications of road crashes. It will introduce the basics of information retrieval, road crash analysis and interpretation, and the strategic development of road safety countermeasures.

**Courses:** PY40, PY41

**Contact hours:** 3 per week      **Semester:** 1  
**Campus offered:** CA

► **PYP402 TRAFFIC PSYCHOLOGY AND BEHAVIOUR**

This unit will review the wide range of factors that influence the behaviour of road users, particularly those that contribute to the incidence of road crashes or exacerbate their severity. It will consider all types of road users, including motor vehicle drivers and passengers, motorcycle riders, cyclists and pedestrians. A range of theoretical models will be examined which have been used to explain the behaviour of road users.

**Courses:** PY40, PY41

**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 1

► **PYP404 APPLYING TRAFFIC PSYCHOLOGY**

This unit will review the various strategies and programs designed to modify road user behaviour. Effective and ineffective approaches will be compared, in order to identify the key characteristics of successful programs. While this is a stand-alone unit, it extends many of the theoretical and practical issues covered in PYP402 - Understanding Road User Behaviour.

**Courses:** PY40, PY41

**Contact hours:** 3 per week      **Credit points:** 12  
**Campus offered:** CA                      **Semester:** 2

► **PYP406 ROAD SAFETY THEORY TO PRACTICE**

This unit will be undertaken in the latter half of both the Graduate Certificate and Graduate Diploma courses and will draw together the various themes developed during the program. It is designed to provide students with an opportunity to study and respond to an existing or emerging road safety problem. The student will be required to draw on the knowledge and skills they have developed to investigate and recommend solutions to the problem. As far as possible, the unit will be designed to reflect the way road safety problems are approached and managed by road safety agencies.

**Courses:** PY40, PY41

**Prerequisites:** PYP401

**Contact hours:** 12 per semester, plus weekly contact with the Unit Coordinator

**Credit points:** 12

**Semester:** 1

► **PYP407 INDEPENDENT STUDY**

This unit will enable students to undertake an independent study based in their places of work. Individual supervision and objective feedback on the experience will be an important component of the learning experience.

**Courses:** PY41

**Prerequisites:** PYP401

**Contact hours:** Weekly contact with Supervisor

**Credit points:** 12

**Campus offered:** CA                      **Semester:** 1, 2

► **QCD110 COMMUNICATION FOR BUSINESS 1**

Focuses on the macro-skills of listening, reading, writing and speaking; establishes techniques for extending vocabulary; uses spoken and written texts of an academic nature to summarise, analyse, make inferences and recognise key concepts; incorporates strategies for effective group participation in a cross-cultural context; helps students learn techniques for writing successfully in genres appropriate to their field of study.

**Courses:** BS40, IF06, QC03

**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCD120 COMMUNICATION FOR INFORMATION TECHNOLOGY 1**

Focuses on the macro-skills of listening, reading, writing and speaking; establishes techniques for extending vocabulary; uses spoken and written texts of an academic nature to summarise, analyse, make inferences and recognise key concepts; incorporates strategies for effective group participation in a cross-cultural context; helps students learn techniques for writing successfully in genres appropriate to their field of study.

**Courses:** IT10, QC03

**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCD210 COMMUNICATION FOR BUSINESS 2**

Further explores vocabulary and grammar and generic structure to develop skills of speaking and writing in context of Field, Tenor and Mode. Effective speaking skills are developed according to academic presentation requirements. Skills for coherent and well-structured writing are also extended to enable efficient essay writing and the refinement of exam techniques. Language and structure appropriate to commercial, technical and academic communication are developed in support of business subjects. Communication for Business 2 language learning tasks are parallel with content material from these units.

**Courses:** BS40, IF06, QC03

**Prerequisites:** QCD110 or IELTS 6.5 or approved equivalent

**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCD220 COMMUNICATION FOR INFORMATION TECHNOLOGY 2**

Further explores vocabulary and grammar and generic structure to develop skills of speaking and writing in the context of Field, Tenor and Mode. Effective speaking skills are developed according to academic presentation requirements. Skills for coherent and well-structured writing are extended to enable efficient essay writing and the refinement of exam techniques. Language and structure appropriate to commercial, technical and academic communication are developed in support of technology subjects. Communication for Information Technology 2 language learning tasks are parallel with content material from these units.

**Courses:** IT10, QC03

**Prerequisites:** QCD120 or IELTS 6.5 or approved equivalent

**Contact hours:** 4 per week      **Credit points:** 12  
**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCE001 GENERAL ENGLISH (FULL-TIME)**

General English offers English language and study skills for students preparing for entry into

English for Academic Purposes, Foundation and Diploma courses and QUT undergraduate and postgraduate award programs. Courses are offered at all levels from elementary to advanced.

**Courses:** QC20, QC21

**Contact hours:** 25 per week **Credit points:** 16  
per 5 week module

**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCE002 GENERAL ENGLISH (PART-TIME)**

General English offers English language and study skills for students preparing for entry into English for Academic Purposes, Foundation and Diploma courses and QUT undergraduate and postgraduate award programs. Courses are offered at all levels from elementary to advanced. Study in this unit is only granted upon special arrangement.

**Courses:** QC20, QC21

**Contact hours:** 12.5 per week

**Credit points:** 8 per 5 week module

**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCE003 ENGLISH FOR ACADEMIC PURPOSES FOR DIRECT ENTRY TO QUT**

The major aim of the English for Academic Purposes course is to assist international students to upgrade their English proficiency level and to meet university entry requirements. This course is designed to prepare students for independent study and to familiarise them with an Australian academic setting in terms of study techniques and student/lecturer relations and expectations.

**Courses:** QC10

**Contact hours:** 25 per week      **Credit points:** 48  
**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCE004 ENGLISH FOR ACADEMIC PURPOSES FOR QUTIC COURSES**

The major aim of the English for Academic Purposes course is to assist international students to upgrade their English proficiency level and to meet university entry requirements. This course is designed to prepare students for independent study and to familiarise them with an Australian academic setting in terms of study techniques and student/lecturer relations and expectations.

