# University of Maine System Self Study 2022

# Institutional Characteristics Form

Date: 6/15/2022

- 1. Corporate name of institution: The University of Maine System
- 2. Date institution was chartered or authorized: May 26, 1968
- **3. Date institution enrolled first students in degree programs:** August 24, 1864 at the former Western State Normal School, now the University of Maine at Farmington
- **4. Date institution awarded first degrees:** May 25, 1866 at the former Western State Normal School, now the University of Maine at Farmington
- 5. Type of control:

Public	Private		
<b>X</b> State	■ Independent, not-for-profit		
■ City	■ Religious Group (Name of Church)		
■ Other (Specify)	■ Proprietary		
	_		

6. By what agency is the institution legally authorized to provide a program of education beyond high school, and what degrees is it authorized to grant?

The University of Maine System Board of Trustees is authorized to grant associate, bachelor's, master's, and doctoral degrees by acts of the Legislature of the State of Maine: 1865 P&S.L.C.532, and 1967 P&S.L.C.229, as amended 1969 P&S.L.C.238.

- 7. Level of postsecondary offerings (check all that apply)
  - **X** Less than one year of work
  - **X** At least one but less than two years University of Maine at Machias (UMM)
  - Diploma or certificate programs of at least two but less than four years
  - **X** Associate degree granting program of at least two years (UMM)
  - **X** Four- or five-year baccalaureate degree granting program
  - **X** First professional degree
  - **X** Master's and/or work beyond the first professional degree
  - **X** Work beyond the master's level but not at the doctoral level (e.g., Specialist in Education)
  - **X** A doctor of philosophy or equivalent degree
  - Other doctoral programs
  - Other (Specify)

### 8. Type of undergraduate programs (check all that apply)

- Occupational training at the crafts/clerical level (certificate or diploma)
- Occupational training at the technical or semi-professional level (degree)
- **X** Two-year programs designed for full transfer to a baccalaureate degree
- **X** Liberal arts and general
- **X** Teacher preparatory
- **X** Professional
- **X** Other: Competency-based education (at the University of Maine at Presque Isle)
- 9. The calendar system at the institution is:

X Semester ■ Quarter ■ Trimester	■ Other
----------------------------------	---------

## 10. What constitutes the credit hour load for a full-time equivalent (FTE) student each semester?

a) Undergraduate 15 credit hours/minimum of 12 credits

b) Graduate 9 credit hours/minimum of 6 credits

c) Professional N/A

### 11. Student population:

a) **Degree-seeking students**: Data as of fall 2021 census (October 15, 2021). Excludes non-degree students. Graduate includes Law students.

	Undergraduate	Graduate	Total
Full-time student headcount	15,508	2,876	18,384
Part-time student headcount	4,587	1,620	6,207
FTE	16,958	2,922	19,880

b) Number of students in non-credit, short-term courses: UMS offers hundreds of non-credit webinars, workshops, conferences, consultations, and industry-based credentialing programs across Maine to approximately 70,000 participants annually, the vast majority of whom are served through Cooperative Extension. Definitions of the types of non-credit activity differ, and every university has its own database for tracking non-credit enrollment, ranging from access databases to third-party support. No two are the same; our student information system, MaineStreet, does not capture non-credit enrollment and does not have a field for doing so. As a result, we do not track headcount at the UMS level. We are applying an e-commerce solution for non-credit activity (Course Merchant) on a pilot basis and plan to extend it to better track the range of non-credit activity across all UMS universities.

# 12. List all programs accredited by a nationally recognized, specialized accrediting agency.

Program	Agency	Accredited since	Last Reviewed	Next Review
UM - Athletic Training, BS	Commission on Accreditation of Athletic Training Education (CAATE)	2005	2021	N/A

**14. International Locations:** For each overseas instructional location, indicate the name of the program, the location, and the headcount of students enrolled for the most recent year. An overseas instructional location is defined as "any overseas location of an institution, other than the main campus, at which the institution matriculates students to whom it offers any portion of a degree program or offers on-site instruction or instructional support for students enrolled in a predominantly or totally on-line program." **Do not include study abroad locations.** 

Name of program(s)	Location	Headcount
N/A		

**15. Degrees and certificates offered 50% or more electronically:** For each degree or Title IV-eligible certificate, indicate the level (certificate, associate's, baccalaureate, master's, professional, doctoral), the percentage of credits that may be completed on-line, and the FTE of matriculated students for the most recent year. Enter more rows as needed.

**16. Instruction offered through contractual relationships:** Instruction offered through contractual relationships: For each contractual relationship through which instruction is offered for a Title IV-eligible degree or certificate, indicate the name of the contractor, the location of instruction, the program name, and degree or certificate, and the number of credits that may be completed through the contractual relationship. Enter more rows as needed.

Name of contractor Location Name of program Degree or certificate # of credits

- 17. List by name and title the chief administrative officers of the institution. See table on p. XXIV-XXV.
- **18. Supply a table of organization for the institution.** Supply a table of organization for the institution. While the organization of any institution will depend on its purpose, size and scope of operation, institutional organization usually includes four areas. Although every institution may not have a major administrative division for these areas, the following outline may be helpful in charting and describing the overall administrative organization:
  - a) Organization of academic affairs, showing a line of responsibility to president for each department, school division, library, admissions office, and other units assigned to this area;
  - b) Organization of student affairs, including health services, student government, intercollegiate activities, and other units assigned to this area;
  - c) Organization of finances and business management, including plant operations and maintenance, non-academic personnel administration, IT, auxiliary enterprises, and other units assigned to this area;
  - d) Organization of institutional advancement, including fund development, public relations, alumni office and other units assigned to this area. See tables on pp. XXVI-XXXIII of self study.
- **19. Record briefly the central elements in the history of the institution:** The University of Maine System (UMS) was established by the Maine legislature in 1968. It comprises seven named universities— the University of Maine; the University of Maine at Augusta; the University of Maine at Farmington; the University of Maine at Fort Kent; the University of Maine at Presque Isle; the University of Southern Maine; and the University of Maine

N/A

at Machias, a regional campus of the University of Maine— and the University of Maine School of Law. UMS also includes a University of Maine at Augusta campus in Bangor and the Maine Graduate and Professional Center in Portland.

The common purpose of the universities, Law School, and numerous instructional and research centers forming UMS is to deliver quality higher education while fulfilling our tripartite mission of teaching, research, and public service.

Unifying a set of universities that were previously individually accredited, NECHE granted accreditation to UMS in July 2020, making it the first statewide higher education enterprise in the country to be accredited as a system.

A comprehensive public institution, UMS serves more than 30,000 students annually and is supported by the efforts of more than 2,000 full-time and part-time faculty and more than 3,000 full-time and part-time staff. UMS reaches over 500,000 people each year through its educational and cultural offerings.

Information about the history and governance structures of UMS, its universities, its Law School, and the University of Maine System Board of Trustees can be found in Standards One and Three.

# Chief Institutional Officers

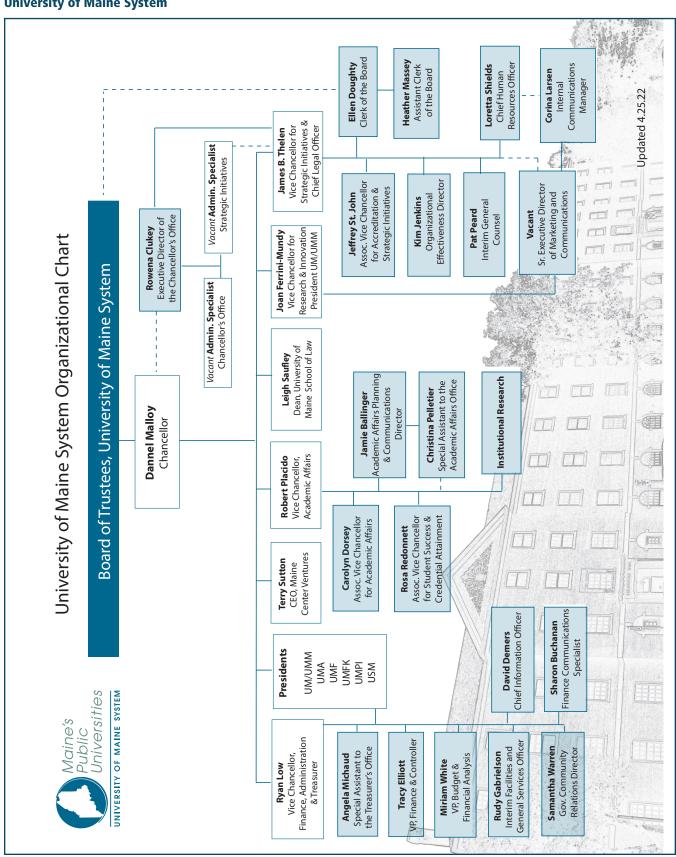

unction of Office	Name	Exact Title	Year of Appointment	
Board chair	Patricia Riley	Chair, Board of Trustees	2022	
Chancellor	Dannel Malloy	Chancellor	2019	
University president	Joan Ferrini-Mundy	President, University of Maine / University of Maine at Machias	2018	
Interim president	Joseph Szakas	Interim President, University of Maine at Augusta	2021	
University president	Edward Serna	President, University of Maine at Farmington	2019

# NECHE Actions, Items of Special Attention, or Concerns

Detailed Actions, Items of Special Attention, or Concerns

Date of NECHE letter	Issue	Action	Standard	Self study page number
October 26, 2021	[P]rovide an update on the contractual arrangement between [the University of Maine at Farmington] and [the] Seguinland Institute with particular emphasis on UMF's success in: a. achieving the financial and enrollment goals set for the program; b. strengthening its agreement with Seguinland Institute with attention to ensuring that academic resources and student services are sufficient and appropriate to support the program; [and] c. evaluating the effectiveness of the program with attention to assessing student learning outcomes and using the results to make improvements[.]	UMF surpassed its fiscal and enrollment targets for the 2021-22 academic year; fully aligned its Seguinland admissions processes, review of faculty, curricular development, and assessment of student learning outcomes; and used the Seguinland location to deliver high-impact first-year fall seminars.	Six	125

### **NECHE Action Items**

May 25, 2021	[Provide an update on the] University of Maine at Augusta's success in achieving its goals for graduation rates[.]	UMA's one-year baccalaureate retention rate climbed from 59% for the fall 2017 cohort to 65% for the fall 2020 cohort. Following first-time, full-time 150% graduation rates of 18%, 19%, 13%, and 16% for its four most recent cohorts, UMA has set a goal of 18% for its next cohort.	Six	126
November 6, 2020	[Provide an update on] the implementation of the [Master of Arts in Organization Leadership competency-based education] program offered at the [University of Maine at] Presque Isle with attention to: a. evaluating the effectiveness of its governance structures on the Presque Isle campus; b. assessing student learning outcomes in the MAOL CBE program and using the results to make improvements; c. ensuring that student services are sufficient to support the program with emphasis on career services[.]	UMPI hired a Dean of Competency-Based Education and Degree Completion in September 2021 with direct responsibility in all three areas (a, b, and c). The Dean has partnered with UMPI's senior leadership and MAOL faculty to review program governance structures and areas of need, and will present an MAOL assessment plan to UMPI's curriculum and assessment group in fall 2022 in preparation for assessing learning outcomes and using the results to improve the program.	Five	94-95

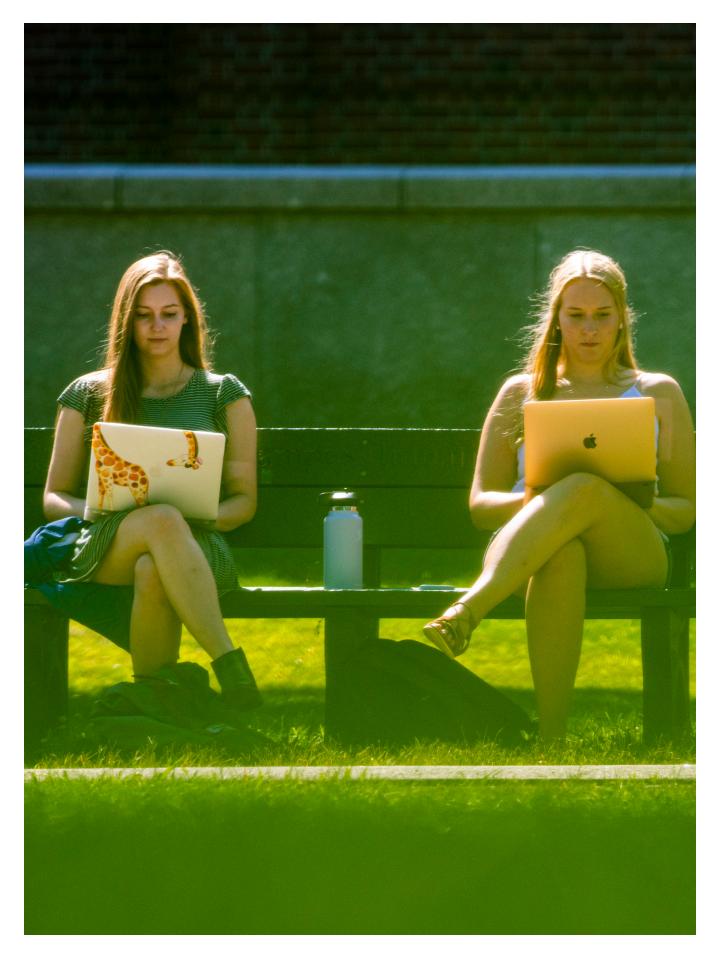

July 17, 2020	[Provide an update on] further developing the system of reviewing academic programs, including an evaluation of the effectiveness of the methodology to ensure a System-wide perspective as well as qualitative judgments of the programs at the individual institutions[.]	Under the leadership of the Vice Chancellor for Academic Affairs and the university provosts, UMS is forming a three-pronged system for academic program review entailing an Annual Academic Program Report (AAPR), a revision and application of a five-year Academic Practice Letter (APL) governing program review practices, and external evaluations at the program level. A newly established Systemwide assessment group will evaluate the AAPR and confirm the efficacy and methodology of its data.	Eight	235-36
July 17, 2020	[Provide an update on] strengthening the funding model for research and increasing research funding and doctoral-level education at the University of Maine [UM][.]	UM has developed a new F&A distribution model, increased research funding, increased doctoral enrollment (and overall graduate enrollment), established a Faculty Affiliates program to foster System-wide growth of research activity and capacity, contributed to statewide economic and research planning, expanded its support for business and technology acceleration and incubation, and in early 2022 achieved Carnegie R1 status.	Six	130-133

### **NECHE Action Items**

July 17, 2020  [Provide an update on] further developing the internal governance of the System, including the University of Maine System Faculty Governance Council[.]	The Council has reached positive outcomes in several areas of self-governance, including decisions about length of terms of service, optimal size of the Council, appropriate representation from stakeholder groups, and the development of its leadership structure. The Council has reviewed plans and proposals and shared feedback on four System-wide initiatives to date, including selection and implementation of a new learning management system, and development of new course (coding) component data standards. The Council continues to pursue the adoption of its charter.	Three	27-29
--	--	-------	-------

July 17, 2020	[F]or each of the Commission's standards, [address] the issues identified in the [June 2020] substantive change report to help ensure that the System and its universities are better situated to address important issues and gain value from the move to single accreditation; [and,] that the University of Maine System further be reminded that it may, in the Fall 2022 self-study, request general approval to offer CBE	1) The alignment of university strategic plans with System-level strategic direction. 2) Expanding access to courses and programs of all types to students at universities where desired curricula are not presently offered. 3) The completion of a UMS libraries strategic plan. 4) The development of a Systemwide assessment and institutional effectiveness committee with representation from all UMS	· · · · · · · · · · · · · · · · · · ·	Specific June 2020 report issues: 1) XLV 2) 133 3) 170 4) 238 Request for general CBE approval: XLVIII
	programs within the scope of its mission and that, until general approval is given by the Commission, any new competency-based education program proposed by the System to be offered at any of its universities [is] considered a substantive change.	universities.		
We share three further updates per productive conversations and email exchanges with NECHE staff.	An update on the ongoing development of the Maine College of Engineering, Computing and Information Science (MCECIS).	An initiative stemming from the Harold Alfond Foundation's \$240 million gift to UMS, MCECIS will serve as a statewide resource for engineering, computing, and information science education and research. A Steering Committee and six working committees (on undergraduate engineering; graduate programs and research; undergraduate computing; fundraising and outreach; transitions to MCECIS from K-12, community college, and as adult learners; and organizational structure) will deliver final reports in May 2022.	Institutional Overview	XLV

			Υ
An update on the Maine Business School (MBS).	MBS and its Graduate School of Business (GSB) have added a new major in Sport Management in the BSBA program and received approvals for two new concentrations in the MBA. MBS and GSB have secured funding from the University of Maine needed to support two faculty lines, the GSB Dean's position, and other resources for fiscal year 2023. Enrollment in the BSBA and MBA programs remains strong, and the MBS and GSB leadership have invested in marketing to develop a combined value proposition for the two programs.	Three	29
An update on the University of Maine at Farmington's ongoing conversion from a fourcredit to three-credit instructional model.	UMF completed major stages of this work in January 2022 and April 2022. Most UMF programs have submitted catalogue-ready program and course descriptions reflecting the three-credit instructional model. Upon completing the conversion, UMF expects to achieve greater curricular alignment with the rest of UMS, increased opportunities for shared programming and instruction, markedly reduced barriers for transfer activity, and other benefits for students, faculty, and enrollment.	Six	129-30

# Introduction: The Self-Study Process

he University of Maine System's (UMS) June 2020 substantive change application requesting unified accreditation for UMS, its seven universities, and the University of Maine School of Law (Law School) followed a multi-year exploration of that operating model in close communication with the Commission.

[UMS] began serious discussions with the Commission in 2015 about the possibility of one institutional accreditation for all [UMS] universities to better fulfill its statewide mission and coordinate its academic program offerings in a resource-constrained environment. A primary issue addressed in all discussions since that time is whether [UMS] can meet its chartered mission to coordinate its academic program across and among all UMS universities with its universities separately accredited, requiring each to maintain control over its own academic program and be sufficiently resourced to meet all accreditation standards on its own (UMS substantive change request, p. 2).

Independent assessments of unified accreditation's viability by NECHE and UMS; then-recent strategic direction set by the UMS Board of Trustees; and encouraging feedback from the U.S. Department of Education about UMS's ability to offer federal financial aid as a System confirmed and catalyzed our desire to pursue a unified-accredited structure.

Upon granting accreditation to UMS in July 2020, the Commission directed us to prepare for an interim evaluation visit in May 2021 and a comprehensive evaluation in fall 2022. Following the May 2021 visit, the two evaluators filed a report describing UMS as having made "significant progress in many areas, particularly those that are foundational to building a unified accreditation model" (p. 2). In its November 29, 2021 letter to Chancellor Malloy, the Commission noted that

While viewpoints about the necessity or value of unified accreditation vary, the [evaluation] team confirmed that there is a consensus that access to high-quality educational programs, transferability, and student success, including student completion, are central to the success of the mission of [UMS], and the development of underlying process[es] and systems across the campuses is a significant step forward in improving and leveraging [UMS's] value (p. 3).

An initial discussion about the self study process and timeline was held in October 2020. Nine draft writing teams—with faculty, staff, and administrators from the seven universities and the Law School—began work in February 2021 and submitted their drafts in May 2021. An editorial group combined and expanded the drafts into the first full narrative, which was shared with the UMS community for review and feedback in September 2021. In January 2022, UMS shared a draft with NECHE Vice President Carol Anderson, who provided invaluable direction.

A second public draft was posted for UMS community review and feedback in February 2022, and a third in May 2022.

Data teams comprising institutional research and assessment staff (UMS and university-based) and faculty representatives began forging common definitions and populating the Data First and E Series forms in summer 2021. The two data sets were shared in April 2022 with faculty senate/assembly presidents, provosts, university accreditation officers, financial aid directors, and registrars for their review and feedback.

Construction of the self study's digital workroom began in December 2021 as a collaboration among university and Law School accreditation officers, university IR staff, and UMS staff. The workroom was largely in place as of May 2022.

A Self Study Steering Committee, the outgrowth of a unified accreditation project management team, was formed in late fall 2021 to guide the work to completion. The committee includes UMS senior staff, a university vice provost, a faculty member, and a graduate student. In addition to advising on editorial choices and sharing input about preparations for the fall visit, Steering Committee members read the final draft and shared recommendations about final content.

UMS published its Notice of Public Comment inviting input on the comprehensive evaluation in the following Maine newspapers in April 2022: the Portland Press Herald, the Bangor Daily News, the Kennebec Journal, the Lewiston Sun Journal, the Machias Valley News Observer, the Calais Advertiser, and the Aroostook County Star-Herald. The notice was also posted on the UMS, university, and Law School websites.

In late May 2022, evaluation team chair Ross Gittell, President of Bryant University, made a preliminary visit to Maine to discuss fall planning and logistics with UMS senior staff and meet with Chancellor Malloy and the UMS Presidents Council.

UMS finalized the self study in mid-June 2022 in advance of an October 2-5, 2022 visit by the evaluation team.

#### Two notes:

- 1. The University of Maine School of Law is an American Bar Association (ABA)-accredited law school within the University of Maine System. Its academic programs adhere to ABA standards. For this reason, it was determined in discussions with NECHE in January 2021, and reaffirmed in writing in December 2021, that UMS would include Law School examples in the narrative, and links to Law School documentation in the digital workroom, but would not supply Data First forms or E Series forms for the Law School.
- 2. In select areas of the University of Southern Maine's (USM) Data First forms, some Law School data is included. We note this in the relevant USM forms (7.2-7.5a). The blended data reflects both the Law School's former administrative housing under USM and the latter's ongoing support of some Law School business processes.

# **Institutional Overview**

The University of Maine System (UMS) was established by the Maine legislature in 1968. It comprises seven named universities: the University of Maine (UM); the University of Maine at Augusta (UMA); the University of Maine at Farmington (UMF); the University of Maine at Fort Kent (UMFK); the University of Maine at Presque Isle (UMPI); the University of Southern Maine (USM); and the University of Maine at Machias (UMM), a regional campus of the University of Maine; and, the University of Maine School of Law. Information about the history and organizational structure of UMS, its universities, its Law School, and the University of Maine System Board of Trustees (Board) can be found in Standards One and Three.

# Unified accreditation, the comprehensive evaluation process, and UMS strategic planning

The last full-scale UMS strategic plan was completed in 2004. Chancellor Malloy and Board leaders began discussing a new planning process in 2020. With the advent of unified accreditation and the development of the NECHE self study, those discussions focused on identifying the best timing for strategic planning in relation to the comprehensive evaluation and resultant action by the Commission. UMS and the Board have jointly sought to ensure that strategic planning harmonizes with the self study, with the evaluation visit, and with requests for improvement shared by the Commission at the conclusion of the evaluation process in spring 2023.

The Board formally charged Chancellor Malloy with launching the strategic planning process in July 2021. The work is being led by the Chancellor and Vice Chancellor Thelen in close coordination with the UMS Presidents Council; a Strategic Planning Working Group comprising UMS staff and university representatives, including faculty; the Board's Ad Hoc Strategic Planning Committee; and our strategic planning consultant, Huron. In September 2020, UMS launched a strategic planning website featuring regular updates, historical documentation, and a timeline detailing the stages of the process from inception in July 2021 through its expected completion in fall 2023 with a public presentation and the Board's adoption of the final plan.

Consistent with an issue raised in our June 2020 substantive change request, each university and Law School strategic plan will align with the pillars of the UMS strategic plan while allowing for a range of initiatives and goals specific to their respective plans and missions.

#### The UMS TRANSFORMS initiative

In October 2020, the Maine-based Harold Alfond Foundation announced a \$240 million commitment to UMS, the largest ever made to a public institution of higher learning in New England. The gift's 12-year implementation entails \$170 million in matching funds to be secured by UMS, for a total investment of \$410 million in Maine's public universities.

The gift will advance UMS, its universities, and the Law School in four areas. Known internally as UMS TRANSFORMS, the implementation process is overseen by an Executive Leadership Group, and is managed by a Program Director and by project leads in each area.

### (i) Growth and expansion of the Maine Graduate and Professional Center

The Maine Graduate and Professional Center brings together programs in law, business, public policy, engineering, computing, and information science, with active synergies among those programs, their faculty, and their students. A \$55 million Alfond gift with a \$50 million match focuses on career preparation and leadership development in these fields. The funds will support scholarships and integrated program development. Upon completion of renovations to the University of Maine School of Law's (Law School) new home in downtown Portland in fall 2022, the Maine Graduate and Professional Center will be co-located in that space.

# (ii) Creation of the multi-university Maine College of Engineering, Computing and Information Science (MCECIS)

MCECIS will be a statewide, integrated solution providing the technical workforce and innovations critical to moving Maine's economy forward, supported by \$75 million from the Alfond Foundation gift.

Discussions about MCECIS began in December 2020 with the formation of a Steering Committee with representatives from the University of Maine (UM), University of Southern Maine (USM), and University of Maine at Augusta (UMA). With assistance from the UMS Office of Organizational Effectiveness, the Steering Committee held two System-wide visioning workshops in spring 2021 attended by approximately 110 faculty, staff, and administrators. The Committee also held a related DEI workshop and 14 listening sessions with internal and external stakeholders.

The Steering Committee oversaw the formation of six working committees and a DEI committee. The committees address Undergraduate Engineering; Undergraduate Computing; Graduate Programs and Research; Fundraising and Outreach; Transitions to MCECIS from K-12, Community College, and as Adult Learners; and Organizational Structure. In total, these groups have over 100 members from across UMS, including numerous faculty. Their final reports are due in May 2022.

An MOU for the affiliation of the USM Department of Engineering with MCECIS was negotiated by the UMS Vice Chancellor for Strategic Initiatives and the Presidents of UM and USM. The search for the inaugural dean of MCECIS was launched by the UM Provost in spring 2022 with the goal of filling the position in summer 2022. In a parallel effort, the team of Perkins-Eastman/SMRT has conducted a capital projects master plan for UM facilities for consideration of potential future MCECIS infrastructure needs.

#### (iii) A set of new student retention and success initiatives

The core student success and retention initiatives of UMS TRANSFORMS are Research Learning Experiences, Gateways to Success, and Pathways to Careers. The latter two focus respectively on high-demand gateway courses typically taken in a student's first year, and on preparing students for career success through internships and related pre-professional training.

The Research Learning Experiences (RLE) program introduces students to applied research opportunities in a range of courses and fields. RLE was piloted in fall 2021 with 250 UM and UMM students across 31 course sections. A System-wide RLE workshop co-hosted by UM and UMF was attended by more than 100 faculty from all seven universities. For 2022-23, 50 RLE course sections have been approved, and pilots are planned at all seven universities.

RLE is designed to provide students with early and wide participation in their educational paths while increasing retention and student success, particularly in the first two years. The RLE pilot is being assessed, and the results will be used to improve the program and its courses in the next phase of the initiative.

# (iv) A substantial investment in University of Maine Athletics program and facilities

The Alfond gift includes a \$90 million investment in facilities at UM with a \$20 million UM match. The gift will help UM Athletics advance its goals in access, gender equity, community involvement, and competitive excellence, and will strengthen its capacity to assist other UMS universities' athletic teams.

The first three Athletics capital projects—renovation or replacement of the Women's Field Hockey, Softball, and Soccer fields—were in the construction document phase as of April 2022.

### Diversity, equity, and inclusion across the University of Maine System

In June 2020, Chancellor Malloy issued an Imperative For Change to reinvigorate the collective commitment to diversity, equity, and inclusion (DEI) across UMS. Board and UMS leaders have endorsed a DEI culture renovation and advancement framework focused on demonstrating that DEI is fundamental to:

- 1. Human capital workforce practices: talent acquisition, care and support, advancement, and diversity contributions;
- 2. Education, research, and service: enrollment, care and support, academic relevance, and faculty and student affairs leadership; and
- 3. Culture: prioritizing DEI, maximizing its environmental integration, and strengthening DEI awareness and outcomes.

Efforts in those three areas are led by a UMS DEI Steering Committee in coordination and collaboration with university-based DEI councils and the UMS TRANSFORMS DEI Action Team. As noted in the Chancellor's April 5, 2021 message and in the DEI Steering Committee's charter:

The UMS DEI Steering Committee will be a multidisciplinary team of [u]niversity and [UMS] leaders charged with mapping [our] path to inclusive excellence, opportunity, and justice. The Committee will provide a structure for cultural renovation that rises to the imperative and is accountable for real progress. It will help ensure that resources and best practices are both shared and leveraged for the greatest possible impact at each university and across UMS as a whole.

The Steering Committee has met regularly since September 2021 and has formed subcommittees in these areas:

- DEI climate survey: the Higher Education Data Sharing Consortium (HEDS) DEI survey was conducted in March 2022. Survey results received by UMS in May 2022 will be used to assess our starting point and identify opportunities for concrete improvements.
- Communications: design and development of a UMS DEI website and communication strategy to promote System- and campus-based DEI priorities and programming.
- 3. Data and Analysis: collecting available UMS DEI data, determining gaps and needs, developing a dashboard for tracking and improvement, and managing key metrics using the Objects and Key Results (OKR) goal management framework.

Through joint membership, the UMS DEI Steering Committee and UMS TRANSFORMS DEI Action Team mutually support continued progress. For example, an April 2021 UMS TRANSFORMS DEI listening session served as a large-scale, qualitative focus group for gathering data about our current state and suggestions for embedding DEI in the fabric of the four UMS TRANSFORMS initiatives during the design phase.

Work is underway— and will expand— in DEI training and education. For example, a summer 2021 intensive "DEI in Admissions" training program was conducted for all UMS Admissions staff plus select Marketing, Financial Aid, and Athletics staff. The three-part training involved mapping the entire recruitment and admission process and providing customer experience training through a DEI lens. In addition, university-level DEI work is ongoing at UMA, UM, USM, and elsewhere.

#### **UMS student success initiatives**

In addition to active student success programs and initiatives at all of the universities and the Law School, two System-wide student success initiatives are ongoing. The RePaving MaineStreet project is a multi-year upgrade and reconfiguration of the UMS student information system, known internally as MaineStreet. The "repaving" will remove digital walls that currently separate each university's data from every other's and permit the flow of student and course information among them. An initial set of improvements to student use of MaineStreet on mobile devices was completed in fall 2021. Working with an external consultant, UMS IT began mapping the RePaving workflow and timeline in spring 2022.

The Unified Catalog initiative seeks to improve access and opportunity for students and faculty by removing non-technical barriers to student success in and around MaineStreet academic activity: in effect, complementing improvements to be achieved through the RePaving MaineStreet work. A Unified Catalog project team was formed in May 2021 with faculty representation from the Law School and the universities. In collaboration with university faculty senates and assemblies, the Unified Catalog work is focused initially on policy and practice alignments to improve course scheduling, credit transfer, and related functions for students, faculty, registrars, and others. This initiative is described in further detail in Standard Three.

# Request for general approval to deliver competency-based education (CBE) programming at the University of Maine at Presque Isle

In its July 17, 2020 and November 29, 2021 letters to Chancellor Malloy, the Commission invited UMS to seek general approval to offer undergraduate and graduate competency-based education (CBE) programs at the University of Maine at Presque Isle (UMPI) consistent with the university's scope of mission.

As demonstrated by prior substantive change requests addressing the delivery of individual CBE programs, UMPI provides appropriate support services for CBE students and has ensured that full-time, tenure-track faculty oversee curriculum design, assessment processes, and the general instruction of competency modules. CBE curricular and assessment practices are aligned with those of in-person and online UMPI course modalities, and all programs delivered in the CBE modality undergo regular curricular and programmatic revisions and assessments leading to the continuous improvement of student learning.

UMPI's fidelity to high-quality CBE programming was confirmed by the most recent evaluation report on three of those programs following a May 2021 visit by a two-member NECHE team:

The development and expansion of the competency-based programs in the YourPace model is exemplary and [is] on par with other CBE programs across the country. UMPI is to be commended for its ability to identify emerging needs, develop solutions, and pivot adroitly when current designs, services, and resources need to be changed (p. 7).

This assessment is congruent with prior evaluations of UMPI CBE programs.

For the reasons outlined above, and with our appreciation for the Commission's invitation to request general approval for CBE programming at UMPI, we formally do so here. We believe UMPI's CBE programming has a very bright future, and that it will continue to enrich and serve the students and faculty engaged with it.

#### **Key findings**

The combination of self study preparation and UMS strategic planning has required thoughtful consideration at all levels of the institution about our priorities. While the strategic planning process will serve to identify the values and goals that shape our future for the next five years, existing priorities— in addition to those named above and elsewhere in the self study— can be readily identified and include the following:

We are committed to using unified accreditation as a tool for maximizing collaboration and coordination in an environment of limited resources, and to achieve educational and operational efficiencies as we do so.

Capitalizing on the University of Maine's (UM) 2022 attainment of Carnegie R1 status, we will broaden and deepen the scope and impact of our research enterprise for our state, the region, and beyond. (See Standard Six for a detailed update on the research funding model, growth in research, and graduate education at UM.)

We will continue to invest in our physical infrastructure. In 2021, the Board approved plans for additional and improved housing at several UMS universities, including construction of a 580-bed residence hall bringing USM student housing to downtown Portland, and approval to accept developer proposals for apartment-style housing at UMPI and UMF. In addition, the Board has invested over \$13 million in the lease and renovation of a multiuse building near the Portland waterfront as the new home of the Law School, the Maine Center for Graduate and Professional Studies, and other UMS functions.

#### **Next steps**

UMS stands at a propitious moment in its history. Even as we work to complete the self study and prepare for the October 2022 evaluation visit, UMS and university leaders are directing the first full-scale UMS strategic planning process since 2004. The landscapealtering 2020 Harold Alfond Foundation gift— UMS TRANSFORMS— has crystallized efforts to advance critical areas of our tripartite mission. Concerted work to weave diversity, equity, and inclusivity into the fabric of our policies and practices is ongoing at all levels. And through the leadership of Chancellor Malloy, Vice Chancellor for Research and Innovation/University of Maine President Ferrini-Mundy, and many others, we have made major advances in research funding and doctoral education at the University of Maine, and in engaged research learning System-wide.

To be sure, we face challenges. Maine is the poorest and most rural of the New England states. Our region has been and will continue to be severely pressured by student demographics. And as of this writing, we continue to respond to COVID-19. Notwithstanding, we are encouraged by our progress in using unified accreditation as a tool for aligning and allocating limited resources in new and collaborative ways. We are pursuing every avenue for extending the educational opportunities we offer our students and deepening our imprint on our state, its workforce, and its economy. And we are excited about the future of the University of Maine System.

## The draft writing teams

Standard One: Mission and Purpose	
Karen Beeftink (co-chair)	University of Maine at Presque Isle
Barbara Blackstone (co-chair)	University of Maine at Machias
Libby Bischof	University of Southern Maine
Jennifer Mascaro Davis	University of Maine at Augusta
Donna Karno	University of Maine at Farmington
Lisa Lavoie	University of Maine at Presque Isle
Michael Scott	
Meredith Swallow	University of Maine
	University of Maine at Farmington
Ellen Taylor	University of Maine at Augusta
Standard Two: Planning and Evaluation	
Debra Allen (co-chair)	University of Maine
Jonathan Henry (co-chair)	University of Maine at Augusta
Marilynn Epp	University of Maine at Fort Kent
Lorne Gibson	University of Maine at Presque Isle
Nathan Grant	University of Maine at Farmington
Kim Lane	University of Maine at Presque Isle
Susan McWilliams	University of Southern Maine
Buster Neel	University of Maine at Augusta
William Otto	University of Maine at Machias
Scott Voisine	University of Maine at Fort Kent
Standard Three: Organization and Governance	
Lydia Savage (chair)	University of Southern Maine
Chris Bates	University of Maine at Augusta
Christopher Gerbi	University of Maine
Gillian Jordan	University of Maine at Augusta
Jerry LaSala	University of Southern Maine
Deborah Meehan	University of Maine at Augusta
Jamie Moreira	University of Maine at Machias
Debra Pelletier	University of Maine at Fort Kent
Deborah Roark	University of Maine at Presque Isle
Blake Whitaker	University of Southern Maine
Joe Zubrick	University of Maine at Fort Kent
Standard Four: The Academic Program	
Raymond Rice (co-chair)	University of Maine at Presque Isle
Joseph Szakas (co-chair)	University of Maine at Augusta
Heather Ball	University of Maine at Machias
Mark Brewer	University of Maine

Erin Connor	University of Maine at Farmington
Tina Daigle	University of Maine at Farmington  University of Maine at Augusta
Matt Dube	University of Maine at Augusta
Greg Fahy	University of Maine at Augusta
Shaleen Jain	University of Maine
Alexander Myhre	University of Maine at Fort Kent
Jeremy Qualls	University of Southern Maine
Erin Soucy	University of Maine at Fort Kent
Jeffrey Thaler	University of Maine School of Law
Katherine Yardley	University of Maine at Farmington
Standard Five: Students	
Orlina Boteva (co-chair)	University of Maine
Sheri Fraser (co-chair)	University of Maine at Augusta
Nicole Achey	University of Maine at Farmington
Susan Baker	University of Maine at Augusta
Andra Bowen	University of Maine
Vicki Daigle	University of Maine at Fort Kent
Brandy Finck	University of Maine at Augusta
Lisa Hibl	University of Southern Maine
Marnie Kaler	University of Maine at Machias
Jacquelyn Lowman	University of Maine at Presque Isle
Matthew Morrin	University of Maine at Fort Kent
Sherry Niang	University of Maine School of Law
Clarissa Thompson	University of Maine at Farmington
Christine Wilson	University of Maine at Farmington
Standard Six: Teaching, Learning and Scholarship	Hairmain of Maine on Arman
Brenda McAleer (co-chair)	University of Maine at Augusta

# Mission and Purpose

#### Description

The University of Maine System (UMS) includes Maine's flagship research university, a comprehensive regional university in an urban setting, smaller liberal arts universities, and Maine's only law school. Collectively, they carry out public higher education's tripartite mission of teaching, research, and public service and are an indispensable resource for the state, directly linking the education of its people and the application of research and scholarship to Maine's civic and economic health and growth.

# History and founding of UMS, its universities, and the University of Maine School of Law

The Morrill Land Grant Act of 1862 allotted each state 30,000 acres of federal land per member of its congressional delegation. Maine received 210,000 acres whose sale funded an endowment of \$118,300 to found the Maine State College of Agriculture and Mechanic Arts. Completed with a 370-acre College farm, the future University of Maine opened its doors to thirteen male students in September 1868.

The College was overseen by a Board of Trustees formed in 1865, with sixteen members representing, by law, Maine's sixteen counties. In 1897, the Board changed the name of the College to the University of Maine (UM), the new name representing in part the broader course of study that evolved in the university's first three decades and, significantly, its position as a university for the entire state.

The University of Maine at Fort Kent (UMFK) was founded in 1878 as the Madawaska Training School for teacher education. It became UMFK in 1970. The University of Maine at Presque Isle (UMPI) was founded in 1903 as the Aroostook State Normal School to provide post-secondary education to residents of central Aroostook County in northern Maine. It became UMPI in 1971. The University of Maine at Farmington (UMF) began as the Western State Normal School in 1864, offering teacher training grounded in the liberal arts. It became UMF in 1971.

The University of Maine at Machias (UMM), now a regional campus of the University of Maine, was founded in 1909 as the Washington State Normal School. It became UMM in 1970. The University of Maine at Augusta (UMA), established in 1965 as a continuing education division of the University of Maine, became an official campus of UM in 1967, just prior to the creation of UMS, and became a university within UMS in 1971.

The University of Southern Maine (USM) was founded as two institutions: the Western State Normal School in Gorham in 1878, and Portland Junior College in 1933. Later incarnations of the two schools merged to become the University of Maine at Portland-Gorham and part of UMS in 1970. The university became USM in 1978.

The University of Maine School of Law (Law School) was founded in 1962.

#### Mission statements: UMS, its universities, and its Law School

The University of Maine System Board of Trustees (Board), appointed by Maine's Governor, is UMS's governing and planning body. Among its core responsibilities is the approval of mission statements and strategic plans for UMS and its universities. Board Policy 301 recognizes that these statements and plans provide a framework for the development of appropriate programs and services.

UMS and university mission statements are subject to review and approval by the Board on a five-year cycle. In consultation with the Chancellor, the Board may call for review and revision of a mission or strategic plan outside of that cycle.

University mission statements are the product of university-wide deliberation led by the President in discussion with the Chancellor, and approval from the university and the Chancellor before Board review and approval at a public Board meeting. Mission statements for UMS and each university are posted on the UMS website.

# **Standard One:** Mission and Purpose

#### **UMS Board Policy Section 301.1: University of Maine System mission**

The University of Maine System unites seven distinctive public universities in the common purposes of providing first-rate higher education at reasonable cost to improve the quality of life for the citizens of Maine. Through its universities, UMS carries out the traditional tripartite mission of teaching, research, and public service.

UMS extends its mission as a major resource for the state, linking economic growth, the education of Maine people, and the application of research and scholarship. The Board of Trustees, in consultation with the Chancellor, is the governing and planning body of the University System responsible for developing and maintaining a cohesive structure of public higher education in the state of Maine. As such, the Board has final authority over all matters within its jurisdiction, including all educational, public service, and research policies, as well as all personnel and financial policies. The Board provides leadership on higher education policy within the System and the state, is committed to strengthening the unique characteristics of each university's mission, and advocates aggressively for adequate resources to support the System and its universities.

### UMS Board Policy Section 301.2: University of Maine mission

The University of Maine advances learning and discovery through excellence and innovation in undergraduate and graduate academic programs while addressing the complex challenges and opportunities of the 21st century through research-based knowledge.

Opportunity for all members of the University of Maine community is a cornerstone of our mission. The university welcomes students, research partners and collaborators into an atmosphere that honors the heritage and diversity of our state and nation.

Founded in 1865, the University of Maine is the Land and Sea Grant institution and the flagship campus of the University of Maine System. This vibrant and dynamic university serves the residents of Maine, the nation, and the world through our acclaimed programs in teaching, research, and outreach.

Inspiring and dedicated teaching propels students into new fields of learning and promotes interdisciplinary understanding. Our educational goals are to help students develop their creative abilities, communication, and critical thinking skills, and understanding of traditions in ethics and rationality within the arts, sciences, and professions.

Internationally recognized research, scholarship, and creative activity distinguish the University of Maine as the state's flagship university, where faculty and students contribute knowledge to issues of local, national, and international significance. As the state's doctoral-granting institution, research and education are inextricably linked.

Comprehensive outreach, including public service, Cooperative Extension, continuing education, and distance learning, engages learners of all ages in improving their lives and communities. Using research-based knowledge, outreach efforts promote sustainable use of Maine's abundant natural resources and build intellectual, cultural, and economic capacity throughout Maine and beyond.

Through integrated teaching, research, and outreach, the University of Maine improves the quality of life for people in Maine and around the world, and promotes responsible stewardship of human, natural, and financial resources.

#### UMS Board Policy Section 301.3: University of Southern Maine mission

The University of Southern Maine, northern New England's outstanding public, regional, comprehensive university, is dedicated to providing students with a high quality, accessible, affordable education. Through its undergraduate, graduate and professional programs, USM faculty members educate future leaders in the liberal arts and sciences, engineering and technology, health and social services, education, business, law and public service.

Distinguished for their teaching, research, scholarly publication and creative activity, the faculty are committed to fostering a spirit of critical inquiry and civic participation. USM embraces academic freedom for students, faculty, and staff, and advocates diversity in all aspects of its campus life and academic work. It supports sustainable development, environmental stewardship, and community involvement. As a center for discovery, scholarship and creativity, USM provides resources for the state, the nation, and the world.

**UMS Board Policy Section 301.4: University of Maine at Augusta mission**UMA transforms the lives of students of every age and background across the state of
Maine and beyond through access to high-quality distance and on-site education, excellent
student support and civic engagement, and innovative professional and liberal arts
programs.

**UMS Board Policy Section 301.5: University of Maine at Farmington mission** As a premier teacher education and public liberal arts college for the state of Maine, the University of Maine at Farmington prepares students for engaged citizenship, enriching professional careers, and an enduring love of learning.

**UMS Board Policy Section 301.6: University of Maine at Fort Kent mission**UMFK will nurture and engage a diversity of learners and aspiring professionals in
Maine's rural communities and beyond through affordable, technologically-enhanced and professionally-focused education programs.

#### UMS Board Policy Section 301.7: University of Maine at Machias mission

Through our Environmental Liberal Arts core, distinctive baccalaureate programs, and student-centered community, the University of Maine at Machias creates enriching educational opportunities that prepare graduates for professional success and lifelong engagement with the world. UMM embodies an active community of diverse learners who share a commitment to exploration, leadership, collaboration, and interdisciplinary problem solving. Inspired by our unique coastal location, UMM's creative energy, applied research, and community engagement enhance the social, cultural, economic, and natural environments of the state of Maine.

**UMS Board Policy Section 301.8: University of Maine at Presque Isle mission** Our success is built on an ethic of care: We inspire learners from near and far, of all ages and career stages, and support their personal journeys toward the future they seek. We value our team members and ensure they have the right tools, technology, and resources to provide learners with educational experiences they will draw upon for the rest of their lives. We serve our community and strive to engage all in activities that strengthen and sustain a rich and rewarding life. Every day, in every way, it's about excellence for everyone.

#### University of Maine School of Law draft mission statement

The following is a draft mission statement for the Law School. It has not been brought forward for review and approval by the UMS Board of Trustees.

Maine Law is an institutional public servant committed to providing an accessible and affordable student-focused program of legal education and achieving the highest standards of ethical behavior.

# **Standard One:** Mission and Purpose

#### **Appraisal**

"The University of Maine System" has, in the past, served as a synonym for the governance structure, including the Board, the Chancellor, and the UMS office. Under unified accreditation, however, it increasingly connotes the faculty, Presidents, administrators, and staff of the seven universities and Law School collaborating with the Board, the Chancellor and his senior staff, and one another. Continued success in implementing unified accreditation requires that each of the universities and the Law School plays a unique and essential role consistent with its mission.

Opportunities for refining and advancing these missions include:

- using the tool of unified accreditation to increase access and improve outcomes for students academically, socially/emotionally, and with respect to post-graduate success.
- strengthening coordination and communication among the universities, Law School, and System office while reducing internal competition, particularly around recruitment.
- identifying and implementing the educational efficiencies to be achieved through our unified environment and operating model.

An example drawn from one of the three areas above: the universities have made demonstrable progress in communicating with prospective and admitted students. For the summer/fall 2021 admission cycle, the universities accelerated their traditional timelines for review of applications and admissions decisions, sending letters to accepted students an average of several weeks to several months earlier in the year than in prior cycles. Across UMS, this change produced 7,237 matriculations by the start of the fall 2021 term, up from 5,718 at the same point in fall 2020 (a 26.6% increase).

Relatedly, every UMS university agreed to stop recruiting students who had applied to more than one of our universities as soon as those students accepted an offer from any one of our universities. This change reduced wasted effort by staff and potentially confusing messaging to incoming students.

#### **Projection**

UMS will continue to use unified accreditation to advance strategic initiatives serving students and the state. The self study process and UMS strategic planning effort, in tandem with ongoing UMS and university-level initiatives addressing student success, DEI, research, infrastructure, and other priorities, will sharpen and strengthen the missions of UMS, its universities, and its Law School.

Beginning in Fall 2023, a new UMS strategic plan will guide mission-specific activity, including university strategic plans, research planning, infrastructure and capital planning, budgeting and resource allocation, and economic and workforce development planning. In addition, the plan will help us prioritize and respond to action items emerging from the Commission's review of our October 2022 comprehensive evaluation. The five-year direction for UMS shared by NECHE will be consonant with and embedded in our strategic values, goals, action steps, and assessments.

Following completion of the UMS strategic plan, and in consultation with the Chancellor, the Law School will bring forward its proposed mission statement for review and approval by the Board.

## **Standard Two:**

# Planning and Evaluation

#### **Description**

Planning and evaluation in UMS occur at multiple levels. The Board of Trustees (Board) has oversight of UMS initiatives enacted through the Chancellor's leadership. Those initiatives are currently guided by Board strategic priorities set forth in 2016 and 2018. System-wide committees and work groups with representation from UMS and the universities and Law School coordinate planning and evaluation to meet university- and System-level goals.

Central to planning and evaluation is the institutional research (IR) and assessment function supplied by several offices at the UMS and university levels. UMS established a UMS IR office in 2016 with three full-time staff who report to the Vice Chancellor for Academic Affairs (VCAA). UMS IR provides regular UMS and university reports and data for academic and research needs, data support for UMS committees, and data requested by the Maine legislature.

Five UMS universities maintain institutional research offices with one (UMF) to four staff (UM and UMA). University IR supplies reporting and analysis at the university, department, and program level on retention and graduation, credit hours, and enrollment trends, conducts student surveys, projects enrollment and credit hours, and provides data for academic program reviews.

A third component of UMS institutional research support is the Office of Data, Analytics and Reporting Technology Services (DARTS). DARTS leads and supports data infrastructure, data governance, data literacy, research, and analytics. Together, UMS IR, university IR, and DARTS ground decision-making in valid data suitable for strategic and operational applications.

To ensure System-wide data consistency and integrity, UMS developed the Data Governance Program in 2017. It includes a five-member Council advised by a Data Advisory Committee with roughly 25 representatives from the seven universities and the Law School. In its first five years, Data Governance has adopted the UMS Data Cookbook (housing functional and technical enterprise data definitions developed collaboratively across UMS and its functional areas), established consistent definitions for Early College and distance education, among other areas, and created a report certification process.

# I. Planning Strategic planning

Strategic planning in UMS is multi-tiered. While much of it occurs individually at varying levels—e.g. System-wide shared services, collaborative programs, and the universities and the Law School—emphasis is on the alignment of plans and planning to ensure UMS priorities remain in step with mission-specific priorities defined at each university. Strategic planning at all levels informs capital and facilities planning, enrollment management, financial planning, academic program development and approval, and student and community service programs. Strategic differentiation is encouraged in the context of UMS priorities designed to meet state and regional needs.

At the highest level, the Board develops and disseminates priorities, goals, and strategies. These are made public through a variety of means: their content is communicated by university leaders and by the Chancellor and his senior staff. These priorities, goals, and strategies reflect strategic planning focused on enrollment, student learning, retention, research and economic development, state workforce needs, and related areas.

All UMS universities maintain strategic plans developed in an inclusive manner that engage their stakeholders. University plans are expected to align with UMS priorities while identifying mission-differentiation and areas for non-duplicative innovation.

In addition to UMS and university planning, shared services, including IT, finance, and human resources, engage in regular planning processes to ensure they meet the needs of UMS, its universities, and the Law School.

Through unified accreditation, numerous collaborative academic and student-support programs involving two or more UMS universities have been forged. An example is the University of Maine at Fort Kent's (UMFK) bachelor of science in nursing (BSN) program at the University of Maine at Presque Isle (UMPI). Students begin at UMPI and then continue as UMFK students with no need to relocate, as all BSN classes are also offered live on the UMPI campus by UMFK faculty on that campus. In this program, UMFK grants the degree. Planning and operationalization involves administrators from both universities who annually review staff, faculty, student, curricular, and resource needs and make appropriate changes and investments.

