In the original published version of this article, there were 2 minor typos in the Abstract and Conclusion sections, which reversed the intended meaning of these statements. In the Abstract, the sentence "At the same time, they consider that the animal's living conditions, their hygiene, and the existence of shelters for injured animals to be inadequate" has been corrected to "At the same time, they consider that the animal's living conditions, their

hygiene, and the existence of shelters for injured animals to be adequate."

In the Conclusion, the statement "However, they consider the existence of shelters for injured animals to be inadequate" has been corrected to "However, they consider the existence of shelters for injured animals to be adequate." The authors apologize for these errors. Both the HTML and PDF versions of the article have been updated to correct the errors.
