THE PERCENTAGE OF PEOPLE WHO RECEIVE VR SERVICES VARIES GREATLY ACROSS STATES

By Alberto Migliore

Data Source: FY2020 Rehabilitation Services Administration (RSA) 911

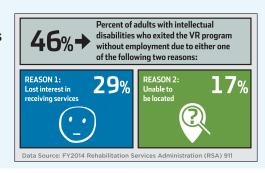

Receiving vocational rehabilitation (VR) services is a key step toward employment. In fiscal year 2020, a total of 33,144 job seekers with intellectual disabilities received VR services across the 50 states and DC. This represents 80% of the total people who exited the VR program in that year.

However, this figure varied substantially across states. For example, in Vermont 93% of people with intellectual disabilities received services, the highest percentage across states. In contrast, Nebraska reported only 34% of people with intellectual disabilities receiving services, the lowest figure. Table 1 shows the figures for all states and DC sorted from highest to lowest. Although the causes of these differences across states are not fully understood, they are likely to be related to the socioeconomic characteristics of states and differences in how state VR agencies engage with their constituencies.

Table 1. Job seekers with intellectual disabilities receiving vocational rehabilitation services

Learn about why adults with intellectual disabilities might exit VR before getting a job:
