If a company uses a pricing service for its fair value measurements, the auditor should determine the nature of the information provided by the pricing service. For example, the auditor should understand whether the fair value measurement was determined using quoted prices from an active market, observable inputs (such as prices for similar assets), or fair value measurements based on a model, and adjust his or her audit procedures based on the nature of the information provided by the pricing service.[26] In addition, if the price is not based on quoted prices from an active market or observable inputs (such as prices for similar assets), the auditor should obtain an understanding of the model and evaluate whether the assumptions are reasonable.[27]

There are additional factors for the auditor to consider under SFAS 157. For example, under SFAS 157, a fair value measurement assumes that the transaction occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. The principal market is one in which the reporting entity would sell the asset or transfer the liability with the greatest volume and level of activity. If there is a principal market, under SFAS 157, the fair value measurement represents the price in that market even if the price in a different market is potentially more advantageous.[28]

Under SFAS 157, when a company uses a pricing service, the auditor should evaluate whether the assumptions used by the pricing service reflect the price to sell the asset or paid to transfer the liability in the principal market (or most advantageous market if the company has no principal market) of the company. If the pricing service valuation is based on actual trades or quotes, the auditor should evaluate whether those traded or quoted prices would be available to the company in the company's principal market (or most advantageous market, if the company has no principal market). For example, a pricing service might provide an amount for which a large financial institution could sell the financial instrument. However, a company that owns that financial instrument might not be able to transact in the same market as a large financial institution. If the price available to a large financial institution would not be available to the company, then that price may not be an appropriate measure of fair value under SFAS 157.

.03 Staff Audit Practice Alert No. 3

Audit Considerations in the Current Economic Environment

December 5, 2008

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Recent events in the financial markets and the current economic environment may affect companies' operations and financial reporting and, in turn, may have implications for audits of financial statements and internal control over financial reporting. Audit risks that may have been identified previously may become more significant or new risks may exist due to current events (e.g. those affecting the economy, credit and liquidity). Among other things, the current uncertainties in the market and economy may create questions about the valuation, impairment, or recoverability of certain assets and the completeness or valuation of certain liabilities reflected in financial statements.

The purpose of this staff audit practice alert is to assist auditors in identifying matters related to the current economic environment that might affect audit risk and require additional emphasis. While the alert highlights certain areas, it is not intended to identify all areas that might affect audit risk in the current economic environment or serve as a substitute for the relevant auditing standards. All audits of issuers must be conducted in accordance with the standards of the PCAOB.

The practice alert is organized into six sections—

- Overall audit considerations;
- Auditing fair value measurements;
- Auditing accounting estimates;
- Auditing the adequacy of disclosures;
- Auditor's consideration of a company's ability to continue as a going concern; and
- Additional audit considerations for selected financial reporting areas.

In order to provide guidance to auditors on audit considerations in the current economic environment, this practice alert necessarily describes generally

accepted accounting principles ("GAAP") used by public companies in various areas. The Board, however, has no authority to prescribe the form or content of an issuer's financial statements. That authority, and the authority to make binding determinations concerning an issuer's compliance with GAAP, rests with the U.S. Securities and Exchange Commission ("SEC"). Accordingly, while this staff audit practice alert describes applicable GAAP, it should not be understood as establishing or interpreting GAAP.

Overall Audit Considerations

The following section describes overall audit considerations related to planning, fraud, internal controls, substantive procedures, and communications with audit committees that may be affected by recent events in the financial markets and current economic conditions.

Planning considerations

The effects of current economic conditions on a company's operations and financial reporting may affect audit planning. In planning the audit, the auditor should consider, among other things, matters affecting the industry in which the company operates, including the economic conditions.[1]

As the audit progresses, changed conditions may make it necessary to modify planned audit procedures.[2] Accordingly, the auditor may need to reassess audit risks and update his or her understanding of how current economic conditions may affect the company's financial reporting. Knowledge of these effects helps the auditor in—

- Identifying areas that may need special consideration;
- Assessing conditions under which accounting data are produced, processed, reviewed, and accumulated within the company;
- Evaluating the reasonableness of estimates, such as valuation of inventories, depreciation, allowances for doubtful accounts, and percentage of completion of long-term contracts;
- Evaluating the reasonableness of management representations;
- Making judgments about the appropriateness of the accounting principles applied and the adequacy of disclosures.[3]

Whenever the auditor has concluded that there is significant risk of material misstatement of the financial statements, the auditor should consider this conclusion in determining the nature, timing, or extent of procedures; assigning staff; or requiring appropriate levels of supervision.[4] Higher risk may cause the auditor to expand the extent of procedures applied, apply procedures closer to or as of year end, particularly in critical audit areas, or modify the nature of procedures to obtain more persuasive evidence.[5]

---

[1] Paragraphs .03 and .07 of AU sec. 311, *Planning and Supervision,* and paragraph 9 of PCAOB Auditing Standard No. 5 ("AS No. 5"), *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

[2] AU sec. 311.05.

[3] AU sec. 311.06.

[4] Paragraph .17 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*.

[5] Ibid.

In an audit of internal control over financial reporting, a direct relationship exists between the degree of risk that a material weakness could exist in a particular area of the company's internal control over financial reporting and the amount of audit attention that should be devoted to that area.[6]

Fraud risk considerations

The current economic environment may also trigger certain risk factors that may affect the risk of misstatement due to fraudulent financial reporting. Examples of risk factors include—

- Incentives and pressures
  - — Financial stability or profitability is threatened by economic, industry, or company operating conditions;
  - — Excessive pressure exists for management to meet the requirements or expectations of third parties;
  - — Information available indicates management or the board of directors' personal financial situation is threatened by the company's financial performance;
  - — Excessive pressure is placed on management or operating personnel to meet financial targets set up by the board of directors or management, including sales or profitability incentive goals;
- Opportunities
  - — The nature of the industry or the company's operations provides opportunities to engage in fraudulent financial reporting;
  - — There is ineffective monitoring of management;
  - — There is a complex or unstable organizational structure;
  - — Internal control components are deficient.[7]

The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.[8] As part of the understanding of internal control sufficient to plan the audit, the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation.[9] Also, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition.[10] The auditor responds to risks of material misstatement due to fraud in the following three ways—

- A response that has an overall effect on how the audit is conducted—that is, a response involving more general considerations apart from the specific procedures otherwise planned.[11]

---

[6] AS No. 5, paragraph 11.

[7] Paragraph .85A.2 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit.*

[8] Paragraph .02 of AU sec. 110, *Responsibilities and Functions of the Independent Auditor.*

[9] AU sec. 316.44.

[10] AU sec. 316.41.

[11] AU sec. 316.48.

For example, the knowledge, skill, and ability of personnel assigned significant engagement responsibilities should be commensurate with the auditor's assessment of the risks of material misstatement due to fraud for the engagement.[12] The auditor also should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions.[13] Further, the auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed.[14]

- A response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed.[15] For example, the auditing procedures performed in response to identified risks of material misstatement due to fraud should vary depending upon the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected.[16] Such procedures may involve both substantive tests and tests of the operating effectiveness of the company's programs and controls.[17]
- A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which Audit Considerations in the such override could occur.[18] For example, the auditor should examine journal entries and other adjustments for evidence of possible material misstatement due to fraud.[19] The auditor also should review accounting estimates for biases that could result in material misstatement due to fraud,[20] and evaluate the business rationale for significant unusual transactions.[21]

The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit.[22]

In an audit of internal control over financial reporting, the risk that a company's internal control over financial reporting will fail to prevent or detect misstatement caused by fraud usually is higher than the risk of failure to prevent or detect error.[23]

Internal control considerations

The current environment may increase audit risk and thus require additional auditor attention regarding the effective operation of internal controls. Areas in which additional attention may be required include the company's

[21] AU sec. 316.66.
[22] AU sec. 316.68.
[23] AS No. 5, paragraph 11.

entity-level controls, such as, among other things, controls related to the control environment, and the company's risk assessment process. Additional attention also may be warranted on the controls related to certain significant accounts and disclosures and their relevant assertions, such as controls over the development of inputs and assumptions for the valuation of significant assets and liabilities; controls over the identification and review of assets for recoverability or impairment; and controls over the company's use of external specialists (for example, valuation or actuarial specialists) who assist in the determination of recorded amounts of certain assets or liabilities. In addition, some companies are responding to the current economic conditions by eliminating jobs. The loss of employees integral to the operation of internal controls may increase the risk of deficiencies in internal control over financial reporting because of, for example, lack of segregation of duties or lack of effective monitoring controls.

In an audit of internal control over financial reporting, the auditor also should evaluate whether the company's controls sufficiently address the identified risks of material misstatement due to fraud[24] and controls intended to address the risk of management override of controls.[25] Controls that might address these risks include—

- Controls over significant, unusual transactions, particularly those that result in late or unusual journal entries;
- Controls over journal entries and adjustments made in the period-end financial reporting process;
- Controls over related party transactions;
- Controls related to significant management estimates; and
- Controls that mitigate incentives for, and pressures on, management to falsify or inappropriately manage financial results.[26]

Effect on substantive procedures

Because the current environment may increase inherent and control risks, the auditor might need to modify his or her planned substantive procedures or perform additional substantive procedures in order to reduce the level of detection risk to an acceptable level to support his or her opinion on the financial statements. Examples of modifications of planned substantive procedure include the following—

- Changing the nature of substantive tests from a less effective to a more effective procedure, such as using tests directed toward independent parties outside the company rather than tests directed toward parties or documentation within the company;
- Changing the timing of substantive tests, such as performing them at year end rather than at an interim date; and
- Changing the extent of substantive tests, such as using a larger sample size.[27]

---

[24] AS No. 5, paragraph 14.

[26] AS No. 5, paragraph 14.

[27] Paragraph .82 of AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*.

Communications with audit committees

The auditor has a responsibility to communicate certain matters related to the conduct of the audit to the audit committee.[28] Some of the required communications that may be affected by current economic conditions include discussions about accounting estimates as well as the company's accounting principles.

With respect to accounting estimates, the auditor should determine that the audit committee is informed about the process used by management in formulating particularly sensitive accounting estimates and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.[29] The auditor should discuss with the audit committee the auditor's judgments about the quality, not just the acceptability, of the company's accounting principles as applied in its financial reporting.[30] The discussion should include such matters as the consistency of the company's accounting policies and their application, and the clarity and completeness of the company's financial statements, which include related disclosures.[31] The discussion also should include items that have a significant impact on the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.[32] Examples of items that may have such an effect include the following—

- Selection of new or changes to accounting policies;
- Estimates, judgments, and uncertainties;
- Unusual transactions; and
- Accounting policies relating to significant financial statement items, including the timing of transactions and the period in which they are recorded.[33]

While these and other communications are directed to the audit committee, the auditor is not precluded from communicating with management or other individuals within the company, who may, in the auditor's judgment, benefit from the communications.[34]

Auditing Fair Value Measurements

Certain kinds of investments such as auction rate securities, commercial paper, mortgage-backed or other asset-backed securities, alternative investments (such as hedge funds, private equity investments, funds of funds, etc.), collateralized debt obligations and other investments may present complexities in valuation because of the current conditions in the financial markets. Accordingly, difficulties surrounding the measurement of fair value and the adequacy of related disclosures have come under increased focus over the past year.

Statement of Financial Accounting Standard ("SFAS") No. 157, *Fair Value Measurements*,[35] establishes a framework for measuring fair values for financial

---

[28] Paragraph .01 of AU sec. 380, *Communication With Audit Committees*.

[34] AU sec. 380.02.

[35] In September 2006, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standard ("SFAS") No. 157, *Fair Value Measurements*, which is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods

(continued)

reporting purposes and expands disclosures about those measurements. On September 30, 2008, the SEC's Office of the Chief Accountant and the Financial Accounting Standards Board ("FASB") staff issued *Clarifications on Fair Value Accounting* acknowledging that "the current environment has made questions surrounding the determination of fair value particularly challenging for preparers, auditors and users of financial information."[36] On October 10, 2008, the FASB issued Staff Position ("FSP") No. FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active,* which provides application guidance regarding—

- How the company's own assumptions (that is, expected cash flows and appropriately risk-adjusted discount rates) should be considered when measuring fair value when relevant observable inputs do not exist;
- How available observable inputs in a market that is not active should be considered when measuring fair value; and
- How the use of market quotes (for example, broker quotes or pricing services for the same or similar financial assets) should be considered when assessing the relevance of observable and unobservable inputs available to measure fair value.[37]

The following matters may be particularly important for auditors in considering fair value accounting estimates—

- The extent to which fair value accounting applies to various accounts;
- The choice and complexity of valuation techniques and models;
- Judgments concerning significant assumptions that may be used by others such as specialists employed or engaged by the company or the auditor;
- The availability, or lack thereof, of information or evidence and its reliability; and
- The extent of disclosure in the financial statements about measurement methods and uncertainty.

PCAOB Staff Audit Practice Alert No. 2 ("Practice Alert No. 2"), *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists*, remains relevant in the current environment and reminds auditors of their responsibilities with regard to—

- Auditing fair value measurements,
- Classification within the fair value hierarchy under SFAS 157,
- Using the work of specialists, and
- Use of a pricing service.[38]

(footnote continued)

within those fiscal years. The FASB deferred the implementation of SFAS No. 157 for certain nonrecurring, nonfinancial assets and liabilities for financial statements issued for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years.

[36] See http://www.sec.gov/news/press/2008/2008-234.htm.

[37] Paragraph 5 of FASB Staff Position ("FSP") No. FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*.

[38] PCAOB Staff Audit Practice Alert No. 2, *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists* (December 10, 2007).

In discussing the auditor's responsibilities for auditing fair value measurements, Practice Alert No. 2 refers the auditor to AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, AU sec. 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, AU sec. 336, *Using the Work of a Specialist*, and AU sec. 342, *Auditing Accounting Estimates*.

Auditing Accounting Estimates

Accounting estimates measure the effects of past business transactions or events, or the present status of an asset or liability.[39] Examples of accounting estimates include net realizable value of inventories, allowance for uncollectible accounts receivable, valuation allowance for deferred tax assets, actuarial assumptions in pension and other postretirement benefit costs, the impairment analysis and estimated useful lives of long-lived assets, restructuring accruals, and assumptions used in option pricing models for share-based payments.[40] In auditing accounting estimates, the auditor normally should consider, among other things, the company's historical experience in making past estimates as well as the auditor's experience in the industry.[41] However, changes in facts, circumstances, or a company's procedures may cause factors different from those considered in the past to become significant to the accounting estimate.[42] The significance of the recent changes in the economy and the financial markets increases the likelihood that this will be the case.

The auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as a whole.[43] In evaluating the reasonableness of accounting estimates, the auditor should obtain an understanding of how management developed the estimate.[44] Based on that understanding, the auditor should use one or a combination of the following approaches—

- Review and test the process used by management to develop the estimate;
- Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate;
- Review subsequent events or transactions occurring prior to the date of the auditor's report.[45]

The work that the auditor performs as part of the audit of internal control over financial reporting should necessarily inform the auditor's decisions about the approach he or she takes to auditing an estimate because, as part of the audit of internal control over financial reporting, the auditor would be required to obtain an understanding of the process management used to develop the estimate and to test controls over all relevant assertions related to the estimate.[46]

In evaluating the reasonableness of an estimate, the auditor normally concentrates on key factors and assumptions that are—

[39] Paragraph .02 of AU sec. 342, *Auditing Accounting Estimates*.

[40] See AU sec. 342.16 for other examples of accounting estimates.

[41] AU sec. 342.09.

[42] Ibid.

[43] AU sec. 342.04.

[44] AU sec. 342.10.

[45] Ibid.

[46] Ibid.

- Significant to the accounting estimate;
- Sensitive to variations;
- Deviations from historical patterns;
- Subjective and susceptible to misstatement and bias.[47]

When assessing audit differences between estimates best supported by the audit evidence and the estimates included in the financial statements, the auditor should consider whether such differences, even if they are individually reasonable, indicate a possible bias on the part of the company's management, in which case the audit or should reconsider the estimates taken as a whole.[48]

As part of the audit, the auditor also should perform a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management.[49] With the benefit of hindsight, a retrospective review should provide the auditor with additional information about whether there may be a possible bias on the part of management in making the current year estimates.[50]

Auditing the Adequacy of Disclosures

The current economic environment may increase the risks regarding the adequacy of disclosures, including the disclosures surrounding a company's risks and uncertainties, which in turn may warrant additional auditor attention.

The American Institute of Certified Public Accountants' Statement of Position 94-6 ("SOP 94-6"), *Disclosure of Certain Significant Risks and Uncertainties*, focuses on disclosures about risks and uncertainties, that in the near term (considered to be within one year from the date of the financial statements), could affect the amounts reported in the financial statements or the functioning of the reporting company.[51] SOP 94-6 provides that companies should make disclosures in their financial statements about the risks and uncertainties in the following areas—

- Nature of operations;
- Use of estimates in the preparation of financial statements;
- Certain significant estimates;
- Current vulnerability due to certain concentrations.[52]

The presentation of financial statements in conformity with GAAP includes adequate disclosure of material matters, related to the form, arrangement, and content of the financial statements and their appended notes.[53] The auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which he or she is aware at the time.[54] If management omits

[50] Ibid.

[51] Paragraph .02 of American Institute of Certified Public Accountants' Statement of Position 94-6 ("SOP 94-6"), *Disclosure of Certain Significant Risks and Uncertainties.* Paragraph .07 of SOP 94-6 defines near term as a period of time not to exceed one year from the date of the financial statements.

[52] SOP 94-6, paragraph .08.

[53] Paragraph .02 of AU sec. 431, *Adequacy of Disclosure in Financial Statements.*

[54] Ibid.

from the financial statements, including the accompanying notes, information that is required by GAAP, the auditor should express a qualified or adverse opinion and should provide the information in his or her report, if practicable, unless its omission from the auditor's report is recognized as appropriate by a specific PCAOB auditing standard.[55]

With respect to other information included in documents containing the financial statements, the auditor should read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements.[56] For instance, the section on management's discussion and analysis of financial condition and results of operations in Form 10-K requires discussion of liquidity, capital resources, results of operations, off-balance sheet arrangements and contractual obligations.[57] In addition, the section on controls and procedures of the Form 10-K requires discussion of management's responsibility for internal control over financial reporting and changes in internal control over financial reporting.[58] If the information in these disclosures is materially inconsistent with the financial statements, the auditor should determine whether the financial statements, the audit report, or both require revision.[59]

Auditor's Consideration of a Company's Ability to Continue as a Going Concern

In the current economic environment, some companies may face challenges in their ability to continue operating as a going concern. For instance, sources of liquidity may be strained because of reduced availability of lines/letters of credit from financial institutions or because of a violation of a debt covenant or other covenant. Additionally, companies may encounter limited access to the commercial paper markets, a decrease in valuation of collateral, difficulty restructuring loans, and delays in payment from customers.

The auditor has a responsibility to evaluate whether there is a substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited.[60] The auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor's report.[61]

The auditor's evaluation includes considering whether the results obtained in planning, performing, and completing the audit identify conditions and events that, when considered in the aggregate, indicate there could be a substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.[62] It may be necessary to obtain additional information about such

---

[55] AU sec. 431.03.

[56] Paragraph .04 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*.

[57] Regulation S-K, Item 303, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

[58] Regulation S-K, Items 308 and 308T, *Internal Control Over Financial Reporting.*

[59] AU sec. 550.04.

[60] Paragraph .02 of AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern.*

[61] Ibid.

[62] AU sec. 341.03a.

conditions and events, as well as the appropriate evidential matter to support information that mitigates the auditor's doubt.[63] Conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the company's ability to continue as a going concern for a reasonable period of time include—

- *Negative trends*—for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, adverse key financial ratios;
- *Other indications of possible financial difficulties*—for example, default on loan or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, restructuring of debt, noncompliance with statutory capital requirements, need to seek new sources or methods of financing or to dispose of substantial assets;
- *Internal matters*—for example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, need to significantly revise operations;
- *External matters that have occurred*—for example, legal proceedings, legislation, or similar matters that might jeopardize a company's ability to operate; loss of a key franchise, license, or patent; loss of a principal customer or supplier; uninsured or underinsured catastrophe such as a drought, earthquake, or flood.[64]

If the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, the auditor should obtain information about management's plans that are intended to mitigate the effect of such conditions or events, and assess the likelihood that such plans can be effectively implemented.[65] The auditor's considerations relating to management plans may include the following—

- Plans to dispose of assets;
- Plans to borrow money or restructure debt;
- Plans to reduce or delay expenditures;
- Plans to increase ownership equity.[66]

Such considerations also may include the effect of federal assistance or participation in a federal program.

If, after considering identified conditions and events and management's plans, the auditor concludes there is substantial doubt, he or she should consider the possible effects on the financial statements and the adequacy of disclosure about the company's inability to continue as a going concern for a reasonable period of time, and include an explanatory paragraph in the audit report to reflect this conclusion.[67] If the auditor concludes that substantial doubt is alleviated, the auditor should consider the need for disclosure of the principal conditions

---

[63] Ibid.

[64] AU sec. 341.06.

[65] AU sec. 341.03b.

[66] AU sec. 341.07.

[67] AU secs. 341.10 and 341.12.

and events that initially caused the auditor to believe there was substantial doubt.[68]

Additional Audit Considerations for Selected Financial Reporting Areas

The following discussion provides auditors with information on selected financial reporting areas that may be affected by the current economic environment. The auditor should give consideration to elevated risks related to the current economic environment and adjust his or her audit procedures as appropriate. This list is not intended to be all inclusive.

- Consolidation
- Contingencies and guarantees
- Credit derivatives
- Debt obligations
- Deferred tax assets
- Derivatives (other than credit derivatives)
- Goodwill, intangible assets and other long-lived assets
- Inventory
- Other-than-temporary impairment
- Pension and other postretirement benefits
- Receivables
- Restructuring
- Revenue recognition
- Share-based payments

Consolidation

As a result of the economic environment, some companies have provided financial support or guarantees, or have taken other actions that may cause them to have a variable interest in an entity or to have increased their exposure to the entity, and, therefore, cause them to consider or reconsider whether the entity is a variable interest entity and if so whether they are its primary beneficiary.[69] Such commitments to provide financial support or guarantees might be found in various contractual arrangements, such as leasing arrangements, supply contracts, service contracts or derivative contracts.

FASB Interpretation ("FIN") No. 46(R) (as amended), *Consolidation of Variable Interest Entities—an interpretation of ARB No. 51*, addresses consolidation by the primary beneficiary of variable interest entities. On November 21, 2008, the FASB announced plans to issue final FSP FAS 140-4 and FIN 46(R)-8, *Disclosures about Transfers of Financial Assets and Interests in Variable Interest Entities,* by December 15, 2008, which will increase disclosure requirements for public companies for reporting periods that end after December 15, 2008.[70]

---

[68] AU sec. 341.11.

[69] Paragraphs 7 and 15 of FASB Interpretation ("FIN") No. 46(R) (as amended), *Consolidation of Variable Interest Entities—an interpretation of ARB No. 51*.

[70] See http://www.fasb.org/news/nr112108.shtml.

Contingencies and guarantees

Recent events in the credit markets may expose companies to additional contingencies and guarantees, which could increase the risk of unidentified or undisclosed contingencies related to, for example—

- Pending or threatened litigation;
- Asserted or unasserted claims and assessments;
- Guarantees of indebtedness of others;
- Guarantees to repurchase receivables or property previously sold or otherwise assigned;
- Violations of laws and regulations;
- Guarantees of contractual performance of others; and
- Outstanding purchase commitments at prices in excess of market values.

The audit normally includes procedures that might identify litigation, claims, and assessments, among other things.[71] Examples of such procedures include the following—

- Reading minutes of meetings of stockholders, directors, and appropriate committees held during and subsequent to the period being audited;
- Reading contracts, loan agreements, leases, and correspondence from taxing or other governmental agencies, and similar documents;
- Obtaining information concerning guarantees from bank confirmation forms;
- Inspecting other documents for possible guarantees by the client.[72]

Credit derivatives

The downturn in the credit markets can have a significant effect on the fair value of a company's credit derivatives. A credit derivative is a derivative instrument whose value derives from the credit risk on an underlying bond, loan or financial asset. The credit risk is on an entity other than the counterparty to the transaction.[73] This entity is known as a reference entity, which incurred the debt.[74]

Credit derivatives are bilateral contracts between the buyer and seller under which the seller sells to the buyer protection against the credit risk of the reference entity.[75] Credit derivatives may be valued through the use of internally developed models or by pricing services. The assumptions used in models can

---

[71] Paragraph .07 of AU sec. 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims and Assessments*. AU sec. 337.08 indicates that a letter of audit inquiry to the client's lawyer is the auditor's primary means of obtaining corroboration of the information furnished by management concerning litigation, claims, and assessments.

[74] Edmund Parker, "Credit Derivatives," *PLC Finance* (http://www.mayerbrown.com/london/article.asp?id=4234&nid=1575).

[75] Ibid.

be highly subjective, sensitive, and complex. A slight difference in assumptions could result in a significant change in the valuation of the derivative.

One factor that affects the fair value of credit derivatives is a decline in the credit quality of the reference entity. As a result of the deterioration in credit derivative positions insured by sellers of credit derivatives, some sellers have been required to post significant amounts of additional collateral. A seller also may be required to post additional collateral based on the deterioration of its own credit standing (regardless of changes in value of the written credit derivatives) to protect the buyer from default by the seller. In addition, the fair value of the asset included in the buyer's financial statements is affected by both the credit rating of the seller of the credit derivative (the counterparty) and the credit rating of the reference entity. The credit risk of the seller may affect the fair value of the liability in the seller's financial statements. In response to concerns from financial statement users and others that the current disclosure requirements for derivative instruments and certain guarantees did not adequately address the potential adverse effects of changes in the credit risk on the financial position, financial performance, and cash flows of the sellers of credit derivatives and certain guarantees, the FASB issued a staff position aimed at improving such disclosures.[76]

The auditor should obtain evidence supporting management's assertions about the fair value of derivatives measured or disclosed at fair value.[77] In addition, the auditor should evaluate whether the presentation and disclosure of derivatives are in conformity with GAAP.[78]

In addition to valuation and presentation and disclosure, other considerations relate to existence and completeness. In March 2008, the President's Working Group on Financial Markets noted "[w]hile the infrastructure of the financial markets generally has coped quite well with heightened price volatility and surging trading volumes, there have been issues with the accuracy and timeliness of trade data transmissions, the timeliness of resolutions of trade matching errors, documentation and cash settlement, electronic post-trade processing, backlogs, integrated processing, and reconciliation and valuation."[79] Sellers and buyers of credit derivatives may have made trades which may not be properly reflected in the financial statements. AU sec. 332 provides examples of substantive procedures auditors may perform to obtain evidence about whether all derivatives have been properly identified and appropriately included in the financial statements.[80]

[80] AU secs. 332.21 to .24.

Debt obligations

Companies may find it more difficult to refinance debt or it may take longer to arrange new financing in the current business environment, and compliance with debt covenants may be more challenging. Circumstances such as the following can affect the risks of material misstatement and the necessary audit procedures regarding debt obligations—

- Violations of existing debt covenants;
- Proper classification between short-term and long-term debt;
- The existence of cross default provisions, such that a violation of a covenant on one loan affects compliance with covenants for another loan;
- Exchange of debt or modifications to the terms of outstanding debt agreements;
- Concessions granted by lenders, including those that constitute a troubled debt restructuring;
- Subjective acceleration clauses;
- Embedded derivatives.

Deferred tax assets

Under current economic conditions, companies may need to record valuation allowances for their deferred tax assets. Deferred tax assets are required to be reduced "by a valuation allowance if, based on the weight of available evidence, it is *more likely than not* (a likelihood of more than 50 percent) that some portion or all of the deferred tax assets will not be realized."[81]

Evaluating the need for and amount of a valuation allowance for deferred tax assets requires consideration of "all available evidence, both positive and negative"[82] to determine whether all or some portion of the deferred tax assets will not be realized. SFAS No. 109, *Accounting for Income Taxes*, provides that the more negative evidence that exists (a) the more positive evidence is necessary and (b) the more difficult it is to support a conclusion that a valuation allowance is not needed for some portion or all of the deferred tax asset.[83]

In addition, SFAS No. 109 states that "information about an enterprise's current financial position and its results of operations for the current and preceding years ordinarily is readily available. That historical information is supplemented by all currently available information about future years. Sometimes, however, historical information may not be available (for example, start-up operations) or it may not be as relevant (for example, if there has been a significant, recent change in circumstances) and special attention is required."[84]

Future realization of a deferred tax asset "ultimately depends on the existence of sufficient taxable income of the appropriate character (for example, ordinary income or capital gain) within the carryback, carryforward period available under the tax law."[85] SFAS No. 109 states that "the weight given to the potential

[84] SFAS No. 109, paragraph 20.

[85] SFAS No.109, paragraph 21.

effect of negative and positive evidence should be commensurate with the extent to which it can be objectively verified."[86]

In addition, FIN No. 48 (as amended), *Accounting for Uncertainty in Income Taxes—an Interpretation of FASB Statement No. 109*, defines a criterion that an individual tax position must meet for any part of the benefit of that position to be recognized in a company's financial statements.[87] The interpretation also provides guidance on measurement, derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.[88]

Derivatives (other than credit derivatives)

The current environment may have a significant effect on the fair value of a company's derivative contracts. In addition, the ability for a company to use hedge accounting, including its ability to apply the short-cut method, may be affected because of the company's or the counterparty's creditworthiness.[89] Hedge accounting also may be affected because changes in the fair value of the derivative may be attributable to a risk other than the risk that is being hedged, such as company or counterparty creditworthiness.[90]

Auditors should obtain evidence supporting management's assertion about the fair value of derivatives measured or disclosed at fair value.[91] External factors, such as credit and market risk, may affect the valuation of derivatives. Credit or default risk exposes the company to the risk of loss as a result of the counterparty to a derivative failing to meet its obligation. Alternatively, the credit risk of the company may affect the fair value of the derivative when the derivative is in a liability position. Market risk exposes the company to the risk of loss from adverse changes in market factors that affect the fair value of a derivative, such as interest rates and foreign exchange rates. In order for a company to use hedge accounting, GAAP requires that management have an expectation that the hedging relationship will be highly effective at inception and on an ongoing basis.[92] Counterparty default risk may affect hedge accounting as GAAP requires that consideration be given to the likelihood that the counterparty will comply with the contractual terms of the derivative contract.[93] If the likelihood that the counterparty will not default ceases to be probable, the company would be unable to conclude that a cash flow hedging relationship is expected to be highly effective in achieving offsetting cash flows.[94] Additionally, a change in the creditworthiness of the derivative's counterparty in a fair value hedge would affect the assessment of whether the relationship qualifies for hedge accounting and amount of ineffectiveness recognized in earnings under

[90] Paragraphs 20 and 28 of SFAS No. 133 (as amended), *Accounting for Derivative Instruments and Hedging Activities*, discuss the risks that are being hedged for a fair value and a cash flow hedge, respectively. Paragraphs 25 and 29 of SFAS No. 133 indicate when to discontinue hedge accounting for a fair value and cash flow hedge, respectively.

[91] AU sec. 332.35.

[92] SFAS No. 133, paragraphs 20b and 28b.

[93] DIG Issue G10.

[94] Ibid.

fair value hedge accounting.[95] Under SFAS No. 133, hedge accounting ceases when a hedge is no longer highly effective on an ongoing basis.[96]

When assessing hedge accounting, auditors should gather evidential matter—

- To determine whether management complied with the hedge accounting requirements of GAAP, including designation and documentation requirements.[97]
- To support management's expectation at the inception of the hedge that the hedging relationship will be highly effective and its periodic assessment of the ongoing effectiveness of the hedging relationship as required by GAAP.[98]
- Supporting the recorded change, for a fair value hedge, in the hedged item's fair value that is attributable to the hedged risk.[99]

In addition, for a cash flow hedge of a forecasted transaction, the auditor should evaluate management's determination of whether a forecasted transaction is probable.[100]

Goodwill, intangible assets and other long-lived assets

Market conditions during an economic downturn may result in an impairment of goodwill, other indefinite-lived intangible assets and other long-lived assets. Goodwill and indefinite-lived intangible assets "shall be tested for impairment annually, or more frequently if events or changes in circumstances indicate that the asset might be impaired."[101] Similarly, SFAS No. 144 (as amended), *Accounting for the Impairment or Disposal of Long-Lived Assets*, states that "A long-lived asset (asset group) shall be tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable."[102] The following are examples of such events and changes in circumstances—

- A significant decrease in the market price of a long-lived asset (asset group);
- A significant adverse change in the extent or manner in which a long-lived asset (asset group) is being used or in its physical condition;
- A significant adverse change in legal factors or in the business climate that could affect the value of a long-lived asset (asset group), including an adverse action or assessment by a regulator;
- An accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of a long-lived asset (asset group);

[100] AU sec. 332.55.

[101] Paragraph 17 of SFAS No. 142 (as amended), *Goodwill and Other Intangible Assets.*

[102] Paragraph 8 of SFAS No. 144 (as amended), *Accounting for the Impairment or Disposal of Long-Lived Assets.*

- A current-period operating or cash flow loss combined with a history of operating or cash flow losses or a projection or forecast that demonstrates continuing losses associated with the use of a long-lived asset (asset group);
- A current expectation that, more likely than not, a long-lived asset (asset group) will be sold or otherwise disposed of significantly before the end of its previously estimated useful life. The term more likely than not refers to a level of likelihood that is more than 50 percent.[103]

Goodwill of a reporting unit shall be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount.[104] Examples of such events or circumstances include—

- A significant adverse change in legal factors or in the business climate;
- An adverse action or assessment by a regulator;
- Unanticipated competition;
- A loss of key personnel;
- A more-likely-than-not expectation that a reporting unit or a significant portion of a reporting unit will be sold or otherwise disposed of;
- The testing for recoverability under SFAS No. 144 of a significant asset group within a reporting unit;
- Recognition of a goodwill impairment loss in the financial statements of a subsidiary that is a component of a reporting unit.[105]

In addition to valuation, companies may need to reassess the useful life of indefinite-lived intangible assets and other long-lived assets. SFAS No. 142 (as amended), *Goodwill and Other Intangible Assets,* requires companies to "evaluate the remaining useful life of an intangible asset that is not being amortized each reporting period to determine whether events and circumstances continue to support an indefinite useful life."[106] In addition, when other long-lived assets (asset group) are tested for recoverability, companies also may need to review depreciation estimates and methods.[107] Under SFAS No. 144, any revision to the remaining useful life of a longlived asset resulting from that review also shall be considered in developing estimates of future cash flows used to test the asset (asset group) for recoverability.[108]

Inventory

Current market conditions and the effect on consumer spending may result in excess or obsolete inventory or inventory with carrying amounts in excess of market values. Inventory is required to be stated at the lower of cost or

---

[103] Ibid.
[104] SFAS No. 142, paragraph 28.

[106] SFAS No. 142, paragraph 16.
[107] SFAS No. 144, paragraph 9.
[108] Ibid.

market.[109] The following are examples of conditions related to the current environment that might affect the risk of material misstatement of inventory valuation and the necessary audit procedures—

- An increase in inventory balances in relation to sales levels, a reduction in inventory turnover, and the aging of inventory may indicate excess or obsolete inventory balances that are not recoverable.
- Declining prices may indicate the carrying amount of inventory is in excess of market value. Accounting Research Bulletin ("ARB") No. 43 (as amended), *Inventory Pricing* (chapter 4), requires that a loss be recognized in the current period "whenever the utility of goods is impaired by damage, deterioration, obsolescence, changes in price levels, or other causes."[110]

In addition, losses on firm, uncancelable, and unhedged commitments to purchase inventory should be measured in the same way as are inventory losses and, if material, should be recognized in the accounts in the current period and separately disclosed in the income statement.[111]

Other-than-temporary impairment

Many debt and equity securities have experienced significant declines in fair value. These declines in fair value may raise questions about whether such declines are other than temporary. The auditor should evaluate management's conclusion about the need to recognize in earnings an impairment loss for a decline in fair value that is other than temporary.[112]

In accordance with SFAS No. 115 (as amended), *Accounting for Certain Investments in Debt and Equity Securities*, a charge to earnings should be made for impairment that is "other than temporary" in held-to-maturity and available-for-sale securities.[113] SEC Staff Accounting Bulletin ("SAB") No. 59, *Accounting for Noncurrent Marketable Equity Securities*, also provides the SEC staff's view and indicates that "other than temporary" should not be interpreted to mean "permanent." SAB No. 59 provides examples of factors which, individually or in combinations, may indicate that a decline is other than temporary and that a write-down of the carrying value is required, including—

- The length of the time and the extent to which the market value has been less than cost;
- The financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology that may impair the earnings potential of the investment or the discontinuance of a segment of the business that may affect the future earnings potential; or
- The intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

---

[110] ARB No. 43, chapter 4, paragraph 8.

[111] ARB No. 43, chapter 4, paragraph 17.

[112] AU sec. 332.46.

[113] Paragraph 16 of SFAS No. 115 (as amended), *Accounting for Certain Investments in Debt and Equity Securities.*

SAB No. 59 further provides that "[u]nless evidence exists to support a realizable value equal to or greater than the carrying value of the investment, a write-down accounted for as a realized loss should be recorded."

Additionally, under FASB Emerging Issues Task Force No. 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets,* certain beneficial interests should be written down to fair value through earnings if the security has declined below its cost and there has been an adverse change in the estimated cash flows based on a holder's best estimate of cash flows that a market participant would use in determining the fair value of the beneficial interest.[114]

Pension and other postretirement benefits ("OPEB")

Increased credit risk and reduced liquidity in the current economic environment can have a significant effect on the fair value of plan assets as well as the assumptions used to measure the pension and OPEB obligation. Companies that sponsor pension and OPEB plans are required to recognize the funded status of these plans in the statement of financial position.[115] The funded status is measured as the difference between the fair value of plan assets and the benefit obligation.[116] SFAS No. 87 (as amended), *Employers' Accounting for Pensions*, and SFAS No. 106 (as amended), *Employers' Accounting for Postretirement Benefits Other Than Pensions*, generally require that plan investments, whether equity or debt securities, real estate or other, be measured at fair value as of the measurement date.[117] Therefore, the measurement requirements of SFAS No. 157 apply to defined-benefit postretirement plan assets. Several assumptions are relevant to determining a company's pension and OPEB obligation, such as discount rate, expected rate of return on plan assets, and rate of compensation increase. Significant declines in the stock market may adversely affect the fair value of the plan assets, and companies may need to consider recent shifts in the market when developing the expected rate of return on plan assets. Changes in fair value of plan assets affect the funded status of the plan.[118] Deviations from the expected rate of return on plan assets affect a company's pension or OPEB expenses in future periods,[119] unless gains and losses are recognized immediately.[120]

Receivables

In the current economic environment, companies may face a heightened risk of non-collection of receivables. Evidence of this risk might be noted in an increase

in days sales outstanding, the aging of receivables, or the amount of delinquent receivables.[121]

In addition for loans receivable, evidence of this risk might be rising loan delinquency and defaults and decreasing secondary market liquidity.[122] These situations can affect the risk of material misstatement in the valuation of a company's receivables and the auditor's evaluation of management's estimate of the allowance.

Restructuring

Market events and their effect on liquidity have caused many companies to take actions such as restructuring to reduce costs. SFAS No. 146 (as amended), *Accounting for Costs Associated with Exit or Disposal Activities*, addresses financial accounting and reporting for costs associated with exit or disposal activities.[123] The risks of material misstatement may relate to recording costs in the improper period, incorrect measurement or presentation of restructuring liabilities and costs, or inadequate disclosures. Misstatements could result in understatement or overstatement of restructuring liabilities and costs.

Revenue recognition

In the current economic environment, companies may be faced with increased pressure to meet revenue targets and analysts' expectations. These pressures may cause companies to change business practices, which could affect the amount and timing of revenue recognition. Examples of business practices that could affect revenue recognition and the necessary audit procedures include, among other things, rights of return, bill-and-hold arrangements, change in payment terms, side agreements, and consignment arrangements. Also, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition.[124]

Share-based payments

Current market conditions have resulted in volatile stock prices for many companies. As a result, some companies may consider modifying share-based payment awards. In addition, the changing economic environment may affect the assumptions used when valuing such awards.

---

[121] Scott Malone, "Corporate America Taking Longer to Collect: Study" (August 24, 2008), (http://www.reuters.com/article/reutersEdge/idUSN2745047620080827), noted that it is taking companies longer to collect from their customers.

[122] SFAS No. 114 (as amended), *Accounting by Creditors for Impairment of a Loan- an amendment of FASB Statements no. 5 and 15*, addresses the accounting by creditors for impairment of a loan by specifying how allowances for credit losses related to certain loans should be determined.

[123] As described in paragraph 2a of SFAS No. 146 (as amended), *Accounting for Costs Associated with Exit or Disposal Activities,* SFAS No. 146 does not change the accounting for termination benefits, including one-time termination benefits granted in the form of an enhancement to an ongoing benefit arrangement, covered by SFAS No. 87, SFAS No. 88 (as amended), *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, SFAS No. 106, and SFAS No. 112 (as amended), *Employers' Accounting for Postemployment Benefits—an amendment of FASB Statements No. 5 and 43*. FSP No. FAS 146-1 (as amended), *Determining Whether a One-Time Termination Benefit Offered in Connection with an Exit or Disposal Activity Is, in Substance, an Enhancement to an Ongoing Benefit Arrangement*, provides guidance on when additional termination benefits offered in connection with an exit or disposal activity are considered, in substance, enhancements to an ongoing benefit arrangement and, therefore, subject to the provisions SFAS Nos. 87, 88, 106 and 112. In addition, SFAS No. 144 addresses accounting for long-lived assets and disposal groups to be disposed of, including components of a company that are discontinued operations.

[124] AU 316.41.

The valuation of share-based payment awards under an option-pricing model includes significant estimates, such as expected term, pre-vesting forfeiture rate and the expected volatility of the underlying stock price. For new grants of awards, companies may need to revise these and other inputs to reflect current expectations. For example, expected volatility in an option-pricing model may be affected by recent volatility in the markets. Assumptions used in the option pricing model affect the value of the award and, consequently, the compensation expense that is recognized in the financial statements.

Modifications of share-based payment awards may result in the recognition of incremental compensation cost. Incremental compensation cost is measured as the excess, if any, of the fair value of the modified award over the fair value of the original award immediately before its terms are modified.[125]

PCAOB Staff Questions and Answers ("Q&A"), *Auditing the Fair Value of Share Options Granted to Employees*, remains relevant in the current environment and reminds auditors of their responsibilities for auditing share-based payments including consideration of—

- The company's process,
- Risk factors,
- Model selection,
- Assumptions used in option-pricing models,
- Validation of data and the option-pricing model,
- Role of specialists.[126]

In discussing the auditor's responsibilities for auditing the fair value of share options granted to employees, the Q&A refers the auditor to AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, AU sec. 336, *Using the Work of a Specialist*, and AU sec. 342, *Auditing Accounting Estimates*.

.04 Staff Audit Practice Alert No. 4

Auditor Considerations Regarding Fair Value Measurements, Disclosures, and Other-Than-Temporary Impairments

April 21, 2009

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

On April 9, 2009, the Financial Accounting Standards Board ("FASB") issued three FASB Staff Positions ("FSP" or, collectively, "the FSPs"):

- FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* ("FSP FAS 157-4")
- FSP FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other- Than-Temporary Impairments* ("FSP FAS 115-2")
- FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* ("FSP FAS 107-1")[1]

The objectives of these FSPs are to: (1) provide "additional guidance for estimating fair value in accordance with FASB Statement No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased" including "guidance on identifying circumstances that indicate a transaction is not orderly,"[2] (2) amend "the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial

[1] The respective FSPs are available at:

— http://www.fasb.org/pdf/fsp_fas157-4.pdf
— http://www.fasb.org/pdf/fsp_fas115-2andfas124-2.pdf
— http://www.fasb.org/pdf/fsp_fas107-1andapb28-1.pdf

[2] FSP FAS 157-4, paragraph 1.

statements,"[3] and (3) "require disclosures about fair value of financial instruments for interim reporting periods for publicly traded companies as well as in annual financial statements."[4]

The purpose of this staff audit practice alert is to inform auditors about potential implications of the FSPs on reviews of interim financial information and annual audits. This alert addresses the following topics: (1) reviews of interim financial information ("reviews"); (2) audits of financial statements, including integrated audits; (3) disclosures; and (4) auditor reporting considerations. While this alert highlights certain areas, it is not intended to serve as a substitute for the relevant auditing standards.

In considering the effects of the FSPs on their audits and reviews, auditors should be aware that some PCAOB standards include descriptions of accounting requirements that are no longer current. The accounting standards set by the FASB are recognized by the U.S. Securities and Exchange Commission ("SEC") as generally accepted.[5] Auditors should look to those standards and to the requirements of the SEC,[6] rather than the standards of the PCAOB, for current accounting requirements and disregard descriptions of accounting requirements in PCAOB standards that are inconsistent with the FSPs. The PCAOB has a project on its standards-setting agenda to address the auditing standards related to auditing accounting estimates and auditing fair value measurements. In connection with this project, the PCAOB is planning to remove descriptions of accounting requirements from these standards. In general, as the PCAOB replaces or substantively revises its interim standards, it will continue to remove descriptions of accounting requirements from those auditing standards.

Reviews of Interim Financial Information

The objective of a review is to provide the auditor with a basis for communicating whether he or she is aware of any material modifications that should be made to the interim financial information for it to conform with generally accepted accounting principles ("GAAP"). A review differs significantly from an audit and consists principally of performing analytical procedures and making inquiries of persons responsible for financial and accounting matters.[7] A review does not provide a basis for expressing an opinion about whether the financial statements are presented fairly, in all material respects, in conformity with GAAP.[8] For an audit, PCAOB standards require that the auditor plan and

---

[3] FSP FAS 115-2, paragraph 2. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairment of equity securities. On April 14, 2009, the SEC's staff released Staff Accounting Bulletin ("SAB") No. 111, *Other Than Temporary Impairment of Certain Investments in Equity Securities*, which amends SAB Topic 5.M. SAB Topic 5.M. now excludes debt securities from its scope while maintaining the SEC staff's views related to equity securities.

[4] FSP FAS 107-1, paragraph 1.

[5] SEC, *Policy Statement: Reaffirming the Status of the FASB as a Designated Private-Sector Standard Setter*, Exchange Act Release No. 34-47743 (April 25, 2003). The PCAOB has no authority to prescribe the form or content of an issuer's financial statements. Accordingly, while this staff audit practice alert describes applicable generally accepted accounting principles ("GAAP"), it does not establish or interpret GAAP.

[6] Auditors should look to the requirements of the SEC for the company under audit with respect to the accounting principles applicable to that company. See AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles.*

[7] Paragraph .07 of AU sec. 722, *Interim Financial Information* ("AU sec. 722").

[8] Ibid.

perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.[9]

As part of the review, the auditor should, among other things, make inquiries of members of management who have responsibility for financial and accounting matters. If relevant to the company, the auditor should include in these inquiries questions about the implementation of the FSPs.[10]

The auditor also should determine whether any matters described in AU sec. 380, *Communication With Audit Committees* ("AU sec. 380"), as they relate to the interim financial information, have been identified.[11] If such matters have been identified, the auditor should communicate those matters to the audit committee or be satisfied, through discussion with the audit committee, that management has communicated such matters to the audit committee.[12] Matters to be communicated include: a change in a significant accounting policy affecting the interim financial information; accounting estimates and management's judgments about those accounting estimates; processes management uses to formulate sensitive accounting estimates; and the auditor's judgment about the quality, not just the acceptability, of the company's accounting policies.[13] Depending upon the circumstances, the implementation of the FSPs may present matters that should be communicated to the audit committee.

Audits of Financial Statements, Including Integrated Audits

FSP FAS 157-4 provides additional guidance for estimating fair value when the volume and level of activity for an asset or liability have significantly decreased.[14] In performing procedures under AU sec. 328, *Auditing Fair Value Measurements and Disclosures* ("AU sec. 328"), the auditor is required to, among other things, obtain an understanding of the company's process for determining fair value measurements and disclosures and of the relevant controls sufficient to assess the risk of material misstatement, and to plan the nature, timing, and extent of the audit procedures.[15] Based on the auditor's assessment of the risk of material misstatement, the auditor should test the entity's fair value measurements and disclosures.[16] Because of the wide range of possible fair value measurements, from relatively simple to complex, and the varying levels of risk of material misstatement associated with the process for determining fair values, the auditor's planned audit procedures can vary significantly in nature, timing, and extent.[17] The auditor's substantive tests of the fair value measurements may involve (a) testing management's significant assumptions, the valuation model, and the underlying data, (b) developing independent fair value estimates for corroborative purposes, or (c) reviewing subsequent events and transactions.[18]

---

[9] Paragraph .08 of AU sec. 508, *Reports on Audited Financial Statements*. An audit includes, among other things, examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements.

[15] AU secs. 328.09 and 328.13.

[16] AU sec. 328.23.

[17] Ibid.

[18] Ibid.

FSP FAS 115-2 amends the guidance for recognizing an other-than-temporary impairment ("OTTI") for a debt security.[19] The auditor is required to evaluate a company's conclusions about the need to recognize an impairment loss.[20] When a company has recognized an impairment loss, the auditor should gather evidence supporting the amount of the impairment adjustment recorded and determine whether the company has appropriately followed GAAP.[21] In certain circumstances, a company is required to separate the amount of the OTTI representing credit losses (as defined by FSP FAS 115-2) and the amount representing all other factors.[22] In those situations, the auditor's objective is to obtain sufficient competent evidential matter to provide reasonable assurance that these estimates are reasonable in the circumstances and that they are presented and disclosed in conformity with GAAP.[23] In evaluating reasonableness, the auditor should obtain an understanding of how the company developed the estimates.[24] In addition, the auditor should discuss an accounting change due to FSP FAS 115-2 and other related topics (as described in the previous section related to interim financial information), with the audit committee in connection with the audit of the financial statements, including integrated audits.[25]

Disclosures

The FSPs require additional disclosures regarding fair value measurements and OTTI. For example (1) FSP FAS 157-4 requires a company to disclose changes in valuation techniques and related inputs for fair value measurements in interim and annual periods and to provide additional disclosures under Statement No. 157, *Fair Value Measurements*[26] and (2) FSP FAS 115-2 requires a company to disclose information that enables users to understand the reasons that a portion of OTTI was not recognized in earnings and the methodology and significant inputs used to calculate the portion of OTTI that was recognized in earnings.[27] The auditor should evaluate whether the financial statement disclosures are in conformity with the FSPs.[28]

In addition, the auditor should read the other information accompanying the interim and annual financial statements contained in reports filed with the SEC.[29] For example, the Management's Discussion and Analysis of Financial Condition and Results of Operations section of annual reports and other filings might include discussions regarding fair value measurements and OTTI.[30] The

[30] For example, see the discussion of critical accounting policies and critical accounting estimates, respectively, in SEC Release Nos. 33-8040, *Cautionary Advice Regarding Disclosure About Critical Accounting Policies* (December 12, 2001) and 33-8350, *Commission Guidance Regarding Management's Discussion and Analysis of Financial Condition and Results of Operations* (December 29, 2003).

auditor should consider whether that information or the manner of its presentation is materially inconsistent with the financial statements. If the auditor concludes that there is a material inconsistency, or becomes aware of information that he or she believes is a material misstatement of fact, the auditor should determine if the financial statements, the audit report, or both require revision. If the auditor concludes that the financial statements or audit report do not require revision, the auditor should request the company to revise the other information.[31]

Auditor Reporting Considerations

FSP FAS 157-4 states that revisions resulting from a change in the valuation technique or its application are to be accounted for as a change in accounting estimate. In the period of adoption, entities are required to disclose a change, if any, in valuation technique and related inputs and quantify the total effect, if practicable, by major category.[32] In addition, FSP FAS 115-2 requires the company to recognize the cumulative effect of initially applying the FSP as an adjustment to the opening balance of retained earnings, as of the beginning of the period in which FSP FAS 115-2 is adopted, with a corresponding adjustment to accumulated other comprehensive income.[33]

The auditor should evaluate whether the company's accounting for and disclosure of the changes are in accordance with the FSPs. To identify consistency matters that might affect the auditor's report, the auditor should evaluate whether the comparability of the financial statements between periods has been materially affected by changes in accounting principles. A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph following the opinion paragraph.[34]

.05 Staff Audit Practice Alert No. 5

Auditor Considerations Regarding Significant Unusual Transactions

April 7, 2010

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

During the course of an audit, the auditor may become aware of significant transactions that are outside the normal course of business for the company, or that otherwise appear to be unusual given the auditor's understanding of the company and its environment ("significant unusual transactions").[1] Significant unusual transactions, especially those close to period end that pose difficult "substance over form" questions, can provide opportunities for companies to engage in fraudulent financial reporting.[2] Further, the auditor's evaluation of whether the company's financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework, includes the consideration of the financial statement presentation and disclosure of significant unusual transactions.[3]

The auditor should gain an understanding of the business rationale or such transactions and whether that rationale (or the lack thereof) suggests that the transactions may have been entered into to engage in fraudulent financial reporting or conceal a misappropriation of assets.[4] The audit engagement team might consult with individuals having appropriate levels of knowledge, competence, and judgment regarding significant unusual transactions.[5] Such consultations regarding significant unusual transactions should occur in accordance with the firm's policies and procedures. The auditor should determine that the audit committee is informed about the methods used to account for significant

unusual transactions.[6] In addition, the engagement quality reviewer cannot provide concurring approval of issuance if he or she is aware of a significant engagement deficiency, including those regarding significant unusual transactions.[7]

Introduction

Staff Audit Practice Alert No. 3, *Audit Considerations in the Current Economic Environment* ("Practice Alert No. 3"), was issued in December 2008 to assist auditors in identifying matters related to the current economic environment that might affect audit risk and require additional emphasis.[8] Practice Alert No. 3 reminds auditors that the auditors' response to the risks of material misstatement due to fraud includes evaluating the business rationale for significant unusual transactions. In the staff's view, although the economic conditions have changed since December 2008, the risk factors, including the risks of significant unusual transactions, that existed in December 2008 continue to exist today and may affect the risk of material misstatement.

The existing standards of the PCAOB contain a variety of requirements related to significant, unusual, or complex transactions, or a combination thereof. The purpose of this staff audit practice alert is to complement Practice Alert No. 3 by compiling selected, relevant requirements from existing PCAOB auditing standards regarding significant unusual transactions into one document. While this alert summarizes certain areas with respect to significant unusual transactions, it is not intended to, and does not, serve as a substitute for the relevant standards of the PCAOB. Nor does this alert change the auditor's responsibilities regarding significant, unusual, or complex transactions. This alert reminds auditors of certain responsibilities with respect to significant unusual transactions and assists auditors in assessing and responding to the risks of material misstatement associated with these transactions during reviews of interim financial information and audits of financial statements, including integrated audits.

This alert groups the existing requirements for significant unusual transactions into the following categories: (1) identifying and assessing risks of material misstatement, (2) responding to risks of material misstatement, (3) consulting others, (4) evaluating financial statement presentation and disclosure,[9] (5) communicating with audit committees, and (6) reviewing interim financial information.

Identifying and Assessing Risks of Material Misstatement

The auditor's identification of significant unusual transactions is informed by the performance of audit procedures and the auditor's knowledge of the

---

[7] Paragraphs 12 and 17 of Auditing Standard No. 7, *Engagement Quality Review*. AS No. 7 is effective for audits of financial statements and reviews of interim financial information for fiscal years beginning on or after December 15, 2009.

[8] Staff Audit Practice Alert No. 3 is available at http://pcaobus.org/Standards/QandA/12-05-2008_APA_3.pdf.

[9] The PCAOB has no authority to prescribe the form or content of an issuer's financial statements. Accordingly, while this staff audit practice alert describes authoritative accounting guidance, it does not establish or interpret that accounting guidance. See Staff Questions and Answers, References to Authoritative Accounting Guidance in PCAOB Standards, available at http://pcaobus.org/Standards/QandA/2009-09-02_FASB_Codification.pdf.

company's business and industry. The auditor should obtain knowledge of matters that relate to the nature of the company's business, its organization, and its operating characteristics.[10] Such matters include, for example, the type of business, types of products and services, and related parties.[11] The auditor also should consider matters affecting the industry in which the company operates, such as accounting practices common to the industry, competitive conditions, and financial trends and ratios.[12]

The auditor should consider whether the information obtained about the company and its environment indicates that one or more fraud risk factors are present, including significant unusual transactions.[13] The auditor also should consider identified fraud risk factors in identifying and assessing risks of material misstatement due to fraud.[14] In obtaining the information needed to identify risks of material misstatement due to fraud, the auditor, among other things, should inquire of others within the company about the existence or suspicion of fraud, including, for example, employees involved in initiating, recording, or processing significant unusual transactions.[15] The auditor also should perform analytical procedures when planning the audit with one objective being the identification of significant unusual transactions.[16] The auditor's assessment of the risks of material misstatement due to fraud, including those regarding significant unusual transactions, should be ongoing throughout the audit.[17]

The auditor should take into account the results of the fraud risk assessment when planning and performing an audit of internal control over financial reporting.[18] The auditor should evaluate whether the company's controls (including controls over significant unusual transactions, particularly those that result in late or unusual journal entries) sufficiently address the identified risks of material misstatement due to fraud and controls intended to address the risk of management override of other controls.[19]

Responding to Risks of Material Misstatement

When the auditor has concluded that there is a significant risk of material misstatement of the financial statements, the auditor should consider this conclusion in determining the nature, timing, or extent of procedures; assigning staff; or requiring appropriate levels of supervision.[20] The auditor's response to the assessment of the risks of material misstatement of the financial statements due to fraud is influenced by the nature and significance of the risks identified as being present and the company's programs and controls that address these identified risks.[21]

[20] AU secs. 312.17 and 316.50.

[21] AU sec. 316.47.

The auditor's response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence.[22] Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud associated with significant unusual transactions.[23]

As part of the overall responses to the risks of material misstatement due to fraud, the auditor should consider management's selection and application of significant accounting principles, including those related to significant unusual transactions.[24] In this respect, the auditor may have a greater concern about whether the accounting principles selected and policies adopted are being applied in an inappropriate manner to create a material misstatement of the financial statements.[25] The auditor should consider whether their collective application indicates a bias that might create a material misstatement of the financial statements.[26] In examining journal entries and other adjustments for evidence of possible material misstatement due to fraud, the auditor should consider that inappropriate entries or adjustments may be applied to accounts that contain significant unusual transactions.[27] The auditor also should evaluate whether analytical procedures that were performed in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement resulting from significant unusual transactions.[28]

In evaluating whether the business rationale (or the lack thereof) for significant unusual transactions suggests that the transactions may have been entered into to engage in fraudulent financial reporting or conceal misappropriation of assets, the auditor should consider:

- Whether the form of such transactions is overly complex;
- Whether management has discussed the nature of and accounting for such transactions with the audit committee or board of directors;
- Whether management is placing more emphasis on the need for a particular accounting treatment than on the underlying economics of the transaction;
- Whether transactions that involve unconsolidated related parties, including special purpose entities, have been properly reviewed and approved by the audit committee or board of directors; and
- Whether the transactions involve previously unidentified related parties or parties that do not have the substance or the financial strength to support the transaction without assistance from the company under audit.[29]

If the company has entered into a significant unusual transaction and the combined assessed level of inherent and control risk is high, in addition to

---

[22] AU sec. 316.13. In addition, paragraphs .07-.09 of AU sec. 230, *Due Professional Care in the Performance of Work*, notes that due professional care requires the auditor to exercise professional skepticism.

examining documentation held by the company, the auditor should consider confirming the terms and amounts of the transaction with the other parties.[30] The auditor also should obtain an understanding of the substance of the transaction to determine the appropriate information to include on the confirmation request.[31]

The auditor must identify all significant findings or issues (including significant unusual transactions) in an engagement completion document.[32] The auditor must document actions taken to address significant unusual transactions (including additional evidence obtained), and the basis for the conclusions reached.[33] In addition, a principal auditor that decides not to make reference to the audit of another auditor, among other things, must obtain, review, and retain an engagement completion document from that auditor.[34]

Engagement Quality Review

The engagement quality reviewer should review the engagement completion document and confirm with the engagement partner that there are no significant unresolved matters, including unresolved matters related to significant unusual transactions.[35] The engagement quality reviewer also should, among other things, evaluate whether (1) appropriate consultations have taken place on difficult or contentious matters, and review the documentation, including conclusions, of such consultations and (2) appropriate matters have been communicated, or identified for communication, to the audit committee, management, and other parties, such as regulatory bodies.[36]

Consulting Others

A firm's policies and procedures should provide reasonable assurance that personnel refer to authoritative literature or other sources and consult, on a timely basis, with individuals within or outside the firm, when appropriate (for example, when dealing with significant unusual transactions).[37] Individuals consulted should have appropriate levels of knowledge, competence, judgment, and authority.[38] The nature of the arrangements for consultation depends on a number of factors, including the size of the firm and the levels of knowledge, competence, and judgment possessed by the persons performing the work.[39] In addition, procedures performed by filing reviewers for U.S. Securities and Exchange Commission ("SEC") filings by SEC registrants audited by foreign associated firms of registered firms that were members of the American Institute of Certified Public Accountants' SEC Practice Section should generally include discussing with the engagement partner any significant auditing, accounting, financial reporting, and independence matters that come to the attention of the filing reviewer, including how such matters were addressed and resolved.[40]

Evaluating Financial Statement Presentation and Disclosure

The auditor's opinion that the financial statements are presented fairly in conformity with the applicable financial reporting framework should be based on whether:

a. The accounting principles selected and applied have general acceptance;[41]

b. The accounting principles are appropriate in the circumstances;

c. The financial statements, including the related notes, are informative of matters that may affect their use, understanding, and interpretation;

d. The information presented in the financial statements is classified and summarized in a reasonable manner, that is, neither too detailed nor too condensed; and

e. The financial statements reflect the underlying transactions and events in a manner that presents the financial position, results of operations, and cash flows stated within a range of acceptable limits, that is, limits that are reasonable and practicable to attain in financial statements.[42]

The auditor's judgment concerning the "fairness" of the overall presentation of financial statements should be applied within the framework of generally accepted accounting principles.[43] Generally accepted accounting principles recognize the importance of reporting transactions and events in accordance with their substance.[44] The auditor should consider whether the substance of transactions or events, including significant unusual transactions, differs materially from their form.[45]

The presentation of financial statements in conformity with generally accepted accounting principles includes adequate disclosure of material matters.[46] An auditor considers whether a particular matter should be disclosed by management in light of the circumstances and facts of which he or she is aware at the time.[47] A basic tenet of the auditing standards of reporting states, "[i]nformative disclosures in the financial statements are to be regarded as reasonably adequate unless otherwise stated in the report."[48] If management omits from the financial statements, including the accompanying notes, information that is required by generally accepted accounting principles, the auditor should determine the effect on his or her audit report.[49] The auditor also may emphasize

---

[41] The auditor should look to the requirements of the SEC for the company under audit with respect to accounting principles applicable to that company. See Rule 4-01 of Regulation S-X.

[42] Paragraph .04 of AU sec. 411, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles.

[44] AU sec. 411.06.

[45] Ibid.

[46] Paragraph .02 of AU sec. 431, *Adequacy of Disclosure in Financial Statements*.

[47] Ibid. When an auditor becomes aware of information that relates to financial statements previously reported on by the auditor, but which was not known to the auditor at the date of the report, and which is of such a nature and from such a source that the auditor would have investigated it had it come to the auditor's attention during the course of the audit, the auditor should take the actions described in AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

[48] Paragraph .02 of AU sec. 150, *Generally Accepted Auditing Standards*, and AU sec. 431.01.

[49] AU sec. 431.03.

a matter regarding the financial statements in a separate paragraph of the auditor's report.[50]

In addition, the auditor should read the other information accompanying the interim and annual financial statements contained in reports filed with the SEC.[51] For example, the Management's Discussion and Analysis of Financial Condition and Results of Operations section of annual reports and other filings might include discussions regarding significant unusual transactions.[52] The auditor should consider whether that information or the manner of its presentation is materially inconsistent with the financial statements. If the auditor concludes that there is a material inconsistency, or becomes aware of information that he or she believes is a material misstatement of fact, the auditor should determine if the financial statements, the audit report, or both require revision. If the auditor concludes that the financial statements or audit report do not require revision, the auditor should request the company to revise the other information.[53]

Communicating With Audit Committees

The auditor should determine that the company's audit committee is informed about the methods used to account for significant unusual transactions.[54] The auditor also should discuss with the audit committee the auditor's judgments about the quality, not just the acceptability, of the company's accounting principles as applied in its financial reporting.[55] The discussion should be open and frank and generally should include such matters as the clarity and completeness of the company's financial statements, which include related disclosures.[56] In addition, the discussion should include items that have a significant impact on the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.[57] Items that may have such an impact include significant unusual transactions.[58]

Reviewing Interim Financial Information

The objective of a review of interim financial information is to provide the auditor with a basis for communicating whether he or she is aware of any material modifications that should be made to the interim financial information for it to conform with generally accepted accounting principles.[59] The objective of a review differs significantly from that of an audit of annual financial statements and consists principally of performing analytical procedures and making inquiries of persons responsible for financial and accounting matters.[60] Certain

[60] Ibid.

auditing procedures may be performed concurrently with the review of interim financial information.[61] For example, there may be significant unusual transactions occurring during the interim period under review for which the auditing procedures needed for purposes of the audit of the annual financial statements could be performed, to the extent practicable, at the time of the interim review.[62]

During a review of interim financial information, the auditor should make inquiries of members of management who have responsibility for financial and accounting matters.[63] Specifically, the auditor should inquire about, among other things (a) significant unusual transactions that may have an effect on the interim financial information, and (b) significant unusual transactions occurring or recognized in the last several days of the interim period.[64] If the auditor becomes aware of information that leads him or her to believe that the interim financial information may not be in conformity with generally accepted accounting principles in all material respects, the auditor should make additional inquiries or perform other procedures that he or she considers appropriate to provide a basis for communicating whether he or she is aware of any material modifications that should be made to the interim financial information.[65]

When conducting a review of interim financial information, the auditor also should determine whether significant unusual transactions have been identified.[66] If such transactions have been identified, the auditor should communicate them to the audit committee, or be satisfied, through discussion with the audit committee, that such matters have been communicated to them by management.[67]

Standards-Setting Activities

The PCAOB has a project on its standards-setting agenda to address the auditing standards regarding related parties. In connection with that project, the PCAOB is evaluating its auditing standards regarding the consideration of significant unusual transactions. In addition, the PCAOB also has on its standards-setting agenda projects to address other standards referenced in this practice alert. Updates on these activities are available on the PCAOB's website. Relevant links are provided below:

.06 Staff Audit Practice Alert No. 6

Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants From Outside the Firm

July 12, 2010

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Introduction

The PCAOB staff has observed that a number of registered public accounting firms located in the United States ("U.S.") have been issuing audit reports on financial statements filed by issuers that have substantially all of their operations outside of the U.S. Although there is nothing inherently inappropriate about this, observations from the Board's inspection process suggest that some firms may not be conducting those audits in accordance with PCAOB standards. Specifically, some firms may be issuing audit reports based on the work of another firm, or by using the work of assistants engaged from outside of the firm, without complying with relevant PCAOB standards.

The circumstances in which such conduct occurs often involve issuers that are incorporated in the U.S. (and that file their annual reports with the Securities and Exchange Commission ("SEC") on Form 10-K), even though substantially all of their operations are in another country. In this context, a number of issuers have come to be incorporated in the U.S., and to have securities trading in the U.S., following a transaction in which an operating company in another country merges with a U.S. shell company that had previously registered its securities under the Securities Exchange Act of 1934.

The number of issuers that file financial statements audited by U.S. auditors, while having substantially all of their operations in another country, has increased in recent years. The demand for those audit services is met by U.S registered public accounting firms of various sizes, including small firms.[1] The

[1] For example, in a 27-month period ending March 31, 2010, at least 40 U.S. registered public accounting firms with fewer than five partners and fewer than ten professional staff issued audit reports on financial statements filed with the SEC by companies whose operations were

(continued)

Board's inspection staff has observed some situations in which it appeared that U.S. registered public accounting firms that provided those auditing services did so by having all or most of the audit performed by another firm or by assistants engaged from outside the firm (including firms and assistants located in another country) without complying with PCAOB standards applicable to using the work and reports of another auditor and supervising assistants.[2] Prompted by those observations, this Alert is intended as a reminder to registered firms concerning a firm's obligations when using the work of other firms or using assistants engaged from outside the firm.

Using the Work of Other Auditors

AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, establishes requirements that apply when an auditor of an issuer's financial statements "use[s] the work and reports of other independent auditors who have audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments included in [that issuer's] financial statements."[3]

The Board's inspection staff has identified indications that some U.S. firms auditing issuers with substantially all of their operations in another country are not properly applying AU sec. 543. For example, in one situation, a U.S. firm engaged to audit such an issuer retained an accounting firm in the China region to perform audit procedures. In the year preceding the audit, the U.S. firm's managing partner and engagement partner traveled to the China region to meet with the issuer's board of directors, the issuer's management, and the other firm in order to gain an understanding of the issuer's business and processes and review with the other firm its audit process. The U.S. firm's personnel did not travel to the China region during the audit, and the audit procedures performed by the other firm constituted substantially all of the audit procedures on the issuer's financial statements. The firm in the China region did not issue a report, and substantially all of the audit documentation was maintained by the firm in the China region. Based on its view that AU sec. 543 applied and permitted it to do so, the U.S. firm issued an audit report stating that it had audited the financial statements and expressing an unqualified opinion on the financial statements. The inspection staff, however, concluded that it was inappropriate for the firm to serve as principal auditor and use the work of the other auditor pursuant to AU sec. 543.

(footnote continued)

substantially all in the China region. (As used in this Staff Audit Practice Alert, the term "China region" includes the People's Republic of China, Hong Kong Special Administrative Region, and Taiwan.) This trend has also attracted attention, and was a subject of discussion at a recent meeting of the Board's Standing Advisory Group (available beginning at minute 43:15 of the archived Webcast at http://pcaobus.org/News/Webcasts/Documents/2010/pcaob-040710-p2.mp3). This trend is not necessarily limited to the China region, and the discussion in this Staff Audit Practice Alert of issues associated with the U.S. registered public accounting firms' audits of companies whose operations were substantially all in the China region also is relevant to audits of companies located in other jurisdictions.

[2] Where appropriate, the Board follows up on indications of such misconduct with enforcement investigations, disciplinary proceedings, and sanctions. By law, these Board processes are nonpublic unless and until they result in a final disciplinary sanction taking effect. In one completed matter, the Board imposed sanctions in a case in which a U.S. firm used a significant amount of audit work performed by a Hong Kong firm without adequately coordinating its work with that of the Hong Kong firm. See *In the Matter of Clancy and Co., P.L.L.C., Jennifer C. Nipp, CPA, and Judith J. Clancy, CPA*, PCAOB Release No. 105-2009-001 (March 31, 2009). Referrals from the Board's inspection program to the Board's enforcement program relating to situations in which firms are using work of other firms or using assistants from outside the firm in connection with audits of foreign-based issuers have been on the rise.

[3] AU sec. 543.01.

Identifying Circumstances in Which AU sec. 543 Applies

AU sec. 543 applies only to circumstances in which a firm would use the "work and reports of other independent auditors who have audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments" of an issuer.[4] AU sec. 543 does not provide a way for an auditor to take responsibility for the work of another auditor that has essentially audited an issuer's financial statements in their entirety, even if the firm complies with the other requirements in AU sec. 543. AU sec. 543 does not apply to the use of another auditor's work if that work is anything other than an audit of the financial statements of one or more subsidiaries, divisions, branches, components, or investments of the issuer.

Determining Whether to Serve as Principal Auditor

Even in circumstances where a firm has access to the work and reports of another auditor that has audited the financial statements of a subsidiary, division, branch, component, or investment, the firm cannot serve as principal auditor (and, accordingly, may not sign the audit report on the issuer's financial statements) unless the firm's own participation in the audit is sufficient.[5] In determining whether its participation is sufficient to serve as principal auditor, the firm "should consider, among other things, the materiality of the portion of the financial statements [the firm] audited in comparison with the portion audited by other auditors, the extent of [the auditor's] knowledge of the overall financial statements, and the importance of the components [the firm] audited in relation to the enterprise as a whole."[6] If an issuer has no significant operations other than those in another country, a registered public accounting firm that plays no significant part in the audit of the foreign operations is highly unlikely to have sufficient participation in the audit to serve as the issuer's principal auditor. A lack of sufficient participation cannot be overcome by using the work of the other auditor, even if the firm assumes responsibility for that work.

Responsibilities of the Principal Auditor

In circumstances in which AU sec. 543 applies and in which the firm's own participation is sufficient to serve as principal auditor, the principal auditor must comply with the other requirements in AU sec. 543 relative to the firm's use of the work and reports of the other auditor,[7] including:

- *Determining the Method of Reporting*—The principal auditor must decide, taking certain factors into account, whether to express an opinion on the financial statements taken as a whole without making reference to the audit of the other auditor (thereby assuming responsibility for the work of the other auditor) or to make reference to the audit of the other auditor.[8]

---

[4] Ibid.

[5] See AU sec. 543.02.

[6] AU sec. 543.02. In an integrated audit, the auditor who serves as the principal auditor of the financial statements should also be the principal auditor of internal control over financial reporting ("ICFR") and so must participate sufficiently in the audit of ICFR to provide a basis for serving as the principal auditor of ICFR. See Paragraph C8 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements.*

[7] AU sec. 543.03-.17.

[8] See AU sec. 543.03-.06.

- *Procedures Applicable to Both Methods of Reporting*—The principal auditor "should make inquiries concerning the professional reputation and independence of the other auditor [and] adopt appropriate measures to assure the coordination of [the principal auditor's] activities with those of the other auditor in order to achieve a proper review of matters affecting the consolidating or combining of accounts in the financial statements."[9]
- *Procedures Applicable When Assuming Responsibility* – If the principal auditor assumes responsibility for the work of the other auditor, the principal auditor "must obtain, and review and retain ... prior to the report release date", certain specific information from the other auditor, and should also consider "[visiting] the other auditor and [discussing] the audit procedures followed and results thereof; [reviewing] the audit programs of the other auditor [and, if appropriate, issuing] instructions to the other auditor as to the scope of the audit work; [and/or reviewing] additional audit documentation of the other auditor relating to significant findings or issues in the engagement completion document."[10]

If the principal auditor assumes responsibility for the work of other auditors, the principal auditor should determine whether the results of the principal auditor's own work, combined with the results of the work of other auditors, provide sufficient competent evidential matter to afford a reasonable basis for an audit opinion on the issuer's financial statements.[11] In developing an opinion, the principal auditor "should consider relevant evidential matter regardless of whether it appears to corroborate or to contradict the assertions in the financial statements."[12]

The principal auditor must exercise due professional care in the performance of the audit.[13] When the principal auditor assumes responsibility for the other auditor's work, the principal auditor's review of the audit documentation obtained from the other auditor[14] and performance of other required procedures may identify issues requiring additional consideration by the principal auditor, such as the following issues observed in some audits by the Board's inspection staff:

- The other auditor did not comply with instructions issued by the principal auditor.
- The other auditor identified an accounting or auditing issue that the other auditor did not resolve.
- The other auditor performed an audit in accordance with auditing standards other than the standards of the PCAOB.

---

[9] AU sec. 543.10. In connection with this point, both the principal auditor and auditors whose work and reports the principal auditor uses should be cognizant of PCAOB registration requirements. Under section 102(a) of the Sarbanes-Oxley Act of 2002 and PCAOB Rule 2100, *Registration Requirements for Public Accounting Firms*, an auditor whose work and report the principal auditor uses must be registered with the PCAOB if that auditor's work constitutes a substantial role in the preparation or furnishing of? the audit report on the issuer's financial statements, as defined in PCAOB Rule 1001(p)(ii), *Definitions of Terms Employed in Rules / Play a Substantial Role in the Preparation or Furnishing of an Audit Report*.

[10] AU sec. 543.12.

[11] See paragraph .02 of AU sec. 150, *Generally Accepted Auditing Standards*, and paragraph .08 of AU sec. 230, *Due Professional Care in the Performance of Work*.

[12] Paragraph .25 of AU sec. 326, *Evidential Matter.*

[13] See AU sec. 230.01.

[14] AU sec. 543.12 describes certain specific information that the principal auditor must obtain from the other auditor.

- The other auditor reported on the financial statements of a component that prepares its financial statements in accordance with a financial reporting framework[15] other than the framework used to prepare the financial statements of the issuer as a whole.

To the extent the principal auditor has substantial doubt about any financial statement assertion of material significance, the principal auditor "must refrain from forming an opinion until [the principal auditor] has obtained sufficient competent evidential matter to remove such substantial doubt, or ... must express a qualified opinion or a disclaimer of opinion."[16] For example, if the principal auditor determines that the work of the other auditor does not provide the necessary audit evidence, the principal auditor should take appropriate actions to obtain sufficient competent evidence, including "[participating] in discussions regarding the accounts with management personnel of the component whose financial statements are being audited by other auditors and/or [making] supplemental tests of such accounts."[17]

Language Considerations

Appropriately satisfying the requirements described above necessarily entails overcoming any language barriers. If the appropriate supervisory personnel of the principal auditor are not sufficiently fluent in the language in which the audit documentation of the other auditor is prepared, the principal auditor must take the necessary actions to enable the principal auditor to fulfill its responsibilities in accordance with PCAOB standards. The principal auditor can neither omit the procedures described in AU sec. 543 because of language differences, nor satisfy those requirements by reference to documents that the principal auditor does not understand.

Engaging Assistants from Outside the Firm

The previous section describes certain requirements in PCAOB standards that apply when a principal auditor uses the work and reports of other auditors who have audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments included in the financial statements presented. In other situations, the auditor might engage assistants from outside the firm in performing the audit. The auditor's responsibilities related to the work of assistants engaged from outside the firm are governed by the same standards as the auditor's responsibilities related to the work of assistants who are associated with the auditor's firm as a partner, shareholder, or employee.

The Board's inspection staff has identified situations in which U.S. firms auditing companies with substantially all of their operations in another country appeared not to have appropriately executed their responsibilities with respect to the work of assistants engaged from outside of the firm. For example, in one situation, a U.S. firm retained the services of a consulting firm that had personnel who could read, write, and speak the language of the area, in the China region, in which the issuer's operations were located. Those consultants planned the audit, communicated with the issuer's management, and traveled to the China region to complete a substantial portion of the audit. None of

---

[15] U.S. generally accepted accounting principles and International Financial Reporting Standards are examples of a financial reporting framework. Auditors should look to the requirements of the SEC for the issuer under audit with respect to the accounting framework applicable to the issuer.

[16] AU sec. 326.25.

[17] AU sec. 543.13.

the U.S. firm's partners or employees traveled to the China region or planned, performed, supervised, or meaningfully reviewed the audit work. Procedures performed by the U.S. firm's engagement partner consisted primarily of reviewing certain work papers prepared by the consultants as well as issuer-prepared draft financial statements and lead schedules that had been translated into English. The inspection staff concluded that the level of the firm's involvement in the audit work performed by the consultants was not sufficient for the firm to assert that an audit had been performed by the firm and that the audit provided a reasonable basis for the firm to have an opinion on the financial statements.

As described further in this Alert, some key considerations in determining the appropriate level of the firm's involvement in audit work performed by assistants engaged from outside the firm (including planning, performing, and supervising the audit work) include, but are not limited to, the following:

- Whether the auditor would be able to obtain information about the knowledge, skill, and ability of the assistants engaged from outside the firm (including their knowledge of PCAOB standards and the relevant financial reporting requirements), and to evaluate the independence of the assistants engaged from outside the firm.
- Whether the auditor would be able to properly plan and supervise the work of the assistants engaged from outside the firm and whether the auditing procedures performed by such assistants, in combination with the work performed by individuals from within the firm, would provide sufficient competent evidential matter to afford a reasonable basis for an audit opinion.
- Whether the assistants engaged from outside the firm are located in the same country or speak the same language as the auditor or the auditor's client.
- Whether the auditor would be able to comply with the documentation requirements, including the preparation, assembly, and retention of documentation, with respect to the work performed by the assistants engaged from outside the firm.

Knowledge, Skill, Ability, and Independence

As is the case when a registered public accounting firm deploys its own partners, shareholders, or employees on an audit, when a registered public accounting firm engages assistants from outside of the firm, the firm's engagement partner "is responsible for the assignment of tasks to, and supervision of, [those] assistants."[18] Those assistants, like all assistants, should be "assigned to tasks and supervised commensurate with their level of knowledge, skill, and ability,"[19] which necessarily requires the person who assigns and supervises the assistants to have an understanding of the level of knowledge, skill, and ability possessed by those assistants. The knowledge, skill, and ability of personnel assigned significant engagement responsibilities also should be commensurate

[18] AU sec. 230.06.

[19] Ibid. A registered public accounting firm has a responsibility to ensure that all individuals who perform audit procedures for which the firm is responsible, including assistants engaged from outside the firm, comply with the professional standards applicable to the firm's auditing practice (see QC sec. 20.03) and that work is assigned to individuals who have the degree of technical training and proficiency required in the circumstances (see QC sec. 20.13).

with the auditor's assessment of the level of risk for the engagement, including the risk of material misstatement due to fraud.[20] Ordinarily, higher risk requires the assignment of more experienced personnel or additional persons with specialized skills and knowledge, e.g., information technology or forensic specialists.[21]

As for independence, the registered public accounting firm must approach independence considerations concerning the assistants engaged from outside the firm as if they were employees of the firm.[22]

Planning and Supervision

The registered public accounting firm is responsible for planning the audit, and for ensuring that the work of assistants is supervised and reviewed in accordance with PCAOB standards.

As the "auditor with final responsibility for the audit", as that term is used in paragraph .02 of AU sec. 311, *Planning and Supervision*, the registered public accounting firm's engagement partner is responsible for audit planning, which involves developing an overall strategy for the expected conduct and scope of the audit.[23] Procedures that an auditor may consider in planning the audit usually involve review of records relating to the company and discussions with assistants, including assistants engaged from outside the firm, and management of the company, the board of directors, or its audit committee.[24] "In planning the audit, the auditor should consider the nature, extent, and timing of work to be performed and should prepare a written audit program (or set of written audit programs).[25]

"The auditor should obtain a level of knowledge of the [issuer's] business that will enable [the auditor] to plan and perform [the] audit in accordance with [PCAOB standards]."[26] "Knowledge of an [issuer's] business is ordinarily obtained through experience with the [issuer] or its industry and inquiry of personnel of the [issuer]."[27] Prior to, or in conjunction with, gathering information about the issuer's business, the engagement partner and key members of the audit team, including any engaged from outside the firm, should discuss the potential for material misstatement due to fraud.[28] The discussion should include, among other things, "an exchange of ideas or "brainstorming" ... about how and where [the auditor] believe[s] the [issuer's] financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the [issuer] could be misappropriated."[29]

---

[20] See paragraph .17 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, and paragraph .50 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

[21] Ibid.

[22] PCAOB standards require that policies and procedures be established to provide the firm with reasonable assurance that individuals who perform the audit maintain independence (in fact and in appearance) in all required circumstances, perform all professional responsibilities with integrity, and maintain objectivity in discharging professional responsibilities. (See QC sec. 20.09.)

[23] See AU sec. 311.03, and paragraph 9 of Auditing Standard No. 5.

[24] See AU sec. 311.04 (including examples of such procedures).

[25] AU sec. 311.05.

[26] AU sec. 311.06.

[27] AU sec. 311.08.

[28] See AU sec. 316.14 and AU sec. 316.17.

[29] AU sec. 316.14.

Appropriate supervision and review necessarily entails overcoming any language barriers. The engagement partner is responsible for the supervision of assistants, including any engaged from outside the firm.[30] "Elements of supervision include instructing assistants, keeping informed of significant problems encountered, reviewing the work performed, and dealing with differences of opinion ... The extent of supervision appropriate in a given instance depends on many factors, including the complexity of the subject matter and the qualifications of persons performing the work."[31] "Ordinarily, higher risk requires ... more extensive supervision by the [engagement partner] during both the planning and the conduct of the engagement."[32] Also, "the extent of supervision should reflect the risks of material misstatement due to fraud."[33] "The work performed by each assistant should be reviewed to determine whether it was adequately performed and to evaluate whether the results are consistent with the conclusions to be presented in the auditor's report."[34]

Audit Documentation

The registered public accounting firm is responsible for ensuring that all audit documentation – including the documentation of the work of the assistants – necessary to meet the PCAOB's documentation requirements is prepared and retained.[35] Auditing Standard No. 3, *Audit Documentation*, "establishes general requirements for documentation the auditor should prepare and retain in connection with engagements conducted pursuant to the standards of the PCAOB."[36] Among other things, Auditing Standard No. 3 requires that the auditor "identify all significant findings or issues in an engagement completion document."[37] These requirements are applicable in situations in which the auditor engages, as assistants, individuals from outside the firm.

Engagement Quality Review

"[T]he engagement quality reviewer should evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the [audit] report"[38] including "[reviewing] the engagement completion document and [confirming] with the engagement partner that there are no significant unresolved matters."[39] "[T]he firm may grant permission to the client to use the [audit] report only after the engagement quality reviewer provides concurring approval of issuance."[40]

.07 Staff Audit Practice Alert No. 7

Auditor Considerations of Litigation and Other Contingencies Arising From Mortgage and Other Loan Activities

December 20, 2010

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Background

In the fall of 2010, allegations surfaced that banks may have misrepresented the quality of mortgages sold and that those banks could be required to repurchase the affected mortgages.[1] Additional allegations have been made that companies servicing $6.4 trillion in American mortgages may have bypassed legally required steps to foreclose on homes.[2] Some of these practices could result in loss contingencies for certain financial institutions that may require recognition of liabilities or disclosure in financial statements.[3]

The situation remains fluid, with estimates of potential costs associated with foreclosure irregularities and mortgage repurchases ranging from "manageable" to an exposure for the industry of up to $52 billion.[4] Some experts have acknowledged scenarios in which the title and legal documentation problems related to foreclosures could lead to significant effects on banks' balance sheets.[5]

Numerous federal and state agencies are coordinating their efforts to review practices that may not comply with state foreclosure laws or applicable federal

[5] Ibid.

laws[6] and to provide for better disclosures and improve transparency in the securitization market.

As part of the efforts to provide for better disclosures, in October 2010, the United States Securities and Exchange Commission's ("SEC") Division of Corporation Finance sent letters to certain public companies as a reminder of their disclosure obligations with respect to their forthcoming quarterly reports on Form 10-Q and subsequent filings. The letters highlighted continued concerns about potential risks and costs associated with mortgage and foreclosure-related activities or exposures. The sample letter posted to the SEC Web site stated that companies should consider certain items for disclosure, including, without limitation, "the impact of various representations and warranties regarding mortgages made to purchasers of the mortgages (or to purchasers of mortgage-backed securities) including to the government-sponsored entities (GSEs), private-label mortgage-backed security (MBS) investors, financial guarantors and other whole loan purchasers."[7]

The letters further reminded companies of the requirements for disclosures in Management's Discussion and Analysis for Forms 10-Q and 10-K under Item 303 of Regulation S-K and for accruing and disclosing loss contingencies in the financial statements under the Financial Accounting Standards Board's ("FASB") Accounting Standards Codification ("ASC") Topic 450, Contingencies, Subtopic 450-20. Companies were reminded that, as appropriate, they should consider the need to accrue loss contingencies and to provide clear and transparent disclosure regarding obligations relating to the various representations and warranties that were made in connection with securitization activities and whole loan sales, and to discuss any implications of any foreclosure reviews, including potential delays in completing foreclosures. If applicable, these disclosures would address the company's role as an originator, securitizer, servicer, and investor.

The letters cautioned companies to consider a number of matters when preparing their quarterly and subsequent filings (e.g., litigation risks and uncertainties related to any known or alleged defects in the securitization process, including any potential defects in mortgage documentation or in the assignment of the mortgages). The letter also cautioned that some of these issues are not limited to financial institutions.

This practice alert advises auditors that the potential risks and costs associated with mortgage and foreclosure-related activities or exposures, such as those discussed in the SEC staff letters, could have implications for audits of financial statements or of internal control over financial reporting. These implications might include accounting for litigation or other loss contingencies and the related disclosures. Auditors should consider the effect of these matters during their reviews of interim financial information, year-end audits, and attestation engagements on assessments of compliance with servicing criteria.

Staff Audit Practice Alert No. 3, *Audit Considerations in the Current Economic Environment* ("Practice Alert No. 3"), was issued in December 2008 to assist auditors in identifying matters related to the current economic environment that might affect audit risk and require additional emphasis.[8] Among other things,

---

[6] White House, Office of the Press Secretary, *Fact Sheet: Federal Government Efforts to Support Accountability, Stability and Clarity in the Housing Market*, dated October 20, 2010.

[7] Neither companies nor public accounting firms should rely on the summary of the SEC staff letter in this practice alert, but should review the letter in its entirety. The SEC staff sample letter is available at: http://www.sec.gov/divisions/corpfin/guidance/cfoforeclosure1010.htm.

[8] Staff Audit Practice Alert No. 3 is available at: http://pcaobus.org/Standards/QandA/12052008_APA_3.pdf.

Practice Alert No. 3 provides auditors with information on selected financial reporting areas, including contingencies and guarantees that may be affected by the economic environment, and reminds auditors of the requirements regarding accounting estimates.

Audit risks that existed in December 2008 with respect to contingencies and guarantees, as well as potential other issues, continue to exist today. These audit risks potentially affect the risk of material misstatement, as evidenced by recent concerns regarding problematic foreclosures and asserted claims or potential litigation relating to representations and warranties made in connection with securitizations or whole loan sales. Auditors may need to consider the possible effects that these issues might have on the nature, timing, and extent of planned audit procedures.[9]

Matters for the auditor's consideration

In light of continued concerns about potential risks and costs associated with mortgage and foreclosure-related activities or exposures, this practice alert reminds auditors of their responsibilities with respect to auditing loss contingencies, disclosures, and other related topics.

Auditing Litigation, Claims, and Assessments

Companies that may be affected by mortgage and foreclosure-related activities or exposures may need to accrue for or provide disclosures relating to legal contingencies.[10]

AU sec. 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, establishes requirements with respect to litigation, claims, and assessments.[11] This standard states that in order to identify litigation, claims, and assessments, and to become satisfied with the accounting and reporting of such matters, the auditor should gather sufficient and appropriate audit evidence relevant to the following factors:

- The existence of a condition, situation, or set of circumstances indicating an uncertainty as to the possible loss to an entity arising from litigation, claims, and assessments;
- The period in which the underlying cause for legal action occurred;[12]
- The degree of probability of an unfavorable outcome; and
- The amount or range of potential loss.[13]

---

[9] Paragraph .33 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*.

[10] FASB ASC Subtopic 45020 requires companies to establish accruals for litigation and other contingencies when it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. In an audit of a foreign private issuer ("FPI") whose financial statements are prepared in conformity with International Financial Reporting Standards ("IFRS"), the auditor should refer to applicable accounting and disclosure requirements of the International Accounting Standards Board ("IASB"). PCAOB standards apply regardless of the applicable financial reporting framework.

[11] AU sec. 337.01.

[12] According to paragraphs .01 and .04 of AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, when an auditor becomes aware of information that relates to financial statements previously reported on by the auditor, but which was not known to the auditor at the date of the report, and which is of such a nature and from such a source that the auditor would have investigated it had it come to the auditor's attention during the course of the audit, the auditor should take the actions described in AU sec. 561.

[13] AU sec. 337.04.

AU sec. 337 discusses the procedures the auditor should perform regarding litigation, claims, and assessments[14] and also states that although certain audit procedures may be undertaken for other purposes, they might also disclose litigation, claims, and assessments (e.g., reading minutes of meetings of stockholders, directors, and appropriate committees held during and subsequent to the period being audited; reading contracts, loan agreements, leases, and correspondence from taxing or other governmental agencies; or inspecting similar documents).[15] Further, the auditor should obtain a letter from the client's lawyer to assist the auditor in corroborating the information furnished by management concerning litigation, claims, and assessments.[16]

Auditing Accounting Estimates

Companies involved in mortgage and foreclosure-related activities may need to estimate and accrue amounts for other potential loss contingencies including those related to various representations and warranties. AU sec. 342, *Auditing Accounting Estimates*, establishes requirements regarding obtaining and evaluating sufficient appropriate audit evidence for accounting estimates. In auditing accounting estimates, the auditor normally should consider the company's historical experience in making past estimates as well as the auditor's experience in auditing companies in the same industry.[17] However, changes in facts, circumstances, or a company's procedures may cause factors different from those considered in the past to become significant to the accounting estimate.[18] For example, a company's historical experience relating to repurchasing loans sold into securitization structures may not be indicative of future trends in that area.

According to AU sec. 342, when planning and performing procedures to evaluate the reasonableness of the company's accounting estimates, the auditor should consider, with an attitude of professional skepticism, the subjective and objective factors included in the estimate.[19] When evaluating accounting estimates relating to mortgage loan repurchase losses, such factors may include, among others, estimated levels of defects based on the company's review or experience, default expectations, investor repurchase demand, or appeal success rates.

Evaluating Financial Statement Presentation and Disclosure

Information essential for a fair presentation in conformity with generally accepted accounting principles should be set forth in the financial statements (which include the related notes).[20] When such information is set forth elsewhere in a report to shareholders "it should be referred to in the financial statements."[21] If management omits from the financial statements, including the accompanying notes, information that is required by generally accepted accounting principles, the auditor should express a qualified or adverse opinion and should provide the information in the audit report, if practicable.[22]

---

[14] AU sec. 337.05.

[15] AU sec. 337.07.

[16] AU sec. 337.08.

[17] AU sec. 342.09.

[18] Ibid.

[19] AU sec. 342.04.

[20] Paragraph .41 of AU sec. 508, *Reports on Audited Financial Statements*.

[21] Ibid.

[22] Paragraph .03 of AU sec. 431, *Adequacy of Disclosure in Financial Statements*.

In addition, the auditor should read the other information accompanying the interim and annual financial statements contained in reports filed with the SEC,[23] including the Management's Discussion and Analysis of Financial Condition and Results of Operations sections of annual reports and other filings.[24] The auditor should consider whether that information or the manner of its presentation is materially inconsistent with the financial statements. If the auditor concludes that there is a material inconsistency or becomes aware of information that he or she believes is a material misstatement of fact, the auditor should determine if the financial statements, the audit report, or both, require revision. If the auditor concludes that the financial statements or audit report do not require revision, the auditor should request the company to revise the other information.[25]

FASB ASC Topic 450, Contingencies, Subtopic 450-20 requires that when a loss is not both probable and estimable, an accrual is not recorded, but disclosure of the contingency is required to be made when there is at least a reasonable possibility that a loss or an additional loss has been incurred.[26] Companies involved in mortgage and foreclosure-related activities or exposures may need to establish new disclosures or enhance existing disclosures regarding litigation and other contingencies or estimates. For example, companies that sold or securitized loans but may not have complied with representations and warranties may be at risk of being forced to repurchase such loans. These companies may need to disclose or enhance their existing disclosures regarding the nature, timing, and uncertainty of their potential exposures as additional claims arise and are resolved.

Communication with Audit Committees

To the extent potential risks and costs associated with mortgage and foreclosure-related activities or exposures are identified, auditors are reminded of their responsibility to communicate with the audit committee. AU sec. 380, *Communication With Audit Committees*, includes requirements regarding communications relating to management judgments and accounting estimates.[27] Other communication with the audit committee includes such matters as the clarity and completeness of the company's financial statements, which include related disclosures[28] and a discussion of items that have a significant impact on the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.[29] For example, in appropriate circumstances, this discussion would include the auditor's view on disclosures relating to representations and warranties that were made in connection with securitization activities.

---

[23] Paragraph .18(f) of AU sec. 722, *Interim Financial Information*, and paragraph .04 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*.

[24] For example, Item 303(a)(1) of Regulation S-K instructs management to "[i]dentify any known trends or any known demands, commitments, events or uncertainties that will result in or that are reasonably likely to result in the registrant's liquidity increasing or decreasing in any material way."

[25] AU secs. 550.04–05.

[26] In an audit of a FPI whose financial statements are prepared in conformity with IFRS, the auditor should refer to applicable accounting and disclosure requirements of the IASB. PCAOB standards apply regardless of the applicable financial reporting framework.

[27] AU sec. 380.08.

[28] AU sec. 380.11.

[29] Ibid.

Reviewing Interim Financial Information

The objective of a review of interim financial information is to provide the auditor with a basis for communicating whether he or she is aware of any material modifications that should be made to the interim financial information for it to conform with generally accepted accounting principles.[30] AU sec. 722, *Interim Financial Information*, requires the auditor to make inquiries regarding unusual or complex situations that may have an effect on the interim information.[31] These situations may include changes in estimated loss contingencies as well as trends and developments affecting accounting estimates.[32]

If information obtained from performing review procedures leads the auditor to believe that the interim financial information may not be in conformity with generally accepted accounting principles in all material respects, the auditor should make additional inquiries or perform other procedures considered appropriate to provide a basis for communicating whether any material modifications should be made to the interim financial information.[33] AU sec. 722 provides additional requirements in cases where the auditor believes that a material modification should be made to the interim financial information.[34]

Ongoing Audit Considerations

As additional information is determined in future periods regarding the potential risks and costs associated with mortgage and foreclosure-related activities or exposures, auditors planning or performing an audit should acquire a sufficient understanding to assess how the additional information affects the nature and potential magnitude of the associated risks. Auditors should modify the overall audit strategy and the audit plan as necessary if circumstances change significantly during the course of the audit, including changes due to a revised assessment of the risks of material misstatement or the discovery of a previously unidentified risk of material misstatement.[35] Accordingly, auditors may need to consider, e.g., how documentation issues in the loan origination process at a bank affect the auditors' initial risk assessment, overall audit strategy and the audit plan.

Risks of material misstatement can arise from a variety of sources, including external factors, including conditions in the company's industry and environment and company-specific factors, such as the nature of the company, its activities, and internal control over financial reporting which can affect the judgments involved in determining accounting estimates or create pressures to manipulate the financial statements to achieve certain financial targets.[36]

---

[30] AU sec. 722.07.

[31] AU sec. 722.18c.

[32] AU sec. 722.55B1.

[33] AU sec. 722.22.

[34] AU sec. 722.29–722.31.

[35] Paragraph 15 of Auditing Standard No. 9, *Audit Planning*. On August 5, the Board adopted Auditing Standards No. 8 through No. 15 related to the auditor's assessment of and response to risk ("the Risk Assessment Standards"), which, if approved by the SEC, would become effective for audits of fiscal periods beginning on or after December 15, 2010. For audits of fiscal periods before the Risk Assessment Standards are effective, auditors should refer to the relevant requirements of AU sec. 311, *Planning and Supervision*, AU sec. 312, AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*, and Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

[36] Paragraph 5 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

In an integrated audit, many factors can affect the risk associated with a control including the design of the control,[37] nature of the control and the frequency with which it operates as well as the competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance.[38] Accordingly, an increase in the volume of foreclosures or loan repurchases could affect the risks associated with related controls.

Attestation Reports on Assessments of Compliance With Servicing Criteria

Section 1122 of the SEC's Regulation AB requires an attestation report by a registered public accounting firm on a servicer's assessment of compliance with servicing criteria.[39] These criteria include, among other things, maintaining collateral or security on pool assets as required by the transaction agreements or related pool asset documents; and initiating, conducting, and concluding loss mitigation or recovery actions in accordance with the timeframes or other requirements established by the transaction agreements.[40]

In adopting Regulation AB, the SEC provided that AT sec. 601, *Compliance Attestation*, applies to the preparation of these attest reports[41] and generally requires that, in assessing whether the servicer has complied with the criteria, an auditor should consider risk factors similar to those an auditor would consider when planning an audit of financial statements,[42] as well as factors relevant[43] to the compliance engagement.[44] For example, in assessing risk, the auditor considers whether the servicer or its parent has identified noncompliance as part of an internal investigation, internal audit, or other compliance review.

.08 Staff Audit Practice Alert No. 8
Audit Risks in Certain Emerging Markets

October 3, 2011

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of the standards and rules of the PCAOB and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts do not establish rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Executive Summary

Emerging markets play an increasingly important role in the global economy given their high economic growth outlook and significant market size.[1] Recent disclosures of possible improprieties in financial reporting by companies based in certain large emerging markets in Asia and observations from the Board's oversight activities highlight the need for heightened awareness of risks when performing audits of companies with operations in emerging markets.

This practice alert focuses on risks of misstatement due to fraud ("fraud risks") that auditors might encounter in audits of companies with operations in emerging markets, auditors' responsibilities for addressing those risks, and certain other auditor responsibilities under PCAOB auditing standards. Local business practices and cultural norms in emerging markets may differ from those in more developed markets, and auditors should be alert to the effect of these differences on the risks of material misstatement. Auditors should focus on the audit procedures required to respond to those risks.

Fraud risks may be encountered in audits of companies in any region, whether the region is an emerging or developed market. Auditors have a responsibility to assess fraud risks in the financial statements that they audit and to perform audit procedures that respond to those risks, regardless of the regulatory environment.[2] The specific nature and characteristics of fraud risks, however, can vary depending upon, among other things, the environment in which the company operates, including the maturity and the robustness of the regulatory environments in the countries in which the company conducts its business activities.

Authorities in many emerging market countries are taking steps to improve investor protection. The PCAOB, however, has observed from its oversight

[1] According to information in the Statistical Appendix of International Monetary Fund *World Economic Outlook: Slowing Growth Rising Risks* (September 2011), emerging market countries accounted for over 40 percent of global gross domestic product in 2010.

[2] See paragraph 4 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement* and paragraphs 3-4 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

activities some conditions in audits of certain companies in emerging markets that indicate heightened fraud risk. Other situations have come to light in recent corporate filings with the Securities and Exchange Commission ("SEC") and in SEC orders suspending trading in securities of certain companies in emerging markets. In just two months in 2011, more than 24 companies with their principal place of business in the People's Republic of China ("PRC") filed Forms 8-K with the SEC reporting auditor resignations, accounting irregularities, or both.[3] In some instances, the auditor's letter of resignation stated that the auditor resigned because of circumstances that could constitute illegal acts for purposes of Section 10A of the Securities Exchange Act of 1934 ("Exchange Act").[4] Since then the SEC's actions have expanded, including instituting stop order proceedings against two PRC-based companies.[5] Further, additional auditor resignations have occurred.[6]

Examples of conditions and situations indicating heightened fraud risk in certain companies in emerging markets that have been observed by PCAOB staff or reported in an SEC filing include:

- Existence of two separate and different sets of financial books and records;
- Discrepancies between the company's financial books and records and audit evidence obtained with respect to the existence and accuracy of cash balances, accounts receivable, and revenues;
- Auditor difficulties in confirming cash balances, including when requesting to visit the offices of the company's bank, or questions about the authenticity of bank statements provided to the auditor;
- Auditors' follow-up visits to bank offices indicating serious discrepancies between bank confirmations provided to the auditor and the bank's actual records, such as previously undisclosed material borrowings and no record of or significant differences regarding certain transactions;
- Attempts by management to intercept or alter confirmation requests or responses;
- Irregularities in sales contracts, such as a company-specific seal affixed on the sales contract that does not belong to the purported customer named in the contract;
- Recognizing revenue from contracts or customers whose existence could not be corroborated;
- Recording sales of products shipped to warehouses or freight forwarders where no customer is identified;
- Undisclosed material facts surrounding acquisition transactions, sales transactions, and off-balance-sheet transactions with related parties;

[6] See, e.g., Longtop Financial Technologies Limited, Form 6-K (May 23, 2011), Exhibit 2 at: http://www.sec.gov/Archives/edgar/data/1412494/000095012311052882/d82501exv99w2.htm.

- Recording of assets for which evidence of control, ownership, or title is either unclear or difficult to corroborate;
- Potential double counting of fixed assets;
- Recording of uncorroborated operating expenses for which the business purpose is unclear;
- Manipulation of the accounting records to mischaracterize or conceal payment of bribes or other improper payments;
- Significant unexplained discrepancies between amounts included in the financial statements in SEC filings and amounts included in financial reports to other regulators, such as local authorities;
- Use of personal-type bank accounts held in the name of corporate officers or employees instead of corporate-type bank accounts for company business; and
- Unusual delays by management in the production of routine documents requested by the auditor.[7]

PCAOB standards require auditors to perform their audits to respond to fraud risks and other risks of material misstatement, and to obtain relevant and reliable evidence that is sufficient to support the auditor's opinion.[8] This practice alert discusses certain considerations that may be relevant when performing audits in emerging markets.

Although the conditions, situations, and fraud risks described in this alert have been observed in audits of companies in certain emerging markets, they might also be present at companies in other markets. The matters discussed in this alert are relevant whenever such conditions, situations, or fraud risks are present in audits of companies located in emerging or developed markets.

Consideration of Fraud is an Integral Part of the Audit

The consideration of fraud is an integral part of the audit under PCAOB standards. PCAOB standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement due to error or fraud.[9] The auditor should exercise professional skepticism, and "conduct the audit engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present."[10] PCAOB auditing standards related to the auditor's assessment of and response to risk[11] and AU sec. 316, collectively, describe the auditor's responsibilities for identification, assessment, and response to fraud risks.

---

[7] In addition to indicating a heightened fraud risk, in some circumstances, the conditions and situations in this list also may be indications of illegal acts which are discussed in the section on illegal acts below.

Identifying and Assessing Fraud Risk Factors[12]

Fraud risks may arise from a variety of sources, including external factors and internal factors. The auditor should perform risk assessment procedures[13] and evaluate whether the information gathered from those procedures indicates that one or more fraud risk factors are present and should be taken into account in identifying and assessing fraud risks.[14]

As part of risk assessment procedures, the auditor "should obtain an understanding of the company and its environment"[15] in order to "understand the events, conditions, and company activities that might reasonably be expected to have a significant effect on the risks of material misstatement."[16] This includes, for example, understanding:[17]

- The relevant industry and regulatory factors, including the legal, and political environment, which may include matters such as:
  - — The company's significance in the regional or local economy and its level of influence over its industry, and regional or local government, and
  - — Cultural norms in the business and regulatory environments;
- The company's objectives, strategies, and related business risks; its organizational structure; and sources of funding of the company's operations;
- The company's significant investments, including equity method investments, joint ventures, and variable interest entities ("VIEs");[18]
- The sources of the company's earnings, including the relative profitability of key products and services; and
- The company's key supplier and customer relationships.

Significant differences can exist between the business environments faced by companies with operations in emerging markets and those in developed markets, which may affect the risk of misstatement in the financial statements. For example, companies in emerging markets may be subject to rapidly changing or less consistent regulatory oversight and reporting requirements, whereas companies in developed markets may not.[19] These and other aspects of the

---

[12] According to paragraph 65 of Auditing Standards 12, "[f]raud risk factors are events or conditions that indicate (1) an incentive or pressure to perpetrate fraud, (2) an opportunity to carry out the fraud, or (3) an attitude or rationalization that justifies the fraudulent action. Fraud risk factors do not necessarily indicate the existence of fraud; however, they often are present in circumstances in which fraud exists." See, generally, AU sec. 316.85.

[13] See paragraphs 4-58 of Auditing Standard No. 12, which describe risk assessment procedures the auditor should perform.

[14] See paragraphs 59-73 of Auditing Standard No. 12, which discuss identifying and assessing the risks of material misstatement, due to error or fraud, using information obtained from performing risk assessment procedures.

[15] Paragraph 7 of Auditing Standard No. 12.

[16] Ibid.

[17] See paragraphs 9-17 of Auditing Standard No. 12.

[18] See Subtopic 810-10 of the Financial Accounting Standards Board's Accounting Standards Codification for a definition of a variable interest entity.

[19] See, generally, Silvia Iorgova and Li Lian Ong *The Capital Markets of Emerging Europe: Institutions, Instruments and Investors*, IMF Working Paper WP/08/103 (April 2008), at: www.imf.org/external/pubs/ft/wp/2008/wp08103.pdf.

business environment in emerging markets can create incentives, pressures, and opportunities that may lead to a heightened risk of fraud.

Incentives and Pressures

As with public companies in developed countries, emerging market companies seeking to raise capital in international markets may wish to present a strong financial position and robust growth in revenue and earnings. In turn, this may create incentives or pressures to manipulate the financial statements rather than report poor results or bad news to the investing public. For example, if a company failed to consummate a previously announced acquisition, there is a risk that management might manipulate the financial statements to make them appear as though the acquisition has occurred. As another example, management at remotely located operating units of large multinational companies locations may feel pressure to report inflated results.

In addition to the incentives and pressures routinely considered in audits of public companies, auditors should consider any unique characteristics of the emerging market company or its environment that might result in specific fraud risks. For example, a company might engage in a significant business partnership with a state-owned entity or VIE. In that situation, the company might be motivated to consolidate the partnership or VIE to strengthen its reported financial position, even if significant legal restrictions prevent the company from obtaining a controlling interest in the partnership or assets. For instance, a company might enter into contractual arrangements with a VIE that are designed to enable the company to consolidate the VIE, even though there might be significant uncertainties regarding the economic substance of those arrangements.[20] As another example, legal restrictions on the movement of company assets might lead companies to maintain substantial amounts of cash or other liquid assets in business units in certain jurisdictions, which can create incentives for misappropriation of assets.

Opportunities

Some fraud risks arise when internal or external conditions and weak internal controls provide opportunities for management or employees of the company to engage in fraudulent activities. Certain aspects of the business environment in emerging markets can create opportunities to perpetrate fraud, as discussed in the examples below.

For example, a company in an emerging market might have a dominant presence in the geographic region in which it is located because it is the single largest employer in the region, or it may exercise control over raw materials on which other companies in the region depend. The company's management might have strong ties with the local or state government. In such circumstances:

- Management might be able to dictate terms or conditions to local suppliers or customers, which might result in non-arm's length transactions.
- Management might be able to pressure personnel of a local bank or other third parties to provide fraudulent information to the auditor.

---

[20] Additionally, such VIE structures can result in increased risks related to omitted, incomplete, or inaccurate disclosures. See paragraphs 12-13 of Auditing Standard No. 12.

- Company employees might not be willing to report instances of fraud for cultural reasons or fear of retribution from management. While whistleblower protections have been introduced in many emerging market countries, observers have said that there is still a need to improve the effectiveness of the whistleblower programs.[21]

Additionally, weak internal controls and lack of robust governance mechanisms have been observed in companies in certain emerging market countries. This may stem from a lack of familiarity in local cultures with certain governance concepts, such as prohibition of self-dealing, even where similar legal concepts exist.[22] For example, such a culture might provide opportunities for management to influence other senior company officials or various third parties to provide false or misleading information to the company's auditors.

If criticizing or questioning a figure of authority is contrary to the local culture, the company's employees may be hesitant to express any concerns about management's actions to an auditor. Such an environment can provide additional opportunities for management to override controls or intentionally misstate the financial statements.[23]

As another example, a company in an emerging market might be created as a spin-off from a larger private or state-owned entity. The operating components of the larger entity may be among the company's largest suppliers or customers. In certain instances, the same individual or group that controls the company might also control the company's suppliers and customers.[24] Such situations might provide opportunities for management to:

- Enter into undisclosed side agreements with the related parties, or
- Collude with the related parties to create false documentation to support fictitious transactions.

Some emerging market companies employ as their chief financial officer ("CFO") an individual based in, or from, another region or country. Such a CFO might lack knowledge of the local language and the company's business practices and, therefore, might not be able to effectively perform certain important entity-level controls, thereby creating opportunities for company personnel to commit or conceal fraudulent misstatement of the financial statements. Similar conditions and risks may be present at significant subsidiaries of multi-national companies in emerging markets.

In some emerging market countries, controlling shareholders exercise strong oversight over executive management and foster a corporate culture focused on long-term value creation. In other jurisdictions, controlling shareholders have the opportunity to engage in abusive conduct, a problem that is magnified in jurisdictions where transparency is poor and where a weak rule of law fails to give minority investors proper judicial recourse.[25]

The Auditor's Response to Fraud Risks

PCAOB standards require that the auditor design and implement audit responses that address the identified and assessed fraud risks.[26] The auditor's responses should include responses that have an overall effect on how the audit is conducted (e.g., making appropriate engagement assignments) and responses involving the nature, timing, and extent of audit procedures (e.g., modifying the planned audit procedures).[27]

Under PCAOB standards, "[t]he auditor's responses to the assessed risks of material misstatement, particularly fraud risks, should involve the application of professional skepticism in gathering and evaluating audit evidence."[28] Ineffective responses to fraud risks may result in the auditor's failure to detect material misstatement of the financial statements or failure to obtain sufficient appropriate audit evidence to support the opinion in the auditor's report. Examples of the application of professional skepticism in response to the assessed fraud risks may include "modifying the planned audit procedures to obtain more reliable evidence regarding relevant assertions and ... obtaining sufficient appropriate evidence to corroborate management's explanations or representations."[29]

Performing Audit Procedures to Respond to Fraud Risks

The auditor should perform substantive procedures, including tests of details, that are specifically responsive to the assessed fraud risks, including certain procedures to address the risk of management override of controls.[30]

Many of the conditions discussed above that indicate heightened fraud risk appear to involve possible attempts to overstate the amounts of assets or revenues in the companies' financial statements. When performing audit procedures to address certain fraud risks, especially those involving the existence of assets such as cash and accounts receivable, it is important to obtain audit evidence through direct written communication with a knowledgeable third party who is objective and free from bias with respect to the audited entity.[31]

If, through the performance of risk assessment procedures, other audit procedures, or by other means, the auditor becomes aware of conditions that call for a heightened degree of professional skepticism with respect to the authenticity of documents, the auditor should perform additional procedures to determine that the reliability of evidence obtained in the course of the audit has not been compromised.[32] In such circumstances, it would be unlikely for auditors to rely solely on management-provided documentation without obtaining documentation directly from third parties to corroborate management's assertions.

[32] See paragraph 9 of Auditing Standard No. 15.

Confirmations

To respond to fraud risks related to the company's accounts with a bank or amounts due from customers, it is important for the auditor to confirm amounts included in the company's financial statements directly with a knowledgeable individual from the bank or customer who is objective and free from bias with respect to the audited entity rather than rely solely on information provided by the company's management.[33] Under PCAOB standards, "[e]vidence obtained from a knowledgeable source that is independent of the company is more reliable than evidence obtained only from internal company sources."[34]

Further, under PCAOB standards, the auditor "should maintain control over the confirmation requests and responses."[35] If the auditor identifies a risk that the company's management, or someone else at management's request, could attempt to intercept or alter the confirmation requests or responses, the auditor should maintain control over the confirmation process by taking actions aimed specifically at addressing that risk. For example, if the auditor uses a courier to expedite the delivery of confirmation requests, the courier should be reliable and independent from management to ensure that the confirmation requests are delivered directly to the intended recipient. If there is a heightened risk of management interference in the confirmation process, it might be necessary for the auditor to deliver the confirmation request personally and/or to observe the intended recipient of the confirmation request complete the response in order to communicate directly with an independent and knowledgeable source.

Also, the auditor should evaluate who the intended recipient of the confirmation request is and whether the company's management has any influence over this individual to provide false or misleading information to the auditor.[36] For example, if the company is the only or a significant customer or supplier of the confirming entity, the staff of that entity may be more susceptible to pressure from the company's management to falsify documentation provided to the auditor. As another example, the auditor might determine that confirmation responses cannot be relied upon if it appears that management interfered with the process because responses to confirmation requests were received from a personal e-mail account rather than a company network domain, or multiple confirmations are returned with similar handwriting and the same date, or confirmations returned from companies with different physical addresses contain mail stamps indicating same time processing.

If there is a heightened risk that the intended recipient is susceptible to management influence, the auditor should consider whether the response will provide meaningful and appropriate evidence and determine whether other procedures are necessary to obtain sufficient appropriate audit evidence.[37]

Revenue Recognition

Under PCAOB standards, "[t]he auditor should presume that there is a fraud risk involving improper revenue recognition and evaluate which types of

---

[33] See AU sec. 330.34, which states that there is a presumption that the auditor will request the confirmation of accounts receivable during an audit except under certain conditions that are unlikely to be present when fraud risks are present. For example, one of those conditions, the auditor's combined assessed level of inherent and control risk is low, is unlikely to be the case when a fraud risk is present.

[34] Paragraph 8 of Auditing Standard No. 15. Also, AU secs. 330.26-.27 describe the auditor's responsibilities regarding confirmation with knowledgeable third parties who are objective and free from bias with respect to the audited entity.

[35] AU sec. 330.28.

[36] See AU sec. 330.26-.27.

[37] See paragraph 4 of Auditing Standard No. 15 and AU sec. 330.27.

revenue, revenue transactions, or assertions may give rise to such risks."[38] Management might use a variety of tools to attempt to overstate revenue or conceal improprieties in recording revenue, including entering into improper bill-and-hold transactions, generating invoices and customer contracts for non-existent transactions, altering original documentation, and establishing fake customers and mailing addresses.

To develop an effective response to such fraud risks, it is important for the auditor to obtain an understanding of the company and its environment, including the sources and composition of revenues; specific attributes of revenue transactions; the company's business and financial reporting processes regarding revenue and amounts due from customers; and unique industry considerations. Such an understanding is important in order for the auditor to consider the ways in which revenue could be fraudulently misstated in order to design appropriate audit procedures to detect those types of misstatements. Also, PCAOB standards require the auditor to gain an understanding of the business rationale for significant unusual transactions and whether that rationale (or the lack thereof) suggests that the transactions may have been entered into to engage in fraudulent financial reporting or conceal misappropriation of assets.[39]

Exercising professional skepticism requires the auditor to, among other things, perform procedures to obtain and critically evaluate evidence from all sources rather than rely solely on management representations about the company's performance.[40] For example, if the auditor performs an analytical procedure regarding revenue and management represents that a significant unexpected increase in revenue from the prior year results from increased production, the auditor should obtain evidence to corroborate this representation and critically evaluate whether the representation is reasonable based on the evidence obtained, such as, whether the company is capable of producing the additional output.[41]

While the auditor is not expected to be an expert in document authentication, the auditor should exercise professional skepticism in reviewing documentation obtained as audit evidence, especially documentation provided by the company. Under PCAOB standards, "if conditions indicate that a document may not be authentic or that the terms in a document have been modified but that the modifications have not been disclosed to the auditor, the auditor should modify the planned audit procedures or perform additional audit procedures to respond to those conditions and should evaluate the effect, if any, on the other aspects of the audit."[42] For example, if the auditor suspects that management has falsified sales documentation, the auditor should perform additional procedures, such as performing procedures to obtain documentation directly from the company's customers or suppliers to compare it to documents provided by management.

Transactions with Related Parties

It is not uncommon for companies in emerging markets to be owned or controlled by a small group of individuals or a family. These individuals often serve as the senior members of the company's management and also may control some of the

---

[38] Paragraph 68 of Auditing Standard No. 12.

[39] See AU sec. 316.66.

[40] See paragraph 7 of Auditing Standard No. 13 and AU sec. 333.02-.04.

[41] See paragraphs 5-9 of Auditing Standard No. 14. When the auditor is performing an analytical procedure as a substantive test, see the requirements of AU sec. 329, *Substantive Analytical Procedures*.

[42] Paragraph 9 of Auditing Standard No. 15.

entities that the company does business with, such as customers or suppliers. Accordingly, transactions with related parties may play a significant role in the company's operations. The auditor, therefore, should be aware of a risk of undisclosed related party transactions or side agreements.

To obtain sufficient appropriate audit evidence with respect to related party transactions, an auditor should design and perform procedures that take into account the specific environment in which a company operates.[43] In addition, pursuant to section 10A(a)(2) of the Exchange Act, auditors are required to include "procedures designed to identify related party transactions that are material to the financial statements or otherwise require disclosure therein."[44]

Some companies in emerging markets might have significant transactions with related entities that are not audited or are audited by another firm. For example, a company might purchase substantially all of its raw materials and utility services from or extend significant loans to a related unaudited entity. Paragraph A.2 of AU sec. 316.85 states in the Opportunities subsection that "significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm" constitute an example of a fraud risk factor that provides opportunities to engage in fraudulent financial reporting. Staff Audit Practice Alert No. 5, *Auditor Considerations Regarding Significant Unusual Transactions*, issued on April 7, 2010, describes certain requirements in PCAOB auditing standards regarding significant unusual transactions.[45]

Other Matters that Affect Fraud Risk

Under PCAOB standards, "the auditor should evaluate whether the accumulated results of auditing procedures and other observations affect the assessment of the fraud risks made throughout the audit and whether the audit procedures need to be modified to respond to those risks."[46] Matters indicating a heightened risk of fraud may include, for example:[47]

- *Inconsistent, vague, or implausible responses from management* – In situations in which management fraudulently recorded nonexistent sales transactions, management's explanation of an unexpected increase in revenue may be vague or inconsistent with the auditor's understanding of the company's operations.
- *Conflicting or missing evidence* – Documents provided by management may appear to have been altered or have internal inconsistencies. The auditor should critically assess such inconsistencies and discrepancies to identify whether they are indicative of fraudulent activities by the company's management or employees. For example:
    - — The name of a third party on the letterhead of a confirmation response may be different from the name on a seal used to authenticate a signed document.

---

[43] See AU sec. 334, *Related Parties*, which describes procedures for the auditor to perform "to identify related party relationships and transactions and to satisfy himself concerning the required financial statement accounting and disclosure."

[44] See 15 U.S.C. § 78j-1(a).

[45] Staff Audit Practice Alert No. 5 is located on the Board's web site at: http://pcaobus.org/Standards/QandA/04-07-2010_APA_5.pdf.

[46] Paragraph 28 of Auditing Standard No. 14.

[47] See Appendix C of Auditing Standard No. 14.

— Amounts confirmed by the local branch of a bank may be different from those confirmed by the bank headquarters.

— There may be conflicting or missing documentary support for the company's rights to assets.

- *Problematic relationships between the auditor and management* – To conceal fraudulent financial reporting, management might attempt to control the audit process by limiting the auditor's access to sources of audit evidence, such as the company's personnel or third parties. For example:

  — Management could request that the auditor send confirmation requests and receive replies through personnel of the company.

  — Management could instruct the bank not to respond to the auditor's request to confirm the company's cash, deposit, or loan payable balances with the bank.

  — Management engaged in fraudulent financial reporting might be unwilling to add or revise disclosures in the financial statements to make them more transparent.

  — Management engaged in fraudulent financial reporting might be unwilling to appropriately address significant deficiencies in internal control on a timely basis, e.g., before the end of a financial reporting period.

Under PCAOB standards, restrictions on the scope of the audit imposed by the company's management or by circumstances, such as – among other things – the inability to obtain sufficient appropriate evidence or an inadequacy in the accounting records, may require the auditor to qualify his or her opinion or to disclaim an opinion on the company's financial statements.[48]

Other Considerations

Client Acceptance and Continuance

Under PCAOB standards, client acceptance and continuance is a required element of quality control for an auditor.[49] This includes establishing policies and procedures to provide reasonable assurance that the auditor:

- "Undertakes only those engagements that the firm can reasonably expect to be completed with professional competence.
- Appropriately considers the risks associated with providing professional services in the particular circumstances."[50]

Conditions and situations previously described in this alert that indicate heightened fraud risk in companies with operations in emerging markets may also place additional demands on the auditor's professional competence. In performing acceptance and continuance assessments for clients with operations in emerging markets, the auditor should consider his or her own ability to perform audits in emerging markets and, if using the work of accountants outside the

---

[48] See paragraph .22 of AU sec. 508, *Reports on Audited Financial Statements*. Also, Auditing Standard No. 5 provides direction regarding modifications to the auditor's report due to restrictions on the scope of the audit of internal control over financial reporting.

[49] See paragraph .07 of QC sec. 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*.

[50] QC sec. 20.15.

auditor's own firm, the auditor's ability to supervise or assume responsibility for that work in accordance with PCAOB standards.

The PCAOB previously directed auditors' attention to the standards that apply to using the work of other auditors and engaging assistants from outside the firm – including auditors and assistants based outside the U.S. – in Staff Audit Practice Alert No. 6, *Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants from Outside the Firm* ("Practice Alert No. 6"), issued on July 12, 2010.[51] Practice Alert No. 6 noted, among other things, that the following factors may affect how an auditor plans and performs an audit of the financial statements of an issuer with substantially all of its operations outside of the U.S., including emerging market countries:

- Use of local audit firms or assistants from an outside firm to complete a portion of the audit work;
- The need to understand the local language;
- Additional travel time and expense necessary to complete an audit; and
- The need to understand the local business environment in which the client operates.

Making Engagement Assignments and Coordinating the Auditor's Response with Another Accounting Firm

PCAOB standards require that the knowledge, skill, and ability of engagement team members with significant engagement responsibilities, and the extent of supervision of engagement team members, be commensurate with the risks of material misstatement, including fraud risks.[52] The higher risk areas of the audit, including the areas of fraud risk, require more supervisory attention from the engagement partner. When the auditor uses the work of accountants outside the auditor's own firm, the auditor should take into account the knowledge, skill, and ability of each engagement team member from outside the firm.[53] Through the Board's oversight activities, the Board's staff has observed instances in certain audits of emerging market companies in which the engagement partner or other engagement team members inappropriately delegated to junior assistants the identification of audit issues, analysis of documents provided by the company, and certain communication with management and third parties; additionally, supervision by the auditor of the junior personnel was not in compliance with PCAOB standards.

In some situations, another independent accounting firm (including accounting firms affiliated with the same network as the auditor) performs an audit of and issues a report on one or more of the company's subsidiaries, divisions, branches, components, or investments. The auditor should inquire about the professional reputation of the other auditor and adopt other appropriate measures, e.g., ascertaining that the other auditor is familiar with the relevant financial reporting requirements and PCAOB standards.[54] PCAOB inspection

---

[51] Practice Alert No. 6 is located on the Board's web site at: http://pcaobus.org/Standards/QandA/2010-07-12_APA_6.pdf

[52] See paragraph 6 of Auditing Standard No. 10 and paragraph 5 of Auditing Standard No. 13. If the auditor uses as assistants personnel of another accounting firm or individual accountants not employed by an accounting firm, the auditor should follow the same requirements as for supervising assistants from the auditor's own firm.

[53] See paragraph 6 of Auditing Standard No. 10.

[54] See paragraph .10 of AU sec. 543, *Part of Audit Performed by Other Independent Auditors*.

reports, when available, may provide the auditor with relevant information.[55] The auditor should adopt appropriate measures to assure the coordination of the auditor's activities with those of the other auditor, including the audit procedures performed in response to fraud risks.[56] Through the Board's oversight activities, the Board's staff has observed instances in certain audits of companies in emerging markets in which the auditor did not properly coordinate the audit with another auditor. When significant parts of the audit are performed by other auditors, the auditor must decide whether the auditor's own participation in the audit is sufficient.[57]

Making appropriate engagement assignments and coordinating the auditor's response with another auditor necessarily entails overcoming any language barriers. In some audits of companies in emerging markets, key engagement team members[58] might be from outside the country in which substantially all of the company's operations, its top management, or the other auditor is located. In those circumstances, the auditor should take the necessary steps to enable effective communication among the engagement team members, effective communication between the auditor and the company's personnel or the other auditor, and effective review of documentation prepared in a foreign language.[59]

Individual accountants or accounting firms that participate in the audit from the same region where the company is located (the "local accountants") may be aware of local customs, cultural norms, and business practices that have an impact on the company's corporate governance and business activities. When planning and performing the audit, the auditor should discuss such matters with the local accountants and determine whether any of these matters affect fraud risks. The auditor should discuss with the local accountants identified fraud risks and determine that appropriate steps are taken to respond to these risks.[60]

Illegal Acts

During the course of an audit, the auditor may determine that violations of laws or government regulations by company management or employees may constitute illegal acts, as defined by AU sec. 317, *Illegal Acts by Clients,*[61] and

---

[55] According to PCAOB Rule 2100, each public accounting firm that (a) prepares or issues any audit report with respect to any issuer; or (b) plays a substantial role in the preparation or furnishing of an audit report with respect to any issuer must be registered with the Board. The Board publishes on its Web site a list that names every registered firm that has triggered an inspection requirement under PCAOB Rule 4003 and notes whether the firm has ever been inspected. See http://pcaobus.org/Inspections/Pages/InspectedFirms.aspx. In addition, the Board has published on its Web site a listing of issuer audit clients of non-U.S. registered firms in jurisdictions where the PCAOB had been denied access to conduct inspections. See http://pcaobus.org/International/Inspections/Pages/IssuerClientsWithoutAccess.aspx.

[56] See AU sec. 543.10, and AU sec. 316.53.

[57] See AU sec. 543.02.

[58] The term "key engagement team members" includes all engagement team members who have significant engagement responsibilities, including the engagement partner. See paragraph 50 of Auditing Standard No. 12.

[59] See paragraph 5 of Auditing Standard No. 10 and AU sec. 543.10.

[60] See paragraph 5 of Auditing Standard No. 10, paragraphs 51-52 of Auditing Standard No. 12, and AU sec. 316.53.

[61] See AU sec. 317.02. For example, even though not fraud, a violation of the books and records provisions of the Foreign Corrupt Practices Act ("FCPA"), Exchange Act sections 13(b)(2) through (b)(7), would be an illegal act as defined in AU sec. 317. These FCPA provisions generally require

(continued)

section 10A of the Exchange Act.[62] AU sec. 317 describes the considerations an auditor should give to the possibility of illegal acts as well as the auditor's responsibilities when a possible illegal act is detected. In addition, pursuant to section 10A(a)(1) of the Exchange Act, auditors are required to perform procedures designed to provide reasonable assurance of detecting illegal acts that would have a direct and material effect on the determination of the financial statement amounts.[63] The auditor's responsibility to detect and report misstatements resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for misstatements caused by error or fraud.[64]

When the auditor becomes aware of information concerning a possible illegal act, the auditor should obtain an understanding of the nature of the act, the circumstances in which it occurred, and sufficient other information to evaluate the effect on the financial statements, as well as the implications for other aspects of the audit, such as the reliability of representations of management.[65] The implications of particular illegal acts will depend on the relationship of the perpetration and concealment, if any, of the illegal act to specific control procedures, and the level of management or employees involved.[66] The auditor should also evaluate the adequacy of disclosure in the financial statements of the potential effects of an illegal act on the entity's operations.[67] If the illegal act results in uncorrected misstatements of even relatively small amounts, it further could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.[68] If the auditor concludes that an illegal act has or is likely to have occurred, AU sec. 317 requires that the auditor, among other things, determine "that the audit committee, or others with equivalent authority and responsibility, is adequately informed with respect to [the] illegal acts."[69]

Section 10A(b) of the Exchange Act imposes additional requirements that apply when the auditor "detects or otherwise becomes aware of information indicating that an illegal act (whether or not perceived to have a material effect on the financial statements) has or may have occurred."[70]

Subsequent Discovery of Facts Existing at the Date of the Auditor's Report

AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, describes procedures that "should be followed by the auditor who,

.09 Staff Audit Practice Alert No. 9

Assessing and Responding to Risk in the Current Economic Environment

December 6, 2011

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of the standards and rules of the PCAOB and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts do not establish rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Background

In December 2008, Staff Audit Practice Alert No. 3, *Audit Considerations in the Current Economic Environment* ("Practice Alert No. 3"),[1] was issued to assist auditors in identifying matters related to the then-current economic environment that might affect the risk of material misstatement of issuers' financial statements and the related auditor's responsibilities under Public Company Accounting Oversight Board ("PCAOB" or "the Board") standards.