#### **Standard Two:**

Planning and Evaluation

### **Contingency planning**

Planning for unanticipated events originates from the Board and Chancellor in consultation with the presidents. Decisions requiring further development and/or discussion are typically delegated to cross-university functional teams (e.g. finance, IT, HR). Options are reviewed by university leadership and in most cases are routed to the UMS Presidents Council for resolution.

Shared services leaders convene regularly— and exigently as needed— to plan for and respond to unforeseen events, with support and facilitation by UMS senior staff. IT leaders, for example, supply additional technology as needed to support faculty, staff and students, while the chief business officers work with the Vice Chancellor for Finance and Administration (VCFA) to plan for absorbing an appropriation curtailment or rescission.

#### **Examples of success**

The Board's 2018 strategic priorities included the goal of increasing adult degree completion. Per the recommendations of the June 2018 UMS Adult Degree Completion report, the Adult Degree Completion Committee was established with representation from every UMS university. With support from UMS staff, the committee identified resources adult completers need. A website provides these resources while also serving as a promotional tool in a statewide marketing campaign. In addition, UMS hired two success coaches who now deliver broad-based services to guide adult learners into UMS and help them make progress in their academic careers.

UMS shared services regularly undertake planning with university and Law School input. An example is the successful implementation of a new System-wide learning management system (LMS) in 2020. The UMS Educational Technology Advisory Committee (ETAC), which includes faculty and UMS and university staff, shepherded the selection of the new LMS from the request-for-proposals (RFP) stage through final implementation.

The LMS effort was guided by needs and desires expressed by faculty and IT personnel in surveys; that input was fed into the RFP. ETAC led the evaluation of proposals and hosted vendor presentations at the annual UMS Faculty Institute to get further feedback from faculty users. As the new LMS was launched, ongoing support for endusers was delivered through regular trainings, including virtual one-on-one sessions.

### II. Evaluation

For the purpose of sustaining a cycle of continuous improvement, evaluation occurs at all levels of the institution, from System reporting on strategic priorities to local academic program review and assessment.

#### **UMS** evaluation

System-wide initiatives responsive to Board priorities include those that reach first-generation students, adult students, Early College programs, financial aid, and distance education. Standing committees lead that work and regularly review data informing collaborative planning. For example, the UMS Student Success Steering Committee tracks data on return rates, low/failing grade rates, and stop-outs and shares it with the appropriate university offices and staff for use in supporting students.

Planning efforts for meeting Board priorities are undergirded by standard reporting and topical research (e.g. benchmarking analyses, labor studies) using internal and external data. Examples can be found on the UMS student reports website and dashboard. A set of key performance indicators measuring financial health, enrollment, and student success is monitored regularly by the Board.

In 2018, UMS introduced a Programs for Examination (PFE) process initially designed to "foster broader collaborative discussions among faculty and academic administrators regarding program size in the context of mission, quality, and sustainability." PFE has since evolved to serve as a continuous improvement process. Through it, the universities use data provided by UMS IR along with information collected from academic units to evaluate the current and projected future state of programs. In spring 2022, PFE was renamed the Annual Academic Program Report (AAPR).

At the end of each AAPR cycle, the Chief Academic Officers present highlights to the Board. Examples of improvements reported in the spring 2021 cycle were the modification of UMA's Contemporary Music program to permit fully online delivery, which has led to increased enrollments; diversification of undergraduate populations in UMPI's YourPace competency-based education programs; and the development of an interdisciplinary major at UMF.

### **Evaluation of shared services**

To provide more efficient services and deploy resources strategically, UMS began to adopt a shared services model in 2006, when the UMS Shared Processing Center was established to manage back-office processing of all applications. In fiscal year 2013, the following shared services were launched: Finance and Administration; Information Technology; Facilities/Capital Planning and Project Management; Strategic Procurement; Risk/Safety Management; Human Resources; and Equal Opportunity. Each marshals the work of either a mix of UMS and university staff, or UMS staff assigned to support a specific university or universities, typically in direct collaboration with university leadership.

Evaluation processes vary to account for local priorities and needs. The universities apply a range of assessments to measure progress in achieving university- and program-level strategic goals, including seeking external reviews, conducting campus-level surveys, and tracking student success, financial aid, and university- and departmental-level budget metrics.

#### **Institutional research**

As noted above, four UMS universities have institutional research offices. USM has separate IR and assessment offices, while IR offices at UM and UMA fulfill combined IR and assessment functions. The IR function at UMPI and UMFK is served by a university staff member in another role and by UMS IR staff. University IR provides reporting and analysis at the university, department, and program levels. Regular reports and analyses on low/failing grades and course withdrawal rates, student success, university and course-level enrollment projections, and admissions trends are among the outputs of university IR, which also supports surveys and provides data for program accreditation and reviews.

#### **Evaluating and informing strategic plans**

UMS universities engage in a continuous improvement cycle of strategic planning, implementation, and evaluation. For example, at USM, benchmarking and a campus survey conducted by the Data Innovation Project will guide a community policing model for the university's Department of Police and Public Safety, while UMPI's strategic plan outlines a set of key results that will be tracked over the next five years.

At UM, a year-long evaluation of the 2012-17 Blue Sky strategic plan was followed by the creation of the Strategic Vision and Values framework. In fall 2020, a working group set key indicators to track progress in meeting the goals of that framework. At UMF, a new structure for planning is in development, and the evaluation of elements in the UMF strategic plan completed in 2021 will rely on key performance indicators tied to the plan's goals, with targets and actuals compared and assessed.

#### **Academic programs**

UMS universities regularly track student demand, costs, and revenue associated with academic programs. These and related measures are incorporated in the AAPR process. (In 2017, every UMS university participated in the National Study of Instructional Costs and Productivity. Its structure and definitions did not align well with some universities' needs, and use of the data was not widespread. At this time, only UM still participates.)

Programs with specialized external accreditation adhere to the evaluation requirements of those accreditors in addition to all NECHE standards. This may entail specialized data management. For example, UMS education programs use TK20 to ensure compliance with Council for the Accreditation of Education Programs (CAEP) assessment expectations.

Expectations for academic program review (APR) differ across universities. For example, USM's APR requires that the self study explicitly reflect on the program's contributions to the university's Vision 2028 document, and the combined self studies allow USM to benchmark its progress on that academic vision. All UMS universities use academic program reviews for broader planning purposes, including benchmarking progress on their academic goals.

### **Collaborative programs**

Evaluation of collaborative programs follows the model outlined above. The university granting the degree is primarily responsible for program evaluation, and the general principle applied is that all faculty and courses are evaluated regardless of university affiliation. In the UMA-UMPI cybersecurity partnership, UMA is a degree-granting university and program evaluation is undertaken at both universities.

Another example is the UM Graduate School of Business, a collaboration of UM and USM faculty. Evaluation is conducted at multiple levels: two comprehensive committees— the Curriculum Committee and the Steering Committee— benchmark against other programs to develop suggestions for curriculum improvements and for

strengthening learning outcomes used in the assurance of learning. Direct assessments and surveys of completers are among the means used to assess learning outcomes.

#### Student success and satisfaction

As noted above, the universities regularly track student success metrics such as retention and graduation rates, low/failing grades and course withdrawal rates, and GPA. Some also share data with external entities such as the Consortium for Retention Data Exchange and the Student Achievement Measure. There has also been growing use of the EAB Navigate tool, which provides data collection and analysis with predictive capabilities for faculty and professional advisors (see Figure 6, p. 96).

All UMS universities survey students, faculty, and staff to gauge satisfaction and collect information informing organizational change. All participate in the National Survey of Student Engagement (NSSE) every three years, and in the Great Colleges to Work For survey. Data are shared with university stakeholders and are used for planning. The universities also periodically survey students about learning, campus activities, technology tools, dining services, and campus climate. In the first two years of COVID, several universities surveyed their constituencies about health and safety contingency planning.

Some UMS universities consistently survey their students at or after graduation. For example, USM conducts a survey of seniors upon application for graduation. That data and NSSE data are used to track progress toward meeting student satisfaction. Similarly, UM has conducted its Life After UMaine survey for over 20 years. Those data are used to track the percentage of graduates employed or in graduate school, and the extent to which they felt prepared for their post-college endeavors. The UM Graduate School surveys its students upon graduation and uses the feedback for planning purposes. In addition, planning is underway to administer the National Association of Colleges and Employers (NACE) First Destination Survey in December 2022.

#### **Appraisal**

#### **Collaborative strategic planning**

As outlined in the Institutional Overview, UMS is currently engaged in a System-wide strategic planning process. The process follows a clear published timeline, includes numerous opportunities for stakeholder engagement, and has been designed to harmonize with ongoing unified accreditation efforts and the development of this self study.

Unified accreditation has united UMS and its universities and Law School in a way that compels intentional strategic planning. Planning processes and the communications attendant to them are evolving accordingly. As evidence of this, numerous UMS initiatives, shared services, and academic programs plan collaboratively.

For example, UMS Title IX processes and compliance operate as a collective, with centralized procedures and shared support for policy implementation and case management, and Title IX offices and their staff support multiple universities. The Title IX hearing officers and advisors comprise an inclusive and consultative group acting in a unified way.

As more functional areas have begun shared planning across the universities, existing roles and responsibilities are shifting. Policies addressing expectations of staff and use of resources are being reviewed and revised to support effective collaboration and cooperation in the unified environment. This includes an updating of UMS Administrative Practice Letters (APLs) led by the Vice Chancellor for Academic Affairs (VCAA) in consultation with the UMS Faculty Governance Council and the Chief Academic Officers.

Currently, the universities and Law School are accountable for meeting individual performance benchmarks, but these benchmarks are not necessarily used for System-level planning. Aggregated benchmarks have not yet been developed to assess the extent to which shared services and other System-wide functional areas are responsive to specific university-level goals and objectives.

#### **Contingency planning**

In most forms of contingency planning, there is inherent tension between UMS- and university-level priorities. While there is a collaborative environment generally, there are legitimate but sometimes unproductively competitive pressures to preserve and protect individual university priorities. For instance, when planning for high-demand academic and workforce development programs, questions about which university or universities stand to benefit most can invite disagreement and competition.

## Assessing adult learners, first-generation students, and related populations

Data are regularly provided to committees tasked with improving student success, degree completion, and access for adult learners and first-generation students. However, a framework for the systematic (global) evaluation of these and related initiatives does not exist. In short, although data and analyses support this work, an assessment cycle of continuous improvement for these populations has not yet been instituted.

## Improving coordination of IR activity and UMS- and university-level planning

University IR capacity varies across UMS, a reality which can sometimes serve as a barrier to System-wide evaluation of programs and priorities. Improvements have been made since the creation of the Data Governance structure and the UMS IR office, but more work is needed to ensure adequate coverage. For example, under ideal conditions, all UMS universities and the Law School would follow the same or similar schedules for collecting information throughout the student life cycle. As IR and assessment resources are not staffed equally, additional responsibility sometimes falls to staff in other university functional areas (e.g. Student Records, Academic Affairs) when data are needed for System-level planning.

#### **Projection**

As noted in our response to item 11.b on the Institutional Characteristics Form, UMS universities do not follow a uniform definition of "non-credit activity," and do not share a single database where non-credit enrollments are entered. We are pursuing an avenue for accomplishing both.

#### Multi-university academic program planning, evaluation, and assessment

The evaluation structure for multi-university collaborative academic programs relies partly on processes originally designed for evaluating single-university programs and courses. While all students are assured the chance to complete a student evaluation of teaching in courses delivered jointly by two or more universities, a cycle of assessment tailored for multi-university programs and leading to the continous improvement of those programs has not yet been developed. (See Standard Eight for an update on our progress in assessing academic programs.)

More effective evaluation may require revisiting current KPIs to confirm that they continue to reflect the missions and strategic plans of the universities and Law School in relation to UMS priorities. KPIs should be associated with defined goals in order to provide an informed and responsive basis for UMS oversight and support for university and Law School strategic plans and planning.

### **Standard Three:**

# Organization and Governance

#### I. Governing Board

#### Description

#### **Organization and governing Board**

The Charter (P&S Laws 1985, chapter 532 as amended) of the University of Maine System (UMS), state law (Title 20-A MRSA, chapter 411), and the UMS Board of Trustees (Board) bylaws (Section 103) and policies describe the public policy on higher education, the authority and responsibilities of the Board and its appointed officers (Chancellor, Presidents, Treasurer, and Clerk), and the governance relationship among the Board, administration, faculty, and students.

The Board is the legally constituted body ultimately responsible for UMS's quality and integrity. This authority and responsibility are vested through Maine state statutes and Section 4 of the UMS charter. The Board comprises 16 members, 15 of whom are appointed by the Governor and approved by the Maine legislature through a public confirmation process. The appointment process is meant to ensure that the Board is sufficiently independent to act in the best interests of all UMS universities. Fourteen trustees are appointed for five-year terms, a full-time student serves as a voting member for a two-year term, and the State Commissioner of Education serves as an *ex officio* voting member.

The Board has adopted policies and bylaws defining its governance authority, responsibilities, and procedures. Each university has a president who reports to the Chancellor. The structure of the System is supplied in organizational charts that display the working order of the institution (see pp. XXVI-XXXIV). The Chancellor oversees UMS academic, research, administrative, finance, and development functions.

Board members are bound by a code of ethical conduct. Article 1, Section 1.2c of the UMS policy manual reads: "A Board member shall not vote on a matter in which he or she has a financial interest[,] and each Trustee shall be bound by an appropriate code of ethics, as adopted by the Board of Trustees." In addition, the Board's operating principles require that its members:

- Be accountable for governance, policy-making, and making decisions that are the responsibility of the Board of Trustees.
- Understand and respect the public's need for trust in office holders. Avoid conflict of interest concerns, both real conflict and the possibility of perceived conflict.
- Understand UMS finances.
- Be forthright with concerns. Concerns should be brought forward as they arise to the Board Chair, the Chancellor, or the appropriate committee chair.
- Advocate for higher education with the public and elected officials in coordination with, and awareness of, the Chair, Chancellor, and System senior staff.

The elected Chair and Vice Chair and committee chairs form the Board's Executive Committee. They organize the Board's work and represent the broader body as required. The Board applies an inclusive process and develops consensus collectively. On major decisions— e.g. hiring a Chancellor or President, approving a budget or a tuition increase, or altering a university's mission— the Board acts through a deliberative process.

The Board Chair is evaluated annually, and other Board members complete an annual self-assessment. These practices are referenced in Board bylaws under Article II, Section 2.3 and Section 2.6. The Board communicates regularly with the Chancellor and UMS senior staff.

The Board makes policy for UMS and oversees its implementation, provides leadership within UMS and in the state, and is committed to strengthening postsecondary education, the unique characteristics of each UMS university and the Law School, and UMS as a whole. The Board is responsible for hiring the Chancellor and plays a central role in hiring university Presidents.

The Board advocates aggressively for resources to support UMS and is responsible and accountable for resource stewardship. In 2018, the Board released a Declaration of Strategic Priorities to Address Critical State Needs that guided resource allocation and investment until 2021.

The Board is the UMS governing and planning body and is responsible for supporting and enhancing its mission, providing sound financial management, exercising prudent stewardship of assets, evaluating the Chancellor and Presidents, allocating resources and planning strategies for programs that most effectively serve the educational needs of citizens, developing and maintaining a strong system of accountability to the public for performance results, visibly advocating for higher education as a means to strengthen the economy and communities of the state, and establishing mechanisms for review and approval of programs. It has final authority over all matters in its jurisdiction, including all educational, research, and public service policies, financial policy, and the relation of UMS to the state and federal governments.

At the UMS level, there is a student Board representative from each university and one student trustee. At the campus level, various structures exist. Some universities have student senates that present reports to the Faculty Senate, and others (like the University of Maine) have undergraduate and graduate student representatives to the Faculty Senate and to the Provost's Council. Each of the seven universities has a faculty governance body (senate or assembly). The Law School is governed by its own Faculty Personnel Policies addressing initial appointment, reappointment, promotion, and reappointment with tenure.

The Board includes the non-voting roles of faculty and student representatives. Board policy provides for one faculty member and one undergraduate student from each of the seven universities, and two graduate students representing the universities that house expanded graduate programs. There is also a student representative from the Law School. A faculty representative and student representative serve on the Board's Academic and Student Affairs Committee (ASA) and Finance, Facilities and Technology Committee (FFT). They are not present for Board executive session meetings.

#### Internal UMS governance

The Board appoints the Chancellor, UMS Presidents, the Treasurer of the Board, and the Clerk of the Board. It also approves members of the Boards of Visitors for each UMS university. The responsibilities and authority of these officers and the Boards of Visitors members are defined in the charter, state law, and the Board's bylaws and policies.

The Board conducts its business through meetings of the full Board and its standing committees: Executive Committee; Academic and Student Affairs Committee; Audit Committee; Finance, Facilities and Technology Committee; Investment Committee; and Human Resources and Labor Relations Committee. The Board annually engages in a self-

#### **Standard Three:**

Organization and Governance

evaluation process and an evaluation of the Board Chair's performance. The full Board meets as a whole in person six times per year to conduct business. (During the first two years of the pandemic, the Board and its committees met via Zoom. In-person meetings resumed in March 2022.) The standing committees meet in the intervening weeks. The Board holds an annual two-day retreat and a yearly summit with the Boards of Visitors of all UMS universities.

Under state law, the Chancellor is the chief administrative and educational officer of UMS. The Chancellor provides leadership to UMS in addressing the state's highest priority needs; establishes a vision and planning to provide quality education that is affordable and accessible for students and strengthens the economy of the state; promotes planning for academic and student affairs, outreach and community services, financial operations, capital plans, and resource allocations; prepares operating and capital budgets, appropriation requests, and bond issues; takes an active role in the nomination, appointment, and evaluation of the university Presidents and other major staff positions; develops and enacts an effective statewide public relations and legislative program; provides centralized management oversight of services; and coordinates academic offerings.

The Chancellor, Presidents, Law Dean, Vice Chancellors, and additional UMS senior staff comprise the Presidents Council and serve as the UMS leadership team.

The Treasurer of the Board has custody of all monies received, makes all expenditures upon authentication, exercises revenue bonding authority with the approval of the Board, and prepares the annual UMS financial report. The Clerk of the Board manages Board affairs and records all proceedings.

The Presidents and Law Dean serve as the chief administrative and educational officers of their universities, with responsibility for day-to-day operations and development of the

academic program within the limits defined by the Board and the Chancellor. Presidents are responsible for five major areas of campus governance: academics, research, finances, infrastructure, and public service/community engagement. (Following a multi-stage service centralization process, UMS is responsible for environmental safety, human resources, facilities maintenance, IT, risk management, procurement, and travel.)

Per Board policy, the Chancellor conducts an annual review of each President. Comprehensive reviews are conducted in the third year of a President's initial term and every fourth year thereafter. The Chancellor reports the outcome of each review to the Board.

Four Vice Chancellors, all reporting to the Chancellor, oversee primary UMS academic and administrative operations in academic affairs, finance, research and innovation, and strategic initiatives. The current Vice Chancellor for Strategic Initiatives is also UMS Chief Legal Officer and the Chancellor's Chief of Staff.

The Chief Academic Officers Council (CAOC) comprises the six university Provosts, the Law School's Vice Dean, the University of Maine at Machias's (UMM) Dean and Director, and the Vice Chancellor for Academic Affairs (VCAA) and his staff. The group works collaboratively to formulate academic procedures and manage the UMS academic portfolio.

At UMFK and UMPI, the President also serves as CAO. At four other UMS universities, the CAO is a separate executive leadership position reporting to the President. Under a new UM-UMM organizational chart approved by the Board in March 2022, the UMM Dean and Director reports to the UM Provost.

The CAOC reviews and maintains policies and procedures for admission, retention, and completion of programs as a part of the program development process, and ensures consistent application across UMS. With input from the CAOC, the VCAA decides on proposed substantive changes to existing academic programs and makes recommendations to the Chancellor on program approval, suspension, and elimination. The Chancellor in turn advances the VCAA's recommendations to the Board for final action.

The universities and Law School manage their budgets individually. The needs and aspirations of each are represented in annual budgeting processes, one-time allocation decisions, and short- and long-term fiscal planning. Tuition revenue, state appropriation, research dollars, and other sources of revenue are carefully managed in support of each university's teaching, research, and service mission.

Each university has an organizational structure, decision-making processes, and policies that reflect its mission and support institutional effectiveness. Each has a published mission statement approved by the Board. UMS and its universities adhere to published statements on shared governance. An example of faculty shared governance is the review of proposals for the creation, elimination, and reorganization of academic programs, a process followed by each university's faculty senate or faculty assembly.

#### Collective bargaining

UMS has six collective bargaining units. Full-time faculty are represented by the Associated. Faculties of the University of Maine System (AFUM/MEA); part-time and adjunct faculty are represented by the Maine Part-time Faculty Association (AFT-Maine, AFL-CIO); professional staff are represented by the University of Maine Professional Association (UMPSA/MEA); classified staff are represented by the University of Maine Clerical, Office, Laboratory and Technical Unit (C.O.L.T./ACSUM/MEA); University of Maine clerical and physical facilities staff are represented by the Teamsters; and university police bargain as the Fraternal Order of Police Lodge #100. All contracts are renegotiated on a two-year cycle and negotiations with all these entities are conducted at the UMS level.

#### **Appraisal**

#### Unified accreditation language and internal management of NECHE activity

In September 2021, following several months of discussion internally and with NECHE staff, the UMS Presidents' Council adopted 1) language describing the NECHE accreditation of UMS, its universities, and the Law School, and 2) a process for the internal management of NECHE visits, reports, and correspondence. The latter was applied successfully last fall to a UMF substantive change proposal, and to a report and site visit addressing UMA's prison education programs.

## Multi-university academic programs and the Cooperating Departments provision

The AFUM collective bargaining agreement includes a provision on Cooperating Departments. The provision states the terms and conditions in which faculty at two or more UMS universities can cooperate to teach courses in each other's programs.

Some faculty have expressed concern that UMS has not engaged with this provision adequately, and purport that UMS seeks instead to offer a degree program or programs taught at multiple universities and awarded by UMS. UMS has responded to this concern in prior correspondence with the Commission.

#### **Composition of the University of Maine System Board of Trustees**

Faculty and staff have no vote on the Board and are not included in Board executive sessions. A voting student trustee appointed for a two-year term participates in executive sessions. Legislation proposed in 2020 to expand the Board to include faculty and staff as appointed and voting trustees was not successful. A similiar proposal in 2022 was also unsuccessful.

#### Post-unified accreditation staffing changes

In August 2020, UMS hired an Associate Vice Chancellor for Academic Affairs, followed by an Associate Vice Chancellor for Accreditation and Strategic Initiatives that December. These are new positions, as are the Vice Chancellor for Research and Innovation (the incumbent is also the President of the University of Maine) and the Vice Chancellor for Strategic Initiatives and Chief Legal Officer, both announced by the Chancellor in March 2021. In keeping with UMS's commitment to maximize existing resources under unified accreditation, the four positions were filled by personnel internal to UMS and its universities.

Some faculty expressed concern in 2020 when the then-Interim Vice Chancellor for Academic Affairs (VCAA) was appointed to the permanent position without a search or faculty input, and in 2021 when the Chancellor announced a rewriting of the position description for that role to better align with the incumbent VCAA's skills. In the latter instance, the concern was that the VCAA did not meet the previous position criteria. In correspondence with NECHE, UMS has responded to concerns about the four positions voiced by the current AFUM President.

#### **Faculty governance**

Under state law, UMS faculty enjoy traditional academic freedoms in teaching, research, and expression of opinions, and faculty are to be consulted in the formulation of academic policies. The *Statement on Shared Governance* approved by the Board in 2007 affirms the Board's support of governance systems and processes characterized by collaboration among the Board, administration, faculty, staff, and students in communication and decision-making. The statement also sets forth the Board's commitment to fostering an atmosphere of trust, communication, and participation through an approach to governance whereby the talents and collective intelligence of the UMS community are used to make effective and efficient decisions.

All UMS universities have faculty and student senates or assemblies—and in some cases, professional and classified staff senates or assemblies— that engage in university-level shared governance.

#### **Establishment and progress of the UMS Faculty Governance Council**

To foster a unifying System-wide mechanism for shared governance for academic collaborations and programs involving two or more UMS universities, the Chancellor invited university faculty senate and assembly leaders to meet with him and members of his senior staff in January 2020. At that meeting, the faculty leaders agreed that during the nascent stages of a unified approach to shared governance, the seven senate/assembly presidents, with the VCAA participating *ex officio*, would form a UMS Faculty Governance Council (Council) to address multi-university academic and curricular policy and programming.

The Council serves as an instrument for exercising faculty purview over multi-university programs and related academic initiatives, ensuring that UMS meets NECHE expectations that faculty have primary responsibility for the content, quality, and effectiveness of the curriculum, and a substantive voice in matters of educational programs, faculty personnel, and other aspects of institutional policy relating to their areas of responsibility and expertise.

As of spring 2022, the Council is confirming its alignment with individual university faculty governance bodies— assemblies and senates— and with existing frameworks and contractual language offered by AFUM for Cooperating Departments (see above). The Council is also working with faculty and university and UMS leadership to refine its own comprehensive structure as well as policies and practices buttressing shared internal academic governance and offering a platform for equal representation of all universities and their stakeholders.

One issue UMS shared with the Council and sought its input on is the development of a governance structure to accompany the implementation of the new UMS learning management system (LMS), Brightspace. UMS fully migrated from its prior LMS to Brightspace in fall 2020 following summer 2020 pilots.

The Faculty Governance Council is responsible for attentiveness to issues relevant to multiuniversity programs, defined as those involving two or more universities collaborating to develop, deliver, and maintain a single program: degree, certificate, or other credential. The Council will offer an appropriate framework of ensuring consistent oversight of sustainable multi-institutional programming proposals aligned with UMS strategic initiatives under unified accreditation.

#### **Standard Three:**

Organization and Governance

As noted in the spring 2021 NECHE evaluation team's report to the Commission, the Council has grappled with defining its role (as consultative or advisory rather than as a decision-making body). It has also wrestled with how best to work alongside existing university-level governance structures and serve as a resource for communication and coordination with UMS leadership while not superseding university structures. Two additional challenges have been 1) designing a workflow allowing for more interaction with university faculty without compromising nimbleness; and 2) managing the growing pains of an expanded group and the general resistance that occurs during a change process.

The Council has met regularly since September 2020 to address these issues, and continues to participate in UMS-led unified accreditation efforts. The Council has reached positive outcomes in several areas, including:

- drafting a charter and determining the composition of its membership
- · optimal size of the Council
- representation from stakeholder groups (e.g. AFUM)
- development of an internal leadership structure, including a co-chair model
- inclusion in the charter of an evaluation clause outlining how and when the Council will review, and possibly revise, it.

The Council continues to pursue final resolution on its charter. Six of the seven university faculty bodies and the Law School faculty body have approved it.

The evaluation clause and its attendant review mechanism are important. The review will help the Council assess whether the Council has been effective in fulfilling its intended purpose, and whether its structure and functions, as defined in its charter, have supported or undermined the universities' respective missions.

The Council has been directly engaged in a number of UMS initiatives. It has helped place faculty representatives on the Unified Catalog project management team and on the two self study data teams (Data First and E Series). The Council met with the previous NECHE evaluation team in May 2021, and took part in Chancellor Malloy's comprehensive review in March 2022. The Council has also reviewed plans and proposals tied to four Systemwide initiatives: the UMS librarians' strategic plan (in 2021); UMS learning management system governance structure proposals (in 2020-21); UMS course (coding) component data standards proposals (ongoing); and a review of UMS Academic Practice Letters (APLs) led by the Vice Chancellor for Academic Affairs (ongoing).

Some faculty view the role of the Council as unclear, with concerns that it not supersede university faculty senates and assemblies. A charter revision has been developed and shared with the Council that addresses these concerns. A related faculty concern is that distinctions between the Council and university-level shared governance should be more

fully articulated, and that department/program and university-level faculty governance of academic matters must be respected.

#### **University governance concerns**

Notwithstanding policies that articulate faculty responsibility for academic programs, some faculty contend that recent UMS initiatives to share or merge programs across universities, including the unique partnership between UMM and UM have, in practice, blurred the lines of responsibility for programs and faculty. (Since 2017, UMM has been a regional campus of UM and shares its administrative personnel.) For example, the merger of faculty from more than one UMS university into a single program or unit has raised questions about criteria for appointment to the graduate faculty of each university, promotion and tenure criteria, and related matters.

#### **Update on the Maine Business School**

In 2018, UM and UMS reorganized the UM Business School (MBS) as the Graduate School of Business (GSB) and the Undergraduate School of Business. The GSB will house planned future graduate programs in business for UMS universities. GSB faculty include UMaine faculty with graduate appointments, and USM faculty with graduate appointments in the MBS. The GSB offers an online UM MBA led by a Dean based in Portland who reports to the UM Provost.

Per the agreement between UMS and the Harold Alfond Foundation, which provided critical support for the development of the multi-university MBS, the only UMS MBA to be offered is the UM MBA; the face-to-face USM MBA is no longer delivered. Some faculty view this as a reduction of choice for students, and have expressed concerns about resource waste and the possible influence of donors on curricular and programmatic matters. UMS has responded to these and related concerns about the MBS voiced by the current AFUM President and others in pre-unified accreditation reporting (see the 2019 UM-UMM self study, pp. 20 and 65-66) and in more recent correspondence with the Commission.

MBS governance concerns have also been addressed in part by UM and USM graduate faculty's December 2018 adoption in principle of a governance document for the GSB. The document reflects substantive faculty engagement in establishing a) a process and criteria for appointment and reappointment; b) participation, including voting, in matters of GSB curriculum and governance, meetings, rules of order, quorum, and agenda setting; and c) committees. The committee structures establish faculty governance roles in the coordination and delivery of business programs; budget management, course scheduling, faculty teaching assignments, and matters of accreditation; and curriculum, including assurance of "a well-documented and systematic process for determining, revising, and assessing degree program learning goals."

The MBS and its GSB have added a new major in sport management in the BSBA program and receiving approvals for two new concentrations for learners in the Maine MBA. Led by faculty, MBS has developed DEI programming that includes film screenings and discussions alongside training for faculty and staff.

The MBS and its GSB obtained unit accreditation with AACSB after NECHE granted unified accreditation to UMS in 2020. This step means the MBS and its GSB are the unit of focus for AACSB accreditation. As support from the Harold Alfond Foundation ends in fiscal year 2022, UM has budgeted the \$1.2 million needed for two faculty lines, a GSB Dean's position, adjunct salaries, and an administrative assistant for fiscal year 2023. The MBS has contributed \$50,000 toward technology in a classroom to enhance connectivity between the new home for the GSB in 2023 (in Portland) and the UM MBS home in Orono.

Enrollment in both the BSBA and MBA programs is strong, with 1,687 (unduplicated) for fall 2021 and expectations for 1,500+ for fall 2022. Working with a marketing firm, MBS

Organization and Governance

and GSB leadership have invested in developing a combined value proposition. Available in Orono, Portland, and online, the MBS and GSB is comprehensive and competitive.

#### The Unified Catalog initiative

As described in the April 2021 UMS progress report to NECHE on unified accreditation:

[E]ach UMS university's academic programs and courses are currently housed in separate, university-specific "instances" in our "MaineStreet" (PeopleSoft) academic catalog[ue], with limited functional capacity for interaction. As a consequence, there is presently no way for data about courses, credit transfer, registration, billing, and related functions to be shared easily between or among UMS universities via MaineStreet. What should be a seamless academic experience supported by an efficient, behind-the-scenes flow of information available to students and faculty across UMS institutional boundaries is instead frequently frustrating for students, faculty, professional advisors, and academic and student support staff (p. 6).

In response to that challenge, the Unified Catalog initiative seeks to remove barriers and increase opportunities for students, faculty, and staff by expanding access to courses and schedules offered across our universities while ensuring that we indicate how— and which— courses align with a student's academic program. This is true for students taking a single course at one university to fill an elective or gap in their program at their home university, and for students enrolled in a collaboratively delivered multi-university course or program.

#### Specific goals include:

- Making links to the Schedules of Classes of all of our universities and the University
  of Maine School of Law visible and searchable in a single place within a student's
  MaineStreet portal for all students at all of our universities and the Law School.
- 2. Making links to the Academic Catalog[ue]s of all of our universities and the University of Maine School of Law available to all students in a single place within a student's MaineStreet portal.
- 3. Working with faculty, registrars, financial aid directors, professional advisors and others to align technical and procedural elements of academic policy and practice (where appropriate) to eliminate obstacles and foster conditions for success for students, faculty, and staff.
- 4. Supporting the development and delivery of high-quality multi-university academic programs, collaborative courses, and related academic pathways and partnerships.
- 5. Improving transfer, retention, time-to-degree, and related student success indicators through achievement of the goals outlined above.

This work is led by the Associate Vice Chancellor for Accreditation and Strategic Initiatives and a project team of administrative and professional staff from all of our universities, and includes representatives identified through the UMS Faculty Governance Council. Work is underway in earnest on goal #3 above. As of May 2022, faculty across UMS are reviewing three initial areas of proposed changes to policy and practice: 1) an alignment and format change for an academic form; 2) alignment of facets of transfer activity; and 3) alignment of the undergraduate residency requirement across UMS — in a draft process and timeline document describing how and when that work will be done.

Some faculty have expressed distrust over the creation and future uses of such a catalogue. Others have embraced the concept. (Note: the Unified Catalog effort will not result in a single System-wide catalogue. Each university will retain its own catalogue. The exception is the development of a single catalogue for UM and its regional campus, UMM. That project predates the Unified Catalog work and is not connected to it.)

#### Faculty concerns about communication and shared governance

Some faculty have reported concerns about delays in information-sharing, lack of information, or short deadlines for feedback on UMS policies and initiatives. Faculty

Senates have, on occasion, requested improved communications from the UMS administration and/or passed resolutions regarding faculty control over curricula and Board policy. UMS has responded in detail to concerns shared with NECHE by the current AFUM President about communication in relation to the June 2020 UMS substantive change request for UMS accreditation.

#### **Projection**

As noted above, in coordination with NECHE staff, UMS developed a protocol for managing site visits, reports, and correspondence with the Commission in September 2021. The protocol reflects UMS's Guiding Principles for Unified Accreditation and was endorsed by the UMS Presidents Council. It will ensure Presidents are directly engaged in NECHE business relevant to their universities, that the UMS NECHE accreditation liaison officer supports university accreditation officers in annual reporting and related reporting (e.g. substantive changes), and that communication between and among UMS, its universities, its Law School, and NECHE is clear and consistent.

UMS's commitment to transparency about unified accreditation, System-wide strategic planning, and ongoing strategic initiatives continues to be reflected in our practices and communication. Chancellor Malloy visits every UMS university and the Law School at least once each semester (fall and spring), and communicates periodically with the entire UMS community via email and other messaging. He also shares a weekly update with the Board, and those messages are posted publicly on the UMS site. Pages on the UMS website focused on unified accreditation and the Unified Catalog initiative are updated monthly. Other initiatives with dedicated pages include UMS strategic planning and UMS TRANSFORMS.

UMS anticipates continued progress in implementing effective shared governance structures, including the UMS Faculty Governance Council, and corresponding progress in other areas. For example, the Law School's Faculty Personnel Policies governance document is under active review as of spring 2022, and as noted above, the Faculty Governance Council continues to work out its policies and processes.

Annual is defined as Summer, Fall and Spring. Enrollment for FY2022 (Current) includes Summer 2021, Fall 2021, Spring 2022. Enrollment for FY2021 (1 year prior) includes Summer 2020, Fall 2020, Spring 2021. Enrollment for FY2020 (2 years prior) includes Summer 2019, Fall 2019, Spring 2020.

Students are counted as follows: Early College students are counted in their most recent plan in the reporting period and then the remaining (non-Early College) students are counted in each location and modality through which they took credits in the reporting period.

#### **Standard Four:**

## The Academic Program

#### **Description**

Students at University of Maine System (UMS) universities may select from 239 undergraduate majors, 399 minors, 361 concentrations, and 25 associate degree programs. All majors in UMS introduce students to subject matter that is broad and substantive with respect to theory, content, and methods of inquiry and analysis. Students progressing through the major develop in-depth knowledge and mastery of at least one disciplinary or interdisciplinary area. Some degree programs require a minor while others require a concentration.

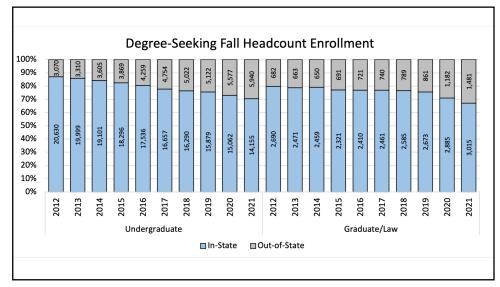

Figure 1: Degree-seeking fall headcount enrollment for UMS by level and tuition residency

#### **Assuring academic quality**

UMS offers courses and programs at its universities and Law School and at instructional centers statewide. This footprint reflects Maine's physical size and UMS's commitment to meeting the needs of a student body that is especially diverse in its access to technology, levels of degree and certificate attainment, and socio-economic means.

Each university maintains a portfolio of academic degree offerings and a system of academic approval and oversight. This system is initiated by university faculty, who control course content and program requirements. When program suspension or elimination prevents students from progressing and completing a program in the publicized amount of time, the university arranges for alternative coursework or a teach-out plan.

Program review cycles are followed at each university, and UMS policy guides program development, approval, administration, and review. Faculty have a substantive voice in these processes. Student success and program effectiveness are measured in various ways, including evidence of meeting learning outcomes and student feedback. National recognition of several programs demonstrates an external perspective on student success and program effectiveness.

Each university maintains procedures for proposing new or revised programs. Such changes are typically initiated by faculty. Proposals include a rationale addressing potential effects on students, faculty, and extant resources. Proposals advance through university levels of faculty governance and administrative oversight, with consideration at the UMS level by the Vice Chancellor for Academic Affairs (VCAA), Chief Academic Officers Council (CAOC), and Board of Trustees (Board). Through this process, UMS and its universities assure programmatic capacity and sustainability as well as alignment with NECHE standards.

When programs are eliminated, the universities continue to offer required courses or appropriate substitutions so students can progress to completion. Examples include the opportunity for UMFK students to continue their coursework through UMPI when UMFK

suspended its education program, and UMF's adding of course sections to accommodate the needs of students in the precursor of a recently revised elementary education program. At all UMS universities, program requirements are published in a variety of ways to ensure student achievement expectations are clear. Through academic and program assessment, faculty assure that student learning, information literacy, skills in inquiry, and critical judgment are connected and are appropriate to subject matter and degree level.

#### **Undergraduate degree programs**

While there is some flexibility, UMS majors require undergraduates to start with and complete foundational and supportive coursework (100- and 200-level) before progressing to more advanced coursework (300- and 400-level). Courses are sequenced so learning and expertise build throughout the academic program and culminate in a required capstone course, generally taken in a student's senior year. Suggested and required course progressions are delineated in the universities' undergraduate catalogues and are easily accessed by students from the universities' websites.

Program overviews and degree requirements for individual majors are available in the undergraduate catalogues. In many cases, this information is further available to students on college and/or departmental websites and from faculty advisors or professional advising staff. Student learning goals for academic programs are published on departmental and/or college websites.

All undergraduate degree programs include general education, major, minor, and concentration requirements that are clearly articulated in catalogues and websites. Advanced courses identify prerequisites to enrollment that may include introductory courses, a GPA threshold, required benchmarks, and/or instructor permission.

Students can select from a number of 3+3 and 4+1 programs in various fields. The Law School, for example, has established 3+3 partnerships with six of the seven UMS universities, enabling qualified students to obtain a bachelor's and a J.D. in six years. Since 2018, the Law School has enrolled 10 USM students through the 3+3 partnership, and in fall 2022 matriculated its first 3+3 student from UM. It is expected that advising students about the 3+3 option in the early years of their undergraduate program will yield additional students through this pathway.

As discussed in detail in Standard Eight, program assessment at UMS universities relies on formative and summative assessment measures and the application of findings to the continuous improvement of student learning. For example, as noted in the university's E Series data, UMFK's Rural Public Safety Administration program uses outcomes from a capstone course, an internship evaluation by the employer, and a student portfolio to improve student learning and strengthen course and program outcomes.

Students completing undergraduate or graduate programs demonstrate collegiate-level skills in the English language.

#### **General education**

Each university has a well-developed general education program and assessments that meet NECHE standards. Learning outcomes are established both broadly and for each course requirement and are assessed using indirect assessment mechanisms, including but not limited to: tracking studies completed by assessment offices, review of core courses at the assignment and syllabus level to ensure attention to outcomes, analyzing student responses on NSSE items related to the goals of general education, focus groups with students, and course-level surveys.

For example, assessment data from USM exit surveys reveal a high level of student confidence in critical thinking skills, analysis of quantitative problems, and effective independent learning.

The Academic Program

General education requirements in each UMS undergraduate program ensure adequate breadth for all degree-seeking students. General education outcomes are defined for each baccalaureate and associate degree to include courses in the arts and sciences, humanities, mathematics, and social sciences.

The number of required credits, general education outcomes, list of courses that satisfy general education requirements, and performance expectations are housed in university catalogues and on university websites. Student academic plans define the courses that meet general education outcomes and the total credit requirements for baccalaureate and associate degree programs. Students complete the equivalent of 40 credits in general education courses for baccalaureate degrees and 20 credits for associate degrees.

#### The major or concentration

All UMS programs connect to specific disciplinary or interdisciplinary areas of inquiry at and beyond the introductory level. Most upper-division courses require lower-division prerequisites. Curriculum committees at each university review curriculum submissions and adjustments so prerequisite trees are maintained.

#### **Graduate degree programs**

Graduate programs are appropriately described in their scope and purpose. Proposals for new programs require specification to general program goals and precise student outcomes. Courses and requirements are individually mapped to learning outcomes. Individual graduate programs are delivered by UM, USM, UMF, UMPI, UMA, and the Law School. UMFK will begin offering a graduate program in nursing in fall 2024. UMA will begin offering a master's degree program in trauma informed management in fall 2022 with faculty from other UMS universities participating. A growing cohort of multi-university programs includes the M.S. in cybersecurity offered by UMA and USM, and a System-wide partnership of all seven universities delivering geographic information systems (GIS) programming.

The scholarship of tenured and tenure-track faculty is reviewed on a regular basis. Graduate student research is expected to lead to publishable work, whereas undergraduate student research is typically (though not always) applied more for instructional purposes. Each UMS university establishes criteria for, and expectations of, its graduate faculty.

Admissions standards across UMS graduate programs align with academic standards. Undergraduate GPAs serve as a baseline for admission in most cases. Professional references and focused application essays are used by graduate admissions committees to gauge preparedness. Faculty play an active role in developing and reviewing admissions criteria.

Each university maintains the quality and rigor of its graduate programs to ensure a progressive growth in breadth and competency. Those offering 4+1 programs explain where undergraduate work ends and graduate work begins, and stipulate limits on the number of undergraduate credits that can be applied toward the graduate program.

UMF requires a course blueprint document for every course in its graduate catalogue, including an explanation of how the course achieves graduate-level rigor. These blueprints and any revisions to them are approved by UMF's Graduate Council, a faculty committee.

As UMS has affirmed in prior correspondence with the Commission: "The institution's graduate programs conform to NECHE's Policy on Credits and Degrees. Transfer credit accepted for graduate programs is limited and typically constitutes no more than 25% of the overall credits required to earn a master's or doctoral degree. (Graduate degrees across the institution require a minimum of 30 credits, with at least an additional 30 credits required beyond the master's degree for a terminal degree.) For example, UM allows no more than six external post-baccalaureate credits for master's degree programs, and no

more than 30 credits for doctoral programs. (These are usually master's credits earned at the university prior to a student's admission to a UM doctoral program)" (June 2020 UMS substantive change request, p. 29).

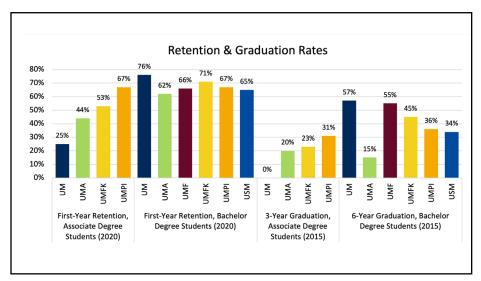

Figure 2: First-year retention and graduation rates for associate and bachelor's degree students

Graduate degree requirements are designed to prepare students for proficiency and independent growth. Post-baccalaureate certificates vary from nine to 18 credits, and graduate program structures vary by degree. For example, by the time they complete 12 credit hours or register for their third term, graduate students at UM submit a program of study detailing a plan for meeting their requirements. Students in professional programs participate in internships or field experience courses, and some must pass national accreditation exams. Students in M.S., M.F.A., Ed.D., and Ph.D. programs complete a thesis or dissertation.

The Law School requires students to conduct supervised research and writing; it also requires a minimum of six credits of professional skills courses, which can include a mix of externships, clinical programs, and/or classroom practicum courses. All of these must conform to American Bar Association standards.

The M.S.Ed program at UMF culminates with an action research project or Internship in School Leadership. The project focuses on classroom practice or school improvement and

includes planning, intervention strategies, data collection and analysis, and the production of a professional report supported by a presentation to faculty and peers.

The graduate programs of the Maine Graduate and Professional Center emphasize integrated, experiential, and cross-disciplinary programming with real-world relevance for graduate and professional students in its focus disciplines. No student may graduate without having completed all requirements, both doctrinal and practical or experiential. Each program is responsible for establishing criteria of competency. This is accomplished in multiple ways. Some require a minimum cumulative GPA and class grade for course completion, while others entail an oral defense or passage of a national accreditation examination.

## Online and distance education and off-campus instructional locations: student resources and course and program evaluation

Support for and evaluation of online, distance, and off-campus instructional site students and courses is consistent with resources directed to in-person, on-campus students and courses. For example, UMA provides video and chat support, academic success coaching, professional advising, and career guidance for online and distance education students taking courses from their homes or at one or more of the university's eight off-campus centers. Similarly, UM provides online and distance students with an orientation to online learning, technology support, and an array of services designed to meet the needs of online and remote learners. System-wide use of an online student evaluation of teaching instrument ensures that every online/distance and off-campus instructional site student may complete an evaluation. Faculty use findings from course evaluations and related assessments to improve online and distance education courses and programs in the same way in which they are used to improve courses and programs delivered via face-to-face and hybrid modalities.

#### **Transfer credit**

Every UMS university publishes its undergraduate and graduate transfer credit policy in its catalogue. This information is also published on the UMS site. Transfer credit is accepted from regionally accredited postsecondary institutions. Coursework may be remedial or developmental, and must be completed with a minimum grade of C- to be eligible for credit. The standard for transfer credit at the graduate level is typically 3.0/B. If a university outside UMS uses a different grading system, each UMS university decides whether the transfer credit meets its minimum grade requirement. Courses from universities outside the United States are also accepted for transfer, consistent with established university policies and practices. In all cases, an official transcript of the course or training to be evaluated must be provided to the receiving university before transfer credit will be granted.

Credit may also be awarded for high school AP exams, CLEP, or via prior learning assessment, including credit for military training. American Council of Education (ACE) standards are applied to evaluations of external trainings, courses, and certifications.

Students who have previously completed a bachelor's degree at a regionally accredited institution are exempt from the general education requirements at all UMS universities unless a specific course is required by the major. Degree-progress exceptions to established transfer equivalencies may be allowed and recorded at the college or department level, but do not appear on a student's official transfer evaluation or on any UMS university transcript.

Transfer credit is considered for most graduate programs across UMS. For example, with the approval of the Admissions Committee, UMF students may transfer up to nine graduate credits from another university into their academic program. Only three of the credits may be in the core of the program. These credits must have been earned from a regionally accredited institution within five years prior to admission and with a minimum grade of B or equivalent. Graduate credits applied toward an undergraduate degree cannot be used

toward the master's degree.

The use of articulation agreements varies considerably across UMS, due mainly to the staff and faculty time required to establish and maintain them. The two largest universities, UM and USM, maintain robust sets of articulation agreements available for students to explore. The smaller universities typically rely on transfer officers working in conjunction with registrars and faculty to make credit transfer decisions on a case-by-case basis.

To ensure equal treatment of students transferring in the same coursework, UMS's student information system permits creation of transfer rules at the university level. Universities create transfer rules whenever possible after evaluations of previously unevaluated courses have been completed. This ensures that a deliberate decision must be made to change the transfer equivalency for future transfer students. It also reduces turnaround time for evaluations.

Students must meet the established requirements of the academic program or college into which they are transferring. Transfer credits do not always count towards these requirements. At the program level, each university may determine that transfer credit cannot be applied toward major requirements.

#### Integrity in the award of academic credit

UMS universities offer a diverse complement of academic programs, including associate's (minimum 60 credits), bachelor's (minimum 120), master's (minimum 30), and terminal degrees, such as a doctorate (typically 30 beyond master's), as well as undergraduate and graduate certificates. Most undergraduate degree programs require 120 credits. A few programs closely aligned with professional career pathways exceed 120 credit hours (e.g. architecture, nursing, and engineering). UMS universities adhere to a credit-hour standard consistent with the federal definition.

Courses are scheduled at regular intervals based on program capacity and student need, and with the goal of supporting timely degree completion. If a course is not available to students who need it to graduate on time, faculty and professional advisors pursue alternatives: directed study, enrollment in an equivalent course at another UMS university, or a substitution. Students enrolling in courses at another UMS university generally must complete a form and seek the approval of their advisor. When procedures are not followed, course transfer credit may not efficiently post to the student's home university transcript.

Authority and oversight of academic program quality and delivery are a shared responsibility of administration and faculty. Periodic review of programs, proposals for new courses or programs, and changes to existing courses or programs are usually initiated by faculty. Proposals are reviewed by the relevant department, college, and curriculum or

program review committees.

Credit-hour policies are referenced in faculty handbooks and discussed in new faculty orientation.

Faculty review the program level and numbering of new course proposals, usually in discussion with a university-wide curriculum committee and the registrar. The credit-hour standard ensures that course credit-hour designations reflect student academic engagement. Syllabi are supplied in this process to confirm that new or revised course proposals include student learning outcomes and required academic policies and information.

The universities' catalogs define the academic credit hour and distinguish among courses at the <100, 100, 200, 300, and 400 levels for undergraduate work. Academic credit toward degree attainment is not awarded for coursework completed at the <100 level, though some universities offer developmental or remedial coursework at this level as prerequisite to other coursework or in transfer. UMS universities traditionally organize curricula to emphasize 100- and 200-level coursework during the first two years of post-secondary study.

In internships and other off-campus experiences where a non-faculty field supervisor contributes to the evaluation of student work, a faculty supervisor retains responsibility for final grading decisions. Credit for clinical or field experience is assessed by the time spent in the experience, learning outcomes mastered, and input from the field supervisor. Full-time faculty participate in the selection and review of part-time faculty, including for Early College programs.

Learning outcomes have been mapped by faculty to every course offering and academic program. These outcomes are included in the proposal for a new course or program, are reviewed through an annual cycle of assessment, and form the basis on which student learning is measured. Learning outcomes for individual courses are available on course syllabi, and program outcomes are published on departmental, college, and/or university websites. Data collected through the regular review of key assessments aligned with student learning outcomes inform the design or redesign of courses and programs.

### Competency-based education: UMPI's YourPace program

Competency-based education programs in UMS are delivered in the University of Maine at Presque Isle's (UMPI) YourPace program. YourPace faculty are subject-matter experts who work closely with their students to develop and adjust curriculum addressing individual student needs as they seek to achieve mastery.

