

Introduction to Proceedings of ISCSET 2022

For the first time in its history, the proceedings of the 11th International Symposium on Computer Science, Computer Engineering and Educational Technologies (ISCSET-2022) is published in a special issue of the Embedded Self-Organizing Systems journal of the Chemnitz University of Technology.

Following 2 years of online organization in 2020 and 2021 as a result of the Covid-19 pandemic, ISCSET 2022 was hosted by the European Medical University in Tashkent, Uzbekistan from the 24th to 26th, October 2022 in a hybrid format. Strengthening the visibility of ISCSET in Central Asia following the addition of the L.N. Gumilyov Eurasian National University in 2020, ISCSET is proud to have acquired another valued and trusted partner in the region.

Established in 2021, the European Medical University is among the pioneers of its field as it is the first private Medical University within Uzbekistan. Despite its relatively young age, it is tasked with the lofty objectives of training high-quality medical specialists in the country, expanding opportunities for the younger generation to receive quality education and establishing research and educational cooperation initiatives with local and international medicine. In short, the University seeks to accelerate the advancement of the medical field of Uzbekistan.

ISCSET 2022 is being organized within the framework of enhancing the European Medical University’s research and cooperation initiatives and to enhance the international visibility of the university. The European Medical University is confident that ISCSET 2022 will serve as a strong foundation for future cooperation with the symposium as well as its partner institutions.

We are encouraged to have received a wider range of contributions to the ISCSET proceedings than ever before. This is surely a testament to the continued growth of the summer school that started in 2011 with only 19 participants and two partner institutions. We are confident that ISCSET will continue to grow and prosper in the coming years.

We welcome universities, professors and scholars to our symposium with open arms as we believe that the interdisciplinary exchange of ideas and experiences is the main

driver of research and innovation.