Since the issuance of Practice Alert No. 3, economic conditions have been slower to recover than many had originally anticipated.[2] Uncertainty continues regarding global economic conditions, and certain volatility indicators are higher than they were before the financial crisis. In September 2011, the International Monetary Fund ("IMF") reduced its estimate of 2012 global growth from 4.5%, which was provided in June 2011, to 4% and, at the same time, reduced its 2012 growth forecast for U.S. growth from 2.7% to 1.8%.[3]

In November 2011, the Federal Reserve Board also reduced its projections for short- and longer-term GDP while increasing its estimated unemployment rate.[4] While countries work toward addressing their economic challenges,

---

[1] *See* Staff Audit Practice Alert No. 3 on the Board's web site at: http://pcaobus.org/Standards/QandA/12-5-2008_APA_3.pdf.

[2] For example, in August 2011, the Congressional Budget Office reported that "[a]lthough economic output began to expand again two years ago, the pace of the recovery has been slow, and the economy remains in a severe slump." Congress of the United States Congressional Budget Office, "*The Budget and Economic Outlook: An Update*" (August 2011).

[3] On September 15, 2011, Christine Lagarde, Managing Director of the IMF, said "[o]verall, global growth is continuing, but slowing down. The advanced countries in particular are facing an anemic and bumpy recovery, with unacceptably high unemployment." The full text of Ms. Lagarde's speech is available at: http://www.imf.org/external/np/speeches/2011/091511.htm.

[4] *See* Federal Reserve Board "*Economic Projections of Federal Reserve Board Members and Federal Reserve Bank Presidents, November 2011,*" available at: http://www.federalreserve.gov/newsevents/press/monetary/20111102b.htm.

market volatility continues, and economic conditions may vary significantly among different regions or sectors of the economy.

Difficult economic conditions may affect companies' operations and financial reporting and, in turn, may have implications for audits of financial statements and internal control over financial reporting. Matters discussed in Practice Alert No. 3, such as auditing fair value measurements, auditing accounting estimates, the auditor's consideration of a company's ability to continue as a going concern, and auditing financial statement disclosures, continue to be critical in the current economic environment.

Although many of the risks discussed in Practice Alert No. 3 continue to have relevance, a number of the auditing standards referenced in that alert regarding the auditor's assessment of and response to risk were superseded in 2010 when the Board adopted a suite of eight new auditing standards ("risk assessment standards").[5] The risk assessment standards, which enhance the effectiveness of the auditor's assessment of and response to risk of material misstatement in an audit, became effective for audits of fiscal years beginning on or after December 15, 2010. As compared to the Board's interim standards, the risk assessment standards, among other things, establish enhanced requirements pertaining to the performance of risk assessment procedures, provide additional factors relevant to identifying significant risks, and enhance requirements for auditing financial statement disclosures. Auditors should be alert to the new requirements contained in the risk assessment standards and how those requirements relate to audits performed in the current economic climate.

The purpose of this staff audit practice alert is to assist auditors in identifying matters related to the current economic environment that might affect the risk of material misstatement and, therefore, require additional audit attention. The practice alert discusses certain issues posed by the current economic environment, highlights certain requirements in the risk assessment standards, and is organized into four sections:

- Considering the impact of economic conditions on the audit;
- Auditing fair value measurements and estimates;
- The auditor's consideration of a company's ability to continue as a going concern; and
- Auditing financial statement disclosures.

While the alert highlights certain issues, it is not intended to identify all issues that might affect audit risk in the current economic environment or serve as a substitute for the relevant auditing standards. All audits of issuers must be conducted in accordance with the standards of the PCAOB.

Considering the Impact of Economic Conditions on the Audit

As year-end approaches for many issuers, changing economic conditions might require the auditor to reassess the appropriateness of the planned audit strategy, materiality levels, risk assessments (including identified fraud risks and other significant risks), and planned audit responses. Such a reassessment is especially important if the auditor planned the audit and performed the initial

[5] Auditing Standards Nos. 8-15 were adopted by the Board on August 5, 2010. See PCAOB Release No. 2010-004, *Auditing Standards Related to the Auditor's Assessment of and Response to Risk and Related Amendments to PCAOB Standards* available at: http://pcaobus.org/Rules/Rulemaking/Docket%20026/Release_2010-004_Risk_Assessment.pdf.

risk assessment procedures early in the year or performed initial testing as of or through an interim date.

Audit Planning and Materiality Considerations

Audit planning is not a discrete phase of an audit but, rather, a continual and iterative process.[6] The nature and extent of planning activities that are necessary depend on, among other things, changes in circumstances that occur during the audit.[7] Accordingly, the auditor should modify the overall audit strategy and the audit plan as necessary if circumstances change significantly during the course of the audit.[8] For example, in an audit of the financial statements of a company with operations in multiple locations, changes in regional economic conditions might alter the risks associated with certain locations, which in turn, could affect the selection of locations for testing or determination of extent of testing at selected locations.[9]

The current economic environment may also require the auditor to re-evaluate the established materiality level or levels and tolerable misstatement (e.g., if the auditor initially established the materiality level or levels and tolerable misstatement based on estimated or preliminary financial statement amounts that differ significantly from actual amounts).[10] The auditor should evaluate whether, in light of the particular circumstances, there are certain accounts or disclosures for which there is a substantial likelihood that misstatements of lesser amounts than the materiality level established for the financial statements as a whole would influence the judgment of a reasonable investor.[11] If so, the auditor should establish separate materiality levels for those accounts or disclosures to plan the nature, timing, and extent of audit procedures.[12] For example, this might be appropriate if certain financial statement line items are particularly important to a regulatory requirement or a debt covenant.

Risk Assessment

The effectiveness of a risk-based audit approach is dependent on the ability of the auditor to identify the risks of material misstatement and to have an appropriate basis for assessing those risks. Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, establishes requirements regarding the process of identifying and assessing risks of material misstatement of the financial statements, including the auditor's responsibilities for performing risk assessment procedures.

Examples of risk assessment procedures that may provide particularly relevant information in identifying and assessing the risks of material misstatement in the current economic environment include, among other things:

- Reading public information about the impact of the current economic environment on the company, including, for example, analyst reports and company-issued press releases.[13]

---

[6] *See* paragraph 5 of Auditing Standard No. 9, *Audit Planning*.

[7] *See* paragraph 7 of Auditing Standard No. 9.

[8] *See* paragraph 15 of Auditing Standard No. 9.

[9] *See* paragraphs 11–14 of Auditing Standard No. 9.

[10] *See* paragraph 11 of Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*.

[11] Paragraph 7 of Auditing Standard No. 11.

[12] Ibid.

[13] *See* paragraph 11 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

- Obtaining an understanding of the company's performance measures (including, for example, performance measures that form the basis for contractual commitments or incentive compensation arrangements or measures used by external parties, such as analysts and rating agencies, to review the company's performance).[14] When slowdowns in a company's market or industry reduce the likelihood that a company will meet its consensus earnings estimate, there could be additional pressure on management to manipulate the financial statements to achieve this estimate.[15]
- Obtaining an understanding of a company's current and prospective financing requirements. In the current economic environment, companies may not be able to regularly access funds through short-term borrowings, may have other liquidity issues, such as significant collateral calls or a lack of acceptable collateral, may be at risk of violating debt covenants, or may have significant tranches of debt becoming due within one year. In such cases, companies may be unable to settle their obligations as they become due. In turn, this situation could affect the risks of material misstatement related to, for example, the classification of long-term liabilities or valuation of long-term assets, or it could result in substantial doubt about the company's ability to continue as a going concern.[16]
- Performing analytical procedures designed to enhance the auditor's understanding of the client's business and the significant transactions and events that have occurred since the prior year-end and identify areas that might represent specific risks relevant to the audit.[17] When performing an analytical procedure, the auditor should use his or her understanding of the company to develop expectations about plausible relationships among the data to be analyzed.[18]

The risk assessment standards include requirements for the auditor to incorporate knowledge obtained during past audits and interim reviews into the auditor's process for identifying risks of material misstatement; however, in a changing economic environment, the auditor should evaluate whether the prior years' information remains relevant and reliable.[19] For example, when performing an analytical procedure in the current economic environment, prior period financial information may not be an appropriate data point in developing an expectation.

The risk assessment standards also require the auditor's assessment of the risks of material misstatement to continue throughout the audit.[20] For example, significant changes in industry or market conditions near year-end, such as a sovereign debt rating downgrade in a market in which a company has a concentration of customers, might provide audit evidence that contradicts the evidence on which the auditor originally based his or her risk assessments regarding the valuation of assets. In such cases, the auditor should revise the

risk assessments and modify planned audit procedures or perform additional procedures in response to the revised risk assessments.[21]

Communication among the engagement team members about significant matters affecting the risks of material misstatement should continue throughout the audit, including when conditions change.[22] For instance, the results of the "brainstorming" discussion among the key engagement team members about how and where they believe the company's financial statements might be susceptible to material misstatement due to fraud may need to be updated to reflect additional fraud risks that could result from the specific effects of the current economic environment on the company.[23]

Identifying Fraud Risks and Other Significant Risks

In identifying and assessing risks of material misstatement, the auditor should evaluate whether the information gathered from the risk assessment procedures indicates that one or more fraud risk factors are present and should be taken into account in identifying and assessing fraud risks.[24] Staff Audit Practice Alert No. 8, *Audit Risks in Certain Emerging Markets* ("Practice Alert No. 8"), issued in October 2011, focuses on fraud risks that auditors might encounter in audits of companies with operations in emerging markets and auditors' responsibilities for addressing those risks.[25] While the focus of Practice Alert No. 8 was on emerging markets, fraud risks may be encountered in audits of companies in any region, especially when the company is faced with challenging economic conditions. In addition, auditors are reminded that their consideration of fraud includes misstatements from the misappropriation of assets.[26]

Fraud risk factors are events or conditions that indicate (1) an incentive or pressure to perpetrate fraud, (2) an opportunity to carry out the fraud, or (3) an attitude or rationalization that justifies the fraudulent action.[27] Incentives or pressures to perpetrate fraud may exist when:

- Financial stability or profitability is threatened by economic conditions. For example, in the current economic environment, a company with substantial direct or indirect sovereign debt exposure may be motivated to not consider all relevant market information when determining a fair value measurement or enter into off-balance sheet arrangements that fail to be appropriately accounted for or disclosed.[28]
- Excessive pressure exists for management to meet the requirements or expectations of third parties (e.g., due to expectations created by management in, for example, press releases or annual report messages that are no longer realistic).

[23] *See* paragraph 52 of Auditing Standard No. 12.

[24] Paragraph 65 of Auditing Standard No. 12.

[25] *See* Staff Audit Practice Alert No. 8 on the Board's web site at: http://pcaobus.org/Standards/Pages/Guidance.aspx.

[26] *See* AU sec. 316.06.

[27] Paragraph 65 of Auditing Standard No. 12.

[28] Staff Audit Practice Alert No. 5, *Auditor Considerations Regarding Significant Unusual Transactions,* discussed audit considerations regarding significant transactions that are outside the normal course of business for a company, or that otherwise appear to be unusual given the auditor's understanding of the company and its environment. *See* Staff Audit Practice Alert No. 5 on the Board's website at: http://pcaobus.org/Standards/QandA/04-07-2010_APA_5.

- There is excessive pressure on operating personnel, including, for example, operating personnel in remote locations, to meet financial targets set by management, including sales or profitability incentive goals.[29]

In identifying and assessing risks of material misstatement, the auditor should determine whether any of the auditor's identified and assessed risks are significant risks.[30] A significant risk is defined as "[a] risk of material misstatement that requires special audit consideration."[31] To determine whether a risk is a significant risk, the auditor should evaluate whether the risk requires special audit consideration because of the nature of the risk or the likelihood and potential magnitude of misstatement related to the risk.[32] One of the factors that should be evaluated in determining which risks are significant risks is whether the risk is related to recent significant economic developments.[33] Accordingly, risks of material misstatement that may be particularly susceptible to changes in the economic environment should be evaluated in this context. Other factors that the auditor should evaluate in determining significant risks include:[34]

- The degree of complexity or judgment in the recognition or measurement of financial information related to the risk, especially those measurements involving a wide range of measurement uncertainty;
- Whether the risk involves significant transactions that are outside the normal course of business for the company or that otherwise appear to be unusual due to their timing, size, or nature; and
- Whether the risk involves significant transactions with related parties. Transactions with related parties may be motivated solely, or in large measure, by conditions such as a lack of sufficient working capital or credit to continue the business, an overly optimistic earnings forecast, or a declining industry characterized by a large number of business failures.[35]

Planned Audit Responses

When the identified and assessed risks of material misstatement change, corresponding changes to planned audit responses may be necessary to adequately address the assessed risks.[36] Depending on the circumstances, these changes may need to be pervasive.[37] An example of such a pervasive change includes modifying the audit strategy to increase the substantive testing of the valuation of numerous significant accounts at year-end because of significant volatility in market conditions.[38]

---

[29] AU sec. 316.85 A.2 describes further examples of risk factors relating to misstatements arising from fraudulent financial reporting.

[30] *See* paragraph 59f of Auditing Standard No. 12.

[31] Paragraph A5 of Appendix A to Auditing Standard No. 12.

[32] *See* paragraph 70 of Auditing Standard No. 12.

[33] *See* paragraph 71 of Auditing Standard No. 12.

[34] Ibid.

[35] *See* paragraph .06 of AU sec. 334, *Related Parties*.

[36] *See* paragraph 3 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

[37] *See* paragraph 6 of Auditing Standard No. 13.

[38] Ibid.

For significant risks, it is unlikely that audit evidence obtained from substantive analytical procedures alone will be sufficient.[39] Accordingly, for significant risks, the auditor's substantive procedures should include tests of details that are specifically responsive to the assessed risks.[40]

When using an analytical procedure as a substantive test, the expected effectiveness of the procedure depends on, among other things, the plausibility and predictability of relationships among financial and non-financial data.[41] As higher levels of assurance are desired from analytical procedures that are used as substantive procedures, more predictable relationships are required to develop the expected analytical relationships.[42] Relationships in a stable environment are usually more predictable than relationships in a dynamic or unstable environment.[43]

When testing controls over relevant assertions in an audit, the auditor should evaluate whether the controls are designed and operating effectively.[44] Practice Alert No. 3 discussed matters that may require additional auditor attention regarding the effective operation of internal controls, including job eliminations that may increase the risk of deficiencies in internal control over financial reporting because of, for example, lack of segregation of duties or lack of effective monitoring controls.

Auditing Fair Value Measurements and Estimates

The current economic environment continues to present challenges relating to auditing fair value measurements and estimates.[45] When auditing accounting estimates, the auditor should perform procedures to determine whether the accounting estimates are determined in conformity with the applicable financial reporting framework, are reasonable, and do not result in bias that materially misstates the financial statements.[46] When testing management's process for determining fair value measurements or estimates, the auditor should perform procedures commensurate with the related risk, including considering whether significant assumptions are best supported by the available audit evidence.[47] For example:

---

[39] *See* paragraph .09 of AU sec. 329, *Substantive Analytical Procedures*.

[40] *See* paragraph 11 of Auditing Standard No. 13.

[41] *See* AU sec. 329.11.

[42] *See* AU sec. 329.14.

[43] Ibid.

[44] *See*, for example, paragraphs 16-22 of Auditing Standard No. 13.

[45] Fair value measurements and estimates were the subject of a number of audit deficiencies noted in the Board's Rule 4010 *Report on Observations of PCAOB Inspectors Related to Audit Risk Areas Affected by the Economic Crisis* (available at: http://pcaobus.org/Inspections/Documents/4010_Report_Economic_Crisis.pdf). In addition, fair value measurements and estimates were discussed in a number of previous staff audit practice alerts. See Staff Audit Practice Alert No. 2, *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists*, Practice Alert No. 3, Staff Audit Practice Alert No. 4, *Auditor Considerations Regarding Fair Value Measurements, Disclosures, and Other-Than-Temporary Impairments*, and Staff Audit Practice Alert No. 7, *Auditor Considerations of Litigation and Other Contingencies Arising from Mortgage and Other Loan Activities*. Staff Audit Practice Alerts are available at: http://pcaobus.org/Standards/Pages/Guidance.aspx.

[46] *See*, for example, paragraph 23 of AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, paragraph .11 of AU sec. 342, *Auditing Accounting Estimates*, and paragraphs 13 and 24-27 of Auditing Standard No. 14, *Evaluating Audit Results*.

[47] Ibid.

- Significant assumptions used in fair value measurements and estimates that are based on past experience and management expectations, such as revenue projections, cash flow estimates, charge-off rates, or projected rate of return assumptions and discount rates used in determining pension liabilities, may not reflect current market information or be representative of expected future conditions or events.
- Reductions in forecasts of macro-economic growth or extended periods of low interest rates may affect important assumptions underlying certain estimates, such as impairment determinations or the valuation of servicing assets. Uncertainty regarding the value of certain types of collateral or increasing counter-party risk may affect the valuation of financial instruments.
- Additional risks, such as sovereign default risk or currency volatility, could add a higher level of complexity in determining the ultimate collectability of sales or the appropriateness of other significant assumptions used in certain fair value determinations or estimates, including the fair value of certain financial instruments.
- An active market may not exist for certain financial instruments which in turn may result in complex valuation methods. Assumptions are integral components of more complex valuation methods, for example, valuation methods that employ a combination of estimates of expected future cash flows together with estimates of the values of assets or liabilities in the future, discounted to the present. Auditors pay particular attention to the significant assumptions underlying a valuation method and evaluate whether such assumptions are reasonable and reflect, or are not inconsistent with, market information.[48]

Auditors are reminded that audit evidence consists of both information that supports and corroborates management's assertions and information that contradicts such assertions including assertions regarding fair values, estimates and related disclosures.[49]

Bias in Accounting Estimates

Business conditions today may create increased pressures to achieve certain financial results that could result in bias in management's estimates.[50] Applying professional skepticism is of particular importance when evaluating estimates and assumptions in judgmental areas that are susceptible to management bias.

The auditor should evaluate whether the difference between estimates best supported by the audit evidence and estimates included in the financial statements, which are individually reasonable, indicate a possible bias on the part of the company's management.[51] A lack of consistency in assumptions used to support different estimates might be indicative of errors or bias in estimates. For instance, revenue assumptions used in the goodwill impairment test that are inconsistent with revenue assumptions used to accrue discretionary compensation might be indicative of management bias. Further, bias might be evidenced by assumptions that are inconsistent with industry economic forecasts or the

[50] *See* paragraph 25d of Auditing Standard No. 14.

[51] Paragraph 27 of Auditing Standard No. 14.

company's budgets or future business plans or the consistent use of overly optimistic assumptions (e.g. consistently missing projected revenue by a substantial amount in each recent period).[52] If each accounting estimate included in the financial statements is individually reasonable but the effect of the difference between each estimate and the estimate best supported by the audit evidence is to increase earnings or loss, the auditor should evaluate whether these circumstances indicate potential management bias in the estimates.[53] Bias also can result from the cumulative effect of changes in multiple accounting estimates. If the estimates in the financial statements are grouped at one end of the range of reasonable estimates in the prior year and are grouped at the other end of the range of reasonable estimates in the current year, the auditor should evaluate whether management is using swings in estimates to achieve an expected or desired outcome, e.g., to offset higher or lower than expected earnings.[54]

If the auditor identifies bias in management's judgments about the amounts and disclosures in the financial statements, the auditor should evaluate whether the effect of that bias, together with the effect of uncorrected misstatements, results in material misstatement of the financial statements.[55] Also, the auditor should evaluate whether the auditor's risk assessments, including, in particular, the assessment of fraud risks, and the related audit responses remain appropriate.[56] Auditors are reminded that indications of management bias in accounting estimates and in selecting accounting principles may affect the auditor's conclusions about the operating effectiveness of controls and should be included in the auditor's evaluation of controls in an integrated audit.[57]

Consideration of Changes to Accounting Standards

Practice Alert No. 3 provided information on selected financial reporting areas that might be affected by the then-current economic environment. While these areas continue to pose audit and financial reporting risk, certain accounting requirements have been amended since the issuance of Practice Alert No. 3.[58] For example, the Financial Accounting Standards Board ("FASB") recently issued Accounting Standards Codification Update 2011-08, *Intangibles-Goodwill and Others (Topic 350): Testing Goodwill for Impairment* ("ASU No. 2011-08").[59] That guidance allows companies to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350.[60]

If a company opts to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more

[58] The Board has no authority to prescribe the form or content of a company's financial statements. That authority, and the authority to make binding determinations concerning compliance with generally accepted accounting standards ("GAAP"), rests with the U.S. Securities and Exchange Commission. Accordingly, while this staff audit practice alert describes applicable GAAP, it does not establish or interpret GAAP.

[60] ASU No. 2011-08 at 1.

likely than not that the fair value of a reporting unit is less than its carrying amount, ASU No. 2011-08 provides examples of events and circumstances that the company should consider in its evaluation.[61] These examples include, among others:

- Macroeconomic conditions such as a deterioration in general economic conditions;
- Limitations on accessing capital;
- Fluctuations in foreign exchange rates, or other developments in equity and credit markets; and
- Industry and market considerations such as a deterioration in the environment in which an entity operates, an increased competitive environment, a decline in market-dependent multiples or metrics (considered in both absolute terms and relative to peers), a change in the market for an entity's products or services, or a regulatory or political development.[62]

When reviewing and testing the process for a company's assessment of qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value, audit considerations include, among others:

- Identifying the sources of data and factors that the company used in forming the assumptions, and consideration of whether such data and factors are relevant, reliable, and sufficient for the purpose based on information gathered in other audit tests.
- Considering whether there are additional key factors or alternative assumptions about the factors.
- Evaluating whether the assumptions are consistent with each other, the supporting data, relevant historical data, and industry data.
- Considering whether changes in the business or industry may cause other factors to become significant to the assumptions.[63]

The Auditor's Consideration of a Company's Ability to Continue as a Going Concern

Practice Alert No. 3 noted certain challenges companies may face in their ability to continue operating as a going concern in light of the then-current economic environment. These challenges included a reduction of the availability of funding under lines of credit or from short-term borrowing markets, difficulty in meeting debt covenants, and a lack of acceptable collateral. Some companies may continue to face such challenges in the current economic environment.

The auditor has a responsibility to evaluate whether there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements

---

[61] ASU No. 2011-08 at 2.

[62] ASU No. 2011-08, paragraph 350-20-35-3c.

[63] *See* AU sec. 342.11.

being audited.[64] The auditor's going concern evaluation can affect the auditor's evaluation of financial disclosures and the auditor's report.[65]

The auditor's going concern evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor's report.[66] Information about such conditions or events is obtained from the application of auditing procedures planned and performed to achieve audit objectives that are related to management's assertions embodied in the financial statements being audited, as described in Auditing Standard No. 15, *Audit Evidence*.[67]

Conditions or events, such as negative trends and other indications of possible financial difficulties as well as internal and external matters that have occurred, when considered in the aggregate, may indicate there could be substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.[68] If the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, the auditor should (1) obtain information about management's plans that are intended to mitigate the effect of such conditions or events, and (2) assess the likelihood that such plans can be effectively implemented.[69]

Management's plans for dealing with the adverse effects of the conditions or events may include the disposal of assets, borrowing additional funds or restructuring existing debt, planned reduction of expenditures, or increasing equity by raising capital.[70] When evaluating management's plans, the auditor should identify those elements that are particularly significant to overcoming the adverse effects of the conditions and events and should plan and perform auditing procedures to obtain evidential matter about them.[71]

In the current economic environment, it is important for the auditor to consider the adequacy of support for such plans,[72] including whether it is likely that the adverse effects will be mitigated for a reasonable period of time and whether the plans can be effectively implemented.[73] For example, if management indicates that the company plans to dispose of assets to raise capital, audit considerations may include the existence of any restrictions on the disposal of the assets, issues related to the marketability of the assets, and any possible direct or indirect effects of disposal of the assets.[74] As another example, if management is relying on a pledge of financial support from a significant shareholder, consideration should be given to the impact of current economic conditions on the shareholder's ability to provide such funding.[75] Another important consideration in the current economic environment is the willingness of a third party to

---

[74] Ibid.

[75] Such consideration may include information contained in, among other things, the audited financial statements of the shareholder, reports issued by regulatory agencies, financial publications, or credit agencies concerning the shareholder, and income tax returns of the shareholder, to the extent available.

continue to provide financial support, especially if the third party has already provided support to ongoing operations or in light of a potentially longer time frame for the company to return to profitability or positive cash flow.

When prospective financial information is particularly significant to management's plans, the auditor should request management to provide that information and should consider the adequacy of support for significant assumptions underlying that information.[76] In considering the adequacy of support for significant assumptions, the auditor should consider whether the assumptions are consistent with current economic conditions, such as, recent reductions in economic growth forecasts and information obtained by the auditor in other audit areas.

In the current economic environment, assumptions that are especially sensitive or susceptible to change and that are important to the auditor's evaluation of whether or not substantial doubt remains about the company's ability to continue as a going concern may warrant particularly careful consideration by the auditor.[77] When, primarily because of the consideration of management's plans, the auditor concludes that substantial doubt about the company's ability to continue as a going concern for a reasonable period of time is alleviated, the auditor should consider the need for disclosure in the financial statements, the principal conditions and events that initially caused him or her to believe there was substantial doubt, including the possible effects of such conditions and events, and any mitigating factors, including management's plans.[78]

Auditing Financial Statement Disclosures

The risk assessment standards recognize the importance of financial statement disclosures by directing the auditor's attention to them throughout the audit process. The current economic environment may increase the risk related to omitted, incomplete, or inaccurate disclosures, including, for example, disclosures regarding contingent liabilities, risks and uncertainties, concentrations of credit risk, and liquidity concerns.

The risk assessment standards require auditors to perform procedures to assess the risk of omitted, incomplete, or inaccurate disclosures, whether intentional or unintentional,[79] and to identify and test significant disclosures.[80] To identify and assess such risks, the auditor should develop expectations about the disclosures that are necessary for the company's financial statements to be presented fairly in conformity with the applicable financial reporting framework.[81] The key engagement team members should discuss (1) the company's selection and application of accounting principles, including related disclosure requirements, and (2) the susceptibility of the company's financial statements to material misstatement due to error or fraud.[82] The discussion among the key engagement

[76] AU sec. 341.09.

[77] Ibid.

[78] *See* AU sec. 341.11.

[79] *See*, for example, paragraphs 49, 52, and 67 of Auditing Standard No. 12.

[80] *See*, for example, paragraphs 59–64 of Auditing Standard No. 12 and paragraph 9 and footnote 6 of Auditing Standard No. 13. A disclosure is a significant disclosure if there is a reasonable possibility that the disclosure could contain a misstatement that, individually or when aggregated with others, has a material effect on the financial statements. *See* paragraph A10 of Auditing Standard No. 5.

[81] *See* paragraph 12 of Auditing Standard No. 12.

[82] Paragraph 49 of Auditing Standard No. 12.

team members should include how fraud might be perpetrated or concealed by omitting or presenting incomplete or inaccurate disclosures.[83]

The nature of certain financial statement disclosure requirements, the complexity of the matters disclosed, and the qualitative nature of certain disclosures can pose additional risks of material misstatement. Also, internal controls over disclosures that are qualitative, judgmental, or complex often are different from those controls over the processing and reporting of routine historical transactions. For these types of disclosures, the necessary controls are more likely to be manual controls than automated controls and may require significant judgment in the operation of the control, which, in turn, can affect the risk associated with the control.

When evaluating whether the financial statements are fairly presented in conformity with the applicable financial reporting framework, the auditor also is required to evaluate the disclosures, which includes, among other things:

- Evaluating whether the financial statements, including the related notes, are informative of matters that may affect their use, understanding, and interpretation;[84] and
- Considering the form, arrangement, and content of the financial statements (including the accompanying notes), encompassing matters such as the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth.[85]

Evaluation of disclosures also involves evaluation of the effect on the financial statements of uncorrected misstatements in disclosures, such as omitted, incomplete, or inaccurate disclosures. Qualitative considerations are particularly important when evaluating misstatements in disclosures that are more narrative in nature, such as those relating to risks and uncertainties or loss contingencies where an estimate has not yet been disclosed.[86] PCAOB auditing standards describe the auditor's responsibilities for considering qualitative factors in the context of the auditor's consideration of materiality.[87]

To determine the extent of supervision necessary for engagement team members to perform their work as directed and form appropriate conclusions, the engagement partner and other engagement team members performing supervisory activities should take into account, among other things, the nature of the assigned work for each engagement team member, including the controls or accounts and disclosures to be tested.[88] For example, additional supervision over audit areas including disclosures that are more qualitative, judgmental, or complex in nature may be merited. Also, to effectively evaluate those disclosures, auditors need to exercise professional skepticism and be alert for events or conditions that may contradict management's assertions in the disclosures.[89] Events or conditions that may contradict information in the disclosures may arise during the performance of other audit procedures including reading information in documents containing audited financial statements or may be based

[86] Practice Alert No. 3 discussed communications with audit committee, including communications about the clarity and completeness of the financial statements, that include related disclosures.

[87] *See*, for example, paragraph 24 and Appendix B of Auditing Standard No. 14.

[88] *See* paragraph 6b(2) of Auditing Standard No. 10, *Supervision of the Audit Engagement.*

[89] *See* AU sec. 230, *Due Professional Care in the Performance of Work*.

on more general factors, such as conditions in the industry in which the company operates. PCAOB standards require auditors to read other information in documents containing audited financial statements and consider whether such information is materially inconsistent with information appearing in the financial statements, including disclosures.[90]

Obtaining audit evidence that is relevant for evaluating disclosures that are more judgmental or qualitative in nature might require different auditing procedures from those used to evaluate disclosures of routine historical data. For example, the evidence needed to evaluate a disclosure relating to a loss contingency might come from sources outside the company's accounting system or possibly from sources outside the company.

.10 Staff Audit Practice Alert No. 10

Maintaining and Applying Professional Skepticism in Audits

December 4, 2012

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of the standards and rules of the PCAOB and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts do not establish rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Executive Summary

Professional skepticism is essential to the performance of effective audits under Public Company Accounting Oversight Board ("PCAOB" or "Board") standards. Those standards require that professional skepticism be applied throughout the audit by each individual auditor on the engagement team.

PCAOB standards define professional skepticism as an attitude that includes a questioning mind and a critical assessment of audit evidence. The standards also state that professional skepticism should be exercised throughout the audit process. While professional skepticism is important in all aspects of the audit, it is particularly important in those areas of the audit that involve significant management judgments or transactions outside the normal course of business. Professional skepticism also is important as it relates to the auditor's consideration of fraud in an audit. When auditors do not appropriately apply professional skepticism, they may not obtain sufficient appropriate evidence to support their opinions or may not identify or address situations in which the financial statements are materially misstated.

Observations from the PCAOB's oversight activities continue to raise concerns about whether auditors consistently and diligently apply professional skepticism. Certain circumstances can impede the appropriate application of professional skepticism and allow unconscious biases to prevail, including incentives and pressures resulting from certain conditions inherent in the audit environment, scheduling and workload demands, or an inappropriate level of confidence or trust in management. Audit firms and individual auditors should be alert for these impediments and take appropriate measures to assure that professional skepticism is applied appropriately throughout all audits performed under PCAOB standards.

Firms' quality control systems can help engagement teams improve the application of professional skepticism in a number of ways, including setting a proper tone at the top that emphasizes the need for professional skepticism; implementing and maintaining appraisal, promotion, and compensation processes

that enhance rather than discourage the application of professional skepticism; assigning personnel with the necessary competencies to engagement teams; establishing policies and procedures to assure appropriate audit documentation, especially in areas involving significant judgments; and appropriately monitoring the quality control system and taking necessary corrective actions to address deficiencies, such as, instances in which engagement teams do not apply professional skepticism.

The engagement partner is responsible for, among other things, setting an appropriate tone that emphasizes the need to maintain a questioning mind throughout the audit and to exercise professional skepticism in gathering and evaluating evidence, so that, for example, engagement team members have the confidence to challenge management representations. It is also important for the engagement partner and other senior engagement team members to be actively involved in planning, directing, and reviewing the work of other engagement team members so that matters requiring audit attention, such as unusual matters or inconsistencies in audit evidence, are identified and addressed appropriately.

It is the responsibility of each individual auditor to appropriately apply professional skepticism throughout the audit, including in identifying and assessing the risks of material misstatement, performing tests of controls and substantive procedures to respond to the risks, and evaluating the results of the audit. This involves, among other things, considering what can go wrong with the financial statements, performing audit procedures to obtain sufficient appropriate audit evidence rather than merely obtaining the most readily available evidence to corroborate management's assertions, and critically evaluating all audit evidence regardless of whether it corroborates or contradicts management's assertions.

The Office of the Chief Auditor is issuing this practice alert to remind auditors of the requirement to appropriately apply professional skepticism throughout their audits. The timing of this release is intended to facilitate firms' emphasis in upcoming calendar year-end audits, as well as in future audits, on the importance of the appropriate use of professional skepticism. Due to the fundamental importance of the appropriate application of professional skepticism in performing an audit in accordance with PCAOB standards, the PCAOB also is continuing to explore whether additional actions might meaningfully enhance auditors' professional skepticism.

Professional Skepticism and Due Professional Care

Professional skepticism, an attitude that includes a questioning mind and a critical assessment of audit evidence, is essential to the performance of effective audits under PCAOB standards. The audit is intended to provide investors with an opinion on whether the financial statements prepared by company management are presented fairly, in all material respects, in conformity with the applicable financial reporting framework. If the audit is conducted without professional skepticism, the value of the audit is impaired.

The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.[1] This responsibility includes obtaining sufficient appropriate evidence to determine whether the financial

[1] Paragraph .02 of AU sec. 110, *Responsibilities and Functions of the Independent Auditor*.

statements are materially misstated rather than merely looking for evidence that supports management's assertions.[2]

PCAOB standards require the auditor to exercise due professional care in planning and performing the audit and in preparing the audit report. Due professional care requires the auditor to exercise professional skepticism. PCAOB standards define professional skepticism as an attitude that includes a questioning mind and a critical assessment of audit evidence. PCAOB standards require the auditor to exercise professional skepticism throughout the audit.[3]

While professional skepticism is important in all aspects of the audit, it is particularly important in those areas of the audit that involve significant management judgments or transactions outside the normal course of business, such as nonrecurring reserves, financing transactions, and related party transactions that might be motivated solely, or in large measure, by an expected or desired accounting outcome. Effective auditing involves diligent pursuit of sufficient appropriate audit evidence, particularly if contrary evidence exists, and critical assessment of all the evidence obtained.

Professional skepticism is also important as it relates to the auditor's consideration of fraud in the audit.[4] Company management has a unique ability to perpetrate fraud because it frequently is in a position to directly or indirectly manipulate accounting records and present fraudulent financial information.[5] Company personnel who intentionally misstate the financial statements often seek to conceal the misstatement by attempting to deceive the auditor. Because of this incentive, applying professional skepticism is integral to planning and performing audit procedures to address fraud risks. In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest.[6]

Examples of the application of professional skepticism in response to the assessed fraud risks are (a) modifying the planned audit procedures to obtain more reliable evidence regarding relevant assertions and (b) obtaining sufficient appropriate evidence to corroborate management's explanations or representations concerning important matters, such as through third-party confirmation, use of a specialist engaged or employed by the auditor, or examination of documentation from independent sources.[7]

PCAOB inspectors continue to observe instances in which the circumstances suggest that auditors did not appropriately apply professional skepticism in their audits.[8] As examples, audit deficiencies like the following raise concerns that a lack of professional skepticism was at least a contributing factor:

- For certain hard-to-value Level 2 financial instruments, the engagement team did not obtain an understanding of the specific methods and/or assumptions underlying the fair value estimates that were obtained from pricing services or other third parties and

[7] Paragraph 7 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

[8] The PCAOB is not alone in identifying concerns regarding professional skepticism in audits. Regulators in countries such as Australia, Canada, Germany, the Netherlands, Singapore, Switzerland, and the United Kingdom have cited concerns about professional skepticism in public

(continued)

used in the engagement team's testing related to these financial instruments. Further, the firm used the price closest to the issuer's recorded price in testing the fair value measurements, without evaluating the significance of differences between the other prices obtained and the issuer's prices.

- The issuer discontinued production of a significant product line during the prior year and introduced a new product line to replace it. There were no sales of the discontinued product line during the last nine months of the year under audit. The engagement team did not test, beyond inquiry, the significant assumptions management used to calculate its separate inventory reserve for this product line.
- The engagement team did not evaluate the effects on the financial statements of management's determination not to test a significant portion of its property and equipment for impairment, despite indicators that the carrying amount may not have been recoverable. These indicators in this situation included operating losses for the relevant segment for the last three years, substantial charges for the impairment of goodwill and other intangible assets during the year, a projected loss for the segment for the upcoming year, and reduced and delayed customer orders.
- After the date of the issuer's balance sheet, but before the release of the firm's opinion, the issuer reported that it anticipated that comparable store sales for the first quarter of the year would be significantly lower than those for the first quarter of the year under audit. The engagement team had performed sensitivity analyses as part of its assessment on the issuer's evaluation of its compliance with its debt covenants, the issuer's ability to continue as a going concern, and the possibility of the impairment of the issuer's long-lived assets. The engagement team did not consider the implications of the anticipated decline in sales on its sensitivity analyses and its conclusions with respect to compliance with debt covenants, the issuer's ability to continue as a going concern, and impairment of long-lived assets.

The PCAOB's enforcement activities also have identified instances in which auditors did not appropriately apply professional skepticism. For example, in one recent disciplinary order, the Board found, among other things, that certain of a firm's audit partners accepted a company's reliance on an exception to generally accepted accounting principles ("GAAP") requirements for reserving for expected future product returns even though doing so conflicted with the plain language of the exception and the firm's internal accounting literature. The partners were aware of, but did not appropriately consider, contradictory audit

reports on their inspections. *See, e.g.,* the Financial Reporting Council's *Audit Quality Inspections Annual Report 2011/12*, available at http://www.frc.org.uk/Our-Work/Publications/AIU/Audit-Quality-Inspections-Annual-Report-2011-12.aspx, the Canadian Public Accountability Board's, *Meeting the Challenge "A Call to Action" 2011 Public Report*, available at http://www.cpab-ccrc.ca/en/content/2011Public_Report_EN.pdf, the Australian Securities & Investments Commission's Report 242, *Audit inspection program public report for 2009–2010*, available at http://www.asic.gov.au/asic/pdflib.nsf/LookupByFileName/rep242-published-29-June-2011.pdf/$file/rep242-published-29-June-2011.pdf, and the Accounting and Corporate Regulatory Authority *Practice Monitoring Programme Sixth Public Report*, August 2012, available at http://www.acra.gov.sg/NR/rdonlyres/E7E2A4BF-EC46-4AB2-877D-297D4E618042/0/PMPReport2012170712finalclean.pdf.

evidence indicating that the returns were not eligible for the exception. This illustration of a lack of professional skepticism reappeared in the firm's response when the issue was questioned by the firm's internal audit quality reviewers. Although certain of the partners involved determined that the company's reliance on the exception to GAAP did not support the company's accounting, they, along with other firm personnel, formulated another equally deficient rationale that supported the company's existing accounting result.[9]

Impediments to the Application of Professional Skepticism

Although PCAOB standards require auditors to appropriately apply professional skepticism throughout the audit, observations from the PCAOB's oversight activities indicate that, as a practical matter, auditors are often challenged in meeting this fundamental audit requirement. In maintaining an attitude that includes a questioning mind and a critical assessment of audit evidence, it is important for auditors to be alert to unconscious human biases and other circumstances that can cause auditors to gather, evaluate, rationalize, and recall information in a way that is consistent with client preferences rather than the interests of external users.

Certain conditions inherent in the audit environment can create incentives and pressures that can serve to impede the appropriate application of professional skepticism and allow unconscious bias to prevail. For example, incentives and pressures to build or maintain a long-term audit engagement, avoid significant conflicts with management, provide an unqualified audit opinion prior to the issuer's filing deadline, achieve high client satisfaction ratings, keep audit costs low, or cross-sell other services can all serve to inhibit professional skepticism.

In addition, over time, auditors may sometimes develop an inappropriate level of trust or confidence in management, which may lead auditors to accede to inappropriate accounting. In some situations, auditors may feel pressure to avoid potential negative interactions with, or consequences to, individuals they know (that is, management) instead of representing the interests of the investors they are charged to protect.

Other circumstances also can impede the appropriate application of professional skepticism. For example, scheduling and workload demands can put pressure on partners and other engagement team members to complete their assignments too quickly, which might lead auditors to seek audit evidence that is easier to obtain rather than evidence that is more relevant and reliable, to obtain less evidence than is necessary, or to give undue weight to confirming evidence without adequately considering contrary evidence.

Although powerful incentives and pressures exist that can impede professional skepticism, the importance of professional skepticism to an effective audit cannot be overstated, particularly given the increasing judgment and complexity in financial reporting and issues posed by the current economic environment.[10] Auditors and audit firms must remember that their overriding duty is to put the interests of investors first. Appropriate application of professional skepticism is key to fulfilling the auditor's duty to investors. In the words of the U.S. Supreme Court:

> By certifying the public reports that collectively depict a corporation's financial status, the independent auditor assumes a public responsibility transcending any employment relationship with the client. The independent public accountant performing this special function owes ultimate allegiance to the corporation's creditors and stockholders, as well as to the investing public. This "public watchdog" function demands that the accountant maintain total independence from the client at all times and requires complete fidelity to the public trust.[11]

However, inadequate performance of audit procedures may be caused by factors other than the lack of skepticism, or in combination with a lack of skepticism. As discussed further below, firms should take appropriate steps to understand the various factors that influence audit quality, including those circumstances and pressures that can impede the application of professional skepticism.

Promoting Professional Skepticism via an Appropriate System of Quality Control

PCAOB standards require firms to establish a system of quality control to provide the firm with reasonable assurance that its personnel comply with applicable professional standards and the firm's standards of quality.[12] This includes designing and implementing policies and procedures that lead engagement teams to appropriately apply professional skepticism in their audits.

Firms' quality control systems can help engagement teams improve the application of professional skepticism in a number of ways, including the following:

- *"Tone-at-the-Top" Messaging.* The PCAOB's inspection findings have identified instances in which the firm's culture allows or tolerates audit approaches that do not consistently emphasize the need for professional skepticism. Consistent communication from firm leadership that professional skepticism is integral to performing a high quality audit, backed up by a culture that supports it, could improve the quality of work performed by audit partners and staff. On the other hand, messages from firm leadership that are excessively focused on revenue or profit growth over achieving audit quality, can undermine the application of professional skepticism.
- *Performance Appraisal, Promotion, and Compensation Processes.* An audit firm's performance appraisal, promotion, and compensation processes can enhance or detract from the application of professional skepticism in its audit practice, depending on how they are designed and executed. For example, if a firm's promotion process emphasizes selling non-audit services or places an undue focus on reducing audit costs, or retaining and acquiring audit clients over achieving high audit quality, the firm's personnel may perceive those goals as being more important to their own compensation, job security, and advancement within the firm than the appropriate application of professional skepticism.
- *Professional Competence and Assigning Personnel to Engagement Teams*. A firm's quality control system depends heavily on the proficiency of its personnel,[13] which includes their ability to exercise

---

[11] *U.S. v. Arthur Young & Co.*, 465 U.S. 805, 817-18 (1984).

[12] *See* paragraph .03 of Quality Control ("QC") sec. 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*.

[13] QC sec. 20.11.

professional skepticism. To perform the audit with professional skepticism, it is important that personnel assigned to engagement teams have the necessary knowledge, skill, and ability required in the circumstances,[14] which includes appropriate technical training and experience. Professional skepticism is interrelated with an auditor's training and experience, as auditors need an appropriate level of competence in order to appropriately apply professional skepticism throughout the audit. In addition, it is important for the firm's culture to continually reinforce the appropriate application of professional skepticism throughout the audit.

- *Documentation*. It is important for a firm's quality control system to establish policies and procedures that cover documenting the results of each engagement.[15] Although documentation should support the basis for the auditor's conclusions concerning every relevant financial statement assertion, areas that require greater judgment generally need more extensive documentation of the procedures performed, evidence obtained, and rationale for the conclusions reached. In addition to the documentation necessary to support the auditor's final conclusions, audit documentation must include information the auditor has identified relating to significant findings or issues that is inconsistent with or contradicts the auditor's final conclusions.[16]
- *Monitoring.* Under PCAOB standards, a firm's quality control policies and procedures should include an element of monitoring to ensure that quality control policies and procedures are suitably designed and being effectively applied.[17] If the firm identifies deficiencies, the firm should evaluate the reasons for the deficiencies and determine the necessary corrective actions or improvements to the quality control system.[18] Accordingly, if a firm identifies deficiencies that include failures to appropriately apply professional skepticism as a contributing factor, the firm should take appropriate corrective actions.

Importance of Supervision to the Application of Professional Skepticism

The supervisory activities performed by the engagement partner and other senior engagement team members are important to the application of professional skepticism.[19] The engagement partner is responsible for the proper supervision of the work of engagement team members.[20] Accordingly, the engagement partner is responsible for setting an appropriate tone that emphasizes the need

---

[14] *See* QC sec. 20.12.

[15] *See* QC secs. 20.17-.18. Also, *see generally* Auditing Standard No. 3, *Audit Documentation.*

[16] *See, e.g.,* paragraphs 7-8 of Auditing Standard No. 3.

[17] *See* QC sec. 20.07 and paragraph .02 of QC sec. 30, *Monitoring a CPA Firm's Accounting and Auditing Practice*.

[18] *See* QC sec. 30.03.

[19] Besides supervision by the engagement partner and other engagement team members, the engagement quality reviewer also plays an important role in assessing the application of professional skepticism by the engagement team. In particular, the engagement quality reviewer is required to perform specific procedures to evaluate the significant judgments made by the engagement team.

[20] Paragraph 3 of Auditing Standard No. 10, *Supervision of the Audit Engagement*.

to maintain a questioning mind throughout the audit and to exercise professional skepticism in gathering and evaluating evidence, so that, for example, engagement team members have the confidence to challenge management representations.[21]

It is also important for the engagement partner and other senior engagement team members to be actively involved in planning, directing, and reviewing the work of other engagement team members so that matters requiring audit attention are identified and addressed appropriately. In directing the work of others, senior engagement team members, including the engagement partner, may have knowledge and experience that may assist less experienced engagement team members in applying professional skepticism. For example, senior engagement team members might help more junior auditors identify matters that are unusual or inconsistent with other evidence. In addition, senior members of the engagement team might be better able to challenge the assertions of senior levels of management, when necessary.

Appropriate Application of Professional Skepticism

Although a firm's quality control systems and the actions of the engagement partner and other senior engagement team members can contribute to an environment that supports professional skepticism, it is ultimately the responsibility of each individual auditor to appropriately apply professional skepticism throughout the audit, including the following areas among others:

- Identifying and assessing risks of material misstatement;
- Performing tests of controls and substantive procedures; and
- Evaluating audit results to form the opinion to be expressed in the auditor's report.

Identifying and Assessing Risks of Material Misstatement

By its nature, risk assessment involves looking at internal and external factors to determine what can go wrong with the financial statements, whether due to error or fraud. When properly applied, the risk assessment approach set forth in PCAOB standards should focus auditors' attention on those areas of the financial statements that are higher risk and thus most susceptible to misstatement. This includes considering events and conditions that create incentives or pressures on management or create opportunities for management to manipulate the financial statements. The evidence obtained from the required risk assessment procedures should provide a reasonable basis for the auditor's risk assessments, which, in turn, should drive the auditor's tests of accounts and disclosures in the financial statements.

The risk assessment procedures required by PCAOB standards also should provide the auditor with a thorough understanding of the company and its environment as a basis for identifying unusual transactions or matters that warrant further investigation. They also provide a basis for the auditor to evaluate and challenge management's assertions.[22] It is important to note that the auditor's understanding should be based on actual information obtained from the risk assessment procedures. It is not sufficient for auditors merely to rely on

---

[21] *See* paragraph 53 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

[22] For example, risk assessment procedures may provide the auditor a basis for challenging management's responses to the required inquiries of management in Auditing Standard No. 12.

their perceived knowledge of the industry or information obtained from prior audits or other engagements for the company.

Performing Tests of Controls and Substantive Procedures

Appropriately applying professional skepticism is critical to obtaining sufficient appropriate audit evidence to determine whether the financial statements are free of material misstatement and, in an integrated audit, whether internal controls over financial reporting are operating effectively. Application of professional skepticism is not merely obtaining the most readily available evidence to corroborate management's assertion.

The need for auditors to appropriately apply professional skepticism is echoed throughout PCAOB standards. For example, PCAOB standards caution that representations from management are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit.[23] Also, the standards warn that inquiry alone does not provide sufficient appropriate evidence to support a conclusion about a relevant assertion.[24]

In addition, PCAOB standards require auditors to design and perform audit procedures in a manner that addresses the assessed risks of material misstatement and to obtain more persuasive evidence the higher the assessment of risk.[25] The auditor is required to apply professional skepticism, which includes a critical assessment of the audit evidence.[26] Substantive procedures generally provide persuasive evidence when they are designed and performed to obtain evidence that is relevant and reliable.[27] When discussing the characteristics of reliable audit evidence, PCAOB standards observe that generally, among other things, evidence obtained from a knowledgeable source independent of the company is more reliable than evidence obtained only from internal company sources and evidence obtained directly by the auditor is more reliable than evidence obtained indirectly.[28]

Taken together, this means that in higher risk areas, the auditor's appropriate application of professional skepticism should result in procedures that are focused on obtaining evidence that is more relevant and reliable, such as evidence obtained directly and evidence obtained from independent, knowledgeable sources.[29] Further, if audit evidence obtained from one source is inconsistent with that obtained from another, the auditor should perform the audit procedures necessary to resolve the matter and should determine the effect, if any, on other aspects of the audit.[30]

The following are examples of audit procedures in PCAOB standards that reflect the need for professional skepticism:

- Resolving inconsistencies in or doubts about the reliability of confirmations;[31]

---

[23] *See* paragraph .02 of AU sec. 333, *Management Representations*.

[24] Paragraph 39 of Auditing Standard No. 13.

[25] *See* paragraphs 8-9 of Auditing Standard No. 13. For fraud risks and significant risks, the auditor also is required to perform procedures, including tests of details, that are specifically responsive to the assessed risks.

[26] *See* AU sec. 230.07.

[27] Paragraph 39 of Auditing Standard No. 13.

[28] *See* paragraph 8 of Auditing Standard No. 15, *Audit Evidence*.

[29] *See* paragraph 9.a. of Auditing Standard No. 13.

[30] Paragraph 29 of Auditing Standard No. 15.

[31] *See, e.g.,* paragraphs .27 and .33 of AU sec. 330, *The Confirmation Process*.

- Examining journal entries and other adjustments for evidence of possible material misstatement due to fraud;[32]
- Reviewing accounting estimates for biases that could result in material misstatement due to fraud;[33]
- Evaluating the business rationale for significant unusual transactions;[34] and
- Evaluating whether there is substantial doubt about an entity's ability to continue as a going concern.[35]

Evaluating Audit Results to Form the Opinion to be Expressed in the Audit Report

When professional skepticism is applied appropriately, the auditor does not presume that the financial statements are presented fairly in conformity with the applicable financial reporting framework. Instead, the auditor employs an attitude that includes a questioning mind in making critical assessments of the evidence obtained to determine whether the financial statements are materially misstated. PCAOB standards indicate that the auditor should take into account all relevant audit evidence, regardless of whether the evidence corroborates or contradicts the assertions in the financial statements.[36] Examples of areas in the evaluation that reflect the need for the auditor to apply professional skepticism, include, but are not limited to, the following:

- *Evaluating uncorrected misstatements*. This includes evaluating whether the uncorrected misstatements identified during the audit result in material misstatement of the financial statements, individually or in combination, considering both qualitative and quantitative factors.[37]
- *Evaluating management bias.* This includes evaluating potential bias in accounting estimates, bias in the selection and application of accounting principles, the selective correction of misstatements identified during the audit, and identification by management of additional adjusting entries that offset misstatements accumulated by the auditor.[38] When evaluating bias, it is important for auditors to consider the incentives and pressures on management to manipulate the financial statements.
- *Evaluating the presentation of the financial statements.* This includes evaluating whether the financial statements contain the information essential for a fair presentation of the financial statements in conformity with the applicable financial reporting framework.[39]

---

[32] *See* AU secs. 316.58-.62.

[33] *See* AU secs. 316.63-.65.

[34] *See* AU secs. 316.66-.67.

[35] *See* AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

[36] *See* paragraph 3 of Auditing Standard No. 14.

[37] *See* paragraph 17 of Auditing Standard No. 14.

[38] *See* paragraph 25 of Auditing Standard No. 14.

[39] *See* paragraphs 30-31 of Auditing Standard No. 14.

When evaluating misstatements, bias, or presentation and disclosures, it is important for auditors to appropriately apply professional skepticism and avoid dismissing matters as immaterial without adequate consideration.

Conclusion

The Office of the Chief Auditor is issuing this practice alert to remind auditors of the requirement to appropriately apply professional skepticism throughout their audits, which includes an attitude of a questioning mind and a critical assessment of audit evidence. The timing of this release is intended to facilitate firms' emphasis in upcoming calendar year-end audits, as well as in future audits, on the importance of the appropriate use of professional skepticism. Due to the fundamental importance of the appropriate application of professional skepticism in performing an audit in accordance with PCAOB standards, the PCAOB also is continuing to explore whether additional actions might meaningfully enhance auditors' professional skepticism.

Select Rules of the Board

Notice: This section is not a complete presentation of the PCAOB's *Rules of the Board*. Certain PCAOB rules and forms that are not directly related to conducting an audit of financial statements have been excluded (for example, rules concerning inspections and investigations are excluded from this section). You can access the PCAOB website (http://pcaobus.org/Rules/Pages/default.aspx) to view those excluded rules and forms.

SELECT RULES OF THE BOARD

TABLE OF CONTENTS

SECTION 1.
GENERAL PROVISIONS

Rule 1001. Definitions of Terms Employed in Rules.

When used in the Rules, unless the context otherwise requires:

(a)(i) Accounting Support Fee

The term "accounting support fee" means the fee described in Rule 7100.

[Effective pursuant to SEC Release No. 34-48278, File No. PCAOB-2003-02 (August 1, 2003)]

(a)(ii) Accountant

The term "accountant" means a natural person—

(1) who is a certified public accountant, or

(2) who holds—

(i) a college, university, or higher professional degree in accounting, or

(ii) a license or certification authorizing him or her to engage in the business of auditing or accounting, or

(3) who—

(i) holds a college, university, or higher professional degree in a field, other than accounting, and

(ii) participates in audits;

provided, however, that the term "accountant" does not include a person engaged only in clerical or ministerial tasks.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(a)(iii) Act

The term "Act" means the Sarbanes-Oxley Act of 2002.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(a)(iv) Associated Entity

The term "associated entity" means, with respect to a public accounting firm –

(1) any entity that directly, indirectly, or through one or more intermediaries, controls, or is controlled by, or is under common control with, such public accounting firm; or

(2) any "associated entity," as used in Rule 2-01(f)(2) of Regulation SX, 17 C.F.R. 210.2-01(f)(2), that would be considered part of that firm for purposes of the Commission's auditor independence rules.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(a)(v) Audit

The term "audit" means an examination of the financial statements of any issuer by an independent public accounting firm in accordance with the rules of the Board or the Commission (or, for the period preceding the adoption of

applicable Rules of the Board under Section 103 of the Act, in accordance with then applicable generally accepted auditing standards for such purposes), for the purpose of expressing an opinion on such statements.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(a)(vi) Audit Report

The term "audit report" means a document or other record—

(1) prepared following an audit performed for purposes of compliance by an issuer with the requirements of the securities laws; and

(2) in which a public accounting firm either—

(i) sets forth the opinion of that firm regarding a financial statement, report or other document; or

(ii) asserts no such opinion can be expressed.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(a)(vii) Audit Services

The term "audit services" means—

(1) subject to paragraph (a)(vii)(2) of this Rule, professional services rendered for the audit of an issuer's annual financial statements, and (if applicable) for the reviews of an issuer's financial statements included in the issuer's quarterly reports.

(2) effective after December 15, 2003, professional services rendered for the audit of an issuer's annual financial statements, and (if applicable) for the reviews of an issuer's financial statements included in the issuer's quarterly reports or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements for those fiscal years.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(a)(viii) Auditing and Related Professional Practice Standards.

The term "auditing and related professional practice standards" means the auditing standards, related attestation standards, quality control standards, ethical standards, and independence standards (including any rules implementing Title II of the Act), and any other professional standards, that are established or adopted by the Board under Section 103 of the Act.

[Effective pursuant to SEC Release No. 34-48730, File No. PCAOB-2003-05 (October 31, 2003)]

(a)(ix) Accounting Board Demand

The term "accounting board demand" means a command to produce documents and/or to appear at a certain time and place to give testimony.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(a)(x) Accounting Board Request

The term "accounting board request" means a request to produce documents and/or to appear at a certain time and place to give testimony.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(a)(xi) Appropriate State Regulatory Authority

The term "appropriate state regulatory authority" means the State agency or other authority responsible for the licensure or other regulation of the practice of accounting in the State or States having jurisdiction over a registered public accounting firm or associated person thereof, with respect to the matter in question.

[Effective pursuant to SEC Release No. 34-49787, File No. PCAOB-2003-08 (June 1, 2004)]

(a)(xii) Auditor

The term "auditor" means both public accounting firms registered with the Public Company Accounting Oversight Board and associated persons thereof.

[Effective pursuant to SEC Release No. 34-50331, File No. PCAOB-2004-06 (September 8, 2004)]

(b)(i) Board

The term "Board" means the Public Company Accounting Oversight Board.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(b)(ii) Bar

The term "bar" means a permanent disciplinary sanction prohibiting a person from being associated with a registered public accounting firm.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(c)(i) Commission

The term "Commission" means the Securities and Exchange Commission.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(c)(ii) Counsel

The term "counsel" means an attorney at law admitted to practice, and in good standing, before the Supreme Court of the United States or the highest court of any state.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(d)(i) Disciplinary Proceeding

The term "disciplinary proceeding" means a proceeding initiated by an order instituting proceedings, held for the purpose of determining whether or not a registered public accounting firm, or any person associated with a registered public accounting firm, has engaged in any act or practice, or omitted to act, in violation of the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards; or has failed reasonably to supervise an associated person in connection with any such violation by that person; or has failed to cooperate with the Board in connection with an investigation; and whether to impose a sanction pursuant to Rule 5300.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(d)(ii) Document

The term "document" is synonymous in meaning and equal in scope to its usage in Federal Rule of Civil Procedure 34(a), including, without limitation, electronic or computerized data compilations. A draft or non-identical copy is a separate document within the meaning of this term. In no event shall the term "document" be construed to be limited to audit work papers.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(e)(i) Exchange Act

The term "Exchange Act" means the Securities Exchange Act of 1934, as amended.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(f)(i) Foreign Public Accounting Firm

The term "foreign public accounting firm" means a public accounting firm that is organized and operates under the laws of a non-U.S. jurisdiction, government or political subdivision thereof.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(f)(ii) Foreign Registered Public Accounting Firm

The term "foreign registered public accounting firm" means a foreign public accounting firm that is a registered public accounting firm.

[Effective pursuant to SEC Release No. 34-50291, File No. PCAOB-2004-04 (August 30, 2004)]

(h)(i) Hearing Officer

The term "hearing officer" means a person, other than a Board member or staff of the interested division, duly authorized by the Board to preside at a hearing.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(i)(i) Issuer Market Capitalization

The terms "issuer market capitalization" and "market capitalization of an issuer" mean—

(1) Except as provided in paragraph (i)(i)(2) of this rule, the aggregate market value of all classes of an issuer's common stock that trade in the United States; or

(2) With respect to an issuer: (i) that is registered under Section 8 of the Investment Company Act or has elected to be regulated as a business development company pursuant to Section 54 of the Investment Company Act, and (ii) whose securities are not traded on a national securities exchange or quoted on Nasdaq, the issuer's net asset value.

[Effective pursuant to SEC Release No. 34-48278, File No. PCAOB-2003-02 (August 1, 2003)]

(i)(ii) Investment Company Act

The term "Investment Company Act" means the Investment Company Act of 1940, as amended.

[Effective pursuant to SEC Release No. 34-48278, File No. PCAOB-2003-02 (August 1, 2003)]

(i)(iii) Issuer

The term "issuer" means an issuer (as defined in Section 3 of the Exchange Act), the securities of which are registered under Section 12 of that Act, or that is required to file reports under Section 15(d) of that Act, or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933, and that it has not withdrawn.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(i)(iv) Interested Division

The term "interested division" means a division or office of the Board assigned primary responsibility by the Board to participate in a particular proceeding.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(n)(i) Notice

The term "notice" means the document sent by the Board to an issuer, pursuant to Rule 7102, setting forth such issuer's share of the accounting support fee under Section 109 of the Act and Rules 7101 and 7102.

[Effective pursuant to SEC Release No. 34-48278, File No. PCAOB-2003-02 (August 1, 2003)]

(n)(ii) Non-Audit Services

The term "non-audit services" means—

(1) subject to paragraph (n)(ii)(2) of this Rule, services related to financial information systems design and implementation as defined in Rule 2-01(c)(4)(ii) of Regulation S-X, 17 C.F.R. 2-01(c)(4)(ii), and all other services, other than audit services or other accounting services.

(2) effective after December 15, 2003, all other services other than audit services, other accounting services, and tax services.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(n)(iii) Non-U.S. Inspection

The term "non-U.S. inspection" means an inspection of a foreign registered public accounting firm conducted within a non-U.S. oversight system.

[Effective pursuant to SEC Release No. 34-50291, File No. PCAOB-2004-04 (August 30, 2004)]

(o)(i) Other Accounting Services

The term "other accounting services" means—

(1) subject to paragraph (o)(i)(2) of this Rule, services that are normally provided by the public accounting firm that audits the issuer's financial statements in connection with statutory and regulatory filings or engagements and assurance and related services that are reasonably related to the performance of the audit or review of the issuer's financial statements, other than audit services.

(2) effective after December 15, 2003, assurance and related services that are reasonably related to the performance of the audit or

review of the issuer's financial statements, other than audit services.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(o)(ii) Order Instituting Proceedings

The term "order instituting proceedings" means an order issued by the Board commencing a disciplinary proceeding.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(p)(i) Person Associated With a Public Accounting Firm (and Related Terms)

The terms "person associated with a public accounting firm" (or with a "registered public accounting firm" or "applicant") and "associated person of a public accounting firm" (or of a "registered public accounting firm" or "applicant") mean any individual proprietor, partner, shareholder, principal, accountant, or professional employee of a public accounting firm, or any independent contractor that, in connection with the preparation or issuance of any audit report—

(1) shares in the profits of, or receives compensation in any other form from, that firm; or

(2) participates as agent on behalf of such accounting firm in any activity of that firm;

provided, however, that these terms do not include a person engaged only in clerical or ministerial tasks or a person whom the public accounting firm reasonably believes is a person primarily associated with another registered public accounting firm.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(p)(ii) Play a Substantial Role in the Preparation or Furnishing of an Audit Report

The phrase "play a substantial role in the preparation or furnishing of an audit report" means—

(1) to perform material services that a public accounting firm uses or relies on in issuing all or part of its audit report with respect to any issuer, or

(2) to perform the majority of the audit procedures with respect to a subsidiary or component of any issuer the assets or revenues of which constitute 20% or more of the consolidated assets or revenues of such issuer necessary for the principal accountant to issue an audit report on the issuer.

Note 1: For purposes of paragraph (1) of this definition, the term "material services" means services, for which the engagement hours or fees constitute 20% or more of the total engagement hours or fees, respectively, provided by the principal accountant in connection with the issuance of all or part of its audit report with respect to any issuer. The term does not include non-audit services provided to non-audit clients.

Note 2: For purposes of paragraph (2) of this definition, the phrase "subsidiary or component" is meant to include any subsidiary, division, branch, office or other component of an issuer, regardless of its form of organization and/or control relationship with the issuer.

Note 3: For purposes of determining "20% or more of the consolidated assets or revenues" under paragraph (2) of this Rule, this determination should be made at the beginning of the issuer's fiscal year using prior year information and should be made only once during the issuer's fiscal year.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(p)(iii) Public Accounting Firm

The term "public accounting firm" means a proprietorship, partnership, incorporated association, corporation, limited liability company, limited liability partnership, or other legal entity that is engaged in the practice of public accounting or preparing or issuing audit reports.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(p)(iii) Party

The term "party" means the interested division, any person named as a respondent in an order instituting proceedings or notice of a hearing, any applicant named in the caption of any order, or any person seeking Board review of a decision.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(p)(iv) Person

The term "person" means any natural person or any business, legal or governmental entity or association.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(p)(vi) Professional Standards

The term "professional standards" means—

(A) accounting principles that are—

(i) established by the standard setting body described in section 19(b) of the Securities Act of 1933, as amended by the Act, or prescribed by the Commission under section 19(a) of the Securities Act of 1933 or section 13(b) of the Securities Exchange Act of 1934; and

(ii) relevant to audit reports for particular issuers, or dealt with in the quality control system of a particular registered public accounting firm; and

(B) auditing standards, standards for attestation engagements, quality control policies and procedures, ethical and competency standards, and independence standards (including rules implementing Title II of the Act) that the Board or the Commission determines—

(i) relate to the preparation or issuance of audit reports for issuers; and

(ii) are established or adopted by the Board under section 103(a) of the Act, or are promulgated as rules of the Commission.

[Effective pursuant to SEC Release No. 34-49787, File No. PCAOB-2003-08 (June 1, 2004)]

(r)(i) Registered Public Accounting Firm

The term "registered public accounting firm" means a public accounting firm registered with the Board.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(r)(ii) Rules or Rules of the Board

The terms "Rules" or "Rules of the Board" mean the bylaws and rules of the Board (as submitted to and approved, modified, or amended by the Commission in accordance with Section 107 of the Act) and those stated policies, practices, and interpretations of the Board that the Commission, by rule, may deem to be rules of the Board, as necessary or appropriate in the public interest or for the protection of investors.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(r)(iii) Revocation

The term "revocation" means a permanent disciplinary sanction terminating a firm's registration.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(s)(i) Securities Act

The term "Securities Act" means the Securities Act of 1933, as amended.

[Effective pursuant to SEC Release No. 34-48278, File No. PCAOB-2003-02 (August 1, 2003)]

(s)(ii) Securities Laws

The term "securities laws" means the provisions of the law referred to in Section 3(a)(47) of the Exchange Act, as amended by the Act, and includes the rules, regulations, and orders issued by the Commission thereunder.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(s)(iii) State

The term "State" means any state of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, or any other territory or possession of the United States.

[Effective pursuant to SEC Release No. 34-48180, File No. PCAOB-2003-03 (July 16, 2003)]

(s)(iii) Secretary

The term "Secretary" means the Secretary of the Board.

[Effective pursuant to SEC Release No. 34-49704, File No. PCAOB-2003-07 (May 14, 2004)]

(s)(iv) Suspension

The term "suspension" means a temporary disciplinary sanction, which lapses by its own terms, prohibiting—

(1) a registered public accounting firm from preparing or issuing, or participating in the preparation or issuance of, any audit report with respect to any issuer; or

(2) a person from being associated with a registered public accounting firm.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(t)(i) Tax Services

The term "tax services" means professional services rendered for tax compliance, tax advice, and tax planning.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

SECTION 3.

PROFESSIONAL STANDARDS

Part 1—General Requirements

Rule 3100. Compliance With Auditing and Related Professional Practice Standards.

A registered public accounting firm and its associated persons shall comply with all applicable auditing and related professional practice standards.

[Effective pursuant to SEC Release No. 34-48730;
File No. PCAOB-2003-05; October 31, 2003]

Rule 3101. Certain Terms Used in Auditing and Related Professional Practice Standards.

(a) The Board's auditing and related professional practice standards use certain terms set forth in this rule to describe the degree of responsibility that the standards impose on auditors.

(1) **Unconditional Responsibility:** The words "must," "shall," and "is required" indicate unconditional responsibilities. The auditor must fulfill responsibilities of this type in all cases in which the circumstances exist to which the requirement applies. Failure to discharge an unconditional responsibility is a violation of the relevant standard and Rule 3100.

(2) **Presumptively Mandatory Responsibility:** The word "should" indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type specified in the Board's standards unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard. Failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard.

Note: In the rare circumstances in which the auditor believes the objectives of the standard can be met by alternative means, the auditor, as part of documenting the planning and performance of the work, must document the information that demonstrates that the objectives were achieved.

(3) **Responsibility To Consider:** The words "may," "might," "could," and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on

the exercise of professional judgment in the circumstances consistent with the objectives of the standard.

Note: If a Board standard provides that the auditor "should consider" an action or procedure, consideration of the action or procedure is presumptively mandatory, while the action or procedure is not.

(b) The terminology in paragraph (a) of this rule applies to the responsibilities imposed by the auditing and related professional practice standards, including the interim standards adopted in Rules 3200T, 3300T, 3400T, 3500T, and 3600T.

(c) The documentation requirement in paragraph (a)(2) is effective for audits of financial statements or other engagements with respect to fiscal years ending on or after November 15, 2004.

[Effective pursuant to SEC Release No. 34-50331; File No. PCAOB-2004-06, September 8, 2004]

Rule 3200T. Interim Auditing Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement of Auditing Standards No. 95, as in existence on April 16, 2003 (Codification of Statements on Auditing Standards, AU § 150 (AICPA 2002)), to the extent not superseded or amended by the Board.

Note: Under Section 102(a) of the Act, public accounting firms are not required to be registered with the Board until 180 days after the date of the determination of the Commission under section 101(d) that the Board has the capacity to carry out the requirements of Title I of the Act (the "mandatory registration date"). The Board intends that, during the period preceding the mandatory registration date, the Interim Auditing Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624; File No. PCAOB-2003-11; April 28, 2004 and SEC Release Nos 33-8233 & 3447746; April 25, 2003]

Rule 3300T. Interim Attestation Standards.

In connection with an engagement (i) described in the AICPA's Auditing Standards Board's Statement on Standards for Attestation Engagements No. 10 (Codification of Statements on Auditing Standards, AT § 101.01 (AICPA 2002)) and (ii) related to the preparation or issuance of audit reports for issuers, a registered public accounting firm, and its associated persons, shall comply with the AICPA Auditing Standards Board's Statements on Standards for Attestation Engagements, and related interpretations and Statements of Position, as in existence on April 16, 2003, to the extent not superseded or amended by the Board.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Attestation Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624; File No. PCAOB-2003-11; April 28, 2004 and SEC Release Nos 33-8233 & 3447746; April 25, 2003]

Rule 3400T. Interim Quality Control Standards.

A registered public accounting firm, and its associated persons, shall comply with quality control standards, as described in—

(a) the AICPA's Auditing Standards Board's Statements on Quality Control Standards, as in existence on April 16, 2003 (AICPA Professional Standards, QC §§ 20–40 (AICPA 2002)), to the extent not superseded or amended by the Board; and

(b) the AICPA SEC Practice Section's Requirements of Membership (d), (f)(first sentence), (l), (m), (n)(1) and (o), as in existence on April 16, 2003 (AICPA SEC Practice Section Manual § 1000.08(d), (f), (j), (m), (n)(1) and (o)), to the extent not superseded or amended by the Board.

Note: The second sentence of requirement (f) of the AICPA SEC Practice Section's Requirements of Membership provided for the AICPA's peer review committee to "authorize alternative procedures" when the requirement for a concurring review could not be met because of the size of the firm. This provision is not adopted as part of the Board's Interim Quality Control Standards. After the effective date of the Interim Quality Control Standards, requests for authorization of alternative procedures to a concurring review may, however, be directed to the Board.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Quality Control Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624; File No. PCAOB-2003-11; April 28, 2004 and SEC Release Nos 33-8233 & 3447746; April 25, 2003]

Part 5—Ethics

Rule 3500T. Interim Ethics Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with ethics standards, as described in the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 102 and 191 (AICPA 2002)), to the extent not superseded or amended by the Board.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Ethics Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624; File No. PCAOB-2003-11;

April 28, 2004 and SEC Release Nos 33-8233 & 3447746;

April 25, 2003]

Rule 3501. Definitions of Terms Employed in Section 3, Part 5 of the Rules.

When used in Section 3, Part 5 of the Rules, unless the context otherwise requires:

(a)(i) Affiliate of the Accounting Firm.

The term "affiliate of the accounting firm" (or "affiliate of the registered public accounting firm" or "affiliate of the firm") includes the accounting firm's parents; subsidiaries; pension, retirement, investment or similar plans; and any associated entities of the firm, as that term is used in Rule 2-01 of the Commission's Regulation SX, 17 C.F.R. § 210.2-01(f)(2).

(a)(ii) Affiliate of the Audit Client.

The term "affiliate of the audit client" means—

(1) An entity that has control over the audit client, or over which the audit client has control, or which is under common control with the audit client, including the audit client's parents and subsidiaries;

(2) An entity over which the audit client has significant influence, unless the entity is not material to the audit client;

(3) An entity that has significant influence over the audit client, unless the audit client is not material to the entity; and

(4) Each entity in the investment company complex when the audit client is an entity that is part of an investment company complex.

(a)(iii) Audit and Professional Engagement Period.

The term "audit and professional engagement period" includes both—

(1) The period covered by any financial statements being audited or reviewed (the "audit period"); and

(2) The period of the engagement to audit or review the audit client's financial statements or to prepare a report filed with the Commission (the "professional engagement period")—

(A) The professional engagement period begins when the registered public accounting firm either signs an initial engagement letter (or other agreement to review or audit a client's financial statements) or begins audit, review, or attest procedures, whichever is earlier; and

(B) The professional engagement period ends when the audit client or the registered public accounting firm notifies the Commission that the client is no longer that firm's audit client.

(3) For audits of the financial statements of foreign private issuers, the "audit and professional engagement period" does not include periods ended prior to the first day of the last fiscal year before the foreign private issuer first filed, or was required to file, a registration statement or report with the Commission, provided there has been full compliance with home country independence standards in all prior periods covered by any registration statement or report filed with the Commission.

(a)(iv) Audit Client.

The term "audit client" means the entity whose financial statements or other information is being audited, reviewed, or attested and any affiliates of the audit client.

(c)(i) Confidential Transaction.

The term "confidential transaction" means—

(1) In general. A confidential transaction is a transaction that is offered to a taxpayer under conditions of confidentiality and for which the taxpayer has paid an advisor a fee.

(2) Conditions of confidentiality. A transaction is considered to be offered to a taxpayer under conditions of confidentiality if the advisor who is paid the fee places a limitation on disclosure by the taxpayer of the tax treatment or tax structure of the transaction and the limitation on disclosure protects the confidentiality of that advisor's tax strategies. A transaction is treated as confidential even if the conditions of confidentiality are not legally binding on the taxpayer. A claim that a transaction is proprietary or exclusive is not treated as a limitation on disclosure if the advisor confirms to the taxpayer that there is no limitation on disclosure of the tax treatment or tax structure of the transaction.

(3) Determination of fee. For purposes of this definition, a fee includes all fees for a tax strategy or for services for advice (whether or not tax advice) or for the implementation of a transaction. These fees include consideration in whatever form paid, whether in cash or in kind, for services to analyze the transaction (whether or not related to the tax consequences of the transaction), for services to implement the transaction, for services to document the transaction, and for services to prepare tax returns to the extent that the fees exceed the fees customary for return preparation. For purposes of this definition, a taxpayer also is treated as paying fees to an advisor if the taxpayer knows or should know that the amount it pays will be paid indirectly to the advisor, such as through a

referral fee or fee-sharing arrangement. A fee does not include amounts paid to a person, including an advisor, in that person's capacity as a party to the transaction. For example, a fee does not include reasonable charges for the use of capital or the sale or use of property.

(4) Related parties. For purposes of this definition, persons who bear a relationship to each other as described in section 267(b) or 707(b) of the Internal Revenue Code will be treated as the same person.

(c)(ii) Contingent Fee.

The term "contingent fee" means—

(1) Except as stated in paragraph (2) below, any fee established for the sale of a product or the performance of any service pursuant to an arrangement in which no fee will be charged unless a specified finding or result is attained, or in which the amount of the fee is otherwise dependent upon the finding or result of such product or service.

(2) Solely for the purposes of this definition, a fee is not a "contingent fee" if the amount is fixed by courts or other public authorities and not dependent on a finding or result.

(f)(i) Financial Reporting Oversight Role.

The term "financial reporting oversight role" means a role in which a person is in a position to or does exercise influence over the contents of the financial statements or anyone who prepares them, such as when the person is a member of the board of directors or similar management or governing body, chief executive officer, president, chief financial officer, chief operating officer, general counsel, chief accounting officer, controller, director of internal audit, director of financial reporting, treasurer, or any equivalent position.

(i)(i) Immediate Family Member.

The term "immediate family member" means a person's spouse, spousal equivalent, and dependents.

(i)(ii) Investment Company Complex.

(1) The term "investment company complex" includes—

(i) An investment company and its investment adviser or sponsor;

(ii) Any entity controlled by or controlling an investment adviser or sponsor in paragraph (i) of this definition, or any entity under common control with an investment adviser or sponsor in paragraph (i) of this definition if the entity—

(A) Is an investment adviser or sponsor; or

(B) Is engaged in the business of providing administrative, custodian, underwriting, or transfer agent services to any investment company, investment adviser, or sponsor; and

(iii) Any investment company or entity that would be an investment company but for the exclusions provided by section 3(c) of the Investment Company Act of 1940 (15 U.S.C. § 80a-3(c)) that has an investment adviser or sponsor

included in this definition by either paragraph (i) or (ii) of this definition.

(2) An investment adviser, for purposes of this definition, does not include a sub-adviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser.

(3) A sponsor, for purposes of this definition, is an entity that establishes a unit investment trust.

[Effective pursuant to SEC Release No. 34-53677; File No. PCAOB-2006-01; April 19, 2006]

Rule 3502. Responsibility Not to Knowingly or Recklessly Contribute to Violations.

A person associated with a registered public accounting firm shall not take or omit to take an action knowing, or recklessly not knowing, that the act or omission would directly and substantially contribute to a violation by that registered public accounting firm of the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards.

[Effective pursuant to SEC Release No. 34-53677; File No. PCAOB-2006-01; April 19, 2006; As amended, effective April 29, 2006, by PCAOB Release No. 2005-020.]

Subpart 1—Independence

Rule 3520. Auditor Independence.

A registered public accounting firm and its associated persons must be independent of the firm's audit client throughout the audit and professional engagement period.

Note 1: Under Rule 3520, a registered public accounting firm or associated person's independence obligation with respect to an audit client that is an issuer encompasses not only an obligation to satisfy the independence criteria set out in the rules and standards of the PCAOB, but also an obligation to satisfy all other independence criteria applicable to the engagement, including the independence criteria set out in the rules and regulations of the Commission under the federal securities laws.

Note 2: Rule 3520 applies only to those associated persons of a registered public accounting firm required to be independent of the firm's audit client by standards, rules or regulations of the Commission or other applicable independence criteria.

[Effective pursuant to SEC Release No. 34-53677; File No. PCAOB-2006-01; April 19, 2006]

Rule 3521. Contingent Fees.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any service or product to the audit client for a contingent fee or a commission, or receives from the audit client, directly or indirectly, a contingent fee or commission.

[Effective pursuant to SEC Release No. 34-53677;
File No. PCAOB-2006-01; April 19, 2006]

Rule 3522. Tax Transactions.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any non-audit service to the audit client related to marketing, planning, or opining in favor of the tax treatment of, a transaction—

(a) **Confidential Transactions**—that is a confidential transaction; or

(b) **Aggressive Tax Position Transactions**—that was initially recommended, directly or indirectly, by the registered public accounting firm and a significant purpose of which is tax avoidance, unless the proposed tax treatment is at least more likely than not to be allowable under applicable tax laws.

Note 1: With respect to transactions subject to the United States tax laws, paragraph (b) of this rule includes, but is not limited to, any transaction that is a listed transaction within the meaning of 26 C.F.R. §1.6011(b)(2).

Note 2: A registered public accounting firm indirectly recommends a transaction when an affiliate of the firm or another tax advisor, with which the firm has a formal agreement or other arrangement related to the promotion of such transactions, recommends engaging in the transaction.

[Effective pursuant to SEC Release No. 34-53677;
File No. PCAOB-2006-01; April 19, 2006;
As amended, effective April 29, 2006, by PCAOB Release No. 2005-020.]

Rule 3523. Tax Services for Persons in Financial Reporting Oversight Roles.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the professional engagement period provides any tax service to a person in a financial reporting oversight role at the audit client, or an immediate family member of such person, unless—

(a) the person is in a financial reporting oversight role at the audit client only because he or she serves as a member of the board of directors or similar management or governing body of the audit client;

(b) the person is in a financial reporting oversight role at the audit client only because of the person's relationship to an affiliate of the entity being audited—

(1) whose financial statements are not material to the consolidated financial statements of the entity being audited; or

(2) whose financial statements are audited by an auditor other than the firm or an associated person of the firm; or

(c) the person was not in a financial reporting oversight role at the audit client before a hiring, promotion, or other change in employment event and the tax services are—

(1) provided pursuant to an engagement in process before the hiring, promotion, or other change in employment event; and

(2) completed on or before 180 days after the hiring or promotion event.

Note: In an engagement for an audit client whose financial statements for the first time will be required to be audited pursuant to the standards of the PCAOB, the provision of tax services to a person covered by Rule 3523 before the earlier of the date that the firm: (1) signed an initial engagement letter or other agreement to perform an audit pursuant to the standards of the PCAOB, or (2) began procedures to do so, does not impair a registered public accounting firm's independence under Rule 3523.

[Effective pursuant to SEC Release No. 34-53677; File No. PCAOB-2006-01; April 19, 2006; As amended, effective April 22, 2008, by PCAOB Release No. 2008-003]

Rule 3524. Audit Committee Pre-approval of Certain Tax Services.

In connection with seeking audit committee pre-approval to perform for an audit client any permissible tax service, a registered public accounting firm shall—

(a) describe, in writing, to the audit committee of the issuer—

(1) the scope of the service, the fee structure for the engagement, and any side letter or other amendment to the engagement letter, or any other agreement (whether oral, written, or otherwise) between the firm and the audit client, relating to the service; and

(2) any compensation arrangement or other agreement, such as a referral agreement, a referral fee or fee-sharing arrangement, between the registered public accounting firm (or an affiliate of the firm) and any person (other than the audit client) with respect to the promoting, marketing, or recommending of a transaction covered by the service;

(b) discuss with the audit committee of the issuer the potential effects of the services on the independence of the firm; and

(c) document the substance of its discussion with the audit committee of the issuer.

[Effective pursuant to SEC Release No. 34-53677; File No. PCAOB-2006-01; April 19, 2006]

Rule 3525. Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting.

In connection with seeking audit committee pre-approval to perform for an audit client any permissible non-audit service related to internal control over financial reporting, a registered public accounting firm shall—

(a) describe, in writing, to the audit committee of the issuer the scope of the service;

(b) discuss with the audit committee of the issuer the potential effects of the service on the independence of the firm; and

Note: Independence requirements provide that an auditor is not independent of his or her audit client if the auditor is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the auditor is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement. Several principles guide the application of this general standard, including whether the auditor assumes a management role or audits his or her own work. Therefore, an auditor would not be independent if, for example, management had delegated its responsibility for internal control over financial reporting to the auditor or if the auditor had designed or implemented the audit client's internal control over financial reporting.

(c) document the substance of its discussion with the audit committee of the issuer.

[Effective pursuant to SEC Release No. 34-56152; File No. PCAOB-2007-02; July 27, 2007]

Rule 3526. Communication with Audit Committees Concerning Independence.

A registered public accounting firm must—

(a) prior to accepting an initial engagement pursuant to the standards of the PCAOB—

(1) describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the potential audit client or persons in financial reporting oversight roles at the potential audit client that, as of the date of the communication, may reasonably be thought to bear on independence;

(2) discuss with the audit committee of the issuer the potential effects of the relationships described in subsection (a)(1) on the independence of the registered public accounting firm, should it be appointed the issuer's auditor; and

(3) document the substance of its discussion with the audit committee of the issuer.

(b) at least annually with respect to each of its issuer audit clients—

(1) describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the audit client or

persons in financial reporting oversight roles at the audit client that, as of the date of the communication, may reasonably be thought to bear on independence;

(2) discuss with the audit committee of the issuer the potential effects of the relationships described in subsection (b)(1) on the independence of the registered public accounting firm;

(3) affirm to the audit committee of the issuer, in writing, that, as of the date of the communication, the registered public accounting firm is independent in compliance with Rule 3520; and

(4) document the substance of its discussion with the audit committee of the issuer.

[Effective pursuant to SEC Release No. 34-58415, File No. PCAOB-2008-03; August 22, 2008]

Rule 3600T. Interim Independence Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with independence standards—

(a) as described in the AICPA's Code of Professional Conduct Rule 101, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 101 and 191 (AICPA 2002)), to the extent not superseded or amended by the Board; and

(b) Standards Nos. 1, 2, and 3, and Interpretations 99-1, 00-1, and 00-2, of the Independence Standards Board, to the extent not superseded or amended by the Board.

Note: The Board's Interim Independence Standards do not supercede the Commission's auditor independence rules. See Rule 2-01 of Reg. S-X, 17 C.F.R. 240.2-01. Therefore, to the extent that a provision of the Commission's rule is more restrictive—or less restrictive—than the Board's Interim Independence Standards, a registered public accounting firm must comply with the more restrictive rule.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Independence Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624; File No. PCAOB-2003-11; April 28, 2004 and SEC Release Nos 33-8233 & 3447746; April 25, 2003]

Part 7—Establishment of Professional Standards

Rule 3700. Advisory Groups.

(a) Formation.

To assist it in carrying out its responsibility to establish auditing and related professional practice standards, the Board will convene one or more advisory groups, in accordance with Section 103(a)(4) of the Act.

(b) Composition.

Advisory groups, in combination or as sub-groups designated by the Board within one advisory group, will contain individuals with expertise in one or more of the following areas—

(1) accounting;
(2) auditing;
(3) corporate finance;
(4) corporate governance;
(5) investing in public companies; and
(6) other areas that the Board deems to be relevant to one or more auditing or related professional practice standards

(c) Selection of Members of Advisory Groups.

Members of advisory groups will be selected by the Board, in its sole discretion, based upon nominations, including self-nominations, received from any person or organization.

Note: The Board will announce, from time to time, periods during which it will receive nominations to an advisory group. During those periods, nominations may be submitted by any person or organization, including, but not limited to, any investor, any accounting firm, any issuer, and any institution of higher learning.

(d) Personal Membership.

Membership in an advisory group will be personal to the individuals selected to serve on the advisory group. A member's functions and responsibilities, including attendance at meetings, may not be delegated to others.

(e) Ethical Duties of Advisory Group Members.

Members of an advisory group shall comply with EC3, EC8(a), EC9, and, with respect to any private publication or public statement about the Board or any advisory group or any of the activities of the Board or any advisory group, EC10 of the Board's Ethics Code.

(f) Ad Hoc Task Forces.

The Board may, in its discretion, establish ad hoc task forces. The membership of such task forces may include, but is not limited to, advisory group members. To the extent not otherwise required, members of ad hoc task forces shall comply with paragraph (e) of this Rule.

Introduction

The Sarbanes-Oxley Act (act) authorizes the Public Company Accounting Oversight Board (PCAOB) to establish auditing and related attestation, quality control, ethics, and independence standards to be used by registered public accounting firms in the preparation and issuance of audit reports for entities subject to the act or the rules of the Securities and Exchange Commission (SEC). Accordingly, public accounting firms registered with the PCAOB are required to adhere to all PCAOB standards in the audits of issuers, as defined by the act, and other entities when prescribed by the rules of the SEC.

TABLE OF CONTENTS

PCAOB Release No. 2003-006

Establishment of Interim Professional Auditing Standards

PCAOB Release No. 2003-006
April 18, 2003

Summary:

The Public Company Accounting Oversight Board ("Board" or "PCAOB") has established interim standards of auditing, attestation, quality control, ethics, and independence ("Interim Professional Auditing Standards"). Section 103(a) of the Sarbanes-Oxley Act of 2002 ("Act") provides that the Board shall, by rule, establish auditing and related attestation, quality control, and ethics standards to be used by registered public accounting firms in the preparation and issuance of audit reports. Section 103(b) authorizes the Board to adopt rules relating to auditor independence. The Board's Interim Professional Auditing Standards were promulgated by various other bodies and pre-date the determination of the Securities and Exchange Commission ("Commission"), under Section 101(d), that the Board is capable of carrying out its responsibilities under the Act. Unlike other Rules of the Board, under Section 103(a)(3)(B) of the Act, the Board's Interim Professional Auditing Standards "shall be separately approved by the Commission at the time of the determination, without regard to the procedures required by Section 107" of the Act regarding rulemaking.

This release describes the standards that the Board has adopted as Interim Professional Auditing Standards on an initial, transitional basis in order to assure continuity and certainty in the standards that govern audits of public companies. They will remain in effect while the Board conducts a review of standards applicable to registered public accounting firms, as discussed in PCAOB Release No. 2003-005. Based on this review, the Board may modify, repeal, replace or adopt permanently the Interim Professional Auditing Standards, or any part thereof, by rulemaking according to the Board's procedures for the establishment of professional auditing standards and subject to Commission approval.

Board Contacts:

Gordon Seymour, Acting General Counsel (202/207-9034; seymourg@pcaobus.org), or Samantha Ross, Special Counsel to the Acting Chairman (202/207-9093; rosss@pcaobus.org).

* * * * * *

The Board has adopted Interim Professional Auditing Standards to govern the conduct of audits of public companies (i.e., "issuers" as defined in the Act). The Act provides that "[p]re-existing standards of designated professional groups of accountants may be adopted during the Board's transitional period,"[1] i.e., before the Commission's determination, under Section 101(d), that the Board is "organized and has the capacity to carry out the requirements of Title I" of the Act. Specifically, Section 103(a)(3)(B) and 103(a)(3)(A)(i) of the Act provide for the Board to adopt, as initial or transitional standards, "any portion of any

[1] See S. Rep. No. 107-205, at 8 (2002).

statement of auditing standards or other professional standards" that satisfy the requirements of Section 103(a)(1) of the Act. These interim standards are to be "separately approved by the Commission at the time of the determination, without regard to the procedures required by Section 107" of the Act regarding rulemaking, which will govern the Board's permanent standards.[2]

Despite the need to adopt these existing standards on an initial, transitional basis in order to assure continuity and certainty in the standards that govern audits of public companies, the Board has not determined whether it would be appropriate to include any of the Interim Professional Auditing Standards as permanent Board standards. In order to make that determination, the Board will establish a schedule and procedure for the review of all Interim Professional Auditing Standards.[3] The objective of that review will be to determine, on a standard-by-standard basis, whether the Interim Professional Auditing Standards should become permanent standards of the Board, should be repealed, or should be modified. As the review of each interim standard is completed, the Board will adopt that standard as a permanent Professional Auditing Standard, with or without modifications, will repeal the standard, or will take any other appropriate action regarding the standard.

The Interim Professional Auditing Standards consist of five rules (Rules 3200T, 3300T, 3400T, 3500T, and 3600T). Appendices 1 and 2 to this release contain, respectively, the text of these rules and a section-by-section analysis of the rules. Section A of this release provides an overview of the Interim Professional Auditing Standards and of the Board's reasons for adopting these standards. Section B of this release describes the effective date of the Interim Professional Auditing Standards and the procedure for Commission approval of these standards..., other than as provided in section 103(a)(3)(B) with respect to initial or transitional standards."

A. Overview of the Interim Professional Auditing Standards

1. Interim Auditing Standards

Auditors of public companies that issue securities are required to provide audit reports that "state whether the audit was made in accordance with generally accepted auditing standards" ("GAAS").[4] The Commission's Division of Corporation Finance will not accept an audit report on the financial statements of an issuer unless the report states that the audit to which it relates was conducted in accordance with GAAS in the United States.[5]

Before the enactment of the Act, U.S. GAAS were established by the American Institute of Certified Public Accountants ("AICPA"). General standards on auditing, as well as standards relating to audit field work and audit reports, were approved and adopted by the membership of the AICPA, and amended by the AICPA's Auditing Standards Board ("ASB"). In addition, the ASB has

---

[2] Section 103(a)(3)(B) of the Act. Section 107(b)(2) of the Act provides that "[n]o rule of the Board shall become effective without prior approval of the Commission.

[3] See PCAOB Release No. 2003-005 (April 18, 2003).

[4] See Regulation S-X, § 2-02, 17 C.F.R. § 210.2-02.

[5] "All financial statements filed with the SEC are required to be audited in accordance with US GAAS, with an explicit statement of that fact in the auditor's report." See Division of Corporation Finance Current Accounting and Disclosure Issues (August 31, 2001), http://www.sec.gov/divisions/corpfin/acctdisc.htm.

developed and issued 101 Statements of Auditing Standards ("SAS") through a process that has included deliberations in public meetings, public exposure of draft statements, and adoption of statements approved by the ASB.[6] GAAS also require an auditor to "be aware of and consider" certain AICPA interpretive publications, such as auditing Interpretations of the SASs, auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position.[7]

Subject to the Commission's oversight authority, the Act gives the Board the exclusive, statutory power to establish and amend Professional Auditing Standards to be used by registered public accounting firms in the preparation and issuance of audit reports.[8] The Board's Professional Auditing Standards supercede standards established by professional organizations, with respect to the preparation or issuance of audit reports on the financial statements of issuers. In Release No. 2003-005, the Board announced its intention to establish Professional Auditing Standards through an open process in which the accounting profession, the preparers of financial statements, the investor community, and others will have the opportunity to participate. The Board also announced in that release a plan to review existing GAAS and, when appropriate, change or establish new GAAS.

In order to assure continuity and certainty in the standards that govern audits of public companies during the Board's review, the Board has determined that GAAS proposed and promulgated by the AICPA and the ASB, as they existed on April 16, 2003, should be adopted as Interim Auditing Standards, pursuant to Section 103(a)(3)(B). Accordingly, the Board has adopted Rule 3200T to require that registered public accounting firms comply with its Interim Auditing Standards in the performance of audits, or interim reviews,[9] of the financial statements of issuers. The Board intends that these GAAS continue to have the same authority they have currently unless and until the Board supercedes them.

2. Interim Attestation Standards

Section 103(a)(1) authorizes the Board to establish "auditing and related attestation standards."[10] Consistent with the Interim Auditing Standards, the

---

[6] See SAS No. 95, *Codification of Statements on Auditing Standards* ("Codification"), AU § 150.03 (AICPA 2002).

[7] In addition, SAS No. 95 also refers to other auditing publications, such as articles in the Journal of Accountancy and other professional journals, including publications by state CPA societies, textbooks, and guidebooks, that have contributed to the development of GAAS. Before applying the guidance in an "other auditing publication," an auditor "should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate." SAS No. 95, Codification at AU § 150.08.

[8] Section 3(c)(2) of the Act provides that "[n]othing in this Act or the rules of the Board shall be construed to impair or limit . . . the authority of the Commission to set standards for accounting or auditing practices or auditor independence, derived from other provisions of the securities laws or the rules or regulations thereunder, for purposes of the preparation and issuance of any audit report, or otherwise under applicable law."

[9] Interim reviews of financial information are integrally related to audits. See generally SAS No. 100. For example, SAS No. 100 makes clear that the general standards on auditing discussed in SAS No. 95 "are applicable to a review of interim financial information." See id. at ¶ 1; see also id. at ¶¶ 12-13 (requiring new auditor conducting initial review of interim financial information to perform procedures, including making inquiries and reviewing the work papers of predecessor auditor and obtaining knowledge of entity's internal controls).

[10] Section 2(a)(10) of the Act also defines Professional Standards to include "standards for attestation engagements . . . that the Board or the Commission determines . . . relate to the preparation or issuance of audit reports for issuers."

Board's Rule 3300T designates the Statements on Standards for Attestation Engagements ("SSAE") and related Interpretations and Statements of Position adopted by the ASB, as they existed on April 16, 2003, as the Board's Interim Attestation Standards. Accordingly, registered public accounting firms must comply with those SSAEs that are related to the preparation or issuance of an audit report on the financial statements of an issuer.[11]

3. Interim Quality Control Standards

Section 103(a)(1) authorizes the Board to establish quality control standards for registered public accounting firms. Until enactment of the Act, the ASB's Statements on Quality Control Standards ("SQCS") were the primary source of such standards.[12] In addition, public accounting firms that are members of the AICPA's SEC Practice Section have committed to satisfying a number of other quality control-related requirements. Consistent with the Interim Auditing Standards and the Interim Attestation Standards, the Board's Rule 3400T designates the Statements on Quality Control Standards adopted by the ASB, as they existed on April 16, 2003, as the Board's Interim Quality Control Standards.

Rule 3400T also designates certain AICPA SEC Practice Section membership requirements as additional Interim Quality Control Standards.[13] It should be noted that the Board is not adopting as interim standards the entirety of the AICPA SEC Practice Section's membership requirements.[14] Further, because the Board intends the Interim Quality Control Standards to preserve existing standards as they apply currently, consistent with Section 103(a)(3) of the Act, those Interim Quality Control Standards adapted from the AICPA SEC Practice Section requirements apply only to those firms that are members of the AICPA SEC Practice Section.[15] The requirements incorporated in Rule 3400T, which are described in more detail in Appendix 2, related to the following matters—

- Continuing professional education of audit firm personnel;
- Concurring partner review of the audit report and the financial statements of Commission registrants;[16]

---

[11] Rule 3300T.

[12] See SAS 25, Codification at AU § 161 (requiring accounting firms to have quality controls for their audit practices). The ASB's standards define quality control as "a process to provide the firm with reasonable assurance that its personnel comply with applicable professional standards and the firm's standards of quality." See System of Quality Control for a CPA Firm's Accounting and Auditing Practice, AICPA Professional Standards ("Professional Standards"), QC § 20.03 (AICPA 2002). The ASB's standards further set forth five broad elements of appropriate quality control in a public accounting firm, which relate to maintaining independence, integrity, and objectivity; managing personnel; establishing guidelines for accepting and continuing clients; performing engagements; and monitoring the existing quality control policies and procedures. Professional Standards at QC § 20.07.

[13] AICPA SEC Practice Section Reference Manual, § 1000.08(d), (f), (l), (m), (n)(1) and (o).

[14] For example, the Board is not adopting those SECPS membership requirements that require each member of the firm to be a member of the AICPA or that require member firms to submit to peer reviews, to report information to the SECPS or to the AICPA's quality control inquiry committee, or to pay dues to the SECPS. See AICPA SEC Practice Section Reference Manual, § 1000.08(a), (c), (g), (j), (k) and (p). Nor is the Board adopting those SECPS membership requirements that have been superceded by statute or by Commission or Board rule.

[15] In the future the Board may, by rulemaking and pursuant to its standards-setting procedures, extend the AICPA SEC Practice Section requirements to other registered public accounting firms.

[16] SECPS membership requirement (f) sets forth the Practice Section's concurring review requirements, which the Board has adopted as part of its Interim Quality Control Standards. See AICPA SEC Practice Section Reference Manual, § 1000.08(f). Requirement (f) also permitted the AICPA "peer review committee [to] authorize alternative procedures where this requirement cannot be met because

(continued)

- Communication by written statement to all professional personnel of firm policies and procedures on the recommendation and approval of accounting principles, present and potential client relationships, and the types of services provided;
- Notification of the Commission of resignations and dismissals from audit engagements for Commission registrants;
- Audit firm obligations with respect to the policies and procedures of correspondent firms and of other members of international firms or international associations of firms; and
- Policies and procedures to comply with applicable independence requirements.

4. Interim Ethics Standards

Section 103(a)(1) authorizes the Board to establish ethics standards.[17] The Board's Rule 3500T designates the provisions of the AICPA's Code of Professional Conduct on integrity and objectivity, as Interim Ethics Standards.[18] Accordingly, registered public accounting firms must comply with the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence as of the date of this release.[19] Consistent with the other interim standards adopted by the Board, these ethical standards continue to have the same authority they have currently unless and until the Board supercedes them.

5. Interim Independence Standards

Section 103(b) of the Act authorizes the Board to "establish such rules as may be necessary or appropriate in the public interest or for the protection of investors, to implement, or as authorized under, title II of this Act."[20] The Board has adopted Interim Independence Standards, based on the provisions of the AICPA's Code of Professional Conduct regarding independence and existing standards and interpretations of the Independence Standards Board. Rule 3600T requires registered public accounting firms to comply with these independence standards in connection with the audit of any Commission registrant.

On January 28, 2003, the Commission adopted final rules to strengthen requirements regarding auditor independence and enhance disclosure regarding fees paid to auditors and otherwise to strengthen the Commission's existing

---

(footnote continued)

of the size of the member firm." The Board has not adopted this part—the second sentence—of SECPS membership requirement (f). Under Section 103(a)(3)(A)(i), the Board "may adopt as its rules . . any portion of any statement of auditing standards or other professional standards that the Board determines" satisfy the Act's requirements. The Board does, however, intend to permit requests for similar relief to be sought from the Board.

[17] Section 2(a)(10)(B) of the Act also defines Professional Standards to include "ethical and competency standards . . . that the Board or the Commission determines . . . relate to the preparation or issuance of audit reports for issuers."

[18] Professional Standards at ET §§ 102 and 191.

[19] Rule 3500T.

[20] Title II of the Act addresses auditor independence. In addition, Section 2(a)(10) of the Act defines "Professional Standards" to include "independence standards (including rules implementing title II) that the Board or the Commission determines . . . relate to the preparation or issuance of audit reports for issuers."

auditor independence rules.[21] These rules were designed to implement provisions of the Act. All registered public accounting firms are required to comply with Commission rules, and the Board's Interim Independence Standards do not supplant the Commission's independence rules. To the extent that the Commission's rules are more restrictive—or less restrictive—than the Board's Interim Independence Standards, registered public accounting firms must comply with the more restrictive requirements. The note to Rule 3600T clarifies this point.

B. Effective Date for the Interim Professional Auditing Standards and Procedure for Commission Approval

Under Section 103(a)(3)(B) of the Act, the Board's Interim Professional Auditing Standards "shall be separately approved by the Commission at the time of [the] determination" of the Commission under Section 101(d) of the Act that the Board has the capacity to carry out the requirements of Title I of the Act. This determination is expected to be made no later than April 26, 2003.[22] The Interim Professional Auditing Standards shall be effective as of the date of the Commission's approval of them, which, accordingly, is expected to be no later than April 26, 2003.

* * * * * *

On the 16th day of April, in the year 2003, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ISSUED BY THE BOARD.
/s/ J. Gordon Seymour
J. Gordon Seymour
Acting Secretary
April 16, 2003

APPENDICES—

1. Rules Relating to Interim Professional Auditing Standards
2. Section-by-Section Analysis of Rules Relating to Interim Professional Auditing Standards

[21] See SEC, Strengthening the Commission's Requirements Regarding Auditor Independence, Securities Act Release No. 33-8183, 68 Fed. Reg. 6,006 (Jan. 28, 2003), as amended by Securities Act Release No. 33-8183A, 68 Fed. Reg. 15,354 (March 26, 2003).

[22] Section 101(d) of the Act requires the Board to take such actions as are necessary or appropriate to enable the Commission to make this determination no later than 270 days after the enactment of the Act, i.e., no later than April 26, 2003.

Appendix 1

Rules Relating to Interim Professional Auditing Standards

RULES OF THE BOARD

SECTION 7. PROFESSIONAL STANDARDS

RULE 3200T. Interim Auditing Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement of Auditing Standards No. 95, as in existence on April 16, 2003 (Codification of Statements on Auditing Standards, AU § 150 (AICPA 2002)).

> Note: Under Section 102(a) of the Act, public accounting firms are not required to be registered with the Board until 180 days after the date of the determination of the Commission under section 101(d) that the Board has the capacity to carry out the requirements of Title I of the Act (the "mandatory registration date"). The Board intends that, during the period preceding the mandatory registration date, the Interim Auditing Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3200T. See Release No. 2003-026 for language of the amendment.]

RULE 3300T. Interim Attestation Standards.

In connection with an engagement (i) described in the AICPA's Auditing Standards Board's Statement on Standards for Attestation Engagements No. 10 (Codification of Statements on Auditing Standards, AT § 101.01 (AICPA 2002)) and (ii) related to the preparation or issuance of audit reports for issuers, a registered public accounting firm, and its associated persons, shall comply with the AICPA Auditing Standards Board's Statements on Standards for Attestation Engagements, and related interpretations and Statements of Position, as in existence on April 16, 2003.

> Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Attestation Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3300T. See Release No. 2003-026 for language of the amendment.]

RULE 3400T. Interim Quality Control Standards.

A registered public accounting firm, and its associated persons, shall comply with quality control standards, as described in—

(*a*) the AICPA's Auditing Standards Board's Statements on Quality Control Standards, as in existence on April 16, 2003 (AICPA Professional Standards, QC §§ 20–40 (AICPA 2002)); and

(*b*) the AICPA SEC Practice Section's Requirements of Membership (d), (f)(first sentence), (l), (m), (n)(1) and (o), as in existence on April 16, 2003 (AICPA SEC Practice Section Manual – 1000.08(d), (f), (j), (m), (n)(1) and (o)).

Note: The second sentence of requirement (f) of the AICPA SEC Practice Section's Requirements of Membership provided for the AICPA's peer review committee to "authorize alternative procedures" when the requirement for a concurring review could not be met because of the size of the firm. This provision is not adopted as part of the Board's Interim Quality Control Standards. After the effective date of the Interim Quality Control Standards, requests for authorization of alternative procedures to a concurring review may, however, be directed to the Board.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Quality Control Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3400T. See Release No. 2003-026 for language of the amendment.]

RULE 3500T. Interim Ethics Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with ethics standards, as described in the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 102 and 191 (AICPA 2002)).

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Ethics Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3500T. See Release No. 2003-026 for language of the amendment.]

RULE 3600T. Interim Independence Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with independence standards—

(1) as described in the AICPA's Code of Professional Conduct Rule 101, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 101 and 191 (AICPA 2002)); and

(2) Standards Nos. 1, 2, and 3, and Interpretations 99-1, 00-1, and 00-2, of the Independence Standards Board.

Note: The Board's Interim Independence Standards do not supercede the Commission's auditor independence rules. See Rule 2-01 of Reg. S-X, 17 C.F.R. 240.2-01. Therefore, to the extent that a provision of the Commission's rule is more restrictive—or less restrictive—than the Board's Interim Independence Standards, a registered public accounting firm must comply with the more restrictive rule.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Independence Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3600T. See Release No. 2003-026 for language of the amendment.]

Appendix 2

Section-by-Section Analysis of Rules Relating to Interim Professional Auditing Standards

The rules relating to interim professional auditing standards consist of PCAOB Rules 3200T, 3300T, 3400T, 3500T and 3600T. Each of the rules is discussed below.

Rule 3200T—Interim Auditing Standards

Rule 3200T provides that, in connection with the preparation or issuance of any audit report on the financial statements of an issuer, a registered public accounting firm shall comply with generally accepted auditing standards as described in the American Institute of Certified Public Accountants' ("AICPA") Auditing Standards Board's ("ASB") Statement on Auditing Standards ("SAS") No. 95, as in existence on April 16, 2003. SAS No. 95 describes the relative authority of various sources of generally accepted auditing standards. Specifically, SAS No. 95 describes the ten general, field work and reporting standards approved by the membership of the AICPA, and amended by the ASB, and the Statements on Auditing Standards approved by the ASB, as standards with which an auditor is required to comply.[1] As of April 16, 2003, 101 SASs had been issued by the ASB.

Statement of Auditing Standards No. 95 also provides that an "auditor should be aware of and consider" certain interpretive publications, such as the ASB's Interpretations of the SASs, auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position. While these interpretive publications have not been accorded the same authority as the ten GAAS or the SASs, SAS No. 95 requires that, if an auditor does not comply with the guidance in these publications, "the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance." Finally, SAS No. 95 also recognizes that other auditing publications "may help the auditor understand and apply the SASs." The Board's Rule 3200T provisionally adopts this framework.

As the Note to Rule 3200T clarifies, under Section 102(a) of the Act, public accounting firms that want to continue to audit issuers are not required to be registered with the Board until 180 days after the date of the determination of the Commission under section 101(d) that the Board has the capacity to carry out the requirements of Title I of the Act (the "mandatory registration date"). The Board intends that, during the period preceding the mandatory registration date, the Interim Auditing Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

Rule 3300T—Interim Attestation Standards

Rule 3300T governs the conduct of engagements that (i) are described in the ASB's Statement on Standards for Attestation Engagements No. 10 (Codification of Statements on Auditing Standards, AT § 101.01), and (ii) relate

[1] SAS No. 95, Codification of Statements on Auditing Standards, AU §§ 150.02-150.03. Statement of Auditing Standards No. 95 also provides that "[t]he auditor should be prepared to justify departures from the SASs."

to the preparation or issuance of audit reports for issuers. Registered public accounting firms involved in such engagements are required to comply with the ASB's Statements on Standards for Attestation Engagements, and related interpretations and AICPA Statements of Position, as in existence on April 16, 2003.

As the Note to Rule 3300T clarifies, the Board intends that, during the period preceding the mandatory registration date, the Interim Attestation Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

Rule 3400T—Interim Quality Control Standards

Rule 3400T sets forth minimum quality control standards with which registered public accounting firms must comply, in order to ensure that registered public accounting firms, and their personnel, comply with applicable accounting and auditing (and other professional) standards. Through Rule 3400T, the Board has provisionally designated the Statements on Quality Control Standards proposed and issued by the ASB and certain AICPA SEC Practice Section ("SECPS") membership requirements, as they existed, and as they applied to SEC Practice Section members, on April 16, 2003, as the Board's Interim Quality Control Standards. Because the Board intends the Interim Quality Control Standards to preserve existing standards as they applied on April 16, consistent with Section 103(a)(3) of the Act, those Interim Quality Control Standards adapted from the AICPA SEC Practice Section requirements apply only to those firms that are members of the AICPA SEC Practice Section.[2]

The ASB's Statements on Quality Control Standards are published in the AICPA's Professional Standards, at QC Sections 20–40. The provisions of the AICPA's SECPS membership requirements that have been incorporated into the Board's Interim Quality Control Standards are Membership Requirements (d), (f) (first sentence), (l), (m), (n)(1) and (o), and referenced appendices, which are published in the AICPA's SEC Practice Section Reference Manual §1000.08. The SECPS membership requirements that are incorporated into the Board's Interim Quality Control Standards provide as follows:

- Requirement (d) requires registered public accounting firms to "ensure that all professionals in the firm residing in the United States, including CPAs and non-CPAs, participate in at least 20 hours of qualifying continuing professional education (CPE) every year and at least 120 hours every three years. . . . [P]rofessionals who devote at least 25% of their time to performing audit, review or other attest engagements (excluding compilations), or who have the partner/manager-level responsibility for the overall supervision or review of any such engagements, must obtain at least 40% (eight hours in any one year and 48 hours every three years) of their required CPE in subjects relating to accounting and auditing."
- Requirement (f) requires registered public accounting firms to "establish policies and procedures that meet the requirements set forth in the SECPS Reference Manual, for a concurring review of the audit report and the financial statements by a partner other

[2] In the future the Board may, by rulemaking and pursuant to its standards-setting procedures, extend the AICPA SEC Practice Section requirements to other registered public accounting firms.

than the audit partner-in-charge of an SEC engagement before issuance of an audit report on the financial statements of an SEC engagement and before the re-issuance of such an audit report where the performance of subsequent events procedures is required by professional standards." After the effective date of the Interim Quality Control Standards, requests for authorization of alternative procedures to a concurring review may be sought from the Board. Any such request should be directed to the attention of the Director of Registration and Inspection, 1666 K Street, N.W., Washington, D.C. 20006-2803.

- Requirement (l) requires registered public accounting firms to "communicate through a written statement to all professional firm personnel the broad principles that influence the firm's quality control and operating policies and procedures on, as a minimum, matters related to the recommendation and approval of accounting principles, present and potential client relationships, and the types of services provided, and inform professional firm personnel periodically that compliance with those principles is mandatory."

- Requirement (m) requires a registered public accounting firm that has been the auditor of an SEC registrant and has resigned, declined to stand for reelection, or been dismissed, to report the fact that the "relationship has ceased directly in writing to the former SEC client, with a simultaneous copy to the Office of the Chief Accountant of the Securities and Exchange Commission" by the end of the fifth business day following the firm's determination that the relationship has ended, irrespective of whether or not the SEC registrant has reported the change in a timely-filed Form 8-K.

- Requirement (n)(1) requires registered public accounting firms that are "members of, correspondents with, or similarly associated with international firms or international associations of firms," to "seek adoption of policies and procedures by the international organization or individual foreign associated firms that are consistent with the objectives set forth in Appendix K, SECPS § 1000.45."

- Requirement (o) requires registered public accounting firms to ensure that they have "policies and procedures in place to comply" with applicable independence requirements. This requirement further specifically requires firms to establish independence policies covering relationships between the firm, its benefit plans, and its professionals, and restricted entities.

As the Note to Rule 3400T clarifies, the Board intends that, during the period preceding the mandatory registration date, the Interim Quality Control Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

Rule 3500T—Interim Ethics Standards

Rule 3500T sets forth ethics standards for registered public accounting firms and their personnel. Through Rule 3500T, the Board has provisionally designated Rule 101 of the AICPA's Code of Professional Conduct, and interpretations and rulings thereunder, as they existed on April 16, 2003, as the Board's

Interim Ethics Standards. Rule 101, and the AICPA's interpretations and rulings thereunder, are published in AICPA Professional Standards, ET §§ 102 and 191 (AICPA 2002).

As the Note to Rule 3500T clarifies, the Board intends that, during the period preceding the mandatory registration date, the Interim Ethics Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

Rule 3600T—Interim Independence Standards

Rule 3600T sets forth independence standards for registered public accounting firms and their personnel. Through Rule 3600T, the Board has provisionally designated Rule 101 of the AICPA's Code of Professional Conduct, and interpretations and rulings thereunder, as they existed on April 16, 2003, and Standards Nos. 1, 2 and 3, and interpretations 99-1, 00-1, and 00-2 of the Independence Standards Board ("ISB"), as the Board's Interim Independence Standards. Rule 101, and the AICPA's interpretations and rulings thereunder, are published in the AICPA's Professional Standards, at ET Sections 102 and 191. The ISB Standards and interpretations, which are made effective by the SEC's Policy Statement on the Establishment and Improvement of Standards Related to Auditor Independence (FR No. 50A, July 17, 2001), are currently available at www.cpaindependence.org.

The Board's Interim Independence Standards shall not be interpreted to supercede the Commission's independence requirements. Therefore, to the extent that a provision of the Commission's rule or policy is more restrictive—or less restrictive—than the Board's Interim Independence Standards, a registered public accounting firm shall comply with the more restrictive requirement.

As the Note to Rule 3600T clarifies, the Board intends that, during the period preceding the mandatory registration date, the Interim Independence Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

PCAOB Release No. 2003-009

Compliance With Auditing and Related Professional Practice Standards—Advisory Groups

PCAOB Release No. 2003–009
June 30, 2003
PCAOB Rulemaking
Docket Matter No. 004

Summary:

After public comment, the Public Company Accounting Oversight Board ("Board" or "PCAOB") has adopted a Rule relating to compliance with the Board's auditing and related professional practice standards and a Rule relating to the formation of advisory groups. Specifically, the Board has adopted Rule 3100, and a related definition that would appear in Rule 1001, and Rule 3700. Rule 3100 generally requires all registered public accounting firms to adhere to the Board's auditing and related professional practice standards in connection with the preparation or issuance of any audit report for an issuer (as defined in the Sarbanes-Oxley Act of 2002 (the "Act")) and in their auditing and related attestation practices. Rule 3700 governs the formation, composition and role of one or more advisory groups to assist the Board in formulating new auditing and related professional practice standards for registered public accounting firms. The Board will submit these Rules to the Securities and Exchange Commission ("Commission" or "SEC") for its approval pursuant to Section 107 of the Act. These Rules will not take effect unless approved by the Commission pursuant to Section 107 of the Act. This Release also provides additional guidance regarding the number, size and composition of advisory groups and addresses certain qualifications that the Board may consider in selecting advisory group members and the terms and conditions of membership. Further, it provides guidance about the advisory group meetings, agendas, role of members and procedures that the Board believes is important to the functioning of advisory groups.

Public Comment:

The Board released for public comment proposed Rules on the establishment of auditing and other professional standards on April 18, 2003. The Board received 22 letters of comment.

Board Contacts:

Gordon Seymour, Acting General Counsel (202/207-9034; seymourg@pcaobus.org), Thomas Ray, Deputy Chief Auditor (202/207-9112; rayt@pcaobus.org), or Mary M. Sjoquist, Special Counsel to Board Member Gradison (202/207-9084; sjoquistm@pcaobus.org).

* * * * * *

Section 103(a)(1) of the Act directs the Board to establish auditing and related attestation standards, quality control standards, and ethics standards to be used by registered public accounting firms in the preparation and issuance of audit reports, as required by the Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors. Similarly, Section 103(b) authorizes the Board to establish such rules as may be necessary or appropriate to implement the auditor independence requirements in, or as authorized under, Title II of the Act. While Section 103(a)(4) directs the Board to convene such expert advisory groups as may be appropriate to aid in standards-setting, it nevertheless affords the Board considerable discretion in determining the procedures by which it will develop and adopt auditing and related professional practice standards.[1]

This Release announces the adoption of Rule 3100 (and a related definition) and Rule 3700. Rule 3100 requires all registered public accounting firms to adhere to the Board's auditing (and related attestation), quality control, and ethics standards, and its independence standards. Rule 3700 addresses the formation, composition, and other basic matters concerning advisory groups, which may be convened to aid in the Board's standards-setting process. In addition, as set forth in more detail below, the Board has determined to convene, at this time, one standing advisory group (the "SAG") to assist it in performing its standards-setting responsibilities.

Section A of this Release discusses the adoption of Rule 3100. Section B discusses the adoption of Rule 3700, and the establishment of the SAG and ad hoc task forces. The text of Rule 3100 (and a related definition) and Rule 3700 and a detailed discussion of the Rules are provided in Appendices 1 and 2 hereto, respectively.

The Board has reviewed all of the public comments received on the Rules as proposed in Release No. 2003-005. In response to these comments, Rule 3100 (and a related definition) and Rule 3700, as finalized, both clarify and modify certain aspects of the proposed Rules. Most importantly, the revisions to the original proposal are as follows—

- Instead of using the term Professional Auditing Standards as originally proposed, the defined term in Rule 1001 has been changed to Auditing and Related Professional Practice Standards;
- Rule 3700(c), Selection of Members of Advisory Groups, has been revised to clarify that the Board will accept nominations to the SAG, including self-nominations, from any person or organization rather than including a nonexclusive list of specific groups; and
- Rule 3700(e), Ethical Duties of Advisory Group Members, has been revised to make EC10 of the Board's Ethics Code applicable to members of the SAG with respect to any private publication or public statement about the Board or any advisory group or any of the activities of the Board or any advisory group.[2]

---

[1] The auditing and related attestation standards, quality control standards, and ethics standards over which the Board has authority under Section 103(a) of the Act, and the independence rules the Board is authorized to adopt under Section 103(b), are collectively referred to in this Release as "auditing and related professional practice standards." This term is defined in Rule 1001(a)(viii). The Board's proposed Rules and Release used the term "professional auditing standards." As discussed in more detail in Appendix 2 to this Release, because a number of commenters found this term confusing, the Board has decided to use the term "auditing and related professional practice standards" (hereinafter, "Standards").

[2] See PCAOB Release No. 2003-008 (June 30, 2003) which includes the entire text of the Board's Ethics Code.

A more detailed analysis of the Board's response to the comments on the proposed Rules is included in Appendix 2. The Board's Rules will be submitted to the Commission for approval. Pursuant to Section 107 of the Act, Board Rules do not take effect unless approved by the Commission.

A. Compliance With the Board's Auditing and Related Professional Standards

Section 103(a) of the Act directs the Board, by rule, to establish auditing and related attestation standards, quality control standards, and ethics standards "to be used by registered public accounting firms in the preparation and issuance of audit reports, as required by [the] Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors." Section 103(b) of the Act also directs the Board to establish independence standards to implement, or as authorized under, Title II of the Act.[3]

As a corollary to the Board's exclusive, statutory authority to establish and amend Standards, all public accounting firms that are registered with the Board must comply with the Board's Standards. While this requirement is implicit in the Act, the Board has codified the obligation of registered firms to comply with the Board's Standards in Rule 3100. Any registered public accounting firm or person associated with such a firm that fails to adhere to applicable Board Standards may be the subject of a Board disciplinary proceeding in accordance with Section 105 of the Act.[4] In general, the Board's Standards will apply to registered public accounting firms and their associated persons in connection with their audits of (and related attestations concerning) the financial statements of issuers, as defined in Section 2(a)(7) of the Act, and those firms' auditing and related attestation practices. A number of commenters suggested that this Rule was either beyond the Board's authority or would create the impression that it applied to areas outside the Board's authority. To address these concerns, commenters suggested adding language about the scope of the Board's authority to Rule 3100. After considering these comments, the Board has decided to adopt the Rule as proposed.

The Board recognizes its responsibility to oversee the audits of issuers, as that term is defined in the Act, and does not intend to suggest that registered public accounting firms and their associated persons must comply with the Board's Standards in auditing non-issuers. Rule 3100, however, requires registered public accounting firms and their associated persons to comply with all *applicable* Standards. Accordingly, if the Board's Standards do not apply to an engagement or other activity of the firm, Rule 3100, by its own terms, does not apply to that engagement or activity.

---

[3] See also Report of the Committee on Banking, Housing, and Urban Affairs, U.S. Senate, on S. 2673, S. Rep. No. 107-205 (July 26, 2002) ("The Committee has concluded that the Board's plenary authority in this area is essential for the Board's effective operation, a position taken during the hearings by a number of witnesses..."). Board Rules adopting or modifying auditing and related professional practice standards require approval by the Commission. In addition, the Board recognizes that the Commission may also establish professional standards applicable to accountants that practice before it and audit reports filed with it and that the Commission has the authority to institute proceedings to amend the Board's Rules, including those that establish auditing and related professional practice standards. See Sections 2(a)(10), 3(c)(2), and 107(b)(5) of the Act.

[4] In addition, the Act provides that any violation of the Board's Rules is to be treated for all purposes in the same manner as a violation of the Securities Exchange Act of 1934, 15 U.S.C. 78a et seq., or the rules and regulations issued thereunder, and any person violating the Board's Rules "shall be subject to the same penalties, and to the same extent, as for a violation of [the Exchange] Act or such rules or regulations." Section 3(b)(1) of the Act.

Authorities other than the Board may nevertheless require that accounting firms or individual auditors comply with the Board's Standards in the conduct of audits of (or attestations concerning) the financial statements of non-issuers.[5] In that event, those authorities may enforce the Board's Standards pursuant to their own processes.

B. Establishment of Advisory Groups and Ad Hoc Task Forces

While the Board will, by rule, establish Standards, it recognizes that the development of such Standards should be an open, public process in which investors, the accounting profession, the preparers of financial statements, and others will have the opportunity to participate. To this end, as discussed in PCAOB Release No. 2003-005 (April 18, 2003), the Board intends to provide for a public comment process on proposed standards.[6] The Board's staff will, of course, be actively involved in the standards-setting process, but the Board also encourages proposals and recommendations on its standards-setting agenda and standards development projects from the public. Moreover, in order to obtain the advice of a broad range of experts, the Board has determined to form an advisory group, the SAG, which may be divided into sub-groups by the Board if the need for specialized advice arises. Finally, the Board may also establish one or more ad hoc task forces to assist the staff with the drafting of technical language, among other things.

1. Authority

Section 103(a)(4) of the Act provides that the Board shall "convene, or authorize its staff to convene, such expert advisory groups as may be appropriate... to make recommendations concerning the content (including proposed drafts) of auditing, quality control, ethics, independence, or other standards required to be established under this section." The Board has decided initially that it is likely to exercise this authority by convening the SAG to participate in the standards-setting process. Rule 3700 addresses the formation, composition, and other basic matters concerning advisory groups, including the SAG.

2. Role, Size and Composition

The role of the SAG will be to assist the Board in *reviewing* existing Standards, in *evaluating* proposed Standards recommended by Board staff, Board-formed technical task forces or others and *recommending* to the Board new or amended Standards. The role of the SAG will not ordinarily include technical drafting (which will be performed by the Board's staff, with the assistance of ad hoc task forces, when necessary). Instead, the Board will look to the SAG to provide advice and insight as to the need to formulate new Standards or change existing Standards and opinions on the impact of proposed new or changed Standards.

---

[5] Cf. Section 209 of the Act (stating that "[i]n supervising nonregistered public accounting firms and their associated persons, appropriate State regulatory authorities should make an independent determination of the proper standards applicable...").

[6] In response to PCAOB Release No. 2003-005, the Board received several comments relating to the process by which the Board will establish standards. While this release is intended to address only the adoption of Rules 3100 and 3700, the Board will nevertheless take these comments into consideration in its standards-setting work.

The Board contemplates that the SAG initially will have approximately 25 members. As noted above, the Board may, based on the circumstances of particular projects, prior to or after the formation of the SAG, form ad hoc task forces of specially qualified persons selected by the Board to assist it with specific projects. Members of any appointed ad hoc task force may or may not be members of the SAG.

The SAG will be composed of individuals with a variety of backgrounds, including practicing auditors, preparers of financial statements, investors (both individual and institutional), and others.[7] In order to achieve this diversity, the Board expects that no one field of expertise will predominate among the SAG membership. Although SAG members may be employed or otherwise affiliated with particular organizations, the Board expects SAG members to serve in their individual capacities and not to serve as representatives of particular interests, groups or employers.

3. Nominations of SAG Members

In determining appointments to the SAG, the Board intends to solicit nominations, including self-nominations. Interested parties will have 45 days from the date of the Board's Notice ("Notice") to the public to submit nominations on a form which will be provided in the Notice. Interested parties who have submitted nominations prior to the publication of the Notice, will be sent nomination forms for completion at the time of publication of the Notice.

4. Qualifications

In evaluating nominations for the SAG, the Board will seek individuals with an interest in the quality of the audits of public companies. The Board may also consider certain factors in determining SAG appointments including but not limited to the following—

a. SAG members will be individuals of integrity, with an understanding of the responsibilities for and the nature of financial disclosure required under the securities laws and the obligations of accountants with respect to the preparation of and issuance of audit reports with respect to such disclosures; and

b. SAG members will have a working knowledge of one or more of the following subjects and a general understanding of the remaining subjects—

- generally accepted auditing standards (as developed by previous auditing standards setting bodies and adopted by the Board as Standards and, in the future, as set from time to time by the Board);
- generally accepted accounting principles;
- the creation, audit or analysis of public financial statements;
- public company corporate governance; and
- other fields that the Board deems to be relevant.

[7] The Board also anticipates appointing individuals from academia and state accounting regulators, among others, to the SAG.

5. Term

Unless the appointment is revoked for cause, as determined by the Board, or unless the SAG member voluntarily resigns from the SAG, membership on the SAG will be for a term of two years; provided, however, that approximately 50 percent of the initial members will be appointed for a three-year term to assure continuity. Members will not be limited in the number of terms that they may serve.

6. Conditions of Membership

Rule 3700(d) specifically states that members of the SAG will serve in their individual capacities and therefore may not delegate their duties, including attendance at meetings, as SAG members. In addition, each appointee to the SAG shall agree in writing to the following "conditions of membership" in order to avoid potential conflicts of interest and to assure that the Board's standards-setting agenda is met—

a. to serve on a voluntary basis without compensation from the Board;[8]

b. to seek constructive resolutions to issues raised by the Board for the SAG;

c. to act in the public interest in his or her individual capacity and not as a representative of any constituency;

d. to attend at least 75 percent of all SAG meetings;[9]

e. to agree to spend, at an expected minimum, between 50 and 100 hours per year on SAG matters or such reasonably greater amount of time as may be necessary to achieve the goals of the SAG and the Board;[10]

f. to refrain from using his or her position on the SAG to influence Board members or Board staff on matters directly affecting that SAG member or his or her employer, business partners or clients;[11]

g. to recuse himself or herself, or otherwise withdraw from, consideration of any matter before the SAG or the Board directly affecting such SAG member, his or her employer, business partners or clients. If recusal or withdrawal is not practical in either such member's or the Board's opinion, such SAG member shall resign from the SAG;[12]

---

[8] SAG members shall be entitled to reimbursement for documented reasonable travel expenses relating to participation in official SAG meetings or other SAG activities.

[9] Attendance may be in person or by telephone or teleconference. SAG members who fail to participate in the minimum number of meetings shall be subject to removal by the Board unless excused from attendance by the Chair of the SAG for good reason.

[10] During the first year of the SAG, members may expect to spend more than the minimum number of hours on SAG matters.

[11] SAG members are not precluded from appearing or practicing before the Board regarding matters generally affecting all issuers or registered public accounting firms, including, indirectly, the member, his or her employer, business partners or clients. Accordingly, a SAG member who is employed by a registered public accounting firm would be permitted to be involved in preparing a comment on a Board rule proposal that generally affects all issuers or registered public accounting firms.

[12] Matters generally affecting issuers or registered public accounting firms, even though affecting the SAG member, his or her employer, business partners or clients, shall not require the member to

(continued)

h. to be bound by EC3, EC8(a), EC9, and, with respect to any private publication or public statement regarding the Board or the SAG or any of the activities of the Board or the SAG, EC10 of the Board's Ethics code;[13]

i. to annually certify his or her continuing compliance with "the conditions of membership;" and

j. to agree to any such other provisions that the Board may deem necessary to avoid even the appearance of a conflict of interest.

7. Meetings and Board Relations

The Board has determined that the first Chair of the SAG will be the Board's Chief Auditor and Director of Professional Standards who will be a non-voting member of the SAG. The Board will approve the agenda for all annual, semi-annual or quarterly SAG meetings as set forth below. Agenda items may also be added where the Board determines that the assistance of the SAG is required in response to emerging issues or problems. The Chair will be responsible for preparing the meeting agenda, organizing and overseeing meetings, conference calls and related activities, acting as the general liaison to the Board and finalizing all submissions to the Board based on the SAG recommendations.

The SAG will hold an annual meeting to discuss the agenda presented to the SAG on the annual standards-setting process and related matters. The SAG will also hold a semi-annual meeting. Both the annual and the semi-annual meetings will be open to the public. Meetings of the SAG may also be held, at the direction of the Board or the Chair, during the intervening quarters. In addition, at the direction of the Chair, monthly meetings of the SAG may be held, by video or teleconference, for the Board's staff to report on new issues raised by the Board for the SAG's consideration and to discuss the status of pending issues. Final decisions on recommendations to the Board and related activities will be conducted at the annual, semi-annual, or other open meeting of the SAG.[14] The meetings held in the quarters between the annual and semi-annual meeting, if any, and the monthly meetings will not generally be open to the public.

If so directed by the Chair of the SAG, the SAG may convene hearings, roundtable discussions or other fact-finding activities designed to assist the SAG in the development of recommendations on new or amended Standards or other recommendations to the Board.

Decisions on whether a recommendation should be made to the Board will be by a majority of the SAG members present in person or by video or teleconference. Recommendations from the SAG will be presented to the Board at an

---

(footnote continued)

recuse or withdraw him or herself from consideration of the matter or to resign from SAG. The Board expects that most standards-setting projects will affect issuers (or categories of issuers) and registered public accounting firms and their associated persons in a generally similar manner; however, if a standard would have a unique or disproportionate effect on a particular issuer or firm, a SAG member employed by that issuer or firm would be required under Rule 3700 to recuse himself or herself.

[13] In PCAOB Release No. 2003-008 (June 30, 2003), the Board clarified that for purposes of applying EC8(a) to SAG members, the SAG members shall not be considered to lack independence or objectivity with regard to SAG matters merely because they (or their employer, business partners or clients) are subject to the direct or indirect oversight of the Board.

