Credit: Universities UK

Concordat: Five Core Principles of Research Integrity

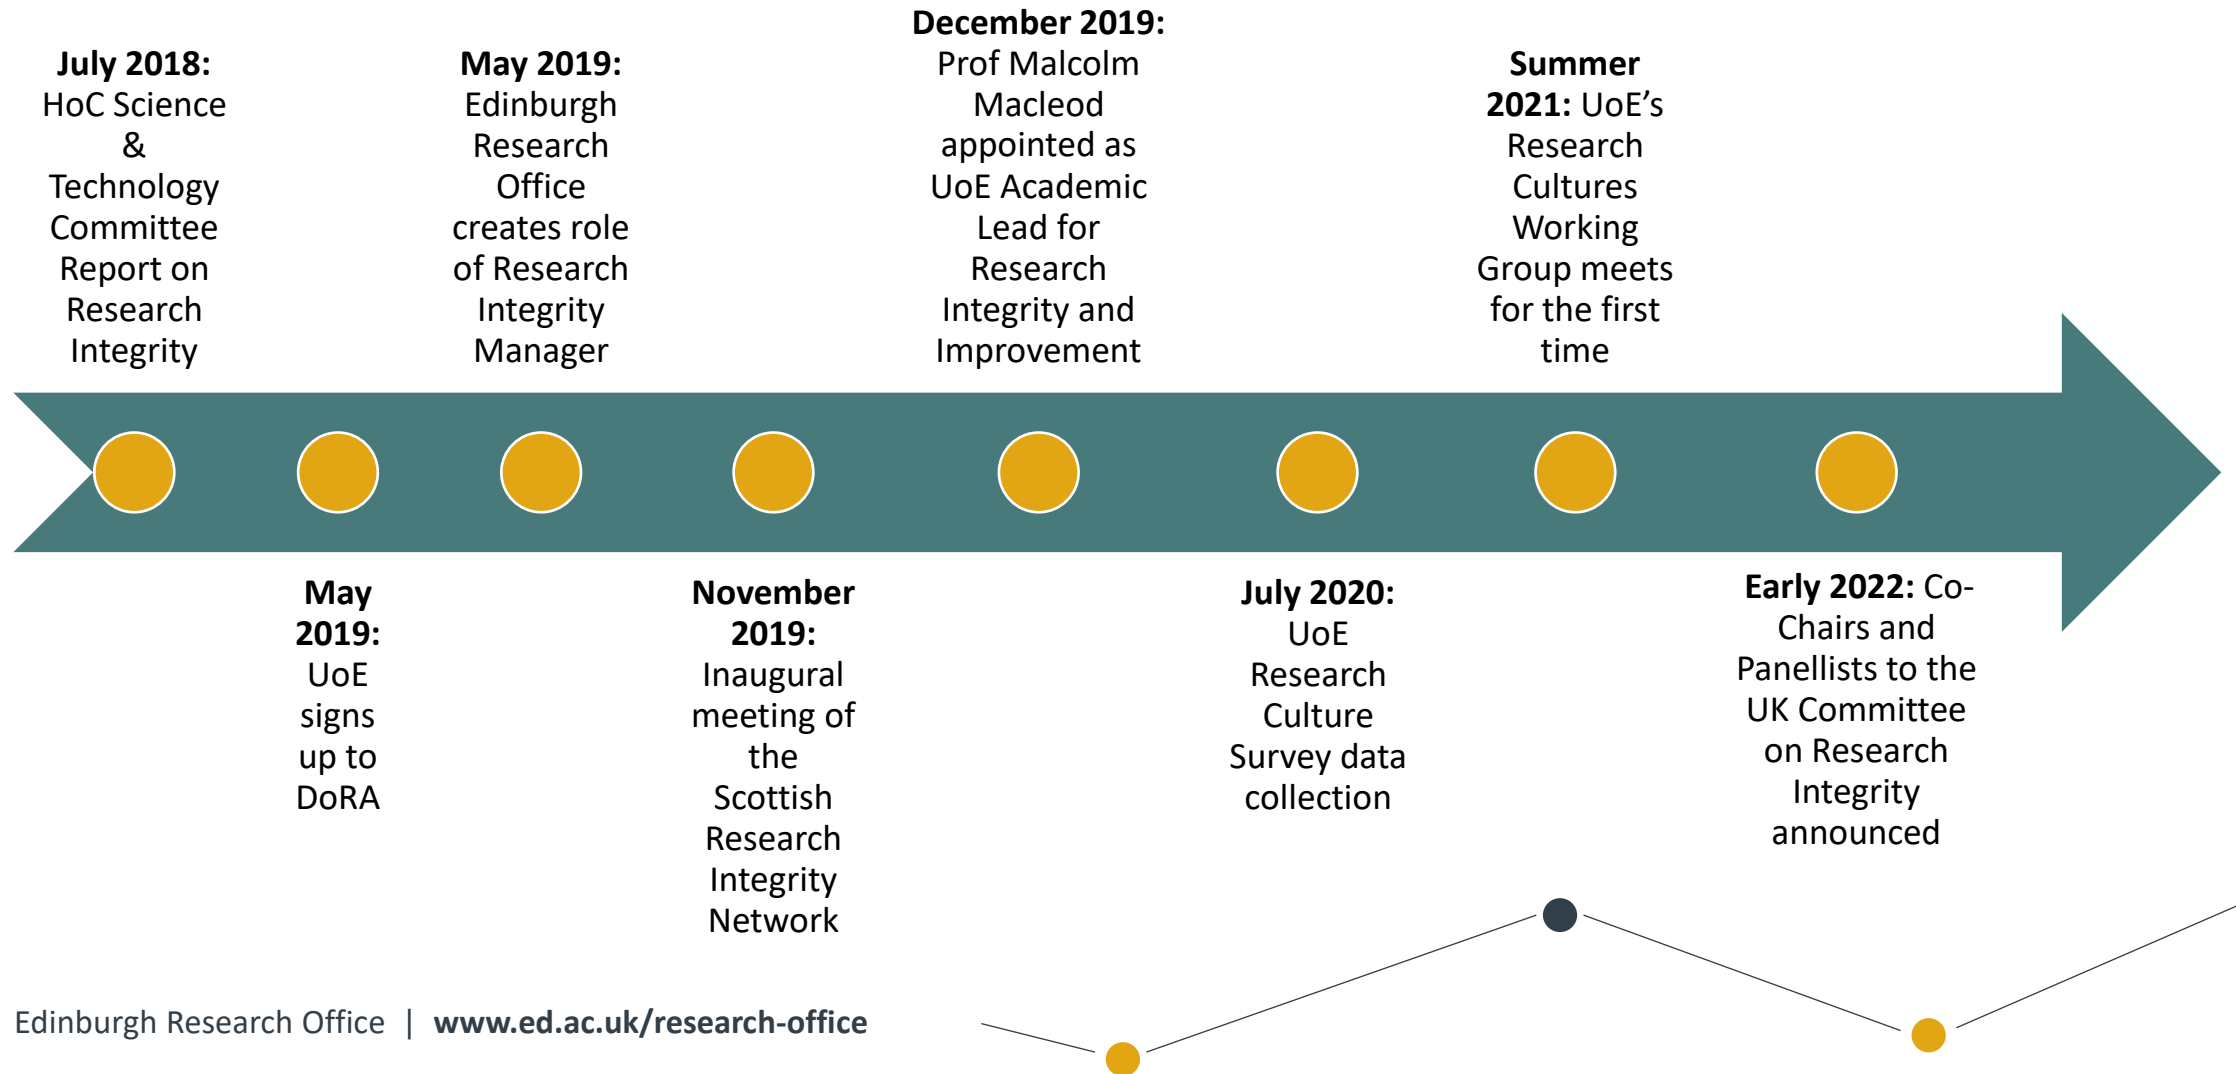

- **Honesty**
- **Rigour**
- **Transparency and Open Communication**
- **Care and Respect** (for all participants in research, and for the subjects, users and beneficiaries of research, including humans, animals, the environment and cultural objects. Respect also for the research record.)
- **Accountability** (of funders, employers and researchers to collectively create a research environment in which individuals and organisations are empowered and enabled to own the research process **and** accountability of individuals and organisations where behaviour falls short of the expected standards.)

Research culture

The University of Edinburgh is committed to promoting and developing a vibrant and inclusive research culture. View the University's commitments on research culture and the results of the 2020 research culture survey.

Our people and culture is what drives our success. A research culture which nurtures and recognises community, openness, good research practice and fair recognition is one that best supports our capacity to deliver world-leading research. The Research Cultures Working Group works closely with the University's Research Ethics and Integrity Review Group (REIRG), and the Institute for Academic Development to bring together work on Research Culture.

Research Cultures Working Group

The Research Cultures Working Group works on behalf of the Research Strategy Group to establish policies and mechanisms to promote positive research cultures at the University of Edinburgh, incorporating equality, diversity and inclusion, across all career stages.

In the second of the bi-monthly thematic events, hosted by Professor Jane Hillston, this event featured Dr Will Cawthorn presenting on the role of research metrics, assessment and research practices and how these impact research culture alongside Professor Malcolm Macleod presenting on research integrity and reproducibility.

[View the Research Cultures Integrity, Reproducibility and Open Research Event Recording \(14th December 2021, University of Edinburgh staff only\)](#)

In the first of the bi-monthly thematic events the group explored the role of Dignity and Respect Advisors at the University of Edinburgh and how they support colleagues dealing with issues of bullying and harassment. The event featured a presentation from Dr Caroline Wallace, Senior Partner - Equality Diversity & Inclusion, followed by a discussion between Professor Jane Hillston and Dr Katie Nicoll Baines about their experiences being Dignity & Respect Advisors.

Research culture survey

The University ran its first research culture survey in summer 2020. We are working on bringing these results together to inform an action plan across the University.

Export Control

Guidance on export control legislation and relevant policies, information about who is responsible for complying with export control legislation, and how to apply for an export licence.

What is export control?

UK export control refers to a set of legal restrictions on the transfer of certain goods, technology, software and knowledge from the United Kingdom to a destination or destinations outside the UK.

What items are controlled?

Information about export control lists and exemptions.

Who must comply with export legislation?

Individual academics and researchers have obligations and responsibility to ensure legal compliance with export control legislation.

How to apply for an export control licence

In some cases, it may be necessary to apply for an export licence from the UK Export Control Organisation to carry out an activity related to your research.

Export control policies and further information

Thank you for your attention!