Faculty maintain ultimate authority over the curriculum in individual competency-based education units, including periodic and ongoing revision to ensure alignment between the competency-based education units and both general education and the curricula of other academic majors. Faculty assessors are responsible for evaluating summative assessments in the YourPace program through the use of standard rubrics. The faculty assessors work in conjunction with the faculty subject-matter expert to update assessments and rubrics continually as competencies are developed. The assessor is responsible for scoring all competency module summative assessments.

In spring 2022, YourPace faculty and administrators used admission and enrollment data to inform changes to the program's admission requirements. Those requirements now include supplemental material (e.g. essay, letter of recommendation) as warranted.

As reflected in UMPI's Data First data, the growth of YourPace programs has been rapid and impressive. In fall 2018, total credit hours were 1,143. In fall 2019, they were 1,182. In fall 2020, they were 2,091, and in fall 2021 they reached 3,886.

## Residency requirements and credit evaluation

Each UMS university requires that at least 30 credit hours be completed at the home university at the time of graduation, representing 25% of the required 120 credits for graduation. Five of the universities require that at least three upper-division courses be completed at the home university. For example, UMF requires that either the final 32 credits or 48 out of the final 64 credits be earned at UMF, of which 20 must be within the home program. Conversely, UMFK does not stipulate what the credits must be.

Each UMS university engages in a process to evaluate the effectiveness of its partnerships that create credit arrangements. For example, a UMA faculty committee oversees an Early College program where instructors are evaluated for approval to engage in a dual-enrollment classroom. Similarly, at UMA, extra-institutional arrangements involving universities of higher learning must be approved through the faculty-driven Curriculum Committee.

Each UMS university has defined policies for continuation, termination, and readmission to its academic programs. Academic standing is based on measurable academic performance, and requirements for maintaining good standing are stated clearly and applied consistently across each university by its faculty and administrators.

Graduation requirements are published in several outlets, including course catalogues, university websites, and academic records management systems. Using the academic records management system (MaineStreet), students and staff are able to check students' degree requirements. Faculty advisors and professional advisors work with students on future course scheduling and on any appropriate substitutions approved by faculty and department chairs and/or deans.

UMS meets the needs of all learners by offering coursework through multiple modalities and in a variety of time frames. Students have access to face-to-face, online synchronous and asynchronous, hybrid, and hi-flex instruction through the traditional semester model, 3-5 week short terms (winter session and May term), eight-week courses, and (at UMPI) competency-based education. Irrespective of the length of a course or its delivery modality, students are expected to fulfill course outcomes/competencies and/or program outcomes/competencies as defined during the program approval process and in course syllabi.

Courses and programs offered for credit off-campus are consistent with the educational objectives of the university. These courses are monitored for quality through course evaluations and data collected for program reviews. For example, UMF offers the B.S. in early childhood education through a blended delivery model, with the face-to-face component taking place at Southern Maine Community College. UMF faculty deliver

the coursework, students are assessed with the same assessments used for on-campus students, and the program is included in the education program's state approval and in national accreditation self-studies.

#### **Academic integrity expectations**

All students are expected to abide by the UMS Academic Integrity Policy. Consequences of cheating and other forms of academic dishonesty are stated in the policy. Identifying student information is housed securely in MaineStreet and backed by UMS IT security measures and FERPA protections. UMS also provides resources for managing specific testing environments, including Respondus, a tool allowing instructors to lock down a browser so a test taker cannot search for answers. Relatedly, UMA provides a service through Academic Logistics that helps students locate sites for taking a proctored exam.

#### **Certificates and micro-credentials**

Faculty seeking to develop certificates follow a process identified by Board policy and by their university. Credit-bearing certificate proposals are reviewed by faculty in departments, on curriculum committees, and in other identified governance structures specific to each university, and by appropriate university and UMS administrators.

Work on digital badging and micro-credentials in UMS has focused on non-credit bearing micro-credentials, but discussions about linking UMS badges and micro-credentials to academic courses are active. Micro-credentials are competency-based, with specific criteria and evidence expectations developed by UMS micro-credential teams with oversight from the UMS Micro-Credential Steering Committee. Learners can meet competencies through multiple pathways. For example, students seeking the Leadership micro-credential can complete an approved leadership training program, a workshop series, or an academic leadership course at UM or elsewhere.

### **Appraisal**

# Strengthening academic and technological resources for students and faculty

Faculty and students have regular access to library resources, instructional technology and IT support, and other support services, although access to services available outside of traditional working hours should be strengthened. For example, graduate students attending Saturday classes at UMF cannot currently access a Curriculum Materials/Assistive Technology Center because it is only available Monday through Friday.

Better coordination and clearly identified resources for multi-university programs are needed. At present, faculty have access to a detailed description of how to cross-list courses for multi-university program delivery, but limited awareness of other resources. Information about course scheduling, coordination of admissions processes, and answers to frequently asked questions need to be put in place to ensure that students and faculty engaged in multi-university programs are properly supported.

Inconsistency of access to resources from one university to the next can be challenging. For example, UM students in the collaboratively delivered UM instructional technology graduate program who take special education classes from UMF have access to more resources at their home university (generally and with respect to instructional technology) than their UMF peers. This is also generally true of faculty teaching courses in multi-university academic programs.

#### Learning management and student information systems

The implementation of a System-wide learning management system (Brightspace) supports academic programming and student success with consistency and adaptability. System-wide resources include the Brightspace Design and Support Staff and the Brightspace Core team. Both meet weekly to discuss updates and changes in the LMS.

UMS's legacy enterprise system, MaineStreet, creates barriers to effective course crosslisting due to how it was initially constructed (each university maintains siloed data and reporting). The RePaving MaineStreet initiative described in the Institutional Overview will concretely improve outcomes in this arena.

#### General education

General education has been effective at providing competencies and is an integral element of undergraduate education. The general education requirements of all seven universities are easily available and accessible to students in the universities' undergraduate catalogues, which also include the rationales behind each set of general education requirements.

Unified accreditation potentially provides UMS with an opportunity to pursue alignment of general education requirements across its universities in a way that has not been previously accomplished. Faculty at several UMS universities have already pursued this work at the program level.

### Improving outcomes in student transfer activity

Current practices and policies on transfer are consistent with NECHE standards and uphold the quality and integrity of the academic program. Transfer policies across UMS allow for students to seek course alternatives not only at their home university, but at other UMS universities as well. However, some facets of transfer activity, including course registration and (in particular) bringing credits earned at another UMS university back to a student's home university, are frustrating for students, faculty, registrars, and others and are not student-centric.

### Improving four- and six-year graduation rates

Improving four- and six-year graduation rates over time continues to be a challenge. As shown in the universities' Data First data, the four-year graduation rates for UMA and UMF have remained essentially flat over the past four years. The same is true of the six-year rates at UMPI and UMFK.

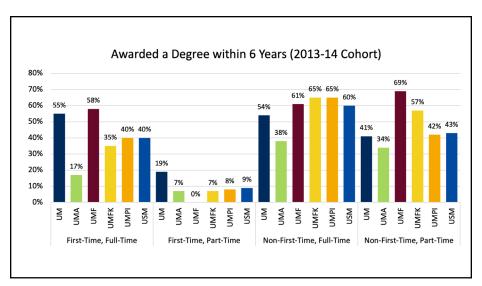

Figure 3: Six-year graduation rates for populations beyond the first-time, full-time cohort

## **Projection**

### Program reviews and program and course outcomes

Effective program and course reviews, as mentioned above, improve academic programs and support student success. These reviews require a process ensuring consistency across UMS. Faculty must maintain a substantive voice in crafting program and course reviews, and in revising and improving the processes themselves.

A System-wide review of existing program learning outcomes would provide essential data and insight about how UMS in aggregate can best deliver necessary programs in the requisite modes of instruction to meet the needs of rapidly changing student and workforce populations. As learning and employment require new technological and workplace skills, programs may need to revise or expand outcomes and assessments to account for those skills.

#### Reconciling off-campus instructional locations lists

In summer 2022, UMS and university staff will reconcile lists of off-campus instructional locations used for NECHE reporting and Dept. of Education reporting. Over time and through idiosyncratic recordkeeping and reporting processes, differing location lists have developed despite the NECHE and Dept. of Education definitions of "instructional location" being nearly identical. In keeping with unified accreditation and as a matter of administrative clarity, we will establish a single list for each of our universities.

#### Standard 4: The Academic Program (Summary - Degree-Seeking Enrollment and Degrees) Fall Enrollment\* by location and modality, as of Census Date Clinical Total Degree Level/ Location & Professional M.D., J.D., Bachelor's Master's Ph.D. Associate's doctorates (e.g., doctorates (e.g., Modality DDS Degree-Main Campus FT 7,835 610 13 272 8,730 Main Campus PT 761 168 13 234 1,176 Other Principal Campus FT 0 Other Principal Campus PT 0 208 219 Branch campuses FT 11 9 76 85 Branch campuses PT Other Locations FT 0 0 Other Locations PT 0 Overseas Locations FT 0 Overseas Locations FT Distance education FT 455 732 425 Distance education PT 68 356 0 Correspondence FT Correspondence PT 0 0 Low-Residency FT Low-Residency PT 0 Unduplicated Headcount Total 23 9,223 1,589 0 26 0 506 11,367 Total FTE 16.70 8,584.00 1,047.70 12.78 236.60 9,897.78 Enter FTE definition: Degrees Awarded, Most Recent Year 1) Enrollment numbers should include all students in the named categories, including students in continuing education and students enrolled through 2) Each student should be recorded in only one category, e.g., students enrolled in low-residency programs housed on the main campus should be 3) Please refer to form 3.2, "Locations and Modalities," for definitions of locations and instructional modalities. \* For programs not taught in the fall, report an analogous term's enrollment as of its Census Date. Degrees Awarded, Most Recent Year (Summer 2020 - Spring 2021)	91	425	0	NA	NA	NA	NA	516
Notes:								

1) Enrollment numbers should include all students in the named categories, including students in continuing education and students enrolled through any contractual relationship.

3) Please refer to form 3.2, "Locations and Modalities," for definitions of locations and instructional modalities.

Please enter any explanatory notes in the box below

Campus Location Determination = Identifies UMA student registrations by class number, then identifies the actual location the student is attempting to complete the credits, and then the formula of where the majority of credits were attempted within the time period is calculated with additional logic applied in case of a tie. The student's FTE and headcount is then assigned to that location.

**Degree Level** = Based on last effective academic program as of census.

Full-time Undergraduate = 12+ UMA enrolled credits.

Part-time Undergraduate = less than 12 UMA enrolled credits.

Full-time Graduate = 9+ UMA enrolled credits.

Part-time Graduate = less than 9 UMA enrolled credits.

<sup>2)</sup> Each student should be recorded in only one category, e.g., students enrolled in low-residency programs housed on the main campus should be recorded only in the category "low-residency programs."

<sup>\*</sup> For programs not taught in the fall, report an analogous term's enrollment as of its Census Date.

Data as of Fall 2021, October 15 census date.

Degrees/certificates awarded, most recent year, represents academic year 2020-2021 from the IPEDS Degrees Conferred survey.

UMF does not have Title IV eligible certificates at this time. All certificate-seeking students are therefore included under non-matriculated because they do not meet the definition for Title IV, although 25 graduate certificates were awarded in the most recent year.

The undergraduate certificate in Alpine Operations ranges from 24 credit hours to completion via the business track to 26 credit hours to completion via the community health track. The undergraduate certificate in GIS ranges from 15 to 16 credit hours to completion, which is 12 credits at UMF and another 3 to 4 credits depending on electives chosen at either University of Maine at Machias or University of Southern Maine.

Totals for degree/certificate majors includes students more than once if they are pursuing multiple majors. An unduplicated headcount is provided under the duplicated total for data integrity purposes.

Discontinued Majors:

\*19.0702 - Aging Studies

Discontinued Undergraduate Certificates (non-Title IV): \*51.1501 - Addiction Rehabilitation

Merged Majors:

\*13.1205 - Secondary Ed Life Sciences and 13.1205 - Secondary Ed Physical Sciences are combined into 13.1316 - Secondary Ed

\*32.0101 - Johnson Scholars TRiO Program was combined with 24.0199 - Liberal Arts Undeclared, or the respectively chosen majors

\*03.0103 - Environmental Policy/Planning and 45.0701 - Geography are combined into 45.0799 - Geography and Environmental

\*45.1301 - Culture, Meaning, and Society was transformed into 45.0201 - Anthropology \*50.0706 - Interactive Media was transformed into 11.1004 - Web and Media Design

The MS in Education major combines several formerly independent majors under one major as of Fall 2021, with students able to choose between concentrations in education leadership, special education, early childhood education, or mathematics education and completion being 33 to 36 total credit hours depending on the chosen concentration.

The graduate certificates in applied behavior analysis and proficiency based education were discontinued.

Totals for degree/certificate majors includes students more than once if they are pursuing multiple majors. An unduplicated headcount is provided under the duplicated total for data integrity purposes.

Discontinued certificates of graduate study:

- \* 13.9999 Proficiency Based Education
- \* 42.2814 Applied Behavior Analysis

#### Notes:

- 1) Enrollment numbers should include all students in the named categories, including students in continuing education and students enrolled through any contractual relationship.
- 2) Each student should be recorded in only one category, e.g., students enrolled in low-residency programs housed on the main campus should be recorded only in the category "low-residency programs."
- 3) Please refer to form 3.2, "Locations and Modalities," for definitions of locations and instructional modalities.
- \* For programs not taught in the fall, report an analogous term's enrollment as of its Census Date.

Please enter any explanatory notes in the box below

Distance education includes students in "Online" and "Your Pace" (AP) programs. Bachelor-degree numbers include four students in transfer programs (which begin at UMFK and then continue at UMPI). For students double-majoring in different degree/certificate types (e.g., simultaneously pursuing an Assocaite and Bachelors, or Bachelors and Certificate), FTE was divided equally among the two in order to ensure the FTE total was not over-estimated or double-counted. For Degrees Awarded, Most Recent Year, see the Completions Report on the UMS Databook page: https://www.maine.edu/databook/student-related-reports/

# Standard 4: The Academic Program (Summary - Non-degree seeking Enrollment and Awards)

- 3) Please refer to form 3.2, "Locations and Modalities," for definitions of locations and instructional modalities.
- \* For programs not taught in the fall, report an analogous term's enrollment as of its Census Date.

Please enter any explanatory notes in the box below

Associate Column Reflects Certificates at USM. Masters include Certificate of Grad Studies (CGS).

UMS defines its' Institutions as Home vs Host when it considers Headcount, SCH and FTE. Beginning Fall 2020, Headcount, Student Credit Hours (SCH) and FTE are reported differently based on Inter-institutional Cross-listed course Host and Home definitions.

The Host institution (is responsible for the faculty, and for ensuring the quality, rigor, and assessment of the course) receives the SCH.

The Home institution (where the student is matriculated, receives student support/resources, and where the students' primary enrollment is) keeps the FTE and Headcount.

### **Standard Five:**

## **Students**

### **Description**

### **Enrollment: undergraduate recruitment**

COVID-19 required a rapid and strategic shift in recruitment practices, including greater coordination and collaboration in planning and staging events across the University of Maine System (UMS). For example, UMS piloted a Presidential Tour series in spring 2020 showcasing each university for prospective and admitted students and their families. Broadcast live on YouTube, the tours garnered strongly positive feedback from attendees (in person and remote) at the initial height of pandemic uncertainty.

Learning from the Presidential Tour series, UMS made a spring 2021 investment in the Visit Days recruitment platform and developed a social and digital media campaign promoting weekly On Track For College events. Through these resources, prospective and admitted students visited with admissions and financial aid representatives from each UMS university in a live, one-on-one setting. UMS also invited Finance Authority of Maine (FAME) counselors to attend these events and assist students who had not filed the FAFSA with one-on-one preparation and submission. In addition, the Admissions directors (undergraduate and graduate) meet monthly to explore collaborations and share best practices.

### **Enrollment: graduate recruitment**

In 2021, UMS hosted its first collaborative graduate school virtual open house featuring every UMS university with graduate programs. Future collaborative events are planned, and the graduate admissions directors from each UMS university now meet monthly to collaborate on recruitment initiatives.

### Collaborative programs and strategic initiatives

Even prior to COVID and unified accreditation, UMS supported and encouraged collaborative programming among its universities. Several partnerships have produced enrollment increases at the smaller universities, and some have provided academic pathways to the larger universities for students interested in programs not available elsewhere.

For example, the Maine Engineering Pathways Program (MEPP), established in 2016, allows students to take general education courses needed for the engineering programs at UM and USM at the smaller UMS universities. When students complete the required curriculum at one of those universities with the requisite GPA, they receive automatic admission into the larger engineering programs and can transfer efficiently. Through the first three years of the program, 21 students enrolled in MEPP, with the largest number at UMA, and three students had transferred to UM or USM to continue their engineering education.

An early program assessment revealed that UMA's success in attracting MEPP students was tied to its decision to establish a defined major for MEPP rather than employing a check-box on the program application. The latter approach resulted in some students checking the box without understanding what MEPP entails. To correct this, the other participating universities have been encouraged to create a defined MEPP major along the UMA model.

The Law School's Rural Lawyer Project was launched in 2017 in response to a shortage of local legal services in a number of rural Maine communities. The project pairs students with local attorneys who serve as mentors and give students direct exposure to rural legal practice. The project began as a collaboration between the Law School and several non-profit partners.

As of spring 2022, the Law School is pursuing a related initiative: the development of a satellite legal clinic in Aroostook County, Maine's northernmost county. This pilot clinical program will bring students under the supervision of a licensed attorney to expand free legal aid and encourage students to establish legal practices in Aroostook communities.

### Admission criteria: undergraduate

Admission to UMS universities is based on a combination of factors demonstrating potential

for academic success. Admission requirements are clearly stated on admission websites, in academic catalogues, and often on the websites of academic programs. Criteria include academic credentials, scholastic achievement, and non-cognitive factors such as personal motivation.

Some UMS universities were test-optional prior to the pandemic, but in response to the manifest challenges COVID-19 has presented, all of them adopted an SAT/ACT test-optional policy in 2020. The policy is now permanent on the undergraduate side and is in place through 2022 for graduate admissions.

Verification of student identity follows an established process for in-person (campus-based) and distance and online courses. UMS employs a secure login managed by UMS requiring password changes every 180 days to ensure that the student who enrolls in a course is the same one who participates in that course and earns credit for it upon completion. Use of a student's assigned UMS username and password is required for participation in online courses.

All UMS university Admissions offices determine admissibility of domestic and international students to undergraduate programs using criteria developed in consultation with the academic colleges. At UM, the Office of International Programs collaborates in this process. Admissions personnel generally consult with the appropriate dean about applicants deemed borderline for admission. USM and UM have English as a Second or Foreign Language (ESOL) centers that serve as gateways to degree programs for non-native speakers.

### Admission criteria: graduate

UMS graduate Admissions offices work closely with deans and faculty to develop and apply criteria for assessing the admissibility of domestic and international students. Each program completes admission reviews using a committee comprising faculty and admissions staff. Graduate program entrance requirements vary by department and program, with some requiring entrance examinations like the GRE or GMAT. All admissions requirements are published on the universities' websites and in their graduate catalogues.

The Law School employs a separate admissions process and criteria. The LSAT is required for admission but is not the sole determinant. Similar to other graduate programs, the Law School takes a holistic approach to admissions decisions. Student consumer information, including entrance numbers, bar passage, and placement data, are available to all Law School applicants.

### Records retention and student privacy

All UMS universities maintain the highest ethical standards in their admissions and retention policies, with records retention and related information-safeguarding policies modeled on and aligned with UMS policies. Additionally, all UMS universities adhere to National Association of College Admission Counseling (NACAC) and International Association for College Admission Counseling (IACAC) standards of practice, and to the Family Educational Rights and Privacy Act of 1974 (FERPA), which protects the privacy of students.

Students have the right to inspect their educational records and the right to challenge records when they are inaccurate, misleading, or in violation of a student's privacy rights. Each university's Office of Student Records (or Office of the Registrar) is the primary resource for information about these records.

### Non-discrimination policy and student-facing information

UMS universities do not discriminate on the basis of race, color, religion, sex, sexual orientation, including transgender status and gender expression, national origin, citizenship status, age, disability, genetic information, or veteran's status in employment,

education, and all other programs and activities. Each university has an appointed office or group responsible for monitoring and responding to instances of bias and hate in its university community. UM fulfills that function through a Bias Response Team, and UMA uses a Diversity, Equity and Inclusion Council.

Admitted students receive clear communication and information about the cost of attendance, academic and social services, financial aid, and program expectations. Each university offers counseling services, an array of student support services, academic services, and opportunities for enhancement and engagement through campus/student life and co-curricular activities.

### **Early College and dual enrollment**

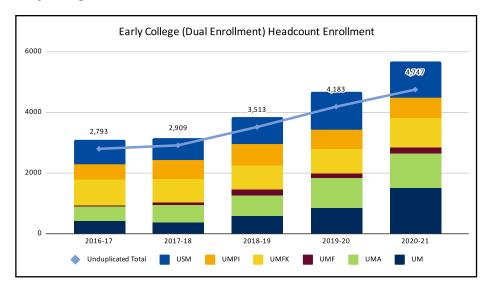

Figure 4: Headcount enrollment for Early College for the past five years

Early College (EC) programs at UMS universities are a critical resource for Maine's high school students and represent significant enrollment (see above). Students benefit from expanded access to course offerings, particularly students in rural high schools and those interested in subjects for which teacher shortages exist.

As determined by a review of grades, student feedback, and subsequent academic performance, common outcomes in EC courses include high course success rates, greater student confidence in the ability to complete college-level work, increased college aspirations, higher GPAs and persistence rates, and higher college graduation rates. Most notably, students who take UMS EC classes enroll in college at a rate that is 12% higher than students who have not participated in EC. (See Standard Eight for a further appraisal of Early College outcomes.)

UM's Summer Start Program was designed to aid in the retention of incoming fall 2020 first-year students by providing them the chance to take two online summer courses: a three-credit course and a one-credit course. First-generation students were offered the option to enroll in a special section of LAS 150, a UM College of Liberal Arts and Sciences course that includes peer mentoring support, as the one-credit option. Eighty-three students enrolled in Summer Start in 2020, and 56 successfully completed their coursework. In summer 2021, Summer Start students participated in pilot offerings of the Research Learning Experience (RLE) program. Fifty-three students completed their courses.

### **Orientation resources**

Each UMS university offers a comprehensive new student orientation for each semester's incoming cohort (fall and spring) to familiarize new students with the university, its

resources, important policies and procedures, academic programs and faculty, and each other. Most of the universities also deliver cohort programming for international students, veterans, and family caretakers.

Peer leaders are an important component of orientations and related programming. At UM, peer mentors are rigorously trained through a Certified Peer Education program, and volunteer to help their peers in various contexts, including a Student Wellness program and a Thriving Leaders program. UM's Commuter and Nontraditional Student Programs (CNTSP) employ six peer mentors to support other students through social programs and interactions in the university's Commuter Lounge. Other peer mentors support Campus Recreation programming and programs for student veterans.

### **Student financial services**

Each university has student financial aid staff and resources that assist students and families with the process of funding their education. In addition to advising families and disbursing aid and university-based program funds, these offices provide information on costs, types of financial aid, completing the FAFSA, and debt. In 2021-22, UM collaborated with UMPI and UMFK on a model for supporting the financial aid administration of the latter two universities.

Cumulatively, UMS universities have substantially increased their investment in financial aid in recent years, as measured in part by increased scholarship levels at UM, USM, and UMM. Between FY15 and FY20, overall UMS financial aid spending grew from \$119 million to \$153 million, a 28.5% increase. Spending on institutional grants and scholarships was the largest contributor to this growth.

All UMS universities use the FAFSA and admissions application materials to award university-level and federal student aid. The universities follow a System-wide policy for tuition adjustment resulting from course withdrawal. However, aid delivery is managed differently among the universities, with UMA and USM operating financial aid as "header" universities (where aid is awarded and disbursed the summer before the traditional academic year begins) and the rest as "trailer" universities (where aid is awarded and disbursed at the end of the traditional academic year). The ongoing UMS transition to a single Office of Postsecondary Education Identifier (OPE ID) will not require aligning all seven universities under a "header" or "trailer" model. Each university is free to retain its current approach to delivering aid.

UMS universities partner with FAME to provide students access to the IGRAD financial literacy tool, and to the Educational Credit Management Corporation (ECMC), which provides comprehensive default-prevention services. In addition, financial literacy information is shared with students in a number of courses. For example, USM covers financial literacy in its senior exit course Launching Into Life After College. New Ventures Maine provides extensive financial literacy education for UMA students, and UMF is home to a Systemwide Financial Literacy Peer Education program available to students at every UMS university.

Cost transparency is a tenet at all UMS universities. Detailed breakdowns at each university delineate costs specific to different student populations by residency and level. In 2016, UMS launched a Financial Terms and Conditions agreement that each student was required to complete before enrolling in courses for the upcoming term. The agreement contains essential information about billing, communication, and student responsibilities.

Other supports are financial. For example, UMA's Pine Tree State Pledge is a tuition-guarantee program assuring that qualified and eligible in-state, full-time, first-year students will not pay out-of-pocket expenses for tuition and mandatory fees. The program is also open to new in-state full-time and part-time transfer students who have earned at least 30 transferable credits.

# **Standard Five:** Students

UMS has also provided some financial relief for students through a small debt forgiveness program established by the UMS Student Success Center. In fall 2021, three students with debt totaling \$7500 were persisting (when they would not have continued otherwise) and were expected to resolve that debt. Ten additional students were supported through the relief program, and eight remained enrolled and in good standing as of April 2022. As of spring 2022, a further six students were working with a Success Coach on debt relief and were preparing for fall 2022 enrollment.

UMA and USM used Higher Education Emergency Relief Funds (HEERF) to support student debt relief. UMA HEERF funds posted to student accounts as of December 2021 provided 717 students with debt relief, including 544 with total debt forgiveness and 173 with partial relief. Similarly, at USM, 1,140 students with balances incurred during the pandemic had their debts forgiven as of February 2022.

### **Common methodology for calculating discount rates**

In 2016-17, the Unified Budget Institutional Aid Committee developed a common methodology for calculating discount rates for use in monitoring tuition discounting across UMS. The UMS Enrollment Management Council supported the study and committed itself to annual reporting on outcomes in this area. Following the initial study (in 2016-17), the study was continued in 2019-20 and 2020-21, and will be completed each year hereafter.

The UMS calculated tuition discount rate equals total unrestricted aid divided by total gross tuition and mandated fee charges. As noted in the 2020-21 UMS Tuition Discount Report, the "overall degree-seeking tuition discount rate varied from [university to university,] with a low of 14% at UMPI and a high of 34% at UM. Similarly, tuition discount rates for first-time, full-time degree-seeking undergraduates ranged from 23% at UMM to 44% at UMA" (p. 3). Comparable ranges were observed for incoming full-time transfer students and full-time continuing degree-seeking students.

### **Supporting student success**

Student success as measured by retention and graduation/completion is a permanent priority for UMS. Each university tracks retention and graduation rates and establishes student success goals in its strategic plan. Correspondingly, each engages in a range of activities to improve student success, including addressing hurdles faced by traditional and non-traditional students, full- and part-time students, first-time-in-college and transfer students, and other cohorts (e.g. veterans, underrepresented, Pell-eligible, first-generation).

Interventions include targeted academic and student support, first-year academic experiences, calendar and scheduling assistance, identification of barrier courses, deployment of campaigns encouraging students to complete 30 credits per year to graduate in four years, and student life, co-curricular, and extra-curricular activities. Despite these interventions, as evidenced in UM's Data First forms, improving persistence rates remains challenging. Rates for first-time, full-time; first-time, part-time; non-first time, full-time; and non-first time, part-time students have remained more or less flat since 2010-11.

The University of Maine at Machias (UMM) and five educational and community organizations and agencies support Family Futures Downeast (FFD), a program "created to promote post-secondary education for parents and early childhood education for children as a means to reduce poverty, create employment opportunities[,] and improve stability [for] Washington County, Maine families." FFD students enter through a College Transitions program and enroll in FFD in the fall in a 15-16 credit, cohort-based academic program. Student supports include study skills training, financial aid, and assistance in math, reading, and technology skills. As of May 2022, 81% of FFD students have completed

the year-long program, and 83% of those students have matriculated into a further post-secondary program at UMM or elsewhere.

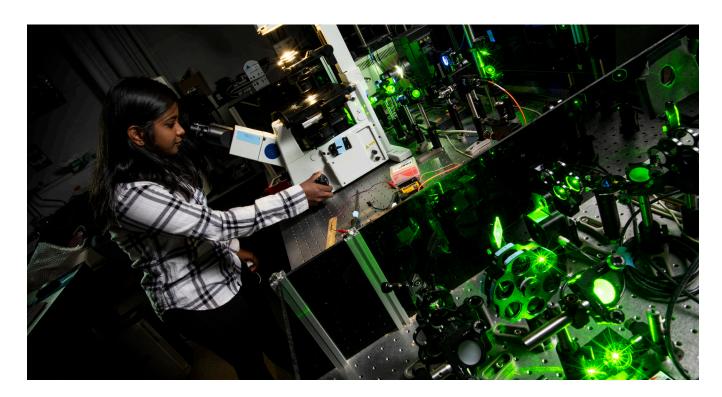

### Student services: overview and guiding principles

UMS universities offer an array of student services consistent with their missions and student needs. Student Life and other student services offices are funded at levels assuring appropriate delivery of robust programming. A full description of student services can be found on the website of each UMS university.

Each student services office or division is led by a chief student affairs officer, and staff sizes are scaled to the number of students being supported. For example, in 2021-22, UMF student affairs employed 51 professionals, 7.25 support staff, and 199 undergraduates. In the same year, UM and UMM (combined) employed 56 professionals, 24 support staff, 22 graduate students, and 338 undergraduates, while UMPI employed 30 professional staff, 5 support staff, and 91 undergraduates. UMA's staffing pattern included 21 professionals, 5 support staff, 2 graduate students, and 30 undergraduates.

Student services personnel are highly trained and well credentialed, with the typical minimum degree requirement for professional staff being the master's degree. UMS Human Resources serves all seven universities, and the Law School collaborates with all departments via a business partner model to help recruit, train, develop, incentivize, and retain employees committed to a student-centered mission. The UMS Office of Equal Opportunity ensures that the community upholds federal and state nondiscrimination laws.

Student services personnel follow Council for the Advancement of Standards in Higher Education (CAS) standards in creating and assessing high-quality programs in each functional area. The National Association of Student Personnel Administrators (NASPA) Standards of Practice further guide staff by promoting student services work as a profession and defining clear expectations for respect for individual difference and diversity, a commitment to service, and dedication to the development of persons and the community. Many UMS student services staff are active in their functional area professional associations, with UMS purchasing System-wide memberships when possible to reduce costs to the universities and expand access for personnel.

UMS administers a common student information system, student conduct code, Title IX procedures, and Equal Opportunity policies. All UMS universities generate student handbooks as the official student guide, with detailed information about UMS policies and information as well as policies specific to the university where a student is matriculated. The student handbooks are digital, easily accessible, and updated annually. Some policies have shifted to the UMS level, including the recent additions of a UMS Tobacco-Free Policy and a UMS Academic Integrity Policy. UMS and its universities use Maxient software for reporting and tracking Title IX, conduct, and Clery. Reports may be made through an online report form or to any university official.

### **Student services: the Student Conduct Code**

The UMS Student Conduct Code promotes student activity and achievement in the context of positive intellectual, ethical, and physical development. The Code is reviewed and revised every three years by a trained Conduct Review Board. The most recent update was adopted in 2021.

### Student services: Title IX

In 2020, UMS hired a central Coordinator of Title IX Services reporting to the UMS Director of Equal Opportunity to establish consistency of compliance efforts across the universities and Law School. Each university appoints one or more Deputy Title IX Coordinators to support its needs and liaise with the UMS Coordinator.

All employees, student workers, and incoming students are required to complete annual Title IX training. For this purpose, UMS currently uses the GET INCLUSIVE software platform, which is self-administered and includes an assessment component.

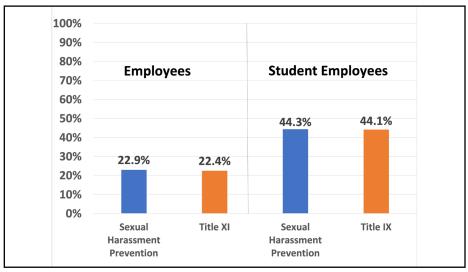

Figure 5: Percentage of UMS Employees and Student Employees Who Completed Required UMS Annual Trainings (AY2021-22) Note: Percentages based on total number of active employees (8,087) and student employees (4,406) paid between August 1, 2021 and May 19, 2022 and therefore expected to complete these trainings. Data exclude active PATFA employees who were not paid between these dates.

### Student services: physical and mental health resources

UMS universities offer a range of housing options, from suite-style to traditional double-loaded corridors. To meet the housing needs of a growing population of non-binary students, the universities have expanded the availability of gender-inclusive housing and bathroom facilities. As defined by Sightlines/Gordian data, inclusive of buildings, wings, and additions, there are 55 distinct residential facilities across UMS.

University recreation departments encourage physical activity and good health in a variety of ways. Recreation facilities provide and promote opportunities to engage in intramural

sports and teams, open gym times, equipment use, and outdoor recreational activity. During the pandemic, many recreation and fitness services were converted to virtual platforms to give all UMS community members access to fitness classes and personal training opportunities from afar.

Each university has either a stand-alone health clinic or a relationship with local health care providers and a liaison to facilitate the use of resources. Students at each university have mental health support available to them on a reliable basis, either through a fully functioning counseling center or a resource person identified for their population, in addition to wellness coaching and alcohol- and drug-education programming.

Services are predominantly available during business hours, but every university has instituted on-call systems to support the emergent physical and mental health needs of students during evenings and weekends. In 2021, UMS introduced SilverCloud, an online self-efficacy tool to assist students in managing their mental health. Additionally, universities across UMS convene interdisciplinary teams that analyze concerning student behavior and provide resources and support as needed.

### Student services: dining

Dining options cater to diverse dietary needs and include eat in, takeout, a la carte, and buffet service. All UMS universities except UM contract for food service with Sodexo, which manages dining and catering in-house. UMS dining programs strive to promote healthy eating habits and diverse food choices for thousands of residential and non-residential students. For students with unique needs, dining programs are staffed with dieticians available for individual consultation. Some UMS universities make kitchens available to students who have a demonstrated need to cook for themselves.

In the past decade, UMS has concertedly increased its sourcing of local food to support sustainable production. At UM, groceries account for 33% of the total food expenditure, and 19% are sourced locally. The university's goal is to see 25% of all food purchases locally sourced by 2025. UMS's Sodexo contract includes a commitment to use at least 20% locally sourced food. Sodexo is meeting and exceeding this goal. Sodexo also partners with each university to invest in dining facilities maintenance, support programming, and address food insecurity through initiatives such as USM's Food Security Cooler, which is stocked each night with excess food from the university's Portland dining hall.

### Student accessibility services

Student accessibility services staff across UMS collaborate to standardize support services, remove educational barriers, and provide reasonable accommodations for students with documented disabilities. Staff in these offices work directly with faculty, professional advisors, and other university partners to provide an equitable campus-life and educational experience for all university community members. Student accommodations include alternative-format textbooks, alternative testing options, and special housing and dining provisions. The groups maintain a System-wide database for students with disabilities that includes key information and contact notes to provide continuity of support.

### Student services: co-curricular opportunities

UMS students may choose from a wide range of co-curricular experiences: clubs and organizations, campus leadership opportunities, intramurals, club sports, community service and engagement, and travel opportunities. Each university has staff assigned to student organizations, leadership training, and out-of-classroom experiences. A joint Student Government Association conference for the seven universities is held annually.

Each university elects a student representative to the UMS Board of Trustees, and UM, USM, and the Law School each elect an additional graduate student representative. These students attend full Board meetings and Board committee meetings. In addition, Maine's Governor appoints a student to serve a two-year term as a full voting Board member.

# **Standard Five:** Students

All UMS universities offer balanced opportunities for men and women to participate in varsity sports. Student-athletes adhere to all conference and university policies and eligibility standards. Student-athlete handbooks and orientations detail expectations and eligibility criteria. Coaches monitor academic progress, and many facilitate mandatory study sessions. UM's Diversity Council includes a student-athlete.

The Law School's Student Bar Association (SBA) fosters community through educational, professional, and social programming. Student groups available to Law students include the American Constitution Society, the Women's Law Association, the Federalist Society, and the Multicultural Law Society. The SBA also sponsors programs in student wellness and physical activity. Other co-curriculars unique to the Law population are its trial team, law journals, and moot court program.

### Academic and career advising

Each UMS university provides individualized academic advising by faculty and professional advisors focused on student success and degree attainment. Advising seeks to equip students with the skills and confidence they need to define and achieve their academic and future goals, take responsibility for their academic success, and practice intellectual curiosity. Increasingly, the universities use the EAB Navigate tool to schedule advising appointments, nudge students to complete transactions, and send early alerts.

MaineStreet, the UMS enterprise management system, includes a degree-audit tool. A System-wide advising group meets regularly to review best practices and pursue enhancements to common advising tools. That group also hosts a biannual UMS Advising Summit. International student immigration advising is provided by all UMS universities hosting F-1 and J-1 programs.

UMS career services offices provide career counseling, job search skill development (e.g. resume/cover letter writing, interviewing, search strategies), education on current trends in employment readiness, and networking opportunities with employers. Historically, all UMS students have been invited to attend career/job fairs at every university regardless of their home university.

All UMS students have access to an online job/internship board. UMA, USM, and UMF have their own platforms, and UM hosts UMM, UMPI, and UMFK students on its platform. As of spring 2022, UMS is exploring a "shared instance" model to allow postings and related components of the job/internship process to be combined and made accessible System-wide.

A significant collaboration has accompanied the introduction of digital badging and micro-credentialing opportunities. UMS career services offices have served as a line of communication to students and to facilitators of some micro-credentials. For example, UMA Career Connections created a BrightSpace course allowing all of the universities to track the progress of students working on a UMS Career Prepared micro-credential developed at UM.

### **Appraisal**

# Providing innovative curricular options: Update on the University of Maine at Presque Isle's M.A. in Organizational Leadership

In its November 6, 2020 letter to Chancellor Malloy, the Commission requested an update on the implementation of UMPI's Master of Arts in Organizational Leadership (MAOL) competency-based education program, with attention to evaluating governance structures, assessing learning outcomes for the improvement of student learning, and providing appropriate student support with an emphasis on career services.

A Dean of Competency-based Education and Degree Completion was hired in September

2021 to oversee and manage the YourPace degree programs, including MAOL. The dean has collaborated closely with UMPI's senior leadership (including other deans), full-time and adjunct faculty, and staff to create partnerships, identify areas for improvement, and streamline expenditures. The dean is also working with other UMS universities to maximize human and financial resources.

Increased enrollments in UMPI's undergraduate degree programs (approximately 322 in the spring 2022, session 2) and MAOL program (approximately 20 in the spring 2022, session 2) affirm the need for additional staff to support the admissions process, enrollment, student retention and success, and curriculum management. A plan for adding graduate programs to the YourPace portfolio is responsive to current and projected enrollments. Additional internal support will be important to the continued success of the YourPace programs.

The MAOL degree program welcomed its first students in October 2020. As of April 2022, a full outcomes assessment of the MAOL curriculum has not been conducted. A migration from Strut, the program's current delivery system, to Brightspace, the UMS-supported learning management system, is planned for fall 2022, session 1. Once MAOL competencies have been redesigned for delivery in Brightspace, UMPI will take advantage of the program's tools for assessing learning outcomes. In a related step, a programmatic assessment plan for the MAOL curriculum will be presented to the UMPI Academic Programs Progression and Assessment group for approval in fall 2022.

An Academic Success Coach works with all YourPace students as they move through their academic careers. The coach leads students through orientation, provides deadline reminders, mentors students through difficult situations, and serves as a liaison between students and faculty. Four students have graduated from MAOL, and one student is now enrolled in a doctoral program. The Dean is currently working with UMPI's Director of Career Readiness on self-paced resource materials for students preparing for their next career step (e.g. resume writing, switching jobs and/or industries).

### Making the Grade initiative

In 2020, UMS formed a System-wide Student Success Steering Committee charged with identifying collaborative opportunities— tools and technology, practice and policy, new initiatives— to be implemented in ways sensitive to differing university missions and populations. Early outcomes include more intentional sharing of institutional best practices and the rapid deployment of student-centered initiatives, such as the Making the Grade program, which allows new students to repeat a failed/low grade course at no cost.

In its first two years, Making the Grade produced a 5% increase in first- to second-year retention among students who took part in it. Forty-four percent of first-year students who failed a course in fall 2018 and repeated it at no cost in spring or summer 2019 returned for the start of their sophomore year in fall 2019. Similarly, 49% of first-years who failed a course in fall 2019 and repeated it at no cost in spring or summer 2020 returned for the start of their sophomore year in fall 2020. In total, over 150 students from all seven UMS universities participated in Making the Grade and saw an average tuition cost savings of \$807.

### **EAB Navigate tools**

In a related investment in student success, UMS universities use the EAB Navigate platform and student app, with each customizing the resource to fit local needs. For example, UMPI, UMA, UMM, UMFK, and UM are using progress reports; UMA and UM use the scheduling feature, UMFK has piloted texting, USM is using it for appointment scheduling and the Study Buddies feature, and UMF and UMFK use alerts, quick surveys, and Study Buddies. Professional advisors and other end-users, including faculty, meet periodically to share updates about Navigate usage and outcomes.

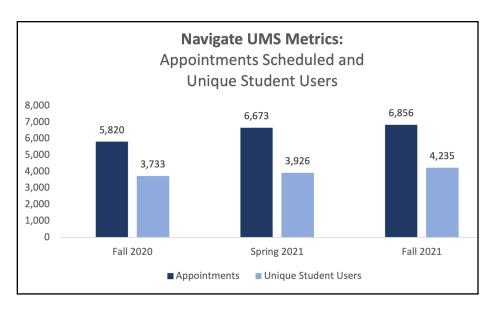

Figure 6: EAB Navigate data

### Facilities, resources, and accessibility

Many UMS residence halls are outdated. To accommodate current and future students appropriately, UMS is focused on increasing the quality and diversity of housing options available System-wide.

Occupancy levels during the pandemic have been a challenge. In fall 2020, UMS universities had a total residence hall capacity of 6,629. COVID health and safety measures reduced total capacity in fall 2021 to 5,763, but actual occupancy was 4,026. Fall 2022 is projected to present a similar challenge, with capacity estimated at 5,845 and occupancy projected at 4,162. UMS expects increased capacity and occupancy in fall 2023.

As modifications are made in dining programs to address the dynamic needs of students, more focus should be given to developing diverse menus to accommodate those with specialty diets (e.g. vegetarian, vegan, gluten-free, allergies, religious restrictions).

While awareness of accessibility needs is increasing, more focus should be placed on educating faculty, staff, and students about accessibility, particularly physical accessibility. Many buildings across the System could be retrofitted, and current accommodations could be standardized. UMS would benefit from a critical review of physical accessibility and corresponding feedback from the university and Law School communities.

In keeping with their missions, UMS universities continually seek ways to ensure services are available to online and distance-education students served through local centers. The pandemic has expanded virtual forms of engagement. For example, UM has worked with the professional association NIRSA: Leaders in Collegiate Recreation to offer a virtual fitness program to anyone with a UMS email address. That program taps into many free online fitness opportunities and has been shared throughout the System. Several universities have also created e-sports leagues as an opportunity for students to socialize in a co-curricular activity remotely.

UMS and its universities have taken steps to ensure students can continue their classes through the pandemic by loaning equipment, reducing internet inequalities, enhancing communication, and offering support for special populations. Like courses themselves, support service resources such as tutoring are now available in hi-flex to better meet student needs. Many services, including tutoring, writing support, library support, and supplemental instruction, are linked to (or embedded in) specific course sections.

The Law School hired a Professor and Director of Academic Success in 2020 and is building a more robust bar readiness passage program. Support for all law students now spans the full three-year experience and continues after graduation. Faculty have been provided with sample bar exam questions to supplement their other assessment methods. At the end of year one, all students take a bar diagnostic exam that helps the administration and students identify areas for improvement. The Director of Academic Success works closely with at-risk students in the second year through individual meetings and a required legal methods course. The Law School also offers a bar foundations course to all third-year students.

### **Projection**

### **Assuring support for students**

The long-term impact of COVID-19 will not be fully realized for several years. In the interim, UMS will pursue creative solutions to keep current students enrolled and bring back those who have left. We will also explore more structured supports for our growing high-risk student groups, and expand the use of technology to communicate effectively across generations— for example, deploying multi-use video content and website chatbots to support inquiries from prospective students.

UMS may also develop a training/communication plan with academic advisors and faculty so they are better equipped to communicate with students about basic financial matters and determine when a student should be referred to the university Financial Aid office. In addition, UMS may expand Maine high school outreach to increase the financial literacy of high school students and their families and high school counselors.

# Standard 5: Students (Student Diversity)

Complete this form for each distinct student body identified by the institution (see Standard 5.1)

For each type of diversity important to your institution (e.g., gender, race/ethnicity, first generation status, Pell eligibility), provide information on student admissions and enrollment below. Use current year data.

Undergraduate Admissions information	Completed Applications	Applicants Accepted	Applicants Enrolled		
Category of Students (e.g., male/fema	le); add more	rows as neede	d

enrolled and military deferment from calculation. (rolling averages)- DataSource NSLDS

Note: Three year loan repayment rate is much higher than previous iterations of this report, given the pandemic-related repayment policy changes made by the Dept. of Ed.

Goal year information was based on the assumption that institutional and State aid, as well as the Federal Pell Grant, will remain flat into next year. We utilized the HEPI index (CPI for higher education) value of 2.7% to incorporate an increase to loan values for the goal year. This was done by taking the last complete year, 2021, increasing by 2.7% (thus simulating the end of 2022), and then increasing again by 2.7% (to arrive at a simulated 2023 value)

\*\* Aid totals include all aid disbursed via the Financial Aid office, as well as Institutional Waivers disbursed through the Financial Aid office, and private loans/scholarships which are only listed on the Financials side. Totals include aid disbursed to Undergraduate, Graduate, Degree-Seeking, and Non-Degree Seeking students.

- Institutional Grant aid includes grants, scholarships, and waivers.

   Loan totals include parent loans, however student debt averages exclude parent PLUS loans.

   FY 2022 currently includes aid disbursed for the Fall and Spring semesters, as of 2.20.22.
- Post-baccelaureate certificate only students are excluded from the degree debt calculations.

- Students leaving the institution without a degree are defined as students who were enrolled in courses in the Fall, Spring, or Summer term of the year prior to the year listed, did not earn a degree, and were not enrolled in the year

- Average Debt includes only those students who borrowed.
- Dollars represented in thousands.
- \*\* This information is not yet available to report on. Datasource: Campus Solutions Reporting DB

Three year loan repayment rate (from NSLDS) definition: Fraction of repayment cohort who are not in default, and with loan balances that have declined three years since entering repayment, excluding enrolled and military deferment from calculation. (rolling averages)- DataSource NSLDS

Note: Three year loan repayment rate is much higher than previous iterations of this report, given the pandemicrelated repayment policy changes made by the Dept. of Ed.

Goal year information was based on the assumption that institutional and State aid, as well as the Federal Pell Grant, will remain flat into next year. We utilized the HEPI index (CPI for higher education) value of 2.7% to incorporate an increase to loan values for the goal year. This was done by taking the last complete year, 2021, increasing by 2.7% (thus simulating the end of 2022), and then increasing again by 2.7% (to arrive at a simulated 2023 value)

UMS defines its' Institutions as Home vs Host when it considers Headcount, SCH and FTE. Beginning Fall 2020, Headcount, Student Credit Hours (SCH) and FTE are reported differently based on Interinstitutional Cross-listed course Host and Home definitions.

The Host institution (is responsible for the faculty, and for ensuring the quality, rigor, and assessment of the course) receives the SCH.

The Home institution (where the student is matriculated, receives student support/resources, and where the students' primary enrollment is) keeps the FTE and Headcount.

Figure 7: Faculty headcount

Faculty and academic staff are vital to the missions of UMS universities and the University of Maine School of Law (Law School). Faculty are hired through shared governance processes and have qualifications appropriate to their roles. A majority of full-time faculty have terminal degrees in their disciplines (74%), and other faculty are also appropriately qualified to teach at a university level.

#### **Description**

#### **Faculty and academic staff**

The percentage of full-time and part-time faculty is determined by the mission of each university. Expectations for faculty work and evaluation are established in and described by UMS's collective bargaining agreements and in university governance documents. Full-time faculty have responsibility for the curriculum. Each university has a faculty governance body that attends to faculty business, with expectations of shared governance. Faculty shared governance is affirmed by Board policy and by the Board's 2007 Statement on Shared Governance.

As noted in Standard Three, UMS has two faculty collective bargaining agreements: the Affiliated Faculties of the Universities of Maine (AFUM) agreement for full-time faculty, and the Part Time Faculty (AFT-Maine, informally PATFA) agreement. Categories of faculty positions (e.g. part-time, lecturer, research, adjunct, tenure-track, and clinical) and tenure-track ranks (assistant, associate, professor) are defined by the two agreements. They list the ranks full-time and part-time faculty members may achieve, minimum salaries, and review processes. Each faculty member is hired into one or more appropriate academic (degree-granting) or research units via a letter of appointment. The participation of various categories of faculty in unit governance is determined by unit governance documents.

Some professional staff from the UMPSA bargaining unit and non-represented staff teach or mentor students. Academic units determine the qualifications necessary for their teaching staff.

#### **Tenure and promotion**

Criteria for reappointment, tenure, promotion, and post-tenure review are determined at the academic program level and are expressed in university governance documents. The AFUM collective bargaining agreement defines the full-time faculty workload, and that definition is broad enough that it can be interpreted according to university, college, school, or departmental needs. Faculty workloads vary depending on the research

expectations of the university and the requirements of the position.

The six-year probationary period for permanent faculty is contractual. Professional development funds are apportioned in accordance with the expectations of the faculty position. The Chief Academic Officers (CAOs) share plans for the hiring of permanent (tenure-track or "just cause"-eligible) faculty annually with the Chief Academic Officers Council (CAOC).

The preparation and qualifications of faculty and academic staff are appropriate to the nature of their assignments. Qualifications are measured by advanced degrees held, evidence of scholarship, advanced study, creative activities, and teaching abilities, and relevant professional experience, training, and credentials. Faculty positions generally require a terminal degree, most commonly the Ph.D. or a doctorate other than the Ph.D., but sometimes a terminal master's degree such as the MFA. Part-time faculty from professional fields are not necessarily required to hold an advanced degree. Part-time faculty and non-faculty academic staff who advise or support students are recruited through a competitive search process.

Search committees for staff members engaged in teaching, learning, advising, and other student support roles are populated by faculty and staff who hold similar roles and are cognizant of mission and needs. As support for all of the above, the universities and Law School receive centralized data and related assistance from UMS Institutional Research. Continuity in teaching and learning is determined in part by reporting lines, with degree-granting academic units holding primary responsibility for instruction and the delivery of student credit hours.

Per UMS Board of Trustees Policy 310, the Board grants tenure to the institution's faculty. Board Policy 312 provides for the appointment of university professors by the Chancellor with Board approval. Under unified accreditation, this remains in force.

#### **Faculty responsibilities**

Faculty assignments range from full-time research to full-time teaching, with many carrying substantial responsibilities for outreach, engagement, and public service. There are an adequate number of faculty and academic staff, including librarians, advisors, and instructional designers, for UMS to carry out its educational mission. Faculty responsibilities include instruction and the systematic understanding of effective teaching and learning processes and outcomes in courses and programs for which they share responsibility.

Additional duties may include student advising, academic planning, and participation in policy-making, course and curricular development, research, and institutional governance. University websites share information about student-faculty ratios and student metrics.

UMS faculty publish books, journal articles, blog posts, and comments on national academic listservs on an array of topics. They conduct research on several continents, in the oceans, and in the polar regions. Numerous UMS faculty have national and international reputations in their fields of scholarship and creative activity.

At each university, there are systems in place based on the AFUM agreement to evaluate tenure-track, post-tenure, and adjunct faculty. The Law School is governed by a separate policy. At each university, faculty appointments, tenure and promotion processes, and tenure decisions are reflective of those of peer universities. The evaluation criteria applied in these decisions are developed at each university, but include teaching, student advising, and curriculum development; research and scholarship (e.g. creative works in the discipline, publications and presentations, research, and scholarly writing); and service to the school or department, college, university, and community.

Per Board Policy 313, each university in UMS has established procedures by which students

evaluate faculty. Every UMS university employs an electronic means of distributing, collecting, and routing student evaluations of teaching.

#### **Faculty recruitment and retention**

UMS adheres to an open and orderly process for recruiting and appointing faculty. Faculty and staff—and in some cases, students— participate in faculty searches. The various documents that outline hiring processes through the UMS job search database (HireTouch) are housed on the UMS Human Resources site and on university HR sites.

As noted in Standard Five— and in alignment with the letter and spirit of applicable laws and its own DEI goals— UMS does not discriminate on the grounds of race, color, religion, sex, sexual orientation, transgender status, gender expression, national origin, citizenship status, age, disability, genetic information, or veteran status in employment, education, and all other programs and activities. Each university provides reasonable accommodations to persons with disabilities upon request. UMS Human Resources guidelines require EEO and implicit bias training. HR provides prospective hires with a written agreement describing the nature and term of the position they are being offered.

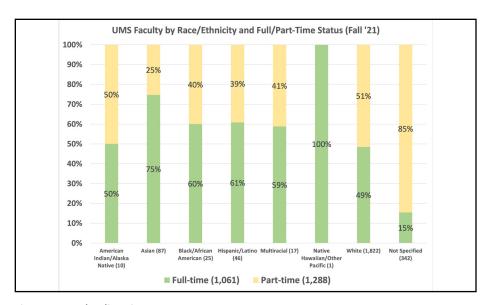

Figure 8: Faculty diversity

Faculty salaries vary across UMS, based in part on the nature of a given university's mission, its balance of teaching and research, the area of Maine it is principally located in (which affects cost of living), and rank (or role/classification). There is no standard means of tracking job satisfaction across UMS. Individual universities compile such data— as through UM's 2018 work-life balance report— but there is no System-wide equivalent.

All UMS universities have dedicated funds for continued professional development, including in-house research grants, sabbaticals, and funds for travel to professional conferences. The universities have various models in place for supporting faculty grant-writing and research, and professional development can be funded externally as well as internally. Resources vary based on the size of the university, the balance of teaching and research, the history of bequests, and the extent of grant-writing resources.

Policies at the UMS and university levels define faculty responsibilities and criteria for professional advancement. The faculty handbooks lay out criteria for recruitment, appointment, retention, evaluations, promotion, and, as applicable, tenure. They also address responsibilities of full-time and part-time faculty, dispute resolution procedures, the organization of governance bodies, procedures for the assessment of teaching, ethical

guidelines, and other matters controlled by the individual universities. The most recent handbooks are available in digital form on the UMS website.

#### Teaching

Teaching at the seven UMS universities and the University of Maine School of Law (Law School) is undertaken by credentialed, carefully vetted tenure-stream and part-time faculty. Teaching at all levels and in all modalities to all student populations is evaluated through formative and summative assessments. Findings from those assessments are used to improve student learning, courses, and programs.

Each UMS university offers continuing educational experiences to help faculty stay current in their pedagogical practices, including the use of new and emerging teaching technologies. These faculty development opportunities are often organized and led by instructional design staff, such as those housed in UM's Center for Innovation in Teaching and Learning, UMF's Teaching and Learning Collaborative, UMPI's Center for Teaching and Learning, UMA's Faculty Development Center, and USM's Center for Collaboration and Development.

Non-credit teaching and outreach courses and programs are delivered primarily through UM Cooperative Extension, which has an infrastructure and staff presence in all sixteen Maine counties. Extension's programmatic emphases include 4-H, food safety, and community development. Cooperative Extension faculty and staff manage active farms and educational camps throughout Maine, and share their expertise in the blueberry and potato industries and numerous other areas of the Maine economy. As noted on the Institutional Characteristics Form, Cooperative Extension delivers the preponderance of non-credit educational programming and outreach in the state.

UMS faculty direct independent studies, fieldwork, credit-bearing internships, practica, and clinical experiences (often with a credentialed field practitioner), and many participate in multi-university courses, programs, and/or collaborations.

# Update on the University of Maine at Farmington's Seguinland Institute partnership

UMS and UMF submitted a successful substantive change request in September 2021 to establish an agreement with the Seguinland Institute of Georgetown, Maine to offer UMF credit for courses taught through the Institute.

Since that request's approval, the partnership has been strengthened in several ways. Specifically, UMF has 1) surpassed its fiscal and enrollment targets for the 2021-22 academic year; 2) fully aligned its admissions processes, review of faculty, curricular development, and assessment of student learning outcomes; and 3) used the Seguinland location to deliver high-impact first-year fall seminars.

As part of joint administrative processes between the two institutions, Seguinland's Executive Director sends UMF's Associate Provost a summary of new student applications along with Seguinland's rationale for admission decisions, which are aligned with UMF's admission criteria. The Associate Provost approves, disapproves, or requests additional information. Similarly, new Seguinland instructors are vetted and approved by UMF consistent with the university's regular hiring and review criteria. In the case of new courses, Seguinland's Executive Director seeks initial approval from the appropriate UMF department chair and final approval from the Associate Provost.

Seguinland outputs are encouraging. Student course evaluations conform with UMF's, and student assessments of faculty for three Seguinland courses taught in fall 2021 were strong. The faculty received scores of 4.8, 4.5, and 4.9 (out of 5.0), respectively. Of the 55 UMF students who attended a Seguinland course, over 90% are still enrolled at or have graduated from UMF, far exceeding the university's average retention rate. UMF and

Seguinland are currently planning a broader longitudinal assessment of student learning outcomes across the full set of Seguinland course offerings.

#### Update on the University of Maine at Augusta's graduation goals

The University of Maine at Augusta (UMA) has set a goal of 18% for its overall IPEDS first-time, full-time 150% graduation rates. UMA has had rates of 18%, 19%, 13%, and 16% for its four most recent cohorts. Its one-year retention rate for baccalaureate cohorts continues to climb, rising from 59% for the fall 2017 cohort to 65% for the fall 2020 cohort.

The university recognizes that its overall first-time, full-time students remain a fraction of its total enrollments: 25.8% in the most recent tally. UMA's Student Achievement Measure (SAM) report shows that its 2014 baccalaureate first-time, full-time students have either graduated from UMA (20%) or from another university (11%), are continuing at UMA (7%) or at another university (11%), and are either successful or continuing on the path of success. According to SAM, the total student success rate of 49% is down slightly from the data UMA reported to the Commission in early 2021 (at 53%), but is a fuller indication of graduation rates and success rates of its student population.

UMA's efforts to improve student success continue apace. While its Title III Strengthening Institutions Grant ends this year, UMA has created an Online New Student Orientation and continues to have a higher percentage of students complete an orientation experience, having incentivized that program. UMA has also determined that its Class Stewards program, while producing modest results, is not sustainable. Instead, the university is using the EAB Navigate platform to ask faculty to issue progress reports at the three-week mark—focusing on no-shows and class entry issues— and again at mid-semester (fall and spring).

Over 60% of UMA faculty responded to the fall 2021 Early Progress Report initiative and then submitted 755 at-risk evaluations. Staff conducted outreach to these students. The university has also implemented the Early Alert tool in Navigate allowing faculty to report a student concern at any time. These steps permit more comprehensive monitoring and earlier interventions. In addition, UMA has increased capacity for online student engagement in a variety of student support areas during the pandemic.

#### **Scholarship**

#### **Faculty scholarship**

Scholarly expectations for faculty vary widely. Consistent across UMS, however, is that the scale of expectations varies with the percentage of each appointment dedicated to research. Faculty at universities with graduate degree programs have higher expectations for research on average than those that do not.

For all UMS universities, the percentage of workload devoted to scholarship or research is defined in the letter of appointment, and Article 10 of the AFUM contract ensures that faculty with mixed appointments (e.g. teaching and research) have total workloads comparable to those with 100% appointments in any one area. Article 10 further ensures that each department, division, or other appropriate academic unit develops evaluation criteria addressing scholarship, course and curricular development, and instruction as appropriate to the unit and the faculty appointment.

#### **Evaluation of faculty**

Consistency in the quality of faculty performance is addressed in university-wide peer evaluation, promotion, and tenure processes and in AFUM-required student evaluations of teaching. Evaluation procedures and review timelines for full-time tenure-track and non-tenure-track faculty are well-established and follow annual cycles.

Part-time faculty are evaluated against criteria, timelines, and procedures outlined in the PATFA contract and rely on student and peer evaluations. Evaluation and reporting for part-time faculty are difficult to track comprehensively. Recent improvements in the onboarding of part-time faculty via the HireTouch software platform should lead to improvements in processes for hiring, orienting, tracking, and evaluating part-time faculty, and will be assessed in that regard.

#### **Academic freedom**

Under Maine law, UMS faculty enjoy traditional academic freedoms in teaching, research, and expression of opinions, and are to be consulted in the formulation of academic policies. All UMS universities have faculty senates or assemblies— and in some cases, a staff senate or assembly engaged in university-level shared governance. These university-specific bodies have primary responsibility for the content, quality, and effectiveness of curriculum offered fully by that university, and the protection and fostering of the academic freedom of all faculty.

The relevant UMS policy statement is Section 212 of the Board's policy manual. Article 2 of the AFUM contract and Article 3 of the PATFA contract address academic freedom. These documents affirm the rights of free inquiry in the performance of teaching, research, publishing, and service obligations. All UMS universities also have faculty handbooks and faculty senate/assembly bylaws that define and affirm academic freedom. All recognize the necessity of academic freedom in higher education and commit to guaranteeing its exercise.

Each UMS university's administration is responsible for enforcing academic freedom policy in accordance with System-wide policies and standards, and protecting individual rights through adequate and timely review of alleged violations.

#### **Assessment and pedagogical effectiveness**

Each university engages in its own institutional assessment through systems of reports, surveys, program reviews, and program accreditation processes supporting continuous improvement. For example, in 2020 USM's Office of Academic Advising undertook a NACADA/Gardner Institute assessment process leading to a gap analysis and development of a strategic plan for academic advising.

Content and methods of instruction are assessed in a range of ways. The program review process requires academic programs to evaluate their courses on a cyclical basis: generally, every five to seven years. For example, USM's program review principles include consideration of the role of the program in the context of the mission and goals of the university, and require that program reviews be used as the basis for the improvement of outcomes and the identification of future goals. In addition, many programs across UMS yoke learning outcomes to the standards of their professional organizations (e.g. the American Psychological Association for psychology programs).

Individual courses are also evaluated for content and methods of instruction through annual program assessments and institutional-level evaluation of general education learning outcomes. In addition, university-level general education program outcomes provide valuable information to programs whose courses are part of the program. The effectiveness of instruction is regularly and systematically assessed at all universities through peer evaluation of content and methods of instruction during reappointments and related peer reviews (e.g. tenure or post-tenure reviews).

#### **Curricular innovation**

UMS universities encourage curricular experimentation. At UMA, for example, courses can carry an "E" (experimental) designation permitting expedited approval as warranted by need or opportunity. At other universities and at the Law School, initial and/or experimental courses are generally classed as topical or "special" and are offered at the

discretion of instructors and program directors.

UMF's Innovation Agreement promotes experimentation by allowing faculty to request that course evaluations during the initial offering or implementation of a course be framed in the context of pedagogical experimentation. The spirit of this agreement is to ensure that faculty do not have to worry about being penalized for trying something new.

The experience of UMS universities with COVID-19 provides evidence of curricular nimbleness, responsiveness to student needs, and the ability to adopt alternative instructional approaches while preserving academic quality. Between March 9 and March 25, 2020, UMS faculty worked to ensure that several thousand course sections would be available to all students remotely. IT deployed its resources, the various centers for teaching and learning partnered to support hundreds of faculty, and UMS and university leaders worked together in implementing a massive shift in instructional delivery to serve our students.

#### **Campus alignment and differentiation**

UMS programmatic offerings collectively align with its multifaceted mission. Survey courses serving as prerequisites in degree pathways are offered across UMS. For example, mathematics, English, and biology courses are offered at all seven universities. Each university offers mission-relevant courses and programs. Examples include UMFK's rural public safety administration program, UMM's book arts certificate, the Law School's environmental and ocean law certificate, and UMA's aviation program.

Students in each major are taught by a variety of faculty to provide exposure to different academic strengths and viewpoints. An appropriate balance between flexibility and consistency in learning outcomes is promoted (where feasible) through delivery of multiple sections of the same course, thereby exposing students to a range of faculty expertise and teaching styles.

There are also mission-linked differences across UMS in educational philosophy. For example, the 2021 UMF strategic plan includes a strong emphasis on providing students a full array of experiential learning opportunities, while UM graduate students play an important role in undergraduate education, and both undergraduate and graduate students are deeply involved in the university's research mission.

UMS universities offer first-year experiences aligned to their respective missions. For example, the First Year Seminar (FYS) is an integral component of the overall first-year experience at UMF. Its twin purposes are to help students make a successful transition to

college and develop habits of lifelong learning. In summer 2019, UMF piloted a version of FYS dubbed First-Year Fusion that includes a week of high-impact experiential learning prior to fall orientation, and ends in mid-semester to allow students to turn their focus to their remaining (regular) courses.

#### Advising

Advising models vary by university and sometimes by program. At some universities, advising reports to Academic Affairs, as it does at USM and UMA, and in others it reports to Academic Support Services, as it does at UMFK. UM has a college-level advising model: some UM colleges have designated advising centers and staff, while in others faculty take on the advising role.

Most UMS universities provide both professional and faculty advisors to students (UMFK, UM, UMA, the Maine Law School, and UMPI). UMF is rethinking its advising model via its Advising Futures Committee, and USM is developing a new strategic plan for academic advising. Advising is part of full-time faculty members' duties and is evaluated during promotion and tenure review.

#### **Appraisal**

#### **Workload considerations**

Workload expectations for full-time faculty are adjusted as needed. Often this is done at the individual level —or example, faculty may be given a course release to take on administrative work— or it may be done (more rarely) on an institutional level. There is no standard process for reappraising faculty workload, an issue that grew in importance in 2020-21 when the pandemic struck and faculty had to learn new modalities of teaching immediately. That this has not been figured into faculty workload remains a challenge. In addition, growing enrollment and shifting enrollment caps are sometimes not accounted for in evaluating workload.

All UMS universities employ sizable contingents of adjunct and non-tenure-track faculty whose primary responsibility is teaching, and who often bring particular skills into the classroom. At the Law School, for example, these instructors are typically practicing attorneys who incorporate their legal work into their teaching. University and Law School adjunct and non-tenure-track faculty often also work in unofficial capacities, advising students and taking part in program assessment. This is typically work for which they are not additionally compensated.

Variable workload definitions make comparisons of positions and compensation across UMS difficult. Meaningful assessment of workloads means establishing common definitions of teaching loads and accounting for teaching done at a university other than a faculty member's home university (for example, in a course or program delivered jointly by multiple UMS universities).

## Update on the University of Maine at Farmington's four- to three-credit conversion

In 2021, UMF began converting from a largely four-credit to a largely three-credit curriculum, and from 128 to 120 hours required to earn a degree. These moves followed a rigorous review through a campus strategic planning process, two external studies by Hanover Research, and completion of an external report in March 2021. The report reflected outputs from numerous meetings with the President's Cabinet, Faculty Senate, Academic Leadership Council (a mix of faculty and administrators), and a faculty working group, as well as multiple open campus sessions.

In revising its curriculum, UMF anticipates significant benefits to students and the university, including:

- greater curricular alignment with the rest of UMS
- increased opportunities for shared programming and instruction
- improved curricular efficiency
- markedly reduced barriers for transfer students
- overall reduction in the cost of a UMF degree.

Considerable work on the four-to-three conversion has been done over the past year and will continue through summer and fall 2022. A planned implementation in fall 2023 requires that most curricular changes be made by the end of fall 2022.

In January 2022, every UMF academic division submitted complete drafts of proposed program revisions for the university's approximately 90 undergraduate major, minors, and certificates. Proposals were reviewed by the UMF leadership and returned with feedback along with requests for information about course cycling and capacity to deliver programs with existing faculty.

By April 2022, the majority of UMF programs had submitted catalogue-ready program and course descriptions. (Education programs will not be submitted until September 2022 as UMF awaits final word on state teacher certification requirements.) Three-fourths of UMF's remaining programs have been reviewed by the leadership; a quarter have been approved by the relevant division and the leadership and are under review with the UMF Curriculum Committee and Faculty Senate.

**Update on the University of Maine's progress in strengthening its funding model for research and increasing research funding and doctoral education** UM has pursued several initiatives in the past two years to stabilize and strengthen the funding model for research and increase research funding and doctoral education. These efforts are described below. Investments are included in multi-year planning assumptions for the research and graduate school enterprises.

#### (i) Strengthening the funding model for research

To further develop the funding model for research, an F&A (facilities and administrative) distribution model was approved by the university in November 2020. While for the previous four years UM applied an F&A distribution model that only supported PIs, the new model for the first time also directly returns a fraction of F&A funding to the units supporting the research that generated the funds. The new model is designed to incentivize and support faculty and academic units in the growth and advancement of their research efforts while also covering for increased expenses resulting from that growth.

Due to concerns about the pandemic causing a possible budgetary shortfall, UM postponed the implementation of the new F&A distribution model by one year. (Two elements of the new model were considered in fiscal year 2022: an improved distribution model for Pls, and second-year implementation for UM's largest research center, the Advanced Structures and Composites Center).

Beginning in fiscal year 2022, UM has provided one million in base-budgeted funds to the Office of the Vice President for Research and Dean of the Graduate School to address urgent needs arising from the growth of the research enterprise, with additional base funds under consideration for fiscal year 2023 and beyond for new-faculty cluster hiring to support UM's continued success in securing extramural funds.

#### (ii) Increasing research funding

In fiscal year 2021, despite challenges posed by COVID-19, UM set a new university record by generating \$133.6 million in external funding in support of research and development activities as compared to \$56.9 million in fiscal year 2017: a 135% increase over that five-year period.

R&D expenditures also reached a new all-time record of \$179.3 million in fiscal year 2021 as compared to \$99.5 million in fiscal year 2017, an increase of 80.2% over the five-year period. UM is committed to sustaining this effort, and doing so will require new funding models and other improvements. Moreover, as the growth and development of the research enterprise has accelerated, the university recognizes that it needs to move more of its research enterprise to base-budget funding. This process began in fiscal year 2022 as highlighted below.

UMS and UM have increasingly raised visibility among policymakers about the connection between UMS R&D activity and talent development and economic growth. Throughout the pandemic, UMS hosted biweekly virtual briefings for legislators and congressional staff spotlighting university research and researchers contributing to pandemic response efforts, including supporting of public health, K-12 education, and small-business development.

Further, university leaders have assumed leadership roles in numerous statewide planning efforts, including the creation of a 10-year state economic strategy and plans on climate action and economic recovery, all of which included bold increases in public R&D investment among their priority recommendations.

UM avails its resources, labs and related facilities, and staff to work with business and industry for joint R&D and problem-solving, as well as programs for business and technology acceleration and incubation. The highest volume of contract work occurs in UM research centers, including the Advanced Structures and Composites Center, the Forest Bioproducts Research Institute and Process Development Center, the Advanced Manufacturing Center, and the Aquaculture Research Institute.

In the last five years, UM has focused on growth in the industry contract and technology commercialization space, with outreach and education/training activities including the TopGun entrepreneurship training program, the Maine Innovation Research Technology Accelerator (MIRTA), an NSF I-Corp program, and a Commercialization Series workshop for

faculty, staff, and graduate students.

UM operates three incubators supporting startups and spinoffs. The patent portfolio is growing in the areas of renewable energy, bioproducts, computer-aided medical diagnostics, neutriceuticals, and advanced manufacturing, with licensees pursuing commercialization. The maturing of some of these technologies and market growth opportunities in green technologies hold promise for increased licensing revenue. UM also plans expansions in facilities, labs, and equipment to modernize and support large-scale additive manufacturing of biomaterials, advanced manufacturing and automation, biomaterials for medical applications, aquaculture, precision agriculture, and food innovation.

Growth and expansion in research and graduate studies, coupled with a growing level of support for research and graduate studies made available to other UMS universities, means there is a need for more investments in research infrastructure and resources for UM to sustain these efforts while also maintaining its own activity. UM is exploring how increases in revenues generated by the growth in research and graduate studies in combination with UMS Research Reinvestment Funds (RRF) can be allocated to meet increased demands for services and known needs to sustain and maintain research and graduate studies. (In 2015, UMS made a recurring \$2.1 million in administrative review savings available for a multi-year research and economic development initiative to create RRF. UM administers these funds to support the growth and development of research and development efforts at UM and across UMS.)

Budget planning is in development to support the necessary UM research-related resources, including for the Graduate School, the Offices of Research Development, Research Administration, and Research Compliance; Advanced Research Computing, Security, and Information Management; Coordinated Operating Research Entities (CORE)

Facilities; and the Office of the Vice President for Innovation and Economic Development.

An incentive-based proposal to share up to 60% of the incremental net revenue from new entrepreneurial programs is moving toward implementation. Entrepreneurial and innovative activities at UM contribute to its teaching, research, and service missions directly (by providing educational opportunities in new or emerging fields) and indirectly (by providing funds to enhance scholarly research, creative activity, innovation, and training). The purpose of the entrepreneurial funding program is to encourage and incentivize academic units to develop graduate programs that can meet the needs of targeted new audiences and generate new sources of revenue.

#### (iii) Increasing doctoral-level education

In spring 2021, total UM doctoral enrollment exceeded 500, and in fall 2021 overall graduate student enrollment and doctoral student enrollment reached all-time highs at 2,557 and 522, respectively. Graduate assistantship stipends have been increased to recruit and retain high-quality students, and more will be done to reach levels reflecting the stipends provided at other New England flagship universities. \$500,000 increases in the Graduate School budget to fund recruitment, assistantship stipends, and other personnel are included in multi-year planning projections.

In March 2021, Chancellor Malloy invited UM President Joan Ferrini-Mundy to assume an additional responsibility as UMS Vice Chancellor for Research and Innovation, with an expectation of increasing research engagement across the System. In the long term, this may result in increased revenues for the UM research and doctoral education enterprise through expanded submission of proposals to federal sponsors by faculty across UMS, and the prospect of shared F&A.

The recently launched UMS Faculty Affiliates program helps facilitate research collaborations between UM faculty and their colleagues at other UMS universities and the Law School. The program also supports the growth of graduate education by providing enhanced teaching experiences for UM graduate students who aspire to careers in the academy as they teach classes for UMS faculty on research sabbaticals or related research-time protections.

The Faculty Affiliates program is also expected to aid in UMS's response to an issue described in the June 2020 substantive change request. Introducing faculty from other UMS universities to research collaborations at UM will likely influence future curriculum at those universities and thereby expose their students to courses and programs otherwise inaccessible to them.

The 2020-24 UMS research and development plan articulates goals through which research can be expanded across UMS, with RRF as a key catalyst. The R&D plan aligns with UMS efforts to support implementation of the state's 2020-29 economic development strategy—emphasizing talent and innovation— and with NECHE's July 2020 letter to UMS affirming the need to strengthen the funding model for research and increase research funding and doctoral education at UM.

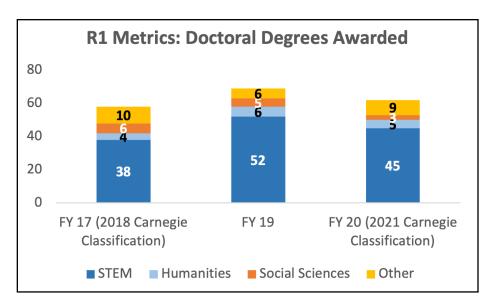

Figure 9: R1 at UM

#### **Projection**

#### Guidance for multi-university academic programs and their faculty

As UMS moves to a more unified approach to teaching and learning, it will need to disseminate standardized guidance for multi-university academic programs and related collaborations. It will also need to consider the impact of cost-sharing agreements, provide seamless academic processes (e.g. course registration, financial aid flow) for multi-university students, and support faculty innovation.

#### **Programmatic review of learning outcomes**

To assess student learning, academic programs at all universities engage in learning outcome assessments that are typically presented in programmatic annual reports. UMS universities will engage faculty more fully in the programmatic review of learning outcomes. Faculty are appropriately engaged at the course and program levels already, but lack a system to quantify how students are meeting program learning outcomes. Relatedly, the assessment work faculty are already doing should be acknowledged and formalized.

### **Standard Seven:**

# Institutional Resources

UMS continues to be well-positioned to comply with this Standard. System-wide groups representing each of the Standard Seven components are in place and have made progress toward shared systems and goals. For financial resources, the period under evaluation has presented extraordinary challenges due to COVID-19; however, work has moved forward on our near-term and long-term financial planning. Centralized IT continues to evolve with integrated governance and planning.

While changing pedagogies and technologies present ongoing challenges, the effective shift to remote learning System-wide in March 2020 and the implementation of a new learning management system in fall 2022 were major achievements. In addition, UMS libraries have finalized a strategic plan, and UMS is engaged in facilities planning and investment with a significantly increased major capital load. Maximizing these institutional resources will continue to benefit UMS and its universities.

#### **Description**

#### **Human Resources: overview**

The University of Maine System (UMS) Office of Human Resources (OHR) provides leadership in collaboration with each UMS university to meet the changing human resource needs of faculty, staff, and students and ensures that UMS offers educational opportunities that transform students' lives and research and outreach contributing to the people and state of Maine. Fair and respectful treatment of employees and compliance with employment laws are among OHR's core values.

As of October 2021, UMS had 4,721 FTE employees, including by headcount 1,238 regular faculty, 846 adjunct faculty, 2,006 salaried staff, 1,204 hourly staff, and 97 administrators. UMS employs a centralized human resources and labor relations function (54 FTE) under the direction of a Chief Human Resources Officer (CHRO) reporting to the Vice Chancellor for Strategic Initiatives and Chief Legal Officer (VCSI). Centralized services include benefits and payroll administration, HRIS, compensation, equal opportunity, ADA compliance, labor relations, talent acquisition, and learning and organizational development. Common policies, practices, and procedures apply across UMS.

Each UMS university is assigned a Human Resources Partner (HRP) with dual reporting lines to the CHRO and the university President. Collective bargaining is conducted for six bargaining units at the UMS level with participation from each university, and all collective bargaining contracts apply across UMS. HR also supports student employees with set-up in the HR system and payroll.

In fall 2021, a monthly CHRO newsletter was developed to reach employees System-wide, providing important information and connecting employees to OHR. Each newsletter features a different monthly theme and announcements and reminders about upcoming events, deadlines, and opportunities. The newsletter supplements local HR communications across UMS.

#### **Human Resources: strategic initiatives**

OHR has launched a live (virtual) System-wide new-hire orientation for navigating the basic employee landscape and reviewing employee benefits, as well as monthly virtual meet-and-greet sessions with UMS staff to welcome and support new hires. This orientation was developed with the goal of ensuring that all new hires experience multiple human interactions throughout the onboarding process despite geographic and COVID-related challenges. The virtual orientation is provided in addition to orientation efforts made locally at each university.

OHR has also developed an HR lecture series to offer programming on topics such as navigating the pandemic, managing stress, mental health support and awareness, and mindfulness techniques.

In addition, OHR has begun a comprehensive review of UMS Human Resources policies and procedures, including the Employee Handbook. Upon completing the review, OHR will make any necessary revisions to its policies and procedures to ensure they align fully with UMS goals and values.

OHR is working to create new positions within Human Resources that will help in achieving UMS' strategic goals. Recently, OHR has focused on filling critical roles such as the Director of Labor Relations, Vice President of Total Rewards, Equal Opportunity Investigator, and Internal Communications Director. These positions will be instrumental in helping to carry out System goals and initiatives.

Human Resources is working cross-functionally with key stakeholders to implement a new payroll system that will help employees who struggle with the current monthly payroll schedule. The new system has the potential to improve the payroll process overall, and the cost savings it realizes will be used to support other initiatives.

OHR co-leads DEI efforts across the state by building on a framework developed by the Chancellor, Presidents, university DEI councils, and OHR's Learning and Organizational Development staff following the Chancellor's June 2020 Imperative for Change directive. UMS recently deployed the HEDS DEI Climate Survey System-wide and will use the resulting data to tailor DEI efforts and programs moving forward.

#### Financial structure, operations, and resources

The UMS Charter (P&SL 1985, chapter 532 as amended, Section 4-B.1.; Bylaws of the Board of Trustees Section 1.3) states that the Board of Trustees is the UMS governing and planning body, and charges it with responsibility for preparing and approving the operating and capital budgets. The Board is responsible for providing sound financial management, exercising prudent stewardship of UMS assets, and planning strategies for programs and allocation of resources that most effectively serve the educational needs of the citizens of Maine.

The Charter (Section 4-A, 4-B2) also states that the Board will appoint a Chancellor as chief administrative and education officer. Among other duties, the Chancellor promotes planning for financial operations, capital plans and resource allocations; prepares all operating and capital budgets, appropriation requests, and bond issues; and provides centralized management oversight of services.

Section 2 of the Charter states that the Board will appoint a Treasurer to receive and have custody of all monies received for UMS, make all expenditures upon authentication, exercise revenue bonding authority with the approval of the Board, and prepare the annual UMS financial report. Board Policy 207 rests all signatory authority to draw funds and to sign contracts, grant applications, research proposals, purchase orders, and similar instruments with the Treasurer.

In current practice, the Vice Chancellor for Finance and Administration (VCFA) also serves as the appointed Treasurer of the Board and exercises the powers reserved to the Treasurer under Maine law. In addition, the VCFA fulfills the other financial and administrative duties assigned by the Board and delegated to that position by the Chancellor.

The VCFA is the UMS chief financial officer. Pursuant to a directive of the Board in November 2013, the VCFA developed a unified financial structure for UMS, including centralized services for budget, financial analysis, finance/controller, and student accounts. The Chief Business Officer (CBO) of each UMS university has a dual reporting line to the VCFA and the university President.

All Board and administrative fiscal policies are promulgated on the UMS website and kept current. A UMS administrative policy on the Use of University Funds was adopted in 2013 to ensure that all funds are expended for business purposes that support and advance the UMS mission.

A new Board policy on the development and management of operating and capital budgets was adopted in 2014 to provide an engaged and iterative process for building the UMS budget that ensures the fiduciary responsibilities of multiple stakeholders (Board, Chancellor, VCFA, and university Presidents) are met, and that the Chancellor and Presidents have the opportunity to engage campus and community constituencies in the process. Additionally, the new policy provides central controls and approval requirements to manage the budget.

UMS applies best practices to monitor and report on its financial health to the Board and the public, including multi-year financial analyses to project five-year revenues and expenditures; current fiscal year (FY) forecasting to project year-end results at intervals during the fiscal year; and financial ratio analyses to monitor the financial health of each university and UMS over time.

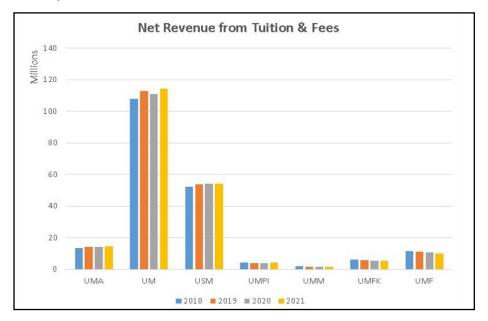

Figure 10: Net revenues from tuition and fees

UMS maintains a Budget Stabilization Fund to supplement revenues and stabilize the budget during enrollment declines and economic downturns, and a Strategic Investment Fund for critical non-recurring investments (currently \$2.5 million annually). The System also maintains a Benefit Pool carryover reserve of \$19.5 million to smooth the financial impact of adverse claim trends in its self-insured health plan. In addition, UMS is in its third year of implementing an appropriation allocation funding model that links the allocation of

new state appropriation to the funding levels of its universities' peers.

UMS's finances are regularly reviewed by three standing committees of the Board: the Finance, Facilities and Technology Committee (FFT) has general responsibility for financial oversight; the Investment Committee is responsible for the conservation and prudent management of the managed investment pool, including the endowment, the defined benefit pension fund, and the operating cash fund; and the Audit Committee monitors the adequacy and integrity of UMS's internal controls, financial reporting, compliance with legal and regulatory requirements, risk assessment, and ethics reporting. Each committee reports regularly to the full Board for approval of key decisions. UMS finances are subject to annual independent financial statement audits and to the Uniform Guidance audit of federal funds.

Despite ongoing economic and demographic challenges, UMS has been able to set aside resources for strategic investments and unforeseen events. As a result, the collective financial condition is relatively stable. In each of the past five fiscal years, UMS's net position has increased from the net of revenues over expenses.

Like all other public higher education institutions, UMS has adopted Governmental Accounting Standards Board (GASB) Statement No. 75 (Accounting and Financial Reporting for Post-employment Benefits Other Than Pensions). UMS adopted the statement in FY17, reducing its beginning-of-year net position by a one-time amount of \$102 million as it recorded the full liability for its post-employment health plan. Since that time, net position has decreased 3% or (\$34) million, to a total of \$832 million as of June 30, 2020.

Operating revenues have increased by 3.2% from \$436 million in FY16 to \$450 million in FY20. Net student tuition and fee revenues are the primary source of operating revenues and have grown 18.2% from \$270 million in FY16 to \$319 million in FY20 despite fall 2020 full-time equivalent enrollment of 21,618 being relatively flat compared with fall 2015 full-time equivalent enrollment of 21,629. In FY18, UMS increased tuition for in-state undergraduate students for the first time since FY12.

Continuing with its commitment to affordable educational opportunities, UMS held the in-state undergraduate tuition increase at that time to an average of 3.3% and the overall average comprehensive costs of education for this same category of students to an increase of 2.7%. The FY20 in-state undergraduate tuition increased by an average of 2.7% where the overall average comprehensive cost of education for this same category of students increased 2.8%.

UMS has a comprehensive enrollment management plan that is updated annually. Enrollment is supported by financial aid funded by each of the universities, including tuition waivers, scholarships, Supplemental Educational Opportunity Grant (SEOG) match, work-study match, university loans, and Perkins/Nursing match.

Net non-operating revenues increased by 19.3% from \$222 million in FY16 to \$265 million in FY20. Non-capital state appropriation has increased by 9% from \$201 million in FY16 to \$219 million in FY20. Gifts currently expendable have been relatively flat over the past five years and totaled \$19.4 million in FY20. Endowment return used for operations has been consistent at \$6 million per year for the past five years.

Investment income has fluctuated with changes in the investment market. Such revenue totaled \$9 million in FY20, and averaged \$9.3 million for the past three years and \$8.2 million over the past five years. UMS engages a consultant to provide guidance on its investments and has in place written investment guidelines and objectives approved by the Investment Committee of the Board.

UMS operating expenses increased by 8.4%, from \$660 million in FY16 to \$716 million in FY20. The combined total operating expenses for instruction, academic support, and student services was \$318 million for FY20, representing 44% of total operating expenses. This percentage has been relatively consistent over the past five years. In keeping with GASB, UMS is committed to including depreciation costs in its capital and operating budgets so it can address ongoing facility renewal and replacement and its backlog of repair and modernization needs.

Ten affiliated fundraising organizations (e.g. foundations, alumni associations) provide support to UMS missions and initiatives. University foundations provided an annual average of \$13.1 million in gifts to UMS over the past five years. Total endowment market values for all affiliated fundraising organizations totaled \$392 million at the end of FY21, up 56 percent from the FY17 total of \$252 million.

UMS has developed a long-range financial planning process—the Multi-Year Financial Analysis (MYFA)—that evaluates the fiscal impact of key budget drivers such as enrollment, faculty and staff compensation, investments in physical plant, and state appropriation invested in UMS. The MYFA is supported by a comprehensive financial modeling tool for multi-scenario, all funds revenue, and expense forecasting, including demographic, program, and facilities analysis. The MYFA is reviewed with the Board annually as part of the budget review process to inform and guide decision-making and resource allocation.

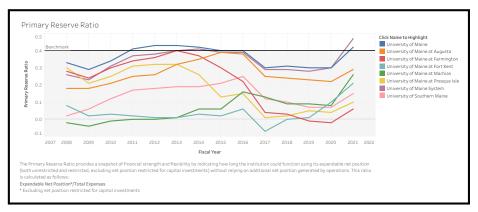

Figure 11: Primary reserve ratio

#### **Facilities**

UMS has developed a central capital planning and project management function, centralized risk management, strategic procurement, safety management, and a unified work control center. These operations are led by a Chief Facilities and General Services Officer reporting to the VCFA. UMS universities manage day-to-day operations of facilities and grounds; their respective facilities directors report to the university Chief Business Officers (CBOs).

UMS owns and operates a physical infrastructure of about 8.7 million square feet of space (a reduction of about 3% since approximately 2012), hundreds of buildings, and thousands of acres of land at its universities and Law School and at numerous additional physical locations, including farms, forests, marine and aquaculture research facilities, and off-campus instructional locations.

#### Libraries

Fulfilling a goal identified in the June 2020 UMS substantive change request to the Commission, the University of Maine System Libraries (UMSL) group completed a strategic plan in 2021.

UMS libraries' shared collections support students, faculty, staff, and researchers, including

all resources acquired in print, e-journals, e-books, databases, various media, and special collections. Through these resources, the libraries support curricula, programs, and research at their respective universities through owned or accessible collections, interlibrary lending, and course reserves.

Available resources include discovery and content management tools, focused Lib Guides web pages for subject areas, programs and classes, and local web pages and other tools created or mediated by UMS librarians. Other resources include:

- Maine InfoNet: a statewide collaborative of academic, public, school, and special libraries
- URSUS: the UMS libraries, Bangor Public Library, Maine State Library, and Maine State Law and Legislative Library
- Larger Libraries Group: UM, USM, Bowdoin, Bates, Colby, Bangor Public Library, Maine State Library, Portland Public Library, and the University of New England
- Maine Shared Libraries Cooperative: a collaborative of 40+ academic and public libraries in Maine who have collectively agreed to retain more than 1.5 million print books for a minimum of 15 years.

#### Information technology

UMS employs a centralized information technology (US:IT) function to meet the expectations and purposes of its students, faculty, and staff. These operations are led by the Chief Information Officer (CIO), who reports to the VCFA. US:IT delivers technology infrastructure, solutions, and services to the universities and other UMS units. The team was unified in 2013, streamlining governance, assets, and delivery systems, while maintaining direct response capability at each university. The resources assigned to UMS universities operate under a common set of standards and principles to achieve System outcomes.

UMS operates a singular wide-area network, providing a single high-speed network to connect all locations, students, faculties, and support. Online and hybrid services are supported by IT and by instructional design staff at all locations.

Regular investments are made to maintain technical capacity at each UMS physical location. Specific emphasis is placed on learning technologies, including video, smart board, wireless capacity, and other infrastructure to support and enhance learning.

UMS's IT capital investment plan demonstrates recent and future planned expenditures. The Education Technology Advisory Committee (ETAC) is a group consisting of faculty, instructional design professionals, and IT staff who identify emerging instructional technologies, evaluate new products and services, and provide investment and servicedesign advice.

A Chief Information Security Officer (CISO) reports to the CIO. The CISO oversees systems integrity and privacy of data and is the UMS HIPAA designee managing unified policy, actions, and security incidents. Training of all staff and proactive audits and log management fall in the CISO's area of responsibility. A revitalization of the US:IT governance board will continue oversight by faculty, academic leadership, and administrative management.

University learning and collaborative spaces are designed to be inviting and highly functional for students and other users. Environments have been upgraded to support bring-your-own-device strategies and mobility. UMS operates a regional optical network at all its universities to provide the necessary bandwidth and capacity to support research and advanced needs.

UMS completed its first Information Technology Strategic Plan in 2018, identifying strengths and gaps in information resources, services, and capacity across UMS. This analysis is updated annually.

#### **Appraisal**

#### **Human Resources**

With its new CHRO in place as of October 2021, OHR is conducting a complete review to identify opportunities and build upon strengths, including consideration of its matrix structure, labor relations staffing, support, and coordination, technology investments, and administration of the Great Colleges to Work For survey.

#### Increasing access to library resources across UMS

Students enrolled in courses at multiple UMS universities have ready access to shared resources. Faculty, staff, and researchers do not, as individual library budgets will not allow for vendor licensing for the full array of potential resources. (Vendor licensing costs are typically based on a tiered range of FTE students.)

A plan and process are needed to ensure that all university constituencies have equitable access to library resources across UMS. Relatedly, continued research into a shared acquisitions model with a single budget is imperative. This approach would promote ease in resource-sharing and ensure access across UMS.

A library resources task force formed in 2017 recommended that UMS take one of two approaches to library resource equity: 1) provide all UMS libraries digital resources to faculty, staff, and researchers at all seven universities and the Law School; or 2) provide several of the most commonly needed resources. The mechanism for funding 1) or 2) suggested at the time is the establishment of a per-credit library fee.

#### **Facilities and infrastructure**

Several facilities require communications and infrastructure upgrades, and keeping pace with evolving pedagogy and technologies is challenging. For this reason, integrated governance and planning for US:IT, including significant collaboration with UMS universities, is used to set policies, achieve support, and establish a cycle of continuous feedback and improvements. Deeper integration of the information technology systems serving UMS universities is occurring and will result in greater efficiency and interoperability while enhancing student success.

UMS contracts with Sightlines/Gordian to help monitor and manage its physical infrastructure. Physical space is generally appropriate and adequate, but disparities exist. UMS engages in ongoing planning and investment to improve the design and condition of its facilities, and to keep current with teaching methodologies and the ever-changing needs of students and faculty.

UMS is managing (as noted above) a significant capital project load. These include multiyear projects and reflect important funding sources, such as private philanthropy, state support, and private partnerships as UMS continues its effort to improve the condition and net asset value of its facilities.

UMS engages periodically in physical resource planning, including annual assessment of the condition and needs of the physical infrastructure. UMS employs a three-tiered planning process that includes master planning approximately every decade, five-year capital planning exercises, and annual work planning to be integrated into UMS's annual budget process.

#### Information technology

Prior to 2012, information technology investments and decisions were made individually by UMS universities, and technologies were not standard from one location to another. Lack of consistency in data coding conventions and standards has also presented challenges in delivering consistent functionality and user experiences for core systems. Resources needed to enable sufficient high-level IT capacity at all instructional locations represent a continued investment.

To address these issues, integrated governance and planning for US:IT, including significant collaboration and flexibility with UMS universities, will be used to set policies, achieve support, and establish a cycle of continuous feedback and improvements. Deeper integration of the information technology systems serving UMS universities is occurring and will result in greater efficiency and interoperability while enhancing student success.

#### **Standard Seven:**

**Institutional Resources** 

Continued growth in the UMS Data Governance structure will promote and ensure greater consistency with data coding conventions and standards. Continuation of the effort to adopt a cloud-first enterprise strategy will ensure long-term scalability, sustainability, and cost efficiency.

#### **Finances**

UMS finances remain strong. The institution carefully tracks state and regional demographics and enrollment activity, and pursues cost savings and operational efficiencies wherever feasible while maintaining appropriate services and programming for students, faculty, and staff.

#### **Projection**

While many facilities are in excellent condition, the overall state of UMS facilities is estimated at a net asset value of approximately 54%, and more than half of all space has a renovation age of 50 years or older. The Board has set a goal of achieving a net asset value of 63% by 2022, a target subject to review and updating.

To address facilities challenges, UMS continues to focus on removing space, constraining the growth of space, and thereby improving overall net asset value. UMS has reduced its total space by 285,000 gross square feet since FY12 and that initiative is ongoing.

UMS efforts to secure new and novel sources of investment have produced gains in the overall funds available— one-time and recurring— for major capital projects in the current capital planning period and the immediate future. Revenue bonds, public-private partnerships, potential new state support, energy services company agreements, and other revenue sources are all being pursued or are in progress above and beyond the more traditional appropriation funds, grants, and general-obligation bond resources.

# Standard 7: Institutional Resources (Headcount of Employees by Occupational Category)

For each of the occupational categories below, enter the data reported on the IPEDS Human Resources Survey (Parts B and D1) for each of the years listed.

If your institution does not submit IPEDS, visit this link for information about how to complete this form: https://surveys.nces.ed.gov/IPEDS/Downloads/Forms/package\_1\_43.pdf

Debt is comprised of small capital leases, tax-exempt bonds payable, and obligations under a master lease-purchase agreement. New debt for FY21 includes a \$23 million bond anticipation note. The University of Maine is part of the UMS which is the legal entity that issues the tax-exempt bonds and bond anticipation note. The UMS' bond rating from S&P Global Ratings was AA-/Stable for FY17 through FY21. The most recent rating is dated 8/11/2021.

#### Line(s) of Credit: List the institutions line(s) of credit and their uses.

Although it is not a line of credit, the University of Maine and the other universities within the University of Maine System have access to a master lease-purchase agreement between Banc of America Capital Corp and the University of Maine System. The University of Maine is utilizing this agreement to strategically replace aging vehicles and to acquire major assets needed to deliver its academic programs.

#### Future borrowing plans (please describe).

Borrowing 5M for FY23 for deferred maintenance.

#### Please indicate your institution's endowment spending policy:

The same endowment spending policy applies to all universities within the University of Maine System and the expendable income objective is 4.5%.

#### Please enter any explanatory notes in the box below.

Net tuition revenue per FTE student reflects the net tuition and fee revenue reported to IPEDS divided by the 12 month FTE student count (as calculated for the IPEDS 12-month enrollment form).

A few notes about the Course Management numbers:

- 1. These totals are based on the number of course shells that had at least one login to them this is somewhat
- 2. We only included courses that were "real" courses created from the Student Information System (ie no
- 3. Summer term was included as a "trailer" for example, FY20 includes courses that would have run from May 4. Because we only imported courses from Blackboard into Brightspace that had content in them, we were able to

FY20 and FY21 reflect the adoption of GASB Statement 84, "Fiduciary Activities" which moved select assets held on behalf of other entities and the related liabilities out of the University's Statement of Net Position to a separate Statement of Fiduciary Net Position. The above data reflects only what is included in the University's Statement of Net Position for the years presented.

Line 19 above for deferred revenue & refundable advances includes deferred inflows of \$40, \$36, and \$33 for the respective years FY19, FY20, and FY21. Line 26 above for other long-term liabilities represents a funding obligation to the System Office of the University of Maine System for the University of Maine at Augusta's share of the impact of implementating GASB 75, "Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions".

0.01

Debt is comprised of small capital leases, tax-exempt bonds payable, obligations under a master lease-purchase agreement, and a loan from the System Office. The University of Maine at Augusta is part of the UMS which is the legal entity that issues the tax-exempt bonds. The UMS' bond rating from S&P Global Ratings was AA-/Stable for FY17 through FY21. The most recent rating is dated 8/11/2021.

#### Line(s) of Credit: List the institutions line(s) of credit and their uses.

Long-term Debt / Total Assets

Although it is not a line of credit, the University of Maine at Augusta and the other universities within the University of Maine System have access to a master lease-purchase agreement between Banc of America Capital Corp and the University of Maine System. The University of Maine at Augusta is utilizing this agreement to strategically replace aging vehicles and to acquire major assets needed to deliver its academic programs.

Future borrowing plans (please describe).

FY20 and FY21 reflect the adoption of GASB Statement 84, "Fiduciary Activities" which moved select assets held on behalf of other entities and the related liabilities out of the University's Statement of Net Position to a separate Statement of Fiduciary Net Position. The above data reflects only what is included in the University's Statement of Net Position for the years presented.

Line 26 above for other long-term liabilities represents a funding obligation to the System Office of the University of Maine System for the University of Maine at Farmington's share of the impact of implementating GASB 75, "Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions".

Line 19 above for deferred revenue & refundable advances includes deferred inflows of \$1,848; \$1,694; and \$1,774 for the respective years FY19, FY20, and FY21

Debt is comprised of small capital leases, tax-exempt bonds payable, obligations under a master lease-purchase agreement, and a loan from the System Office. The University of Maine at Farmington is part of the UMS which is the legal entity that issues the tax-exempt bonds. The UMS' bond rating from S&P Global Ratings was AA-/Stable for FY17 through FY21. The most recent rating is dated 8/11/2021.

## Line(s) of Credit: List the institutions line(s) of credit and their uses.

Although it is not a line of credit, the University of Maine at Farmington and the other universities within the University of Maine System have access to a master lease-purchase agreement between Banc of America Capital Corp and the University of Maine System. The University of Maine at Farmington is utilizing this agreement to strategically replace aging vehicles and to acquire major assets needed to deliver its academic programs.

Future borrowing plans (please describe).

Please enter any explanatory notes in the box below

FY20 and FY21 reflect the adoption of GASB Statement 84, "Fiduciary Activities" which moved select assets held on behalf of other entities and the related liabilities out of the University's Statement of Net Position to a separate Statement of Fiduciary Net Position. The above data reflects only what is included in the University's Statement of Net Position for the years presented.

Line 19 above for deferred revenue & refundable advances includes deferred inflows of \$133; \$122; and \$155 for the respective years FY19, FY20, and FY21.

Line 26 above for other long-term liabilities represents a funding obligation to the System Office of the University of Maine System for the University of Maine at Fort Kent's share of the impact of implementing GASB 75, "Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions".

Debt to Assets Ratio Long-term Debt / Total Assets	0.26	0.26	0.21		

Debt is comprised of small capital leases, tax-exempt bonds payable, obligations under a master lease-purchase agreement, and a loan from the System Office. The University of Maine at Fort Kent is part of the UMS which is the legal entity that issues the tax-exempt bonds. The UMS' bond rating from S&P Global Ratings was AA-/Stable for FY17 through FY21. The most recent rating is dated 8/11/2021.

### Line(s) of Credit: List the institutions line(s) of credit and their uses.

Although it is not a line of credit, the University of Maine at Fort Kent and the other universities within the University of Maine System have access to a master lease-purchase agreement between Banc of America Capital Corp and the University of Maine System. The University of Maine at Fort Kent is utilizing this agreement to strategically replace aging vehicles and to acquire major assets needed to deliver its academic programs.

### Future borrowing plans (please describe).

There are no plans at this time to borrow funds in the future.