**Courses:** QC10

**Contact hours:** 25 per week      **Credit points:** 48  
**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCF111 TERTIARY PREPARATION STUDIES 1**

Introduces students to the study and learning skills required in an Australian university while gaining an understanding of the Australian culture and society; Australia's Indigenous People, a brief review of Australian history; the family and multiculturalism; using the computer to gather information and communicate in an academic environment, assignment presentation, study skills and examination techniques.

**Courses:** QC02

**Contact hours:** 6 per week      **Credit points:** 12  
**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCF112 COMMUNICATION 1**

Designed to help students communicate successfully in a variety of situations; the fundamentals of both oral and written communications set within the context of a number of academic situations; oral communication; effective listening skills; knowledge of how to conduct a seminar; the gathering of information from a variety of sources and its organisation for specific purposes; the various writing genres and the correct use of conventions in the English language.

**Courses:** QC02

**Contact hours:** 6 per week      **Credit points:** 12  
**Campus offered:** KG                      **Semester:** 1, 2, 3

► **QCF113 COMMUNICATION EXTENSION**

Provides English language support for students who are not able to reach their full potential in their other subjects because of their lack of English language proficiency; grammar workshops and individual sessions where students can have support for assignment planning and editing, practising presentations and general assistance with any language problems. Note: Students are

## UNIT SYNOPSES

tested to establish if they are required to take this unit.

**Courses:** QC02

**Contact hours:** 2 per week    **Credit points:** Nil  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF120 ACCOUNTING 1

Introduces the essential concepts of debit and credit; processing of financial transactions via journals and ledger through to trial balance for a sole-trading enterprise; end of accounting period adjustments and final reports, specifically preparation of Profit and Loss statements and Balance Sheets and accounting controls over cash.

**Courses:** QC01, QC02

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF121 ECONOMICS 1

Introduces students to major economic issues; the basics of economic literacy necessary for future tertiary studies; a working knowledge of the global economy; an understanding of economic problems with particular reference to Australia; the main economic systems; the purpose of a five-sector model and the functions and characteristics of each sector.

**Courses:** QC01, QC02

**Contact hours:** 4 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF122 ORGANISATIONS AND MANAGEMENT

Provides students with an appreciation of what it is like to be part of an organisation, recognising that they play a major role in all aspects of our lives. Increasingly we are in an international environment where the emphasis is on the use of information, the ability to learn and innovate, and to handle change. The unit focuses on the skills and the understanding of concepts that are needed in all areas of organisational life and which contribute to job and life satisfaction.

**Courses:** QC01, QC02

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF150 MATHEMATICS

Focuses on basic algebra; equations (including simultaneous equations); functions (including polynomials, exponential, logarithmic) and their graphs; growth and decay; introduction to trigonometry; introduction to matrices; factorisation; analytical geometry; averages; dispersion; probability.

**Courses:** QC01, QC02

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF153 PHYSICAL SCIENCES 1

Introduces students to scientific study and research processes and the basic principles underlying physics and chemistry; heat and temperature; geometric properties of light; reflection and refraction; diffraction and interference; introduction to electricity and magnetism; the atom; chemical periodicity; chemical names and formulas; chemical bonding; chemical quantities; chemical reactions - stoichiometry; thermochemistry; the behaviour of gases; water and aqueous systems - properties of solutions.

**Courses:** QC01, QC02

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF210 APPLIED PSYCHOLOGY

Introduces students experientially to the scientific study of human behaviour and mental activity. Topics include people, the world around us and building relationships; memory, cognition and intelligence; learning approaches; personality; vocational behaviour; stress; abnormal behaviour; motivation and emotion; working in groups and social influences.

**Courses:** QC01, QC02

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF211 TERTIARY PREPARATION STUDIES 2

Develops the skills initiated in Tertiary Preparation Studies 1; Australian government and law; foreign policy; oral presentations and preparation and presentation of a report

**Courses:** QC01, QC02

**Prerequisites:** QCF111 or equivalent studies

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF212 COMMUNICATION 2

Promotes clear and concise writing in particular genres (essays, assignments and reports) pertinent to undergraduate study; mastery of basic primary and secondary research skills related to assignment tasks; effective oral communication in seminar presentations and tutorial discussion; effective listening in lecture situations and answering exam questions with an awareness of relevance and time management.

**Courses:** QC01, QC02

**Prerequisites:** QCF112 or equivalent studies  
**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF220 ACCOUNTING 2

Examines various accounting sub-systems such as 10-column worksheets, control accounts and subsidiary ledgers; inventory and fixed asset systems; accounting for credit transactions; budgeting; cash flow and financial analysis techniques useful for management.

**Courses:** QC01, QC02

**Prerequisites:** QCF120 or equivalent studies  
**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF221 ECONOMICS 2

Introduces students to the study of macroeconomics. Topics include the five-sector model, the trade cycle, inflation and unemployment, government policy and the external sector.

**Courses:** QC01, QC02

**Prerequisites:** QCF121 or equivalent studies  
**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF230 INFORMATION PROCESSING

Introduces students to a range of problem-solving techniques and shows how these can be used to solve various problems using an object-oriented programming language; the foundation of relational databases in terms of storing, altering and retrieving information, using SQL for its implementation; a basis for the specification and implementation of information systems using relational algebra.

**Courses:** QC01, QC02

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF240 LEGAL STUDIES

Introduces students to the Australian legal system through an examination of the meaning of law, the role of the courts and parliament, the importance of judicial precedent and alternative methods of dispute settlement; the fundamental elements of the law of torts including negligence, defamation, nuisance, assault and battery and trespass to land; the law of contract, including the formation of a contract, the factors that may affect the validity of a contract and the circumstances leading to the discharge of a contract; and an exploration of the theoretical basis of criminal law and an investigation of its operation in practice

**Courses:** QC01, QC02

**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 2

### ► QCF250 MATHEMATICS B

Focuses on rate of change; the derivative; stationary points; curve sketching; optimisation; integration; probability distribution; the binomial distribution; normal distribution; hypothesis testing; simple interest; compound interest; present and future values; annuities; amortisation of debts; sinking funds; budgeting; t tests; regression analysis and correlation.

