RAE2015 OF THE UNIVERSITY OF TURKU

BIBLIOMETRIC ANALYSIS FOR THE UNIVERSITY OF TURKU 2010-2013: PART 2

Bibliometric analysis for the University of Turku 2010-2013: Part 2

22.2.2016

Authors: Elise Johansson
Katja Halonen
Kristiina Hintikka
Leena Järveläinen
Leeni Lehtiö
Christel Lund
Susanna Syrjäsoo
Anu Valtari

Acknowledgements

The report was prepared in the Turku University Library under the direction of Vice Rector Kalle-Antti Suominen and Project Manager Pirkko Mäenpää.

The work at the library was led by the Head of Library Services Jukka Rantasaari and coordinated by Chief Information Specialist Elise Johansson. The report was coordinated by Information Specialists Katja Halonen and Kristiina Hintikka. The main contributors were Information Specialists Leena Järveläinen, Leeni Lehtiö, Christel Lund, Susanna Syrjäsuo and Anu Valtari.

The report data was also prepared by all information specialists at the Turku University Library. The whole library personnel effort has been valuable in making this work possible.

Comments on the report would be gratefully received and should be sent by e-mail to:

Introduction

As a part of the Research Assessment Exercise Turku University Library was commissioned by the Vice Rector Kalle-Antti Suominen to carry out a bibliometric analysis for the Units of Analysis for which the coverage of publications in the Web of Science citation index was insufficient.

The Turku University Library conducted the bibliometric analysis to supplement the bibliometric analysis by the Centre for Science and Technology Studies (CWTS) of the Leiden University. The bibliometric analysis by the library consisted of two parts.

This second part of the Turku University Library's report analysed the distribution of publications according to the Finnish Publication Forum ratings of 2014 across the publication types A-C of the Finnish Ministry of Education and Culture's classification of publications (Ministry of Education and Culture Publication Data Collection Manual 2014). The report covered the time period 2011-2013 and included all Units of Analysis. The year 2010 was not included in the analysis, because the Finnish Publication Forum classification, introduced in 2012, was used for the first time in the Ministry of Education and Culture publication data collection for the year 2011.

The first part of the Turku University Library's report analysed the publishing activity, language, the internationality of publication and international collaboration at the university, faculty and unit level. The report covered the publications of the Units of Analysis of the Faculty of Humanities, Faculty of Education, Turku School of Economics, Faculty of Law and Faculty of Social Sciences. For the Faculty of Medicine and Faculty of Mathematics and Natural Sciences, which have a good coverage in Web of Science and therefore received an analysis by CWTS, the analysis in the library was carried out only at the faculty level.

Data and methods

The publication data in this second part of the library analysis included the 2011-2013 publication output of the University of Turku. The 2013 publication data could be exported from the Current Research Information System of the University of Turku, which was introduced in 2013, but the data required some processing. The 2011-2012 data was available in other formats and required a significant amount of manual processing. The 2010 data was excluded from this second part of the analysis, because 2011 was the first year in the Ministry of Education and Culture publication data collection where the Finnish Publication Forum classification was used.

Based on the publication data, the information specialists of the Turku University Library analysed the distribution of publications according to the Finnish Publication Forum ratings. All publications were upgraded to the Publication Forum ratings of 2014. The publication categories A-C of the Finnish Ministry of Education and Culture's classification of publications were included in the analysis. (Ministry of Education and Culture Publication Data Collection Manual 2014)

Publication Forum (JuFo)¹ classification system of academic journals, publication series and publishers was created to support the quality assessment of research output. The evaluation of publication levels is performed by national expert panels. There are three levels of publication channels: 1 = basic level, 2 = leading level and 3 = highest level. The classification is intended to be used for the evaluation of large publication volumes.

In the analyses, the whole counting method of publications has been used. This means that one publication can be included in the publication count of several faculties and Units of Analysis. Due to this, the publication counts are different between the university, faculty and unit level of analysis.

It is noteworthy that, especially when the publication counts are low, caution should be used in the interpretation of the results. Furthermore, the reader is requested not to make comparisons between the different disciplines or Units of Analysis. It should be remembered that the units are different in size and have different publication cultures depending on the discipline in question.

¹ For more information on Publication Forum, see <http://www.julkaisufoorumi.fi/en>

Publication Forum analysis for the University of Turku

Publishing in Publication Forum (JuFo) classified publications

The following table and figures present the distribution of publications (publication types A-C) at different Publication Forum levels for the University of Turku in 2011-2013. The analyses have been carried out by publication type, year, Publication Forum level and faculty.

Table 1. University of Turku. Number of publications (publication types A-C) by type, Publication Forum level and year for years 2011-2013 (n=11215)

Publication type Publication Forum level	2011	2012	2013	Total	% of publication type

Publication Forum analysis for the Faculty of Law

Publishing in Publication Forum (JuFo) classified publications

The analysis data for the Faculty of Law is similar on the faculty level and on the departmental level. Therefore the results from the faculty and departmental level are presented in the same report.

The following tables and figures present the distribution of publications (publication types A-C) at different Publication Forum levels for the Faculty of Law in 2011-2013. The analyses have been carried out by publication type, year and Publication Forum level.

Table 37. Faculty of Law. Number of publications (publication types A-C) by type, Publication Forum level and year for years 2011-2013 (n=429)

Publication type Publication Forum level	2011	2012	2013	Total 2011-2013	% of publication type
