Agenda

The Issue:

Two perspectives

Frontline working learners

Employers

COVID-19's Impact on the Worker & Workplace

<https://www.cdc.gov/coronavirus/2019-ncov/community/guidance-business-response.html>

Who are frontline service workers?

40% work on retail, healthcare, food service and hospitality

The majority make less than \$30,000 per year

30% are under the age of 35

60-70% have job-limiting foundational skills (e.g. literacy, numeracy, problem-solving)

Constantakes, P., & Noakes, S. (2019). Tapping data for frontline talent development. Retrieved from Digital Promise website: <https://digitalpromise.org/tapping-data-frontline-talent-development/#current-ecosystem>

Research Questions

What are the experiences of working learners in employer sponsored learning?

What motivates frontline service workers to participate in employer sponsored learning opportunities, many of which are offered online?

What factors support working learners' continued participation and their success?

.....and how has this changed?

Goals & Purpose

Adult learners take part in **many different kinds** of learning (in the workplace and beyond)

Find out

...what opportunities learners are offered and are taking part in

Encourage and Support

....sustained participation and connections between and across settings

Coworkers

Computers

Mobile devices

Family

Researcher Perspective

Underlying Understandings & Foundation

Working learners are not a homogeneous group

Learners make strategic decisions about where they want to put their time and effort.

Learning offerings differ - based on a variety of factors.

Independent learning is an visible option for many learners

Worker learners in the center

Learners make strategic decisions about where they want to put their time and effort.

Working learners are not a homogeneous group

Learning Preferences

Learners develop their skills across their day and lives

Independent mobile learning

Learning offerings differ - based on a variety of factors.

Independent learning is a visible option for many learners

Asking colleagues, watching managers

Portland, OR Metro Demographics

- Population (4 counties): 2,283,827
 - Education:
 - High School Graduation rate 80%
 - High school diploma or higher 92.2%
 - Bachelors or higher 49%
 - Regional Literacy Rates (as measured by PIAAC):
14.3% Level 1 or less
 - Poverty: 12.7%
 - Immigration Patterns: Mexico (37%), China (6%), Vietnam (5.2%), India (4.1%), and Canada (3.6%).
 - English Language Learners: 3.2%
- | | |
|---|--------|
| White | 81.15% |
| Hispanic or Latino | 11.90% |
| Asian | 7.20% |
| Black or African American | 2.80% |
| Two or More Races | 4.14% |
| American Indian & Alaska Native | 1.00% |
| Native Hawaiian &
Other Pacific Islander | 0.59% |

Portland, OR Metro Economy and Labor Market

- Portland Metro is Oregon's largest workforce.
- 81% of jobs in Oregon connected to international trade and tourism.
- 12.4% projected growth across all sectors (2018)
- Top industry: Food service
- Jobs held by immigrants in order of rate: manufacturing, hospitality and food service, health care, retail, agriculture.
- Hospitality, Healthcare, and Retail have taken the biggest hits due to the Covid-19 pandemic.

Portland, OR Metro Digital Inclusion and Equity

- Digital distress indicator*:

Clackamas County: 12.27,

Multnomah Cty: 21.54,

Washington Cty: 2.89,

Clark Cty (WA), 8.13

- Households with computers: 93.30%
- Households with broadband: 86.7%
- Broadband penetration rate: 22% of census blocks have no wireline providers at 25↓/3↑ or faster.

*Digital distress indicator: Census tracts with a high percent of homes not subscribing to the internet or subscribing only through a cellular data plan and a high percent of homes with no computing devices or relying only on mobile devices. A score over 50 indicates digital distress

Twin Cities Metro Area (Minneapolis, Bloomington, St. Paul)

Population: 882,645

- Poverty: 14%
- Immigration Patterns:
- White 65.7%
- Black/African American (Includes Somali & other African immigrants 14.7%)
- American Indian 1%
- Asian 10%
- Hispanic 8%
- English Language Learners: 5%

Education:

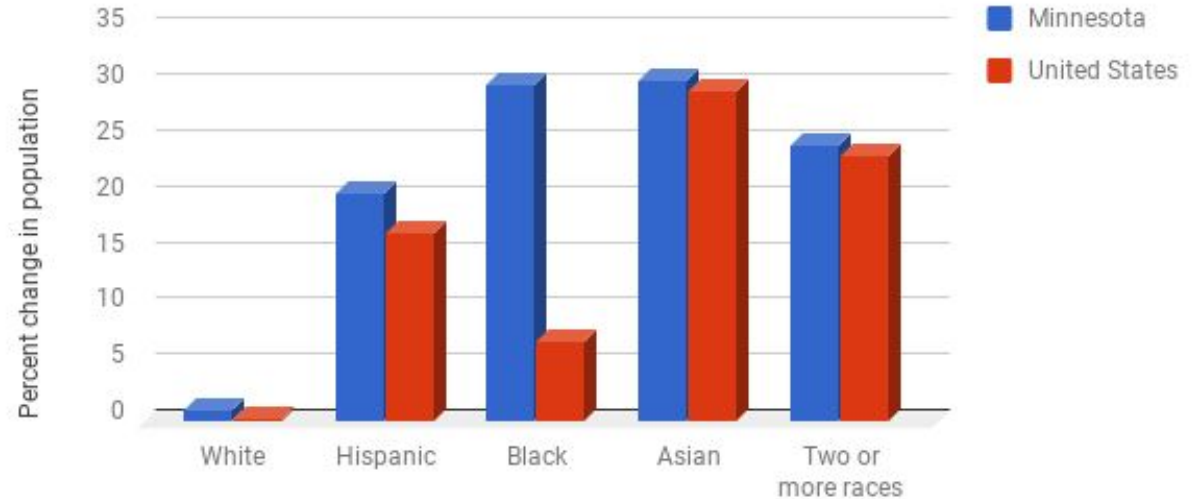

- High School Graduation rate 89.6%
- High school diploma or higher ???
- Bachelors or higher 43.5%
- Regional Literacy Rates (as measured by PIAAC): 15% Level 1 or less

Minneapolis - Ethnicity Reported in US Census

- White alone - 65.70%
- Black or African American alone - 14.73%
- American Indian and Alaska Native alone - 0.93%
- Asian alone - 10.10%
- Two or More Races - 4.60%
- Hispanic or Latino - 9.20%
- White alone, not Hispanic or Latino - 61.33%

Minnesota is growing more diverse at a faster rate than U.S.

Latest 2017 Census figures show population percentage growth compared to 2010.

Source: U.S. Census

MINNEAPOLIS

- The Twin Cities is Minnesota's largest workforce.
- Office & admin 14.4%, 13.5% healthcare, 9.7% sales, food prep & service 8%
- Median hourly wage for all occupations in the Twin Cities Metro Area was \$22.78 in the first quarter of 2019
- 6.8% projected growth across all sectors - including industries w/ frontline service workers (2019 data).
- Jobs held by immigrants: 24% in service occupations (health care support, protective service, food preparation and serving, building and grounds cleaning, and personal care occupations.)
- Jobs in Accommodation/food services, health care/social assistance, and retail have taken the biggest hits due to the Covid-19 pandemic.

Minneapolis/St. Paul Metro Digital Inclusion and Equity

- Digital distress indicator*: 21
 - 22 - Minneapolis
 - 26.15 St Paul
 - 14.8 Bloomington
- Households with broadband: 83.3%
- Households with computers: 91.6%
- Broadband penetration rate (of blocks have *no* wireline providers at 25↓/3↑ or faster)
 - Minneapolis - 7%
 - St Paul - 18%
 - Bloomington 13%

*Digital distress indicator: Census tracts with a high percent of homes not subscribing to the internet or subscribing only through a cellular data plan and a high percent of homes with no computing devices or relying only on mobile devices. A score over 50 indicates digital distress

Poll - What are some stereotypes about adult basic skills learners who are also working?

Personas

- Created to understand users
- Helps to better serve needs and goals of users
- Is a representation of characteristics
- Invites the reader into shared understanding