**Courses:** QC01, QC02

**Prerequisites:** QCF150 or equivalent studies  
**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF251 MATHEMATICS C

Focuses on rate of change; the derivative; stationary points; curve sketching; optimisation; integration; probability distribution; the binomial distribution; normal distribution; hypothesis testing; trigonometry including trigonometrical ratios and circles; Pythagorean identities; periodic

functions, applications of integration; advanced topics in differential and integral calculus, error and approximation.

**Courses:** QC01, QC02

**Prerequisites:** QCF150 or equivalent studies  
**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCF252 LIFE SCIENCE

Examines the themes of life, macromolecules, metabolism, cell structure, cell processes, biological diversity, plant and animal physiology. Emphasises practical skills both in the laboratory and in the field.

**Courses:** QC01, QC02

**Prerequisites:** QCF153 or equivalent studies  
**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 2

### ► QCF253 PHYSICAL SCIENCES 2

Prepares students for tertiary studies in the applied sciences and provides a solid foundation in basic chemistry, physics and experimental techniques; acids - bases - neutralisation; oxidation reduction reactions - electrochemistry; reaction rates and chemical equilibrium; introduction of organic chemistry; physical quantities, units, vectors/scalars; kinematics, graphical analysis of motion; vector addition and subtraction; force, mass, weight; Newton's three laws; circular motion; gravitational force, work, energy; power; momentum, force impulse, collisions; angular quantities, kinematic equations for rotational motion; simple harmonic motion.

**Courses:** QC01, QC02

**Prerequisites:** QCF153 or equivalent studies  
**Contact hours:** 5 per week    **Credit points:** 12  
**Campus offered:** KG            **Semester:** 1, 2, 3

### ► QCS211 ACADEMIC COMMUNICATION

Designed to develop the English communication skills of international students who intend to pursue tertiary studies in Australia. The skills learnt in this subject area are of vital importance in an academic context. Students will be advised first of all on effective thinking, listening and note-taking strategies. The unit objectives include the promotion of efficient reading methods and clear and concise writing in the conventional genres relevant to undergraduate and postgraduate study. Students will be expected to master basic primary and secondary research skills related to assignment tasks. Students will also be encouraged to develop speaking proficiency in tutorial discussion, oral presentation and seminar management. Under Review

**Courses:** QC03

**Contact hours:** 6 per week    **Semester:** 1, 2  
**Campus offered:** KG

### ► QCS212 TERTIARY STUDY SKILLS

Introduces international students to the expectations and demands of the education system in which they will continue their university studies. A thematic study of Australian culture and society will allow students to develop reading skills, written and oral presentation skills and effective research skills. Under Review

**Courses:** QC03

**Contact hours:** 4 per week    **Semester:** 1, 2  
**Campus offered:** KG

### ► QCS213 COMMUNICATION EXTENSION

Although not a compulsory subject the unit is designed as an English language support for students who are not able to reach their full potential in their other subjects because of their lack of English language proficiency. It consists of two main areas: grammar workshops and individual sessions where students can have support for assignment planning and editing, practising presentations and general assistance with any language problems. Under Review

**Courses:** QC03

**Contact hours:** 2 per week (Weeks 1-7 only)  
**Campus offered:** KG            **Semester:** 1, 2

### ► QCS230 COMPUTING

Designed to give international students the computing ability to function in tertiary studies in Australia. The unit covers access to the QUT network, Microsoft Windows, email, Internet,

## UNIT SYNOPSES

word processing and presentation, and the use of technology for research. \*Under Review

**Courses:** QC03

**Contact hours:** 4 per week

**Campus offered:** KG

**Semester:** 1, 2

### ► SCB222 EXPLORATION OF THE UNIVERSE

Introduction to optical observational astronomy; instrumentation; celestial sphere and astronomical coordinates, observations of constellations, stars, planets, clusters and other interesting celestial objects. Theory: optics of telescopes, properties of light, determination of physical properties of stars, nebulae, stellar spectra and classification, historical models of the solar system, Kepler's law, gravitation, physical geology of the planets and formation of the solar system, phenomena of astronomical origin, brief introduction to stars and galaxies. Practical exercises and field trips.

**Courses:** ED50, IF71, SC01

**Contact hours:** 5 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► SCB301 SCIENCE FOR DEAN'S SCHOLARS

The content of this unit is offered through a series of approximately six modules, of which students are required to complete three. The range of modules, together with the selection required, ensures that students have a broad foundation for advanced studies. The modules offered include Life Sciences, Chemistry, Physics, Mathematics, Statistics and Environmental Science.

**Courses:** SC01 (Dean's Scholars Accelerated Honours Program)

**Prerequisites:** At least three of the Senior subjects Biological Science, Chemistry, Earth Science, Mathematics B, Mathematics C, or Physics with at least 3 x (4 VHA)

**Contact hours:** 20 per week (for five weeks)

**Credit points:** 24

**Campus offered:** GP

**Semester:** 3

### ► SCB303 TUTORIAL PROGRAM FOR DEAN'S SCHOLARS

The content of this unit is designed in a consultative process involving the student, the academic mentor, and the Dean. The unit aims to allow the study of topics and concepts in science that will support the student's progress in initial studies in advanced level units.

**Courses:** SC01 (Dean's Scholars Accelerated Honours Program)

**Prerequisites:** SCB301

**Credit points:** 12

**Campus offered:** GP

**Semester:** 1

### ► SCB401 RESEARCH METHODS FOR DEAN'S SCHOLARS

Literature review; experimental design; research proposal formulation and writing; presentation of a research proposal.

**Courses:** SC01 (Dean's Scholars Accelerated Honours Program)

**Prerequisites:** Either (a) SCB301 and SCB303, or (b) completion of at least 8 units in the SC01 program, including at least 3 Faculty core units from List A and at least 3 from List B, with a GPA of at least 6.5

**Contact hours:** Arranged by academic mentor

**Credit points:** 12

**Campus offered:** GP

**Semester:** 2

### ► SCB402 EARTH RESOURCES MANAGEMENT

Appreciation of earth resources, their distribution and uses; societal and environmental impacts on future alternatives; economic mineral resources; energy sources; water and soil resources; realities and limits of earth resources; resource management; conservation versus exploration; waste disposal; environmental pollution; future technological developments and their possible effects on earth resources. Management in applied geology; professionalism and ethics together with an introduction to civil and mining law. Mining acts and miner's rights; licensing procedures for prospecting search and exploration; mining leases on crown lands and mining on private land; the enforcement of mining interest; petroleum legislation in Australia; company structure; joint ventures; practical work involves applica-

tions for exploration licences; claims and leases. A field trip may be included.

