# CHANGES IN

(cont. from first page) everything in the college is subordinate to the development and needs of the student.'

The changes which are to take

place are as follows:

1. That the rule which requires ten hours to be taken in each of the following, English, Foreign Language, Social Science, and Science and Mathematics, be dropped

(Editor's Note: This means that if a student is sufficiently profficient in the ability to read a passage of a foreign language of a fair degree of difficulty when he or she enters the University, he will not be required to take any language. If, however, he is unable to meet the test, he will be required to take the subject until he can meet the requirements set forth.)

2. That the selection of the students' major subject shall be de-Husbands Go", and as a Russian ferred until the latter part of the peasant in "Uncle Vanya." second somestor of the sophomore

year.

3. That the courses to be taken during the first two years be planned to insure for the student a breadth of general culture and a basis for intelligent selection of his major subject and an adequate foundation for entering upon his

work in it as a junior.
4. That three hour credit courses be adopted in so far as possible. In order to do this, the committee recommends that Saturday morning be used for classes. In so far as possible all students' schedules are to be arranged to include Saturday morning classes.

6. That the limit of hours to be takon by a student during his last two years in his major subject be

200

eighteam to twenty-four.

She has been honored with an associate membership in the dramatic society.
