Head Linesman	Nicholas Scarpelli	Alternate	Clyde Sale

### TODAY'S GAME

After a year's interruption, the University of Idaho and the University of Pacific resume a rivalry which dates back to 1953. The Vandals have yet to beat the Tigers, and only a 7-7 tie in 1957 keeps Pacific from holding a perfect mark in the eight-game series. The Tigers clipped the Vandals 27-2 in 1961.

A fairly green team this year, the Tigers have lost their first two games of the season and are just beginning to find themselves. Halfback Chris Machado and four linemen were the only lettermen who returned from last year's team which finished 5-5. The returning linemen included Don Shackelford, a 6-3, 245-pound left tackle, who begins his third year without ever being out of the starting lineup and who is considered one of the finest linemen to play for Pacific.

The Tigers started their fall camp with 43 players. In addition to Machado, three non-lettermen, a sophomore up from the 1962 freshman club and a handful of junior college transfers vied for backfield positions.

John Rohde, who is in his third year as head coach at Pacific, said his line has good speed but lacks depth.

JOHN ROHDE  
Head Coach

*Is the '64 Buick Wildcat really wild?*

*...the wildest!*

Wish we could show you a picture of the '64 Buick Wildcat instead of just "Wildcat people". But that would spoil the surprise in store for you on October 4th. That's when the new Wildcat (and all the other beautiful '64 Buicks) go on display at your local Buick dealer's. Until then, a few tidbits to whet your appetite: three new Wildcat V-8 engines ranging up to 360 hp. Three new transmissions, including a new Super Turbine torque converter automatic with lots more thrust on lots less gas. Four new models: 4-door hardtop; 2-door sport coupe; 4-door sedan; convertible. Above all, they're Buicks!

**What does she mean "cigars...cigarettes...Tiparillos"?**

You'll be hearing that chant more and more—now that Tiparillos have arrived. And arrived they have. In all the right places. With all the right people.

The new Tiparillo has a neat, trim shape. It looks young and debonair. And its pearly, pliable tip pays more than lip service to your smoking pleasure.

And never before such mildness! The most careful blending of choicest imported tobaccos has seen to that. So, too, has the exclusive, veinless Ultra Cigar Wrapper\* that burns so evenly and smoothly it insures complete mildness.

You can even see the mildness. The

surprisingly whiter ash is visible evidence. Smoker's proof. Here is flavor you don't have to inhale to enjoy.

"Cigars . . . cigarettes . . . ?" Who knows, maybe someday it will be just "Tiparillos!"

Why don't you ask for one today?

\*U.S. PAT. OFF. REG. DES. OFF. \*T.M. GENERAL CIGAR CO.

**Tiparillos are on sale at this stadium.**

## "College Role in the Olympics"

by LEO H. PETERSEN  
United Press International Sports Editor

college stars. Like so many others, he is sorry football is not on the Olympic program.

"Football does so much for us I wish it could be represented in the games," said Wilson, "but so long as we are one of the few countries where football is played, that is not possible."

"So while the sport is not represented, it certainly makes its presence felt."

"This year the colleges will raise over \$350,000 of the \$2,000,000 we will need to send our team to Tokyo. And if what they have done in the past is any indication, they will exceed that quota."

In 1956, for instance, the quota was \$500,000 and \$650,000 was raised. In 1960, the quota of \$350,000 was exceeded.

Clarence (Biggie) Munn, athletic director at Michigan State and an outstanding football coach there before he moved up to athletic directorship, is the chairman of the NCAA fund raising committee. He succeeds Willis (Bill) Hunter of the University of Southern California, who was so successful in the past.

Most NCAA members suggest a voluntary contribution of 25 cents on each ticket, and Wilson says the fans have responded "wonderfully". Sometimes the colleges take up collections and the Rose Bowl football game, every year of the Olympic games, puts a special 50-cent charge on tickets and contributes it all to the U. S. Olympic fund.

While no official team standings—other than gold, silver and bronze medal winners—are kept, there is an unofficial point standing, which in the past games at Rome, had Russia beating out the U. S. for the team title.

But Wilson thinks we will have a stronger team in Tokyo, "thanks to our colleges".

"And thanks to them, too," he adds, "I am sure we will raise the over-all total of \$2,000,000 which we will need to send our 1964 squad to Tokyo."