**Courses:** ED50, IF39, IF71, SC01

**Contact hours:** 4 per week **Credit points:** 12

**Campus offered:** GP

**Semester:** 1, 2

### ► SCB501 RESEARCH PROJECT FOR DEAN'S SCHOLARS

Individually tailored research project carried out under the supervision of a research mentor.

**Courses:** SC01 (Dean's Scholars Accelerated Honours Program)

**Prerequisites:** SCB401

**Contact hours:** (Individual research project)

**Credit points:** 24

**Campus offered:** GP

**Semester:** 1, 2

### ► SPB001 HUMAN DEVELOPMENT AND EDUCATION

Life span development for students interested in early childhood, primary or secondary. Theoretical perspectives on human development; cognitive, language, moral and social-emotional development; understanding differences in learners: the impact of ethnicity and culture on human development, exceptional development, and the concept of inclusive education.

**Courses:** ED43, ED50, ED51, ED52, ED55, ED56, ED57, IF70-79, IF81, IF82, IF83, IF84

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB002 PSYCHOLOGY OF LEARNING AND TEACHING

Theories of learning, metacognition, motivation, problem-solving, thinking and creativity. Intelligence and thinking styles. Psychological dimensions of assessment. Creating optimum environments for learning. Teaching and learning implications of ethnicity and culture. Teaching to difference in a context of inclusive education.

**Courses:** ED26, ED50, ED51, ED52, ED53, ED55, ED56, ED57, IF70-79, IF81, IF82, IF83, IF84

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB003 TEACHING CHILDREN WITH LOW INCIDENCE DISABILITIES AND HEALTH PROBLEMS

Introduction to a wide range of low incidence exceptionalities (for example sensory impairments, developmental delay and health impairments such as epilepsy, asthma and hepatitis, and so on); methods of managing associated disabling conditions; implementation and evaluation of programming; support and referral services.

**Courses:** ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Prerequisites:** SPB001, SPB002

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB004 TEACHING EXCEPTIONAL STUDENTS

Integrates a basic understanding and application of learning theory as it applies to exceptional populations. Focuses on approaches to teaching particular exceptional groups. Provides an opportunity for development of specialist skills and resources in one of the following areas: (a) students with learning difficulties; (b) gifted students; (c) students with low incidence disabilities, for example hearing impaired, visually impaired or physically handicapped; (d) behaviourally or emotionally disturbed students.

**Courses:** ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB006 EDUCATIONAL COUNSELLING

The nature of counselling/helping in educational contexts; the educator as counsellor; characteristics of effective helpers, practical development of communications skills, building an empathic relationship; structuring the counselling process; application of some counselling theories to the educational contexts; practical sessions using educationally based role plays to demonstrate effective use of the skills learned. Compulsory study school for external students. Incompatible with studies in Counselling or equivalent at Diploma of Teaching level.

**Courses:** ED13, ED26, ED43, ED50, ED51, ED52, ED54, ED55, ED61, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB007 HUMAN SEXUALITY AND LEARNING

Key topics in sexual behaviour and learning such as heterosexual and homosexual sexuality across the life span, contraception, abortion, STDs, child sexual abuse, sexual assault, pornography. Implications for school, community, and health-care workers and educators, with emphasis on the former.

**Courses:** ED26, ED43, ED50, ED51, ED52, ED54, ED55, IF70-79, NS40, NS48

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB008 THE MIDDLE YEARS OF SCHOOLING

Provides an understanding of the developmental needs and interests of young adolescents and reform initiatives being implemented by schools to address these issues. The unit analyses the work of agencies and major reports in the middle years of schooling and examines aspects of research focussing on reform in curriculum, pedagogy and the way schools are organised. The unit is one of four units forming a pathway into the middle years of schooling for primary and secondary teaching.

**Courses:** ED26, ED50, ED51, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB009 RESEARCH METHODS IN EDUCATION

Development of an awareness and understanding of the research process for a historical, sociocultural, ethical and theoretical perspective; the validity, applicability and suitability of various research strategies for specific educational endeavours; comprehension and evaluation of research findings drawn from a variety of perspectives, paradigms and methodologies; development of skills to conduct research appropriate to answer questions.

**Courses:** ED23, ED26, ED28, ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB010 EDUCATION LAW AND THE BEGINNING TEACHER

Legal literacy; sources of education law; students- and rights; students- law and schools; parents law and education; teachers- rights and obligations; teachers and school-based accidents; educational malpractice.

**Courses:** ED26, ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB011 LEARNING/TEACHING ENVIRONMENTS

The environmental context for learning/teaching; the range of learning environments in education; how people interact in different learning environments; the design of learning experiences for people in non-formal learning contexts.

**Courses:** ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB012 CLASSROOM AND BEHAVIOUR MANAGEMENT

Reviews and extends knowledge about managing learners to meet their needs in purposive and responsive learning environments. A reflective and research oriented evaluation of topics is encouraged, including managerial, environmental and educational conceptions of developing positive relations, teaching for motivation, and contemporary models, structures and frameworks for decision-making, relating to co-operative learning environments.

**Courses:** ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

### ► SPB013 PROGRESSIVE STRATEGIES FOR GENERAL AND VOCATIONAL EDUCATION

The interface between general and vocational education is an issue faced by teachers in all educational systems as schools adopt and present programs in areas which were formerly the domain of TAFE. Familiarity with developments such as the competencies movements and competency based assessment, National Standards and Frameworks, are but a few of the recent edu-

## UNIT SYNOPSES

cational developments impinging on the profession of teaching. This unit promotes understanding of the principles of convergence, and the meaning and interpretation of competence in practice from both a national and international perspective. Strategies which enable students to plan, implement and assess work programs in a manner consistent with contemporary educational thought are explored.

