It has been accepted for inclusion in Substance Use Research & Evaluation by an authorized administrator of USM Digital Commons. For more information, please contact jessica.c.hovey@maine.edu.

Time to Ask Program At Greater Portland Health

64%
of trainees
were clinical
staff

5
practice
locations

96
staff
members
trained*

*At least
one module

Program components include a blended-learning curriculum and monthly practice facilitation consisting of support and consultation from experts.

Participants believed that the modules were informative, engaging, and effective

88%
of non-clinical staff
believed that the
trainings were a
good use of their
time

92%
of all staff believe
language and
approaches matter
when working with
people who drink

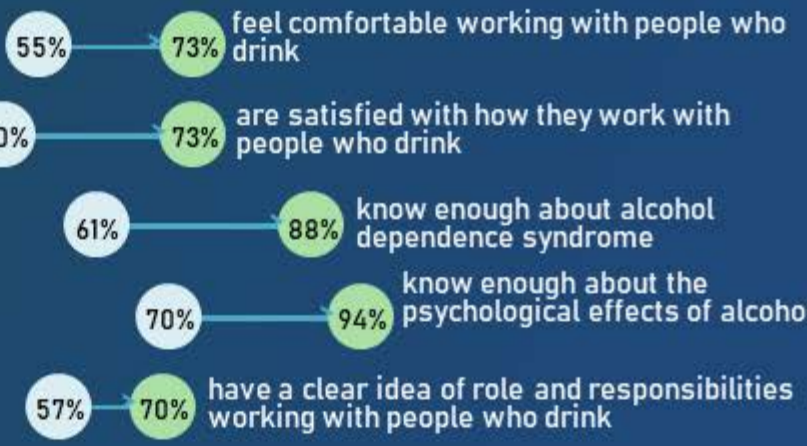

"[I] don't connect with patients but I think the module raised my awareness and offered valuable statistical information."

"Viewing their alcohol use as multifaceted and not a reflection of personal failure is something I continue to try and implement in my mindset at work every day."

Program implementation improved staff attitudes, beliefs, and knowledge about working with patients who drink

before → after TTA implementation

Compared to the pre-survey, post-survey respondents had **significantly higher mean scores** in the domains of **self-rated knowledge** and **self-esteem** in working with people who drink

TTA helped support GPH providers and staff in confronting barriers to incorporating screening into practice.

Post-survey respondents felt like their organization facilitated their use of screening tools
