Results

80%

Totally Agree

topics discussed are relevant to the overall objective.

90%

Agree / Totally Agree

the pedagogical approaches used, such as online activities, facilitated learning process

90%

Agree / Totally Agree

teachers facilitated the students' learning process.

Students were satisfied with Minor's adaptation to the Online format, allowing them to obtain the necessary knowledge and skills to work in this context.

Conclusions

Thank you!

Hi Antonio, Vitor & Arne-Griet!

Thank you for everything you've done for us throughout this minor - it's been a pleasure getting to know you & to learn so many valuable things for our futures in physiotherapy & also for life...

I hope to come to Portugal one day & meet you all in person - it would be nice to have an Irish whiskey together!

Take care of yourself and (as you famously said) keep cool!

Olá Antonio & Vitor, thank you for your guidance throughout these past months, it's been a pleasure 😊 it has not been easy for everyone with the classes being entirely online but you made it interesting and engaging. I have certainly learnt a lot. Both of you are really passionate about teaching and it is inspiring!

I hope to see you guys in person when I travel in beautiful Portugal again sometime in the future. All the best with everything and keep cool always!

(The image was taken in Sagres 2 years ago! 😊)

Added by Kenneth Leong

Dear Antonio,

Just a simple and sincere "Obrigado" to you and Vitor for the knowledge shared and the quality time spent together.

I hope to be able to say hello in person one day.

In the hope not to be too lame I end this short message with your signature greeting: "KEEP COOL & SAFE" (hopefully it isn't copyrighted)

until we meet again.

Diego