[14] The Board expects the SAG to make decisions in an efficient and speedy manner. To this end, the SAG need not defer decisions on recommendations for the annual or semi-annual open meetings. Rather, at the direction of the Chair, the SAG may make decisions on recommendations at any meeting, so long as it is open to the public in some manner, including, at the direction of the Chair, telephonically.

open meeting of the Board. Such recommendations will be provided in writing, including dissenting opinions, if any, by SAG members. The Board retains the exclusive authority to adopt, modify, or reject any SAG recommendation, in its sole discretion, in order to protect investors by improving the fairness and reliability of corporate disclosures as set forth in the Act.

* * * * * *

On the 30th day of June, in the year 2003, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.
/s/ J. Gordon Seymour
J. Gordon Seymour
Acting Secretary
June 30, 2003

APPENDICES—

1. Rules Relating to Auditing and Related Professional Practice Standards and Advisory Groups
2. Section-by-Section Analysis of Rules Relating to Auditing and Related Professional Practice Standards and Advisory Groups

Appendix 1

Rules Relating to Auditing and Related Professional Practice Standards and Advisory Groups

RULES OF THE BOARD

SECTION 1. GENERAL PROVISIONS

Rule 1001. Definitions of Terms Employed in Rules.

When used in the Rules, unless the context otherwise requires:

(a)(viii) Auditing and Related Professional Practice Standards.

The term "auditing and related professional practice standards" means the auditing standards, related attestation standards, quality control standards, ethical standards, and independence standards (including any rules implementing Title II of the Act), and any other professional standards, that are established or adopted by the Board under Section 103 of the Act.

SECTION 7. PROFESSIONAL STANDARDS

Part 1—General Requirements

Rule 3100. Compliance With Auditing and Related Professional Practice Standards.

A registered public accounting firm and its associated persons shall comply with all applicable auditing and related professional practice standards.

Part 7—Establishment of Professional Standards

Rule 3700. Advisory Groups.

a. Formation.

To assist it in carrying out its responsibility to establish auditing and related professional practice standards, the Board will convene one or more advisory groups, in accordance with Section 103(a)(4) of the Act.

b. Composition.

Advisory groups, in combination or as sub-groups designated by the Board within one advisory group, will contain individuals with expertise in one or more of the following areas—

1. accounting;
2. auditing;
3. corporate finance;
4. corporate governance;
5. investing in public companies; and
6. other areas that the Board deems to be relevant to one or more auditing or related professional practice standards.

c. Selection of Members of Advisory Groups.

Members of advisory groups will be selected by the Board, in its sole discretion, based upon nominations, including self-nominations, received from any person or organization.

Note: The Board will announce, from time to time, periods during which it will receive nominations to an advisory group. During those periods, nominations may be submitted by any person or organization, including, but not limited to, any investor, any accounting firm, any issuer, and any institution of higher learning.

d. Personal Membership.

Membership in an advisory group will be personal to the individuals selected to serve on the advisory group. A member's functions and responsibilities, including attendance at meetings, may not be delegated to others.

e. Ethical Duties of Advisory Group Members.

Members of an advisory group shall comply with EC3, EC8(a), EC9, and, with respect to any private publication or public statement about the Board or any advisory group or any of the activities of the Board or any advisory group, EC10 of the Board's Ethics Code.

f. Ad Hoc Task Forces.

The Board may, in its discretion, establish ad hoc task forces. The membership of such task forces may include, but is not limited to, advisory group members. To the extent not otherwise required, members of ad hoc task forces shall comply with paragraph (e) of this Rule.

Appendix 2

Section-by-Section Analysis of Rules Relating to Auditing and Related Professional Practice Standards and Advisory Groups

Rules Relating to Auditing and Related Professional Practice Standards

The Rules relating to auditing and related professional practice standards consist of Rule 3100, plus a new definition that appears in Rule 1001. Each of the Rules, and the new definition, is discussed below.

Rule 1001—Definitions of Terms Employed in Rules.

Rule 1001 contains definitions of terms used in the Board's Rules.

Auditing and related professional practice standards

Rule 1001(a)(viii) defines "auditing and related professional practice standards" as the auditing standards, related attestation standards, quality control standards, ethical standards, and independence standards (including any rules implementing Title II of the Act), and any other professional standards, that are established or adopted by the Board under Section 103 of the Act.

The Board had proposed to use "professional auditing standards" as the term defined in this provision. Several commenters expressed concern that characterizing attestation, quality control, ethical, and independence standards as "professional auditing standards" would confuse people as to the defined term's meaning. To address these concerns, the Board has chosen to use the term "auditing and related professional practice standards" as the defined term for the standards established or adopted by the Board under Section 103 of the Act. The Board has used the longer term "auditing and related professional practice standards," rather than the shorter "professional standards," because the term "professional standards" is defined otherwise in Section 2(a)(10) of the Act. The term "auditing and related professional practice standards" is similar to that portion of the definition of the term "professional standards" that appears in Section 2(a)(10)(B) of the Act. (Hereinafter in this Section-by- Section Analysis, auditing and related professional practice standards shall be referred to as "Standards.")

In addition, the Board's proposed definition was based on a portion of the definition of "professional standards" in Section 2(a)(10)(B) of the Act. For purposes of clarity, the Board has modified this definition slightly to track more closely the description of the standards the Board will set in Section 103(a)(1) of the Act. The definition still includes any other type of standard provided for in the definition of "professional standards" in Section 2(a)(10)(B) of the Act that the Board establishes or adopts under Section 103 of the Act. Accordingly, the definition, as revised, covers the same scope of standards as the Board's proposed rule.

Rule 3100—Auditing and Related Professional Practice Standards Applicable to Registered Public Accounting Firms.

Rule 3100 provides that a registered public accounting firm and its associated persons must comply with all applicable Standards.[1] This Rule is intended to codify the obligation of registered public accounting firms and their associated persons to comply with applicable Standards and to ensure that the Board's Standards are enforceable.

A number of commenters suggested that this Rule was either beyond the Board's authority or would create the impression that the Rule applied to areas outside the Board's authority. To address these concerns, commenters suggested adding language about the scope of the Board's authority to Rule 3100. After considering these comments, the Board has decided to adopt the Rule as proposed.

The Board recognizes its responsibility to oversee the audits of issuers, as that term is defined in the Act, and does not intend to suggest that registered public accounting firms and their associated persons must comply with the Board's Standards in auditing non-issuers. Rule 3100, however, requires registered public accounting firms and their associated persons to comply with all *applicable* Standards. Accordingly, if the Board's Standards do not apply to an engagement or other activity of the firm, Rule 3100, by its own terms, does not apply to that engagement or activity.[2]

Finally, one commenter suggested that Rule 3100 also require registered public accounting firms and their associated person to be duly licensed, registered or permitted or otherwise to hold valid practice privileges and be in good standing under the laws of each applicable state. Registration with the Board does not supersede state registration or licensing requirements and the Board expects registered public accounting firms and their associated persons to comply with state and other applicable legal requirements. Rule 3100, however, is merely intended to codify the obligation of registered public accounting firms and their associated persons to comply with Board Standards and to ensure that the Board's Standards are enforceable. Accordingly, the Board has decided not to amend the Rule as proposed to reflect this suggestion.

---

[1] The Board's proposed rule included a note to clarify that proposed Rule 3100 was intended to apply to those public accounting firms that will be required to register with the Board immediately after the applicable date in order to continue to participate in the audits of issuers after such date. For U.S. public accounting firms the applicable date is October 22, 2003. Because of the approaching registration deadline, and because the Board's Interim Auditing Standards, as approved by the SEC, currently require these public accounting firms to comply with them, the Board has deleted the note as unnecessary.

[2] For example, the Board's Interim Auditing Standards provide that, "[i]n connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement of Auditing Standards No. 95, as in existence on April 16, 2003 (Codification of Statements on Auditing Standards, AU § 150 (AICPA 2002))." See Rule 3200T. The term "audit report" is defined in the Act and the Board's Rules to mean the audit of an issuer. See Rule 1001(a)(vi), adopted by the Board in PCAOB Release. No. 2003-007. Moreover, the Board notes that it would not be a correct description of its authority to say, as one commenter suggested Rule 3100 provide, that "A registered public accounting firm and its associated persons shall comply with all applicable professional auditing standards *in performing an audit of an issuer.*" Particularly with respect to the quality control standards the Board is authorized to establish, the Board may adopt standards that, while related to registered public accounting firms' audit practices, must be complied with other than in the course of performing an audit. Cf. Section 103(a)(2)(B) of the Act (requiring the Board to include, among the "quality control standards that it adopts with respect to the issuance of audit reports, requirements... relating to...hiring, professional development, and advancement of personnel").

Rules Relating to Advisory Groups

Rule 3700—Advisory Groups.

Rule 3700 addresses certain basic matters concerning the formation and use of advisory groups in the Board's standards-setting process.[3] The Rule provides that the Board will convene one or more advisory groups, as contemplated in Section 103(a)(4) of the Act. Any advisory group will consist of individuals with expertise in certain, specified areas relevant to the Board's standards-setting responsibilities. Members of an advisory group will be selected by the Board. In addition, the Rule provides for the Board to establish ad hoc task forces.[4] While such task forces may include advisory group members, a task force may consist totally or partially of non-advisory group members who are persons with specialized experience in the standard-setting project under study. To the extent persons who serve on such task forces are not advisory group members or professional staff of the Board, they must comply with the ethics provisions applicable to advisory group members under Rule 3700(e).

The Rule further provides that membership on an advisory group will be personal to the individuals selected and that the functions of an advisory group member, including attendance at meetings, may not be delegated to others. This provision is based on a comparable provision in the Financial Accounting Standards Board's Rules governing the members of the Financial Accounting Standards Advisory Council.

Finally, Rule 3700 provides that members of a Board advisory group must comply with certain provisions in the Board's Ethics Code. Specifically, the Rule makes advisory group members subject to EC3, EC8(a) and EC9, and, to the extent applicable, EC10. These provisions of the Board's Ethics Code address, respectively, general ethical principles applicable to service for the Board, disqualification in the case of conflicts of interest, the non-disclosure of non-public information, and speaking for the Board when not authorized to do so by the Board.[5]

Commenters suggested that it might be appropriate to establish more than one advisory group since expertise is likely to be required in more than one specialized area. The Board is aware that it may need advice in one or more specialized area. However, the Board has determined to form only one standing advisory group (the "SAG"). This group, however, may, at the Board's direction, form specialized subgroups as needed. In addition, the Board may form ad hoc task forces to work with Board staff in formulating Standards in specialized areas which may then, in the Board's discretion, be added to the SAG's agenda for discussion at SAG meetings.

In addition, Commenters recommended adding other specific groups from which nominations could be received to the groups identified in Rule 3700(c) as proposed. After careful consideration of these comments, the Board has determined that Rule 3700(c) should reflect the Board's intention to accept nominations from all sources. Accordingly, Rule 3700(c) has been revised to state that the Board will accept nominations from any person or organization, including self-nominations. A note to this part of Rule 3700 provides that the Board will

---

[3] The Rule does not address the use of an advisory group for matters other than standards-setting.

[4] Such task forces may be formed without regard to the procedures for the formation, composition, and selection of advisory group members under Rule 3700(a)–(c).

[5] See PCAOB Release No. 2003-008 (June 30, 2003) for the text of the Ethics Code adopted by the Board.

announce, from time to time, periods during which it will receive nominations for an advisory group.

With respect to qualifications of the advisory group members, one commenter suggested that all members have qualifications similar to those "requirements set forth for audit committee members in recently issued stock exchange and SEC" rules or proposed rules. The New York Stock Exchange ("NYSE") proposed listing requirements require that all members of audit committees of listed companies be financially literate. In addition, at least one member of the audit committee must meet the definition of an "audit committee financial expert."[6] The NASDAQ Stock Market ("NASDAQ") proposed rules regarding qualifications for service on audit committees require that all audit committee members must be able to read and understand financial statements including a company's balance sheet, income statement, and cash flow statement and that the audit committee have at least one member who meets the definition of an "audit committee financial expert."[7] After considering this comment, the Board has decided to adopt the Rule as proposed by the Board. While Rule 3700 does not specifically state the qualifications each member must have, the Rule does set forth the types of expertise that the Board will look for in advisory group members. In addition, as noted in Section C.4. of this Release, the Board may also consider certain specific qualifications in selecting nominees to the SAG. The Board believes that it will likely select members who, at a minimum, would meet the general qualifications set forth for "all" audit committee members in the proposed Rules of the NYSE and NASDAQ while providing the Board with the flexibility to select members from a broad spectrum of backgrounds to assist it in meeting the requirements of the Act. SAG members will be selected based upon qualifications which will be elicited from them on a nomination form and through the evaluative process.

Furthermore, commenters suggested that the composition of the SAG be flexible because the Board may find that it is unable to attract a sufficient number of qualified members from fields such as finance and investment. In response to this concern, it should be noted that, the Board expects that the SAG will be broadly representative and that no one field of expertise will predominate among the SAG membership. Other concerns regarding composition related to assuring that the SAG have a sufficient number of members with technical expertise including requiring a majority of members to be practicing auditors. Although the Board certainly intends that the SAG have practicing auditors among its members, the Board believes that it is important that the SAG be able to provide advice in a broad range of areas, including technical auditing expertise, and that technical expertise in particular areas may be obtained by forming ad hoc task forces, as needed and as appropriate for particular standards-setting projects. Other commenters recommended that—

a. the four largest auditing firms be represented on the SAG;

b. non-U.S. auditors be represented;

c. the number of members associated with a single firm, company or association be limited;

d. membership be dispersed among those affiliated with firms, companies and associations of various sizes;

e. there be a balance between financial information suppliers (representatives of public companies and auditors) and financial information users (equity and debt investors).

---

[6] See SEC Release No. 34-47672; File No. SR-NYSE-2002-33 (April 11, 2003).

[7] See SEC Release No. 34-47516; File No. SR-NASD-2002-141 (March 17, 2003).

As noted above, the Board recognizes the need to have diversity on the SAG and in selecting members will keep diversity in mind while assuring that no one expertise will predominate among the SAG membership.

With respect to the actual functions of the SAG, one commenter, suggested that the SAG be involved in all standards-setting proposals while another commenter recommended that the actual drafting of the Standards fall within the SAG's authority. In order to maintain flexibility in the rulemaking process, the Board has determined not to revise the proposed Rule to reflect these comments. Although the SAG is likely to be involved in the Board's standards-setting process as discussed in the Release, the Board does not intend to make SAG involvement mandatory to every standards-setting project. In addition, the actual drafting of the Standards is likely to be done by the Board's staff assisted by ad hoc task forces where necessary.

Another comment related to recommending that the SAG work toward "harmonizing" international standards. Neither Rule 3100 nor 3700 is intended to address substantive standards-setting issues. Rather the Board intends to address such issues, including cooperation with standards-setters in other jurisdictions, in the future.

Commenters also made recommendations regarding SAG procedural matters. These commenters suggested that the Board address—

a. the process for making recommendations on Standards for consideration by the Board;

b. whether or not SAG meetings would be open to the public;

c. the format and the frequency of the meetings;

d. the process by which the Board will set the SAG's agenda;

e. the appointment of a Chair for the SAG;

f. whether the Board will provide all resources for drafting, editing, monitoring comments and publishing new and amended Standards;

g. the term of appointment to the SAG; and

h. an avenue for minority viewpoints to be expressed in any report or recommendation to the Board.

With the exception of the comment on resources for drafting and publishing new Standards, the Board has addressed all of these comments in Section B.7. of the Release. In summary, the SAG will hold an annual meeting and a semi-annual meeting. Additional meetings may be held in the intervening quarters. Monthly telephonic meetings are also expected to be held at the discretion of the Chair. The annual and semi-annual meetings, and any meeting at which the SAG makes a final decision on a recommendation to the Board, will be open to the public. Agenda items for the SAG will be driven in part by the schedule to be set by the Board for the review of the Interim Auditing Standards. Other agenda items will be added by the Board where the Board determines that a response to emerging issues or problems connected with audits needs to be addressed. The Board has determined that the first Chair of the SAG will be the Board's Chief Auditor and Director of Professional Standards. All SAG members will be appointed for two-year terms except that approximately one-half of the appointees initially appointed to the SAG will be appointed for a three-year term to assure continuity. There will be no limits on the terms that a member of the SAG may serve. The Board anticipates that drafting, editing, monitoring comments and publishing, will be conducted by the Board and its staff. To the extent that the SAG is specifically authorized by the Board to undertake any

of these functions and the expenses have been preapproved by the Board or a staff member delegated by the Board, the Board will cover the SAG's costs.

In response to the issue of whether the SAG's meetings will be open to the public and in order to assure that the public is informed of the SAG's operations, the Board has determined that the annual and semi-annual meetings of the SAG will be open. In addition, decisions on making recommendations to the Board will only be made at an open meeting of the SAG. All recommendations to the Board by the SAG will be presented to the Board in open public meetings of the Board and such presentations will include the presentation of minority views of the SAG members. Finally, it should be noted that Board standards-setting proposals will be subject to the public comment process before being adopted by the Board.

With respect to Rule 3700(e) relating to the ethical duties of the SAG members, one commenter recommended that the SAG members be subject to Section EC14, the certification requirements, of the Ethics Code. In response to this comment, the Board has added to its "conditions of membership" described in Section C of the Release, a requirement that members of the SAG shall annually certify their continuing compliance with the "conditions of membership." A second commenter recommended that both Rule 3700(e) and EC8(a) of the Ethics Code be clarified to confirm that being a practicing auditor does not, in and of itself, constitute a financial interest requiring recusal. Section EC8(a) of the Ethics Code has been revised to add an explanatory note that clarifies this issue.[8] A third commenter recommended that members of the SAG be prohibited from "unauthorized" speaking for the Board. In response to this comment, the Board has revised Rule 3700(e) to make EC10 of the Board's Ethics Code applicable to any private publication or public statement by an advisory group member with regard to the Board or the advisory group or any of the activities of the Board or the advisory group. Finally, a fourth commenter recommended that a member of the SAG be permitted to share SAG material with support personnel within the member's home organization who are assigned to assist the member in his or her duties. The Board has not added a provision to address this concern. The Board believes that SAG members will normally be able to perform their responsibilities without needing access to non-public Board information. To the extent that it may be appropriate, from time to time, to permit non-public standards-setting information to be shared with individuals outside the SAG, including to permit SAG members to consult technical experts who are not employees or staff of the Board, the Board may require that such individuals agree to the confidentiality provisions under Section EC9 of the Ethics Code.

PCAOB Release No. 2003-025

Auditing Standard No. 1, References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board

PCAOB Release No. 2003-025
December 17, 2003
PCAOB Rulemaking
Docket Matter No. 010

Approved by the Securities and Exchange Commission on May 14, 2004, and is effective for audit reports issued or reissued on or after May 24, 2004.

Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") has adopted Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*. This standard requires registered public accounting firms to include in their reports on engagements performed pursuant to the Board's auditing and related professional practice standards, including audits and reviews of financial statements, a reference to the standards of the Public Company Accounting Oversight Board (United States). The Board will submit this standard to the Securities and Exchange Commission ("Commission" or "SEC") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This standard will not take effect unless approved by the Commission.

* * * * * *

Section 103 of the Act authorizes the PCAOB to establish auditing and related professional practice standards to be used by registered public accounting firms in connection with the preparation and issuance of audit reports as required by the Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors. Consistent with Section 103 of the Act, PCAOB Rule 3100, *Compliance With Auditing and Related Professional Practice Standards*, requires auditors to comply with all applicable auditing and related professional practice standards established by the PCAOB.

Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* directs auditors[1] to state that

[1] Reference in the Board's standards to an "auditor" means a registered public accounting firm, or an associated person of such a firm, as defined in the Act and the Board's rules, unless specifically stated otherwise. Nothing in the Board's rules would preclude an accounting firm from conducting an audit of a company that is not an issuer in accordance with the Board's standards and so stating in its audit report. This is true regardless of whether or not the accounting firm performing the audit is registered with the Board.

the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)" whenever the auditor has performed the engagement in accordance with the Board's standards.

Section A of this release describes Auditing Standard No. 1. Section B of this release discusses and addresses the comments received on the Board's proposed auditing standard, which the Board released for public comment. The text of Auditing Standard No. 1 is attached to this release as Appendix 1.

A. Description of Auditing Standard No. 1

At the time of this release, the Board's auditing and related professional practice standards consist of the standards described in Rules 3200T through 3600T, which the Board has adopted, on an initial, transitional basis, as interim standards. The standards (with which PCAOB Rule 3100 requires registered public accounting firms, and persons associated with such firms, to comply) include these interim standards and any permanent standards that the Board adopts.

Each of the standards described in Rules 3200T through 3600T was originally adopted by the American Institute of Certified Public Accountants ("AICPA"), a committee thereof, including the Auditing Standards Board ("ASB"), or the Independence Standards Board. Thus the Board's rule on interim auditing standards, Rule 3200T, incorporates "generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, in existence on April 16, 2003" (the "interim standards").[2] These auditing standards were adopted, and from time to time amended, by the ASB, until the Board incorporated them into the Board's interim standards. The interim standards require auditors to include in their reports a reference to the standards that were followed in performing the engagement. These references include "generally accepted auditing standards," "U.S. generally accepted auditing standards," "auditing standards generally accepted in the United States of America," and "standards established by the AICPA."

PCAOB Auditing Standard No. 1 supersedes these references by requiring that auditors' reports on the financial statements of issuers that are issued or reissued, after Auditing Standard No. 1 becomes effective, include a statement that the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."[3] This auditing standard is effective for auditors' reports issued or reissued on or after the 10th day following approval of this auditing standard by the Commission. An appendix[4] to this standard provides illustrative reports on an audit of financial statements and a review[5] of interim financial information of a public company.

Once Auditing Standard No. 1 becomes effective, it will require auditors to state that the engagement was performed in accordance with "the standards of the Public Company Accounting Oversight Board (United States)," irrespective of whether the engagement was conducted before or after Auditing Standard No.

---

[2] The Board's rules on interim standards were adopted by the Board on April 16, 2003, and approved by the Commission on April 25, 2003. See SEC Rel. No. 33-8222 (April 25, 2003).

[3] See Auditing Standard No. 1 ¶ 3.

[4] Appendices to the Board's standards are an integral part of the standard and carry the same authoritative weight as the body of the standard.

[5] Reviews of the interim financial information are integrally related to audits of financial statements. See generally Statement on Auditing Standards No. 100, *Interim Financial Information* ("SAS No. 100"). For example, SAS No. 100 makes clear that the general standards on auditing discussed in SAS No. 95 "are applicable to a review of interim financial information."

1 becomes effective. Accordingly, auditors who reissue reports that were originally issued before the date that Auditing Standard No. 1 becomes effective, or who issue reports that include comparative financial information that was the subject of an audit or review report that was issued before that date, must nevertheless state that the audit or review was performed in accordance with "the standards of the Public Company Accounting Oversight Board (United States)," if those reports are reissued after Auditing Standard No. 1 becomes effective. The Board believes that a uniform reference to the standards of the PCAOB—even with respect to audits and reviews completed before the PCAOB adopted its interim standards—is appropriate because the interim standards that the Board adopted are the "generally accepted auditing standards" with which auditors were required to comply before the PCAOB adopted its interim standards.

Referring to PCAOB standards in connection with a period that preceded the date of the PCAOB's own adoption of those standards may seem somewhat counterintuitive. The requirement is intended, however, to reflect the fact that the standards in place before the PCAOB adopted its interim standards, without change, became the PCAOB's standards. Indeed, the Board considered whether to require auditors to refer to "generally accepted auditing standards" when reissuing reports that were originally issued before Auditing Standard No. 1 becomes effective, and to refer to "standards of the PCAOB" with respect to reports issued on or after Auditing Standard No. 1 becomes effective.

The Board believes, however, that it is appropriate to describe the "generally accepted auditing standards" that the Board adopted as "standards of the PCAOB." This terminology will reflect the fact that the standards that auditors were required to use before April 25, 2003—i.e., generally accepted auditing standards as they existed on April 16, 2003—became the applicable standards on April 25 and continue to apply to audits of public companies, as the Board amends them. Auditing standards have continuously been amended over time, and auditors have consistently been required to state whether their audits complied with the then-prevailing standards. The substance of the applicable standards for audits and reviews of public company financial statements did not change on April 25, 2003. Rather, April 25, 2003, is significant only because the PCAOB gained authority over such standards on that date. The Board believes it would be inappropriate to create an impression in auditors' reports that engagements performed before Auditing Standard No. 1 becomes effective, or even before April 25, were performed in accordance with a wholly different body of standards, rather than the same body of standards at different points in its evolution.

The Board expects to amend its standards from time to time, just as the ASB amended generally accepted auditing standards from time to time. The Board believes that using a consistent description of standards prevailing at the time an audit or review report is issued—and holding auditors to compliance with those then-prevailing standards—better contributes to the creation of informative audit reports.

Upon adoption of this auditing standard, all references in the interim standards to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, and standards established by the AICPA, mean the corresponding standards of the Public Company Accounting Oversight Board. The Act and the Board's rules already require the auditor to comply with the Board's standards. The purpose of this standard is to conform the references in the interim standards to the standards that the Act and Rule 3100 require auditors to use in

connection with preparing and issuing audit and related reports on the financial statements of issuers.

Under the Act, Auditing Standard No. 1 will not be effective unless it is approved by the SEC. By its terms, Auditing Standard No. 1 will be effective for auditors' reports issued or reissued on or after the 10th day following SEC approval of this standard. Until the effective date of this standard, the reporting requirements as described in the AICPA's Codification of Statements on Auditing Standards, are still in effect as interim standards.

B. Public Comment Process and Board Responses

The Board released a proposed auditing standard, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*, for public comment, on November 12, 2003. The Board received eight written comment letters.[6] In response to these comments, the Board's final rules both clarify and modify certain aspects of the proposal, as explained below.

1. Transitional Issues

The Board received several comments related to transitional issues, including, how the proposed standard would affect—

- reissuance of a report originally issued before the proposed standard became effective;
- issuance of a report on comparative financial statements when the audits of the financial statements for periods presented for comparative purposes were conducted before the proposed standard became effective and/or before the Board adopted its interim standards; and
- issuance of a dual-dated report that include dates that straddle the effective date of this standard.

In the proposed standard, the Board had recommended the standard be effective for auditors' reports dated on or after the later of January 1, 2004 or the 10th day after SEC approval of the standard as adopted by the Board. In evaluating the comments with regard to transition, the Board decided to modify the effective date of this standard. Rather than linking the effective date of this standard to the date of the report, this auditing standard will be effective for reports issued or reissued on or after the 10th day following SEC approval of this auditing standard. After this standard becomes effective, any auditor's report issued or reissued with respect to the financial statements of a public company must state that the engagement was performed in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."

One commenter also expressed concern that the proposed standard's requirement that a report state that an audit performed prior to the PCAOB's adoption of interim standards was performed in accordance with PCAOB standards would, in essence, require the auditor to re-audit the prior period's financial statements in order to bring that audit or review into conformity with current PCAOB standards. The Board does not intend to require auditors to bring audits that were performed in accordance with then-prevailing standards into

[6] The comment letters are available on the Board's Web site—www.pcaobus.org—and will be attached to the Board's Form 19b-4, to be filed with the Commission.

conformity with later-prevailing standards in order to reissue a previously-issued report. When the Board adopted as interim standards the generally accepted auditing standards established by the ASB, the Board also adopted the effective dates of those standards. Therefore, reference in auditors' reports to the standards of the PCAOB with respect to financial statements audited or reviewed prior to the effective date of Auditing Standard No. 1 is equivalent to the previously-required reference to generally accepted auditing standards. The reference relates to those standards that were in effect when the audit or review was completed and should not be interpreted to imply a representation that the audit or review complied with standards that became effective after the audit or review was completed. Thus, once Auditing Standard No. 1 becomes effective, a reference to generally accepted auditing standards in reports issued in connection with financial statements of public companies is no longer appropriate or necessary.

2. Applicable Standards of the PCAOB

Several commenters recommended that the Board only require auditors' reports to refer to the *auditing* standards of the PCAOB for audits of financial statements and not to the standards of the PCAOB generally. The Board intends for report references to "the standards of the Public Company Accounting Oversight Board (United States)" to mean those auditing and related professional practice standards that are applicable to the particular engagement. For example, if an issuer does not use any outside service organization that would affect its internal control over financial reporting, then the interim auditing standard on service organizations—described in the Codification of Statements on Auditing Standards at AU § 324 (*Service Organizations*), would not be applicable. On the other hand, the Board's independence standards apply to registered public accounting firms, and associated persons thereof, in connection with the preparation and issuance of audit reports for issuers.

As another example, quality control standards generally apply to a firm's system of quality control over its accounting and auditing practice and not to individual audit engagements. Thus, a breakdown in the system of quality control does not necessarily mean that a particular audit was not conducted in accordance with the standards of the PCAOB. However, such a breakdown might result in a deficient audit if it caused or contributed to an audit deficiency. The determination as to whether a particular auditing or related professional practice standard is applicable in the context of a particular audit is dependent on the nature of the standard in question and on the nature of the engagement at issue.

Thus a reference to "auditing standards" of the PCAOB would be too narrow and preclusive to other standards applicable to the audit. The Board believes that reference to "the standards of the Public Company Accounting Oversight Board (United States)" is a more descriptive reference to the standards applied in the audit.

3. Reference to GAAS

The Board received a number of comments recommending that auditors' reports, with respect to financial statement audits, describe PCAOB standards as generally accepted auditing standards. The notion of general acceptance developed at a time when auditing and accounting standards were not established with the force of law by governmental or other authoritative bodies, but

rather were established by consensus among the members of the accounting profession.

As far as auditing and related professional practice standards are concerned, the Board gained authority to establish such standards by the enactment of the Act. Professional consensus is no longer sufficient to establish auditing standards, and therefore the Board believes that it is no longer appropriate to refer to the standards with which an auditor of the financial statements of a public company must comply as "generally accepted." While those standards may be generally accepted in a variety of contexts, what gives them the force of law in the context of public company audits is adoption by the PCAOB and approval by the SEC.

Therefore, for purposes of any engagement performed in accordance with the applicable auditing and related professional practice standards of the PCAOB, references in the interim standards to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, and standards established by the AICPA, mean the standards of the PCAOB.

4. References to Country of Origin and Issuing Office

The Board also received comments recommending that the Board continue to require auditors to state in their reports that the standards according to which they performed their engagements were those standards applicable in the United States. Adopting this recommendation will make it easier for readers of audit reports that are used in cross-border offerings and listings of securities to quickly identify the jurisdiction in which the standards were promulgated. As such, the Board has required in Auditing Standard No. 1 that auditors' reports describe the PCAOB's standards as "the standards of the Public Company Accounting Oversight Board (United States)."

Another commenter recommended that auditors identify in their reports the city and state (or country) of the registered firms issuing the reports. The SEC's rules require disclosure in the auditor's report of the city and state of the accounting firm's office issuing the report.[7] The Board also concurs with this recommendation and, accordingly, has modified the auditing standard and the illustrative reports in the appendix to Auditing Standard No. 1.

5. Other Auditors

The Board was asked to clarify the applicability of this standard, and the Board's standards generally, to circumstances where more than one auditing firm contributes to an audit of a consolidated entity. For example, a firm other than the firm engaged to report on the company's consolidated financial statements may be hired to audit the financial statements of a subsidiary company. In such circumstances, the auditor that conducts the majority of the audit is referred to as the principal auditor and the auditor of the subsidiary company is referred to as the other auditor.[8] Depending on the significance of the portion of the financial statements audited by the other auditor, the principal auditor may divide responsibility with the other auditor by making reference to the audit of the other auditor in his or her report, or the principal auditor may take

[7] 17 C.F.R. § 210.2-02 (2003).

[8] See Codification of Auditing Standards, AU § 543 (AICPA 2002).

responsibility for the work of the other auditor by not making any reference to the other auditor.

In either event, the entire audit must be performed in accordance with the Board's standards. Section 103 of the Act, and the Board's Rule 3100, require registered public accounting firms, and associated persons thereof, to comply with all applicable auditing and related professional practice standards in connection with the preparation and issuance of audit reports on the financial statements of issuers. Whether the other auditor is a registered public accounting firm or an associated person of a registered public accounting firm, the other auditor must comply with the standards of the PCAOB.

6. Applicability to Non-U.S. Firms Not Yet Registered With the Board

Another commenter asked the Board to clarify whether non-U.S. public accounting firms—who are not required to register with the PCAOB until 2004—will be permitted, until registered with the PCAOB, to continue to reference "auditing standards generally accepted in the United States of America" when reporting on an issuer's financial statements. Like the Board's interim standards, with which a public accounting firm is required to comply even before the firm's mandatory registration date, during the period preceding the mandatory registration date, standards of the PCAOB apply to firms engaged in work that requires their registration. Therefore, non-U.S. public accounting firms that have not yet registered, that engage in work that would require them to be registered as of the mandatory registration date, are nevertheless required to reference "the standards of the Public Company Accounting Oversight Board (United States)."

7. Application of Auditing Standard No. 1 to Audit Reports in Connection With Initial Public Offerings

Another commenter recommended that the Board expand the proposed standard to specifically address the various scenarios that auditors will encounter with respect to reporting in conjunction with initial public offerings. The SEC's Rule 3-01 of Regulation S-X requires that, like other SEC filings that must comply with Regulation S-X, a registration statement filed in connection with an initial public offering must include or otherwise incorporate "for the registrant and its subsidiaries consolidated, audited balance sheets as of the end of each of the two most recent fiscal years."[9] In addition, Rule 3-02 of Regulation S-X requires that there "be filed, for the registrant and its subsidiaries consolidated and for its predecessors, audited statements of income and cash flows for each of the three fiscal years preceding the date of the most recent audited balance sheet."[10] The Board understands these provisions to mean that an issuer desiring to register a transaction involving the sale of securities must include balance sheets for the two years preceding the transaction, and income statements and statements of cash flows for the three years preceding the transaction, each audited in accordance with standards as required by the securities laws.

In Section 103 of the Act, Congress has provided the Board authority to establish auditing and related professional practice standards "to be used by registered public accounting firms in the preparation and issuance of audit reports."

---

[9] 17 C.F.R. § 210.3-01 (2003).

[10] 17 C.F.R. § 210.3-02 (2003).

In addition, the PCAOB has adopted, and the SEC has approved, PCAOB Rule 3100, which requires registered public accounting firms to comply with all applicable auditing and related professional practice standards of the PCAOB in connection with the preparation and issuance of audit reports on the financial statements of issuers. Accordingly, audit reports on the financial statements of issuers must now comply with—and under Auditing Standard No. 1 auditors must state that they performed the audit in accordance with—the standards of the PCAOB. So long as audits that were performed prior to April 25, 2003, were performed in accordance with then-prevailing generally accepted auditing standards as required by Rule 2-02 of Regulation S-X, an auditor need not reaudit any financial statements that relate to periods preceding April 25, 2003. Further, as discussed above, because the Board adopted the "generally accepted auditing standards" in effect as of April 16, 2003, the Board believes it is appropriate to require auditors who issue or reissue reports on periods prior to the date Auditing Standard No. 1 becomes effective to state that their audits were performed in accordance with PCAOB standards, so long as they were performed in accordance with the "generally accepted auditing standards" prevailing at the time the audits were performed.

* * * * * *

On the 17th day of December, in the year 2003, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

APPENDIX—

References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board

Appendix

References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board

1. The Sarbanes-Oxley Act of 2002 authorized the Public Company Accounting Oversight Board ("PCAOB") to establish auditing and related professional practice standards to be used by registered public accounting firms. PCAOB Rule 3100, *Compliance With Auditing and Related Professional Practice Standards*, requires the auditor to comply with all applicable auditing and related professional practice standards of the PCAOB.

2. The Board has adopted as interim standards, on an initial, transitional basis, the generally accepted auditing standards, described in the American Institute of Certified Public Accountants' ("AICPA") Auditing Standards Board's Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, in existence on April 16, 2003.[1]

3. Accordingly, in connection with any engagement performed in accordance with the auditing and related professional practice standards of the PCAOB, whenever the auditor is required by the interim standards to make reference in a report to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, or standards established by the AICPA, the auditor must instead refer to "the standards of the Public Company Accounting Oversight Board (United States)." An auditor must also include the city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued.

4. This auditing standard is effective for auditors' reports issued or reissued on or after the 10th day following approval of this auditing standard by the Securities and Exchange Commission.

5. Audit reports issued prior to the effective date of this standard were required to state that the audits that supported those reports were performed in accordance with generally accepted auditing standards. The PCAOB adopted those generally accepted auditing standards, including their respective effective dates, as they existed on April 16, 2003, as interim standards. Therefore, reference to "the standards of the Public Company Accounting Oversight Board (United States)" with respect to audits of financial statements performed prior to the effective date of this standard is equivalent to the previously-required reference to generally accepted auditing standards. Accordingly, upon adoption of this standard, a reference to generally accepted auditing standards in auditors' reports is no longer appropriate or necessary.

> Note: The term "auditor" in this standard is intended to include both registered public accounting firms and associated persons thereof.

---

[1] The Board's rules on interim standards were adopted by the Board on April 16, 2003, and approved by the Commission on April 25, 2003. See SEC Rel. No. 33-8222 (April 25, 2003).

Appendix—Illustrative Reports

1. The following is an illustrative report on an audit of financial statements:

Report of Independent Registered Public Accounting Firm

We have audited the accompanying balance sheets of X Company as of December 31, 20X3 and 20X2, and the related statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 20X3. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of [*at*] December 31, 20X3 and 20X2, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X3, in conformity with U.S. generally accepted accounting principles.

[City and State or Country]

[*Date*]

2. The following is an illustrative report on a review of interim financial information:

Report of Independent Registered Public Accounting Firm

We have reviewed the accompanying [*describe the interim financial information or statements reviewed*] of X Company as of September 30, 20X3 and 20X2, and for the three-month and nine-month periods then ended. This (these) interim financial information (statements) is (are) the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial (statements) for it (them) to be in conformity with U.S. generally accepted accounting principles.

PCAOB Release No. 2003-026

Technical Amendments to Interim Standards Rules

PCAOB Release No. 2003-026
December 17, 2003
PCAOB Rulemaking
Docket Matter No. 011

Summary:

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") has adopted certain technical amendments to its rules to reflect that the Board will be superseding, or effectively amending, the existing professional standards referred to in the Board's interim standards rules as the Board continues to set auditing and related professional practice standards.

The Board will submit these amendments to the Securities and Exchange Commission ("Commission") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). The Board's amendments will not take effect unless approved by the Commission.

Board Contacts

Thomas Ray, Deputy Chief Auditor (202/207-9112; rayt@pcaobus.org), Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org).

* * *

A. Amendments to the Board's Rules Relating to Interim Standards

On April 16, 2003, the Board adopted on an initial, transitional basis five temporary rules that refer to existing professional standards of auditing, attestation, quality control, ethics, and independence.[1] The amendments approved by the Board reflect that, when the Board adopts a new auditing and related professional practice standard that addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standards will be superseded or effectively amended. Accordingly, the Board has approved to add the phrase "to the extent not superseded or amended by the Board" to each of the interim standards rules (PCAOB Rules 3200T, 3300T, 3400T, 3500T, and 3600T). In addition, the Board is making technical amendments to Rule 3600T, revising the numbering of the paragraphs from "(1)" and "(2)" to "(*a*)" and "(*b*)". The text of these amendments is presented in the Appendix.

[1] These rules were adopted by the Board on April 16, 2003, and approved by the Securities and Exchange Commission on April 25, 2003. See SEC Rel. No. 33- 8222 (April 25, 2003).

B. Public Comment Process and Board Responses

The Board proposed technical amendments to its interim standards rules and released them for public comment, on November 12, 2003. The Board received six written comment letters.[2] Most of the commenters explicitly indicated support for the technical amendments to the interim standards rules, and none indicated opposition to the technical amendments. In addition, many commenters requested that the Board identify how proposed, as well as final, standards affect the existing interim standards. While it may not always be practicable to identify exactly which portions of existing standards have been superseded or amended by new Board standards, the Board recognizes the need to provide auditors with as much guidance and clarity as possible. As future standards are adopted or amended, the Board intends to identify, to the greatest extent possible, those interim standards that are amended or superseded by standards issued by the Board.

Appendix

Amendments to Rules Relating to Interim Professional Auditing Standards

The Board has amended Section 3 of its rules by inserting the phrase "to the extent not superseded or amended by the Board" in Rules 3200T, 3300T, 3400T, 3500T, and 3600T, and by revising the numbering of the paragraphs in Rule 3600T from "(1)" and "(2)" to "(*a*)" and "(*b*)". The relevant portions of the Rules, as amended, are set out below. Language added by these amendments is shown in bold italics. Deleted paragraph numbers are struck through. Other text in Section 3, including notes to the Rules, remains unchanged and is indicated below by " * * * ".

RULES OF THE BOARD

* * *

SECTION 3. PROFESSIONAL STANDARDS

Part 1 — General Requirements

* * *

Rule 3200T. Interim Auditing Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement of Auditing Standards No. 95, as in existence on April 16, 2003 (Codification of Statements on Auditing Standards, AU § 150 (AICPA 2002)), ***to the extent not superseded or amended by the Board***.

* * *

Rule 3300T. Interim Attestation Standards.

In connection with an engagement (i) described in the AICPA's Auditing Standards Board's Statement on Standards for Attestation Engagements No. 10 (Codification of Statements on Auditing Standards, AT § 101.01 (AICPA 2002)) and (ii) related to the preparation or issuance of audit reports for issuers, a registered public accounting firm, and its associated persons, shall comply with the AICPA Auditing Standards Board's Statements on Standards for Attestation Engagements, and related interpretations and Statements of Position, as in existence on April 16, 2003, ***to the extent not superseded or amended by the Board***.

* * *

Rule 3400T. Interim Quality Control Standards.

A registered public accounting firm, and its associated persons, shall comply with quality control standards, as described in—

(*a*) the AICPA's Auditing Standards Board's Statements on Quality Control Standards, as in existence on April 16, 2003 (AICPA Professional Standards, QC §§ 20–40 (AICPA 2002)), ***to the extent not superseded or amended by the Board***; and

(*b*) the AICPA SEC Practice Section's Requirements of Membership (d), (f)(first sentence), (l), (m), (n)(1) and (o), as in existence on April 16, 2003 (AICPA SEC Practice Section Manual § 1000.08(d), (f), (l), (m), (n)(1) and (o))***, to the extent not superseded or amended by the Board***.

* * *

Rule 3500T. Interim Ethics Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with ethics standards, as described in the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 102 and 191 (AICPA 2002))***, to the extent not superseded or amended by the Board***.

* * *

Rule 3600T. Interim Independence Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with independence standards—

(~~1~~*a*) as described in the AICPA's Code of Professional Conduct Rule 101, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 101 and 191 (AICPA 2002)), ***to the extent not superseded or amended by the Board***; and

(~~2~~*b*) Standards Nos. 1, 2, and 3, and Interpretations 99-1, 00-1, and 00-2, of the Independence Standards Board ***to the extent not superseded or amended by the Board***.

PCAOB Release No. 2004-006

Auditing Standard No. 3, Audit Documentation

PCAOB Release No. 2004-006
June 9, 2003
PCAOB Rulemaking
Docket Matter No. 012

Summary

After public comment, the Public Company Accounting Oversight Board (the "PCAOB" or "Board") has adopted Auditing Standard No. 3, *Audit Documentation*, and an amendment to AU sec. 543 of the Interim Auditing Standards. The Board will submit this standard and amendment to the Securities and Exchange Commission ("SEC" or "Commission") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This standard will not take effect unless approved by the Commission.

Board Contacts

* * * * * *

Section 103(a)(2)(A)(i) of the Act expressly directs the Board to establish auditing standards that require registered public accounting firms to prepare and maintain, for at least seven years, audit documentation "in sufficient detail to support the conclusions reached" in the auditor's report. Audit documentation is one of only a few topics that the Act expressly requires the Board to adopt standards. Accordingly, the Board made audit documentation a priority in its standards setting responsibilities.

The Board commenced a standards-development project on audit documentation by convening a public roundtable discussion on September 29, 2003, to discuss issues and hear views on audit documentation. Before that roundtable discussion, the Board prepared and released a briefing paper on audit documentation, which posed several questions to help identify the objectives—and the appropriate scope and form—of audit documentation.[1] In addition, the Board asked participants to address specific practice issues relating to, among other things, changes in audit documentation after an audit report has been released; the essential elements and the appropriate amount of detail of audit documentation; the effect on audit documentation of a principal auditor's decision to use the work of other auditors; and retention of audit documentation.

Taking into consideration comments from participants in this roundtable discussion, advice from the Board's staff, and other input, the Board determined

[1] See Briefing Paper for the Roundtable on Audit Documentation, dated September 10, 2003. The transcript of the September 29, 2003 roundtable discussion and copies of the briefing paper are available on the Board's Web site (www.pcaobus.org).

that the existing interim auditing standard on audit documentation was not sufficient in providing direction to ensure that auditors appropriately document both the work they perform and the conclusions they reach in connection with audits and other engagements. On November 21, 2003, the Board issued a proposed auditing standard entitled *Audit Documentation*, as well as a related amendment to an interim auditing standard (paragraph .12 of AU sec. 543, *Part of Audit Performed by Other Independent Auditors*).

The Board received 38 comment letters from a variety of interested parties, including auditors, regulators, professional associations, and government agencies. Those comments led to some changes in the requirements of the standard.

The Board's standard on audit documentation will be one of the fundamental building blocks on which both the integrity of audits and the Board's oversight will rest. The integrity of an audit depends, in large part, on the existence of a complete and understandable record of the work that the auditor performed, the evidence gathered, and the conclusions reached. Meaningful review by managers and partners, or by the Board in the context of its inspections, would be difficult, if not impossible, without adequate documentation. Clear and comprehensive audit documentation is essential for auditors to enhance the quality of the audit and for the Board to fulfill its mandate to inspect registered public accounting firms "to assess the degree of compliance" of those firms with applicable standards and laws.

Appendices 1 and 2 to this release contain, respectively, the text of Auditing Standard No. 3, *Audit Documentation*, and the amendment to AU sec. 543. Appendix A to Auditing Standard No. 3 includes the Board's analysis of the comments received and the Board's responses.

A. Introduction

Auditors document the evidence supporting the conclusions reached in their reports with a work product commonly referred to as *audit documentation* or *working papers*. Sufficient audit documentation is an integral part of a quality audit. That is, the auditor documents not only the nature, timing, and extent of the work performed, but also the professional judgments made by members of the engagement team and others.

In addition to providing the basis for the conclusions in the auditor's report, audit documentation facilitates the planning, performance, and supervision of the engagement and provides the basis for the review of the quality of the work by providing the reviewer with written documentation of the evidence supporting the auditor's significant conclusions.

First and foremost, the objectives of this audit documentation standard are to improve audit quality and to enhance public confidence in the quality of auditing and other engagements. Complete and thorough audit documentation improves the quality of the work performed in many ways. One important example is that quality audit documentation is a record of the actual work performed, which provides assurance that the auditor accomplished the planned objectives. Further, the need to document the procedures performed, the evidence obtained, and the conclusions reached demands a disciplined approach to planning and performing the engagement. Also, audit documentation facilitates the reviews performed by supervisors, managers, partners, and PCAOB inspectors.

Inadequate audit documentation diminishes audit quality on many levels. First, if audit documentation does not exist for a particular procedure or conclusion related to a significant matter, its absence casts doubt as to whether the necessary work was done. If the work was not documented, then it becomes difficult for members of the engagement team, and others, to know what was done, what conclusions were reached, and how those conclusions were reached.

The more significant differences between existing requirements under the interim auditing standards and this new standard on audit documentation, along with the related amendment, are described in the following sections.

B. Auditors Must Document Their Work

As previously mentioned, the principal objective of this standard is to improve the quality of audits and other engagements. In so doing, this standard affirmatively requires that auditors document procedures performed, evidence obtained, and conclusions reached. Likewise, a deficiency in documentation is a departure from the Board's standard. The Board emphasizes that, in the event of a deficiency in documentation, the auditor must be prepared to present persuasive other evidence that the procedures were performed, evidence was obtained, and appropriate conclusions were reached.

If it is questionable whether audit procedures were performed or evidence was obtained, the auditor must determine, and if so demonstrate, that the necessary procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. There may be circumstances (for example, a Board inspection) in which the auditor may be required to demonstrate with persuasive other evidence that the procedures were actually performed, the evidence was actually obtained, and appropriate conclusions were actually reached. In this and similar contexts, oral explanation alone does not constitute persuasive other evidence. However, oral evidence may be used to clarify other written evidence.

The failure to prepare adequate documentation is serious. The severity of that failure depends on the factors that determine the nature and extent of the documentation for a particular audit area or auditing procedure. For example, when the risk of material misstatement associated with an assertion is high, the failure to document the procedures, evidence, and conclusions related to that assertion is a very serious violation of PCAOB Standards. Failure to provide adequate documentation could limit an auditor's ability to demonstrate that the work was actually performed.

C. An Experienced Auditor Must Understand the Work

Audits and reviews of issuers' financial statements are now, under the Act, subject to review by PCAOB inspectors. Therefore, the Board determined that a documentation standard that enables a PCAOB inspector to understand the work that was performed is essential. Similar to the U.S. General Accounting Office's documentation standard for government and other audits conducted in accordance with generally accepted government auditing standards,[2] this standard requires audit documentation to contain sufficient information to enable an experienced auditor, having no previous connection with the engagement,

[2] U.S. General Accounting Office, *Government Auditing Standards*, "Field Work Standards for Financial Audits" (2003 Revision), paragraph 4.22.

to understand the work that was performed, the name of the person(s) who performed it, the date it was completed, and the conclusions reached.

This standard also defines an *experienced auditor* as one who has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry.

D. Two Significant Dates Defined in This Standard

To ensure quality and consistency in the preparation and retention of audit documentation, the standard defines two important dates: (1) the report release date and (2) the documentation completion date. The *report release date* is the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. After the report release date, auditors will have 45 days to assemble a complete and final set of audit documentation. The end of this 45-day period is the *documentation completion date*.

Prior to the report release date, the auditor must have—

- Completed all necessary auditing procedures, including clearing review notes and providing support for all final conclusions, and
- Obtained sufficient evidence to support the representations in the auditor's report.

If the auditor obtains and documents evidence after the report release date, the auditor should refer to the interim auditing standards, AU sec. 390, *Consideration of Omitted Procedures After the Report Date* and AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* for related guidance. Auditors should not discard any previously existing documentation in connection with obtaining and documenting evidence after the report release date.

If procedures are performed subsequent to the report release date, auditors must identify and document any additions to audit documentation as a result of those procedures. This documentation must include the nature of the change, the date of the change, the name of the person who prepared the change, and the reason for the change. Furthermore, audit documentation must not be deleted or discarded after the documentation completion date.

E. Subsequent Changes to Audit Documentation

This standard requires that changes to audit documentation after the documentation completion date be documented without deleting or discarding the original documents. Such documentation must indicate the date the information was added, who added it, and the reason for adding it. The SEC has articulated its position on working papers, as well as the importance of documenting any subsequent changes to the working papers.

> Working papers prepared or collected by auditors in the course of an audit provide the single most important support for their representation regarding compliance with generally accepted auditing standards. They serve as the repository for the competent evidential matter necessary to afford the auditors with a reasonable basis for opining on an issuer's financial position. Transactions or events occurring long after the balance sheet date often require reference to prior working papers, and such working papers may have significant usefulness in future audits. It is therefore imperative that auditors preserve their working papers in a complete and unaltered form.

> Auditors should be encouraged to devise orderly procedures for the proper control over the contents of working papers. Moreover, the Commission recognizes that the necessity for evidential matter to be included in the auditor's working papers varies substantially depending on individual audits. When any alterations or additions are made to the working papers subsequent to the issuance of the auditor's report, however, such alterations or additions should themselves be properly documented and indicate the time and circumstances under which they are made.[3]

F. Documentation Deficiencies

Documentation added to the working papers well after completion of the audit or other engagement is likely to be of a lesser quality than that produced contemporaneously when the procedures were performed. It is very difficult to reconstruct and recall specific activities related to gathering audit evidence months, and perhaps years, after the work was actually performed. The turnover of both firm and company staff can cause difficulty in reconstructing conversations, meetings, data, or other evidence. Also, with the passage of time memories fade. "Research has shown that minutes, hours or days after an experience, memory preserves a relatively detailed record, allowing us to reproduce the past with reasonable if not perfect accuracy. But with the passing of time, the particulars fade and opportunities multiply for interference—generated by later, similar experiences—to blur our recollections."[4]

The Board believes that audit evidence should be documented at the time the procedures are performed and that oral explanation should not be the primary source of evidence. Furthermore, any oral explanation should not contradict the documented evidence, and appropriate consideration should be given to the credibility of the individual providing the oral explanation.

G. Multi-Location Audits

In this standard, the Board reminds auditors that the office of the accounting firm issuing the auditor's report is responsible for ensuring that all audit documentation sufficient to meet the requirements of this standard is prepared and retained. Audit documentation supporting the work performed by other auditors (including auditors associated with other offices of the firm, affiliated firms, or non-affiliated firms), must be retained by or be accessible to the office issuing the auditor's report. The Board believes this requirement will improve audit quality by enhancing the probability that *all* audit documentation will be prepared consistently with the same standards of audit quality.

In addition, the office issuing the auditor's report must obtain and review, prior to the report release date, certain documentation—outlined in this standard—related to the work performed by other auditors. Thus, the firm issuing an audit report on consolidated financial statements of a multinational company may not release that report without the specific documentation described in this standard.

[4] Dr. Daniel Schacter, "The Seven Sins of Memory: How the Mind Forgets and Remembers," *Psychology Today* (May 2001).

H. Part of Audit Performed by Others

In reporting on a company's consolidated financial statements, an auditor may use the work of other auditors who have audited one or more affiliates or divisions of the company. When more than one auditor is involved in an audit engagement, one of the firms typically serves as the principal auditor. The principal auditor then must decide whether to make reference in the auditor's report to the audit performed by the other auditor.

If the principal auditor decides to assume responsibility for the work of other auditors, then the principal auditor will not make reference to the work of other auditors in the audit report. However, if the principal auditor decides not to assume that responsibility, then the principal auditor should indicate clearly the division of responsibility between the principal auditor and other auditors in expressing an opinion on the consolidated financial statements. Existing guidance in AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, applies when using the work of other auditors. However, this existing guidance does not establish any specific documentation requirements.

In connection with PCAOB Auditing Standard No. 3, *Audit Documentation*, the Board adopted an amendment to paragraph .12 of AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, addressing appropriate audit documentation when a principal auditor decides not to make reference to the work of other auditors. In this amendment, the Board imposes the same unconditional responsibility on the principal auditor, as with multi-location audits, to obtain certain audit documentation from the other auditor prior to the report release date. In addition, the amendment provides that the principal auditor should consider performing one or more of the procedures described in the amendment, such as discussing the audit procedures and related results with the other auditors and reviewing the audit programs of the other auditors.

The Board believes this amendment will enable the principal auditor to gain considerably more assurance about the quality of the other auditor's work without creating an unreasonable burden.

I. Retention of Audit Documentation

This standard requires that an auditor retain audit documentation for seven years after the report release date, which is the minimum period permitted under Section 103(a) of the Act.

As previously discussed, auditors will have 45 days after the report release date to assemble the complete and final set of audit documentation. If an auditor's report is not issued on a completed engagement, as is common in a review of interim financial information of a public company, then the audit documentation is to be retained for seven years from the date that fieldwork was substantially completed.

J. Effective Date

On March 9, 2004, the Board issued PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. Since documentation issues are prevalent in PCAOB Auditing Standard No. 2 and the key objective of this standard is to improve the quality of audits and other engagements, the Board determined that the implementation date of this standard should coincide with that of PCAOB Auditing Standard No. 2. Therefore, this standard will be effective for audits of financial statements with respect to fiscal years ending on or after

the later of November 15, 2004, or 30 days after the date of approval of this standard by the SEC.

The effective date for quarterly reviews and other engagements, conducted pursuant to the standards of the PCAOB, would occur beginning with the first quarter ending after the first financial statement audit covered by this standard.

* * * * * *

On the 9th day of June, in the year 2004, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.
/s/ J. Gordon Seymour
J. Gordon Seymour
Acting Secretary
June 9, 2004

APPENDICES—

1. Auditing Standard No. 3—*Audit Documentation*
2. Amendment to Interim Auditing Standards—*Part of Audit Performed by Other Independent Auditors*

Appendix 1

Auditing Standard No. 3, *Audit Documentation*

[Supersedes SAS No. 96, *Audit Documentation*]

Introduction

1. This standard establishes general requirements for documentation the auditor should prepare and retain in connection with engagements conducted pursuant to the standards of the Public Company Accounting Oversight Board ("PCAOB"). Such engagements include an audit of financial statements, an audit of internal control over financial reporting, and a review of interim financial information. This standard does not replace specific documentation requirements of other standards of the PCAOB.

Objectives of Audit Documentation

2. *Audit documentation* is the written record of the basis for the auditor's conclusions that provides the support for the auditor's representations, whether those representations are contained in the auditor's report or otherwise. Audit documentation also facilitates the planning, performance, and supervision of the engagement, and is the basis for the review of the quality of the work because it provides the reviewer with written documentation of the evidence supporting the auditor's significant conclusions. Among other things, audit documentation includes records of the planning and performance of the work, the procedures performed, evidence obtained, and conclusions reached by the auditor. Audit documentation also may be referred to as *work papers* or *working papers*.

> Note: An auditor's representations to a company's board of directors or audit committee, stockholders, investors, or other interested parties are usually included in the auditor's report accompanying the financial statements of the company. The auditor also might make oral representations to the company or others, either on a voluntary basis or if necessary to comply with professional standards, including in connection with an engagement for which an auditor's report is not issued. For example, although an auditor might not issue a report in connection with an engagement to review interim financial information, he or she ordinarily would make oral representations about the results of the review.

3. Audit documentation is reviewed by members of the engagement team performing the work and might be reviewed by others. Reviewers might include, for example:

a. Auditors who are new to an engagement and review the prior year's documentation to understand the work performed as an aid in planning and performing the current engagement.

b. Supervisory personnel who review documentation prepared by assistants on the engagement.

c. Engagement supervisors and engagement quality reviewers who review documentation to understand how the engagement team reached significant conclusions and whether there is adequate evidential support for those conclusions.

d. A successor auditor who reviews a predecessor auditor's audit documentation.

e. Internal and external inspection teams that review documentation to assess audit quality and compliance with auditing and related professional practice standards; applicable laws, rules, and regulations; and the auditor's own quality control policies.

f. Others, including advisors engaged by the audit committee or representatives of a party to an acquisition.

Audit Documentation Requirement

4. The auditor must prepare audit documentation in connection with each engagement conducted pursuant to the standards of the PCAOB. Audit documentation should be prepared in sufficient detail to provide a clear understanding of its purpose, source, and the conclusions reached. Also, the documentation should be appropriately organized to provide a clear link to the significant findings or issues. [1] Examples of audit documentation include memoranda, confirmations, correspondence, schedules, audit programs, and letters of representation. Audit documentation may be in the form of paper, electronic files, or other media.

5. Because audit documentation is the written record that provides the support for the representations in the auditor's report, it should:

a. Demonstrate that the engagement complied with the standards of the PCAOB,

b. Support the basis for the auditor's conclusions concerning every relevant financial statement assertion, and

c. Demonstrate that the underlying accounting records agreed or reconciled with the financial statements.

6. The auditor must document the procedures performed, evidence obtained, and conclusions reached with respect to relevant financial statement assertions. [2] Audit documentation must clearly demonstrate that the work was in fact performed. This documentation requirement applies to the work of all those who participate in the engagement as well as to the work of specialists the auditor uses as evidential matter in evaluating relevant financial statement assertions. Audit documentation must contain sufficient information to enable an experienced auditor, having no previous connection with the engagement:

a. To understand the nature, timing, extent, and results of the procedures performed, evidence obtained, and conclusions reached, and

b. To determine who performed the work and the date such work was completed as well as the person who reviewed the work and the date of such review.

Note: An *experienced auditor* has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry.

7. In determining the nature and extent of the documentation for a financial statement assertion, the auditor should consider the following factors:

- Nature of the auditing procedure;
- Risk of material misstatement associated with the assertion;

---

[1] See paragraph 12 of this standard for a description of significant findings or issues.

[2] *Relevant financial statement assertions* are described in paragraphs 68-70 of PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With An Audit of Financial Statements*.

- Extent of judgment required in performing the work and evaluating the results, for example, accounting estimates require greater judgment and commensurately more extensive documentation;
- Significance of the evidence obtained to the assertion being tested; and
- Responsibility to document a conclusion not readily determinable from the documentation of the procedures performed or evidence obtained.

Application of these factors determines whether the nature and extent of audit documentation is adequate.

8. In addition to the documentation necessary to support the auditor's final conclusions, audit documentation must include information the auditor has identified relating to significant findings or issues that is inconsistent with or contradicts the auditor's final conclusions. The relevant records to be retained include, but are not limited to, procedures performed in response to the information, and records documenting consultations on, or resolutions of, differences in professional judgment among members of the engagement team or between the engagement team and others consulted.

9. If, after the documentation completion date (defined in paragraph 15), the auditor becomes aware, as a result of a lack of documentation or otherwise, that audit procedures may not have been performed, evidence may not have been obtained, or appropriate conclusions may not have been reached, the auditor must determine, and if so demonstrate, that sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. To accomplish this, the auditor must have persuasive other evidence. Oral explanation alone does not constitute persuasive other evidence, but it may be used to clarify other written evidence.

- If the auditor determines and demonstrates that sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached, but that documentation thereof is not adequate, then the auditor should consider what additional documentation is needed. In preparing additional documentation, the auditor should refer to paragraph 16.
- If the auditor cannot determine or demonstrate that sufficient procedures were performed, sufficient evidence was obtained, or appropriate conclusions were reached, the auditor should comply with the provisions of AU sec. 390, *Consideration of Omitted Procedures After the Report Date*.

Documentation of Specific Matters

10. Documentation of auditing procedures that involve the inspection of documents or confirmation, including tests of details, tests of operating effectiveness of controls, and walkthroughs, should include identification of the items inspected. Documentation of auditing procedures related to the inspection of significant contracts or agreements should include abstracts or copies of the documents.

Note: The identification of the items inspected may be satisfied by indicating the source from which the items were selected and the specific selection criteria, for example:

- If an audit sample is selected from a population of documents, the documentation should include identifying characteristics (for example, the specific check numbers of the items included in the sample).
- If all items over a specific dollar amount are selected from a population of documents, the documentation need describe only the scope and the identification of the population (for example, all checks over $10,000 from the October disbursements journal).
- If a systematic sample is selected from a population of documents, the documentation need only provide an identification of the source of the documents and an indication of the starting point and the sampling interval (for example, a systematic sample of sales invoices was selected from the sales journal for the period from October 1 to December 31, starting with invoice number 452 and selecting every 40th invoice).

11. Certain matters, such as auditor independence, staff training and proficiency and client acceptance and retention, may be documented in a central repository for the public accounting firm ("firm") or in the particular office participating in the engagement. If such matters are documented in a central repository, the audit documentation of the engagement should include a reference to the central repository. Documentation of matters specific to a particular engagement should be included in the audit documentation of the pertinent engagement.

12. The auditor must document significant findings or issues, actions taken to address them (including additional evidence obtained), and the basis for the conclusions reached in connection with each engagement. *Significant findings or issues* are substantive matters that are important to the procedures performed, evidence obtained, or conclusions reached, and include, but are not limited to, the following:

a. Significant matters involving the selection, application, and consistency of accounting principles, including related disclosures. Significant matters include, but are not limited to, accounting for complex or unusual transactions, accounting estimates, and uncertainties as well as related management assumptions.

b. Results of auditing procedures that indicate a need for significant modification of planned auditing procedures, the existence of material misstatements, omissions in the financial statements, the existence of significant deficiencies, or material weaknesses in internal control over financial reporting.

c. Audit adjustments. For purposes of this standard, an *audit adjustment* is a correction of a misstatement of the financial statements that was or should have been proposed by the auditor, whether or not recorded by management, that could, either individually or when aggregated with other misstatements, have a material effect on the company's financial statements.

d. Disagreements among members of the engagement team or with others consulted on the engagement about final conclusions reached on significant accounting or auditing matters.

e. Circumstances that cause significant difficulty in applying auditing procedures.

f. Significant changes in the assessed level of audit risk for particular audit areas and the auditor's response to those changes.

g. Any matters that could result in modification of the auditor's report.

13. The auditor must identify all significant findings or issues in an *engagement completion document*. This document may include either all information necessary to understand the significant findings, issues or cross-references, as appropriate, to other available supporting audit documentation. This document, along with any documents cross-referenced, should collectively be as specific as necessary in the circumstances for a reviewer to gain a thorough understanding of the significant findings or issues.

Note: The engagement completion document prepared in connection with the annual audit should include documentation of significant findings or issues identified during the review of interim financial information.

Retention of and Subsequent Changes to Audit Documentation

14. The auditor must retain audit documentation for seven years from the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements (*report release date*), unless a longer period of time is required by law. If a report is not issued in connection with an engagement, then the audit documentation must be retained for seven years from the date that fieldwork was substantially completed. If the auditor was unable to complete the engagement, then the audit documentation must be retained for seven years from the date the engagement ceased.

15. Prior to the report release date, the auditor must have completed all necessary auditing procedures and obtained sufficient evidence to support the representations in the auditor's report. A complete and final set of audit documentation should be assembled for retention as of a date not more than 45 days after the report release date (*documentation completion date*). If a report is not issued in connection with an engagement, then the documentation completion date should not be more than 45 days from the date that fieldwork was substantially completed. If the auditor was unable to complete the engagement, then the documentation completion date should not be more than 45 days from the date the engagement ceased.

16. Circumstances may require additions to audit documentation after the report release date. Audit documentation must not be deleted or discarded after the documentation completion date, however, information may be added. Any documentation added must indicate the date the information was added, the name of the person who prepared the additional documentation, and the reason for adding it.

17. Other standards require the auditor to perform procedures subsequent to the report release date in certain circumstances. For example, in accordance with AU sec. 711, *Filings Under Federal Securities Statutes*, auditors are required to perform certain procedures up to the effective date of a registration statement. [3] The auditor must identify and document any additions to audit documentation as a result of these procedures consistent with the previous paragraph.

---

[3] Section 11 of the Securities Act of 1933 makes specific mention of the auditor's responsibility as an expert when the auditor's report is included in a registration statement under the 1933 Act.

18. The office of the firm issuing the auditor's report is responsible for ensuring that all audit documentation sufficient to meet the requirements of paragraphs 4–13 of this Standard is prepared and retained. Audit documentation supporting the work performed by other auditors (including auditors associated with other offices of the firm, affiliated firms, or non-affiliated firms), must be retained by or be accessible to the office issuing the auditor's report. [4]

19. In addition, the office issuing the auditor's report must obtain, and review and retain, prior to the report release date, the following documentation related to the work performed by other auditors (including auditors associated with other offices of the firm, affiliated firms, or non-affiliated firms):

a. An engagement completion document consistent with paragraphs 12 and 13.
Note: This engagement completion document should include all cross-referenced, supporting audit documentation.

b. A list of significant fraud risk factors, the auditor's response, and the results of the auditor's related procedures.

c. Sufficient information relating to any significant findings or issues that are inconsistent with or contradict the final conclusions, as described in paragraph 8.

d. Any findings affecting the consolidating or combining of accounts in the consolidated financial statements.

e. Sufficient information to enable the office issuing the auditor's report to agree or to reconcile the financial statement amounts audited by the other auditor to the information underlying the consolidated financial statements.

f. A schedule of audit adjustments, including a description of the nature and cause of each misstatement.

g. All significant deficiencies and material weaknesses in internal control over financial reporting, including a clear distinction between those two categories.

h. Letters of representations from management.

i. All matters to be communicated to the audit committee.

If the auditor decides to make reference in his or her report to the audit of the other auditor, however, the auditor issuing the report need not perform the procedures in this paragraph and, instead, should refer to AU sec. 543, *Part of Audit Performed by Other Independent Auditors*.

20. The auditor also might be required to maintain documentation in addition to that required by this standard. [5]

---

[4] Section 106(b) of the Sarbanes-Oxley Act of 2002 imposes certain requirements concerning production of the work papers of a foreign public accounting firm on whose opinion or services the auditor relies. Compliance with this standard does not substitute for compliance with Section 106(b) or any other applicable law.

[5] For example, the SEC requires auditors to retain, in addition to documentation required by this standard, memoranda, correspondence, communications (for example, electronic mail), other documents, and records (in the form of paper, electronic, or other media) that are created, sent, or received in connection with an engagement conducted in accordance with auditing and related professional practice standards and that contain conclusions, opinions, analyses, or data related to the engagement. (*Retention of Audit and Review Records*, 17 CFR §210.2-06, effective for audits or reviews completed on or after October 31, 2003.)

Effective Date

21. This standard is effective for audits of financial statements, which may include an audit of internal control over financial reporting, with respect to fiscal years ending on or after November 15, 2004. For other engagements conducted pursuant to the standards of the PCAOB, including reviews of interim financial information, this standard takes effect beginning with the first quarter ending after the first financial statement audit covered by this standard.

Appendix A

Background and Basis for Conclusions

Introduction

A1. This appendix summarizes considerations that the Public Company Accounting Oversight Board ("PCAOB" or "Board") deemed significant in developing this standard. This Appendix includes reasons for accepting certain views and rejecting others.

A2. Section 103(a)(2)(A)(i) of the Sarbanes-Oxley Act of 2002 (the "Act") directs the Board to establish auditing standards that require registered public accounting firms to prepare and maintain, for at least seven years, audit documentation "in sufficient detail to support the conclusions reached" in the auditor's report. Accordingly, the Board has made audit documentation a priority.

Background

A3. Auditors support the conclusions in their reports with a work product called *audit documentation*, also referred to as *working papers* or *work papers*. Audit documentation supports the basis for the conclusions in the auditor's report. Audit documentation also facilitates the planning, performance, and supervision of the engagement and provides the basis for the review of the quality of the work by providing the reviewer with written documentation of the evidence supporting the auditor's significant conclusions. Examples of audit documentation include memoranda, confirmations, correspondence, schedules, audit programs, and letters of representation. Audit documentation may be in the form of paper, electronic files, or other media.

A4. The Board's standard on audit documentation is one of the fundamental building blocks on which both the integrity of audits and the Board's oversight will rest. The Board believes that the quality and integrity of an audit depends, in large part, on the existence of a complete and understandable record of the work the auditor performed, the conclusions the auditor reached, and the evidence the auditor obtained that supports those conclusions. Meaningful reviews, whether by the Board in the context of its inspections or through other reviews, such as internal quality control reviews, would be difficult or impossible without adequate documentation. Clear and comprehensive audit documentation is essential to enhance the quality of the audit and, at the same time, to allow the Board to fulfill its mandate to inspect registered public accounting firms to assess the degree of compliance of those firms with applicable standards and laws.

A5. The Board began a standards-development project on audit documentation by convening a public roundtable discussion on September 29, 2003, to discuss issues and hear views on the subject. Participants at the roundtable included representatives from public companies, public accounting firms, investor groups, and regulatory organizations.

A6. Prior to this roundtable discussion, the Board prepared and released a briefing paper on audit documentation that posed several questions to help identify the objectives—and the appropriate scope and form—of audit documentation. In addition, the Board asked participants to address specific issues in practice relating to, among other things, changes in audit documentation after release of the audit report, essential elements and the appropriate amount of detail of audit documentation, the effect on audit documentation of a principal auditor's

decision to use the work of other auditors, and retention of audit documentation. Based on comments made at the roundtable, advice from the Board's staff, and other input the Board received, the Board determined that the pre-existing standard on audit documentation, Statement on Auditing Standards ("SAS") No. 96, *Audit Documentation*, was insufficient for the Board to discharge appropriately its standard-setting obligations under Section 103(a) of the Act. In response, the Board developed and issued for comment, on November 17, 2003, a proposed auditing standard titled, *Audit Documentation*.

A7. The Board received 38 comment letters from a variety of interested parties, including auditors, regulators, professional associations, government agencies, and others. Those comments led to some changes in the requirements of the standard. Also, other changes made the requirements easier to understand. The following sections summarize significant views expressed in those comment letters and the Board's responses to those comments.

Objective of This Standard

A8. The objective of this standard is to improve audit quality and enhance public confidence in the quality of auditing. Good audit documentation improves the quality of the work performed in many ways, including, for example:

- Providing a record of actual work performed, which provides assurance that the auditor accomplishes the planned objectives.
- Facilitating the reviews performed by supervisors, managers, engagement partners, engagement quality reviewers,[1] and PCAOB inspectors.
- Improving effectiveness and efficiency by reducing time-consuming, and sometimes inaccurate, oral explanations of what was done (or not done).

A9. The documentation requirements in this standard should result in more effective and efficient oversight of registered public accounting firms and associated persons, thereby improving audit quality and enhancing investor confidence.

A10. Inadequate audit documentation diminishes audit quality on many levels. First, if audit documentation does not exist for a particular procedure or conclusion related to a significant matter, it casts doubt as to whether the necessary work was done. If the work was not documented, then it becomes difficult for the engagement team, and others, to know what was done, what conclusions were reached, and how those conclusions were reached. In addition, good audit documentation is very important in an environment in which engagement staff changes or rotates. Due to engagement staff turnover, knowledgeable staff on an engagement may not be available for the next engagement.

Audit Programs

A11. Several commenters suggested that audit documentation should include audit programs. Audit programs were specifically mentioned in SAS No. 96 as a form of audit documentation.

---

[1] The engagement quality reviewer is referred to as the concurring partner reviewer in the membership requirements of the AICPA SEC Practice Section. The Board adopted certain of these membership requirements as they existed on April 16, 2003. Some firms also may refer to this designated reviewer as the second partner reviewer.

A12. The Board accepted this recommendation, and paragraph 4 in the final Standard includes audit programs as an example of documentation. Audit programs may provide evidence of audit planning as well as limited evidence of the execution of audit procedures, but the Board believes that signed-off audit programs should generally not be used as the sole documentation that a procedure was performed, evidence was obtained, or a conclusion was reached. An audit program aids in the conduct and supervision of an engagement, but completed and initialed audit program steps should be supported with proper documentation in the working papers.

Reviewability Standard

A13. The proposed standard would have adapted a standard of reviewability from the U.S. General Accounting Office's ("GAO") documentation standard for government and other audits conducted in accordance with generally accepted government auditing standards ("GAGAS"). The GAO standard provides that "Audit documentation related to planning, conducting, and reporting on the audit should contain sufficient information to enable an experienced auditor who has had no previous connection with the audit to ascertain from the audit documentation the evidence that supports the auditors' significant judgments and conclusions."[2] This requirement has been important in the field of government auditing because government audits have long been reviewed by GAO auditors who, although experienced in auditing, do not participate in the actual audits. Moreover, the Panel on Audit Effectiveness recommended that sufficient, specific requirements for audit documentation be established to enable public accounting firms' internal inspection teams as well as others, including reviewers outside of the firms, to assess the quality of engagement performance.[3] Audits and reviews of issuers' financial statements will now, under the Act, be subject to review by PCAOB inspectors. Therefore, a documentation standard that enables an inspector to understand the work that was performed in an audit or review is appropriate.

A14. Accordingly, the Board's proposed standard would have required that audit documentation contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the work that was performed, the name of the person(s) who performed it, the date it was completed, and the conclusions reached. This experienced auditor also should have been able to determine who reviewed the work and the date of such review.

A15. Some commenters suggested that the final standard more specifically describe the qualifications of an experienced auditor. These commenters took the position that only an engagement partner with significant years of experience would have the experience necessary to be able to understand all the work that was performed and the conclusions that were reached. One commenter suggested that an auditor who is reviewing audit documentation should have experience and knowledge consistent with the experience and knowledge that the auditor performing the audit would be required to possess, including knowledge of the current accounting, auditing, and financial reporting issues of the company's industry. Another said that the characteristics defining an experienced auditor should be consistent with those expected of the auditor with final responsibility for the engagement.

---

[2] U.S. General Accounting Office, *Government Auditing Standards*, "Field Work Standards for Financial Audits" (2003 Revision), paragraph 4.22.

[3] Panel on Audit Effectiveness, *Report and Recommendations* (Stamford, Ct: Public Oversight Board, August 31, 2000).

A16. After considering these comments, the Board has provided additional specificity about the meaning of the term, *experienced auditor*. The standard now describes an experienced auditor as one who has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry.

A17. Some commenters also suggested that the standard, as proposed, did not allow for the use of professional judgment. These commenters pointed to the omission of a statement about professional judgment found in paragraph 4.23 of GAGAS that states, "The quantity, type, and content of audit documentation are a matter of the auditors' professional judgment." A nearly identical statement was found in the interim auditing standard, SAS No. 96, *Audit Documentation*.

A18. Auditors exercise professional judgment in nearly every aspect of planning, performing, and reporting on an audit. Auditors also exercise professional judgment in the documentation of an audit and other engagements. An objective of this standard is to ensure that auditors give proper consideration to the need to document procedures performed, evidence obtained, and conclusions reached in light of time and cost considerations in completing an engagement.

A19. Nothing in the standard precludes auditors from exercising their professional judgment. Moreover, because professional judgment might relate to any aspect of an audit, the Board does not believe that an explicit reference to professional judgment is necessary every time the use of professional judgment may be appropriate.

Audit Documentation Must Demonstrate That the Work Was Done

A20. A guiding principle of the proposed standard was that auditors must document procedures performed, evidence obtained, and conclusions reached. This principle is not new and was found in the interim standard, SAS No. 96, *Audit Documentation*, which this standard supersedes. Audit documentation also should demonstrate compliance with the standards of the PCAOB and include justification for any departures.

A21. The proposed standard would have adapted a provision in the California Business and Professions Code which provides that if documentation does not exist, then there is a rebuttable presumption that the work had not been done.

A22. The objections to this proposal fell into two general categories: the effect of the rebuttable presumption on legal proceedings and the perceived impracticality of documenting every conversation or conclusion that affected the engagement. Discussion of these issues follows.

Rebuttable Presumption

A23. Commenters expressed concern about the effects of the proposed language on regulatory or legal proceedings outside the context of the PCAOB's oversight. They argued that the rebuttable presumption might be understood to establish evidentiary rules for use in judicial and administrative proceedings in other jurisdictions.

A24. Some commenters also had concerns that oral explanation alone would not constitute persuasive other evidence that work was done, absent any documentation. Those commenters argued that not allowing oral explanations when there was no documentation would essentially make the presumption "irrebuttable." Moreover, those commenters argued that it was inappropriate for a professional standard to predetermine for a court the relative value of evidence.

A25. The Board believes that complete audit documentation is necessary for a quality audit or other engagement. The Board intends the standard to require

auditors to document procedures performed, evidence obtained, and conclusions reached to improve the quality of audits. The Board also intends that a deficiency in documentation is a departure from the Board's standards. Thus, although the Board removed the phrase *rebuttable presumption*, the Board continues to stress, in paragraph 9 of the Standard, that the auditor must have persuasive other evidence that the procedures were performed, evidence was obtained, and appropriate conclusions were reached with respect to relevant financial statement assertions.

A26. The term *should* (presumptively mandatory responsibility) was changed to *must* (unconditional responsibility) in paragraph 6 to establish a higher threshold for the auditor. Auditors have an unconditional requirement to document their work. Failure to discharge an unconditional responsibility is a violation of the standard and Rule 3100, which requires all registered public accounting firms to adhere to the Board's auditing and related professional practice standards in connection with an audit or review of an issuer's financial statements.

A27. The Board also added two new paragraphs to the final standard to explain the importance and associated responsibility of performing the work and adequately documenting all work that was performed. Paragraph 7 provides a list of factors the auditor should consider in determining the nature and extent of documentation. These factors should be considered by both the auditor in preparing the documentation and the reviewer in evaluating the documentation.

A28. In paragraph 9 of this Standard, if, after the documentation completion date, as a result of a lack of documentation or otherwise, it appears that audit procedures may not have been performed, evidence may not have been obtained, or appropriate conclusions may not have been reached, the auditor must determine, and if so demonstrate, that sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. In those circumstances, for example, during an inspection by the Board or during the firm's internal quality control review, the auditor is required to demonstrate with persuasive other evidence that the procedures were performed, the evidence was obtained, and appropriate conclusions were reached. In this and similar contexts, oral explanation alone does not constitute persuasive other evidence. However, oral evidence may be used to clarify other written evidence.

A29. In addition, more reliable, objective evidence may be required depending on the nature of the test and the objective the auditor is trying to achieve. For example, if there is a high risk of a material misstatement with respect to a particular assertion, then the auditor should obtain and document sufficient procedures for the auditor to conclude on the fairness of the assertion.

Impracticality

A30. Some commenters expressed concern that the proposed standard could be construed or interpreted to require the auditor to document every conversation held with company management or among the engagement team members. Some commenters also argued that they should not be required to document every conclusion, including preliminary conclusions that were part of a thought process that may have led them to a different conclusion, on the ground that this would result in needless and costly work performed by the auditor. Commenters also expressed concern that an unqualified requirement to document procedures performed, evidence obtained, and conclusions reached without allowing the use of auditor judgment would increase the volume of documentation

but not the quality. They stated that it would be unnecessary, time-consuming, and potentially counterproductive to require the auditor to make a written record of everything he or she did.

A31. The Board's standard distinguishes between (1) an audit procedure that must be documented and (2) a conversation with company management or among the members of the engagement team. Inquiries with management should be documented when an inquiry is important to a particular procedure. The inquiry could take place during planning, performance, or reporting. The auditor need not document each conversation that occurred.

A32. A final conclusion is an integral part of a working paper, unless the working paper is only for informational purposes, such as documentation of a discussion or a process. This standard does not require that the auditor document each interim conclusion reached in arriving at the risk assessments or final conclusions. Conclusions reached early on during an audit may be based on incomplete information or an incorrect understanding. Nevertheless, auditors should document a final conclusion for every audit procedure performed, if that conclusion is not readily apparent based on documented results of the procedures.

A33. The Board also believes the reference to *specialists* is an important element of paragraph 6. Specialists play a vital role in audit engagements. For example, appraisers, actuaries, and environmental consultants provide valuable data concerning asset values, calculation assumptions, and loss reserves. When using the work of a specialist, the auditor must ensure that the specialist's work, as it relates to the audit objectives, also is adequately documented. For example, if the auditor relies on the work of an appraiser in obtaining the fair value of commercial property available for sale, then the auditor must ensure the appraisal report is adequately documented. Moreover, the term *specialist* in this standard is intended to include any specialist the auditor relies on in conducting the work, including those employed or retained by the auditor or by the company.

Audit Adjustments

A34. Several commenters recommended that the definition of *audit adjustments* in this proposed standard should be consistent with the definition contained in AU sec. 380, *Communication With Audit Committees*.

A35. Although the Board recognizes potential benefits of having a uniform definition of the term *audit adjustments*, the Board does not believe that the definition in AU sec. 380 is appropriate for this documentation standard because that definition was intended for communication with audit committees. The Board believes that the definition should be broader so that the engagement partner, engagement quality reviewer, and others can be aware of all proposed corrections of misstatements, whether or not recorded by the entity, of which the auditor is aware, that were or should have been proposed based on the audit evidence.

A36. Adjustments that should have been proposed based on known audit evidence are material misstatements that the auditor identified but did not propose to management. Examples include situations in which (1) the auditor identifies a material error but does not propose an adjustment and (2) the auditor proposes an adjustment in the working papers, but fails to note the adjustment in the summary or schedule of proposed adjustments.

Information That Is Inconsistent With or Contradicts the Auditor's Final Conclusions

A37. Paragraph .25 of AU sec. 326, *Evidential Matter*, states: "In developing his or her opinion, the auditor should consider relevant evidential matter regardless of whether it appears to corroborate or to contradict the assertions in the financial statements." Thus, during the conduct of an audit, the auditor should consider all relevant evidential matter even though it might contradict or be inconsistent with other conclusions. Audit documentation must contain information or data relating to significant findings or issues that are inconsistent with the auditor's final conclusions on the relevant matter.

A38. Also, information that initially appears to be inconsistent or contradictory, but is found to be incorrect or based on incomplete information, need not be included in the final audit documentation, provided that the apparent inconsistencies or contradictions were satisfactorily resolved by obtaining complete and correct information. In addition, with respect to differences in professional judgment, auditors need not include in audit documentation preliminary views based on incomplete information or data.

Retention of Audit Documentation

A39. The proposed standard would have required an auditor to retain audit documentation for seven years after completion of the engagement, which is the minimum period permitted under Section 103(a)(2)(A)(i) of the Act. In addition, the proposed standard would have added a new requirement that the audit documentation must be assembled for retention within a reasonable period of time after the auditor's report is released. Such reasonable period of time should not exceed 45 days.

A40. In general, those commenting on this documentation retention requirement did not have concerns with the time period of 45 days to assemble the working papers. However, some commenters suggested the Board tie this 45-day requirement to the filing date of the company's financial statements with the SEC. One commenter recommended that the standard refer to the same trigger date for initiating both the time period during which the auditor should complete work paper assembly and the beginning of the seven-year retention period.

A41. For consistency and practical implications, the Board agreed that the standard should have the same date for the auditor to start assembling the audit documentation and initiating the seven-year retention period. The Board decided that the seven-year retention period begins on the *report release date*, which is defined as the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. In addition, auditors will have 45 days to assemble the complete and final set of audit documentation, beginning on the report release date. The Board believes that using the report release date is preferable to using the filing date of the company's financial statements, since the auditor has ultimate control over granting permission to use his or her report. If an auditor's report is not issued, then the audit documentation is to be retained for seven years from the date that fieldwork was substantially completed. If the auditor was unable to complete the engagement, then the seven-year period begins when the work on the engagement ceased.

Section 802 of Sarbanes-Oxley and the SEC's Implementing Rule

A42. Many commenters had concerns about the similarity in language between the proposed standard and the SEC final rule (issued in January 2003) on record retention, *Retention of Records Relevant to Audits and Reviews*.[4] Some commenters recommended that the PCAOB undertake a project to identify and resolve all differences between the proposed standard and the SEC's final rule. These commenters also suggested that the Board include similar language from the SEC final rule, Rule 2-06 of Regulation S-X, which limits the requirement to retain some items.

Differences Between Section 802 and This Standard

A43. The objective of the Board's standard is different from the objective of the SEC's rule on record retention. The objective of the Board's standard is to require auditors to create certain documentation to enhance the quality of audit documentation, thereby improving the quality of audits and other related engagements. The records retention section of this standard, mandated by Section 103 of the Act, requires registered public accounting firms to "prepare and maintain for a period of not less than 7 years, *audit work papers, and other information related to any audit report*, in sufficient detail to support the conclusions reached in such report." (emphasis added)

A44. In contrast, the focus of the SEC rule is to require auditors to *retain* documents that the auditor does create, in order that those documents will be available in the event of a regulatory investigation or other proceeding. As stated in the release accompanying the SEC's final rule (SEC Release No. 33-8180):

> Section 802 of the Sarbanes-Oxley Act is intended to address the destruction or fabrication of evidence and the preservation of "financial and audit records." We are directed under that section to promulgate rules related to the retention of records relevant to the audits and reviews of financial statements that companies file with the Commission.

A45. The SEC release further states, "New rule 2-06...addresses the retention of documents relevant to enforcement of the securities laws, Commission rules, and criminal laws."

A46. Despite their different objectives, the proposed standard and SEC Rule 2-06 use similar language in describing documentation generated during an audit or review. Paragraph 4 of the proposed Standard stated that, "Audit documentation ordinarily consists of *memoranda, correspondence*, schedules, and *other documents created* or obtained *in connection with* the engagement and may be in the form of paper, electronic files, or other media." Paragraph (a) of SEC Rule 2-06 describes "records relevant to the audit or review" that must be retained as, (1) "workpapers and other documents that form the basis of the audit or review and (2) *memoranda, correspondence*, communications, *other documents*, and records (including electronic records), which: [a]re *created*, sent or received *in connection with* the audit or review and [c]ontain conclusions, opinions, analyses, or financial data related to the audit or review. ..." (numbering and emphasis added).

A47. The SEC makes a distinction between the objectives of categories (1) and (2). Category (1) includes audit documentation. Documentation to be retained

---

[4] SEC Regulation S-X, 17 C.F.R. § 210.2-06 (SEC Release No. 33-8180, January 2003). (The final rule was effective in March 2003.)

according to the Board's Standard clearly falls within category (1). Items in category (2) include "desk files" which are more than "what traditionally has been thought of as auditor's 'workpapers'." The SEC's rule requiring auditors to retain items in category (2) have the principal purpose of facilitating enforcement of securities laws, SEC rules, and criminal laws. This is not an objective of the Board's Standard. According to SEC Rule 2-06, items in category (2) are limited to those which: (*a*) are created, sent or received in connection with the audit or review, and (*b*) contain conclusions, opinions, analyses, or financial data related to the audit or review. The limitations, (*a*) and (*b*), do not apply to category (1).

A48. Paragraph 4 of the final Standard deletes the reference in the proposed standard to "other documents created or obtained in connection with the engagement." The Board decided to keep "correspondence" in the standard because correspondence can be valid audit evidence. Paragraph 20 of the Standard reminds the auditor that he or she may be required to maintain documentation in addition to that required by this Standard.

Significant Matters and Significant Findings or Issues

A49. Some commenters asked how the term *significant matters*, in Rule 2-06, relates to the term *significant findings* or issues in the Board's Standard. The SEC's release accompanying its final Rule 2-06 states that "...*significant matters* is intended to refer to the documentation of substantive matters that are important to the audit or review process or to the financial statements of the issuer...." This is very similar to the term *significant findings or issues* contained in paragraph 12 of the Board's Standard which requires auditors to document *significant findings or issues*, actions taken to address them (including additional evidence obtained), and the basis for the conclusions reached. Examples of significant findings or issues are provided in the Standard.

A50. Based on the explanation in the SEC's final rule and accompanying release, the Board believes that *significant matters* are included in the meaning of *significant findings or issues* in the Board's standard. The Board is of the view that *significant findings or issues* is more comprehensive and provides more clarity than *significant matters* and, therefore, has not changed the wording in the final Standard.

Changes to Audit Documentation

A51. The proposed standard would have required that any changes to the working papers after completion of the engagement be documented without deleting or discarding the original documents. Such documentation must indicate the date the information was added, by whom it was added, and the reason for adding it.

A52. One commenter recommended that the Board provide examples of auditing procedures that should be performed before the report release date and procedures that may be performed after the report release date. Some commenters also requested clarification about the treatment of changes to documentation that occurred after the completion of the engagement but before the report release date. Many commenters recommended that the Board more specifically describe post-issuance procedures. The Board generally agreed with these comments.

A53. The final Standard includes two important dates for the preparation of audit documentation: (1) the report release date and (2) the documentation completion date.

- Prior to the report release date, the auditor must have completed all necessary auditing procedures, including clearing review notes

and providing support for all final conclusions. In addition, the auditor must have obtained sufficient evidence to support the representations in the auditor's reports before the report release date.

- After the report release date and prior to the documentation completion date, the auditor has 45 calendar days in which to assemble the documentation.

A54. During the audit, audit documentation may be superseded for various reasons. Often, during the review process, reviewers annotate the documentation with clarifications, questions, and edits. The completion process often involves revising the documentation electronically and generating a new copy. The SEC's final rule on record retention, *Retention of Records Relevant to Audits and Reviews*,[5] explains that the SEC rule does not require that the following documents generally need to be retained: superseded drafts of memoranda, financial statements or regulatory filings; notes on superseded drafts of memoranda, financial statements or regulatory filings that reflect incomplete or preliminary thinking; previous copies of workpapers that have been corrected for typographical errors or errors due to training of new employees; and duplicates of documents. This standard also does not require auditors to retain such documents as a general matter.

A55. Any documents, however, that reflect information that is either inconsistent with or contradictory to the conclusions contained in the final working papers may not be discarded. Any documents added must indicate the date they were added, the name of the person who prepared them, and the reason for adding them.

A56. If the auditor obtains and documents evidence after the report release date, the auditor should refer to the Interim Auditing Standards, AU sec. 390, *Consideration of Omitted Procedures After the Report Date* and AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*. Auditors should not discard any previously existing documentation in connection with obtaining and documenting evidence after the report release date.

A57. The auditor may perform certain procedures subsequent to the report release date. For example, pursuant to AU sec. 711, *Filings Under Federal Securities Statutes*, auditors are required to perform certain procedures up to the effective date of a registration statement. The auditor should identify and document any additions to audit documentation as a result of these procedures. No audit documentation should be discarded after the documentation completion date, even if it is superseded in connection with any procedures performed, including those performed pursuant to AU sec. 711.

A58. Additions to the working papers may take the form of memoranda that explain the work performed, evidence obtained, and conclusions reached. Documentation added to the working papers must indicate the date the information was added, the name of the person adding it, and the reason for adding it. All previous working papers must remain intact and not be discarded.

A59. Documentation added to the working papers well after completion of the audit or other engagement is likely to be of a lesser quality than that produced contemporaneously when the procedures were performed. It is very difficult to reconstruct activities months, and perhaps years, after the work was actually performed. The turnover of both firm and company staff can cause difficulty in reconstructing conversations, meetings, data, or other evidence. Also, with

---

[5] See footnote 4.

the passage of time memories fade. Oral explanation can help confirm that procedures were performed during an audit, but oral explanation alone does not constitute persuasive other evidence. The primary source of evidence should be documented at the time the procedures are performed, and oral explanation should not be the primary source of evidence. Furthermore, any oral explanation should not contradict the documented evidence, and appropriate consideration should be given to the credibility of the individual providing the oral explanation.

Multi-Location Audits and Using the Work of Other Auditors

A60. The proposed Standard would have required the principal auditor to maintain specific audit documentation when he or she decided not to make reference to the work of another auditor.

A61. The Board also proposed an amendment to AU sec. 543 concurrently with the proposed audit documentation standard. The proposed amendment would have required the principal auditor to review the documentation of the other auditor to the same extent and in the same manner that the audit work of all those who participated in the engagement is reviewed.

A62. Commenters expressed concerns that these proposals could present conflicts with certain non-U.S. laws. Those commenters also expressed concern about the costs associated with the requirement for the other auditor to ship their audit documentation to the principal auditor. In addition, the commenters also objected to the requirement that principal auditors review the work of other auditors as if they were the principal auditor's staff.

Audit Documentation Must Be Accessible to the Office Issuing the Auditor's Report

A63. After considering these comments, the Board decided that it could achieve one of the objectives of the proposed standard (that is, to require that the issuing office have access to those working papers on which it placed reliance) without requiring that the working papers be shipped to the issuing office. Further, given the potential difficulties of shipping audit documentation from various non-U.S. locations, the Board decided to modify the proposed standard to require that audit documentation either be retained by or be accessible to the issuing office.

A64. In addition, instead of requiring that all of the working papers be shipped to the issuing office, the Board decided to require that the issuing office obtain, review, and retain certain summary documentation. Thus, the public accounting firm issuing an audit report on consolidated financial statements of a multinational company may not release that report without the documentation described in paragraph 19 of the Standard.

A65. The auditor must obtain and review and retain, prior to the report release date, documentation described in paragraph 19 of the Standard, in connection with work performed by other offices of the public accounting firm or other auditors, including affiliated or non-affiliated firms, that participated in the audit. For example, an auditor that uses the work of another of its offices or other affiliated or non-affiliated public accounting firms to audit a subsidiary that is material to a company's consolidated financial statements must obtain the documentation described in paragraph 19 of the Standard, prior to the report release date. On the other hand, an auditor that uses the work of another of its offices or other affiliated or non-affiliated firms, to perform selected procedures, such as observing the physical inventories of a company, may not be required to obtain the documentation specified in paragraph 19 of the Standard. However,

this does not reduce the need for the auditor to obtain equivalent documentation prepared by the other auditor when those instances described in paragraph 19 of the Standard are applicable.

Amendment to AU Sec. 543, Part of Audit Performed by Other Independent Auditors

A66. Some commenters also objected to the proposed requirement in the amendment to AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, that the principal auditor review another auditor's audit documentation. They objected because they were of the opinion such a review would impose an unnecessary cost and burden given that the other auditor will have already reviewed the documentation in accordance with the standards established by the principal auditor. The commenters also indicated that any review by the principal auditor would add excessive time to the SEC reporting process, causing even more difficulties as the SEC Form 10-K reporting deadlines have become shorter recently and will continue to shorten next year.

A67. The Board accepted the recommendation to modify the proposed amendment to AU sec. 543, *Part of Audit Performed by Other Independent Auditors*. Thus, in the final amendment, the Board imposes the same unconditional responsibility on the principal auditor to obtain certain audit documentation from the other auditor prior to the report release date. The final amendment also provides that the principal auditor should consider performing one or more of the following procedures:

- Visit the other auditors and discuss the audit procedures followed and results thereof.
- Review the audit programs of the other auditors. In some cases, it may be appropriate to issue instructions to the other auditors as to the scope of the audit work.
- Review additional audit documentation of the other auditors relating to significant findings or issues in the engagement completion document.

Effective Date

A68. The Board proposed that the Standard and related amendment would be effective for engagements completed on or after June 15, 2004. Many commenters were concerned that the effective date was too early. They pointed out that some audits, already begun as of the proposed effective date, would be affected and that it could be difficult to retroactively apply the Standard. Some commenters also recommended delaying the effective date to give auditors adequate time to develop and implement processes and provide training with respect to several aspects of the Standard.

A69. After considering the comments, the Board has delayed the effective date. However, the Board also believes that a delay beyond 2004 is not in the public interest.

A70. The Board concluded that the implementation date of this Standard should coincide with that of PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*, because of the documentation issues prevalent in PCAOB Auditing Standard No. 2. Therefore, the Board has decided that the standard will be effective for audits of financial statements with respect to fiscal years ending on or after November 15, 2004. The effective date for reviews of interim financial information and other engagements, conducted pursuant to the

Standards of the PCAOB, would occur beginning with the first quarter ending after the first financial statement audit covered by this Standard.

Reference to Audit Documentation As the Property of the Auditor

A71. Several commenters noted that SAS No. 96, *Audit Documentation*, the interim auditing standard on audit documentation, referred to audit documentation as the property of the auditor. This was not included in the proposed Standard because the Board did not believe ascribing property rights would have furthered this standard's purpose to enhance the quality of audit documentation.

Confidential Client Information

A72. SAS No. 96, *Audit Documentation*, also stated that, "the auditor has an ethical, and in some situations a legal, obligation to maintain the confidentiality of client information," and referenced Rule 301, *Confidential Client Information*, of the AICPA's Code of Professional Conduct. Again, the Board's proposed standard on audit documentation did not include this provision. In adopting certain interim Standards and rules as of April 16, 2003, the Board did not adopt Rule 301 of the AICPA's Code of Professional Conduct. In this Standard on audit documentation, the Board seeks neither to establish confidentiality standards nor to modify or detract from any existing applicable confidentiality requirements.

Addendum

Additional Documentation Requirements of SEC Rule 2-06

This addendum is not a part of PCAOB Auditing Standard No. 3.

B1. Auditors should be aware of the additional record retention requirements in SEC Rule 2-06 of Regulation S-X ("Rule 2-06"). The Board is providing additional information below to remind auditors of the SEC requirements. This addendum is not an interpretation of Rule 2-06. Instead, this addendum provides excerpts from the SEC release accompanying the final rule which provides the SEC's interpretation of the rule's requirements, particularly paragraphs (a) and (c) of Rule 2-06.

B2. Paragraph (a) of Rule 2-06 requires that:

> . . . the accountant shall retain . . . memoranda, correspondence, communications, other documents, and records (including electronic records) which:
>
> (1) Are created, sent or received in connection with the audit or review, and
>
> (2) Contain conclusions, opinions, analyses, or financial data related to the audit or review.

B3. Paragraph (c) of Rule 2-06 states:

> Memoranda, correspondence, communications, other documents, and records (including electronic records) described in paragraph (a) of this section shall be retained whether they support the auditor's final conclusions regarding the audit or review, or contain information or data relating to a significant matter, that is inconsistent with the auditor's final conclusions regarding that matter or the audit or review. Significance of a matter shall be determined based on an objective analysis of the facts and circumstances. Such documents and records include, but are not limited to, those documenting a consultation on or resolution of differences in professional judgment.

Other Statements by the SEC

B4. In the excerpt below, from the SEC's release accompanying its final Rule 2-06, the SEC discusses documents that generally are not required to be retained under Rule 2-06.

> In the Proposing Release, we stated that non-substantive materials that are not part of the workpapers, such as administrative records, and other documents that do not contain relevant financial data or the auditor's conclusions, opinions or analyses would not meet the second of the criteria in Rule 2-06(a) and would not have to be retained. Commentators questioned whether the following documents would be considered substantive and have to be retained:
>
> - Superseded drafts of memoranda, financial statements or regulatory filings,
> - Notes on superseded drafts of memoranda, financial statements or regulatory filings that reflect incomplete or preliminary thinking,
> - Previous copies of workpapers that have been corrected for typographical errors or errors due to training of new employees,

- Duplicates of documents, or
- Voice-mail messages.

These records generally would not fall within the scope of new Rule 2-06 provided they do not contain information or data, relating to a significant matter that is inconsistent with the auditor's final conclusions, opinions or analyses on that matter or the audit or review. For example, Rule 2-06 would require the retention of an item in this list if that item documented a consultation or resolution of differences of professional judgment.

B5. The excerpt below, from the SEC's release accompanying its final Rule 2-06, provides further explanation about documents to be retained under Rule 2-06:

> In consideration of the comments received, we have revised paragraph (c) of the rule. We have removed the phrase "cast doubt" to reduce the possibility that the rule mistakenly would be interpreted to reach typographical errors, trivial or "fleeting" matters, or errors due to "on-the-job" training. We continue to believe, however, that records that either support or contain significant information that is inconsistent with the auditor's final conclusions would be relevant to an investigation of possible violations of the securities laws, Commission rules, or criminal laws and should be retained. Paragraph (c), therefore, now provides that the materials described in paragraph (a) shall be retained whether they support the auditor's final conclusions or contain information or data, relating to a significant matter that is inconsistent with the final conclusions of the auditor on that matter or on the audit or review. Paragraph (c) also states that the documents and records to be retained include, but are not limited to, those documenting consultations on or resolutions of differences in professional judgment.
>
> The reference in paragraph (c) to "significant" matters is intended to refer to the documentation of substantive matters that are important to the audit or review process or to the financial statements of the issuer or registered investment company. Rule 2-06(c) requires that the documentation of such matters, once prepared, must be retained even if it does not "support" the auditor's final conclusions, because it may be relevant to an investigation. Similarly, the retention of records regarding a consultation about, and resolution of, differences in professional judgment would be relevant to such an investigation and must be retained. We intend for Rule 2-06 to be incremental to, and not to supersede or otherwise affect, any other legal or procedural requirement related to the retention of records or potential evidence in a legal, administrative, disciplinary, or regulatory proceeding.
>
> Finally, we recognize that audits and reviews of financial statements are interactive processes and views within an accounting firm on accounting, auditing or disclosure issues may evolve as new information or data comes to light during the audit or review. We do not view "differences in professional judgment" within subparagraph (c) to include such changes in preliminary views when those preliminary views are based on what is recognized to be incomplete information or data.

Appendix 2

Amendment to Interim Auditing Standards—Part of Audit Performed by Other Independent Auditors

AU sec. 543.12 is amended as follows:

When the principal auditor decides not to make reference to the audit of the other auditor, in addition to satisfying himself as to the matters described in AU sec. 543.10, the principal auditor must obtain, and review and retain, the following information from the other auditor:

a. An engagement completion document consistent with paragraphs 12 and 13 of PCAOB Auditing Standard No. 3.

Note: This engagement completion document should include all cross-referenced, supporting audit documentation.

b. A list of significant fraud risk factors, the auditor's response, and the results of the auditor's related procedures.

c. Sufficient information relating to significant findings or issues that are inconsistent with or contradict the auditor's final conclusions, as described in paragraph 8 of PCAOB Auditing Standard No. 3.

d. Any findings affecting the consolidating or combining of accounts in the consolidated financial statements.

e. Sufficient information to enable the office issuing the auditor's report to agree or reconcile the financial statement amounts audited by the other firm to the information underlying the consolidated financial statements.

f. A schedule of audit adjustments, including a description of the nature and cause of each misstatement.

g. All significant deficiencies and material weaknesses in internal control over financial reporting, including a clear distinction between those two categories.

h. Letters of representations from management.

i. All matters to be communicated to the audit committee.

The principal auditor must obtain, and review and retain, such documents prior to the report release date.[1] In addition, the principal auditor should consider performing one or more of the following procedures:

- Visit the other auditor and discuss the audit procedures followed and results thereof.

[1] As it relates to the direction in paragraph .19 of AU sec. 324, for the auditor to "give consideration to the guidance in section 543.12," the auditor need not, in this circumstance, obtain the previously enumerated documents.

- Review the audit programs of the other auditor. In some cases, it may be appropriate to issue instructions to the other auditor as to the scope of the audit work.
- Review additional audit documentation of the other auditor relating to significant findings or issues in the engagement completion document.

PCAOB Release No. 2004-007

Rule Regarding Certain Terms Used in Auditing and Related Professional Practice Standards

PCAOB Release No. 2004-007
June 9, 2004
PCAOB Rulemaking
Docket Matter No. 009

Summary:

After public comment, the Public Company Accounting Oversight Board (the "PCAOB" or "Board") has adopted Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards*. The Board will submit this rule to the Securities and Exchange Commission ("SEC" or "Commission") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This rule will not take effect unless approved by the Commission.

Board Contacts:

Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org), and Bella Rivshin, Assistant Chief Auditor (202/207-9180; rivshinb@pcaobus.org).

* * *

Section 103 of the Act directs the Board to establish auditing and related professional practice standards, including auditing, attestation, quality control, ethics, and independence standards, applicable to registered public accounting firms in the preparation and issuance of audit and other reports for public companies. To date, the Board has adopted rules that require registered public accounting firms and their associated persons to "comply with all applicable auditing and related professional practice standards," (Rule 3100) and designate as interim standards of the Board certain standards that existed as of April 16, 2003 (Rules 3200T—3600T).

On October 7, 2003, the Board proposed Rule 3101 to set forth the terminology the Board will use to describe the degree of responsibility that the auditing and related professional practice standards impose on registered auditors. As proposed, this terminology also would apply to the Board's interim standards. The Board believes that the use of clear, concise, consistent, and definitive imperatives will improve audit quality.

The Board received 12 comment letters from a variety of interested parties, including auditors, professional associations, and government agencies. In response to the comments received, several changes were made to the requirements of the rule, which are described in detail in Appendix 2.

Appendices 1 and 2 to this release contain, respectively, the text of Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards*, and the Section-by-Section Analysis.

A. Introduction

Until now, the accounting profession has not expressly defined imperatives used to describe different degrees of the auditor's responsibility when conducting engagements in accordance with professional standards. Because of its concerns regarding the clarity in and consistency of existing standards, the Public Oversight Board's Panel on Audit Effectiveness recommended that the various levels of imperatives in auditing standards be clarified.[1] The Board agrees that defining these levels of imperatives will assist auditors with their work and further enhance the quality of audits.

Rule 3101 defines terminology the Board will use to describe the degrees of responsibility that the standards impose on the auditors as follows—

1. Unconditional Responsibility. The words "must," "shall," and "is required" indicate unconditional responsibilities. The auditor must fulfill responsibilities of this type in all cases in which the circumstances exist to which the requirement applies.
2. Presumptively Mandatory Responsibility. The word "should" indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type specified in the Board's standards unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard.
3. Responsibility To Consider. The words "may," "might," "could," and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on the exercise of professional judgment in the circumstances consistent with the objectives of the standard.

B. Applicability to Interim Standards

Although the auditing and related professional practice standards did not previously expressly define the degree of responsibility attached to these terms, the Board determined that the terminology defined in Rule 3101 is consistent with the existing interpretation of the interim standards. The Board believes that applying Rule 3101 to all auditing and related professional practice standards, including the interim standards, will create a common understanding among auditors of performance expectations when conducting engagements in accordance with the PCAOB Standards. Therefore, the Board concluded that it is appropriate to apply the definitions of these particular terms to the interim standards.

C. Documentation Requirement for Presumptively Mandatory Responsibility

The integrity of the audit depends, in large part, on the existence of a complete and understandable record of the work performed, the conclusions reached, and the evidence obtained to support those conclusions. Clear, complete, and comprehensive audit documentation enhances the quality of the audit. Audit documentation should demonstrate compliance with professional standards and

[1] Panel on Audit Effectiveness, *Report and Recommendations* §2.228 (August 31, 2000).

provide an explanation to justify the reasons for any variations in procedures performed.

The PCAOB Standards require that the auditor document the procedures performed, evidence obtained, and conclusions reached during an engagement. To further enhance the quality of the audit, Rule 3101(a)(2) adds a specific documentation requirement to achieve complete and comprehensive audit documentation for situations in which the auditor does not perform a presumptively mandatory activity. In those instances, auditors must document the reasons they chose not to perform the presumptively mandatory activity and how the alternative procedure performed sufficiently achieved the objectives of the specific standard.

During an internal or external review of the engagement, other evidence, including oral explanation, may help substantiate the procedures performed by the auditor during the audit. However, because the auditor is required to document his or her work during the audit, oral explanation should be used only to clarify the documented work performed. Furthermore, the reviewer should give appropriate consideration to the credibility of the individual(s) providing the oral explanation, and the oral explanation should be consistent with the documented evidence.

D. Effective Date

Because of the specific documentation requirement in paragraph (a)(2) of this rule, the Board has determined that the implementation date for the documentation requirement contained in Rule 3101 should coincide with that of PCAOB Auditing Standard No. 3, *Audit Documentation*. Therefore, the documentation requirement for Rule 3101(a)(2) will be effective for audits of financial statements with respect to fiscal years ending on or after the later of November 15, 2004, or 30 days after the date of approval of this rule by the SEC. The remaining Rule 3101 provisions become effective immediately following approval by the SEC.

* * *

On the 9th day of June, in the year 2004, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

2. Section-by-Section Analysis of Rule 3101

Appendix 1

Rule Regarding Certain Terms Used in Auditing and Related Professional Practice Standards

RULES OF THE BOARD

SECTION 1. GENERAL PROVISIONS

Rule 1001. Definitions of Terms Employed in Rules

(a)(xi) Auditor

The term "auditor" means both public accounting firms registered with the Public Company Accounting Oversight Board and associated persons thereof.

SECTION 3. PROFESSIONAL STANDARDS

Part 1—General Requirements

Rule 3101. Certain Terms Used in Auditing and Related Professional Practice Standards

(a) The Board's auditing and related professional practice standards use certain terms set forth in this rule to describe the degree of responsibility that the standards impose on auditors.

(1) **Unconditional Responsibility:** The words "must," "shall," and "is required" indicate unconditional responsibilities. The auditor must fulfill responsibilities of this type in all cases in which the circumstances exist to which the requirement applies. Failure to discharge an unconditional responsibility is a violation of the relevant standard and Rule 3100.

(2) **Presumptively Mandatory Responsibility:** The word "should" indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type specified in the Board's standards unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard. Failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard.

Note: In the rare circumstances in which the auditor believes the objectives of the standard can be met by alternative means, the auditor, as part of documenting the planning and performance of the work, must document the information that demonstrates that the objectives were achieved.

(3) **Responsibility To Consider**: The words "may," "might," "could," and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the

audit will depend on the exercise of professional judgment in the circumstances consistent with the objectives of the standard.
Note: If a Board standard provides that the auditor "should consider" an action or procedure, consideration of the action or procedure is presumptively mandatory, while the action or procedure is not.

(b) The terminology in paragraph (a) of this rule applies to the responsibilities imposed by the auditing and related professional practice standards, including the interim standards adopted in Rules 3200T, 3300T, 3400T, 3500T, and 3600T.

(c) The documentation requirement in paragraph (a)(2) is effective for audits of financial statements or other engagements with respect to fiscal years ending on or after [insert date the later of November 15, 2004, or 30 days after approval of this rule by the Securities and Exchange Commission].

Appendix 2

Section-by-Section Analysis of Rule 3101

Rule 3101(a)

In drafting its standards, the Board intends to distinguish among three levels of auditor responsibility. Rule 3101(a) explains the terminology regarding imperatives used in the standards the Board establishes.

Rule 3101(a)(1) provides that the words "must," "shall," and "is required" in standards indicate unconditional responsibilities. The auditor must accomplish responsibilities of this type in all cases in which the circumstances exist to which the requirement applies. A failure to discharge an unconditional responsibility imposed under the Board's standards is a violation of the relevant standard and Rule 3100.

Rule 3101(a)(2) provides that the word "should" in standards indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard. In the rare circumstances in which the auditor believes the objectives of the standard can be met by alternative means, the auditor, as part of documenting the planning and performance of the work, must document the information that demonstrates that the objectives were achieved. The Board has determined that a failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard.

Rule 3101(a)(3) provides that the words "may," "might," "could," and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on the exercise of professional judgment in the circumstances.

The Board added the following captions to Rule 3101(a): 3101(a)(1) Unconditional Responsibility, 3101(a)(2) Presumptively Mandatory Responsibility, and 3101(a)(3) Responsibility To Consider. Proposed Rule 3101(a) did not have a caption or designation for each category of terms. Rather, the proposed rule simply referenced the category of certain terms by using the standard format in PCAOB rulemaking. The Board added the captions in response to a commenter's recommendation that a caption be added to each category of certain terms for ease of reference and clarity.

One commenter recommended replacing the term "obligation" in Rule 3101 with a comparable term because the commenter believed that the term "obligation" in legal and governmental environments has a connotation that is inconsistent with the intent of Rule 3101 and may be misinterpreted by legal or governmental officials. After considering this comment, the Board replaced the term "obligation" with the synonym "responsibility" in Rule 3101.

Rule 3101(a)(2) defines a presumptively mandatory responsibility as a requirement that the auditor must comply with "unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to

achieve the objectives of the standard." Furthermore, Rule 3101(a)(2) states that "failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard."

The Board also added a note to Rule 3101(a)(2) to require auditors to document compliance with presumptively mandatory responsibilities by alternative means. The Board originally proposed that the auditor be required to "demonstrate by verifiable, objective, and documented evidence" that the alternative procedures he or she followed were sufficient in the specific circumstances. Commenters stated that they believed that the documentation requirement was important, both to promote discipline of thought and to provide a uniform basis for evaluating compliance with the standards. Several of these commenters went even further to recommend that the Board strengthen the documentation requirement by adding language such as "contemporaneous" and "memorialized at the time of the audit" to the rule.

Conversely, other commenters suggested that the documentation requirement was unduly onerous and placed too great a documentation burden on the auditors. The commenters argued that the documentation would be too voluminous and would add very little value to the audit. Some of these commenters further recommended that, in lieu of the proposed documentation requirement, the rule require that the auditor consider the significance of the particular audit area and document only the significant issues or findings. A commenter also recommended that other evidence, such as oral explanation, should be allowed as support for the reasons why the auditor chose not to perform a presumptively mandatory responsibility. Additionally, some commenters recommended that the documentation requirement should be addressed in the standard on audit documentation.

The integrity of the audit depends, in large part, on the existence of a complete and understandable record of the work performed, the conclusions reached, and the evidence obtained to support those conclusions. Clear, complete, and comprehensive audit documentation enhances the quality of the audit. Audit documentation should demonstrate compliance with professional standards and justify the reasons for any variations in procedures performed.

The PCAOB Standards require the auditor to document the procedures performed, evidence obtained, and conclusions reached during an engagement. To further enhance the quality of the audit, Rule 3101(a)(2) adds a specific documentation requirement to achieve complete and comprehensive audit documentation in engagement working papers for situations in which the auditor does not perform a presumptively mandatory responsibility. In those instances, it is essential that auditors document the reasons they chose not to perform the presumptively mandatory responsibility and how the alternative procedure they performed sufficiently achieved the objectives of the specific standard.

Because circumstances will be rare in which the auditor will perform an alternative procedure, the Board anticipates that the documentation requirement in the rule ought not to result in unduly onerous consequences or too voluminous documentation. Furthermore, since the auditor must already document the work performed as part of the audit, adding a concise explanation as to why the auditor chose to perform the alternative procedure should not increase the volume of documentation to an unreasonable level.

During an internal or external review of the engagement, other evidence, including oral explanation, may help substantiate the procedures performed by the auditor during the audit. However, because the auditor is required to document his or her work in the engagement working papers during the audit, oral explanation should be used only to clarify the documented work performed. The justification as to why the alternative procedure was performed rather than the presumptively mandatory responsibility must be documented in the working papers. Furthermore, the reviewer should give appropriate consideration to the credibility of the individual(s) providing the oral explanation, and the oral explanation should be consistent with the documented evidence in the engagement working papers.

Moreover, the Board concluded that applying the documentation requirement only to significant issues, findings, or procedures is impractical because it will not be efficient or effective to determine, each time, whether the level of significance of an audit area warranted the auditor to document the reasons for choosing to perform an alternative procedure instead of the presumptively mandatory procedure. The purpose of Rule 3101 is to bring uniformity to definitions and requirements that auditors have to follow. In addition, the Board determined that moving Rule 3101(a)(2)'s documentation requirement to the audit documentation standard would not be appropriate because of its specific subject matter.

Additionally, the Board has added a note, originally a footnote in the Board's proposing release accompanying its proposed rule, describing an auditor's responsibility in a "should consider" scenario to the text of Rule 3101(a)(3), Responsibility to Consider. Some commenters recommended that this footnote be added directly to the text of the rule because they saw it as an important clarification that was not included in the original proposed rule. A commenter further urged the Board to elaborate on its applicability and the documentation requirements for a "should consider" action.

Another commenter suggested that the "should consider" footnote be excluded from the rule because it implies that the action would require the auditor to document every instance of compliance with a "should consider" action. The commenter, instead, recommended that Rule 3101(a)(3) be revised to apply to all considerations regardless of how the obligation is expressed (for example, whether it is preceded by a "should," "may," "could," or "might").

Because the "should consider" terminology is widely used in the interim standards, the Board determined that it is important to state the Board's expectation for compliance and, therefore, agreed with commenters who recommended adding the "should consider" footnote to the text of Rule 3101(a)(3). Furthermore, the Board concluded that there is an important difference between a "should consider" and a "may consider" action or procedure. The difference is a direct correlation to the definitions of "should" and "may." The auditor has a greater responsibility in a "should consider" action because the auditor has a presumptively mandatory responsibility to consider the action or procedure versus just having a responsibility to consider the action. Therefore, Rule 3101(a)(3) was not revised to apply to all considerations regardless of how the obligation is expressed.

Additionally, the Board determined that the documentation requirement relating to a procedure that an auditor "should consider" is not the same as the documentation requirement for a presumptively mandatory responsibility because in a "should consider" situation, only the consideration of the action

is presumptively mandatory, while the action or procedure itself is not. In these situations, the auditor should use his or her professional judgment in determining how to document his or her consideration of the specific action or procedure.

Rule 3101(b)

Rule 3101(b) provides that the terminology in paragraph (a) of this rule applies to all the auditing and related professional practice standards, including the interim standards adopted in Rules 3200T, 3300T, 3400T, 3500T, and 3600T. Rule 3101(b) applies to conduct occurring after the effective date of the rule.

Therefore, Rule 3101(b) provides that the terminology in Rule 3101(a) is applicable to all existing auditing and related professional practice standards with which auditors must comply. The Board determined that a failure to comply with a presumptively mandatory responsibility in an interim standard will be treated as a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the specific circumstances, compliance was not necessary to achieve the objectives of the standard.

Some commenters on the proposed rule stated that the imperatives the Board identified are consistent with the way auditors currently interpret existing auditing and related professional practice standards, while other commenters recommended that Rule 3101(a) not apply to the interim standards on the grounds that the new definitions could create confusion or have unintended consequences. Because the accounting profession previously had not expressly defined these terms, commenters further recommended that the Board perform a comprehensive analysis of how and in what context the interim standards use the defined terms to determine whether current practice is consistent with the Rule 3101(a) definitions.

The Board concluded that the terminology defined in Rule 3101 is consistent with the existing interpretation regarding the application of the terminology in the interim standards. Rule 3101 creates a common understanding among the auditors as to what is expected of them when performing engagements in accordance with the PCAOB Standards and, therefore, Rule 3101 will apply to the interim standards.

Furthermore, a commenter recommended that the Board clarify the level of authority the appendices carry when accompanying the Board's Standards. Because the Board adopts the appendices to its permanent standards as rules, the appendices to the Board's permanent standards carry the same level of authority as the standards themselves. In addition, the appendices to the interim standards, which in certain circumstances carry a different level of authority, retain their original level of authority as adopted on April 16, 2003.

Rule 3101(c)

Rule 3101(c) establishes an effective date for the documentation requirement in paragraph (a)(2). The Board agreed with commenters who recommended establishing an effective date to provide a reasonable amount of time for auditors to implement procedures to properly comply with the new documentation requirement.

Rule 3101 does not apply retroactively. Therefore, conduct occurring before the rule is effective will be evaluated in light of the standards as they existed at

the time of the conduct. As noted above, however, the Board believes that, except for the documentation requirement in Rule 3101(a)(2), the definitions in Rule 3101 are consistent with the existing interpretation of these terms in the existing, interim standards. Therefore, as an interpretive matter, the Board expects that it will interpret these terms in the existing, interim standards in a manner consistent with their definitions in Rule 3101, in light of the facts and circumstances of each particular situation.

PCAOB Release No. 2005-014

Ethics and Independence Rule Concerning Independence, Tax Services, and Contingent Fees

PCAOB Release No. 2005-014
July 26, 2005
PCAOB Rulemaking
Docket Matter No. 017

Approved by the Securities and Exchange Commission on April 19, 2006, with varying effective dates.

The Securities and Exchange Commission has approved PCAOB ethics and independence rules concerning independence, tax services and contingent fees.

The rules introduce a foundation for the independence component of the Board's ethics rules by establishing a general obligation requiring a registered public accounting firm and its associated persons to be independent of the firm's audit clients throughout the audit and professional engagement period.

The rules identify circumstances in which the provision of tax services impairs an auditor's independence, including services related to marketing, planning, or opining in favor of the tax treatment of, among other things, transactions that are based on aggressive interpretations of applicable tax laws and regulations.

The rules also treat registered public accounting firms as not independent of their audit clients if they enter into contingent fee arrangements with those clients or if the firms provide tax services to certain members of management who serve in financial reporting oversight roles at an audit client or to immediate family members of such persons.

The rules further implement the Sarbanes-Oxley Act's requirement that auditors' non-audit services be pre-approved by the audit committee by strengthening the auditor's responsibilities in connection with seeking audit committee pre-approval of tax services. Specifically, the rules require a registered public accounting firm that seeks such pre-approval to describe proposed tax services engagements, in writing, for the audit committee; to discuss with the audit committee the potential effects of the services on the firm's independence; and to document the substance of that discussion.

Finally, an ethics rule also codifies the principle that persons associated with a registered public accounting firm (e.g., individual accountants) can be held responsible when certain of their actions contribute to a firm's violation of relevant laws, rules, or professional standards.

The effective dates for the rules follow:

Rule	Effective Date
3501—Definition of Terms	April 29, 2006
3502—Responsibility Not to Knowingly or Recklessly Contribute to Violations	April 29, 2006
3520—Auditor Independence	April 29, 2006
3521—Contingent Fees	Rule 3521 will not apply to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before June 18, 2006.
3522—Tax Transactions	Rule 3522 will not apply to tax services that were completed by a registered public accounting firm no later than June 18, 2006.
3523—Tax Services for Persons in Financial Reporting Oversight Roles	Rule 3523 will not apply to tax services being provided pursuant to an engagement in process on April 19, 2006, provided that such services are completed on or before October 31, 2006.
3524—Audit Committee Pre-approval of Certain Tax Services	Rule 3524 will not apply to any tax service pre-approved on an engagement-by-engagement basis before June 18, 2006. With respect to tax services provided to audit clients whose audit committees pre-approve tax services pursuant to policies and procedures, Rule 3524 will not apply to any such tax service that is begun by April 20, 2007.

Summary:

The Public Company Accounting Oversight Board ("PCAOB" or "Board") is adopting rules to promote the ethics and independence of registered public accounting firms that audit financial statements of U.S. public companies. The rules treat a registered firm as not independent of a public company audit client if the firm, or an affiliate of the firm, provided any service or product to an audit client for a contingent fee or a commission, or received from an audit client, directly or indirectly, a contingent fee or commission. The rules also treat such a firm as not independent if the firm, or an affiliate of the firm, provided assistance in planning, or provided tax advice on, certain types of potentially abusive tax transactions to an audit client or provided any tax services to certain persons employed by an audit client. Further, the rules require registered public accounting firms to provide certain information to audit committees in connection with seeking pre-approval to provide non-prohibited tax services.

In addition to these rules relating to tax services, the Board also is adopting a general rule requiring registered public accounting firms and their associated persons to be independent of their audit clients throughout the audit and professional engagement period. Finally, the Board is adopting a rule on the responsibility of persons associated with registered public accounting firms not to cause registered public accounting firms to violate the Sarbanes-Oxley Act of 2002 (the "Act"), the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Securities and Exchange Commission issued under the Act, and professional standards.

Public Comments:

The Board released for public comment proposed rules to promote the ethics and independence of registered public accounting firms on December 14, 2004. The Board received 805 letters of comment.

Board Contacts:

Bella Rivshin, Assistant Chief Auditor (202/207-9180; rivshinb@pcaobus.org), Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org).

* * *

I. Final Rules on Auditors' Provision of Tax Services

On December 14, 2004, the Board proposed certain rules related to registered public accounting firms' provision of tax services to public company audit clients. The proposal was designed to address certain concerns related to auditor independence when auditors become involved in marketing or otherwise opining in favor of aggressive tax shelter schemes and in selling personal tax services to individuals who play a direct role in preparing the financial statements of public company audit clients. The proposal was also based on the Board's recognition of the fact that accounting firms have long offered basic tax compliance services that have not raised significant questions about those firms' ability also to serve as independent auditors. The Board received 805 comment letters from investors, auditors, issuers, and others, most of whom, in general, supported the proposed rules.[1]

Neither the federal securities laws nor the SEC's rules prohibit auditors from providing tax services to their audit clients, so long as such services are preapproved by a company's audit committee (and so long as those services do not fall into one of several enumerated categories of expressly prohibited services).[2] The SEC has recognized, however—most recently in connection with promulgating rules to implement the auditor independence provisions of Title II of the Act[3]—that while it did not consider conventional tax compliance and planning to be a threat to auditor independence, the marketing of novel, tax-driven financial products raises more challenging auditor independence issues.

---

[1] Seven hundred forty of these comment letters were from individual investors expressing strong support for the proposal.

[2] On February 5, 2003, the Securities and Exchange Commission ("SEC" or "Commission") adopted rules to implement Title II of the Sarbanes-Oxley Act of 2002 (the "Act"). These rules address key aspects of auditor independence with special emphasis on the provision of non-audit services. The rules expressly prohibit ten categories of non-audit services, as required by Section 201 of the Act. Strengthening the Commission's Requirements Regarding Auditor Independence, SEC Release No. 33-8183, § II.B.11 (Jan. 28, 2003), 17 C.F.R. Parts 210, 240, 249, and 274.

[3] See id.

On this basis, the SEC has cautioned that an audit committee should "scrutinize carefully" the retention of the company's auditor in a transaction initially recommended by the auditor "the sole business purpose of which may be tax avoidance and the tax treatment of which may be not supported in the Internal Revenue Code and related regulations."[4]

In addition to requiring the SEC to establish rules implementing the Act's prohibition of certain non-audit services, the Act vested in the PCAOB the authority to establish standards relating to ethics and independence in public company auditing. Specifically, Section 103(a) of the Act directs the Board, by rule, to establish "ethics standards to be used by registered public accounting firms in the preparation and issuance of audit reports, as required by th[e] Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors." Moreover, Section 103(b) of the Act directs the Board to establish such rules on auditor independence "as may be necessary or appropriate in the public interest or for the protection of investors, to implement, or as authorized under, Title II of th[e] Act."[5]

As discussed more fully in the Board's proposing release, since the SEC issued its new rules, two types of tax services have raised serious concerns among investors, auditors, lawmakers, and others relating to the ethics and independence of accounting firms that provide both auditing and tax services—

1. the marketing to public company audit clients of questionable tax transactions used improperly to avoid paying taxes or to manipulate financial statements in order to make such statements appear more favorable to investors, and
2. the provision of tax services, including tax shelter products, to executives of public company audit clients who are involved in the financial reporting process at such companies.

Indeed, in an April 2005 report issued since the Board's proposal, the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs (the "Subcommittee") found that some of the nation's largest accounting firms had in the past sold generic tax products to multiple corporate and individual clients despite evidence that some of those products were potentially abusive or illegal.[6] In addition, the Internal Revenue Service ("IRS") and the

---

[4] Id. Moreover, the SEC's release accompanying its rules referred to the recommendation of the Conference Board's Commission on Public Trust and Private Enterprise that, as a "best practice," auditors not provide advice on "novel and debatable" tax strategies and products. Id. §II.B.11 at note 112.

[5] Pursuant to this authority, in April 2003, the Board adopted as its interim, transitional, independence standards (PCAOB Rule 3600T) the American Institute of Certified Public Accountants ("AICPA") *Code of Professional Conduct* Rule 101 and related interpretations and rulings thereof, as they existed on April 16, 2003. PCAOB Rule 3600T notes that the interim standards do not supersede the Commission's auditor independence rules and, to the extent that a provision of the Commission's rules is more restrictive (or less restrictive) than the interim standards, the auditor must comply with the more restrictive rules. The PCAOB also adopted Independence Standards Board ("ISB") Standard Nos. 1, 2, and 3 and Interpretations 99-1, 00-1, and 00-2 as additional interim independence standards.

[6] See Permanent Subcommittee on Investigations of the Committee on Homeland Security and Governmental Affairs, The Role of Professional Firms in the U.S. Tax Shelter Industry, S. REP. No. 109-54, at 6 (2005) (hereinafter "April 2005 Senate Report"). This report was based on a Subcommittee investigation that included hearings, in November 2003, in which the Subcommittee elicited testimony that described certain potentially abusive tax shelter products marketed through cold-call selling techniques by accounting firms and others. *See also U.S. Tax Shelter Industry: The Role of Accountants, Lawyers, and Financial Professionals: Hearings Before the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs*, 108th Cong. (2003) (hereinafter "U.S. Tax Shelter Hearings").