**Courses:** ED26, ED50, ED54, ED55, IF70-79  
**Contact hours:** 3 per week **Credit points:** 12

► **SPB014 ADVANCED SKILLS OF EFFECTIVE LEARNING AND TEACHING**

The Queensland Education Departments corporate plan focuses on teachers having skills and attitudes to teach in a socially just framework and to facilitate effective learning and teaching. This unit develops understandings of the Principles for Effective Learning and Teaching and develops strategies which facilitate socially just teaching which is consonant with such principles and, at the same time, encourage lifelong teacher learning.

**Courses:** ED50

**Contact hours:** 3 per week **Credit points:** 12

► **SPB015 GETTING IT ALL TOGETHER: TEACHERS- PROFESSIONAL WORK IN THE DIFFERING CONTEXTS OF THE PRIMARY CLASSROOM**

Designed to address the multidimensional, diverse and complex nature of teachers professional work in the primary classroom with a view to developing in graduating teachers an holistic, comprehensive and critical approach to the curriculum dilemmas that permeate their work.

**Courses:** ED51

**Contact hours:** 3 per week **Credit points:** 12

► **SPB016 TEACHERS AND THE CURRICULUM**

Development of concepts and strategies essential to the processes of school-based curriculum development and the design, implementation and evaluation of relevant school programs; the significance of curriculum in the broader sense to a spectrum of individual professional teaching perspectives.

**Courses:** ED26, ED50, ED51, ED53, ED55, ED61, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

► **SPB017 CLASSROOM MANAGEMENT: MODELS AND PRACTICE**

Practical and research-based approaches to classroom management and discipline for teachers. Includes techniques that motivate pupils in daily teaching, rule development, teaching for responsibility, dealing with parents and communication and settings for on-task behaviour and meeting student needs.

**Courses:** ED26, ED43, ED50-55, ED61, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

► **SPB018 TEACHING STRATEGIES**

Evaluation of the students teaching strategies; the literature on teaching strategies; critical evaluation of strategies/models of teaching available.

**Courses:** ED26, ED50-52, ED54, ED55, ED61, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

► **SPB019 INTRODUCTION TO EDUCATIONAL ADMINISTRATION**

Introduction to educational administration with particular reference to the theory and practice of work roles, motivation, leadership, decision making, change, conflict, needs assessment and presentation of written reports for various educational settings.

**Courses:** ED26, ED43, ED50, ED51, ED52, ED54, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

► **SPB020 CLASSROOM ASSESSMENT PRACTICES**

Examination of nature and purpose of assessment; traditional and contemporary developments in the assessment of students in a range of settings; test construction and validation; record keeping and reporting, with emphasis on practical applications by practising teachers.

**Courses:** ED26, ED43, ED50-55, ED61, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

► **SPB022 THE MIDDLE YEARS CURRICULUM**

This unit will enable students to gain an appreciation of the middle school movement and how this has the potential to impact on the needs and interests of young adolescents. The focus is on a more integrated approach to curriculum, teaching strategies appropriate to middle schools and authentic assessment.

**Courses:** ED26, ED50, ED51, ED55, IF70-79

**Contact hours:** 3 per week **Credit points:** 12

► **SPB023 ADULT LEARNING AND DEVELOPMENT**

The psychological foundations of human learning and development with special emphasis on adults. Contemporary theories and research issues such as cognition and learning, the effect of motivation on learning, understanding group dynamics, self/identity development, and creating effective learning environments will be explored.

**Courses:** ED54, ED26

**Contact hours:** 3 per week **Credit points:** 12

► **SPB024 ACQUISITION AND ADAPTABILITY OF WORKPLACE KNOWLEDGE AND SKILLS**

Explores the underlying theoretical constructs which may enhance the acquisition of knowledge and skills. In accord with the National Training Reform Agenda, issues such as multiskilling, contextualised learning, intervention to accelerate performance, and transfer of knowledge and skill are addressed.

**Courses:** ED54

**Contact hours:** 3 per week **Credit points:** 12

► **SPB025 THE INDIVIDUAL IN ADULT AND WORKPLACE EDUCATION**

Tailoring instruction to the needs and strengths of individuals and acquiring confidence in planning, organising and implementing learning experiences. The focus ranges from setting up initial meetings to creating responsive positive learning environments and evaluating outcomes in terms of individual learners.

**Courses:** ED54, ED26

**Contact hours:** 3 per week **Credit points:** 12

► **SPB026 ADULT EDUCATION IN THE WORKPLACE AND COMMUNITY**

The nature of all common forms of adult education, with particular emphasis on workplace and community settings; analyses key concepts and views of leading adult educators, and relates them to current attempts in Australia to provide effective forms of post-compulsory education and training.

**Courses:** ED54, ED26, ED61

**Contact hours:** 3 per week **Credit points:** 12

► **SPB027 ORIENTATION TO ADULT AND WORKPLACE PROGRAMS**

Basic concepts in curriculum and curriculum processes for contemporary adult, workplace and community education. The nature of programs; investigating needs, competencies and outcomes; planning learning opportunities; participant assessment and program evaluation.

**Courses:** ED54, ED26, ED61

**Contact hours:** 3 per week **Credit points:** 12

► **SPB028 THE GROUP IN ADULT AND WORKPLACE EDUCATION**

Introduction to the theory relating to groups and explores processes which occur in adult groups. Participants deal with practical applications for educational settings, with special emphasis on developing facilitating skills.

**Courses:** ED54, ED26, ED61

**Contact hours:** 3 per week **Credit points:** 12

► **SPB029 INSTRUCTIONAL STRATEGIES FOR ADULT AND WORKPLACE EDUCATORS**

Exploration of theories and practices related to effective instructional strategies in diverse settings; introduction to skills and concepts required by competent practitioners in formal and non-formal teaching and learning settings within workplaces and communities.

**Courses:** ED54, ED26, ED61

**Corequisites:** SPB027

**Contact hours:** 3 per week **Credit points:** 12

► **SPB030 PROGRAMMING IN ADULT AND WORKPLACE EDUCATION**

Important aspects of responsive programming for adult and workplace education. Covers the planning implementation, evaluation and reflection components of program development, design and delivery.

**Courses:** ED54, ED26

**Prerequisites:** SPB029

**Contact hours:** 3 per week **Credit points:** 12

► **SPB031 LAW IN THE ADULT AND WORKPLACE ENVIRONMENT**

Recent legal and legislative developments mean that employers and employees require greater awareness of their legal responsibilities in all workplace environments. This unit provides a level of legal literacy appropriate to sound legal risk management in workplace settings.