TOTAL LIABILITIES and NET ASSETS	\$24,167	\$23,093	\$22,903	-4.4%	-0.8%

<sup>&</sup>quot;FY20 and FY21 reflect the adoption of GASB Statement 84, ""Fiduciary Activities"" which moved select assets held on behalf of other entities and the related liabilities out of the University's Statement of Net Position to a separate Statement of Fiduciary Net Position. The above data reflects only what is included in the University's Statement of Net Position for the years presented.

Line 19 above for deferred revenue & refundable advances includes deferred inflows of \$136; \$125; and \$162 for the respective years FY19, FY20, and FY21

Line 26 above for other long-term liabilities represents a funding obligation to the System Office of the University of Maine System for the University of Maine at Presque Isle's share of the impact of implementating GASB 75, ""Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions""."

	Ratio Long-term Debt / Total Assets	0.07	0.07	0.06		

Debt is comprised of small capital leases, tax-exempt bonds payable, and obligations under a master lease-purchase agreement. The University of Maine at Presque Isle is part of the UMS which is the legal entity that issues the tax-exempt bonds. The UMS' bond rating from S&P Global Ratings was AA-/Stable for FY17 through FY21. The most recent rating is dated 8/11/2021.

Line(s) of Credit: List the institutions line(s) of creditions	edit and their uses	s.		
Although it is not a line of credit, the University of Main	ne at Presque Isle a	and the other univer	sities within the Uni	versity of Maine
System have access to a master lease-purchase agreemen	nt between Banc of	America Capital Co	orp and the Universi	ty of Maine System.
The University of Maine at Presque Isle is utilizing this a	agreement to strate	gically replace aging	vehicles and to acqu	uire major assets
needed to deliver its academic programs.

### Please enter any explanatory notes in the box below that may impact the institution's cash flow.

With the exception of some very small petty cash balances, cash and cash equivalents represents the University of Maine at Presque Isle's share of cash and operating investments held by and managed by the System Office of the University of Maine System (UMS). Investment earnings are generally kept by the System Office although a modest amount is distributed as 'temporary investment income' on unspent gift balances held by the University of Maine at Presque Isle and other universities within the UMS. The UMS Controller's Office prepares a Statement of Net Position and a Statement of Revenues, Expenses, and Changes in net position for each university within the UMS; however, it only prepares a cash flow statement for the UMS as a whole for inclusion in the UMS' audited financial statements.

Has the institution needed to access its restricted net assets or liquidate other financial assets to fund operations? If so, please describe and indicate when approvals (if required) were obtained from the state's authority.

Operating expenses include those funded from unrestricted operations and those related to expenditure of restricted grants and contracts and gifts, etc. If the University is unable to spend a restricted gift in the yrear received, the University's practice is to spend it in accordance with donor restrictions in the next fiscal year(s). The University of Maine at Presque Isle does not need to seek approval from the State of Maine to utilize its own reserves.

Please enter any explanatory notes in the box below.

# Standard 7: Institutional Resources (Headcount of Employees by Occupational Category)

For each of the occupational categories below, enter the data reported on the IPEDS Human Resources Survey (Parts B and D1) for each of the years listed.

If your institution does not submit IPEDS, visit this link for information about how to complete this form: https://surveys.nces.ed.gov/IPEDS/Downloads/Forms/package\_1\_43.pdf

FY20 and FY21 reflect the adoption of GASB Statement 84, "Fiduciary Activities" which moved select assets held on behalf of other entities and the related liabilities out of the University's Statement of Net Position to a separate Statement of Fiduciary Net Position. The above data reflects only what is included in the University's Statement of Net Position for the years presented.

Line 19 above for deferred revenue & refundable advances includes deferred inflows of \$2,860; \$2,622; and \$2,414 for the respective years FY19, FY20, and FY21.

\$260,472

\$234,304

\$252,731

-10.0%

Line 26 above for other long-term liabilities represents a funding obligation to the System Office of the University of Maine System for the University of Southern Maine's share of the impact of implementing GASB 75, "Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions".

Debt is comprised of small capital leases, tax-exempt bonds payable, and obligations under a master lease-purchase agreement. New debt for FY21 consists of a bond anticipation note. The University of Southern Maine is part of the UMS which is the legal entity that issues the tax-exempt bonds and bond anticipation note. The UMS' bond rating from S&P Global Ratings was AA-/Stable for FY17 through FY21. The most recent rating is dated

## Line(s) of Credit: List the institutions line(s) of credit and their uses.

Although it is not a line of credit, the University of Southern Maine and the other universities within the University of Maine System have access to a master lease-purchase agreement between Banc of America Capital Corp and the University of Maine System. The University of Southern Maine is utilizing this agreement to strategically replace aging vehicles and to acquire major assets needed to deliver its academic programs.

### Future borrowing plans (please describe).

USM anticipates borrowing approximately \$95 million through bond financing for the construction of a new residence hall and parking garage on the Portland campus.

### Standard Eight:

# Educational Effectiveness

#### **Description**

#### **Assessment of student learning outcomes**

Each UMS university measures learning in its academic programs to improve student outcomes and the curriculum. Examples and descriptions of assessment processes and findings are shared throughout this Standard.

#### **Assessment organization**

Each university has an office or committee responsible for collecting and reporting data on academic program learning outcomes. Typically, the Provost's office oversees academic program assessment efforts in coordination with university and/or UMS institutional research staff, university assessment staff, and the academic deans.

UM and UMM have an Office of Institutional Research and Assessment with an Assessment Coordinator and an Assessment Data Analyst, while USM has an Office of Academic Assessment. UMPI's assessment work is housed with the Executive Director of Academic Development and Compliance. UMF's education programs are assessed through a Teacher Education Accreditation office. UMFK, UMF's non-education programs, and the Law School use assessment committees comprising faculty and staff. At UMA, assessment is the responsibility of academic programs with assistance from an Office of Institutional Research and Assessment.

#### **Student learning outcomes**

Every university publishes learning outcomes for its academic programs on departmental, college, or university websites. Additionally, UMF, UMPI, and UMFK publish their outcomes in their course catalogs, and UMFK, UMA, and the Law School also publish course outcomes in course syllabi.

Graduate programs at UM participate in a program learning outcomes assessment process as defined in the UM assessment plan. A three-year phased approach has been taken for onboarding graduate programs. All programs are expected to have created program learning outcomes by May 2022. In the 2022-23 academic year, programs will map curricula and draft assessment plans. Reporting of annual assessment results and cohort-based three-year assessment reporting will start in 2023-24. Review of three-year assessment reports by the UM Office of Institutional Research and Assessment and the UM Assessment Advisory Board—with subsequent feedback to programs— will commence in 2024-25.

#### **Assessment data collection**

Tools and processes used to collect program assessment data vary across UMS, but all of the universities collect learning artifacts to measure outcomes. The most commonly reviewed artifacts are student course evaluations, portfolios, papers, exams, projects, capstones, rubrics, and surveys of students, graduates, and employers.

In UMF's teacher education program, data collected every semester includes dispositions assessment, essential areas of teaching assessment, end-of-program surveys, classroom management observation checklist, teacher work sample/contextual factors analysis, and unitwide lesson plans and rationales. Additional data is collected on an annual or biannual basis, including focus group data, and employer and graduate surveys.

Some UMS universities have centralized and rendered uniform their collection and storage of assessment data. For example, UMPI uses MaineStreet to collect students' program learning outcomes scores and course grades, Google Drive to collect all faculty course evaluations and faculty-generated course assessments, and Google Forms to administer student surveys. UM uses Google Sheets and Forms for all assessment reporting. USM uses an in-house form— the Assessment of Student Learning Plan— that all academic programs complete at the end of each academic year. TK20/Watermark is used to collect and track student data in teacher education programs at UM, UMA, UM, and USM.

As described in the university's E Series data, UM's kinesiology and physical education program evaluates student learning through an extensive set of assessments, including candidacy portfolio, pre-service teacher dispositions, lesson plans, seminar evaluation, Praxis test scores, student teaching reviews, student teaching portfolio review, and exit review. These are in addition to the assessment of key course artifacts (such as projects, tests, and essays).

#### **Review of assessment data**

At most UMS universities, the Provost's office and the academic deans review program assessment data (e.g. UMPI, UMFK, USM, UMA, and UMF). At some universities, additional offices and staff review the data. At UMPI, for example, the Executive Director of Academic Development, academic program coordinators, and program faculty also review it. At USM, academic assessment offices join the Provost's office and the deans in reviewing the data. UM, UMM, and the Law School use committees. For example, at UM an Assessment Advisory Board evaluates all programs' assessment reports using a detailed rubric and holds a feedback meeting with each program.

Although there is variation in the timelines for reviewing program assessment reports across the universities, most encourage or require annual reporting. UM, UMM, USM, UMA, and UMF all require annual reporting, with some exceptions, and UMA's annual reports culminate in a five-year program review. UM also requires a cumulative report every three years. UMPI requires a program report for existing academic programs every seven years and for new programs every three years. The Law School reports on select outcomes each year, culminating with a complete report of all program outcomes every three years.

#### **Examples of closing the loop**

Examples abound of how assessment of data has led to programmatic or curricular changes. UMPI has changed course requirements and sequencing based on student learning outcome data, while UMFK's nursing program made curricular revisions based on the licensure pass rate of its graduates. The Law School added required courses after mapping its curriculum to its stated outcomes.

At UMF, the Division of Psychology determined that the writing proficiency of students in its Research Methods course did not consistently meet faculty expectations, despite students' ability to describe and interpret their research findings accurately. In response, the division created a Sophomore Seminar to improve the writing skills of all psychology majors prior to enrollment in Research Methods. UMF has continued to use student essays to refine and improve the design and implementation of its Sophomore Seminar.

General Education outcomes at USM's undergraduate programs are reviewed annually by a Core Curriculum Committee that uses the university's new course proposal process and related curriculum and policy changes to improve student learning. As USM's E Series data indicates, factors considered include "[s]ignificant changes in curricular

design (e.g. implementation of a new writing sequence), curriculum policies, transfer policies and equivalencies (e.g. establishment of new writing requirement transfer equivalents), and assessment approaches (e.g. writing faculty focus groups and plans for direct assessment of student writing products at three levels)."

#### **General education**

Each UMS university has established general education learning outcomes and processes for assessing those outcomes. For example, UMA gathers student artifacts for assessment from a small number of classes, and plans to expand collection when its methodology is finalized. UM's Faculty Senate recently voted to look at ways to modify and improve assessment. UMFK is working on a holistic approach and is augmenting its rubrics. Start dates for general education assessment work across UMS are typically fairly recent: e.g. 2013 for UMA, 2015 for UMPI, and 2018 for UM.

UM assesses one general education category (out of nine) each semester using rubrics based on the AAC&U VALUE rubrics. UMPI uses in-class assessment, and UMFK uses e-portfolios. UMA and USM use different methods to assess different types of general education requirements. UMA uses outcome-based assessment, tasking each program with developing its own assessment. Programs then use writing samples from English 101 to evaluate written communication, standardized tests (e.g. the California Critical Thinking Test) to assess critical thinking, and in-class quizzes to assess cultural diversity and ethics. USM uses tracking studies, syllabus/assignment review, student NSSE responses, student focus groups, and other course-level surveys.

In 2014, UMPI embarked on an ambitious general education revision. Over several years, UMPI is converting its program to an outcomes-based program. In the revised program, courses provide students with instruction and experience in five general outcomes: 1) Effective Written and Oral Communication, 2) Critical and Creative Thinking, 3) Quantitative and Scientific Reasoning, 4) Information Literacy, and 5) Global Consciousness and Intercultural Awareness. Each is split into 22 sub-outcomes.

UMPI faculty use the sub-outcomes to clarify what students will know, understand, and do upon completing their general education program. Faculty have designed formative and summative assessments that use GLO rubrics to assess student proficiency by the end of a course. If students do not meet proficiency but are still developing their skills and knowledge, they can earn an NP (not sufficiently proficient) and are given additional time. If students do not meet proficiency in that time or did not earn an NP, they do not pass the course.

#### **Block transfer**

While each UMS university operates its general education and assessment programs separately, there have been encouraging efforts to increase coordination. For example, UMM and UMPI recently changed parts of their general education requirements to bring them into closer alignment with UM's requirements. In 2015, UMS established block transfer agreements between its universities and the Maine Community College System facilitating student transfer within and into UMS.

The block description includes only existing common outcomes, with the understanding that each local general education program is more extensive and includes other outcomes. A working group of faculty and staff from the seven UMS universities used the LEAP Essential Learning Outcomes as a common framework and language for describing and forming common outcomes in general education programs across UMS.

Block transfer has been useful in helping UMS deliver degree programs across two or more of its universities, such as UMA's partnership with UMF to offer the UMA nursing program to UMF students. UMF nursing students satisfy UMF's general education requirements and then transfer them as a block to UMA, a move that frees those students from fulfilling some UMA-specific requirements.

#### Co-curricular assessment

#### **Advising**

In addition to program and general education assessment, UMS universities assess related functions vital to student learning and success. One of the most critical is advising. The universities follow broadly similar advising practices, but how they assess advising differs. In 2011, UMS developed a System-wide Advising Group (SWAG) to provide faculty and staff an arena for sharing best practices and methods for assessing and improving academic advising.

#### **Experiential learning**

Each UMS university offers extensive opportunities for experiential learning, including internships, service learning, and field experiences. Assessment of these programs is conducted through student course evaluations and end-of-program intern and supervisor evaluations. At USM, Engaged Learning is included and assessed as one of thirteen general education outcomes. UMM requires a service learning experience in each major. The UM Experiential Programs Innovation Central (EPIC) program offers in-depth learning and skills in research, interdisciplinary experiences, new technologies, innovation, and design and prototyping through participating units: the Center for Undergraduate Research; the Advanced Manufacturing Center; the Center for Innovation in Teaching and Learning; the Foster Center for Innovation; and the Innovative Media Research and

#### Commercialization Center.

Each UMS university offers study abroad, faculty-led travel courses, international internships, and student teaching experiences. International Programs offices make global education accessible through partnerships that permit students to pay tuition at their home universities (with the benefit of all scholarships and financial aid); through travel courses that are less expensive and shorter (for students who need to work during the academic year and/or are enrolled in programs with extensive academic requirements); and through scholarships that target low-income and first-generation students.

#### **Community partnerships**

Community-engaged scholarship, teaching, and learning are central to fulfilling USM's commitment to the success of the region and the state. For example, USM's Community Engagement and Career Development Office (CECD) works with community partners, faculty, and students to develop meaningful and impactful community-based learning experiences. To enhance its programs, USM is committed to ongoing assessment of community engagement as reflected in its annual CECD report.

The 9,000 square-foot UMF community garden serves as an educational center that integrates coursework, research, student clubs, campus events, and outreach in surrounding communities. Through the garden, growing community and growing food take place side by side. The vegetables produced are donated to on-campus food closets or pantries and off-campus food banks to help address food insecurity in Maine.

A recent example of both experiential learning and community partnerships is UMA's co-taught Garden Seminar, which applies theory and research in organizational sociology and community psychology to the practice of growing a community garden and maintaining a successful student organization to support it. In 2019, UMA and its partners harvested 695 pounds of vegetables delivered to food-insecure families through the Augusta Food Bank.

#### Student retention, course completion, and graduation

UMS Institutional Research maintains public student success metrics for all universities, in addition to metrics tracked and reported by university IR and assessment staff. These resources allow UMS to track enrollment and retention over time at all seven universities and the Law School and study student progress, course completion rates, graduation rates, and transfer activity.

The universities collect and analyze data at multiple points in the year and for different purposes. Participating in surveys such as the NSSE helps UMS and university leaders assess the overall quality of the academic environment and intellectual and personal engagement of students.

There has been strong collaboration and administrative coordination among UMS universities to respond to the challenges posed by fluctuating retention rates. Additionally, universities have developed a suite of analytical reports to guide academic departments in evaluations of their curriculum and course offerings for enrollment planning purposes. Further planning resources are expected in phase II of the EAB Navigate implementation as more data become available for predictive analysis.

UMS has several mechanisms for awarding undergraduate credit based on prior learning, each governed by policies outlined in the undergraduate catalogues, including CLEP, AP DANTES, ACE, review of certifications or credentials, military trainings, and challenge exams. In addition, prior learning assessment (PLA) offices and transfer officers across UMS work with academic departments in leading students through a portfolio review process as needed.

#### **Appraisal**

#### Update on assessing academic programs across UMS

UMS continues to develop and refine its processes for the systematic review of academic programs. To maintain a cycle of continuous improvement, academic program evaluation occurs at all levels, from UMS reporting on strategic priorities to local program review and assessment. Currently, academic review falls under three distinct processes: the Annual Academic Program Report (AAPR), the Academic Practice Letter (APL) on academic program review, and external accreditations at the program level. Taken together—and conducted in conjunction with qualitative measures such as student evaluations, stakeholder group feedback, and benchmark data—these processes provide a thorough and effective review of the academic program portfolio.

Originally intended as a mechanism for fostering broader collaborative discussions among faculty and academic administrators, the AAPR has evolved since 2018 to serve as an annual assessment of the health and sustainability of academic programs. The AAPR provides a set of metrics for academic leaders at each UMS university to use to identify challenges, opportunities for collaboration, and strategic academic goals.

Cumulatively, the universities' annual assessments create a System-wide structure addressing critical state needs, with a newly established System-wide assessment group taking responsibility for evaluating the AAPR and confirming the efficacy of its methodology and data. The assessment group will use benchmark data and metrics from peer institutions and NECHE to develop robust performance metrics. Those metrics will be combined with data collected from student and stakeholder groups to inform the review process and continuously improve individual programs and the overall portfolio.

The AAPR has undergone two major revisions since 2018, and UMS has reconfigured its data collection format to add new metrics based on two years of collected data. The data guides program approvals and program suspension or elimination decisions affecting all UMS universities. For example, USM recently added a faculty position to its Tourism program, while other reviews have prompted programs to make improvements to marketing, curricular redesign, and shifts in (or additions to) course modalities.

The APL process assesses programs at the university level. These five-year reviews help program leaders evaluate curriculum and research offerings and gauge overall program vitality in relation to the rest of a university's academic portfolio. University-level review is further supported by evaluation requirements and findings of professional program accreditors, and by feedback from NECHE. The results of external reviews provide longitudinal checks on programs as benchmarked against national best practices.

#### **General education assessment**

General education assessment continues to develop and be embedded as institutional practice. Some UMS universities are further along than others.

For example, UMPI's initial assessment of its general education efforts shows that a high percentage of students from fall 2015 to spring 2018 were able to achieve proficiency or advanced proficiency in 22 general education learning outcomes as evidenced by assessment scores. At UM and UMA, general education assessment cycles are progressing well but not rapidly. Although considerable efforts have gone into designing and administering assessment tools and gathering assessment data, some programs have been slow to close the loop and enact curricular changes based on their review of student learning outcomes.

#### Assessing student demographics and academic changes

Maine's high school graduation rate of 87% is comparable to the New England average of 88% (2019). College enrollment rates, however, reveal a widening gap. Maine's college enrollment decreased from 62% in 2011 to 58% in 2018, while the New England rate has increased from 62% to 66% during that same time frame.

From 2015-20, there was an 11% decrease in total credit hours taken by in-state undergraduate students while out-of-state undergraduate (40%), NEBHE (9.4%), and Early College (95.8%) saw increases in credit hours attempted. There was an overall 11.7% increase in credit hours taken by graduate students across all groups and universities. Total credit hours (undergraduate and graduate) taken from 2015-20 grew 0.4%. First-year average credits taken and passed improved on average across UMS between 2013 and 2019: a 1.1% increase in credits taken and a 1.3% increase in credits passed.

Rates of low and failing grades improved across the UMS from 2015-20. UMF historically had the lowest rates of any UMS university; its rates have ticked upward while others have begun to decline. UM's efforts had a significant impact in improving their rates from 2018-19 to 2019-20. From 2014-19, cumulative UMS fall-to-spring return rates revealed a decline in retention of first-year and second-year students, but there were overall gains in fall-to-fall return rates among all

student groups in that period.

At universities that used the EAB Navigate tool for at least two semesters and scheduled student appointments through it, students who interacted with advisors in that medium persisted at higher rates in both semesters than those who did not. This is notable: these were students whose faculty and professional advisors had concerns about them in the first place. This data is helping UMS emphasize the value of participation in structured progress reports and the importance of time-intensive, high-touch interventions.

#### **Early College outcomes**

A strong majority of UMS Early College participants go on to enroll in postsecondary institutions following graduation. Across five recent cohorts (2014-19), between 70.5% and 74.2% of UMS Early College students later enrolled in college. This stands in contrast to the overall college-going rate among all Maine high school graduates, which has averaged 62.0% over the last seven graduating classes.

UMS Early College participants increasingly go on to enroll in a UMS university. Of the fall 2014-summer 2015 cohort, 31.8% of participants went on to enroll in UMS. This figure has increased year over year, with the fall 2018-summer 2019 cohort showing the highest level of subsequent UMS enrollment at 36.4%.

The average UMS-going rate among all Maine high school graduates was 19.7% for the last seven graduating classes. Of those who go on to enroll in UMS, the majority enroll at UM (42.5-53.8% of the last five cohorts) or USM (10.3-21.4%). Of UMS Early College participants who subsequently enrolled outside UMS, most chose to attend an in-state university (between 38.4% and 52.0% over the last five cohorts).

EC students are more likely to persist in their first year of college. Males and underrepresented students benefit most, with retention rates 12% and 14% higher, respectively, than those of peers who do not participate in EC.

#### **Course evaluations**

Course evaluations are given to students in all classes in accordance with the AFUM contract. Evaluations are delivered through a commercial platform (Explorance Blue) or a university's campus portal. Course evaluation questions vary slightly by university and program. Questions typically use a Likert scale and also provide students with a space to offer comments, giving faculty quantitative and qualitative data about the student's experience and views on instructional effectiveness.

The online course evaluation process has the advantages of not absorbing class time, saving on resources required for paper surveys, and allowing for quicker analysis and sharing of results.

Most UMS universities did not actively track response rates for paper-based course evaluations, but anecdotally, completion rates were high. In general, response rates are lower for electronic completion. Some faculty and instructional support staff attribute that to instructors not providing in-class time for students to complete evaluations. (UM did a small study in Fall 2019 comparing response rates when in-class time was provided versus when it was

not. When it was allotted, the mean response rate was 64%, compared to 49% when it was not.)

UM did see a dip in response rates in fall 2020 compared to fall 2019, but attributed that to the pandemic. The spring response rate for UM in spring 2021 was 44.4%, while UMM's rate was 51.6%. UMM response rates went up from previous semesters. This was attributed to the adoption of a new instrument containing fewer questions.

#### **Evaluating student completion trends**

A review of UMS completion reports (2011-20) reveals several common themes. Across UMS, women consistently represented over 60% of graduates, and the highest number of degrees and certificates conferred by discipline was in health professions, followed by education and business disciplines.

During that same span, UMS universities saw an increase in completion of certificates and master's degree programs and a decline in associate, law degrees, and doctorates. UM and UMF produced high graduation rates compared to other UMS universities, and USM steadily improved its graduation rates over the last four years.

#### **Projection**

#### Growing the culture of assessment

Each UMS university has worked to grow its culture of assessment. These efforts will continue as a UMS assessment identity is developed. In support of effective assessment oversight and practices, a UMS Assessment Committee advisory to the Vice Chancellor for Academic Affairs (VCAA) will consider ways to build System-level reporting and develop and share assessment best practices and tools. Consistent with goals identified in the June 2020 UMS substantive change request, the Committee will also work with the VCAA on a common language for assessment and student success, identify ways to help academic programs measure student learning, and advise the VCAA and CAOs on assessment reporting processes.

#### Improving data-sharing and communication about data

Strengthening communication between UMS and the universities and Law School about data sharing will be an ongoing priority for the UMS Office of Institutional Research, Data Governance staff, and university IR and other functional areas. UMS recognizes that shared definitions of student success must be developed and then supported by consistent and reliable data definitions, services, and communication.

UMS will seek to integrate different areas of assessment (e.g. student affairs assessment and academic assessment) to develop a clearer picture of how UMS universities and the Law School are preparing students. This work was interrupted during the pandemic, compelling some universities, such as UM and UMM, to defer assessment reporting for a year. While university-level decisions about how to assess students and programs remain important, it is likely that establishing a centralized means of reporting assessment data will enhance accountability and lead to analyses that serve all.

#### **Standard Nine:**

# Integrity, Transparency and Public Disclosure

The University of Maine System (UMS) is committed to the free pursuit and dissemination of knowledge through its educational and cultural offerings, and outreach and public service to community members, businesses, organizations, and policymakers.

UMS, its universities, and its Law School communicate their NECHE accreditation status on their respective websites, most commonly on a page devoted to public communications. Academic programs that carry industry and professional (discipline-specific) accreditations list these at the program and/or department level so audiences seeking that information can readily access it.

#### **Description**

#### Student academic integrity policy

In 2020, UMS adopted a System-wide Student Academic Integrity policy establishing a uniform institutional standard for academic honesty and replacing a collection of similar but inconsistent university-level policies. The UMS Student Academic Integrity policy enables centralized record-keeping for academic integrity violations and allows faculty and staff to identify and appropriately address cases in which a student engages in academic misconduct at more than one university.

Faculty who teach at more than one UMS university are no longer required to negotiate multiple academic misconduct procedures, and the standardized policy promotes equitable treatment of student academic misconduct across UMS while providing additional rights and opportunities for redress for both students and faculty.

#### Student privacy

UMS regards student privacy as essential. The Family Educational Rights and Privacy Act of 1974 (FERPA) protects the privacy of students. Under FERPA, students have the right to inspect and review their educational records and challenge records when they are inaccurate, misleading, or otherwise in violation of privacy rights. Key resources such as Registrars serve at each university to oversee records retention and student information privacy. In addition, the UMS General Counsel is available to assist the universities and Law School when questions or concerns about student privacy arise.

#### **Intellectual property**

Faculty and staff seeking protection of, and licensing for, inventions, technologies, processes, software, trademarks, or other intellectual property are supported and guided by area experts. Each UMS university maintains appropriate human and animal subjects review boards.

UM and USM research compliance offices guide the university communities in ethical research and respond appropriately to cases of alleged misconduct. UMS Policies and Procedures for Financial Disclosures and Conflicts of Interest in Extramurally Sponsored Activities apply to all employees and students serving as investigators on proposals submitted to external sponsors.

UMS and its universities expect students to abide by the UMS Student Conduct Code (Code). The Code is updated every three years with input from each university and its stakeholders. The Code also codifies a range of other safety and non-violence policies, including an alcohol and drug policy, a tobacco-free policy, and an illegal downloading policy.

The Code is enforced locally by university and Law School administrators and enables students charged with violations to participate in a transparent and fair resolution process. Members of hearing boards receive substantial training on diversity, equity, academic freedom, and freedom of speech in addition to relevant laws, regulations, and policies.

#### **Public-facing information and data**

UMS and its universities transparently provide timely, accessible, accurate, and consistent aggregated information about student achievement and institutional performance to current and prospective students, their families, and the public. The UMS website provides System-wide data and links to each UMS university. UMS also provides information on the successful completion of degrees System-wide.

Each UMS university has its own website containing university-specific information, and a digital university catalogue that is updated annually and is easily accessible. Student learning goals can be found in general education requirements and in program requirements for each major on program web pages, in the university catalogues, and in student handbooks. Student achievement and institutional performance, including retention and graduation rates and, where applicable, licensure exam passage rates, can be found in the UMS DataBook, university web pages, and university catalogues. Examples include UMF's Facts resource, USM's six-year retention and graduation rates, UM's student consumer information and alumni achievement awards, UMA's student consumer information.

Each UMS university publishes the total cost of education and net price, detailed information about financial aid availability, length of study, expected amount of student debt, and the cohort default and loan repayment rates on its website and in its catalogue. This information can typically be accessed from financial aid or admission pages and from links found on the homepage of each university. These resources connect students to financial services staff, bursars, information for veterans, special programs, scholarships, net price calculators, financial terms and conditions, add/drop policies, 1098T information, mandatory fee descriptions, refunds, and sponsor billing.

The UMS website houses information related to System-wide data and policies, student consumer information, links to each university, faculty and staff information, and University of Maine System Board of Trustees (Board) information. The public can access information on admission, employment opportunities through HireTouch, student discipline procedures, and university student handbooks.

UMS maintains an annual financial report. Some UMS universities provide information directly on their websites, such as UM (through its Office of Budget and Business Services), or on request (e.g. UMF through its Office of Finance and Administration).

Each UMS university maintains a directory on its website where departmental affiliations, faculty credentials, and biographical and contact information are listed. UMS maintains a comprehensive employee directory on its website, and dedicates a section of the site to detailed information about the Board: its policies, its committees, meeting materials and agenda, and related information.

UMS and university web content and social media content is governed by formal policies on content creation responsibilities, editorial control, and processes for adding and removing web sections and social media tools. While the authenticated web portal is managed at the UMS level, each university has designated staff who exercise editorial control over utilities, contents, and communications.

UMS is committed to responding to all reasonable requests for information about itself and its universities and Law School. As noted above, UMS provides public access to a UMS DataBook with aggregated information on various topics, including student enrollment and completion reports, financial policies, and procedures and human resources.

Each university also maintains data available through an Office of Institutional Research or similar office. Avenues for requesting information are prominent in many high-traffic areas of UMS universities websites, such as UMA Admissions and UMF Connect With Us.

Compliance information such as Title IX, FERPA, annual security reports, and diversity and EEO/AA, is often provided as links on a university's homepage.

To aid the public in obtaining shareable information not available on UMS or university websites, UMS has established a coordinated process for responding to Freedom of Access Act (FOAA) requests, with guidance provided by the UMS General Counsel's office as needed. FOAA contacts for each university are clearly identified on the UMS website; the same is true for UMS shared services that regularly receive requests for information, such as Human Resources and Procurement.

Information and resources about grading can be found on university websites, including the Office of Student Records (or Office of the Registrar) and in course catalogues.

Assessment information at the university level is usually provided by institutional research and/or assessment offices. In many cases, university websites provide information about, and links to, related UMS resources and policies.

#### Grievance and complaint policies and procedures

Grievance and complaint procedures are detailed and widely disseminated. Policy and educational material on harassment and disability accommodation are distributed to students, faculty, and staff primarily through accessible electronic communications. They are also available in paper format. All such policies are periodically assessed and updated to reflect best practices, changing case law, and federal regulations.

Information about grievance processes is provided to enrolled students annually and is posted on university websites and the UMS website. Faculty and staff receive annual notices about the availability of these policies. All employees are also informed annually of their responsibilities should they learn of an instance of a student or staff member being affected by sexual harassment and/or other gender-based violence or acts of discrimination. All faculty and staff are required to complete annual Title IX training and must complete sexual harassment training every three years.

While individual universities are responsible for educating their communities about policies and procedures, shared UMS resources assist them in investigating and adjudicating complaints. EO professionals work collaboratively and are available to assist each university as needed, enabling UMS to deploy staff from other UMS universities to address situations involving perceived bias or conflict of interest.

UMS Human Resources provides access to UMS labor agreements for salaried and hourly staff. Fairness and truthfulness regarding professional treatment of staff are outlined in various collective bargaining agreements and in all grievance procedures. UMS policy supports a grievance process for represented and non-represented employees, and the attendant policies and standards are widely distributed. The Equal Opportunity Complaint Procedure and Board Policy 402 on Sexual Harassment, Dating and Domestic Violence, Sexual Assault and Stalking apply to all members and guests of the university and Law School communities.

#### **Recruitment and employment**

UMS Human Resources staff approve all job announcements and recruiting strategies for professional and faculty searches, including requirements to advertise in ways that promote a diverse pool of candidates. EO staff are available to advise search committees throughout the search process, including sharing implicit bias information with search chairs and committee members.

If written agreements diverge from standard language, protocol dictates that MOUs, contracts, and other agreements be reviewed by the UMS General Counsel's office to provide an opportunity for clarifying roles and obligations. Relatedly, guidelines for determining employee and independent contractor relationships define who is considered an employee or representative of the UMS and its universities.

#### Marketing and brand management

Each UMS university publishes a brand book that includes logo, font, and color palette guidelines defining what is allowable in representing the university. This guidance reinforces public understanding of the communicating parties involved, and brand recognition. Several universities also suggest a structure for employee email signatures that includes identification of an employee's role. Communications made via hard copy use letterhead identify the initiating university and office, and signature blocks usually indicate a person's position by title.

UMS is mindful of the unique challenges faced by current and prospective students, particularly in rural areas, and uses a variety of strategies—public website, authenticated web portal, print publications, and social media— to ensure that all are able to access information. Each UMS university publishes information about its location(s) and settings, student bodies, programs, academic and other support services, opportunities for students (both academic and co-curricular), and student resources, including library and IT services.

All UMS websites are designed for accessibility from a variety of devices, including desktop computers, tablets, and mobile smartphones.

#### ADA compliance and resources

Each university has staff dedicated to providing accessibility support to students and employees under ADA laws. ADA administrators across UMS meet regularly to discuss trends and best practices in the field, classroom, workplace, and student populations; engage in routine policy and practice reviews; and pursue professional development. Students or staff with complaints about access under ADA are directed to the Equal Opportunity process overseen by the UMS Director of Equal Opportunity.

#### **University catalogues**

Catalogues are the most comprehensive publications UMS universities produce, setting forth the obligations and responsibilities of students and the universities. Catalogues are updated annually. Institutional information— including mission statements, objectives, educational outcomes, status as a public university, policies and procedures, registration, student fees, and a description of physical resources— can be found in each university's catalogue.

The Law School does not maintain its own catalogue. Instead, it maintains Course Listings pages (for first-year, second-year, and third-year courses) and a registration packet that is distributed to students every semester. Information about the Law School can also be found in USM's catalogue, an artifact of the Law School's former administrative housing under that university.

Prior to publication of a new academic catalogue, the Office of Student Records (or Registrar) at each university runs a database query whereby courses that have not been taught in two years are identified and flagged for review. Following a review by academic division chairs/deans, courses that will not be taught for a third year are sunsetted (i.e. no longer listed in the catalogue). Courses are removed from a catalogue altogether if they have not been taught for five consecutive years.

#### **Appraisal**

#### **Advancing inclusivity**

UMS takes a systemic approach to addressing issues of inclusion. For example, a System-wide policy for students wishing to use a name other than their legal name was adopted in 2018, and student data management systems and learning management systems are regularly updated to reflect a student's preferred name and pronouns.

UMS and university student-facing programming addresses diversity, equity, and inclusion, LGBTQ+, racism, sexism, mental health first aid and suicide prevention, Title IX and gender-based violence, bystander empowerment, and substance-abuse prevention and intervention. Most UMS universities do not have dedicated staff in the areas of prevention education or diversity and inclusion, resulting typically in a committee-based approach to delivering programming in these areas.

Recognizing the well-documented disparate impact to a number of populations, including BIPOC, low socio-economic status, and persons with disabilities, UMS has elected to stop asking applicants questions about their criminal or disciplinary history as part of the admissions process. As needed, these questions have been redirected to student housing applications or prior to entry into clinical programs.

#### Safeguarding information

Any UMS employee with access to FERPA-protected materials must complete an annual training on how to maintain a high level of student data security and privacy. UMS employs Information Technologies staff to keep university hardware and software up to date, promulgate best practices in security and data management, and investigate data breaches, malware, and phishing.

In 2017, a coordinated effort was undertaken to improve website accessibility across all websites and make data accessible to all stakeholders via the UMS site. That year, UMS established a Data Governance program to protect and use data assets for the benefit of all UMS universities and stakeholders. The Data Governance Council comprises UMS and university representatives working collaboratively in areas related to UMS and institutional data reflecting student, financial, and human resources information vital to daily operations, administration, and future planning. The Data Governance program ensures that all university websites are scanned at seven- to 14-day intervals to check for new

content and report on quality assurance. The Data Governance annual report is available on the UMS site.

In 2019, UMS published a redesigned website based on requirements from the Office of Civil Rights and resulting from recommendations from a Web Accessibility Task Force with representatives from several UMS universities. In 2020, UMS hired a Digital Content Specialist to ensure that web content is of high quality, accessible, and written to meet the needs of audiences visiting the UMS site.

The Digital Content Specialist meets with stakeholders across UMS to ensure that webpages are upholding best practices for content curation and development, and link appropriately to university and Law School websites. The Content Specialist employs a range of strategies to achieve this, including disseminating information widely and redundantly across public UMS sites, authenticated web portals, print publications, and web-based social media tools.

#### **Assuring catalogue access**

Providing online versions of university catalogues is now standard as consumer preference has shifted from paper-first to digital-first formats. Acalog, a catalog management software, supports well-organized, interactive, and user-friendly online UMS catalogues.

Several UMS universities take the additional step of including information in catalogue course descriptions about when a course is typically offered (e.g. "in the fall" or "every other spring"). This is not the norm across all universities. Though not explicitly in the scope of the relevant NECHE standard, it may be advisable to include this information in future catalogues, especially as a universal visibility of catalogues is planned as part of the Unified Catalog initiative.

#### Responsiveness to the public

UMS universities ensure that information about how they transfer credit, charge fees, and showcase their academic offerings is easy to locate on university websites, and that the language and design of those pages ensures that the broadest possible audience can understand the content and make informed decisions based on it.

Prospective student communications are funneled through Admissions offices and their prospect-management systems so each contact is logged and consistent practices of informing students of decisions are observed. The same is true of alumni constituencies and the advancement or alumni and development offices that handle donor inquiries and networking requests.

#### **Projection**

# Exploring greater consistency in student consumer information and related reporting

Under unified accreditation, it may be helpful to develop an aligned approach to formatting websites and catalogues. A single template would see all UMS universities use the same title(s) for these pages, standardizing where various materials are located on websites and indicating when they should appear both on university websites and in the respective catalogues.

Additionally, as an entity that serves students, UMS should feature specific information on its site about student discipline and appeals separate from the student code of conduct. Any updates and information developed by UMS for use by all its universities in student-focused contexts merit a similar degree of consistency and coordination across the universities and Law School.

Relatedly, making reports and data sets of all kinds publicly available in consistent and easily accessible formats will improve ease of use for UMS, university, and Law School websites.

#### **New England Commission of Higher Education**

3 Burlington Woods Drive, Suite 100, Burlington, MA 01803-4514 Tel: 781-425-7785 | Fax: 781-425-1001 | www.neche.org

## AFFIRMATION OF COMPLIANCE WITH FEDERAL REGULATIONS RELATING TO TITLE IV

Periodically, member institutions are asked to affirm their compliance with federal requirements relating to Title IV program participation, including relevant requirements of the Higher Education Opportunity Act.

1. Credit Transfer Policies. The institution's policy on transfer of credit is publicly disclosed through its website and other relevant publications. The institution includes a statement of its criteria for transfer of credit earned at another institution of higher education along with a list of institutions with which it has articulation agreements. (NECHE Policy 95. See also *Standards for Accreditation* 4.29-4.32 and 9.18.)

**3. Distance and Correspondence Education: Verification of Student Identity:** If the institution offers distance education or correspondence education, it has processes in place to establish that the student who registers in a distance education or correspondence education course or program is the same student who participates in and completes the program and receives the academic credit.... The institution protects student privacy and notifies students at the time of registration or enrollment of any projected additional student charges associated with the verification of student identity. (NECHE Policy 95. See also *Standards for Accreditation* 4.48.)

Method(s) used for verification:

-- https://online.umaine.edu/online-student-verification/ (This information is taken from the University of Maine's *UMaine Online* site. Because the University of Maine System's learning management system is centralized, the methods for verification described on that site apply to all students System-wide.)

Self study page reference: 87

4. FOR COMPREHENSIVE EVALUATIONS ONLY: Public Notification of an Evaluation Visit and Opportunity for Public Comment: The institution has made an appropriate and timely effort to notify the public of an upcoming comprehensive evaluation and to solicit comments. (NECHE Policy 77.)

Exams also designed for students to apply their knowledge to identify, formulate, and solve engineering problems. Lastly, test questions designed to assess students' ability to use techniques, skills, and engineering tools.	Scores determined by class instructors.	Student survey comments from 2017 indicated that students fell like they spent too long waiting for their questions to be answered in class. Students somewhat split on the flipped classroom style, but more were positive than negative this year.	2019

## OPTION E1: PART A. INVENTORY OF EDUCATIONAL EFFECTIVENESS INDICATORS

CATEGORY	(1) Where are these learning outcomes published? (please specify) Include URLs where appropriate.	(2) Other than GPA, what data/evidence is used to determine that graduates have achieved the stated outcomes for the degree? (e.g., capstone course, portfolio review, licensure examination)	(3) Who interprets the evidence? What is the process? (e.g. annually by the curriculum committee)	(4) What changes have been made as a result of using the data/evidence?	(5) Date of most recent program review (for general education and each degree program)
At the institutional level:	Educated person statement	NSSE Graduating Student Survey Alumni Career Survey	Provost College Deans	Updating the educated person statement. Online retention initiative	2015
For general education if an undergraduate institution:	UMA Catalog at http://catalog.uma.edu/	Written Communication rubric California Critical Thinking Skills Test Standardized Assessment of Information Literacy Skills, etc.	Program faculty Provost Assessment Directors	Developed common assessment tools for Computer Literacy, Cultural Diversity, and Ethical Reasoning. Participated instructors planned to make some adjustments in their courses.	2021
Applied Science	UMA Catalog, program review, and on the program website at https://www.uma.edu/academics/programs/applied-science/	N.A. (individualized program)	Annually by the program faculty, Academic Coordinator, and College Dean	N.A. (individualized program) This program is impacted by most curriculum changes in the other programs	External Review in April 2017 Internal Review in May 2021

Architecture	UMA Catalog, program review binder, and on the program website at https://www.uma.edu/academics/programs/architecture/details/	Capstone Thesis (ARC509/510), 2nd and 4th years portfolio reviews, 4th-year Integrated Studio (ARC407/417), Annual Community-based projects done in 2nd, 3rd, and 4th years	Annually by the program faculty and Program Coordinator. Done through narrative assessments of all program coursework, assessment of individual cohort (year), and assessment of the program's curricular sequences (there are seven) For each course, faculty review and recommend changes to their respective courses. The full-time faculty then reviews the coursework holistically, looking at each of our five cohorts, as well as each of our seven curricular sequences. In all cases, suggestions are made to improve each area specifically and	Curriculum changes including instituting a review and revamp of architectural technology course work, high-lighting specific skills and integration across coursework. Reworked multiple years of the design studio to better focus on fundamental design skills, projects of varying scales, and projects located in alternative locations and climates. Increase in history & theory coursework. Other individual courses are addresses as deemed necessary by our internal assessment.	January 2018 Upcoming April 2022
Art	UMA Catalog, program review binder, and on the program website at https://www.uma.edu/academics/programs/art/details/	Capstone (i.e. Public Senior Exhibition reviewed by all Art faculty – ART 430) Portfolio review (Mid-collegiate career after completion of foundational ART courses)	Annually by the program faculty, Academic Coordinator, and College Dean	Curriculum changes (e.g. Senior Exhibition: After reviewing student writing art statement, required ENG 3XX Portfolio Review: Reschedule of the portfolio review from senior status to 45-60 credit hours and embedded individual advising in the portfolio review process	December 2016 Upcoming 2022
Aviation	UMA Catalog, Program review binder, and on the program website at https://www.uma.edu/a cademics/programs/avi ation/	FAA certification test (Federal Aviation Administration)	Annually by the program faculty, Academic Coordinator, and College Dean	Providing Early College aviation courses to High School Juniors and Seniors Providing Private Pilot Ground course to High School Seniors Creating an Introduction to Aviation course for High School Juniors Changing the MTR101 Meteorology course (4 Credits) to a Pilot Centered Weather course – AVI150 Aviation Weather (3 Credits). Adding a lab course – AVI151 Aviation Weather Lab – 1 Credit	June 2013 Next self- study is in Spring 2022
Biology	UMA Catalog, Program review binder, and on the program website at https://www.uma.edu/a cademics/programs/biol ogy/	Capstone course Graduating senior survey Tracking program graduates in different career paths/graduate schools	Annually by the program faculty, Academic Coordinator, and College Dean	Curriculum changes (e.g. adjusted the program requirement to meet graduate/professional schools such as premed track, science teacher certificate.  Expanded student internship)	February 2013 Next self- study is in Spring 2022
Business Administration	UMA Catalog, Program review binder, and on the program website at https://www.uma.edu/a cademics/programs/bus iness/details/	Capstone and ETS Major Field Test in Business	Annually by the program faculty, Academic Coordinator, and College Dean	Continue to leverage technology to enhance the learning experience through expanding connections with students (E.g., distance students can participate in class synchronously via Zoom, also outside of the class students ask questions through web conferencing via Zoom, alternatively to phone or email	April 2017
Computer Information Systems	UMA Catalog, Program review binder, and the program website at https://www.uma.edu/a cademics/programs/cis/ details/	Capstone course Internship experiences (includes E- portfolio) and the CIS460 Computers and Culture course	Annually by the program faculty, Academic Coordinator, and College Dean	Required all internship participants to complete an e-portfolio with artifacts and a rationale for student work.  Reviewed and modified the math requirements for the CIS concentrations based on the learning objectives.	Internal Review Spring 2019 External Review

		Individual and team projects (Peer assessment/Self- evaluation)			March 2020
Cybersecurity	UMA Catalog, Program review binder, and on the program website at https://www.uma.edu/academics/programs/cybersecurity/details/	Capstone course Internship experiences Individual and team projects	Annually by the program faculty, Academic Coordinator, and College Dean	Curriculum changes are made to meet continued compliance as an Academic Center of Cybersecurity Education as established by the department of Homeland Security/National Security Agency. Changes are also made to on a regular basis based upon the evolving cybersecurity industry.	Internal Review Spring 2019 External Review March 2020
Cybersecurity (Collaborative Master's Program with University of Southern Maine, Started in Fall 2020	UMA Catalog, Program review binder, and on the program website at https://www.uma.edu/a cademics/programs/cyb ersecurity/ms/	Capstone course or Thesis required for graduation	Annually by the program faculty, Academic Coordinator, and College Dean	Changes are made based upon mutual evaluation and agreement with members from USM.	To be determined
Data Science	UMA Catalog, Program review binder, and on the program website at https://www.uma.edu/aca demics/programs/data- science/details/	Capstone course Internship experiences Individual and team projects (Peer assessment/Self- evaluation)	Annually by the program faculty, Academic Coordinator, and College Dean	As the program is relatively new, the faculty is monitoring student progress for potential changes.	Internal Review Spring 2019 External Review March 2020
Dental Assisting	UMA Catalog, Program review binder, and on the website at https://www.uma.edu/academics/programs/dental-programs/dental-assisting/details/	Dental Assisting National Board Exam scores, Course evaluation, Alumni survey, Employer survey	Annually by the program faculty, Academic Coordinator, and College Dean	DANB focused review sessions prior to exam, group testing, dividing examination into three components rather than one longer examination.	August 2019
Dental Hygiene	UMA Catalog, Program review binder, and on the program website at https://www.uma.edu/academics/programs/dental-programs/dental-hygiene/details/	Dental Hygiene National Board Exam scores, Commission on Dental Competency Clinical Board (CDCA) Assessments, DEH 351 Capstone course; Course evaluation Alumni survey Employer survey	Annually by the program faculty, Academic Coordinator, and College Dean	Instituted mock clinical boards; continually revise and update curriculum to keep pace with contemporary dental hygiene practice; incorporate changes requisite to Commission on Dental Accreditation (CODA) evolving standards with most recent including those relating to learning activities related to off campus clinical rotations.	October 2019
Education	UMA Catalog, Program review binder, and on the program website at <a href="https://www.uma.edu/academics/programs/education/">https://www.uma.edu/academics/programs/education/</a>	Portfolio Review at conclusion of student-teaching internship. Review of Key Assessment data in Taskstream Evaluation Program.	Annually by the program faculty, Academic Coordinator, and College Dean	Ongoing work related to: (1) assessing student dispositions in coursework and in clinical/field experiences; (2) adding assessments to EDU courses that enable students to demonstrate knowledge of culturally responsive approaches to teaching; and (3) creation of a more connected process of developing the portfolio across EDU 395: Field Experience and EDU 399: Student Teaching Seminar.	December 2019
English	UMA Catalog, Program review binder, and on the program website at https://www.uma.edu/academics/programs/english/details/	Capstone	Annually by the program faculty, Academic Coordinator, and College Dean	Revised the entire English program curriculum. Rewrote program learning outcomes. Standardized ENG 101 course content. Added ENG 100: Introduction to College Reading and Writing. Assessed ENG 102: Introduction to literature and revised course outcomes, added a theory and research component.	October 2021

Information & Library Science	UMA Catalog, Program review binder, and on the program website at https://www.uma.edu/academics/programs/ils/details/	Capstone and E- Portfolio, Senior surveys, site- evaluator surveys,	Annually by the program faculty, Academic Coordinator, and College Dean	Revise learning outcomes, change course titles and descriptions, develop new courses, capture data at Capstone course level, review types of learning assignments, development of new approaches to engagement, broader information sharing, more involvement in the student life-cycle of the university from pre-admission counseling to graduation.	2018/2019
Interdisciplinary Studies	UMA Catalog, program review, and the program website https://www.uma.edu/aca demics/programs/interdisc iplinary/	Capstone and E/Portfolio, Senior surveys, site- evaluator surveys,	Annually by the program faculty, Academic Coordinator, and College Dean	Curriculum and procedural changes; made INT 208 the required methods course for INT majors. Organized a student conference. Spring 2020 pilot of the capstone course as a course rather than an independent study.	Self-study initiated in 2017, which will be updated in Spring 2022
Justice Studies	UMA Catalog, Program review binder, and on the web at https://www.uma.edu/aca demics/programs/justice-studies/	Capstone course Portfolio	Annually by the program faculty, Academic Coordinator, and College Dean	Individual course changes, Gen Ed requirement changes, renewal of articulation agreement with Maine Criminal Justice Academy, addition of one new full-time faculty member and one half-time faculty member /Director of Maine Community Policing Institute.  New Certificate: Advanced Criminal Justice Management, Community Corrections (in addition to Community Policing, Mediation and the other preexisting certificates)  New Pre-Law Concentration and 3+3  Agreement with Maine Law	External Review in December 2011 Self-study in Spring 2022
Liberal Studies	UMA Catalog, Program review binder, and on the web at https://www.uma.edu/aca demics/programs/liberal- studies/	N.A. (individualized program)	Annually by the program faculty, Academic Coordinator, and College Dean	This program is impacted by most curriculum changes in the other programs. In 2018, research methods options were expanded to accommodate education students.	Self-study initiated in March 2015, which will be updated in Spring 2022
AS Medical Laboratory Technology	UMA Catalog, Program review binder, and on the web at https://www.uma.edu/a cademics/programs/me dical-laboratory-technology/details/	Capstone (Clinical Practicum) National certification exam ASCP certification (American Society of Clinical Pathologists) Graduate survey Employer evaluation survey	Annually by the program faculty, Academic Coordinator, and College Dean	Curriculum changes/proposed changes: A Clinical Immunology course proposal is in progress to address the historically lowest scoring area of the board of certification exam. Discussing possibility of a second clinical microbiology course to substitute general microbiology and add additional time to teach the large amount of clinical microbiology/increase molecular theory.	October 2016
Mental Health and Human Services	UMA Catalog, Program review binder, and on the web at https://www.uma.edu/a cademics/programs/mh hs/details/	Completion of HUS 470 Field Placement; Graduate survey; Employer survey; Tracking the passing of state level licensing exams	Annually by the program faculty, Academic Coordinator, and College Dean	Revamped core curriculum using information from Learning Outcomes data. Applied for and received national accreditation from the Council for Standards in Human Service Education (CSHSE). Curriculum changes.	Internal Review 2019 External Review 2020
Graduate Certificate in Substance Use Disorders (Started in Fall 2020)	UMA Catalog, Program review binder, and on the web at https://www.uma.edu/a cademics/programs/mh hs/gcsud/	Successful completion of the Certified Clinical Supervisor (CCS) (training/course) to apply for state level licensure; Graduate survey; Tracking the passing of state level licensing exams	Annually by the program faculty, Academic Coordinator, and College Dean	Program began in Fall 2020 in response to the needs for additional trained personnel to provide substance use counseling to people across Maine and beyond. Changed admissions process and course prerequisites in 2022 to allow students to enter program in September or January. Initially admission was only in January. Course prerequisites updated so a student can now completed certificate in 1 year (2 courses x 3 semesters), our original schedule, OR 2 years (1 course x 6 semesters).	To be determined