U.S. Department of Justice have brought a number of cases against accounting firms in connection with those firms' marketing of tax shelter products and, specifically, those firms' alleged failures to register, or comply with list maintenance requirements relating to, their tax shelter products. Most recently, earlier this year, the IRS proposed a settlement initiative for executives and companies that participated in certain abusive tax avoidance transactions, at times with the assistance of the companies' auditors.[7] At the time the initiative was announced, IRS Commissioner Mark W. Everson said that "[t]hese transactions raise[d] questions not only about compliance with the tax laws, but also, in some instances, about corporate governance and auditor independence."[8] Specifically, the IRS concluded that "[r]eal or perceived conflicts of interest may exist where independent auditors certify to the public the accuracy and integrity of the company's financial statements and these auditors advise senior executives on their personal tax issues about abusive tax shelters they promoted, the same executives that oversee the relationship with the auditing firm."[9]

The Government Accountability Office ("GAO") also has noted concerns about auditors' involvement in marketing abusive tax shelters to public companies. The GAO recently reported that 61 Fortune 500 companies obtained tax shelter services from their external auditors during the period 1998 through 2003.[10] The GAO also noted that the IRS considered some of these "transactions abusive, with tax benefits subject to disallowance under existing law, and other transactions possibly to have some traits of abuse."[11]

While other organizations have focused on a variety of legal and ethical issues presented by the tax shelter business, the Board's proposal focused on whether tax services generally, or any class of tax services, impair an auditor's independent judgment, in fact or appearance, in its audit work. Thus, over several months, the Board considered a wide range of tax services, including routine tax return preparation and tax compliance; tax planning and advice relating to federal, state, local, and other tax laws; executive tax services; international assignment tax services; and tax shelter strategies and products. To assist the Board in its evaluation, the Board held a public roundtable discussion with individuals representing a variety of viewpoints, including investors, auditors, managers of public companies, governmental officials, and others.[12]

Based on this evaluation, the Board developed a set of proposed rules designed to establish a framework for addressing the concerns that have arisen in connection with auditors' provision of tax services to their public company audit

[12] The Board held the Auditor Independence Roundtable on Tax Services (the "Roundtable") on July 14, 2004. A list of Roundtable participants may be found at pages 2 and 3 of the transcript of the Roundtable. *See Auditor Independence Roundtable on Tax Services* (July 14, 2004), *available at* http://pcaobus.org/Rules/Rulemaking/Docket017/2004-07-14_Roundtable_Transcript.pdf.

clients. Specifically, the proposed rules were designed, among other things, to prevent auditors from providing (1) certain aggressive tax shelter services to public company audit clients, (2) any other service to a public company audit client for a contingent fee, which is a fee arrangement often used in tax work, and (3) any tax service to certain persons who serve in financial reporting oversight roles at a public company audit client. The proposed rules also would implement the requirements of the Act and the SEC's independence rules when an auditor seeks audit committee pre-approval to provide tax services that are not prohibited by the Board's or the SEC's rules.

The Board also sought comment on whether additional types of tax services, such as tax compliance services, should be prohibited by a Board rule. After carefully considering the comments received on this issue, most of which supported the Board's preliminary determination to exclude certain kinds of tax services from the purview of its proposed rules, the Board has determined to adopt the rules, substantially as proposed, and not to restrict auditors' provision of other kinds of tax services. That is, auditors may continue to provide to their public company audit clients other kinds of tax services not expressly prohibited by the Board's rules, so long as such services are consistent with the Commission's independence requirements and so long as the auditor and audit committee have complied with the Act's and the Commission's requirements relating to audit committee pre-approval of such services.

There is some evidence that accounting firms already recognize the risks that involvement in clients' abusive tax shelters can pose, as well as the problems that can result from providing tax services to executives of audit clients. And, there is some evidence that such firms have made changes to their oversight of firm services in order to avoid such problems in the future. For example, in its April 2005 report, the Subcommittee found that, since the Subcommittee's investigation began, some of the largest firms had each committed to, among other things, "cultural, structural, and institutional changes to dismantle its tax shelter practice. . . ."[13] Moreover, some firms have announced significant internal reforms designed to restore confidence in the ethics and independence of their audit practices.

Against this backdrop, commenters generally supported the Board's proposal. In addition, the Subcommittee recommended in its April 2005 report that "the Public Company Accounting Oversight Board . . . strengthen and finalize proposed rules restricting certain accounting firms from providing aggressive tax services to their audit clients, charging companies a contingent fee for providing tax services, and using aggressive marketing efforts. . . ."[14] Also, the IRS noted its support for the Board's proposal in its response to the GAO's report on Tax Shelters.[15]

Accordingly, today the Board is adopting final rules based on its December 2004 proposal. These final rules reflect modifications of the proposal in certain respects, largely due to insights derived from the Board's consideration of the comments received. Part II of this release describes the final rules, as well as modifications from the proposed version of the rules.

II. Detailed Discussion of Rules and Consideration of Comments

The Board's final rules are intended to accomplish four objectives. First, the rules codify, in an ethics rule, the principle that persons associated with a registered public accounting firm should not cause the firm to violate relevant laws, rules, and standards. Second, the rules introduce a foundation for the independence component of the Board's ethics rules. That foundation includes a fundamental independence requirement and, as necessary and appropriate, additional rules addressing specific circumstances related to independence issues.

Third, the rules build on that foundation with provisions that identify certain impairments to an auditor's independence. Specifically, the rules treat a firm as not independent if it, or any of its affiliates, enters into a contingent fee arrangement relating to an audit client. Also, the rules treat a firm as not independent if it, or any of its affiliates, markets, plans, or opines in favor of certain types of aggressive tax transactions to or for public company audit clients. In addition, the rules treat a firm as not independent if it, or any of its affiliates, provides tax services to certain persons in a financial reporting oversight role at an audit client or to immediate family members of such persons.

Fourth, the rules require registered public accounting firms to provide audit committees certain information in connection with seeking pre-approval from such committees, as required by the Act and the SEC's independence rules, to perform nonprohibited tax services for the audit client. The rules would require a firm seeking preapproval to describe the terms of the tax services engagement to the audit committee and to engage in a substantive discussion with the audit committee about the potential effects of such services on the firm's independence.[16]

A. Responsibility Not to Cause Violations

Rule 3502, as proposed, provided that a person associated with a registered public accounting firm shall not cause that firm to violate the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards, due to an act or omission the person knew or should have known would contribute to such violation. The Board proposed the rule to codify the ethical obligation of associated persons of registered firms not to cause registered firms to commit such violations. Proposed Rule 3502 also made clear that an associated person's ethical obligation is not merely to refrain from knowingly causing a violation but also to act with sufficient care to avoid negligently causing a violation.

The Board received a number of comments on proposed Rule 3502. Several commenters supported the rule as proposed and noted that they saw the rule as essential to the Board's ability to carry out its disciplinary responsibilities under the Act. Other commenters, however, including the largest accounting firms and an accounting trade association, did not support the rule as proposed. In general, these commenters objected to the proposed rule's use of a negligence standard in light of the complex regulatory requirements with which auditors

[16] The rules also include several definitions that are integral to the operation of the rules.

must comply. Some of these commenters also questioned the Board's authority to adopt the proposed rule, or at least the proposed rule with a negligence standard.

The Board has carefully considered these comments and determined to adopt Rule 3502, with some modifications. The Board continues to believe that it is authorized to adopt the rule. Section 103(a) of the Act directs the Board to, "by rule, establish . . . such ethics standards to be used by registered public accounting firms in the preparation and issuance of audit reports, as required by this Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors." The Board believes that the rule is an appropriate exercise of this authority to set ethical standards for accountants subject to the Board's jurisdiction.

Under the Act and Board rules, both registered firms and their associated persons must comply with PCAOB rules and standards, as well as related laws. When an associated person with such a responsibility causes the firm with which he or she is associated to violate such rules, standards or laws, this conduct operates to the detriment of the protection of investors and the public interest and may bear on the ethics of the responsible associated person. When such a person engages in this conduct with knowledge that, or in reckless disregard of whether, it would directly and substantially contribute to the firm's violation, the Board believes this conduct plainly reflects an ethical lapse by the responsible person and, therefore, is within the Board's authority—and indeed responsibility—to proscribe.

At least one commenter asserted that the proposed rule was not a proper exercise of the Board's ethics standards-setting authority because it reached a range of conduct, rather than delineating "particular impermissible conduct." The Board disagrees and believes the type of conduct addressed by the rule is plainly the type of conduct the Board's ethics rules can and should address. In fact, the accounting profession's existing ethical code at the time of enactment of the Act reaches any act that may "discredit[]" the profession—thereby reaching ranges of conduct, including violations of certain laws, rather than just specifying "particular impermissible conduct."[17] When Congress vested the authority to set ethics standards in the Board, the Board believes it intended for this authority to be at least as broad as the scope of the existing ethics rules, at least as to matters within the Board's jurisdiction. This authority, in the Board's view, plainly includes the ability to require that persons subject to the Board's jurisdiction, as an ethical obligation, not cause a violation of relevant laws.

Commenters opposed to the proposed rule also sought to analogize the rule to a theory of liability that the Supreme Court rejected in *Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.*[18] In *Central Bank*, the Supreme Court held that that there is no private right of action for aiding and abetting a violation of Section 10(b) of the Securities Exchange Act of 1934 ("Exchange Act"). That decision turned on the fact that the text of Section 10(b)

---

[17] *See AICPA Code of Professional Conduct*, ET section ("sec.") 501, "Acts Discreditable" ("A member shall not commit an act discreditable to the profession."). Interpretations of this part of the ethical code provide that an accountant member will be considered to have committed a discreditable act if, among other things, he or she: "fails to comply with applicable federal, state or local [tax] laws or regulations," ET sec. 501.08, Interpretation 501-7; fails to follow applicable requirements of a governmental body, such as the SEC, in performing accounting services, ET sec. 501.06, Interpretation 501-5; or fails to follow government audit standards and rules in conducting a governmental audit, ET sec. 501.04, Interpretation 501-3.

[18] 511 U.S. 164 (1994).

does not provide for aiding-and-abetting liability.[19] The Board does not believe this decision affects the scope of the Board's explicit authority to set ethics standards under Section 103 of the Act.[20] Again, the Board notes that the profession's existing ethics code also reaches what can be characterized as "secondary" conduct contributing to a violation.[21]

The power to adopt Rule 3502 also is inherent in, and necessary to, the Board's authority to enforce PCAOB standards, rules, and related laws against both registered firms and their associated persons. Section 105 authorizes the Board to investigate and, when appropriate, discipline registered firms and their associated persons. Certain types of violations, by their nature, may give rise to direct liability only for a registered public accounting firm. Such firms, however, can only act through the natural persons that comprise them, many of whom are "associated persons" subject to the Board's ethics standards and disciplinary authority. When one or more of those associated persons has caused that firm to violate PCAOB standards, rules, or related laws with the requisite state of mind, it is appropriate, and consistent with the Board's duty to discipline registered firms and their associated persons under Section 101(c)(4) of the Act, that the Board be able to discipline the associated person for that misconduct.[22]

After carefully considering the comments received, the Board has determined, however, to modify the scope of Rule 3502 to apply only when an associated person causes the registered firm's violation due to an act or omission the person "knew, or was reckless in not knowing, would directly and substantially contribute to such violation." This revised formulation reflects two changes to the rule as proposed.

First, the Board has determined to change the state-of-mind requirement in the rule. Specifically, Rule 3502, as adopted, will apply to "an act or omission the [associated] person knew, or was reckless in not knowing," would cause the violation. While the Board believes it has the authority to adopt a negligence standard,[23] the Board believes the revised standard strikes the right balance in the context of this rule. The Board believes that the phrase "knew, or was reck-

---

[19] See id. at 190 ("Because the text of §10(b) does not prohibit aiding and abetting, we hold that a private plaintiff may not maintain an aiding and abetting suit under §10(b).").

[20] Rule 3502, of course, differs from an aiding-and-abetting cause of action in important respects. Among other things, the rule does not apply whenever an associated person causes another to violate relevant laws, rules and standards. Rather, Rule 3502 applies only when an associated person causes a violation by the registered firm with which the person is associated.

[21] *See AICPA Code of Professional Conduct*, paragraph .02(2) of ET sec. 91, "Applicability" ("A member shall not knowingly permit a person, whom the member has the authority or capacity to control, to carry out on his or her behalf, either with or without compensation, acts which, if carried out by the member, would place the member in violation of the rules. Further, a member may be held responsible for the acts of all persons associated with him or her in the practice of public accounting whom the member has the authority or capacity to control."); *see also* ET sec. 102.02, Interpretation 102-1(c) (violation of ethics rules not just to sign, but to "permit[] or direct[] another to sign a document containing materially false and misleading information") (adopted as a Board interim ethics rule in Rule 3500T).

[22] Some commenters suggested that the reference to "any act, or practice . . . in violation of this Act" in Section 105(c)(4)—the part of the Act authorizing the Board to impose certain sanctions—was inconsistent with the proposed rule. The Board notes, however, as it did in the proposing release, that Section 105(c)(5) expressly provides that the more severe of these sanctions may be imposed when intentional, knowing, or reckless conduct, or repeated instances of negligent conduct, "results in" violation of law, regulations, or professional standards.

[23] A number of commenters argued that Section 105(c) of the Act prevents the Board from imposing discipline based on a negligence standard. The Board's determination to change the rule's state-of-mind requirement to recklessness moots these comments. The Board notes, however, that Section 105(c)(5) identifies a range of sanctions that the Board may not impose in the absence of knowing conduct, reckless conduct, or repeated instances of negligent conduct. The Act does not similarly limit the Board's authority to impose certain other sanctions.

less in not knowing" is a wellunderstood legal concept, and the Board intends for the phrase to be given its normal meaning.

Second, the Board has determined to modify the phrase used to describe the connection between the associated person's conduct and the violation. Specifically, Rule 3502, as adopted, provides that the associated person's act or omission must "directly and substantially contribute to [the firm's] violation." In particular, "substantially" in this context means that the associated person's conduct (i.e., an act or omission) contributed to the violation in a material or significant way. The term "substantially" also means, however, that the associated person's conduct does not need to have been the sole cause of the violation. "Directly" means that the associated person's conduct either essentially constitutes the violation—even though it is the firm and not the individual that actually commits the violation—or is a reasonably proximate facilitating event of, or a reasonably proximate stimulus for, the violation. "Directly and substantially" does not mean that the associated person's conduct must be the sole cause of the violation, nor that it must be the final step in a chain of actions leading to the violation. In addition, the term "directly" should not be misunderstood to excuse someone who knowingly or recklessly engages in conduct that substantially contributes to a violation, just because others also contributed to the violation, or because others could have stopped the violation and did not. At the same time, the term does not reach an associated person's conduct that, while contributing to the violation in some way, is remote from, or tangential to, the firm's violation.

A number of commenters expressed concern that adoption of a negligence standard would allow the Board, or the SEC, to proceed against associated persons who in good faith, albeit negligently, have caused a registered firm to violate applicable laws or standards. For example, commenters suggested that the proposed rule could be used against compliance personnel within a firm who inadvertently design a firm's compliance system in a flawed manner. Commenters also expressed concern that, because the SEC can enforce PCAOB rules under Section 3 of the Act, the Board's rule could have the practical effect of altering the state-of-mind requirement applicable in SEC enforcement proceedings against accountants.

It was not the Board's intention to establish a new standard for SEC enforcement of the securities laws and related applicable rules. The Board also recognizes that persons subject to its jurisdiction must comply with complex professional and regulatory requirements in performing their jobs. The Board does not seek to create through this rule a vehicle to pursue compliance personnel who act in an appropriate, reasonable manner that, in hindsight, turns out to have not been successful. Nor does the Board seek to reach those whose conduct, unbeknownst to them, remotely contributes to a firm's violation. At the same time, the Board continues to believe that it is necessary and appropriate for its ethics rules to apply when an associated person has engaged in an act or omission with knowledge that, or in reckless disregard of whether, it would directly and substantially contribute to a violation.[24]

The Board also believes that, because the rule is essential to the functioning of the Board's independence rules, this rulemaking provides the appropriate forum to adopt the rule. For example, Rule 3521 provides, in part, that a registered firm is not independent of its audit client if the firm provides that audit client with a service for a contingent fee. When an associated person causes, in

---

[24] While the Board's proposed rule tracked some of the language of Section 21C of the Securities Exchange Act of 1934 ("Exchange Act'), the rule, as adopted, differs significantly from, and should not be interpreted in pari material with, that statutory provision.

a manner consistent with the discussion above, the registered firm to provide that service for a contingent fee, Rule 3502 would allow the Board to discipline the associated person for that conduct.[25]

B. Ethics and Independence

The final rules also create a foundation for the independence requirements of the Board's ethics rules. The rules introduce a new "Independence" subpart in the ethics rules. That subpart begins with Rule 3520, which articulates the fundamental independence requirement. The final rules also include additional rules that describe independence impediments in the particular context of contingent fee arrangements and tax services.

1. The Fundamental Independence Requirement

Rule 3520 sets forth the fundamental ethical obligation of independence: a registered public accounting firm and its associated persons must be independent of the firm's audit client throughout the audit and professional engagement period. This requirement encompasses the independence requirements set out in PCAOB Rule 3600T and goes further, as a matter of the auditor's ethical obligation, to encompass any other independence requirement applicable to the audit in the particular circumstances. Accordingly, in the case of an audit client subject to the financial reporting requirements of the securities laws and the SEC's rules, the ethical obligation under Rule 3520 requires the firm and its associated persons to maintain independence consistent with the SEC's requirements.[26]

By giving this scope to Rule 3520, the Board is not promulgating any new independence requirement. The Commission's independence requirements exist independently of Rule 3520 and are subject to change at the discretion of the Commission, without Rule 3520 purporting separately to lock in place any aspect of those requirements. Instead, Rule 3520 is based on the simple premise that ethical standards for auditors can and should encompass a duty by the auditor to maintain independence necessary to ensure compliance with independence requirements in the circumstances of the particular engagement.

A note to the rule emphasizes the scope of the obligation in the rule by pointing out that, even in circumstances to which the Commission's Rule 2-01 applies, a registered public accounting firm and its associated persons still may need to comply with other independence requirements, including those requirements separately established by the Board. Using this foundation, the Board may adopt additional rules in the "Independence" subpart of the ethics rules that effectively set out additional requirements. As described below, with the new rules adopted today, the Board's independence rules include contingent fee arrangements and tax services.

After carefully considering the comments on proposed Rule 3520, the Board has determined to adopt the rule, with only one change. Most commenters supported the scope and content of the proposed rule. A few commenters, however, asked

---

[25] Rule 3502, of course, is not the exclusive means for the Board to enforce applicable Board rules and standards against associated persons. Among other provisions, Rules 3100 and 3200T through 3600T directly require associated persons to comply with certain auditing and related professional practice standards. In addition, PCAOB standards generally contain directives to the "auditor." The term "auditor" is defined in PCAOB Rule 1001(a)(xii) to include both registered firms and their associated persons. Accordingly, an associated person of a registered firm that does not comply with such a directive may be charged with violations of such other standards, independent of any charges under Rule 3502.

[26] 17 C.F.R. § 210.2-01.

the Board to add text to the proposed rule to clarify or emphasize that the rule incorporates certain concepts in the existing independence requirements. While these comments are discussed in more detail below, the Board did not adopt these suggestions, as a general matter, because of the purpose of Rule 3520. Rule 3520 was simply intended to require, by Board rule, compliance with applicable independence requirements. The rule was not intended to, and does not, add to—or subtract from—these existing requirements. Nor is it intended to reflect the Board's conceptual approach to independence issues. Accordingly, while the Board does not necessarily disagree with the intent of the commenters who suggested adding text to the proposed rule, it does not believe it is necessary or appropriate to modify the rule to reflect their specific suggestions.

Three commenters suggested that Rule 3520 expressly require that auditors maintain independence from their audit client "both in fact and appearance." As proposed, the rule already requires auditors to maintain independence both in fact and appearance, because the SEC's independence rules—which are incorporated in Rule 3520, as discussed above—are "designed to ensure that auditors are qualified and independent of their audit clients both in fact and in appearance."[27] In addition, Statement on Auditing Standard ("SAS") No. 1, Codification of Auditing Standards and Procedures, adopted by the Board as an interim standard, requires that auditors "not only be independent in fact; [but also] avoid situations that may lead outsiders to doubt their independence."[28] Therefore, the Board does not believe it is necessary to include this additional language in Rule 3520 to preserve these existing principles.

Some commenters also recommended that Rule 3520 expressly include the SEC's four overarching independence principles that it will look to in determining whether a particular service or client relationship impairs the auditor's independence.[29] Other commenters asked the Board to explicitly note in the rule that certain tax services are consistent with the SEC's four principles. For the reasons described above, the Board has decided not to change the rule in response to either of these suggestions. The Board notes, however, that the SEC's independence rules already refer to the four principles, and these rules must be complied with under Rule 3520.

Two commenters suggested that Rule 3520 include the text of the American Institute of Certified Public Accountants' ("AICPA") Ethics Rule 102, which provides, in pertinent part, that members of the AICPA should avoid any subordination of their judgment.[30] Although the Board shares these commenters' view about the importance of this principle, the Board has already adopted Ethics Rule 102 as part of its interim ethics rule, Rule 3500T. Accordingly, this rule is already part of the Board's ethical standards and need not be separately repeated in Rule 3520 to be enforced by the Board.

Two firms suggested that Rule 3520, as proposed, might have the effect of precluding use of exceptions in the SEC's existing independence rules and asked

---

[27] 17 C.F.R. § 210.2-01, Preliminary Note 1; *accord United States v. Arthur Young & Co.*, 465 U.S. 805, 819 n.15 (1984).

[28] SAS No. 1, *Codification of Auditing Standards and Procedures*, paragraph .03 of AU sec. 220. The standard further states that "[p]ublic confidence would be impaired by evidence that independence was actually lacking, and it might also be impaired by the existence of circumstances which reasonable people might believe likely to influence independence." *Id*.

[29] *See* 17 C.F.R. §210.2-01, Preliminary Note 2. Specifically, under those principles, the SEC looks to whether a relationship or the provision of a service: (a) creates a mutual or conflicting interest between the accountant and the audit client; (b) places the accountant in the position of auditing his or her own work; (c) results in the accountant acting as management or an employee of the audit client; or (d) places the accountant in a position of being an advocate for the audit client.

[30] *See AICPA Code of Professional Conduct*, ET sec. 102, "Integrity and Objectivity".

the Board to avoid that result. Other than creating a requirement in a Board rule to comply with existing and applicable independence requirements, it does not add to, or detract from, the scope and substantive effect of these existing requirements in any respect.

The Board has, however, as suggested by a commenter, added "associated persons" to the rule. While the independence requirements added to the Board's rules through this rulemaking apply to the firm, other independence requirements covered by Rule 3520 are directed to individual accountants within auditing firms. Most notably, certain of the SEC's independence rules impose independence requirements directly on individual accountants.[31] Accordingly, the Board believes it is appropriate for the rule to apply to associated persons, as well as registered firms themselves. At the same time, the Board has added a new note to the rule to make clear that the rule applies only to those associated persons of a registered public accounting firm that are required to be independent of the firm's audit client by standards, rules, or regulations of the Commission or other applicable independence criteria.[32] Accordingly, the rule does not impose independence requirements on persons not already subject to them, and does not impose new independence requirements on any associated person. Rather, Rule 3520 only requires associated persons who are otherwise subject to independence requirements to comply, as an ethical obligation, with those requirements.

2. Contingent Fees

The Board also has determined to adopt Rule 3521 as proposed. There was widespread support among commenters for the Board's view, expressed in the proposal, that certain fee arrangements used for the provision of tax services create per se conflicts of interest that impair auditors' independence from their audit clients. As discussed more fully in the proposing release, when an accounting firm provides a service to an audit client for a contingent fee, the firm's economic interests become aligned with the interests of its audit client in a manner that is inconsistent with the firm's role as independent auditor. The Board's rule was adapted from the SEC's rule prohibiting contingent fee arrangements[33]and thus treats registered firms as not independent if they enter into contingent fee arrangements with audit clients.

Specifically, Rule 3521 provides that a registered public accounting firm is not independent of its audit client[34]if the firm, or any affiliate of the firm,[35] during the audit and professional engagement period,[36] provides any service or product to the audit client for a contingent fee or a commission, or receives from the audit client, directly or indirectly, a contingent fee or commission. The Board's

[32] Other applicable independence criteria include any rules of the PCAOB, other than Rule 3520, that contain independence requirements directly applicable to associated persons of the firm, such as Rule 3600T.

[33] *See* 17 C.F.R §210.2-01(c)(5).

[34] Rule 3501(a)(iv) defines "audit client" as "the entity whose financial statements or other information is being audited, reviewed, or attested and any affiliates of the audit client."

[35] Rule 3501(a)(ii) defines "affiliate of the accounting firm" as "the accounting firm's parents; subsidiaries; pension, retirement, investment or similar plans; and any associated entities of the firm, as that term is used in Rule 2-01 of the Commission's Regulation S-X, 17 C.F.R. §210.2-01(f)(2)."

[36] Rule 3501(a)(iii) adapts the definition of "audit and professional engagement period" from the definition of that term in Rule 2-01 of the SEC's Regulation S-X, which includes both the period covered by the financial statements under audit or review and the period beginning when a registered public accounting firm signs an initial engagement letter (or when such a firm begins audit, review or attest procedures, whichever is earlier) and ends when the audit client notifies the SEC that the engagement has ceased. *See* 17 C.F.R. §210.2-01(f)(5).

definition of a contingent fee is "any fee established for the sale of a product or the performance of any service pursuant to an arrangement in which no fee will be charged unless a specified finding or result is attained, or in which the amount of the fee is otherwise dependent upon the finding or result of such product or service."[37]

Fees fixed by courts or other public authorities and not dependent on a finding or result are excluded from this definition to permit contingencies that do not pose a risk of establishing a mutual interest between the auditor and the audit client. In the proposing release, the Board cited, as an example of such a permissible fee, fees approved by a bankruptcy court, as required under U.S. federal bankruptcy law.[38] The Board also sought comment on whether there are courts or other public authorities that fix fees that are not dependent on a finding or result, other than bankruptcy courts, such that the term "courts or other public authorities" is necessary.

In response to this request, several commenters noted that they are not aware of any such authorities and encouraged the Board to eliminate the reference to "other public authorities" from the proposed rule. Other commenters suggested that the Board retain the phrase, even though they did not identify other contexts in which fees that are not contingent on a result of a "product or service" are nevertheless subject to approval by a court or other public authority.[39] After considering these comments, the Board has decided to retain the exception for fees that require approval of "courts or other public authorities." The Board envisions that there may be fee approval schemes outside the U.S. that are analogous to U.S. bankruptcy law.

Although Rule 3521 and the related definition of "contingent fee" are modeled on the SEC's independence rules, as discussed in the Board's proposing release, they differ from those rules in that the Board's rules do not include the SEC's exception for fees "in tax matters, if determined based on the results of judicial proceedings or the findings of governmental agencies."[40] As discussed in the Board's proposing release, this exception may have been misinterpreted in the past and is largely redundant of the exception for fees fixed by courts or other public authorities.[41] For these reasons, proposed Rule 3521 would eliminate

---

[37] Rule 3501(c)(ii). As discussed in the Board's proposing release, the term "contingent fee" includes the aggregate amount of compensation for a service, including any payment, service, or promise of other value, taking into account any rights to reimbursements, refunds, or other repayments that could modify the amount received in a manner that makes it contingent on a finding or result.

[38] 11 U.S.C. § 328(a) (providing that, with a court's approval, a bankruptcy trustee may employ a professional person "on any reasonable terms and conditions of employment, including on a retainer, on a fixed or percentage fee basis, or on a contingent fee basis").

[39] One commenter suggested that arbitration panels should be captured in the final rule as an example of "courts or other public authorities" that may approve auditor fees. The Board is not aware, and the commenter did not appear to suggest, that any arbitration panels currently have authority, by contract or law, to approve the payment of fees to accountants. Therefore, the Board has not expanded the exception to include fees fixed by arbitration panels. Nevertheless, if an arbitration panel were by contract given the authority to approve accountants' fees, such fees would be permissible under the Board's rule so long as the determination of the fee was not contingent on the result of a product or service.

[40] 17 C.F.R. § 210.2-01(f)(10). By eliminating this exception from its rule, the Board expresses no view on any firm's compliance with Rule 2-01 of the Commission's Regulation S-X. *See* 17 C.F.R. §210.2-01(c)(5).

[41] As the SEC Chief Accountant has stated, the SEC's "tax matters" exception only permits fee arrangements where the determination of the fee is "taken out of the hands of the accounting firm and its audit client . . ., with the result that the accounting firm and client are less likely to share a mutual financial interest in the outcome of the firm's advice or service." Letter from Donald T. Nicolaisen, Chief Accountant, U.S. Securities and Exchange Commission, to Bruce P. Webb, Professional Ethics Executive Committee Chair, American Institute of Certified Public Accountants (May 21, 2004), *available at* http://www.sec.gov/info/accountants/staffletters/webb052104.htm (hereinafter "Nicolaisen Letter").

this exception. The few commenters who addressed this issue agreed with the Board's reasoning and the elimination of this exception. Therefore, the Board's final rule does not include an exception for tax matters in which an auditor's fee agreement is based on the results of judicial proceedings or the findings of governmental agencies.

In addition, Rule 3521 treats a firm as not independent of an audit client if it receives a contingent fee or commission from that client "directly or indirectly." The rule's use of the term "indirectly" is meant to prevent arrangements for a fee from any person that is contingent on a finding or result attained by the audit client. The Board's determination to include such fees within the prohibition is based on the principle that, regardless of who pays the contingent fee, such a contingency gives an auditor a stake in the audit client attaining the finding or result. Accordingly, under Rule 3521, it does not matter who pays the contingent fee, if it is contingent on a finding or result attained by the audit client or otherwise related to the firm's services for the audit client. That is, while use of an intermediary to disguise an audit client's agreement to a contingent fee is certainly prohibited, the rule is not limited to circumstances in which a contingent fee may be traced (e.g., through an intermediary) to an agreement or payment by an audit client.

Comparable to the SEC's independence rules, proposed Rule 3521 treats contingent fee arrangements between a registered firm's affiliates and the registered firm's audit clients as relevant to the firm's independence.[42] The inclusion of such affiliates within the scope of those persons whose activities may impair the independence of a firm from an audit client is intended to prevent frustration of the rule's purpose through the use of firm subsidiaries and other affiliates.[43] The rule is not intended to, and does not, impose any requirements on affiliates of firms *per se*. Nonetheless, the conduct of an affiliate of the firm can cause the registered firm not to be independent in the situations specified in the rules.

Finally, one accounting firm commented that Rule 3521 should prohibit value-added fees because such fees could be used in lieu of contingent fees to achieve a similar effect as contingent fees. Fees that function as contingent fee arrangements are already prohibited under the SEC's rule against contingent

---

[42] The rule does so by providing that the firm is not independent if it "or any affiliate of the firm . . . provides any service or product to the audit client for a contingent fee or a commission, or receives from the audit client, directly or indirectly, a contingent fee or commission." The scope of the rule is intended to be the same as the scope of the Commission's rule, which defines the terms "accountant" and "accounting firm" to include such affiliates. Because registration with the Board is the basis for the Board's authority over an accountant, the rules would treat those persons that are related to a registered public accounting firm and satisfy the Commission's definition of "accounting firm," but are not registered firms themselves, as "affiliates of the accounting firm." Thus, Rule 3501(a)(i) would adapt the Commission's definition of the term "accounting firm" to define the term "affiliate of the accounting firm" as "the accounting firm's parents, subsidiaries, pension, retirement, investment or similar plans, and any associated entities of the firm, as that term is used in Rule 2-01 of the Commission's Regulation S-X, 17 C.F.R. §210.2-01(f)(2)."

[43] *See*, e.g., *In re PricewaterhouseCoopers LLP, & PricewaterhouseCoopers Securities LLC*, Exchange Act Release No. 46,216 (July 17, 2002), *available at* http://www.sec.gov/litigation/admin/34-46216.htm (finding an auditing firm and an affiliate under the control of the firm in violation of Commission requirements because the affiliate performed investment banking services for the firm's audit clients for contingent fees); In *KPMG, LLP v. Securities & Exch. Comm'n*, 289 F.3d 109 (D.C. Cir. 2002), the D.C. Circuit Court declined to find KPMG in violation of the AICPA's rule against contingent fees, where KPMG only indirectly received a contingent royalty from an audit client, through an associated entity of the firm. The Board's rules should be understood, however, to treat such an arrangement as an impairment of a registered firm's independence.

fees,[44] and thus under the Board's final rule as well, whether such fees are labeled contingent fees, value-added fees, or otherwise. The SEC has indicated that it will closely monitor the use of valueadded fees "to determine whether a fee labeled a "value added" fee is in fact a contingent fee, such as where there are side letters or other evidence that ties the fee to the success of the services rendered,"[45] and the Board intends to do so as well before, if necessary, considering additional rulemaking.

3. Aggressive Tax Positions

Rule 3522 is intended to describe a class of tax-motivated transactions that present an unacceptable risk of impairing an auditor's independence if the auditor markets, plans, or opines in favor of, such a transaction. As discussed in the Board's proposing release, such conduct has seriously damaged investors' confidence in the judgment, objectivity, and ethics of firms that engage in such transactions. Further, aggressive tax positions carry a high risk that taxing authorities will not allow the position taken by the auditor and the audit client. As the SEC Chief Accountant noted in the context of contingent fees, "the fact that a government agency might challenge the amount of the client's tax savings . . . heightens . . . the mutuality of interest between the firm and client."[46]

As proposed, Rule 3522 treated a firm as not independent of its audit client if the firm, or an affiliate of the firm, provided services related to planning, or opining on the tax consequences of a transaction that is a listed or confidential transaction under U.S. Department of Treasury ("Treasury") regulations or that promoted an interpretation of applicable tax laws for which there is inadequate support. In order to describe such transactions in a manner that is clear and consistent with existing constructs for analyzing tax-oriented transactions, the rule is adapted from certain Treasury regulations and from the SEC's release accompanying its 2003 independence rules.

Commenters generally supported the notion that auditors should not provide tax services involving aggressive tax positions to their audit clients. They also supported the scope of Rule 3522, which as proposed covered listed transactions, confidential transactions, and other aggressive transactions. A number of commenters made suggestions to make the rule text clearer, however, and after considering such comments the Board has modified the rule in several respects.

First, several commenters suggested that the rule should make clear that it does not prohibit auditors from advising audit clients *not* to engage in an aggressive transaction. Rule 3522 was not intended to prevent such advice, so in response to these comments the Board has modified the rule to make clear the prohibition on opining on aggressive transactions is limited to "opining *in favor of* the tax treatment of" such transactions (emphasis added). Thus, auditors are permitted

---

[44] *See* Revision of the Commission's Auditor Independence Requirements, SEC Release No. 33-7919, §IV.D.5 (Nov. 21, 2000), 17 C.F.R. Parts 210, 240. Indeed, the SEC staff has cautioned audit committees against approving—

> any agreement—from a direct contract provision to "a wink and a nod"—that provides for the possible additional payment of a "value added" fee based on the results of an accounting firm's performance of a tax or other service [that] would be viewed as impairing the firm's independence. In addition, an audit committee should consider carefully the impact on an accounting firm's independence of the possibility of even a completely voluntary payment of a "value added" fee by an audit client to the firm.

Nicolaisen Letter, *supra* note 41.

[45] *See* Revision of the Commission's Auditor Independence Requirements, SEC Release No. 33-7919, §IV.D.5 (Nov. 21, 2000), 17 C.F.R. 210, 240.

[46] Nicolaisen Letter, *supra* 41.

to advise *against* an audit client's execution of an aggressive tax transaction.[47] However, Rule 3522 prohibits an opinion that a transaction does not satisfy the more-likely-than-not standard but does satisfy a lower standard of confidence. Similarly, the rule prohibits advice that an audit client will "probably" lose an argument in favor of a tax treatment, because such advice can imply up to a 49-percent chance of success.

In addition, as recommended by one commenter, given recent concerns about accounting firms establishing marketing centers to sell tax shelter products, the Board has added the term "marketing" to the list of activities that compromise an auditor's independence. That is, under Rule 3522, as adopted, an auditor may not market an aggressive tax transaction to an audit client, in addition to being prohibited from "planning, or opining in favor of the tax treatment of," such a transaction.

Finally, proposed Rule 3522(a)'s prohibition on auditors' involvement in listed transactions has been moved to become a part of the prohibition on involvement in aggressive tax position transactions, in light of the overlap of the two provisions and also in light of questions regarding whether the prohibition on listed transactions could apply in the context of a non-U.S. tax regime. Accordingly, Rule 3522 now provides for two categories of prohibitions related to aggressive tax transactions, whereas, as proposed, it had provided for three such categories. These two categories, as well as modifications of their proposed versions, are discussed below.

a. Aggressive Tax Position Transactions[48]

Rule 3522(b) would treat a registered firm as not independent if the firm, or an affiliate of the firm, provided an audit client any service related to marketing, planning, or opining in favor of the tax treatment of, a transaction that satisfies three criteria—

- the transaction was initially recommended, directly or indirectly, by the firm;
- a significant purpose of the transaction is tax avoidance; and
- the proposed tax treatment of the transaction is not at least more likely than not to be allowed under applicable tax laws.

Rule 3522(b) is adapted from the SEC's guidance to audit committees in its release accompanying its 2003 independence rules, which cautioned that audit committees should "scrutinize carefully" the retention of the auditor "in a transaction initially recommended by the accountant, the sole business purpose of which may be tax avoidance and the tax treatment of which may be not supported in the Internal Revenue Code and related regulations."[49] The rule builds on this guidance from the perspective of the auditor, by providing that a

---

[47] In addition, a number of commenters asked for clarification of the scope of Rule 3522's prohibition against "opining" on an aggressive transaction. The Board does not intend the rule to encompass the auditor's opinion on the fairness of financial statements that reflect the accounting for a transaction that an audit client has executed. Rather, Rule 3522 is intended to prevent auditors from facilitating clients' execution of aggressive transactions by, among other things, providing auditors' written tax opinions that protect the audit client from the assertion of penalties by tax authorities or courts.

[48] As proposed, this provision was entitled "aggressive tax positions." One commenter questioned whether this title was intended to expand the scope of this provision beyond transactions. In addition, the commenter noted that the term "transaction" was consistent with Treasury regulations. In response to this comment, the Board has re-titled this provision to be "aggressive tax position transactions."

[49] Strengthening the Commission's Requirements Regarding Auditor Independence, *supra* note 2, at §II.B.11 (Jan. 28, 2003).

registered firm is not independent of its audit client if the firm, or an affiliate of the firm, participates in such a transaction.

The first prong of the rule's test looks for transactions that the auditing firm—directly or indirectly, e.g., through an affiliate, through or with another tax advisor with which the firm has an arrangement, or otherwise—initially recommended to the audit client. In this manner, the rule excludes from its scope those transactions that the audit client itself, or a party other than a tax advisor with which the firm has an arrangement[50](e.g., an acquiring corporation), initiated. The term "initially recommended" is intended to be a test based on fact. Thus, the prong would be satisfied, notwithstanding a representation from the audit client that the audit client initiated the development of the transaction,[51] if the auditor had knowledge that the auditor, its affiliate, or another tax advisor with which the firm has an arrangement, initially recommended it. As proposed, the rule would have looked for transactions that were "initially recommended by the registered public accounting firm or another tax advisor." Some commenters expressed concern that an auditor might not be in a position to know whether another tax advisor with no relationship to the auditor had recommended a transaction. In response to these comments, the Board has modified the first prong of Rule 3522(b) to make clear that auditors are only responsible for ascertaining whether the firm, one of its affiliates, or another tax advisor with which the firm has a formal agreement or other arrangement related to the promotion of such a transaction, initially recommended the transaction.[52]

The second and third prongs of Rule 3522(b) incorporate concepts that have existing meaning and relevance to tax advisors. The second prong of the test set forth in Rule 3522(b) uses the phrase "significant purpose of which is tax avoidance," adapted from the Internal Revenue Code.[53] The term "tax avoidance" should be understood to include acceleration of deductions into earlier taxable years and deferral of income to later taxable years. A few commenters noted that the test whether a significant purpose of a transaction is tax avoidance appears to be a low threshold that could encompass any plan to reduce taxes, and some of those commenters suggested that the Board raise that threshold. The Board intends for the threshold to be low, however, and therefore has not used terms that might seem to establish a higher threshold, such as requiring an evaluation of whether the "sole purpose" of a transaction is tax avoidance.

In addition, the rule uses the term "more likely than not to be allowable under applicable tax laws," which is the standard certain taxpayers must meet, under Treasury regulations, to avoid penalties for substantial understatement

---

[50] The term "tax advisor" is not intended to denote a group with a certain license or professional status, but rather to cover any person, other than the client, that recommends a tax transaction to the client.

[51] Two commenters indicated that, as they interpreted the term "transaction," an auditor's tax services in connection with, for example, a merger transaction that was initiated by the client or another company, would not come within the ambit of Rule 3522(b), because the auditor would not have recommended the merger transaction itself. This is not a fair interpretation of the rule and indeed would thwart its purpose.

[52] *See* Rule 3522(b), Note 2. The term "formal agreement or other arrangement" in Note 2 relates only to relationships a registered firm may have with a tax advisor that is not already an affiliate of the firm.

[53] The Internal Revenue Code treats transactions with respect to which a "significant purpose . . . is the avoidance or evasion of Federal income tax" as tax shelters, for purposes of determining whether an adequate disclosure defense is available for the substantial understatement penalty. *See* 26 U.S.C. §6662(d)(2)(C) (amended by the Jobs Act; *see also* 26 U.S.C. §6662A(b)(2)(B) (imposing 20-percent penalty on understatements of tax in connection with "any reportable transaction (other than a listed transaction) if a significant purpose of such transaction is the avoidance or evasion of Federal income tax").

of income tax in connection with a tax shelter.[54] This test is based, in part, on the Board's observation of some firms' policies that rely on the "more likely than not" standard to approve the firm's involvement in providing tax services relating to a transaction initiated by the firm. The rule also uses this standard because a tax treatment that is not "more likely than not" to be allowed poses a significantly higher risk of being challenged by taxing authorities, such that a mutuality of interest between the auditor and the audit client could arise.[55] Moreover, the rule uses this standard, as opposed to a higher standard, in recognition of the fact that tax laws may often be complex and subject to differing good faith interpretations.[56]

In order to satisfy Rule 3522(b)'s "more likely than not" standard, a registered public accounting firm must establish, based on an analysis of the pertinent facts and authorities, that there is a greater than 50-percent likelihood that the tax treatment of the transaction would, if challenged, be upheld.[57] To satisfy this test, an auditor's analysis must be objectively reasonable and well-founded at the time the analysis is conducted. The Board would not, however, treat an auditor as not independent if the law changed after the service was provided or if the tax treatment simply turned out to be not allowed, despite the auditor's reasonable judgment before the ultimate resolution of a tax claim or other dispute.

Rule 3522(b) does not require a registered public accounting firm to obtain a third-party opinion that a tax treatment is "more likely than not" to be allowed under applicable tax laws. On the contrary, while a firm may decide for its own reasons to obtain a third-party opinion, such an opinion would not relieve the firm of its obligation to form its own judgment on the likelihood of a proposed tax treatment to be allowed.[58]

Finally, although the SEC's release accompanying its 2003 independence rules cautioned audit committees to scrutinize situations in which a proposed tax treatment might not be supported "in the Internal Revenue Code and related

---

[54] *See* 26 C.F.R. §1.6664-4(f).

[55] Some commenters noted that, while the term "more likely than not" is wellunderstood in the context of evaluating U.S. tax advice, it has not been used in non- U.S. contexts. One of these commenters also noted that this standard may be hard to judge in jurisdictions in which the rule of law does not always prevail. After considering these comments, the Board has determined to maintain the "more likely than not standard," because it is an objective standard that may be applied in contexts outside the U.S. even where it has not applied to-date. Further, the Board notes that foreign private issuers ordinarily file U.S. tax returns and therefore are already expected to comply—and be familiar with—U.S. tax laws and regulations.

[56] A few commenters recommended that the Board use a standard higher than "more likely than not," on the ground that there is some evidence that some accounting firms that used the "more likely than not" standard in the past have not adhered to it. While the Board is concerned about the record on this issue, the Board has determined not to use a higher standard at this time. The Board intends to monitor compliance with the rule through its inspections of registered public accounting firms and will consider revising the rule in the future, if that monitoring or other evidence reveals that the rule is not achieving its intended purpose.

[57] Cf. 26 C.F.R. §1.6664-4(f)(2)(i)(B)(1) (incorporating by reference methodology set forth in 26 C.F.R. §1.6662-4(d)(3)(ii) for analysis of whether a tax treatment has "substantial authority" or, in the case of tax shelters, is "more likely than not" the proper treatment, for purposes of determining whether a penalty may be due on a substantial understatement of income tax).

[58] Treasury regulations permit corporations to avoid penalties for substantial understatement of income taxes in connection with tax shelters if they "reasonably rel[y] in good faith on the opinion of a professional tax advisor, if the opinion is based on the tax advisor's analysis of the pertinent facts and authorities . . . and unambiguously states that the tax advisor concludes that there is a greater than 50-percent likelihood that the tax treatment of the item will be upheld if challenged by the Internal Revenue Service." 26 C.F.R. § 1.6664-4(f)(2)(i)(B)(2). Rule 3522(b) would not permit registered public accounting firms, who themselves serve as tax advisors, to rely on other tax advisors to satisfy the rule's standard because registered firms that provide tax services are themselves in a position to perform such an analysis.

regulations," the proposed rule would use the term "applicable tax laws" in recognition of the variety of tax laws and regulations, including federal, state, local, foreign, and other tax laws, that may be the subject of tax services. For this reason, and in response to questions from several commenters, the Board also incorporated its proposed prohibition on auditors providing tax services in connection with transactions that are listed by the IRS into Rule 3522(b). That is, IRS listing is one example of aggressive tax transactions covered by the rule.

Accordingly, the prohibition on advising in favor of listed transactions, which was proposed as Rule 3522(a), has been moved to a note to what is now Rule 3522(b). Specifically, Note 1 to Rule 3522(b) treats a registered public accounting firm as not independent of its audit client if the firm, or any affiliate of the firm, provided services related to marketing, planning, or opining in favor of the tax treatment of, a listed transaction. Under Treasury regulations, a listed transaction is "a transaction that is the same as or substantially similar to one of the types of transactions that the IRS has determined to be a tax avoidance transaction and identified by notice, regulation, or other form of published guidance as a listed transaction."[59] The IRS uses its listing process to identify and publish a list of transactions that tax promoters and advisors have developed and sold to clients but that, in the IRS's view, do not comply with applicable laws. Thus, the Treasury's regulation on "listed transactions" identifies a class of transactions that, in the Board's view, carries an unacceptable risk of disallowance, which in turn create an unacceptable risk of establishing a mutuality of interest between the auditor and the audit client if the auditor participated in marketing, planning, or opining in favor of the tax treatment of a transaction that impairs independence. By referring to this class of transactions, Note 1 to Rule 3522(b) incorporates an existing framework that auditors who serve as tax advisors already follow in their tax practices and that is highly likely to remain current since the Treasury and the IRS regularly update guidance related to listed transactions.[60]

As discussed above, the Board's proposed prohibition on auditor involvement in transactions that are "listed" by the IRS has been moved to a note to Rule 3522(b). By definition, a listed transaction is not "more likely than not to be allowable under applicable tax laws" at the time the auditor advises on it. Because the risk of IRS or other scrutiny of listed transactions, including transactions that are substantially similar to listed transactions,[61] is high, tax advisors and taxpayers tend not to enter into such transactions once they are listed. In light of this fact, when it proposed this rule, the Board sought comment on whether the rule should treat an auditor as not independent if a transaction planned or opined on by the auditor subsequently became listed. In general, commenters recommended against adopting a *per se* rule that subsequent listing of such a transaction impaired an auditor's independence with respect to either the period in which the transaction was executed or in subsequent periods. The Board

---

[59] *See*, e.g., 26 C.F.R. §1.6011-4(b)(2).

[60] The IRS updates the list of listed transactions by issuing a listing notice, both adding to and removing transactions from the list of listed transactions. *See*, *e.g.*, IRS Notice No. 2004-67, 2004-41 I.R.B. 600. Some commenters questioned whether the Board should effectively incorporate the IRS's changes to its list into the Board's rule on aggressive transactions. This is, indeed, the Board's intention. To freeze the IRS's list as of the date of the Board's final rule, or to establish a system of reviewing the IRS's list as it is updated, might permit auditors to provide tax services in favor of listed transactions notwithstanding that the IRS had identified those transactions as potentially abusive. Such a system would thwart the underlying intent of the Board's rule.

[61] By its terms, the Treasury regulation requiring reporting of listed transactions makes clear that the definition of "listed transaction" includes transactions that have been listed by the IRS as well as transactions that are "substantially similar" to such transactions. By expressly referring to the Treasury's regulation on listed transactions, the Board intends Rule 3522(b) to encompass such substantially similar transactions that are included in the Treasury's regulation.

agrees that such a *per se* rule would not be appropriate, but as discussed below, firms should nevertheless be cautious in participating in transactions that they believe could become listed.

Even if a firm were independent at the time a transaction was executed, because it reasonably and correctly concluded the transaction was not the same as, or substantially similar to, a listed transaction, once a transaction is actually listed (or a substantially similar transaction becomes listed), a firm that has participated in the transaction may find its independence impaired due to the mutuality of interest caused by the listing. That is, depending on the circumstances, a firm's independence may become impaired in some cases after a transaction planned or opined on by the firm becomes listed. In such cases, the auditor should carefully consider the potential impairment of its independence with the audit committee of its audit client.[62] For example, once a transaction is listed, either the audit client or the firm, or both, may be required to defend the tax treatment of the transaction and, in some cases, pay penalties. In addition, the firm may face liability to the audit client related to the firm's tax advice. The auditor's judgment regarding appropriate financial reporting and disclosure concerning a transaction that becomes listed could become biased by the auditor's vested interests in defending its tax advice.

Some auditors commented that they would prefer a bright-line rule providing that, so long as a transaction recommended by the firm was not listed at the time it was executed, subsequent listing cannot impair an auditor's independence later in time, when the auditor is called on to defend its earlier tax advice. Such a bright-line rule, however, would do little to address circumstances in which, because of IRS scrutiny after execution of the transaction, the auditor's interest in the client's successful defense of the transaction becomes heightened to the point where the auditor can no longer be impartial about the financial statement presentation of the transaction. That said, as some commenters noted, existing independence requirements address these kinds of circumstances, and thus the Board has determined not to expand Rule 3522(b) either to retroactively deem an auditor not independent upon subsequent listing of a transaction or to deem an auditor not independent *per se* in the period in which such a transaction becomes listed.

b. Confidential Transactions

The Treasury has identified transactions with tax-advisor imposed conditions of confidentiality as potentially abusive. By regulation, the Treasury requires taxpayers to disclose to the IRS transactions in which a tax advisor "places a limitation on disclosure by the taxpayer of the tax treatment or tax structure of the transaction and the limitation on disclosure protects the confidentiality of that advisor's tax strategies."[63] Tax-advisor imposed confidentiality may also be indicative of a tax product that a tax advisor intends to market to multiple customers, thus necessitating commitments by customers to treat the tax treatment or structure of the advisor's product as confidential.

As discussed in the proposing release, the Board is concerned that marketing, planning, or opining in favor of tax products that require confidentiality in order that they may be offered to multiple clients contributes to the erosion of public confidence in the ethics and integrity of such firms. A reasonable investor easily

---

[62] According to ISB Standard No. 1, which is incorporated in the Board's Rule 3600T interim independence standards, at least annually, an auditor must "disclose to the audit committee of the company (or the board of directors if there is no audit committee), in writing, all relationships between the auditor and its related entities and the company and its related entities that in the auditor's professional judgment may reasonably be thought to bear on independence."

[63] 26 C.F.R. § 1.6011-4(b)(3)(ii).

could infer that the auditor has a vested interest in advocating to the IRS the tax treatment it promoted, or helped to promote, to multiple clients and perpetuating that treatment in the audit client's financial statements. Based on these concerns, Rule 3522(a) treats a registered public accounting firm as not independent of its audit client if the firm, or an affiliate of the firm, provided services related to marketing, planning, or opining in favor of the tax treatment of a transaction for an audit client under terms that satisfy the definition of "confidential transaction," as defined by Rule 3501(c)(i), which is adapted from the Treasury's regulation requiring tax advisors to report confidential transactions.[64]

It should be noted that, Rule 3501(c)(i) defines confidential transactions in terms of confidentiality restrictions imposed by tax advisors generally, not specifically auditors. Therefore, whereas under Rule 3522(b) a transaction that is initially recommended by a tax advisor other than the auditor or an affiliate of the auditor unless the tax advisor has an arrangement with the auditor does not fall within the first prong of the rule, Rule 3522(a) prohibits an auditor from marketing, planning, or opining in favor of a confidential transaction whether the applicable terms of confidentiality are imposed by the auditor or by another tax advisor, acting independently of the auditor.

Commenters generally supported the Board's proposed prohibition on confidential transactions. Although some commenters expressed the view that tax advisors might impose conditions of confidentiality for reasons other than the ability to market the proposed transaction to multiple clients, other commenters agreed that auditors should not become involved in transactions subject to tax-advisor imposed confidentiality restrictions. One accounting firm commenter also noted that, even if a transaction were not potentially abusive, the fact that there is a disclosure limitation is likely to create a negative impression concerning the objectivity of the auditor.

In addition, a few commenters suggested that the rule be limited to circumstances in which terms of confidentiality are imposed with respect to the U.S. tax treatment of a transaction. After carefully considering these comments, the Board has determined not to modify the scope of the rule. Tax-advisor imposed conditions of confidentiality facilitate aggressive selling of novel tax ideas that pose too great a risk of impairing the objectivity of auditors who market, plan, or opine in favor of them. Further, the rule continues to permit audit clients themselves to impose conditions of confidentiality in connection with transactions

---

[64] 26 C.F.R. § 1.6011-4(b)(3) (2005). The proposed version of this rule incorporated the Treasury's definition of the term "confidential transaction" by reference. A number of commenters noted generally that incorporation of this Treasury regulation by reference could lead to unintended changes to the Board's rules if the Treasury amends those regulations (or the IRS amends its list of listed transactions). As discussed above, the Board intends for its prohibition on auditors' involvement as tax advisors in audit clients' execution of listed transactions to be kept current by changes to the IRS's list. Upon further consideration, unlike the Board's prohibition on listed transactions, the Board has determined that it may not be appropriate for any changes the Treasury may make to its definition of "confidential transaction" to automatically be reflected in the Board's prohibition on auditors' involvement in such a transaction. The definition of "confidential transaction" in Rule 3501(c)(i) is intended to be the same as the current Treasury regulation, except for the minimum fee requirement.The proposed version of the rule did not incorporate the Treasury's minimum fee exception to its regulation on confidential transactions. That is, Treasury Regulation 1.6011-4(b)(3)(i) provides that "a confidential transaction is a transaction that is offered to a taxpayer under conditions of confidentiality and for which the taxpayer has paid an advisor a minimum fee." 26 C.F.R. § 1.6011-4(b)(3) (2005). Under the regulation, the "minimum fee" is $250,000 for corporate taxpayers (and partnerships and trusts in which all of the owners or beneficiaries are corporations) and $50,000 for all other transactions. *Id*. 26 C.F.R. §1.6011-4(b)(3)(iii). Although some commenters suggested that the Board should adopt the minimum fee exception, the Board understands the IRS disclosure rules to serve a different purpose than Rule 3522(a). Accordingly, the Board has not adopted a minimum fee exception in its final rule either.

on which auditors may provide tax advice, and this fact appears to adequately serve audit clients' needs to maintain appropriate confidentiality. Finally, there does not appear to be a reasoned basis to limit the prohibition on confidential transactions to proposed tax treatments under U.S. tax laws.

4. Tax Services for Persons in Financial Reporting Oversight Roles

Rule 3523 provides that a registered public accounting firm is not independent of an audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any tax service to a member of management in a financial reporting oversight role at the audit client.[65] As discussed in the Board's proposing release, this rule addresses concerns that performing tax services for certain individuals involved in the financial reporting processes of an audit client creates an appearance of a mutual interest between the auditor and those individuals.

The Board received varied comments on Rule 3523. Some commenters, including groups representing investors and issuers, as well as several large accounting firms, supported the proposed rule on the ground that it is necessary to preserve the objectivity, and the appearance of objectivity, of auditors. Other commenters, however, including a number of smaller accounting firms, accounting associations, and a few issuers, claimed that the rule is not necessary, that these services have long been provided, and that auditors should be allowed to provide senior financial management of issuers with the same types of tax services the auditor may provide the issuer. After carefully considering these comments, the Board has determined to adopt the rule, with a few modifications. The Board continues to believe that the provision of tax services by the auditor to the senior management responsible for the audit client's financial reporting creates an unacceptable appearance of the auditor and such senior management having a mutual interest.

The Board also received a number of comments on specific aspects of the proposed rule. For example, some commenters expressed confusion as to whether Rule 3523 is intended to apply to directors, in part because the definition of "financial reporting oversight role" includes directors. In response to these comments, the Board has modified the rule to exclude directors more explicitly. Thus, the rule no longer uses the term "officer"—which is how the proposed rule narrowed the scope to exclude directors—and instead includes an explicit exception for any person who serves in a financial reporting oversight role "only because he or she serves as a member of the board of directors or similar management or governing body of the audit client."[66]

The Board also included a second exception in Rule 3523(b) in response to comments regarding whether the rule should apply to persons who serve in a financial reporting oversight role at an affiliate of an issuer. After considering these comments, the Board has determined not to restrict auditors' provision of tax services to employees in a financial reporting oversight role at an affiliate

---

[65] The rule's use of the term "financial reporting oversight role" is based on the Commission's definition of "financial reporting oversight role," which includes any person who has direct responsibility for oversight over those who prepare the issuer's financial statements and related information (for example, management's discussion and analysis) that are included in filings with the Commission. *See* Strengthening the Commission's Requirements Regarding Auditor Independence, *supra* note 2, at §II.A. The Commission uses the term "financial reporting oversight role" to describe those positions that are covered by the Act's "cooling off" period, during which a public company would not be independent from its audit firm if a member of the engagement team for the audit of that company assumed such a position. *See* Sarbanes-Oxley Act of 2002, §206, 17 C.F.R. §210.2-01(f)(3)(ii). The term "financial reporting oversight role" as defined in Rule 3501(f)(i) mirrors verbatim the SEC's definition of the same term in Rule 2-01 of Regulation S-X. 17 C.F.R. §210.2-01(f)(3)(ii).

[66] Rule 3523(a).

of an audit client, so long as the financial statements of the affiliate are not material to the financial statements of the audit client or are audited by an auditor other than the firm or an associated person of the firm. This exception is intended to exclude executives of affiliates that do not contribute to the consolidated financial statements of the audit client. The Board does not believe that auditors' relationships with executives of immaterial affiliates, or affiliates whose financial statements are audited by an auditor other than the firm or an associated person of the firm, pose as great a risk to auditors' impartiality regarding an audit clients' consolidated financial statements as do auditors' provision of tax services to executives involved in the consolidated financial reporting of the client.

The first part of this exception, Rule 3523(b)(i), excludes persons in a financial reporting oversight role at immaterial affiliates of the entity being audited. This exception would encompass, among others, executives of most affiliates within the same investment company complex as the audited entity and executives of up-stream affiliates of the audited entity. The second part of this exception, Rule 3523(b)(ii), excludes executives in financial reporting oversight roles of a subsidiary of an audit client that is not audited by the firm or any firm that is an associated person of the firm, as defined by PCAOB Rule 1001. On the other hand, executives in financial reporting oversight roles at a material subsidiary whose financial statements are audited by a firm that is an associated person of the registered firm would be subject to Rule 3523. For purposes of Rule 3523(b)(ii), the term "audited" should be understood to include audit procedures that contribute to the firm's preparation or issuance of an audit report on an audit client's consolidated financial statements, whether or not such procedures result in an audit opinion on the affiliate's financial statements.

Some commenters also expressed concern that the rule could impose an undue hardship on persons who become subject to the rule because they are hired or promoted into a financial reporting oversight role at an audit client. To address that concern, the Board determined to create a time-limited exception to the rule to cover such situations. Specifically, the Board has determined to add a new exception to the rule that applies to a person who was not in a financial reporting oversight role at the audit client before a hiring, promotion, or other change in employment event, when the tax services are both: (1) provided pursuant to an engagement that was in process before the hiring, promotion, or other change in employment event; and (2) completed on or before 180 days after the hiring or promotion event.[67] The Board will treat engagements as "in process" if an engagement letter has been executed and substantive work on the engagement has commenced; the Board will not treat engagements as "in process" during negotiations on the scope and fee for a service.

Some commenters also suggested that, as proposed, Rule 3523 could invite persons subject to the rule to evade the rule by using the auditor's tax services through an immediate family member or through an entity controlled by the person. In response to this comment, the Board has added to the scope of the rule immediate family members of persons who are covered by the rule.[68]

---

[67] Rule 3523(c).

[68] The Board also has added a definition of "immediate family member," adapted from the SEC's definition in its independence rules. *Compare* Rule 3501(i)(i) *with* 17 C.F.R. §210.2-01(f)(13). The Board has not included entities controlled by persons in financial reporting oversight roles, such as trusts and investment partnerships. The Board notes, however, that an auditor who provides services to an entity controlled by a person in a financial reporting oversight role of an audit client should consider whether, under ISB Standard No. 1, it is necessary to notify the client's audit committee of such services.

In addition, some commenters suggested that the rule be expanded to cover all non-audit services, such as services involving investment, personal financial planning, and executive compensation, on the ground that any such services provided to those in a financial reporting oversight role create a perception of a mutuality of interest between auditors and those members of management who receive such services.[69] Other commenters suggested that the rule be expanded to include persons who do not play a financial reporting oversight role but nevertheless play a key role in operations, such as vice presidents of sales.[70] Other commenters recommended the rule cover audit committee members. Still other commenters, however, disagreed with these commenters and noted that applying the rule to audit committee members might serve as a practical disincentive to audit committee service.

The Board has determined not to expand the final rule to include all non-audit services, directors or persons outside the definition of "financial reporting oversight role." To date, the concerns that have arisen in this area have related to auditors' provision of tax services to executives of public companies. Accordingly, the Board believes it is appropriate, at this time, to limit the rule to address this problem. The Board intends to monitor implementation of the rule, however. In addition, to the extent that issuers pay for non-audit services provided to any individuals, audit committees can and should be scrutinizing the potential effects on the auditor's independence due to such services. Further, as discussed in the proposing release, although accounting firms are not now required to seek pre-approval for executive tax services paid directly by the employee, auditors should consider under Independence Standards Board ("ISB") Standard No. 1 whether it is necessary to notify the audit committee of these services[71] or whether it is otherwise advisable to inform audit committees of such services.[72] In this regard, while the Board is reluctant to establish a per se prohibition on auditors' provision of tax services to directors of their audit clients, the Board notes that firms can – and some have – adopted procedures

---

[69] Some commenters asked for clarification of whether persons in a financial reporting oversight role could seek the assistance of the registered public accounting firm that prepared the original tax return to assist them in responding to an IRS or other governmental agency examination regarding that specific tax return after Rule 3523 becomes effective. If a registered firm prepared such a tax return before the rule's effective date, the rule does not operate to prohibit that person from answering questions and providing assistance when that tax return is under examination by a taxing authority after the rule's effective date, Such assistance, of course, must be otherwise consistent with Board and SEC auditor independence rules, including the requirement the auditor not become an advocate for its audit client.

[70] A few commenters suggested that the Board use the list of officers in section 16 of the Exchange Act, rather than relying on the defined term "financial reporting oversight role." The "financial reporting oversight role" term, however, includes those individuals at an audit client that, because of their oversight of the company's financial reporting process, raise special concerns when they have certain relationships with the auditor. For this reason, the Board continues to believe this is the appropriate group to include in this rule.

[71] *See* ISB Standard No. 1; *see also* Memorandum from Scott A. Taub, Deputy Chief Accountant, Office of the Chief Accountant, U.S. Securities and Exchange Commission to William H. Donaldson, Chairman, Securities and Exchange Commission at 5 (June 24, 2003) (attached to letter from Chairman William H. Donaldson, U.S. Securities and Exchange Commission, to Five Consumer Groups) (July 11, 2003), *available at* http://www.sec.gov/info/accountants/staffletters/taub071103.pdf (hereinafter "Taub Memo").

[72] For example, the SEC staff has recommended that audit committees scrutinize audit firms' provision of these services—

> The provision of tax services to the executives of an audit client is not expressly addressed in the Act or in the Commission's rules. Nonetheless, an audit committee should review the provision of those services to assure that reasonable investors would conclude that the auditor, when providing such services, is capable of exercising objective and impartial judgment on all issues within the audit engagement.

Taub Memo, *supra* note 71, at 5.

to notify the audit committee of such services so it may evaluate the potential effect of such services on the auditor's independence.[73]

C. The Auditor's Responsibilities in Connection With Audit Committee Preapproval of Tax Services

Under Section 10A(h) of the Exchange Act, as amended by Section 202 of the Sarbanes-Oxley Act, all non-audit services that the auditor proposes to perform for an issuer client "shall be pre-approved by the audit committee of the issuer." The SEC's 2003 independence rules implemented the Act's pre-approval requirement by adopting a provision on audit committee administration of the engagement.[74] Rule 3524 implements the Act's pre-approval requirement further by strengthening the auditor's responsibilities in seeking audit committee pre-approval of tax services. Specifically, Rule 3524 requires a registered public accounting firm that seeks pre-approval of an issuer audit client's audit committee[75] to perform tax services that are not otherwise prohibited by the Act or the rules of the SEC or the Board to—

- Describe, in writing, to the audit committee the nature and scope of the proposed tax service;
- Discuss with the audit committee the potential effects on the firm's independence that could be caused by the firm's performance of the proposed tax service; and
- Document the firm's discussion with the audit committee.

These requirements are intended to buttress the pre-approval processes established by the Act and the Commission's rules. Whether an audit committee preapproves a non-audit service on an *ad hoc* basis or on the basis of policies and procedures, the Commission staff has stated that "detailed backup documentation that spells out the terms of each non-audit service to be provided by the auditor" should be provided to the audit committee.[76] Indeed, the SEC staff has indicated "[s]uch documentation should be so detailed that there should never be any doubt as to whether any particular service was brought to the

---

[73] *See*, e.g., Remarks of Scott Bayless, Deloitte & Touche LLP, *Auditor Independence Roundtable on Tax Services* (July 14, 2004) at 152 (indicating that even when "the company does not pay for those services . . . there is a notification procedure to ensure that the audit committee has the ability to take control of that relationship if they so desire").

[74] *See* 17 C.F.R. §210.2-01(c)(7).

[75] Proposed Rule 3524 used the term "audit committee of the audit client," which some commenters interpreted to mean that the rule would require auditors to make the required communications in connection with proposed tax services for affiliates of an audit client that are not consolidated as subsidiaries with the audit client for financial statement purposes. One commenter noted that the Commission's Rule 2- 01(c)(7) requires only that "[b]efore the accountant is engaged by the issuer or its subsidiaries, or the registered investment company or its subsidiaries, to render audit or non-audit services, the engagement [be] approved by the issuer's or registered investment company's audit committee." By using the phrase "in connection with seeking audit committee pre-approval," the Board intends Rule 3524 to apply only when the SEC's Rule 2-01(c)(7) requires such approval. Accordingly, the rule does not require registered firms to make the specified communications or to seek audit committee pre-approval in any situations in which audit committee pre-approval is not already required by the SEC's rules. Nor should the rule be understood to require preapproval by any committee other than the committee required to provide pre-approval by the SEC's rules. To clarify this issue, the Board has also modified Rule 3524 to more clearly track the language of section 10A(h) of the Exchange Act and the SEC's Rule 2- 01(c)(7).

[76] Taub Memo, *supra* note 71, at 3; *see also* SEC Office of the Chief Accountant: Application of Commission's Rules on Auditor Independence Frequently Asked Questions, Audit Committee Preapproval, Question 5, (issued August 13, 2003), *available at* http://www.sec.gov/info/accountants/ocafaqaudind121304.htm (hereinafter "FAQs").

audit committee's attention and was considered and pre-approved by that committee."[77]

Rule 3524 implements the Act's pre-approval requirement further by requiring that registered firms provide the audit committee of an issuer audit client a description of proposed tax services engagements that includes descriptions of the scope of any tax service under review and the fee structure for the engagement.[78] Some commenters suggested significant changes to the scope of the proposed rule. One group of commenters recommended that the rule be broadened to apply to all non-audit services, rather than only tax services. Other commenters expressed concern that the rule appeared to impose restrictions on audit committee pre-approval in excess of the SEC's requirements and, for that reason, recommended that the Board narrow or eliminate the rule. The Board has determined not to change the scope of the rule in response to these comments. While auditors and audit committees may find the procedures in Rule 3524 to be useful for purposes of considering non-audit services generally, the Board adopts these rules only after having engaged in a substantial effort to obtain facts and views of interested persons on appropriate procedures for considering proposed tax services. Before considering broadening the rule, the Board would seek additional information, based, among other things, on experience with this rule, inspections of registered firms, and additional public input. On the other hand, notwithstanding the concerns of some commenters that Rule 3524 requires more than the parallel SEC rule, the Board has determined not to narrow or eliminate the rule. The Board continues to believe that the rule is an appropriate complement to the SEC's preapproval rule. Rule 3524 supports the procedure under the SEC rule, by requiring the auditor—who is in the best position to describe a proposed engagement—to gather the information required to be presented to the audit committee by the SEC rule. Indeed, it is the SEC rule and staff interpretations of what information audit committees need that have informed the Board's development of the rule.

The Board has made certain modifications to the proposed rule, however. As proposed, the rule would have required auditors to provide audit committees copies of all engagement letters for proposed tax services. While some commenters supported this proposal as a way to ensure that audit committees received adequate information on which to base their judgments, other commenters expressed concern that the rule could result in audit committees being provided voluminous stacks of engagement letters—some in foreign languages—that would obscure rather than elucidate the nature of the tax services proposed. On the basis of this information, and because the underlying purpose of the proposed requirement was to establish a manageable collection of information on which audit committees could make their determinations to pre-approve tax services, the Board has determined to eliminate the proposed rule's requirement to supply the audit committee a copy of each tax service engagement letter. Instead, the rule requires auditors to describe for audit committees, in writing, the scope

---

[77] Taub Memo, *supra* note 71, at 3; *see also* FAQs, *supra* note 76, Audit Committee Pre-approval, Question 5 (issued August 13, 2003). The SEC staff FAQ answer states that ("[p]re-approval policies must be designed to ensure that the audit committee knows precisely what services it is being asked to pre-approve so that it can make a well-reasoned assessment of the impact of the service on the auditor's independence. For example, if the audit committee is presented with a schedule or cover sheet describing services to be pre-approved, that schedule or cover sheet must be accompanied by detailed back-up documentation regarding the specific services to be provided").

[78] *See* Rule 3524(a)(1). Audit committees may ask auditors for other materials not identified in the rule, to assist them in their determinations whether to preapprove proposed tax services. Rule 3524 should not be understood to limit the information or materials that an audit committee may request, or that a registered firm may decide to provide, in connection with the pre-approval of tax services.

of the proposed service, the proposed fee structure for the service, and the potential effect of the service on the auditor's independence. The Board believes requiring such a description of a proposed service better meets the Board's goal to improve the quality of information auditors provide audit committees about proposed tax services.

The rule also requires the auditor to describe for the audit committee any amendment to the engagement letter or any other agreement relating to the service (whether oral, written, or otherwise) between the firm and the audit client.[79] While the Board does not expect or encourage auditors to enter into side agreements relating to tax services, the Board understands that, in the past, some accounting firms have entered into such agreements.[80] To the extent firms do so, they must disclose those agreements to the audit committee.

In addition, to the extent that a firm receives fees or other consideration from a third party in connection with promoting, marketing, or recommending a tax transaction, Rule 3524 requires the firm to disclose those fees or other consideration to the audit committee. Specifically, Rule 3524(a)(2) requires that the firm disclose to the audit committee "any compensation arrangement or other agreement, such as a referral agreement, a referral fee or fee-sharing arrangement, between the registered public accounting firm (or an affiliate of the firm) and any person (other than the audit client) with respect to the promoting, marketing or recommending of a transaction covered by the service." This provision is adapted from the IRS's rules of practice, which require tax advisors to disclose such arrangements to taxpayer clients.[81]

Rule 3524(b) also requires registered public accounting firms to discuss with audit committees of their issuer audit clients the potential effects of any proposed tax services on the firm's independence. Even if a non-audit service does not per se impair an auditor's independence, the Commission's independence rules nevertheless deem an auditor not to be independent if—

> the accountant is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the accountant is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement.[82]

Rule 3524(b) is intended to provide audit committees a robust foundation of information upon which to determine whether to pre-approve proposed tax services. Some commenters have asked for guidance as to the scope of the discussions intended by the rule. The Board intends that the scope of such discussions remain flexible, to address the matters that are pertinent in the judgment of the audit committee, as informed by Commission requirements. While the Act's

---

[79] *Id*. One commenter expressed concern that Rule 3524(a)'s requirement to describe an "other agreement" could be understood to require the auditor to submit to the audit committee documentation concerning "essentially every communication with the audit client." The Board believes this comment is misplaced. Rule 3524 does not require that the auditor describe all communications with the audit client, but rather all agreements with the audit client that relate to the proposed service.

[80] *See, e.g.*, *In re PricewaterhouseCoopers LLP, & PricewaterhouseCoopers Securities LLC*, *supra* note 43 ("through side letters or oral understandings, the parties created contingent fee arrangements"). In addition, some commenters have expressed concern that Rule 3524 requires disclosure to the audit committee of fee arrangements that are prohibited by Rule 3521 (or by professional association membership requirements, such as certain referral agreements and fees). Those commenters have asked the Board to clarify that Rule 3524 does not operate to permit such fee structures that are otherwise prohibited by the Board's rules or to endorse fee structures that are prohibited or discouraged by professional ethics rules. It is the case that Rule 3524 does not permit or otherwise endorse such fees.

[81] See 31 C.F.R. §10.35(e)(1) (2005), *available at* http://www.irs.gov/pub/irspdf/ pcir230.pdf.

[82] 17 C.F.R. § 210.2-01(b).

legislative history makes clear that the Act "does not require the audit committee to make a particular finding in order to pre-approve an activity,"[83] the Commission's staff expects a robust review of proposed non-audit services—

> The audit committee must take its role seriously and perform diligent analyses and reviews that allow the committee to conclude that reasonable investors would view the auditor as capable of exercising objective and impartial judgment on all matters brought to the auditor's attention.[84]

To be clear, the rule does not prescribe any test for audit committees or require audit committees to make legal assessments as to whether proposed services are prohibited or permissible. Nor is the rule intended to limit an audit committee's discretion to establish its own more stringent pre-approval procedures. Rather, the rule directs registered firms to present detailed information and analysis to audit committees for audit committees' consideration, in their own judgment, of the best interests of the issuer and its shareholders.

In addition, through the discussion required by Rule 3524(b), the Board expects registered firms to convey to the audit committee information sufficient to distinguish between tax services that could have a detrimental effect on the firm's independence and those that would be unlikely to have a detrimental effect. Some commenters expressed concern that an example of such a distinction that the Board provided in the proposing release could be understood to suggest that audit committees should not permit an auditor to provide any tax services unless the company had an internal tax department and/or a tax director who could make sound management decision in the best interest of the company. The Board did not intend to suggest that particular functional departments or managers must exist at a company before its auditor may provide it tax services. Rather, the inquiry the auditor should engage in when proposing to provide tax services to an audit client is whether, in the particular case, the company has the capacity to make its own decisions regarding the proposed tax matter, such that the auditor would not be in the position of performing management functions or making management decisions for the company.[85] The resolution of this inquiry will vary depending on the nature of the tax matter at issue and the sophistication of the company, among other things.

Rule 3524, both as proposed and as adopted, is intentionally silent as to when a registered public accounting firm should provide the required information about a proposed tax service to an audit committee. This is because, under the SEC's 2003 independence rules, audit committees themselves may have policies that establish a procedure and schedule for audit committee review of non-audit services, including tax services.[86] Some commenters expressed concern that the rule might favor one approval method (*ad hoc*) over another (approval pursuant to policies and procedures). This is not the case. Similar to the SEC's 2003 independence rules, Rule 3524 does not dictate, or even express a preference as to, whether the documentation and discussions required under Rule 3524 should take place pursuant to an audit committee's policies and procedures on pre-approval or on an ad hoc basis. Many issuers have adopted

---

[83] S. REP. No. 107-205, at 19 (2002).

[84] Taub Memo, *supra* note 71, at 7-8; *see also* FAQs, *supra* note 76, Audit Committee Pre-approval, Question 5 (issued August 13, 2003).

[85] *See* PCAOB Rule 3600T (adopting *AICPA Code of Professional Conduct*, paragraph .05 of ET sec. 101, "Independence", Interpretation No. 101-3, "Performance of Other Services," as of April 16, 2003) ("care should be taken not to perform management functions or make management decisions for attest clients the responsibility for which remains with the client's board of directors and management.") (Interpretation No. 101-3 was later amended by the AICPA in December 2003).

[86] 17 C.F.R. § 210.2-01(c)(7)(i)(B).

policies that provide for pre-approval in annual audit committee meetings. The Board understands that such an annual planning process can include as robust a presentation to the audit committee as a case-by-case pre-approval process, and Rule 3524 is designed to be flexible enough to accommodate either system and to encourage auditors and audit committees to develop systems tailored to the needs and attributes of the issuer.

The timing and method by which auditors describe for, and discuss with, audit committees proposed tax services will necessarily vary depending on different audit committees procedures. For those audit committees that hold an annual meeting to consider proposed non-audit services for the upcoming year, often by reviewing a proposed annual budget for non-audit services, it would be appropriate for auditors to provide their disclosures pursuant to Rule 3524(a), and hold their discussions pursuant to Rule 3524(b), about proposed tax services that are known at the time of the meeting in connection with or at that meeting. In addition, some audit committees' policies delegate authority to pre-approve non-audit services to one committee member and require reporting of any services approved by delegated authority at the next scheduled audit committee meeting, on a quarterly basis, or otherwise, in order for the audit committee to review an updated forecast or other summary of non-audit services. In such cases, it would be appropriate for auditors to provide the member holding delegated authority to approve a tax service a description of the service that complies with Rule 3524(a). Also, although the auditor may discuss the service with the member holding delegated authority when the member is considering the service, in order to comply with Rule 3524(b), the auditor ought to discuss the service with the audit committee as a whole when the audit committee considers the updated forecast or other summary.

Finally, Rule 3524(c) requires a registered public accounting firm to document the substance of its discussion with the audit committee under subparagraph (b). The few commenters who addressed this provision supported it.[87]

III. Effective and Transition Dates

The Board intends that the rules become effective at varying times.

In light of pre-existing legal and regulatory requirements, Rules 3502 and 3520 do not, in any practical sense, create new criteria for appropriate conduct. Accordingly, no transition period is called for, and therefore the Board intends that Rules 3502 and 3520, as well as the definitions in Rule 3501, become effective 10 days after the date that the SEC approves the rules.

Rule 3521 is based on the SEC's existing contingent fee rule, although it differs from that rule in certain respects. Accordingly, the Board will not apply Rule 3521 to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before the later of December 31, 2005, or 10 days after the date that the SEC approves the rules. Of course, as noted above, the Commission's Rule 2-01 on auditor independence treats an auditor as not independent if it enters into a contingent fee arrangement with an audit client today.[88]

Rules 3522, 3523, and 3524 establish new criteria for appropriate conduct by registered public accounting firms and their associated persons. The Board believes it is appropriate to allow a reasonable period of time for such firms to

[87] One commenting auditor suggested that the Board consider requiring specific forms or occasions for auditor documentation of audit committee discussion. After considering this suggestion, the Board has determined that such forms or required timing of discussions could unnecessarily limit the scope of the discussions that, in the judgment of the auditor and audit committee, are appropriate.

[88] 17 C.F.R. § 210.2-01(c)(5).

prepare internal policies and procedures, and train their employees to ensure compliance with these new requirements. In addition, the Board understands that engagements covered by these rules may be in progress and that firms will need to terminate or complete these engagements in a professional manner. Accordingly, the Board believes it is appropriate to allow transition periods for these rules.

The Board understands that Rule 3523 will, in practical effect, lead to some registered firms terminating recurring engagements to provide tax services and may require certain members of public companies' senior management to find other tax preparers. Accordingly, the Board has determined that it will not apply Rule 3523 to tax services being provided pursuant to an engagement in process at the time the SEC approves the rules, provided that such services are completed on or before the later of June 30, 2006 or 10 days after the date that the SEC approves the rules. As discussed above, the Board will treat engagements as "in process" if an engagement letter has been executed and work of substance has commenced; the Board will not treat engagements as "in process" during negotiations on the scope and fee for a service.

Although the Board does not expect them to require the same transition as Rule 3523, Rules 3522 and 3524 also impose new legal requirements. Accordingly, the Board has determined that it will not apply Rule 3522 to tax services that were completed by a registered public accounting firm no later than the later of December 31, 2005, or 10 days after the date that the SEC approves the rules. Rule 3524 will not apply to any tax service pre-approved before the later of December 31, 2005, or 10 days after the date that the SEC approves the rules, or, in the case of an issuer that pre-approves non-audit services by policies and procedures, the rule will not apply to any tax service provided by March 31, 2006.

On the 26th day of July, in the year 2005, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

APPENDIX—

Rules

Appendix

Rules

SECTION 3: PROFESSIONAL STANDARDS

Part 5 — Ethics

Rule 3501. Definitions of Terms Employed in Section 3, Part 5 of the Rules.

When used in Section 3, Part 5 of the Rules, unless the context otherwise requires:

(a)(i) Affiliate of the Accounting Firm

The term "affiliate of the accounting firm" (or "affiliate of the registered public accounting firm" or "affiliate of the firm") includes the accounting firm's parents; subsidiaries; pension, retirement, investment or similar plans; and any associated entities of the firm, as that term is used in Rule 2-01 of the Commission's Regulation SX, 17 C.F.R. § 210.2-01(f)(2).

(a)(ii) Affiliate of the Audit Client

The term "affiliate of the audit client" means—

(1) An entity that has control over the audit client, or over which the audit client has control, or which is under common control with the audit client, including the audit client's parents and subsidiaries;

(2) An entity over which the audit client has significant influence, unless the entity is not material to the audit client;

(3) An entity that has significant influence over the audit client, unless the audit client is not material to the entity; and

(4) Each entity in the investment company complex when the audit client is an entity that is part of an investment company complex.

(a)(iii) Audit and Professional Engagement Period

The term "audit and professional engagement period" includes both—

(1) The period covered by any financial statements being audited or reviewed (the "audit period"); and

(2) The period of the engagement to audit or review the audit client's financial statements or to prepare a report filed with the Commission (the "professional engagement period")—

(A) The professional engagement period begins when the registered public accounting firm either signs an initial engagement letter (or other agreement to review or audit a client's financial statements) or begins audit, review, or attest procedures, whichever is earlier; and

(B) The professional engagement period ends when the audit client or the registered public accounting firm notifies the Commission that the client is no longer that firm's audit client.

(3) For audits of the financial statements of foreign private issuers, the "audit and professional engagement period" does not include periods ended prior to the first day of the last fiscal year before the

foreign private issuer first filed, or was required to file, a registration statement or report with the Commission, provided there has been full compliance with home country independence standards in all prior periods covered by any registration statement or report filed with the Commission.

(a)(iv) Audit Client

The term "audit client" means the entity whose financial statements or other information is being audited, reviewed, or attested and any affiliates of the audit client.

(c)(i) Contingent Fee

The term "contingent fee" means—

(1) Except as stated in paragraph (2) below, any fee established for the sale of a product or the performance of any service pursuant to an arrangement in which no fee will be charged unless a specified finding or result is attained, or in which the amount of the fee is otherwise dependent upon the finding or result of such product or service.

(2) Solely for the purposes of this definition, a fee is not a "contingent fee" if the amount is fixed by courts or other public authorities and not dependent on a finding or result.

(f)(i) Financial Reporting Oversight Role

The term "financial reporting oversight role" means a role in which a person is in a position to or does exercise influence over the contents of the financial statements or anyone who prepares them, such as when the person is a member of the board of directors or similar management or governing body, chief executive officer, president, chief financial officer, chief operating officer, general counsel, chief accounting officer, controller, director of internal audit, director of financial reporting, treasurer, or any equivalent position.

(i)(i) Investment Company Complex

(1) The term "investment company complex" includes—

(i) An investment company and its investment adviser or sponsor;

(ii) Any entity controlled by or controlling an investment adviser or sponsor in paragraph (i) of this definition, or any entity under common control with an investment adviser or sponsor in paragraph (i) of this definition if the entity—

(A) Is an investment adviser or sponsor; or

(B) Is engaged in the business of providing administrative, custodian, underwriting, or transfer agent services to any investment company, investment adviser, or sponsor; and

(iii) Any investment company or entity that would be an investment company but for the exclusions provided by section 3(c) of the Investment Company Act of 1940 (15 U.S.C. § 80a-3(c)) that has an investment adviser or sponsor included in this definition by either paragraph (i) or (ii) of this definition.

(2) An investment adviser, for purposes of this definition, does not include a sub-adviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser.

(3) A sponsor, for purposes of this definition, is an entity that establishes a unit investment trust.

Rule 3502. Responsibility Not to Cause Violations.

A person associated with a registered public accounting firm shall not cause that registered public accounting firm to violate the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards, due to an act or omission the person knew or should have known would contribute to such violation.

Subpart 1—Independence

Rule 3520. Auditor Independence.

A registered public accounting firm must be independent of its audit client throughout the audit and professional engagement period.

Note: Under Rule 3520, a registered public accounting firm's independence obligation with respect to an audit client that is an issuer encompasses not only an obligation to satisfy the independence criteria set out in the rules and standards of the PCAOB, but also an obligation to satisfy all other independence criteria applicable to the engagement, including the independence criteria set out in the rules and regulations of the Commission under the federal securities laws.

Rule 3521. Contingent Fees.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any service or product to the audit client for a contingent fee or a commission, or receives from the audit client, directly or indirectly, a contingent fee or commission.

Rule 3522. Tax Transactions.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any non-audit service to the audit client related to planning, or opining on the tax treatment of, a transaction—

(a) **Listed Transactions**—that is a listed transaction within the meaning of 26 C.F.R. §6011.1-4(b)(2);

(b) **Confidential Transactions**—that is a confidential transaction within the meaning of 26 C.F.R. §6011.1-4(b)(3), or that would be a confidential transaction within the meaning of 26 C.F.R. §6011.1-4(b)(3) if the fee for the transaction were equal to or more than the minimum fee described in 26 C.F.R. §6011.1-4(b)(3); or

(c) Aggressive Tax Positions—that was initially recommended by the registered public accounting firm or another tax advisor and a significant purpose of which is tax avoidance, unless the proposed tax treatment is at least more likely than not to be allowable under applicable tax laws.

Rule 3523. Tax Services for Senior Officers of Audit Client.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any tax service to an officer in a financial reporting oversight role at the audit client.

Rule 3524. Audit Committee Pre-approval of Certain Tax Services.

In connection with seeking audit committee pre-approval to perform for an audit client any permissible tax service, a registered public accounting firm shall—

(a) provide to the audit committee of the audit client—

(i) the engagement letter relating to the service, which shall include descriptions of the scope of the service and the fee structure, any amendment to the engagement letter, or any other agreement (whether oral, written, or otherwise) between the firm and the audit client, relating to the service; and

(ii) any compensation arrangement or other agreement, such as a referral agreement, a referral fee or fee-sharing arrangement, between the registered public accounting firm (or an affiliate of the firm) and any person (other than the audit client) with respect to the promoting, marketing, or recommending of a transaction covered by the service;

(b) discuss with the audit committee the potential effects of the services on the independence of the firm; and

(c) document the substance of its discussion with the audit committee.

PCAOB Release No. 2005-015

Auditing Standard No. 4, Reporting on Whether a Previously Reported Material Weakness Continues to Exist

PCAOB Release No. 2005-015
July 26, 2005
PCAOB Rulemaking
Docket Matter No. 018

Approved by the Securities and Exchange Commission on February 6, 2006, and is effective as of February 6, 2006.

Summary:

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") has adopted Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*. The Board will submit this standard to the Securities and Exchange Commission ("Commission" or "SEC") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This standard will not take effect unless approved by the Commission.

Board Contacts:

Laura Phillips, Associate Chief Auditor (202/207-9111; phillipsl@pcaobus.org), Sharon Virag, Assistant Chief Auditor (202/207-9164; virags@pcaobus.org)

* * *

I. Background

Congress enacted Section 404 of the Sarbanes-Oxley Act of 2002 (the "Act") to provide investors with increased transparency about public companies' internal control over financial reporting. Since then, approximately 12.7 percent of public companies that are accelerated filers[1] have reported that their internal control over financial reporting is not effective because one or more material weaknesses in internal control over financial reporting existed as of the company's fiscal year-end.[2] When a company reports a material weakness, investors may be left uncertain about the reliability of the company's financial reporting. They may also want information about the company's plans for remediating the material weakness and its timeframe for doing so, and to be notified when the material weakness has been eliminated. Thus, a disclosure that internal

[1] An "accelerated filer," as defined in Rule 12b-2 under the Securities Exchange Act of 1934, 17 C.F.R. § 240.12b-2, is generally a U.S. company that, among other things, has equity market capitalization over $75 million and has filed at least one annual report with the Commission.

[2] See Paul J. Martinek, Adjustments, Restatements Are Predictors Of Weaknesses, Compliance Week (June 14, 2005).

control over financial reporting is not effective is often only the beginning of a company's communications with investors concerning the material weakness (or weaknesses) that caused the problem.[3]

Both companies and report users have recognized the importance of a mechanism for companies to effectively communicate with the markets when a previously reported material weakness in internal control over financial reporting no longer exists.[4] In many cases, companies will find the mechanisms for company disclosures already provided by the federal securities laws sufficient. For example, a public company is required to disclose quarterly any changes in internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.[5] Investors will, therefore, learn of material improvements, such as the correction of a material weakness, on at least a quarterly basis through these required disclosures.[6] Under the Board's Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Connection with an Audit of Financial Statements*, the company's auditor is responsible for evaluating these quarterly disclosures.[7] Finally, investors will also learn about the status of previously reported material weaknesses (as well as internal control over financial reporting overall), accompanied by auditor assurance, when the company files its next annual report. Investors and issuers, however, have called for the ability to obtain auditor assurance as of an interim date that a previously reported material weakness no longer exists. At the November 18, 2004, SAG Meeting, several members of the group with experience as investors and issuers encouraged the Board to develop a standard that would describe this type of engagement for the auditor. In particular, several issuer members of the SAG emphasized that companies that have reported a material weakness will want to have options available to assure the markets that the material weakness has been remediated.[8]

II. Public Comment on the Board's Proposal

On March 31, 2005, the Board issued for public comment a proposed auditing standard titled "Reporting on the Elimination of a Material Weakness." In response, the Board received 30 comment letters from a variety of interested parties, including auditors, investors, issuers, and others. The comment letters

---

[3] Some companies with material weaknesses have already begun this process by including detailed descriptions of their remediation plans in their annual filings or by providing additional disclosures in subsequent filings on the steps they are continuing to take to remediate the weaknesses. See June 2005 Internal Control Report: All About Remediation, Compliance Week (July 6, 2005).

[4] The Board's Standing Advisory Group ("SAG") discussed possible auditor involvement with the elimination of a material weakness at its November 18, 2004 public meeting ("SAG Meeting"). An archived webcast of the SAG Meeting and a related briefing paper on this topic, "Reporting on the Correction of a Material Weakness," are available on the PCAOB's Web site at www.pcaobus.org.

[5] See Item 308(c) of Regulation S-K, 17 C.F.R. §229.308(c).

[6] Of course, through this same mechanism, investors also could learn if internal control over financial reporting deteriorates materially during the year.

[7] See Paragraphs 202–206 of Auditing Standard No. 2, as well as PCAOB Staff Question and Answer No. 55 regarding the extent of these responsibilities. The Staff Questions and Answers are available on the Board's Web site under Standards at www.pcaobus.org.

[8] See Nick S. Cyprus, Vice President, Controller and Chief Accounting Officer, The Interpublic Group of Companies, Remarks at SAG Meeting (Nov. 18, 2004) ("I guarantee there will be demand [for such a standard]"); Sam Cotterell, Vice President and Controller, Boise Cascade LLC, Remarks at SAG Meeting (Nov. 18, 2004) ("if I have a material weakness disclosed, I want a mechanism to let the market know that that has been fixed. I want to do that as quickly as possible.").

included detailed discussion of a wide range of topics. Many commenters expressed strong support for the standard.[9]

Other comments included:

- suggestions regarding the wording of the auditor's opinion and the title of the proposed standard;
- discussion of several technical issues, such as the standard's focus on control objectives, consideration of materiality, and the potential need for the auditor to perform substantive procedures;
- suggestions regarding the auditor's responsibility when new material weaknesses are identified during this engagement, and when all previously reported material weaknesses are not being reported upon by the auditor;
- concerns that, although an engagement under the standard would be completely voluntary, it could become compulsory, as a practical matter, if investors begin to insist on auditor attestation in all cases in which a material weakness is identified;
- a suggestion that the conforming amendment be modified to allow auditors to use AT 101 strictly for a company's internal use.

The Board carefully considered all of the comment letters that it received. A detailed analysis of comments and the Board's responses are contained in the Background and Basis for Conclusions, in Appendix B of the standard.

III. Summary of Changes to the Proposed Standard

The Board adopted Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*, after making several changes to the proposed standard in response to comments. The more significant changes include—

- revising the form of the auditor's opinion to clarify that the purpose of the engagement is to determine whether the material weakness "exists" or "no longer exists" and making related changes to the title of the standard;
- conforming text in the conditions for engagement performance to the text of a parallel provision in PCAOB Auditing Standard No. 2, due to the close relationship between the two standards. Specifically, the Board clarified that under Auditing Standard No. 4, management's evidence includes documentation;
- adding guidance on the subjects of materiality, control objectives and substantive procedures;
- adding a responsibility for the auditor to inform the audit committee if the auditor identifies a new material weakness during an engagement performed under this standard;

---

[9] See Letter from Laurie Fiori Hacking, Executive Director, Ohio Public Employees Retirement System, to J. Gordon Seymour, Acting Secretary, PCAOB (Apr. 15, 2005) ("The elimination of a material weakness, accompanied by an independent auditor's interim report attesting to management's assessment of its internal controls, will increase investor confidence in the reliability of a company's financial statements."); Letter from Gregory J. Jonas, Managing Director, Moody's Investors Service, to Office of the Secretary, PCAOB (May 5, 2005) ("the proposed standard strikes a useful balance by giving companies the option to provide users with information they value and with the assurance they find useful while not requiring a complete re-assessment").

- modifying the required elements of the auditor's report to clarify that a continuing auditor previously obtained an understanding of internal control over financial reporting and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the specified material weakness;
- including additional illustrative auditor's reports; and
- modifying the conforming amendment to the Board's interim attestation standards to allow auditors to continue to use AT 101 for engagements to report on whether a material weakness continues to exist if such a report is intended strictly for a company's internal use.

These changes have been reflected in the adopted standard, and are discussed further in the Background and Basis for Conclusions, included in Appendix B of the standard.

IV. Overview of the Engagement

This standard establishes a stand-alone engagement that is entirely voluntary, performed only at the company's request. This type of reporting is not required by the Act or the standards or rules of the PCAOB, and should not be viewed as compulsory. The Board anticipates that in deciding whether to engage their auditors to report on whether a particular material weakness continues to exist, companies will weigh the costs and benefits and do so only when it is cost-effective. Based on the investor and issuer comments at the SAG Meeting, the Board believes that, in some situations, companies will find that auditor assurance that a material weakness no longer exists leads to a higher level of investor confidence in a company's financial reporting, and that the costs of the engagement are therefore worth incurring. If a company believes, however, that these benefits would be outweighed in a particular case by the costs of obtaining them, the company may (and presumably would) determine not to engage its auditor to perform this work.

Although the Board designed this standard to be a cost-effective means of providing investors assurance that a material weakness no longer exists, the Board expects that this engagement will be best suited and most cost-effective for reporting on material weaknesses that are discrete problems with a limited effect on the company's internal control over financial reporting. Reporting on material weaknesses that have a pervasive effect on the company's internal control over financial reporting could require such a broad and extensive base of work that the Board anticipates that a company in this situation would choose to wait for the auditor's annual audit of internal control over financial reporting conducted under Auditing Standard No. 2 to obtain auditor assurance that a pervasive material weakness no longer exists.

The objective of an auditor's engagement under this standard is to express an opinion on whether a previously reported material weakness continues to exist. The standard, therefore, draws from many concepts applicable to the auditor's report on the effectiveness of internal control over financial reporting, as described in Auditing Standard No. 2, although in a more narrowly focused and limited manner. For this reason, most of the requirements in the standard will be familiar to auditors. In designing this standard, the Board provided flexibility wherever possible, to allow auditors to conduct the engagement in a manner suited to the material weakness in internal control over financial reporting at issue.

Similar to any other attestation service, an auditor's report under this standard is based on an evaluation of management's assertion that the material weakness no longer exists. This standard establishes several conditions that must be met for the auditor to perform this engagement. These conditions were patterned after management's responsibilities under the SEC's rules implementing Section 404 of the Act[10] and the corresponding conditions in Auditing Standard No. 2.[11] These conditions include management accepting responsibility for internal control over financial reporting, evaluating the effectiveness of the specified controls that address the material weakness, asserting that the specified controls are effective in addressing the material weakness, and supporting its assertion with sufficient evidence, including documentation.

The auditor's assurance resulting from this engagement is that the previously reported material weakness, in the auditor's opinion, no longer exists as of a specified date. Although the auditor's evaluation of the design and operating effectiveness of the identified controls generally follows the requirements of PCAOB Auditing Standard No. 2, this engagement is designed to be significantly narrower in scope because the auditor's testing is limited to the controls specifically identified by management as addressing the material weakness. Both management and the auditor use the company's stated control objective as the target for determining whether the specified controls sufficiently address the material weakness. (See Section VI for further discussion of the determination that a material weakness no longer exists.)

V. Auditor's Report

To communicate clearly the narrow focus of this engagement, the standard requires the auditor's report to describe the material weakness, identify all of the specified controls that management asserts address the material weakness, and identify the stated control objective achieved by these controls. The report also is required to include language to emphasize to readers that the auditor has not performed procedures sufficient to reach conclusions about the effectiveness of any other controls or provided an opinion regarding the effectiveness of internal control over financial reporting overall.[12] Report users should thus understand the limited scope of the auditor's opinion.

To render an opinion that a material weakness no longer exists, the auditor must have obtained evidence about the design and operation of the relevant controls, determined that the material weakness no longer exists, and determined that no scope limitations were placed on the auditor's work. Because of the narrow focus of this engagement, qualified opinions are not permitted. Limitations on the scope of the auditor's work preclude the auditor from rendering an opinion. The auditor's opinion as to whether a previously reported material weakness continues to exist may be expressed as "the material weakness exists" or "the material weakness no longer exists." Accordingly, the standard does not distinguish between an unqualified opinion and an adverse opinion but simply refers to the auditor's opinion.

---

[10] See Item 308(a) of Regulation S-K, 17 C.F.R. §229.308(a).

[11] See Paragraph 20 of Auditing Standard No. 2.

[12] The SAG Meeting included a discussion about the importance of such a report clearly communicating to report users the scope of the engagement. Several SAG members emphasized the potential for report users to believe, mistakenly, that the auditor, as a result of this limited engagement, had rendered a current opinion regarding the effectiveness of internal control over financial reporting overall. Comments received on the proposed standard generally expressed overall support for the clarity of the proposed auditor's report in this regard.

Unlike an auditor's report on internal control over financial reporting, in which the assessment is required to be as of the date of the annual financial statements, an auditor's report on whether a material weakness continues to exist may be as of any date set by management. The "as of" date of management's assertion represents the day the company believes the material weakness no longer exists and that the company has adequately assessed the effectiveness of the specified controls that address the material weakness. In the event that the auditor begins testing and concludes that additional remediation is required to address the material weakness, the company has the opportunity to re-address its remediation efforts, reset the assertion date, and ask the auditor again to opine on whether the material weakness continues to exist.

If the auditor determines that a material weakness continues to exist and does not issue a report, the standard requires the auditor to communicate to the company's audit committee, in writing, his or her conclusion that the material weakness continues to exist. Similarly, the auditor also has a responsibility to communicate to the audit committee, in writing, any new material weaknesses that the auditor identifies during this engagement that the auditor has not already communicated in writing to the audit committee. The standard also addresses the circumstance in which the auditor reports on fewer than all of the previously reported material weaknesses. In this circumstance, the standard requires the auditor to include language in his or her report stating that his or her previously issued report on management's annual assessment of the company's internal control over financial reporting identified additional material weaknesses, that the auditor is not reporting on those other material weaknesses, and that the auditor, accordingly, is expressing no opinion on whether those material weaknesses exist after the company's year-end.[13]

VI. Determining That a Material Weakness No Longer Exists

The standard requires the auditor to obtain evidence sufficient to determine whether the design and operation of the controls identified by management achieve the *stated control objectives* and that the material weakness no longer exists. A control objective for internal control over financial reporting generally relates to a relevant financial statement assertion, such as whether certain recorded transactions are genuine, and provides a basis for evaluating the effect of a company's controls on that assertion.[14] A stated control objective in the context of this engagement is the specific control objective identified by management that, if achieved, would result in the material weakness no longer existing. For this reason, management and the auditor must be satisfied that, if the stated control objective were achieved, the material weakness would no longer exist.

---

[13] Several investors, among others, suggested that, in the circumstance in which additional material weaknesses were previously reported but are not the subject of the auditor's report on whether a material weakness continues to exist, the auditor's report should draw attention to these other material weaknesses. In response to these comments, the standard states that when referring to his or her previously issued report, the auditor is required either to attach that report to his or her report on whether the material weakness continues to exist or to include information about where the previously issued report can be publicly obtained.

[14] See Paragraphs 68 through 70 of Auditing Standard No. 2 for additional information on relevant assertions.

When a material weakness has a pervasive effect on the company's internal control over financial reporting, identifying the control objectives that are not being met may be difficult because of the large number of control objectives affected. A material weakness related to an ineffective control environment is an example of this situation. If management and the auditor have difficulty in identifying *all* of the stated control objectives affected by a material weakness, the material weakness is probably not suitable for this type of narrow, interim reporting and should be tested, instead, during the auditor's annual audit of internal control over financial reporting conducted under Auditing Standard No. 2.

VII. Using the Work of Others

Auditing Standard No. 4 applies the same framework for using the work of others as the one described in Auditing Standard No. 2. Similar to Auditing Standard No. 2, the standard permits the auditor to use the work of others to alter the nature, timing, and extent of the auditor's performance of work related to this engagement. This framework requires the auditor to obtain the principal evidence supporting his or her opinion and to evaluate the nature of the controls being tested, together with the competence and objectivity of the persons performing the work.

Under both Auditing Standard No. 2 and this standard, the framework measures principal evidence in relation to the overall assurance provided by the auditor. Under Auditing Standard No. 2, the principal evidence supporting the auditor's opinion should be evaluated in relation to the auditor's opinion on internal control over financial reporting overall. Under this standard, the evaluation of whether the auditor has obtained the principal evidence supporting his or her opinion needs to be applied at the control objective level. It should be noted, however, that this does not require the auditor to obtain the principal evidence that each control specifically identified in management's assertion as related to the identified control objectives is effective.

There may be some circumstances in which the scope of the audit procedures to be performed in this type of engagement will be so limited that using the work of others will not provide any tangible benefit to the company or its auditor. The flexibility that the framework otherwise provides, however, is meant to encourage auditors to evaluate whether opportunities exist to use the work of others in this context.

VIII. Effective Date of the Standard

The standard will be effective as of the date of SEC approval.

* * *

On the 26th day of July, in the year 2005, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

APPENDICES—

1. Auditing Standard No. 4—*Reporting on Whether a Previously Reported Material Weakness Continues to Exist*
2. Conforming Amendment to PCAOB Auditing and Related Professional Practice Standards Resulting from the Adoption of Auditing Standard No. 4—*Reporting on Whether a Previously Reported Material Weakness Continues to Exist*

Appendix 1

Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*

Applicability of Standard

1. This standard establishes requirements and provides direction that apply when an auditor is engaged to report on whether a previously reported material weakness in internal control over financial reporting (hereinafter referred to as a material weakness) continues to exist as of a date specified by management.

> Note 1: In this context, *previously reported material weakness* means a material weakness that was described previously in an auditor's report issued pursuant to Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements*.
>
> Note 2: The date specified by management as the date that the previously reported material weakness no longer exists must be a date after the date of management's most recent annual assessment.

2. An auditor may conduct an engagement to report on whether a previously reported material weakness continues to exist if (1) the auditor has audited the company's financial statements and internal control over financial reporting in accordance with Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements*, as of the date of the company's most recent annual assessment of internal control over financial reporting, or (2) the auditor has been engaged to perform an audit of the financial statements and internal control over financial reporting in accordance with Auditing Standard No. 2 in the current year and has a sufficient basis for performing this engagement. (See paragraph 26 of this standard for additional requirements that apply specifically to a successor auditor's application of this standard.)

> Note: References in this standard to the company's most recent annual assessment of internal control over financial reporting apply to the company's most recent assessment of internal control over financial reporting overall, either as of the company's year-end or as of a more recent interim date, as audited by the auditor in accordance with Auditing Standard No. 2.

3. The auditor may report on more than one previously reported material weakness as part of a single engagement.

4. The engagement described by this standard is voluntary. The standards of the PCAOB do not require an auditor to undertake an engagement to report on whether a previously reported material weakness continues to exist. The auditor may audit the company's internal control over financial reporting in accordance with Auditing Standard No. 2 without ever performing an engagement in accordance with this standard.

Auditor's Objective in an Engagement to Report on Whether a Previously Reported Material Weakness Continues to Exist

5. The auditor's objective in an engagement to report on whether a previously reported material weakness continues to exist is to obtain reasonable

assurance about whether the previously reported material weakness exists as of a date specified by management and to express an opinion thereon. The auditor's opinion relates to the existence of a specifically identified material weakness as of a specified date and does not relate to the effectiveness of the company's internal control over financial reporting overall.

6. To obtain reasonable assurance, the auditor should obtain and evaluate evidence about whether specified controls were designed and operated effectively as of the date specified by management and whether those controls satisfy the company's stated control objective.

Note: Obtaining and evaluating evidence about whether the specified controls are designed effectively without also obtaining evidence about whether those controls operated effectively would not result in the auditor obtaining reasonable assurance for the purpose of expressing an opinion on whether a material weakness continues to exist.

Conditions for Engagement Performance

7. The auditor may report on whether a previously reported material weakness continues to exist at a company only if all of the following conditions are met:

a. Management accepts responsibility for the effectiveness of internal control over financial reporting;

b. Management evaluates the effectiveness of the specific control(s) that it believes addresses the material weakness using the same control criteria that management used for its most recent annual assessment of internal control over financial reporting and management's stated control objective(s);

c. Management asserts that the specific control(s) identified is effective in achieving the stated control objective;

d. Management supports its assertion with sufficient evidence, including documentation; and

e. Management presents a written report that will accompany the auditor's report that contains all the elements described in paragraph 48 of this standard.

8. If all the conditions in paragraph 7 of this standard are not met, the auditor is not permitted to complete the engagement to report on whether a previously reported material weakness continues to exist.

Framework and Definitions for Evaluation

9. The terms *internal control over financial reporting*, *control deficiency*, *significant deficiency*, and *material weakness* have the same meanings as the definitions of those terms in paragraphs 7 through 10, respectively, of Auditing Standard No. 2.

10. Paragraph 13 of Auditing Standard No. 2 states that management is required to base its annual assessment of the effectiveness of the company's internal control over financial reporting on a suitable, recognized control framework (also known as *control criteria*) and describes the characteristics that make a framework suitable for this purpose. For purposes of an engagement to report on whether a previously reported material weakness continues to exist, both management and the auditor must use both (1) the same control criteria used for the company's most recent annual assessment of internal control over

financial reporting, and (2) the company's stated control objective(s) to evaluate whether a material weakness continues to exist.

> Note: The performance and reporting requirements in Auditing Standard No. 2 and in this standard are based on the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission's publication, *Internal Control—Integrated Framework*. Known as the COSO report, it provides a suitable and available framework for purposes of management's annual assessment of internal control over financial reporting. (More information about the COSO framework is included in paragraphs 14 and 15 of Auditing Standard No. 2, the COSO report, and AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*.)

11. A *control objective* provides a specific target against which to evaluate the effectiveness of controls. A control objective for internal control over financial reporting generally relates to a relevant financial statement assertion and states a criterion for evaluating whether the company's control procedures in a specific area provide reasonable assurance that a misstatement to or omission in that relevant assertion is prevented or detected by controls on a timely basis.[1]

12. Management establishes control objectives that are tailored to the individual company. The process of tailoring control objectives to the individual company allows the control criteria used for management's annual assessment to be applied to the facts and circumstances in a reasonable and appropriate manner. Although control objectives are used most frequently to evaluate the effectiveness of control activities, the other components of internal control over financial reporting (i.e., control environment, risk assessment, information and communication, and monitoring) also can be expressed in terms of control objectives.

13. In an audit of internal control over financial reporting, the auditor is required to identify the company's control objectives in each area and to identify the controls that satisfy each control objective to evaluate whether the company's internal control over financial reporting is designed effectively.[2]

14. Table 1 includes examples of control objectives and their related assertions:

Table 1—Examples of Control Objectives and Related Assertions

Control Objectives	Assertions
Recorded sales of product X initiated on the company's Web site are real	Existence or occurrence
Product X warranty losses that are probable and can be reasonably estimated are recorded as of the company's quarterly financial statement period-ends	Completeness

(continued)

[1] See paragraphs 68 to 70 of Auditing Standard No. 2 for additional information on relevant assertions.

[2] See paragraph 88 of Auditing Standard No. 2

Control Objectives	Assertions
Interest rate swaps are recorded at fair value	Valuation or allocation
The company has legal title to recorded product X inventory in the company's Dallas, TX warehouse	Rights and obligations
Pending litigation that is reasonably possible to result in a material loss is disclosed in the quarterly and annual financial statements	Presentation and disclosure

15. If a material weakness has previously been reported, a necessary control objective (or objectives) has not been achieved.

16. A *stated control objective* in the context of an engagement to report on whether a material weakness continues to exist is the specific control objective identified by management that, if achieved, would result in the material weakness no longer existing.

17. Because the stated control objective, for purposes of this engagement, provides management and the auditor with a specific target against which to evaluate whether the material weakness continues to exist, management and the auditor must be satisfied that, if the stated control objective were achieved, the material weakness would no longer exist.

Note: When a material weakness has a pervasive effect on the company's internal control over financial reporting, identifying the related control objectives that are not being achieved may be difficult because of the large number of control objectives affected. A material weakness related to an ineffective control environment would be an example of this circumstance. If management and the auditor have difficulty identifying *all* of the stated control objectives affected by a material weakness, the material weakness probably is not suitable for this engagement and should be addressed, instead, through the auditor's annual audit of internal control over financial reporting conducted under Auditing Standard No. 2.

Performing an Engagement to Report on Whether a Previously Reported Material Weakness Continues to Exist

18. In an engagement to report on whether a previously reported material weakness continues to exist, the auditor must obtain sufficient competent evidence about the design and operating effectiveness of specified controls that provide reasonable assurance that the company's stated control objective is achieved in the context of the control criteria (e.g., COSO).

Note 1: An individual material weakness may be associated with a single stated control objective or with more than one stated control objective, depending on the nature of the material weakness and the manner in which the company tailors its stated control objectives to its business.

Note 2: Depending on the nature of the company's business, its organization, its internal control over financial reporting, and the specific material weakness that is the subject of this engagement, the auditor may determine that he or she is not able to obtain a sufficient basis for reporting on whether a previously reported material weakness continues to exist without performing a complete audit of internal control over financial reporting in accordance with Auditing Standard No. 2.

Applying the Standards of the PCAOB

19. The auditor must adhere to the standards of the PCAOB in performing an engagement to report on whether a previously reported material weakness continues to exist. Adherence to the standards involves:

a. Planning the engagement,

b. Obtaining an understanding of internal control over financial reporting,

c. Testing and evaluating whether a material weakness continues to exist, including using the work of others, and

d. Forming an opinion on whether a previously reported material weakness continues to exist.

20. Even though some requirements of this standard are set forth in a manner that suggests a sequential process, auditing whether a previously reported material weakness continues to exist involves a process of gathering, updating, and analyzing information. Accordingly, the auditor may perform some of the procedures and evaluations described in this section of the standard concurrently.

21. The engagement to report on whether a previously reported material weakness continues to exist must be performed by a person or persons having adequate technical training and proficiency as an auditor. In all matters related to the assignment, an independence in mental attitude must be maintained. Due professional care must be exercised in the performance of the engagement and the preparation of the report. Paragraphs 30 through 36 of Auditing Standard No. 2 describe the application of these standards in the context of an internal control-related service.

22. This standard establishes the fieldwork and reporting standards applicable to an engagement to report on whether a previously reported material weakness continues to exist.

23. The concept of materiality, as discussed in paragraphs 22 and 23 of Auditing Standard No. 2, underlies the application of the general and fieldwork standards in an engagement to report on whether a previously reported material weakness continues to exist. Therefore, the auditor uses materiality at the financial-statement level, rather than at the individual account-balance level, in evaluating whether a material weakness exists. The auditor should assess materiality as of the date that management asserts that the previously reported material weakness no longer exists.

Planning the Engagement

24. The auditor should properly plan the engagement to report on whether a previously reported material weakness continues to exist and should properly supervise any assistants. When planning the engagement, the auditor should evaluate how the matters described in paragraph 39 of Auditing Standard No. 2 will affect the auditor's procedures.

Obtaining an Understanding of Internal Control over Financial Reporting

25. To perform this engagement, the auditor must have a sufficient knowledge of the company and its internal control over financial reporting. An auditor who has audited the company's internal control over financial reporting in accordance with Auditing Standard No. 2 as of the date of the company's most recent annual assessment of internal control over financial reporting would be expected to have obtained a sufficient knowledge of the company and its internal control over financial reporting to perform this engagement.

Note: The second sentence of the paragraph above contemplates that the auditor's previous engagement under Auditing Standard No. 2 resulted in rendering an opinion. If an auditor previously engaged to perform an audit of internal control over financial reporting in accordance with Auditing Standard No. 2 has not yet rendered an opinion on the effectiveness of the company's internal control over financial reporting as of the company's most recent year-end or more recently, then that auditor should follow the requirements for a successor auditor in paragraphs 26a-b and 27. Additionally, if an auditor has previously performed an audit of internal control over financial reporting at the company and is now a successor auditor (because another auditor has subsequently performed an audit of internal control over financial reporting at the company in intervening years), the auditor should follow the requirements in paragraphs 26 and 27 for a successor auditor.

26. When a successor auditor[3] performs an engagement to report on whether a previously reported material weakness continues to exist and he or she has not yet completed an audit of internal control over financial reporting at the company, he or she must perform procedures to obtain sufficient knowledge of the company's business and its internal control over financial reporting to achieve the objective of the engagement, as described in paragraph 5 of this standard. A successor auditor who has not yet completed an audit of internal control over financial reporting at the company must perform the following procedures as part of obtaining sufficient knowledge of the company's business and its internal control over financial reporting:

a. Comply with paragraphs 47 through 51 of Auditing Standard No. 2 regarding obtaining an understanding of internal control over financial reporting. The extent of understanding of internal control over financial reporting needed to satisfy these requirements in the context of an engagement to report on whether a previously reported material weakness continues to exist depends on the nature of the material weakness on which the auditor is reporting. The more pervasive the effects of the material weakness, the more extensive the understanding of internal control over financial reporting should be under these requirements. For example, if the material weakness affects company-level controls, a more extensive understanding of internal control over financial reporting will be necessary than if the effects of the material weakness are isolated at the transaction level.

b. Perform a walkthrough as described in paragraphs 79 through 82 of Auditing Standard No. 2 for all major classes of transactions that are directly affected by controls specifically identified by management as addressing the material weakness.

   Note: Some controls have only an indirect effect on a major class of transactions, such as certain controls in the control environment or risk assessment components of internal control over financial reporting. The auditor need not perform a walkthrough of major classes of transactions that are affected only indirectly by the controls specifically identified by management as addressing the material weakness.

c. In addition to the communication requirements described in AU sec. 315, *Communications Between Predecessor and Successor Auditors*, the successor auditor should make specific inquiries of the

[3] The term *successor auditor* has the same meaning as the definition of that term in paragraph .02 of AU sec. 315, *Communications Between Predecessor and Successor Auditors*.

predecessor auditor. These inquiries should address the basis for the predecessor auditor's determination that a material weakness existed in the company's internal control over financial reporting and the predecessor auditor's awareness of any information bearing on the company's ability to successfully address that material weakness.

27. A successor auditor may determine that he or she needs to perform procedures in addition to those specified in paragraph 26 of this standard to obtain a sufficient knowledge of the company's business and its internal control over financial reporting. Depending on the nature of the company's business, its organization, its internal control over financial reporting, and the specific material weakness that is the subject of this engagement, a successor auditor may determine that he or she is not able to obtain a sufficient basis for reporting on whether a previously reported material weakness continues to exist without performing a complete audit of internal control over financial reporting in accordance with Auditing Standard No. 2.

Testing and Evaluating Whether a Material Weakness Continues to Exist

28. The auditor must obtain an understanding of and evaluate management's evidence supporting its assertion that the specified controls related to the material weakness are designed and operated effectively, that these controls achieve the company's stated control objective(s) consistent with the control criteria, and that the identified material weakness no longer exists. If the auditor determines that management has not supported its assertion with sufficient evidence, the auditor cannot complete the engagement to report on whether a previously reported material weakness continues to exist, because one of the conditions for engagement completion described in paragraph 7 of this standard would not be met.

Note: Paragraphs 40 through 46 of Auditing Standard No. 2 apply to the auditor's evaluation of management's annual assessment of internal control over financial reporting and management's related documentation. The auditor may apply the relevant concepts described in that section to the evaluation of management's evidence supporting management's assertion that a previously reported material weakness no longer exists.

29. As a part of evaluating management's evidence supporting its assertion, the auditor should determine whether management has selected an appropriate date for its assertion. In making this determination, the auditor should take into consideration the following:

a. Management's assertion that a previously reported material weakness no longer exists may be made as of any specified date that permits management to obtain sufficient evidence supporting its assertion.

   Note: The auditor also should determine whether the specified date of management's assertion permits the auditor to obtain sufficient evidence supporting his or her opinion.

b. Depending on the nature of the material weakness, the stated control objective, and the specified controls, the specified date of management's assertion may need to be after the completion of one or more period-end financial reporting processes.

c. Controls that operate daily and on a continuous, or nearly continuous, basis generally permit the auditor to obtain sufficient

evidence as to their operating effectiveness as of almost any date management might choose to specify in its report.

d. Controls that operate over the company's period-end financial reporting process typically can be tested only in connection with a period-end.

30. The auditor should obtain evidence about the effectiveness of all controls specifically identified in management's assertion. The nature, timing, and extent of the testing that enables the auditor to obtain sufficient evidence supporting his or her opinion on whether a previously reported material weakness continues to exist will depend on both the nature of the controls specifically identified by management as meeting the company's stated control objectives and the date of management's assertion.

31. All controls that are necessary to achieve the stated control objective(s) should, therefore, be specifically identified and evaluated. The specified controls will necessarily include controls that have been modified or newly implemented and also may include existing controls that previously were deemed effective during management's most recent annual assessment of internal control over financial reporting. As part of testing and evaluating the design effectiveness of the specified controls, the auditor should determine whether the specified controls would meet the stated control objective(s) if they operated as designed. In making this evaluation, the auditor should apply paragraphs 88 through 91 of Auditing Standard No. 2.

32. Consistent with the direction in paragraph 92 of Auditing Standard No. 2, the auditor should evaluate the operating effectiveness of a specified control by determining whether the specified control operated as designed and whether the person performing the control possesses the necessary authority and qualifications to perform the control effectively. In determining the nature, timing, and extent of tests of controls, the auditor should apply paragraphs 93 through 102 and 105 through 107 of Auditing Standard No. 2.

33. The auditor should apply paragraph 98 of Auditing Standard No. 2 regarding an adequate period of time to determine the operating effectiveness of a control in the context of an engagement to report on whether a previously reported material weakness continues to exist. Paragraph 98 of Auditing Standard No. 2 states (in part):

> The auditor must perform tests of controls over a period of time that is adequate to determine whether, as of the date specified in management's report, the controls necessary for achieving the objectives of the control criteria are operating effectively. The period of time over which the auditor performs tests of controls varies with the nature of the controls being tested and with the frequency with which specific controls operate and specific policies are applied.

For example, a transaction-based daily reconciliation generally would permit the auditor to obtain sufficient evidence as to its operating effectiveness in a shorter period of time than a pervasive, company-level control, such as any of those described in paragraphs 52 and 53 of Auditing Standard No. 2. Additionally, the auditor typically will be able to obtain sufficient evidence as to the operating effectiveness of controls over the company's period-end financial reporting process only by testing those controls in connection with a period-end.

34. The auditor should determine whether, based on the nature of the material weakness, performing substantive procedures to support recorded financial statement amounts or disclosures affected by the specifically identified controls is necessary to obtain sufficient evidence regarding the operating effectiveness of those controls. For example, a material weakness in the company's controls over the calculation of its bad debt reserve ordinarily would require

that the auditor also perform substantive procedures to obtain sufficient evidence supporting an opinion about whether the material weakness continues to exist as of a specified date. In this circumstance, in addition to testing the design and operating effectiveness of the controls specifically identified as achieving the company's stated control objective that its bad debt reserve is reasonably estimated and recorded, the auditor ordinarily would need to perform substantive procedures to determine that, as of that same specified date, the company's bad debt reserve was fairly stated in relation to the company's financial statements taken as a whole.

35. When the specified controls, stated control objectives, and material weakness affect multiple locations or business units of the company, the auditor may apply the relevant concepts in paragraphs B1 through B13 of Appendix B of Auditing Standard No. 2 to determine the locations or business units at which to perform procedures.

Using the Work of Others

36. The auditor should evaluate whether to use the work performed by others in an engagement to report on whether a previously reported material weakness continues to exist. To determine the extent to which the auditor may use the work of others to alter the nature, timing, or extent of the work the auditor otherwise would have performed, the auditor should apply paragraphs 109 through 115 and 117 through 125 of Auditing Standard No. 2.

37. The auditor's opinion relates to whether a material weakness no longer exists at the company because the stated control objective(s) is met. Therefore, if the auditor has been engaged to report on more than one material weakness or on more than one stated control objective, the auditor must evaluate whether he or she has obtained the principal evidence that the control objectives related to each of the material weaknesses identified in management's assertion are achieved. The auditor may, however, use the work of others to alter the nature, timing, or extent of the work he or she otherwise would have performed. For these purposes, the work of others includes relevant work performed by internal auditors, company personnel (in addition to internal auditors), and third parties working under the direction of management or the audit committee that provide information about the effectiveness of internal control over financial reporting.

38. Paragraph 122 of Auditing Standard No. 2 should be applied in the context of the engagement to report on whether a previously reported material weakness continues to exist. Paragraph 122 states, in part, "As the significance of the factors listed in paragraph 112 increases, the ability of the auditor to use the work of others decreases at the same time that the necessary level of competence and objectivity of those who perform the work increases." There may, therefore, be some circumstances in which the scope of the audit procedures to be performed in this engagement will be so limited that using the work of others will not provide any tangible benefit to the company or its auditor. Additionally, the auditor should perform any walkthroughs himself or herself because of the degree of judgment required in performing this work.

> Note: The requirement described in paragraph 26b of this standard for the auditor to perform a walkthrough applies only to an auditor who did not complete an audit of internal control over financial reporting as of the company's most recent annual assessment. An auditor who has rendered an opinion on the effectiveness of the company's internal control over financial reporting in accordance with Auditing Standard No. 2 as of the company's most recent annual assessment is not required to perform a walkthrough as part of this engagement.

39. The following example illustrates how to apply this section on using the work of others to this engagement.

In this example, the company's previously reported material weakness relates to the company's failure to perform bank reconciliations at its 50 subsidiaries. The specified controls identified by the company are the timely preparation of complete and accurate reconciliations between the company's recorded cash balances and the company's cash balances as reported by its financial institution.

Although certain controls over bank reconciliations are centralized, the performance of the bank reconciliations themselves is not centralized because they occur at each individual operating unit. Further, each operating unit has, on average, three separate cash accounts. The cash accounts affected are not material individually but are material in the aggregate. Most of the controls over the preparation of bank reconciliations involve a low degree of judgment in evaluating their operating effectiveness, can be subjected to objective testing, and have a low potential for management override.

If these conditions describe the specified controls over the preparation of bank reconciliations, the auditor could determine that, based on the nature of the controls as described above, he or she could use the work of others to a moderate extent, provided that the degree of competence and objectivity of the individuals performing the tests is high. The auditor might perform tests of controls that are centralized at the holding company level himself or herself; perform testing at a limited number of locations himself or herself; test the work of others performed at a limited number of other locations; review the results of the work of others at all other locations tested; and determine that, qualitatively and quantitatively, principal evidence had been obtained.

On the other hand, if the company's previously reported material weakness related to the company's failure to perform a reconciliation of its only cash account, few controls and few operations of those controls would underlie management's assertion that the material weakness no longer exists. In this circumstance, it is unlikely that the auditor would be able to use a significant amount of the work of others because of the limited scope of the total amount of work needed to test management's assertion and due to the requirement that the auditor obtain the principal evidence himself or herself.

Note: The examples provided in paragraph 126 of Auditing Standard No. 2 illustrate how to apply the requirements in Auditing Standard No. 2 regarding using the work of others in an audit of internal control over financial reporting. Because of the differences between the auditor obtaining the principal evidence supporting an opinion on the effectiveness of internal control over financial reporting overall and supporting an opinion on the much narrower subject of whether a specified material weakness in internal control over financial reporting continues to exist, the examples in Auditing Standard No. 2 may not illustrate the appropriate application of using the work of others in this narrower engagement. For instance, the examples in paragraph 126 of Auditing Standard No. 2 suggest that, for certain controls, the auditor could potentially use the work of others in its entirety. However, in most cases, the auditor could not solely use the work of others for a control specified in management's assertion regarding a material weakness no longer existing and, at the same time, obtain the principal evidence supporting his or her opinion. As another example, Auditing Standard No. 2 describes an example of appropriately alternating tests of controls. Alternating tests of controls is applicable only in the context of a recurring engagement, which is not the context for the auditor's reporting on whether a previously reported material weakness continues to exist.

Opinions Based, in Part, on the Work of Another Auditor

40. The auditor may apply the relevant concepts in AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, in an engagement to report on whether a previously reported material weakness continues to exist, with the following exception. If the auditor decides to serve as the principal auditor and to use the work and reports of another auditor as a basis, in part, for his or her opinion, the principal auditor must not divide responsibility for the engagement with the other auditor. Therefore, the principal auditor must not make reference to the other auditor in his or her report.

Forming an Opinion on Whether a Previously Reported Material Weakness Continues to Exist

41. When forming an opinion on whether a previously reported material weakness continues to exist, the auditor should evaluate all evidence obtained from all sources. This process should include an evaluation of the sufficiency of the evidence obtained by management and the results of the auditor's evaluation of the design and operating effectiveness of the specified controls.

42. Management may conclude that a previously reported material weakness no longer exists because it has been reduced to a significant deficiency. If management does not plan to correct the significant deficiency within a reasonable period of time, the auditor should evaluate whether the remaining significant deficiency could be indicative of a material weakness in internal control over financial reporting. Under paragraph 140 of Auditing Standard No. 2, a significant deficiency not corrected after some reasonable period of time is a strong indicator of a material weakness. Because the auditor is not required to provide an opinion under this voluntary engagement, the auditor could reasonably decline to provide an opinion under such circumstances.

43. The auditor may issue an opinion on whether a previously reported material weakness continues to exist only when there have been no restrictions on the scope of the auditor's work. Because of the scope of an engagement to report on whether a previously reported material weakness continues to exist, any limitations on the scope of the auditor's work require the auditor either to disclaim an opinion or to withdraw from the engagement. A qualified opinion is not permitted.

> Note: As described in paragraph 51 of this standard, the auditor's opinion on whether a previously reported material weakness continues to exist may be expressed as "the material weakness exists" or "the material weakness no longer exists." Therefore, the provisions of this standard do not distinguish between an unqualified opinion and an adverse opinion and, instead, refer simply to "an opinion" or "the auditor's opinion."

Requirement for Written Representations

44. In an engagement to report on whether a previously reported material weakness continues to exist, the auditor should obtain written representations from management:

a. Acknowledging management's responsibility for establishing and maintaining effective internal control over financial reporting;

b. Stating that management has evaluated the effectiveness of the specified controls using the specified control criteria and management's stated control objective(s);

c. Stating management's assertion that the specified controls are effective in achieving the stated control objective(s) as of a specified date;

d. Stating management's assertion that the identified material weakness no longer exists as of the same specified date;

e. Stating that management believes that its assertions are supported by sufficient evidence;

f. Describing any material fraud and any other fraud that, although not material, involves senior management or management or other employees who have a significant role in the company's internal control over financial reporting and that has occurred or come to management's attention since the date of management's most recent annual assessment of internal control over financial reporting; and

g. Stating whether there were, subsequent to the date being reported on, any changes in internal control over financial reporting or other factors that might significantly affect the stated control objective(s) or indicate that the identified controls were not operating effectively as of, or subsequent to, the date specified in management's assertion.

45. The written representations should be signed by those members of management with overall responsibility for the company's internal control over financial reporting whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management ordinarily include the chief executive officer and chief financial officer or others with equivalent positions in the company.

46. The failure to obtain written representations from management, including management's refusal to furnish them, constitutes a limitation on the scope of the engagement. As discussed further in paragraph 43 of this standard, if there is a limitation on the scope of an engagement to report on whether a previously reported material weakness continues to exist, the auditor must either disclaim an opinion or withdraw from the engagement. Further, the auditor should evaluate the effects of management's refusal on his or her ability to rely on other representations of management, including, if applicable, representations obtained in an audit of the company's financial statements.

Documentation Requirements

47. The documentation requirements in Auditing Standard No. 3, *Audit Documentation*, are modified in the following respect as they apply to this engagement. Paragraph 14 of Auditing Standard No. 3 defines the *report release date* as the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. As described in paragraph 29 of this standard, management's assertion that a material weakness no longer exists may be made as of a date other than a period-end financial reporting date. Therefore, the auditor's release of a report on whether a previously reported material weakness continues to exist may not necessarily be associated with the issuance of financial statements of the company. Accordingly, in an engagement to report on whether a previously reported material weakness continues to exist, the report release date for purposes of applying Auditing Standard No. 3 is the date the auditor grants permission to use the auditor's report on whether a previously reported material weakness continues to exist.

Reporting on Whether a Previously Reported Material Weakness Continues to Exist

Management's Report

48. As a condition for the auditor's performance of this voluntary engagement, management is required to present a written report that will accompany the auditor's report, as described in paragraph 7e of this standard. To satisfy this condition for the auditor's performance of this engagement, management's report should include:

a. A statement of management's responsibility for establishing and maintaining effective internal control over financial reporting for the company;

b. A statement identifying the control criteria used by management to conduct the required annual assessment of the effectiveness of the company's internal control over financial reporting;

c. An identification of the material weakness that was identified as part of management's annual assessment;

Note: This report element should be modified in the case in which management's annual assessment did not identify the material weakness, but, rather, only the auditor's report on management's annual assessment identified the material weakness.

d. An identification of the control objective(s) addressed by the specified controls and a statement that the specified controls achieve the stated control objective(s) as of a specified date; and

e. A statement that the identified material weakness no longer exists as of the same specified date because the specified controls address the material weakness.

Auditor's Evaluation of Management's Report

49. With respect to management's report, the auditor should evaluate the following matters:

a. Whether management has properly stated its responsibility for establishing and maintaining effective internal control over financial reporting;

b. Whether the control criteria used by management to conduct the evaluation is suitable;

c. Whether the material weakness, stated control objectives, and specified controls have been properly described; and

d. Whether management's assertions, as of the date specified in management's report, are free of material misstatement.

50. If, based on the results of this evaluation, the auditor determines that management's report does not include the elements described in paragraph 48 of this standard, the conditions for engagement performance have not been met.