<https://edtech.worlded.org/person-a-development-as-a-research-tool>

Persona development process

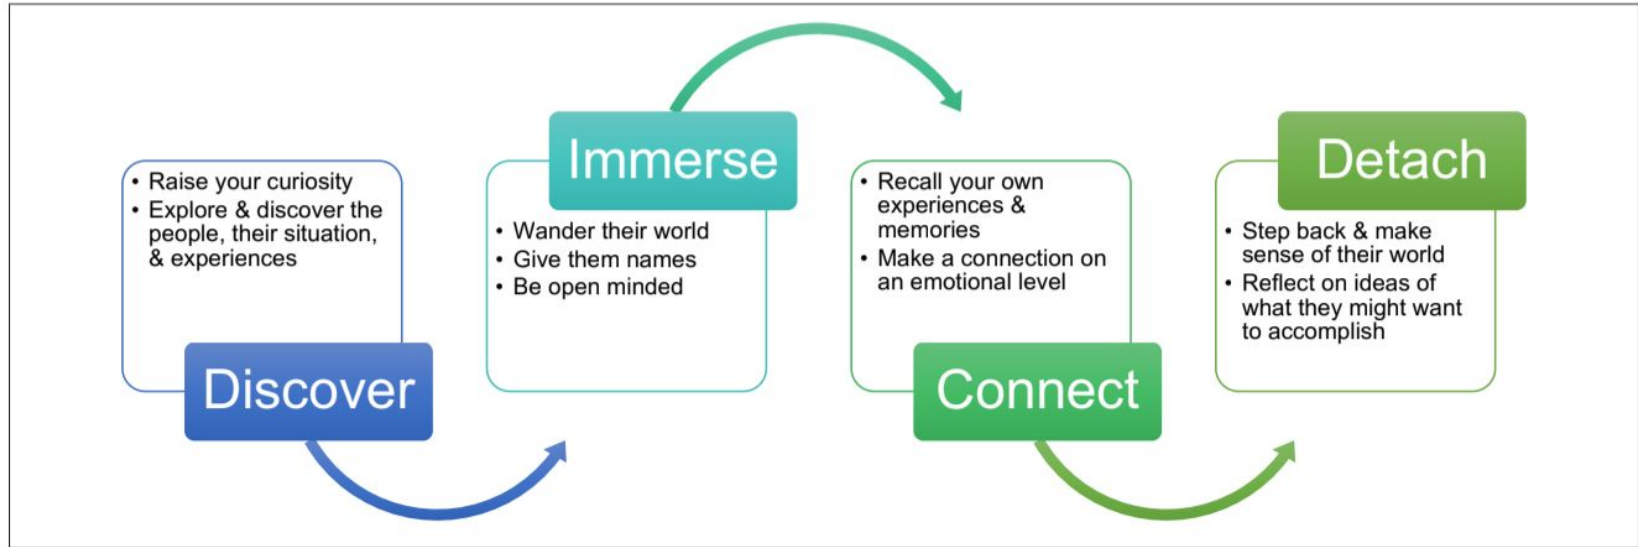

FIGURE 1. The 4-phase framework of empathy in design practice (from Kouprie & Visser, 2009).

Different reasons for participating

Foundational skills

To satisfy a job
requirement

To earn a
degree or
certificate

To move up in their current or chosen job or career

Learning in pursuit of degree or certification

On hold

Learning required for work

Short term goal: taking extra classes to expand work and career opportunities and to make her a more valuable team member at work

- **Education:** High school with some college courses
- **Position:** Retail in national drugstore chain
- **Long term goal:** To move into a different industry
- **Barrier:** Learning disability makes learning take longer
- **Supports:** Encouragement from trusted mentor or supervisor; family sharing household responsibilities
- **Technology for learning** makes learning more flexible

Yeah, if you're working in the pharmacy they offer classes every Tuesday and Thursday to where you can go in, they teach you everything you need to pass, you know, to become a certified pharmacy tech. Like they'll pay for the test or they you know pay for all your books but you have to go the class on Tuesdays and Thursdays. And then you can uh, once you pass your certification you'll be you know uh certified pharmacy tech.

Poll: What did we miss?

What supports are needed by learners engaged in required for work?

Learn English as a stepping stone: return to previous career

- **Short-term goal:** Improve expressive and receptive American English skills
- Encouraged by front-line supervisor to attend class

- **Education:** 4 year college degree in country of origin
- **Position:** “Front of the house” position
- **Long-term Goal:** To transition into original career track
- **Barrier:** Time and money
- Takes class while “on the clock”
- Uses computer and smartphone for independent learning

“I ... work 2 jobs you know 16 hours per [day] You have to support your family at the same time [send money] back to home yeah so actually the main thing is the time, we don't have time.”

Poll - Learning required to return to previous career.

What supports do learners need?

Learn English as a stepping stone: to move into a different field

- **Short-term goal:** Improve expressive and receptive American English skills
- Encouraged by front-line supervisor to attend class

- **Education:** High school education in country of origin
- **Position:** “Back of the house” position (food prep)
- **Long-term Goal:** More education and a different job
- **Barrier:** Few opportunities to speak English
- Takes class “off the clock”
- Uses computer and smartphone for independent learning but wishes he had better computer skills

*“I believe that learning is future.”
“Never I stop. I always try.”*

Poll - English as a stepping stone to different field

What supports do learners need?