Music	UMA Catalog, Program review binder, and on the web at https://www.uma.edu/a cademics/programs/nur sing/rn-bsn/details/	Successful Completion of MUS 141 lower level jury, MUS 346 Junior Jury or Portfolio, MUS 448 Senior Jury or Portfolio, Capstone: MUS 435W Senior Seminar in 20th and 21st Century Music.	Annually by the program faculty, Academic Coordinator, and College Dean	We re-vamped our checksheet after our 2017 External Review and internal data collection to include the four previous concentations, (music education, performance, composition, audio recording) on one checksheet. Having only one checksheet has improved graduation rates and has improved students successful pass rate on juries.	Internal Review 2021 External Review Spring 2022
BS Nursing:  2 Tracks: pre licensure (PL) and RN to BSN  *Applies only to PL-BSN  **Applies only to RN-BSN	UMA Catalog, program review binder, Student Program Handbook, and the program website at https://www.uma.edu/academics/programs/nursing/bsn/details/	Senior Practicum Exit Exam NCLEX (National Council Licensure Examination)* Nurse preceptor evaluation of student performance in clinical Senior Seminar** Program survey Graduate survey Employer survey	Annually by the program faculty, Academic Coordinator, and College Dean	Ongoing development of courses built on concept based curriculum as NUR program is rolled out* Ongoing development of courses built on concept based curriculum as NUR program is rolled out* Final courses to be offered Spring 2022 with first graduating cohort from PL track * Ongoing review of progression to determine appropriate pre and co requisites to insure smooth progress through program with minimal obstacles* Curriculum changes: development of holistic externship as an elective NUR394	Fall 2019*  Fall 2019*  Focused visit completed Fall 2021 visiting committee made no recommend ations stating all criteria were met. Awaiting final approval from ACEN
Public Administration	UMA Catalog, Program review binder, and on the web at https://www.uma.edu/academics/programs/publicadministration/	Capstone course Graduate survey  Graduate school acceptance Internship supervisor feedback	Annually by the program faculty,  Academic Coordinator, and College Dean	After consultations with the faculty in English and Math, curriculum modifications designed to improve graduates' analytical skills and writing ability. Specifically, more emphasis on writing, and redesigned assignments in the Research Methods course.	Self-study completed in May 2020, which will be updated in Spring 2022
Social Science	UMA Catalog, Program review binder, and on the web at https://www.uma.edu/academics/programs/social-science/details/	Capstone course Graduate survey	Annually by the program faculty, Academic Coordinator, and College Dean	As of Fall 2021: Streamlined degree requirements, allowing more flexibility for transfer students. Updated, removed, and added new concentrations. Added new Project Planning course (SSC 390) to extend Capstone experience to six credits over two semesters.	Self-study in Spring 2021 External Review in Fall 2021
Graduate Certificate in Trauma- Informed Emergency Management (Started in Fall 2021)	UMA Catalog, Program review binder, and on the web at https://www.uma.edu/a cademics/programs/tem	Graduate survey	Annually by the program faculty, Academic Coordinator, and College Dean	The program is brand new and monitoring student progress.	To be determined
Veterinary Technology	UMA Catalog, Program review binder, and the program website at https://www.uma.edu/a cademics/programs/vet erinary-technology/details/	National exam Completion of skills book as required by AVMA	Annually by the program faculty, Academic Coordinator, and College Dean	Additional emphasis placed on topics in which students tend to score lower on the national exam	October 2019

Program is fully reviewed, including a self-study and external reviewer, approximately every 5 years.	Program curriculum was reviewed and managed by a consortium of UMS institutions until it's last review in 2018-2019, when accreditation was lost. No program changes have been pursued since. Program is being considered for a 1-year admissions suspension to revitalize (suspend enrollments 2022-2023).	2018-2019
BA in English	Website: https://www.umfk. edu/english/program/ Catalog: https://catalog.umfk. edu/preview_program.php? catoid=6&poid=630&returnto=3 05	Capstone and e-portfolio	The Program Lead reviews the results with the program fulltime faculty. Information is then shared with Unit Chair and Division Dean. Annual reports are also generated each year as a means to assess the data. Program is fully reviewed, including a self-study and external reviewer, approximately every 5 years.	New, Applied Communications concentration & minor implemented fall 2019. Program faculty had a failed attempt to collaborate with a sister institution on a shared program. Attempts have/ are being made to revitalize the curriculum. Program is being considered for a 1-year admissions suspension to revitalize (suspend enrollments 2022-2023).	2018-2019; however, a formal review was not performed as the program has been under threat of suspension since 2017-2018.
BS in Environmental Studies	Website: https://www.umfk.edu/environmental/program/ Catalog: https://catalog.umfk.edu/preview_program.php? catoid=6&poid=637&returnto=3 05	a) a capstone senior project (written project report, public oral presentation, and final grade); b) a general knowledge exam of topics in biology and environmental studies (prepared by environmental studies and biology faculty); c) a performance evaluation for an internship by the internship supervisor (if applicable)	Environmental Studies/ Biology Program Lead and program full-time faculty. The group meets monthly during the academic year, and discussions routinely include course modifications and ideas for program improvement. Information shared with Unit Chair and Division Dean. Meetings to discuss SLOs typically occur once per year. Annual reports are also generated each year as a means to assess the data. Program is fully reviewed, including a self-study and external reviewer, approximately every 5 years.	Program SLOs and curriculum updated after 2020-2021 program review, which includes the elimination of former concentrations, and the addition of a self-design concentration and an accelerated graduate pathway with MaineLaw (3+3). Implementation of changes effective fall 2022	2020-2021
BS in Rural Public Safety Administration	Webiste: https://www.umfk. edu/safety/program/ Catalog: https://catalog.umfk. edu/preview_program.php? catoid=6&poid=641&retumto=3 05	Capstone, internship evaluations, and student portfolio.	The Program Lead reviews the results with the program faculty. Information is then shared with Unit Chair and Divsion Dean. Annual reports are also generated each year as a means to assess the data. Program is fully reviewed, including a self-study and external reviewer, approximately every 5 years.	Changes to courses; adjustments over the years to the SLO's: added stronger writing and research content. Case? Research Paper, Article reviews or case studies as directed by the Professor. Requested a program name change in 2020-2021 to Criminal Justice to improve recruitment (research indicates that Criminal Justice is most searched by potential students), which was denied.	2013-2014. Formal review was scheduled for 2021-2022, but delayed to 2022-2023 due to faculty position vacancy.
AA in General Studies	Website: https://www.umfk. edu/general-studies/program/ Catalog: https://catalog.umfk. edu/content.php? catoid=6&navoid=305	E-portfolio, capstone/research project (when applicable; varies by concentration)	Professional advisor, and Faculty advisor if applicable (dependant on selected course of study). Registrar's office confirms degree requirements are met. Program faculty of specific concentrations continuously review curricular for relevance. Annual reports are also generated each year as a means to assess the data.	For concentrations, curriculum is updated when changes are made to the Bachelor's degree and/or minor; refer to those changes.	Review varies depending on the concentration track; review is paired with the corresponding Bachelor program review (e.g. AA-Accounting track is reviewed when the BS in Business Management program is reviewed). The last review was in 2015-2016 for the Behavioral Science and Human Services tracks.

# **E-SERIES FORMS:** MAKING ASSESSMENT MORE EXPLICIT Option E1: Part a.

AS in Applied Forest Management	Website: https://www.umfk.edu/forestry/program/ Catalog: https://catalog.umfk.edu/preview_program.php2catoid=6&poid=663&returnto=3	Capstone project, multiple in depth reports, topic & field exams, alumni survey (voluntary, not required). There are 21 SLOs with specific measures for each outcome.	Forestry faculty meet at the end of the spring semester to review results and discuss course/program changes based on how well SLO's were met for the year. Information is also shared with the AFM advisory board to solicit additional feedback. Annual reports are also generated each year as a means to assess the data. Program is fully reviewed during it's accreditation cycle, which is every 10 years.	Course name change from Map and Air Photo and Interpretation (FOR 242) to Map and Lidar Interpretation; change reflects the changing direction of remote sensing in Maine. Forest Protection II (FOR 330) laboratory time increased by eight hours to accommodate an annual field trip. The First Year Experience (HUM 102) course has been removed from the AFM program and some of the content of the course moved to Introduction to Forestry (FOR 100) which increased from three to four credits to reflect the increase in course content. Removal of Forest Measurements (FOR 291) from the AFM curriculum and the course content distributed to Forest Mensuration (FOR 290), with an increase of 3 to 4 credits, and Forest Inventory and Analysis (FOR 332), with an increase from 2 to 3 credits.	2017-2018
AS in Information Securit	Website: https://www.umfk.edu/security/program/ Catalog: https://catalog.umfk.edu/preview_program.php? catoid=6&poid=665&returnto=3 05	E-portfolio, capstone projects in each course	The Program Lead reviews the results with the program fulltime faculty. Information is then shared with Unit Chair and Divsion Dean. Annual reports are also generated each year as a means to assess the data. Program is fully reviewed along with the BS in Cybersecurity, including a self-study and external reviewer, approximately every 5 years.	Program curriculum was reviewed and managed by a consortium of UMS institutions until it's last review in 2018-2019, when accreditation was lost. No program changes have been pursued since. Program is being considered for a 1-year admissions suspension to revitalize (suspend enrollments 2022-2023).	2018-2019

College of Arts,	, Sciences, Social Scie	nce (CAHS)			
Art ProgramsBA-BFA	https://usm.maine.edu/art/overview	Digital portfolio reviews and senior capstone projects (exhibits of work)	Program faculty reviewed assessment results and assessed student competencies online.	Changes were made in the assessment process to address the new online forum of teaching and learning.	2016
Communication-Media Studies-BA	https://usm.maine.edu/communication- media-studies/communication-and-media- studies-learning-outcomes	Class assignments and capstone projects	Program faculty and the CMS Curriculum Committee reviewed the catalog requirements for their majors.	Program and course changes were updated in the catalog; these changes enabled us to develop better assessment instruments for the learning outcomes.	Spring 2015
Creative WritingMFA	https://usm.maine. edu/stonecoastmfa/overview	Reflection papers and thesis papers	Dept Chair reviewed assessment results using professional judgments.	Course pedagogy changes were made; e.g. we introduced the concept of "ars poetica" earlier in the curriculum so students can use the concept in their own work and examine in other writers.	Summer 2016
CriminologyBA	https://usm.maine. edu/criminology/overview	Capstone projects	Dept Chair reviewed senior seminar projects by examining scored papers.	Due to the quality of the student work, program-level changes are not needed at this time.	Fall 2016

EconomicsBA	https://cms.usm.maine. edu/sites/default/files/assessment/SLOs% 20for%20Economics%20Program.pdf	Class assignments, exams, pre-post surveys	Dept Chair reviewed survey information and assessment results using professional judgments.	By completing a rigorous program review process, we have identified changes needed in our curriculum; in addition to changes in our assessment process.	Spring 2021
Category	Where are the Learning Outcomes published for this level/program? (please include url)	Other than GPA, what data/evidence is used to determine that graduates have achieved the stated outcomes for the degree (i. e. capstone, portfolio review, liensure exam, etc)	Who interprets the data/evidence; What is the process? EnglishBA	https://usm.maine.edu/eng/overview	Focus groups and surveys	Program faculty and a commitee reviewed and interpreted the survey results.	Changes at the course-level were implemented which involved new training and support for faculty teaching in the program.	Spring 2019
HistoryBA	https://usm.maine.edu/history/overview	Class assignments capstone projects, internships, oral performance, research projects, and surveys	Program faculty have an annual discussion of curricular changes, and will be reviewing assessment results in Spr'22.	Course changes are being planned to HTY 400 after reviewing capstone projects. Modifications are also expected in HTY 200 where program-level outcomes are practiced.	2015-2016
Leadership & Organization Studies- BS and MA	https://usm.maine. edu/leadership/overview	Class assignments, oral performances, reflection essays	Program faculty and a faculty committee reviewed course blueprints, course goals and outcomes, and assessment methods, as part of the program review process.	Course descriptions were updated and are now more reflective of the course learning goals. Revised assessment methods (class assignments) are being implemented this academic year.	2020-2021
Philosophy-BA	https://usm.maine.edu/phi/overview	Class assignments and papers	Program faculty were unable to meet last year due to the pandemic, but plans are being made to review and discuss the assessment results during this academic year.	Program-level changes will include revisiting the assessment plans this year; i. e. including comparing papers of 200 and 300 level courses, examining how students are able to interpret arguments, and having a meeting with students to discuss the research process.	2010
Category	Where are the Learning Outcomes published for this level/program? (please include url)	Other than GPA, what data/evidence is used to determine that graduates have achieved the stated outcomes for the degree (i. e. capstone, portfolio review, liensure exam, etc)	Who interprets the data/evidence; What is the process? (i.e. annually by faculty or curriculum committee)	What changes have been made as a result of using the data/evidence?	Date of most recent program review (for general education and degree programs)
Political ScienceBA	https://usm.maine.edu/pos/outcomes	Class assignments, capstone projects, internship experiences, oral presentations, and research papers	Program faculty and Dept Chair used professional judgments in reviewing the assessment results and survey data.	After this year's self-study report, a curriculum map of the program-level learning outcomes is currently being implemented, in addition to reviewing and updating the assessment methods for each of the outcomes.	2020-2021
Social & Behavioral ScienceBA	https://usm.maine.edu/sbs/overview	Class assignments and reflection papers	Program faculty and the Dept Chair used professional judgments in reviewing the assessment data.	Updates were completed on the program-level curriculum map, and plans are underway to refine the program goals, as well as addition, the SBS 370 course was approved to meet the new designation of WRI 3.	2021

SociologyBA	https://usm.maine.edu/sociology/overview	Capstone projects	Program faculty and Dept Chair evaluated rubrics and reviewed qualitative methods. In addition created a formal 3-year program assessment plan.	Course-level changes include a review of the learning outcomes in SOC 210 and 307 this year, and to design assessments to align with the outcomes.	Spring 2021				
Category	Where are the Learning Outcomes published for this level/program? BiologyBS-MS	https://usm.maine.edu/bio/overview	Capstone projects, inventories, exams and pre-post tests	Program faculty plan to implement their updated assessment plan this academic year and will schedule time to review assessment results annually.	During the program review process, an updated assessment plan was approved, which included new learning goals and outcomes, the development of assessment methods, and a redesigned curriculum map.	Summer 2021				

ChemistryBS-BA Biochemistry-BS	https://usm.maine, edu/sites/default/files/assessment/SLOs% 20for%20Chemistry.pdf	Class assignments, capstone projects, exit exams, ACS comp exam, exit interviews, internships, and research papers	Program faculty evaluated rubrics, scored exams, and compiled survey results, and used professional judgments for interpreting those results.	Our results indicated that no action is needed at this time; however, we may begin to examine how to improve the student's ability to write comprehensive lab reports.	Fall 2018
Computer ScienceBS	https://cms.usm.maine.edu/cos/mission- statement-department-computer-science	Course-embedded assignments and tests	Program faculty will review assessment results twice a year, and will continue to examine student performance trends.	Changes in assessment procedures are in the process this year; i.e. implementing a new assessment plan and reviewing assessment methods.	Spring 2016
Category	Where are the Learning Outcomes published for this level/program? EngineeringBS	https://usm.maine.edu/engineering/abet- accreditation	Class assignments/exams, capstone projects, exit interviews, employer meetings, oral performance, and student survey information	Program faculty, a faculty committee, Dept Chair, faculty advisors, and the Engineering Advisory Board reviewed assessment results; i.e. qualitative data, rubrics, scored exams, compiled survey results, as well as information from workshops and meetings. Professional judgments were used for making interpretations.	Recent changes included mapping and implementing our required courses to ABET Student Outcomes. Based upon the assessment results, small corrections were made this year in course content and pedagogical adjustments.	2014-2015
Environmental ScienceBS Environmental Planning & Policy-BA	https://usm.maine.edu/environmental- science/overview	Class assignments, capstone projects, essays, research projects, internships, and surveys	Program faculty and Dept Chair discussed assessment results at the faculty meetings; i.e. examined student success in ESP courses, and used professional judgments when interpreting the data.	No major changes will be made at this time, due to two faculty members are on-leave this academic year. However, the most recent update included revising the curriculum map to incorporate the new writing-reading-inquiry designation (WR1 2 and WRI 3).	2013
Exercise, Health, Sport Sciences: Athletic Training BS	https://usm.maine.edu/ehss/program-and- student-outcomes	Class assignments, capstone projects, internships, and survey information	Program faculty and Dept Chair reviewed the assessment results; i.e. examined rubrics, scored exams, qualitative methods, comp exams, and survey data.	Program-level changes included: adjustments in the assessment procedures, course pedagogy, student's out-of-class experiences, and changes in the advising relationships.	2017

		The plant follows:	Standard II: Program	
		Outcomes from Action 1)	Orgnization and Administration	
		The UMFK policy on diversity	Standard III: Students	
		within the workplace and classroom	Standard IV: Parent Institution	
		is: The University of Maine at Fort	Support	
		Kent is guided by an overarching	Standard V: Curriculum	
		objective to ensure that the makeup of the campus community, which	Standard IV: Faculty	
		includes students, faculty, and staff,	•	
		is a reflection of the larger		
		community. To help us reach that		
		objective, we make it a practice not		
		to discriminate on the grounds of		
		race, color, religion, sex, sexual		
		orientation, including transgender		
		status or gender expression, national origin, citizenship status, age,		
		disability, or veteran status. This		
		policy extends to both our		
		employment and student recruitment		
		activity and it requires our ongoing		
		commitment and intention. This		
		central objective, in tandem with the		
		various program initiatives at work		
		in our program as described above, are all intended to improve the		
		cultural, ethnic, and gender diversity		
		of our program.		
		Faculty members have made a		
		concerted effort to increase visual		
		representation of female students		
		whenever possible in all program		
		advertising materials including; the		
		website, recruitment posters, fact sheet, and social media. Female		
		foresters and alumni are being		
		surveyed for their input and asked to		
		assist with recruiting initiatives such		
		as meeting with visiting student		
		groups, high school instructors, or		
		other organizations wishing to learn		
		more about forestry.		
		• In the spring of 2018 Nicole Rogers was hired to replace long—		
		time forestry faculty member Dave		
		Hobbins upon retirement. Nicole's		
		presence may significantly impact		
		the attraction and retention of female		
		students. Professor Rogers now		
		plays an integral role in all recruiting		
		duties especially when it involves		
		speaking to prospective students.  • Laurie Spooner, a local science		
		teacher with a Master's degree in		
		Forestry, will begin to teach a high		
		school level Introduction to Forestry		
		in nearby Van Buren by fall of 2020.		
		The curriculum from UMFK's		
		introductory course will be shared		
		with her, allowing her high school		
		students to obtain 3 of 4 credits toward the AFM Introduction to		
		Forestry course through the early		
		college program.		
		The University has developed a		
		marketing strategy for the Natural		
		Sciences programs (AFM,		
		Environmental Studies, Biology) to		
		boost enrollment. Increasing		
		diversity in the AFM program has been incorporated into this plan. One		
		of the strategies is to use online		
		target marketing focusing on regions		
		in the northeast where there is a		
		higher likelihood of attracting		
		students interested in forestry.		
I	I	Marketing consists of running		l l

I I	banner ads on websites visited by	Ţ
	individuals within the target areas	
	that would link to additional	
	information on the AFM program.	
	Particular attention will be given to	
	Maine's Washington and Penobscot	
	counties, both of which have Native	
	American population centers.	
	Students of French culture are the	
	largest represented group in the	
	Program. Since inception,	
	approximately 1/3rd of all AFM	
	graduates have French surnames and	
	have come from within 60 miles of	
	campus where the French-Acadian	
	heritage is prevalent. The AFM	
	program is well recognized	
	throughout Aroostook County and	
	although the Program does not target	
	individuals of French heritage	
	directly it does recruit heavily in the	
	local region.

Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with <i>Government Auditing Standards</i>	110

I began last year's letter noting that Fiscal Year 2020 was one of historic change and unprecedented challenge in the University of Maine System. Likewise, Fiscal Year 2021 presented considerable hurdles as well as exciting opportunities for collaboration, strengthening and progress.

Our most important work is providing education, research, public service, and workforce development. I am proud to report that nearly 5,000 students graduated from our universities and the Maine School of Law in May, with a mix of online and interactive events. This resilient Class of 2021 was 7 percent larger than last year even with COVID-19 complications.

This fall, a majority of students, faculty and staff are on our campuses and the energy is real. From the University of Maine at Fort Kent to the University of Southern Maine, we're safely engaged in learning, conducting research and providing outreach. This is possible because we continue to follow science-based public health protocols.

Because of diligent stewardship, UMS retained its AA- credit rating, with a stable outlook, during the pandemic. S&P Global's report indicated that UMS management "maintains a disciplined debt policy, imparts fiscal discipline through using dashboard indicators and long-term financial planning, and adapts to the challenging demographics of Maine through newly developed initiatives."

The report assessed our enterprise profile as strong, characterized by breadth and depth, and noted that enrollment has remained stable even with unfavorable state demographics and strong regional competition. The report also noted that our unified accreditation model will permit greater academic collaboration between our universities and allow UMS to offer academic programming that any one university may not have the resources to offer by itself.

We carefully administer our resources so that tax and donor dollars go farther. Our sound fiscal management is imperative to managing costs, lowering the cost of borrowing, and attracting additional investments.

The Harold Alfond Foundation's \$240 million investment in the System announced last October is a transformative opportunity for higher education in Maine. It includes:

- \$75 million for a multi-university Maine College of Engineering, Computing, and Information Science.
- \$20 million to support student retention and success systemwide.
- \$90 million to modernize UMaine Athletics infrastructure and improve gender equity.
- \$55 million to develop the Maine Graduate and Professional Center (Maine Center) in Portland, including a signature new building to house Maine Law, the Graduate School of Business and Muskie School of Public Service.

Over the next ten years, we'll be using these historic investments to improve diversity, equity, and inclusion in these important areas, and all universities in our system will play a role. We'll be leveraging Alfond investments to secure an additional \$170 million in matching funds over the same time from private, state and federal sources, resulting in \$410 million total investment in our public university system. The impacts will be truly transformative.

In March Governor Janet Mills signed legislation to implement the Maine Jobs and Recovery Plan, which directed \$35 million to UMS to accelerate talent development, research and innovation in

support of the state's economic recovery and its long-term economic growth and global competitiveness. This plan will help to fund new programs and infrastructure, bringing new jobs to several industries.

With more than 50 percent of UMS's physical plant constructed or last renovated more than 50 years ago, the System is working on strategic capital infrastructure improvements and planning for more. Greater investment in our facilities and innovative partnerships are part of our plan.

This June Trustees approved a FY22 budget that — for the seventh time in 10 years — holds in-state tuition rates flat for Maine students. Holding the line on tuition cannot be the expectation every year, but our stewardship of university resources will always include an obligation to keep the costs of a public higher education in Maine within the reach of Maine families.

Thank you, again, for your interest in and support of our work.

Dannel P. Malloy Chancellor

### INDEPENDENT AUDITORS' REPORT

Board of Trustees University of Maine System Orono, Maine

### Report on the Financial Statements

We have audited the accompanying financial statements of the business-type activities, the discretely presented component unit and the aggregate remaining fund information of the University of Maine System (the System) (a component unit of the state of Maine) as of and for the years ended June 30, 2021 and 2020, and the related notes to the financial statements, which collectively comprise the System's basic financial statements as listed in the table of contents.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditors' Responsibility

Our responsibility is to express opinions on these basic financial statements based on our audits. We did not audit the financial statements of the University of Maine Foundation (Foundation), the discretely presented component unit. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for the Foundation, is based solely on the report of the other auditors. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The financial statements of the Foundation were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

CLA is an independent member of Nexia International, a leading, global network of independent accounting and consulting firms. See nexia.com/member-firm-disclaimer for details.

Board of Trustees University of Maine System

### **Opinions**

In our opinion, based on our audits and the report of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities, the discretely presented component unit and the aggregate remaining fund information of the System as of June 30, 2021 and 2020, and the respective changes in financial position and, where applicable, cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

### Emphasis of Matter

As described in Note 18, the System changed accounting policies related to reporting fiduciary activities as aggregate remaining fund information by adopting Statement of Governmental Accounting Standards (GASB Statement) No.84, *Fiduciary Activities*, in 2021. Accordingly, financial information that was historically accounted for in the business-type activities is now reported in fiduciary fund financial statements. The changes adopted to conform to the provisions of GASB Statement No. 84 are applied retroactively by restating the 2020 financial statements. Our auditors' opinion was not modified with respect to this matter.

### Other Matters

### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis and the required supplemental information – retirement and OPEB plans, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the System's basic financial statements. The supplemental information required by the state of Maine, as listed in the table of contents, is presented for purposes of additional analysis, and is not a required part of the basic financial statements.

The supplemental information required by the state of Maine is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplemental information required by the state of Maine is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Board of Trustees University of Maine System

The Chancellor's Letter and schedule of the Board of Trustees and Management, as listed in the table of contents, has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on it.

### Report on Summarized Comparative Information

The other auditors have previously audited the Foundation's 2020 financial statements and they expressed an unmodified opinion on those audited statements in their report dated October 27, 2020. In our opinion, based on the report of other auditors, the summarized comparative information presented herein for the Foundation as of and for the year ended June 30, 2020, is consistent, in all material respects, with the audited financial statements from which is has been derived.

### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 30, 2021 on our consideration of the System's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the System's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the System's internal control over financial reporting and compliance.

## UNIVERSITY OF MAINE SYSTEM MANAGEMENT'S DISCUSSION AND ANALYSIS JUNE 30, 2021 AND 2020 (UNAUDITED)

The Management's Discussion and Analysis (MD&A) provides a broad overview of the University of Maine System's ("the System" or UMS) financial condition as of June 30, 2021 and 2020, the results of its operations for the years then ended, significant changes from the previous years, and outlook for the future where appropriate and relevant. Management has prepared the financial statements and related note disclosures along with this MD&A. The MD&A should be read in conjunction with the accompanying basic financial statements and related notes.

### Mission

Established in 1968 by the Maine State Legislature, the System is the state's largest educational enterprise, uniting its public universities in the common purpose of providing high-quality educational undergraduate and graduate opportunities that are accessible, affordable, and relevant to the needs of Maine students, businesses, and communities. The System features seven universities—some with multiple campuses—located across the state, a law school, eight outreach centers, an additional 34 course sites, and Cooperative Extension. The System carries out the traditional tripartite mission – teaching, research, and public service. A major resource for the State, the System drives economic development by conducting world-class research, commercializing valuable ideas, and partnering successfully with businesses and industries throughout Maine and beyond.

### **Universities, Campuses, and Centers**

The System is a comprehensive public institution of higher education with nearly 30,000 enrolled students, supported by the efforts of 1,165 regular full-time faculty, 83 regular part-time faculty, 3,104 regular full-time staff, and 308 regular part-time staff members.

From Maine's largest city to its rural northern borders, our universities are known for excellence in teaching and research. Our universities are:

The University of Maine (UM) is the state's land grant, sea grant and space grant university. As Maine's flagship public university, UM has a statewide mission of teaching, research and economic development, and community service. UM is the state's only public research university and is among the most comprehensive higher education institutions in the Northeast, where undergraduate and graduate students have opportunities to participate in groundbreaking research with world-class scholars. UM offers bachelor's, master's and doctoral degrees.

PORTLAND • GORHAM • LEWISTON • ONLINE

With campuses in Augusta and Bangor, eight UMA Centers across Maine, and expertise in online and distance learning, the University of Maine at Augusta (UMA) is considered the university of choice for Mainers who want to receive a quality and affordable education without uprooting their lives.

Established in 1864 as Maine's first public institution of higher education, the University of Maine at Farmington (UMF) is Maine's public liberal arts college, offering quality programs in teacher education, human services, and arts and sciences.

The University of Maine at Fort Kent (UMFK) is a campus focused on health sciences and professional programs. Founded in 1878 to meet local, state, and regional workforce needs, UMFK provides a diversity of learners with the education and development needed to be successful professionals and engaged members of their communities in the 21st Century.

The University of Maine at Machias (UMM) is the regional campus of the University of Maine. Offering quality baccalaureate programs with an emphasis on experiential and community-engaged learning. UMM's distinct campus environment and strong regional identity are enhanced by a partnership with the state's flagship university.

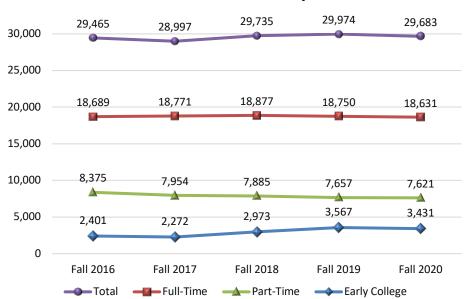

The University of Maine at Presque Isle (UMPI) is a nationally recognized institution of innovation and opportunity, providing students with an affordable and personalized education, a caring, small-university environment, and lifechanging experiences that prepare them to be career-ready graduates. Established in 1903, UMPI now offers bachelor's, associate's, online, and competency-based education degree programs, as well as its first master's degree program.

The University of Southern Maine (USM) is northern New England's outstanding public, regional, comprehensive university, dedicated to providing students with a high-quality, accessible, affordable education. From campuses in Portland, Gorham, and Lewiston-Auburn, USM offers baccalaureate, master's, and doctoral programs.

The University of Maine School of Law (Maine Law), a freestanding institution within the System and located in Portland, is committed to justice and leadership in a changing world. As the state's public and only law school, Maine Law provides an accessible and affordable studentfocused program of legal education through a rigorous doctrinal and experiential curriculum. Lewiston-Auburn College is a campus of USM. The Hutchinson Center in Belfast is a campus of UM. UMA Bangor is a campus of UMA. UMA also has eight Centers that provide onsite, distance and online students with access and support to education courses offered by all seven UMS universities at the centers as well as at 34 Interactive Television (ITV) course sites statewide.

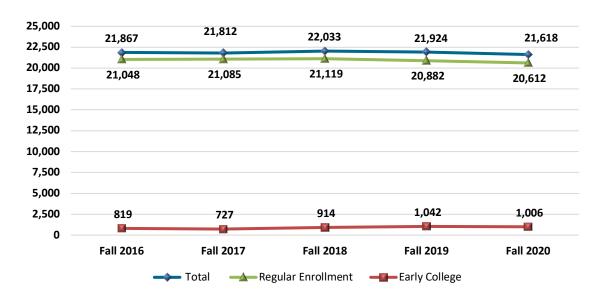

### Student Enrollment

Chart 1 shows student enrollment, including early college, on a headcount basis with 29,683 students enrolled for the fall 2020 semester, down 1.0% from fall 2019 and up 0.7% since fall 2016. For both fall 2020 and fall 2019, 63% of the student population were enrolled full-time.

**Chart 1: Student Enrollment by Headcount** 

Chart 2 and Table 1 show student enrollment, including early college, on a full-time equivalent (FTE) basis with 21,618 FTE students enrolled for the fall 2020 semester, down 1.4% from fall 2019 and down 1.1% from fall 2016. For fall 2020, 73% of FTE enrollments were from Maine residents compared to 75% for fall 2019.

**Chart 2: Student FTE Enrollment** 

**Table 1: Student FTE Enrollment** 

	% Change Fall 2016 to 2020	Fall 2020	% Change	Fall 2019	% Change	Fall 2018	% Change	Fall 2017	% Change	Fall 2016	% Change
UM	1.9%	9,773	-0.1%	9,782	0.3%	9,750	0.3%	9,720	1.3%	9,594	2.4%

Total	-1.1%	21,618	-1.4%	21,924	-0.5%	22,033	1.0%	21,812	-0.3%	21,867	1.1%

### **Student Comprehensive Cost of Education**

Net student fee revenue, totaling \$238 million in FY21 and \$248 million in FY20, is the System's greatest source of revenue, contributing 32% of total operating and net nonoperating revenues for FY21. Net student fees represented 35% of the total operating and net nonoperating revenues for FY20. Such revenues are impacted by enrollment levels; tuition, room and board, and fee levels; and the amount of scholarship allowances provided to students.

The average comprehensive cost of education (tuition, mandatory fees, and room and board) for UMS undergraduate, graduate, and law school students is shown in Table 2 and Chart 3. The percentage changes for the comprehensive cost of education in FY21 range from an increase of 3.2% for out-of-state and NEBHE undergraduate students, down to a decrease of 20.3% for Canadian graduate students. Percentage changes in FY20 ranged from an increase of 2.8% for in-state, NEBHE and Canadian undergraduate students, down to an increase of 0.8% for in-state law school students.

The FY21 in-state undergraduate tuition increased by a system-wide average of 2.5% where the overall average comprehensive cost of education for this same category of students increased 3.0%. In FY20, the System increased tuition for in-state undergraduate students by a system-wide average of 2.7% where the overall average comprehensive cost of education for this same category of students increased 2.8%.

Note: Some amounts presented in the above Table 2 for 2019 differ from FY2019's MD&A and are based upon restated amounts included in the System report titled, 'Student Charges FY2020'.

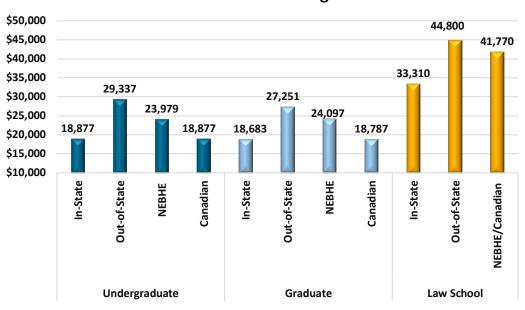

Chart 3: FY21 Student Comprehensive Cost of Education - Averages

### **OVERVIEW OF THE FINANCIAL STATEMENTS**

This discussion and analysis is an introduction to the System's financial statements which are prepared in accordance with U.S. generally accepted accounting principles and are comprised of four components: 1) system-wide financial statements, 2) component unit financial statements, 3) fiduciary funds financial statements, and 4) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

The University of Maine Foundation is a legally separate tax-exempt component unit of the System. This entity's financial position and activities are discretely presented in the System's financial statements as required by Governmental Accounting Standards Board (GASB) statements. This MD&A includes information only for the System, not its component unit.

### System-wide Financial Statements

These financial statements report information about the System's assets, liabilities, deferred inflows and outflows, net position, revenues, and expenses and are comprised of the following:

- Statements of Net Position
- Statements of Revenues, Expenses, and Changes in Net Position
- Statements of Cash Flows

### **Fiduciary Funds Financial Statements**

These financial statements include information about assets held by the System on behalf of other entities as a trustee or fiduciary. The System is responsible for ensuring such assets are used only for their intended purposes and by those to whom the assets belong. Included in these fiduciary financial statements are investments held on behalf of the System's pension and other postemployment benefit trusts, monies invested by external parties in the System's managed investment and endowment pools, and cash held on behalf of various student government groups.

The fiduciary funds financial statements are comprised of the following:

- Statements of Fiduciary Net Position
- Statements of Changes in Fiduciary Net Position

### **Notes to the Financial Statements**

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in both the system-wide and fiduciary funds financial statements.

### **Other Information**

This report also provides certain required supplementary information related to the System's retirement and other postemployment benefit plans and a Schedule of Activities required by the State of Maine.

### STATEMENTS OF NET POSITION

The Statements of Net Position present the financial position of the System at one point in time – June 30 – and include all assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position of the System. These statements are the primary statements used to report financial condition. Net position represents the residual interest in the System's assets and deferred outflows of resources after liabilities and deferred inflows of resources are deducted. The change in net position is an indicator of whether the overall financial condition has improved or deteriorated during the year. Table 3 on page 19 shows Condensed Statements of Net Position for the past five years.

### **Restatement of Prior Year**

The FY20 financial statements have been restated to reflect adoption of GASB Statement No. 84, *Fiduciary Activities*. The overall impact on the FY20 data in the Condensed Statements of Net Position is that:

• Cash, a component of current assets, decreased by \$2.4 million as cash held on behalf of student and other groups was moved to the Statements of Fiduciary Net Position.

- Unearned revenue and deposits and funds held for others current portion, both of which are components of current liabilities, decreased by a total of \$2.4 million to coincide with the above-mentioned cash that was moved to the Statements of Fiduciary Net Position.
- Endowment investments and the offsetting funds held for others, a component of noncurrent liabilities, each decreased by \$25.9 million as endowment monies belonging to external parties and pooled with System endowment monies were moved to the Statements of Fiduciary Net Position.

For comparison purposes we also restated the FY19 data presented in the Condensed Statements of Net Position shown in Table 3 on page 19.

### Impact of Change in Postemployment Health Plan

The System's Other Postemployment Benefits (OPEB) plan had a significant impact on the FY21 Statement of Net Position, primarily due to two factors: 1) adding a Medicare Exchange option for retirees in addition to the group plan option and 2) investment returns. The total OPEB liability decreased from \$213 million at June 30, 2020 to \$162 million at June 30, 2021, primarily due to these two factors. Assets in the UMS OPEB Trust also increased from \$137 million at June 30, 2020 to \$180 million at June 30, 2021 including \$37 million in investment returns.

For reporting in the System's Condensed Statements of Net Position, the total OPEB liability is netted with the value of the UMS OPEB Trust assets. At June 30, 2021, the System had a net OPEB asset of \$18 million compared with a net OPEB liability of \$76 million (a component of other noncurrent liabilities) at June 30, 2020.

Other lines of the Condensed Statements of Net Position that were significantly adjusted by the FY21 actuarial results include the following:

- Deferred outflows of resources associated with the OPEB plan decreased \$13 million.
- Deferred inflows of resources associated with the OPEB plan increased \$22 million.

The plan benefit change, of offering the Medicare Exchange option, resulted in a \$49 million positive impact to the System's unrestricted net position, restoring a portion of the \$102 million of unrestricted net position that was lost when the full value of the liability associated with the UMS OPEB Plan was brought into the Statements of Net Position in FY17 as the System adopted GASB No. 75, Accounting and Financial Reporting for Postemployment Benefits Other than Pensions.

### **Overview of Condensed Statements of Net Position**

As shown in Table 3, assets and liabilities are classified as current or noncurrent. Current assets are available to satisfy current liabilities, which in turn are those amounts expected to be payable within the next year. Total assets and deferred outflows of resources of \$1.327 billion at June 30, 2021, increased \$105 million, or 9% over the prior year.

The major component of current assets is operating investments, which totaled \$286 million at June 30, 2021 and \$264 million at June 30, 2020. Noncurrent assets consist mainly of endowment investments and capital assets, net of depreciation. Endowment investments totaled \$166 million at June 30, 2021, an increase of \$31 million, or 23%, from the FY20 yearend balance of \$135 million, and a \$28 million, or 20%, increase from FY19. Capital assets net of accumulated depreciation totaled \$689 million and \$683 million at June 30, 2021 and 2020, respectively.

Current liabilities of \$97 million and \$73 million at June 30, 2021 and 2020, respectively, consist primarily of accounts payable and various accrued liabilities including those for the System's healthcare claims, defined contribution retirement plan and payroll taxes. Impacts to accounts payable and accrued liabilities include the timing of the last check cycle for the fiscal year, the level of construction activity in progress, and budget constraints.

At \$227 million, total noncurrent liabilities decreased \$53 million, or 19%, from June 30, 2020 to 2021. This decrease is primarily the result of an \$82 million decrease in other noncurrent liabilities and a \$29 million increase in long-term debt. For FY20 and FY19, the System had total noncurrent liabilities of \$280 million, with the change being a \$11 million increase in noncurrent liabilities and an \$11 million decrease in long-term debt.

Total net position at June 30, 2021 of \$945 million increased \$113 million, or 14%, from the June 30, 2020 balance, which increased \$14 million, or 2%, from the June 30, 2019 balance. Additional information about net position is presented on page 25.

### **Managed Investment Pool (MIP)**

The System pools certain funds for investment purposes including the System's endowment pool monies, endowment monies belonging to the System's affiliated organizations, and monies on behalf of the following entities: the UMS OPEB Trust, Maine Maritime Academy (MMA), and the University of Maine School of Law Foundation.

Chart 4 shows the June 30, 2019, 2020 and 2021 fair values of the MIP investments, including the amounts held on behalf of each entity.

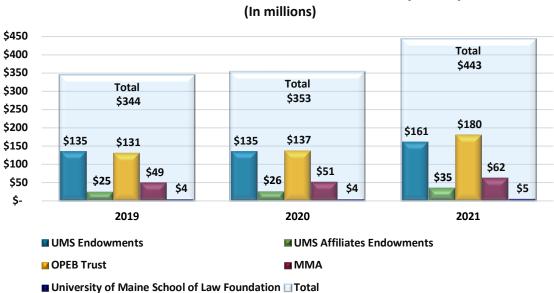

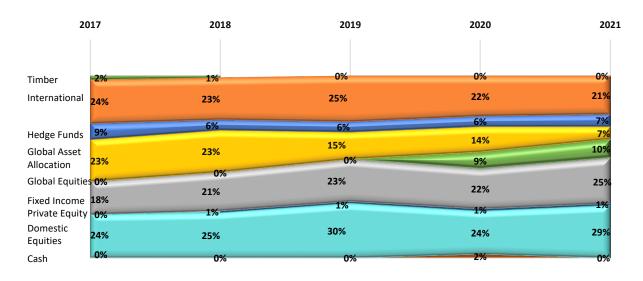

Chart 4: Fair Value of MIP Investments by Entity
(In millions)

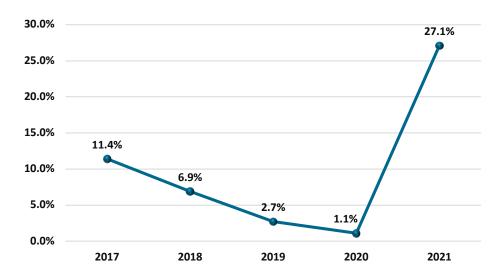

'UMS Endowments' noted in Chart 4 is the System's share of the MIP investments and is included as part of the 'Endowment Investments' noted in the accompanying Condensed Statements of Net Position. The portion of the MIP representing UMS Affiliates' Endowments is included in the Statements of Fiduciary Net Position as 'Investment in UMS endowment pool'. The total of the OPEB Trust, MMA, and the University of Maine School of Law Foundation portions of the MIP are included in the Statements of Fiduciary Net Position as 'Investment in UMS managed investment pool'.

The MIP investments are diversified among a number of asset classes to minimize risk while optimizing return. Chart 5 illustrates the percentage of holdings in each asset class and how they have changed over the past 5 years.

**Chart 5: Asset Allocation Percentages for Managed Investment Pool** 

As shown in Chart 6, in FY21 the MIP realized a net of fees return of 27.1%, up from 1.1% in FY20. The pooled investments have a 5-year annualized net of fees return of 9.5%.

**Chart 6: Total Return (Net of Fees)** 

### **Endowments (Including Affiliates)**

Endowments are generally created from donor gifts or bequests with the funds invested to create present and future income with the original amount of the gift (corpus) retained in perpetuity and are considered restricted non-expendable. If the donor established criteria to determine how the expendable amounts are to be used, such amounts are considered restricted expendable. If the use of expendable amounts is left to the discretion of the System, the endowment income and appreciation are considered unrestricted.

As mentioned in the previous MIP section, the System uses a pooled investment approach for its endowments (unless otherwise specified by the donor) and the endowments of three affiliates. Affiliates investing in the endowment pool include: the University of Maine at Fort Kent Foundation, the University of Southern Maine Foundation, and the John L. Martin Scholarship Fund, Inc.

As shown in Chart 7, the UMS and its affiliates share of these pooled endowment investments had a fair value of \$196 million at June 30, 2021, an increase of \$36 million from the prior year. This included an increase of \$42 million in positive net performance less \$7 million distributed for scholarships and other operating activities.

The pool's June 30, 2020 fair value of \$161 million had increased \$1 million from the 2019 yearend fair value of \$160 million. This increase included endowment contributions of \$5 million plus \$2 million in positive net performance less \$6 million distributed for scholarships and other operating activities.

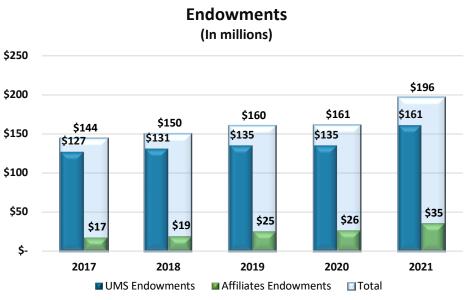

Chart 7: Fair Values of UMS and Affiliates Pooled

Of the \$196 million in pooled endowment investment, \$161 million are UMS Endowments and \$35 million are Affiliates Endowments. The fair value of the UMS Endowments is reported as

part of the 'Endowment Investments' in the accompanying Condensed Statements of Net Position, and the fair value of the Affiliates Endowments is reported in the Statements of Fiduciary Net Position as 'Investment in UMS endowment pool'.

The UMS endowment distribution formula is designed to smooth market volatility. The method uses a 3-year market value average with a percentage-spending rate applied. The spending rate applied in FY17 thru FY21 was 4.5%.

### **Capital Assets and Debt Activities**

Table 4 on the next page shows the status of major capital construction projects as of June 30, 2021 and the related budget approved by the UMS Board of Trustees.

The System's facilities are critical to each university's mission as they provide the physical framework and environment for education, research, cultural programs, and residential life. The System continually evaluates its long-term capital and strategic needs, including which facilities to upgrade, retire, or build. Capital assets are funded with various sources of funds including state bonds, gifts, grants, educational and general funds, and System revenue bonds.

During FY21, the System had capital asset additions of \$50 million, which included \$46 million of construction in progress, and \$4 million of equipment. In FY20, the System had capital asset additions of \$41 million, which included \$31 million of construction in progress, \$5 million of equipment and \$5 million of software.

The System strives to manage all of its financial resources effectively, including the prudent use of debt to finance construction projects that support the System's mission. In May 2021, the System issued \$43 million of bond anticipation notes (BAN) to partially finance UM's Ferland Engineering Education and Design Center project and USM's new residence hall project and new parking garage project both on the Portland campus. These three projects are noted in Table 4. The System anticipates issuing new revenue bonds in the spring of FY22 to pay off the BAN, to refund prior debt, and to finance additional capital projects.

The System's total outstanding debt as of June 30, 2021 was \$167 million, an increase of \$29 million, or 21%, from the FY20 total debt of \$138 million. In FY20, total debt decreased \$12 million, or 8%, from the FY19 total debt of \$150 million.

### **Deferred Outflows and Inflows of Resources**

The System's deferred outflows and deferred inflows of resources primarily relate to the System's defined benefit pension plans and its other postemployment health plan (OPEB). The total of these deferrals can fluctuate significantly from year-to-year depending on changes in assumptions used for the plans, differences between expected and actual experience, and differences between projected and actual earnings on plan investments. To smooth the impact of these changes, they are amortized over a period of years.

At June 30, 2021 deferred outflows of resources totaled \$18 million, a decrease of \$13 million from the prior year balance of \$31 million. The decrease is primarily due to a decrease of \$13 million related to OPEB. In FY20, the System's deferred outflows of resources increased \$9 million from the June 30, 2019 balance of \$22 million, primarily due to a \$9 million increase also related to OPEB.

Deferred inflows of resources of \$58 million at June 30, 2021 increased \$21 million from the \$37 million at June 30, 2020. The increase is primarily due to an increase of \$22 million related to the System's OPEB plan. In FY20, the System's deferred inflows of resources decreased \$7 million from the \$44 million at June 30, 2019, primarily due to a decrease of \$7 million related to the System's OPEB plan.

### **Net Position**

As seen in the Condensed Statements of Net Position shown in Table 3 on page 19, the System's total net position is presented by the below noted four categories.

**Net investment in capital assets** represents the historical cost of the System's capital assets reduced by total accumulated depreciation and outstanding balances of debt attributable to the acquisition, construction, or improvement of those assets. The System's net investment in capital assets was \$550 million at June 30, 2021 and \$547 million at June 30, 2020.

The FY21 increase in net investment in capital assets of \$3 million was comprised of capital asset acquisitions of \$50 million less \$42 million of depreciation expense, less \$2 million of capital asset retirements, less new debt of \$16 million, plus a reduction in debt of \$13 million.

The FY20 increase in net investment in capital assets of \$5 million was comprised of capital asset acquisitions of \$41 million less \$42 million of depreciation expense, less \$1 million of capital asset retirements, less new debt of \$2 million, plus a reduction in debt of \$14 million, less an increase in software licensing agreements of \$3 million with Jaggaer and \$1 million with TouchNet, and less a \$1 million increase in deferred inflows related to the dining contract with Sodexo as the contract was renewed during FY20.

**Restricted-nonexpendable net position** represents the corpus of the System's permanent endowment funds. Items that impact this category of net position include new endowment gifts and fair value fluctuations for those endowments whose fair value has fallen below the endowment corpus. The June 30, 2021 balance of \$69 million increased \$2 million, or 3%, over

the \$67 million at June 30, 2020. For FY20, restricted-expendable net position increased \$1 million, or 2%, from the FY19 year-end balance of \$66 million.

Restricted-expendable net position consists of a variety of funds including unexpended gifts, quasi-endowments and appreciation on true endowments, subject to externally imposed conditions on spending. The restrictions include a variety of purposes including student financial aid, capital asset acquisitions, research, and public service. The June 30, 2021 balance of \$144 million increased \$29 million, or 25% over the June 30, 2020 balance of \$115 million. This increase is primarily attributable to \$25 million of investment performance in excess of endowment income distributed for operations, plus a \$2 million increase in unspent restricted gift balances, a \$1 million increase in MEIF funds and a net \$1 million increase from other managed restricted-expendable funds.

The FY20 net decrease of \$1 million, or 1%, is primarily attributable to a \$4 million increase in unspent restricted gift balances offset by a \$3 million decrease in endowment values as endowment income distributed for operations exceeded actual investment performance.

**Unrestricted net position** is not subject to externally imposed stipulations; however, these resources are critical for the financial stability of the UMS and have been designated by management for specific areas, including operational and capital needs, compensating for operating investment and other budget fluctuations, and benefits costs including covering the risks associated with self-insured plans. Given both the physical and financial size of the System, funds must be readily available to cover various situations including emergency and other unforeseen expenditures, strategic priorities, operating losses, over-expenditures on budgeted items, and benefits costs.