Auditor's Report

51. The auditor's report on whether a previously reported material weakness continues to exist must include the following elements:

a. A title that includes the word *independent*;

b. A statement that the auditor has previously audited and reported on management's annual assessment of internal control over financial reporting as of a specified date based on the control criteria, as well as a statement that the auditor's report identified a material weakness;

Note: This report element should be modified in cases in which a successor auditor's performance of this engagement is occurring before he or she has opined on the effectiveness of internal control over financial reporting overall in accordance with Auditing Standard No. 2. In this circumstance, the auditor's report should refer to the predecessor auditor's report on management's annual assessment and the predecessor auditor's identification of the material weakness.

c. A description of the material weakness;

d. An identification of management's assertion that the identified material weakness in internal control over financial reporting no longer exists;

e. An identification of the management report that includes management's assertion, such as identifying the title of the report (if the report is titled);

f. A statement that management is responsible for its assertion;

g. An identification of the specific controls that management asserts address the material weakness;

Note: As discussed further in paragraph 31, all controls that are necessary to achieve the stated control objective should be identified.

h. An identification of the company's stated control objective that is achieved by these controls;

i. A statement that the auditor's responsibility is to express an opinion on whether the material weakness continues to exist as of the date of management's assertion based on his or her auditing procedures;

j. A statement that the engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States);

k. A statement that the standards of the Public Company Accounting Oversight Board require that the auditor plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company;

l. A statement that the engagement includes examining evidence supporting management's assertion and performing such other procedures the auditor considered necessary in the circumstances and that the auditor obtained an understanding of internal control over financial reporting as part of his or her previous audit of management's annual assessment of internal control over financial reporting and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the material weakness;

Note: This report element should be modified in cases in which a successor auditor's performance of this engagement is occurring

before he or she has opined on the effectiveness of internal control over financial reporting overall in accordance with Auditing Standard No. 2. In this circumstance, the auditor's report should include a statement that the engagement includes obtaining an understanding of internal control over financial reporting, examining evidence supporting management's assertion, and performing such other procedures as the auditor considered necessary in the circumstances.

m. A statement that the auditor believes the auditing procedures provide a reasonable basis for his or her opinion;

n. The auditor's opinion on whether the identified material weakness exists (or no longer exists) as of the date of management's assertion;

o. A paragraph that includes the following statements:

- That the auditor was not engaged to and did not conduct an audit of internal control over financial reporting as of the date of management's assertion, the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting, and that the auditor does not express such an opinion, and
- That the auditor has not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company as of any date after the date of management's annual assessment of the company's internal control over financial reporting, other than the controls specifically identified in the auditor's report, and that the auditor does not express an opinion that any other controls operated effectively after the date of management's annual assessment of the company's internal control over financial reporting.

  Note: This report element statement should be modified in the case in which a successor auditor's performance of this engagement is occurring before he or she has opined on the effectiveness of internal control over financial reporting overall in accordance with Auditing Standard No. 2 to read as follows: That the auditor has not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company other than the controls specifically identified in the auditor's report and that the auditor does not express an opinion that any other controls operated effectively.

p. A paragraph stating that, because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate;

q. The manual or printed signature of the auditor's firm;

r. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued; and

s. The date of the auditor's report.

52. Example A-1 in Appendix A is an illustrative auditor's report for an opinion that a material weakness no longer exists, expressed by an auditor who has previously reported on the company's internal control over financial reporting in accordance with Auditing Standard No. 2 as of the company's most recent year-end (herein after referred to as a continuing auditor). Example A-2 in Appendix A is an illustrative auditor's report for an opinion that a material weakness no longer exists expressed by a successor auditor.

53. As stated in paragraph 3 of this standard, the auditor may report on more than one previously reported material weakness as part of the same engagement. In this circumstance, the auditor should modify the report elements described in paragraph 51 of this standard accordingly.

54. *Report modifications.* The auditor should modify the standard report if any of the following conditions exist.

a. Other material weaknesses that were reported previously by the company as part of the company's annual assessment of internal control are not addressed by the auditor's opinion. (See paragraph 56 of this standard.)

b. A significant subsequent event has occurred since the date being reported on. (See paragraphs 57 and 58 of this standard.)

c. Management's report on whether a material weakness continues to exist includes additional information. (See paragraphs 59 through 60 of this standard.)

55. As described further in paragraph 43 of this standard, the form of the auditor's report resulting from an engagement to report on whether a previously reported material weakness continues to exist may be an opinion on whether a material weakness continues to exist, or it may be in the form of a disclaimer of opinion. A qualified opinion is not permitted. Any limitations on the scope of the auditor's work preclude the expression of an opinion. In addition to these reporting alternatives, an auditor may elect not to report on whether a material weakness continues to exist and, instead, withdraw from the engagement.

56. *Other material weaknesses reported previously by the company as part of the company's annual assessment of internal control are not addressed by the auditor's opinion.* In the circumstance in which the company previously has reported more than one material weakness, the auditor may be engaged to report on whether any or all of the material weaknesses continue to exist. If the auditor reports on fewer than all of the previously reported material weaknesses, the auditor should include the following or similar language in the paragraph that states that the auditor was not engaged to perform an audit of internal control over financial reporting. When referring to his or her previously issued report on management's annual assessment, the auditor should either attach that report or include information about where it can be publicly obtained.

> Our report on management's annual assessment of XYZ Company's internal control over financial reporting, dated [*date of report*], [attached or *identify location of where the report is publicly available*] identified additional material weaknesses other than the one identified in this report. We are not reporting on those other material weaknesses and, accordingly, express no opinion regarding whether those material weaknesses continue to exist after [*date of management's annual assessment, e.g., December 31, 200X*]. [*Revise this wording*

and references or attachments appropriately for use in a successor auditor's report.]

Example A-3 in Appendix A is an illustrative report issued by a continuing auditor reporting on only one material weakness when additional material weaknesses previously were reported.

57. *Subsequent events.* A change in internal control over financial reporting or other factors that might significantly affect the effectiveness of the identified controls or the achievement of the company's stated control objective might occur subsequent to the date of management's assertion but before the date of the auditor's report. Therefore, the auditor should inquire of management whether there was any such change or factors. As described in paragraph 44 of this standard, the auditor should obtain written representations from management regarding such matters. Additionally, to obtain information about whether such a change has occurred that might affect the effectiveness of the identified controls or the achievement of the company's stated control objective and, therefore, the auditor's report, the auditor should inquire about and examine, for this subsequent period, the following:

- Internal audit reports (or similar functions, such as loan review in a financial institution) relevant to the stated control objective or identified controls issued during the subsequent period;
- Independent auditor reports (if other than the auditor's) of significant deficiencies or material weaknesses relevant to the stated control objective or identified controls;
- Regulatory agency reports on the company's internal control over financial reporting relevant to the stated control objective or identified controls; and
- Information about the effectiveness of the company's internal control over financial reporting relevant to the stated control objective or identified controls obtained as a result of other engagements.

58. If the auditor obtains knowledge about subsequent events that he or she believes adversely affect the effectiveness of the identified controls or the achievement of the stated control objective as of the date specified in management's assertion, the auditor should follow the requirements in paragraph 61 regarding special considerations when a material weakness continues to exist. If the auditor is unable to determine the effect of the subsequent event on the effectiveness of the identified controls or the achievement of the stated control objective, the auditor should disclaim an opinion.

59. *Management's report includes additional information.* If management's report includes information in addition to the matters described in paragraph 48 of this standard, the auditor should disclaim an opinion on the additional information. For example, the auditor should use the following or similar language as the last paragraph of the report to disclaim an opinion on management's plans to implement new controls:

> We do not express an opinion or any other form of assurance on management's statement referring to its plans to implement new controls by the end of the year.

60. If the auditor believes that management's additional information contains a material misstatement of fact, he or she should discuss the matter with management. If, after discussing the matter with management, the auditor

concludes that a material misstatement of fact remains, the auditor should notify management and the audit committee, in writing, of the auditor's views concerning the information.

Note: If management makes the types of disclosures described in paragraph 59 outside its report on whether a previously reported material weakness continues to exist and includes them elsewhere within a document that contains management's and the auditor's reports on whether a previously reported material weakness continues to exist, the auditor would not need to disclaim an opinion, as described in paragraph 59. However, in that situation, the auditor's responsibilities are the same as those described in this paragraph if the auditor believes that the additional information contains a material misstatement of fact.

Special Considerations When a Previously Reported Material Weakness Continues to Exist

61. If the auditor determines that the previously reported material weakness continues to exist and the auditor reports on the results of the engagement, he or she must express an opinion that the material weakness exists as of the date specified by management.

62. As described in paragraph 55, the auditor is not required to issue a report as a result of this engagement. If the auditor does not issue a report in this circumstance, he or she must communicate, in writing, his or her conclusion that the material weakness continues to exist to the audit committee. Similarly, if the auditor identifies a material weakness during this engagement that has not been previously communicated to the audit committee in writing, the auditor must communicate that material weakness, in writing, to the audit committee.

63. Additionally, whenever the auditor concludes that a previously reported material weakness continues to exist, the auditor must consider that conclusion as part of his or her evaluation of management's quarterly disclosures about internal control over financial reporting, as required by paragraphs 202 through 206 of Auditing Standard No. 2.

64. For example, if the auditor were engaged to report on whether two separate material weaknesses continue to exist and concluded that one no longer exists and one continues to exist, the auditor's report could comprise either of the following: (1) a report that contained two opinions, one on the material weakness that the auditor concluded no longer exists and one opinion on the material weakness that the auditor concluded continues to exist, or (2) a report that contained only a single opinion on the material weakness that the auditor concluded no longer exists if the company modifies its assertion to address only the material weakness that the auditor concluded no longer exists. In the second circumstance, the auditor must communicate, in writing, his or her conclusion that a material weakness continues to exist to the audit committee and also should apply paragraph 56 of this standard regarding other material weaknesses reported previously that are not addressed by the auditor's opinion. Additionally, the auditor must consider that conclusion as part of his or her evaluation of management's quarterly disclosures about internal control over financial reporting, as required by paragraphs 202 through 206 of Auditing Standard No. 2.

Effective Date

65. This standard is effective February 6, 2006.

Appendix A

Illustrative Reports on Whether a Previously Reported Material Weakness Continues to Exist

Paragraphs 51 through 60 of this standard provide direction on the auditor's report on whether a previously reported material weakness continues to exist. The following examples illustrate the application of those paragraphs.

Example A-1—*Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists*

Example A-2—*Illustrative Auditor's Report for a Successor Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists*

Example A-3—*Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion on Only One Previously Reported Material Weakness When Additional Material Weaknesses Previously Were Reported*

Example A-1

Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists

Report of Independent Registered Public Accounting Firm

We have previously audited and reported on management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."*]. Our report, dated [*date of report*], identified the following material weakness in the Company's internal control over financial reporting:

[*Describe material weakness*]

We have audited management's assertion, included in the accompanying [title of management's report], that the material weakness in internal control over financial reporting identified above no longer exists as of [*date of management's assertion*] because the following control(s) addresses the material weakness:

[*Describe control(s)*]

Management has asserted that the control(s) identified above achieves the following stated control objective, which is consistent with the criteria established in [*identify control criteria used for management's annual assessment of internal control over financial reporting*]: [*state control objective addressed*]. Management also has asserted that it has tested the control(s) identified above and concluded that the control(s) was designed and operated effectively as of [*date of management's assertion*]. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on whether the identified material weakness continues to exist as of [*date of management's assertion*] based on our auditing procedures.

Our engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company. Our engagement included examining evidence supporting management's assertion and performing such other procedures as we considered necessary in the circumstances. We obtained an understanding of the company's internal control over financial reporting as part of our previous audit of management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the material weakness described above. We believe that our auditing procedures provide a reasonable basis for our opinion.

In our opinion, the material weakness described above no longer exists as of [*date of management's assertion*].

We were not engaged to and did not conduct an audit of internal control over financial reporting as of [*date of management's assertion*], the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express such an opinion. This means that we have not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company as of any date after

December 31, 200X, other than the control(s) specifically identified in this report. Accordingly, we do not express an opinion that any other controls operated effectively after December 31, 200X.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Example A-2

Illustrative Auditor's Report for a Successor Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists

Report of Independent Registered Public Accounting Firm

We were engaged to report on whether a previously reported material weakness continues to exist at XYZ Company as of [*date of management's assertion*] and to audit management's next annual assessment of XYZ Company's internal control over financial reporting. Another auditor previously audited and reported on management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."*]. The other auditor's report, dated [*date of report*], identified the following material weakness in the Company's internal control over financial reporting:

[*Describe material weakness*]

We have audited management's assertion, included in the accompanying [title of management's report], that the material weakness in internal control over financial reporting identified above no longer exists as of [*date of management's assertion*] because the following control(s) addresses the material weakness:

[*Describe control(s)*]

Management has asserted that the control(s) identified above achieves the following stated control objective, which is consistent with the criteria established in [*identify control criteria used for management's annual assessment of internal control over financial reporting*]: [*state control objective addressed*]. Management also has asserted that it has tested the control(s) identified above and concluded that the control(s) was designed and operated effectively as of [*date of management's assertion*]. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on whether the identified material weakness continues to exist as of [*date of management's assertion*] based on our auditing procedures.

Our engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company. Our engagement included obtaining an understanding of internal control over financial reporting, examining evidence supporting management's assertion, and performing such other procedures as we considered necessary in the circumstances. We believe that our auditing procedures provide a reasonable basis for our opinion.

In our opinion, the material weakness described above no longer exists as of [*date of management's assertion*].

We were not engaged to and did not conduct an audit of internal control over financial reporting as of [*date of management's assertion*], the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express such an opinion. This means that we have not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company other than the control(s) specifically identified in this report. Accordingly, we do not express an opinion that any other controls operated effectively.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Example A-3

Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion on Only One Previously Reported Material Weakness When Additional Material Weaknesses Previously Were Reported

Report of Independent Registered Public Accounting Firm

We have previously audited and reported on management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).*"]. Our report, dated [*date of report*], identified the following material weakness in the Company's internal control over financial reporting:

[*Describe material weakness*]

We have audited management's assertion, included in the accompanying [title of management's report], that the material weakness in internal control over financial reporting identified above no longer exists as of [*date of management's assertion*] because the following control(s) addresses the material weakness:

[*Describe control(s)*]

Management has asserted that the control(s) identified above achieves the following stated control objective, which is consistent with the criteria established in [*identify control criteria used for management's annual assessment of internal control over financial reporting*]: [*state control objective addressed*]. Management also has asserted that it has tested the control(s) identified above and concluded that the control(s) was designed and operated effectively as of [*date of management's assertion*]. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on whether the identified material weakness continues to exist as of [*date of management's assertion*] based on our auditing procedures.

Our engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company. Our engagement included examining evidence supporting management's assertion and performing such other procedures as we considered necessary in the circumstances. We obtained an understanding of the company's internal control over financial reporting as part of our previous audit of management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the material weakness described above. We believe that our auditing procedures provide a reasonable basis for our opinion.

In our opinion, the material weakness described above no longer exists as of [*date of management's assertion*].

We were not engaged to and did not conduct an audit of internal control over financial reporting as of [*date of management's assertion*], the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express such an opinion. This means that we have not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company as of any date after December 31, 200X, other than the control(s) specifically identified in this

report. Accordingly, we do not express an opinion that any other controls operated effectively after December 31, 200X. Our report on management's annual assessment of XYZ Company's internal control over financial reporting, dated [*date of report*], [attached or *identify location of where the report is publicly available*] identified additional material weaknesses other than the one identified in this report. We are not reporting on those other material weaknesses and, accordingly, express no opinion regarding whether those material weaknesses continue to exist after [*date of management's annual assessment, e.g., December 31, 200X*].

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Appendix B

Background and Basis for Conclusions

Introduction

B1. This appendix summarizes factors that the Public Company Accounting Oversight Board (the "Board") deemed significant in reaching the conclusions in the standard. This appendix includes reasons for accepting certain views and not accepting others.

Background

B2. Section 404 of the Sarbanes-Oxley Act of 2002 (the "Act") requires the management of public companies each year to file an assessment of the effectiveness of their companies' internal control over financial reporting. The company's independent auditor must attest to, and report on, management's assessment. Under the Securities and Exchange Commission's (the "SEC" or "Commission") implementing rules, company management may not conclude that internal control over financial reporting is effective if one or more material weaknesses exists.

B3. When a company reports a material weakness, investors may be left uncertain about the reliability of the company's financial reporting. Both companies and report users have recognized the importance of a mechanism for alerting investors that a previously disclosed material weakness no longer exists.[1] The federal securities laws provide part of that mechanism. Those laws require the company to disclose to investors any changes in internal control over financial reporting that occurred during the company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.[2] Therefore, investors will learn of material improvements, such as the remediation of a material weakness, on a timely basis through quarterly disclosures.[3]

B4. When a company determines that a material weakness has been remediated, it may determine that disclosure is sufficient. Some investors and companies, however, have called for the ability to bolster confidence in management's assertions about those internal control improvements with the added assurance of the company's independent auditor.[4]

B5. The Board reviewed its existing auditing and attestation standards to determine whether adequate standards governing such an engagement already existed. The Board's interim attestation standards provide requirements for general attest engagements; however, the Board determined that these standards lack sufficient specificity for this purpose.[5] The Board, therefore, proposed

---

[1] The Board's Standing Advisory Group ("SAG") discussed possible auditor involvement with the elimination of a material weakness at its November 18, 2004, public meeting. The webcast of the November 18, 2004 SAG discussion and the related briefing paper on this topic, "Reporting on the Correction of a Material Weakness," are available on the Board's Web site at www.pcaobus.org.

[2] See Item 308(c) of Regulation S-K, 17 C.F.R. §229.308(c).

[3] In addition, even if internal control over financial reporting is effective as of the end of a company's fiscal year, investors also could potentially learn if it deteriorates materially during the year through these quarterly disclosures.

[4] The Standing Advisory Group's November 18, 2004 discussion included this type of encouragement.

[5] See AT sec. 101, "Attest Engagement" of the Board's interim standards. Effective April 16, 2003, the PCAOB adopted, on an initial, transitional basis, five temporary interim standards rules

(continued)

an auditing standard that would be tailored narrowly to an engagement to report on whether a previously reported material weakness continues to exist.

B6. The Board received 30 comment letters on its proposal, primarily from auditor and investor groups as well as from two issuers. Those comments led to changes in the standard, intended to make the requirements of the standard clearer and more operational. This appendix summarizes significant views expressed in those comment letters and the Board's responses.

Voluntary Nature of Engagement

B7. The proposed standard explicitly stated that the engagement described by this standard is voluntary and that the standards of the PCAOB did not require an auditor to undertake this engagement when a material weakness was previously reported. In addition, the Board stressed the voluntary nature of this engagement at the public meeting proposing this standard.

B8. The value and importance of the Board's standards providing the option of this type of auditor reporting on a material weakness was confirmed unanimously in the comment letters from investors and investor-related parties. Auditors were also supportive of the standard overall and its voluntary nature. Both of the issuers who commented indicated that they would be concerned if issuers become compelled to obtain such opinions. One of these commenters stressed that the disclosure requirements of management, coupled with enhanced criminal penalties, should provide investors with information regarding the continued existence or correction of a material weakness.

B9. The Board continues to believe that providing for this type of auditor reporting in its standards will serve the public interest. At the same time, the Board reaffirms that reporting on whether a material weakness continues to exist is a voluntary engagement and is not required by the standards of the PCAOB.

Form of the Auditor's Opinion

B10. The proposed standard called for the auditor to express a single opinion directly on the subject matter (i.e., the material weakness itself), rather than on management's assertion, as follows:

> In our opinion, XYZ Company has eliminated the material weakness described above as of [*date of management's assertion*] because the stated control objective is met as of [*date of management's assertion*].

B11. Primarily auditors commented on the form of the opinion in the proposed standard and their comments reflected a wide spectrum of ideas. Some commenters expressed support for the auditor's report, including the form of the opinion as proposed. Other comments included a suggestion for two opinions, consistent with Auditing Standard No. 2—one on the subject matter (the elimination of the material weakness) and one on management's assertion. Other

---

(footnote continued)

(PCAOB Rules 3200T, 3300T, 3400T, 3500T, and 3600T) that refer to pre-existing professional standards of auditing, attestation, quality control, ethics, and independence (the "interim standards"). These rules were approved by the SEC on April 25, 2003. See SEC Release No. 33-8222. On December 17, 2003, the Board approved technical amendments to the interim standards rules indicating that, "when the Board adopts a new auditing and related professional practice standard that addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standards will be superseded or effectively amended. Accordingly, the Board approved adding the phrase 'to the extent not superseded or amended by the Board' to each of the interim standards rules." *Technical Amendments to Interim Standards Rules*, PCAOB Release No. 2003-026 (Dec. 17, 2003); Exchange Act Release No. 49624 (Apr. 28, 2004) (SEC Approval). The interim standards are available on the Board's Web site at www.pcaobus.org.

commenters suggested that just one opinion was sufficient, though these commenters were split regarding whether the one opinion should be on management's assertion or on the subject matter. Other commenters suggested that an opinion stating that the material weakness had been eliminated, without the phrase "because the stated control objective is met" would be a better alternative, while others asked the Board to consider an opinion stating that the identified controls were effective because the stated control objective was met, without stating that the material weakness had been eliminated.

B12. A number of commenters expressed concern with the phrasing "the material weakness has been eliminated," including the use of that phrase in the auditor's opinion and in the title of the proposed standard. These commenters believed that terminology such as "elimination" or "eliminated" might be too definite a term that might mislead report users into believing that there were no remaining deficiencies in the internal control over financial reporting in the area related to the specified material weakness, even though control deficiencies of a lesser severity than a material weakness might persist.

B13. After considering these suggestions, the Board decided to retain a single opinion on the subject matter and to revise the opinion wording. The Board continues to believe that a single opinion expressed directly on the subject matter is the simplest and clearest form of communication related to this engagement. Further, the Board believes that an auditor's opinion directly on the subject matter (i.e., the material weakness itself) will best achieve the overarching objective of this engagement—to clearly communicate as of an interim date auditor assurance about whether a previously reported material weakness continues to exist.

B14. The Board agreed with commenters that use of the term "elimination" might increase the risk that a report user would misunderstand the assurance provided by an auditor's opinion on a previously reported material weakness. As a result, the Board changed the form of the opinion to "In our opinion, the material weakness described above no longer exists as of [date of management's assertion]" and the title of the standard to "Reporting on Whether a Previously Reported Material Weakness Continues to Exist." The text of the standard was modified throughout to delete references to "eliminated" or "elimination" and to reflect wording consistent with the revised opinion and title.

As-of Date of Report

B15. The proposed standard provided for significant flexibility by allowing the engagement to be undertaken at any time during the year, limited only by implications associated with the nature of the material weakness. In other words, the proposed standard did not require the engagement to be performed in conjunction with an audit or review of financial statements. Instead, the proposed standard required the auditor to determine whether management had selected an appropriate date for its assertion and specified several matters for the auditor to consider in making this determination.

B16. A number of auditors suggested that the engagement described by the proposed standard should be performed only as of quarterly financial reporting dates instead of as of any date during the year. These commenters believed that such a requirement would allow the auditor to integrate this work with the auditor's interim review procedures under AU sec. 722, *Interim Financial Information*, and provide a link between the auditor's report on the material weakness and management's quarterly disclosures of material changes in internal control. Commenters noted that many of the material weaknesses that have been disclosed to date are related to the period-end financial reporting process and that the auditor would therefore need to test controls in connection

with a period-end to determine whether the material weakness continues to exist. Several commenters linked their suggestion that this engagement be performed only as of a quarterly financial reporting date to the view that the standard's direction on performing substantive procedures as part of this engagement should be bolstered (see separate discussion on performance of substantive procedures beginning at paragraph B51). One commenter pointed out, however, that if this engagement could be conducted only in connection with a quarterly financial reporting date, special guidance for applying the standard to foreign filers would be necessary because foreign filers are not required to report quarterly in the same manner as domestic filers.

B17. The Board believes that the flexibility provided in the proposed standard regarding the timing of the engagement is an important and appropriate feature of the standard. Although the Board agrees with commenters' observations that many of the material weaknesses disclosed during the past year were related to the period-end financial reporting process, the Board determined that the existing provisions of the proposed standard address this circumstance. In determining whether management has selected an appropriate date for its assessment, the standard requires the auditor to consider that controls that operate over the company's period-end financial reporting process typically can be tested only in connection with a period-end.

B18. Moreover, some material weaknesses—such as those that involve transaction-based controls that operate daily—are well suited for a management assertion and an auditor opinion that the material weakness no longer exists as of almost any date. Restricting an auditor's reporting on whether a material weakness continues to exist to only quarterly financial reporting dates could impose unnecessary delay on a company seeking auditor assurance that this type of material weakness no longer exists. For example, assume that a calendar year-end company had previously disclosed a material weakness that was the type that would lend itself well to reporting that it no longer existed as of any date. Further, management could not yet assert that the material weakness no longer existed as of March 31, but believed that it could make the assertion as of a date in April. If the standard restricted auditor reporting to a quarterly financial reporting date, the auditor would have to wait until June 30 to be able to attest to whether the material weakness continued to exist (and, presumably, would not be able to issue his or her report until July, at the earliest). While management could, in this example, provide timely disclosure to investors that the material weakness no longer existed, the Board concluded that structuring the provisions of the standard to potentially result in this kind of delay in auditor assurance would not serve the public interest.

B19. In light of these considerations, the Board decided to retain the provisions of the proposed standard that would permit the auditor to report on whether a previously reported material weakness continues to exist as of any date.

B20. At least one auditor asked for clarification about whether a report issued pursuant to Auditing Standard No. 2 that identified a material weakness could be issued at the same time as a report pursuant to this standard indicating that the material weakness no longer exists as of a later date. The degree of flexibility regarding the timing of this engagement would permit the company (depending on the company's ability to assert that a material weakness no longer exists and the auditor's ability to timely audit that assertion) to simultaneously distribute its annual reports and the management assertion and auditor report described in this standard. Consistent with this flexible approach, nothing in this standard or Auditing Standard No. 2 would preclude the auditor from issuing a single, combined report on the results of an audit of internal control

over financial reporting pursuant to Auditing Standard No. 2 and the results of an engagement performed pursuant to this standard.

Applicability of the Standard to Material Weaknesses Not Previously Reported

B21. The proposed standard was structured to allow an auditor to report only on a previously reported material weakness. The proposed standard defined a previously reported material weakness as a material weakness that was previously described by an auditor's report issued pursuant to Auditing Standard No. 2. A material weakness initially identified *after* the company's annual assessment date could not, therefore, be the subject of an auditor's report under the proposed standard.

B22. Virtually all of the investors who submitted comment letters suggested that the standard should allow for auditor reporting on material weaknesses identified subsequent to the company's most recent annual assessment of internal control over financial reporting. Although some of these commenters expressed concern about the level of work that might be required of the auditor to thoroughly understand a material weakness not previously reported upon by an auditor, they did not believe that the standard should prohibit such reporting. One commenter stated that if a successor auditor could gain an understanding of a company's internal control sufficient to report on a material weakness that was identified and reported on by a predecessor auditor, an auditor should be able to gain the understanding necessary to report on a material weakness identified by management as of an interim date.

B23. The majority of the auditors who commented indicated strong opposition to allowing auditors to report in this engagement on material weaknesses not previously reported. These commenters suggested that the initial identification of a material weakness requires a level of understanding of the company's controls and the specific facts and circumstances surrounding the material weakness that can result only from a complete evaluation of the effectiveness of internal control over financial reporting. Additionally, at least one commenter expressed concern that the identification of a material weakness subsequent to the annual assessment is a strong indicator of a material change within the company's internal control over financial reporting. This commenter believed that in such a circumstance the auditor would not have sufficient knowledge of the current state of internal control over financial reporting to be able to consider the interaction and potential implications of the change on other controls. This commenter also believed that this situation would prevent the auditor, in most cases, from being able to determine whether the newly identified material weakness no longer exists.

B24. The Board decided to retain the approach described by the proposed standard. The Board believes that the issue of a newly identified material weakness being an indicator of a material change within a company's internal control over financial reporting is a valid concern. Although the change in internal control over financial reporting giving rise to any new material weakness may be confined specifically to the area in which the material weakness originally was identified, the change also could be more far-reaching. In such circumstances, the auditor may not be able to determine the effect of the change without performing a full audit of internal control over financial reporting.

B25. The Board also notes that there is an important distinction between material weaknesses previously identified in an auditor's report issued pursuant to Auditing Standard No. 2 and other newly identified material weaknesses. The primary purpose of the narrow engagement described by this standard is to establish a timely and reasonable mechanism that a company can use to remove

any perceived "stain" upon its financial reporting due to an outstanding adverse audit opinion on internal control over financial reporting that identified a material weakness. In the case of a new material weakness that is identified and addressed by management as of an interim date, an adverse auditor opinion previously attesting to the material weakness would not exist and, therefore, the new material weakness would not be the subject of the same type of market focus.

B26. There is also a fundamental difference between the auditor reporting on a material weakness not previously reported and a successor auditor reporting on a material weakness that *was* reported in a predecessor auditor's opinion on internal control over financial reporting. The fundamental difference is the concept of material change described above. The successor auditor must obtain a sufficient understanding of the company's internal control over financial reporting to report on the existence of a material weakness that was previously reported. This successor auditor, however, has the benefit of knowing that the material weakness was identified in the context of an audit of the internal control over financial reporting as a whole and that the predecessor auditor should have adequately described the nature of the material weakness (particularly its pervasiveness and the extent of its effect on the company's financial reporting). In contrast, in situations in which a material change has taken place and a new material weakness has arisen after the previous annual assessment of internal control over financial reporting, neither the predecessor nor the successor auditor has obtained this level of understanding as it relates to the newly identified material weakness.

B27. These considerations, taken together, resulted in the Board's decision to retain the provisions of the proposed standard that limit this engagement only to material weaknesses that have been previously described in an auditor's report issued pursuant to Auditing Standard No. 2. The Board also made changes to the standard, as suggested by one commenter, to make these provisions clearer. These changes included changing the title of the standard to "Reporting on Whether a Previously Reported Material Weakness Continues to Exist" as well as conforming changes to the text of the standard to refer explicitly to a *previously reported* material weakness as the subject matter of this engagement.

Focus on Control Objectives

B28. The proposed standard focused on stated control objectives to determine whether a material weakness continues to exist and posited that if a material weakness has been disclosed previously, a necessary control objective at the company has not been achieved. Because the term "stated control objective" was not precisely defined elsewhere in the Board's auditing standards, the proposed standard provided a definition as well as examples of stated control objectives.

B29. A *stated control objective* in the context of this engagement is the specific control objective identified by management that, if achieved, would result in the material weakness no longer existing. The stated control objective would provide management and the auditor with a specific target against which to evaluate whether the material weakness continues to exist. For this reason, the proposed standard required that management and the auditor be satisfied that if the stated control objective were achieved the material weakness would no longer exist.

B30. Comments on the proposed standard's focus on control objectives came primarily from auditors. Many auditors, either explicitly or implicitly, supported the focus on control objectives. One auditor suggested that, given the importance of control objectives, the proposed standard should explicitly state that documentation of control objectives is required.

B31 Several auditors, however, expressed concerns about the proposed standard's focus on control objectives. A couple of these commenters suggested that the proposed standard's emphasis on control objectives might inappropriately establish a framework for evaluating the effectiveness of internal control over financial reporting that differs from, or otherwise adversely affects the proper application of, the Committee of Sponsoring Organizations of the Treadway Commission's publication *Internal Control—Integrated Framework* ("COSO").

B32. Most concerned commenters expressed apprehension that report users might be misled by an auditor's opinion that a material weakness had been eliminated because the control objectives had been met. They believed that this type of opinion might lead report users to mistakenly believe that if the control objectives were met, there were no remaining deficiencies in the internal control over financial reporting in the area related to the material weakness—when, in fact, a significant deficiency or deficiency could continue to exist.

B33. Another commenter noted that the examples in the proposed standard illustrated only control objectives for the control activities component of internal control over financial reporting—not for the other components (control environment, risk assessment, monitoring, information and communication). This commenter suggested that examples of control objectives in the other components would be helpful. Another commenter suggested that, given the importance of the control objective concept, if the Board's standards were to specifically address the concept, such a definition and discussion should reside in Auditing Standard No. 2. One concerned auditor concluded that, given the importance of control objectives, more guidance was needed, including clarification that if more than one control is necessary to achieve a stated control objective, all such controls must be identified and tested as part of this engagement.

B34. In response to comments, the Board decided to retain the definition of, and focus on, control objectives and provide additional guidance. The Board views the auditor's use of the concept of control objectives as analogous to the use of the concept of relevant assertions. The concept of relevant assertions was already familiar to experienced auditors and was specifically defined for the first time in Auditing Standard No. 2 because of that standard's focus on testing controls over all relevant assertions related to all significant accounts. Similarly, the concept of control objectives is familiar to most experienced auditors and is already used to describe the auditor's responsibilities under Auditing Standard No. 2).[6] A definition of control objectives (and stated control objectives) is provided in this standard because of the standard's focus on control objectives as a specific measure for determining whether a material weakness continues to exist. This is consistent with the Board's objective for its standards to be clear as well as the focus on control objectives in the engagement described by this standard.

B35. The Board believes that the standard's focus on control objectives is sound and helpful and is an appropriate complement to the control criteria, such as

---

[6] For example, paragraph 12 of Auditing Standard No. 2 states, "Therefore, effective internal control over financial reporting often includes a combination of preventive and detective controls to achieve a specific control objective." Paragraph 85 of Auditing Standard No. 2 elaborates on this idea, including the example that, when performing tests of preventive and detective controls, the auditor might conclude that a deficient preventive control could be compensated for by an effective detective control and, therefore, not result in a significant deficiency or material weakness. That paragraph concludes with the statement, "When determining whether the detective control is effective, the auditor should evaluate whether the detective control is sufficient to achieve the control objective to which the [deficient] preventive control relates." Perhaps most notably, paragraph 88 of Auditing Standard No. 2 requires the auditor to identify the company's control objectives in each area and identify the controls that satisfy each control objective to evaluate whether the company's internal control over financial reporting is designed effectively.

COSO, for the purposes of this engagement. The process of tailoring control objectives to the individual company allows the control criteria (i.e., the evaluation framework) used for management's annual assessment to be applied to the facts and circumstances in a reasonable and appropriate manner. Accordingly, the emphasis in this standard on control objectives is consistent with, and supports a correct application of, COSO.

B36. The focus on whether the stated control objectives have been met as the target for determining whether a material weakness continues to exist does accommodate the circumstance in which a deficiency or significant deficiency continues to exist in that area of the company's internal control over financial reporting. Although several commenters linked this result with the focus on control objectives, this potential result would exist in any case within the overall construct of this standard, completely apart from the focus on control objectives. The potential for less severe deficiencies to persist in an area in which a previously reported material weakness no longer exists parallels the reporting results of an engagement performed under Auditing Standard No. 2. According to that standard, only material weaknesses (not less severe weaknesses) are disclosed in an auditor's report and only the existence of a material weakness and not less severe weaknesses affects the auditor's opinion on the effectiveness of the company's internal control over financial reporting. As an illustration, assume that a company that had previously reported a material weakness in internal control over financial reporting elected to wait until the auditor's next annual report issued pursuant to Auditing Standard No. 2 to obtain auditor assurance related to the existence of the material weakness. If the control weakness that had previously risen to the level of material weakness were reduced to a significant deficiency or deficiency as of the company's next year-end, the auditor's next report issued under Auditing Standard No. 2 would present an unqualified opinion indicating that the company's internal control over financial reporting was effective. The Board concluded that the users of an auditor's report on whether a previously reported material weakness continues to exist need only receive auditor assurance that the material weakness no longer exists and not more detailed information about whether less severe control deficiencies continue to persist.

B37. The Board notes, however, that paragraph 140 of Auditing Standard No. 2 states (in part) that strong indicators of a material weakness include circumstances in which significant deficiencies that have been communicated to management and the audit committee remain uncorrected after some reasonable period of time. If management does not plan to correct the significant deficiency within a reasonable period of time, the auditor should evaluate whether the remaining significant deficiency could be indicative of a material weakness in internal control over financial reporting. An auditor is not required to provide an opinion under this voluntary engagement, and could reasonably decline to provide an opinion under such circumstances.

B38. In response to comments that report users will mistakenly believe that an auditor's report issued pursuant to the standard's provisions is communicating auditor assurance that no control deficiencies exist in the area related to the former material weakness, the Board decided that the change in the title of the standard and the form of the auditor's opinion (discussed further in paragraph B14), coupled with this discussion, would sufficiently mitigate any potential for report users to misunderstand the assurance being provided by an engagement conducted under the this standard. Removing the concept of control objectives from the standard would not address the potential for misunderstanding because this potential exists independently of the focus on control objectives.

B39. With regard to the recommendation that the standard provide additional examples of stated control objectives, including stated control objectives related to components of internal control over financial reporting other than control activities, the Board determined that the provisions of the standard should remain largely at the conceptual level and state that the other components of internal control over financial reporting can be expressed in terms of control objectives. The Board also determined to emphasize, in the note to paragraph 17 of the standard, that when a material weakness has a pervasive effect on the company's internal control over financial reporting, it may be difficult to identify all of the relevant control objectives and the material weakness probably is not suitable for this type of narrow, interim reporting.

B40. For the purposes of this engagement, a stated control objective need not be more precise than to describe an objective that relates to whether there is a more than remote risk that the company's financial statements are materially misstated in a given area. For instance, paragraph 14 of the standard includes the example control objective, "The company has legal title to recorded product X inventory in the company's Dallas, TX warehouse." This example assumes that the product X inventory account related to the company's Dallas, TX warehouse represents a more than remote risk of material misstatement to the company's financial statements taken as a whole and has been identified as a separate significant account. This example does not suggest that a company should establish separate control objectives for all of its various types of inventory, by inventory location, regardless of materiality.

B41. Although the Board believes that the proposed standard made clear that in performing this engagement, the auditor should identify and test all controls necessary to achieve the stated control objective, based on the importance of this concept and in response to commenters, the Board concluded that an explicit clarification should be added. Not only must newly implemented or modified controls be identified and tested in this engagement, but *all* controls necessary to achieve the stated control objective must be identified and tested. For example, in a circumstance in which four controls must operate effectively for a given control objective to be achieved, the failure of one of those controls could result in a material weakness. In the context of this engagement, all four controls necessary to achieve the stated control objective would need to be specifically identified and tested. This must be the case because of the inherent limitations in internal control over financial reporting. If three of the four controls were found to be effective as of year-end, they cannot be assumed to be effective as of a later date. To render an opinion as of a current date about whether the material weakness exists, the auditor must have current evidence about whether all controls (in this example, all four controls) necessary to achieve the control objective are designed and operating effectively.

B42. Regarding the suggestion to include a requirement that control objectives be documented, the Board notes that neither COSO nor Auditing Standard No. 2 currently contain such a requirement. As with many aspects of assessing the effectiveness of internal control over financial reporting, the better the documentation, the easier and more efficient the evaluation, especially from the auditor's perspective. In the context of this engagement, by virtue of creating a stated control objective, the company and the auditor would document the stated control objective, even if that documentation appeared only in their respective reports. Therefore, documentation is effectively required for the stated control objectives encompassed by an engagement conducted under this standard. The Board does not believe, however, that establishing a broad requirement for documenting *all* control objectives related to a company's internal control over financial reporting is needed at this time or would be appropriately placed within this standard.

Concept of Materiality

B43. To provide direction on the concept of materiality, the proposed standard largely referred to Auditing Standard No. 2. The proposed standard stated that the concept of materiality, as discussed in paragraphs 22 and 23 of Auditing Standard No. 2, underlies the application of the general and fieldwork standards in an engagement to report on whether a previously reported material weakness continues to exist. Therefore, the auditor uses materiality at the financial-statement level, rather than at the individual account-balance level, in evaluating whether a material weakness exists.

B44. Several auditors commented that the proposed standard should provide additional direction on how the auditor considers materiality in performing this engagement. Commenters believed that clarification was necessary regarding the appropriate time context for management's and the auditor's materiality judgments. These commenters asked whether materiality should be assessed as of the date management asserts to be the date at which the material weakness no longer exists, or as of the end of the prior year when the material weakness was originally reported.

B45. Most commenters on this issue suggested that the date for assessing materiality should be the date management asserts to be the date at which the material weakness no longer exists. Commenters noted, however, that this position would allow a material weakness to no longer exist merely as a result of a business acquisition or disposition, for example, because either of those actions would change materiality as of that point in time (and, in the case of a disposition, send the material weakness along with the disposed business).

B46. Several auditors suggested that the auditor's opinion should explicitly recognize the concept of materiality. Commenters suggested the following as alternatives that would recognize materiality: "Management's assertion that XYZ Company has eliminated the material weakness described above as of [*date of management's assertion*] is fairly stated, in all material respects . . ." and "XYZ Company has eliminated the material weakness with respect to the Company's internal control over financial reporting as described above as of [*date specified in management's assertion*], in all material respects." These commenters were concerned that the opinion described by the proposed standard misrepresented the precision of the auditor's assessment and neglected the notion of reasonable assurance.

B47. The Board decided that the provisions in the standard regarding materiality should be clarified to specify that materiality should be assessed as of the date management asserts that the material weakness no longer exists. The as-of date of management's assertion and the auditor's opinion is fundamental to the auditor's decisions about whether he or she has obtained sufficient evidence to support an opinion and to the auditor's evaluation of that evidence to form an opinion on whether the material weakness exists as of that point in time. The Board believes that the logical and internally consistent position regarding the time context for assessing materiality is to assess materiality as of the date that management asserts the material weakness no longer exists. The Board also believes that materiality can be assessed as of a date other than a financial reporting period-end. This is consistent with the Board's decision, discussed further beginning at paragraph B15, that the standard permit the auditor to report on whether a previously reported material weakness continues to exist as of any date.

B48. The Board also believes that auditors should exercise caution in circumstances in which the only aspect of a previously reported material weakness that has changed is materiality (in other words, the size of the financial statement

accounts has changed due to an acquisition or other activity rather than any changes in the design or operation of controls). In many such cases, the company will have undergone significant changes, with an associated change in internal control over financial reporting overall. In this circumstance, the auditor would need to perform procedures beyond the scope of work ordinarily contemplated under this standard to have a sufficient basis for his or her new assessment of materiality and an adequate understanding of the company's internal control over financial reporting overall. The Board believes that, in many cases in which the company has undergone a change of this magnitude, the auditor would need to perform a full audit of internal control over financial reporting in accordance with Auditing Standard No. 2 to have a sufficient basis for assessing materiality, understanding the company's internal control over financial reporting overall, and rendering an opinion about whether a material weakness continues to exist. Also, as discussed in paragraph B37, a previously reported material weakness may no longer exist because it has been reduced to a significant deficiency. In this circumstance, if management does not plan to correct the significant deficiency within a reasonable period of time, the auditor should evaluate whether the remaining significant deficiency could be indicative of a material weakness.

B49. Regarding the form of the auditor's opinion and concerns that the opinion suggested by the proposed standard implied an inappropriate degree of precision and neglected the concept of reasonable assurance, the Board concluded that the provisions of the proposed standard were sufficiently clear that the auditor's objective in this engagement was to plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist as of the date specified by management. Furthermore, the auditor's report described by the proposed standard included disclosure of this objective. The Board does not, therefore, believe that report users would mistakenly believe that the auditor's opinion, as proposed, would convey absolute assurance.

B50. In addition, the Board believes that including another reference to materiality in the auditor's opinion would not add anything of substance to the auditor's conclusion and could instead impair its readability. The determination of whether a material weakness exists is inherently linked to materiality. Stating that the material weakness no longer exists in all material respects would be redundant—the equivalent of saying that the financial statements are not materially misstated in all material respects. Accordingly, the Board has not added another reference to materiality in the auditor's opinion.

Performance of Substantive Procedures

B51. The proposed standard, consistent with its reliance on the existing provisions of Auditing Standard No. 2, focused largely on the tests of controls that the auditor must perform to obtain reasonable assurance that a material weakness no longer exists. The proposed standard additionally recognized that, in some cases, the auditor also would need to perform substantive procedures on account balances to obtain sufficient evidence as to whether a material weakness no longer exists.

B52. Several auditors believed that the proposed standard was too mild in its wording that the auditor "may determine" that performing substantive procedures was necessary. Those commenters believed that, to be consistent with the integrated audit concept of Auditing Standard No. 2 and to reflect the fact that identification of many material weaknesses during the past year occurred during the performance of substantive audit procedures, such wording did not adequately convey the importance of performing substantive procedures in an

engagement to report on whether a previously reported material weakness continues to exist. Some commenters recommended that the standard set forth a presumptively mandatory requirement for the auditor to perform substantive audit procedures in all cases, while others suggested that strengthening the language or providing additional guidance about when substantive procedures are necessary would be sufficient.

B53. The Board continues to believe that in some circumstances, substantive procedures will not be necessary for the auditor to obtain sufficient evidence about whether a material weakness continues to exist. Like many aspects of this standard, the auditor's judgment in this area will depend on the nature of the material weakness. An auditor can obtain sufficient evidence to support an opinion on whether some material weaknesses continue to exist without the need for substantive procedures. Other material weaknesses necessitate substantive procedures for the auditor to obtain sufficient evidence. Therefore, the Board determined that it would be inappropriate to establish a presumptively mandatory requirement that substantive procedures be performed in all cases.

B54. The Board agreed, however, that the proposed standard did not sufficiently stress the potential importance of performing substantive procedures, depending on the nature of the material weakness. Paragraph 34 of the standard has, therefore, been modified in a manner that the Board believes better articulates the potential need to perform substantive procedures. An example also has been added to this paragraph of the standard to illustrate a circumstance in which substantive procedures ordinarily would need to be performed.

Using the Work of Others

B55. Similar to PCAOB Auditing Standard No. 2, the proposed standard permitted the auditor to use the work of others to alter the nature, timing, and extent of the auditor's performance of this work. Specifically, the proposed standard applied the framework for using the work of others described in PCAOB Auditing Standard No. 2. That framework requires the auditor to obtain the principal evidence supporting his or her opinion and to evaluate the nature of the controls being tested, together with the competence and objectivity of the persons performing the work.

B56. Under both PCAOB Auditing Standard No. 2 and the proposed standard, the framework measures principal evidence in relation to the overall assurance provided by the auditor. In PCAOB Auditing Standard No. 2, the principal evidence supporting the auditor's opinion should be evaluated in relation to the auditor's opinion on internal control over financial reporting overall. In contrast, the evaluation of whether the auditor has obtained the principal evidence supporting his or her opinion as to whether a material weakness no longer exists would need to be applied at the control objective level.

B57. There were few comments on the provisions for using the work of others in this proposed standard. Most commenters who commented on these provisions expressed confusion about a passage in the example of proposed paragraph 36, which stated that "the auditor *might* perform a walkthrough of the reconciliation process himself or herself [emphasis added]." Commenters believed that walkthroughs were required in the proposed standard in all cases and that walkthroughs must be conducted by the auditor himself or herself.

B58. One auditor suggested clarifying within the proposed standard that the auditor will be able to use the work of others only in limited circumstances. This same commenter also believed that the bank reconciliation example presented in the proposed standard to illustrate how the auditor could use the work of others in this type of engagement was too simplistic and requested additional, more realistic examples.

B59. The Board continues to believe that the framework for using the work of others that was established in Auditing Standard No. 2 is appropriate for use in this context and, therefore, the provisions for using the work of others in the standard have been retained as proposed. At the same time, the Board determined that it would be helpful to clarify, through the following discussion, that the evaluation of whether the auditor has obtained the principal evidence supporting his or her opinion on whether a material weakness continues to exist would need to be applied at the control objective level. A complete understanding of this feature of the standard is important because this provision allows for additional flexibility in the auditor's work.

B60. The auditor's opinion in this engagement is expressed only on whether the material weakness continues to exist—not on whether the individually identified controls are effective. As a result, the evaluation as to whether the auditor has obtained the principal evidence supporting his or her opinion should be made at the control objective level—not at the lower level of the controls individually identified in management's assertion and the auditor's report.

B61. If, for example, management's and the auditor's reports identify three separate previously reported material weaknesses that no longer exist, the auditor would, in effect, be rendering three separate opinions. Those opinions would indicate that each of the three individual material weaknesses continues to exist or no longer exists as of the date of management's assertion. The standard, therefore, would require the auditor to obtain the principal evidence that the *control objectives* related to each of the three identified material weaknesses were now achieved. However, the standard would not require that the auditor obtain the principal evidence that each *control specifically identified* in management's assertion as achieving the control objectives is effective.

B62. Auditing Standard No. 4 follows the same framework for using the work of others as Auditing Standard No. 2. There may, however, be some circumstances in which the scope of the audit procedures to be performed in this engagement will be so limited that using the work of others will not provide any tangible benefit to the company or its auditor. The Board believes that no additional specific restriction on the use of the work of others is appropriate or necessary in the context of this engagement. Such a restriction would diminish the flexibility that the framework otherwise provides and perhaps inhibit the auditor's exercise of the judgment necessary to implement the framework appropriately. Furthermore, the Board does not believe that auditors need such direction within the standard to make appropriate decisions about using the work of others in this context.

B63. Similarly, the Board determined that no further examples of using the work of others were needed. The Board believes that additional examples demonstrating the application of the provisions in the standard for using the work of others to reflect more realistic (i.e., complex, fact-driven) situations is better handled outside of the standard itself and by auditors—in their audit methodology, training courses, and other venues.

B64. In response to confusion about the requirement for walkthroughs, the Board clarified the standard by adding a note to paragraph 38 and deleted the reference to a walkthrough from the example on using the work of others. Walkthroughs are required only of a successor auditor when the successor auditor performs this engagement before performing an audit of internal control over financial reporting in accordance with Auditing Standard No. 2. A continuing auditor that has opined already on the company's internal control over financial reporting in accordance with Auditing Standard No. 2 as of the company's most recent annual assessment and is engaged to conduct this narrow engagement is not required to perform any walkthroughs as part of this engagement.

Dividing Responsibility

B65. Due to the narrow scope of an engagement to report on whether a material weakness continues to exist, the provisions of the proposed standard allowed the principal auditor to use the work and reports of another auditor as a basis, in part, for his or her opinion. The proposed standard also prohibited the principal auditor from dividing responsibility for the engagement with another auditor.

B66. Very few comments were received on this provision of the proposed standard. One auditor suggested that, although dividing responsibility may not be appropriate in certain circumstances, the standard should not prohibit it. Another auditor expressed confusion about whether the principal auditor could refer to the report of the other auditor but not divide responsibility with the other auditor.

B67. The Board continues to believe that, based on the nature of the engagement described by the standard, the principal auditor should be prohibited from dividing responsibility for the engagement with another auditor. The Board's consideration of the nature of this engagement included recognition of the narrow scope of the work (i.e., whether a previously reported material weakness continues to exist), that the engagement would be voluntary, and that the assignment would be non-recurring (unlike the recurring nature of the audit of the financial statements or the audit of internal control over financial reporting). The Board notes that three appropriate alternatives exist in the circumstance in which another auditor is involved and the company wants to obtain auditor assurance that a previously reported material weakness no longer exists:

- The principal auditor could report on whether a previously reported material weakness continues to exist according to this standard by performing all of the testing required for this engagement himself or herself.
- The principal auditor could report on whether a previously reported material weakness continues to exist according to this standard by using the work and reports of another auditor as a basis, in part, for his or her opinion, and by taking responsibility for the work performed by the other auditor. In this case, the auditor may not make reference to the other auditor in his or her report on whether a previously reported material weakness continues to exist.
- The company could wait until year-end when the principal auditor would report on the effectiveness of internal control over financial reporting overall under the provisions of Auditing Standard No. 2.

B68. The Board concluded that the standard was sufficiently clear that the principal auditor could not divide responsibility with another auditor and, therefore, that the auditor also could not refer to the other auditor in his or her report. Accordingly, no change has been made to the standard in this regard.

New Material Weaknesses Identified

B69. The proposed standard was silent regarding the auditor's responsibilities if, during the performance of this engagement, he or she became aware of a new material weakness not previously reported on by an auditor.

B70. Several commenters requested that the standard address the auditor's responsibilities for new material weaknesses identified during this engagement and suggested what these responsibilities should be. One investor suggested that the standard should require the auditor to include disclosure of any new material weaknesses of which the auditor was aware in his or her report. This

commenter stated that, otherwise, the auditor's report would become a way of telling investors the good news while concealing the bad news. Another commenter suggested that management should be required to include the new material weakness in management's assertion that would accompany the auditor's report and the auditor should then disclaim an opinion on the new material weakness.

B71. Both the identification of material weaknesses and the remediation of such weaknesses will be captured by management's voluntary and required reporting under the SEC's rules. Accordingly, the provisions of this standard do not facilitate management's ability to conceal from investors the emergence of a new material weakness at the company. Nevertheless, the Board agreed that when an auditor identifies a new material weakness during the performance of this engagement, the auditor should not simply remain silent. Accordingly, the Board modified the standard to require the auditor to communicate, in writing, to the audit committee any material weaknesses identified during this engagement that the auditor had not previously communicated, in writing, to the audit committee.

B72. The existing provisions of Auditing Standard No. 2 contain responsibilities for the auditor if (1) information comes to the auditor's attention during this engagement that leads him or her to believe, while performing quarterly procedures required by Auditing Standard No. 2, that management's quarterly disclosures are materially misleading, or (2) the auditor becomes aware of conditions that existed at the date of his or her last report issued under Auditing Standard No. 2.

B73. Paragraphs 202-206 of Auditing Standard No. 2 establish certain requirements for the auditor related to management's quarterly and annual certifications with respect to the company's internal control over financial reporting. If matters come to the auditor's attention during this engagement that lead him or her to believe, while fulfilling these quarterly requirements, that modification to the disclosures about changes in internal control over financial reporting is necessary for the certifications to be accurate and to comply with the requirements of Section 302 of the Act and the SEC's rules, these provisions of Auditing Standard No. 2 require the auditor to take action. Such actions escalate from auditor communications with management and then to the audit committee, culminating in the auditor considering his or her additional responsibilities under AU sec. 317, *Illegal Acts by Clients*, and Section 10A of the Securities Exchange Act of 1934.

B74. In addition, a continuing or predecessor auditor would have responsibilities under paragraph 197 of Auditing Standard No. 2 if the existence of a new material weakness came to the auditor's attention. This paragraph effectively extends the responsibilities in AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, to reports on the effectiveness of internal control over financial reporting issued pursuant to Auditing Standard No. 2. The identification of a new material weakness in the current year would cause the auditor, in fulfilling these responsibilities, to determine whether the facts relating to the material weakness existed at the date of the auditor's report pursuant to Auditing Standard No. 2 and, if so, (1) whether those facts would have changed the auditor's report issued under Auditing Standard No. 2 if he or she had been aware of them and (2) whether there are persons currently relying on or likely to rely on the auditor's report. If the auditor determined that the new material weakness identified in the current year actually existed as of the date of his or her previous report under Auditing Standard No. 2 and that it was not adequately identified and disclosed in that report, the auditor would need

to take steps such as recalling and reissuing the previous report to ensure that investors did not continue to rely on the previously issued (erroneous) report.

B75. Including newly identified material weaknesses in the auditor's report could potentially mislead investors into believing that the assurance provided by this type of engagement is broader than it actually is. If report users were provided with disclosure (covered by the auditor's opinion) of new material weaknesses of which the auditor was aware, report users might incorrectly believe that the auditor's report captured *all* new material weaknesses that had arisen at the company. Similarly, a requirement for the auditor to disclose any new material weaknesses could lead report users to conclude, incorrectly, that no such disclosure means that there is current auditor assurance over the whole of internal control over financial reporting at the company. The objective of this engagement is to provide auditor assurance about whether a previously reported material weakness continues to exist—nothing broader. The only way for investors to obtain a more complete report from the auditor would be for the auditor to audit internal control over financial reporting in accordance with Auditing Standard No. 2.

Specific Identification of All Previously Reported Material Weaknesses

B76. The proposed standard required the auditor to modify his or her report if the auditor provides assurance on less than all of the material weaknesses previously reported. The proposed standard did not, however, require the auditor to specifically identify all of the previously reported material weaknesses not covered.

B77. All investors who commented on this issue suggested that all material weaknesses previously reported either should be referred to or specifically included in the auditor's report. They indicated that failure to identify the additional material weaknesses might lead some users to erroneously conclude that they no longer exist. Auditors, on the other hand, agreed that complete specific identification of the previously reported material weaknesses not covered by the auditor's opinion should not be included, primarily because they believe that it may increase the risk of confusion about the scope of the engagement and what is being covered in the auditor's opinion. Several commenters who agreed that specific identification was not necessary suggested that in addition to the report modification included in the proposed standard, the auditor's report on this engagement should specifically direct the reader to the previous auditor's report (issued under Auditing Standard No. 2), by either attaching a copy of the audit report or by providing direction as to where the report could be obtained.

B78. The Board believes that including a complete specific identification of the previously reported material weaknesses not covered by this engagement would prove problematic. As noted by many commenters, it is possible that including this detail would confuse report readers regarding the scope of this narrow engagement and could simply that, unless told otherwise, a report user should assume that those other material weaknesses *do* continue to exist. In some of the material weakness descriptions included in management's and the auditor's reports on the effectiveness of the company's internal control over financial reporting as of year-end, the description of multiple material weaknesses covered several pages. That level of detail in an auditor's report specifically targeted at whether just one material weakness continues to exist could easily overwhelm the rest of the audit report, making the report prone to various kinds of misinterpretations.

B79. The Board concluded that report readers would be better served by requiring the auditor to provide information regarding where to obtain the previously

issued audit report—either by attaching it or referring to where it could be publicly obtained.

Other Reporting Matters

B80. *No Requirement to Issue a Report.* The proposed standard required that the auditor, if he or she concluded that the material weakness continues to exist, communicate that conclusion in writing to the audit committee. The proposed standard, however, did not require the issuance of a report. Rather, the proposed standard recognized that the auditor must consider this knowledge in connection with the auditor's responsibilities under Auditing Standard No. 2 to determine whether management's quarterly disclosures about internal control over financial reporting are not materially misleading.

B81. Several auditors who commented recommended that the proposed standard should require the auditor to issue an adverse report in the event that the auditor concludes that the material weakness continues to exist. One suggested that issuance of an adverse report would be necessary only if the auditor believed that the company had previously publicly disclosed that the material weakness had been addressed.

B82. The Board continues to believe that requiring the issuance of an adverse report to the company would serve no useful purpose in this circumstance because the company might not make such a report public. The Board believes, therefore, that requiring the auditor to communicate, in writing, with the audit committee his or her conclusion that a material weakness that was the subject of this engagement continues to exist would serve the same purpose as requiring the issuance of an adverse report. At the same time, such a requirement would provide the auditor with additional flexibility as to the form of communication that would be most meaningful to the audit committee. Regarding the potential for management to lead investors to incorrectly believe that the material weakness no longer exists in its public disclosures, the Board believes that the federal securities laws, as well as auditor's existing responsibilities related to management's quarterly disclosures, are adequate safeguards to protect investors from misleading information.

B83. *No Distinction in Standard Between Unqualified and Adverse Opinion.* As discussed in the note to paragraph 43 of the standard, the standard no longer distinguishes between an unqualified and an adverse opinion. The auditor's opinion was revised to state that the material weakness exists or no longer exists. This revision is discussed further in the section "Form of Auditor's Opinion" and is now referred to in the standard as the auditor's opinion.

B84. *Inherent Limitations.* The inherent limitations paragraph of the auditor's report provided in the proposed standard discussed the inherent limitations of internal control over financial reporting overall, rather than the inherent limitations of the controls related to the material weakness being reported on.

B85. One commenter suggested that the inherent limitations paragraph was too broad for this engagement and needed to be modified to more accurately reflect the narrow focus of this type of engagement.

B86. The Board agreed that the inherent limitations paragraph, in this context, should be targeted to the specific controls identified in this auditor report. In addition, the Board continues to believe that the broader concept of inherent limitations in internal control over financial reporting overall is equally applicable. The inherent limitations paragraph in the auditor's report has been modified to reflect both of these conclusions.

B87. *Obtaining an Understanding of Internal Control Over Financial Reporting.* The proposed standard included a required report element stating that

"the engagement includes obtaining an understanding of internal control over financial reporting, examining evidence supporting management's assertion, and performing such other procedures as the auditor considered necessary in the circumstances." This language also was included in the example report included in the proposed standard.

B88. Several auditors expressed concern that the phrase, "the engagement includes obtaining an understanding of internal control over financial reporting," implies that, as a part of the current engagement, the auditor spent a significant amount of time understanding internal control over financial reporting overall rather than carrying forward his or her understanding from the prior annual audit. These commenters believed this implication conflicted with the direction in the body of the proposed standard that an auditor who has audited the company's internal control over financial reporting within the past year in accordance with Auditing Standard No. 2 would be expected to have obtained a sufficient knowledge of the company and its internal control over financial reporting to perform this engagement. One commenter acknowledged that the proposed wording may be appropriate in cases in which a successor auditor is performing this engagement without previously gaining that understanding.

B89. The Board continues to believe that an auditor who has audited the company's internal control over financial reporting as of the company's most recent annual assessment in accordance with Auditing Standard No. 2 would be expected to have obtained a sufficient knowledge of the company and its internal control over financial reporting to perform an engagement to report on whether a previously reported material weakness continues to exist. To require a continuing auditor to update and document his or her understanding of internal control over financial reporting overall (to the full measure required by Auditing Standard No. 2) would be unnecessarily burdensome and costly. The Board modified the report element for a continuing auditor to clarify that the auditor previously obtained an understanding of internal control over financial reporting overall at the company and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the specified material weakness.

B90. The Board continues to believe, however, that a successor auditor that has not yet audited the company's internal control over financial reporting in accordance with Auditing Standard No. 2 would need to obtain a current understanding of internal control over financial reporting in connection with this engagement. Therefore, the report element described in the proposed standard is appropriate and has been retained for a successor auditor's reporting.

B91. *Example Reports.* The proposed standard included only one example report, which illustrated reporting on one material weakness by a continuing auditor when no additional material weaknesses were reported previously. Several commenters requested modification of the standard to address circumstances that the Board believed were already addressed by the proposed standard but were not illustrated in the single example report. Some commenters also made specific requests for additional example reports.

B92. The Board determined, after considering the nature of the comments, that additional example reports, while not covering all possible situations, would provide additional clarity to the various reporting situations. The Board selected three reports to illustrate most facets of the reporting provisions of the standard. Appendix A includes those reports.

Conforming Amendments to AT sec. 101

B93. The proposed standard contained a proposed conforming amendment to AT sec. 101, *Attest Engagements*. The proposed conforming amendment would

have required the proposed standard to be used, rather than AT sec. 101, for any engagements in which the subject matter is whether a material weakness continues to exist. This conforming amendment would have precluded the auditor from performing an agreed-upon procedures or review engagement (using AT sec. 101) when the subject matter of the engagement was whether a material weakness continues to exist.

B94. The Board received few comments related to the proposed conforming amendment. One auditor agreed that a conforming amendment to preclude a review-level attestation was appropriate when the subject matter was whether a material weakness continues to exist. This commenter went on to suggest, however, that there could be appropriate uses for an agreed-upon procedures engagement and that the Board should not preclude agreed-upon procedures from being performed under the Board's standards. Such reports, the commenter noted, would be restricted to the use of the specified parties who take responsibility for the sufficiency of the agreed-upon procedures for their purposes and, therefore, these reports would not generally be available to investors. Thus, these reports would not be a substitute for the engagements addressed in the proposed standard. Another commenter separately suggested broadly retaining the ability for the auditor to perform a review engagement when the subject matter is a previously reported material weakness.

B95. The Board continues to believe that investors and other report users in the public domain will be best served by the Board's standards permitting only positive assurance (i.e., an examination-level attestation) from the auditor when the subject matter is whether a material weakness continues to exist. The Board agrees, however, that private parties (such as audit committees) who wish to engage the auditor to perform specified procedures when the subject matter is whether a material weakness continues to exist should be allowed to negotiate such a private arrangement, as long as the results are not intended for public use. The Board, therefore, decided to modify the conforming amendment to AT sec. 101 of the Board's interim standards. As adopted, an auditor may not use AT 101 to report on whether a material weakness in internal control over financial reporting continues to exist for any purpose other than the company's internal use.

Appendix 2

Conforming Amendment to PCAOB Auditing and Related Professional Practice Standards Resulting From the Adoption of the Auditing Standard No. 4—*Reporting on Whether a Previously Reported Material Weakness Continues to Exist*

Attestation Standards

The Board's interim attestation standards include the Statements on Standards for Attestation Engagements promulgated by the ASB, as in existence on April 16, 2003. The conforming amendment to the Board's interim attestation standards is as follows:

- *AT sec. 101, Attest Engagements*

  AT sec. 101 is amended by adding as letter f. to paragraph .04, the following:

  Engagements in which the practitioner is engaged to report on whether a material weakness in internal control over financial reporting continues to exist for any purpose other than the company's internal use. Such engagements must be conducted pursuant to PCAOB Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*.

PCAOB Release No. 2005-020

Ethics and Independence Rule Concerning Independence, Tax Services, and Contingent Fees

PCAOB Release No. 2005-020
November 22, 2005

PCAOB Rulemaking
Docket Matter No. 017

Approved by the Securities and Exchange Commission on April 19, 2006, with varying effective dates.

The Securities and Exchange Commission has approved PCAOB ethics and independence rules concerning independence, tax services and contingent fees.

The rules introduce a foundation for the independence component of the Board's ethics rules by establishing a general obligation requiring a registered public accounting firm and its associated persons to be independent of the firm's audit clients throughout the audit and professional engagement period.

The rules identify circumstances in which the provision of tax services impairs an auditor's independence, including services related to marketing, planning, or opining in favor of the tax treatment of, among other things, transactions that are based on aggressive interpretations of applicable tax laws and regulations.

The rules also treat registered public accounting firms as not independent of their audit clients if they enter into contingent fee arrangements with those clients or if the firms provide tax services to certain members of management who serve in financial reporting oversight roles at an audit client or to immediate family members of such persons.

The rules further implement the Sarbanes-Oxley Act's requirement that auditors' non-audit services be pre-approved by the audit committee by strengthening the auditor's responsibilities in connection with seeking audit committee pre-approval of tax services. Specifically, the rules require a registered public accounting firm that seeks such pre-approval to describe proposed tax services engagements, in writing, for the audit committee; to discuss with the audit committee the potential effects of the services on the firm's independence; and to document the substance of that discussion.

Finally, an ethics rule also codifies the principle that persons associated with a registered public accounting firm (e.g., individual accountants) can be held responsible when certain of their actions contribute to a firm's violation of relevant laws, rules, or professional standards.

The effective dates for the rules follow:

Rule	Effective Date
3501—Definition of Terms	April 29, 2006
3502—Responsibility Not to Knowingly or Recklessly Contribute to Violations	April 29, 2006
3520—Auditor Independence	April 29, 2006
3521—Contingent Fees	Rule 3521 will not apply to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before June 18, 2006.
3522—Tax Transactions	Rule 3522 will not apply to tax services that were completed by a registered public accounting firm no later than June 18, 2006.
3523—Tax Services for Persons in Financial Reporting Oversight Roles	Rule 3523 will not apply to tax services being provided pursuant to an engagement in process on April 19, 2006, provided that such services are completed on or before October 31, 2006.
3524—Audit Committee Pre-approval of Certain Tax Services	Rule 3524 will not apply to any tax service pre-approved on an engagement-by-engagement basis before June 18, 2006. With respect to tax services provided to audit clients whose audit committees pre-approve tax services pursuant to policies and procedures, Rule 3524 will not apply to any such tax service that is begun by April 20, 2007.

Summary:

The Public Company Accounting Oversight Board ("PCAOB" or "Board") is adopting technical amendments to certain rules it adopted in July 2005 to promote the ethics and independence of registered public accounting firms that audit financial statements of U.S. public companies.

Public Comments:

The Board, on December 14, 2004, released for public comment proposed rules to promote the ethics and independence of registered public accounting firms. The Board received 807 letters of comment. After considering these comments, the Board adopted final rules on July 26, 2005. Because the amendments being adopted today do not change the substance of these rules, the Board is not seeking additional comment. The rules adopted on July 26, 2005, as amended by this release, remain subject to the Securities and Exchange Commission ("SEC") approval process, which includes a period for public comment.

Board Contacts:

Bella Rivshin, Assistant Chief Auditor (202/207 -9180; rivshinb@pcaobus.org), or Greg Scates, Associate Chief Auditor (202/207 -9114; scatesg@pcaobus.org).

* * *

On July 26, 2005, the Board adopted certain rules related to registered public accounting firms' provision of tax services to public company audit clients. The rules were designed to address certain concerns related to auditor independence when auditors become involved in marketing or otherwise opining in favor of aggressive tax shelter schemes or in selling personal tax services to individuals who play a direct role in preparing the financial statements of public company audit clients. As part of this rulemaking, the Board adopted an ethics rule, Rule 3502, to codify the principle that persons associated with a registered public accounting firm should not cause the firm to violate relevant laws, rules, and standards. The rules were submitted to the SEC on August 2, 2005, for its approval, pursuant to Section 107 of the Sarbanes-Oxley Act of 2002.

After discussions with the SEC, the Board has decided to remove the word "cause" from the title and text of Rule 3502. This amendment is intended to avoid any misperception that the rule affects the interpretation of any provision of the federal securities laws. The rule, as amended, should be interpreted and understood to be the same as the rule adopted by the Board in July, however.[1] In particular, under the amended rule, the person's conduct must have the same relation to the violation and the person must act with the same mental state as under the rule the Board adopted in July.

The Board is also amending Note 1 to Rule 3522(b) to correct a typographical error in the citation of the provision of the Internal Revenue Code cited in that note.

In light of the time that has elapsed since their adoption, the Board has also decided to revise the effective dates for certain of the rules. Three of those rules—Rules 3521, 3522 and 3524—had effective dates of the later of December 31, 2005 or 10 days after the date the SEC approves the rules.[2] The Board has decided to revise the effective dates of those three rules to 60 days after the date the SEC approves the rules.[3]

Specifically, the Board will not apply Rule 3521 to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before 60 days after the date that the SEC approves the rules.[4] The Board will not apply Rule 3522 to tax services that were completed by a registered public accounting firm no later than 60 days after the date that the SEC approves the rules. Rule 3524 will not apply to any tax service pre-approved before 60 days after the date that the SEC approves the rules, or, in the case of an issuer that pre-approves non-audit services by policies and procedures, the rule will not apply to any tax service provided by March 31, 2006. Combined with the time period since the rules' adoption, the extension of the effective dates for these rules should allow reasonable time for affected firms to

Acting Secretary
November 22, 2005

APPENDIX—

Technical Amendments to Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees

Appendix

Amendments to Rules

[Underlining indicates an addition; strikethrough indicates a deletion.]

Rule 3502. Responsibility Not to ~~Cause~~ Knowingly or Recklessly Contribute to Violations

A person associated with a registered public accounting firm shall not take or omit to take an action knowing, or recklessly not knowing, that the act or omission would directly and substantially contribute to a violation by that registered public accounting firm of ~~cause that registered public accounting firm to violate~~ the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards~~; due to an act or omission the person knew, or was reckless in not knowing, would directly and substantially contribute to such violation~~.

Rule 3522. Tax Transactions.

* * *

(b) **Aggressive Tax Position Transactions—**that was initially recommended, directly or indirectly, by the registered public accounting firm and a significant purpose of which is tax avoidance, unless the proposed tax treatment is at least more likely than not to be allowable under applicable tax laws.

Note 1: With respect to transactions subject to the United States tax laws, paragraph (b) of this rule includes, but is not limited to, any transaction that is a listed transaction within the meaning of 26 C.F.R. §1.6011-~~1–4~~(b)(2).

PCAOB Release No. 2007-001

Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud

PCAOB Release No. 2007-001
January 22, 2007

This report focuses on aspects of the Board's interim auditing standards that address the auditor's responsibility with respect to fraud, principally AU § 316, *Consideration of Fraud in a Financial Statement Audit*.[1] The Board is not, in this report, changing or proposing to change any existing standard, nor is the report meant to provide a new interpretation of any aspect of existing standards. The Board has, however, identified certain observations, made in the course of Board inspections, that are sufficiently important or arise with sufficient frequency to warrant discussion in a public report, both for the purpose of generally focusing auditors on being diligent about these matters and for the purpose of providing information that audit committees may find useful in working with auditors.[2]

The auditor's responsibility with respect to the detection of a material misstatement caused by fraud is an important focus of the Board. The Board's standards state that the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, including misstatements caused by fraud.[3] Although any financial statement audit entails some risk that the auditor will not detect a material misstatement even when the audit has been conducted in accordance with the standards of the PCAOB,[4] the risk of nondetection is likely to be higher for misstatements caused by fraud than for misstatements caused by error, since fraud usually involves deliberate concealment and may involve collusion with third parties. The auditor should, therefore, assess risks and apply procedures directed specifically to the detection of a material, fraudulent misstatement of the financial statements.

---

[1] On April 16, 2003, the Board adopted certain pre-existing auditing standards as its interim auditing standards to be used on an initial, transitional basis. PCAOB Rule 3200T describes the auditing standards that the Board adopted and requires registered public accounting firms and their associated persons to comply with these auditing standards to the extent not superseded or amended by the Board. See www.pcaobus.org/standards.

[2] The inspection observations described in this report reflect information reported to the Board by its inspection staff and do not reflect or constitute any determinations by the Board as to whether any firms or persons have engaged in any conduct for which the Board could sanction them through the Board's disciplinary process.

[3] See paragraph .01 of AU §316, *Consideration of Fraud in a Financial Statement Audit*.

[4] See AU § 316.12.

Using observations from certain Board inspections as a focal point, this report discusses aspects of procedures relevant to an auditor's consideration of fraud.[5] The discussion is organized around the following topics:[6]

- Auditor's Overall Approach to the Detection of Financial Fraud
- Brainstorming Sessions and Fraud-Related Inquiries
- Auditor's Response to Fraud Risk Factors
- Financial Statement Misstatements
- Risk of Management Override of Controls
- Other Areas to Improve Fraud Detection

Auditor's Overall Approach to the Detection of Financial Fraud

The auditor is to make various judgments about the nature, timing, and extent of tests to perform to address specifically identified risks of material misstatement due to fraud.[7]

PCAOB inspection teams have observed, however, that auditors often document their consideration of fraud merely by checking off items on standard audit programs and checklists. PCAOB standards require additional documentation evidencing the actual performance of certain of the procedures outlined in those programs and checklists.[8]

In addition, in audits performed by multi-person audit engagement teams, the lack of such additional documentation makes it difficult for senior members of the audit team to supervise engagement team members properly and to review the procedures performed with respect to the consideration of fraud. In certain instances involving such engagement teams, PCAOB inspection teams have observed that engagement teams' documentation did not contain any such additional evidence of the actual performance of the procedures, suggesting that there may not be sufficient involvement of senior members in supervising and reviewing the engagement team's application of the provisions of AU § 316.

In addition, PCAOB inspection teams have, in some cases, observed that auditors failed to expand audit procedures when addressing identified fraud risk factors. In those cases, it appeared that auditors might be performing the procedures required in AU § 316 mechanically, without using those procedures to develop insights on the risk of fraud or with a view toward identifying ways to modify the audit plan in order to address the risk. If used properly, firm programs and checklists can be useful tools for achieving the objectives of AU § 316. Mechanical implementation of the standard is unlikely to be very effective in detecting fraud.

---

[5] Information received or prepared by the Board in connection with any inspection of a registered public accounting firm is subject to certain confidentiality restrictions set out in Sections 104(g)(2) and 105(b)(5) of the Act. Under the Board's Rule 4010, the Board may publish summaries, compilations, or general reports concerning the results of its various inspections, provided that no such published report may identify the firm or firms to which any quality control criticisms in the report relate.

[6] This report's focus on certain topics should not be understood to suggest any relatively lesser degree of importance of topics that are not addressed. Topics are included in this report because of the nature and frequency of deficiencies that Board inspectors have observed concerning these points in certain of their inspections.

[7] See AU § 316.52.

[8] See AU § 316.83 and paragraph 6 of PCAOB Auditing Standard No. 3, *Audit Documentation*.

Brainstorming Sessions and Fraud-Related Inquiries

The auditor's planning should include consideration of how the issuer's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how the issuer's assets could be misappropriated.[9] In audits involving multi-person audit teams, the audit team should hold what the standard refers to as a "brainstorming session" to discuss those issues. This discussion allows the audit team to be alerted to how fraud might be perpetrated and concealed based on the general and client-specific knowledge of key members of the audit team and the expertise of the more experienced members of the team. This brainstorming session also reinforces the concept that the detection of a material misstatement in the financial statements caused by fraud is an essential element of an audit.

During this stage of planning the audit, AU § 316.15 states the auditor should set "aside any prior beliefs the audit team members may have that management is honest and has integrity." The emphasis at this stage is on the issuer's vulnerability to fraud, if management and employees were inclined to perpetrate it,[10] and not solely on the likelihood that fraud has occurred. To be most effective, this stage of planning the audit, including an audit team's brainstorming discussion, should occur during the early stages of audit planning so that auditors can consider the issuer's vulnerability to fraud when developing an overall strategy for the expected scope and conduct of the audit. To most effectively identify fraud risk factors, an audit team's brainstorming session should involve key members of the audit team, including, for example, information technology ("IT"), tax, and other specialists, when they are key members of the audit engagement team.[11]

Despite the importance of this planning stage to an effective audit, PCAOB inspection teams have noted instances of failures to comply with this aspect of the standard. In particular, PCAOB inspectors have (1) identified audits in which the audit team was unable to demonstrate that brainstorming sessions were held; (2) identified audits in which the audit teams' brainstorming sessions occurred after planning and after substantive fieldwork had begun; and (3) identified audits in which key members of the audit team did not attend the brainstorming sessions.

To appropriately discharge the auditor's responsibility with respect to the detection of a material misstatement caused by fraud, the auditor should make inquiries of the audit committee, management, and others about their knowledge of alleged or suspected fraud and fraud risks within the organization.[12] In some engagements, however, inspection teams have found no evidence in the audit documentation that the auditor made required inquiries of the audit committee, management, or others about their knowledge of fraud and fraud risks.

Auditor's Response to Fraud Risk Factors

Auditors respond to the assessment of the risks of material misstatement due to fraud by using a combination of overall and specific responses.[13] The auditor

---

[9] See AU § 316.14.

[10] See AU § 316.15.

[11] See AU § 316.17.

[12] See AU § 316.20–.27.

[13] See AU § 316.48.

should evaluate whether the fraud risk assessment can be linked to individual accounts or classes of transactions and related assertions.[14] Linking in this manner assists the auditor in designing the appropriate audit procedures.[15] An overall response involves a general consideration of how the audit is to be conducted and involves procedures such as modifying the assignment of personnel and the extent of supervision and incorporating an element of unpredictability into the selection of auditing procedures to be performed.[16] For specifically identified risks of material misstatement due to fraud, such as significant related-party transactions not in the ordinary course of business, the auditor generally responds by changing the nature, timing, and/or extent of auditing procedures.[17]

PCAOB inspection teams have observed instances of auditors failing to respond appropriately to identified fraud risk factors. Inspection teams also observed instances in which auditors examined transactions warranting further fraud risk consideration, but for which there was no evidence that the auditors had considered any associated fraud risk factors.

Financial Statement Misstatements

When the auditor's procedures identify misstatements in the financial statements, the auditor should document the nature and effect of the misstatements[18] and consider whether the misstatements might be indicative of fraud.[19] The auditor's evaluation of misstatements may influence the auditor's conclusion about the materiality of those misstatements.[20] Qualitative considerations related to indications of fraud may mean that misstatements of relatively small amounts are material.[21] Although intent might be difficult to ascertain, that difficulty does not relieve the auditor of the responsibility to consider whether misstatements might be indicative of fraud.[22] In addition, the auditor's ongoing assessment of the risk of material misstatement due to fraud should take into account, among other things, any last-minute adjustments significantly affecting financial results.[23]

PCAOB inspectors noted instances in which auditors failed to properly calculate planning materiality and/or the threshold for posting proposed audit adjustments to a summary schedule. As a result, certain uncorrected misstatements were not evaluated, or were not evaluated appropriately, both individually and in the aggregate, with other misstatements because the summary schedule was incomplete. The inspection teams also observed that some auditors did not fulfill their responsibility to investigate identified departures from generally accepted accounting principles to determine whether such departures were indicative of fraud.

In addition, PCAOB inspectors noted instances in which auditors did not post all proposed audit adjustments in excess of the posting threshold to the summary

[23] See AU § 316.68.

schedule, thus rendering the summary incomplete. Inspectors also noted instances in which auditors had netted the effects of known misstatements that individually met the posting threshold. The net effect of those particular misstatements was lower than the posting threshold for the summary of unadjusted differences. As a result, those misstatements were improperly excluded from the evaluation of potential misstatements. Furthermore, inspection teams observed that some auditors did not adequately scrutinize late adjustments, significantly affecting financial results, that were proposed by management and that partially or completely offset adjustments previously proposed by the auditors.

Risk of Management Override of Controls

AU § 316.08 recognizes that "[m]anagement has a unique ability to perpetrate fraud because it frequently is in a position to directly or indirectly manipulate accounting records and to present fraudulent financial information. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively." To address the risk of management override of controls, AU § 316 requires an auditor to perform certain procedures, such as the examination of journal entries and other adjustments for evidence of possible material misstatements due to fraud[24] and the review of accounting estimates for biases that similarly could result in material misstatements due to fraud.[25]

PCAOB inspection teams noted instances in which it did not appear that the auditor had performed adequate procedures with respect to evaluating the risk of management override of controls. More specifically, in some instances it did not appear that the auditor had appropriately addressed the risk of management override of controls with respect to journal entries and accounting estimates.

Journal Entries

Management has often used journal entries to perpetrate or conceal fraudulent financial reporting by recording inappropriate or unauthorized amounts in the accounting records, including computer records, or by making adjustments directly to draft financial statements in post-closing or consolidating entries. Accordingly, auditors should understand the company's financial reporting process and the controls over journal entries and evaluate these areas.[26]

To identify, select, and test specific entries and other adjustments and to determine the appropriate method of examining the underlying support for these entries, auditors should consider several important issues, for example:

- Fraud risk factors that might help identify specific classes of journal entries for testing, such as entries made by unauthorized personnel or personnel who do not ordinarily enter journal entries, or entries that lack detailed explanations or other supporting documentation,
- The characteristics of fraudulent entries, including entries made at unusual times, such as nights, weekends, or holidays, and entries made to intercompany or suspense accounts, and

---

[24] See AU § 316.58.

[25] See AU § 316.63.

[26] See AU § 316.58a.

- Nonstandard journal entries that might not be subjected to the same level of internal control as recurring journal entries, for instance, entries at the close of quarterly and annual reporting periods and those that are part of the post-closing process.[27]

PCAOB inspection teams identified certain audit engagements in which auditors performed tests of journal entries, but failed to demonstrate that they had appropriately assessed the completeness and integrity of the population of journal entries obtained from the issuer. The inspection teams also noted instances in which there was no evidence in the audit documentation, and no persuasive other evidence, that an appropriate examination and evaluation of journal entries was performed. In addition, inspection teams noted the exclusion of journal entries with lower dollar amounts from the examination. Setting the scope in such a manner fails to appropriately address the risk of fraud occurring as a result of the frequent use of low-dollar entries.

In reviewing journal entries, auditors should obtain an understanding of the financial reporting process related to the initiation, recording, and processing of journal entries;[28] the procedures used to record recurring and nonrecurring adjustments; and the controls over journal entries and similar adjustments. Auditors might need to use IT specialists and computer-assisted audit techniques to assist them in this process to ensure the integrity and completeness of the population of journal entries and to assist in the selection of journal entries for testing.[29]

Accounting Estimates

Fraudulent financial reporting often is accomplished through intentional misstatement of accounting estimates.[30] Financial frauds have been committed by management intentionally biasing assumptions and judgments used to estimate account balances. In certain cases, management also has used significant or unusual accounting estimates to intentionally distort results of operations by, for example, failing to recognize losses due to the impairment of assets or intentionally overstating estimates in one period so that the estimates can be reversed in future periods to manage earnings in those periods. Such accounting estimates include allowances for bad debts, accruals for merger-related expenses in connection with business combinations, and so-called restructuring reserves.

Auditors, in complying with AU § 316, should consider the possibility of management bias in developing estimates by considering whether the differences between the estimates best supported by the audit evidence and the estimates included in the financial statements indicate a possible management bias.[31] For example, if each individual accounting estimate included in the financial statements was reasonable and, at the same time, the effect of the difference between each management estimate and the estimate best supported by the audit evidence was to increase income, the auditor should reconsider the estimates taken as a whole.[32] Moreover, auditors should perform a retrospective

---

[27] See AU § 316.61.

[28] See AU § 316.58–.59 and .61.

[29] See AU § 316.61.

[30] See AU § 316.63.

[31] Ibid.

[32] See AU § 312.36.

review of significant accounting estimates reflected in the prior year's financial statements to determine whether management's judgments and assumptions relating to estimates indicate a possible bias on the part of management.[33] If the auditor identifies a possible bias, he or she should evaluate whether the circumstances producing such a bias represent a risk of material misstatement due to fraud.[34]

PCAOB inspection teams observed that some auditors have failed to test, or failed to document their testing of, management's assumptions and other aspects of issuers' accounting estimates. The inspection teams also noted that some auditors failed to assess, or failed to include in their audit documentation evidence that they had assessed, whether the overstatement or understatement of accounting estimates indicated a bias in management's estimates that could result in material misstatements due to fraud.

Other Areas to Improve Fraud Detection

Improvement in auditors' performance in the areas described below also may better position auditors to detect possible misstatements due to fraud.[35]

Analytical Procedures

Although analytical procedures alone are not well-suited for detecting fraud,[36] they can be an effective diagnostic tool, depending on the reliability of the data used to develop the expected results. For example, auditors can use analytical procedures on information that management is less able or less likely to manipulate, such as operating statistics maintained by operating personnel or audited information.

PCAOB inspection teams have noted numerous deficiencies in auditors' performance of analytical procedures that were intended to be substantive analytical procedures. These deficiencies include the failure to test the underlying data used in the analytical procedures as well as the failure to disaggregate the data in order to improve the precision of the analytical procedures when such disaggregation was appropriate. In addition, inspection teams noted that, when the analytical procedures were intended to be substantive tests, some auditors failed to establish expectations, establish thresholds for identifying significant differences, or investigate differences from the expectations that were greater than the established thresholds. Moreover, some auditors failed to obtain corroboration of management's explanations for differences in excess of the established thresholds.

---

[33] See AU § 316.64.

[34] See AU § 316.65.

[35] Each of the areas described in this section has significant relevance to aspects of an audit other than an auditor's responsibilities with respect to fraud. The discussion of any inspection observations in this section should not be understood to mean that any observed deficiencies in these areas have been addressed with the particular firm specifically in relation to detection of fraud. These matters are included in this report because appropriate attention to these areas may play a role in helping the auditor detect material misstatements caused by fraud.

[36] See paragraph .09 of AU §329, *Analytical Procedures*, as amended by the *Conforming Amendments to PCAOB Interim Standards Resulting From the Adoption of PCAOB Auditing Standard No. 2, "An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements."*

Confirmation Process

AU § 316.41 states that auditors ordinarily should presume that revenue recognition is a fraud risk, thus requiring the auditor to respond with appropriate audit procedures. Numerous financial frauds have been perpetrated by management through premature or fictitious revenue recognition schemes.

The recognition of fictitious revenue often results in complementary false and uncollectible receivables. Historically, one of the most widely used substantive tests for determining the existence of receivables and similar assets and, perhaps, for detecting revenue-related fraud as a result, has been direct communication by the auditor with the issuer's customers and others. That audit procedure is based on the premise that audit evidence obtained from third parties will provide the auditor with higher quality audit evidence than is typically available from within the entity.[37]

PCAOB auditing standards permit the use of either positive or negative confirmation requests.[38] With positive confirmation requests, audit evidence is obtained when the auditor receives completed confirmations from the issuer's customers or other intended recipients[39] or, in the absence of such responses, when the auditor performs alternative procedures, such as the examination of shipping documents and cash receipts.[40] (Recipients of negative confirmations are requested to respond only if they disagree with the stated information.) The interim auditing standards caution auditors to use negative confirmations only when certain conditions are present, one of which is that the combined assessed level of inherent and control risk is low.[41] When auditors do not request confirmation of accounts receivable or do not receive responses to positive confirmation requests, they should apply alternative procedures to obtain the evidence necessary to reduce audit risk to an acceptably low level.

PCAOB inspection teams have identified instances in which auditors who had not requested confirmations of account balances or had not received responses to positive confirmation requests either failed to obtain, or failed to include evidence in their audit documentation that they had obtained, sufficient other evidence regarding the existence of accounts receivable balances.

Roll-Forward of Interim Substantive Testing

Auditors usually perform some of their audit work as of an interim date. Interim audit procedures may include confirmation of accounts receivable and observation of physical inventories. PCAOB auditing standards allow auditors to apply substantive tests to the details of asset or liability accounts as of an interim date if additional substantive tests can be designed to cover the remaining period to provide a reasonable basis for extending the audit conclusions at the interim date to the balance sheet date.[42]

---

[37] See paragraph .34 of AU §330, *The Confirmation Process.*

[38] See AU § 330.17.

[39] See AU § 330.18.

[40] See AU § 330.31–.32.

[41] See AU § 330.20.

[42] See paragraph .03 of AU § 313, *Substantive Tests Prior to the Balance Sheet Date*.

Interim audit work creates a somewhat higher risk that the auditor will not detect fraud because management may record fraudulent transactions in this roll-forward period, believing that the auditors will be less likely to detect them. The auditing standards caution auditors that such interim audit procedures potentially increase the risk that misstatements that exist at the balance sheet date will not be detected by the auditor. Furthermore, audit risk tends to increase as the period from the interim date to the balance-sheet date is lengthened.[43]

Therefore, in determining audit procedures to be performed from the interim date to the balance-sheet date, auditors should consider the following factors: the length of the period between the interim and balance-sheet dates; any changes in controls; the nature and volume of transactions during this period; the comparability of the items comprising the account balance at the interim and balance-sheet dates; and any misstatements detected as a result of the interim procedures.[44]

PCAOB inspection teams have observed that some auditors failed to perform, or failed to include evidence in their audit documentation that they had performed, adequate substantive roll-forward procedures to cover the activity from the interim date to the balance sheet date.

Review of Interim Financial Information

Financial frauds, including revenue and expense recognition schemes, often originate with the manipulation of quarterly earnings. The SEC requires the auditor to review the issuer's interim financial information before the company files its quarterly report on Form 10-Q or Form 10-QSB with the SEC for each of the first three quarters of the company's fiscal year. In addition, certain issuers, pursuant to item 302(a) of Regulation S-K, are required to include selected quarterly financial data in their annual (and certain other) filings with the SEC. Thus, a review of a company's interim financial information is required for the fourth quarter for those issuers, even though the company does not file a report on Form 10-Q or Form 10-QSB for that quarter. PCAOB inspection teams observed, in some instances, that auditors had failed to perform, or failed to include evidence in their audit documentation that they had performed, sufficient procedures with respect to the review of fourth-quarter financial information for those issuers that were required to disclose selected quarterly financial data.

* * *

The particular inspection observations described in this report gave rise to quality control concerns that were communicated to the firms at which the deficiencies were identified. By law, those quality control criticisms are not made public with respect to any particular firm if the firm addresses the criticism to the Board's satisfaction within 12 months after the issuance of the inspection report on the firm.[45] No later than the conclusion of this 12-month period, a firm that seeks to keep such criticisms nonpublic must provide the Board with explanation and evidence, which the Board evaluates, concerning how the firm

[43] Ibid.

[44] See AU § 313.04–.07.

[45] See Section 104(g)(2) of the Sarbanes-Oxley Act of 2002.

has addressed the criticisms.[46] To date, the Board's initial experience with the remediation process has been very positive;[47] the Board will continue to monitor the firms' progress in this important area.

PCAOB Rulemaking
Docket Matter No. 021

Summary

After public comment, the Public Company Accounting Oversight Board is adopting Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, as well as an independence rule and conforming amendments to the Board's auditing standards.

Board Contact

Sharon Virag, Associate Chief Auditor (202/207-9164)

* * * * * *

1. Introduction

In 2002, Congress passed the Sarbanes-Oxley Act (the "Act"), which, among other things, established new provisions related to internal control over financial reporting. Section 404 of the Act requires company management to assess and report on the effectiveness of the company's internal control. It also requires a company's independent auditor, registered with the Public Company Accounting Oversight Board ("PCAOB" or "Board"), to attest to management's disclosures regarding the effectiveness of its internal control. As directed by Sections 103 and 404 of the Act, the Board established a standard to govern the newly required audit by adopting Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* ("Auditing Standard No. 2").[1] The Securities and Exchange Commission ("Commission" or "SEC") approved Auditing Standard No. 2 on June 17, 2004.[2]

---

[1] See PCAOB Release No. 2004-001 (March 9, 2004).

[2] See Securities Exchange Act Release No. 49884 (June 17, 2004).

Since Auditing Standard No. 2 became effective, the Board has closely monitored the progress registered firms have made in implementing its requirements. The PCAOB's monitoring has included gathering information during inspections of registered public accounting firms; participating, along with the SEC, in two roundtable discussions with representatives of issuers, auditors, investor groups, and others; meeting with its Standing Advisory Group; receiving feedback from participants in the Board's Forums on Auditing in the Small Business Environment; and reviewing academic, government, and other reports and studies.

As a result of this monitoring, two basic propositions emerged.[3] First, the audit of internal control over financial reporting has produced significant benefits, including an enhanced focus on corporate governance and controls and higher quality financial reporting. Second, these benefits have come at a significant cost. Costs have been greater than expected and, at times, the related effort has appeared greater than necessary to conduct an effective audit of internal control over financial reporting.

As part of a four-point plan to improve implementation of the internal control requirements, the Board determined to amend Auditing Standard No. 2.[4] On December 19, 2006, the Board proposed for comment a new standard on auditing internal control, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, that would replace Auditing Standard No. 2. The Board also proposed a related auditing standard, *Considering and Using the Work of Others in an Audit*, an independence rule relating to the auditor's provision of internal control-related non-audit services, and conforming amendments to its auditing standards.[5]

The Board issued these proposals with the primary objectives of focusing auditors on the most important matters in the audit of internal control over financial reporting and eliminating procedures that the Board believes are unnecessary to an effective audit of internal control. The proposals were designed to both increase the likelihood that material weaknesses in companies' internal control will be found before they cause material misstatement of the financial statements and steer the auditor away from procedures that are not necessary to achieve the intended benefits. The Board also sought to make the internal control audit more clearly scalable for smaller and less complex public companies and to make the text of the standard easier to understand. In formulating these proposals, the Board re-evaluated every significant aspect of Auditing Standard No. 2.

The Board received 175 comment letters on its proposals. The Board also discussed the proposals with its Standing Advisory Group on February 22, 2007.[6] A large majority of commenters were generally supportive of the Board's proposals, particularly the top-down, risk-based approach and focus on the most

---

[4] See PCAOB Press Release, "Board Announces Four-Point Plan to Improve Implementation of Internal Control Reporting Requirements" (May 17, 2006). The other aspects of the plan are: (1) reinforcing auditor efficiency through PCAOB inspections; (2) developing or facilitating development of implementation guidance for auditors of smaller public companies; and (3) continuing PCAOB Forums on Auditing in the Small Business Environment.

[5] Proposed Auditing Standard: *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements and Related Other Proposals*, PCAOB Release No. 2006-007 (Dec. 19, 2006).

[6] A transcript of the portion of the meeting that related to the proposals and an archived web cast of the entire meeting are available on the Board's Web site at http://pcaobus.org/News/Events/Documents/02222007_SAGMeeting/SAG_Transcript.pdf.

important matters. Based on the comments received, the Board believes that the proposal achieves, in large part, the objectives the Board set out when deciding to amend Auditing Standard No. 2. Many commenters also offered suggestions to improve the final standard, which the Board has carefully analyzed.

In considering the comments received and formulating a final standard, the Board closely coordinated its work with the SEC, which proposed guidance for management on evaluating internal control at the same time that the Board issued its proposals.[7] In addition to its role in implementing Section 404(a) of the Act, the SEC must approve new PCAOB auditing standards before they can become effective.[8] On April 4, 2007, the Commission held a public meeting to discuss the Board's proposals and the coordination of those proposals with the Commission's proposed management guidance. At the meeting, the SEC staff provided the Commission its analysis of the public comments on the PCAOB's proposal and the proposed management guidance. The Commission endorsed the recommendations of its staff and directed its staff to focus its remaining work in four areas:

- "Aligning the PCAOB's new auditing standard ... with the SEC's proposed new management guidance under Section 404, particularly with regard to prescriptive requirements, definitions, and terms";
- "Scaling the 404 audit to account for the particular facts and circumstances of companies, particularly smaller companies";
- "Encouraging auditors to use professional judgment in the 404 process, particularly in using risk-assessment"; and
- "Following a principles-based approach to determining when and to what extent the auditor can use the work of others."[9]

After careful consideration of the comments it received and the input from the SEC, the Board has refined its proposals to provide additional clarity and further help auditors to focus on the most important matters. The Board has decided to adopt the revised standard on auditing internal control as Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* ("Auditing Standard No. 5"), to supersede Auditing Standard No. 2. The Board has also decided to adopt the independence rule and conforming amendments to the auditing standards.[10]

2. Notable Areas of Change in the Final Standard

As stated above, the Board believes that the changes made to the proposal reflect refinements, rather than significant shifts in approach. This section describes the areas of change to the proposals that are most notable. Appendix 4 contains additional discussion of comments received on the proposals and the Board's response.

---

[7] See Securities Exchange Act Release No. 54976 (Dec. 20, 2006).

[8] See Section 107 of the Act.

[9] See SEC Press Release, "SEC Commissioners Endorse Improved Sarbanes-Oxley Implementation To Ease Smaller Company Burdens, Focusing Effort On 'What Truly Matters'" (Apr. 4, 2007).

[10] As discussed below, the Board has determined not to adopt the proposed auditing standard on considering and using the work of others.

A. Alignment with management guidance

On December 20, 2006, the SEC issued proposed guidance to help management evaluate internal control for purposes of its annual assessment. In formulating a new standard on auditing internal control, the Board sought to describe an audit process that would be coordinated with management's evaluation process. Many commenters suggested, however, that the SEC's management guidance and the Board's standard should be more closely aligned.

After considering the comments in this area, the Board has decided to make changes that will improve the coordination between the SEC's management guidance and the Board's standard. In doing so, the Board has been mindful of the inherent differences in the roles of management and the auditor. Management's daily involvement with its internal control system provides it with knowledge and information that may influence its judgments about how best to evaluate internal control and the sufficiency of the evidence it needs for its annual assessment. Management also should be able to rely on self-assessment and, more generally, the monitoring component of internal control, provided the monitoring component is properly designed and operates effectively.

The auditor is required to provide an independent opinion on the effectiveness of the company's internal control over financial reporting. The auditor does not have the familiarity with the company's controls that management has and does not interact with or observe these controls with the same frequency as management. Therefore, the auditor cannot obtain sufficient evidence to support an opinion on the effectiveness of internal control based solely on observation of or interaction with the company's controls. Rather, the auditor needs to perform procedures such as inquiry, observation, and inspection of documents, or walkthroughs, which consist of a combination of those procedures, in order to fully understand and identify the likely sources of potential misstatements, while management might be aware of those risk areas on an on-going basis.

The Board believes, however, that the general concepts necessary to an understanding of internal control should be described in the same way in the Board's standard and in the SEC's guidance. Accordingly, the Board has decided to use the same definition of material weakness in its standard that the SEC uses in its final management guidance and related rules. In addition, the Board is adopting the definition of significant deficiencies that the SEC has proposed. The final standard and final management guidance also describe the same indicators of a material weakness. In addition, as described more fully below, the final standard on auditing internal control uses the term "entity-level controls" instead of "company-level controls," which was used in the proposed standard, in order to use the same term as the SEC uses in its final management guidance.[11] Auditing Standard No. 5's discussion of the effect of these controls is also consistent with the discussion of the same topic in the SEC's final guidance.

B. The top-down approach

The proposed standard on auditing internal control was structured around the top-down approach to identifying the most important controls to test. This approach follows the same principles that apply to the financial statement audit – the auditor determines the areas of focus through the identification of significant accounts and disclosures and relevant assertions. Under the proposed

[11] These terms were used interchangeably in the proposed standard and SEC's proposed management guidance and, for these purposes, they mean the same thing. See Securities Exchange Act Release No. 54976 (Dec. 20, 2006), at 12 fn. 29.

standard, the auditor would specifically identify major classes of transactions and significant processes before identifying the controls to test.

In response to comments about the level of detail in the requirements of the proposed standard, the Board has reconsidered whether the final standard should include the identification of major classes of transactions and significant processes as a specifically required step in the top-down approach. As a practical matter, the auditor will generally need to understand the company's processes to appropriately identify the correct controls to test. The Board believes, however, that specific requirements directing the auditor how to obtain that understanding are unnecessary and could contribute to a "checklist approach" to compliance, particularly for auditors who have a long-standing familiarity with the company. Accordingly, the Board has removed the requirements to identify major classes of transactions and significant processes from the final standard. While this should allow auditors to apply more professional judgment as they work through the top-down approach, the end point is the same as in the proposed standard—the requirement to test those controls that address the assessed risk of misstatement to each relevant assertion.[12]

C. Emphasis on fraud controls

The proposed standard on auditing internal control discussed fraud controls and the auditor's procedures related to these controls among the testing concepts included near the end of the standard. Commenters suggested that the placement of the discussion, or the lack of specificity regarding the controls that should be deemed fraud controls, failed to properly emphasize these controls or provide auditors with sufficient direction on how to test fraud controls. In response, the Board has made several changes in the final standard.

First, the discussion of fraud risk and anti-fraud controls has been moved closer to the beginning of the standard to emphasize to auditors the relative importance of these matters in assessing risk throughout the top-down approach.[13] Incorporating the auditor's fraud risk assessment—required in the financial statement audit—into the auditor's planning process for the audit of internal control should promote audit quality as well as better integration. While internal control cannot provide absolute assurance that fraud will be prevented or detected, these controls should help to reduce instances of fraud, and, therefore, a concerted focus on fraud controls in the internal control audit should enhance investor protection. Second, management fraud has also been identified in the final standard as an area of higher risk; accordingly, the auditor should focus more of his or her attention on this area.[14] Finally, the standard, as adopted, provides additional guidance on the types of controls that might address fraud risk.[15]

D. Entity-level controls

The proposed standard on auditing internal control emphasized entity-level controls because of their importance both to the auditor's ability to appropriately tailor the audit through a top-down approach—specifically by identifying and testing the most important controls—and to effective internal control. Additionally, the proposed standard emphasized that these controls might,

---

[12] See paragraph 21.

[13] See paragraphs 14 and 15.

[14] See paragraph 11.

[15] See paragraph 14.

depending on the circumstances, allow the auditor to reduce the testing of controls at the process level. Commenters suggested that the proposed standard did not provide enough direction on how entity-level controls can significantly reduce testing, and some suggested that controls that operate at the level of precision necessary to do so are uncommon. Many commenters suggested incorporating in the final standard the discussion of direct versus indirect entity-level controls that was included in the SEC's proposed management guidance.

The Board continues to believe that entity-level controls, depending on how they are designed and operate, can reduce the testing of other controls related to a relevant assertion. This is either because the entity-level control sufficiently addresses the risk related to the relevant assertion, or because the entity-level controls provide some assurance so that the testing of other controls related to that assertion can be reduced. In response to comments and in order to clarify these concepts, the Board included in the final standard a discussion of three broad categories of entity-level controls, which vary in nature and precision, along with an explanation of how each category might have a different effect on the performance of tests of other controls.[16]

The final standard explains that some controls, such as certain control environment controls, have an important, but indirect effect, on the likelihood that a misstatement will be detected or prevented on a timely basis. These controls might affect the other controls the auditor selects for testing and the nature, timing, and extent of procedures the auditor performs on other controls.

The final standard explains that other entity-level controls may not operate at the level of precision necessary to eliminate the need for testing of other controls, but can reduce the required level of testing of other controls, sometimes substantially. This is because the auditor obtains some of the supporting evidence related to a control from an entity-level control and the remaining necessary evidence from the testing of the control at the process level. Controls that monitor the operation of other controls are the best example of these types of controls. These monitoring controls help provide assurance that the controls that address a particular risk are effective and, therefore, they can provide some evidence about the effectiveness of those lower-level controls, reducing the testing of those controls that otherwise would be necessary.

Lastly, the final standard explains that some entity-level controls might operate at a level of precision that, without the need for other controls, sufficiently addresses the risk of misstatement to a relevant assertion. If a control sufficiently addresses the risk in this manner, the auditor does not need to test other controls related to that risk.

E. Walkthroughs

The proposed standard on auditing internal control would have required auditors to perform a walkthrough of each significant process each year. This proposed requirement represented a change from Auditing Standard No. 2, which required a walkthrough of each major class of transactions within a significant process. Commenters were split on the question of whether the re-calibration from major class of transactions to significant process in the proposed standard would result in a reduction of effort. Some issuers and auditors suggested that walkthroughs are already being performed on significant processes, while other

[16] See paragraph 23. The Board believes that expertise of auditors and companies in the area of entity-level controls will continue to evolve. For example, the Committee of Sponsoring Organizations of the Treadway Commission has begun a project on the monitoring component of internal control that may provide some guidance in this area.

issuers and auditors commented that this proposed requirement would make a difference. A few commenters suggested that a walkthrough of each significant process was insufficient and would negatively affect audit quality, but many others stated that walkthroughs should not be required at all.

In evaluating these comments, the Board focused principally on the objectives it believes are achieved through a properly performed walkthrough. The Board firmly believes that those objectives should be met for the auditor to verify that he or she has a sufficient understanding of the points within the processes where misstatements could occur and to properly identify the controls to test.[17] Procedures that fulfill those objectives also play an important role in the evaluation of the effectiveness of the design of the controls. The Board believes that, in some instances, the requirement to perform a walkthrough may have overshadowed the objectives it was meant to achieve. This may have resulted in some walkthroughs being performed to meet the requirement but failing to achieve the intended purpose. The final standard, therefore, focuses specifically on achieving certain important objectives, and the performance requirement is based on fulfilling those objectives as they relate to the understanding of likely sources of misstatement and the selection of controls to test.[18] While a walkthrough will frequently be the best way of attaining these goals, the auditor's focus should be on the objectives, not on the mechanics of the walkthrough. In some cases, other procedures may be equally or more effective means of achieving them.

F. Evaluation and communication of deficiencies

The proposed standard on auditing internal control required the auditor to evaluate the severity of identified control deficiencies to determine whether they are significant deficiencies or material weaknesses. It then required the auditor to communicate, in writing, to management and the audit committee all significant deficiencies and material weaknesses identified during the audit. The proposed standard defined "significant deficiency" as "a control deficiency, or combination of control deficiencies, such that there is a reasonable possibility that a significant misstatement of the company's annual or interim financial statements will not be prevented or detected." The term "significant misstatement" was defined, in turn, to mean "a misstatement that is less than material yet important enough to merit attention by those responsible for oversight of the company's financial reporting."

Commenters generally supported the proposed definition of the term "significant misstatement," though some were concerned that it was too subjective. Other commenters questioned whether the standard should include a definition of significant deficiency and a requirement to communicate significant deficiencies to the audit committee. At least one commenter suggested that the term be removed from the standard.

After considering these comments, the Board has determined to make changes to the definition of significant deficiency and related requirements.[19] The Board continues to believe that the standard should require auditors to provide

---

[17] See paragraph 34, which describes these objectives.

[18] See paragraph 34.

[19] The Board also made minor changes to the definition of material weakness in order to use the same definition in the SEC's management guidance and related rule. In the final standard, material weakness is defined as "a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis."

relevant information about important control deficiencies—even those less severe than a material weakness—to management and to the audit committee. The final standard, therefore, requires the auditor to consider and communicate any identified significant deficiencies to the audit committee. In order to emphasize that the auditor need not scope the audit to identify all significant deficiencies, however, the Board placed these provisions in the section of the final standard that describes communications requirements.[20]

The relatively minor changes that the Board made to the definition of significant deficiency are also intended to focus the auditor on the communication requirement and away from scoping issues. The final definition is based on the proposed definition of "significant misstatement," which commenters generally supported, and is aligned with the SEC's proposed definition of the same term. Under the final standard, a significant deficiency is "a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness yet important enough to merit attention by those responsible for oversight of the company's financial reporting."

G. Scaling the audit

The proposed standard on auditing internal control indicated that a company's size and complexity are important considerations and that the procedures an auditor should perform depend upon where along the size and complexity continuum a company falls. The proposed standard included a section on scaling the audit for smaller, less complex companies and would have required auditors to evaluate and document the effect of the company's size and complexity on the audit. This documentation requirement applied to audits of companies of all sizes. The proposed standard also included a list of the attributes of smaller, less complex companies and a description of how the auditor might tailor his or her procedures when these attributes are present. In general, commenters were supportive of the proposed standard's general approach to scalability, but had several recommendations for change.

Some commenters suggested that scalability should not be covered as a standalone discussion applicable only to smaller companies and that other companies, regardless of size, might have areas that are less complex. The Board agrees that the direction on scaling will be most effective if it is a natural extension of the risk-based approach and applicable to all companies. Consequently, the Board shortened the separate section on "scaling the audit," and incorporated a discussion of scaling concepts, similar to what was proposed, throughout the final standard. Specifically, notes to relevant paragraphs describe how to tailor the audit to the particular circumstances of a smaller, less complex company or unit. The Board also retained the list of attributes of smaller, less complex companies and acknowledged that, even within larger companies, some business units or processes may be less complex than others. Discussion of these attributes has been incorporated in the section on the auditor's planning procedures in the final standard.[21] As described in the proposing release, the

---

[20] See paragraph 80. The final standard also includes the proposed requirement for the auditor to communicate, in writing, to management, all deficiencies in internal control identified during the audit and inform the audit committee when such a communication has been made, and the proposed requirement to inform, when applicable, the board of directors of the auditor's conclusion that the audit committee's oversight is ineffective. See paragraphs 79 and 81. Some commenters believed that the requirement to communicate all identified deficiencies to management would result in an unnecessary administrative exercise. The Board continues to believe, however, that auditors should provide information about identified control deficiencies to management.

[21] See paragraph 9.

provisions on scalability in the final standard will form the basis for guidance on auditing internal control in smaller companies to be issued this year.

Several commenters, mostly auditors, suggested that the performance requirements that applied to all companies, including large, complex companies, would lead to unnecessary and costly documentation requirements. These commenters were particularly concerned about the requirement to document the effects of size and complexity on all aspects of the audit, even if a particular engagement could not be tailored as a result of these factors. After considering these comments, the Board agreed that this documentation requirement is not necessary to promote audit quality and, therefore, has not included it in the final standard.

H. Use of the work of others in an integrated audit

At the time the Board proposed Auditing Standard No. 5 for public comment, the Board also proposed an auditing standard entitled Considering and Using the Work of Others in an Audit that would have superseded the Board's interim standard AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* ("AU sec. 322"), and replaced the direction on using the work of others in an audit of internal control in Auditing Standard No. 2. As discussed in the proposing release, the Board had several objectives in proposing this standard. The first was to better integrate the financial statement audit and the audit of internal control by having only one framework for using the work of others in both audits. Additionally, the Board wanted to encourage auditors to use the work of others to a greater extent when the work is performed by sufficiently competent and objective persons. Among other things, under the proposed standard, auditors would have been able to use the work of sufficiently competent and objective company personnel—not just internal auditors—and third parties working under the direction of management or the audit committee for purposes of the financial statement audit as well as the audit of internal control.

The Board received numerous comments on the proposed standard on using the work of others. Commenters generally indicated support for a single framework regarding the auditor's use of the work of others in an integrated audit. Some, however, suggested retaining existing AU sec. 322 as the basis for that single framework. They expressed the view that the objective of removing barriers to integration and using the work of others to the fullest extent appropriate could be achieved by retaining AU sec. 322 and going forward with the proposed removal of the "principal evidence" provision. At the same time, some other commenters suggested that the proposed standard did not go far enough in encouraging auditors to use the work of others.

After considering these comments, the Board continues to believe that a single framework for the auditor's use of the work of others is preferable to separate frameworks for the audit of internal control and the audit of financial statements. The factors used to determine whether and to what extent it is appropriate to use the work of others should be the same for both audits. At the same time, the Board agreed with those commenters who suggested that better integration of the audits could be achieved without replacing the existing auditing standard. The Board therefore has decided to retain AU sec. 322 for both audits and incorporate language into Auditing Standard No. 5 that establishes these integration concepts rather than adopt the proposed standard on considering and using the work of others.

Consistent with the proposal, however, Auditing Standard No. 5 allows the auditor to use the work of others to obtain evidence about the design and operating effectiveness of controls and eliminates the principal evidence provision. Recognizing that issuers might employ personnel other than internal auditors to perform activities relevant to management's assessment of internal control over financial reporting, the final standard allows the auditor to use the work of company personnel other than internal auditors, as well as third parties working under the direction of management or the audit committee.[22]

In line with the overall risk-based approach to the audit of internal control over financial reporting, the extent to which the auditor may use the work of others depends, in part, on the risk associated with the control being tested. As the risk decreases, so does the need for the auditor to perform the work him or herself. The impact of the work of others on the auditor's work also depends on the relationship between the risk and the competence and objectivity of those who performed the work. As the risk decreases, the necessary level of competence and objectivity decreases as well.[23] Likewise, in higher risk areas (for example, controls that address specific fraud risks), use of the work of others would be limited, if it could be used at all.

Finally, the Board understands that some of the work performed by others for the purposes of management's assessment of internal controls can be relevant to the audit of financial statements. Therefore, in an integrated audit, the final standard allows the auditor to use the work of these sufficiently competent and objective others—not just internal auditors—to obtain evidence supporting the auditor's assessment of control risk for purposes of the audit of financial statements.[24] The Board believes that this provision will promote better integration of the audit of internal control with the audit of financial statements.

3. Rule 3525—Audit Committee Pre-Approval of Non-Audit Services Related to Internal Control Over Financial Reporting

The Board also proposed a new rule related to the auditor's responsibilities when seeking audit committee pre-approval of internal control related non-audit services. As proposed, the rule required a registered public accounting firm that seeks pre-approval of an issuer audit client's audit committee to perform internal control-related non-audit services that are not otherwise prohibited by the Act or the rules of the SEC or the Board to: describe, in writing, to the audit committee the scope of the proposed service; discuss with the audit committee the potential effects of the proposed service on the firm's independence; and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee pre-approval to perform tax services for an audit client under PCAOB Rule 3524. Most commenters were supportive of the rule as proposed, though some offered suggestions about what should be included in the required communication. After considering the comments on the proposed rule, the Board has adopted it without change.

---

[22] See paragraph 17.

[23] See paragraph 18.

[24] See paragraph 17.

4. Conforming Amendments

As part of the proposal issued for public comment, the Board proposed amendments to certain of the Board's other auditing standards. Only one comment letter specifically addressed the proposed amendments. That letter expressed support for the amendments and suggested a few additional amendments that might be necessary. The Board has considered this comment and added these additional amendments, as well as others, as necessary based on the final standard.

5. Effective Date

The proposing release solicited commenters' feedback on how the Board could structure the effective date of the final requirements so as to best minimize disruption to ongoing audits, but make greater flexibility available to auditors as early as possible. Most commenters on this topic suggested making the final standard on auditing internal control effective as soon as possible in order to be available for 2007 audits.

The Board agrees that the improvements in Auditing Standard No. 5 should be available as soon as possible. Accordingly, the Board has determined that Auditing Standard No. 5, Rule 3525, and the conforming amendments will be effective, subject to approval by the SEC, for audits of fiscal years ending on or after November 15, 2007. Earlier adoption is permitted, however, at any point after SEC approval. Auditors who elect to comply with Auditing Standard No. 5 after SEC approval but before its effective date must also comply, at the same time, with Rule 3525 and other PCAOB standards as amended by this release.

Auditing Standard No. 2 will be superseded when Auditing Standard No. 5 becomes effective. Auditors who do not elect to comply with Auditing Standard No. 5 before that date (but after SEC approval) must continue to comply with Auditing Standard No. 2 until it is superseded. Such auditors should, however, apply the definition of "material weakness" contained in Auditing Standard No. 5, rather than the one contained in Auditing Standard No. 2. The SEC has adopted a rule to define the term "material weakness," and the definition in Auditing Standard No. 5 parallels the new SEC definition.

APPENDICES—

1. Auditing Standard No. 5—An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements
2. Rule 3525—Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting
3. Conforming Amendments to PCAOB Auditing Standards
4. Additional Discussion of Comments and the Board's Response

Appendix 1

Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated With An Audit of Financial Statements*

Introduction

1. This standard establishes requirements and provides direction that applies when an auditor is engaged to perform an audit of **management's assessment**[1] of the effectiveness **of internal control over financial reporting** ("the audit of internal control over financial reporting") that is integrated with an audit of the financial statements.[2]

2. Effective internal control over financial reporting provides reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes.[3] If one or more **material weaknesse**s exist, the company's internal control over financial reporting cannot be considered effective.[4]

3. The auditor's objective in an audit of internal control over financial reporting is to express an opinion on the effectiveness of the company's internal control over financial reporting. Because a company's internal control cannot be considered effective if one or more material weaknesses exist, to form a basis for expressing an opinion, the auditor must plan and perform the audit to obtain competent evidence that is sufficient to obtain reasonable assurance[5] about whether material weaknesses exist as of the date specified in management's assessment. A material weakness in internal control over financial reporting may exist even when financial statements are not materially misstated.

4. The general standards[6] are applicable to an audit of internal control over financial reporting. Those standards require technical training and proficiency as an auditor, independence, and the exercise of due professional care, including professional skepticism. This standard establishes the fieldwork and reporting standards applicable to an audit of internal control over financial reporting.

5. The auditor should use the same suitable, recognized control framework to perform his or her audit of internal control over financial reporting as management uses for its annual evaluation of the effectiveness of the company's internal control over financial reporting.[7]

---

[1] Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

[2] This auditing standard supersedes Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with An Audit of Financial Statements*, and is the standard on attestation engagements referred to in Section 404(b) of the Act. It also is the standard referred to in Section 103(a)(2)(A)(iii) of the Act.

(continued)

Integrating the Audits

6. The audit of internal control over financial reporting should be integrated with the audit of the financial statements. The objectives of the audits are not identical, however, and the auditor must plan and perform the work to achieve the objectives of both audits.

7. In an integrated audit of internal control over financial reporting and the financial statements, the auditor should design his or her testing of controls to accomplish the objectives of both audits simultaneously—

- To obtain sufficient evidence to support the auditor's opinion on internal control over financial reporting as of year-end, and
- To obtain sufficient evidence to support the auditor's control risk assessments for purposes of the audit of financial statements.

8. Obtaining sufficient evidence to support control risk assessments of low for purposes of the financial statement audit ordinarily allows the auditor to reduce the amount of audit work that otherwise would have been necessary to opine on the financial statements. (See Appendix B for additional direction on integration.)

> Note: In some circumstances, particularly in some audits of smaller and less complex companies, the auditor might choose not to assess control risk as low for purposes of the audit of the financial statements. In such circumstances, the auditor's tests of the operating effectiveness of controls would be performed principally for the purpose of supporting his or her opinion on whether the company's internal control over financial reporting is effective as of year-end. The results of the auditor's financial statement auditing procedures also should inform his or her risk assessments in determining the testing necessary to conclude on the effectiveness of a control.

Planning the Audit

9. The auditor should properly plan the audit of internal control over financial reporting and properly supervise any assistants. When planning an integrated audit, the auditor should evaluate whether the following matters are important to the company's financial statements and internal control over financial reporting and, if so, how they will affect the auditor's procedures—

- Knowledge of the company's internal control over financial reporting obtained during other engagements performed by the auditor;
- Matters affecting the industry in which the company operates, such as financial reporting practices, economic conditions, laws and regulations, and technological changes;
- Matters relating to the company's business, including its organization, operating characteristics, and capital structure;

(footnote continued)

company's internal control over financial reporting on a suitable, recognized control framework (also known as control criteria) established by a body or group that followed due-process procedures, including the broad distribution of the framework for public comment. For example, the report of the Committee of Sponsoring Organizations of the Treadway Commission (known as the COSO report) provides such a framework, as does the report published by the Financial Reporting Council, Internal Control Revised Guidance for Directors on the Combined Code, October 2005 (known as the Turnbull Report).

- The extent of recent changes, if any, in the company, its operations, or its internal control over financial reporting;
- The auditor's preliminary judgments about materiality, risk, and other factors relating to the determination of material weaknesses;
- Control deficiencies previously communicated to the audit committee[8] or management;
- Legal or regulatory matters of which the company is aware;
- The type and extent of available evidence related to the effectiveness of the company's internal control over financial reporting;
- Preliminary judgments about the effectiveness of internal control over financial reporting;
- Public information about the company relevant to the evaluation of the likelihood of material financial statement misstatements and the effectiveness of the company's internal control over financial reporting;
- Knowledge about risks related to the company evaluated as part of the auditor's client acceptance and retention evaluation; and
- The relative complexity of the company's operations.

  Note: Many smaller companies have less complex operations. Additionally, some larger, complex companies may have less complex units or processes. Factors that might indicate less complex operations include: fewer business lines; less complex business processes and financial reporting systems; more centralized accounting functions; extensive involvement by senior management in the day-to-day activities of the business; and fewer levels of management, each with a wide span of control.

Role of Risk Assessment

10. Risk assessment underlies the entire audit process described by this standard, including the determination of **significant accounts and disclosures** and **relevant assertion**s, the selection of controls to test, and the determination of the evidence necessary for a given control.

11. A direct relationship exists between the degree of risk that a material weakness could exist in a particular area of the company's internal control over financial reporting and the amount of audit attention that should be devoted to that area. In addition, the risk that a company's internal control over financial reporting will fail to prevent or detect misstatement caused by fraud usually is higher than the risk of failure to prevent or detect error. The auditor should focus more of his or her attention on the areas of highest risk. On the other hand, it is not necessary to test controls that, even if deficient, would not present a reasonable possibility of material misstatement to the financial statements.

12. The complexity of the organization, business unit, or process, will play an important role in the auditor's risk assessment and the determination of the necessary procedures.

---

[8] If no audit committee exists, all references to the audit committee in this standard apply to the entire board of directors of the company. See 15 U.S.C. §§ 78c(a)58 and 7201(a)(3).

Scaling the Audit

13. The size and complexity of the company, its business processes, and business units, may affect the way in which the company achieves many of its **control objective**s. The size and complexity of the company also might affect the risks of misstatement and the controls necessary to address those risks. Scaling is most effective as a natural extension of the risk-based approach and applicable to the audits of all companies. Accordingly, a smaller, less complex company, or even a larger, less complex company might achieve its control objectives differently than a more complex company. [9]

Addressing the Risk of Fraud

14. When planning and performing the audit of internal control over financial reporting, the auditor should take into account the results of his or her fraud risk assessment.[10] As part of identifying and testing entity-level controls, as discussed beginning at paragraph 22, and selecting other controls to test, as discussed beginning at paragraph 39, the auditor should evaluate whether the company's controls sufficiently address identified risks of material misstatement due to fraud and controls intended to address the risk of management override of other controls. Controls that might address these risks include—

- Controls over significant, unusual transactions, particularly those that result in late or unusual journal entries;
- Controls over journal entries and adjustments made in the period-end financial reporting process;
- Controls over related party transactions;
- Controls related to significant management estimates; and
- Controls that mitigate incentives for, and pressures on, management to falsify or inappropriately manage financial results.

15. If the auditor identifies deficiencies in controls designed to prevent or detect fraud during the audit of internal control over financial reporting, the auditor should take into account those deficiencies when developing his or her response to risks of material misstatement during the financial statement audit, as provided in AU section 316.44 and .45.

Using the Work of Others

16. The auditor should evaluate the extent to which he or she will use the work of others to reduce the work the auditor might otherwise perform himself or herself. AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, applies in an integrated audit of the financial statements and internal control over financial reporting.

17. For purposes of the audit of internal control, however, the auditor may use the work performed by, or receive direct assistance from, internal auditors,

---

[9] The SEC Advisory Committee on Smaller Public Companies considered a company's size with respect to compliance with the internal control reporting provisions of the Act. See Advisory Committee on Smaller Public Companies to the United States Securities and Exchange Commission, Final Report, at p. 5 (April 23, 2006).

[10] See paragraphs .19–.42 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, regarding identifying risks that may result in material misstatement due to fraud.

company personnel (in addition to internal auditors), and third parties working under the direction of management or the audit committee that provides evidence about the effectiveness of internal control over financial reporting. In an integrated audit of internal control over financial reporting and the financial statements, the auditor also may use this work to obtain evidence supporting the auditor's assessment of control risk for purposes of the audit of the financial statements.

18. The auditor should assess the competence and objectivity of the persons whose work the auditor plans to use to determine the extent to which the auditor may use their work. The higher the degree of competence and objectivity, the greater use the auditor may make of the work. The auditor should apply paragraphs .09–.11 of AU section 322 to assess the competence and objectivity of internal auditors. The auditor should apply the principles underlying those paragraphs to assess the competence and objectivity of persons other than internal auditors whose work the auditor plans to use.

Note: For purposes of using the work of others, competence means the attainment and maintenance of a level of understanding and knowledge that enables that person to perform ably the tasks assigned to them, and objectivity means the ability to perform those tasks impartially and with intellectual honesty. To assess competence, the auditor should evaluate factors about the person's qualifications and ability to perform the work the auditor plans to use. To assess objectivity, the auditor should evaluate whether factors are present that either inhibit or promote a person's ability to perform with the necessary degree of objectivity the work the auditor plans to use.

Note: The auditor should not use the work of persons who have a low degree of objectivity, regardless of their level of competence. Likewise, the auditor should not use the work of persons who have a low level of competence regardless of their degree of objectivity. Personnel whose core function is to serve as a testing or compliance authority at the company, such as internal auditors, normally are expected to have greater competence and objectivity in performing the type of work that will be useful to the auditor.

19. The extent to which the auditor may use the work of others in an audit of internal control also depends on the risk associated with the control being tested. As the risk associated with a control increases, the need for the auditor to perform his or her own work on the control increases.

Materiality

20. In planning the audit of internal control over financial reporting, the auditor should use the same materiality considerations he or she would use in planning the audit of the company's annual financial statements.[11]

Using a Top-Down Approach

21. The auditor should use a top-down approach to the audit of internal control over financial reporting to select the controls to test. A top-down approach begins at the financial statement level and with the auditor's understanding of the overall risks to internal control over financial reporting. The auditor then focuses on entity-level controls and works down to significant accounts and disclosures and their relevant assertions. This approach directs the

[11] See AU section 312, *Audit Risk and Materiality in Conducting an Audit*, which provides additional explanation of materiality.

auditor's attention to accounts, disclosures, and assertions that present a reasonable possibility of material misstatement to the **financial statements and related disclosures**. The auditor then verifies his or her understanding of the risks in the company's processes and selects for testing those controls that sufficiently address the assessed risk of misstatement to each relevant assertion.

Note: The top-down approach describes the auditor's sequential thought process in identifying risks and the controls to test, not necessarily the order in which the auditor will perform the auditing procedures.

Identifying Entity-Level Controls

22. The auditor must test those entity-level controls that are important to the auditor's conclusion about whether the company has effective internal control over financial reporting. The auditor's evaluation of entity-level controls can result in increasing or decreasing the testing that the auditor otherwise would have performed on other controls.

23. Entity-level controls vary in nature and precision—

- Some entity-level controls, such as certain control environment controls, have an important, but indirect, effect on the likelihood that a misstatement will be detected or prevented on a timely basis. These controls might affect the other controls the auditor selects for testing and the nature, timing, and extent of procedures the auditor performs on other controls.
- Some entity-level controls monitor the effectiveness of other controls. Such controls might be designed to identify possible breakdowns in lower-level controls, but not at a level of precision that would, by themselves, sufficiently address the assessed risk that misstatements to a relevant assertion will be prevented or detected on a timely basis. These controls, when operating effectively, might allow the auditor to reduce the testing of other controls.
- Some entity-level controls might be designed to operate at a level of precision that would adequately prevent or detect on a timely basis misstatements to one or more relevant assertions. If an entity-level control sufficiently addresses the assessed risk of misstatement, the auditor need not test additional controls relating to that risk.

24. Entity-level controls include—

- Controls related to the control environment;
- Controls over management override;

  Note: Controls over management override are important to effective internal control over financial reporting for all companies, and may be particularly important at smaller companies because of the increased involvement of senior management in performing controls and in the period-end financial reporting process. For smaller companies, the controls that address the risk of management override might be different from those at a larger company. For example, a smaller company might rely on more detailed oversight by the audit committee that focuses on the risk of management override.
- The company's risk assessment process;

- Centralized processing and controls, including shared service environments;
- Controls to monitor results of operations;
- Controls to monitor other controls, including activities of the internal audit function, the audit committee, and self-assessment programs;
- Controls over the period-end financial reporting process; and
- Policies that address significant business control and risk management practices.

25. *Control Environment*. Because of its importance to effective internal control over financial reporting, the auditor must evaluate the control environment at the company. As part of evaluating the control environment, the auditor should assess—

- Whether management's philosophy and operating style promote effective internal control over financial reporting;
- Whether sound integrity and ethical values, particularly of top management, are developed and understood; and
- Whether the Board or audit committee understands and exercises oversight responsibility over financial reporting and internal control.

26. *Period-end Financial Reporting Process*. Because of its importance to financial reporting and to the auditor's opinions on internal control over financial reporting and the financial statements, the auditor must evaluate the period-end financial reporting process. The period-end financial reporting process includes the following—

- Procedures used to enter transaction totals into the general ledger;
- Procedures related to the selection and application of accounting policies;
- Procedures used to initiate, authorize, record, and process journal entries in the general ledger;
- Procedures used to record recurring and nonrecurring adjustments to the annual and quarterly financial statements; and
- Procedures for preparing annual and quarterly financial statements and related disclosures.

  Note: Because the annual period-end financial reporting process normally occurs after the "as-of" date of management's assessment, those controls usually cannot be tested until after the as-of date.

27. As part of evaluating the period-end financial reporting process, the auditor should assess—

- Inputs, procedures performed, and outputs of the processes the company uses to produce its annual and quarterly financial statements;
- The extent of information technology ("IT") involvement in the period-end financial reporting process;
- Who participates from management;

- The locations involved in the period-end financial reporting process;
- The types of adjusting and consolidating entries; and
- The nature and extent of the oversight of the process by management, the board of directors, and the audit committee.

Note: The auditor should obtain sufficient evidence of the effectiveness of those quarterly controls that are important to determining whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion as of the date of management's assessment. However, the auditor is not required to obtain sufficient evidence for each quarter individually.

Identifying Significant Accounts and Disclosures and Their Relevant Assertions

28. The auditor should identify significant accounts and disclosures and their relevant assertions. Relevant assertions are those financial statement assertions that have a reasonable possibility of containing a misstatement that would cause the financial statements to be materially misstated. The financial statement assertions include[12]—

- Existence or occurrence
- Completeness
- Valuation or allocation
- Rights and obligations
- Presentation and disclosure

Note: The auditor may base his or her work on assertions that differ from those in this standard if the auditor has selected and tested controls over the pertinent risks in each significant account and disclosure that have a reasonable possibility of containing misstatements that would cause the financial statements to be materially misstated.

29. To identify significant accounts and disclosures and their relevant assertions, the auditor should evaluate the qualitative and quantitative risk factors related to the financial statement line items and disclosures. Risk factors relevant to the identification of significant accounts and disclosures and their relevant assertions include—

- Size and composition of the account;
- Susceptibility to misstatement due to errors or fraud;
- Volume of activity, complexity, and homogeneity of the individual transactions processed through the account or reflected in the disclosure;
- Nature of the account or disclosure;
- Accounting and reporting complexities associated with the account or disclosure;

[12] See AU section 326, *Evidential Matter*, which provides additional information on financial statement assertions.