"I am sure, that as in the past two Olympics, college football again will lead the way in our NCAA fund raising campaign. I wish there were some way I could thank the thousands of football fans who contribute to the fund personally."

"Without their support, and without their athletes, our Olympic teams would be in a sorry state."

So the college football fans of the United States are not only viewing and supporting a great sport—they are contributing to many others.

College football, which entertains millions of the nation's sports fans each fall, plays a vital part in the success of the United States Olympic teams every four years.

It raises more money for the United States Olympic Committee than any other sport and will be in the forefront again this fall in the fund raising campaigns for the team which Uncle Sam will send to the 1964 Olympic Games in Tokyo.

The National Collegiate Athletic Association has a quota of \$350,000 to raise for the 1964 games. Most of it will be raised at college football games.

Fund raising, of course, is not the only part the universities and colleges of the nation play in the success of the U.S.A. Olympic teams. They also furnish 25 per cent of the athletes—most of them in track and field, swimming, rowing and basketball. They are the four sports the U.S. usually dominates in these international games.

"Without our colleges and universities we just could not make it, financially or athletically," says Kenneth L. (Tug) Wilson, president of the U. S. Olympic Committee. "They play a most vital part in our picture."

He pointed out that our greatest performances in past Olympic games have come from our

## IDAHO CO-CAPTAINS

**DON MATTHEWS**  
Idaho Co-Captain, Guard

Don Matthews is rated by Coach Dee Andros as one of the top field leaders in collegiate football. A tough ex-Marine, Matthews is a typical college guard. At 5-10 and 205 pounds he's not big enough to catch the eye of the pro scouts, but his combination of solid blocking on offense and sharp tackling on defense makes him a fixture in the Vandal line. Matthews enrolled at Idaho in 1960 and turned out for the frosh football team without invitation and strictly on a make-good basis. The second game of the season he intercepted a University of Washington pass, ran for a touchdown and earned himself a starting job he has never lost. Matthews is 24 and an education major. His home is Amesbury, Mass.

**GALEN ROGERS**  
Idaho Co-Captain, Fullback

Galen Rogers, one of the top ground gainers during his two varsity seasons, is a solid fullback who commands full respect of all the ball players. Faced with the weekly task of defending his first-team fullback berth, Rogers sets an example for the rest of the squad with his determination. Rogers transferred to Idaho from Columbia Basin College in 1960 and played a season as a halfback finishing second in total yards gained. He was out of school the following year, but returned last season as a fullback. Only a mid-season injury robbed him of the rushing title and he finished second again. Rogers is married and the father of the youngest child on the team. His son Galen was born Sept. 3. Rogers is 22 and is majoring in education. His hometown is Clarkston, Wash.

## Why They're Vandals

Since 1918 "Joe Vandal" has been the trademark of University of Idaho athletics. The name was first tagged on the Idaho basketball team when they made a shambles of opposition and were being called the 'Wrecking Crew' by the press in the Northwest. Dean Edward Maslin Hulme of the College of Liberal Arts thought the Idahoans were like the Norsemen of old. Sports Editor Lloyd (Jazz) McCarty, of the student newspaper, the Argonaut, agreed. He started using the appellation "Vandals" and it stuck. In 1921 the name was made official and today all Idaho teams are called Vandals. A large silver and gold Vandal head graces the front of the Student Union in glowing neon lights and the burly, be-whiskered individual can be seen throughout the campus.

## Future Grid Schedules

### 1964

Sept. 19	San Jose State at San Jose
Sept. 26	Iowa at Iowa City

### 1963 SCHEDULE

Pacific 0 - Colorado State 20	Oct. 26—Utah State at Logan
Pacific 8 - West Texas State 32	Nov. 9—San Diego State at Stockton (N)
Oct. 5—San Diego Marines at Stockton (N)	Nov. 16—BYU at Stockton (N)
Oct. 12—Fresno State at Stockton (N)	Nov. 22—San Jose at San Jose (N)
Oct. 19—Idaho at Moscow	Dec. 6—Hawaii at Honolulu (N)

Founded in 1889, the University of Idaho was the first four-year institution of higher learning in the state. During the coming academic year, the University will celebrate its 75th anniversary.

\* \* \*

The University of Idaho is the largest college in the state. Between 4,800 and 4,900 college level resident students—an increase of about 300 over last year—are expected this fall. With its adult education centers throughout the state, summer school, correspondence courses, etc., the University is serving annually more than 10,000 students.