The balance of \$182 million at June 30, 2021 increased by \$79 million, or 77%, from the FY20 year-end balance of \$103 million. For FY20, unrestricted net position increased \$9 million, or 10%, from the FY19 year-end balance of \$94 million.

### STATEMENTS OF REVENUES, EXPENSES, AND CHANGES IN NET POSITION

The Statements of Revenues, Expenses, and Changes in Net Position reports operating revenues, operating expenses, nonoperating revenues (expenses), other changes in net position, and the resulting change in net position for the fiscal year.

### **Reclassification of Prior Year Revenues**

The FY20 financial statements have been restated to reflect a correction in the reporting of grant revenue from the federal Pell student financial aid program. FY20 revenue in the amount of \$37.8 million has been moved from the operating revenues section to the nonoperating revenues (expenses) section of the Statements of Revenues, Expenses, and Changes in Net Position. This classification correction has also been made to the 2019, 2018, and 2017 columns of the Condensed Statements of Revenues, Expenses, and Changes in Net Position shown in Table 5.

### <u>Overview of Condensed Statements of Revenues, Expenses, and Changes in Net Position</u>

Table 5, on the next page, shows Condensed Statements of Revenues, Expenses, and Changes in Net Position for the past five fiscal years ended June 30. The FY21 change in net position of \$113 million was significantly improved over the FY20 change in net position of \$14 million. Primary factors in this shift include the following:

- \$46 million in OPEB income, including a one-time reduction in expense of \$49 million from a change in benefit terms, for FY21 compared with OPEB expense of \$9.5 million for FY22;
- \$13 million increase in net operating investment income; and
- \$34 million increase in market returns for endowment investments.

The FY20 increase in net position of \$14 million was up \$10 million over that for FY19. The coronavirus relief funding of \$15 million was a major factor in this increase, helping to compensate for room and board revenues lost from sending students home early in the spring semester due to the world-wide pandemic.

### **Operating and Nonoperating Revenue**

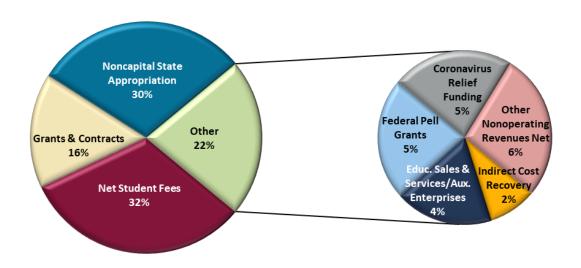

UMS revenues and expenses are categorized as either operating or nonoperating.

- In addition to tuition and fees, the System receives operating revenue from other sources such as governmental and privately funded grants and contracts; gifts from individuals, foundations, and corporations; state appropriations; and investment income.
- Certain significant recurring revenues and expenses are considered nonoperating
  including state noncapital appropriations, federal Pell grants, coronavirus relief funding,
  gifts, endowment return used for operations, investment income, and interest expense.

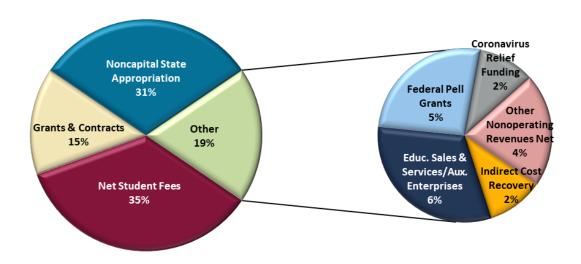

The following pie charts illustrate the total operating and net nonoperating revenue sources used to fund the System's activities for FY21 and FY20.

**Chart 8: Total Operating and Net Nonoperating Revenue** 

2021 - \$738 million

2020 - \$716 million

### Net Student Fees Revenue

Net student fees of \$239 million for FY21 are the largest source of revenues used to fund operating expenses, representing 32% of total operating and net nonoperating revenues. Net student fees of \$248 million for FY20 represented 35% of that year's total operating and net nonoperating revenues.

Net student fees revenue is comprised of tuition and fees and residence and dining fees less scholarship allowances:

- Tuition and fees totaled \$321 million in FY21, increasing \$2 million, or less than 1%, from the prior year. FY20 revenues increased \$6 million, or 2%, from FY19.
- Residence and dining fees of \$40 million in FY21 were down \$12 million, or 23%, compared with FY20 as the COVID-19 pandemic that began in late FY20 continued to impact operations. The System limited the number of students allowed to live on campus during FY21 as part of its emergency response to the continuing pandemic.
   FY20 residence and dining fees decreased \$13 million, or 20%, compared with FY19, primarily attributable to sending students home early during the spring semester as part of the UMS' emergency response to the world-wide COVID-19 pandemic. Approximately 46%, or \$13 million, of the spring semester room and board charges were refunded to
- Scholarship allowances totaled \$122 million in FY21, decreasing \$1 million, or less than 1%, from the prior year. The FY20 scholarship allowances increased \$9 million, or 8%, from FY19.

### Student Financial Aid

the students.

Student financial aid awards are made from a variety of sources including federal, state, private, and university funds. Funding received by the UMS from third parties is recognized as grants and contracts revenue (operating), federal Pell grants revenue (nonoperating) or gift revenue (nonoperating) on the Statements of Revenues, Expenses, and Changes in Net Position while the distribution of aid from all sources is shown as one of two components:

- 1. Scholarship Allowances financial aid retained by the System to cover students' tuition, fees, and on-campus housing and meals. These amounts are reported as a direct offset to operating revenues as a component of the net student fees revenue line.
- 2. Student Aid Expense financial aid refunded to students to cover off-campus living costs, books, and other personal living expenses. These amounts are reported as operating expense.

Federal financial aid awards are based on a student's financial need considering their total cost of education which includes tuition and fees, housing and meals (both on and off campus), books, and other personal living expenses.

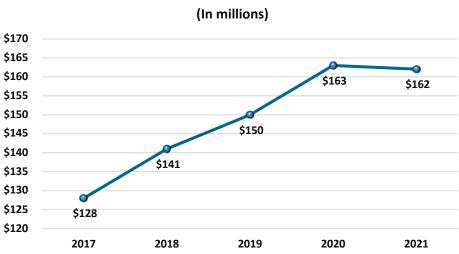

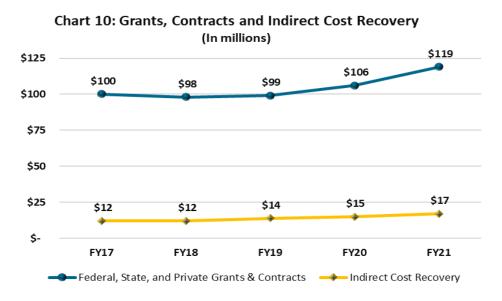

Chart 9: Total Financial Aid

During FY21, total financial aid provided to students was \$162 million, decreasing \$1 million, or less than 1%, from FY20 financial aid of \$163 million. The decrease includes a \$3 million decrease in Pell awards and an increase of \$1 million in FY21 funding from the federal Coronavirus Relief funds which were received for the first time in FY20.

During FY20, total financial aid provided to students was \$163 million, increasing \$13 million, or 9%, over FY19 financial aid of \$150 million. The increase includes \$8 million in FY20 funding from the federal Coronavirus Aid, Relief, and Economic Security Act in response to the COVID-19 pandemic, an increase of \$7 million in institutional unrestricted aid, and a decrease of \$2 million in Pell awards.

### **Grants, Contracts, and Indirect Cost Recovery**

Grants and contracts revenues are recognized to the extent of related expenses. Consequently, reported revenues will fluctuate based on the timing of expenses across fiscal years. The System receives funding from federal, state, and private sources with the majority of funding being provided by the federal government for research activities. State research and development funding is often used to leverage federal dollars.

Grants and contracts operating revenues totaled \$119 million in FY21, increasing \$13 million, or 12%, from FY20. This increase is the net change in funding from over 430 different sponsors. The largest single funding increase was \$1.4 million related to a corporate grant regarding innovative manufacturing techniques related to composites. In all, direct non-SFA Federal funding increased \$6.1 million while direct and pass-through funding from the State increased by \$3.6 million from FY20.

FY20 operating grants and contracts revenues totaled \$106 million, increasing \$7 million, or 7%, from FY19. This increase was the net change in funding from over 400 different sponsors. The largest single funding increase was a \$2 million corporate grant regarding production capability related to composites.

In addition to providing for direct costs, grants and contracts sponsors provide for recovery of Facilities and Administrative (F&A) costs, which are also known as indirect costs. The amount of allowable F&A costs is calculated for each grant and contract using the applicable negotiated rate subject to specific sponsor limitations and other proposal and award conditions. Recovery of indirect costs totaled \$17 million for FY21, increasing \$2 million from FY20. Recovery of indirect costs totaled \$15 million for FY20, which was an increase \$1 million from FY19.

### **Noncapital State of Maine Appropriations**

State noncapital appropriation revenue includes amounts for general operations and amounts legislatively earmarked for research and development, financial aid, and various other areas. Although not considered operating revenue under GASB reporting requirements, the noncapital state appropriation was the second largest funding source for educational and general operations behind net student fees.

As shown in Chart 11, the System received \$218 million in noncapital state appropriation revenue during FY21, down \$2 million, or 0.9% from FY20. The System received \$220 million in noncapital state appropriation revenue during FY20, up \$8 million, or 3.8%, from FY19.

At \$218 million, noncapital state appropriation revenue covered 80% of the \$274 million operating loss in FY21, up from the operating loss coverage level of 73% in FY20.

### **Coronavirus Relief Funding**

The coronavirus relief funding of \$36.6 million and \$15.5 million for FY21 and FY20, respectively includes both a federal component and a state component.

### **Federal Funding**

In response to the COVID-19 pandemic that began in March 2020, the federal government signed into law various acts to provide economic relief to the nation, including higher education. The U.S. Department of Education has awarded the System a total of \$103.7 million under the following acts:

- Coronavirus Aid, Relief and Economic Security (CARES) Act \$17.9 million awarded in FY20.
- Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act \$31.7 million awarded in FY21.

• American Rescue Plan (ARP) Act - \$54.1 million awarded in late FY21.

Under these acts, the System received total awards of \$44.7 million to use for emergency aid to students and total awards of \$59 million to use for various other pandemic related costs including reimbursement of FY20 refunded room and board revenues and recovery of lost revenues.

In the accompanying financial statements, the System has recognized revenue from the above federal awards in accordance with GASB guidance. Under this guidance, revenue recognition does not necessarily correlate with the same fiscal year that the System applied allowable costs against the awards. For example, some of the FY21 revenue recognized in the accompanying financial statements related to costs applied against the federal awards in FY20. Also, certain costs applied against the federal awards in FY21 will not be recognized as revenue until FY22.

FY21 federal coronavirus relief funding revenue totals \$29.3 million and is related to the following costs:

- Emergency awards made to students in FY21 \$9.0 million
- Reimbursement of FY20 room and board refunds \$5.5 million
- Recovery of lost FY21 lost revenues \$13.6 million
- Other pandemic related costs \$1.2 million

FY20 federal coronavirus relief funding revenue totals \$15.5 million and is related to the following costs:

- Emergency awards made to students in FY20 \$8.2 million
- Reimbursement of FY20 room and board refunds \$7.2 million
- Other pandemic related costs \$100 thousand

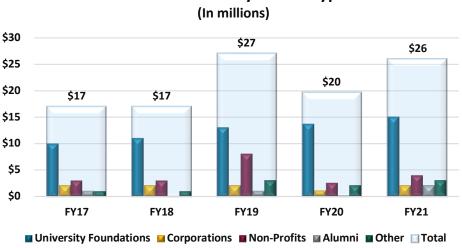

### **State Funding**

During FY21, the System was awarded \$14.9 million in coronavirus relief from the State of Maine to be used for COVID-19 testing costs, personal protective equipment, and quarantine related costs. The System has recognized coronavirus relief funding revenue from this award in the amount of \$7.3 million for FY21.

### Cash Gifts

As shown in Chart 12, total cash gifts of \$26 million received in FY21 were up \$6 million from the prior year. FY21 gifts from university foundations, corporations, non-profits, and other donor types each increased \$1 million, while alumni gifts increased \$2 million. FY20 gifts from the non-profits decreased \$5 million, and corporations, alumni gifts, and other donor types each decreased \$1 million.

Of the \$26 million in gifts received in FY21, 85% were restricted, 10% were endowed, and 5% were unrestricted. Of the \$20 million in gifts received in FY20, 95% were restricted, 4% were endowed, and 1% were unrestricted.

**Chart 12: Gifts by Donor Type** 

### **Operating Expenses**

Table 6 shows expenses on a functional basis while Table 7 shows expenses by natural classification.

Table 6: Operating Expenses by Functional Classification For the Years Ended June 30

<b>Total Operating Expenses</b>	679	99%	716	99%	724	99%	692	99%	668	99%
Nonoperating:										
Interest	4	1%	4	1%	4	1%	4	1%	5	1%
Total Expenses	\$683	100%	\$720	100%	\$728	100%	\$696	100%	\$673	100%

Compensation costs were \$336 million in FY21, up 1.5% from the FY20 total of \$331 million while FY21 benefits totaled \$87 million, down 33% from the FY20 total of \$129 million. The FY21 decrease in benefits is primarily related to the changes in the System's OPEB plan noted on page 17. Compensation costs for FY20 saw an increase of 2.8% over the FY19 total of \$322 million and FY20 benefits were down 7% from the FY19 total of \$139 million.

### STATEMENTS OF CASH FLOWS

The Statements of Cash Flows examines the changes in cash position for each year of operations. Its primary purpose is to provide relevant information about the cash receipts and cash payments of the System during the fiscal year. These statements help users assess the System's ability to generate future cash flows, its ability to meet obligations as they become due, and its need for external financing.

### STATEMENTS OF FIDUCIARY NET POSITION

The Statements of Fiduciary Net Position present assets that the System holds in a fiduciary or trustee capacity on behalf of various external entities and groups, including the following:

- UMS OPEB Trust
- UMS Defined Benefit plan
- Maine Maritime Academy
- University of Maine School of Law Foundation
- University of Maine at Fort Kent Foundation

- University of Southern Maine Foundation
- John L. Martin Scholarship Fund, Inc.
- Student government groups

As shown in the Condensed Statements of Fiduciary Net Position in Table 8, the System holds a total of \$310 million in assets on behalf of the above noted entities. The vast majority of these assets are in the form of pooled investments, representing investment in the System's MIP, either directly or indirectly through the UMS Endowment Pool. See the discussion of the UMS' Managed Investment Pool and Endowments on pages 19 and 22, respectively for more information about these investments.

The Statements of Fiduciary Net Position also present liabilities and net position associated with the assets held on behalf of the external entities.

Table 8: Condensed Statements of Fiduciary Net Position as of June 30 (In millions)

### STATEMENTS OF CHANGES IN FIDUCIARY NET POSITION

The Statements of Changes in Fiduciary Net Position show the fiscal year changes in the net position associated with assets held on behalf of the external entities noted in the prior discussion of the Statements of Fiduciary Net Position.

### STRATEGIC VISION AND PRIORITIES

### <u>Unified Accreditation & Strategic Planning</u>

UMS's unified accreditation, effective since July 1, 2020, opens the door to previously unavailable strategic opportunities for the System's universities to collaborate, share resources, and achieve educational efficiencies to better serve their students and the State of Maine. System leadership and representatives from all System universities and Maine Law are fully engaged in the significant work of preparing a self-study assessment report for the New England Commission of Higher Education (NECHE) in connection with NECHE's planned Fall 2022 comprehensive evaluation of the System's unified accreditation. RecognizTing that this work is ongoing, the Board recently charged the Chancellor to lead the System in the creation of a new UMS strategic plan. The UMS strategic planning process and resulting Strategic Plan will be informed by the NECHE unified accreditation self-study, Fall 2022 comprehensive evaluation visit and report, and the NECHE Standards for Accreditation.

### The Maine Jobs and Recovery Plan – University Funding Allocation

The federal American Rescue Plan provided relief funding for states including a \$1.13 billion allocation to the State of Maine for discretionary use by the Governor and Legislature to respond to the pandemic and support economic recovery. The passage of the Administration's Maine Jobs and Recovery Plan identifies priorities for using these funds including \$35 million to be invested in critical university workforce infrastructure and experience opportunities thereby advancing economic recovery and Maine's 10-year strategic plan. These resources will accelerate talent development, research and innovation and the long-term economic growth and global competitiveness of Maine that responds to the COVID-19 public health emergency. Students will experience greater opportunities for exploratory learning, paid internships, and career preparation programs connected to the Maine workforce.

### **Harold Alfond Foundation Investment**

Last fall, the Harold Alfond Foundation announced an historic \$240 million investment over 12 years in the System. This extraordinary grant will support transformative changes in student success and retention, engineering, graduate and professional education, Division 1 athletics and gender equity at the state's largest educational, research, innovation and talent development asset.

### **Other Capital Investments**

Improving the System's capital infrastructure is a strategic imperative with more than 50 percent of UMS's physical plant constructed or last renovated more than 50 years ago. Greater investment in our facilities and innovative partnerships are part of our plan.

Earlier this year UMS Trustees authorized expending funds to develop the 580-bed Portland Commons affordable student housing residence hall project and the career and student success center on USM's Portland campus. The campus development project is part of a series of proposed housing initiatives that the System is exploring to bring more beds to campuses in addition to Portland. Further, USM's new career and student success center will attract, retain, and prepare more career-ready college graduates for the Maine workforce.

Trustees also gave initial approval for UM to enter into a public-private partnership to repurpose two costly and currently unusable historic buildings on the Orono campus into a boutique hotel. An on campus facility of this nature will serve people attending academic conferences, cultural and athletic events, homecomings, commencements, and other functions, and may serve as a base of experiential learning opportunities for UMS students in tourism and hospitality programs.

In addition, Trustees approved funds at UMPI to renovate Weiden Hall to meet needs of the Owls' athletic program and build enrollment in health-related academic programs and at UMA to create a hub for student spaces, admissions, advising, registrar and financial aid. The Board also authorized UMS to negotiate and execute a lease agreement for an interim home for the Law School and the Maine Center in downtown Portland, saving the need to spend far greater amounts to shore up the current law school building, which has fallen into obsolescence. These are just some of the exciting projects taking place throughout our System with more to come.

### **University Credit Rating**

The System routinely issues revenue bonds for its capital needs and S&P Global Ratings (S&P) reviews the credit worthiness of the System and its debt. In August 2021, S&P affirmed its AArating with a stable outlook for the UMS' revenue bonds, reflecting the strength of UMS' available resources for the rating category relative to medians and peer institutions. The stable outlook placed UMS ahead of the negative outlook for the not-for-profit higher education sector. In its overview, S&P assessed UMS' enterprise profile as strong, characterized by our breadth and depth of institutions and assessed our financial profile as very strong while noting significant future debt plans as a limiting factor. The revenue bonds are secured by a broad pledge of the System's available resources.

The State of Maine also periodically provides debt service and other capital support like its cumulative \$50 million commitment towards the construction of the Ferland Engineering Education and Design Center at the UM. This commitment is being fulfilled with annual payments to the System, which began in FY19 and extend through FY29.

UNIVERSITY OF MAINE SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 2021 AND 2020 (IN THOUSANDS)

## 1. SIGNIFICANT ACCOUNTING POLICIES

## a. Organization

The University of Maine System ("the System"), a discretely presented component unit of the State of Maine, consists of seven universities, eight centers, and a central administrative office. All activities of the System are included in the accompanying financial statements, including those of its discretely presented component unit, the University of Maine Foundation, which is a not-for-profit entity controlled by a separate governing board whose goal is to support the System (see Note 16). The component unit receives funds primarily through donations and contributes funds to the System for student scholarships and institutional support.

#### **b.** Basis of Presentation

The accompanying financial statements of the System have been prepared using the economic resources measurement focus and the accrual basis of accounting in accordance with U.S. generally accepted accounting principles (GAAP), as prescribed by the Governmental Accounting Standards Board (GASB).

Under the System's policy, operating activities in the Statements of Revenues, Expenses, and Changes in Net Position are those that generally result from exchange transactions such as payments received for services and payments made for the purchase of goods and services and certain grants. Certain other transactions are reported as nonoperating activities in accordance with GASB Statement No. 35, Basic Financial Statements – and Management's Discussion and Analysis – for Public Colleges and Universities. These nonoperating activities include the System's noncapital appropriations from the State of Maine, federal pell grants, coronavirus relief funding, gifts currently expendable, endowment return used for operations, net investment income, and interest expense.

In FY21 the System adopted GASB Statement No. 84, *Fiduciary Activities* (GASB No. 84). This statement addresses accounting and financial reporting related to the System's fiduciary funds and activity. This statement establishes criteria for identifying fiduciary activities and describes four fiduciary funds that should be reported, if applicable: (1) pension (and other employee benefit) trust funds, (2) investment trust funds, (3) private-purpose trust funds, and (4) custodial funds. Custodial funds generally should report fiduciary activities that are not held in a trust or equivalent arrangement that meets specific criteria.

Under GASB No. 84, fiduciary activities are reported in the fiduciary fund financial statements of the basic financial statements. The Statements of Fiduciary Net Position is used to report the assets, deferred outflows of resources, liabilities, deferred inflows of resources,

and fiduciary net position of pension (and other employee benefit) trust funds, investment trust funds, private-purpose trust funds, and custodial funds. The Statement of Changes in Fiduciary Net Position is used to report additions to and deductions from identified fiduciary funds. The System adopted the provisions of GASB No. 84 retroactive to July 1, 2019, and has restated its FY20 financial statements in accordance with the provisions of GASB No. 84. The adoption of GASB No. 84 is described further in Note 18.

#### c. Fiduciary Funds

The System holds these funds on behalf of other entities as a trustee or fiduciary. The System is responsible for ensuring such assets are used only for their intended purposes and by those to whom the assets belong.

The System reports its fiduciary funds in the following financial statements that accompany these notes.

**Statements of Fiduciary Net Position** – Presents the assets held by the System in a fiduciary capacity as of June 30 along with the related deferred outflows of resources, liabilities, deferred inflows of resources, and net position.

**Statements of Changes in Fiduciary Net Position** – Presents the components of the fiscal year change in net position of the fiduciary funds.

The System's fiduciary financial statements include the following types of fiduciary funds:

**Pension and Other Employee Benefit Trusts** – These funds include the assets associated with the System's Defined Benefit Plan for classified employees and its OPEB health plan.

**External Investment Pools** – These are a type of custodial fund and represent amounts invested by external parties in the System's management investment and endowment pools.

**Other Custodial Funds** – These custodial funds are held on behalf of various student government groups.

#### d. Net Position

The accompanying Statements of Net Position present the System's net position (assets plus deferred outflows of resources less liabilities and deferred inflows of resources) in the following four categories:

**Net investment in capital assets:** Capital assets, net of accumulated depreciation and outstanding principal balances of debt attributable to the acquisition, construction, repair or improvement of those assets. It also includes the premiums/discounts related to the outstanding debt. This category excludes the portion of debt attributable to unspent bond proceeds.

**Restricted – nonexpendable:** Net position subject to externally imposed conditions that the System maintain them in perpetuity. Such net position includes the historical gift value of restricted true endowment funds. In the event that market fluctuations have caused the fair value of an endowment to fall below corpus, the related net position is valued at the lower fair value amount.

**Restricted** – **expendable:** Net position subject to externally imposed conditions that can be fulfilled by the actions of the System or by the passage of time. Such net position includes the accumulated net gains on true endowment funds, restricted gifts and income, and other similarly restricted funds.

**Unrestricted:** All other categories of net position. Unrestricted net position may be committed by actions of the System's Board of Trustees.

The System has adopted a policy of generally utilizing restricted – expendable resources, when available, prior to unrestricted resources.

#### e. Cash and Cash Equivalents

The System considers all highly liquid investments (including restricted assets) with a maturity of three months or less when purchased to be cash equivalents.

## f. Investments

All investments are reported at fair value except for the state pool, which is reported at amortized cost. System management is responsible for the fair measurement of investments reported in the financial statements. The System has implemented policies and procedures to assess the reasonableness of the fair values provided and believes that reported fair values at the Statements of Net Position dates are reasonable.

**Pooled Third party investments:** Three outside entities, the UMS Other Postemployment Benefit (OPEB) Trust, Maine Maritime Academy and the University of Maine School of Law Foundation, pool monies with the System's endowment pool. Investment performance results of these pooled monies are allocated on a pro rata basis based on the number of pool shares held by each entity. Contributions to and withdrawals from the pool are allowed only on the first business day of a calendar quarter.

Investment of these monies follows guidelines approved by the System's Board of Trustees Investment Committee. These guidelines are further disclosed in the remainder of this Note and Note 3 to these financial statements as part of the discussion of endowments.

**Endowment**: The System follows the pooled investment concept for its endowed funds, whereby all invested funds are included in one pool, except for funds that are separately invested as directed by the donor. Investment income is allocated to each endowed fund in the pool based on its pro rata share of the pool.

The income produced by the fund, including realized and unrealized gains, can be used to meet the spending objective. As determined by policy, the expendable income objective was 4.5% for FY21 and FY20. The percentage was applied to a 3-year market value average to determine expendable income.

Under State of Maine law, subject to the intent of a donor expressed in the gift instrument, an institution may appropriate for expenditure or accumulate so much of an endowment fund as the institution determines is prudent for the uses, benefits, purposes and duration for which the endowment fund is established. The System's policy is to spend endowment appreciation to the extent of the approved annual spending rate while not invading corpus. The return (loss) net of the amount used for operations is presented as Other Changes in Net Position in the Statements of Revenues, Expenses and Changes in Net Position.

**Authorized Investment Vehicles - Operating Investments:** The System has a three-tiered approach regarding its operating investments:

- Liquidity Pool The purpose of this pool is to meet the day-to-day obligations of the
  System. It consists of funds that are invested in a portfolio of highest quality short-term
  fixed-income securities (e.g., Treasury obligations, agency securities, repurchase
  agreements, money market funds, commercial paper, and/or short-term bond mutual
  funds) with adequate liquidity. The average quality of the pool will be rated at least "A-1"
  by Standard and Poor's (or equivalent).
- Income Pool The purpose of this pool is to provide sufficient income to meet budgetary goals and provide additional diversification to minimize downside risk. This pool invests in a diversified portfolio which may include items such as, but not limited to, fixed income securities, Federal Deposit Insurance Corporation insured or adequately collateralized certificates of deposit (CDs), or unconstrained, short or intermediate term bond funds with a normal average duration of -2 to 7 years. The pool may invest in funds rated from BB to AAA quality. The overall average quality rating of this pool will be at least "A-" by Standard and Poor's (or equivalent).
- Total Return Pool This pool is expected to add diversification and growth to the portfolio
  and may invest in diversified assets made up of, but not limited to, equities, hedge funds,
  and global asset allocation mandates.

**Authorized Investment Vehicles - Endowment Investments:** The fund is diversified both by asset class and within asset classes. To have a reasonable probability of consistently achieving the Fund's return objectives, the following asset allocation policy ranges were applicable as of June 30, 2021 and 2020:

	2021	2020
Equity securities	49-69%	45-65%
Fixed income securities	16-36%	15-35%
Other	5-25%	10-30%
Cash	0-10%	0-10%

**Authorized Investment Vehicles - Deposits with Bond Trustees**: These monies are invested in accordance with the governing bond resolutions and arbitrage certificates.

## g. Gifts and Pledges

Gifts are recorded at their fair value at the date of gift. Promises to donate to the System are recorded as receivables and revenues when the System has met all applicable eligibility and time requirements. Gifts and bequests to be used for endowment purposes are categorized as endowment gifts. Other gifts are categorized as currently expendable. Pledges receivable are reported net of amounts deemed uncollectible and after discounting to the present value of the expected future cash flows. Since the System cannot fulfill the time requirement for gifts to endowments until the gift is received, pledges to endowments are not reported. Because of uncertainties with regard to their realizability and valuation, bequests and intentions to give and other conditional promises are not recognized as assets until the specified conditions are met.

#### h. Grants and Contracts and Capital Appropriations

The System records a receivable and corresponding revenue for grants and contracts and capital appropriations at the point all eligibility requirements (e.g., allowable costs are incurred) are met.

#### i. Inventories

Inventories are stated at cost. Cost is determined using the first-in, first-out method or the average-cost method.

## j. Capital Assets

Capital assets which include property, plant, equipment, intangible assets and library holdings are recorded at cost when purchased or constructed and at acquisition value at date of donation. Costs for maintenance, repairs and minor renewals and replacements are expensed as incurred; major renewals and replacements are capitalized.

Prior to July 1, 2003, library materials were generally capitalized and depreciated over a ten-year period. Effective July 1, 2003, the System began to expense library materials as incurred. The System will retain the undepreciated library materials balance as a core non-depreciating asset.

The System does not capitalize and depreciate its collections of historical treasures and works of art because it is the System's policy that:

- Works of art and historical treasures are to be held for public exhibition, education, or research in furtherance of public service, rather than for financial gain.
- Works of art and historical treasures are to be protected, kept unencumbered, cared for, and preserved.
- Proceeds from sale of works of art and historical treasures are to be used to acquire other items for the collections.

A capitalization threshold of \$50 is used for buildings, building additions and improvements, land improvements and internally generated intangibles. Equipment (including equipment acquired under capital leases) and purchased software are capitalized with a unit cost of \$5 or more. These assets, with the exception of land, are depreciated and amortized using the straight-line basis over the estimated useful lives of the related assets, which range from 4 to 60 years.

## k. Irrevocable Split-Interest Agreements

The System's irrevocable split-interest agreements consist of the System's remainder interest in trusts held by third parties. The System reports these irrevocable split-interest agreements as assets and deferred inflows of resources when it becomes aware of the agreement and has sufficient information to measure its beneficial interest. The System recognizes the annual change in the fair values of the split interest agreements as an increase or decrease in the asset and the related deferred inflows of resources. The System will recognize revenue at the termination of the agreement, as stipulated in the irrevocable split-interest agreement. Also, at the termination of the agreement, the split-interest asset and the related deferred inflow of resources will be eliminated.

## **I. Unearned Revenue and Deposits**

Unearned revenue and deposits in the Statements of Net Position consists primarily of grant and contract advances and deposits and advance payments received for tuition and fees related to certain summer programs and tuition received for the following academic year. Unearned revenue for summer programs is presented net of waivers. Other expenses related to unearned revenue for summer programs are presented as prepaids in the Statements of Net Position (e.g., scholarships, supplies).

### m. Compensated Absences

Employees earn the right to be compensated during absences for annual vacation leave. The accompanying Statements of Net Position reflect an accrual for the amounts earned, including related benefits ultimately payable. The System accounts for the vacation leave hours on a last-in, first-out basis. A portion of this liability is classified as current and represents the System's estimate of vacation time that will be paid during the next fiscal year to employees leaving the System.

## n. Deferred Outflows and Deferred Inflows of Resources

Deferred outflows of resources are the consumption of assets or increase in liabilities that is applicable to future reporting periods. Deferred outflows of resources are presented separately after Total Assets in the Statements of Net Position.

The System's deferred outflows consist of:

- 1. The difference between the reacquisition price and the carrying value of refunded revenue bonds. These amounts are to be recognized as a component of interest expense over the shorter of the remaining life of the refunded bonds or the life of the new bonds.
- 2. Assumption and experience changes and net investment losses that increase the pension and OPEB liabilities. These amounts are to be recognized as components of pension and postemployment health expense in future reporting periods.

Deferred inflows of resources are the acquisition of assets or reduction of liabilities that is applicable to future reporting periods. Deferred inflows of resources are presented separately after Total Liabilities in the Statements of Net Position.

The System's deferred inflows of resources consist of:

- Assumption and experience changes and net investment gains that reduce the pension and OPEB liabilities. These amounts are to be recognized as components of pension and postemployment health expense in future reporting periods.
- 2. The unamortized balances of a service concession arrangement with Sodexo America, LLC that provided the System with equipment, facility improvements, and a signing bonus. These amounts will be recognized as revenue over the life of the agreement.
- 3. An offsetting credit to the fair value of the System's remainder interest in irrevocable split-interest agreements. These deferrals will be recognized as gift income at the termination of the split-interest agreement.

#### o. Net Student Fees

Student tuition, dining, residence, and other fees are presented net of scholarships and fellowships applied to students' accounts. Certain other scholarship amounts are paid directly to, or refunded to, the student and are generally reflected as student aid expense.

#### p. Tax Status

The System is exempt from income taxes under Section 115 of the Internal Revenue Code ("the Code") as a governmental entity. It is also recognized by the Internal Revenue Service as an organization described in Section 501(c)(3) of the Code.

### q. Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. The most significant estimates in the financial statements include liabilities for self-insured plans, pension and other retirement benefit obligations, as well as allowances for uncollectible receivables. Actual results could differ from those estimates.

## r. Reclassifications

Certain FY20 items in the accompanying financial statements have been reclassified, without effect on total net position, to conform to the FY21 presentation. The most significant change was the reclassification of federal Pell grant revenue from the operating revenues section of the Statements of Revenues, Expenses and Changes in Net Position to the nonoperating revenues section.

#### 2. CASH AND CASH EQUIVALENTS

Custodial credit risk is the risk that in the event of bank failure, the System's deposits, including those held in a fiduciary capacity, may not be returned. Deposits are considered uninsured if they are not covered by depository insurance and are (a) uncollateralized, (b) collateralized with securities held by the pledging financial institution, or (c) collateralized with securities held by the pledging financial institution's trust department or agent but not in the System's name. The System's policy is that with the exception of daily operating cash, it will carry no deposits that are uncollateralized or uninsured. As of June 30, 2021 and 2020, bank balances with uninsured or uncollateralized operating cash deposits were \$1,156 and \$726, respectively.

#### 3. INVESTMENTS

#### a. Composition and Fair Value Measurements

## **Composition and Purpose of Investments:**

The System uses a pooled investment approach for its endowments (including Affiliates' endowments invested with the System) unless otherwise required by the donor. As previously noted, three outside entities - the UMS OPEB Trust, Maine Maritime Academy, and the University of Maine School of Law Foundation - pool monies for investment purposes with the System's endowment. Investment policies and strategies are determined for this combined Managed Investment Pool (MIP). Fair values, credit ratings, and interest rate risk for the entire investment pool are presented below under "DB Plan and MIP investments". The amount held for the three outside entities are shown as "MIP held on behalf of outside entities".

**Operating Investments:** The System's operating investments are available to fund operations or other purposes as determined by System management.

**Deposits with Bond Trustees**: Deposits with bond trustees are composed of unexpended bond proceeds from bond issuances, bond anticipation notes and escrow accounts associated with the System's lease-purchase program.

**Endowment Investments:** Except for certain gifts invested separately at the request of the donors (\$716 and \$491 at June 30, 2021 and 2020, respectively), the System's endowment is managed as a pooled investment fund using external investment managers. The University of Maine at Fort Kent Foundation, the University of Southern Maine Foundation, and the John L. Martin Scholarship Fund, Inc. participate in the System's endowment pool through a management agreement. The fair values of the investments held for these affiliated organizations at June 30, 2021 and 2020, respectively are \$35,190 and \$25,857, and are reported as investments in the UMS endowment pool in the accompanying Statements of Fiduciary Net Position.

Endowed gifts are invested to generate income to be used to fund various activities such as scholarships and research as specified by the donors. The total endowment accumulated net income and appreciation available to the System for spending is as follows at June 30:

	2021	2020
Restricted - expendable	\$76,199	\$51,028
Unrestricted	20,697	16,754
Total available for spending	\$96,896	\$67,782

Investments for the Defined Benefit Plan – Classified Employees: These pension plan investments offset the Total Pension Liability of the System's Defined Benefit Plan – Classified Employees (DB Plan) described in Note 13d. They are managed by the System and their fair values, credit ratings, and interest rate risk are presented below in the "DB Plan and MIP investments".

## Fair Value Measurements:

GASB Statement No. 72, Fair Value Measurement and Application (GASB No. 72), defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the entity's principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. GASB No. 72 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value, and describes three levels of inputs that may be used to measure fair value:

- Level 1. Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the entity has the ability to access as of the measurement date. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant degree of judgement.
- Level 2. Valuations based on significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.
- Level 3. Valuations based on inputs that are unobservable and significant to the overall fair value measurement. They reflect an entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The above hierarchy is based on the valuation inputs used to measure the fair value of the asset and gives the highest priority to level 1 measurements and the lowest priority to level 3 measurements. Investments that are measured at fair value using net asset value (NAV) per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

The System measures the fair value of investments in certain entities that do not have a quoted market price at the calculated NAV per share or its equivalent. As these investments are not readily marketable the estimated value is subject to uncertainty, and therefore, may differ from the value that would have been used had a ready market for the investments existed.

The System's operating investments and deposits with bond trustees were composed of the following at June 30, 2021:

		Fair Value Measurements Using: Cr		Credit						
	Total		Level 1	Leve	2	Lev	el 3	Rating	In	terest Rate Risk

Additional information for investments measured at NAV at June 30, 2021 and 2020 is as follows:

<sup>&</sup>lt;sup>1</sup> Multi-strategy funds: Includes investments in equities and limited partnerships. Limited partnerships may invest in pooled vehicles in global equities, fixed income instruments, currencies, commodities; long and short positions with respect to bonds, leveraged loans, trade claims and other investments; or other hedge funds with objectives to outperform certain benchmarks. Fair values of these investments are completed on a monthly or quarterly basis using other significant direct or indirect observable inputs or recent observable transaction information for similar investments. Includes investments in liquidation status awaiting final distributions.

<sup>&</sup>lt;sup>2</sup> Bank loans: Investments in these funds include floating rate loans in a diverse set of industries and are traditionally rated below investment grade. Other observable inputs determine fair value of this investment.

#### b. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The System's policy for managing interest rate risk is as follows:

**Operating Investments:** To limit interest rate exposure, the System diversifies its investments as specified in Note 1.f.

**Endowment Investments:** To limit interest rate exposure, the endowment investment policy restricts the average effective duration of the fixed income portfolio to no more than 1 year from the duration of the applicable benchmark (e.g., the Barclays Capital Aggregate Bond Index was 6.61 years and 6.01 years at June 30, 2021 and 2020, respectively).

Investments for the Defined Benefit Plan – Classified Employees: To limit interest rate exposure, the defined benefit plan investment policy restricts the average effective duration of the fixed income portfolio to no more than 1 year from the duration of the applicable benchmark (e.g., the Barclays Capital Aggregate Bond Index was 6.61 years and 6.01 years at June 30, 2021 and 2020, respectively).

## c. Foreign Currency Risk

**Operating Investments:** The System's operating investments include various fixed income, equity, and hedge fund holdings that have foreign currency exposure, with some funds hedging against foreign currency risk. Portfolio foreign currency exposure was \$6,622 and \$21,712 at June 30, 2021 and 2020, respectively.

**Endowment Investments:** The System's endowments are invested in the System MIP. The MIP invests in various fixed income, equity, and hedge funds which have foreign currency exposure, with some funds hedging against foreign currency risk. The endowment investments share of the foreign currency exposure in the MIP was \$ 54,847 and \$ 61,865 at June 30, 2021 and 2020, respectively. This includes \$9,822 and \$9,972 at June 30, 2021 and 2020, respectively, for investments held for affiliated organizations.

*Investments for the Defined Benefit Plan – Classified Employees:* Pension investments include various fixed income, equity, and hedge fund holdings that have foreign currency exposure, with some funds hedging against foreign currency risk. Portfolio foreign currency exposure was \$4,956 and \$9,095 at June 30, 2021 and 2020, respectively.

## d. Investment Income

Income related to the **System's investments** and reported in the accompanying Statements of Revenues, Expenses and Changes in Net Position is as follows:

See Note 13d for investment returns related to the **Defined Benefit Plan – Classified Employees**.

## 4. ACCOUNTS, GRANTS, AND PLEDGES RECEIVABLE

Accounts, grants, and pledges receivable include the following at June 30:

		2021						
	Total	Current Portion		ncurrent Portion	Total	Current Portion		ncurrent ortion
Student and other accounts receivable	\$45,729	\$45,236	\$	493	\$38,798	\$38,362	\$	436
Grants receivable	51,705	48,530		3,175	28,587	25,642		2,945
Pledges receivable	528	106		422	2,086	1,794		292
Total gross receivables	97,962	93,872		4,090	69,471	65,798		3,673
Less allowance for doubtful accounts	(19,233)	(19,225)		(8)	(13,492)	(13,486)		(6)
Less discount on pledges receivable	(13)	-		(13)	(7)	-		(7)
Total receivables, net	\$78,716	\$74,647	\$	4,069	\$55,972	\$52,312	\$	3,660

In accordance with GASB Statement No. 35, grants receivable related to the acquisition of capital assets is reported as a noncurrent receivable even though collection is expected within the next twelve months.

## 5. NOTES AND LEASES RECEIVABLE

Notes and leases receivable include the following at June 30:

		2	021				2	020		
		Curi	rent	No	ncurrent	Current Noncuri				ncurrent
	Total	Por	tion	F	ortion	Total	Por	tion	P	ortion
Perkins loans	\$15,355	\$	-	\$	15,355	\$19,804	\$	-	\$	19,804
Nursing loans	2,141		-		2,141	2,240		-		2,240
Institutional loans	11,145		-		11,145	10,749		-		10,749
Lease receivable (a)	500		63		437	563		63		500
Total notes and leases receivable	29,141		63		29,078	33,356		63		33,293
Less allowance for doubtful accounts	(885)		-		(885)	(1,142)		-		(1,142)
Total notes and leases receivable, net	\$28,256	\$	63	\$	28,193	\$32,214	\$	63	\$	32,151

Collections of the notes receivable for Perkins, Nursing, and Institutional loans may not be used to pay current liabilities, as the proceeds are restricted for making new loans. Accordingly, these notes receivable are recorded in the accompanying Statements of Net Position as noncurrent assets.

(a) Lease receivable consists of a lease with the University of New Hampshire, secured by equipment with monthly payments of \$5, including interest at 4.85% per annum. The lease matures in 2029.

## 6. CAPITAL ASSETS

Capital asset activity for the year ended June 30, 2021 is as follows:

Total capital assets	\$	684,957	\$ (1,238)	\$	-	\$ (54	5) \$	\$ 683,173

#### 6. CAPITAL ASSETS - CONTINUED

As of June 30, 2021 and 2020, \$34,179 and \$5,755, respectively, in proceeds from debt issuances remain unspent. These amounts are included in the accompanying Statements of Net Position as part of deposits with bond trustees along with amounts restricted for debt service.

Also remaining unspent as of June 30, 2021 and 2020 is \$33,401 and \$41,057, respectively, in capital appropriations awarded by the State of Maine. These amounts are not included in the accompanying financial statements because the System has not met all eligibility requirements (e.g., incurred costs).

Both the debt proceeds and capital appropriation monies are earmarked for specific projects, most of which are capital construction projects. As monies are spent on these projects, the costs are included in capital assets in the accompanying Statements of Net Position.

Outstanding commitments on uncompleted construction contracts totaled \$52,403 and \$21,289 at June 30, 2021 and 2020, respectively.

#### 7. ACCRUED LIABILITIES AND LONG-TERM DEBT

Changes in accrued liabilities and long-term debt during the year ended June 30, 2021 include the following:

## a. Lease Obligations

The System leases certain equipment and real estate under leases with terms exceeding one year. Future minimum lease payments under capital leases and under non-cancelable operating leases (with initial or remaining lease terms in excess of one year) as of June 30, 2021 are as follows:

<b>Year Ending</b>	Capital Leases				O	perating		
June 30:	Pr	Principal Interest			Leases	Total		
2022	\$	162	\$	63	\$	245	\$	470
2023		169		56		239		464
2024		177		48		237		462
2025		185		40		239		464
2026		193		32		239		464
2027-2031		583		42		1,246		1,871
2032-2036		-		-		659		659
2037-2041		-		-		131		131
Total minimum								
lease payments	\$	1,469	\$	281	\$	3,235	\$	4,985

The rent expense related to operating leases amounted to \$233 for the year ended June 30, 2021 and \$395 for the year ended June 30, 2020.

## **b.** Bonds Payable and Direct Borrowings

Bonds payable and direct borrowings consist of the following at June 30:

	2021	2020
Bonds Payable:		
2017 Series A Revenue Bonds (original principal of \$30,340) Serial bonds, maturing from 2018 to 2026, with annual principal payments from \$2,285 to \$4,460 and coupon interest rates from 4.0% to 5.0%. Issued to refund 2007A Series Revenue bonds and to provide funding for capital projects. Includes premiums of \$1,073 and \$1,604, respectively.	\$ 17,048	\$ 21,024
2015 Series A Revenue Bonds (original principal of \$48,450) Serial bonds, maturing from 2016 to 2037, with annual principal payments from \$405 to \$3,760 and coupon interest rates from 3.0% to 5.0%. Issued to refund 2004A, 2005A, and 2007A Series Revenue bonds and to provide funding for capital projects. Includes premiums of \$1,467 and \$1,898, respectively.	38,507	41,203
2013 Series A Revenue Bonds (original principal of \$65,255) Serial and Term bonds, maturing from 2014 to 2035, with annual principal payments from \$1,275 to \$4,425 and coupon interest rates from 2.0% to 5.0%. Issued to refund 2000A, 2003A, 2004A, and 2005A Series Revenue bonds. Includes premiums of \$2,063 and \$2,637.	46,233	49,592
2012 Series A Revenue Bonds (original principal of \$34,975) Serial and Term bonds, maturing from 2013 to 2033, with annual principal payments from \$1,070 to \$2,620 and coupon interest rates from 2.0% to 4.0%. Issued to refund balloon on the 2002A Series Revenue bonds and to provide funding for a capital project. Includes premiums of \$374 and \$478, respectively.	15,714	17,763
Total bonds payable, net	117,502	129,582
Direct Borrowings:		
TD Bank, N.A.: \$43,000 bond anticipation note, Series 2021, monthly interest only payments at .31%, matures July 2022. The note agreement contains a provision that in an event of default, the Purchaser may declare principal of and interest on the note to be immediately due and payable. In the event of a default, the unpaid principal of the note shall, at the option of the Purchaser, bear interest at the lesser of a rate which is four percentage points per annum greater than that which would otherwise be applicable or the maximum interest rate permitted by applicable law. Late payments will be assessed a 6% late fee.	43,000	

## b. Bonds Payable and Direct Borrowings - continued

	2021	2020
University of Maine Foundation: Note payable, secured by equipment, with annual payments of \$15, including interest at 4.25%, matures 2023. The promissory note contains a provision that in the event of default of payment, the unpaid balance of the principal shall, at the option of the holder, become immediately due and payable. Any amount due at the time of default, shall accrue interest until payment at the rate of 5% per year.	21	35
Key Government Finance Inc. (KGF): \$832 loan secured by five- year software license agreement, annual payments of \$182,		
including interest at 3.78%, matures July 2023. The loan agreement contains a provision that in the event of default, KGF may exercise one or more of the following remedies in its sole discretion: a) terminate the agreement and all of the UMS' rights to the software license agreement, b) seek court action to enforce payment, c) cause the Licensor to terminate the license with the UMS, d) declare all unpaid installment payments to be immediately due and payable. Late charges will be assessed on any delinquent payments from the due date of the payment until paid at the rate of 5% per annum or the highest rate permitted by law, whichever is less.	510	667
Efficiency Maine Trust: \$2,595 loan for biomass energy project, quarterly principal payments of \$65 plus interest at 1.5% beginning in June 2016 and continuing through March 2026. The promissory note contains a provision that in the event of default, all outstanding principal shall be immediately due and payable, and interest on the unpaid principal balance shall		
thereafter accrue at an interest rate equal to 12%.	1,233	1,492
Banc of America Public Capital Corp. (BOAPCC): Master lease purchase agreement, secured by equipment and vehicles, quarterly or semi-annual payments including interest at 1.19% to 4.14%, maturing from October 2022 to May 2037. The master lease purchase agreement contains a provision that in the event of default, BOAPCC has the right, at its sole option, to take one or any combination of the following steps: a) declare all remaining payments due and payable, b) repossess the financed property, c) whatever action at law or in equity may appear		
necessary or desirable to enforce its rights under the agreement.	3,106	3,803
Total direct borrowings	47,870	5,997
Total bonds payable and direct borrowings	\$165,372	\$135,579

## b. Bonds Payable and Direct Borrowings - continued

Costs associated with the issuance of revenue bonds have been expensed as incurred and included in the accompanying Statements of Revenues, Expenses and Changes in Net Position. Premiums, discounts, and deferred amounts on refunding are being amortized over the life of the respective bond issuances as part of interest expense using the effective interest method.

Principal and interest payments on bonds payable and direct borrowings for the next five years and in subsequent five-year periods are as follows at June 30, 2021:

	Bonds P	ayable	Direct Bor	rowings
Year Ending June 30:	Principal	Interest	Principal	Interest
2022	\$ 10,910	\$ 4,670	\$ 1,299	\$250
2023	10,395	4,145	44,269	91
2024	10,880	3,647	1,000	37
2025	9,560	3,134	433	18
2026	10,015	2,687	254	18
2027-2031	40,300	8,095	196	43
2032-2036	20,025	1,650	375	21
2037-2041	440	15	44	1
Total Payments	\$112,525	\$28,043	\$47,870	\$473

Interest costs related to the revenue bonds for FY21 and FY20 were \$3,620 and \$3,842, respectively.

#### 8. UNEARNED REVENUE AND DEPOSITS

Unearned revenue and deposits as of June 30 consist of the following:

			2020
	2021	Restated	
Unearned grant advances	\$ 6,447	\$	6,774
Unearned summer session revenue	8,014		7,899
Other unearned revenue and deposits	4,628		791
Total unearned revenue and deposits	\$ 19,089	\$	15,464

The System recognizes grant and contract revenue to the extent that it has fulfilled the eligibility requirements (e.g., incurred allowable costs) of the grant or contract award. Some awards pay the System in advance of the System fulfilling its obligations. In such situations, the System reports the cash as an asset and the offset as unearned revenue and deposits, a current liability, in the Statements of Net Position (see unearned grant advances in the above table).

The vast majority of grant and contract awards made to the System pay the funds to the System on a reimbursement basis. To the extent that the System has eligible, unreimbursed expenses, it recognizes a grant receivable in the Statements of Net Position. The System excludes from its financial statements the portion of an award not currently reimbursable because the System has not yet met the eligibility requirements. As of June 30, 2021 and 2020, the portion of outstanding awards excluded from the financial statements totaled \$127,831 and \$66,118, respectively.

#### 9. GOVERNMENT ADVANCES REFUNDABLE

The System participates in the Federal Perkins Loan and Nursing Loan Programs. These programs are funded through a combination of federal and institutional resources. The portion of these programs that has been funded with federal funds is ultimately refundable to the U.S. Government upon the termination of the System's participation in the programs. The portion that would be refundable if the programs were terminated as of June 30, 2021 and 2020 has been included in the accompanying Statements of Net Position as a noncurrent liability.

## **10. NET POSITION**

The System's net position is composed of the following as of June 30:

	2021	2020
Net investment in capital assets	\$ 549,870	\$ 547,323
Restricted - Nonexpendable:		
Endowment funds	69,149	66,656
Restricted - Expendable:		
Student financial aid	63,081	47,441
Capital assets and retirement of debt	1,340	1,873
Loans	17,391	17,059
Academic support	17,946	14,246
Research and public service	11,011	6,863
Library	4,519	3,775
Other	28,316	24,121
Total restricted - expendable	143,604	115,378
Unrestricted:		
Educational and general reserves	88,619	81,098
Risk management	3,888	2,450
Budget stabilization	21,500	12,114
Auxiliary enterprises	1,253	7,865
Benefit pool carryover	28,286	19,563
Implementation of GASB 75 for OPEB	(33,795)	(83,264)
Information technology initiatives	1,120	1,199
Internally designated projects	8,632	13,535
Facility projects	36,772	26,193
Quasi endowment corpus	13,398	11,093
Endowment appreciation	7,299	5,661
Cost sharing and other	5,099	5,244
Total unrestricted	182,071	102,751
Total Net Position	\$ 944,694	\$ 832,108

#### 11. COMMITMENTS AND CONTINGENCIES

## a. Grant Program Involvement

The System participates in a number of federal programs subject to financial and compliance audits. The amount of expenditures that may be disallowed by the granting agencies cannot be determined at this time, although the System does not expect these amounts, if any, to be material to the financial statements.

### b. Risk Management – Insurance Programs

The System is exposed to various risks of loss related to torts; thefts of, damage to and destruction of assets; errors and omissions; injuries; environmental pollution and natural disasters. The System manages these risks through a combination of commercial insurance policies purchased in the name of the System, a large deductible all-risk property insurance program and a self-insured retention program for physical damage to vehicles and mobile equipment.

The System's retention obligation for the general liability and vehicle liability is capped at \$400 per claim, with an aggregate limit of \$20,000 per year. Educator's legal liability risks are subject to a \$200 per loss retention with an aggregate limit of \$25,000. The System's estimate of the amount payable under these retention levels has been included in the accompanying Statements of Net Position as part of current accrued liabilities. As of June 30, 2021 and 2020 certain legal claims existed for which the probability or amount of payment could not be determined. The System, however, does not expect these amounts, if any, to be material to the financial statements.

At October 1, 2016, the System moved from a self-funded workers' compensation model to commercial insurance. The liability for pre-existing unpaid claims is based on the requirements of GASB Statement No. 10, Accounting and Financial Reporting for Risk Financing and Related Insurance Issues, which requires that a liability for claims be reported if information prior to the issuance of the financial statements indicates that it is probable that a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. The System's estimated liability at June 30, 2021 and 2020 of \$2,201 and \$2,200, respectively, for pre-existing workers' compensation claims is included in accrued liabilities in the accompanying Statements of Net Position (see Note 7). The System now purchases commercial workers' compensation insurance which limits UMS' insurable exposure for any one incident to \$1.5.

The System's active employee and under age 65 retiree health plans are self-funded with an Administrative Services Only (ASO) agreement with a commercial carrier. The System began offering two health plan options beginning in calendar year 2021 to retirees who are Medicare eligible. The legacy option is a fully insured Medicare Advantage Private Fee for Service program with a commercial carrier. The new option is a funded Health Reimbursement Account (HRA) through a Medicare Exchange program. As of June 30, 2021 and 2020, the estimated liability for claims incurred but not reported is included in total health insurance accrued liabilities in the

#### 11. COMMITMENTS AND CONTINGENCIES - CONTINUED

accompanying Statements of Net Position (see Note 7). The System purchases stop-loss insurance which limits the exposure to \$1,000 per individual.

The System's health insurance liability at June 30 consists of the following:

	2021	2020
Claims incurred but not reported	\$ 5,382	\$ 5,703
Reported claims	905	1,279
Total health insurance liability (Note 7)	\$ 6,287	\$ 6,982

Related to the System's self-insured health plan, certain collective bargaining agreements with System employees provide for a health insurance 'premium rebate' in the event that the total aggregate premium amount for the applicable two-year period (the "calculation period") exceeds, by a stated percentage, the total aggregate costs paid for claims and other expenses for the same period. Throughout each calculation period, the System receives periodic reports on how actual costs are trending in relation to the premiums; however, probability of a rebate cannot be determined until the end of the calculation period, which was December 31, 2020. As of June 30, 2021 and 2020 the estimated liability for the premium rebate of \$2,750 and \$0, respectively, has been included in the accompanying Statements of Net Position as a current liability.

#### 12. PASS THROUGH GRANTS

During FY21 and FY20, the System distributed \$103,358 and \$112,555, respectively, for student loans through the U.S. Department of Education Federal Direct Lending Program. These distributions and related funding sources are not included as expenses and revenues or as cash disbursements and cash receipts in the accompanying financial statements.

#### 13. PENSION PLANS

The System has several single-employer pension plans, each of which is described in more detail below. The System's pension (income)/expense for each of these plans was as follows for the years ended June 30:

	2021	2020
Faculty and Professional Employees:		
Contributory retirement plan	\$ 22,602	\$ 21,809
Incentive retirement plan	1,526	1,443
Hourly Employees:		
Basic retirement plan	3,201	3,139
Defined benefit plan (Income)/Expense	(216)	1,361
Total net pension expense	\$ 27,113	\$ 27,752

## a. Contributory Retirement Plan - Faculty and Professional Employees

Eligible salaried employees participate in the University of Maine System Retirement Plan for Faculty and Professional Employees (Contributory Plan), a defined contribution retirement plan administered by the Teachers Insurance and Annuity Association of America (TIAA). The Board of Trustees and collective bargaining agreements establish benefit terms and mandatory employee and employer contribution rates.

All full-time employees are eligible once employment begins. Part-time employees are eligible upon achieving the equivalent of five years of continuous, full-time, regular service. All eligible employees are required to participate when they reach thirty years of age. The System contributes an amount equal to 10% of each participant's base salary and each participant contributes 4% of base salary. Participants may make additional voluntary contributions up to limits allowable by the Internal Revenue Service. The System has a five-year vesting schedule for the employer matching contribution for certain salaried employees hired on or after January 1, 2010. All participant contributions are fully and immediately vested.

Effective June 1, 2014, TIAA became the sole record-keeper for the Contributory Retirement Plan. Upon separation from the System, participants may withdraw up to 100% of their vested account balances or transfer funds to other investment alternatives subject to Internal Revenue Service limitations and the contractual provisions of the Contributory Plan.

Employee contributions made to the Contributory Plan were \$9,042 in FY21 and \$8,723 in FY20.

#### 13. PENSION PLANS - CONTINUED

## b. Incentive Retirement Plan - Faculty and Professional Employees

### **Plan Description**

**Plan Administration:** The Incentive Retirement Plan is a single employer plan administered by the System. The Plan does not issue standalone financial statements.

**Benefits Provided:** Represented faculty who were employed before July 1, 1996 and other professional employees who were employed before July 1, 2006 participate in the University of Maine System Incentive Retirement Plan (Incentive Plan), a defined benefit plan, which was established on July 1, 1975. The Board of Trustees has authority to establish and amend provisions under the Incentive Plan subject to collective bargaining.

The Incentive Plan provides that eligible retiring employees with at least 10 years of continuous regular full-time equivalent service immediately prior to retirement will receive a benefit equivalent to  $1\frac{1}{2}$ % times their completed years of service (up to a maximum of 27 years) times their final annual base salary. This amount is to be paid as a lump-sum contribution to the participant's retirement account. Employees may elect to retire at any age on or after 55.

*Plan Membership:* At June 30, 2021 and 2020, active plan participants consisted of 794 and 859, respectively.

**Contributions:** The Incentive Plan is funded on a terminal funding basis - funded when costs become due and payable. Employees do not make contributions under the Incentive Plan.

#### **Net Pension Liability**

The total pension liability related to the Incentive Plan at the measurement date of June 30, 2021 and 2020 was \$21,208 and \$21,049, respectively. The fiduciary net position as a percentage of the total pension liability was 0.00% as this plan has no assets. The total pension liability was determined by an actuarial valuation as of July 1, 2021 and July 1, 2019 rolled forward to the measurement date of June 30, 2020 respectively, using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial cost method	Entry age normal
Inflation	Not explicitly assumed
Salary increases	3.5% per year, including longevity
Discount rate	2.16% as of June 30, 2021
	2.21% as of June 30, 2020
Life expectancy	2021: Mortality rates were based on the Pub-2010 Mortality
	Table projected with Scale MP-2020
	2020: Mortality rates were based on the RP-2014 Mortality Table
	projected with MP-2018

## 13b. Incentive Retirement Plan – Faculty and Professional Employees - continued

**Discount rate:** GASB Statement No. 73, Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68, requires projected benefit payments be discounted to their actuarial present value using a tax-exempt, high-quality municipal bond rate.

For the Incentive Plan, which does not hold assets, the total pension liability is based on the discount rate of 2.16% and 2.21% as of June 30, 2021 and 2020, respectively. The rates are based on the municipal bond rates as of the measurement dates. The municipal bond rates for 2021 and 2020 are based on the Bond Buyer 20-Bond General Obligation (GO) Index published for the weeks of June 30, 2021 and June 30, 2020, respectively.

Sensitivity of the net pension liability to changes in the discount rate: The following table presents the total pension liability as of June 30, calculated using the respective current discount rate as well as using a discount rate 1-percentage point lower or 1-percentage point higher than the current rate:

	June 30, 2021			June 30, 2020		
	Current			Current		
	1%	Discount	1%	1%	Discount	1%
	Decrease	Rate	Increase	Decrease	Rate	Increase
	(1.16%)	(2.16%)	(3.16%)	(1.21%)	(2.21)	(3.21%)
Total pension liability	\$ 21,844	\$ 21,208	\$ 20,552	\$21,689	\$21,049	\$20,390

#### 13b. Incentive Retirement Plan - Faculty and Professional Employees - continued

Changes in Total Pension Liability for the **Incentive Retirement Plan**:

Fiscal Year Ended June 30	2021	2020
Total pension liability – beginning	\$ 21,049	\$ 21,082
Changes for the year:		
Service cost	692	538
Interest	456	719
Differences between expected and actual experience	833	-
Changes of assumptions and other inputs	376	851
Benefit payments	(2,198)	(2,141)
Total pension liability – ending (a)	21,208	21,049
Fiduciary net position – beginning	-	-
Contributions – employer	2,198	2,141
Benefit payments	(2,198)	(2,141)
Fiduciary net position – ending (b)	-	-
Net pension liability – ending (a)-(b)	\$ 21,208	\$ 21,049
Plan fiduciary net position as a percentage of the total pension liability	0.00%	0.00%
Covered payroll	\$ 62,646	\$ 67,303
Net pension liability as a percentage of covered payroll	33.85%	31.27%
Contributions as a percentage of covered payroll	3.51%	3.18%

#### c. Basic Retirement Plan - Classified Employees

The Basic Retirement Plan (Basic Plan) is a single employer defined contribution plan (DC Plan) administered by the System and does not issue standalone financial statements. This DC Plan was created on July 1, 1998 in accordance with Section 403(b) of the Internal Revenue Code. Classified employees hired July 1, 1998 or later participate in this DC Plan.

Eligible employees who were hired before July 1, 1998 could elect to roll over to the DC Plan the value of their accrued benefit in the Defined Benefit Retirement Plan for Classified Staff (DB Plan), as described further below, or remain in the DB Plan. Eligible employees that remained in the DB Plan and were age 50 and over on June 30, 1998 would continue to accrue additional benefits while the value of the benefit for those under age 50 would remain static. The majority of those under age 50 chose to roll over the value of their accrued benefit to the DC Plan.

Full-time employees are eligible to participate in the DC Plan once employment begins. Part-time employees are eligible once they have achieved the equivalent of five years of continuous, full-time regular service. Since June 1, 2014, all contributions have been directed to TIAA as the sole record-keeper.

#### <u> 13c. Basic Retirement Plan – Classified Employees - continued</u>

Employees hired prior to July 1, 1998 and who have more than five years of completed service may voluntarily contribute up to 4% of base pay to the DC Plan and receive a 100% match from the System. Employees hired July 1, 1998 or later are required to contribute 1%. Employee contributions to the DC Plan of up to 4% of base pay are matched 100% by the System. In addition, employees who have four or more years of completed service and do not participate in the DB Plan, receive System contributions equal to 6% of their base pay, for a total maximum employer contribution of 10%.

The System implemented a four-year vesting schedule for the employer matching contribution for classified employees hired on or after January 1, 2010 and, on January 1, 2013, implemented a five-year vesting schedule for employer matching contributions. Employees hired before January 1, 2010 were fully and immediately vested in the employer matching contribution. All participant contributions are fully and immediately vested.

Upon separation from the System, participants may withdraw up to 100% of their vested account balances or transfer funds to other investment alternatives subject to Internal Revenue Service limitations and the contractual provisions of the Basic Plan.

Employee contributions made to the Basic Plan were \$1,346 in FY21 and \$1,340 in FY20.

#### d. Defined Benefit Plan - Classified Employees

#### **Plan Description**

**Plan Administration:** The Defined Benefit Plan (the Plan) is a single employer plan administered by the System. The Plan does not issue standalone financial statements. The Plan is maintained for eligible classified employees who chose not to join the Basic Plan.

The System's Board of Trustees has authority to establish or amend provisions of all classified employee plans, including contribution requirements, subject to collective bargaining agreements.

**Benefits Provided:** Participants are eligible for normal retirement benefits upon attaining age 65 and retirement. The monthly retirement benefit is based on a formula specified by policy in collective bargaining agreements. Eligible employees receive the sum of:

- a. 1.25% or 1.50% (based on years of service) of the participant's average annual compensation times credited service (up to a maximum of 30 years); plus
- b. 1.25% or 1.50% (based on years of service) of the participant's unused sick leave.

Participants are eligible for early retirement benefits upon the attainment of age 55 and completion of five years of continuous service. The benefit is computed in accordance with the normal retirement age benefit, but is reduced by an actuarial factor because benefits will be paid over a longer period of time. No reduction is made if an employee retires after attaining 62

years of age with 25 or more years of service. Participants are also eligible for disability and death benefits.

Employees who participate in the Plan may also participate in the Optional Retirement Savings Plan (ORSP). The ORSP is a voluntary, employee-funded defined contribution plan. Employees may contribute up to 4% of their base pay and receive a 100% match from the System. The ORSP is administered by TIAA.

**Plan Membership:** The Plan is closed to new entrants. At June 30, pension plan membership consisted of the following:

	2021	2020
Inactive plan participants or beneficiaries currently receiving benefits	700	724
Inactive plan participants entitled to but not yet receiving benefits	191	199
Active plan participants	2	3
Total plan participants	893	926

**Contributions:** The System adopted a funding strategy for the Plan on February 27, 2014. The System's funding strategy follows a long-term contribution schedule, such that a level annual dollar amount will be contributed to the plan indefinitely, while never allowing the Plan's assets to be depleted. The actuarially determined annual projected contribution to the Plan is \$672 through and including FY51, at which point the projected fiduciary net position is estimated to be sufficient to meet annual benefit payments; however, any required contribution amount will be re-determined with each actuarial valuation as market performance and other factors will impact the required future funding. Funding the Plan over the long-term allows the System to minimize contribution volatility.

Employees do not make contributions under the Plan.

#### Plan Investments

**Method Used to Value Investments:** Investments are reported at fair value. See Note 3 for information related to the fair value measurement, interest rate risk, and foreign currency risk associated with the Plan's investments.

**Investment Policy:** The Plan's investments are diversified both by asset class and within asset classes. To have a reasonable probability of consistently achieving the Plan's return objectives, the following asset allocation policy ranges were in effect as of June 20, 2021 and 2020:

	2021	2020
Equity securities	25-45%	25-45%
Fixed income securities	35-55%	35-55%
Other	15-35%	15-35%
Cash	0-10%	0-10%

**Rate of Return:** For the years ended June 30, 2021 and 2020, the annual money-weighted rate of return, net of investment expenses, was 15.86% and 4.48%, respectively.

#### **Net Pension Liability**

The components of the net pension liability at the measurement date of June 30 were as follows:

	2021	2020
Total pension liability	\$ 33,840	\$ 36,318
Fiduciary net position	(25,291)	(24,609)
Net pension liability	\$ 8,549	\$ 11,709
Fiduciary net position as a percentage of the total pension liability	74.7%	67.8%

For purposes of determining fiduciary net position, benefits are recorded when paid.

**Actuarial Assumptions:** The total pension liability as of June 30, 2021 and 2020 was determined by an actuarial valuation as of July 1, 2021 and as of July 1, 2019 rolled forward to the measurement date of June 30, 2020, respectively, using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial cost method	Entry age normal
Actuarial asset method	The actuarial value of assets is the market value of
	assets
Inflation	2.5% as of June 30, 2021
	2.4% as of June 30, 2020
Salary increases	3.5% for all years
Investment rate of return	6.25% net of investment expenses, including inflation
Life expectancy	Pre-retirement and post-retirement mortality rates
	were based on the Pub-2010 amount-weighted
	Mortality Table with Scale MP-2020. For disabled lives,
	the mortality rates were based on the Pub-2010
	amount-weighted Disabled Mortality Table with Scale
	MP-2020.

The long-term expected rate of return on the Plan's investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Best estimates of arithmetic real rates of return for each major asset class included in the Plan's target asset allocation as of June 30 are summarized in the following table:

		2021		2020
		Long-Term	Long-Terr	
		<b>Expected Real</b>		Expected Real
	Target	Rates of	Target	Rates of

**Discount Rate:** GASB Statement No. 68, Accounting and Financial Reporting for Pensions, requires that projected benefit payments be discounted to their actuarial present value using the single rate that reflects (1) a long-term expected rate of return on pension plan investments to the extent that the pension plan's assets are sufficient to pay benefits and pension plan assets are expected to be invested using a strategy to achieve that return and (2) a tax-exempt, high-quality municipal bond rate to the extent that the conditions for use of the long-term expected rate of return are not met.

For the Plan, the discount rate used to measure the total pension liability at June 30, 2021 and 2020 was 6.25%. The projection of cash flows used to determine the discount rate assumed that contributions from the System will be made in accordance with the Plan's funding policy adopted on February 27, 2014. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected benefit payments of current plan participants. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

**Sensitivity of the net pension liability to changes in the discount rate:** The following presents the net pension liability as of June 30 calculated using the discount rate of 6.25%, as well as using a discount rate 1-percentage point lower or 1-percentage point higher than the current rate:

		June 30, 2021		J	lune 30, 2020	
		Current			Current	
	1%	Discount	1%	1%	Discount	1%
	Decrease	Rate	Increase	Decrease	Rate	Increase
	(5.25%)	(6.25%)	(7.25%)	(5.25%)	(6.25%)	(7.25%)
Total pension liability	\$ 36,194	\$ 33,840	\$ 31,762	\$ 38,945	\$ 36,318	\$ 34,010
Fiduciary net position	25,291	25,291	25,291	24,609	24,609	24,609
Net pension liability	\$ 10,903	\$ 8,549	\$ 6,471	\$ 14,336	\$ 11,709	\$ 9,401

Changes in Net Pension Liability for the **Defined Benefit Pension Plan**:

Fiscal Year Ended June 30	2021	2020
Total pension liability – beginning	\$ 36,318	\$ 38,105
Changes for the year:		
Service cost	1	1
Interest	2,148	2,255
Differences between expected and actual experience	(285)	-
Changes of assumptions	(426)	-
Benefit payments	(3,916)	(4,043)
Total pension liability – ending (a)	33,840	36,318
Fiduciary net position – beginning	24,609	26,576
Contributions – employer	907	896
Net investment income	3,704	1,213
Benefit payments	(3,916)	(4,043)
Administrative expenses	(13)	(33)
Fiduciary net position – ending (b)	25,291	24,609
Net pension liability – ending (a)-(b)	\$ 8,549	\$ 11,709
Plan fiduciary net position as a percentage of the total pension		
liability	74.74%	67.76%
Covered payroll	\$ 65	\$ 68
Net pension liability as a percentage of covered payroll	13158.91%	17284.43%
Contributions as a percentage of covered payroll	1396.00%	1322.06%
Plan assets measured at fair value	\$ 25,291	\$ 24,609

#### 13. PENSION PLANS - CONTINUED

#### e. Funding of Basic and Defined Benefit Plans – Classified Employees

While the Basic Plan and Defined Benefit Plan are administratively separate, they are both part of the Retirement Plan for Classified Employees and are covered by the same plan document. In accordance with Section 414(k) of the Internal Revenue Code, the System may elect to fund employer contributions to the Basic Plan and ORSP from any excess assets in the Defined Benefit Plan, subject to certain limitations.

#### 14. POSTEMPLOYMENT HEALTH PLAN

#### Plan Description

**Plan Administration:** The Other Postemployment Benefits (OPEB) Health Plan ("OPEB Plan") is a defined benefit, single employer plan, administered by the System. The OPEB Plan does not produce standalone financial statements. Within certain limits, the Board of Trustees has authority to establish and amend provisions under the Plan for retirees. This authority is subject to collective bargaining agreements for active employees.

**Plan Benefits:** System retirees at or above the normal retirement age of 65 with at least ten years of continuous full-time regular university service immediately prior to retirement, and who are in the System health plan upon retirement, are eligible for post-retirement health coverage. This coverage is also extended to those former eligible employees who receive benefits under the System's long-term disability (LTD) insurance and to widows/widowers of university employees and retirees. Employees who retire on or after April 1, 2008 and former employees receiving LTD benefits will have a one-time election to cease coverage under the System health plan and later reenroll for coverage provided continuous coverage is documented.

The System Medicare eligible retiree health plan options include a Medicare Exchange program with an HRA and a group health plan which subsidizes the cost of insurance for eligible persons who are retired from the System and have reached age 65, who are under age 65 and are part of a special retirement incentive program, and who are former employees and approved for LTD benefits regardless of age or years of service. The level of subsidy varies with retirement date and years of service. The System also provides a subsidy for eligible spouses and dependents. With certain restrictions, spouses and dependents are eligible to continue coverage after the death of a retiree meeting the above criteria.

Persons eligible for a subsidy from the System may not convert their benefit into an in-lieu-of payment to secure coverage under independent plans.

The System's OPEB (income)/expense for June 30, 2021 and 2020 was \$(46,390) and \$9,528, respectively.

#### 14. POSTEMPLOYMENT HEALTH PLAN - CONTINUED

*Plan membership:* At June 30, OPEB Plan membership consisted of the following:

	2021	2020
Inactive plan participants or beneficiaries currently receiving benefits	2,137	2,562
Active plan participants	4,014	3,976
Total plan participants	6,151	6,538

**Contributions:** The System annually contributes an actuarially determined contribution to a Trust, based on the results of the most recent actuarial valuation.

Funding the OPEB Plan over the long-term allows the System to smooth market impacts, limiting contribution volatility. The required contribution amount will be re-determined with each actuarial valuation as market performance and other factors will impact the required future funding.

#### **Plan Investments**

Assets of the OPEB Plan are invested in the System's managed investment pool. See Notes 1f and 3 for more information on the pool and the OPEB Plan's share.

#### 14. POSTEMPLOYMENT HEALTH PLAN - CONTINUED

#### **Net OPEB Liability**

The components of the net OPEB liability at June 30 were as follows:

	2021	2020
Total OPEB liability	\$162,212	\$213,431
Fiduciary net position	(180,270)	(137,400)
Net OPEB liability (asset)	\$ (18,058)	\$ 76,031
Fiduciary net position as a percentage of the total OPEB liability	111.13%	64.38%

**Actuarial Assumptions:** The total OPEB liability as of June 30, 2021 and 2020 was determined by an actuarial valuation as of July 1, 2021 and as of July 1, 2019 rolled forward to the measurement date of June 30, 2020 respectively, using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial cost method Actuarial asset method	Entry age normal Market value
Inflation Investment rate of return	<ul><li>2.2% as of June 30, 2021; 2.4% as of June 30, 2020</li><li>7.25% net of investment expenses, including inflation as of June 30, 2021 and 2020</li></ul>
Healthcare cost trend rate	6% for 2021 decreasing .25% per year to 5.25%, then grading down to an ultimate trend rate of 4%, utilizing the Society of Actuaries Getzen Medical Trend Model. The ultimate medical inflation rate is reached in 2075.
	8% for 2020 decreasing .5% per year to 5.5%, then grading down to an ultimate trend rate of 3.9%, utilizing the Society of Actuaries Getzen Medical Trend Model. The ultimate medical inflation rate is reached in 2075.
Prescription drug trend rates (Catastrophic prescription Drug HRA)	6.5% for 2021, decreasing .25% per year to an ultimate trend rate of 5 percent. Drug HRA)
Life expectancy	Pre-retirement and post-retirement mortality rates were based on the Pub-2010 headcount-weighted Mortality Table projected with fully generational mortality improvement using Scale MP-2020. For disabled lives, the mortality rates were based on the Pub-2010 headcount-weighted Disabled Mortality Table projected with fully generational mortality improvement using Scale MP-2020.

#### 14. POSTEMPLOYMENT HEALTH PLAN – CONTINUED

The long-term expected rate of return on OPEB Plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of OPEB Plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Best estimates of arithmetic real rates of return for each major asset class included in the OPEB Plan's target asset allocation as of June 30 are summarized in the following table:

		2021		2020
Asset Class	Target Allocation	Long-Term Expected Real Rate of Return	Target Allocation	Long-Term Expected Real Rate of Return
Large Cap Equities	22.0%	3.80%	17.0%	5.00%
Domestic Small/Mid Cap International Equities	6.0% 10.0%	3.90% 3.80%	7.0% 10.0%	5.20% 5.20%
International Small Cap Equities	4.0%	4.10%	4.0%	5.60%
Emerging Market Equities Emerging Small Cap Market Equities	3.5%	5.90%	3.5%	7.10%
Global Equity	3.5% 10.0%	6.10% 4.40%	3.5% 10.0%	7.60% 5.70%
Domestic Core Bonds	9.5%	0.70%	7.0%	0.20%
TIPS Short-term TIPS	3.5% 3.5%	0.20% 0.00%	7.0% 0.0%	-0.40% 0.00%
Bank Loans	5.0%	2.80%	5.0%	2.70%
Absolute Return Fixed Income	5.0%	1.80%	5.0%	1.10%
Global Asset Allocation Hedge Funds	7.5% 7.0%	2.30% 3.10%	15.0% 6.0%	2.90% 3.20%
Total	100%	-	100%	

**Discount Rate:** Projected benefit payments are required to be discounted to their actuarial present value using the single rate that reflects (1) a long-term expected rate of return on OPEB Plan investments to the extent that the OPEB Plan's fiduciary net position is projected to be sufficient to make projected benefit payments and OPEB Plan assets are expected to be invested using a strategy to achieve that return and (2) a tax-exempt, high-quality municipal bond rate to the extent that the conditions for use of the long-term expected rate of return are not met.

#### 14. POSTEMPLOYMENT HEALTH PLAN - CONTINUED

The discount rate used to measure the total OPEB liability at the measurement dates of June 30, 2021 and 2020 was 7.25%. The projection of cash flows used to determine the discount rate assumed that contributions from the System will be made in accordance with the OPEB Plan's funding policy. Based on those assumptions, the OPEB Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on OPEB Plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

**Sensitivity of the net OPEB liability to changes in the discount rate:** The following presents the net OPEB liability as of June 30, calculated using the respective current discount rate as well as using a discount rate 1-percentage point lower or 1-percentage point higher than the current rate:

_		June 30, 2021	•		June 30, 2020	
		Current			Current	
	1%	Discount	1%	1%	Discount	1%

	\$ 1,90	55	\$(	1,219)	\$ 746	\$(39,580)

#### 16. COMPONENT UNITS

The System is supported in part by several foundations and alumni associations that raise funds on the System's behalf. The System determined that one of those entities, the University of Maine Foundation ("the Foundation"), meets the criteria set forth under GASB Statement No. 61, The Financial Reporting Entity: Omnibus an amendment of GASB Statements No. 14 and No. 34, for inclusion as a discretely presented component unit of the System.

The Foundation is a legally separate, tax-exempt organization, which acts primarily as a fundraising organization to supplement the resources that are available to the System in support of its programs. The Board of Directors of the Foundation is self-perpetuating and independent of the System's Board of Trustees. Although the System does not control the timing or amount of receipts from the Foundation, the Foundation holds and invests resources almost entirely for the System's benefit (specifically the University of Maine); the System is entitled to access a majority of the economic resources held; and the economic resources held are "significant to the System" based on a 5% of net position threshold. The Foundation has accordingly been discretely presented as a component unit of the System in the accompanying financial statements as of and for the years ended June 30, 2021 and 2020, and is reported in separate financial statements as the Foundation reports its financial results under Financial Accounting Standards Board standards rather than GASB standards. Contributions and additions to the Foundation's endowments with donor restrictions were \$16,580 for FY21 and \$7,082 for FY20.

The Foundation asset category, long-term investments, endowment, comprised 84% and 81% of the Foundation's total assets as of June 30, 2021 and 2020, respectively. Remaining disclosures in this note relate to this asset group.

#### Long-term investments, endowment

The Foundation maintains a general pool of investments for its endowments. These investment securities are stated at fair value based on quoted market prices within active markets. The fair values of alternative investments are determined from information supplied by the investment managers based on the market values of underlying investments on a net asset value basis. Investment income is reflected in the Statements of Activities as "without donor restrictions" or "with donor restrictions" based upon the existence and nature of any donor-imposed restrictions.

The Foundation has established a specific set of investment objectives and guidelines for investment managers that attempt to provide a predictable stream of income while seeking to maintain the purchasing power of the endowment assets over the long-term. The investment policy establishes an achievable return objective and seeks to manage risk through diversification of asset classes. The current long-term return objective is to return 7.25% in 2021 and 2020. Actual returns in any given year may vary from these amounts.

#### 16. COMPONENT UNITS - CONTINUED

#### **Endowment spending policy**

The Foundation utilizes a spending policy for its pooled endowment in order to provide for the current and long-term needs of endowment recipients. The spending policy determines the endowment income to be distributed. For the years ended June 30, 2021 and 2020 the spending policy was 4.5% of the average market value for the twelve previous quarters ending September 30.

Endowment spending is contingent upon a fund's market value exceeding its historic dollar value (principal). In accordance with the Uniform Prudent Management of Institutional Funds Act, a prudent expenditure may be allowed unless the donor has explicitly prohibited expenditure of principal. During the years ended June 30, 2021 and 2020, the Foundation distributed \$14,184 and \$13,596, respectively, to the System for both restricted and unrestricted purposes.

#### Fair value measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date.

A fair value hierarchy for inputs is used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Foundation. Unobservable inputs reflect assumptions about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy is categorized into three levels based on the inputs as follows:

- Level 1. Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access. Valuation adjustments and block discounts are not applied to Level 1 securities. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant degree of judgment.
- Level 2. Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.
- Level 3. Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

#### 16. COMPONENT UNITS - CONTINUED

The Foundation's short-term investments measured at fair value valuations based on unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) as of June 30, 2021 and 2020 were \$25,130 and \$23,481, respectively. These investments include money markets, certificates of deposit, U.S. government obligations and bonds.

The following table summarizes the Foundation's long-term endowment investments by class in the fair value hierarchy as of June 30:

		20	021			
			Level	Level		
	NAV	Level 1	2	3	Total	Liquidity

Complete financial statements for the Foundation may be obtained from the Foundation's office at Two Alumni Place, Orono, ME 04469-5792.

#### 17. SERVICE CONCESSION ARRANGEMENTS

In June 2016, the System contracted with Sodexo America LLC ("Sodexo") to provide food services at all campuses except the University of Maine. In May 2020, the term of the contract was extended for 5 additional years commencing July 1, 2021, continuing through June 30, 2026 and is subject to renewal for 5 additional 1-year terms.

Upon execution of the 2016 contract, the System received a signing bonus of \$500 and a commitment by Sodexo to provide up to \$4,000 for equipment and improvements to the System's dining facilities during the first 2 years of the agreement. Effective September 1, 2018, the contract was amended to include an additional \$2,000 for equipment and improvements. Any such improvements and equipment provided will remain the property of the System. Improvements to facilities not completed as of June 30, 2021 and 2020 are recorded as a receivable in the amount of \$0 and \$5, respectively, in the Statement of Net Position.

As of June 30, 2021 and 2020, the equipment and improvements provided under this agreement have been classified as either capital assets or expenses in accordance with the System's capitalization policies, with an offsetting deferred inflow of resources. The signing bonus has also been classified as a deferred inflow of resources. Over the life of the contract, the System will amortize the deferred inflows of resources while recognizing auxiliary revenue each year. If the agreement expires, terminates or is amended in a way that has an adverse impact on Sodexo, the System will be liable for the unamortized portion of Sodexo's investment.

As of June 30, 2021 and 2020 the balance of the deferred inflows of resources related to the Sodexo service concession arrangement is \$4,708 and \$4,721, respectively (see Note 15). During FY21 and FY20, amortization in the amount of \$513 and \$429, respectively, has been recognized as auxiliary revenue.

#### 18. PRIOR PERIOD ADJUSTMENTS

The provisions of GASB No. 84 are effective for periods beginning after December 15, 2019. This statement applies to the System's fiduciary funds (see Note 1c.) and the System adopted GASB No. 84 for its June 30, 2021 financial statements. The change represents a change from one generally accepted accounting principle to another generally accepted accounting principle that is the current industry practice.

The changes adopted to conform to the provisions of GASB No. 84 are applied retroactively by restating the FY20 financial statements. The impact of the restatement was to reduce the balances of certain items in the System's FY20 Statements of Net Position and to move those reductions to the Statements of Fiduciary Net Position. A condensed version of the System's FY20 Statements of Net Position is presented below, showing the originally stated balances,

#### 18. PRIOR PERIOD ADJUSTMENTS - CONTINUED

the impact of GASB No. 84, and the restated FY20 balances. There was no impact on the System's Statements of Revenues, Expenses, and Changes in Net Position.

#### 19. UNCERTAINTIES

During FY20, the World Health Organization declared the spread of Coronavirus Disease (COVID-19) a worldwide pandemic. Subsequent to the FY21 year-end, the COVID-19 pandemic continues to have significant effects on global markets, supply chains, businesses, communities, and the delivery of education. Specific to the System, COVID-19 may negatively impact various parts of its FY22 operations and financial results, including, but not limited to, enrollment, auxiliary revenues, collections of receivables, operating costs and personnel. Management is taking appropriate actions to mitigate impacts; however, the full effect of COVID-19 is unknown and cannot be reasonably estimated as these events are still developing.

UNIVERSITY OF MAINE SYSTEM ANNUAL FINANCIAL REPORT 2021

#### INCENTIVE RETIREMENT PLAN - CONTINUED:

#### **Notes to Required Supplementary Information:**

Changes of benefit terms: None.

Changes of assumptions and other inputs:

- 2021: The discount rate changed from 2.21% as of the beginning of the measurement period to 2.16% as of the end of the measurement period. In addition, the mortality tables were updated to the Pub-2010 mortality tables with mortality improvement scale MP-2020.
- 2020: The discount rate changed from 3.5% as of the beginning of the measurement period to 2.21% as of the end of the measurement period.
- 2019: The discount rate changed from 3.87% as of the beginning of the measurement period to 3.5% as of the end of the measurement period.
- 2018: The discount rate changed from 3.58% as of the beginning of the measurement period to 3.87% as of the end of the measurement period.
- 2017: The discount rate changed from 2.85% as of the beginning of the measurement period to 3.58% as of the end of the measurement period.

Methods and assumptions used in calculations of actuarially determined contributions:

The University of Maine System Incentive Retirement Plan is funded on a terminal funding basis - funded when costs become due and payable.

Actuarial cost method Entry age normal

Inflation Not explicitly assumed

Payroll increases 3.5% per year

Salary increases

Assets There are no assets accumulated in a trust that meets the

3.5% per year, including longevity

criteria in paragraph 4 of GASB Statement No. 73.

#### **DEFINED BENEFIT PENSION PLAN - CONTINUED:**

#### **Notes to Required Supplementary Information:**

Changes of benefit terms: None.

Changes of assumptions and other inputs:

- 2021: The mortality tables were updated to the Pub-2010 amount-weighted mortality tables with scale MP-2020
- 2020: None
- 2019: The mortality tables were updated to reflect more recent mortality tables and generational mortality improvement.
- 2018: None
- 2017: None
- 2016: The investment return rate was changed from 6.75% to 6.25% and the administrative expense assumption was changed from \$50, increasing by 3% per year, to \$30, increasing by 2% per year up to a maximum of \$70.
- 2015: The actuarial funding method was changed from Projected Unit Credit to Entry Age Normal, the investment return rate was changed from 7.25% to 6.75% and the administrative expense assumption was changed from \$90 per year to \$50 per year.

Methods and assumptions used in calculations of actuarially determined contributions:

The actuarially determined contributions in the schedule of employers' contributions are calculated as of July 1, one year prior to the end of the fiscal year in which contributions are reported. The following actuarial methods and assumptions were used to determine contributions reported in that schedule:

Actuarial cost method 2015 to 2021: Entry age normal

2014: Projected Unit Credit

Asset valuation method

The actuarial value of assets is the market value of assets.

Inflation

2021: 2.5% per year 2020: 2.4% per year 2019: 2.6% per year

2016 to 2018: 3% per year 2015: 3.25% per year

Salary increases 3.5% per year Payroll increases 3.5% per year

Investment rate of return/ 2016 to 2021: 6.25%, net of investment expenses,

discount rate compounded annually

2015: 6.75%, net of investment expenses, compounded

annually

2014: 7.25%, net of investment expenses, compounded

annually

#### **DEFINED BENEFIT PENSION PLAN – CONTINUED:**

Investment Returns: Fiscal Year Ended June 30	2021	2020	2019	2018	2017	2016	2015	2014
Annual money-weighted								
rate of return, net of								
investment expenses	15.86%	4.48%	4.03%	4.80%	7.04%	0.64%	0.12%	14.27%

The money-weighted rate of return considers the changing amounts actually invested during a period and weights the amount of pension plan investments by the proportion of time they are available to earn a return during that period. The rate of return is then calculated by solving, through an iterative process, for the rate that equates the sum of the weighted external cash flows into and out of the pension plan investments to the ending fair value of pension plan investments.

Contributions as a percentage of covered payroll	4.82%	5.26%	5.00%	5.41%	7.51%

#### **OPEB PLAN - CONTINUED:**

#### **Notes to Required Supplementary Information:**

#### Changes of benefit terms:

Effective January 1, 2021 UMS offered a funded Health Reimbursement Account (HRA) through a retiree health exchange. Retirees can choose from various individual Medicare coverages or the UMS sponsored group coverage. The total OPEB liability decreased \$51,219 from the prior year including changes of benefit terms of \$49,469.

#### Changes of assumptions:

2021: The mortality tables were updated to the Pub-2010 amount-weighted mortality tables with scale MP-2020. The health care cost rate was updated to reflect more recent trends. The inflation rate was changed from 2.4% to 2.2%.

2020: The investment rate of return/discount rate was changed from 7.5% to 7.25%

2019: The mortality tables were updated to reflect more recent mortality tables and generational mortality improvement. The health care cost rate was updated to reflect more recent trends.

2018: None

2017: The investment rate of return/discount rate was changed from 7.75% to 7.5% and the actuarial funding method was changed from Projected Unit Credit to Entry Age Normal.

Methods and assumptions used in calculations of actuarially determined contributions: The actuarially determined contributions in the schedule of employers' contributions are calculated as of July 1, one year prior to the end of the fiscal year in which contributions are reported. The following actuarial methods and assumptions were used to determine contributions reported in that schedule:

Actuarial cost method 2017 to 2021: Entry age normal

2016: Projected Unit Credit

Amortization method 2021: Level dollar amount over 25 years on a closed

amortization period

2020: Level dollar amount over 26 years on a closed

amortization period

2019: Level dollar amount over 28 years on a closed

amortization period

2017 to 2018: Level dollar amount over 30 years on a closed

amortization period

Amortization period 2021: 25 years

2020: 26 years 2019: 28 years

2017 to 2018: 30 years

Asset valuation method Market value

#### **OPEB PLAN - CONTINUED:**

Inflation

2021: 2.2%

2020: 2.4%

2019: 2.6%

2017 to 2018: 3% per year

Healthcare cost trend rate

2021: 6% decreasing .25% per year to 5.25%, then grading down to an ultimate trend rate of 4%, utilizing the Society of Actuaries Getzen Medical Trend Model. The ultimate medical inflation rate is reached in 2075.

2019 to 2020: 8% decreasing .5% per year to 5.5%, then grading down to an ultimate trend rate of 3.9%, utilizing the

grading down to an ultimate trend rate of 3.9%, utilizing the Society of Actuaries Getzen Medical Trend Model. The ultimate medical inflation rate is reached in 2075.

2017 to 2018: 8% decreasing 1% per year to an ultimate rate

of 5% for 2020 and later years

Investment rate of return/ discount rate

2020 to 2021: 7.25% net of investment expenses, including

inflation

2017 to 2019: 7.5% net of investment expenses, including

inflation

2016: 7.75% net of investment expenses, including inflation

Investment Returns: Fiscal Year Ended June 30	2021	2020	2019	2018	2017
Annual money-weighted rate of return, net of					
investment expenses	26.88%	1.16%	2.81%	6.90%	11.56%

The money-weighted rate of return considers the changing amounts actually invested during a period and weights the amount of OPEB plan investments by the proportion of time they are available to earn a return during that period. The rate of return is then calculated by solving, through an iterative process, for the rate that equates the sum of the weighted external cash flows into and out of the OPEB plan investments to the ending fair value of OPEB plan investments.

## INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Board of Trustees University of Maine System Orono, Maine

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the business-type activities, the discretely presented component unit and the aggregate remaining fund information of the University of Maine System (the System) as of and for the year ended June 30, 2021, and the related notes to the financial statements, which collectively comprise the System's basic financial statements, and have issued our report thereon dated November 30, 2021. Our report includes a reference to other auditors who audited the financial statements of the University of Maine Foundation (Foundation), as described in our report on the System's financial statements. The financial statements of the Foundation were not audited in accordance with *Government Auditing Standards*, and accordingly, this report does not include reporting on internal control over financial reporting or instances of reportable noncompliance associated with the Foundation.

#### Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the System's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control. Accordingly, we do not express an opinion on the effectiveness of the System's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

CLA is an independent member of Nexia International, a leading, global network of independent accounting and consulting firms. See nexia.com/member-firm-disclaimer for details.

Board of Trustees University of Maine System

#### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the System's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

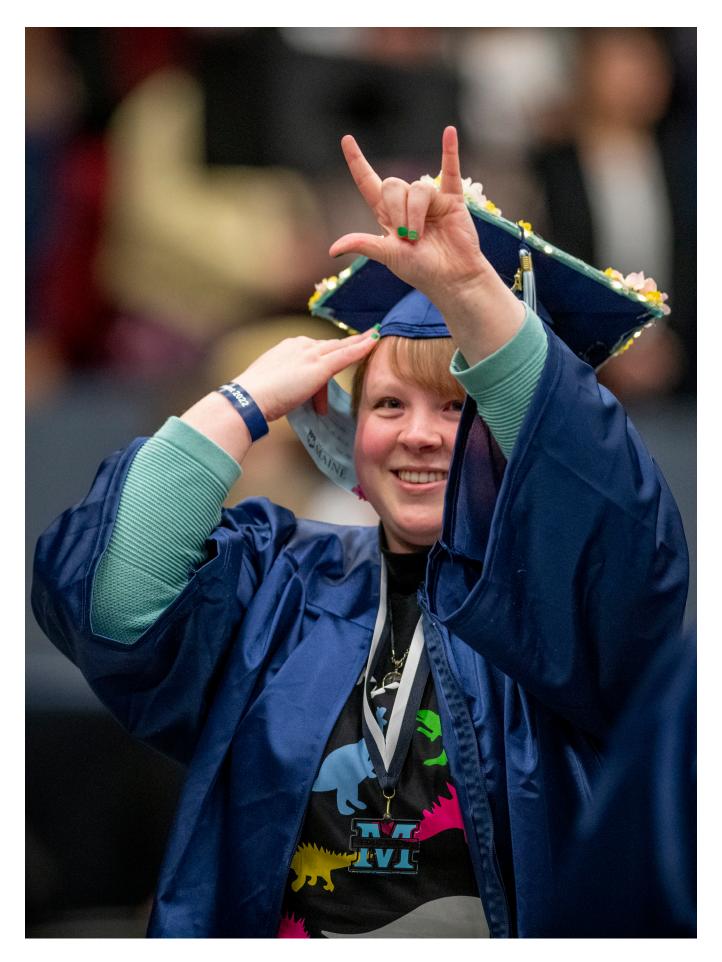

#### **Purpose of This Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the System's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the System's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

#### **AUDITORS MANAGEMENT LETTER**

CliftonLarsonAllen LLP CLAconnect.com

Board of Trustees University of Maine System Orono, Maine

We have audited the financial statements of the business-type activities, the discretely presented component unit and the aggregate remaining fund information of University of Maine System (the System), a component unit of the State of Maine, as of and for the year ended June 30, 2021, and have issued our report thereon dated November 30, 2021. We did not audit the financial statements of the University of Maine Foundation, the discretely presented component unit. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for the University of Maine Foundation, is based solely on the report of such other auditors. We have previously communicated to you information about our responsibilities under auditing standards generally accepted in the United States of America and *Government Auditing Standards*, as well as certain information related to the planned scope and timing of our audit. Professional standards also require that we communicate to you the following information related to our audit.

#### Significant audit findings

#### Qualitative aspects of accounting practices

#### Accounting policies

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the System are described in Note 1 to the financial statements.

As described in Note 18, the System changed accounting policies related to reporting fiduciary activities as aggregate remaining fund information by adopting Statement of Governmental Accounting Standards (GASB Statement) No.84, *Fiduciary Activities*, in 2021. Accordingly, financial information that was historically accounted for in the business-type activities is now reported in fiduciary fund financial statements. The changes adopted to conform to the provisions of GASB No. 84 are applied retroactively by restating the 2020 financial statements. Our auditors' opinion was not modified with respect to this matter.

We noted no transactions entered into by the entity during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

#### Accounting estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimate(s) affecting the financial statements were:

Management's estimate of depreciation is based on the estimated useful lives of capital assets.
 We evaluated the key factors and assumptions used to estimate the useful lives in determining that it is reasonable in relation to the financial statements taken as a whole.

CLA is an independent member of Nexia International, a leading, global network of independent accounting and consulting firms. See nexia.com/member-firm-disclaimer for details.

#### **AUDITORS MANAGEMENT LETTER**

Board of Trustees University of Maine System Page 2

- Management's estimate of the allowance for doubtful accounts is based on historical loss levels, and an analysis of the collectability of individual accounts. We evaluated the key factors and assumptions used to develop the allowance in determining that it is reasonable in relation to the financial statements taken as a whole.
- Management's estimate of the amount of year-end compensated absences payable to
  employees is based on historical trends and anticipated leave time activity. We evaluated the
  key factors and assumptions used to develop the year-end compensated absences payable to
  employees in determining that it is reasonable in relation to the financial statements taken as
  a whole.
- Management's estimate of the earned and unearned portions of summer-session tuition, room
  and board fees is based on number of days for the respective fiscal year as a percentage of the
  total summer days on a calendar basis. We evaluated the key factors and assumptions used to
  develop the earned and unearned portions of summer-session tuition, room and board fees in
  determining that it is reasonable in relation to the financial statements taken as a whole.
- Management's estimate of scholarship allowance is based on an approved NACUBO method.
   We evaluated the key factors and assumptions used to develop the scholarship allowance in determining that it is reasonable in relation to the financial statements taken as a whole.
- Management's estimate of the net other postemployment benefit liability is based on an
  actuarial computed amount. We evaluated the key factors and assumptions used to develop the
  other postemployment benefits liability in determining that it is reasonable in relation to the
  financial statements taken as a whole.
- Management's estimate of the net pension liability is based on an actuarial computed amount.
   We evaluated the key factors and assumptions used to develop the net pension liability in determining that it is reasonable in relation to the financial statements taken as a whole.
- Management's estimate of the fair value of investments is based on prices quoted by the various brokers used for purchases and sales of investments. The System invests in alternative investments which are carried at estimated fair values based on financial information provided by the general partners or investment managers of the funds based on the underlying net asset values (practical expedient). Because many of these investments are not readily marketable, the estimates of fair value necessarily involve assumptions and estimation methods which are uncertain. We evaluated the key factors and assumptions used to determine the fair value of investments, in determining that it is reasonable in relation to the financial statements take as a whole.
- Management's estimate of the self-insurance liability related to workers' compensation and health insurance is based on actuarial valuations that is based on historical claims and exposure data. We evaluated the key factors and assumptions used to estimate the liability in determining that it is reasonable in relation to the financial statements taken as a whole.

#### **AUDITORS MANAGEMENT LETTER**

Board of Trustees University of Maine System Page 3

#### Financial statement disclosures

Certain financial statement disclosures are particularly sensitive because of their significance to financial statement users. There were no particularly sensitive financial statement disclosures.

The financial statement disclosures are neutral, consistent, and clear.

#### Difficulties encountered in performing the audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

However, we want to inform you that we were not able to issue our audit report by October 31, 2021 due to a delay in the completion of the University of Maine Foundation's (the Foundation) financial statement audit. October 31, 2021 is the annual deadline for the System to provide audited financial statements to the State of Maine, who provided the System an extension to November 30, 2021.

#### Uncorrected misstatements

Professional standards require us to accumulate all misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. Management did not identify and we did not notify them of any uncorrected financial statement misstatements.

#### Corrected misstatements

Management did not identify and we did not notify them of any financial statement misstatements detected as a result of audit procedures.

#### Disagreements with management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditors' report. No such disagreements arose during our audit.

#### Management representations

We have requested certain representations from management that are included in the management representation letter dated November 30, 2021.

#### Management consultations with other independent accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the entity's financial statements or a determination of the type of auditors' opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

#### **AUDITORS MANAGEMENT LETTER**

Board of Trustees University of Maine System Page 4

#### Significant issues discussed with management prior to engagement

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to engagement as the entity's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our engagement.

#### Audits of group financial statements

We noted no matters related to the group audit that we consider to be significant to the responsibilities of those charged with governance of the group other than the delay in the issuance of the Foundation's audit as noted above.

#### Quality of component auditor's work

There were no instances in which our evaluation of the work of a component auditor gave rise to a concern about the quality of that auditor's work.

#### Limitations on the group audit

There were no restrictions on our access to information of components or other limitations on the group audit.

#### Other information in documents containing audited financial statements

With respect to the required supplementary information (RSI) accompanying the financial statements, we made certain inquiries of management about the methods of preparing the RSI, including whether the RSI has been measured and presented in accordance with prescribed guidelines, whether the methods of measurement and preparation have been changed from the prior period and the reasons for any such changes, and whether there were any significant assumptions or interpretations underlying the measurement or presentation of the RSI. We compared the RSI for consistency with management's responses to the foregoing inquiries, the basic financial statements, and other knowledge obtained during the audit of the basic financial statements. Because these limited procedures do not provide sufficient evidence, we did not express an opinion or provide any assurance on the RSI.

With respect to the supplementary information required by the State of Maine accompanying the financial statements, on which we were engaged to report in relation to the financial statements as a whole, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period or the reasons for such changes, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves. We have issued our report thereon dated November 30, 2021.

The Chancellor's Letter and schedule of the Board of Trustees and Management accompanying the financial statements, which is the responsibility of management, was prepared for purposes of additional analysis and is not a required part of the financial statements. Such information was not subjected to the auditing procedures applied in the audit of the financial statements, and, accordingly, we did not express an opinion or provide any assurance on it.