- Exposure to losses in the account;
- Possibility of significant contingent liabilities arising from the activities reflected in the account or disclosure;
- Existence of related party transactions in the account; and
- Changes from the prior period in account or disclosure characteristics.

30. As part of identifying significant accounts and disclosures and their relevant assertions, the auditor also should determine the likely sources of potential misstatements that would cause the financial statements to be materially misstated. The auditor might determine the likely sources of potential misstatements by asking himself or herself "what could go wrong?" within a given significant account or disclosure.

31. The risk factors that the auditor should evaluate in the identification of significant accounts and disclosures and their relevant assertions are the same in the audit of internal control over financial reporting as in the audit of the financial statements; accordingly, significant accounts and disclosures and their relevant assertions are the same for both audits.

Note: In the financial statement audit, the auditor might perform substantive auditing procedures on financial statement accounts, disclosures and assertions that are not determined to be significant accounts and disclosures and relevant assertions.[13]

32. The components of a potential significant account or disclosure might be subject to significantly differing risks. If so, different controls might be necessary to adequately address those risks.

33. When a company has multiple locations or business units, the auditor should identify significant accounts and disclosures and their relevant assertions based on the consolidated financial statements. Having made those determinations, the auditor should then apply the direction in Appendix B for multiple locations scoping decisions.

Understanding Likely Sources of Misstatement

34. To further understand the likely sources of potential misstatements, and as a part of selecting the controls to test, the auditor should achieve the following objectives—

- Understand the flow of transactions related to the relevant assertions, including how these transactions are initiated, authorized, processed, and recorded;
- Verify that the auditor has identified the points within the company's processes at which a misstatement—including a misstatement due to fraud—could arise that, individually or in combination with other misstatements, would be material;
- Identify the controls that management has implemented to address these potential misstatements; and

[13] This is because his or her assessment of the risk that undetected misstatement would cause the financial statements to be materially misstated is unacceptably high (see AU sec. 312.39 for further discussion about undetected misstatement) or as a means of introducing unpredictability in the procedures performed (see paragraph 61 and AU sec. 316.50 for further discussion about predictability of auditing procedures).

- Identify the controls that management has implemented over the prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could result in a material misstatement of the financial statements.

35. Because of the degree of judgment required, the auditor should either perform the procedures that achieve the objectives in paragraph 34 himself or herself or supervise the work of others who provide direct assistance to the auditor, as described in AU section 322.

36. The auditor also should understand how IT affects the company's flow of transactions. The auditor should apply paragraphs .16–.20, .30–.32, and .77–.79, of AU section 319, *Consideration of Internal Control in a Financial Statement Audit*, which discuss the effect of information technology on internal control over financial reporting and the risks to assess.

Note: The identification of risks and controls within IT is not a separate evaluation. Instead, it is an integral part of the top-down approach used to identify significant accounts and disclosures and their relevant assertions, and the controls to test, as well as to assess risk and allocate audit effort as described by this standard.

37. *Performing Walkthroughs*. Performing walkthroughs will frequently be the most effective way of achieving the objectives in paragraph 34. In performing a walkthrough, the auditor follows a transaction from origination through the company's processes, including information systems, until it is reflected in the company's financial records, using the same documents and information technology that company personnel use. Walkthrough procedures usually include a combination of inquiry, observation, inspection of relevant documentation, and re-performance of controls.

38. In performing a walkthrough, at the points at which important processing procedures occur, the auditor questions the company's personnel about their understanding of what is required by the company's prescribed procedures and controls. These probing questions, combined with the other walkthrough procedures, allow the auditor to gain a sufficient understanding of the process and to be able to identify important points at which a necessary control is missing or not designed effectively. Additionally, probing questions that go beyond a narrow focus on the single transaction used as the basis for the walkthrough allow the auditor to gain an understanding of the different types of significant transactions handled by the process.

Selecting Controls to Test

39. The auditor should test those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion.

40. There might be more than one control that addresses the assessed risk of misstatement to a particular relevant assertion; conversely, one control might address the assessed risk of misstatement to more than one relevant assertion. It is neither necessary to test all controls related to a relevant assertion nor necessary to test redundant controls, unless redundancy is itself a control objective.

41. The decision as to whether a control should be selected for testing depends on which controls, individually or in combination, sufficiently address the assessed risk of misstatement to a given relevant assertion rather than on

how the control is labeled (e.g., entity-level control, transaction-level control, control activity, monitoring control, **preventive control**, **detective control**).

Testing Controls

Testing Design Effectiveness

42. The auditor should test the design effectiveness of controls by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that could result in material misstatements in the financial statements.

> Note: A smaller, less complex company might achieve its control objectives in a different manner from a larger, more complex organization. For example, a smaller, less complex company might have fewer employees in the accounting function, limiting opportunities to segregate duties and leading the company to implement alternative controls to achieve its control objectives. In such circumstances, the auditor should evaluate whether those alternative controls are effective.

43. Procedures the auditor performs to test design effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, and inspection of relevant documentation. Walkthroughs that include these procedures ordinarily are sufficient to evaluate design effectiveness.

Testing Operating Effectiveness

44. The auditor should test the operating effectiveness of a control by determining whether the control is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

> Note: In some situations, particularly in smaller companies, a company might use a third party to provide assistance with certain financial reporting functions. When assessing the competence of personnel responsible for a company's financial reporting and associated controls, the auditor may take into account the combined competence of company personnel and other parties that assist with functions related to financial reporting.

45. Procedures the auditor performs to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control.

Relationship of Risk to the Evidence to be Obtained

46. For each control selected for testing, the evidence necessary to persuade the auditor that the control is effective depends upon the risk associated with the control. The risk associated with a control consists of the risk that the control might not be effective and, if not effective, the risk that a material weakness would result. As the risk associated with the control being tested increases, the evidence that the auditor should obtain also increases.

Note: Although the auditor must obtain evidence about the effectiveness of controls for each relevant assertion, the auditor is not responsible for obtaining sufficient evidence to support an opinion about the effectiveness of each individual control. Rather, the auditor's objective is to express an opinion on the company's internal control over financial reporting overall. This allows the auditor to vary the evidence obtained regarding the effectiveness of individual controls selected for testing based on the risk associated with the individual control.

47. Factors that affect the risk associated with a control include—

- The nature and materiality of misstatements that the control is intended to prevent or detect;
- The inherent risk associated with the related account(s) and assertion(s);
- Whether there have been changes in the volume or nature of transactions that might adversely affect control design or operating effectiveness;
- Whether the account has a history of errors;
- The effectiveness of entity-level controls, especially controls that monitor other controls;
- The nature of the control and the frequency with which it operates;
- The degree to which the control relies on the effectiveness of other controls (e.g., the control environment or information technology general controls);
- The competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance;
- Whether the control relies on performance by an individual or is automated (i.e., an automated control would generally be expected to be lower risk if relevant information technology general controls are effective); and

  Note: A less complex company or business unit with simple business processes and centralized accounting operations might have relatively simple information systems that make greater use of off-the-shelf packaged software without modification. In the areas in which off-the-shelf software is used, the auditor's testing of information technology controls might focus on the application controls built into the pre-packaged software that management relies on to achieve its control objectives and the IT general controls that are important to the effective operation of those application controls.

- The complexity of the control and the significance of the judgments that must be made in connection with its operation.

  Note: Generally, a conclusion that a control is not operating effectively can be supported by less evidence than is necessary to support a conclusion that a control is operating effectively.

48. When the auditor identifies deviations from the company's controls, he or she should determine the effect of the deviations on his or her assessment of the risk associated with the control being tested and the evidence to be obtained, as well as on the operating effectiveness of the control.

Note: Because effective internal control over financial reporting cannot, and does not, provide absolute assurance of achieving the company's control objectives, an individual control does not necessarily have to operate without any deviation to be considered effective.

49. The evidence provided by the auditor's tests of the effectiveness of controls depends upon the mix of the nature, timing, and extent of the auditor's procedures. Further, for an individual control, different combinations of the nature, timing, and extent of testing may provide sufficient evidence in relation to the risk associated with the control.

Note: Walkthroughs usually consist of a combination of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control and might provide sufficient evidence of operating effectiveness, depending on the risk associated with the control being tested, the specific procedures performed as part of the walkthrough and the results of those procedures.

50. *Nature of Tests of Controls.* Some types of tests, by their nature, produce greater evidence of the effectiveness of controls than other tests. The following tests that the auditor might perform are presented in order of the evidence that they ordinarily would produce, from least to most: inquiry, observation, inspection of relevant documentation, and re-performance of a control.

Note: Inquiry alone does not provide sufficient evidence to support a conclusion about the effectiveness of a control.

51. The nature of the tests of effectiveness that will provide competent evidence depends, to a large degree, on the nature of the control to be tested, including whether the operation of the control results in documentary evidence of its operation. Documentary evidence of the operation of some controls, such as management's philosophy and operating style, might not exist.

Note: A smaller, less complex company or unit might have less formal documentation regarding the operation of its controls. In those situations, testing controls through inquiry combined with other procedures, such as observation of activities, inspection of less formal documentation, or re-performance of certain controls, might provide sufficient evidence about whether the control is effective.

52. *Timing of Tests of Controls.* Testing controls over a greater period of time provides more evidence of the effectiveness of controls than testing over a shorter period of time. Further, testing performed closer to the date of management's assessment provides more evidence than testing performed earlier in the year. The auditor should balance performing the tests of controls closer to the as-of date with the need to test controls over a sufficient period of time to obtain sufficient evidence of operating effectiveness.

53. Prior to the date specified in management's assessment, management might implement changes to the company's controls to make them more effective or efficient or to address control deficiencies. If the auditor determines that the new controls achieve the related objectives of the control criteria and have been in effect for a sufficient period to permit the auditor to assess their design and operating effectiveness by performing tests of controls, he or she will not need to test the design and operating effectiveness of the superseded controls for purposes of expressing an opinion on internal control over financial reporting. If the operating effectiveness of the superseded controls is important to the auditor's control risk assessment, the auditor should test the design and operating effectiveness of those superseded controls, as appropriate. (See additional direction on integration beginning at paragraph B1.)

54. *Extent of Tests of Controls.* The more extensively a control is tested, the greater the evidence obtained from that test.

55. *Roll-Forward Procedures.* When the auditor reports on the effectiveness of controls as of a specific date and obtains evidence about the operating effectiveness of controls at an interim date, he or she should determine what additional evidence concerning the operation of the controls for the remaining period is necessary.

56. The additional evidence that is necessary to update the results of testing from an interim date to the company's year-end depends on the following factors—

- The specific control tested prior to the as-of date, including the risks associated with the control and the nature of the control, and the results of those tests;
- The sufficiency of the evidence of effectiveness obtained at an interim date;
- The length of the remaining period; and
- The possibility that there have been any significant changes in internal control over financial reporting subsequent to the interim date.

  Note: In some circumstances, such as when evaluation of the foregoing factors indicates a low risk that the controls are no longer effective during the roll-forward period, inquiry alone might be sufficient as a roll-forward procedure.

Special Considerations for Subsequent Years' Audits

57. In subsequent years' audits, the auditor should incorporate knowledge obtained during past audits he or she performed of the company's internal control over financial reporting into the decision-making process for determining the nature, timing, and extent of testing necessary. This decision-making process is described in paragraphs 46–56.

58. Factors that affect the risk associated with a control in subsequent years' audits include those in paragraph 47 and the following—

- The nature, timing, and extent of procedures performed in previous audits,
- The results of the previous years' testing of the control, and
- Whether there have been changes in the control or the process in which it operates since the previous audit.

59. After taking into account the risk factors identified in paragraphs 47 and 58, the additional information available in subsequent years' audits might permit the auditor to assess the risk as lower than in the initial year. This, in turn, might permit the auditor to reduce testing in subsequent years.

60. The auditor may also use a benchmarking strategy for automated application controls in subsequent years' audits. Benchmarking is described further beginning at paragraph B28.

61. In addition, the auditor should vary the nature, timing, and extent of testing of controls from year to year to introduce unpredictability into the testing and respond to changes in circumstances. For this reason, each year the auditor might test controls at a different interim period, increase or reduce the

number and types of tests performed, or change the combination of procedures used.

Evaluating Identified Deficiencies

62. The auditor must evaluate the severity of each control **deficiency** that comes to his or her attention to determine whether the deficiencies, individually or in combination, are material weaknesses as of the date of management's assessment. In planning and performing the audit, however, the auditor is not required to search for deficiencies that, individually or in combination, are less severe than a material weakness.

63. The severity of a deficiency depends on—

- Whether there is a reasonable possibility that the company's controls will fail to prevent or detect a misstatement of an account balance or disclosure; and
- The magnitude of the potential misstatement resulting from the deficiency or deficiencies.

64. The severity of a deficiency does not depend on whether a misstatement actually has occurred but rather on whether there is a reasonable possibility that the company's controls will fail to prevent or detect a misstatement.

65. Risk factors affect whether there is a reasonable possibility that a deficiency, or a combination of deficiencies, will result in a misstatement of an account balance or disclosure. The factors include, but are not limited to, the following—

- The nature of the financial statement accounts, disclosures, and assertions involved;
- The susceptibility of the related asset or liability to loss or fraud;
- The subjectivity, complexity, or extent of judgment required to determine the amount involved;
- The interaction or relationship of the control with other controls, including whether they are interdependent or redundant;
- The interaction of the deficiencies; and
- The possible future consequences of the deficiency.

  Note: The evaluation of whether a control deficiency presents a reasonable possibility of misstatement can be made without quantifying the probability of occurrence as a specific percentage or range.

  Note: Multiple control deficiencies that affect the same financial statement account balance or disclosure increase the likelihood of misstatement and may, in combination, constitute a material weakness, even though such deficiencies may individually be less severe. Therefore, the auditor should determine whether individual control deficiencies that affect the same significant account or disclosure, relevant assertion, or component of internal control collectively result in a material weakness.

66. Factors that affect the magnitude of the misstatement that might result from a deficiency or deficiencies in controls include, but are not limited to, the following—

- The financial statement amounts or total of transactions exposed to the deficiency; and
- The volume of activity in the account balance or class of transactions exposed to the deficiency that has occurred in the current period or that is expected in future periods.

67. In evaluating the magnitude of the potential misstatement, the maximum amount that an account balance or total of transactions can be overstated is generally the recorded amount, while understatements could be larger. Also, in many cases, the probability of a small misstatement will be greater than the probability of a large misstatement.

68. The auditor should evaluate the effect of compensating controls when determining whether a control deficiency or combination of deficiencies is a material weakness. To have a mitigating effect, the compensating control should operate at a level of precision that would prevent or detect a misstatement that could be material.

Indicators of Material Weaknesses

69. Indicators of material weaknesses in internal control over financial reporting include—

- Identification of fraud, whether or not material, on the part of senior management;[14]
- Restatement of previously issued financial statements to reflect the correction of a material misstatement;[15]
- Identification by the auditor of a material misstatement of financial statements in the current period in circumstances that indicate that the misstatement would not have been detected by the company's internal control over financial reporting; and
- Ineffective oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee.

70. When evaluating the severity of a deficiency, or combination of deficiencies, the auditor also should determine the level of detail and degree of assurance that would satisfy prudent officials in the conduct of their own affairs that they have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles. If the auditor determines that a deficiency, or combination of deficiencies, might prevent prudent officials in the conduct of their own affairs from concluding that they have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles, then the auditor should treat the deficiency, or combination of deficiencies, as an indicator of a material weakness.

---

[14] For the purpose of this indicator, the term "senior management" includes the principal executive and financial officers signing the company's certifications as required under Section 302 of the Act as well as any other members of senior management who play a significant role in the company's financial reporting process.

[15] See Financial Accounting Standards Board Statement No. 154, *Accounting Changes and Error Corrections*, regarding the correction of a misstatement.

Wrapping-Up

Forming an Opinion

71. The auditor should form an opinion on the effectiveness of internal control over financial reporting by evaluating evidence obtained from all sources, including the auditor's testing of controls, misstatements detected during the financial statement audit, and any identified control deficiencies.

Note: As part of this evaluation, the auditor should review reports issued during the year by internal audit (or similar functions) that address controls related to internal control over financial reporting and evaluate control deficiencies identified in those reports.

72. After forming an opinion on the effectiveness of the company's internal control over financial reporting, the auditor should evaluate the presentation of the elements that management is required, under the SEC's rules, to present in its annual report on internal control over financial reporting.[16]

73. If the auditor determines that any required elements of management's annual report on internal control over financial reporting are incomplete or improperly presented, the auditor should follow the direction in paragraph C2.

74. The auditor may form an opinion on the effectiveness of internal control over financial reporting only when there have been no restrictions on the scope of the auditor's work. A scope limitation requires the auditor to disclaim an opinion or withdraw from the engagement (see paragraphs C3–C7).

Obtaining Written Representations

75. In an audit of internal control over financial reporting, the auditor should obtain written representations from management—

a. Acknowledging management's responsibility for establishing and maintaining effective internal control over financial reporting;

b. Stating that management has performed an evaluation and made an assessment of the effectiveness of the company's internal control over financial reporting and specifying the control criteria;

c. Stating that management did not use the auditor's procedures performed during the audits of internal control over financial reporting or the financial statements as part of the basis for management's assessment of the effectiveness of internal control over financial reporting;

d. Stating management's conclusion, as set forth in its assessment, about the effectiveness of the company's internal control over financial reporting based on the control criteria as of a specified date;

e. Stating that management has disclosed to the auditor all deficiencies in the design or operation of internal control over financial reporting identified as part of management's evaluation, including separately disclosing to the auditor all such deficiencies that it believes to be significant deficiencies or material weaknesses in internal control over financial reporting;

---

[16] See Item 308(a) of Regulations S-B and S-K, 17 C.F.R. §§ 228.308(a) and 229.308(a).

f. Describing any fraud resulting in a material misstatement to the company's financial statements and any other fraud that does not result in a material misstatement to the company's financial statements but involves senior management or management or other employees who have a significant role in the company's internal control over financial reporting;

g. Stating whether control deficiencies identified and communicated to the audit committee during previous engagements pursuant to paragraphs 78 and 80 have been resolved, and specifically identifying any that have not; and

h. Stating whether there were, subsequent to the date being reported on, any changes in internal control over financial reporting or other factors that might significantly affect internal control over financial reporting, including any corrective actions taken by management with regard to significant deficiencies and material weaknesses.

76. The failure to obtain written representations from management, including management's refusal to furnish them, constitutes a limitation on the scope of the audit. As discussed further in paragraph C3, when the scope of the audit is limited, the auditor should either withdraw from the engagement or disclaim an opinion. Further, the auditor should evaluate the effects of management's refusal on his or her ability to rely on other representations, including those obtained in the audit of the company's financial statements.

77. AU section 333, *Management Representations*, explains matters such as who should sign the letter, the period to be covered by the letter, and when to obtain an updated letter.

Communicating Certain Matters

78. The auditor must communicate, in writing, to management and the audit committee all material weaknesses identified during the audit. The written communication should be made prior to the issuance of the auditor's report on internal control over financial reporting.

79. If the auditor concludes that the oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, the auditor must communicate that conclusion in writing to the board of directors.

80. The auditor also should consider whether there are any deficiencies, or combinations of deficiencies, that have been identified during the audit that are **significant deficiencies** and must communicate such deficiencies, in writing, to the audit committee.

81. The auditor also should communicate to management, in writing, all deficiencies in internal control over financial reporting (i.e., those deficiencies in internal control over financial reporting that are of a lesser magnitude than material weaknesses) identified during the audit and inform the audit committee when such a communication has been made. When making this communication, it is not necessary for the auditor to repeat information about such deficiencies that has been included in previously issued written communications, whether those communications were made by the auditor, internal auditors, or others within the organization.

82. The auditor is not required to perform procedures that are sufficient to identify all control deficiencies; rather, the auditor communicates deficiencies in internal control over financial reporting of which he or she is aware.

83. Because the audit of internal control over financial reporting does not provide the auditor with assurance that he or she has identified all deficiencies less severe than a material weakness, the auditor should not issue a report stating that no such deficiencies were noted during the audit.

84. When auditing internal control over financial reporting, the auditor may become aware of fraud or possible illegal acts. In such circumstances, the auditor must determine his or her responsibilities under AU section 316, *Consideration of Fraud in a Financial Statement Audit*, AU section 317, *Illegal Acts by Clients*, and Section 10A of the Securities Exchange Act of 1934.[17]

Reporting on Internal Control

85. The auditor's report on the audit of internal control over financial reporting must include the following elements[18]—

a. A title that includes the word *independent*;

b. A statement that management is responsible for maintaining effective internal control over financial reporting and for assessing the effectiveness of internal control over financial reporting;

c. An identification of management's report on internal control;

d. A statement that the auditor's responsibility is to express an opinion on the company's internal control over financial reporting based on his or her audit;

e. A definition of internal control over financial reporting as stated in paragraph A5;

f. A statement that the audit was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States);

g. A statement that the standards of the Public Company Accounting Oversight Board require that the auditor plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects;

h. A statement that an audit includes obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as the auditor considered necessary in the circumstances;

i. A statement that the auditor believes the audit provides a reasonable basis for his or her opinion;

j. A paragraph stating that, because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of effectiveness to future periods are subject to the risk that controls may

[17] See 15 U.S.C. § 78j-1.

[18] See Appendix C, which provides direction on modifications to the auditor's report that are required in certain circumstances.

become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate;

k. The auditor's opinion on whether the company maintained, in all material respects, effective internal control over financial reporting as of the specified date, based on the control criteria;

l. The manual or printed signature of the auditor's firm;

m. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued; and

n. The date of the audit report.

Separate or Combined Reports

86. The auditor may choose to issue a combined report (i.e., one report containing both an opinion on the financial statements and an opinion on internal control over financial reporting) or separate reports on the company's financial statements and on internal control over financial reporting.

87. The following example combined report expressing an unqualified opinion on financial statements and an unqualified opinion on internal control over financial reporting illustrates the report elements described in this section.

Report of Independent Registered Public Accounting Firm [*Introductory paragraph*]

> We have audited the accompanying balance sheets of W Company as of December 31, 20X8 and 20X7, and the related statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 20X8. We also have audited W Company's internal control over financial reporting as of December 31, 20X8, based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).*"]. W Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying [*title of management's report*]. Our responsibility is to express an opinion on these financial statements and an opinion on the company's internal control over financial reporting based on our audits.

[*Scope paragraph*]

> We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in

the circumstances. We believe that our audits provide a reasonable basis for our opinions.

[*Definition paragraph*]

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

[*Inherent limitations paragraph*]

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

[*Opinion paragraph*]

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of W Company as of December 31, 20X8 and 20X7, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 20X8 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20X8, based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).*"].

[*Signature*]

[*City and State or Country*]

[*Date*]

88. If the auditor chooses to issue a separate report on internal control over financial reporting, he or she should add the following paragraph to the auditor's report on the financial statements—

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), W Company's internal control over financial reporting as of December 31, 20X8, based on [*identify control criteria*] and our report dated [*date of report, which should be the same as the date of the report on the financial statements*] expressed [*include nature of opinion*].

The auditor also should add the following paragraph to the report on internal control over financial reporting—

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the [*identify financial statements*]

of W Company and our report dated [*date of report, which should be the same as the date of the report on the effectiveness of internal control over financial reporting*] expressed [*include nature of opinion*].

Report Date

89. The auditor should date the audit report no earlier than the date on which the auditor has obtained sufficient competent evidence to support the auditor's opinion. Because the auditor cannot audit internal control over financial reporting without also auditing the financial statements, the reports should be dated the same.

Material Weaknesses

90. Paragraphs 62–70 describe the evaluation of deficiencies. If there are deficiencies that, individually or in combination, result in one or more material weaknesses, the auditor must express an adverse opinion on the company's internal control over financial reporting, unless there is a restriction on the scope of the engagement.[19]

91. When expressing an adverse opinion on internal control over financial reporting because of a material weakness, the auditor's report must include—

- The definition of a material weakness, as provided in paragraph A7.
- A statement that a material weakness has been identified and an identification of the material weakness described in management's assessment.

  Note: If the material weakness has not been included in management's assessment, the report should be modified to state that a material weakness has been identified but not included in management's assessment. Additionally, the auditor's report should include a description of the material weakness, which should provide the users of the audit report with specific information about the nature of the material weakness and its actual and potential effect on the presentation of the company's financial statements issued during the existence of the weakness. In this case, the auditor also should communicate in writing to the audit committee that the material weakness was not disclosed or identified as a material weakness in management's assessment. If the material weakness has been included in management's assessment but the auditor concludes that the disclosure of the material weakness is not fairly presented in all material respects, the auditor's report should describe this conclusion as well as the information necessary to fairly describe the material weakness.

92. The auditor should determine the effect his or her adverse opinion on internal control has on his or her opinion on the financial statements. Additionally, the auditor should disclose whether his or her opinion on the financial statements was affected by the adverse opinion on internal control over financial reporting.

Note: If the auditor issues a separate report on internal control over financial reporting in this circumstance, the disclosure required by this paragraph may

[19] See paragraph C3 for direction when the scope of the engagement has been limited.

be combined with the report language described in paragraphs 88 and 91. The auditor may present the combined language either as a separate paragraph or as part of the paragraph that identifies the material weakness.

Subsequent Events

93. Changes in internal control over financial reporting or other factors that might significantly affect internal control over financial reporting might occur subsequent to the date as of which internal control over financial reporting is being audited but before the date of the auditor's report. The auditor should inquire of management whether there were any such changes or factors and obtain written representations from management relating to such matters, as described in paragraph 75*h*.

94. To obtain additional information about whether changes have occurred that might affect the effectiveness of the company's internal control over financial reporting and, therefore, the auditor's report, the auditor should inquire about and examine, for this subsequent period, the following—

- Relevant internal audit (or similar functions, such as loan review in a financial institution) reports issued during the subsequent period,
- Independent auditor reports (if other than the auditor's) of deficiencies in internal control,
- Regulatory agency reports on the company's internal control over financial reporting, and
- Information about the effectiveness of the company's internal control over financial reporting obtained through other engagements.

95. The auditor might inquire about and examine other documents for the subsequent period. Paragraphs .01–.09 of AU section 560, *Subsequent Events*, provide direction on subsequent events for a financial statement audit that also may be helpful to the auditor performing an audit of internal control over financial reporting.

96. If the auditor obtains knowledge about subsequent events that materially and adversely affect the effectiveness of the company's internal control over financial reporting as of the date specified in the assessment, the auditor should issue an adverse opinion on internal control over financial reporting (and follow the direction in paragraph C2 if management's assessment states that internal control over financial reporting is effective). If the auditor is unable to determine the effect of the subsequent event on the effectiveness of the company's internal control over financial reporting, the auditor should disclaim an opinion. As described in paragraph C13, the auditor should disclaim an opinion on management's disclosures about corrective actions taken by the company after the date of management's assessment, if any.

97. The auditor may obtain knowledge about subsequent events with respect to conditions that did not exist at the date specified in the assessment but arose subsequent to that date and before issuance of the auditor's report. If a subsequent event of this type has a material effect on the company's internal control over financial reporting, the auditor should include in his or her report an explanatory paragraph describing the event and its effects or directing the reader's attention to the event and its effects as disclosed in management's report.

98. After the issuance of the report on internal control over financial reporting, the auditor may become aware of conditions that existed at the report date that might have affected the auditor's opinion had he or she been aware of them. The auditor's evaluation of such subsequent information is similar to the auditor's evaluation of information discovered subsequent to the date of the report on an audit of financial statements, as described in AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

Appendix A

Definitions

A1. For purposes of this standard, the terms listed below are defined as follows—

A2. A **control objective** provides a specific target against which to evaluate the effectiveness of controls. A control objective for internal control over financial reporting generally relates to a relevant assertion and states a criterion for evaluating whether the company's control procedures in a specific area provide reasonable assurance that a misstatement or omission in that relevant assertion is prevented or detected by controls on a timely basis.

A3. A **deficiency** in internal control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.

- A deficiency in *design* exists when (*a*) a control necessary to meet the control objective is missing or (*b*) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met.
- A deficiency in *operation* exists when a properly designed control does not operate as designed, or when the person performing the control does not possess the necessary authority or competence to perform the control effectively.

A4. **Financial statements and related disclosures** refers to a company's financial statements and notes to the financial statements as presented in accordance with generally accepted accounting principles ("GAAP"). References to financial statements and related disclosures do not extend to the preparation of management's discussion and analysis or other similar financial information presented outside a company's GAAP-basis financial statements and notes.

A5. **Internal control over financial reporting** is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP and includes those policies and procedures that—

(1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

(3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.[1]

---

[1] See Securities Exchange Act Rules 13a-15(f) and 15d-15(f), 17 C.F.R. §§ 240.13a-15(f) and 240.15d-15(f).

Note: The auditor's procedures as part of either the audit of internal control over financial reporting or the audit of the financial statements are not part of a company's internal control over financial reporting.

Note: Internal control over financial reporting has inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements will not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

A6. **Management's assessment** is the assessment described in Item 308(a)(3) of Regulations S-B and S-K that is included in management's annual report on internal control over financial reporting.[2]

A7. A **material weakness** is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a **reasonable possibility** that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

Note: There is a **reasonable possibility** of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in Financial Accounting Standards Board Statement No. 5, Accounting for Contingencies ("FAS 5").[3]

A8. Controls over financial reporting may be **preventive controls** or **detective controls**. Effective internal control over financial reporting often includes a combination of preventive and detective controls.

- Preventive controls have the objective of preventing errors or fraud that could result in a misstatement of the financial statements from occurring.
- Detective controls have the objective of detecting errors or fraud that has already occurred that could result in a misstatement of the financial statements.

A9. A **relevant assertion** is a financial statement assertion that has a reasonable possibility of containing a misstatement or misstatements that would cause the financial statements to be materially misstated. The determination of whether an assertion is a relevant assertion is based on inherent risk, without regard to the effect of controls.

A10. An account or disclosure is a **significant account or disclosure** if there is a reasonable possibility that the account or disclosure could contain a misstatement that, individually or when aggregated with others, has a material effect on the financial statements, considering the risks of both overstatement and understatement. The determination of whether an account or disclosure is significant is based on inherent risk, without regard to the effect of controls.

---

[2] See 17 C.F.R. §§ 228.308(a)(3) and 229.308(a)(3).

[3] See FAS 5, paragraph 3.

A11. A **significant deficiency** is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

Appendix B

Special Topics

Integration of Audits

B1. *Tests of Controls in an Audit of Internal Control.* The objective of the tests of controls in an audit of internal control over financial reporting is to obtain evidence about the effectiveness of controls to support the auditor's opinion on the company's internal control over financial reporting. The auditor's opinion relates to the effectiveness of the company's internal control over financial reporting as of a *point in time* and *taken as a whole*.

B2. To express an opinion on internal control over financial reporting as of a point in time, the auditor should obtain evidence that internal control over financial reporting has operated effectively for a sufficient period of time, which may be less than the entire period (ordinarily one year) covered by the company's financial statements. To express an opinion on internal control over financial reporting taken as a whole, the auditor must obtain evidence about the effectiveness of selected controls over all relevant assertions. This requires that the auditor test the design and operating effectiveness of controls he or she ordinarily would not test if expressing an opinion only on the financial statements.

B3. When concluding on the effectiveness of internal control over financial reporting for purposes of expressing an opinion on internal control over financial reporting, the auditor should incorporate the results of any additional tests of controls performed to achieve the objective related to expressing an opinion on the financial statements, as discussed in the following section.

B4. *Tests of Controls in an Audit of Financial Statements.* To express an opinion on the financial statements, the auditor ordinarily performs tests of controls and substantive procedures. The objective of the tests of controls the auditor performs for this purpose is to assess control risk. To assess control risk for specific financial statement assertions at less than the maximum, the auditor is required to obtain evidence that the relevant controls operated effectively during the *entire period* upon which the auditor plans to place reliance on those controls. However, the auditor is not required to assess control risk at less than the maximum for *all* relevant assertions and, for a variety of reasons, the auditor may choose not to do so.

B5. When concluding on the effectiveness of controls for the purpose of assessing control risk, the auditor also should evaluate the results of any additional tests of controls performed to achieve the objective related to expressing an opinion on the company's internal control over financial reporting, as discussed in paragraph B2. Consideration of these results may require the auditor to alter the nature, timing, and extent of substantive procedures and to plan and perform further tests of controls, particularly in response to identified control deficiencies.

B6. *Effect of Tests of Controls on Substantive Procedures.* If, during the audit of internal control over financial reporting, the auditor identifies a deficiency, he or she should determine the effect of the deficiency, if any, on the nature, timing, and extent of substantive procedures to be performed to reduce audit risk in the audit of the financial statements to an appropriately low level.

B7. Regardless of the assessed level of control risk or the assessed risk of material misstatement in connection with the audit of the financial statements, the auditor should perform substantive procedures for all relevant assertions.

Performing procedures to express an opinion on internal control over financial reporting does not diminish this requirement.

B8. *Effect of Substantive Procedures on the Auditor's Conclusions About the Operating Effectiveness of Controls*. In an audit of internal control over financial reporting, the auditor should evaluate the effect of the findings of the substantive auditing procedures performed in the audit of financial statements on the effectiveness of internal control over financial reporting. This evaluation should include, at a minimum—

- The auditor's risk assessments in connection with the selection and application of substantive procedures, especially those related to fraud.
- Findings with respect to illegal acts and related party transactions.
- Indications of management bias in making accounting estimates and in selecting accounting principles.
- Misstatements detected by substantive procedures. The extent of such misstatements might alter the auditor's judgment about the effectiveness of controls.

B9. To obtain evidence about whether a selected control is effective, the control must be tested directly; the effectiveness of a control cannot be inferred from the absence of misstatements detected by substantive procedures. The absence of misstatements detected by substantive procedures, however, should inform the auditor's risk assessments in determining the testing necessary to conclude on the effectiveness of a control.

Multiple Locations Scoping Decisions

B10. In determining the locations or business units at which to perform tests of controls, the auditor should assess the risk of material misstatement to the financial statements associated with the location or business unit and correlate the amount of audit attention devoted to the location or business unit with the degree of risk.

> Note: The auditor may eliminate from further consideration locations or business units that, individually or when aggregated with others, do not present a reasonable possibility of material misstatement to the company's consolidated financial statements.

B11. In assessing and responding to risk, the auditor should test controls over specific risks that present a reasonable possibility of material misstatement to the company's consolidated financial statements. In lower-risk locations or business units, the auditor first might evaluate whether testing entity-level controls, including controls in place to provide assurance that appropriate controls exist throughout the organization, provides the auditor with sufficient evidence.

B12. In determining the locations or business units at which to perform tests of controls, the auditor may take into account work performed by others on behalf of management. For example, if the internal auditors' planned procedures include relevant audit work at various locations, the auditor may coordinate work with the internal auditors and reduce the number of locations or business units at which the auditor would otherwise need to perform auditing procedures.

B13. The direction in paragraph 61 regarding special considerations for subsequent years' audits means that the auditor should vary the nature, timing, and extent of testing of controls at locations or business units from year to year.

B14. *Special Situations*. The scope of the audit should include entities that are acquired on or before the date of management's assessment and operations that are accounted for as discontinued operations on the date of management's assessment. The direction in this multiple-locations discussion describes how to determine whether it is necessary to test controls at these entities or operations.

B15. For equity method investments, the scope of the audit should include controls over the reporting in accordance with generally accepted accounting principles, in the company's financial statements, of the company's portion of the investees' income or loss, the investment balance, adjustments to the income or loss and investment balance, and related disclosures. The audit ordinarily would not extend to controls at the equity method investee.

B16. In situations in which the SEC allows management to limit its assessment of internal control over financial reporting by excluding certain entities, the auditor may limit the audit in the same manner. In these situations, the auditor's opinion would not be affected by a scope limitation. However, the auditor should include, either in an additional explanatory paragraph or as part of the scope paragraph in his or her report, a disclosure similar to management's regarding the exclusion of an entity from the scope of both management's assessment and the auditor's audit of internal control over financial reporting. Additionally, the auditor should evaluate the reasonableness of management's conclusion that the situation meets the criteria of the SEC's allowed exclusion and the appropriateness of any required disclosure related to such a limitation. If the auditor believes that management's disclosure about the limitation requires modification, the auditor should follow the same communication responsibilities that are described in paragraphs .29–.32 of AU section 722, *Interim Financial Information*. If management and the audit committee do not respond appropriately, in addition to fulfilling those responsibilities, the auditor should modify his or her report on the audit of internal control over financial reporting to include an explanatory paragraph describing the reasons why the auditor believes management's disclosure requires modification.

Use of Service Organizations

B17. AU section 324, *Service Organizations*, applies to the audit of financial statements of a company that obtains services from another organization that are part of the company's information system. The auditor may apply the relevant concepts described in AU section 324 to the audit of internal control over financial reporting.

B18. AU section 324.03 describes the situation in which a service organization's services are part of a company's information system. If the service organization's services are part of a company's information system, as described therein, then they are part of the information and communication component of the company's internal control over financial reporting. When the service organization's services are part of the company's internal control over financial reporting, the auditor should include the activities of the service organization when determining the evidence required to support his or her opinion.

B19. AU section 324.07–.16 describe the procedures that the auditor should perform with respect to the activities performed by the service organization. The procedures include—

a. Obtaining an understanding of the controls at the service organization that are relevant to the entity's internal control and the controls at the user organization over the activities of the service organization, and

b. Obtaining evidence that the controls that are relevant to the auditor's opinion are operating effectively.

B20. Evidence that the controls that are relevant to the auditor's opinion are operating effectively may be obtained by following the procedures described in AU section 324.12. These procedures include—

a. Obtaining a service auditor's report on controls placed in operation and tests of operating effectiveness, or a report on the application of agreed-upon procedures that describes relevant tests of controls.

Note: The service auditor's report referred to above means a report with the service auditor's opinion on the service organization's description of the design of its controls, the tests of controls, and results of those tests performed by the service auditor, and the service auditor's opinion on whether the controls tested were operating effectively during the specified period (in other words, "reports on controls placed in operation and tests of operating effectiveness" described in AU section 324.24*b*). A service auditor's report that does not include tests of controls, results of the tests, and the service auditor's opinion on operating effectiveness (in other words, "reports on controls placed in operation" described in AU section 324.24*a*) does not provide evidence of operating effectiveness. Furthermore, if the evidence regarding operating effectiveness of controls comes from an agreed-upon procedures report rather than a service auditor's report issued pursuant to AU section 324, the auditor should evaluate whether the agreed-upon procedures report provides sufficient evidence in the same manner described in the following paragraph.

b. Performing tests of the user organization's controls over the activities of the service organization (e.g., testing the user organization's independent re-performance of selected items processed by the service organization or testing the user organization's reconciliation of output reports with source documents).

c. Performing tests of controls at the service organization.

B21. If a service auditor's report on controls placed in operation and tests of operating effectiveness is available, the auditor may evaluate whether this report provides sufficient evidence to support his or her opinion. In evaluating whether such a service auditor's report provides sufficient evidence, the auditor should assess the following factors—

- The time period covered by the tests of controls and its relation to the as-of date of management's assessment,
- The scope of the examination and applications covered, the controls tested, and the way in which tested controls relate to the company's controls, and
- The results of those tests of controls and the service auditor's opinion on the operating effectiveness of the controls.

Note: These factors are similar to factors the auditor would consider in determining whether the report provides sufficient evidence to support the auditor's assessed level of control risk in an audit of the financial statements, as described in AU section 324.16.

B22. If the service auditor's report on controls placed in operation and tests of operating effectiveness contains a qualification that the stated control objectives might be achieved only if the company applies controls contemplated in the design of the system by the service organization, the auditor should evaluate whether the company is applying the necessary procedures.

B23. In determining whether the service auditor's report provides sufficient evidence to support the auditor's opinion, the auditor should make inquiries concerning the service auditor's reputation, competence, and independence. Appropriate sources of information concerning the professional reputation of the service auditor are discussed in paragraph .10*a* of AU section 543, *Part of Audit Performed by Other Independent Auditors*.

B24. When a significant period of time has elapsed between the time period covered by the tests of controls in the service auditor's report and the date specified in management's assessment, additional procedures should be performed. The auditor should inquire of management to determine whether management has identified any changes in the service organization's controls subsequent to the period covered by the service auditor's report (such as changes communicated to management from the service organization, changes in personnel at the service organization with whom management interacts, changes in reports or other data received from the service organization, changes in contracts or service level agreements with the service organization, or errors identified in the service organization's processing). If management has identified such changes, the auditor should evaluate the effect of such changes on the effectiveness of the company's internal control over financial reporting. The auditor also should evaluate whether the results of other procedures he or she performed indicate that there have been changes in the controls at the service organization.

B25. The auditor should determine whether to obtain additional evidence about the operating effectiveness of controls at the service organization based on the procedures performed by management or the auditor and the results of those procedures and on an evaluation of the following risk factors. As risk increases, the need for the auditor to obtain additional evidence increases.

- The elapsed time between the time period covered by the tests of controls in the service auditor's report and the date specified in management's assessment,
- The significance of the activities of the service organization,
- Whether there are errors that have been identified in the service organization's processing, and
- The nature and significance of any changes in the service organization's controls identified by management or the auditor.

B26. If the auditor concludes that additional evidence about the operating effectiveness of controls at the service organization is required, the auditor's additional procedures might include—

- Evaluating procedures performed by management and the results of those procedures.
- Contacting the service organization, through the user organization, to obtain specific information.
- Requesting that a service auditor be engaged to perform procedures that will supply the necessary information.
- Visiting the service organization and performing such procedures.

B27. The auditor should not refer to the service auditor's report when expressing an opinion on internal control over financial reporting.

Benchmarking of Automated Controls

B28. Entirely automated application controls are generally not subject to breakdowns due to human failure. This feature allows the auditor to use a "benchmarking" strategy.

B29. If general controls over program changes, access to programs, and computer operations are effective and continue to be tested, and if the auditor verifies that the automated application control has not changed since the auditor established a baseline (i.e., last tested the application control), the auditor may conclude that the automated application control continues to be effective without repeating the prior year's specific tests of the operation of the automated application control. The nature and extent of the evidence that the auditor should obtain to verify that the control has not changed may vary depending on the circumstances, including depending on the strength of the company's program change controls.

B30. The consistent and effective functioning of the automated application controls may be dependent upon the related files, tables, data, and parameters. For example, an automated application for calculating interest income might be dependent on the continued integrity of a rate table used by the automated calculation.

B31. To determine whether to use a benchmarking strategy, the auditor should assess the following risk factors. As these factors indicate lower risk, the control being evaluated might be well-suited for benchmarking. As these factors indicate increased risk, the control being evaluated is less suited for benchmarking. These factors are—

- The extent to which the application control can be matched to a defined program within an application.
- The extent to which the application is stable (i.e., there are few changes from period to period).
- The availability and reliability of a report of the compilation dates of the programs placed in production. (This information may be used as evidence that controls within the program have not changed.)

B32. Benchmarking automated application controls can be especially effective for companies using purchased software when the possibility of program changes is remote—e.g., when the vendor does not allow access or modification to the source code.

B33. After a period of time, the length of which depends upon the circumstances, the baseline of the operation of an automated application control should be reestablished. To determine when to reestablish a baseline, the auditor should evaluate the following factors—

- The effectiveness of the IT control environment, including controls over application and system software acquisition and maintenance, access controls and computer operations.
- The auditor's understanding of the nature of changes, if any, on the specific programs that contain the controls.
- The nature and timing of other related tests.

- The consequences of errors associated with the application control that was benchmarked.
- Whether the control is sensitive to other business factors that may have changed. For example, an automated control may have been designed with the assumption that only positive amounts will exist in a file. Such a control would no longer be effective if negative amounts (credits) begin to be posted to the account.

Appendix C

Special Reporting Situations

Report Modifications

C1. The auditor should modify his or her report if any of the following conditions exist.

a. Elements of management's annual report on internal control are incomplete or improperly presented,

b. There is a restriction on the scope of the engagement,

c. The auditor decides to refer to the report of other auditors as the basis, in part, for the auditor's own report,

d. There is other information contained in management's annual report on internal control over financial reporting, or

e. Management's annual certification pursuant to Section 302 of the Sarbanes-Oxley Act is misstated.

C2. *Elements of Management's Annual Report on Internal Control Over Financial Reporting Are Incomplete or Improperly Presented*. If the auditor determines that elements of management's annual report on internal control over financial reporting are incomplete or improperly presented, the auditor should modify his or her report to include an explanatory paragraph describing the reasons for this determination. If the auditor determines that the required disclosure about a material weakness is not fairly presented in all material respects, the auditor should follow the direction in paragraph 91.

C3. *Scope Limitations*. The auditor can express an opinion on the company's internal control over financial reporting only if the auditor has been able to apply the procedures necessary in the circumstances. If there are restrictions on the scope of the engagement, the auditor should withdraw from the engagement or disclaim an opinion. A disclaimer of opinion states that the auditor does not express an opinion on the effectiveness of internal control over financial reporting.

C4. When disclaiming an opinion because of a scope limitation, the auditor should state that the scope of the audit was not sufficient to warrant the expression of an opinion and, in a separate paragraph or paragraphs, the substantive reasons for the disclaimer. The auditor should not identify the procedures that were performed nor include the statements describing the characteristics of an audit of internal control over financial reporting (paragraph 85 *g*, *h*, and *i*); to do so might overshadow the disclaimer.

C5. When the auditor plans to disclaim an opinion and the limited procedures performed by the auditor caused the auditor to conclude that a material weakness exists, the auditor's report also should include—

- The definition of a material weakness, as provided in paragraph A7.
- A description of any material weaknesses identified in the company's internal control over financial reporting. This description should provide the users of the audit report with specific information about the nature of any material weakness and its actual and potential effect on the presentation of the company's financial statements issued during the existence of the weakness. This description also should address the requirements in paragraph 91.

C6. The auditor may issue a report disclaiming an opinion on internal control over financial reporting as soon as the auditor concludes that a scope limitation will prevent the auditor from obtaining the reasonable assurance necessary to express an opinion. The auditor is not required to perform any additional work prior to issuing a disclaimer when the auditor concludes that he or she will not be able to obtain sufficient evidence to express an opinion.

> Note: In this case, in following the direction in paragraph 89 regarding dating the auditor's report, the report date is the date that the auditor has obtained sufficient competent evidence to support the representations in the auditor's report.

C7. If the auditor concludes that he or she cannot express an opinion because there has been a limitation on the scope of the audit, the auditor should communicate, in writing, to management and the audit committee that the audit of internal control over financial reporting cannot be satisfactorily completed.

C8. *Opinions Based, in Part, on the Report of Another Auditor*. When another auditor has audited the financial statements and internal control over financial reporting of one or more subsidiaries, divisions, branches, or components of the company, the auditor should determine whether he or she may serve as the principal auditor and use the work and reports of another auditor as a basis, in part, for his or her opinion. AU section 543, *Part of Audit Performed by Other Independent Auditors*, provides direction on the auditor's decision of whether to serve as the principal auditor of the financial statements. If the auditor decides it is appropriate to serve as the principal auditor of the financial statements, then that auditor also should be the principal auditor of the company's internal control over financial reporting. This relationship results from the requirement that an audit of the financial statements must be performed to audit internal control over financial reporting; only the principal auditor of the financial statements can be the principal auditor of internal control over financial reporting. In this circumstance, the principal auditor of the financial statements must participate sufficiently in the audit of internal control over financial reporting to provide a basis for serving as the principal auditor of internal control over financial reporting.

C9. When serving as the principal auditor of internal control over financial reporting, the auditor should decide whether to make reference in the report on internal control over financial reporting to the audit of internal control over financial reporting performed by the other auditor. In these circumstances, the auditor's decision is based on factors analogous to those of the auditor who uses the work and reports of other independent auditors when reporting on a company's financial statements as described in AU section 543.

C10. The decision about whether to make reference to another auditor in the report on the audit of internal control over financial reporting might differ from the corresponding decision as it relates to the audit of the financial statements. For example, the audit report on the financial statements may make reference to the audit of a significant equity investment performed by another independent auditor, but the report on internal control over financial reporting might not make a similar reference because management's assessment of internal control over financial reporting ordinarily would not extend to controls at the equity method investee.[1]

C11. When the auditor decides to make reference to the report of the other auditor as a basis, in part, for his or her opinion on the company's internal

[1] See paragraph B15, for further discussion of the evaluation of the controls over financial reporting for an equity method investment.

control over financial reporting, the auditor should refer to the report of the other auditor when describing the scope of the audit and when expressing the opinion.

C12. *Management's Annual Report on Internal Control Over Financial Reporting Containing Additional Information*. Management's annual report on internal control over financial reporting may contain information in addition to the elements described in paragraph 72 that are subject to the auditor's evaluation.

C13. If management's annual report on internal control over financial reporting could reasonably be viewed by users of the report as including such additional information, the auditor should disclaim an opinion on the information.

C14. If the auditor believes that management's additional information contains a material misstatement of fact, he or she should discuss the matter with management. If, after discussing the matter with management, the auditor concludes that a material misstatement of fact remains, the auditor should notify management and the audit committee, in writing, of the auditor's views concerning the information. AU section 317, *Illegal Acts by Clients* and Section 10A of the Securities Exchange Act of 1934 may also require the auditor to take additional action.[2]

> Note: If management makes the types of disclosures described in paragraph C12 outside its annual report on internal control over financial reporting and includes them elsewhere within its annual report on the company's financial statements, the auditor would not need to disclaim an opinion. However, in that situation, the auditor's responsibilities are the same as those described in this paragraph if the auditor believes that the additional information contains a material misstatement of fact.

C15. *Management's Annual Certification Pursuant to Section 302 of the Sarbanes-Oxley Act is Misstated*. If matters come to the auditor's attention as a result of the audit of internal control over financial reporting that lead him or her to believe that modifications to the disclosures about changes in internal control over financial reporting (addressing changes in internal control over financial reporting occurring during the fourth quarter) are necessary for the annual certifications to be accurate and to comply with the requirements of Section 302 of the Act and Securities Exchange Act Rule 13a-14(a) or 15d-14(a), whichever applies,[3] the auditor should follow the communication responsibilities as described in AU section 722*, Interim Financial Information*, for any interim period. However, if management and the audit committee do not respond appropriately, in addition to the responsibilities described in AU section 722, the auditor should modify his or her report on the audit of internal control over financial reporting to include an explanatory paragraph describing the reasons the auditor believes management's disclosures should be modified.

Filings Under Federal Securities Statutes

C16. AU section 711, *Filings Under Federal Securities Statutes*, describes the auditor's responsibilities when an auditor's report is included in registration statements, proxy statements, or periodic reports filed under the federal securities statutes. The auditor should apply AU section 711 with respect to the auditor's report on internal control over financial reporting included in such filings. In addition, the auditor should extend the direction in AU section 711.10

---

[2] See 15 U.S.C. § 78j-1.

[3] See 17 C.F.R. §§ 240.13a-14(a) and 240.15d-14(a).

to inquire of and obtain written representations from officers and other executives responsible for financial and accounting matters about whether any events have occurred that have a material effect on the audited financial statements to matters that could have a material effect on internal control over financial reporting.

C17. When the auditor has fulfilled these responsibilities and intends to consent to the inclusion of his or her report on internal control over financial reporting in the securities filing, the auditor's consent should clearly indicate that both the audit report on financial statements and the audit report on internal control over financial reporting (or both opinions if a combined report is issued) are included in his or her consent.

Appendix 2

Rule 3525. Audit Committee Pre-Approval of Non-Audit Services Related to Internal Control Over Financial Reporting

In connection with seeking audit committee pre-approval to perform for an audit client any permissible non-audit service related to internal control over financial reporting, a registered public accounting firm shall—

(a) describe, in writing, to the audit committee of the issuer the scope of the service;

(b) discuss with the audit committee of the issuer the potential effects of the service on the independence of the firm; and

Note: Independence requirements provide that an auditor is not independent of his or her audit client if the auditor is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the auditor is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement. Several principles guide the application of this general standard, including whether the auditor assumes a management role or audits his or her own work. Therefore, an auditor would not be independent if, for example, management had delegated its responsibility for internal control over financial reporting to the auditor or if the auditor had designed or implemented the audit client's internal control over financial reporting.

(c) document the substance of its discussion with the audit committee of the issuer.

[Effective pursuant to SEC Release No. 34-56152; File No. PCAOB-2007-02; July 27, 2007]

Appendix 3

Conforming Amendments to PCAOB Auditing Standards

[Effective pursuant to SEC Release No. 34-56152; File No. PCAOB-2007-02; July 27, 2007]

AU sec. 230, "Due Professional Care in the Performance of Work"

Statement on Auditing Standards ("SAS") No. 1, "Codification of Auditing Standards and Procedures," section 230, "Due Professional Care in the Performance of Work" (AU sec. 230, "Due Professional Care in the Performance of Work"), as amended, is amended as follows—

a. Paragraph .10 is replaced with—

> The exercise of due professional care allows the auditor to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud, or whether any material weaknesses exist as of the date of management's assessment. Absolute assurance is not attainable because of the nature of audit evidence and the characteristics of fraud. Although not absolute assurance, reasonable assurance is a high level of assurance. Therefore, an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) may not detect a material weakness in internal control over financial reporting or a material misstatement to the financial statements.

b. The term "financial statements" within the first sentence of paragraph .13 is replaced with the term "financial statements or internal control over financial reporting."

c. The second sentence of paragraph .13 is replaced with—

> Therefore, the subsequent discovery that either a material misstatement, whether from error or fraud, exists in the financial statements or a material weakness in internal control over financial reporting exists does not, in and of itself, evidence (a) failure to obtain reasonable assurance, (b) inadequate planning, performance, or judgment, (c) the absence of due professional care, or (d) a failure to comply with the standards of the Public Company Accounting Oversight Board (United States).

AU sec. 310, "Appointment of the Independent Auditor"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 310, "Appointment of the Independent Auditor" (AU sec. 310, "Appointment of the Independent Auditor"), as amended, is amended as follows—

a. The third bullet point of paragraph .06 is replaced with—

> Management is responsible for establishing and maintaining effective internal control over financial reporting. If, in an integrated audit of financial statements and

internal control over financial reporting, the auditor concludes that he or she cannot express an opinion on internal control over financial reporting because there has been a limitation on the scope of the audit, he or she should communicate, in writing, to management and the audit committee that the audit of internal control over financial reporting cannot be satisfactorily completed.

b. The eighth bullet point of paragraph .06 is amended as follows—

Under Integrated audit of financial statements and internal control over financial reporting, the last sub-bullet point is replaced with the following—

To the board of directors—any conclusion that the audit committee's oversight of the company's external financial reporting and internal control over financial reporting is ineffective.

Under Audit of financial statements, the last sub-bullet is replaced with the following—

To the board of directors—if the auditor becomes aware that the oversight of the company's external financial reporting and internal control over financial reporting by the audit committee is ineffective, that conclusion.

AU sec. 311, "Planning and Supervision"

SAS No. 22, "Planning and Supervision" (AU sec. 311, "Planning and Supervision"), as amended, is amended as follows—

Within the note to paragraph 1, the reference to paragraph 39 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraph 9 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 312, "Audit Risk and Materiality in Conducting an Audit"

SAS No. 47, "Audit Risk and Materiality in Conducting an Audit" (AU sec. 312, "Audit Risk and Materiality in Conducting an Audit"), as amended, is amended as follows—

a. Within the note to paragraph 3, the reference to paragraphs 22–23 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraph 20 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

b. Within the note to paragraph 7, the reference to paragraphs 24–26 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 14–15 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

c. The note to paragraph 12 is replaced with—

Note: When performing an integrated audit of financial statements and internal control over financial reporting,

refer to paragraphs 9 and 20 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* regarding planning considerations and materiality, respectively.

d. Within the note to paragraph 18, the reference to Appendix B, *Additional Performance Requirements and Directions; Extent-of-Testing Examples* of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs B10–B16 of Appendix B, *Special Topics,* of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

e. Within the note to paragraph 30, the reference to paragraphs 147–149 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 6–8 and paragraphs B1–B5 of Appendix B, *Special Topics,* of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 313, "Substantive Tests Prior to the Balance-Sheet Date"

SAS No. 45, "Omnibus Statement on Auditing Standards—1983" (AU sec. 313, "Substantive Tests Prior to the Balance-Sheet Date"), is amended as follows—

Within the note to paragraph 1, the reference to paragraphs 98–103 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 52–53 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 315, "Communications Between Predecessor and Successor Auditors"

SAS No. 84, "Communications Between Predecessor and Successor Auditors" (AU sec. 315, "Communications Between Predecessor and Successor Auditors"), as amended, is amended as follows—

The last sentence of paragraph 16 is replaced with—

Furthermore, the predecessor auditor is not a specialist as defined in AU sec. 336, Using the Work of a Specialist, nor does the predecessor auditor's work constitute the work of others as described in AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, or paragraphs 16–19 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 316, "Consideration of Fraud in a Financial Statement Audit"

SAS No. 99, "Consideration of Fraud in a Financial Statement Audit" (AU sec. 316, "Consideration of Fraud in a Financial Statement Audit"), is amended as follows—

Within the note to paragraph 1, the reference to paragraphs 24–26 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 14–15 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 319, "Consideration of Internal Control in a Financial Statement Audit"

SAS No. 55, "Consideration of Internal Control in a Financial Statement Audit" (AU sec. 319, "Consideration of Internal Control in a Financial Statement Audit"), as amended, is amended as follows—

a. The note to paragraph 2 is replaced with—

> Note: Refer to paragraph A9 of Appendix A, *Definitions,* of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* for the definition of a relevant assertion and paragraphs 28–33 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, for discussion of identifying relevant assertions.

b. Within the note to paragraph 9, the reference to Appendix B, *Additional Performance Requirements and Directions; Extent of Testing Examples,* of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs B10–B16 of Appendix B, *Special Topics,* of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

c. The last sentence of paragraph 33 is deleted.

d. The note to paragraph 65 is deleted.

e. The note to paragraph 83 is deleted.

f. Within the note to paragraph 97, the reference to paragraphs 104–105 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraph 54 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

g. The appendix at paragraph 110 is deleted.

AU sec. 322, "The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements"

SAS No. 65, "The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements" (AU sec. 322, "The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements"), is amended as follows—

a. Within the note to paragraph 1, the reference to paragraphs 108–126 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 16–19 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

b. The note to paragraph 20 is deleted.

c. Within the note to paragraph 22, the reference to paragraph 122 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 18–19 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 324, "Service Organizations"

SAS No. 70, "Service Organizations" (AU sec. 324, "Service Organizations"), as amended, is amended as follows—

Within the note to paragraph 1, the reference to Appendix B, *Additional Performance Requirements and Directions; Extent-of-Testing Examples*, of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs B17–B27 of Appendix B, *Special Topics*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 325, "Communications About Control Deficiencies in an Audit of Financial Statements"[1]

AU sec. 325, "Communications About Control Deficiencies in an Audit of Financial Statements" is amended as follows—

a. The first bullet point before paragraph 1 is amended as follows—

The reference to paragraphs 207–214 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 78–84 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

b. The first bullet point in paragraph 1 is replaced with—

A deficiency in design exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met.

c. Paragraph 2 is replaced with—

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting, that is less severe than a material weakness yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

d. The notes to paragraph 2 are deleted.

---

[1] When the Board adopted Auditing Standard No. 2, it superseded SAS No. 60 in the context of an integrated audit of financial statements and internal control over financial reporting by paragraphs 207-214 of Auditing Standard No. 2. See PCAOB Release No. 2004-008, *Conforming Amendments to PCAOB Interim Standards Resulting From the Adoption of PCAOB Auditing Standard No. 2*, "An Audit of Internal Control Over Financial Reporting Performed in Conjunction with An Audit of Financial Statements" (Sept. 15, 2004). As a result of superseding Auditing Standard No. 2, paragraphs 78-84 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, now supersede SAS No. 60 in the context of an integrated audit.

e. Paragraph 3 is replaced with—

> A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.
>
> Note: There is a reasonable possibility of an event when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in paragraph 3 of Financial Accounting Standards Board Statement No. 5, *Accounting for Contingencies*.
>
> Note: In evaluating whether a deficiency exists and whether deficiencies, either individually or in combination with other deficiencies, are material weaknesses, the auditor should follow the direction in paragraphs 62–70 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

f. Paragraph 5 is replaced with—

> If oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, that circumstance should be regarded as an indicator that a material weakness in internal control over financial reporting exists. Although there is not an explicit requirement to evaluate the effectiveness of the audit committee's oversight in an audit of only the financial statements, if the auditor becomes aware that the oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, the auditor must communicate that information in writing to the board of directors.

g. The last sentence of paragraph 9 is replaced with—

> In an audit of financial statements only, auditing interpretation 1 to AU sec. 325, "Reporting on the Existence of Material Weaknesses," continues to apply except that the term "reportable condition" means "significant deficiency" as defined in paragraph 2 of this standard.

AU sec. 9325, "Communication of Internal Control Related Matters Noted in an Audit: Auditing Interpretations of Section 325"

AU sec. 9325, "Communication of Internal Control Related Matters Noted in an Audit: Auditing Interpretations of Section 325" is amended as follows—

> The note prior to paragraph 1 is replaced with—
>
> Note: In an audit of financial statements only, auditing interpretation 1 to AU sec. 325, "Reporting on the Existence of Material Weaknesses," continues to apply except that the term "reportable condition" means "significant deficiency" as defined in paragraph 2 of this standard. Within

the example report within paragraph 4 of the interpretation, the third sentence is replaced with the definition of a material weakness in paragraph A7 of Appendix A, *Definitions*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 328, "Auditing Fair Value Measurements and Disclosures"

SAS No. 101, "Auditing Fair Value Measurements and Disclosures" (AU sec. 328, "Auditing Fair Value Measurements and Disclosures"), is amended as follows—

The first sentence of paragraph 41 is replaced with—

> Events and transactions that occur after the balance-sheet date but before the date of the auditor's report (for example, a sale of an investment shortly after the balance-sheet date), may provide audit evidence regarding management's fair value measurements as of the balance-sheet date[7]

---

[7] The auditor's consideration of a subsequent event or transaction, as contemplated in this paragraph, is a substantive test and thus differs from the review of subsequent events performed pursuant to section 560, *Subsequent Events*.

AU sec. 332, "Auditing Derivative Instruments, Hedging Activities, and Investments in Securities"

SAS No. 92, "Auditing Derivative Instruments, Hedging Activities, and Investments in Securities" (AU sec. 332, "Auditing Derivative Instruments, Hedging Activities, and Investments in Securities"), is amended as follows—

The note to paragraph 11 is replaced with—

> Note: When performing an integrated audit of financial statements and internal control over financial reporting, paragraph 39 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, states "[t]he auditor should test those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion." Therefore, in an integrated audit of financial statements and internal control over financial reporting, if there are relevant assertions related to the company's investment in derivatives and securities, the auditor's understanding of controls should include controls over derivatives and securities transactions from their initiation to their inclusion in the financial statements and should encompass controls placed in operation by the entity and service organizations whose services are part of the entity's information system.

AU sec. 333, "Management Representations"

SAS No. 85, "Management Representations" (AU sec. 333, "Management Representations"), as amended, is amended as follows—

a. Within the note to paragraph 5, the reference to paragraphs 142–144 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 75–77 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

b. The second sentence of paragraph 9 is replaced with—

> Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of the date of the auditor's report.

AU sec. 9337, "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments: Auditing Interpretations of Section 337"

AU sec. 9337, "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments: Auditing Interpretations of Section 337" is amended as follows—

a. The last sentence of paragraph 4 is replaced with—

> What is the relationship between the effective date of the lawyer's response and the date of the auditor's report?

b. Paragraph 5 is replaced with—

> *Interpretation*—Section 560.10 through .12 indicates that the auditor is concerned with events, which may require adjustment to, or disclosure in, the financial statements, occurring through the date of his or her report. Therefore, the latest date of the period covered by the lawyer's response (the "effective date") should be as close to the date of the auditor's report as is practicable in the circumstances. Consequently, specifying the effective date of the lawyer's response to reasonably approximate the expected date of the auditor's report will in most instances obviate the need for an updated response from the lawyer.

AU sec. 341, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern"

SAS No. 59, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern" (AU sec. 341, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern"), as amended, is amended as follows—

The second sentence of paragraph 2 is replaced with—

> The auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor's report.

AU sec. 342, "Auditing Accounting Estimates"

SAS No. 57, "Auditing Accounting Estimates" (AU sec. 342, "Auditing Accounting Estimates"), is amended as follows—

a. Subparagraph *c*. of paragraph 10 is replaced with—

> *c*. Review subsequent events or transactions occurring prior to the date of the auditor's report.

b. Paragraph 13 is replaced with—

> *Review subsequent events or transactions.* Events or transactions sometimes occur subsequent to the date of the balance sheet, but prior to the date of the auditor's report, that are important in identifying and evaluating the reasonableness of accounting estimates or key factors or assumptions used in the preparation of the estimate. In such circumstances, an evaluation of the estimate or of a key factor or assumption may be minimized or unnecessary as the event or transaction can be used by the auditor in evaluating their reasonableness.

AU sec. 380, "Communication With Audit Committees"

SAS No. 61, "Communication With Audit Committees" (AU sec. 380, "Communication With Audit Committees"), as amended, is amended as follows—

> Within footnote 1 to paragraph 1, the reference to PCAOB Auditing Standard No. 2 is replaced with a reference to PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 508, "Reports on Audited Financial Statements"

SAS No. 58, "Reports on Audited Financial Statements" (AU sec. 508, "Reports on Audited Financial Statements"), as amended, is amended as follows—

> Within the note to paragraph 1, the reference to paragraphs 162–199 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 85–98 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and Appendix C, *Special Reporting Situations*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*. The sentence that reads "In addition, see Appendix A, *Illustrative Reports on Internal Control Over Financial Reporting*, of PCAOB Auditing Standard No. 2, which includes an illustrative combined audit report and examples of separate reports," is replaced with, "In addition, see paragraphs 86–88 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, which includes an illustrative combined audit report."

AU sec. 530, "Dating of the Independent Auditor's Report"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 530, "Dating of the Independent Auditor's Report" (AU sec. 530, "Dating of the Independent Auditor's Report"), as amended, is amended as follows—

a. Paragraph .01 is replaced with—

> The auditor should date the audit report no earlier than the date on which the auditor has obtained sufficient competent evidence to support the auditor's opinion. Paragraph .05 describes the procedure to be followed when a subsequent event occurring after the report date is disclosed in the financial statements.
>
> Note: When performing an integrated audit of financial statements and internal control over financial reporting, the auditor's reports on the company's financial statements and on internal control over financial reporting should be dated the same date.
>
> Note: If the auditor concludes that a scope limitation will prevent the auditor from obtaining the reasonable assurance necessary to express an opinion on the financial statements, then the auditor's report date is the date that the auditor has obtained sufficient competent evidence to support the representations in the auditor's report.

b. Paragraph .05 is replaced with—

> The independent auditor has two methods for dating the report when a subsequent event disclosed in the financial statements occurs after the auditor has obtained sufficient competent evidence on which to base his or her opinion, but before the issuance of the related financial statements. The auditor may use "dual dating," for example, "February 16, 20_, except for Note _, as to which the date is March 1, 20_," or may date the report as of the later date. In the former instance, the responsibility for events occurring subsequent to the original report date is limited to the specific event referred to in the note (or otherwise disclosed). In the latter instance, the independent auditor's responsibility for subsequent events extends to the later report date and, accordingly, the procedures outlined in section 560.12 generally should be extended to that date.

c. Within the heading before paragraph .03, the reference to "completion of field work" is replaced with "the date of the independent auditor's report."

AU sec. 543, "Part of Audit Performed by Other Independent Auditors"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 543, "Part of Audit Performed by Other Independent Auditors" (AU sec. 543, "Part of Audit Performed by Other Independent Auditors"), as amended, is amended as follows—

> Within the note to paragraph .01, the reference to paragraphs 182–185 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs C8–C11 of Appendix C, *Special Reporting Situations*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 560, "Subsequent Events"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 560, "Subsequent Events" (AU sec. 560, "Subsequent Events"), as amended, is amended as follows—

a. Within the note to paragraph .01, the reference to paragraphs 186–189 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 93–97 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

b. The second sentence of paragraph .12 is replaced with—

> These procedures should be performed at or near the date of the auditor's report.

AU sec. 561, "Subsequent Discovery of Facts Existing at the Date of the Auditor's Report"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 561, "Subsequent Discovery of Facts Existing at the Date of the Auditor's Report" (AU sec. 561, "Subsequent Discovery of Facts Existing at the Date of the Auditor's Report"), as amended, is amended as follows—

> Within the note to paragraph .01, the reference to paragraph 197 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraph 98 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 711, "Filings Under Federal Securities Statutes"

SAS No. 37, "Filings Under Federal Securities Statutes" (AU sec. 711, "Filings Under Federal Securities Statutes"), is amended as follows—

a. Within the note to paragraph 2, the reference to paragraphs 198–199 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs C16–C17 of Appendix C, *Special Reporting Situations*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

b. The third sentence of paragraph 10 is replaced with—

> The likelihood that the auditor will discover subsequent events necessarily decreases following the date of the auditor's report, and, as a practical matter, after that time the independent auditor may rely, for the most part, on inquiries of responsible officials and employees.

AU sec. 722, "Interim Financial Information"

SAS No. 100, "Interim Financial Information" (AU sec. 722, "Interim Financial Information"), is amended as follows—

a. The following is inserted after the first sentence of paragraph 3—

> The SEC also requires management, with the participation of the principal executive and financial officers (the certifying officers) to make certain quarterly and annual

certifications with respect to the company's internal control over financial reporting.[2]

---

[2] See Section 302 of the Sarbanes-Oxley Act of 2002, and Securities Exchange Act Rule 13a-14(a) or 15d-14(a), (17 C.F.R. §240.13a-14a or 17 C.F.R. §240.15d-14a), whichever applies.

b. The note to paragraph 3 is deleted.

c. The following is added to the end of paragraph 7—

Likewise, the auditor's responsibility as it relates to management's quarterly certifications on internal control over financial reporting is different from the auditor's responsibility as it relates to management's annual assessment of internal control over financial reporting. The auditor should perform limited procedures quarterly to provide a basis for determining whether he or she has become aware of any material modifications that, in the auditor's judgment, should be made to the disclosures about changes in internal control over financial reporting in order for the certifications to be accurate and to comply with the requirements of Section 302 of the Act.

Note: The auditor's responsibilities for evaluating management's certification disclosures about internal control over financial reporting take effect beginning with the first quarter after the company's first annual assessment of internal control over financial reporting as described in Item 308(a)(3) of Regulations S-B and S-K.

d. The following lettered section is added to the end of paragraph 18—

g. Evaluating management's quarterly certifications about internal control over financial reporting by performing the following procedures—

- Inquiring of management about significant changes in the design or operation of internal control over financial reporting as it relates to the preparation of annual as well as interim financial information that could have occurred subsequent to the preceding annual audit or prior review of interim financial information;
- Evaluating the implications of misstatements identified by the auditor as part of the auditor's other interim review procedures as they relate to effective internal control over financial reporting; and
- Determining, through a combination of observation and inquiry, whether any change in internal control over financial reporting has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

e. Paragraph 29 is replaced with—

As a result of conducting a review of interim financial information, the accountant may become aware of matters that cause him or her to believe that—

a. Material modification should be made to the interim financial information for it to conform with generally accepted accounting principles;

b. Modification to the disclosures about changes in internal control over financial reporting is necessary for the certifications to be accurate and to comply with the requirements of Section 302 of the Act and Securities Exchange Act Rule 13a-14(a) or 15d-14(a), whichever applies; and

c. The entity filed the Form 10-Q or Form 10-QSB before the completion of the review.

In such circumstances, the accountant should communicate the matter(s) to the appropriate level of management as soon as practicable.

f. Paragraph 32 is replaced with—

If the auditor becomes aware of information indicating that fraud or an illegal act has or may have occurred, the auditor must also determine his or her responsibilities under AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, AU sec. 317, *Illegal Acts by Clients*, and Section 10A of the Securities Exchange Act of 1934.[1]

---

[1] See 15 U.S.C. §78j-1

g. Within paragraph 33, the third sentence is replaced with—

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting, that is less severe than a material weakness yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

Auditing Standard No. 3, Audit Documentation

Auditing Standard No. 3, *Audit Documentation* is amended as follows—

Within footnote 2 to paragraph 6, the reference to paragraphs 68–70 of Auditing Standard No. 2 is replaced with a reference to paragraphs 28–33 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

Auditing Standard No. 4, Reporting on Whether a Previously Reported Material Weakness Continues to Exist

Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* is amended as follows—

a. Within note 1 to paragraph 1, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

b. Within paragraph 2, the two references to Auditing Standard No. 2 are replaced with references to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

c. Within the note to paragraph 2, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

d. Within paragraph 4, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

e. Paragraph 9 is replaced with—

> The terms *internal control over financial reporting*, *deficiency*, *significant deficiency*, and *material weakness* have the same meanings as the definitions of those terms in Appendix A, *Definitions,* of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

f. The first sentence of paragraph 10 is replaced with—

> Paragraph 5 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, states "[t]he auditor should use the same suitable, recognized control framework to perform his or her audit of internal control over financial reporting as management uses for its annual evaluation of the effectiveness of the company's internal control over financial reporting."

g. Within the note to paragraph 10, the reference to Auditing Standard No. 2 in the first sentence is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and the last sentence is amended as follows—

> More information about the COSO framework is included within the COSO report.

h. Paragraph 11 is replaced with—

> The terms relevant assertion and control objective have the same meaning as the definitions of those terms in Appendix A, *Definitions*, of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

i. Paragraph 13 is replaced with—

> In an audit of internal control over financial reporting, the auditor should test the design effectiveness of controls by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that

could result in material misstatements in the financial statements.[2]

---

[2] See paragraph 42 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

j. Within the note to paragraph 17, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

k. Within note 2 to paragraph 18, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

l. Within paragraph 21, the last sentence is deleted.

m. Within paragraph 23, the reference to paragraphs 22 and 23 of Auditing Standard No. 2 is replaced with a reference to paragraph 20 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*. Additionally, the second sentence is deleted.

n. Within paragraph 24, the reference to paragraph 39 of Auditing Standard No. 2 is replaced with a reference to paragraph 9 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

o. Within paragraph 25, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

p. Within the note to paragraph 25, the two references to Auditing Standard No. 2 are replaced with references to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

q. Within subparagraph a. of paragraph 26, the reference to paragraphs 47 through 51 of Auditing Standard No. 2 is replaced with a reference to paragraphs 22–27 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

r. Subparagraph b. of paragraph 26 is replaced with—

> Perform the procedures described in paragraphs 34–38 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, for those transactions that are directly affected by controls specifically identified by management as addressing the material weakness.

s. The note to subparagraph b. of paragraph 26 is deleted.

t. Within paragraph 27, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

u. The note to paragraph 28 is deleted.

v. Within paragraph 31, the reference to paragraphs 88 through 91 of Auditing Standard No. 2 is replaced with a reference to paragraphs 42–43 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

w. Paragraph 32 is replaced with—

> Consistent with the direction in paragraphs 44–45 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, the auditor should test the operating effectiveness of a specified control by determining whether the specified control operated as designed and whether the person performing the control possesses the necessary authority and qualifications to perform the control effectively. In determining the nature, timing, and extent of tests of controls, the auditor should apply paragraphs 50–54 of Auditing Standard No. 5.

x. Paragraph 33 is replaced with—

> The auditor should perform tests of the specified controls over a period of time that is adequate to determine whether, as of the date specified in management's assertion, the controls necessary for achieving the stated control objective are operating effectively. The timing of the auditor's tests should vary with the risk associated with the control being tested. For example, a transaction-based, daily reconciliation generally would permit the auditor to obtain sufficient evidence as to its operating effectiveness in a shorter period of time than a pervasive, entity-level control, such as any of those described in paragraphs 22–24 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*. Additionally, the auditor typically will be able to obtain sufficient evidence as to the operating effectiveness of controls over the company's period-end financial reporting process only by testing those controls in connection with a period-end.

y. Within paragraph 35, the reference to paragraphs B1 through B13 of Appendix B of Auditing Standard No. 2 is replaced with a reference to paragraphs B10–B16 of Appendix B, Special Topics, of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

z. Within paragraph 36, the reference to paragraphs 109 through 115 and 117 through 125 of Auditing Standard No. 2 is replaced with a reference to paragraphs 16–19 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

aa. The second sentence of paragraph 37 is replaced with—

> Therefore, if the auditor has been engaged to report on more than one material weakness or on more than one stated control objective, the auditor must evaluate whether he or she has obtained sufficient evidence that the control objectives related to each of the material weaknesses identified in management's assertion are achieved.

bb. The first two sentences of paragraph 38 are replaced with—

> Paragraphs 18–19 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, should be applied in the context of the engagement to report on whether a previously reported material weakness continues to exist.

cc. The note to paragraph 38 is deleted.

dd. The note to paragraph 39 is deleted.

ee. Paragraph 42 is replaced with—

> Management may conclude that a previously reported material weakness no longer exists because its severity has been sufficiently reduced such that it is no longer a material weakness.

ff. Subparagraph f. of paragraph 44 is replaced with—

> Describing any fraud resulting in a material misstatement to the company's financial statements and any other fraud that does not result in a misstatement in the company's financial statements but involves senior management or management or other employees who have a significant role in the company's internal control over financial reporting and that has occurred or come to management's attention since the date of management's most recent annual assessment of internal control over financial reporting.

gg. Within the note to subparagraph b. of paragraph 51, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

hh. Within the note to subparagraph l. of paragraph 51, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

ii. Within the note to the second bullet point of subparagraph o. of paragraph 51, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

jj. Within paragraph 52, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

kk. Within paragraph 63, the reference to paragraphs 202 through 206 of Auditing Standard No. 2 is replaced with a reference to paragraphs 7 and 29–32 of AU sec. 722, *Interim Financial Information*.

ll. Within paragraph 64, the reference to paragraphs 202 through 206 of Auditing Standard No. 2 is replaced with a reference to paragraphs 7 and 29–32 of AU sec. 722, *Interim Financial Information.*

Appendix 4

Additional Discussion of Comments and the Board's Response

As discussed in the first part of the Board's release, on December 19, 2006, the Board proposed for comment a new standard on auditing internal control, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, that would replace Auditing Standard No. 2, a related auditing standard, *Considering and Using the Work of Others in an Audit*, an independence rule relating to the auditor's provision of internal control-related non-audit services, and certain amendments to its auditing standards. The Board received 175 comment letters on its proposals and feedback from the Board's Standing Advisory Group.

Notable changes that the Board made in finalizing its proposals in response to comments are described in the first part of the Board's release. This appendix contains a further discussion of comments received on the proposals and the Board's response.

1. Alignment of Board's Internal Control Auditing Standard and the SEC's Guidance to Management

Many commenters suggested that the SEC's guidance to management and the Board's auditing standard should be more closely aligned. The commenters appeared to hold different opinions, however, about what alignment should mean in this context. Some commenters suggested that the most important issue was the need to use the same definitions of important terms in both documents. Some focused on perceived differences in scope, testing, and documentation requirements, while others suggested that the tone of the two documents was different and that the Board's proposals were more prescriptive. A few commenters suggested that the standard on auditing internal control should merely refer to the SEC management guidance without providing additional direction to the auditor.

As discussed more fully in the first part of this release, in formulating a new standard on auditing internal control, the Board intended to describe an audit process that would be coordinated with management's evaluation process. After considering the comments in this area, the Board made several changes, described in the first part of this release, that improve coordination while recognizing the inherent differences in the roles of management and the independent auditor under Section 404. The Board also adopted, as proposed, the final standard without a requirement for the auditor to perform an evaluation of management's assessment process. Commenters generally supported this aspect of the proposal, which was intended to respond to concerns that the requirements of Auditing Standard No. 2 had become de facto guidance for management's process. The absence of this requirement in the final standard should also allow for improved coordination between management and the auditor.

2. Level of Prescriptive Detail

Some commenters suggested that there remained too many instances of the use of the terms "should" and "must" in the proposed standard and that this might drive excessive documentation and possibly unnecessary work. The Board's

Rule 3101 describes the level of responsibility that these imperatives impose on auditors when used in PCAOB standards, and the Board uses these terms in its standards to clearly convey its expectations. In response to these comments, the Board analyzed each requirement in the proposed standard to determine whether more reliance could be placed on general principles rather than detailed requirements. Where appropriate, the Board made modifications to make the final standard more principles-based. As discussed more fully in the first part of this release, areas in which changes were made include the focus on fulfilling the objectives of a walkthrough and in the description of the top-down approach. Some of these changes also contributed to better coordination with the SEC's guidance for management.

In addition, several commenters expressed concern over the creation of presumptively mandatory responsibilities related to efficiency concepts. The example cited most often was the note to paragraph 3 of the proposed standard on auditing internal control, which stated—

> Note: The auditor should select for testing only those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to a given relevant assertion that could result in a material misstatement to the company's financial statements.

Commenters suggested that because of this requirement for the auditor to select "only those controls that are important" for testing, an auditor would have violated the Board's standards if he or she tested even one control that was later shown to be not important. Commenters believed that this would undermine audit effectiveness and recommended removal of such statements.

One of the objectives of the revised standard is to encourage auditors to focus on those areas that present the greatest risk of allowing a material misstatement in the financial statements. However, the Board agrees that its standards should not define a ceiling or maximum amount of work which the auditor may not exceed. While this statement (and others like it) in the proposed standard was not intended to imply that the Board would, with hindsight, suggest that an auditor violated the standard through testing of a control that was later determined to be not important to the audit, the Board has removed the note to paragraph 3 in response to these comments. Similar statements throughout the standard have also either been removed or modified.

3. Walkthroughs

The proposed standard required that the auditor perform a walkthrough of each significant process each year and allowed the auditor to use others, such as management personnel and internal auditors, to directly assist the auditor in this work. The proposed standard also indicated that the walkthrough provides audit evidence but did not prescribe further requirements regarding the circumstances in which a walkthrough might provide the auditor with sufficient evidence of operating effectiveness for a particular control. The proposing release, however, noted that a walkthrough could be sufficient for some low-risk controls in subsequent years.

As discussed in the first part of this release, the Board received a significant number of comments on this topic. While several commenters expressed support for the importance of the walkthrough to audit quality, many commenters suggested that the proposed provisions in this area were more prescriptive than necessary, and suggested risk concepts as a way to add flexibility. While these commenters acknowledged the value of a walkthrough and its importance to

the evaluation of design effectiveness, many stated that the requirement to perform a walkthrough in an area that is either low-risk, not complex, or unchanged appears inconsistent with the other areas in the proposed standard that rely upon auditor judgment to a much greater extent.

Use of others in achieving the objectives of a walkthrough

Commenters supported allowing the auditor to use others to provide the auditor with direct assistance, particularly in low-risk areas, with only a few commenters believing that this change could jeopardize the quality of the audit. In addition, many commenters believed that the standard should allow full use of the work of others in performing walkthroughs, although some commenters strongly disagreed with this point.

As discussed in the first part of this release, the final standard focuses the auditor on achieving four objectives related to the identification of where within the company's processes misstatements could arise, rather than specifically on performing walkthroughs. Due to the importance of achieving these objectives to the auditor's conclusion about internal control, the Board believes that allowing the use of the work of others to a greater extent than what was proposed would not provide the auditor with an adequate understanding of the relevant risks and the related controls. Therefore, similar to the proposed standard, Auditing Standard No. 5 allows the auditor to use the work of others in achieving the objectives of a walkthrough, but only as direct assistance. That is, the auditor will be required to supervise, review, evaluate, and test the work performed by others.[1]

Using walkthroughs to test operating effectiveness

On the subject of using walkthroughs to test operating effectiveness, commenters suggested that walkthroughs can provide sufficient evidence of operating effectiveness, but held different views about situations in which this would be the case. Some commenters supported the use of walkthroughs in low-risk areas, while others focused on whether the control itself should be low-risk. Several commenters suggested that a walkthrough could provide sufficient evidence of operating effectiveness for lower-risk controls but only when entity-level controls are strong. Almost all commenters agreed that the proposed standard focused on the appropriate conditions for using such an approach—specifically, when risk is low, when past audits indicate effective design and operation of the control, and when no changes have been made to the control or process in which the control resides.

After considering these comments, the Board has decided that the risk-based approach that is described in the final standard is the appropriate framework for determining the evidence necessary to support the auditor's opinion. Therefore, Auditing Standard No. 5 articulates the principle that performance of a walkthrough might provide sufficient evidence of operating effectiveness, depending on the risk associated with the control being tested, the specific procedures performed as part of the walkthroughs and the results of the procedures performed.[2] The Board believes that establishing more detailed requirements in this area is not necessary, because application of the general principle in the standard will depend on the particular facts and circumstances presented.

---

[1] See paragraph 27 of AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.

[2] See paragraph 49.

4. Assessing Risk

The Board's May 16, 2005 guidance emphasized the importance of risk assessment in the audit of internal control, and that element of the guidance was incorporated and enhanced in the proposed standard. The proposed standard required risk assessment at each of the decision points in a top-down approach, including the auditor's identification of significant accounts and disclosures and their relevant assertions. The proposed standard also required an assessment of risk at the individual control level, and required that the auditor determine the evidence necessary for a given control based on this risk assessment.

The Board received many comments on the risk assessment provisions in the proposed standard. Comments on the proposed risk assessment approach were generally supportive, with some commenters suggesting ways for improving the risk assessment emphasis in the standard. Many commenters discussed the requirement in the proposed standard for the auditor to assess the risk that the control might not be effective and, if not effective, the risk that a material weakness would result for each control the auditor selected for testing. Commenters suggested that this requirement conflicted with both current practice and the requirements within the interim standards for the financial statement audit, which involve risk assessment at the financial statement assertion level. These commenters believed that this requirement would result in risk assessments at both the assertion level and the individual control level and suggested that assessing (and documenting) risk at the relevant assertion level is sufficiently precise to drive appropriate audits. Furthermore, they believed that a specific requirement to assess risk at the individual control level and its associated documentation requirement would be unnecessary.

After considering these comments, the Board continues to believe that the auditor may vary the nature, timing, and extent of testing based on the assessed risk related to a control. Making this assessment a presumptively mandatory requirement, as it was in the proposed standard, however, does not appear necessary to achieve the intended benefits of varied testing based on the risk associated with a control. Auditing Standard No. 5, therefore, requires the auditor to assess the risk related to the relevant assertion, but not the risk at the individual control level. The standard permits the auditor to consider the risk at the control level, however, and alter the nature, timing, and extent of testing accordingly.

Several commenters expressed concern about the advisability of taking a risk-based approach and the adequacy of the Board's interim standards regarding risk assessment. These commenters suggested that auditors have frequently been unsuccessful at applying a risk-based approach to the financial statement audit in the past.

The Board has found the arguments for a more principles-based approach to internal control auditing convincing, and the principle that the auditor should vary the testing to respond to the risk is one of the most important in the standard. Early implementation of Auditing Standard No. 2 demonstrated that, when internal control is audited without adequate consideration of risk, the areas that pose the greatest danger of material misstatement may be obscured or lost. The emphasis on risk, therefore, drives an audit that is more effective and focused. While the Board believes that auditors can appropriately assess risk based on the interim auditing standards, it has committed to examining the existing standards in this area to see where improvements can be made. This is currently one of the Board's standard setting priorities.

5. Evaluation of Deficiencies

The Board received a substantial number of comments on the topic of evaluating deficiencies, including comments on the proposed definitions of material weakness and significant deficiency, the "strong indicators" of a material weakness, and the requirement to evaluate all identified deficiencies. While a number of commenters stated that auditors do identify material weaknesses in the absence of an actual material misstatement, some noted that, in many cases, material weaknesses are identified only when material misstatements are discovered. Several commenters suggested that the proposed standard, with its focus on using a top-down approach and scoping to identify material weaknesses, would allow auditors to do a more thorough review of the most important controls with less effort expended on reviewing lower risk controls. These commenters often stated that this approach should increase the likelihood of the auditor detecting material weaknesses before a material misstatement occurs.

Definition of a material weakness

The proposed standard retained the basic framework in Auditing Standard No. 2 that described material weaknesses by reference to the likelihood and magnitude of a potential misstatement. While the Board believed that framework to be sound, it made an effort to clarify the definition in the proposed standard by replacing the reference to "more than remote likelihood" with "reasonable possibility." Financial Accounting Standards Board ("FASB") Statement No. 5 describes the likelihood of a future event occurring as "probable," "reasonably possible," or "remote." The definition in Auditing Standard No. 2 referred to a "more than remote" likelihood of a misstatement occurring. In accordance with FASB Statement No. 5, the likelihood of an event is "more than remote" when it is either "reasonably possible" or "probable."

As the Board noted in the proposing release, however, some auditors and issuers have misunderstood the term "more than remote" to mean something significantly less likely than a reasonable possibility. This, in turn, could have caused these issuers and auditors to evaluate the likelihood of a misstatement at a much lower threshold than the Board intended. Because the term "more than remote" could have resulted in auditors and issuers evaluating likelihood at a more stringent level than originally intended, the Board proposed changing the definition to refer to a "reasonable possibility."

Commenters on this change were split between those that felt the change would reduce unnecessary effort spent on identifying and analyzing deficiencies, and those who believed it would not. Several commenters noted that the replacement of the term "more than remote likelihood" with the term "reasonable possibility" does not raise the auditor's threshold for classifying deficiencies. According to those commenters, the change simply attempts to align the description of the threshold for identifying deficiencies with previous guidance issued by the PCAOB. The Board continues to believe that the proposed definition—as well as Auditing Standard No. 2—established an appropriate threshold for the likelihood part of the definition of material weakness. While the Board agrees that, as a definitional matter, "reasonable possibility" and "more than remote" describe the same threshold, it believes that "reasonable possibility" describes that threshold more appropriately and clearly, and will therefore avoid the misunderstanding of the threshold created by the way it was described in Auditing Standard No. 2. As a result, it retained that term in the final definition in the standard.

In addition, some commenters noted that the definitions of material weakness and significant deficiency in the proposed standard, like the definitions in Auditing Standard No. 2, referred to the likelihood of a material misstatement in

both the interim and annual financial statements. Most of these commenters suggested that the Board remove the term "interim" from the definitions of material weakness and significant deficiency because, according to the commenters, it causes confusion when scoping the audit of internal control and unnecessarily complicates the evaluation of deficiencies, particularly in the absence of guidance from the SEC and FASB regarding interim materiality. Some commenters, however, said that the Board should not remove the term "interim" from the definitions because the evaluation of deficiencies should be performed to consider the effectiveness of internal control for both the interim and annual financial statements. After carefully considering these comments, and in order to use the same definition that the SEC uses in its guidance to management, the Board determined to retain the reference to interim financial statements in the final definition of material weakness.[3]

Indicators of a material weakness

The proposed standard described circumstances that should be regarded as strong indicators of a material weakness in internal control. The proposing release noted that the identification of one of these strong indicators should bias the auditor toward a conclusion that a material weakness exists but does not require the auditor to reach that conclusion. Under the proposal, the auditor could determine that these circumstances do not rise to the level of a material weakness, and in some cases, are not deficiencies at all.

Many commenters supported the proposed changes from Auditing Standard No. 2 relating to strong indicators, agreeing that, by allowing greater use of professional judgment in this area, practice will improve. A few commenters stated that these changes may lead to some inconsistency in practice, but consistent with other commenters, they still supported the use of greater professional judgment in the evaluation of deficiencies. At least one commenter suggested that several of the strong indicators were not indicators of a material weakness but should be, under all circumstances, a material weakness. A few commenters also suggested that the list of strong indicators in Auditing Standard No. 2 actually stifles the auditor's judgment to the point that auditors fail to identify material weaknesses that exist because the deficiency is not on the list of strong indicators. These commenters suggested that removing the list of strong indicators entirely would be best.

The Board believes that auditor judgment is imperative in determining whether a deficiency is a material weakness and that the standard should encourage auditors to use that judgment. At the same time, the Board continues to believe that highlighting certain circumstances that are indicative of a material weakness provides practical information about the application of the standard. As a result, the Board has included this information in the final standard but has taken a more principles-based approach. Additionally, the Board has coordinated with the SEC so that the indicators in the auditing standard parallel those in the SEC's management guidance.

Rather than referring to "strong indicators," the final standard refers simply to "indicators" of material weakness.[4] The standard also makes clear that the list of indicators is not exhaustive and should not be used as a checklist. Specifically,

---

[3] The provisions in the final standard relating to significant deficiencies are discussed in the first part of this release. As discussed in the first part of this release, the Board also made minor wording changes to the definition of material weakness in order to use the same definition as the SEC in its guidance to management and related rules.

[4] The Board included as an indicator the proposed standard's requirement to determine the level of assurance that would satisfy prudent officials in the conduct of their own affairs that they

(continued)

under the final standard, the presence of one of the indicators does not mandate a conclusion that a material weakness exists. At the same time, a deficiency that is not a listed indicator may be a material weakness.

The Board did not adopt as indicators in the final standard certain proposed strong indicators. The Board believes, as at least one commenter suggested, that some of these proposed strong indicators are better characterized as material weaknesses rather than as indicators of a material weakness.[5] Including them in the list of indicators, as adopted, would therefore be inconsistent with the degree of judgment required to evaluate whether an indicator of a material weakness is, under particular facts and circumstances, a material weakness.

Requirement to evaluate all identified deficiencies

The proposed standard required the auditor to evaluate the severity of each control deficiency that comes to his or her attention. The same provision in the proposed standard made clear, however, that the auditor need not scope the audit to find control deficiencies that are less severe than material weaknesses. A few commenters believed that this requirement is not necessary and suggested that an acceptable alternative would be for the auditor to verify that management has evaluated all deficiencies.

The Board continues to believe that the auditor needs to evaluate all deficiencies that come to his or her attention. Without such an evaluation, there would not be a sufficient basis for the auditor's opinion.

6. Additional Scoping and Materiality Issues

The proposed standard clarified that the auditor should plan and perform the audit of internal control using the same materiality measures used to plan and perform the audit of the annual financial statements. This direction was intended to address concerns that auditors have interpreted Auditing Standard No. 2 as directing them to search for potential defects in internal control at a lower materiality level than that used in the audit of the annual financial statements.

The Board received many comments on materiality and scoping, and a large portion of the commenters expressed support for the proposed standard's approach. Some commenters, however, recommended providing clear quantitative guidelines for calculating materiality. Other commenters expressed concern about such an approach, fearing that material areas would be inappropriately excluded from the audit scope. Finally, some commenters suggested that the

---

(footnote continued)

have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles. In the proposal, if the auditor determined that a deficiency would prevent prudent officials from concluding that they have such reasonable assurance, the auditor was required to deem the deficiency to be at least a significant deficiency. Under the final standard, if the auditor determines that a deficiency might prevent prudent officials from concluding that they have such reasonable assurance, this circumstance is an indicator of material weakness.

[5] One such proposed strong indicator was an ineffective control environment. Under the proposal, indicators of an ineffective control environment included identification of fraud on the part of senior management and significant deficiencies that have been communicated to management and the audit committee and remain uncorrected after some reasonable period of time. The final standard includes the identification of fraud on the part of senior management as an indicator of a material weakness. In order to simplify the list and make it more principles-based, as well as to align it with the SEC management guidance, however, the Board did not include significant deficiencies that remain uncorrected as an indicator in the final standard.

Board should provide additional guidance on scoping and extent of control testing decisions, such as guidance on sample sizes related to testing of high-risk controls versus low-risk controls or more specific guidance on the scope of the internal control audit for entities with multiple locations.[6]

After considering these comments, the Board has determined to adopt its discussion of materiality in the internal control audit as proposed. The Board believes that the auditing standard on internal control is an inappropriate place to redefine or refine the meaning of materiality, which is a long-established concept in the federal securities laws. With respect to requests for more specific guidance on scoping or extent of testing issues, the Board has, as discussed in the first part of this release, endeavored to adopt a standard that relies more on general principles than detailed requirements. Accordingly, the Board believes that auditors should make specific determinations of how to comply with the general scoping and testing requirements in the standard using professional judgment in the particular circumstances presented.

7. Scaling the Audit for Smaller Companies

As discussed in the first part of this release, the Board received many comments on the proposed section on scaling the audit from commenters with a variety of perspectives. The comments covered a wide range of issues. In addition to the matters discussed in the first part of this release, commenters suggested:

- That the proposed section on scalability should be focused more closely on how complexity relates to a risk-based audit;
- That the proposed standard did not provide sufficient flexibility for smaller companies and that the standard should provide for more "credit" for control testing based on work done as part of the financial statement audit;
- That the resulting costs of these proposed changes would need to be studied for several years to determine if they are appropriate;
- That the attributes of smaller, less complex companies that were included in the proposed standard were appropriate and that the tailoring directions for auditors were adequate;
- That some of the attributes of smaller, less complex companies that might allow the auditor to tailor the audit might be, instead, risk factors that require more testing;
- That the emphasis on entity-level controls might not be appropriate; and
- That the Board's project to develop guidance on auditing internal control in smaller public companies is necessary.

As discussed in the first part of this release, the Board made several changes in response to comments in the final standard. The new standard provides direction on how to tailor internal control audits to fit the size and complexity of the company being audited. It does so by including notes throughout the standard on how to apply the principles in the standard to smaller, less complex companies, and by including a discussion of the relevant attributes of smaller, less complex companies as well as less complex units of larger companies. The Board

[6] The proposed standard focused on the auditor's assessment of risk of material misstatement and how the auditor could carry that assessment process into the scoping of a multi-location audit. Commenters were very supportive of the Board's approach in this area and, consequently, the Board has determined to adopt these provisions as proposed.

believes that the final standard appropriately considers the circumstances of smaller and less complex public companies (and other companies with less complex business units) while requiring a high-quality audit regardless of company size or complexity. The planned guidance on this topic will provide additional practical information for auditors of smaller companies.

8. Information Technology Principles

In gaining an understanding of the effect of information technology ("IT") on internal control over financial reporting and the risks the auditor should assess, the proposed standard directed the auditor to apply guidance in AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*. Additionally, the proposed standard included a discussion of IT operations at smaller and less complex companies. A number of commenters discussed the importance of IT risks to determining the scope of the audit and recommended that the final standard include additional guidance on how the risk assessment related to IT is incorporated in the audit of internal control.

In response to these comments, the Board included in Auditing Standard No. 5 a note to paragraph 36 that clarifies that the identification of risks and controls within IT should not be a separate evaluation but, rather, an integral part of the auditor's top-down risk assessment, including identification of significant accounts and disclosures and their relevant assertions, as well as the controls to test.

9. Roll-forward Procedures

The proposed standard discussed the procedures the auditor should perform to obtain additional evidence concerning the operation of the control when the auditor reports on the effectiveness of the control "as of" a specific date, but has tested the effectiveness of the control at an interim date. The Board received a few comments on this topic, mainly from auditors. The comments were consistent in their view that the proposed standard improperly implies, by using the expression "if any" in relation to additional evidence the auditor is required to obtain, that the auditor may not need to do any roll-forward work. Commenters suggested that such an approach would be inconsistent with paragraph .99 of AU sec. 319 and suggested that the words "if any" be removed from the final standard. The Board believes that its standard should be consistent with AU sec. 319.99 in that the auditor should perform some level of roll-forward procedures. Consequently, the Board removed the words "if any" from the relevant paragraphs of Auditing Standard No. 5 to correct the inconsistency. The Board also noted that, in some circumstances, inquiry alone might be a sufficient roll-forward procedure.

10. Cumulative Knowledge and Rotation

The proposed standard on auditing internal control allowed the auditor to incorporate knowledge from previous years' audits into his or her decision making process for determining the nature, timing, and extent of testing necessary. The section in the proposed standard on special considerations for subsequent years' audits built upon the risk-based framework in the proposed standard for determining the nature, timing and extent of testing by describing certain additional factors for the auditor to evaluate in subsequent years. These factors included the results of prior years' testing and any change that may have taken place in the controls or the business since that testing was performed. This section retained the requirement in Auditing Standard No. 2 that each control deemed important to the auditor's conclusion be tested every year, but allowed

for a reduction in testing when the additional risk factors indicated that the risk was lower than in the past.

Many commenters strongly supported these provisions as proposed. Many investors, in particular, stated that while they supported the proposed approach, they would not be supportive of rotation of control testing over a multiple-year period. These commenters were generally concerned that rotation of control testing would negatively affect audit quality. Among supporters of the approach in the proposed standard, several requested further clarification in the standard or additional guidance on how this approach should affect the level of testing.

Many issuers suggested that the standard should allow for full rotation—which exempts some important controls from testing each year—of at least controls in low-risk areas. Other commenters recommended that all controls should be tested on a multiyear rotating basis. These comments often focused on the fact that while the proposed standard required the auditor to evaluate whether there had been any relevant changes since the control was tested, it still required testing at some level even when there had been no change. These commenters considered this requirement to be unnecessary.

The Board shares the concern that multi-year rotation of control testing would not provide sufficient evidence for the auditor's opinion on internal control effectiveness, which is required by the Act to be issued each year. In the financial statement audit, control testing plays a supporting role—to the extent that controls have been tested and are effective, the auditor can reduce the level of (but not eliminate) the necessary substantive testing. In contrast, in the internal control audit, control testing does not play a supporting role but is the sole basis for the auditor's opinion. Additionally, even if the design of the control and its related process does not change from the prior year, it is not possible to assess the control's operating effectiveness without performing some level of testing. For these reasons, rotation is not a viable option in the audit of internal control.

Instead, the approach described in the proposed standard has been clarified in the final standard and continues to focus the auditor on relevant changes since a particular control was last tested, as many commenters suggested. Under this approach, the auditor would consider, in addition to the risk factors described in the standard that are always relevant to determining the nature, timing, and extent of testing, whether there has been a change in the controls or in the business that might necessitate a change in controls; the nature, timing, and extent of procedures performed in previous audits; and the results of the previous years' testing of the control.[7] After taking into account these additional factors, the additional information in subsequent years' audits might permit the auditor to assess risk as lower than in the initial year and, thus, might permit the auditor to reduce testing.

This treatment of cumulative knowledge is analogous to the roll-forward provisions in the final standard. In the case of subsequent years, the auditor, in essence, rolls forward the prior years' testing when the control was found to be effective in the past and no change has occurred (or would have been expected to occur due to changes in the environment or process that contains the control). Because the auditor might be able to assess the risk lower in the subsequent years, a walkthrough, or equivalent procedures, might be sufficient for low-risk controls. This approach appropriately factors in the effect of cumulative knowledge, while maintaining audit quality and providing a sufficient basis for the auditor's opinion.

---

[7] See paragraph 55.

11. Reporting the Results of the Audit

In the proposed standard, the Board attempted to address concerns that the separate opinion on management's assessment required by Auditing Standard No. 2 contributed to the complexity of the standard and caused confusion regarding the scope of the auditor's work.[8] Accordingly, to emphasize the proper scope of the audit and to simplify the reporting, the proposed standard required that the auditor express only one opinion on internal control—a statement of the auditor's opinion on the effectiveness of the company's internal control over financial reporting. The proposal eliminated the separate opinion on management's assessment because it was redundant of the opinion on internal control itself and because the opinion on the effectiveness of controls more clearly conveys the same information—specifically, whether the company's internal control is effective.

Many commenters agreed with the Board that eliminating the separate opinion on management's assessment would reduce confusion and clarify the reporting. Some commenters, however, suggested that the Board should instead require only an opinion on management's assessment. These commenters expressed their belief that the Act requires only that the auditor review management's assessment process and not the company's internal control. Additionally, a few commenters expressed confusion about why the proposed standard continued to reference an audit of management's assessment in paragraph 1 of the proposed standard and the auditor's report.

The Board has determined, after considering these comments, to adopt the provision requiring only an opinion on internal control.[9] The Board continues to believe that the overall scope of the audit that was described by Auditing Standard No. 2 and the proposed standard is correct; that is, to attest to and report on management's assessment, as required by Section 404(b) of the Act, the auditor must test controls directly to determine whether they are effective.[10] Accordingly, paragraphs 1 and 2 of the proposed standard provided that the auditor audits management's assessment—the statement in management's annual report about whether internal control is effective—by auditing whether that statement is correct—that is, whether internal control is, in fact, effective. The final standard similarly makes this clear. In response to commenters, however, the Board has clarified the auditor's report so that it will consistently refer to the required audit as the audit of internal control.

12. Implementation

Some commenters urged the Board to focus on implementation issues after it adopts a final standard, and noted that effective implementation by the Board is crucial to the internal control reporting process. Some of these commenters focused on the inspections process, which they suggested is key to promoting

---

[8] Although Auditing Standard No. 2 requires the auditor to evaluate management's process, the auditor's opinion on management's assessment is not an opinion on management's internal control evaluation process. Rather, it is the auditor's opinion on whether management's statements about the effectiveness of the company's internal controls are fairly stated.

[9] The SEC has adopted changes to its rules that require the auditor to express an opinion directly on internal control.

[10] In addition, Section 103 of the Act requires the Board's standard on auditing internal control to include "testing of the internal control structure and procedures of the issuer ...." Under Section 103, the Board's standard also must require the auditor to present in the audit report, among other things, "an evaluation of whether such internal control structure and procedures ... provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles ...."

audit efficiency. Some stated that auditors would be unlikely to change their audit approach until they are confident that the inspections will be similarly focused. The Board is committed to effective monitoring of firms' compliance with the new standard and will continue to promote proper implementation through other means, including the Board's Forums on Auditing in the Small Business Environment and guidance for auditors of smaller companies.

PCAOB Release No. 2008-001

Auditing Standard No. 6, Evaluating Consistency of Financial Statements, *and Conforming Amendments*

PCAOB Release No. 2008-001
January 29, 2008
PCAOB Rulemaking
Docket Matter No. 023

Summary

After public comment, the Public Company Accounting Oversight Board is adopting Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*, and amendments to the Board's interim auditing standards.

Board Contacts

Greg Fletcher, Associate Chief Auditor (202/207-9203, fletcherg@pcaobus.org), Keith Wilson, Associate Chief Auditor (202/207-9134; wilsonk@pcaobus.org)

******

A. Introduction

The Board proposed certain changes to its auditing standards in response to two actions of the Financial Accounting Standards Board ("FASB"). In May 2005, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 154, *Accounting Changes and Error Corrections*,[1] which superseded Accounting Principles Board ("APB") Opinion No. 20, *Accounting Changes*.[2] The FASB has also issued an exposure draft of a proposed Statement of Financial Accounting Standards, *The Hierarchy of Generally Accepted Accounting Principles.*[3]

SFAS No. 154 establishes, unless impracticable, retrospective application as the required method for reporting a change in accounting principle in the absence of explicit transition requirements specific to a newly adopted accounting principle.[4] SFAS No. 154 also redefines the term "restatement" to refer only to "the process of revising previously issued financial statements to reflect the

[2] Accounting Principles Board ("APB") Opinion No. 20, *Accounting Changes* (1971). SFAS No. 154 also superseded SFAS No. 3, *Reporting Accounting Changes in Interim Financial Statements*.

[3] FASB, Proposed Statement of Financial Accounting Standards, *The Hierarchy of Generally Accepted Accounting Principles,* Exposure Draft (April 2005).

[4] Among other reasons for undertaking this project, the FASB intended to eliminate differences between APB Opinion No. 20 and the International Accounting Standards Board standard, IAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*. See introduction to SFAS No. 154.

correction of an error in those financial statements."[5] Under SFAS No. 154, therefore, the term "restatement" does not refer to changes made to previously issued financial statements to reflect a change in accounting principle.

AU sec. 420, *Consistency of Application of Generally Accepted Accounting Principles*, the Board's interim standard on the auditor's responsibilities for evaluating the consistency of the application of generally accepted accounting principles ("GAAP"), generally reflected the provisions of APB Opinion No. 20, which was superseded by SFAS No. 154. To better align the Board's standards with the new accounting standard, on April 3, 2007, the Board proposed a new auditing standard on evaluating consistency, which would supersede AU sec. 420, and conforming amendments to AU sec. 508, *Reports on Audited Financial Statements*, of its interim auditing standards.

The FASB's proposed standard on the GAAP hierarchy would incorporate the hierarchy found in the auditing standards into the accounting standards. Historically, a description of the GAAP hierarchy has resided only in the auditing standards.[6]

Because the GAAP hierarchy identifies the sources of accounting principles and the framework for selecting principles to be used in preparing financial statements, the Board believed that these requirements are more appropriately located in the accounting standards. Accordingly, also on April 3, 2007, the Board proposed to remove the GAAP hierarchy from the auditing standards.[7]

The proposed standard provided direction for the auditor's evaluation of the consistency of financial statements. It directed the auditor to recognize a change in accounting principle or an adjustment to correct a misstatement[8] in previously issued financial statements in the auditor's report if it had a material effect on the financial statements. The conforming amendments to AU sec. 508, *Reports on Audited Financial Statements*, provide language for the explanatory paragraph. The proposed standard also directed the auditor to review a material change in financial statement classification and the related disclosure to determine whether the change also is a change in accounting principle or a correction of a material misstatement.

The proposed standard and amendments were intended to update and clarify the auditing standards in light of SFAS No. 154 and the FASB's proposal on the GAAP hierarchy. In particular, these updates and clarifications should enhance the clarity of auditor reporting on accounting changes and corrections of misstatements by distinguishing between these events.

The Board received 11 comment letters. In general, the commenters were supportive of the proposed standard and amendments. They generally stated that the proposed auditing standard appropriately described how the auditor should evaluate the consistency of financial statements and reflected the changes to accounting requirements under SFAS No. 154. Several commenters suggested

---

[5] See SFAS No. 154, paragraph 2j.

[6] See AU sec. 411, *The Meaning of "Present Fairly in Conformity with Generally Accepted Accounting Principles*." Although the Board is removing the GAAP hierarchy from this standard, the standard remains in existence, as amended.

[7] If the amendments are approved by the SEC, the effective date for the removal of the GAAP hierarchy from the auditing standards will be 60 days after the standard and amendments are approved by the SEC. The Board has coordinated with the FASB and understands that the FASB intends to coincide the effective date of its standard on the GAAP hierarchy with that of the PCAOB.

[8] SFAS No. 154 uses the term "error" instead of "misstatement." This release, including the final standard and amendments, uses "misstatement," the prevailing term used in PCAOB auditing standards. The term "error," as used in SFAS No. 154, is equivalent to "misstatement," as used in the auditing standards.

clarifications in various parts of the standard. As described in the following sections, the Board has considered the comments and made changes to the final standard and amendments.

The Board is adopting the proposed standard as Auditing Standard No. 6, as well as the amendments to the interim standards. This release describes key aspects and elements of the new standard and amendments, comments received, and changes incorporated in the final standard.

B. Evaluating Consistency

Under Auditing Standard No. 6, auditors are required to evaluate the consistency of a company's financial statements and report on inconsistencies. The new standard updates these requirements and aligns them more closely with SFAS No. 154[9] by requiring the auditor's report to recognize a company's correction of a material misstatement, regardless of whether it involves the application of an accounting principle. Based on a discussion at an October 2005 meeting of the Board's Standing Advisory Group, the Board understands that this requirement is consistent with current practice. The new standard focuses on the auditor's responsibilities regarding events that warrant recognition in the auditor's report on the financial statements–changes in accounting principles and corrections of misstatements in previously issued financial statements.[10] This standard also clarifies that the auditor's report should indicate whether an adjustment to prior-period financial statements results from a change in accounting principle or the correction of a misstatement.

1. Materiality

There were several comments on materiality. Some commenters suggested that the standard should specifically state that the auditor need not recognize the correction of a misstatement that is immaterial to the previously issued financial statements. Another suggested that the standard should remind the auditor that professional judgment is required to evaluate consistency. Another commenter said that additional guidance on materiality as applied to individual matters in the financial statements would be helpful in applying the standard. Others suggested that clarity would be improved by inserting the word "material" in several places.

In general, the Board's view is that the purpose of the standard is to provide direction on evaluating consistency; for example, the accounting periods the auditor should evaluate, the recognition in the auditor's report of consistency matters prescribed by the accounting standards, and the related audit reporting requirements. Because an audit is predicated on the use of reasoned judgment and the consideration of materiality in planning, performing, and reporting on the audit, the Board does not believe it is necessary for this standard to specifically direct the auditor to exercise judgment and apply materiality. Further, materiality is a concept that is defined under the federal securities laws, and it is not the objective of this standard to alter or interpret that concept.

---

[9] Because SFAS No. 154 provides comprehensive, authoritative accounting guidance on changes in accounting principle and corrections of errors, Auditing Standard No. 6 omits the accounting guidance that was included in AU sec. 420.

[10] AU sec. 420 also required recognition of those events. However, it only required recognition in the auditor's report of the correction of a misstatement involving an accounting principle. In addition, unlike AU sec. 420, the new standard does not describe the accounting changes that do not require recognition in the auditor's report.

The Board did agree that clarity could be improved in some areas by inserting the word "material" to modify the word "misstatement." The Board added "material" to AU secs. 508.18A and B to be consistent with paragraph 4 of Auditing Standard No. 6. However, AU sec. 508.18C does not include "material" because that sentence summarizes the SFAS No. 154 requirement for correcting a misstatement, which does not directly mention materiality.

2. Periods Covered by the Evaluation of Consistency

The new standard describes the scope of the required evaluation of consistency in terms that are similar to the description in AU sec. 420. Under the new standard, when the auditor reports only on the current period, the auditor should evaluate whether the financial statements of the current period are consistent with those of the preceding period. When the auditor reports on two or more years, the auditor should evaluate whether the financial statements reported on are consistent with each other and with the prior year's financial statements, if presented. For example, assume that a company presents comparative financial statements covering three years and has a change in auditors. In the first year in which the successor auditor reports, the successor auditor evaluates consistency between the year on which he or she reports and the immediately preceding year. In the second year in which the successor auditor reports, the successor auditor would evaluate consistency between the two years on which he or she reports and between those years and the earliest year presented. In response to comments, the Board added this example to the final standard.

When a company uses retrospective application, as defined in SFAS No. 154, to account for a change in accounting principle, the financial statements presented generally will be consistent. However, the previous years' financial statements presented with the current year's financial statements will reflect the change in accounting principle and, therefore, will appear different from those previous years' financial statements on which the auditor previously reported. For example, consider a company that adopts a new accounting standard in 2007 that requires retrospective application to 2006 and 2005. The financial statements for 2006 and 2005 will be consistent, as presented with 2007. However, the financial statements for the years 2006 and 2005 that were issued a year earlier will not reflect the retrospective application and hence will not be consistent with 2007 and will be different from the 2006 and 2005 financial statements that are presented with 2007. The new standard clarifies that the auditor's evaluation of consistency should encompass previously issued financial statements for the relevant periods.

Paragraph 3 of the proposed standard described the financial statement periods covered by the evaluation of consistency. The third sentence of that paragraph was intended to be a clarification of the requirement in AU sec. 420.22 regarding the evaluation of two or more years. However, some commenters found the third sentence of paragraph 3 to be confusing and recommended retaining the language in AU sec. 420.22, unless the Board had intended to change the auditor's responsibilities for evaluating the consistency of GAAP. Because the Board wanted to be clear that the auditor's responsibilities had not changed, the Board decided to retain the original sentence from AU sec. 420.22, with some changes, instead of the proposed third sentence of paragraph 3. The inserted sentence, adapted from AU sec. 420.22, reads as follows (additions underlined and deletions struck through):

> When the ~~independent~~ auditor reports on two or more periods~~years~~, he or she should evaluate~~addressthe~~ consistency ~~of the application of accounting principles~~ between such periods~~years~~ and the consistency of such periods~~years~~

with the period~~year~~ prior thereto if such prior period~~year~~ is presented with the financial statements being reported upon.

The Board did not include the reference to "the application of accounting principles" because paragraph 3 also relates to the auditor's evaluation of a company's correction of a material misstatement, regardless of whether it involves the application of an accounting principle. The Board also used the word "evaluate" because it describes the auditor's responsibilities consistently with the rest of the paragraph.

Two commenters suggested that the last sentence of proposed paragraph 3, which described the auditor's responsibility to evaluate whether the financial statements are consistent with previously issued financial statements for the same period, was confusing and unnecessary. These commenters suggested deleting the last sentence of paragraph 3. In addition, one commenter suggested that paragraph 3 of the proposed standard could be clarified by including the explanatory language from the proposing release regarding retrospective application under SFAS No. 154. As discussed above, the new standard is intended to clarify that the auditor's evaluation of consistency should include an evaluation of previously issued financial statements for the relevant periods. Accordingly, the Board believed that the final sentence of paragraph 3 is necessary. However, the Board agreed that including the suggested explanatory language from the proposing release regarding retrospective application would clarify the paragraph and has added that language as a footnote to paragraph 3.

3. Reference to Application of Accounting Principles

Consistent with the discussion above related to paragraph 3 of the proposed standard, the Board also removed the reference to "application of accounting principles" from the first paragraph of Auditing Standard No. 6. Because the auditor's evaluation of consistency under this standard includes errors not involving an accounting principle, the consistency evaluation is broader than that described under the second standard of reporting. Accordingly, the Board also removed the reference to the second standard of reporting from paragraph 2 of Auditing Standard No. 6.

4. Change in Accounting Principle

The new standard requires the auditor to evaluate a change in accounting principle[11] that has a material effect on the financial statements to determine whether: (1) the newly adopted accounting principle is a generally accepted accounting principle, (2) the method of accounting for the effect of the change is in conformity with GAAP, (3) the disclosures related to the accounting change are adequate, and (4) the company justifies that the alternative accounting principle is preferable,[12] as required by SFAS No. 154.[13] Under the amendments

---

[11] The proposed and final standards use the definition of a change in accounting principle found in SFAS No. 154, paragraph 2c.

[12] In certain circumstances, Securities and Exchange Commission ("SEC") rules require issuers to file a letter from the auditor indicating whether or not a change is to an alternative accounting principle that is preferable. See Rule 10-01(b)(6) of Regulation S-X, 17 C.F.R. § 210.10-01(b)(6).

[13] Under SFAS No. 154, the issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle as long as the change in accounting principle is made in accordance with the GAAP hierarchy. See SFAS No. 154, paragraph 14.

to AU sec. 508, if the four criteria are met,[14] the auditor would recognize the change in accounting principle in the auditor's report through the addition of an explanatory paragraph consisting of an identification of the nature of the change and a reference to the issuer's note disclosure describing the change. If those criteria are not met, the auditor would issue a qualified or adverse opinion.[15]

Some commenters recommended that the Board reconsider whether it was necessary for the auditor to recognize in the audit report changes that result when a company is required to adopt a newly issued accounting standard. They indicated that the significance of a company's discretionary change in accounting principle may be diluted if the auditor recognizes both discretionary changes and those changes in accounting principles required by a newly-issued standard in the report. Another commenter suggested that the auditor should not be required to include an explanatory paragraph in the audit report when changes in accounting principle have been applied retrospectively because, in such cases, the financial statements included in the filing will appear consistent. As noted above, the Board believes that it is important for investors to be informed when the prior year financial statements presented with the current year are different from previously issued financial statements. In addition, the Board believes that the different language in the auditor's report for discretionary changes and those required by a newly-issued standard provides sufficient notification to investors of the general nature of the change. Therefore, the Board adopted the requirement as proposed.[16]

One commenter suggested that the proposed standard deleted useful information about a change in accounting principle that also involves a change in an estimate. The proposed standard did not carry forward the requirement of AU sec. 420.13 that the auditor should recognize in his or her report a change in accounting principle that is inseparable from a change in estimate. After considering this comment, the Board concluded that the requirement in AU sec. 420.13 does result in useful information being included in the auditor's report. Accordingly, the Board updated the language in AU sec. 420 to reflect the term used in SFAS 154, and included the requirement in Auditing Standard No. 6.[17]

Some commenters asked the Board to clarify the reporting requirement related to a change in reporting entity. According to AU sec. 420.08, a change in reporting entity resulting from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit, does not require that the auditor include an explanatory paragraph in the auditor's report. Under the proposed standard, the auditor may have been required to report on, for example, the disposition of a subsidiary or business unit because SFAS No. 154 (and its predecessor, APB Opinion No. 20) did not specifically exempt such a transaction from the definition of a change in

---

[14] The auditor has substantially the same responsibility for evaluating a change in accounting principle as under AU sec. 431, *Adequacy of Disclosure in Financial Statements*, and paragraph .50 of AU sec. 508, *Reports on Audited Financial Statements*. The language in Auditing Standard No. 6 has, however, been updated to be consistent with SFAS No. 154.

[15] This responsibility is substantially unchanged from AU sec. 508.51.

[16] In addition, one commenter suggested that the standard include an example of a change in the method of applying an accounting principle. The final standard, like the proposed standard, notes that under SFAS No. 154 a change in the method of applying an accounting principle is also a change in accounting principle. While the Board believes that it is helpful for the standard to reference the accounting requirement, it also believes that it is not appropriate for the auditing standard to provide accounting guidance.

[17] The new standard uses the term "change in accounting estimate effected by a change in accounting principle," which is defined in SFAS No. 154 as "a change in accounting estimate that is inseparable from the effect of a related change in accounting principle."

reporting entity. Generally, dispositions or spin-offs have specific disclosure requirements in the accounting standards and the Board did not intend to change practice and require the auditor to report on these events through an explanatory paragraph. Accordingly, the Board carried forward the requirement from AU sec. 420.08 regarding a transaction or event. In addition, the Board also added a reference to paragraph 2f in SFAS No. 154, which describes a change in reporting entity, as suggested by some commenters.

In response to comments, the Board also modified paragraph 8 of the proposed standard, which provided direction for reporting a change in accounting principle. Some commenters noted that the proposed conforming amendments to AU sec. 508.17 had a more clearly stated version of the number of years that the auditor is required to include an explanatory paragraph related to a change in principle than did footnote 5 to paragraph 8. After considering the commenters' recommendation that the language in the footnote be changed, the Board decided that the footnote was not necessary because paragraph 8 referred the auditor directly to the reporting requirements in AU sec. 508. The Board therefore removed footnote 5 from the final standard.

5. Correction of a Material Misstatement in Previously Issued Financial Statements

Under Auditing Standard No. 6, the correction of a material misstatement in previously issued financial statements (i.e., a "restatement") is recognized in the auditor's report through the addition of an explanatory paragraph. Under the conforming amendments to AU sec. 508, the explanatory paragraph in the auditor's report regarding a restatement should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the company's disclosure of the correction of the misstatement. The first statement in the explanatory paragraph distinguishes restatements from adjustments to prior-period financial statements resulting from changes in accounting principle. Previously, the auditor's responsibilities for reporting on most restatements were the same as for reporting on changes in accounting principle.

One commenter suggested that the proposed standard did not clearly explain whether corrections of an error not involving a principle would require recognition in the auditor's report. Unlike the previous requirement, the proposed standard did not distinguish between the "correction of an error in principle" and an "error correction not involving a principle."[18] Rather, the proposed standard required recognition in the auditor's report of any correction of a material misstatement, whether or not the error involved a principle. The Board reconsidered the language and concluded that the requirement as proposed was sufficiently clear. The new standard aligns the auditor's reporting responsibilities with the accounting standards, which require disclosure of all restatements, by requiring an explanatory paragraph when the company has restated the financial statements.

Some commenters suggested that it would not improve clarity to have the auditor's report include a statement that the financial statements were restated "to correct a material misstatement." They noted that SFAS No. 154 already defines a restatement as the revision of previously issued financial statements to reflect the correction of an error. The Board decided to retain the reporting

[18] This distinction previously was in paragraphs .12 and .16 of AU sec. 420, *Consistency of Application of Generally Accepted Accounting Principles*.

requirement as proposed because it clearly distinguishes corrections of misstatements from changes in accounting principle. Also, the required reporting language regarding restatements is more informative because it does not rely entirely on the user's knowledge of the definition of "restatement" in the accounting standard.[19]

One commenter also recommended that the auditor's explanatory paragraph about the correction of a misstatement should contain additional information. The commenter recommended that the explanatory paragraph include a statement that (1) the previously issued auditor's report should not be relied on because the previously issued financial statements were materially misstated, and (2) the previously issued report is replaced by the auditor's report on the restated financial statements.

The Board believes that the recommended additional language is not necessary because existing PCAOB standards and rules of the Securities and Exchange Commission ("SEC") are sufficient to inform users about misstatements in previously issued financial statements. Specifically, AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, requires the auditor to take specific action when he or she concludes that information discovered after the financial statements have been issued would have affected his or her report if the company had not reflected the information in the financial statements and people are currently relying or are likely to rely on the financial statements and auditor's report. According to AU sec. 561.06, the auditor should advise the company to make appropriate disclosure of the newly discovered facts and their impact on the financial statements to persons who are known to be currently relying or who are likely to rely on the financial statements and the related auditor's report.[20]

A U.S. public company that is not a foreign private issuer under SEC rules also is required to file a Form 8-K current report, if it concludes that any previously issued financial statements should no longer be relied upon because of an error in such financial statements.[21] If the auditor has notified the issuer that action should be taken to prevent future reliance on a previously issued audit report, the company also must disclose that information in the Form 8-K.

6. Changes in Classification

Auditing Standard No. 6 does not require the auditor's report to recognize a change in classification[22] in previously issued financial statements, except for a reclassification that is also a change in accounting principle or correction of a material misstatement.[23] Accordingly, the new standard clarifies that the

---

[19] Two commenters suggested that the standard include the explanation from the release that the term "error," as used in SFAS No. 154, is equivalent to "misstatement," as used in the auditing standards. The Board agreed and has included that explanation in the final standard.

[20] AU sec. 561.06 also requires that if the effect on the financial statements or auditor's report can promptly be determined, disclosure should consist of issuing, as soon as practicable, revised financial statements and auditor's report. If issuance of the financial statements with an auditor's report for a later period is imminent, a company is permitted to disclose the revision to the financial statements instead of reissuing earlier statements. When the effect on the financial statements cannot be determined without a prolonged investigation, appropriate disclosure would consist of notification that the financial statements and auditor's report should not be relied on and that revised financial statements and auditor's report will be issued upon completion of an investigation.

[21] See Securities Exchange Act Rule 13a-11, 17 C.F.R. § 240.13a-11.

[22] AU sec. 420.17 also did not require recognition of a change in financial statement classification in the auditor's report.

[23] SFAS No. 154 uses the term "presentation" in its definition of an error in previously issued financial statements. The directions in paragraph 11 of the new standard address the auditor's

(continued)

auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change is also a change in accounting principle or a correction of a material misstatement. For example, in some circumstances, a change in financial statement classification also may be the correction of a misstatement. A restatement to correct the misclassification of an account as short- or long-term or misclassification of cash flows would be both a restatement and reclassification. Therefore, the auditor should evaluate these matters as part of the evaluation of corrections of misstatements. Under Auditing Standard No. 6, a classification change that is also a change in accounting principle should be reported on as a change in accounting principle, and a classification change that is also a correction of a material misstatement should be reported on by the auditor as a restatement.

Some commenters recommended slight revisions to the first sentence of paragraph 11 to clarify the auditor's responsibilities. The first sentence stated that changes in classification in previously issued financial statements do not require recognition in the auditor's report. This seemed to conflict with the second sentence which required the auditor to review a material change in classification and related disclosure to determine whether such a change also is a change in accounting principle or a correction of a material misstatement. The Board agreed with the comments and modified the first sentence to state that a change in classification does not require audit report recognition unless the change represents the correction of a material misstatement or a change in accounting principle. Additionally, in the proposed standard, the Board used the word "review" to describe the auditor's responsibility when there has been a material change in financial statement classification. The Board concluded that the word "evaluate" better describes the auditor's responsibilities in this area and is more consistent with the other requirements in Auditing Standard No. 6. Accordingly, the Board replaced "review" with "evaluate."

C. Description of GAAP and Removal of the GAAP Hierarchy From the Auditing Standards

As discussed previously, the FASB has proposed to incorporate the GAAP hierarchy into its own standards. The Board believes that it is appropriate to locate the GAAP hierarchy in the accounting standards rather than in the auditing standards. Thus, the Board amended its interim standards to remove the GAAP hierarchy from the auditing standards. These amendments do not change the principles in AU sec. 411 for evaluating fair presentation of the financial statements in conformity with GAAP.

Commenters strongly supported removing the GAAP hierarchy from the auditing standards and stated that it was appropriate for the GAAP hierarchy to be contained in the accounting standards. However, one commenter observed that the proposed amendments contain significant differences from the American Institute of Certified Public Accountants' ("AICPA") Auditing Standards Board's ("ASB") proposed amendment to AU sec. 411 of the ASB's standards.[24]

(footnote continued)

responsibilities for changes in classification, which is an element of the presentation and disclosure financial statement assertion under the auditing standards. See, e.g., paragraph .08 of AU sec. 326, *Evidential Matter*.

[24] In addition, this commenter suggested that U.S. auditing standard-setters should work together to achieve consistency on core auditing standards that are used by almost all auditors of U.S. entities. This commenter also suggested that if the Board continues issuing its own standards for audits

(continued)

The Board believes that the amendments to AU sec. 411 are consistent with the Board's objective of removing the GAAP hierarchy from the auditing standards, and retaining, or providing, direction necessary for audits of public companies. The significant differences between the ASB's amendments to its AU sec. 411 and the Board's amendments primarily are related to sources of GAAP for governmental entities and direction on the application of accounting principles, which the Board did not believe was appropriate for inclusion in the proposed amendments. In addition, the Board deleted references to Rule 203 of the AICPA's *Code of Professional Conduct*. Rule 203 prohibits auditors from expressing an opinion on financial statements that do not conform to GAAP unless the auditor can demonstrate that due to unusual circumstances the financial statements would have been misleading without departing from GAAP. In 2003, when the Board adopted certain AICPA rules and ASB standards as interim Board standards, the Board did not adopt Rule 203. Consistent with that action, the proposed amendments did not include a reference to Rule 203.

D. Section-by-Section Description of Amendments to the Interim Auditing Standards

In addition to proposing an auditing standard on evaluating consistency of financial statements, the Board also proposed amendments to other interim auditing standards and related interpretations. The following sections describe key aspects and elements of the amendments to the standards and interpretations, comments received, and changes incorporated in the final amendments.

AU sec. 410, Adherence to Generally Accepted Accounting Principles

The Board proposed to delete AU sec. 410.02 which discussed the meaning of "generally accepted accounting principles" and included other matters that are addressed elsewhere in the standards. However, some commenters suggested that, to improve clarity, AU sec. 410 should retain the sentence in existing AU sec. 410.02 which states that the "first standard is construed not to require a statement of fact by the auditor but an opinion."

The Board agreed that, when viewed alone, the first standard of reporting, contained in AU sec. 410.01, does not provide a complete description of the auditor's responsibilities related to fair presentation in conformity with GAAP. However, the first standard of reporting combined with the fourth standard clearly indicates that that the auditor is providing a statement of an opinion and not a statement of fact. The fourth standard of reporting provides that the auditor's report shall contain either an expression of opinion regarding the financial statements taken as a whole, or an assertion to the effect that an opinion cannot be expressed. To emphasize that the first and fourth reporting standards must be read together, the Board is including the fourth standard of reporting in the final amendment to AU sec. 410. However, as proposed, the prior statement on the meaning of "generally accepted accounting principles" has been deleted from AU sec. 410.02.

(footnote continued)

of public companies, it should adopt alternative numbering/referencing schemes in order to reduce confusion between its interim standards and the AICPA standards. The Board is considering these comments as it seeks to make continuous improvements to its standard-setting and other programs.

AU sec. 411, The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles

The Board proposed to delete AU sec. 411.02, which was a detailed description of GAAP, and AU secs. 411.05, .07 and .09-.15, which described the application of the GAAP hierarchy. The Board proposed to replace the description of GAAP in AU 411.02, with a statement that GAAP refers "to the accounting principles recognized in the standards of the Financial Accounting Standards Board or in the standards of any other standard-setting body recognized by the U.S. Securities and Exchange Commission."