**Courses:** ED54

**Contact hours:** 3 per week **Credit points:** 12

► **SPB034 ORGANISATION AND ADMINISTRATION OF ADULT AND WORKPLACE EDUCATION**

Adult and workplace educators are responsible for the effective planning, organisation and management of a broad spectrum of training modules, courses and programs. This unit will assist the adult and workplace educator to explore, analyse and apply strategic planning and HRM processes within diverse organisational contexts. Emphasis will be placed on an understanding of the concepts and theories associated with enhancing learning at work, and human resource management, in order to guide effective practice.

**Courses:** ED54, ED26

**Prerequisites:** SPB026, CLB304

**Contact hours:** 3 per week **Credit points:** 12

► **SPN600 LEARNERS AND TEACHERS IN CONTEXT**

Introduction to course themes of the teacher as researcher and critically reflective practitioner; development of a variety of case study, experiential learning and research methodologies to investigate the nature of the learner and the learning process within a variety of social and cultural contexts; exploration of human development, individual differences, and the factors which can influence effective learning and teaching; the relationship of all of the above to Areas of Specialisation (Early Childhood, Primary, Secondary).

**Courses:** ED17, ED18, ED19

**Contact hours:** 5-6 per week **Credit points:** 24

► **SPN601 TEACHING STUDIES**

Introduces students to contemporary approaches to the curriculum and key learning areas, as well as provides the practical skills and understandings necessary for managing and promoting learning in a wide range of contexts.

**Courses:** ED17, ED18, ED19

**Contact hours:** 3 per week **Credit points:** 12

► **SPN602 PROFESSIONAL TEAMING, CASE AND PROJECT IMPLEMENTATION**

This unit focuses on the transition from pre-service student to qualified professional. The unit will provide an opportunity for refinement of knowledge, skills and understandings gained in previous semesters, and assist students to become independent, collaborative and reflective professionals.

**Courses:** ED17, ED18, ED19

**Contact hours:** 5-6 per week **Credit points:** 24

► **SPN603 INTERDISCIPLINARY PRIMARY CURRICULUM STUDIES**

The unit is designed to consolidate and expand students' developing understandings and capacities associated with classroom teaching, program planning, implementation and evaluation, and student assessment and reporting in specific key learning areas. It will also consolidate their curriculum understandings in the key learning areas with a view to ensuring that holistic, cross curriculum, student responsive planning and teaching will occur as an integral part of each

teacher's professional curriculum work in the primary context.

**Courses:** ED18

**Prerequisites:** SPN601

**Contact hours:** 3 per week **Credit points:** 12

► **SPN604 ISSUES IN CURRENT PROFESSIONAL PRACTICE**

In response to the rapidly changing political, cultural and social contexts within which education generally and schools in particular are operating, teachers need to re-think their roles and responsibilities and re-shape their relationships with students and the community. Major issues emerging include: sustainable social practice in a diverse cultural society, changing school structures such as site-based management, an increasing focus on student learning outcomes and the inter-relationship between curriculum changes and community expectations of schools. This unit contributes to the student's understanding of this changing context by addressing these issues at a theoretical level while challenging students to reflect upon implications of these changing contexts for their teaching practice.

**Courses:** ED17, ED18, ED19

**Contact hours:** 3 per week **Credit Points:** 12

► **SPN605 CHANGE, EVALUATION AND ACCOUNTABILITY IN EDUCATIONAL CONTEXTS**

This unit gives particular attention to the development of understandings and capacities relating to curriculum planning; assessment, evaluation and reporting; accountability; and to the need to be inclusively responsive to the diverse range of student backgrounds, abilities and aspirations. It examines relevant influences within a context of change as a basis for a more informed and critically aware understanding of where teachers and their professional work fit.

**Courses:** ED17, ED18, ED19

**Contact hours:** 3 per week **Credit Points:** 12

► **SPN610 ADVANCED EDUCATIONAL COUNSELLING**

The major theoretical approaches to counselling are applied to problems and concerns arising in the educational context. Theories outlined include Psychoanalytic, Adlerian, Existential, Person-Centred, Gestalt, Transactional Analysis, Behaviour, Rational-Emotive, and Reality. Skills and techniques associated with each major theory will be presented and related to educationally based problems and concerns. The effects and outcomes of counselling interventions will be investigated and ethical issues will be addressed.

**Courses:** ED13, ED11, ED61

**Prerequisites:** SPB006

**Credit points:** 12

► **SPN611 EDUCATIONAL COUNSELLING PROFESSIONAL PRACTICE**

Professional practices of educational counsellors working in the P-12 context; intervention, prevention, affective, and developmental programs discussed; adolescent issues and career counselling outlined; consultation: models, theories and practices; self-management skills highlighted: time management, program evaluation, accountability and decision-making discussed.

**Courses:** ED13, ED11, ED61

**Credit points:** 12

► **SPN612 PSYCHOEDUCATIONAL ASSESSMENT**

Assessment techniques and strategies; assessment of intelligence, academic skills, aptitude, personality; reliability, validity, test construction and standardisation procedures; the process of administering assessment instruments; interpretation of test results and assessment data; using assessment data in programming and placement.

**Courses:** ED13, ED11, ED28

**Credit points:** 12

► **SPN613 LEARNERS WITH SPECIAL NEEDS: PROGRAMMING FOR INCLUSIVE EDUCATION**

Special educational needs of children in early childhood, school (P-12) and post-secondary settings arising from physical, cognitive, behavioural and sociocultural differences; develop-

mental screening; diagnosing student functioning in cognitive, social-emotional, self-help and motor skill areas; programming and curriculum decision making for children with special needs; techniques of formative and summative assessment appropriate to student learning needs; strategies for inclusive education; roles and models of support and advisory personnel including in-service strategies.