\* \* \*

The campus, considered one of the most beautiful in the West, covers more than 1,200 acres. There are more than a hundred buildings. More than \$8,000,000 in new construction is currently under way on the campus—Physical Sciences Building (\$2,100,000), Wallace Residential Center (\$3,750,000), addition to Student Union Building (\$2,000,000), and addition to Heating Plant (\$500,000).

\* \* \*

Despite its great growth in recent years, the University of Idaho has continued to stress quality education. Close contact is maintained between students and faculty. The current student-faculty ratio is 15.26 to 1.

\* \* \*

That the University of Idaho is attracting top students is apparent from recent studies. Out-of-state students must be at least in the upper half of their high school graduating class to be admitted. There is no such limit on residents of the state. However, a study of freshman from Idaho in the fall of 1962, showed that 77 per cent were in the upper 50 per cent of their high school graduating class. The overall grade average of students attending the University the past year was 2.44 out of a possible 4.0!

\* \* \*

The University of Idaho is one of the most cosmopolitan institutions in the West. It is, of course, dominantly an Idaho institution, with about 80 per cent of the students coming from the state and with all 44 of the counties annually represented. However, more than 40 other states are represented each year as well as more than 25 foreign countries. The faculty, too, is cosmopolitan. Faculty members were educated at more than 200 different universities and colleges.

\* \* \*

The University of Idaho offers an unusually wide variety of college training, and has been called "one of the nation's best-balanced universities." There are nine different colleges and schools—Colleges of Letters and Science (Liberal Arts), Agriculture, Engineering, Law, Mines, Forestry, Education and Business Administration, and the Graduate School.

\* \* \*

The University of Idaho is known as "The Research Center of the State." Currently, there are more than 350 different research projects in process.

\* \* \*

The University of Idaho is fully accredited by the Northwest Association of Secondary and Higher Schools. Its reputation enables the transfer of credits to any other university or college in the nation. In the

last 14 years, every student who applied for medical school and who had a "B" average for all of his college work was accepted. Fifty-four doctors of medicine now practicing in Idaho completed their pre-medical studies at the University of Idaho.

\* \* \*

The University of Idaho has chapters of the nation's leading honoraries such as Phi Beta Kappa, Sigma Xi and Phi Kappa Phi. The University received a chapter of Phi Beta Kappa in 1925—far ahead of many of its contemporaries.

\* \* \*

Located in Moscow with a population of about 12,000 the University of Idaho is largely a residential institution—that is, most of the students live on the campus in dormitories or fraternity and sorority houses. Most of the dormitory space has been provided since World War II, giving the University some of the most modern facilities in the nation. There are 16 fraternities and nine sororities—all leading nationals.

\* \* \*

#### Recognition of high scholastic standing:

In 1946, the George Peabody College Survey Commission, comparing the institution with major universities and colleges of the Middle West, ranked the University of Idaho among the upper 10 per cent of those schools.

In 1953, a survey ranked the University of Idaho second in the nation among the universities and colleges with the highest percentages of chemistry graduates who continue on to receive doctorate degrees.

In 1955, engineering graduates of the University of Idaho at the Army Engineers School gave their alma mater an eighth place rank among 72 universities and colleges.

In 1960, the University of Idaho was ranked among the leading universities and colleges in the nation (55th among 836) for inspiring a high percentage of students to do advanced work and to follow a college teaching career.

Success of graduates is great. (Note for example one of the display boards.)

\* \* \*

Annual costs for room rent, board, dues, registration fees, books and supplies run from about \$782 to \$946. (See pamphlet on details of costs.) State residents pay no tuition. Out-of-state students pay \$310 a year in tuition.

## BIG SKY CONFERENCE

In 1922 the University of Idaho became a member of the Pacific Coast Conference. Forty-one years later the Vandals became charter members of the Big Sky Athletic Conference. Between those two dates there were occasional seasons of joy, a few of sadness and many of indifference.

In the Big Sky, its architects hope that they have blended a league of major schools with similar backgrounds, resources and athletic programs. Idaho, Idaho State, Montana, Montana State, Gonzaga and the West's newest four-year college Weber State have formed the new league.

Jack Friel, former Washington State basketball coach and commissioner of officials for the Pacific Intercollegiate Officiating Bureau is the league's first commissioner.

League play begins this fall in football and cross country with the cross country meet billed for Moscow in early November. The Vandals will not be eligible for a league title in football this season since they only play Idaho State in the loop, but will enter the cross-

country competition. This winter a full round robin basketball league begins with an NCAA tournament bid hanging in the balance.

The value of a league tieup became readily apparent when one considers last season's 20-6 basketball record that failed to attract any tournament offers. In the conference a 10-15 mark will be good enough if the 10 victories are over BSAC opponents. As new basketball Coach Jim Goddard said, "This new league is exciting. Within its structure our teams will have something at which to point, namely a tournament berth."

Competition is billed for 10 sports—football, cross-country, basketball, swimming, skiing, wrestling, baseball, track, golf and tennis. Idaho will field teams in every sport but wrestling during the first season.

League format for the various sports is being established by the commissioner's office and the directors of athletics of the member institutions. A league all-around championship is being formulated as well as the conference championship meets.

## Idaho Notes Famous Former Students

SLIEPCEVICH

### Elena M. Sliepceвич

A 1939 graduate of the University of Idaho, Elena M. Sliepceвич is one of the nation's leaders in physical education. A professor and coordinator of health education at Ohio State University, Miss Sliepceвич is currently serving as Director, School Health Education Study, American Association for Health, Physical Education and Recreation in Washington, D. C. She received her masters' degree from the University of Michigan in 1949 and her doctorate from Springfield College in 1955. She holds membership in 15 national health organizations.

### Dr. Lawrence H. Gipson

This University of Idaho graduate and former member of the faculty has written what has been described as the "greatest single work by an American historian of our time." The quote concerns a nine-volume history of the British Empire before the American revolution written by Dr. Gipson. One of the volumes won the Pulitzer Prize for 1962.

Dr. Gipson was graduated in 1903 and was selected as a Rhodes scholar to study at Oxford. In 1926, he was elected to Phi Beta Kappa, national scholastic honorary, and holds honorary doctorate degrees from the University of Idaho, Yale, Temple and Lehigh universities and Kenyon College. His writing has won the Justin Winsor prize and the Loubat prize in addition to the Pulitzer prize.

GIPSON

DAVIS

### A. Darius Davis

Mr. Davis, who began his grocery career in 1917 as a delivery boy, is today one of the nation's leaders in the field. He, his three brothers and their father started in business in Miami, Fla., in 1925. In 1939, they purchased control of the Wynn & Lovett Grocery Company of Jacksonville and have built it into one of the largest grocery chains in the nation.

A 1929 graduate of the University of Idaho, who received an honorary Doctor of Law degree in 1961, Davis is a former chairman of the Florida Council for Industry and Commerce and is a director of Atlantic National Bank and Southern Bell Telephone & Telegraph Co.

### Charles A. Connaughton

Charles A. Connaughton, a native of Placerville and a 1928 graduate of the University of Idaho, is a U.S. Forest Service Regional Forester in San Francisco. His outstanding work rated the Superior Service Honor Award from the Secretary of the Department of Agriculture.

He has been employed by the U.S. Forest Service since graduating from Idaho. Mr. Connaughton received a Master of Forestry degree from Yale in 1934. He has worked in research, directing several research facilities concerned with range and watershed use, multiple use and sustained yield. He is vice president of the American Forestry Association, president of the Society of American Foresters and a member of its council.

CONNAUGHTON

YOUNG

### Walker R. Young

A 1908 engineer graduate of the University of Idaho, Mr. Young rose in his profession to become chief engineer of the Bureau of Reclamation from 1945 to his retirement in 1948. He started as an assistant engineer in charge of the design and inspection of the Arrowrock Dam, worked as construction engineer at Boulder Dam and guided it to completion two years ahead of schedule, then served as assistant chief engineer of the Bureau of Reclamation in 1940. His foreign assignments include work in Western Germany, Switzerland, Italy, France, India, Puerto Rico, Colombia and Venezuela.

### H. Myrl Stearns

One of the outstanding men in the field of electronics in the world is H. Myrl Stearns, president of Varian Associates, an international firm dealing with radar, communications and electronics. He received a B.S. from Idaho in 1937 and an E.E. in 1939 from Stanford. Mr. Stearns helped refine the development of radar and its use during World War II. After joining Varian Associates in 1948 as executive vice president and general manager, he guided the group from a payroll of six employees to more than 4,000 today. Mr. Stearns holds patents in the field of automatic frequency controls and automatic ranging and has authored numerous articles on radar, microwave tubes and engineering management.