Interviews with Stakeholders

Contexts Differ

And Context Matters

1

Some Stakeholders implement a Top Down Approach

Disconnect between what stakeholders think is important for learners and what learners themselves want and need

2

Some Stakeholders look for feedback directly from the Employers their programs serve

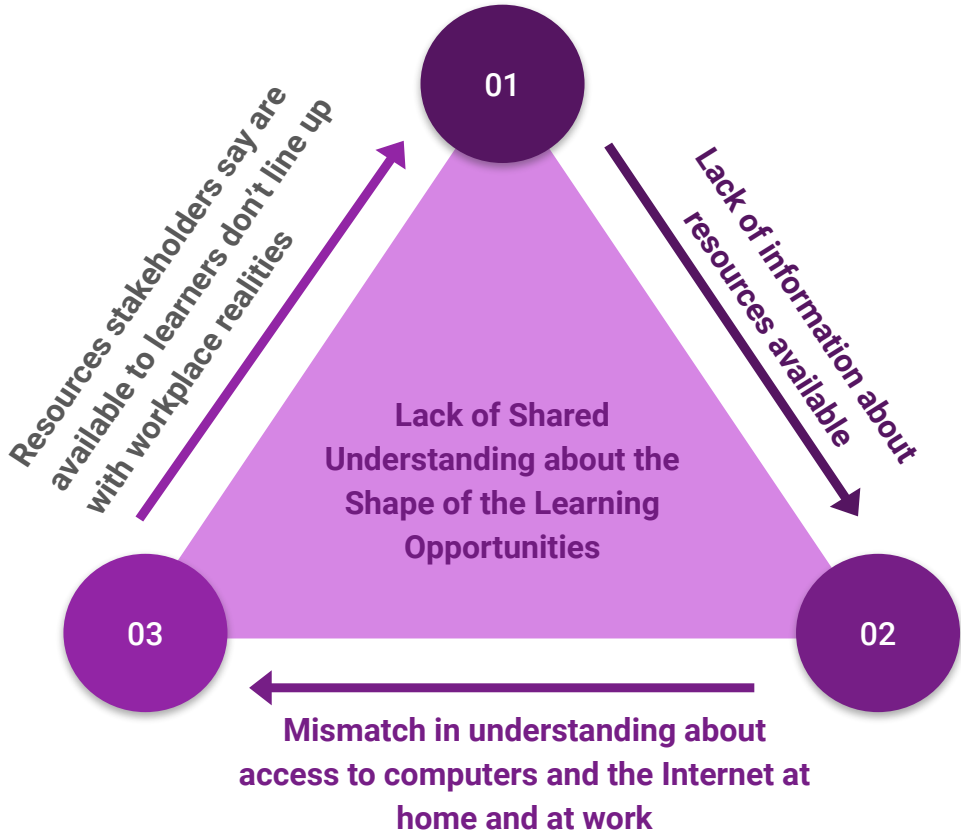

Use survey data to look for change in communication skills and also if they find value in providing the learning opportunity

3

Some Stakeholders go directly to the learners to find out what they need

Learners' persistence and motivation is looked at and asked about and used to make learning opportunities fit learners' needs

Interviews with Stakeholders

Moving into more analysis.... And data collection

But the world is now different....

[The Dawn of the Age of Digital Learning](#)

“... 30+ million people claiming unemployment in just the past 6 weeks, the Coronavirus has brought forth pressure ... to reskill unemployed and furloughed adults at scale. the best enterprise leaders will need to allocate more spending on digital learning and upskilling opportunities for their employees.”

Michael Moe and Vignesh Rajendran

Poll - Inviting your voice to help us look ahead.

Given the changing nature of employment and learning, what do you think the field should be thinking about next?

TWENTY FIRST CENTURY LEARNING ECOSYSTEM NEWS (LENS)

Welcome to our interactive blog for the **21st Century Learning Ecosystem Opportunities** project. Here you can take part in discussions and keep up to date on this three-year research project. The project responds to the need for employers, educators, and policy makers to better understand the characteristics of learning opportunities available to frontline service workers.

PROJECT BACKGROUND

This collective effort seeks to identify the factors that incentivize frontline service workers to engage in workplace-sponsored learning activities that support development of 21st century skills, including specific workplace skills, digital literacy, English language and literacy, problem solving, and adult basic skills. Central to this study is elevating the voice of the working learner.