**Courses:** ED13, ED11

**Credit points:** 12

► **SPN614 TEACHING STUDENTS WITH LEARNING DIFFICULTIES/DISABILITIES**

Teachers should view students as individuals who require different kinds of support and not as educational failures. Competing models for explaining the aetiology and characteristics of learning/literacy difficulties are evaluated and their educational implications explored. Students who experience difficulties must be given support especially in key areas such as literacy development. Governments are encouraged to offer support on the grounds of equity for individuals as well as long term economic benefits to the community.

**Contact hours:** Block

**Semester:** 2

► **SPN615 EDUCATIONAL INTERVENTION FOR CHALLENGING BEHAVIOUR IN THE CLASSROOM**

Aims to provide theoretical and practical knowledge for regular and special educators working in the area of behaviour management in schools. Preventative behaviour management practices will be addressed for the school and classroom and more specialised skills and strategies that may be utilised with challenging behaviour will be examined.

**Courses:** ED13, ED61, ED11

**Credit points:** 12

► **SPN616 BEHAVIOUR MANAGEMENT: PROGRAMS AND PLANNING**

Present behaviour management interventions for implementation in the supportive school environment. Skills of consultation and negotiation will be developed to enable dissemination to the broader educational community. Severe and aggressive behavioural problems will be investigated and interventions determined. Emphasis will be on the development, implementation, evaluation, and maintenance of appropriate interventions.

**Courses:** ED13, ED61, ED11

**Prerequisites:** SPN617

**Credit points:** 12

► **SPN617 ISSUES IN CLASSROOM MANAGEMENT**

Provides an overview of the domain and research on the various approaches to dealing with the prevention and management of behaviour difficulties in the school setting. These approaches include proposals for change in the structures of the school or education system, curricular strategies and methods of dealing with more difficult emotional or behavioural problems. The main emphasis of this unit however is an analysis of current management theories and the implications of these for school and classroom practice.

**Courses:** ED11, ED13, ED61

**Contact hours:** 3 per week **Credit points:** 12

► **SPN618 CAREER DEVELOPMENT PROGRAMS**

Focus on career planning as a lifelong process, emphasising that education and guidance programs focus on skill development for repeated decision-making throughout the life span. It will explore the complementary relationship between career education and career guidance.

**Courses:** ED13, ED11, ED61

**Contact hours:** 3 per week **Credit points:** 12

► **SPN619 CAREER THEORY**

Focus on a review of the theoretical perspectives that have influenced work in the area of career development. Recent attempts at integrating this diverse body of literature will be presented. Students will be encouraged to develop their own

position on the relevance of career theory to their practice and present their theoretical stance.

**Courses:** ED11, ED13, ED61

**Credit points:** 12

► **SPN620 CAREER COUNSELLING**

Aims to provide theoretical knowledge and practical skills relevant to career counselling which will enable students to effectively assist people to make appropriate career decisions.

**Courses:** ED13, ED61, ED11

**Prerequisites:** SPB006 OR SPN610

**Credit points:** 12

► **SPN621 ADULT AND WORKPLACE EDUCATION: PRINCIPLES AND PRACTICES**

The ethical basis, the contextual basis and the expert knowledge of adult and workplace education are explored through the themes of conceptualisation, teaching adults, change, flexible delivery, assessment and legal risk management. This will provide an extensive basis for further work, including research, in the area.

**Courses:** ED13, ED11

**Contact hours:** 3 per week **Credit points:** 12

► **SPN622 LEGAL RISK MANAGEMENT AND WORKPLACE EDUCATION**

The legal environment facing workplace educators is becoming evermore complex with significant increases in legislation and precedents arising from decisions reached in civil and industrial courts. This unit is based on a perception of workplace educators needing a level of legal literacy sufficient to recognise rights and responsibilities that will enable them, in collaboration with other specialists, to implement appropriate legal risk management strategies.

**Courses:** ED13, ED11

**Credit points:** 12

► **SPN623 STRATEGIC WORKPLACE EDUCATION**

Examines the effect of the organisational market niche and other influences on strategic decision-making in workplace education. In addition, the literature on learning organisations and organisational learning is expanding rapidly and this discourse needs to be examined in the light of its strategic dependence and influence. This unit will be conducted using the self-directed methodology of contract learning.

**Courses:** ED13, ED11, ED61

**Corequisites:** SPN621

**Contact hours:** 3 per week **Credit points:** 12

► **SPN624 FOUNDATIONS OF ADULT LEARNING AND DEVELOPMENT**

Provides students with an opportunity to develop an understanding of the complex nature of the adult learning and development process. This is achieved by exposing students to contemporary theories and strategies in adult learning and development and extending their knowledge to the adult and workplace environment. Key concepts such as the motivation, self-directed learning and knowledge construction are addressed. Special emphasis is placed on transferring the theory to practice.

**Courses:** ED13, ED11, ED61

**Contact hours:** 3 per week **Credit points:** 12

► **SPN625 CHANGING AGENDAS IN LEADERSHIP**

Addresses differing approaches to the study of leadership and management, and the dilemmas of responding to rapidly changing contexts. Issues such as school-based management, quality management, teachers as leaders are raised. The unit aims to enhance an understanding of leadership and provide a broad base for other work in the leadership and management area of interest.

**Courses:** ED13, ED11, ED61

**Credit points:** 12

► **SPN626 LEADING AND MANAGING PEOPLE**

A brief overview of changing views of leadership leads to seven themes of significance for leaders in the new organisation including the learning organisation, multiple leadership, site-based management, globalisation and interna-

## UNIT SYNOPSES

tionalisation, leaders and the law, leadership and equity issues, career management.

**Courses:** ED13, ED11, ED61

**Credit points:** 12

**Incompatible with:** PRN630, PRN631, PRN632

### ► SPN627 POLICY DEVELOPMENT AND ANALYSIS

Concentrates on developing understandings in students regarding leaders of change processes within organisations. Themes covered include the changing nature of organisations, organisational culture, organisational values, ethics and ethical leadership, communication, relationship building, the change process, leading the change process, accountability and organisational improvement.

**Courses:** ED13, ED11, ED61

**Credit points:** 12

**Incompatible with:** PRN609, PRN610

### ► SPN628 LEADERSHIP FOR CHANGE

Commences by orienting students towards key aspects of human resource management in organisations, including an investigation of the nature of work for workers in the post-corporate world and provides a general framework for leading and managing people within this challenging and changing context.