However, commenters had concerns about the proposal. One commenter noted that the SEC might allow companies to file financial statement prepared in conformity with international financial reporting standards ("IFRS") but not recognize the International Accounting Standards Board, which issues IFRS, as a standard-setting body. Another commenter suggested that to avoid potential confusion by users, the Board should acknowledge that there are other sources of GAAP for entities other than public companies.

In response to these comments, the Board decided to modify its proposed amendment of AU 411. It deleted AU sec. 411.02, which described GAAP, and revised AU sec. 411.01 to indicate that the auditor should look to the requirements of the SEC for the company under audit to identify the accounting principles that are applicable to that company. This change should also clarify that the standard is focused only on the accounting principles that may be used for purposes of the federal securities laws. Other accounting principles may apply to financial statements prepared for other purposes or by entities that are not issuers. The Board also modified AU 411.01 to better emphasize that standard's focus on the meaning of the phrase "present fairly."

Finally, as proposed, the Board eliminated AU secs. 411.16 and .17 which set an effective date and transition requirements that are no longer applicable.

AU sec. 420, Consistency of Application of Generally Accepted Accounting Principles

AU sec. 420 has been superseded by Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*. However, some commenters suggested that parts of AU sec. 420 should have been incorporated into Auditing Standard No. 6. Commenters suggested that guidance on the objective of the consistency standard and the relationship of consistency and comparability, matters that may not affect consistency, and changes expected to have a material future effect provided useful direction.

The Board believes that it is unnecessary to include the preceding direction. The proposed standard clarified that the auditor's report should recognize only those matters that require recognition under the existing auditing standards—i.e., a change in accounting principle or the correction of a material misstatement. The Board does not believe it is necessary to list in a standard those matters that do not require recognition in the auditor's report. Also, the Board believes that paragraph 1 clearly describes the objective of the standard. Paragraph 2 makes it clear that the standard considers comparability to be between periods for the company under audit.

AU sec. 431, Adequacy of Disclosure in Financial Statements

AU sec. 431 describes the auditor's responsibilities for evaluating the adequacy of disclosures in the financial statements. The amendments address two technical matters relating to that section.

Footnote 1 to AU sec. 431.03 is not consistent with the SEC's independence rules regarding non-audit services and therefore has been eliminated.

AU sec. 431.04 is an application of the AICPA's *Code of Professional Conduct* regarding the disclosure of confidential client information. In 2003, when the Board adopted certain AICPA rules and ASB standards as interim Board standards, the Board did not adopt Rule 301. Consistent with that action, the proposed amendments would eliminate AU sec. 431.04.

Some commenters expressed concerns that the proposed elimination of AU sec. 431.04 would change the auditor's obligations, or reflected Board policy, regarding the use of confidential client information in connection with evaluating the adequacy of financial statement disclosures. Those commenters generally recognized the limited nature of AU sec. 431.04 and acknowledged that, since in 2003 the Board did not adopt Rule 301, removing a portion of the interim standards based on that rule was a conforming amendment. However, they were concerned that the Board's action might be construed as minimizing the auditor's responsibilities for maintaining the confidentiality of client information.

The Board is aware that many auditors have legal or professional obligations to maintain the confidentiality of client information. These requirements arise from the rules of state licensing authorities,[25] the rules of professional organizations such as the AICPA and the International Federation of Accountants, and the laws of some foreign jurisdictions. The Board's decision to omit Rule 301 from its interim standards was based on a determination that incorporation of that rule was not necessary to fulfill the Board's mandate under Section 103(a)(1) and (3) of the Sarbanes-Oxley Act. It did not reflect a decision that auditor confidentiality requirements imposed by other authorities were inappropriate. Similarly, in amending AU sec. 431, the Board seeks neither to modify nor to detract from existing confidentiality requirements.

Interpretations of the Auditing Standards in AU 400 Sections

The auditing interpretation in AU sec. 9420.52-.54 has been incorporated into Auditing Standard No. 6 and therefore has been eliminated, as proposed. The auditing interpretations in AU sec. 9411 and the remaining auditing interpretations in AU sec. 9420 are addressed by the accounting standards and therefore also have been eliminated as proposed.[26]

AU sec. 508, Reports on Audited Financial Statements

In general, the Board has adopted the amendments as proposed. The amendments have conformed this interim auditing standard to Auditing Standard No. 6 on evaluating consistency and the amendments to AU secs. 410 and 411, described above. For example, AU sec. 508.16 now specifically identifies the matters related to consistency of the company's financial statements that should be recognized in the auditor's report. Similarly, AU sec. 508.17A provides the requirements for evaluating consistency, that also is in paragraph 7 of Auditing Standard No. 6. AU secs. 508.17B and C, and AU sec. 508.18A provide separate requirements for reporting on changes in accounting principles and restatements, as discussed previously.

---

[25] For example, confidentiality requirements are included in the provisions of the Uniform Accountancy Act, which has been enacted in some form by many states.

[26] One commenter suggested that some of the auditing interpretations should be retained because the guidance is still relevant. The Board considered the view of this commenter but decided to eliminate the interpretations because other auditing standards provided the necessary direction regarding the matter addressed in the interpretation, the interpretation dealt with items not requiring recognition in the auditor's report, or the interpretation was related to an accounting consideration of the company.

In addition, the amendments eliminate AU sec. 508.14-.15. Those paragraphs were an application of AICPA Ethics Rule 203, which, as previously noted, was not adopted as an interim standard by the Board.[27]

Finally, in light of the definitions in SFAS No. 154, the amendments change references to "restatements" to the more general term "adjustments" to refer broadly to changes to previously issued financial statements that may result from either a correction of a misstatement or a change in accounting principle.[28]

References to APB Opinion No. 20

In addition, the Board has adopted other amendments to update references to APB Opinion No. 20, which was superseded by SFAS No. 154. Accordingly the Board amended AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, footnote 3 to paragraph .06, to reference paragraphs 25 and 26 of SFAS No. 154. For AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, footnote 4 to paragraph .19, the Board referenced paragraph 20 of SFAS No. 157, *Fair Value Measurements*, which states that a change in valuation technique or its application is appropriate if the change results in a measurement that is equally or more representative of fair value in the circumstances. This replaces a reference to the preferability requirement in SFAS No. 157 because that requirement does not apply to a change in a company's method for determining fair value. Paragraph 20 is the accounting guidance applicable to a company's change in method for determining fair value.

E. Effective Date

This standard and amendments will be effective 60 days after approval by the SEC.

* * *

On the 29th day of January, in the year 2008, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.
/s/ J. Gordon Seymour
J. Gordon Seymour
Secretary

January 29, 2008

---

[27] One commenter expressed concern about deleting these paragraphs and suggested that, if the Board's intent was to delete all reference to the AICPA Code of Professional Conduct from the Board's interim standards, the Board should indicate the professional ethics that auditors should follow when conducting audits according to PCAOB standards. The Board's Rules 3500T and 3600T describe the Board's interim ethics and independence standards, respectively. These standards include certain provisions from the AICPA's Code of Professional Conduct. In addition, the Board has adopted ethics and independence rules concerning independence, tax services, and contingent fees. See PCAOB Release No. 2005-014 (July 26, 2005). State law and membership organizations may impose additional requirements.

[28] Some commenters suggested that certain other changes were needed to AU sec. 508 or that certain amendments were not necessary. For example, some commenters suggested eliminating AU sec. 508.57 and retaining the original terminology in AU secs. 508.73-.74. The Board decided that some of the suggested changes would change existing practice, such as the elimination of AU sec. 508.57, and were outside the scope of this project. For the others, the Board concluded that the amendments were consistent with the direction in Auditing Standard No. 6. In addition, one commenter believed that there were inconsistencies between the proposed amendments to AU sec. 508 and Staff Questions and Answers, *Adjustments to Prior-Period Financial Statements Audited By a Predecessor Auditor*. However, the Board reviewed the Staff Questions and Answers and did not agree that there were inconsistencies with the proposed amendments to AU sec. 508.

APPENDICES—

1. Auditing Standard No. 6—*Evaluating Consistency of Financial Statements*
2. Amendments to Interim Auditing Standards

Appendix 1

Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*

[Supersedes AU secs. 420 and 9420]

Consistency and the Auditor's Report on Financial Statements

1. This standard establishes requirements and provides direction for the auditor's evaluation of the consistency of the financial statements, including changes to previously issued financial statements, and the effect of that evaluation on the auditor's report on the financial statements.

2. To identify consistency matters that might affect the report, the auditor should evaluate whether the comparability of the financial statements between periods has been materially affected by changes in accounting principles or by material adjustments to previously issued financial statements for the relevant periods.

3. The periods covered in the auditor's evaluation of consistency depend on the periods covered by the auditor's report on the financial statements. When the auditor reports only on the current period, he or she should evaluate whether the current-period financial statements are consistent with those of the preceding period. When the auditor reports on two or more periods, he or she should evaluate consistency between such periods and the consistency of such periods with the period prior thereto if such prior period is presented with the financial statements being reported upon.[1] The auditor also should evaluate whether the financial statements for periods described in this paragraph are consistent with previously issued financial statements for the respective periods.[2]

> Note: The term "current period" means the most recent year, or period of less than one year, upon which the auditor is reporting.

4. The auditor should recognize the following matters relating to the consistency of the company's financial statements in the auditor's report if those matters have a material effect on the financial statements:

---

[1] For example, assume that a company presents comparative financial statements covering three years and has a change in auditors. In the first year in which the successor auditor reports, the successor auditor evaluates consistency between the year on which he or she reports and the immediately preceding year. In the second year in which the successor auditor reports, the successor auditor would evaluate consistency between the two years on which he or she reports and between those years and the earliest year presented.

[2] When a company uses retrospective application, as defined in Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections* ("SFAS No. 154"), to account for a change in accounting principle, the financial statements presented generally will be consistent. However, the previous years' financial statements presented with the current year's financial statements will reflect the change in accounting principle and, therefore, will appear different from those previous years' financial statements on which the auditor previously reported. This standard clarifies that the auditor's evaluation of consistency should encompass previously issued financial statements for the relevant periods.

a. A change in accounting principle
b. An adjustment to correct a misstatement in previously issued financial statements.[3]

Change in Accounting Principle

5. A change in accounting principle is a change from one generally accepted accounting principle to another generally accepted accounting principle when (1) there are two or more generally accepted accounting principles that apply, or when (2) the accounting principle formerly used is no longer generally accepted. A change in the method of applying an accounting principle also is considered a change in accounting principle.[4]

Note: A change from an accounting principle that is not generally accepted to one that is generally accepted is a correction of a misstatement.

6. The auditor should evaluate and report on a change in accounting estimate effected by a change in accounting principle like other changes in accounting principle.[5] In addition, the auditor should recognize a change in the reporting entity[6] by including an explanatory paragraph in the auditor's report, unless the change in reporting entity results from a transaction or event. A change in reporting entity that results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit does not require recognition in the auditor's report.

7. The auditor should evaluate a change in accounting principle to determine whether –

a. The newly adopted accounting principle is a generally accepted accounting principle,
b. The method of accounting for the effect of the change is in conformity with generally accepted accounting principles,
c. The disclosures related to the accounting change are adequate,[7] and
d. The company has justified that the alternative accounting principle is preferable.[8]

8. A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements. If the auditor concludes that the criteria in paragraph 7

---

[3] The term "error," as used in SFAS No. 154, is equivalent to "misstatement," as used in the auditing standards.

[4] See SFAS No. 154, paragraph 2c.

[5] SFAS No. 154, paragraph 2e, defines a "change in accounting estimate effected by a change in accounting principle" as "a change in accounting estimate that is inseparable from the effect of a related change in accounting principle."

[6] "Change in reporting entity" is a change that results in financial statements that, in effect, are those of a different reporting entity. See SFAS No. 154, paragraph 2f.

[7] Newly issued accounting pronouncements usually set forth the method of accounting for the effects of a change in accounting principle and the related disclosures. SFAS No. 154 sets forth the method of accounting for the change and the related disclosures when there are no specific requirements in the new accounting pronouncement.

[8] The issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle, as long as the change in accounting principle is made in accordance with the hierarchy of generally accepted accounting principles. See SFAS No. 154, paragraph 14.

have been met, the auditor should add an explanatory paragraph to the auditor's report, as described in AU sec. 508, *Reports on Audited Financial Statements*. If those criteria are not met, the auditor should treat this accounting change as a departure from generally accepted accounting principles and address the matter as described in AU sec. 508.

Note: If a company's financial statements contain an investment accounted for by the equity method, the auditor's evaluation of consistency should include consideration of the investee. If the investee makes a change in accounting principle that is material to the investing company's financial statements, the auditor should add an explanatory paragraph (following the opinion paragraph) to the auditor's report, as described in AU sec. 508.

Correction of a Material Misstatement in Previously Issued Financial Statements

9. The correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph, as described in AU sec. 508.

10. The accounting pronouncements generally require certain disclosures relating to restatements to correct misstatements in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the inadequacy of disclosure as described in AU sec. 431, *Adequacy of Disclosure in Financial Statements*, and AU sec. 508.

Change in Classification

11. Changes in classification in previously issued financial statements do not require recognition in the auditor's report, unless the change represents the correction of a material misstatement or a change in accounting principle. Accordingly, the auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change also is a change in accounting principle or a correction of a material misstatement. For example, certain reclassifications in previously issued financial statements, such as reclassifications of debt from long-term to short-term or reclassifications of cash flows from the operating activities category to the financing activities category, might occur because those items were incorrectly classified in the previously issued financial statements. In such situations, the reclassification also is the correction of a misstatement. If the auditor determines that the reclassification is a change in accounting principle, he or she should address the matter as described in paragraphs 7 and 8 and AU sec. 508. If the auditor determines that the reclassification is a correction of a material misstatement in previously issued financial statements, he or she should address the matter as described in paragraphs 9 and 10 and AU sec. 508.

Appendix 2

Amendments to Interim Auditing Standards

The following amendments relate to the standards and auditing interpretations in AU sec. 328, the AU 400s sections, AU sec. 508, and AU sec. 561 of the Board's auditing standards.

Auditing Standards

AU sec. 328, "Auditing Fair Value Measurements and Disclosures"

Statement on Auditing Standards ("SAS") No. 101, "Auditing Fair Value Measurements and Disclosures," (AU sec. 328, "Auditing Fair Value Measurements and Disclosures"), as amended, is amended as follows:

a. The text of footnote 4 to paragraph .19 is replaced with the following:

> Statement of Financial Accounting Standard No. 157, *Fair Value Measurements*, states that a change in valuation technique or its application is appropriate if the change results in a measurement that is equally or more representative of fair value in the circumstances.

AU sec. 410, "Adherence to Generally Accepted Accounting Principles"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 410 (AU sec. 410, "Adherence to Generally Accepted Accounting Principles"), as amended, is amended as follows:

a. Paragraph .02 is replaced with following paragraph, and the reference to footnote 1 is moved to the end of the new paragraph .02.

The fourth standard of reporting is:

> The report shall either contain an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking.

AU sec. 411, "The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*"

SAS No. 69, "The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*" (AU sec. 411, "The Meaning of *Present Fairly in*

Conformity With Generally Accepted Accounting Principles"), as amended, is amended as follows:

a. The third sentence of paragraph .01 is replaced with the following:

> The purpose of this section is to explain the meaning of "present fairly" as used in the phrase "present fairly . . . in conformity with generally accepted accounting principles." In applying this section, the auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

b. Paragraphs .02, .05, .07, and .09–.18 are deleted.

AU sec. 9411, "The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*, Auditing Interpretations of Section 411"

Auditing Interpretation No. 3, "The Auditor's Consideration of Management's Adoption of Accounting Principles for New Transactions or Events" of the auditing interpretations of AU sec. 411 (AU sec. 9411.11–.15) is deleted.

AU sec. 420, "Consistency of Application of Generally Accepted Accounting Principles," and AU sec. 9420, "Consistency of Application of Generally Accepted Accounting Principles, Auditing Interpretations of Section 420"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 420 (AU sec. 420, "Consistency of Application of Generally Accepted Accounting Principles"), as amended, and the related auditing interpretations (AU sec. 9420) are superseded by PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*.

AU sec. 431, "Adequacy of Disclosure in Financial Statements"

SAS No. 32, "Adequacy of Disclosure in Financial Statements" (AU sec. 431, "Adequacy of Disclosure in Financial Statements") is amended as follows:

a. Footnote 1 is deleted.

b. Paragraph .04 is deleted.

AU sec. 508, "Reports on Audited Financial Statements"

SAS No. 58, "Reports on Audited Financial Statements" (AU sec. 508, "Reports on Audited Financial Statements"), as amended, is amended as follows:

a. In Paragraph .03, footnote 2 is deleted.

b. In Paragraph .11, item .11b is deleted; item .11c is reordered as .11b; .11d is reordered as .11c; the paragraph references in .11c (formerly .11d) to paragraphs .16 through .18 are replaced with paragraph references .17A through .17E; and a new item .11d is added as follows:

> "A material misstatement in previously issued financial statements has been corrected (paragraphs .18A through .18C)."

c. Paragraphs .14–.15 are deleted, along with the preceding heading "Departure From a Promulgated Accounting Principle," and the note following the paragraph.

d. The text of paragraph .16 is replaced with the following:

> The auditor should recognize the following matters relating to the consistency of the company's financial statements in the auditor's report if those matters have a material effect on the financial statements:
>
> a. A change in accounting principle
>
> b. An adjustment to correct a misstatement in previously issued financial statements

e. Paragraphs .17–.18 and related footnotes 12 and 13 are replaced with the following:

Change in Accounting Principle

.17A As discussed in PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*, the auditor should evaluate a change in accounting principle to determine whether (1) the newly adopted accounting principle is a generally accepted accounting principle, (2) the method of accounting for the effect of the change is in conformity with generally accepted accounting principles, (3) the disclosures related to the accounting change are adequate, and (4) the company has justified that the alternative accounting principle is preferable.[12] A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph following the opinion paragraph. If the auditor concludes that the criteria in this paragraph have been met, the explanatory paragraph in the auditor's report should include identification of the nature of the change and a reference to the note disclosure describing the change.

[12] The issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle, as long as the change in accounting principle is made in accordance with the hierarchy of generally accepted accounting principles. See FASB Statement 154, paragraph 14.

.17B Following is an example of an explanatory paragraph for a change in accounting principle resulting from the adoption of a new accounting pronouncement:

> As discussed in Note X to the financial statements, the company has changed its method of accounting for [*describe accounting method change*] in [*year(s) of financial statements that reflect the accounting method change*] due to the adoption of [*name of accounting pronouncement*].

.17C Following is an example of an explanatory paragraph when the company has made a change in accounting principle other than a change due to the adoption of a new accounting pronouncement.

As discussed in Note X to the financial statements, the company has elected to change its method of accounting for [*describe accounting method change*] in [*year(s) of financial statements that reflect the accounting method change*].

.17D The explanatory paragraph relating to a change in accounting principle should be included in reports on financial statements in the year of the change and in subsequent years until the new accounting principle is applied in all periods presented. If the accounting change is accounted for by retrospective application to the financial statements of all prior periods presented, the additional paragraph is needed only in the year of the change.

.17E If the auditor concludes that the criteria in paragraph .17A for a change in accounting principle are not met, the auditor should consider the matter to be a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, issue a qualified or adverse opinion.

Correction of a Material Misstatement in Previously Issued Financial Statements

.18A Correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph following the opinion paragraph.[13] The explanatory paragraph should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the company's disclosure of the correction of the misstatement. Following is an example of an appropriate explanatory paragraph when there has been a correction of a material misstatement in previously issued financial statements.

As discussed in Note X to the financial statements, the 20X2 financial statements have been restated to correct a misstatement.

[13] The directions in paragraphs .68-.69 apply when comparative financial statements are presented and the opinion on the prior-period financial statements differs from the opinion previously expressed.

.18B This type of explanatory paragraph in the auditor's report should be included in reports on financial statements when the related financial statements are restated to correct the prior material misstatement. The paragraph need not be repeated in subsequent years.

.18C The accounting pronouncements generally require certain disclosures relating to restatements to correct a misstatement in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the lack of disclosure as discussed beginning at paragraph .41 and in AU sec. 431.

f. Paragraph .50 is deleted.

g. The text of paragraph .51 is replaced with the following:

Departures from generally accepted accounting principles related to changes in accounting principle. Paragraph .17A states the criteria for evaluating a

change in accounting principle. If the auditor concludes that the criteria have not been met, he or she should consider that circumstance to be a departure from generally accepted accounting principles and, if the effect of the accounting change is material, should issue a qualified or adverse opinion.

h. In paragraph .52:

- The first three sentences of the paragraph are replaced with the following:

  The accounting standards indicate that a company may make a change in accounting principle only if it justifies that the allowable alternative accounting principle is preferable. If the company does not provide reasonable justification that the alternative accounting principle is preferable, the auditor should consider the accounting change to be a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, should issue a qualified or adverse opinion. The following is an example of a report qualified because a company did not provide reasonable justification that an alternative accounting principle is preferable:

- In the second sentence of the first paragraph of the example report, the phrase "for making this change" is replaced with the phrase "that this accounting principle is preferable."

  In the text of footnote 17, the first two sentences are deleted; the word, "However" is deleted at the beginning of the third sentence; the word "because" at the beginning of the third sentence is capitalized; the phrase "the middle paragraph" is replaced with "this paragraph;" and the references to paragraphs ".16 through .18" are replaced with references to paragraphs "17A through 17E."

i. The text of paragraph .57 is replaced with the following:

   If the auditor issues a qualified or adverse opinion because the company has not justified that an allowable accounting principle adopted in an accounting change is preferable, as described in paragraph .52, the auditor should continue to express that opinion on the financial statements for the year of change as long as those financial statements are presented and reported on. However, the auditor's qualified or adverse opinion relates only to the accounting change and does not affect the status of a newly adopted principle as a generally accepted accounting principle. Accordingly, while expressing a qualified or adverse opinion for the year of change, the independent auditor's opinion regarding the subsequent years' statements need not express a qualified or adverse opinion on the use of the newly adopted principle in subsequent periods.

j. In the text of footnote 19 to paragraph .59, "(b)" is added to the beginning of the list of subsections.

k. The first sentence of footnote 20 to paragraph .62 is deleted.

l. In the second sentence of footnote 25 to paragraph .67, replace the phrase "section 420, *Consistency of Application of Generally Accepted Accounting Principles*," with the phrase "PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*"

m. In the second sentence of paragraph .69:

- Item (c) is inserted as follows:

  (c) if applicable, a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period,
- Item (c) is changed to (d)
- Item (e) is inserted as follows:

  (e) if applicable, a reference to the company's disclosure of the correction of the misstatement,
- Item (d) is changed to (f) and the words "the fact" are inserted at the beginning of the item

n. In the third sentence of paragraph .73, the word "restated" is replaced with the word "adjusted."

q. In paragraph .74:

- In the first sentence of the third text paragraph, the word "restated" is replaced with the word "adjusted," and the word "restatement" is replaced with the words "the adjustments."
- In the second sentence of the third text paragraph, the word "restatement" is deleted, and the word "his" is replaced with the words "the auditor's."

AU sec. 561, "Subsequent Discovery of Facts Existing at the Date of the Auditor's Report"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 561, "Subsequent Discovery of Facts Existing at the Date of Report," as amended, is amended as follows:

a. The text of footnote 3 to paragraph .06 is replaced with the following:

> See paragraphs 26 and 27 of Accounting Principles Board Opinion No. 9 and paragraphs 25 and 26 of FASB Statement No. 154, regarding disclosure of adjustments applicable to prior periods.

PCAOB Release No. 2008-003

Ethics and Independence Rule 3526, Communication With Audit Committees Concerning Independence, *Amendment to Interim Independence Standards, Amendment to Rule 3523,* Tax Services for Persons in Financial Reporting Oversight Roles, *Implementation Schedule for Rule 3523*

PCAOB Release No. 2008-003
April 22, 2008
PCAOB Rulemaking
Docket Matter No. 017

Summary: The Public Company Accounting Oversight Board ("PCAOB" or "Board") is adopting an ethics and independence rule, Rule 3526, *Communication with Audit Committees Concerning Independence,* that will supersede the Board's interim independence requirement, *Independence Standards Board Standard No. 1, Independence Discussions with Audit Committees* ("ISB No. 1"), and two related interpretations. The Board is also adopting an amendment to Rule 3523, *Tax Services for Persons in Financial Reporting Oversight Roles,* and further adjusting the implementation schedule for Rule 3523 as it applies to tax services provided during the audit period. Specifically, amended Rule 3523 will not prohibit tax services provided during the portion of the audit period that precedes the beginning of the professional engagement period. In order to maintain the status quo while the SEC considers this amendment, the Board has further delayed the implementation of the prohibition against pre-engagement period tax services to persons in financial reporting oversight roles in existing Rule 3523 until December 31, 2008. The amendment to Rule 3523 will become effective immediately upon approval by the SEC, and Rule 3526 will become effective on the later of September 30, 2008, or 30 days after the date the SEC approves the rule.

Board Contacts: Bella Rivshin, Associate Chief Auditor (202/207-9180; rivshinb@pcaobus.org), or Greg Scates, Deputy Chief Auditor (202/207-9114; scatesg@pcaobus.org).

I. Introduction

On July 26, 2005, the Public Company Accounting Oversight Board ("PCAOB" or "Board") adopted certain rules related to registered public accounting firms' provision of tax services to public company audit clients. As part of this rulemaking, the Board adopted Rule 3523, which provides that a registered firm, subject to certain exceptions, is not independent of an audit client if the firm, or an affiliate of the firm, provides tax services during the audit and professional engagement period to a person in, or an immediate family member of a

person in, a financial reporting oversight role ("FROR") at an audit client. Rule 3523 was intended to address concerns related to auditor independence when auditors provide personal tax services to individuals who play a direct role in preparing the financial statements of public company audit clients. Rule 3523 was approved by the Securities and Exchange Commission ("SEC" or "Commission") on April 19, 2006.

On April 3, 2007, the Board issued a concept release to solicit comment about the possible effects on a registered firm's independence of providing tax services to a person covered by Rule 3523 during the portion of the audit period that precedes the beginning of the professional engagement period and other practical consequences of applying the restrictions imposed by Rule 3523 to that portion of the audit period.[1] With a few exceptions, commenters on that release recommended that the Board amend Rule 3523 to exclude that portion of the audit period.

After considering the comments received, on July 24, 2007, the Board proposed to amend Rule 3523 as described in the concept release.[2] At the same time, the Board also proposed Rule 3526, *Communication with Audit Committees Concerning Independence*, a new ethics and independence rule that would supersede *Independence Standards Board Standard No. 1, Independence Discussions with Audit Committees* ("ISB No. 1"), and two related interpretations, and require a registered public accounting firm to communicate certain information related to the firm's independence to the issuer's audit committee.

The Board received 16 comment letters on the proposed rules. Overall, the commenters were supportive of proposed Rule 3526 and the proposed amendment to Rule 3523. Commenters generally agreed that proposed Rule 3526 would enhance communication between the auditor and the audit committee and recommended that the Board adopt the rule. Commenters also reiterated that they believed that an auditor's independence would not be impaired by the provision of tax services to a person in a FROR during the portion of the audit period that precedes the beginning of the professional engagement period, and that the Board should adopt the proposed amendment to Rule 3523. Commenters also suggested certain modifications to the proposed rules.

The Board is adopting proposed Rule 3526 and the proposed amendment to Rule 3523 with some modifications in response to comments. This release describes key aspects of the amendment and new rule, comments received, and changes incorporated in the final rules. Additionally, as described below, the Board is further adjusting the implementation schedule for Rule 3523, as it applies to tax services provided to persons in FRORs during the period subject to audit but before the professional engagement period begins, to allow sufficient time for the SEC to consider whether to approve the amendment to the rule.

II. Rule 3526. Communication With Audit Committees Concerning Independence

Under Section 301 of the Sarbanes-Oxley Act of 2002 ("the Act"), "[t]he audit committee of each issuer, in its capacity as a committee of the board of directors, shall be directly responsible for the appointment, compensation, and oversight of the work of any registered public accounting firm employed by that issuer...for

---

[1] See PCAOB Release No. 2007-002 (April 3, 2007). Because the Board has adjusted the implementation schedule for Rule 3523, the rule has not prohibited the provision of tax services to persons in FRORs during the portion of the audit period that precedes the beginning of the professional engagement period.

[2] See PCAOB Release No. 2007-008 (July 24, 2007).

the purpose of preparing or issuing an audit report or related work...."[3] PCAOB interim independence standards require the auditor to provide certain information to the audit committee about independence that could assist the audit committee in fulfilling these oversight responsibilities. Specifically, ISB No. 1 requires, among other things, firms to disclose at least annually to the audit committee all relationships between the auditor and its related entities and the company and its related entities that, in the auditor's professional judgment, may reasonably be thought to bear on the auditor's independence. ISB No. 1 does not, however, require the firm to provide information to the audit committee about the firm's independence in connection with *becoming* the issuer's auditor (i.e., *before* the person or firm becomes the issuer's auditor).

As discussed in the proposing release, the Board proposed Rule 3526 because it believed that the accounting firm should discuss with the audit committee before accepting an initial engagement pursuant to the standards of the PCAOB any relationships the accounting firm has with the issuer that may reasonably be thought to bear on its independence. The proposed rule was intended to build on the communication requirements in ISB No. 1 and provide the audit committee with information—including information about the firm's relationships with persons in FRORs at the company—that may be important to its determination about whether to hire the firm as the company's auditor. The Board also proposed to include in the rule a new requirement for the firm to document the substance of its discussion with the audit committee.

All commenters were generally in favor of the Board adopting the proposed rule, and, as discussed more fully below, some recommended modifications. Commenters stated that Rule 3526 would assist audit committees in fulfilling their responsibilities and would aid them in their decision making process. After carefully considering the comments, the Board is adopting Rule 3526 with one modification, as described below. If approved by the SEC, Rule 3526 will supersede ISB No. 1 and two related interpretations.[4]

A. Scope of the Required Communication

The Board proposed in Rule 3526(a) to require the registered firm, prior to accepting an initial engagement pursuant to the standards of the PCAOB, to

---

[3] The SEC has implemented this provision by adopting rules directing the national securities exchanges and national securities associations to prohibit the listing of any security of an issuer that is not in compliance with the audit committee requirements mandated by the Act.

[4] ISB Interpretation 00-1, The Applicability of ISB Standard No. 1 When "Secondary Auditors" Are Involved in the Audit of a Registrant, and ISB Interpretation 00-2, *The Applicability of ISB Standard No. 1 When "Secondary Auditors" Are Involved in the Audit of a Registrant, An Amendment of Interpretation 00-1*. The interpretations state that the responsibility to comply with ISB No. 1 rests solely with the primary auditor, but that the primary auditor should include in its report to the audit committee all of its relationships and those of its domestic and foreign associated firms that could reasonably bear on the independence of the primary auditor. Under these interpretations, if the primary auditor is relying on the work of secondary auditors not associated with the primary auditor's firm, the report of the primary auditor should either describe any such secondary auditors' relationships, or it should state that it does not do so. The treatment of secondary auditors under Rule 3526 will be similar to the treatment of secondary auditors under ISB No. 1 and the two interpretations. Secondary auditors will not need to comply with Rule 3526, but the primary auditor will need to disclose to the audit committee any relationships of the firm's affiliates that could reasonably be thought to bear on the independence of the primary auditor. As under ISB No. 1 and the related interpretations, the scope of any communications about secondary auditors under Rule 3526 should be clear to the audit committee. Accordingly, the Board expects the primary auditor's report to either include any covered relationships of any secondary auditors not affiliated with the firm or state that it does not do so. One commenter recommended that the Board consider providing an exemption for secondary auditors. Because the rule does not require communications by secondary auditors, an exemption is not necessary.

describe in writing to the audit committee[5] all relationships between the accounting firm or any affiliates of the firm[6] and the potential audit client or persons in FRORs at the potential audit client that may reasonably be thought to bear on independence. The Board also proposed to require the firm to discuss with the audit committee the potential effects of those relationships on the firm's independence. In Rule 3526(b), the Board proposed to require a registered firm on at least an annual basis after becoming the issuer's auditor to provide the same information described above and also affirm to the audit committee of the issuer, in writing, that the firm is independent in compliance with Rule 3520, *Auditor Independence*.[7] As described in the proposing release, the Board intended for these communications to provide the audit committee with sufficient information to understand how a particular relationship might affect independence and to foster a robust discussion between the firm and the audit committee.

Commenters generally believed that the scope of the required communications was appropriate. Several commenters noted that, to a large extent, firms are already making the kinds of communications that would be required by proposed Rule 3526. One commenter acknowledged, however, that existing communications between the firm and a potential new audit client do not include the disclosure of tax services to a person in a FROR or his or her immediate family member. Additionally, some registered firms noted that communications regarding the auditor's independence currently vary in content and timing and may, in some instances, occur only orally.

Most commenters did not believe that it was necessary for the Board to expand the scope of the required communication to include any additional matters. One commenter, however, recommended requiring the firm to confirm its independence in writing to the audit committee prior to accepting an initial engagement. Another commenter recommended revising Rule 3526(a) to require the firm to make the communications in its initial proposal to the company's audit committee. As discussed above, the Board proposed to require firms to affirm their independence annually but did not propose a similar requirement that would apply before the firm is initially engaged as the company's auditor. Rule 3526(a) requires registered firms to make certain communications about relationships that may reasonably be thought to bear on independence before accepting an initial engagement pursuant to the standards of the PCAOB. Rather than prescribing a particular time before that point when the communications must occur, however, the rule allows registered firms and audit committees the flexibility to make that determination. The Board understands that, in some cases, firms need time before a new engagement begins to resolve any matters

---

[5] One commenter recommended the Board provide guidance in situations in which an issuer does not have an audit committee. Under Section 2(a)(3) of the Act, "[t]he term 'audit committee' means – (A) a committee (or equivalent body) established by and amongst the board of directors of an issuer for the purpose of overseeing the accounting and financial reporting processes of the issuer and audits of the financial statements of the issuer; and (B) if no such committee exists with respect to an issuer, the entire board of directors of the issuer." Accordingly, under Rule 3526, if an audit client does not have an audit committee, the auditor would be required to make the communications to the entire board of directors.Additionally, one commenter recommended that audit committees provide better disclosure, through the proxy, when approving non-audit services performed by the auditor. The commenter stated that providing this type of transparency will permit investors a greater ability to evaluate audit committee's fiduciary performance of shareholders. The Board does not have statutory authority to require disclosure by audit committees.

[6] One commenter recommended that the Board adopt a definition of affiliate of the firm. This term is already defined in Rule 3501.

[7] Rule 3520 states that a registered public accounting firm and its associated persons must be independent of the firm's audit client throughout the audit and professional engagement period.

that could impair their independence. If a firm were required to affirm its independence prior to accepting a new engagement, it would need to wait until it has resolved any independence issues to make the required communications. These communications are intended to assist the audit committee in fulfilling its responsibility to hire the auditor—their usefulness for that purpose may diminish if they are left until immediately before the engagement begins. Accordingly, the Board does not believe a requirement for auditors to affirm that they are independent before accepting a new engagement is appropriate.

Other commenters recommended certain exclusions from the scope of the required communications. For example, one commenter asserted that the auditor cannot be expected to know about all relationships that may reasonably be thought to bear on its independence, and recommended that the written communication to the audit committee state that the auditor's assessment is based on information provided to the auditor by the issuer. The Board does not believe that allowing auditors to include such a limitation in the communication would be appropriate. Complying with the Board's independence requirements is the responsibility of the auditor.[8] To fulfill this responsibility, as well as their related responsibility under the SEC's independence rules, auditors need to ascertain what relationships with the issuer and persons in FRORs at the issuer may reasonably be thought to bear on their independence. Moreover, some of the information the auditor must assess in order to assure its independence and that may need to be communicated under Rule 3526—such as the firm's or its associated persons' financial interests in the audit client—can be more readily obtained by the auditor than its audit client.

Another commenter recommended that the Board exclude tax services to a person in a FROR from the required communications because the commenter believed that compliance with Rule 3523, as amended, should adequately address any independence concerns regarding such services. As discussed in the proposing release, Rule 3526 is intended to require disclosure of not only whether the firm provided any specifically prohibited services or maintained any specifically prohibited relationships, but also whether any of the firm's relationships or services may reasonably be thought to bear on independence under the SEC's general standard of auditor independence[9] and AU sec. 220, *Independence*.[10] Because auditors will need to consider the relevant facts and circumstances

---

[8] Another commenter suggested that the audit committee should be able to rely on the firm to determine and resolve any independence issues, and that a requirement for the auditor to discuss these matters with the audit committee would increase the responsibilities of the audit committee with respect to independence. This commenter recommended that the Board not adopt these requirements. As discussed above, the rule is intended to provide audit committees with information to assist them in carrying out their responsibilities to oversee the audit engagement, but auditors remain responsible for complying with the independence requirements. Nothing in the rule adds to, or otherwise modifies, the responsibilities of the audit committee.

[9] 17 C.F.R. § 210.2-01(b). Under that standard, an accountant is not independent if "the accountant is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the accountant is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement." In considering this general standard, the SEC "looks in the first instance to whether a relationship or the provision of service: creates a mutual or conflicting interest between the accountant and the audit client; places the accountant in the position of auditing his or her own work; results in the accountant acting as management or an employee of the audit client; or places the accountant in a position of being an advocate for the audit client." 17 C.F.R. § 210.2-01, preliminary note.

[10] AU sec. 220, *Independence*, requires that "[i]n all matters relating to theassignment, an independence in mental attitude is to be maintained by the auditor..." AU sec. 220 notes that "[i]t is of utmost importance to the profession that the general public maintain confidence in the independence of independent auditors" and that public confidence in the auditor's independence "would be impaired by evidence that independence was actually lacking, and it might also be impaired by the existence of circumstances which reasonable people might believe likely to influence independence."

in order to make such a determination, the Board does not believe that *per se* exemptions are appropriate.

Some commenters suggested that, in certain circumstances, firms would be restricted in the information they could provide to the audit committee about relationships with persons in FRORs due to legal limitations imposed by confidentiality and privacy laws. Specifically, one commenter was concerned that the auditor would not be able to disclose to the audit committee information about tax services rendered to a person in a FROR prior to obtaining a consent from that person. Another commenter recommended that the Board address the need for obtaining such a consent in its final release, while another recommended that the Board provide an exemption in circumstances where applicable legal restrictions impede an auditor's ability to comply fully with the disclosure requirement.

Under ISB No. 1, auditors have been required to disclose to the audit committee relationships with the company and its related entities and to discuss the auditor's independence with the audit committee. Accordingly, the required communications could include discussion of tax or other services provided to an entity or person other than the company itself. The Board understands that firms are subject to certain confidentiality requirements in the tax context[11] and that other restrictions could arise outside of that context, depending on the facts and circumstances that a particular relationship presents. The Board is not, however, aware that firms have encountered difficulty in communicating with audit committees, as required by ISB No. 1 or any other professional practice standard, as a result of such privacy requirements.

As described above, Rule 3526 is a general requirement that, like ISB No. 1, requires disclosure of certain relationships that may be relevant to the audit committee's oversight of the engagement. It does not set forth a list of relationships that must always be disclosed or mandate specific information that must be communicated when disclosure is required. Rather, Rule 3526 allows firms significant flexibility to determine how to comply with the requirements to describe a covered relationship and discuss the potential effects of that relationship on the firm's independence. Accordingly, while the Board will monitor the application of the rule in this regard, it does not believe that the recommended exception is necessary or appropriate at this time.

The Board also received several comments on its proposal not to include the words "in the auditor's professional judgment" in the rule's description of the scope of the required communications. ISB No. 1 requires disclosure of certain relationships that "in the auditor's professional judgment may reasonably be thought to bear on independence." In the proposing release, the Board explained that it believed that omitting the reference to the auditor's professional judgment would clarify the requirement by reminding auditors of the need to focus on the perceptions of reasonable third parties when making independence determinations. Some commenters supported the proposed exclusion of the words "in the auditor's professional judgment" from Rule 3526. Other commenters, however, believed that the absence of the reference to judgment could confuse, rather than clarify, the requirement and noted that it is reasonable and appropriate for audit committees to rely on the accounting firm's judgment as to what matters should be disclosed. One of these commenters contended that this aspect of the Board's proposal is inconsistent with the Board's recent

---

[11] See 26 U.S.C. § 7216; 26 C.F.R. § 301.7216-3 (prohibiting disclosure or use of tax return information without written consent of taxpayer that meets specified requirements); 26 C.F.R. § 301.7216-1 (defining "tax return information" to mean "any information, including, but not limited to a taxpayer's name, address, or identifying number, which is furnished in any form or manner for, or in connection with, the preparation of a tax return of the taxpayer").

focus on the importance of the use of auditor judgment. Conversely, one commenter did not object to the absence of a reference to judgment, provided that the adopting release contain an acknowledgement that the auditor must apply judgment in determining which matters are required to be communicated to the audit committee.[12]

As the Board explained in the proposing release, auditors will need to apply judgment to determine whether a relationship may reasonably be thought to bear on independence. After considering commenters' views, the Board continues to believe that adding specific reference to the auditor's professional judgment is unnecessary and inappropriate in this instance. While the Board agrees that auditors must exercise sound judgment in carrying out their responsibilities, it does not believe that specific reference to judgment in this rule is necessary to encourage auditors to do so. Judgment is called for in applying any reasonableness standard to particular facts and circumstances, and Rule 3526 is no different. Determining what relationships may reasonably be thought to bear on independence requires consideration of how a third party—not the auditor—would view the relationship, which is consistent with the SEC's general standard of auditor independence and AU sec. 220. A reference to "in the auditor's professional judgment" could suggest otherwise, however, and therefore could discourage the necessary analysis. Accordingly, the Board has determined not to add the phrase to Rule 3526.

B. Time Period Covered by Rule 3526(a)

In the proposing release, the Board solicited comment on whether the initial communication in Rule 3526(a) should be limited to relationships that existed during a particular period, and, if so, how long that period should be. Commenters provided a wide variety of recommendations in this area. Some commenters stated that the initial communication should not be limited to relationships that existed during a particular period. Some of these commenters noted that establishing a specific period could result in arbitrary exclusion of certain relationships and recommended that the audit committee and auditor be responsible for determining the relevant time frame.

Other commenters recommended that the time period be limited to the audit and professional engagement period because, according to these commenters, the relevant relationships are those that exist currently or will continue to exist. One of these commenters stated that requiring communication of relationships that existed prior to this period would cause an unnecessary burden on the firm to identify and communicate these matters and on the audit committee to consider such information, because the firm was not subject to the auditor independence rules with respect to the audit client before the beginning of the audit and professional engagement period. One commenter recommended that the required time period should, at a minimum, be the audit period and that the rule should require auditors to consider communicating relationships that existed before that time. Finally, one commenter recommended that the time period should be no longer than two years prior to the commencement of the audit period, and two commenters recommended that the proposed rule should cover a time period of at least three years.

After considering these comments, the Board has determined that the initial communication required by Rule 3526(a) should not be limited to relationships

[12] Additionally, one commenter recommended including the reference to judgment and also referring to the SEC's general standard of auditor independence and the preliminary note to the SEC's independence rules in the proposed rule or the adopting release. Footnote 9 of this release refers to the general standard and the preliminary note.

that existed during a particular time period. While the Board agrees that a relationship that existed during the audit and professional engagement period may be more likely to bear on independence than a relationship that ended substantially before that time, it does not believe that the passage of time is the only factor relevant to a determination of whether a relationship may reasonably be thought to bear on independence. The nature of the relationship must also be considered. For example, if the firm customized and implemented the company's financial reporting system, that relationship, depending on the circumstances, might reasonably be thought to bear on independence even if the engagement to design the system was concluded before the beginning of the audit and professional engagement period. Determining whether a particular relationship is covered by Rule 3526(a) will, therefore, depend on the relevant facts and circumstances.

The Board is making one modification to the rule in response to a comment recommending that Rule 3526 make clear that the relationships required to be disclosed are those that may reasonably be thought to bear on independence as of the date of the communication. Because the relevant relationships are those that continue to bear on independence at the time of the communication, the Board has modified the rule by adding the words "as of the date of the communication" where appropriate. This clarification should help firms distinguish relationships that are covered by the rule from those that are not.

This modification should also clarify that, if a relationship may reasonably be thought to bear on independence as of the date of the communication, it must be disclosed regardless of whether it was disclosed in a prior year. Some commenters suggested that auditors should not be required to repeat a previously made disclosure. The Board believes that an earlier disclosure may reduce the amount of information that needs to be disclosed, but it does not obviate the need for disclosure altogether. If the nature of the relationship and the potential effects of the relationship on independence remain substantially unchanged, a reference to the earlier disclosure will generally be sufficient when disclosure is required. Moreover, as discussed above, after some amount of time, the length of which depends on the nature of the relationship, a relationship may no longer reasonably be thought to bear on independence and, therefore, would no longer need to be disclosed.

C. Timing of the Communications

As discussed above, the Board proposed Rule 3526(a) because it believed that auditors should communicate relevant information about independence before becoming the issuer's auditor. A few commenters expressed concern that the proposed rule could cause undue burden on private companies pursuing an initial public offering if the communication were required before the auditor accepts an engagement to assist an existing private company client in going public. According to commenters, a requirement to complete the independence assessment before the auditor could commence work related to the initial public offering might disadvantage the audit client by causing delay. One commenter stated that auditors generally begin work on the initial public offering based upon an initial review of relationships between the accounting firm and the company and complete their independence assessment before the company's registration statement is filed. This commenter suggested that the Board reconsider the required timing of the communications in the context of an initial public offering.

After considering these comments, the Board has determined that relieving a firm whose private company audit client is pursuing an initial public offering

from compliance with Rule 3526 is not necessary or appropriate. As discussed above, the rule is intended to provide audit committees with the information they need to effectively oversee the audit engagement. When a private company undertakes an initial public offering, it must, for the first time, have its financial statements audited by an auditor that is independent within the meaning of the rules of the SEC and PCAOB. Among other decisions an audit committee must make is whether to engage its existing auditor for the initial public offering or whether to retain a new auditor for that purpose. In this context, the Board believes that the communication about an existing auditor's independence—which is relevant to the existing auditor's ability to continue as the company's auditor through, and after, the initial public offering—should not be delayed until just before the registration statement is filed. Moreover, the Board believes that this evaluation will not cause an unnecessary burden because the private company is already a client of the accounting firm and therefore should already be aware of most of the relationships that would need to be communicated.

The Board also received comment on the timing of the annual communication requirement that the Board proposed in Rule 3526(b). Like ISB No. 1, proposed Rule 3526 did not specify when during the year the firm would be required to make the annual communication.[13] One commenter recommended that the Board specify in Rule 3526(b) when the annual communication should take place to make sure that these critical discussions do not take place at the end of the audit engagement. The commenter recommended that the proposed rule be changed to state that firms should apply Rule 3526 as early in the audit process as practicable, preferably during the planning stage of the audit. One commenter recommended that the communication occur before substantial planning procedures commence, while another recommended that the annual communication should take place at the time the engagement letter is signed and then again near the end of the audit. Finally, one commenter recommended adding a section to Rule 3526 requiring an auditor to update the communications when he or she becomes aware of a covered, previously unknown or new relationship.

After considering these comments, the Board does not believe it is appropriate to mandate specifically when the Rule 3526(b) annual communication take place. In most cases, the communications will be more useful if they take place near the beginning of the audit process. However, by not prescribing the timing of the communication, Rule 3526(b) will allow the auditor and audit committee to determine the timing that is most appropriate in the circumstances of the particular engagement. Similarly, the Board does not believe that it is necessary for the rule to explicitly address how a firm should correct an incomplete communication.

III. Rule 3523. Tax Services for Persons in Financial Reporting Oversight Roles

A. Amendment to Rule 3523 to Exclude the Portion of the Audit Period That Precedes the Professional Engagement Period

Rule 3523, as adopted by the Board, prohibits a registered public accounting firm, or an affiliate of the firm, from providing tax services during the "audit and professional engagement period" to a person in, or an immediate family

[13] The Board understands that, under ISB No. 1, the communication typically occurs at the end of the audit when the financial statements are issued.

member of a person in, a FROR at the audit client. Consistent with the SEC's independence rules,[14] the phrase "audit and professional engagement period" is defined to include two discrete periods of time. The "audit period" is the period covered by any financial statements being audited or reviewed.[15] The "professional engagement period" is the period beginning when the firm either signs the initial engagement letter or begins audit procedures, whichever is earlier, and ends when either the company or the firm notifies the SEC that the company is no longer that firm's audit client.[16]

In circumstances in which a registered firm has been the auditor for an audit client for more than a year, the "audit period" is a subset of the "professional engagement period." However, when a registered firm accepts a new audit client, the audit period may cover a period of time before the commencement of the professional engagement period. In such circumstances, Rule 3523, as adopted, provides that the firm is not independent of its audit client if the firm, or an affiliate of the firm, provided tax services to a person covered by Rule 3523 during the audit period but before the beginning of the professional engagement period. This aspect of the rule therefore effectively prevents a firm from accepting a new audit client if the firm, or an affiliate of the firm, provided tax services to such a person during the period covered by any financial statements to be audited or reviewed.

In preparing for implementation of the Board's tax services and independence rules, the Board decided to revisit the application of Rule 3523 to tax services provided during the audit period. As discussed above, on April 3, 2007, the Board issued a concept release to solicit comment about the possible effects on a firm's independence of providing tax services to a person covered by Rule 3523 during the portion of the audit period that precedes the beginning of the professional engagement period, and other practical consequences of applying the restrictions imposed by Rule 3523 to that portion of the audit period. After careful consideration of comments received in response to the concept release, the Board, on July 24, 2007, proposed to amend the rule to exclude the portion of the audit period that precedes the beginning of the professional engagement period.[17]

The Board received 13 comments on the proposed amendment to Rule 3523. Almost all of the commenters supported the Board's recommendation to amend Rule 3523.[18] Many of these commenters reiterated their belief that the firm's independence would not be affected by the provision of tax services to a person in a FROR during the portion of the audit period that precedes the beginning of the professional engagement period. Commenters also reaffirmed their belief

---

[14] 17 C.F.R. § 210.2-01(f)(5).

[15] Rule 3501(a)(iii)(1).

[16] Rule 3501(a)(iii)(2).

[17] See PCAOB Release No. 2007-008, which includes a discussion of the comments the Board received on the concept release.

[18] Only one commenter on the proposed rule objected to the amendment of Rule 3523. This commenter's objection stemmed from the contention that the terms "professional engagement period" and "a person in a financial reporting role" were not defined. Definitions for "professional engagement period" and "financial reporting oversight role" are provided under Rules 3501(a)(iii)(2) and 3501(f)(i), respectively. The same commenter, while not specifically addressing the proposed amendment, also expressed concern with Rule 3523(a), which provides an exception for tax services to a person who is in a FROR only because he or she serves as a member of the Board of Directors, and, referring to the responsibilities of directors, recommended deleting this section in its entirety. This commenter also recommended that the Board eliminate Rule 3523, which provides an exception, under certain circumstances, for tax services to a person who is in a FROR only because of the person's relationship to an affiliate of the entity being audited. The Board does not believe that eliminating these exceptions is warranted.

that, if Rule 3523 is not amended, it could adversely affect companies' ability to change auditors by limiting the companies' choice of auditors.

The Board has carefully considered these comments, as well as the comments on the concept release,[19] and determined to adopt the amendment to Rule 3523. The Board continues to believe that it is not necessary for the rule to restrict the provision of tax services during the portion of the audit period that precedes the professional engagement period. Rule 3523 relates to services provided to individuals and not the audit client that issues the financial statements subject to audit. Additionally, registered firms would remain responsible for considering the relevant facts and circumstances of a specific tax engagement and determining whether their independence is impaired under the SEC's general standard of auditor independence.[20]

One commenter objected to the discussion in the proposing release (and included here in the paragraph above) describing the firm's obligation to consider whether the firm's independence is impaired under the SEC's general standard of auditor independence. This commenter stated that the discussion sends a contradictory message by calling for firms to assess whether their independence is impaired despite the Board's conclusion that restrictions are unnecessary to preserve independence. The Board disagrees. As a result of the Board's amendment, firms will not be specifically prohibited by Rule 3523 from providing tax services to persons in a FROR during the portion of the audit period that precedes the professional engagement period. That does not mean, however, that such services are categorically permitted. Rather, as discussed in the proposing release, the amendment reflects the Board's belief that a more tailored approach, based on facts and circumstances and measured against the general standard of auditor independence, is preferable to a *per se* prohibition. Accordingly, as with any other service or relationship that is not specifically prohibited by the independence rules, firms must determine whether the service or relationship impairs independence under the SEC's general standard of auditor independence.

B. Application of Rule 3523 to New Issuers

The Board proposed adding a note to Rule 3523 concerning the application of Rule 3523 in the context of an initial public offering in light of comments received on the concept release. The proposed note stated that, in the context of an initial public offering, the provision of tax services to a person covered by Rule 3523 before the earlier of the date that a registered firm: (1) signed an initial engagement letter or other agreement to perform an audit pursuant to the standards of the PCAOB, or (2) began procedures to do so, does not impair a firm's independence under Rule 3523. Commenters generally recommended that the Board adopt the note and encouraged the Board to consider expanding it to include other corporate life events, noting that corporate life events other than an initial public offering may also result in the need for an audit client's

[19] In response to the concept release, two commenters stated that Rule 3523 should not be amended to exclude the portion of the audit period that precedes the professional engagement period. These commenters believed that providing tax services to a person in a FROR during the audit period impairs independence, and suggested that audit firms may plan for a change of auditors sufficiently in advance to avoid or minimize any problems resulting from the application of the rule to the audit period.

[20] 17 C.F.R. § 210.2-01(b); see footnote 9.

financial statements to be audited pursuant to the standards of the PCAOB for the first time.[21]

In response to these comments, the Board determined to revise the note to Rule 3523 to describe events, other than just initial public offerings, pursuant to which a company's financial statements must be audited in accordance with the standards of the PCAOB for the first time. Specifically, the Board replaced the words "[i]n the context of an initial public offering" with "[i]n an engagement for an audit client whose financial statements for the first time will be required to be audited pursuant to the standards of the PCAOB." This situation may occur when a company decides to conduct an initial public offering of its securities,[22] which would require the company to file, for the first time, a registration statement under the Securities Act of 1933. Additionally this situation may occur when a foreign private issuer decides to list its securities on a national securities exchange, which would require the company to register its securities, for the first time, under the Securities Exchange Act of 1934. In both cases, the company's audited financial statements would be required, for the first time, to be audited pursuant to the standards of the PCAOB.[23]

The Board does not believe it is appropriate to list in the note the various corporate life events identified by commenters, such as mergers or acquisitions, reverse mergers or other similar transactions. The relevant factor is not the name given to a transaction or event but whether the transaction or event triggers the initial requirement for an audit pursuant to the standards of the PCAOB. For example, the surviving company in a merger or acquisition transaction may be an issuer that is already filing with the SEC financial statements required to be audited pursuant to the standards of the PCAOB. The Board did not intend the note to Rule 3523 to describe such a scenario.[24] By focusing on the need for a first-time audit pursuant to the standards of the PCAOB, the company and its auditors are better able to determine whether a proposed transaction or corporate life event is described by the note.

One commenter stated that, while it is easy to identify the date on which the initial engagement letter to perform an audit pursuant to the standards of the PCAOB is signed, it would be very difficult to apply the second prong of the note, which requires identification of the date that the auditor began procedures to perform an audit pursuant to the standards of the PCAOB, especially

---

[21] Commenters suggested the following as examples of when an audit client's financial statements would, for the first time, need to be audited pursuant to the standards of the PCAOB—mergers, reverse mergers in which a privately-held entity merges with a public company and succeeds to the public company's reporting obligations under the Securities Exchange Act of 1934, issuance of publicly traded debt, issuance of partnership or other units, inclusion of a public company's securities in an employee benefit plan, decision by a foreign private issuer to list its securities in the United States, and companies that have greater than 500 U.S. shareholders and total assets exceeding $10 million as of the latest fiscal year-end.

[22] The company may offer equity securities, debt securities, limited partnership interests, trust interests, or another type of securities in the initial public offering.

[23] The Board intends the note to Rule 3523 to describe all circumstances in which a company that was not an "issuer," as defined by the Act, becomes an issuer as a result of a corporate life event or otherwise. These circumstances include those in which a private company that was once an issuer becomes an issuer again. As long as the company was not required to have its financial statements audited pursuant to the standards of the PCAOB, the company and its auditors are better able to determine whether a proposed transaction or corporate life event is described by the note.

[24] Another example is a private operating company becoming a reporting company through a reverse merger with a reporting shell company. In this scenario, even though the operating company assumes the reporting obligations of the former shell company, the surviving reporting company is the former shell company whose financial statements already were required to be audited pursuant to the standards of the PCAOB. Therefore, the note to Rule 3523 does not describe this situation.

if the registered firm audited the company's prior years' financial statements.[25] Another commenter similarly questioned whether this period begins when the auditor begins planning for the audit. The Board recognizes that, in certain circumstances, it may be difficult to identify when a continuing auditor began procedures pursuant to the standards of the PCAOB. An auditor begins procedures for purposes of Rule 3523 when he or she begins procedures, including required audit planning procedures, to update its earlier audits to conform them to the standards of the PCAOB or begins procedures on a new audit pursuant to those standards. This point in time will depend on the facts and circumstances of the particular engagement and corporate life event, rather than on any more specific triggering event that the Board could establish by rule.

C. Transition Periods

Rule 3523 prohibits the provision of tax services to covered persons once the professional engagement period begins. Some commenters on the concept release recommended that the Board amend Rule 3523 to allow a transition period after a company changes auditors so that the new auditor may complete any tax services in progress to any persons in FRORs affected by the issuer's change of auditors.[26] Other commenters stated that tax services to persons in FRORs should, as is currently required, cease before the professional engagement period begins. The Board decided to seek further feedback on this topic in the proposing release. Specifically, the Board asked commenters to specify why they believed any transition period was necessary and how long any such transition period should be.[27]

The majority of commenters on this topic recommended that the Board provide for a 180-day transition period to allow an accounting firm to complete covered tax services once the professional engagement period begins. Most of these commenters stated that, since the Board has previously determined that a 180-day transition is appropriate when a person is hired or promoted into a FROR,[28] the Board should provide the same transition when an issuer changes its auditor. The commenters stated that, without a transition period, the person in a FROR could experience undue hardship because he or she may have to switch tax preparers in the middle of the personal tax services engagement. Additionally, some commenters stated that some accounting firms may not be able to terminate the in-process personal tax services engagements within a timeframe that would also allow them to submit their proposal for the new audit engagement. Conversely, some commenters stated that they believed that the Board should not provide a transition period and that it is appropriate for the firm to cease the personal tax services before the professional engagement

---

[25] The commenter noted that, when a company undertakes an initial public offering, it is required to include in the registration statement audited financial statements for its past three completed fiscal years. These financial statements may have previously been audited pursuant to generally accepted auditing standards ("GAAS"). The commenter was concerned that if the company does not retain a new auditor for its initial public offering, there may be a question as to whether the auditor should consider its audits of the prior years in assessing when it "began procedures" as provided under the note to Rule 3523. An auditor should not consider work already performed on previously completed GAAS audits for determining when the auditor "began procedures" because those audits were not performed pursuant to the standards of the PCAOB.

[26] Rule 3523(c) provides a time-limited transition period for an auditor to complete in-progress tax services to a person that becomes a FROR at the audit client through a hiring, promotion, or other change in employment event. That transition period is unaffected by this release.

[27] See PCAOB Release 2007-008 (July 24, 2007), at 12.

[28] See Rule 3523(c).

period begins or that a transition period should only be available on a case-by-case basis where cessation of services would cause significant hardship.[29]

After considering these comments, the Board does not believe that a transition period is necessary when a company changes its auditor and has determined not to amend Rule 3523 to include one. The Board adopted Rule 3523 because the provision of tax services to a person in a FROR after the accounting firm is hired as the auditor creates an unacceptable appearance that the firm lacks independence. While the Board believed a time-limited exception was warranted to accommodate persons who, through a hiring or promotion event, abruptly become covered by the rule, it does not believe that such a transition period is similarly necessary after an auditor change. In the former situation, the firm already is the issuer's auditor and has no control over whether or when the person is promoted or otherwise moved into a FROR. In contrast, the firm controls whether and when it begins a new engagement. The Board therefore believes that the firm is able to conclude, or transition to another provider, any tax services to persons in FRORs at a new audit client before beginning the engagement.[30]

Some commenters also encouraged the Board to consider providing a transition period for firms to complete tax services to persons who become covered by Rule 3523 as a result of a corporate life event, such as a merger, acquisition, or initial public offering. Commenters suggested that such corporate life events present conceptually similar transition issues to those related to the hiring or promotion of a person into a FROR and that Rule 3523(c) should therefore be expanded to accommodate them. Commenters also stated that the absence of transitional relief may cause unnecessary hardship for persons in FRORs whose tax return preparation work was well underway at the point of the initial public offering, merger, or acquisition.[31]

As discussed above, in the context of an initial public offering, the rule, as amended, makes clear that tax services provided to a person in a FROR do not impair independence as long as those tax services are concluded before the earlier of the date that the firm: (1) signed an initial engagement letter or other agreement to perform an audit pursuant to the standards of the PCAOB, or (2) began procedures to do so. Auditors should have sufficient time before that date to conclude any tax services to persons that would be covered by the rule. Accordingly, the Board does not believe that the recommended transition period is necessary in the context of an initial public offering.

The Board also considered whether a transition period is necessary to allow a firm to conclude tax services to persons who become covered by the rule after a merger or acquisition. As discussed above, Rule 3523 already provides a transition period for a firm to conclude tax services to a person who was not in a FROR before a hiring, promotion, or other change in employment event. If a

---

[29] Another commenter stated that Rule 3523 should be effective immediately for issuers with fiscal years ending on or after December 15, 2007, that all personal tax services in process should be allowed to continue until the filing of the applicable tax return, and that such services, along with the related fees, should be disclosed in the issuer's filings with the SEC and documented in the minutes of meetings of the audit committee.

[30] Nothing in Rule 3523 requires a firm to complete or terminate tax services to persons in FRORs at a potential audit client before submitting a proposal for a new audit engagement. Rather, the rule requires the accounting firm to complete or terminate those services by the beginning of the professional engagement period.

[31] The commenters further stated that, because persons in FRORs may receive tax services from a number of accounting firms, the application of the rule to the audit period may unreasonably restrict a company's ability to either continue or change auditors after a corporate life event. As discussed above, the Board has amended the rule to exclude the portion of the audit period that precedes the professional engagement period.

business combination results in a change of employer for a person in a FROR—from, for example, the acquired company to the acquiring company—the existing transition period in Rule 3523 would apply.[32] For example, if Company A acquires Company B, a person who was in a FROR at Company B would experience an "other change in employment event" if he or she became an employee of Company A in a FROR as a result of the acquisition. If such a person had been receiving tax services from Company A's registered public accounting firm pursuant to an engagement in process before the acquisition, the time-limited exception in Rule 3523(c) would apply.[33]

In the example above, persons in FRORs at Company A would not experience a change in employment event because they were employed by Company A both before and after the acquisition, and Rule 3523(c) would, therefore, not apply. If Company B's auditor became Company A's auditor after the acquisition (replacing Company A's auditor), Company B's auditor would have to conclude any tax services to persons in FRORs (and their immediate family members) at Company A before the start of the professional engagement period. The Board believes this is appropriate because, as discussed above, the Board does not believe that a transition period is necessary to allow a newly engaged auditor to conclude in-progress tax services to persons in FRORs at the new audit client. Accordingly, the Board has determined not to expand the existing transition period in Rule 3523(c).

IV. Effective Date and Adjustment of Implementation Schedule

Rule 3526 establishes new requirements for registered public accounting firms. The Board believes it is appropriate to allow a reasonable period of time for such firms to prepare internal policies and procedures and train their employees to ensure compliance with these new requirements. Accordingly, Rule 3526 will become effective, and ISB No. 1 and the related interpretations superseded, on the later of September 30, 2008, or 30 days after the date that the SEC approves the rule.

The amendment to Rule 3523 would have the effect of making permanent the Board's delay in implementing the rule as it applies to tax services provided during the period subject to audit but before the professional engagement period. Accordingly, no transition period is necessary, and the amended rule will become effective immediately upon approval by the SEC. The Board has also determined to further adjust the implementation schedule for Rule 3523 to allow sufficient time for the SEC to consider whether to approve the amendment to Rule 3523.[34] Specifically, the Board will not apply Rule 3523 to tax services provided on or before December 31, 2008, when those services are provided during the audit period and are completed before the professional engagement period begins.[35] The Board has filed this adjustment to the implementation schedule with the SEC as an immediately effective proposed rule change. The

Rule 3523. Tax Services for Persons in Financial Reporting Oversight Roles

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the ~~audit and~~ professional engagement period provides any tax service to a person in a financial reporting oversight role at the audit client, or an immediate family member of such person, unless—

a. the person is in a financial reporting oversight role at the audit client only because he or she serves as a member of the board of directors or similar management or governing body of the audit client;

b. the person is in a financial reporting oversight role at the audit client only because of the person's relationship to an affiliate of the entity being audited—

(1) whose financial statements are not material to the consolidated financial statements of the entity being audited; or

(2) whose financial statements are audited by an auditor other than the firm or an associated person of the firm; or

c. the person was not in a financial reporting oversight role at the audit client before a hiring, promotion, or other change in employment event and the tax services are—

(1) provided pursuant to an engagement in process before the hiring, promotion, or other change in employment event; and

(2) completed on or before 180 days after the hiring or promotion event.

Note: In an engagement for an audit client whose financial statements for the first time will be required to be audited pursuant to the standards of the PCAOB, the provision of tax services to a person covered by Rule 3523 before the earlier of

the date that the firm: (1) signed an initial engagement letter or other agreement to perform an audit pursuant to the standards of the PCAOB, or (2) began procedures to do so, does not impair a registered public accounting firm's independence under Rule 3523.

Rule 3526. Communication with Audit Committees Concerning Independence

A registered public accounting firm must—

a. prior to accepting an initial engagement pursuant to the standards of the PCAOB—

(1) describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the potential audit client or persons in financial reporting oversight roles at the potential audit client that, as of the date of the communication, may reasonably be thought to bear on independence;

(2) discuss with the audit committee of the issuer the potential effects of the relationships described in subsection (a)(1) on the independence of the registered public accounting firm, should it be appointed the issuer's auditor; and

(3) document the substance of its discussion with the audit committee of the issuer.

b. at least annually with respect to each of its issuer audit clients—

(1) describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the audit client or persons in financial reporting oversight roles at the audit client that, as of the date of the communication, may reasonably be thought to bear on independence;

(2) discuss with the audit committee of the issuer the potential effects of the relationships described in subsection (b)(1) on the independence of the registered public accounting firm;

(3) affirm to the audit committee of the issuer, in writing, that, as of the date of the communication, the registered public accounting firm is independent in compliance with Rule 3520; and

(4) document the substance of its discussion with the audit committee of the issuer.

Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting an auditing standard, *Engagement Quality Review*, that will be applicable to all registered firms and will supersede the Board's interim concurring partner review requirement, and a conforming amendment to the Board's interim quality control standards.

* * * * *

I. Introduction

Section 103 of the Sarbanes-Oxley Act (the "Act") directs the Board, among other things, to set standards for public company audits, including a requirement or each registered public accounting firm to "provide a concurring or second partner review and approval of [each] audit report (and other related information), and concurring approval in its issuance . . . ." A well-performed engagement quality review ("EQR") can serve as an important safeguard against erroneous or insufficiently supported audit opinions and, accordingly, can contribute to audit quality. In February 2008, the Board proposed to replace its interim requirement with a new EQR standard.[1] The Board's original proposal was developed in response, among other things, to feedback from some members of its Standing Advisory Group ("SAG") that the existing interim requirements[2]

[1] PCAOB Release No. 2008-002, Proposed Auditing Standard—*Engagement Quality Review and Conforming Amendment to the Board's Interim Quality Control Standards* (February 26, 2008) (the "original proposal").

[2] The Securities and Exchange Commission Practice Section ("SECPS") of the American Institute of Certified Public Accountants ("AICPA") Requirements of Membership Sections 1000.08(f); 1000.39, Appendix E.

(the "existing requirements") do not provide for a sufficiently thorough review to give investors assurance on the quality of engagements. The proposal was intended to enhance the quality of the EQR by strengthening the existing requirements.

Commenters recommended significant modifications to the original proposal, and, in response, the Board made changes designed to better tailor the standard to its purposes.[3] Because of the extent of those changes, the Board again sought public comment, this time on the standard as revised. The Board has considered those comments, as well as the input of the SAG, and the final standard ("AS No. 7" or the "EQR standard") has benefitted from the additional public input.[4]

The EQR standard the Board is adopting provides for a rigorous review that will serve as a meaningful check on the work performed by the engagement team. AS No. 7 should increase the likelihood that a registered public accounting firm will catch any significant engagement deficiencies before it issues its audit report. As a result, the Board recognizes that more work may be necessary under the EQR standard than was performed in some concurring reviews under the existing requirements.

At the same time, the Board has been sensitive to commenters' concerns and agrees that the EQR should not become, in effect, a second audit. Instead, the EQR should be—and, as described in AS No. 7, is—a review of work already performed by the engagement team. The EQR standard requires the engagement quality reviewer (or the "reviewer") to evaluate the significant judgments made and related conclusions reached by the engagement team in forming the overall conclusion on the engagement and in preparing the engagement report, and requires certain procedures designed to focus the reviewer on those judgments and conclusions.

The procedures required of the reviewer by AS No. 7 are different in nature from the procedures required of the engagement team. Unlike the engagement team, a reviewer does not perform substantive procedures or obtain sufficient evidence to support an opinion on the financial statements or internal control over financial reporting. If more audit work is necessary before the reviewer may provide concurring approval of issuance, the engagement team—not the reviewer—is responsible under PCAOB standards for performing the work. In contrast, the reviewer fulfills his or her responsibility to perform an effective review of the engagement under the EQR standard by holding discussions with the engagement team, reviewing documentation, and determining whether he or she can provide concurring approval of issuance.

II. Overview of Auditing Standard No. 7

Overall, commenters preferred the reproposed standard to the original proposal, though some continued to believe that certain provisions were unclear and suggested certain changes to the standard. After considering commenters' feedback, the Board has made several modifications to the EQR standard to

---

[3] Comments on the original proposal and the Board's responses are described in PCAOB Release No. 2009-001, Proposed Auditing Standard—*Engagement Quality Review* (March 4, 2009) (the "reproposing release").

[4] The Board received 38 comments on the original proposal and 30 comments on the reproposal. The SAG discussed the reproposed standard on April 2, 2009. A transcript of that discussion is available on the Board's website at http://pcaobus.org/Rules/Rulemaking/Docket%20025/2009-04-02_EQR_SAG_Transcript.pdf. The SAG also discussed EQR on June 22, 2004 and October 5, 2005. Archived webcasts are available on the Board's website at http://pcaobus.org/News/Webcasts/Pages/default.aspx.

provide additional clarity. This section describes the comments received, the Board's response, and changes made in AS No. 7.[5]

A. Applicability of the EQR Requirement

Paragraph 1 of the reproposed standard required an EQR for audit engagements and reviews of interim financial information ("interim reviews"), but not for other engagements performed according to the standards of the PCAOB. For the most part, commenters believed that this provision was appropriate.[6] One commenter, however, suggested including the EQR requirements for interim reviews in AU section ("sec.") 722, *Interim Financial Information*, instead of including them as part of the EQR standard to "make it clear that the scope of the procedures performed remain under the umbrella of the objective of a review of interim financial information (which is much different than the scope and objective of an audit)." Because the requirements for the EQR of interim reviews in AS No. 7 are closely related to and described by reference to the requirements for the EQR of an audit, the Board believes it is more appropriate to locate both sets of requirements in the same standard. Accordingly, the Board is adopting the provisions regarding applicability of the EQR standard as reproposed.

B. Statement of Objective

The reproposed standard included a statement of objective intended to focus reviewers on the overall purpose of the standard as they carry out the more specific EQR requirements. As reproposed, the objective of the engagement quality reviewer was "to perform an evaluation of the significant judgments made by the engagement team and the conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued, in order to determine whether to provide concurring approval of issuance."

Most commenters agreed that the EQR standard should include a statement of objective. While some believed the objective was appropriate as reproposed, several suggested substituting the phrase "related conclusions reached" for "the conclusions reached" to indicate that the reviewer is required to evaluate conclusions relating to significant judgments, rather than all conclusions. In addition, some commenters suggested making the objective less vague, while others wanted the Board to broaden it or make it less procedural.

After considering these comments, the Board has, as suggested by commenters, revised the objective so that it refers to "significant judgments made by the engagement team[7] and the *related* conclusions reached . . . ." (emphasis added). This change should help reviewers maintain their focus on areas of the engagement that are most likely to contain a significant engagement deficiency. With

---

[5] The Board received some comments related to its standard-setting process in general. The Board continuously endeavors to improve its processes, including its standard-setting process, and is considering these comments as it does so.

[6] One commenter did not believe that an EQR should be required for interim reviews because of concerns about the scope of the EQR for interim reviews. The section entitled *Specifically Required Procedures in the EQR of an Interim Review* of this release discusses the EQR requirements for interim reviews.

[7] Because the engagement partner has final responsibility for the engagement, he or she has final responsibility for the significant judgments made during the engagement, notwithstanding any involvement in or responsibility for those judgments by firm personnel outside of the engagement team, such as members of the firm's national office. Accordingly the "significant judgments made by the engagement team" include all of the significant judgments made during the engagement.

this revision, the Board believes the statement of objective establishes, at the appropriate level of detail, a framework for the performance of the EQR that is consistent with the specific requirements in AS No. 7. Corresponding changes have been made in paragraphs 9 and 14, which describe the scope of the EQR for audits and interim reviews, respectively. The reviewer achieves his or her objective by complying with the specific requirements of the standard.

C. Qualifications of the Engagement Quality Reviewer

In order to provide for a high-quality EQR, the reproposed standard described the qualifications that any reviewer would be required to meet. These provisions were designed to provide assurance that the reviewer could effectively perform an EQR of the particular engagement under review. At the same time, the provisions recognized that smaller firms may have few partners—and, in the case of sole practitioners, no additional partners—available in-house to perform the EQR.

Accordingly, the reproposed standard required an engagement quality reviewer from within the firm issuing the engagement report to be a partner or another individual in an equivalent position, but also allowed a qualified individual from outside the firm to perform the EQR. In either event, the reproposed standard required the reviewer to be an associated person[8] of a registered public accounting firm.[9] The reproposed standard also included a general competence requirement and requirements related to the reviewer's independence, integrity, and objectivity.

In-House Reviewer: Partner or an Individual in an Equivalent Position

The requirement in the reproposed standard for a reviewer from within the firm to be a partner or an individual in an equivalent position was intended to address concerns expressed by some commenters on the original proposal about the authority of the engagement quality reviewer relative to that of the engagement partner. Because the EQR is intended to be an objective second look at work performed by the engagement team, the reviewer should be able to withstand pressure from the engagement partner or other firm personnel, such as members of the firm's national office. As described in the reproposing release, the Board believed that concerns about authority will most often arise when the reviewer and the engagement partner work at the same firm. The Board also believed that a standard based on perceptions of relative authority within a firm would not be sufficiently clear to be workable. Accordingly, the Board attempted to address these concerns with a requirement that an in-house reviewer—but not one from outside the firm—be a partner or person in an equivalent position.

---

[8] For clarity, in paragraph 3 of AS No. 7, the Board added a reference to Rule1001(p)(i), which defines the term "associated person of a registered public accounting firm." A person not already associated with a registered firm can enter into a relationship with the firm issuing the report such that the person would become associated with that firm by performing the review. Specifically, a person not already associated with a firm would become associated with the firm issuing the report if *he or she* (rather than, or in addition to, his or her firm or other employer): (1) receives compensation from the firm issuing the report for performing the review or (2) performs the review as agent for the firm issuing the report. For example, if the firm issuing the report contracts directly with an employee of an unregistered accounting firm to perform the engagement quality review, that person would become associated with the firm issuing the report by virtue of that independent contractor relationship.

[9] A registered public accounting firm has an obligation to secure and enforce consents to cooperate with the Board from each associated person of the firm, see Section 102(b)(3) of the Act, including those who become associated with the firm by performing the review. The Board also may directly sanction any such person who fails to cooperate in an investigation or inspection. See Section 105(b)(3) of the Act and PCAOB Rules 5110 and 4006.

While some commenters supported the reproposed requirement, others disagreed with it, generally because, in their view, being a partner or person in an equivalent position would not necessarily ensure that the reviewer possesses the qualities required to perform the EQR. These commenters noted that partners as well as non-partners may be subject to internal pressure within the firm to provide concurring approval of issuance. In addition, in one commenter's view, it would be burdensome for one-partner firms to hire an outside reviewer to comply with this requirement. Finally, some commenters also asked the Board to define the term "equivalent position."

While both partners and non-partners may experience pressure within the firm to provide concurring approval of issuance, the Board continues to believe that the reproposed requirement is the most appropriate way to address this issue. Partnership is not a perfect proxy for authority, but a partner is more likely to possess sufficient authority to conduct the EQR than a non-partner. The Board continues to believe that a requirement based on perceptions of authority would not be workable. Accordingly, the Board is adopting this requirement substantially as reproposed.[10] At a firm that is not organized as a partnership, "an individual in an equivalent position" is someone with the degree of authority and responsibility of a partner in a firm that is organized as a partnership.

Qualified Reviewer from Outside the Firm

As noted above, the reproposed standard also allowed a qualified reviewer from outside the firm to conduct the review. In the reproposing release, the Board expressed the view that allowing a sufficiently qualified professor or other individual not employed by an accounting firm to perform the EQR should not negatively affect audit quality and may mitigate the compliance burden on sole practitioners and smaller firms. The Board sought comment on whether a qualified accountant who is not employed by an accounting firm should be allowed to conduct the EQR.[11]

The majority of commenters on this topic did not oppose the reproposed provision. Some commenters, however, cautioned that reviewers from outside an accounting firm may not necessarily have the required technical expertise or recent audit experience. One commenter believed that allowing the use of such outside reviewers could "hamper the existing independence rules,"[12] increase costs, and limit the potential growth of partners.

After considering these comments, the Board continues to believe that the EQR standard can—and should—allow firms the proposed flexibility in choosing a reviewer, provided that reviewer meets the competence and other qualification requirements. According to these requirements, as discussed below, any reviewer would have to have the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the person who has overall responsibility for the engagement under review. Accordingly, while some persons from outside a firm might not have the required qualifications, those who do can effectively perform the EQR.[13]

---

[10] One commenter suggested that the phrasing of the reproposed standard did not establish a requirement for the in-house reviewer to be a partner because it stated that the reviewer "may be" a partner, a person in an equivalent position, or an individual outside the firm. While the use of "may" in that context imposed a requirement, to avoid any confusion on this point the Board has rephrased the requirement in paragraph 3 of AS No. 7 to use the word "must."

[11] As noted in the reproposing release, under the existing requirement a firm may seek a waiver to engage an outside experienced individual to perform the EQR. Because AS No. 7 allows a firm to use an outside reviewer, such a waiver is not necessary under AS No. 7.

[12] The comment did not explain how the independence rules would be hampered.

[13] Similarly, a reviewer does not meet all of the qualification requirements in AS No. 7 by virtue of his or her status as a partner or employee of an accounting firm.

The Board also does not agree that allowing the use of a reviewer from outside the firm issuing the report would negatively affect the application or enforcement of the independence rules. As the Board noted in the reproposing release, it will continue to consider anyone who performs the EQR to be an "audit partner" and a member of the "audit engagement team" for purposes of independence requirements.[14] In addition, because AS No. 7 would not require a firm to use an outside reviewer, allowing a firm to do so should not increase costs or limit the potential growth of partners. Any firm that is concerned that invoking the flexibility provided by the EQR standard would raise its costs or impede the development of its partners could, simply, decline to do so and use a reviewer from within the firm if one is available.

When considering an outside individual for the role of the engagement quality reviewer, the firm will likely need to make additional inquiries to obtain necessary information about the individual's qualifications. For example, while information about independence of the firm's partners is typically collected and evaluated as part of the periodic independence review, information about the independence of an outside reviewer will likely need to be requested and evaluated as part of the reviewer selection process. Firms also likely know more about the competence of their own partners than of an outside reviewer.

General Competence Requirement

As noted above, the reproposed standard, like the original proposal, included a requirement for the reviewer to "possess the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the person who has overall responsibility for the same type of engagement." This provision was intended to set a minimum requirement for those who would perform the EQR. In response to comments on the original proposal, the reproposing release explained that this provision, by its terms, did not require the engagement quality reviewer's knowledge and competence to match those of the engagement partner, or for the reviewer to be a "clone" of the engagement partner.[15]

Some commenters reiterated their concerns that the engagement quality reviewer's skills would be expected to match those of the engagement partner, and that such a requirement could cause resource constraints for smaller firms. Other commenters suggested modifying the general competence provision by stating that the reviewer's competence should be established based on the facts and circumstances of the engagement, or describing the required qualifications from the reviewer's perspective, rather than by comparing them to the qualifications of the engagement partner. Finally, some commenters suggested including in the EQR standard a statement that the reviewer may obtain the required level of knowledge and competence through utilizing assistants.

The Board continues to believe that if a minimum level of knowledge and competence in accounting, auditing, and financial reporting is required to conduct an audit, it is similarly necessary to effectively review that audit.[16] The reviewer is

---

[14] See Rule 2-01(f) of Regulation S-X, 17 C.F.R. 210.2-01(f), for the definitions of "audit partner" and "audit engagement team."

[15] Specifically, the reproposing release noted:

> The general competence provision merely sets a minimum requirement for those who would perform the EQR, but it does not require the reviewer's competence to match that of the engagement partner. In many cases, both individuals' competence will exceed the minimum level prescribed, but there is no requirement that they do so in tandem, or even at all.

[16] While a reviewer may use assistants in performing the EQR, the reviewer's own skills should meet the requirements of AS No. 7.

not required to possess other competencies, e.g., those related to communication or management skills, that the engagement partner may have.

Accordingly, the Board is adopting the general competence provision substantially as proposed. The Board is, however, modifying the requirement to clarify further that the determination of what constitutes the appropriate level of knowledge and competence should be based on the circumstances of the engagement, including the size and complexity of the business under audit or under interim review.[17] In AS No. 7, the Board replaced the phrase "the same type of engagement" with "the engagement." The new phrasing focuses the reviewer on the particular engagement under review, rather than that "type" of engagement.[18] Firms that do not have partners that meet this general competence requirement available to perform the EQR may engage an outside reviewer to perform an EQR.

Independence, Integrity, and Objectivity

Like the original proposal, the reproposed standard required the reviewer to be independent of the company, perform the review with integrity, and maintain objectivity. Comments on the reproposal focused on two provisions regarding objectivity—the prohibition against the reviewer supervising the engagement team and the two-year "cooling-off" period before the engagement partner could perform the EQR.

Supervision of the Engagement Team

The reproposed standard provided that to maintain objectivity the engagement quality reviewer should not, among other things, "supervise the engagement team with respect to the engagement subject to the engagement quality review." The phrase "subject to the engagement quality review" was intended to clarify that partners with leadership responsibilities in a firm, region, service, or industry practice are not, solely because of those responsibilities, precluded from reviewing any engagement performed by their subordinates in the firm. Some commenters believed that the phrase "subject to the engagement quality review" was not sufficient to clarify this point.

After considering these comments, the Board has decided that the express prohibition against "supervis[ing] the engagement team with respect to the engagement subject to the engagement quality review" is not necessary to effectuate the Board's intent. The remaining two criteria for maintaining objectivity in paragraph 7 of AS No. 7—not making decisions on behalf of the engagement team and not assuming any responsibilities of the engagement team—are sufficient to preclude those involved in the engagement from serving as the engagement quality reviewer.[19] For example, partners (including the engagement

---

[17] Footnote 18 on page 9 of the original release stated, "The determination of what constitutes the appropriate level of knowledge and competence should be based on the circumstances of the engagement, including the size or complexity of the business."

[18] In addition, to simplify the text of AS No. 7, the Board replaced the phrase "person with overall responsibility for the engagement" with the term "engagement partner." Footnote 3 of AS No. 7 explains that the term "engagement partner" has the same meaning as the phrases the "auditor with final responsibility for the audit," as described in AU sec. 311, *Planning and Supervision*, and the "practitioner-in-charge of an engagement," as described in PCAOB interim quality control standard QC sec. 40, *The Personnel Management Element of a Firm's System of Quality Control-Competencies Required by a Practitioner-in-Charge of an Attest Engagement*. Because all of these terms refer to the same person, this change does not alter the meaning of the EQR standard.

[19] AS No. 7 does not prohibit the engagement team from consulting with the reviewer, as long as the reviewer maintains his or her objectivity in accordance with paragraph 7. As noted in the reproposing release, such consultations may contribute to audit quality. In addition, one commenter

(continued)

partner and other partners on larger engagements), managers, and others who supervise engagement personnel on the audit under review would not qualify under the remaining criteria because they have assumed responsibilities of the engagement team. At the same time, removing the phrase "supervise the engagement team" from AS No. 7 should further clarify that those in leadership positions in the firm who did not make decisions for or assume responsibilities of the engagement team may perform the EQR.

The Two-Year "Cooling-Off" Period

The reproposed standard included a provision prohibiting an engagement partner from serving as the engagement quality reviewer for at least two years following his or her last year as the engagement partner.[20] The Board included the "cooling-off" period because it believed that it would be harder for an engagement partner who has had overall responsibility for the audit for at least a year to perform the review with the necessary level of objectivity. While a number of commenters expressed general support for a two-year "cooling-off" period, some believed that it could impose an undue hardship on smaller firms, and suggested a shorter "cooling-off" period.

After considering these comments, the Board continues to believe that a "cooling-off" period will be beneficial to audit quality and that a two-year period appropriately safeguards objectivity without imposing unnecessary hardship on most firms. At the same time, the Board recognizes that compliance with this requirement could be difficult for smaller firms with fewer personnel. In its independence rules, the Securities and Exchange Commission ("SEC") exempted certain smaller firms from the audit partner rotation requirements. Specifically, Rule 2-01(c)(6)(ii) of Regulation S-X provides an exemption for firms with fewer than five issuer audit clients and fewer than ten partners, provided the Board "conducts a review at least once every three years of each of the audit client engagements that would result in a lack of auditor independence under" the SEC partner rotation requirements. The Board believes that this exemption—including the provision regarding Board inspections—also describes an appropriate exemption from the "cooling-off" requirement in the EQR standard. Accordingly, firms that qualify for the exemption from the SEC partner rotation requirements will also be exempt from the "cooling-off" period under AS No. 7.

D. EQR Process

The Board's goal in proposing an EQR standard was to strengthen the existing requirements for concurring reviews in order to promote a more meaningful review of the work performed by the engagement team. Accordingly, the original proposal described certain procedures that the reviewer was required to

---

(footnote continued)

asked the Board to clarify whether a reviewer may consult with the same personnel who previously consulted with the engagement team. The EQR standard does not prohibit the reviewer from holding discussions with such personnel. The reviewer may not, however, use personnel who previously consulted with the engagement team as assistants in performing the review unless they meet the objectivity and other qualification requirements of AS No. 7. To emphasize the requirement that assistants maintain objectivity, the Board added to paragraph 7 of AS No. 7 the phrase "and others who assist the reviewer."

[20] SEC independence rules allow engagement partners and concurring partners to serve for five consecutive years, after which they may not serve in either role for another period of five years. Within a five-year period, SEC independence rules do not impose a "cooling-off" period before the engagement partner can serve as the concurring partner. See Rule 2 - 01(c)(6)(i)(A) of Regulation S-X.

perform that were more specific than those in the existing requirements. In response to comments received on the original proposal, the Board clarified some of the specifically required procedures and included, in a separate section in the reproposed standard, tailored requirements for an EQR of an interim review.

In general, commenters believed that the reproposed standard described the requirements of the EQR more clearly than the original proposal. However, a number of commenters suggested additional modifications that, in their view, would further clarify the Board's intent and ensure consistency of the requirements with the statement of objective. As described below, after considering these comments, the Board has modified certain of these requirements.

Terminology Used to Describe the Required Procedures

Several commenters noted that the specifically required procedures in paragraphs 9, 10, 14, and 15 of the reproposed standard were described using different, but in some cases similar, terms such as "determine," "evaluate," "identify," "read," and "review," which some commenters found confusing. In one commenter's view, the terms "determine," "identify," and "evaluate" may require the reviewer to perform procedures that are similar in scope to the procedures performed by the engagement partner. The commenters asked the Board to clarify the terminology in these sections of the EQR standard.

While the Board does not believe that this terminology required the reviewer to perform procedures that are appropriately performed by the engagement partner, it does agree that the terminology should not be confusing. Accordingly, the Board reduced the number of terms used in AS No. 7, so that the required procedures in paragraphs 9, 10, 14, and 15 are described using two terms, "evaluate" and "review"—with one exception. Because AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*, requires the auditor to *read* other information in documents containing the financial statements to be filed with the SEC, paragraphs 10.g and 15.e of AS No. 7, like in the original and reproposed standards, also require the reviewer to *read* such other information and evaluate whether the engagement team has taken appropriate action with respect to any material inconsistencies with the financial statements or interim financial information, respectively, or material misstatements of fact of which the engagement quality reviewer is aware.

Review of Documentation

A number of commenters viewed the statement in paragraphs 9 and 14 of the reproposed standard that "the reviewer should perform the procedures . . . by reviewing documentation" as too open-ended.[21] Commenters were concerned that this provision could be interpreted to require the review of all of the engagement documentation.

The Board did not intend to require—and the reproposed provision did not require—the reviewer to review all of the engagement documentation. Nevertheless, to clarify this point, the Board has added the phrase "to the extent necessary to satisfy the requirements" of paragraphs 10 and 11, in an EQR of an audit, and 15 and 16, in an EQR of an interim review. As a practical matter, the reviewer cannot comply with the requirements of the EQR standard without holding discussions with the engagement partner and reviewing documentation. AS No. 7 requires the reviewer to hold sufficient discussions with the engagement partner and other members of the engagement team and

[21] That statement was intended, along with other changes in the reproposed standard, to clarify that the EQR is a review of the engagement team's work rather than a second audit. See page 17 of the reproposing release.

review sufficient documentation to perform the required procedures with due professional care. What is sufficient will necessarily depend on the facts and circumstances of the particular engagement under review. Auditors often document their significant judgments and conclusions in various summary documents, which could serve as a starting point for the reviewer's evaluation of the engagement team's work.

Paragraph 11 of the reproposed standard required the reviewer, in an EQR of an audit, to evaluate whether the engagement documentation that he or she reviewed when performing the procedures required by paragraph 10 indicates that the engagement team responded appropriately to significant risks and supports the conclusions reached by the engagement team with respect to the matters reviewed. One commenter suggested adding a requirement to paragraph 11 to evaluate engagement documentation for compliance with the requirements of Auditing Standard No. 3, *Audit Documentation* ("AS No. 3"). The Board originally proposed such a requirement but, in response to comments, did not include it in the reproposed standard.[22] The Board continues to believe that the documentation review requirements of paragraph 11 of the reproposed standard are appropriate and is adopting them as reproposed.

In an EQR of an interim review, paragraph 16 of the reproposed standard required the reviewer to evaluate whether the engagement documentation that he or she reviewed "[i]ndicates that the engagement team responded appropriately to significant risks," and "[s]upports the conclusions reached by the engagement team with respect to the matters reviewed." Some commenters noted that the auditor is not required to identify significant risks in a review of interim financial information and suggested not including a corresponding requirement in the EQR standard. The Board agrees and has not included this requirement in AS No. 7.

Specifically Required Procedures in the EQR of an Audit

Like the original proposal, the reproposed standard required certain procedures designed to give the reviewer the necessary information to evaluate the engagement team's significant judgments and conclusions. In response to comments on the original proposal, the Board made changes to these provisions in the reproposed standard that were intended to clarify that the reviewer performs the EQR by reviewing the engagement team's work, rather than by auditing the company himself or herself. Some commenters suggested that the specifically required procedures in the reproposed standard needed additional clarification.

In the view of several commenters, the reproposed standard did not clearly articulate the requirement for the reviewer to focus on the significant judgments made and the related conclusions reached by the engagement team. These commenters believed that the reproposed standard might be interpreted as requiring the review of all of the engagement team's judgments and conclusions. In response, AS No. 7 refers to "significant judgments" instead of "judgments" in describing certain of the required procedures.

The Board also clarified the wording of paragraph 10.b of the reproposed standard, which required the reviewer to "evaluate the risk assessments and audit responses . . . ." Some commenters expressed concern that this formulation required a review of audit responses for all areas of the audit. In response, AS No. 7 more specifically requires the reviewer to evaluate the engagement team's audit responses to significant risks identified by the engagement team and other significant risks identified by the engagement quality reviewer through

[22] Commenters suggested that such a requirement would duplicate the documentation review performed by the engagement partner.

performance of the procedures required by the EQR standard.[23] This change should help focus reviewers on areas of the audit that are more likely to contain a significant engagement deficiency.

Some commenters also expressed concern about the requirements in paragraphs 10.e and 10.f of the reproposed standard to determine whether appropriate matters have been communicated to the audit committee, management, and others; and to determine whether appropriate consultations have taken place on difficult or contentious matters. According to these commenters, a requirement to determine whether all of the communications or consultations have taken place rather than to evaluate the engagement team's communications and consultations was inconsistent with the objective of the EQR. In response, the Board replaced the phrase "determine if" with "based on the procedures required by this standard, evaluate whether." This change should tailor the specific requirements more closely to the overall objective. The Board also placed these paragraphs after the other required procedures in paragraph 10 to emphasize that the reviewer performs the evaluation required by these paragraphs based on the information obtained through the other procedures required by the EQR standard, and made a corresponding change in paragraph 15 for the EQR of an interim review.

Specifically Required Procedures in the EQR of an Interim Review

In response to comments on the original proposal, the Board included in the reproposed standard separate requirements for reviewing audits and interim reviews. The EQR requirements for interim reviews were based on the requirements for an EQR of an audit but were tailored to the different procedures performed in an interim review. A number of commenters were supportive of including separate requirements for the EQR of interim reviews in the reproposed standard. Some commenters, as discussed below, suggested modifications to those requirements.

Paragraph 15.a of the reproposed standard required the evaluation of engagement planning, including the consideration of the firm's recent engagement experience with the company and risks identified in connection with the firm's client acceptance and retention process; the company's business, recent significant activities, and related financial reporting issues and risks; and the nature of identified risks of material misstatement due to fraud. In one commenter's view, that paragraph might suggest that an interim review should include the same type of risk assessment as an audit. After considering this comment, the Board disagrees. Paragraph 15.a does not impose a requirement on the engagement team to identify risks as part of an interim review. Rather, it requires the reviewer to evaluate the engagement team's consideration of risks that have already been identified, e.g., during the preceding year's audit.

Additionally, three commenters recommended not requiring the EQR of an interim review to include an evaluation of judgments made about the severity and disposition of identified control deficiencies. In one commenter's view, such

---

[23] The term "significant risk" is defined in the Board's recently proposed auditing standard on identifying and assessing risks of material misstatement to mean a "risk of material misstatement that is important enough to require special audit consideration." PCAOB Release No. 2008-006, *Proposed Auditing Standards Related to the Auditor's Assessment of and Response to Risk and Conforming Amendments to PCAOB Standards* (October 21, 2008). The Board intends that definition to apply to the EQR standard as well. The Board included this definition in a note to paragraph 10.b of AS No. 7. If, at the conclusion of the above mentioned rulemaking, the Board adopts a definition of significant risk that is different from that proposed, the Board will make a conforming change to the EQR standard.

an evaluation would be inconsistent with the scope of an interim review. AU sec. 722.07, provides that the auditor:

> should perform limited procedures quarterly to provide a basis for determining whether he or she has become aware of any material modifications that, in the auditor's judgment, should be made to the disclosures about changes in internal control over financial reporting in order for the certifications to be accurate and to comply with the requirements of Section 302 of the Act.

In response, the Board modified the requirement in paragraph 15.b in AS No. 7 to be more consistent with the requirements of AU sec. 722. Accordingly, AS No. 7 requires the reviewer, among other things, to evaluate significant judgments made about any material modifications that should be made to the disclosures about changes in internal control over financial reporting.

Paragraph 15.c of the reproposed standard required the reviewer, in the EQR of an interim review, to "[r]ead the interim financial information for all periods presented and for the immediately preceding interim period, management's disclosure for the period under review, if any, about changes in internal control over financial reporting, and the related engagement report, if a report is to be filed with the SEC." Some commenters suggested that the reviewer should be required to read the engagement report even when the issuer is not required to include the report in an SEC filing. The Board agrees and, accordingly, changed "to be filed with the SEC" to "to be issued."[24]

E. Concurring Approval of Issuance

For an EQR of an audit, paragraph 12 of the reproposed standard provided that the reviewer "may provide concurring approval of issuance only if, after performing with due professional care the review required by this standard, he or she is not aware of a significant engagement deficiency." A note to the same paragraph describes a "significant engagement deficiency" as any of the four conditions described in the original proposal.[25] The reproposed requirements for providing concurring approval of issuance in an EQR of an interim review were the same, except that the first of these four conditions was modified in light of the differences between an interim review and an audit. Specifically, in an EQR of an interim review, the first condition was "the engagement team failed to perform interim review procedures necessary in the circumstances of the engagement" rather than "the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB."

Commenters generally believed that the concurring approval of issuance provision was appropriately described, though one recommended excluding the

---

[24] Additionally, one commenter recommended not requiring the reviewer to read interim financial information "for the immediately preceding interim period" because it was not clear, to this commenter, what one would review when performing the EQR for the first quarter. AU sec. 722.16 requires the accountant to apply analytical procedures to the interim financial information, which should include, among other things, comparing the quarterly interim financial information with comparable information for the immediately preceding interim period (i.e., the fourth quarter of the prior year, in a first quarter interim review). Because the Board believes the reproposed requirement is appropriately within the scope of an EQR for an interim review, it has retained it in AS No. 7.

[25] As included in the reproposed standard, these conditions were: (1) the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB; (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement; (3) the engagement report is not appropriate in the circumstances; or (4) the firm is not independent of its client.

reference to "due professional care" from the EQR standard because AU sec. 230, *Due Professional Care in the Performance of Work*, already imposes an overall requirement on auditors to exercise due professional care. Many commenters, however, were critical of the reproposing release's description of the reproposed requirement. A significant number of commenters objected to, or stated that they disagreed with, the statement in the reproposing release that the requirement to exercise due professional care imposes on the engagement quality reviewer essentially the same requirement as the "knows, or should know based on the requirements of this standard" formulation that was originally proposed. Some suggested that the Board is redefining the meaning of due professional care. One commenter stated that "[a] standard of 'knows, or should know' is akin to a strict liability requirement for engagement deficiencies," while another commenter suggested that the Board "clarify that in this context, 'due professional care' is not a negligence standard."

After considering the comments, the Board is adopting the concurring approval of issuance requirement as reproposed. While auditors are already required to exercise due professional care in discharging their responsibilities, comments, as noted above and in the reproposing release, have reflected some confusion about the applicable standard of care in an EQR. Accordingly, reference to due professional care in the requirement is appropriate.

The Board is not redefining due professional care in the context of the EQR standard. As the Board noted in the reproposing release, AU sec. 230 describes due professional care as "reasonable care and diligence" and makes clear that an auditor who acts negligently, i.e., without "reasonable care and diligence," breaches the duty to exercise due professional care.[26] Due professional care, as described in AU sec. 230, imposes neither a strict liability nor an actual knowledge standard. The Board intends the term to mean "reasonable care and diligence," as described in AU sec. 230.

The application of a negligence standard to the concurring approval of issuance provision means, as noted in the reproposing release, that "a reviewer cannot evade responsibility because, as a result of an inadequate review, he or she did not discover a problem that a reasonably careful and diligent review would have revealed."[27] For that reason, the provision requires the reviewer to perform the required review with due professional care as a prerequisite to providing concurring approval of issuance. A qualified reviewer who has done so will, necessarily, have discovered any significant engagement deficiencies that could reasonably have been discovered under the circumstances. Accordingly, under AS No. 7, such a reviewer may provide concurring approval of issuance if "he or she is not aware of a significant engagement deficiency." Because a reviewer who has not performed the required review with due professional care might not have discovered any significant engagement deficiencies that could reasonably have been discovered under the circumstance—si.e., those the reviewer reasonably should know about—such a reviewer may not, consistent with the standard, provide concurring approval of issuance.

---

[26] See AU sec. 230.03.

[27] Of course, to impose the more severe sanctions authorized under the Act, such as a permanent bar or permanent revocation of registration, the Board must establish "(A) intentional or knowing conduct, including reckless conduct, that results in violation of the applicable statutory, regulatory, or professional standard; or (B) repeated instances of negligent conduct, each resulting in a violation of the applicable statutory, regulatory, or professional standard." Section 105(c)(5) of the Act; see also Rules on Investigations and Adjudications, PCAOB Release No. 2003-015, Appendix 2 at A2-76 (September 29, 2003) (discussing Section 105(c)(5)).

F. Documentation of the EQR

The reproposed standard required the EQR documentation to contain sufficient information to identify: who performed the review, the documents reviewed, whether and when concurring approval of issuance was provided or the reasons for not providing the approval, and the significant discussions held, including the details of such discussions. These provisions were intended to respond to comments expressing concern that the originally proposed documentation requirements were overly detailed and would result in duplication of the engagement team's work. Some commenters reiterated their concerns that some of the reproposed requirements were duplicative of requirements to document the engagement itself or overly burdensome.

The Board continues to believe that it is necessary to strengthen the documentation requirements in the interim standard to provide for an informative record of the work performed during the EQR. At the same time, the Board has reconsidered its approach to the documentation requirement in light of the comments received. As described below, the Board has added a general requirement that places the specific requirements in the context of the overall purpose of EQR documentation—to provide a record of how the reviewer carried out the review in accordance with the standard's requirements.

Specifically, paragraph 19 of AS No. 7 includes a requirement for the engagement documentation to contain sufficient information to enable an experienced auditor,[28] having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of the standard.[29] This provision is similar to the audit documentation requirement in paragraph 6 of AS No. 3, and should clarify how the more specific requirements are meant to apply in particular circumstances.

For example, if a reviewer identified a significant engagement deficiency to be addressed by the engagement team, the engagement team should document its response to the identified deficiency in accordance with AS No. 3. Because AS No. 7 does not require duplication of documentation prepared by the engagement team, the engagement quality reviewer does not have to separately document the engagement teams response. Rather, the EQR documentation should contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand, e.g., the significant deficiency identified, how the reviewer communicated the deficiency to the engagement team, why such matter was important, and how the reviewer evaluated the engagement team's response. Similarly, if the reviewer participated in the discussion of the potential for material misstatement due to fraud,[30] and the engagement team documented the discussion in accordance with AS No. 3, AS No. 7 only requires the engagement quality reviewer or reviewer's assistants to prepare separate documentation if the documentation prepared by the engagement team does not contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of AS No. 7.

---

[28] As described in paragraph 6 of AS No. 3, "[a]n experienced auditor has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry."

[29] Additionally, for clarity of presentation, the Board moved the requirement to include documentation of an EQR in the engagement documentation from paragraph 19 to a new paragraph 20 in AS No. 7.

[30] See paragraph .14 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

In response to comments, the Board also considered whether modifications were necessary to the specific requirements. First, the Board received several comments related to the provisions of reproposed paragraph 19.b, which required the EQR documentation to contain information sufficient to identify the documents reviewed. One commenter believed that a reviewer "may feel compelled to engage in an unnecessary review of additional documents in order to compile a more 'complete' list." Conversely, another commenter believed that the reviewer would be discouraged "to inspect one or more documents than he or she otherwise might or should, thus reducing the quality of the EQR." Some commenters suggested clarifying how the documents should be identified as "reviewed" (i.e., electronically or manually), or suggested limiting the scope of paragraph 19.b to "significant documents."

After considering these comments, the Board has decided to include this requirement in AS No. 7. Identifying a document as reviewed by the engagement quality reviewer should not be unduly burdensome, and will provide an informative record. Such a record could provide registered firms, and the Board, with better information about the EQR, which can be used to evaluate and improve the EQR process. The Board believes it is unnecessary to require in the standard a particular document identification method, such as electronic or manual signature. Rather, this should be determined by each firm individually.

Second, a number of commenters believed that the requirement in paragraph 19.c to document details of significant discussions held by the reviewer, and others who assisted the reviewer, would not improve audit quality and that it would be costly to implement. These commenters suggested that the reviewer might not be able to determine whether a discussion is significant at the time a discussion is held and therefore feel compelled to document every discussion. In order to make clear that documentation of every discussion is neither required nor a prudent use of resources, the Board has not included an explicit requirement to document discussions in AS No. 7. As explained above, however, if documentation of a particular discussion is necessary "to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed . . . to comply with the provisions of th[e] standard," such documentation is required under the general documentation requirement.

G. Effective Date

In reproposing the standard, the Board intended to make a final standard effective for EQRs of interim reviews for fiscal years beginning after December 15, 2009 and for EQRs of audits for fiscal years ending on or after December 15, 2009. Several commenters were concerned that the proposed effective date would not allow for sufficient time to train the auditing firm's personnel and implement the new EQR requirements. These commenters recommended that the effective date of the EQR standard be linked to the beginning of an audit period to provide adequate time for registered firms to prepare for adoption. The Board agrees with the concerns expressed by the commenters and has decided to make AS No. 7 effective, subject to SEC approval, for both the EQR of audits and the EQR of interim reviews for fiscal years beginning on or after December 15, 2009.

H. Comparison with other EQR Standards

Three commenters suggested that the Board provide a comparison between the EQR standard and standards of other standard-setters on this subject. One

commenter noted that because issuer clients often represent a minor part of a smaller firm's audit client base, the audit methodology of such a firm may be based on other standards as well as PCAOB standards. In response, the Board has described certain significant differences between the Board's EQR standard and the analogous standards of the International Auditing and Assurance Standards Board ("IAASB")[31] and the Auditing Standards Board ("ASB") of the AICPA[32] in Appendix 3. Each section of the appendix also includes references to the relevant paragraphs of AS No. 7.

Appendix 3 is provided for informational purposes only. It describes only certain provisions of AS No. 7, and is not a substitute for the EQR standard itself. The full text of AS No. 7 is included in Appendix 1 of this release. Compliance with AS No. 7 is required for registered public accounting firms. Compliance with the analogous ASB and IAASB standards is not sufficient to meet the requirements of AS No. 7.

* * *

On the 28th day of July, in the year 2009, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

Appendix 1—Auditing Standard No. 7

Engagement Quality Review

[Supersedes SECPS Requirements of Membership 1000.08(f).]

Applicability of Standard

1. An engagement quality review and concurring approval of issuance are required for each audit engagement and for each engagement to review interim financial information conducted pursuant to the standards of the Public Company Accounting Oversight Board ("PCAOB").

Objective

2. The objective of the engagement quality reviewer is to perform an evaluation of the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued, in order to determine whether to provide concurring approval of issuance.[1]

Qualifications of an Engagement Quality Reviewer

3. The engagement quality reviewer must be an associated person of a registered public accounting firm. An engagement quality reviewer from the firm that issues the engagement report (or communicates an engagement conclusion, if no report is issued) must be a partner or another individual in an equivalent position. The engagement quality reviewer may also be an individual from outside the firm.[2]

4. As described below, an engagement quality reviewer must have competence, independence, integrity, and objectivity.

> Note: The firm's quality control policies and procedures should include provisions to provide the firm with reasonable assurance that the engagement quality reviewer has sufficient competence, independence, integrity, and objectivity to perform the engagement quality review in accordance with the standards of the PCAOB.

---

[1] In the context of an audit, "engagement report" refers to the audit report (or reports if, in an integrated audit, the auditor issues separate reports on the financial statements and internal control over financial reporting). In the context of an engagement to review interim financial information, the term refers to the report on interim financial information. An engagement report might not be issued in connection with a review of interim financial information. See paragraph .03 of AU section ("sec.") 722, *Interim Financial Information*.

[2] An outside reviewer who is not already associated with a registered public accounting firm would become associated with the firm issuing the report if *he or she* (rather than, or in addition to, his or her firm or other employer): (1) receives compensation from the firm issuing the report for performing the review or (2) performs the review as agent for the firm issuing the report. See PCAOB Rule 1001(p)(i) for the definition of an associated person of a registered public accounting firm.

Competence

5. The engagement quality reviewer must possess the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the engagement partner on the engagement under review.[3]

Independence, Integrity, and Objectivity

6. The engagement quality reviewer must be independent of the company, perform the engagement quality review with integrity, and maintain objectivity in performing the review.

> Note: The reviewer may use assistants in performing the engagement quality review. Personnel assisting the engagement quality reviewer also must be independent, perform the assigned procedures with integrity, and maintain objectivity in performing the review.

7. To maintain objectivity, the engagement quality reviewer and others who assist the reviewer should not make decisions on behalf of the engagement team or assume any of the responsibilities of the engagement team. The engagement partner remains responsible for the engagement and its performance, notwithstanding the involvement of the engagement quality reviewer and others who assist the reviewer.

8. The person who served as the engagement partner during either of the two audits preceding the audit subject to the engagement quality review may not be the engagement quality reviewer. Registered firms that qualify for the exemption under Rule 2-01(c)(6)(ii) of Regulation S-X, 17 C.F.R. 210.2-01(c)(6)(ii), are exempt from the requirement in this paragraph.

Engagement Quality Review for an Audit

Engagement Quality Review Process

9. In an audit engagement, the engagement quality reviewer should evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report. To evaluate such judgments and conclusions, the engagement quality reviewer should, to the extent necessary to satisfy the requirements of paragraphs 10 and 11: (1) hold discussions with the engagement partner and other members of the engagement team, and (2) review documentation.

10. In an audit, the engagement quality reviewer should:

a. Evaluate the significant judgments that relate to engagement planning, including—

— The consideration of the firm's recent engagement experience with the company and risks identified in connection with the firm's client acceptance and retention process,

---

[3] The term "engagement partner" has the same meaning as the phrases "auditor with final responsibility for the audit" in AU sec. 311, *Planning and Supervision*, and "practitioner-in-charge of an engagement" in PCAOB interim quality control standard QC sec. 40, *The Personnel Management Element of a Firm's System of Quality Control-Competencies Required by a Practitioner-in-Charge of an Attest Engagement*. QC sec. 40 describes the competencies required of a practitioner-incharge of an attest engagement.

— The consideration of the company's business, recent significant activities, and related financial reporting issues and risks, and

— The judgments made about materiality and the effect of those judgments on the engagement strategy.

b. Evaluate the engagement team's assessment of, and audit responses to—

— Significant risks identified by the engagement team, including fraud risks, and

— Other significant risks identified by the engagement quality reviewer through performance of the procedures required by this standard.

Note: A *significant risk* is a risk of material misstatement that is important enough to require special audit consideration.

c. Evaluate the significant judgments made about (1) the materiality and disposition of corrected and uncorrected identified misstatements and (2) the severity and disposition of identified control deficiencies.

d. Review the engagement team's evaluation of the firm's independence in relation to the engagement.

e. Review the engagement completion document[4] and confirm with the engagement partner that there are no significant unresolved matters.

f. Review the financial statements, management's report on internal control, and the related engagement report.

g. Read other information in documents containing the financial statements to be filed with the Securities and Exchange Commission ("SEC")[5] and evaluate whether the engagement team has taken appropriate action with respect to any material inconsistencies with the financial statements or material misstatements of fact of which the engagement quality reviewer is aware.

h. Based on the procedures required by this standard, evaluate whether appropriate consultations have taken place on difficult or contentious matters. Review the documentation, including conclusions, of such consultations.

i. Based on the procedures required by this standard, evaluate whether appropriate matters have been communicated, or identified for communication, to the audit committee, management, and other parties, such as regulatory bodies.

Evaluation of Engagement Documentation

11. In an audit, the engagement quality reviewer should evaluate whether the engagement documentation that he or she reviewed when performing the procedures required by paragraph 10—

---

[4] Paragraph 13 of PCAOB Auditing Standard No. 3, *Audit Documentation*, requires the auditor to identify all significant findings or issues in an engagement completion document.

[5] See paragraphs .04–.06 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*; AU sec. 711, *Filings Under Federal Securities Statutes*.

a. Indicates that the engagement team responded appropriately to significant risks, and

b. Supports the conclusions reached by the engagement team with respect to the matters reviewed.

Concurring Approval of Issuance

12. In an audit, the engagement quality reviewer may provide concurring approval of issuance only if, after performing with due professional care[6] the review required by this standard, he or she is not aware of a significant engagement deficiency.

Note: A *significant engagement deficiency* in an audit exists when (1) the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB, (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement, (3) the engagement report is not appropriate in the circumstances, or (4) the firm is not independent of its client.

13. In an audit, the firm may grant permission to the client to use the engagement report only after the engagement quality reviewer provides concurring approval of issuance.[7]

Engagement Quality Review for a Review of Interim Financial Information

Engagement Quality Review Process

14. In an engagement to review interim financial information, the engagement quality reviewer should evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued. To evaluate such judgments and conclusions, the engagement quality reviewer should, to the extent necessary to satisfy the requirements of paragraphs 15 and 16: (1) hold discussions with the engagement partner and other members of the engagement team, and (2) review documentation.

15. In a review of interim financial information, the engagement quality reviewer should:

a. Evaluate the significant judgments that relate to engagement planning, including the consideration of—

— The firm's recent engagement experience with the company and risks identified in connection with the firm's client acceptance and retention process,

— The company's business, recent significant activities, and related financial reporting issues and risks, and

---

[6] See AU sec. 230, *Due Professional Care in the Performance of Work*.

[7] Concurring approval of issuance by the engagement quality reviewer also is required when reissuance of an engagement report requires the auditor to update his or her procedures for subsequent events. In that case, the engagement quality reviewer should update the engagement quality review by addressing those matters related to the subsequent events procedures.

— The nature of identified risks of material misstatement due to fraud.

b. Evaluate the significant judgments made about (1) the materiality and disposition of corrected and uncorrected identified misstatements and (2) any material modifications that should be made to the disclosures about changes in internal control over financial reporting.

c. Perform the procedures described in paragraphs 10.d and 10.e.

d. Review the interim financial information for all periods presented and for the immediately preceding interim period, management's disclosure for the period under review, if any, about changes in internal control over financial reporting, and the related engagement report, if a report is to be issued.

e. Read other information in documents containing interim financial information to be filed with the SEC[8] and evaluate whether the engagement team has taken appropriate action with respect to material inconsistencies with the interim financial information or material misstatements of fact of which the engagement quality reviewer is aware.

f. Perform the procedures in paragraphs 10.h and 10.i

Evaluation of Engagement Documentation

16. In a review of interim financial information, the engagement quality reviewer should evaluate whether the engagement documentation that he or she reviewed when performing the procedures required by paragraph 15 supports the conclusions reached by the engagement team with respect to the matters reviewed.

Concurring Approval of Issuance

17. In a review of interim financial information, the engagement quality reviewer may provide concurring approval of issuance only if, after performing with due professional care the review required by this standard, he or she is not aware of a significant engagement deficiency.

Note: A *significant engagement deficiency* in a review of interim financial information exists when (1) the engagement team failed to perform interim review procedures necessary in the circumstances of the engagement, (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement, (3) the engagement report is not appropriate in the circumstances, or (4) the firm is not independent of its client.

18. In a review of interim financial information, the firm may grant permission to the client to use the engagement report (or communicate an engagement conclusion to its client, if no report is issued) only after the engagement quality reviewer provides concurring approval of issuance.

---

[8] See AU sec. 722.18f; AU sec. 711.

Documentation of an Engagement Quality Review

19. Documentation of an engagement quality review should contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of this standard, including information that identifies:

a. The engagement quality reviewer, and others who assisted the reviewer,

b. The documents reviewed by the engagement quality reviewer, and others who assisted the reviewer,

c. The date the engagement quality reviewer provided concurring approval of issuance or, if no concurring approval of issuance was provided, the reasons for not providing the approval.

20. Documentation of an engagement quality review should be included in the engagement documentation.

21. The requirements related to retention of and subsequent changes to audit documentation in PCAOB Auditing Standard No. 3, *Audit Documentation*, apply with respect to the documentation of the engagement quality review.

Appendix 2—Conforming Amendment to PCAOB Interim Quality Control Standards

QC sec. 20, "System of Quality Control for a CPA Firm's Accounting and Auditing Practice"

QC section ("sec.") 20, "System of Quality Control for a CPA Firm's Accounting and Auditing Practice" of the Board's interim quality control standards is amended as follows—

The third sentence of paragraph .18 of QC sec. 20 is replaced with the following sentence:

> These policies and procedures also should address engagement quality reviews pursuant to PCAOB Auditing Standard No. 7, *Engagement Quality Review*.

Appendix 3—Analysis of Significant Differences between the Requirements of Auditing Standard No. 7, *Engagement Quality Review*, of the PCAOB and the Analogous Standards of the IAASB, and the Auditing Standards Board of the AICPA

Introduction

This appendix includes an analysis of significant differences between Auditing Standard No. 7, *Engagement Quality Review* ("AS No. 7" or the "EQR standard") of the Public Company Accounting Oversight Board ("PCAOB"), and the analogous standards of the Auditing Standards Board ("ASB") of the American Institute of Certified Public Accountants ("AICPA"),[1] and the International Auditing and Assurance Standards Board ("IAASB").[2] This analysis may not represent the views of the ASB or IAASB regarding the interpretation of their standards.

Appendix 3 is provided for informational purposes only. It describes only certain provisions of AS No. 7, and is not a substitute for the standard itself. The full text of AS No. 7 is included in Appendix 1 of this release. Compliance with AS No. 7 is required for registered public accounting firms. Compliance with the analogous ASB and IAASB standards is not sufficient to meet the requirements of AS No. 7.

The Board has developed AS No. 7 to enhance the quality of the engagement quality review ("EQR") process by strengthening the provisions of the Board's interim standard.[3] Recently, the ASB and IAASB also updated their standards related to the EQR, and the Board considered information in the standards of the ASB and IAASB when developing its new EQR standard. As described in this appendix, AS No. 7 includes provisions that are similar in terminology and substance to those in the ASB and IAASB standards, and other provisions added as necessary by the Board. For example, the Board included certain provisions in AS No. 7 that are not included in the standards of the ASB or IAASB to: comply with the requirements of the Sarbanes-Oxley Act ("the Act"); respond to the feedback received on the interim standard from the Board's Standing Advisory Group ("SAG") and information obtained through PCAOB oversight of registered firms; and to ensure consistency of the provisions of AS No. 7 with the provisions and terminology of other relevant standards of the PCAOB.

Some of the provisions of the IAASB standards described in this appendix are included in the "Application and Other Explanatory Material" section of these standards. That section "does not in itself impose a requirement," but "is relevant to the proper application of the requirements of an ISA."[4] In contrast, the

[4] See paragraph A59 of ISA 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing*.

comparable provisions of AS No. 7 are included in the standard, and establish requirements.

Applicability

PCAOB

Section 103 of the Act requires the Board to adopt an EQR standard for audit engagements.[5] Because of the importance of interim financial information to investors, the Board has decided to include a requirement to perform an EQR for reviews of interim financial information performed in accordance with AU section ("sec.") 722, *Interim Financial Information*, ("interim reviews") in the EQR standard. Accordingly, AS No. 7 requires an EQR and concurring approval of issuance for each audit engagement and for each interim review engagement conducted pursuant to the standards of the PCAOB.[6]

ASB

SQCS No. 7 does not require an EQR for any type of engagement. Accounting firms should determine whether an EQR is required for any engagement.[7]

IAASB

ISQC 1 requires an EQR only for audits of financial statements of listed entities. Accounting firms should determine whether an EQR is required for any other engagements.[8]

Qualifications of a Reviewer

PCAOB

Associated Person—In order to obtain cooperation with the Board of the individuals that perform an EQR,[9] the Board included in AS No. 7 a requirement, according to which the engagement quality reviewer must be an associated person of a registered public accounting firm.[10]

A Reviewer from Outside the Firm—Similar to the standards of the ASB and IAASB, AS No. 7 allows a qualified individual from outside the firm to perform an EQR.[11]

Partner or Person in an Equivalent Position—Because the EQR is intended to be an objective "second look" at work performed by the engagement team, the reviewer should possess sufficient authority to be able to withstand pressure

---

[5] See Section 103(a)(2)(A)(ii) of the Act.

[6] See paragraph 1 of AS No. 7.

[7] See paragraphs 80-81 and 83 of SQCS No. 7.

[8] See paragraphs 35(a)-(b) of ISQC 1.

[9] A registered public accounting firm has an obligation to secure and enforce consents to cooperate with the Board from each associated person of the firm, see Section 102(b)(3) of the Act, including those who become associated with the firm by performing the review. The Board also may directly sanction any such person who fails to cooperate in an investigation or inspection. See Section 105(b)(3) of the Act and PCAOB Rules 5110 and 4006.

[10] See paragraph 3 of AS No. 7.

[11] See id..

from the engagement partner or other firm personnel, such as members of the firm's national office. The Board believes that concerns about authority will most often arise when the reviewer and the engagement partner are from the same firm. Therefore, the Board included in AS No. 7 the requirement that an in-house reviewer—but not one from outside the firm—be a partner or another individual in an equivalent position.[12]

General Competence Requirement—The Board included in AS No. 7 a requirement for the reviewer to possess the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the engagement partner on the engagement under review.[13] Without such knowledge and competence, the reviewer would not be able to appropriately evaluate the significant judgments made and related conclusions reached by the engagement team in an audit or an interim review.

Independence, Integrity, and Objectivity—The reviewer must comply with all applicable independence requirements,[14] and perform the review with integrity and objectivity.[15] The engagement quality reviewer should be able to take a step back and conduct the review from the perspective of an outsider looking in.

Accordingly, AS No. 7 requires that the firm's quality control policies and procedures should include provisions to provide the firm with reasonable assurance that the engagement quality reviewer has sufficient competence, independence, integrity, and objectivity to perform the engagement quality review in accordance with the standards of the PCAOB.[16] As described later, the ASB and IAASB contain similar provisions, except the standards of IAASB do not include the direction on independence for the reviewer.

While AS No. 7 does not contain the direction included in the standards of ASB and IAASB that the firm's policies and procedures should establish the degree to which a reviewer can be consulted on the engagement without compromising his or her objectivity,[17] or provide for the replacement of the reviewer when the reviewer's ability to perform an objective review has been, or may be, impaired,[18] such direction is implicit in the requirement of AS No. 7 that a reviewer must maintain objectivity in performing the EQR.[19] Importantly, AS No. 7 provides direction on maintaining objectivity, according to which the engagement quality reviewer and others who assist the reviewer should not make decisions on behalf of the engagement team or assume any of the responsibilities of the engagement team.[20]

"Cooling-off" period—An engagement quality reviewer is expected to take a fresh, objective look at the engagement. The Board believes that it would be harder for an engagement partner, who has had overall responsibility for the

---

[12] See id.

[13] See paragraph 5 of AS No. 7. PCAOB interim quality control standards describe the competencies required of a person who has the overall responsibility for an engagement (or any practitioner-in-charge of an attest engagement). See QC sec. 40, *The Personnel Management Element of a Firm's System of Quality Control- Competencies Required by a Practitioner-in-Charge of an Attest Engagement*.

[14] See, e.g., Rule 2-01(c)(6) of Regulation S-X, 17 C.F.R. § 210.2-01(c)(6) (subjecting the engagement quality reviewer to the five-year partner rotation requirement).

[15] See ET sec. 102, *Integrity and Objectivity*, and ET sec. 191, *Ethics Rulings on Independence, Integrity, and Objectivity*.

[16] See paragraph 4 of AS No. 7.

[17] See paragraph 96 of SQCS No. 7; paragraph 39(b) of ISQC 1.

[18] See paragraph 97 of SQCS No. 7; paragraph 41 of ISQC 1.

[19] See paragraph 6 of AS No. 7.

[20] See paragraph 7 of AS No. 7.

audit for a year or more, to perform the EQR with the necessary level of objectivity. Accordingly, AS No. 7 includes a requirement, according to which the reviewer may not be the person who served as the engagement partner during either of the two audits preceding the audit subject to the EQR. (Registered firms that qualify for the exemption under Rule 2- 01(c)(6)(ii) of Regulation S-X, 17 C.F.R. §210.2-01(c)(6)(ii), are exempt from this requirement.)[21]

ASB

SQCS No. 7 requires an auditing firm to establish the engagement quality reviewer qualifications, including those related to experience, authority, and objectivity.[22] SQCS No. 7 describes the engagement quality reviewer as a partner, other person in the firm, qualified external person, or a team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to perform the EQR.[23] According to SQCS No. 7, what constitutes sufficient and appropriate technical experience, and authority depends on the circumstances of the engagement.[24]

SQCS No. 7 does not include a "cooling-off" period, or a requirement for the reviewer to be an associated person of a registered public accounting firm.

Similar to AS No. 7, SQCS No. 7 requires that the firm establish policies and procedures designed to maintain the objectivity of the reviewer, and that such policies and procedures provide that the reviewer should satisfy the independence requirements relating to the engagements reviewed.[25] Unlike AS No. 7, SQCS No. 7 does not provide a specific direction on maintaining objectivity. Instead, SQCS No. 7 provides examples of policies and procedures for maintaining the objectivity of the reviewer.[26]

IAASB

ISQC 1 requires an auditing firm to establish the engagement quality reviewer qualification requirements, including those related to experience, authority, and objectivity.[27] The engagement quality reviewer is described as a partner, other person in the firm, suitably qualified external person, or a team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to objectively evaluate the significant judgments the engagement team made and the conclusions it reached in formulating the report.[28] The application materials in ISQC 1 state that what constitutes sufficient and appropriate technical expertise, experience and authority depends on the circumstances of the engagement.[29]

ISQC 1 and ISA 220 do not include reviewer independence or "cooling-off" requirements, or a requirement for the reviewer to be an associated person of a registered public accounting firm.

Similar to AS No. 7, ISQC 1 requires that the firm establish policies and procedures designed to maintain the objectivity of the reviewer.[30] Unlike AS No. 7,

[30] See paragraph 40 of ISQC 1.

the IAASB standards do not provide specific direction on maintaining objectivity. Instead, the application materials of ISQC 1 discuss policies and procedures for maintaining the objectivity of the reviewer.[31]

Engagement Quality Review for an Audit

Engagement Quality Review Process

PCAOB

Similar to the standards of the ASB and IAASB, AS No. 7 requires the reviewer to evaluate the significant judgments made and the related conclusions reached by the engagement team in forming the overall conclusion on the engagement and in preparing the engagement report; and to carry out the review through discussions with those performing the engagement and the review of documentation.[32]

Further, AS No. 7 specifically requires the reviewer, among other things, to evaluate:

- The significant judgments that relate to engagement planning;[33]
- The engagement team's assessment of and audit responses to significant risks, including fraud risks;[34] and
- The significant judgments made about identified misstatements and control deficiencies.[35]

Also, AS No. 7 contains a requirement, similar to a requirement for audits of listed entities in ISA 220, according to which the reviewer, based on the procedures required by the standard, should evaluate whether appropriate consultations have taken place on difficult or contentious matters, and review the documentation, including conclusions, of such consultations.[36]

According to PCAOB Rule 3520, *Auditor Independence*, "[a] registered public accounting firm and its associated persons must be independent of the firm's audit client throughout the audit and professional engagement period." Because of the importance of compliance with PCAOB and Securities and Exchange Commission ("SEC") independence requirements, AS No. 7 requires the reviewer to review the engagement team's evaluation of the firm's independence in relation to the engagement.[37]

In 2004, the Board adopted Auditing Standard No. 3, Audit Documentation ("AS No. 3"). According to paragraph 13 of AS No. 3, the auditor must identify all significant findings or issues in an engagement completion document. AS No. 7 requires the reviewer to review the engagement completion document and confirm with the person who has overall responsibility for the engagement that there are no significant unresolved matters.[38]

---

[31] See paragraph A49 of the Application and Other Explanatory Materials of ISQC 1.

[32] See paragraph 9 of AS No. 7.

[33] See paragraph 10.a of AS No. 7.

[34] See paragraph 10.b of AS No. 7.

[35] See paragraph 10.c of AS No. 7.

[36] See paragraph 10.h of AS No. 7.

[37] See paragraph 10.d of AS No. 7.

[38] See paragraph 10.e of AS No. 7.

Similar to the standards of the ASB and IAASB, AS No. 7 requires the reviewer to review the financial statements and the related engagement report.[39] Additionally, because an integrated audit includes an audit of internal control over financial reporting,[40]AS No. 7 requires the reviewer to review management's report on internal control.[41]

An issuer may publish various documents that contain information in addition to audited financial statements and the auditor's report thereon. The auditor is required to read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements.[42] Accordingly, AS No. 7 requires the reviewer to read other information in documents containing the financial statements to be filed with the SEC and evaluate whether the engagement team has taken appropriate action with respect to any material inconsistencies with the financial statements or material misstatements of fact of which the engagement quality reviewer is aware.[43]

Finally, because of the importance to the audit process of effective communication between the auditor and those charged with governance, AS No. 7 requires the reviewer, based on the procedures required by the standard, to evaluate whether appropriate matters have been communicated, or identified for communication, to the audit committee, management, and other parties, such as regulatory bodies.[44]

ASB

Similar to AS No. 7, SQCS No. 7 requires that the EQR procedures include an objective evaluation of the significant judgments made by the engagement team and the conclusions reached in formulating the report.[45] The EQR performed in accordance with SQCS No. 7 should include: reading the financial statements or other subject matter information and the report and considering whether the report is appropriate; review of selected documentation; and a discussion with the engagement partner regarding significant findings and issues.[46]

In addition to the required procedures summarized in the preceding paragraph, an EQR performed in accordance with SQCS No. 7 may include consideration of certain other matters, examples of which are provided in the standard. SQCS No. 7 also provides examples of significant judgments that could be made by the engagement team.[47]

IAASB

The EQR procedures required by the standards of the IAASB are similar to those required by the ASB.[48] Additionally, for audits of listed entities, the IAASB standards require the reviewer to consider: the engagement team's evaluation of the firm's independence in relation to the engagement; and whether

[42] See AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*.

[43] See paragraph 10.g of AS No. 7.

[44] See paragraph 10.i of AS No. 7.

[45] See paragraph 85 of SQCS No. 7.

[46] See paragraphs 86 and 87 of SQCS No. 7.

[47] See paragraphs 88 and 89 of SQCS No. 7.

[48] See paragraph 37 of ISQC 1; paragraph 20 of ISA 220.

appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters, and the conclusions arising from those consultations.[49]

Evaluation of Engagement Documentation

PCAOB

AS No. 7 includes a documentation review requirement that is similar to the requirement for audits of listed entities in the IAASB standards. According to AS No. 7, the reviewer should evaluate whether the engagement documentation that he or she reviewed when performing the required EQR procedures indicates that the engagement team responded appropriately to significant risks and supports the conclusions reached by the engagement team with respect to the matters reviewed.[50]

ASB

Unlike AS No. 7, SQCS No. 7 does not require the reviewer to evaluate whether the engagement documentation satisfies certain criteria. Instead, SQCS No. 7 states that an EQR may include consideration of whether working papers selected for review reflect the work performed in relation to the significant judgments and support the conclusions reached.[51]

IAASB

Similar to AS No. 7, the IAASB standards require, for audits of financial statements of listed entities, that the reviewer consider whether audit documentation selected for review reflects the work performed in relation to the significant judgments and supports the conclusions reached.[52]

Concurring Approval of Issuance and Resolution of Differences of Opinion

PCAOB

Under the Act,[53] the Board's standard on EQR must require concurring approval of issuance of each audit report. AS No. 7 states that the engagement quality reviewer may provide concurring approval of issuance only if, after performing with due professional care the review required by the standard, he or she is not aware of a significant engagement deficiency.[54] The firm may grant permission to the client to use the engagement report only after the engagement quality reviewer provides concurring approval of issuance.[55]

Unlike the standards of the ASB and IAASB, AS No. 7 does not include an explicit provision for addressing differences of opinion. Firms may develop their

---

[49] See paragraphs 38(a) and 38(b) of ISQC 1; paragraphs 21(a) and 21(b) of ISA 220.