The Federation Movement

# A New Era for American Sports!

by OLIVER E. KUECHLE

Sports Editor

The Milwaukee Journal

A new concept in the conduct and administration of amateur athletics in this country has taken deep root. It is evolutionary. It is sound. It is an inevitable development as participation in our ever-expanding athletic programs grow.

It is known as the federation movement.

At the moment, it embraces four sports: track and field, basketball, gymnastics and baseball. In time, it will undoubtedly embrace others.

Each field has its own federation. In each, which is the evolutionary part of the concept, the educational community at last has its proper representation through the National Collegiate Athletic Association, the National Federation of State High School Athletic Associations, the National Junior College Athletic Association and other representative agencies. Conservatively, these three organizations, with other federation members, represent more than 85% of the amateur interests in the United States.

The question has been asked: Why new federations? Why? Since kerosene lamps also provided light, why electric lights?

The answer to the federation movement is simple. Those who are the primary contributors to amateur athletics, the schools, believe—nay, now insist—that they have the right to share in the responsibility of establishing policy directly affecting their own programs. They have not had such right in the past. They have merely tagged along. It is the basic philosophy among educational institutions that educators and administrators alone determine the course of their athletic programs within the framework of the over-all educational concept. There can be no retreat from this—no further indifference either.

The federation movement allows all nationally recognized organizations to have voice and vote in establishing basic policy in each sport. It provides, further, that no two organizations within a federation can ever gain control.

Each federation is autonomous. Each operates independently. A few national organizations belong to all four federations. Others belong only to the federation which directly concerns their sport.

The movement is not limited to educational institutions. It has a place for all. Even in these beginnings, most major amateur sports organizations have joined as partners. The one strident dissenter has been the Amateur Athletic Union. It has steadfastly declined all invitations to join.

Through federation programs, the country cannot help but benefit. There will be improved development oppor-

tunities, increased competition, enlightened administration. We as a nation cannot help but have stronger representation in international and Olympic competitions.

Here is a brief look at the individual federations:

**United States Track and Field Federation (USTFF).** It was organized July 24, 1962, and consists of 10 national organizations. In less than a year it has sponsored three national championship meets, a national track clinic and has embarked on an extensive development program for all age groups. It is organized in more than 40 states, with each state conducting its own program of development and competition. The Gulf Coast Federation (Texas) conducted a cross-country meet, for instance, which drew 475 runners and the Michigan Federation held an indoor track meet which drew 625 boys and girls. Outspoken in praise of the USTFF has been Executive Secretary Cliff Fagan of the National Federation of State High School Athletic Associations: "We (high schools) have always had the biggest potential but, until the federation movement, we have never fully realized our potential."

**Basketball Federation of the United States (BFUSA).** The 10-member federation, organized July 1, 1962, represents almost all of the organized amateur basketball played in the United States. It has been recognized by the international governing body and will assume independent international sanctioning privileges beginning January 1, 1964. It has a definite program to improve this country's image internationally through better representation in world games and increased international competition. Several countries have already indicated new interest to send their teams to this country in the season just ahead.

**United States Gymnastic Federation (USGF).** The federation, organized December 9, 1962, has already become the dominant force in gymnastics in this country. A national championship was held in June. Clinics have brought expert gymnastic instructions to coaches and competitors. The federation has embarked upon an intensified national program to popularize gymnastics, particularly among school-age boys and girls.

**United States Baseball Federation (USBF).** The federation has a basic two-fold program: (1) to help amateur baseball in whatever way it can and (2) to provide the United States with an organization to promote baseball internationally. Under the auspices of the state department, the USBF last summer provided a group of collegiate baseball coaches and players to conduct instructional clinics in Central America.

The new school year brings great new opportunities to the entire federation movement.

## Three ways to quarterback the most important drive of the day —your drive home

1. Don't buck the line of traffic, stay in it. Fancy open field running doesn't pay on the highway.
2. When dusk falls and your visibility is limited, slow down and turn on your lights. What you can't see can hurt you.
3. Don't try to beat the clock by speeding. Remember, when time runs out on the highway, everybody loses.

*Presented in the interest of safe and sane driving  
by the R. J. Reynolds Tobacco Company.*