**Courses:** ED13, ED11, ED61

**Credit points:** 12

**Incompatible with:** PRN608

### ► SPN629 CURRENT ISSUES IN LEADERSHIP

Themes considered include the nature of policy, the notion of policy trends or policy agendas, policy analysis, issues of development and implementation, the relationship between policy and long-term social changes.

**Courses:** ED13, ED11, ED61

**Prerequisites:** SPN625

**Credit points:** 12

### ► SPN630 LEARNING, TEACHING AND SUPERVISION

Provides students with an excellent opportunity to develop an advanced understanding of learning and implications for teaching in their context. Students will be introduced to recent research on the nature of learning, meta-learning, epistemological beliefs in such a way that they critique their own practices.

**Courses:** ED11, ED13

**Credit points:** 12

### ► SPN631 LEADING CHANGE IN CONTEMPORARY PROFESSIONAL PRACTICE

Considers a range of contemporary problems and issues in cultures and climates of incessant educational change which impact on the professional practice of educators. These circumstances underline the need for curriculum leadership in professional practice. Problem areas include: managing behaviour in a supportive school environment; promoting inclusion practices; interpreting and implementing educational policy, for example the Whiltshire report; mentoring the beginning teacher; managing stress; implementing effective learning and teaching principles; translating teacher competencies into practice; creating and transforming organisational cultures. The unit provides the opportunity for students to focus on particular professional problems and issues of interest to them and, within the context of relevant literature and the realities of their particular professional situation, develop a change plan for addressing these problems and issues which is transformative and action-oriented.

**Courses:** ED13, ED11

**Credit points:** 12

### ► SPN633 CRITICAL FRAMEWORKS FOR ANALYSING THE MIDDLE YEARS OF SCHOOLING

Contextualises and conceptualises the key issues impacting on young adolescents engaged in the middle years of schooling. Focuses on a critical analysis of the origins and development of 'middle schooling' as concept and practice. Students will develop an understanding of ways in which the 'story' of middle schooling can be told from

different standpoints, and of ways in which the assumptions, principles, aims and practices of middle schooling can be celebrated, endorsed, critiqued and contested. Students should begin to refine their own standpoints in relation to education generally and to the middle-compulsory years of schooling in particular. They could then take those standpoints into their studies of subsequent units, where the standpoints could be unsettled, reworked, refined and applied.

**Courses:** ED11, ED13

**Contact hours:** 3 per week **Credit Points:** 12

### ► SPN634 RETHINKING PROGRAMS AND PEDAGOGIES: THE MIDDLE YEARS OF SCHOOLING

Develop programs and pedagogies in the middle years of schooling. A research orientation that focuses on recent initiatives to make curriculum organisation, programming, teaching and learning, and evaluation more responsive to the developmental needs and interests of young adolescents. The four modules relate to the reform agendas being advocated by the middle years of schooling movement, including integrative curriculum, appropriate pedagogies, responsive programming and evaluation and off-site learning.

**Courses:** ED11, ED13

**Credit points:** 12

### ► SPN635 ASSESSMENT AND REPORTING IN THE MIDDLE YEARS OF SCHOOLING

Focuses on recent initiatives to make assessment, recording and reporting student learning in a middle years context more responsive to the developmental needs and interests of young adolescents while at the same time encouraging educators to critically analyse and research what is espoused to be more flexible, responsive and collaborative assessment and reporting systems.

**Courses:** ED11, ED13

**Credit points:** 12

### ► SPP500 LEARNERS WITH SPECIAL NEEDS

Provides an overview of special educational needs of school (p-12) and TAFE College learners arising from cognitive, behavioural, sociocultural and physical disabilities and differences. The development of effective teaching/learning strategies suited to special educational needs will be a focus of this unit.

**Courses:** ED28, ED61

**Contact hours:** 3 per week **Credit points:** 12

### ► SPP501 CONSULTATION AND COMMUNICATION

Aims to provide theoretical knowledge and practical skills relevant to a consultation and collaboration model of services provided by teachers working in supportive roles within an educational setting. Intra and interpersonal skills will be addressed along with a review of the role and responsibilities of learning support teachers in inclusive settings.

**Courses:** ED28, ED61

**Contact hours:** 3 per week **Credit points:** 12

### ► SPP502 PROGRAMMING FOR STUDENTS WITH LEARNING DIFFICULTIES/DISABILITIES

Review of the research of the impact of learning difficulties/disabilities on learning and in particular on learning literacy. The learning and literacy demands of the curriculum will be reviewed and appropriate methods for programming for students with special learning needs will be addressed. Key issues considered are consultation and collaboration between regular and support teachers.

**Courses:** ED28, ED61

**Contact hours:** 3 per week **Credit points:** 12

### ► SPP503 LITERACY AND LEARNING

Review of significant learning difficulties/disabilities among learners in schools (Years 1-12) and post-secondary education; foundation studies in language and learning; assessment and monitoring of literacy related curriculum tasks; test interpretation and development; related approaches to teaching; informed by principles derived from psycholinguistics, metacognition,

process approaches to literacy and constructivist approaches to learning within an inclusive education framework.

**Courses:** ED28

**Contact hours:** 3 per week **Credit points:** 12

### ► SPP504 CURRICULUM: LEARNERS WITH SPECIAL NEEDS

Introduction to curriculum development and situational/self-analysis; innovative program approaches for learners with special needs; changing ourselves and our educational environments; evaluation of curriculum development; resource teacher support for school-based curriculum development, human relationships education and participation and equity; communication about improved programs.

**Courses:** ED28

**Contact hours:** 3 per week **Credit points:** 12

### ► SPP505 FINANCIAL MANAGEMENT IN EDUCATION SETTINGS

The financial aspect of managing an educational setting; various financial management control problems; the basic accounting principles and skills used in the recording and management of school financial transactions; guidelines for the efficient and effective use of limited school financial resources.

**Courses:** ED23, ED61

**Credit points:** 12

### ► SPP508 HUMAN RESOURCE MANAGEMENT IN EDUCATION

Staff supervision and appraisal; staff development planning, implementation and evaluation; facilitative skills.

**Courses:** ED23, ED61

**Contact hours:** 3 per week **Credit points:** 12
