In the year 1922, when the thought of restoring the graves of veterans of all wars whose remains lie buried in the various graveyards in Weare, was introduced to the voters at the annual town meeting in March, little thought was given to

the possibilities of the project aside from that which prompted the town to undertake the program, namely, cutting the bushes and trees. During the first year of the program, it was discovered that many of the graves were unmarked, many with broken stones, and still others whose stones were buried from sight beneath the turf. Your Committee, feeling that these conditions were within its jurisdiction to remedy, took the necessary steps to do so.

There are, however, quite a number of graves which need re-grading and owing to the small appropriation each year, it has been impossible to complete this work. It is felt also that the graves of all of our veterans should be charted so that future generations of the town will not be confronted with the problems which have hampered the work of this committee, and because the town owes to the memory of those valiant sons a debt of patriotic responsibility which it cannot afford to overlook.

It is the opinion of your Committee that this work should go forward and we request that the sum of \$150 be appropriated at the March town meeting.

REPORT OF THE Superintendent of Schools

To the School Board and Citizens of Weare:

This is my third annual report. It deals briefly with the following topics:

- (1) Statistics of our schools.
- (2) Our school buildings.
- (3) A new program of studies for the elementary schools.
- (4) Our schools and the community.
- (5) Recommendations for the coming year.

GENERAL STATISTICS FOR THE SCHOOL YEAR ENDING

State of N. H. . .	355.7	95.5	. . .	0.99

Comparison of these figures with the report of the year before will show that our attendance record has improved considerably, and that our percentage of attendance is still better than the average for the state. Our boys and girls, however, seem to have difficulty in getting to school on time. The average number of tardinesses per pupil for Weare is almost double that for the state as a whole; and only two schools—East Weare and Rockland—had a record of promptness for 1929-30 that was better than the state average.

The Riverdale school is closed this year, as there are not enough pupils in that neighborhood to warrant the maintenance of a separate school. The children in that district are attending school at River Road.

The Junior High school is considerably larger this year than last, but there are still several eighth grade pupils attending one-room schools. Two of these are at River Road, one at South Weare, one at Sugar Hill and one at Rockland. I believe that the lack of association at work with others of the same age is a real handicap to pupils in the upper grades, and I wish to repeat my suggestion of last year that pupils in grade eight (also in grade seven where possible) should strive to take advantage of the larger opportunities offered in our junior high school.

OUR SCHOOL BUILDINGS

The Buxton school received a thorough remodeling last summer. Windows were added on the left of the pupils, enough to make the glass area equal to one-fifth of the area of the floor. A new steel ceiling was painted white, and the walls a light buff color, which helped to make the room light. New washable canvas shades, recently bought for the Riverdale school, were moved to the Buxton. Additional black-board space was provided, and chemical toilets were installed.

It is hoped that citizens interested to see the effect of such a thorough change will look into the Rockland or Buxton schools. These are certainly two very pleasant study rooms.

A REVISED STATE PROGRAM OF STUDIES

During the past summer a new edition of the "Program of Studies for the Elementary Schools" was issued by the State Board of Education. This volume of nearly 500 pages is the work of committees of teachers and superintendents, who have worked diligently for more than a year to complete this important task. The principal changes made by the program are as follows:

a. *More emphasis on reading.* The 1921 program of studies stated that most children have become independent readers by the end of Grade III, and gave little or no emphasis to formal instruction in reading beyond that point. It is now recognized that further instruction for most pupils is necessary. Training in silent reading as well as oral reading is emphasized.

b. *Less arithmetic for the first two grades.* Certain processes with number that seem very difficult for young children are mastered with comparative ease by pupils who are a little older, and whose minds have developed to a point where they can understand such problems. It seems good judgment to postpone the more formal number work until the minds of the pupils are mature enough to grasp it successfully.

c. *More American history, and less European.* There was a time when stories of American history were taught in almost every grade, and this plan resulted in much tiresome repetition. In order to avoid this, the 1921 program assigned to Grades 5 and 6 stories of Hebrew, Greek, Roman and English history. While there is much valuable material in this field, experience has shown that two years of work upon it was too much time, and that one year is probably sufficient. In the new program, the fourth and fifth grades are given stories of our own country. The sixth grade studies the European background of American history, which serves as a basis for a more thorough understanding of our nation's development as studied in the seventh and eighth grades.

d. *More-definite standards or goals in each subject.* Throughout the new program, there are helpful suggestions for teaching different subjects effectively. There are also many specific statements as to the degree of mastery expected in each grade. Both of these features should be of help to teachers in securing a higher quality of work on the part of their pupils.

e. *Particular reference to the needs of the rural teacher.* Teaching a rural school has a technique all its own. A teacher who can do a splendid job of teaching in a city school may find herself quite at a loss in a one-room school with six or more grades. It is encouraging to find this fact recognized by the authors of our new program of studies, and to find many helpful suggestions advanced for the use of the teacher in a rural school.

OUR SCHOOLS AND THE COMMUNITY

For several years past, the schools have co-operated in a demonstration of their work for the benefit of the public. This program has usually been held in November, but was postponed in 1930 with the thought that a later time in the year would be more suitable. There is no intention of discontinuing this kind of meeting, for it seems to promote a friendly and helpful interest in the schools on the part of the many who attend these programs.

Grateful mention should be made here of the interest shown by the local post of the American Legion, which has offered for several years a prize for the best essay on a worth while subject, written by the pupils in our elementary schools.

RECOMMENDATIONS FOR THE COMING YEAR

1. *Visit school one or more times each year.* All parents are urged to call at the school which their children are attending, for at least half an hour at some time during the year. We are always glad to welcome parents and neighbors

at our schools. Their visits help in many ways, especially by developing a better understanding between parents and teachers.

2. *Improved attendance and less tardiness.* It is manifestly a waste of money to pay a teacher to teach children, if the children are not there to learn. No excuse other than ill health should keep a child from school a single day. Furthermore, the habit of being late, which many of us adults have formed, ought not to be encouraged in our children. Parents, by taking care, can prevent much of the absence and tardiness which mar our records each year.

3. *Continued improvement of school buildings.* The school that needs attention most urgently this year seems to be the River Road school. Its underpinning and floor are in such a condition as to make replacement imperative.

Three other buildings are in need of repairs or improvements. The South Weare school has only half enough window space. The Center school, where the walls are painted over wall paper, is in urgent need of cleaning up and repainting inside. The exterior of the High School building needs painting.

I would recommend that the district appropriate money for a thorough job of improvement at the River Road school, and that the funds usually appropriated for minor repairs be used to do as much work on the other schools mentioned as can reasonably be done this year.

CONCLUSION

Grateful acknowledgment is here made of the cordial cooperation of school board members, teachers and other citizens of Weare. Let us continue to practice the motto, "Work together for the good of the children."

Respectfully submitted,

ALMON W. BUSHNELL,
Superintendent of Schools.