[50] See paragraph 11 of AS No. 7.

[51] See paragraph 88 of SQCS No. 7.

[52] See paragraph 38(c) of ISQC 1; paragraph 21(c) of ISA 220.

[53] See Section 103(a)(2)(A)(ii) of the Act.

[54] According to paragraph 12 of AS No. 7, "A significant engagement deficiency in an audit exists when (1) the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB, (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement, (3) the engagement report is not appropriate in the circumstances, or (4) the firm is not independent of its client."

[55] See paragraph 13 of AS No. 7.

own procedures for resolving such differences. Ultimately, however, under the standard, the reviewer may not provide concurring approval of issuance if there remains a significant engagement deficiency. If no concurring approval is provided, AS No. 7 requires that the EQR documentation include information that identifies the reasons for not providing the approval.

ASB

SQCS No. 7 does not include a requirement for the engagement quality reviewer to provide concurring approval of issuance. Instead, SQCS No. 7 requires the EQR be completed before the engagement report is released.[56] According to SQCS No. 7, when the engagement quality reviewer makes recommendations that the engagement partner does not accept and the matter is not resolved to the reviewer's satisfaction, the firm's procedures for dealing with differences of opinion apply.[57] The firm's policies and procedures should require that conclusions reached be documented and implemented, and the engagement report not be released until the matter, on which the difference of opinion has arisen, is resolved.[58]

IAASB

The standards of the IAASB do not include a requirement for the engagement quality reviewer to provide concurring approval of issuance. Instead, the IAASB standards require that the engagement partner should not date the auditor's report until the completion of the EQR.[59] If differences of opinion arise between the engagement partner and the engagement quality reviewer, ISA 220 requires the engagement team to follow the firm's policies and procedures for dealing with and resolving differences of opinion.[60] ISQC 1 requires the firm to establish policies and procedures for dealing with and resolving differences of opinion between the engagement partner and the engagement quality reviewer. Such policies and procedures shall require that conclusions reached be documented and implemented, and the report not be dated until the matter is resolved.[61]

Documentation of an EQR

PCAOB

Because of deficiencies in the documentation of concurring reviews, the Board decided to strengthen the existing documentation requirements. AS No. 7 requires that documentation of an EQR should contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of the standard, including information that identifies: the engagement quality reviewer, and others who assisted the reviewer; the documents reviewed by the engagement quality reviewer and others who assisted the reviewer; and the date the engagement quality reviewer provided concurring approval of issuance

[60] See paragraph 22 of ISA 220.

[61] See paragraphs 43-44 of ISQC 1.

or, if no concurring approval of issuance was provided, the reasons for not providing the approval.[62]

Unlike the standards of the ASB or the IAASB, AS No. 7 requires that the documentation of an EQR be included in the engagement documentation and provides requirements related to retention of and subsequent changes to the EQR documentation.[63]

ASB

According to SQCS No. 7, the documentation of an EQR should state that the procedures required by the firm's policies on EQR have been performed, the EQR has been completed before the report is released, and the reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.[64]

SQCS No. 7 requires that the firm should: establish procedures designed to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation; and establish policies and procedures for the retention of engagement documentation for a period sufficient to meet the needs of the firm, professional standards, laws, and regulations.[65]

IAASB

The engagement quality reviewer is required to document that the procedures required by the firm's policies on the EQR have been performed, the EQR has been completed on or before the date of the auditor's report, and the reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.[66]

ISQC 1 requires that the firm should establish policies and procedures related to the completion of the assembly of final engagement files; confidentiality, safe custody, integrity, accessibility and retrievability of engagement documentation; and retention of engagement documentation.[67]

PCAOB Release No. 2010-004

Auditing Standards Related to the Auditor's Assessment of and Response to Risk and Related Amendments to PCAOB Standards

PCAOB Release No. 2010-004
August 5, 2010
PCAOB Rulemaking
Docket Matter No. 026

Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting eight auditing standards related to the auditor's assessment of and response to risk that will supersede six of the Board's interim auditing standards and related amendments to PCAOB standards. The eight auditing standards and related amendments will be applicable to all registered firms conducting audits in accordance with PCAOB standards.

Board Contacts

Keith Wilson, Deputy Chief Auditor (202/207-9134, wilsonk@pcaobus.org), Jessica Watts, Associate Chief Auditor (202/207-9376, wattsj@pcaobus.org), Hasnat Ahmad, Assistant Chief Auditor (202/2079349, ahmadh@pcaobus.org), Diane Jules, Assistant Chief Auditor (202/207-9111, julesd@pcaobus.org), and Hong Zhao, Assistant Chief Auditor (202/207-9355, zhaoh@pcaobus.org).

* * * * *

I. Introduction

The Board is adopting eight auditing standards and related amendments that benefit investors by establishing requirements that enhance the effectiveness of the auditor's assessment of and response to the risks of material misstatement in an audit.

In an audit performed in accordance with PCAOB standards, risk underlies the entire audit process, including the procedures that the auditor performs to support the opinion expressed in the auditor's report. Most of the Board's interim auditing standards relating to assessing and responding to risk in an audit of financial statements were developed in the 1980s.[1] Those standards described in general terms the auditor's responsibilities for assessing and responding to risk. They directed auditors to vary the amount of audit attention related to particular financial statement accounts based on the risks presented by them. The

[1] Examples of those standards include AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, and AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*.

standards also allowed the auditor to use tests of controls to reduce substantive testing.[2]

A number of factors and events led the Board to reexamine those standards and seek to improve them. These included the widespread use of risk-based audit methodologies; recommendations to the profession on ways in which auditors could improve risk assessment;[3] advice from the Board's Standing Advisory Group ("SAG");[4] adoption of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*; and observations from the Board's oversight activities.

On October 21, 2008, the Board proposed a set of auditing standards to update the requirements for assessing and responding to risk in an audit ("the original proposed standards").[5] The original proposed standards were intended to improve the auditing standards and to benefit investors by establishing requirements that enhance the effectiveness of auditors' assessment of and response to risk through:

- Performing procedures that provide a reasonable basis for identifying and assessing risks of material misstatement, whether due to error or fraud
- Tailoring the audit to respond appropriately to the risks of material misstatement
- Making a comprehensive evaluation of the evidence obtained during the audit to form the opinion(s) in the auditor's report

The Board also sought to emphasize the auditor's responsibilities for consideration of fraud by incorporating requirements for identifying and responding to the risks of material misstatement due to fraud ("fraud risks") and evaluating audit results from the existing PCAOB standard, AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.[6] Incorporating these requirements makes clear that the auditor's responsibilities for assessing and responding to fraud risks are an integral part of the audit process rather than a separate, parallel process. It also benefits investors by prompting auditors to make a more thoughtful and thorough assessment of fraud risks and to develop appropriate audit responses.

Improvements in the standards related to risk assessment also should enhance integration of the audit of financial statements with the audit of internal control over financial reporting ("audit of internal control") by articulating a process for identifying and assessing risks of material misstatement that applies to both portions of the integrated audit when the auditor is performing an integrated audit.

Many commenters on the original proposed standards were supportive of the Board's efforts to update its risk assessment requirements and offered numerous suggestions for changing the original proposed standards. After considering

[3] See, e.g., Public Oversight Board, Panel on Audit Effectiveness ("PAE"), *Report and Recommendations* (August 31, 2000). For a summary of the PAE's recommendations related to risk assessment, see PCAOB Standing Advisory Group ("SAG") Meeting Briefing Paper, "Risk Assessment in Financial Statement Audits" (February 16, 2005), Appendix A, available at: http://pcaobus.org/News/Events/Pages/02162005_SAGMeeting.aspx.

[4] Webcasts of SAG meetings are available on the Board's Web site at: http://pcaobus.org/News/Webcasts/Pages/default.aspx.

[5] PCAOB Release No. 2008-006, *Proposed Auditing Standards Related to the Auditor's Assessment of and Response to Risk* (October 21, 2008).

[6] Paragraphs .14–.51 and paragraphs .68–.78 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

all of the comments received on those standards, the Board made numerous refinements to the original proposed standards. Because the standards address many fundamental aspects of the audit process and are expected to serve as a foundation for future standards-setting, the Board reproposed the standards for public comment on December 17, 2009 ("the reproposed standards").[7]

The Board received 23 comment letters on the reproposed standards.[8] The Board discussed the comments received with the SAG on April 8, 2010.[9] Most commenters were generally supportive of the reproposed standards and the improvements made to those standards. Many commenters also offered suggestions to improve the standards, which the Board has carefully analyzed.

After consideration of the comments received, the Board has refined the standards to provide additional clarity. The Board has decided to adopt the following standards for assessing and responding to risk in an audit and the related amendments to PCAOB standards:

- Auditing Standard No. 8, *Audit Risk*
- Auditing Standard No. 9, *Audit Planning*
- Auditing Standard No. 10, *Supervision of the Audit Engagement*
- Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*
- Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*
- Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*
- Auditing Standard No. 14, *Evaluating Audit Results*
- Auditing Standard No. 15, *Audit Evidence*

Appendices 1–8 of this release present the auditing standards, and Appendix 9 presents the related amendments to PCAOB standards.

II. Notable Areas of Change in the Standards

The changes made to the reproposed standards reflect refinements rather than significant shifts in approach. This section describes the areas of change to the reproposed standards that are most notable, e.g., because they affect multiple standards or multiple sections of an individual standard. Appendix 10 discusses these and other changes in more detail.

A. Planning and Supervision Standards

The reproposed standards included a standard covering both audit planning and supervision. Some commenters observed that audit planning and supervision should be covered in separate standards.

Audit planning and supervision, although related in some respects, are distinct activities that should be presented in separate standards. Accordingly,

---

[7] PCAOB Release No. 2009-007, *Proposed Auditing Standards Related to the Auditor's Assessment of and Response to Risk* (December 17, 2009).

[8] Comments on the original proposed standards and the reproposed standards are available on the Board's Web site at: http://pcaobus.org/Rules/Rulemaking/Pages/Docket026.aspx.

[9] A transcript of the portion of the meeting that related to the reproposed standards is available on the Board's Web site at: http://pcaobus.org/Rules/Rulemaking/Pages/Docket026.aspx.

the Board has divided the planning and supervision standard into separate standards for planning and for supervision. Presenting the requirements for planning and supervision in separate standards is a technical change that, by itself, does not affect the auditor's responsibilities for planning the audit or supervision of the work of engagement team members as described in the reproposed standards.

B. Requirements for Multi-location Audits

The reproposed standard on audit planning and supervision included requirements regarding establishing the scope of testing of individual locations in multi-location engagements. The reproposed standard on consideration of materiality in planning and performing an audit included requirements for determining materiality of individual locations in multi-location audits. Some commenters requested clarification on the Board's expectations regarding how to apply those requirements in audits in which part of the work is performed by other auditors, specifically, auditors of financial statements of individual locations or business units that are included in the consolidated financial statements.

The multi-location requirements have been revised to take into account situations in which part of the work is performed by other auditors.[10] Appendix 10 discusses those revisions in more detail and explains the Board's expectations regarding how to apply the respective requirements in situations involving other auditors.

The reproposed standard on audit planning and supervision also included a statement, similar to a statement in Auditing Standard No. 5, that "The direction in paragraph 5 of Proposed Auditing Standard, *The Auditor's Responses to the Risks of Material Misstatement*, regarding incorporating an element of unpredictability in the auditing procedures means that the auditor should vary the nature, timing, and extent of audit procedures at locations or business units from year to year." Some commenters stated that the statement in the reproposed audit planning and supervision standard was unnecessarily prescriptive. After considering the comments received, the requirement regarding unpredictability was removed from the audit planning standard, and the discussion in Auditing Standard No. 13 regarding incorporating an element of unpredictability was expanded to include varying the testing in the selected locations.[11] However, this does not change the requirements in Auditing Standard No. 5 regarding incorporating unpredictability in testing controls at individual locations in audits of internal control.[12]

C. Requirement for Performing Walkthroughs

In the original proposed standards, the standard on identifying and assessing risks of material misstatement referred auditors to Auditing Standard No. 5 for a discussion of the performance of walkthroughs. Some commenters on the original proposed standards stated that the proposed standard should include a discussion of walkthroughs rather than referring to Auditing Standard No. 5. The

---

[10] Paragraphs 11–14 of Auditing Standard No. 9, *Audit Planning*, and paragraph 10 of Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*.

[11] Paragraph 5 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

[12] Paragraphs 61 and B13 of Auditing Standard No. 5.

reproposed standard on identifying and assessing risks of material misstatement included a discussion of the objectives for understanding likely sources of potential misstatements and of performing walkthroughs, which paralleled a discussion in Auditing Standard No. 5.[13] Some commenters expressed concerns that those new requirements would lead to unnecessary walkthroughs, particularly in audits of financial statements only.

The intention of including the discussion of walkthroughs was to describe how to perform walkthroughs, not to impose additional requirements regarding when to perform walkthroughs. The discussion has been revised to focus on how the auditor should perform walkthroughs, and the discussion of the objectives for understanding likely sources of potential misstatements has been removed.[14] Consequently, the objectives in paragraph 34 of Auditing Standard No. 5 for understanding potential sources of likely misstatement will continue to apply only to integrated audits.

D. Requirements Regarding Financial Statement Disclosures

Because of the importance of disclosures to the fair presentation of financial statements and based on observations from the Board's oversight activities, the reproposed standards included additional requirements intended to increase the auditor's attention on the disclosures in the financial statements. For example, the reproposed standard on identifying and assessing risks of material misstatement included a new requirement related to developing an expectation about the necessary financial statement disclosures as part of obtaining an understanding of the company and its environment. Some commenters stated that the requirements should be clarified as applying to disclosures required by the applicable financial reporting framework. Also, the reproposed standard on evaluating audit results included expanded requirements for the auditor to evaluate whether the financial statements include the required disclosures. Some commenters stated that the standard should clarify that the requirements apply only to material disclosures.

After analyzing the comments, those two requirements have been revised to clarify that they refer to the fair presentation of the financial statements in conformity with the applicable financial reporting framework.[15]

III. Additional Discussion of Standards and Comments

Some commenters on the reproposed standards stated that the Board should provide more information about its requirements, including how the requirements are expected to affect audits. Commenters requested information about how the Board's standards compare to the standards of other standards-setters. Some commenters also requested more explanation for certain requirements in the Board's reproposed standards.

Appendix 10 of this release has been expanded to provide additional background for certain requirements in the Board's standards and further discussion of the Board's responses to comments, including the basis for its conclusions regarding certain requirements.

[13] Paragraph 34 of Auditing Standard No. 5.

[14] Paragraphs 37–38 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

[15] Paragraph 13 of Auditing Standard No. 12 and paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*.

In analyzing comments on the appendix to the reproposed standards that compared the reproposed standards to the analogous standards of the International Auditing and Assurance Standards Board ("IAASB") and the Auditing Standards Board ("ASB") of the American Institute of Certified Public Accountants, the Board observed that a number of the explanations sought by commenters, e.g., the reasons for the differences in certain requirements, were discussed elsewhere in the release, e.g., in the appendix that provided additional discussion of comments.

Appendix 10 of this release discusses the principal rationale for the objectives and requirements in the standards being adopted today. Appendix 11 of this release discusses certain differences between the objectives and requirements of the PCAOB standards and the analogous standards of the IAASB and ASB. When a difference between the Board's standards and the analogous standards of the IAASB and ASB is noted, Appendix 11 contains a reference to the discussion of the Board's requirements in Appendix 10.

IV. Effective Date

The release accompanying the reproposed standards stated that the Board expects that the standards would be effective for audits of fiscal years beginning on or after December 15, 2010, subject to approval by the Securities and Exchange Commission ("SEC"), and the Board requested comment on the proposed effective date. Several commenters stated that the Board should establish sufficient time for auditing firms to make changes to their methodologies and train their staff on the new risk assessment standards.

After considering the comments received and the timing of the adoption of the standards, the Board has determined that the accompanying standards and related amendments will be effective, subject to SEC approval, for audits of fiscal periods beginning on or after December 15, 2010. In its determination, the Board considered that many auditors already employ risk-based audit methodologies, which should facilitate the methodology changes and training necessary to implement the standards by the effective date.

* * *

On the 5th day of August, in the year 2010, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.
/s/ J. Gordon Seymour
J. Gordon Seymour
Secretary

Appendix 1—Auditing Standard No. 8

Audit Risk

Introduction

1. This standard discusses the auditor's consideration of audit risk in an audit of financial statements as part of an integrated audit[1] or an audit of financial statements only.

Objective

2. The objective of the auditor is to conduct the audit of financial statements in a manner that reduces audit risk to an appropriately low level.

Audit Risk

3. To form an appropriate basis for expressing an opinion on the financial statements, the auditor must plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement[2] due to error or fraud. Reasonable assurance[3] is obtained by reducing audit risk to an appropriately low level through applying due professional care, including obtaining sufficient appropriate audit evidence.

4. In an audit of financial statements, audit risk is the risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated, i.e., the financial statements are not presented fairly in conformity with the applicable financial reporting framework. Audit risk is a function of the risk of material misstatement and detection risk.

> Note: The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

Risk of Material Misstatement

5. The risk of material misstatement refers to the risk that the financial statements are materially misstated. Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, indicates that the auditor should assess the risks of material misstatement at two levels: (1) at the financial statement level and (2) at the assertion[4] level.[5]

---

[1] When the auditor is performing an integrated audit of financial statements and internal control over financial reporting, the requirements in Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, also apply. However, the risks of material misstatement of the financial statements are the same for both the audit of financial statements and the audit of internal control over financial reporting.

[2] Misstatement is defined in Appendix A of Auditing Standard No. 14, *Evaluating Audit Results*.

[3] See AU sec. 110, *Responsibilities and Functions of the Independent Auditor*, and paragraph .10 of AU sec. 230, *Due Professional Care in the Performance of Work*, for a further discussion of reasonable assurance.

[4] See Auditing Standard No. 15, *Audit Evidence*, for a description of financial statement assertions.

[5] Paragraph 59 of Auditing Standard No. 12.

6. Risks of material misstatement at the financial statement level relate pervasively to the financial statements as a whole and potentially affect many assertions. Risks of material misstatement at the financial statement level may be especially relevant to the auditor's consideration of the risk of material misstatement due to fraud. For example, an ineffective control environment, a lack of sufficient capital to continue operations, and declining conditions affecting the company's industry might create pressures or opportunities for management to manipulate the financial statements, leading to higher risk of material misstatement.

7. Risk of material misstatement at the assertion level consists of the following components:

a. *Inherent risk*, which refers to the susceptibility of an assertion to a misstatement, due to error or fraud, that could be material, individually or in combination with other misstatements, before consideration of any related controls.

b. *Control risk*, which is the risk that a misstatement due to error or fraud that could occur in an assertion and that could be material, individually or in combination with other misstatements, will not be prevented or detected on a timely basis by the company's internal control. Control risk is a function of the effectiveness of the design and operation of internal control.

8. Inherent risk and control risk are related to the company, its environment, and its internal control, and the auditor assesses those risks based on evidence he or she obtains. The auditor assesses inherent risk using information obtained from performing risk assessment procedures and considering the characteristics of the accounts and disclosures in the financial statements.[6] The auditor assesses control risk using evidence obtained from tests of controls (if the auditor plans to rely on those controls to assess control risk at less than maximum) and from other sources.[7]

Detection Risk

9. In an audit of financial statements, detection risk is the risk that the procedures performed by the auditor will not detect a misstatement that exists and that could be material, individually or in combination with other misstatements. Detection risk is affected by (1) the effectiveness of the substantive procedures and (2) their application by the auditor, i.e., whether the procedures were performed with due professional care.

10. The auditor uses the assessed risk of material misstatement to determine the appropriate level of detection risk for a financial statement assertion. The higher the risk of material misstatement, the lower the level of detection risk needs to be in order to reduce audit risk to an appropriately low level.

11. The auditor reduces the level of detection risk through the nature, timing, and extent of the substantive procedures performed. As the appropriate level of detection risk decreases, the evidence from substantive procedures that the auditor should obtain increases.[8]

[8] Paragraph 37 of Auditing Standard No. 13.

Appendix 2—Auditing Standard No. 9

Audit Planning

Introduction

1. This standard establishes requirements regarding planning an audit.

Objective

2. The objective of the auditor is to plan the audit so that the audit is conducted effectively.

Responsibility of the Engagement Partner for Planning

3. The **engagement partner** [1] is responsible for the engagement and its performance. Accordingly, the engagement partner is responsible for planning the audit and may seek assistance from appropriate engagement team members in fulfilling this responsibility. Engagement team members who assist the engagement partner with audit planning also should comply with the relevant requirements in this standard.

Planning an Audit

4. The auditor should properly plan the audit. This standard describes the auditor's responsibilities for properly planning the audit.[2]

5. Planning the audit includes establishing the overall audit strategy for the engagement and developing an audit plan, which includes, in particular, planned risk assessment procedures and planned responses to the risks of material misstatement. Planning is not a discrete phase of an audit but, rather, a continual and iterative process that might begin shortly after (or in connection with) the completion of the previous audit and continues until the completion of the current audit.

Preliminary Engagement Activities

6. The auditor should perform the following activities at the beginning of the audit:

a. Perform procedures regarding the continuance of the client relationship and the specific audit engagement,[3]

b. Determine compliance with independence and ethics requirements, and

Note: The determination of compliance with independence and ethics requirements is not limited to preliminary engagement activities and should be reevaluated with changes in circumstances.

---

[1] Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

[2] The term, "auditor," as used in this standard, encompasses both the engagement partner and the engagement team members who assist the engagement partner in planning the audit.

[3] Paragraphs .14–.16 of QC sec. 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice.* AU sec. 161, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards*, explains how the quality control standards relate to the conduct of audits.

c. Establish an understanding with the client regarding the services to be performed on the engagement.[4]

Planning Activities

7. The nature and extent of planning activities that are necessary depend on the size and complexity of the company, the auditor's previous experience with the company, and changes in circumstances that occur during the audit. When developing the audit strategy and audit plan, as discussed in paragraphs 8–10, the auditor should evaluate whether the following matters are important to the company's financial statements and internal control over financial reporting and, if so, how they will affect the auditor's procedures:

- Knowledge of the company's internal control over financial reporting obtained during other engagements performed by the auditor;
- Matters affecting the industry in which the company operates, such as financial reporting practices, economic conditions, laws and regulations, and technological changes;
- Matters relating to the company's business, including its organization, operating characteristics, and capital structure;
- The extent of recent changes, if any, in the company, its operations, or its internal control over financial reporting;
- The auditor's preliminary judgments about materiality,[5] risk, and, in integrated audits, other factors relating to the determination of material weaknesses;
- Control deficiencies previously communicated to the audit committee[6] or management;
- Legal or regulatory matters of which the company is aware;
- The type and extent of available evidence related to the effectiveness of the company's internal control over financial reporting;
- Preliminary judgments about the effectiveness of internal control over financial reporting;
- Public information about the company relevant to the evaluation of the likelihood of material financial statement misstatements and the effectiveness of the company's internal control over financial reporting;
- Knowledge about risks related to the company evaluated as part of the auditor's client acceptance and retention evaluation; and
- The relative complexity of the company's operations.

  Note: Many smaller companies have less complex operations. Additionally, some larger, complex companies may have less complex units or processes. Factors that might indicate less complex operations include: fewer business lines; less complex business processes and financial reporting systems; more centralized accounting functions; extensive involvement by senior management

---

[4] AU sec. 310, *Appointment of the Independent Auditor.*

[5] Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit.*

[6] If no audit committee exists, all references to the audit committee in this standard apply to the entire board of directors of the company. See 15 U.S.C. §§78c(a)58 and 7201(a)(3).

in the day-to-day activities of the business; and fewer levels of management, each with a wide span of control.

Audit Strategy

8. The auditor should establish an overall audit strategy that sets the scope, timing, and direction of the audit and guides the development of the audit plan.

9. In establishing the overall audit strategy, the auditor should take into account:

a. The reporting objectives of the engagement and the nature of the communications required by PCAOB standards,[7]

b. The factors that are significant in directing the activities of the engagement team,[8]

c. The results of preliminary engagement activities[9] and the auditor's evaluation of the important matters in accordance with paragraph 7 of this standard, and

d. The nature, timing, and extent of resources necessary to perform the engagement.[10]

Audit Plan

10. The auditor should develop and document an audit plan that includes a description of:

a. The planned nature, timing, and extent of the risk assessment procedures;[11]

b. The planned nature, timing, and extent of tests of controls and substantive procedures;[12] and

c. Other planned audit procedures required to be performed so that the engagement complies with PCAOB standards.

Multi-location Engagements

11. In an audit of the financial statements of a company with operations in multiple locations or business units,[13] the auditor should determine the extent to which audit procedures should be performed at selected locations or business units to obtain sufficient appropriate evidence to obtain reasonable assurance

---

[7] See, e.g., AU sec. 310 and AU sec. 380, *Communication With Audit Committees.* Also, various laws or regulations require other matters to be communicated. (See, e.g., Rule 2-07 of Regulation S-X, 17 CFR 210.2-07; and Rule 10A-3 under the Securities Exchange Act of 1934, 17 CFR 240.10A-3.) The requirements of this standard do not modify communications required by those other laws or regulations.

[8] See, e.g., paragraph 6 of Auditing Standard No. 10, *Supervision of the Audit Engagement*.

[9] Paragraph 6 of this standard.

[10] See, e.g., paragraph .06 of AU sec. 230, *Due Professional Care in the Performance of Work*, paragraph 16 of this standard, and paragraph 5.a. of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

[11] Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

[12] Auditing Standard No. 13 and Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements.*

[13] The term "business units" includes subsidiaries, divisions, branches, components, or investments.

about whether the consolidated financial statements are free of material misstatement. This includes determining the locations or business units at which to perform audit procedures, as well as the nature, timing, and extent of the procedures to be performed at those individual locations or business units. The auditor should assess the risks of material misstatement to the consolidated financial statements associated with the location or business unit and correlate the amount of audit attention devoted to the location or business unit with the degree of risk of material misstatement associated with that location or business unit.

12. Factors that are relevant to the assessment of the risks of material misstatement associated with a particular location or business unit and the determination of the necessary audit procedures include:

a. The nature and amount of assets, liabilities, and transactions executed at the location or business unit, including, e.g., significant transactions executed at the location or business unit that are outside the normal course of business for the company, or that otherwise appear to be unusual given the auditor's understanding of the company and its environment;[14]

b. The materiality of the location or business unit;[15]

c. The specific risks associated with the location or business unit that present a reasonable possibility[16] of material misstatement to the company's consolidated financial statements;

d. Whether the risks of material misstatement associated with the location or business unit apply to other locations or business units such that, in combination, they present a reasonable possibility of material misstatement to the company's consolidated financial statements;

e. The degree of centralization of records or information processing;

f. The effectiveness of the control environment, particularly with respect to management's control over the exercise of authority delegated to others and its ability to effectively supervise activities at the location or business unit; and

g. The frequency, timing, and scope of monitoring activities by the company or others at the location or business unit.

Note: When performing an audit of internal control over financial reporting, refer to Appendix B, Special Topics, of Auditing Standard No. 5[17] for considerations when a company has multiple locations or business units.

13. In determining the locations or business units at which to perform audit procedures, the auditor may take into account relevant activities performed by internal audit, as described in AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, or others, as described in Auditing Standard No. 5. AU sec. 322 and Auditing Standard No. 5 establish requirements regarding using the work of internal audit and others, respectively.

---

[14] Paragraph .66 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

[15] Paragraph 10 of Auditing Standard No. 11 describes the consideration of materiality in planning and performing audit procedures at an individual location or business unit.

[16] There is a reasonable possibility of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in the FASB Accounting Standards Codification, Contingencies Topic, paragraph 450-20-25-1.

[17] Paragraphs B10–B16 of Auditing Standard No. 5.

14. AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, describes the auditor's responsibilities regarding using the work and reports of other independent auditors who audit the financial statements of one or more of the locations or business units that are included in the consolidated financial statements.[18] In those situations, the auditor should perform the procedures in paragraphs 11–13 of this standard to determine the locations or business units at which audit procedures should be performed.

Changes During the Course of the Audit

15. The auditor should modify the overall audit strategy and the audit plan as necessary if circumstances change significantly during the course of the audit, including changes due to a revised assessment of the risks of material misstatement or the discovery of a previously unidentified risk of material misstatement.

Persons with Specialized Skill or Knowledge

16. The auditor should determine whether specialized skill or knowledge is needed to perform appropriate risk assessments, plan or perform audit procedures, or evaluate audit results.

17. If a person with specialized skill or knowledge employed or engaged by the auditor participates in the audit, the auditor should have sufficient knowledge of the subject matter to be addressed by such a person to enable the auditor to:

a. Communicate the objectives of that person's work;
b. Determine whether that person's procedures meet the auditor's objectives; and
c. Evaluate the results of that person's procedures as they relate to the nature, timing, and extent of other planned audit procedures and the effects on the auditor's report.

Additional Considerations in Initial Audits

18. The auditor should undertake the following activities before starting an initial audit:

a. Perform procedures regarding the acceptance of the client relationship and the specific audit engagement; and
b. Communicate with the predecessor auditor in situations in which there has been a change of auditors in accordance with AU sec. 315, *Communications Between Predecessor and Successor Auditors*.

19. The purpose and objective of planning the audit are the same for an initial audit or a recurring audit engagement. However, for an initial audit, the auditor should determine the additional planning activities necessary to establish an appropriate audit strategy and audit plan, including determining the audit procedures necessary to obtain sufficient appropriate audit evidence regarding the opening balances.[19]

---

[18] For integrated audits, see also paragraphs C8–C11 of Auditing Standard No. 5.

[19] See also paragraph 3 of Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*.

Appendix A

Definition

A1. For purposes of this standard, the term listed below is defined as follows:

A2. Engagement partner—The member of the engagement team with primary responsibility for the audit.

Appendix 3—Auditing Standard No. 10

Supervision of the Audit Engagement

Introduction

1. This standard establishes requirements regarding supervision of the audit engagement, including supervising the work of engagement team members.

Objective

2. The objective of the auditor is to supervise the audit engagement, including supervising the work of engagement team members so that the work is performed as directed and supports the conclusions reached.

Responsibility of the Engagement Partner for Supervision

3. The **engagement partner**[1] is responsible for the engagement and its performance. Accordingly, the engagement partner is responsible for proper supervision of the work of engagement team members and for compliance with PCAOB standards, including standards regarding using the work of specialists,[2] other auditors,[3] internal auditors,[4] and others who are involved in testing controls.[5] Paragraphs 5–6 of this standard describe the nature and extent of supervisory activities necessary for proper supervision of engagement team members.[6]

4. The engagement partner may seek assistance from appropriate engagement team members in fulfilling his or her responsibilities pursuant to this standard. Engagement team members who assist the engagement partner with supervision of the work of other engagement team members also should comply with the requirements in this standard with respect to the supervisory responsibilities assigned to them.

Supervision of Engagement Team Members

5. The engagement partner and, as applicable, other engagement team members performing supervisory activities, should:

---

[1] Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

[2] AU sec. 336, *Using the Work of a Specialist.*

[3] AU sec. 543, *Part of Audit Performed by Other Independent Auditors.*

[4] AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements.*

[5] Paragraphs 16–19 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements.*

[6] See also paragraph .06 of AU sec. 230, *Due Professional Care in the Performance of Work.*

a. Inform engagement team members of their responsibilities,[7] including:

(1) The objectives of the procedures that they are to perform;

(2) The nature, timing, and extent of procedures they are to perform; and

(3) Matters that could affect the procedures to be performed or the evaluation of the results of those procedures, including relevant aspects of the company, its environment, and its internal control over financial reporting,[8] and possible accounting and auditing issues;

b. Direct engagement team members to bring significant accounting and auditing issues arising during the audit to the attention of the engagement partner or other engagement team members performing supervisory activities so they can evaluate those issues and determine that appropriate actions are taken in accordance with PCAOB standards;[9]

Note: In applying due professional care in accordance with AU sec. 230, each engagement team member has a responsibility to bring to the attention of appropriate persons, disagreements or concerns the engagement team member might have with respect to accounting and auditing issues that he or she believes are of significance to the financial statements or the auditor's report regardless of how those disagreements or concerns may have arisen.

c. Review the work of engagement team members to evaluate whether:

(1) The work was performed and documented;

(2) The objectives of the procedures were achieved; and

(3) The results of the work support the conclusions reached.[10]

6. To determine the extent of supervision necessary for engagement team members to perform their work as directed and form appropriate conclusions, the engagement partner and other engagement team members performing supervisory activities should take into account:

a. The nature of the company, including its size and complexity;[11]

b. The nature of the assigned work for each engagement team member, including:

(1) The procedures to be performed, and

(2) The controls or accounts and disclosures to be tested;

c. The risks of material misstatement; and

---

[7] AU sec. 230.06 and paragraph 5 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement,* establish requirements regarding the appropriate assignment of engagement team members.

[8] Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement,* describes the auditor's responsibilities for obtaining an understanding of the company, its environment, and its internal control over financial reporting.

[9] See, e.g., paragraph 15 of Auditing Standard No. 9, *Audit Planning*, paragraph 74 of Auditing Standard No. 12, and paragraphs 20–23 and 35–36 of Auditing Standard No. 14, *Evaluating Audit Results.*

[10] Auditing Standard No. 14 describes the auditor's responsibilities for evaluating the results of the audit, and Auditing Standard No. 3, *Audit Documentation*, establishes requirements regarding audit documentation.

[11] Paragraph 10 of Auditing Standard No. 12.

d. The knowledge, skill, and ability of each engagement team member.[12]

Note: In accordance with the requirements of paragraph 5 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, the extent of supervision of engagement team members should be commensurate with the risks of material misstatement.[13]

[12] See also paragraph 5.a. of Auditing Standard No. 13 and AU sec. 230.06.

[13] Paragraph 5.b. of Auditing Standard No. 13 indicates that the extent of supervision of engagement team members is part of the auditor's overall responses to the risks of material misstatement.

Appendix A

Definition

A1. For purposes of this standard, the term listed below is defined as follows:

A2. Engagement partner—The member of the engagement team with primary responsibility for the audit.

Appendix 4—Auditing Standard No. 11

Consideration of Materiality in Planning and Performing an Audit

Introduction

1. This standard establishes requirements regarding the auditor's consideration of materiality in planning and performing an audit.[1]

Materiality in the Context of an Audit

2. In interpreting the federal securities laws, the Supreme Court of the United States has held that a fact is material if there is "a substantial likelihood that the ...fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."[2] As the Supreme Court has noted, determinations of materiality require "delicate assessments of the inferences a 'reasonable shareholder' would draw from a given set of facts and the significance of those inferences to him ...."[3]

3. To obtain reasonable assurance about whether the financial statements are free of material misstatement, the auditor should plan and perform audit procedures to detect misstatements that, individually or in combination with other misstatements, would result in material misstatement of the financial statements. This includes being alert while planning and performing audit procedures for misstatements that could be material due to quantitative or qualitative factors. Also, the evaluation of uncorrected misstatements in accordance with Auditing Standard No. 14, *Evaluating Audit Results*, requires consideration of both qualitative and quantitative factors.[4] However, it ordinarily is not practical to design audit procedures to detect misstatements that are material based solely on qualitative factors.

4. For integrated audits, Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, states, "In planning the audit of internal control over financial reporting, the auditor should use the same materiality considerations he or she would use in planning the audit of the company's annual financial statements."[5]

Objective

5. The objective of the auditor is to apply the concept of materiality appropriately in planning and performing audit procedures.

---

[1] Auditing Standard No. 14 establishes requirements regarding the auditor's consideration of materiality in evaluating audit results.

[2] TSC Industries v. Northway, Inc., 426 U.S. 438, 449 (1976). See also Basic, Inc. v. Levinson, 485 U.S. 224 (1988).

[3] TSC Industries, 426 U.S. at 450.

[4] Appendix B of Auditing Standard No. 14.

[5] Paragraph 20 of Auditing Standard No. 5.

Considering Materiality in Planning and Performing an Audit

Establishing a Materiality Level for the Financial Statements as a Whole

6. To plan the nature, timing, and extent of audit procedures, the auditor should establish a materiality level for the financial statements as a whole that is appropriate in light of the particular circumstances. This includes consideration of the company's earnings and other relevant factors. To determine the nature, timing, and extent of audit procedures, the materiality level for the financial statements as a whole needs to be expressed as a specified amount.

Note: If financial statements for the audit period are not available, the auditor may establish an initial materiality level based on estimated or preliminary financial statement amounts. In those situations, the auditor should take into account the effects of known or expected changes in the company's financial statements, including significant transactions or adjustments that are expected to be reflected in the financial statements at the end of the period.

Establishing Materiality Levels for Particular Accounts or Disclosures

7. The auditor should evaluate whether, in light of the particular circumstances, there are certain accounts or disclosures for which there is a substantial likelihood that misstatements of lesser amounts than the materiality level established for the financial statements as a whole would influence the judgment of a reasonable investor. If so, the auditor should establish separate materiality levels for those accounts or disclosures to plan the nature, timing, and extent of audit procedures for those accounts or disclosures.

Note: Lesser amounts of misstatements could influence the judgment of a reasonable investor because of qualitative factors, e.g., because of the sensitivity of circumstances surrounding misstatements, such as conflicts of interest in related party transactions.

Determining Tolerable Misstatement

8. The auditor should determine the amount or amounts of tolerable misstatement for purposes of assessing risks of material misstatement and planning and performing audit procedures at the account or disclosure level. The auditor should determine tolerable misstatement at an amount or amounts that reduce to an appropriately low level the probability that the total of uncorrected and undetected misstatements would result in material misstatement of the financial statements. Accordingly, tolerable misstatement should be less than the materiality level for the financial statements as a whole and, if applicable, the materiality level or levels for particular accounts or disclosures.

9. In determining tolerable misstatement and planning and performing audit procedures, the auditor should take into account the nature, cause (if known), and amount of misstatements that were accumulated in audits of the financial statements of prior periods.

Considerations for Multi-location Engagements

10. For purposes of the audit of the consolidated financial statements of a company with multiple locations or business units, the auditor should determine tolerable misstatement for the individual locations or business units at an amount that reduces to an appropriately low level the probability that the total of uncorrected and undetected misstatements would result in material misstatement of the consolidated financial statements. Accordingly, tolerable misstatement at an individual location should be less than the materiality level for the financial statements as a whole.

Considerations as the Audit Progresses

11. The auditor should reevaluate the established materiality level or levels and tolerable misstatement when, because of changes in the particular circumstances or additional information that comes to the auditor's attention, there is a substantial likelihood that misstatements of amounts that differ significantly from the materiality level or levels that were established initially would influence the judgment of a reasonable investor. Situations in which changes in circumstances or additional information that comes to the auditor's attention would require such reevaluation include:

a. The materiality level or levels and tolerable misstatement were established initially based on estimated or preliminary financial statement amounts that differ significantly from actual amounts.

b. Events or changes in conditions occurring after the materiality level or levels and tolerable misstatement were established initially are likely to affect investors' perceptions about the company's financial position, results of operations, or cash flows.

Note: Examples of such events or changes in conditions include (1) changes in laws, regulations, or the applicable financial reporting framework that affect investors' expectations about the measurement or disclosure of certain items and (2) significant new contractual arrangements that draw attention to a particular aspect of a company's business that is separately disclosed in the financial statements.

12. If the auditor's reevaluation results in a lower amount for the materiality level or levels or tolerable misstatement than initially established by the auditor, the auditor should (1) evaluate the effect, if any, of the lower amount or amounts on his or her risk assessments and audit procedures and (2) modify the nature, timing, and extent of audit procedures as necessary to obtain sufficient appropriate audit evidence.

Note: The reevaluation of the materiality level or levels and tolerable misstatement is also relevant to the auditor's evaluation of uncorrected misstatements in accordance with Auditing Standard No. 14.[6]

[6] Paragraph 17 of Auditing Standard No. 14.

Appendix 5—Auditing Standard No. 12

Identifying and Assessing Risks of Material Misstatement

Introduction

1. This standard establishes requirements regarding the process of identifying and assessing risks of material misstatement[1] of the financial statements.

2. Paragraphs 4–58 of this standard discuss the auditor's responsibilities for performing **risk assessment procedures**.[2] Paragraphs 59–73 of this standard discuss identifying and assessing the risks of material misstatement using information obtained from performing risk assessment procedures.

Objective

3. The objective of the auditor is to identify and appropriately assess the risks of material misstatement, thereby providing a basis for designing and implementing responses to the risks of material misstatement.

Performing Risk Assessment Procedures

4. The auditor should perform risk assessment procedures that are sufficient to provide a reasonable basis for identifying and assessing the risks of material misstatement, whether due to error or fraud,[3] and designing further audit procedures.[4]

5. Risks of material misstatement can arise from a variety of sources, including external factors, such as conditions in the company's industry and environment, and company-specific factors, such as the nature of the company, its activities, and internal control over financial reporting. For example, external or company-specific factors can affect the judgments involved in determining accounting estimates or create pressures to manipulate the financial statements to achieve certain financial targets. Also, risks of material misstatement may relate to, e.g., personnel who lack the necessary financial reporting competencies, information systems that fail to accurately capture business transactions, or financial reporting processes that are not adequately aligned with the requirements in the applicable financial reporting framework. Thus, the audit procedures that are necessary to identify and appropriately assess the risks of material misstatement include consideration of both external factors and company-specific factors. This standard discusses the following risk assessment procedures:

a. Obtaining an understanding of the company and its environment (paragraphs 7–17);

---

[1] Paragraphs 5–8 of Auditing Standard No. 8, *Audit Risk*.

[2] Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

[3] AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, discusses fraud, its characteristics, and the types of misstatements due to fraud that are relevant to the audit, i.e., misstatements arising from fraudulent financial reporting and misstatements arising from asset misappropriation.

[4] Auditing Standard No. 15, *Audit Evidence*, describes further audit procedures as consisting of tests of controls and substantive procedures.

b. Obtaining an understanding of internal control over financial reporting (paragraphs 18–40);

c. Considering information from the client acceptance and retention evaluation, audit planning activities, past audits, and other engagements performed for the company (paragraphs 41–45);

d. Performing analytical procedures (paragraphs 46–48);

e. Conducting a discussion among engagement team members regarding the risks of material misstatement (paragraphs 49–53); and

f. Inquiring of the audit committee, management, and others within the company about the risks of material misstatement (paragraphs 54–58).

Note: This standard describes an approach to identifying and assessing risks of material misstatement that begins at the financial statement level and with the auditor's overall understanding of the company and its environment and works down to the significant accounts and disclosures and their relevant assertions.[5]

6. In an integrated audit, the risks of material misstatement of the financial statements are the same for both the audit of internal control over financial reporting and the audit of financial statements. The auditor's risk assessment procedures should apply to both the audit of internal control over financial reporting and the audit of financial statements.

Obtaining an Understanding of the Company and Its Environment

7. The auditor should obtain an understanding of the company and its environment ("understanding of the company") to understand the events, conditions, and company activities that might reasonably be expected to have a significant effect on the risks of material misstatement. Obtaining an understanding of the company includes understanding:

a. Relevant industry, regulatory, and other external factors;

b. The nature of the company;

c. The company's selection and application of accounting principles, including related disclosures;

d. The **company's objectives and strategies** and those related **business risks** that might reasonably be expected to result in risks of material misstatement; and

e. The company's measurement and analysis of its financial performance.

8. In obtaining an understanding of the company, the auditor should evaluate whether significant changes in the company from prior periods, including changes in its internal control over financial reporting, affect the risks of material misstatement.

---

[5] Paragraph 11 of Auditing Standard No. 15 discusses financial statement assertions.

Industry, Regulatory, and Other External Factors

9. Obtaining an understanding of relevant industry, regulatory, and other external factors encompasses industry factors, including the competitive environment and technological developments; the regulatory environment, including the applicable financial reporting framework[6] and the legal and political environment;[7] and external factors, including general economic conditions.

Nature of the Company

10. Obtaining an understanding of the nature of the company includes understanding:

- The company's organizational structure and management personnel;
- The sources of funding of the company's operations and investment activities, including the company's capital structure, noncapital funding (e.g., subordinated debt or dependencies on supplier financing), and other debt instruments;
- The company's significant investments, including equity method investments, joint ventures, and variable interest entities;
- The company's operating characteristics, including its size and complexity;

  Note: The size and complexity of a company might affect the risks of misstatement and how the company addresses those risks.
- The sources of the company's earnings, including the relative profitability of key products and services; and
- Key supplier and customer relationships.

  Note: The auditor should take into account the information gathered while obtaining an understanding of the nature of the company when determining the existence of related parties in accordance with AU sec. 334, *Related Parties*.

11. As part of obtaining an understanding of the company as required by paragraph 7, the auditor should consider performing the following procedures and the extent to which the procedures should be performed:

- Reading public information about the company relevant to the evaluation of the likelihood of material financial statement misstatements and, in an integrated audit, the effectiveness of the company's internal control over financial reporting, e.g., company-issued press releases, company-prepared presentation materials for analysts or investor groups, and analyst reports;
- Observing or reading transcripts of earnings calls and, to the extent publicly available, other meetings with investors or rating agencies;

---

[6] The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

[7] AU sec. 317, *Illegal Acts by Clients*, discusses the auditor's consideration of laws and regulations relevant to the audit.

- Obtaining an understanding of compensation arrangements with senior management, including incentive compensation arrangements, changes or adjustments to those arrangements, and special bonuses; and
- Obtaining information about trading activity in the company's securities and holdings in the company's securities by significant holders to identify potentially significant unusual developments (e.g., from Forms 3, 4, 5, 13D, and 13G).

Selection and Application of Accounting Principles, Including Related Disclosures

12. As part of obtaining an understanding of the company's selection and application of accounting principles, including related disclosures, the auditor should evaluate whether the company's selection and application of accounting principles are appropriate for its business and consistent with the applicable financial reporting framework and accounting principles used in the relevant industry. Also, to identify and assess risks of material misstatement related to omitted, incomplete, or inaccurate disclosures, the auditor should develop expectations about the disclosures that are necessary for the company's financial statements to be presented fairly in conformity with the applicable financial reporting framework.

13. The following matters, if present, are relevant to the necessary understanding of the company's selection and application of accounting principles, including related disclosures:

- Significant changes in the company's accounting principles, financial reporting policies, or disclosures and the reasons for such changes;
- The financial reporting competencies of personnel involved in selecting and applying significant new or complex accounting principles;
- The accounts or disclosures for which judgment is used in the application of significant accounting principles, especially in determining management's estimates and assumptions;
- The effect of significant accounting principles in controversial or emerging areas for which there is a lack of authoritative guidance or consensus;
- The methods the company uses to account for significant and unusual transactions; and
- Financial reporting standards and laws and regulations that are new to the company, including when and how the company will adopt such requirements.

Company Objectives, Strategies, and Related Business Risks

14. The purpose of obtaining an understanding of the company's objectives, strategies, and related business risks is to identify business risks that could reasonably be expected to result in material misstatement of the financial statements.

> Note: Some relevant business risks might be identified through other risk assessment procedures, such as obtaining an understanding of

the nature of the company and understanding industry, regulatory, and other external factors.

15. The following are examples of situations in which business risks might result in material misstatement of the financial statements:

- Industry developments (a potential related business risk might be, e.g., that the company does not have the personnel or expertise to deal with the changes in the industry.)
- New products and services (a potential related business risk might be, e.g., that the new product or service will not be successful.)
- Use of information technology ("IT") (a potential related business risk might be, e.g., that systems and processes are incompatible.)
- New accounting requirements (a potential related business risk might be, e.g., incomplete or improper implementation of a new accounting requirement.)
- Expansion of the business (a potential related business risk might be, e.g., that the demand for the company's products or services has not been accurately estimated.)
- The effects of implementing a strategy, particularly any effects that will lead to new accounting requirements (a potential related business risk might be, e.g., incomplete or improper implementation of the strategy.)
- Current and prospective financing requirements (a potential related business risk might be, e.g., the loss of financing due to the company's inability to meet financing requirements.)
- Regulatory requirements (a potential related business risk might be, e.g., that there is increased legal exposure.)

Note: Business risks could affect risks of material misstatement at the financial statement level, which would affect many accounts and disclosures in the financial statements. For example, a company's loss of financing or declining conditions affecting the company's industry could affect its ability to settle its obligations when due. This, in turn, could affect the risks of material misstatement related to, e.g., the classification of long-term liabilities or valuation of long-term assets, or it could result in substantial doubt about the company's ability to continue as a going concern. Other business risks could affect the risks of material misstatement for particular accounts, disclosures, or assertions. For example, an unsuccessful new product or service or failed business expansion might affect the risks of material misstatement related to the valuation of inventory and other related assets.

Company Performance Measures

16. The purpose of obtaining an understanding of the company's performance measures is to identify performance measures, whether external or internal, that affect the risks of material misstatement.

17. The following are examples of performance measures that might affect the risks of material misstatement:

- Measures that form the basis for contractual commitments or incentive compensation arrangements;

- Measures used by external parties, such as analysts and rating agencies, to review the company's performance; and
- Measures the company uses to monitor its operations that highlight unexpected results or trends that prompt management to investigate their cause and take corrective action, including correction of misstatements.

Note: The first two examples represent performance measures that can affect the risks of material misstatement by creating incentives or pressures for management of the company to manipulate certain accounts or disclosures to achieve certain performance targets (or conceal a failure to achieve those targets). The third example represents performance measures that management might use to monitor risks affecting the financial statements.

Note: Smaller companies might have less formal processes to measure and review financial performance. In such cases, the auditor might identify relevant performance measures by considering the information that the company uses to manage the business.

Obtaining an Understanding of Internal Control Over Financial Reporting

18. The auditor should obtain a sufficient understanding of each component[8] of internal control over financial reporting ("understanding of internal control") to (a) identify the types of potential misstatements, (b) assess the factors that affect the risks of material misstatement, and (c) design further audit procedures.

19. The nature, timing, and extent of procedures that are necessary to obtain an understanding of internal control depend on the size and complexity of the company;[9] the auditor's existing knowledge of the company's internal control over financial reporting; the nature of the company's controls, including the company's use of IT; the nature and extent of changes in systems and operations; and the nature of the company's documentation of its internal control over financial reporting.

Note: The auditor also might obtain an understanding of certain controls that are not part of internal control over financial reporting, e.g., controls over the completeness and accuracy of operating or other nonfinancial information used as audit evidence.[10]

20. Obtaining an understanding of internal control includes evaluating the design of controls that are relevant to the audit and determining whether the controls have been implemented.

Note: Procedures the auditor performs to obtain evidence about design effectiveness include inquiry of appropriate personnel, observation of the company's operations, and inspection of relevant documentation. Walkthroughs, as described

---

[8] Paragraphs 21–22 of this standard discuss components of internal control over financial reporting.

[9] Paragraph 13 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*, states, "The size and complexity of the company, its business processes, and business units, may affect the way in which the company achieves many of its control objectives. The size and complexity of the company also might affect the risks of misstatement and the controls necessary to address those risks."

[10] Paragraph 10 of Auditing Standard No. 15.

in paragraphs 37–38, that include these procedures ordinarily are sufficient to evaluate design effectiveness.

Note: Determining whether a control has been implemented means determining whether the control exists and whether the company is using it. The procedures to determine whether a control has been implemented may be performed in connection with the evaluation of its design. Procedures performed to determine whether a control has been implemented include inquiry of appropriate personnel, in combination with observation of the application of controls or inspection of documentation. Walkthroughs, as described in paragraphs 37–38, that include these procedures ordinarily are sufficient to determine whether a control has been implemented.

21. Internal control over financial reporting can be described as consisting of the following components:[11]

- The control environment,
- The company's risk assessment process,
- Information and communication,
- Control activities, and
- Monitoring of controls.

22. Management might use an internal control framework with components that differ from the components identified in the preceding paragraph when establishing and maintaining the company's internal control over financial reporting. In evaluating the design of controls and determining whether they have been implemented in an audit of financial statements only, the auditor may use the framework used by management or another suitable, recognized framework.[12] For integrated audits, Auditing Standard No. 5, states, "The auditor should use the same suitable, recognized control framework to perform his or her audit of internal control over financial reporting as management uses for its annual evaluation of the effectiveness of the company's internal control over financial reporting."[13] If the auditor uses a suitable, recognized internal control framework with components that differ from those listed in the preceding paragraph, the auditor should adapt the requirements in paragraphs 23–36 of this standard to conform to the components in the framework used.

Control Environment

23. The auditor should obtain an understanding of the company's control environment, including the policies and actions of management, the board, and the audit committee concerning the company's control environment.

24. Obtaining an understanding of the control environment includes assessing:

- Whether management's philosophy and operating style promote effective internal control over financial reporting;
- Whether sound integrity and ethical values, particularly of top management, are developed and understood; and

---

[11] Different internal control frameworks use different terms and approaches to describe the components of internal control over financial reporting.

[12] See Securities Exchange Act Release No. 34-47986 (June 5, 2003) for a description of the characteristics of a suitable, recognized framework.

[13] Paragraph 5 of Auditing Standard No. 5.

- Whether the board or audit committee understands and exercises oversight responsibility over financial reporting and internal control.

  Note: In an audit of financial statements only, this assessment may be based on the evidence obtained in understanding the control environment, in accordance with paragraph 23, and the other relevant knowledge possessed by the auditor. In an integrated audit of financial statements and internal control over financial reporting, Auditing Standard No. 5[14] describes the auditor's responsibility for evaluating the control environment.

25. If the auditor identifies a control deficiency[15] in the company's control environment, the auditor should evaluate the extent to which this control deficiency is indicative of a fraud risk factor, as discussed in paragraphs 65–66 of this standard.

The Company's Risk Assessment Process

26. The auditor should obtain an understanding of management's process for:

a. Identifying risks relevant to financial reporting objectives, including risks of material misstatement due to fraud ("fraud risks");
b. Assessing the likelihood and significance of misstatements resulting from those risks; and
c. Deciding about actions to address those risks.

27. Obtaining an understanding of the company's risk assessment process includes obtaining an understanding of the risks of material misstatement identified and assessed by management and the actions taken to address those risks.

Information and Communication

28. *Information System Relevant to Financial Reporting.* The auditor should obtain an understanding of the information system, including the related business processes, relevant to financial reporting, including:

a. The classes of transactions in the company's operations that are significant to the financial statements;
b. The procedures, within both automated and manual systems, by which those transactions are initiated, authorized, processed, recorded, and reported;
c. The related accounting records, supporting information, and specific accounts in the financial statements that are used to initiate, authorize, process, and record transactions;
d. How the information system captures events and conditions, other than transactions,[16] that are significant to the financial statements; and
e. The period-end financial reporting process.

---

[14] Paragraph 25 of Auditing Standard No. 5.

[15] Paragraph A3 of Auditing Standard No. 5.

[16] Examples of such events and conditions include depreciation and amortization and conditions affecting the recoverability of assets.

Note: Appendix B discusses additional considerations regarding manual and automated systems and controls.

29. The auditor also should obtain an understanding of how IT affects the company's flow of transactions. (See Appendix B.)

Note: The identification of risks and controls within IT is not a separate evaluation. Instead, it is an integral part of the approach used to identify significant accounts and disclosures and their relevant assertions and, when applicable, to select the controls to test, as well as to assess risk and allocate audit effort.

30. A company's business processes are the activities designed to:

a. Develop, purchase, produce, sell and distribute a company's products or services;

b. Record information, including accounting and financial reporting information; and

c. Ensure compliance with laws and regulations relevant to the financial statements.

31. Obtaining an understanding of the company's business processes assists the auditor in obtaining an understanding of how transactions are initiated, authorized, processed, and recorded.

32. A company's period-end financial reporting process, as referred to in paragraph 28.e., includes the following:

- Procedures used to enter transaction totals into the general ledger;
- Procedures related to the selection and application of accounting principles;[17]
- Procedures used to initiate, authorize, record, and process journal entries in the general ledger;
- Procedures used to record recurring and nonrecurring adjustments to the annual financial statements (and quarterly financial statements, if applicable); and
- Procedures for preparing annual financial statements and related disclosures (and quarterly financial statements, if applicable).

33. *Communication.* The auditor should obtain an understanding of how the company communicates financial reporting roles and responsibilities and significant matters relating to financial reporting to relevant company personnel and others, including:

- Communications between management, the audit committee, and the board of directors; and
- Communications to external parties, including regulatory authorities and shareholders.

Control Activities

34. The auditor should obtain an understanding of control activities that is sufficient to assess the factors that affect the risks of material misstatement and to design further audit procedures, as described in paragraph 18 of

[17] Paragraphs 12–13 of this standard.

this standard.[18] As the auditor obtains an understanding of the other components of internal control over financial reporting, he or she is also likely to obtain knowledge about some control activities. The auditor should use his or her knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control over financial reporting in determining the extent to which it is necessary to devote additional attention to obtaining an understanding of control activities to assess the factors that affect the risks of material misstatement and to design further audit procedures.

Note: A broader understanding of control activities is needed for relevant assertions for which the auditor plans to rely on controls. Also, in the audit of internal control over financial reporting, the auditor's understanding of control activities encompasses a broader range of accounts and disclosures than what is normally obtained in a financial statement audit.

Monitoring of Controls

35. The auditor should obtain an understanding of the major types of activities that the company uses to monitor the effectiveness of its internal control over financial reporting and how the company initiates corrective actions related to its controls.[19]

36. An understanding of the company's monitoring activities includes understanding the source of the information used in the monitoring activities.

Performing Walkthroughs

37. As discussed in paragraph 20, the auditor may perform walkthroughs as part of obtaining an understanding of internal control over financial reporting. For example, the auditor may perform walkthroughs in connection with understanding the flow of transactions in the information system relevant to financial reporting, evaluating the design of controls relevant to the audit, and determining whether those controls have been implemented. In performing a walkthrough, the auditor follows a transaction from origination through the company's processes, including information systems, until it is reflected in the company's financial records, using the same documents and IT that company personnel use. Walkthrough procedures usually include a combination of inquiry, observation, inspection of relevant documentation, and re-performance of controls.

Note: For integrated audits, Auditing Standard No. 5 establishes certain objectives that the auditor should achieve to further understand likely sources of potential misstatements and as part of selecting the controls to test. Auditing Standard No. 5 states that performing walkthroughs will frequently be the most effective way of achieving those objectives.[20]

38. In performing a walkthrough, at the points at which important processing procedures occur, the auditor questions the company's personnel about their understanding of what is required by the company's prescribed procedures

---

[18] Also see paragraph B5 of Appendix B of this standard.

[19] In some companies, internal auditors or others performing an equivalent function contribute to the monitoring of controls. AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, establishes requirements regarding the auditor's consideration and use of the work of the internal audit function.

[20] See paragraphs 34–38 of Auditing Standard No. 5.

and controls. These probing questions, combined with the other walkthrough procedures, allow the auditor to gain a sufficient understanding of the process and to be able to identify important points at which a necessary control is missing or not designed effectively. Additionally, probing questions that go beyond a narrow focus on the single transaction used as the basis for the walkthrough allow the auditor to gain an understanding of the different types of significant transactions handled by the process.

Relationship of Understanding of Internal Control to Tests of Controls

39. The objective of obtaining an understanding of internal control, as discussed in paragraph 18 of this standard, is different from testing controls for the purpose of assessing control risk[21] or for the purpose of expressing an opinion on internal control over financial reporting in the audit of internal control over financial reporting.[22] The auditor may obtain an understanding of internal control concurrently with performing tests of controls if he or she obtains sufficient appropriate evidence to achieve the objectives of both procedures. Also, the auditor should take into account the evidence obtained from understanding internal control when assessing control risk and, in the audit of internal control over financial reporting, forming an opinion about the effectiveness of internal control over financial reporting.

40. *Relationship of Understanding of Internal Control to Evaluating Entity-Level Controls in an Audit of Internal Control Over Financial Reporting.* Auditing Standard No. 5 states, "The auditor must test those entity-level controls that are important to the auditor's conclusion about whether the company has effective internal control over financial reporting."[23] The procedures performed to obtain an understanding of certain components of internal control in accordance with this standard, e.g., the control environment, the company's risk assessment process, information and communication, and monitoring of controls, might provide evidence that is relevant to the auditor's evaluation of entity-level controls.[24] The auditor should take into account the evidence obtained from understanding internal control when determining the nature, timing, and extent of procedures necessary to support the auditor's conclusions about the effectiveness of entity-level controls in the audit of internal control over financial reporting.

Considering Information from the Client Acceptance and Retention Evaluation, Audit Planning Activities, Past Audits, and Other Engagements

41. *Client Acceptance and Retention and Audit Planning Activities.* The auditor should evaluate whether information obtained from the client acceptance and retention evaluation process or audit planning activities is relevant

---

[21] Paragraphs 16–35 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement.*

[22] Paragraph B1 of Auditing Standard No. 5.

[23] Paragraph 22 of Auditing Standard No. 5.

[24] The entity-level controls included in paragraph 24 of Auditing Standard No. 5 include controls related to the control environment; the company's risk assessment process; centralized processing and controls; controls over the period-end financial reporting process; and controls to monitor other controls.

to identifying risks of material misstatement. Risks of material misstatement identified during those activities should be assessed as discussed beginning in paragraph 59 of this standard.

42. *Past Audits.* In subsequent years, the auditor should incorporate knowledge obtained during past audits into the auditor's process for identifying risks of material misstatement, including when identifying significant ongoing matters that affect the risks of material misstatement or determining how changes in the company or its environment affect the risks of material misstatement, as discussed in paragraph 8 of this standard.

43. If the auditor plans to limit the nature, timing, or extent of his or her risk assessment procedures by relying on information from past audits, the auditor should evaluate whether the prior years' information remains relevant and reliable.

44. *Other Engagements.* When the auditor has performed a review of interim financial information in accordance with AU sec. 722, *Interim Financial Information,* the auditor should evaluate whether information obtained during the review is relevant to identifying risks of material misstatement in the year-end audit.

45. The auditor should obtain an understanding of the nature of the services that have been performed for the company by the auditor or affiliates of the firm[25] and should take into account relevant information obtained from those engagements in identifying risks of material misstatement.[26]

Performing Analytical Procedures

46. The auditor should perform analytical procedures that are designed to:

a. Enhance the auditor's understanding of the client's business and the significant transactions and events that have occurred since the prior year end; and

b. Identify areas that might represent specific risks relevant to the audit, including the existence of unusual transactions and events, and amounts, ratios, and trends that warrant investigation.

47. In applying analytical procedures as risk assessment procedures, the auditor should perform analytical procedures relating to revenue with the objective of identifying unusual or unexpected relationships involving revenue accounts that might indicate a material misstatement, including material misstatement due to fraud. Also, when the auditor has performed a review of interim financial information in accordance with AU sec. 722, he or she should take into account the analytical procedures applied in that review when designing and applying analytical procedures as risk assessment procedures.

48. When performing an analytical procedure, the auditor should use his or her understanding of the company to develop expectations about plausible relationships among the data to be used in the procedure.[27] When comparison of those expectations with relationships derived from recorded amounts yields unusual or unexpected results, the auditor should take into account those results in identifying the risks of material misstatement.

---

[25] See PCAOB Rule 3501(a)(i), which defines "affiliate of the accounting firm."

[26] Paragraph 7 of Auditing Standard No. 9, *Audit Planning*.

[27] Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data.

Note: Analytical procedures performed as risk assessment procedures often use data that is preliminary or data that is aggregated at a high level, and, in those instances, such analytical procedures are not designed with the level of precision necessary for substantive analytical procedures.

Conducting a Discussion among Engagement Team Members Regarding Risks of Material Misstatement

49. The key engagement team members should discuss (1) the company's selection and application of accounting principles, including related disclosure requirements, and (2) the susceptibility of the company's financial statements to material misstatement due to error or fraud.

Note: The key engagement team members should discuss the potential for material misstatement due to fraud either as part of the discussion regarding risks of material misstatement or in a separate discussion.[28]

Note: As discussed in paragraph 67, the financial statements might be susceptible to misstatement through omission of required disclosures or presentation of inaccurate or incomplete disclosures.

50. Key engagement team members include all engagement team members who have significant engagement responsibilities, including the engagement partner. The manner in which the discussion is conducted depends on the individuals involved and the circumstances of the engagement. For example, if the audit involves more than one location, there could be multiple discussions with team members in differing locations. The engagement partner or other key engagement team members should communicate the important matters from the discussion to engagement team members who are not involved in the discussion.

Note: If the audit is performed entirely by the engagement partner, that engagement partner, having personally conducted the planning of the audit, is responsible for evaluating the susceptibility of the company's financial statements to material misstatement.

51. Communication among the engagement team members about significant matters affecting the risks of material misstatement should continue throughout the audit, including when conditions change.[29]

Discussion of the Potential for Material Misstatement Due to Fraud

52. The discussion among the key engagement team members about the potential for material misstatement due to fraud should occur with an attitude that includes a questioning mind, and the key engagement team members should set aside any prior beliefs they might have that management is honest and has integrity. The discussion among the key engagement team members should include:

- An exchange of ideas, or "brainstorming," among the key engagement team members, including the engagement partner, about how and where they believe the company's financial statements

[28] Paragraphs 52–53 of this standard.

[29] See also paragraph 29 of Auditing Standard No. 14, *Evaluating Audit Results*.

might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the company could be misappropriated, including (a) the susceptibility of the financial statements to material misstatement through related party transactions and (b) how fraud might be perpetrated or concealed by omitting or presenting incomplete or inaccurate disclosures;

- A consideration of the known external and internal factors affecting the company that might (a) create incentives or pressures for management and others to commit fraud, (b) provide the opportunity for fraud to be perpetrated, and (c) indicate a culture or environment that enables management to rationalize committing fraud;
- A consideration of the risk of management override; and
- A consideration of the potential audit responses to the susceptibility of the company's financial statements to material misstatement due to fraud.

53. The auditor should emphasize the following matters to all engagement team members:

- The need to maintain a questioning mind throughout the audit and to exercise professional skepticism in gathering and evaluating evidence, as described in AU sec. 316;[30]
- The need to be alert for information or other conditions (such as those matters presented in Appendix C of Auditing Standard No. 14) that might affect the assessment of fraud risks; and
- If information or other conditions indicate that a material misstatement due to fraud might have occurred, the need to probe the issues, acquire additional evidence as necessary, and consult with other team members and, if appropriate, others in the firm including specialists.[31]

Inquiring of the Audit Committee, Management, and Others within the Company about the Risks of Material Misstatement

54. The auditor should inquire of the audit committee, or equivalent (or its chair), management, the internal audit function, and others within the company who might reasonably be expected to have information that is important to the identification and assessment of risks of material misstatement.

Note: The auditor's inquiries about risks of material misstatement should include inquiries regarding fraud risks.

55. The auditor should use his or her knowledge of the company and its environment, as well as information from other risk assessment procedures, to determine the nature of the inquiries about risks of material misstatement.

---

[30] AU sec. 316.13.

[31] Paragraphs 20–23 of Auditing Standard No. 14 establish further requirements for evaluating whether misstatements might be indicative of fraud and determining the necessary procedures to be performed in those situations.

Inquiries Regarding Fraud Risks

56. The auditor's inquiries regarding fraud risks should include the following:

a. Inquiries of management regarding:

(1) Whether management has knowledge of fraud, alleged fraud, or suspected fraud affecting the company;

(2) Management's process for identifying and responding to fraud risks in the company, including any specific fraud risks the company has identified or account balances or disclosures for which a fraud risk is likely to exist, and the nature, extent, and frequency of management's fraud risk assessment process;

(3) Controls that the company has established to address fraud risks the company has identified, or that otherwise help to prevent and detect fraud, including how management monitors those controls;

(4) For a company with multiple locations (a) the nature and extent of monitoring of operating locations or business segments and (b) whether there are particular operating locations or business segments for which a fraud risk might be more likely to exist;

(5) Whether and how management communicates to employees its views on business practices and ethical behavior;

(6) Whether management has received tips or complaints regarding the company's financial reporting (including those received through the audit committee's internal whistleblower program, if such program exists) and, if so, management's responses to such tips and complaints; and

(7) Whether management has reported to the audit committee on how the company's internal control serves to prevent and detect material misstatements due to fraud.

b. Inquiries of the audit committee, or equivalent, or its chair regarding:

(1) The audit committee's views about fraud risks in the company;

(2) Whether the audit committee has knowledge of fraud, alleged fraud, or suspected fraud affecting the company;

(3) Whether the audit committee is aware of tips or complaints regarding the company's financial reporting (including those received through the audit committee's internal whistleblower program, if such program exists) and, if so, the audit committee's responses to such tips and complaints; and

(4) How the audit committee exercises oversight of the company's assessment of fraud risks and the establishment of controls to address fraud risks.

c. If the company has an internal audit function, inquiries of appropriate internal audit personnel regarding:

(1) The internal auditors' views about fraud risks in the company;

(2) Whether the internal auditors have knowledge of fraud, alleged fraud, or suspected fraud affecting the company;

(3) Whether internal auditors have performed procedures to identify or detect fraud during the year, and whether management has satisfactorily responded to the findings resulting from those procedures; and

(4) Whether internal auditors are aware of instances of management override of controls and the nature and circumstances of such overrides.

57. In addition to the inquiries outlined in the preceding paragraph, the auditor should inquire of others within the company about their views regarding fraud risks, including, in particular, whether they have knowledge of fraud, alleged fraud, or suspected fraud. The auditor should identify other individuals within the company to whom inquiries should be directed and determine the extent of such inquiries by considering whether others in the company might have additional knowledge about fraud, alleged fraud, or suspected fraud or might be able to corroborate fraud risks identified in discussions with management or the audit committee. Examples of other individuals within the company to whom inquiries might be directed include:

- Employees with varying levels of authority within the company, including, e.g., company personnel with whom the auditor comes into contact during the course of the audit (a) in obtaining an understanding of internal control, (b) in observing inventory or performing cutoff procedures, or (c) in obtaining explanations for significant differences identified when performing analytical procedures;
- Operating personnel not directly involved in the financial reporting process;
- Employees involved in initiating, recording, or processing complex or unusual transactions, e.g., a sales transaction with multiple elements or a significant related party transaction; and
- In-house legal counsel.

58. When evaluating management's responses to inquiries about fraud risks and determining when it is necessary to corroborate management's responses, the auditor should take into account the fact that management is often in the best position to commit fraud. Also, the auditor should obtain evidence to address inconsistencies in responses to the inquiries.

Identifying and Assessing the Risks of Material Misstatement

59. The auditor should identify and assess the risks of material misstatement at the financial statement level and the assertion level. In identifying and assessing risks of material misstatement, the auditor should:

a. Identify risks of misstatement using information obtained from performing risk assessment procedures (as discussed in paragraphs 4–58) and considering the characteristics of the accounts and disclosures in the financial statements.

Note: Factors relevant to identifying fraud risks are discussed in paragraphs 65–69 of this standard.

b. Evaluate whether the identified risks relate pervasively to the financial statements as a whole and potentially affect many assertions.

c. Evaluate the types of potential misstatements that could result from the identified risks and the accounts, disclosures, and assertions that could be affected.

Note: In identifying and assessing risks at the assertion level, the auditor should evaluate how risks at the financial statement level could affect risks of misstatement at the assertion level.

d. Assess the likelihood of misstatement, including the possibility of multiple misstatements, and the magnitude of potential misstatement to assess the possibility that the risk could result in material misstatement of the financial statements.

Note: In assessing the likelihood and magnitude of potential misstatement, the auditor may take into account the planned degree of reliance on controls selected to test.[32]

e. Identify significant accounts and disclosures[33] and their relevant assertions[34] (paragraphs 60–64 of this standard).

Note: The determination of whether an account or disclosure is significant or whether an assertion is a relevant assertion is based on inherent risk, without regard to the effect of controls.

f. Determine whether any of the identified and assessed risks of material misstatement are **significant risks** (paragraphs 70–71 of this standard).

Identifying Significant Accounts and Disclosures and Their Relevant Assertions

60. To identify significant accounts and disclosures and their relevant assertions in accordance with paragraph 59.e., the auditor should evaluate the qualitative and quantitative risk factors related to the financial statement line items and disclosures. Risk factors relevant to the identification of significant accounts and disclosures and their relevant assertions include:

- Size and composition of the account;
- Susceptibility to misstatement due to error or fraud;
- Volume of activity, complexity, and homogeneity of the individual transactions processed through the account or reflected in the disclosure;
- Nature of the account or disclosure;

---

[32] Paragraphs 16–35 of Auditing Standard No. 13.

[33] Paragraph A10 of Auditing Standard No. 5 states:

An account or disclosure is a significant account or disclosure if there is a reasonable possibility that the account or disclosure could contain a misstatement that, individually or when aggregated with others, has a material effect on the financial statements, considering the risks of both overstatement and understatement. The determination of whether an account or disclosure is significant is based on inherent risk, without regard to the effect of controls.

[34] Paragraph A9 of Auditing Standard No. 5 states:

A relevant assertion is a financial statement assertion that has a reasonable possibility of containing a misstatement or misstatements that would cause the financial statements to be materially misstated. The determination of whether an assertion is a relevant assertion is based on inherent risk, without regard to the effect of controls.

- Accounting and reporting complexities associated with the account or disclosure;
- Exposure to losses in the account;
- Possibility of significant contingent liabilities arising from the activities reflected in the account or disclosure;
- Existence of related party transactions in the account; and
- Changes from the prior period in account and disclosure characteristics.

61. As part of identifying significant accounts and disclosures and their relevant assertions, the auditor also should determine the likely sources of potential misstatements that would cause the financial statements to be materially misstated. The auditor might determine the likely sources of potential misstatements by asking himself or herself "what could go wrong?" within a given significant account or disclosure.

62. The risk factors that the auditor should evaluate in the identification of significant accounts and disclosures and their relevant assertions are the same in the audit of internal control over financial reporting as in the audit of the financial statements; accordingly, significant accounts and disclosures and their relevant assertions are the same for both audits.

Note: In the financial statement audit, the auditor might perform substantive auditing procedures on financial statement accounts, disclosures, and assertions that are not determined to be significant accounts and disclosures and relevant assertions.[35]

63. The components of a potential significant account or disclosure might be subject to significantly differing risks.

64. When a company has multiple locations or business units, the auditor should identify significant accounts and disclosures and their relevant assertions based on the consolidated financial statements.

Factors Relevant to Identifying Fraud Risks

65. The auditor should evaluate whether the information gathered from the risk assessment procedures indicates that one or more fraud risk factors are present and should be taken into account in identifying and assessing fraud risks. Fraud risk factors are events or conditions that indicate (1) an incentive or pressure to perpetrate fraud, (2) an opportunity to carry out the fraud, or (3) an attitude or rationalization that justifies the fraudulent action. Fraud risk factors do not necessarily indicate the existence of fraud; however, they often are present in circumstances in which fraud exists. Examples of fraud risk factors related to fraudulent financial reporting and misappropriation of assets are listed in AU sec. 316.85. These illustrative risk factors are classified based on the three conditions discussed in this paragraph, which generally are present when fraud exists.

---

[35] The auditor might perform substantive auditing procedures because his or her assessment of the risk that undetected misstatement would cause the financial statements to be materially misstated is unacceptably high or as a means of introducing unpredictability in the procedures performed. See paragraphs 11, 14, and 25 of Auditing Standard No. 14, for further discussion about undetected misstatement. See paragraph 61 of Auditing Standard No. 5 and paragraph 5.c. of Auditing Standard No. 13, for further discussion about the unpredictability of auditing procedures.

Note: The factors listed in AU sec. 316.85 cover a broad range of situations and are only examples. Accordingly, the auditor might identify additional or different fraud risk factors.

66. All three conditions discussed in the preceding paragraph are not required to be observed or evident to conclude that a fraud risk exists. The auditor might conclude that a fraud risk exists even when only one of these three conditions is present.

67. *Consideration of the Risk of Omitted, Incomplete, or Inaccurate Disclosures.* The auditor's evaluation of fraud risk factors in accordance with paragraph 65 should include evaluation of how fraud could be perpetrated or concealed by presenting incomplete or inaccurate disclosures or by omitting disclosures that are necessary for the financial statements to be presented fairly in conformity with the applicable financial reporting framework.

68. *Presumption of Fraud Risk Involving Improper Revenue Recognition.* The auditor should presume that there is a fraud risk involving improper revenue recognition and evaluate which types of revenue, revenue transactions, or assertions may give rise to such risks.

69. *Consideration of the Risk of Management Override of Controls.* The auditor's identification of fraud risks should include the risk of management override of controls.

Note: Controls over management override are important to effective internal control over financial reporting for all companies, and may be particularly important at smaller companies because of the increased involvement of senior management in performing controls and in the period-end financial reporting process. For smaller companies, the controls that address the risk of management override might be different from those at a larger company. For example, a smaller company might rely on more detailed oversight by the audit committee that focuses on the risk of management override.

Factors Relevant to Identifying Significant Risks

70. To determine whether an identified and assessed risk is a significant risk, the auditor should evaluate whether the risk requires special audit consideration because of the nature of the risk or the likelihood and potential magnitude of misstatement related to the risk.

Note: The determination of whether a risk of material misstatement is a significant risk is based on inherent risk, without regard to the effect of controls.

71. Factors that should be evaluated in determining which risks are significant risks include:

a. The effect of the quantitative and qualitative risk factors discussed in paragraph 60 on the likelihood and potential magnitude of misstatements;

b. Whether the risk is a fraud risk;

   Note: A fraud risk is a significant risk.

c. Whether the risk is related to recent significant economic, accounting, or other developments;

d. The complexity of transactions;

e. Whether the risk involves significant transactions with related parties;

f. The degree of complexity or judgment in the recognition or measurement of financial information related to the risk, especially those measurements involving a wide range of measurement uncertainty; and

g. Whether the risk involves significant transactions that are outside the normal course of business for the company or that otherwise appear to be unusual due to their timing, size, or nature.

Further Consideration of Controls

72. When the auditor has determined that a significant risk, including a fraud risk, exists, the auditor should evaluate the design of the company's controls that are intended to address fraud risks and other significant risks and determine whether those controls have been implemented, if the auditor has not already done so when obtaining an understanding of internal control, as described in paragraphs 18–40 of this standard.[36]

73. Controls that address fraud risks include (a) specific controls designed to mitigate specific risks of fraud, e.g., controls to address risks of intentional misstatement of specific accounts and (b) controls designed to prevent, deter, and detect fraud, e.g., controls to promote a culture of honesty and ethical behavior.[37] Such controls also include those that address the risk of management override of other controls.

Revision of Risk Assessment

74. The auditor's assessment of the risks of material misstatement, including fraud risks, should continue throughout the audit. When the auditor obtains audit evidence during the course of the audit that contradicts the audit evidence on which the auditor originally based his or her risk assessment, the auditor should revise the risk assessment and modify planned audit procedures or perform additional procedures in response to the revised risk assessments.[38]

---

[36] Auditing Standard No. 13 discusses the auditor's response to fraud risks and other significant risks.

[37] AU sec. 316.88 and paragraph 14 of Auditing Standard No. 5 present examples of controls that address fraud risks.

[38] See also paragraph 46 of Auditing Standard No. 13.

Appendix A

Definitions

A1. For purposes of this standard, the terms listed below are defined as follows:

A2. Business risks—Risks that result from significant conditions, events, circumstances, actions, or inactions that could adversely affect a company's ability to achieve its objectives and execute its strategies. Business risks also might result from setting inappropriate objectives and strategies or from changes or complexity in the company's operations or management.

A3. Company's objectives and strategies—The overall plans for the company as established by management or the board of directors. Strategies are the approaches by which management intends to achieve its objectives.

A4. Risk assessment procedures—The procedures performed by the auditor to obtain information for identifying and assessing the risks of material misstatement in the financial statements whether due to error or fraud.

> Note: Risk assessment procedures by themselves do not provide sufficient appropriate evidence on which to base an audit opinion.

A5. Significant risk—A risk of material misstatement that requires special audit consideration.

Appendix B

Consideration of Manual and Automated Systems and Controls

B1. While obtaining an understanding of the company's information system related to financial reporting, the auditor should obtain an understanding of how the company uses information technology ("IT") and how IT affects the financial statements.[1] The auditor also should obtain an understanding of the extent of manual controls and automated controls used by the company, including the IT general controls that are important to the effective operation of the automated controls. That information should be taken into account in assessing the risks of material misstatement.[2]

B2. Controls in a manual system might include procedures such as approvals and reviews of transactions, and reconciliations and follow-up of reconciling items.

B3. Alternatively, a company might use automated procedures to initiate, record, process, and report transactions, in which case records in electronic format would replace paper documents. When IT is used to initiate, record, process, and report transactions, the IT systems and programs may include controls related to the relevant assertions of significant accounts and disclosures or may be critical to the effective functioning of manual controls that depend on IT.

B4. The auditor should obtain an understanding of specific risks to a company's internal control over financial reporting resulting from IT. Examples of such risks include:

- Reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both;
- Unauthorized access to data that might result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions (particular risks might arise when multiple users access a common database);
- The possibility of IT personnel gaining access privileges beyond those necessary to perform their assigned duties, thereby breaking down segregation of duties;
- Unauthorized changes to data in master files;
- Unauthorized changes to systems or programs;
- Failure to make necessary changes to systems or programs;
- Inappropriate manual intervention; and
- Potential loss of data or inability to access data as required.

B5. In obtaining an understanding of the company's control activities, the auditor should obtain an understanding of how the company has responded to risks arising from IT.

---

[1] See also AU sec. 324, *Service Organizations*, if the company uses a service organization for services that are part of the company's internal control over financial reporting.

[2] *See also* paragraphs 16–17 of Auditing Standard No. 9, *Audit Planning*.

B6. When a company uses manual elements in internal control systems and the auditor plans to rely on, and therefore test, those manual controls, the auditor should design procedures to test the consistency in the application of those manual controls.

Appendix 6—Auditing Standard No. 13

The Auditor's Responses to the Risks of Material Misstatement

Introduction

1. This standard establishes requirements regarding designing and implementing appropriate responses to the risks of material misstatement.

Objective

2. The objective of the auditor is to address the risks of material misstatement through appropriate overall audit responses and audit procedures.

Responding to the Risks of Material Misstatement

3. To meet the objective in the preceding paragraph, the auditor must design and implement audit responses that address the risks of material misstatement that are identified and assessed in accordance with Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

4. This standard discusses the following types of audit responses:

a. Responses that have an overall effect on how the audit is conducted ("overall responses"), as described in paragraphs 5–7; and

b. Responses involving the nature, timing, and extent of the audit procedures to be performed, as described in paragraphs 8–46.

Overall Responses

5. The auditor should design and implement overall responses to address the assessed risks of material misstatement as follows:

a. *Making appropriate assignments of significant engagement responsibilities.* The knowledge, skill, and ability of engagement team members with significant engagement responsibilities should be commensurate with the assessed risks of material misstatement.[1]

b. *Providing the extent of supervision that is appropriate for the circumstances, including, in particular, the assessed risks of material misstatement.* (See paragraphs 5–6 of Auditing Standard No. 10, *Supervision of the Audit Engagement*.)

c. *Incorporating elements of unpredictability in the selection of audit procedures to be performed.* As part of the auditor's response to the assessed risks of material misstatement, including the assessed risks of material misstatement due to fraud ("fraud risks"), the auditor should incorporate an element of unpredictability in the

[1] See also paragraph .06 of AU sec. 230, *Due Professional Care in the Performance of Work*.

selection of auditing procedures to be performed from year to year. Examples of ways to incorporate an element of unpredictability include:

(1) Performing audit procedures related to accounts, disclosures, and assertions that would not otherwise be tested based on their amount or the auditor's assessment of risk;

(2) Varying the timing of the audit procedures;

(3) Selecting items for testing that have lower amounts or are otherwise outside customary selection parameters;

(4) Performing audit procedures on an unannounced basis; and

(5) In multi-location audits, varying the location or the nature, timing, and extent of audit procedures at related locations or business units from year to year.[2]

d. *Evaluating the company's selection and application of significant accounting principles.* The auditor should evaluate whether the company's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions,[3] are indicative of bias that could lead to material misstatement of the financial statements.

Note: Paragraph .11 of AU sec. 380, *Communication With Audit Committees*, discusses the auditor's judgments about the quality of a company's accounting principles.

6. The auditor also should determine whether it is necessary to make pervasive changes to the nature, timing, or extent of audit procedures to adequately address the assessed risks of material misstatement. Examples of such pervasive changes include modifying the audit strategy to:

a. Increase the substantive testing of the valuation of numerous significant accounts at year end because of significantly deteriorating market conditions, and

b. Obtain more persuasive audit evidence from substantive procedures due to the identification of pervasive weaknesses in the company's control environment.

7. Due professional care requires the auditor to exercise professional skepticism.[4] Professional skepticism is an attitude that includes a questioning mind and a critical assessment of the appropriateness and sufficiency of audit evidence. The auditor's responses to the assessed risks of material misstatement, particularly fraud risks, should involve the application of professional skepticism in gathering and evaluating audit evidence.[5] Examples of the application of professional skepticism in response to the assessed fraud risks are (a) modifying the planned audit procedures to obtain more reliable evidence regarding

---

[2] For integrated audits, paragraphs 61 and B13 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, establish requirements for introducing unpredictability in testing of controls from year to year and in multi-location audits.

[3] Paragraphs 12–13 of Auditing Standard No. 12 discuss the auditor's responsibilities regarding obtaining an understanding of the company's selection and application of accounting principles. See also paragraphs .66–.67 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit,* and paragraphs .04 and .06 of AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles.*

[4] AU secs. 230.07–.09.

[5] AU sec. 316.13.

relevant assertions and (b) obtaining sufficient appropriate evidence to corroborate management's explanations or representations concerning important matters, such as through third-party confirmation, use of a specialist engaged or employed by the auditor, or examination of documentation from independent sources.

Responses Involving the Nature, Timing, and Extent of Audit Procedures

8. The auditor should design and perform audit procedures in a manner that addresses the assessed risks of material misstatement for each relevant assertion of each significant account and disclosure.

9. In designing the audit procedures to be performed, the auditor should:

a. Obtain more persuasive audit evidence the higher the auditor's assessment of risk;

b. Take into account the types of potential misstatements that could result from the identified risks and the likelihood and magnitude of potential misstatement;[6]

c. In an integrated audit, design the testing of controls to accomplish the objectives of both audits simultaneously:

(1) To obtain sufficient evidence to support the auditor's control risk[7] assessments for purposes of the audit of financial statements;[8] and

(2) To obtain sufficient evidence to support the auditor's opinion on internal control over financial reporting as of year-end.

Note: Auditing Standard No. 5 establishes requirements for tests of controls in the audit of internal control over financial reporting.

10. The audit procedures performed in response to the assessed risks of material misstatement can be classified into two categories: (1) tests of controls and (2) substantive procedures.[9] Paragraphs 16–35 of this standard discuss tests of controls, and paragraphs 36–46 discuss substantive procedures.

Note: Paragraphs 16–17 of this standard discuss when tests of controls are necessary in a financial statement audit. Ordinarily, tests of controls are performed for relevant assertions for which the auditor chooses to rely on controls to modify his or her substantive procedures.

Responses to Significant Risks

11. For significant risks, the auditor should perform substantive procedures, including tests of details, that are specifically responsive to the assessed risks.

---

[6] For example, potential misstatements regarding disclosures include omission of required disclosures or presentation of inaccurate or incomplete disclosures.

[7] See paragraph 7.b. of Auditing Standard No. 8, *Audit Risk*, for a definition of control risk.

[8] For purposes of this standard, the term "audit of financial statements" refers to the financial statement portion of the integrated audit and to the audit of financial statements only.

[9] Substantive procedures consist of (a) tests of details of accounts and disclosures and (b) substantive analytical procedures.

Note: Auditing Standard No. 12 discusses identification of significant risks[10] and states that fraud risks are significant risks.

Responses to Fraud Risks

12. The audit procedures that are necessary to address the assessed fraud risks depend upon the types of risks and the relevant assertions that might be affected.

Note: If the auditor identifies deficiencies in controls that are intended to address assessed fraud risks, the auditor should take into account those deficiencies when designing his or her response to those fraud risks.

Note: Auditing Standard No. 5 establishes requirements for addressing assessed fraud risks in the audit of internal control over financial reporting.[11]

13. *Addressing Fraud Risks in the Audit of Financial Statements.* In the audit of financial statements, the auditor should perform substantive procedures, including tests of details, that are specifically responsive to the assessed fraud risks. If the auditor selects certain controls intended to address the assessed fraud risks for testing in accordance with paragraphs 16–17 of this standard, the auditor should perform tests of those controls.

14. The following are examples of ways in which planned audit procedures may be modified to address assessed fraud risks:

a. Changing the *nature* of audit procedures to obtain evidence that is more reliable or to obtain additional corroborative information;

b. Changing the *timing* of audit procedures to be closer to the end of the period or to the points during the period in which fraudulent transactions are more likely to occur; and

c. Changing the *extent* of the procedures applied to obtain more evidence, e.g., by increasing sample sizes or applying computer-assisted audit techniques to all of the items in an account.

Note: AU secs. 316.54–.67 provide additional examples of responses to assessed fraud risks relating to fraudulent financial reporting (e.g., revenue recognition, inventory quantities, and management estimates) and misappropriation of assets in the audit of financial statements.

15. Also, AU sec. 316 indicates that the auditor should perform audit procedures to specifically address the risk of management override of controls including:

a. Examining journal entries and other adjustments for evidence of possible material misstatement due to fraud (AU secs. 316.58–.62);

b. Reviewing accounting estimates for biases that could result in material misstatement due to fraud (AU secs. 316.63–.65); and

c. Evaluating the business rationale for significant unusual transactions (AU secs. 316.66–.67).

---

[10] See paragraph 71 of Auditing Standard No. 12 for factors that the auditor should evaluate in determining which risks are significant risks.

[11] Paragraphs 14–15 of Auditing Standard No. 5.

Testing Controls

Testing Controls in an Audit of Financial Statements

16. *Controls to be Tested.* If the auditor plans to assess control risk at less than the maximum by relying on controls,[12] and the nature, timing, and extent of planned substantive procedures are based on that lower assessment, the auditor must obtain evidence that the controls selected for testing are designed effectively and operated effectively during the entire **period of reliance**.[13] However, the auditor is not required to assess control risk at less than the maximum for *all* relevant assertions and, for a variety of reasons, the auditor may choose not to do so.

17. Also, tests of controls must be performed in the audit of financial statements for each relevant assertion for which substantive procedures alone cannot provide sufficient appropriate audit evidence and when necessary to support the auditor's reliance on the accuracy and completeness of financial information used in performing other audit procedures.[14]

> Note: When a significant amount of information supporting one or more relevant assertions is electronically initiated, recorded, processed, or reported, it might be impossible to design effective substantive tests that, by themselves, would provide sufficient appropriate evidence regarding the assertions. For such assertions, significant audit evidence may be available only in electronic form. In such cases, the sufficiency and appropriateness of the audit evidence usually depend on the effectiveness of controls over their accuracy and completeness. Furthermore, the potential for improper initiation or alteration of information to occur and not be detected may be greater if information is initiated, recorded, processed, or reported only in electronic form and appropriate controls are not operating effectively.

18. *Evidence about the Effectiveness of Controls in the Audit of Financial Statements.* In designing and performing tests of controls for the audit of financial statements, the evidence necessary to support the auditor's control risk assessment depends on the degree of reliance the auditor plans to place on the effectiveness of a control. The auditor should obtain more persuasive audit evidence from tests of controls the greater the reliance the auditor places on the effectiveness of a control. The auditor also should obtain more persuasive evidence about the effectiveness of controls for each relevant assertion for which the audit approach consists primarily of tests of controls, including situations in which substantive procedures alone cannot provide sufficient appropriate audit evidence.

Testing Design Effectiveness

19. The auditor should test the design effectiveness of the controls selected for testing by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence

---

[12] Reliance on controls that is supported by sufficient and appropriate audit evidence allows the auditor to assess control risk at less than the maximum, which results in a lower assessed risk of material misstatement. In turn, this allows the auditor to modify the nature, timing, and extent of planned substantive procedures.

[13] Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

[14] Paragraph 10 of Auditing Standard No. 15, *Audit Evidence*, and paragraph .16 of AU sec. 329, *Substantive Analytical Procedures*.

to perform the control effectively, satisfy the company's control objectives and can effectively prevent or detect error or fraud that could result in material misstatements in the financial statements.

Note: A smaller, less complex company might achieve its control objectives in a different manner from a larger, more complex organization. For example, a smaller, less complex company might have fewer employees in the accounting function, limiting opportunities to segregate duties and leading the company to implement alternative controls to achieve its control objectives. In such circumstances, the auditor should evaluate whether those alternative controls are effective.

20. Procedures the auditor performs to test design effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, and inspection of relevant documentation. Walkthroughs that include these procedures ordinarily are sufficient to evaluate design effectiveness.[15]

Testing Operating Effectiveness

21. The auditor should test the operating effectiveness of a control selected for testing by determining whether the control is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

22. Procedures the auditor performs to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control.

Obtaining Evidence from Tests of Controls

23. The evidence provided by the auditor's tests of the effectiveness of controls depends upon the mix of the nature, timing, and extent of the auditor's procedures. Further, for an individual control, different combinations of the nature, timing, and extent of testing might provide sufficient evidence in relation to the degree of reliance in an audit of financial statements.

Note: To obtain evidence about whether a control is effective, the control must be tested directly; the effectiveness of a control cannot be inferred from the absence of misstatements detected by substantive procedures.

Nature of Tests of Controls

24. Some types of tests, by their nature, produce greater evidence of the effectiveness of controls than other tests. The following tests that the auditor might perform are presented in the order of the evidence that they ordinarily would produce, from least to most: inquiry, observation, inspection of relevant documentation, and re-performance of a control.

Note: Inquiry alone does not provide sufficient evidence to support a conclusion about the effectiveness of a control.

25. The nature of the tests of controls that will provide appropriate evidence depends, to a large degree, on the nature of the control to be tested, including whether the operation of the control results in documentary evidence

[15] Paragraphs 37–38 of Auditing Standard No. 12 discuss performing a walkthrough.

of its operation. Documentary evidence of the operation of some controls, such as management's philosophy and operating style, might not exist.

Note: A smaller, less complex company or unit might have less formal documentation regarding the operation of its controls. In those situations, testing controls through inquiry combined with other procedures, such as observation of activities, inspection of less formal documentation, or re-performance of certain controls, might provide sufficient evidence about whether the control is effective.

Extent of Tests of Controls

26. The more extensively a control is tested, the greater the evidence obtained from that test.

27. Matters that could affect the necessary extent of testing of a control in relation to the degree of reliance on a control include the following:

- The frequency of the performance of the control by the company during the audit period;
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control;
- The expected rate of deviation from a control;
- The relevance and reliability of the audit evidence to be obtained regarding the operating effectiveness of the control;
- The extent to which audit evidence is obtained from tests of other controls related to the assertion;
- The nature of the control, including, in particular, whether it is a manual control or an automated control; and
- For an automated control, the effectiveness of relevant information technology general controls.

  Note: AU sec. 350, *Audit Sampling*, establishes requirements regarding the use of sampling in tests of controls.

Timing of Tests of Controls

28. The timing of tests of controls relates to when the evidence about the operating effectiveness of the controls is obtained and the period of time to which it applies. Paragraph 16 of this standard indicates that the auditor must obtain evidence that the controls selected for testing are designed effectively and operated effectively during the entire period of reliance.

29. *Using Audit Evidence Obtained during an Interim Period.* When the auditor obtains evidence about the operating effectiveness of controls as of or through an interim date, he or she should determine what additional evidence is necessary concerning the operation of the controls for the remaining period of reliance.

30. The additional evidence that is necessary to update the results of testing from an interim date through the remaining period of reliance depends on the following factors:

- The possibility that there have been any significant changes in internal control over financial reporting subsequent to the interim date;

Note: If there have been significant changes to the control since the interim date, the auditor should obtain evidence about the effectiveness of the new or modified control;

- The inherent risk associated with the related account(s) or assertion(s);
- The specific control tested prior to year end, including the nature of the control and the risk that the control is no longer effective during the remaining period, and the results of the tests of the control;
- The planned degree of reliance on the control;
- The sufficiency of the evidence of effectiveness obtained at an interim date; and
- The length of the remaining period.

31. *Using Audit Evidence Obtained in Past Audits.* For audits of financial statements, the auditor should obtain evidence during the current year audit about the design and operating effectiveness of controls upon which the auditor relies. When controls on which the auditor plans to rely have been tested in past audits and the auditor plans to use evidence about the effectiveness of those controls that was obtained in prior years, the auditor should take into account the following factors to determine the evidence needed during the current year audit to support the auditor's control risk assessments:

- The nature and materiality of misstatements that the control is intended to prevent or detect;
- The inherent risk associated with the related account(s) or assertion(s);
- Whether there have been changes in the volume or nature of transactions that might adversely affect control design or operating effectiveness;
- Whether the account has a history of errors;
- The effectiveness of entity-level controls that the auditor has tested, especially controls that monitor other controls;
- The nature of the controls and the frequency with which they operate;
- The degree to which the control relies on the effectiveness of other controls (e.g., the control environment or information technology general controls);
- The competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance;
- Whether the control relies on performance by an individual or is automated (i.e., an automated control would generally be expected to be lower risk if relevant information technology general controls are effective);[16]
- The complexity of the control and the significance of the judgments that must be made in connection with its operation;

[16] The auditor also may use a benchmarking strategy, when appropriate, for automated application controls in subsequent years' audits. Benchmarking is described further beginning at paragraph B28 of Auditing Standard No. 5.

- The planned degree of reliance on the control;
- The nature, timing, and extent of procedures performed in past audits;
- The results of the previous years' testing of the control;
- Whether there have been changes in the control or the process in which it operates since the previous audit; and
- For integrated audits, the evidence regarding the effectiveness of the controls obtained during the audit of internal control.

Assessing Control Risk

32. The auditor should assess control risk for relevant assertions by evaluating the evidence obtained from all sources, including the auditor's testing of controls for the audit of internal control and the audit of financial statements, misstatements detected during the financial statement audit, and any identified control deficiencies.

33. Control risk should be assessed at the maximum level for relevant assertions (1) for which controls necessary to sufficiently address the assessed risk of material misstatement in those assertions are missing or ineffective or (2) when the auditor has not obtained sufficient appropriate evidence to support a control risk assessment below the maximum level.

34. When deficiencies affecting the controls on which the auditor intends to rely are detected, the auditor should evaluate the severity of the deficiencies and the effect on the auditor's control risk assessments. If the auditor plans to rely on controls relating to an assertion but the controls that the auditor tests are ineffective because of control deficiencies, the auditor should:

a. Perform tests of other controls related to the same assertion as the ineffective controls, or

b. Revise the control risk assessment and modify the planned substantive procedures as necessary in light of the increased assessment of risk.

Note: Auditing Standard No. 5 establishes requirements for evaluating the severity of a control deficiency and communicating identified control deficiencies to management and the audit committee in an integrated audit. AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements*, establishes requirements for communicating significant deficiencies and material weaknesses in an audit of financial statements only.

Testing Controls in an Audit of Internal Control

35. Auditing Standard No. 5 states that the objective of the tests of controls in an audit of internal control is to obtain evidence about the effectiveness of controls to support the auditor's opinion on the company's internal control over financial reporting. The auditor's opinion relates to the effectiveness of the company's internal control over financial reporting as of a point in time and taken as a whole.[17] Auditing Standard No. 5 establishes requirements regarding the selection of controls to be tested and the necessary nature, timing,

[17] Paragraph B1 of Auditing Standard No. 5.

and extent of tests of controls in an audit of internal control over financial reporting.

Substantive Procedures

36. The auditor should perform substantive procedures for each relevant assertion of each significant account and disclosure, regardless of the assessed level of control risk.

37. As the assessed risk of material misstatement increases, the evidence from substantive procedures that the auditor should obtain also increases. The evidence provided by the auditor's substantive procedures depends upon the mix of the nature, timing, and extent of those procedures. Further, for an individual assertion, different combinations of the nature, timing, and extent of testing might provide sufficient appropriate evidence to respond to the assessed risk of material misstatement.

38. Internal control over financial reporting has inherent limitations,[18] which, in turn, can affect the evidence that is needed from substantive procedures. For example, more evidence from substantive procedures ordinarily is needed for relevant assertions that have a higher susceptibility to management override or to lapses in judgment or breakdowns resulting from human failures.[19]

Nature of Substantive Procedures

39. Substantive procedures generally provide persuasive evidence when they are designed and performed to obtain evidence that is relevant and reliable. Also, some types of substantive procedures, by their nature, produce more persuasive evidence than others. Inquiry alone does not provide sufficient appropriate evidence to support a conclusion about a relevant assertion.

> Note: Auditing Standard No. 15 discusses certain types of substantive procedures and the relevance and reliability of audit evidence.

40. Taking into account the types of potential misstatements in the relevant assertions that could result from identified risks, as required by paragraph 9.b., can help the auditor determine the types and combination of substantive audit procedures that are necessary to detect material misstatements in the respective assertions.

41. *Substantive Procedures Related to the Period-end Financial Reporting Process.* The auditor's substantive procedures must include the following audit procedures related to the period-end financial reporting process:

a. Reconciling the financial statements with the underlying accounting records; and

b. Examining material adjustments made during the course of preparing the financial statements.

   Note: AU secs. 316.58–.62 establish requirements for examining journal entries and other adjustments for evidence of possible material misstatement due to fraud.

---

[18] Paragraph A5 of Auditing Standard No. 5.

[19] See, e.g., paragraph .14 of AU sec. 328, *Auditing Fair Value Measurements and Disclosures*.

Extent of Substantive Procedures

42. The more extensively a substantive procedure is performed, the greater the evidence obtained from the procedure. The necessary extent of a substantive audit procedure depends on the materiality of the account or disclosure, the assessed risk of material misstatement, and the necessary degree of assurance from the procedure. However, increasing the extent of an audit procedure cannot adequately address an assessed risk of material misstatement unless the evidence to be obtained from the procedure is reliable and relevant.

Timing of Substantive Procedures

43. Performing certain substantive procedures at interim dates may permit early consideration of matters affecting the year-end financial statements, e.g., testing material transactions involving higher risks of misstatement. However, performing substantive procedures at an interim date without performing procedures at a later date increases the risk that a material misstatement could exist in the year-end financial statements that would not be detected by the auditor. This risk increases as the period between the interim date and year end increases.

44. In determining whether it is appropriate to perform substantive procedures at an interim date, the auditor should take into account the following:

a. The assessed risk of material misstatement, including:
   (1) The auditor's assessment of control risk, as discussed in paragraphs 32–34;
   (2) The existence of conditions or circumstances, if any, that create incentives or pressures on management to misstate the financial statements between the interim test date and the end of the period covered by the financial statements;
   (3) The effects of known or expected changes in the company, its environment, or its internal control over financial reporting during the remaining period;
b. The nature of the substantive procedures;
c. The nature of the account or disclosure and relevant assertion; and
d. The ability of the auditor to perform the necessary audit procedures to cover the remaining period.

45. When substantive procedures are performed at an interim date, the auditor should cover the remaining period by performing substantive procedures, or substantive procedures combined with tests of controls, that provide a reasonable basis for extending the audit conclusions from the interim date to the period end. Such procedures should include (a) comparing relevant information about the account balance at the interim date with comparable information at the end of the period to identify amounts that appear unusual and investigating such amounts and (b) performing audit procedures to test the remaining period.

46. If the auditor obtains evidence that contradicts the evidence on which the original risk assessments were based, including evidence of misstatements that he or she did not expect, the auditor should revise the related risk assessments and modify the planned nature, timing, or extent of substantive procedures covering the remaining period as necessary. Examples of such

modifications include extending or repeating at the period end the procedures performed at the interim date.

Dual-purpose Tests

47. In some situations, the auditor might perform a substantive test of a transaction concurrently with a test of a control relevant to that transaction (a "**dual-purpose test**"). In those situations, the auditor should design the dual-purpose test to achieve the objectives of both the test of the control and the substantive test. Also, when performing a dual-purpose test, the auditor should evaluate the results of the test in forming conclusions about both the assertion and the effectiveness of the control being tested.[20]

[20] Paragraph .44 of AU sec. 350 discusses applying audit sampling in dual-purpose tests.

Appendix A

Definitions

A1. For purposes of this standard, the terms listed below are defined as follows:

A2. Dual-purpose test—Substantive test of a transaction and a test of a control relevant to that transaction that are performed concurrently, e.g., a substantive test of sales transactions performed concurrently with a test of controls over those transactions.

A3. Period of reliance—The period being covered by the company's financial statements, or the portion of that period, for which the auditor plans to rely on controls in order to modify the nature, timing, and extent of planned substantive procedures.

Appendix 7—Auditing Standard No. 14

Evaluating Audit Results

Introduction

1. This standard establishes requirements regarding the auditor's evaluation of audit results and determination of whether he or she has obtained sufficient appropriate audit evidence.

Objective

2. The objective of the auditor is to evaluate the results of the audit to determine whether the audit evidence obtained is sufficient and appropriate to support the opinion to be expressed in the auditor's report.

Evaluating the Results of the Audit of Financial Statements

3. In forming an opinion on whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework, the auditor should take into account all relevant audit evidence, regardless of whether it appears to corroborate or to contradict the assertions in the financial statements.

4. In the audit of financial statements,[1] the auditor's evaluation of audit results should include evaluation of the following:

a. The results of analytical procedures performed in the overall review of the financial statements ("overall review");
b. **Misstatements** accumulated during the audit, including, in particular, **uncorrected misstatements**;[2]
c. The qualitative aspects of the company's accounting practices;
d. Conditions identified during the audit that relate to the assessment of the risk of material misstatement due to fraud ("fraud risk");
e. The presentation of the financial statements, including the disclosures; and
f. The sufficiency and appropriateness of the audit evidence obtained.

Performing Analytical Procedures in the Overall Review

5. In the overall review, the auditor should read the financial statements and disclosures and perform analytical procedures to (a) evaluate the auditor's conclusions formed regarding significant accounts and disclosures and (b) assist

[1] For purposes of this standard, the term "audit of financial statements" refers to the financial statement portion of the integrated audit and to the audit of financial statements only.

[2] Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

in forming an opinion on whether the financial statements as a whole are free of material misstatement.

6. As part of the overall review, the auditor should evaluate whether:

a. The evidence gathered in response to unusual or unexpected transactions, events, amounts, or relationships previously identified during the audit is sufficient; and

b. Unusual or unexpected transactions, events, amounts, or relationships[3] indicate risks of material misstatement that were not identified previously, including, in particular, fraud risks.

Note: If the auditor discovers a previously unidentified risk of material misstatement or concludes that the evidence gathered is not adequate, he or she should modify his or her audit procedures or perform additional procedures as necessary in accordance with paragraph 36 of this standard.

7. The nature and extent of the analytical procedures performed during the overall review may be similar to the analytical procedures performed as risk assessment procedures. The auditor should perform analytical procedures relating to revenue through the end of the reporting period.[4]

8. The auditor should obtain corroboration for management's explanations regarding significant unusual or unexpected transactions, events, amounts, or relationships. If management's responses to the auditor's inquiries appear to be implausible, inconsistent with other audit evidence, imprecise, or not at a sufficient level of detail to be useful, the auditor should perform procedures to address the matter.

9. *Evaluating Whether Analytical Procedures Indicate a Previously Unrecognized Fraud Risk.* Whether an unusual or unexpected transaction, event, amount, or relationship indicates a fraud risk, as discussed in paragraph 6.b., depends on the relevant facts and circumstances, including the nature of the account or relationship among the data used in the analytical procedures. For example, certain unusual or unexpected transactions, events, amounts, or relationships could indicate a fraud risk if a component of the relationship involves accounts and disclosures that management has incentives or pressures to manipulate, e.g., significant unusual or unexpected relationships involving revenue and income.

Accumulating and Evaluating Identified Misstatements

10. *Accumulating Identified Misstatements.* The auditor should accumulate misstatements identified during the audit, other than those that are clearly trivial.

Note: "Clearly trivial" is not another expression for "not material." Matters that are clearly trivial will be of a smaller order of magnitude than the materiality level established in accordance with Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit,* and will be inconsequential, whether taken individually or in aggregate and whether judged by any criteria of size, nature, or circumstances. When there is any uncertainty about whether one or more items is clearly trivial, the matter is not considered trivial.

---

[3] Paragraphs 46–48 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement* and paragraph .03 of AU sec. 329, *Substantive Analytical Procedures.*

[4] Paragraph 47 of Auditing Standard No. 12 contains a requirement to perform analytical procedures relating to revenue as part of the risk assessment procedures.

11. The auditor may designate an amount below which misstatements are clearly trivial and do not need to be accumulated. In such cases, the amount should be set so that any misstatements below that amount would not be material to the financial statements, individually or in combination with other misstatements, considering the possibility of undetected misstatement.

12. The auditor's accumulation of misstatements should include the auditor's best estimate of the total misstatement in the accounts and disclosures that he or she has tested, not just the amount of misstatements specifically identified. This includes misstatements related to accounting estimates, as determined in accordance with paragraph 13 of this standard, and projected misstatements from substantive procedures that involve audit sampling, as determined in accordance with AU sec. 350, *Audit Sampling*.[5]

13. *Misstatements Relating to Accounting Estimates.* If the auditor concludes that the amount of an accounting estimate included in the financial statements is unreasonable or was not determined in conformity with the relevant requirements of the applicable financial reporting framework, he or she should treat the difference between that estimate and a reasonable estimate determined in conformity with the applicable accounting principles as a misstatement. If a range of reasonable estimates is supported by sufficient appropriate audit evidence and the recorded estimate is outside of the range of reasonable estimates, the auditor should treat the difference between the recorded accounting estimate and the closest reasonable estimate as a misstatement.

Note: If an accounting estimate is determined in conformity with the relevant requirements of the applicable financial reporting framework and the amount of the estimate is reasonable, a difference between an estimated amount best supported by the audit evidence and the recorded amount of the accounting estimate ordinarily would not be considered to be a misstatement. Paragraph 27 discusses evaluating accounting estimates for bias.

14. *Considerations as the Audit Progresses.* The auditor should determine whether the overall audit strategy and audit plan need to be modified if:

a. The nature of accumulated misstatements and the circumstances of their occurrence indicate that other misstatements might exist that, in combination with accumulated misstatements, could be material; or

b. The aggregate of misstatements accumulated during the audit approaches the materiality level or levels used in planning and performing the audit.[6]

Note: When the aggregate of accumulated misstatements approaches the materiality level or levels used in planning and performing the audit, there likely will be greater than an appropriately low level of risk that possible undetected misstatements, when combined with the aggregate of misstatements accumulated during the audit that remain uncorrected, could be material to the financial statements. If the auditor's assessment of this risk is unacceptably high, he or she should perform additional audit procedures or determine that management has adjusted the financial statements so that the risk that the financial statements are materially misstated has been reduced to an appropriately low level.

---

[5] AU sec. 350.26.

[6] Auditing Standard No. 11.

15. The auditor should communicate accumulated misstatements to management on a timely basis to provide management with an opportunity to correct them.

16. If management has examined an account or a disclosure in response to misstatements detected by the auditor and has made corrections to the account or disclosure, the auditor should evaluate management's work to determine whether the corrections have been recorded properly and whether uncorrected misstatements remain.

17. *Evaluation of the Effect of Uncorrected Misstatements.* The auditor should evaluate whether uncorrected misstatements are material, individually or in combination with other misstatements. In making this evaluation, the auditor should evaluate the misstatements in relation to the specific accounts and disclosures involved and to the financial statements as a whole, taking into account relevant quantitative and qualitative factors.[7] (See Appendix B.)

> Note: In interpreting the federal securities laws, the Supreme Court of the United States has held that a fact is material if there is "a substantial likelihood that the ...fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."[8] As the Supreme Court has noted, determinations of materiality require "delicate assessments of the inferences a 'reasonable shareholder' would draw from a given set of facts and the significance of those inferences to him ...."[9]
>
> Note: As a result of the interaction of quantitative and qualitative considerations in materiality judgments, uncorrected misstatements of relatively small amounts could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility[10] that it could lead to a material contingent liability or a material loss of revenue.[11] Also, a misstatement made intentionally could be material for qualitative reasons, even if relatively small in amount.
>
> Note: If the reevaluation of the established materiality level or levels, as set forth in Auditing Standard No. 11,[12] results in a lower amount for the materiality level or levels, the auditor should take into account that lower materiality level or levels in the evaluation of uncorrected misstatements.

18. The auditor's evaluation of uncorrected misstatements, as described in paragraph 17 of this standard, should include evaluation of the effects of uncorrected misstatements detected in prior years and misstatements detected in the current year that relate to prior years.

19. The auditor cannot assume that an instance of error or fraud is an isolated occurrence. Therefore, the auditor should evaluate the nature and effects of the individual misstatements accumulated during the audit on the assessed risks of material misstatement. This evaluation is important in determining

---

[7] If the financial statements contain material misstatements, AU sec. 508, *Reports on Audited Financial Statements*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AU sec. 508.35 discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

[8] TSC Industries v. Northway, Inc., 426 U.S. 438, 449 (1976). See also Basic, Inc. v. Levinson, 485 U.S. 224 (1988).

[9] TSC Industries, 426 U.S. at 450.

[10] There is a reasonable possibility of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in the FASB Accounting Standards Codification, Contingencies Topic, paragraph 450-20-25-1.

[11] AU sec. 317, *Illegal Acts by Clients.*

[12] Paragraphs 11–12 of Auditing Standard No. 11.

whether the risk assessments remain appropriate, as discussed in paragraph 36 of this standard.

20. *Evaluating Whether Misstatements Might Be Indicative of Fraud.* The auditor should evaluate whether identified misstatements[13] might be indicative of fraud and, in turn, how they affect the auditor's evaluation of materiality and the related audit responses. As indicated in AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, fraud is an intentional act that results in material misstatement of the financial statements.[14]

21. If the auditor believes that a misstatement is or might be intentional, and if the effect on the financial statements could be material or cannot be readily determined, the auditor should perform procedures to obtain additional audit evidence to determine whether fraud has occurred or is likely to have occurred and, if so, its effect on the financial statements and the auditor's report thereon.

22. For misstatements that the auditor believes are or might be intentional, the auditor should evaluate the implications on the integrity of management or employees and the possible effect on other aspects of the audit. If the misstatement involves higher-level management, it might be indicative of a more pervasive problem, such as an issue with the integrity of management, even if the amount of the misstatement is small. In such circumstances, the auditor should reevaluate the assessment of fraud risk and the effect of that assessment on (a) the nature, timing, and extent of the necessary tests of accounts or disclosures and (b) the assessment of the effectiveness of controls. The auditor also should evaluate whether the circumstances or conditions indicate possible collusion involving employees, management, or external parties and, if so, the effect of the collusion on the reliability of evidence obtained.

23. If the auditor becomes aware of information indicating that fraud or another illegal act has occurred or might have occurred, he or she also must determine his or her responsibilities under AU secs. 316.79–.82A, AU sec. 317, and Section 10A of the Securities Exchange Act of 1934, 15 U.S.C. §78j–1.

Evaluating the Qualitative Aspects of the Company's Accounting Practices

24. When evaluating whether the financial statements as a whole are free of material misstatement, the auditor should evaluate the qualitative aspects of the company's accounting practices, including potential bias in management's judgments about the amounts and disclosures in the financial statements.

25. The following are examples of forms of management bias:

a. The selective correction of misstatements brought to management's attention during the audit (e.g., correcting misstatements that have the effect of increasing reported earnings but not correcting misstatements that have the effect of decreasing reported earnings).

   Note: To evaluate the potential effect of selective correction of misstatements, the auditor should obtain an understanding of the reasons that management decided not to correct misstatements communicated by the auditor in accordance with paragraph 15.

---

[13] Misstatements include omission and presentation of inaccurate or incomplete disclosures.

[14] AU sec. 316.05.

b. The identification by management of additional adjusting entries that offset misstatements accumulated by the auditor. If such adjusting entries are identified, the auditor should perform procedures to determine why the underlying misstatements were not identified previously and evaluate the implications on the integrity of management and the auditor's risk assessments, including fraud risk assessments. The auditor also should perform additional procedures as necessary to address the risk of further undetected misstatement.

c. Bias in the selection and application of accounting principles.[15]

d. Bias in accounting estimates.[16]

26. If the auditor identifies bias in management's judgments about the amounts and disclosures in the financial statements, the auditor should evaluate whether the effect of that bias, together with the effect of uncorrected misstatements, results in material misstatement of the financial statements. Also, the auditor should evaluate whether the auditor's risk assessments, including, in particular, the assessment of fraud risks, and the related audit responses remain appropriate.

27. *Evaluating Bias in Accounting Estimates.* The auditor should evaluate whether the difference between estimates best supported by the audit evidence and estimates included in the financial statements, which are individually reasonable, indicate a possible bias on the part of the company's management. If each accounting estimate included in the financial statements was individually reasonable but the effect of the difference between each estimate and the estimate best supported by the audit evidence was to increase earnings or loss, the auditor should evaluate whether these circumstances indicate potential management bias in the estimates. Bias also can result from the cumulative effect of changes in multiple accounting estimates. If the estimates in the financial statements are grouped at one end of the range of reasonable estimates in the prior year and are grouped at the other end of the range of reasonable estimates in the current year, the auditor should evaluate whether management is using swings in estimates to achieve an expected or desired outcome, e.g., to offset higher or lower than expected earnings.

Note: AU secs. 316.64–.65 establish requirements regarding performing a retrospective review of accounting estimates and evaluating the potential for fraud risks.

Evaluating Conditions Relating to the Assessment of Fraud Risks

28. When evaluating the results of the audit, the auditor should evaluate whether the accumulated results of auditing procedures[17] and other observations affect the assessment of the fraud risks made throughout the audit and whether the audit procedures need to be modified to respond to those risks. (See Appendix C.)

---

[15] Paragraph 5.d. of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

[16] Paragraph 27 of this standard.

[17] Such auditing procedures include, but are not limited to, procedures in the overall review (paragraph 9 of this standard), the evaluation of identified misstatements (paragraphs 20–23 of this standard), and the evaluation of the qualitative aspects of the company's accounting practices (paragraphs 24–27 of this standard).

29. As part of this evaluation, the engagement partner should determine whether there has been appropriate communication with the other engagement team members throughout the audit regarding information or conditions that are indicative of fraud risks.

Note: To accomplish this communication, the engagement partner might arrange another discussion among the engagement team members about fraud risks. (See paragraphs 49–51 of Auditing Standard No. 12.)

Evaluating the Presentation of the Financial Statements, Including the Disclosures

30. The auditor must evaluate whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework.

Note: AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles,* establishes requirements for evaluating the presentation of the financial statements. Auditing Standard No. 6, *Evaluating Consistency of Financial Statements,* establishes requirements regarding evaluating the consistency of the accounting principles used in financial statements.

Note: The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

31. As part of the evaluation of the presentation of the financial statements, the auditor should evaluate whether the financial statements contain the information essential for a fair presentation of the financial statements in conformity with the applicable financial reporting framework. Evaluation of the information disclosed in the financial statements includes consideration of the form, arrangement, and content of the financial statements (including the accompanying notes), encompassing matters such as the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth.

Note: According to AU sec. 508, if the financial statements, including the accompanying notes, fail to disclose information that is required by the applicable financial reporting framework, the auditor should express a qualified or adverse opinion and should provide the information in the report, if practicable, unless its omission from the report is recognized as appropriate by a specific auditing standard.[18]

Evaluating the Sufficiency and Appropriateness of Audit Evidence

32. Auditing Standard No. 8, *Audit Risk,* states:

To form an appropriate basis for expressing an opinion on the financial statements, the auditor must plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement due to error or fraud. Reasonable assurance is obtained by reducing audit risk

[18] AU secs. 508.41–.44.

to an appropriately low level through applying due professional care, including obtaining sufficient appropriate audit evidence.[19]

33. As part of evaluating audit results, the auditor must conclude on whether sufficient appropriate audit evidence has been obtained to support his or her opinion on the financial statements.

34. Factors that are relevant to the conclusion on whether sufficient appropriate audit evidence has been obtained include the following:

a. The significance of uncorrected misstatements and the likelihood of their having a material effect, individually or in combination, on the financial statements, considering the possibility of further undetected misstatement (paragraphs 14 and 17–19 of this standard).

b. The results of audit procedures performed in the audit of financial statements, including whether the evidence obtained supports or contradicts management's assertions and whether such audit procedures identified specific instances of fraud (paragraphs 20–23 and 28–29 of this standard).

c. The auditor's risk assessments (paragraph 36 of this standard).

d. The results of audit procedures performed in the audit of internal control over financial reporting, if the audit is an integrated audit.

e. The appropriateness (i.e., the relevance and reliability) of the audit evidence obtained.[20]

35. If the auditor has not obtained sufficient appropriate audit evidence about a relevant assertion or has substantial doubt about a relevant assertion, the auditor should perform procedures to obtain further audit evidence to address the matter. If the auditor is unable to obtain sufficient appropriate audit evidence to have a reasonable basis to conclude about whether the financial statements as a whole are free of material misstatement, AU sec. 508 indicates that the auditor should express a qualified opinion or a disclaimer of opinion.[21]

36. *Evaluating the Appropriateness of Risk Assessments.* As part of the evaluation of whether sufficient appropriate audit evidence has been obtained, the auditor should evaluate whether the assessments of the risks of material misstatement at the assertion level remain appropriate and whether the audit procedures need to be modified or additional procedures need to be performed as a result of any changes in the risk assessments. For example, the re-evaluation of the auditor's risk assessments could result in the identification of relevant assertions or significant risks that were not identified previously and for which the auditor should perform additional audit procedures.

Note: Auditing Standard No. 12 establishes requirements on revising the auditor's risk assessment.[22] Auditing Standard No. 13 discusses the auditor's responsibilities regarding the assessment of control risk and evaluation of control deficiencies in an audit of financial statements.[23]

---

[19] Paragraph 3 of Auditing Standard No. 8.

[20] Paragraphs 7–9 of Auditing Standard No. 15, *Audit Evidence,* discuss the relevance and reliability of audit evidence.

[21] AU sec. 508.22–.34 contains requirements regarding audit scope limitations.

[22] Paragraph 74 of Auditing Standard No. 12.

[23] Paragraphs 32–34 of Auditing Standard No. 13.

Evaluating the Results of the Audit of Internal Control Over Financial Reporting

37. Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* indicates that the auditor should form an opinion on the effectiveness of internal control over financial reporting by evaluating evidence obtained from all sources, including the auditor's testing of controls, misstatements detected during the financial statement audit, and any identified control deficiencies. Auditing Standard No. 5 describes the auditor's responsibilities regarding evaluating the results of the audit, including evaluating the identified control deficiencies.[24]

[24] Paragraphs 62–70 of Auditing Standard No. 5 discuss evaluating identified control deficiencies, and paragraphs 71–73 of Auditing Standard No. 5 discuss forming an opinion on the effectiveness of internal control over financial reporting.

Appendix A

Definitions

A1. For purposes of this standard, the terms listed below are defined as follows:

A2. Misstatement—A misstatement, if material individually or in combination with other misstatements, causes the financial statements not to be presented fairly in conformity with the applicable financial reporting framework.[1] A misstatement may relate to a difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that should be reported in conformity with the applicable financial reporting framework. Misstatements can arise from error (i.e., unintentional misstatement) or fraud.[2]

A3. Uncorrected misstatements—Misstatements, other than those that are clearly trivial,[3] that management has not corrected.

[1] The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

[2] Paragraph .02 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit.*

[3] Paragraph 10 of this standard states that, "[t]he auditor should accumulate misstatements identified during the audit, other than those that are clearly trivial."

Appendix B

Qualitative Factors Related to the Evaluation of the Materiality of Uncorrected Misstatements

B1. Paragraph 17 of this standard states:

> The auditor should evaluate whether uncorrected misstatements are material, individually or in combination with other misstatements. In making this evaluation, the auditor should evaluate the misstatements in relation to the specific accounts and disclosures involved and to the financial statements as a whole, taking into account relevant quantitative and qualitative factors.[1]
>
> Note: In interpreting the federal securities laws, the Supreme Court of the United States has held that a fact is material if there is "a substantial likelihood that the . . . fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."[2] As the Supreme Court has noted, determinations of materiality require "delicate assessments of the inferences a 'reasonable shareholder' would draw from a given set of facts and the significance of those inferences to him . . . ."[3]
>
> Note: As a result of the interaction of quantitative and qualitative considerations in materiality judgments, uncorrected misstatements of relatively small amounts could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility[4] that it could lead to a material contingent liability or a material loss of revenue.[5] Also, a misstatement made intentionally could be material for qualitative reasons, even if relatively small in amount.

B2. Qualitative factors to consider in the auditor's evaluation of the materiality of uncorrected misstatements, if relevant, include the following:

a. The potential effect of the misstatement on trends, especially trends in profitability.

b. A misstatement that changes a loss into income or vice versa.

c. The effect of the misstatement on segment information, for example, the significance of the matter to a particular segment important to the future profitability of the company, the pervasiveness of the matter on the segment information, and the impact of the matter on trends in segment information, all in relation to the financial statements taken as a whole.

d. The potential effect of the misstatement on the company's compliance with loan covenants, other contractual agreements, and regulatory provisions.

---

[1] If the financial statements contain material misstatements, AU sec. 508, *Reports on Audited Financial Statements*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AU sec. 508.35 discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

[2] TSC Industries v. Northway, Inc., 426 U.S. 438, 449 (1976). See also Basic, Inc. v. Levinson, 485 U.S. 224 (1988).

[3] TSC Industries, 426 U.S. at 450.

[4] There is a reasonable possibility of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in the FASB Accounting Standards Codification, Contingencies Topic, paragraph 450-20-25-1.

[5] AU sec. 317, *Illegal Acts by Clients*.

e. The existence of statutory or regulatory reporting requirements that affect materiality thresholds.

f. A misstatement that has the effect of increasing management's compensation, for example, by satisfying the requirements for the award of bonuses or other forms of incentive compensation.

g. The sensitivity of the circumstances surrounding the misstatement, for example, the implications of misstatements involving fraud and possible illegal acts, violations of contractual provisions, and conflicts of interest.

h. The significance of the financial statement element affected by the misstatement, for example, a misstatement affecting recurring earnings as contrasted to one involving a non-recurring charge or credit, such as an extraordinary item.

i. The effects of misclassifications, for example, misclassification between operating and non-operating income or recurring and non-recurring income items.

j. The significance of the misstatement or disclosures relative to known user needs, for example:

- The significance of earnings and earnings per share to public company investors.
- The magnifying effects of a misstatement on the calculation of purchase price in a transfer of interests (buy/sell agreement).
- The effect of misstatements of earnings when contrasted with expectations.

k. The definitive character of the misstatement, for example, the precision of an error that is objectively determinable as contrasted with a misstatement that unavoidably involves a degree of subjectivity through estimation, allocation, or uncertainty.

l. The motivation of management with respect to the misstatement, for example, (i) an indication of a possible pattern of bias by management when developing and accumulating accounting estimates or (ii) a misstatement precipitated by management's continued unwillingness to correct weaknesses in the financial reporting process.

m. The existence of offsetting effects of individually significant but different misstatements.

n. The likelihood that a misstatement that is currently immaterial may have a material effect in future periods because of a cumulative effect, for example, that builds over several periods.

o. The cost of making the correction—it may not be cost-beneficial for the client to develop a system to calculate a basis to record the effect of an immaterial misstatement. On the other hand, if management appears to have developed a system to calculate an amount that represents an immaterial misstatement, it may reflect a motivation of management as noted in paragraph B2.l above.

p. The risk that possible additional undetected misstatements would affect the auditor's evaluation.

Appendix C

Matters That Might Affect the Assessment of Fraud Risks

C1. If the following matters are identified during the audit, the auditor should take into account these matters in the evaluation of the assessment of fraud risks, as discussed in paragraph 28 of this standard:

a. Discrepancies in the accounting records, including:
   (1) Transactions that are not recorded in a complete or timely manner or are improperly recorded as to amount, accounting period, classification, or company policy.
   (2) Unsupported or unauthorized balances or transactions.
   (3) Last-minute adjustments that significantly affect financial results.
   (4) Evidence of employees' access to systems and records that is inconsistent with the access that is necessary to perform their authorized duties.
   (5) Tips or complaints to the auditor about alleged fraud.

b. Conflicting or missing evidence, including:
   (1) Missing documents.
   (2) Documents that appear to have been altered.[1]
   (3) Unavailability of other than photocopied or electronically transmitted documents when documents in original form are expected to exist.
   (4) Significant unexplained items in reconciliations.
   (5) Inconsistent, vague, or implausible responses from management or employees arising from inquiries or analytical procedures.
   (6) Unusual discrepancies between the company's records and confirmation responses.
   (7) Missing inventory or physical assets of significant magnitude.
   (8) Unavailable or missing electronic evidence that is inconsistent with the company's record retention practices or policies.
   (9) Inability to produce evidence of key systems development and program change testing and implementation activities for current year system changes and deployments.
   (10) Unusual balance sheet changes or changes in trends or important financial statement ratios or relationships, e.g., receivables growing faster than revenues.
   (11) Large numbers of credit entries and other adjustments made to accounts receivable records.
   (12) Unexplained or inadequately explained differences between the accounts receivable subsidiary ledger and the general ledger control account, or between the customer statement and the accounts receivable subsidiary ledger.

[1] Paragraph 9 of Auditing Standard No. 15, *Audit Evidence*.

(13) Missing or nonexistent cancelled checks in circumstances in which cancelled checks are ordinarily returned to the company with the bank statement.

(14) Fewer responses to confirmation requests than anticipated or a greater number of responses than anticipated.

c. Problematic or unusual relationships between the auditor and management, including:

(1) Denial of access to records, facilities, certain employees, customers, vendors, or others from whom audit evidence might be sought, including:[2]

a. Unwillingness to facilitate auditor access to key electronic files for testing through the use of computer-assisted audit techniques.

b. Denial of access to key information technology operations staff and facilities, including security, operations, and systems development.

(2) Undue time pressures imposed by management to resolve complex or contentious issues.

(3) Management pressure on engagement team members, particularly in connection with the auditor's critical assessment of audit evidence or in the resolution of potential disagreements with management.

(4) Unusual delays by management in providing requested information.

(5) Management's unwillingness to add or revise disclosures in the financial statements to make them more complete and transparent.

(6) Management's unwillingness to appropriately address significant deficiencies in internal control on a timely basis.

d. Other matters, including:

(1) Objections by management to the auditor meeting privately with the audit committee.

(2) Accounting policies that appear inconsistent with industry practices that are widely recognized and prevalent.

(3) Frequent changes in accounting estimates that do not appear to result from changing circumstances.

(4) Tolerance of violations of the company's code of conduct.

[2] Denial of access to information might constitute a limitation on the scope of the audit that requires the auditor to qualify or disclaim an opinion. (See Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and AU sec. 508, *Reports on Audited Financial Statements*.)

Appendix 8—Auditing Standard No. 15

Audit Evidence

Introduction

1. This standard explains what constitutes audit evidence and establishes requirements regarding designing and performing audit procedures to obtain sufficient appropriate audit evidence.

2. Audit evidence is all the information, whether obtained from audit procedures or other sources, that is used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence consists of both information that supports and corroborates management's assertions regarding the financial statements or internal control over financial reporting and information that contradicts such assertions.

Objective

3. The objective of the auditor is to plan and perform the audit to obtain appropriate audit evidence that is sufficient to support the opinion expressed in the auditor's report.[1]

Sufficient Appropriate Audit Evidence

4. The auditor must plan and perform audit procedures to obtain sufficient appropriate audit evidence to provide a reasonable basis for his or her opinion.

5. Sufficiency is the measure of the quantity of audit evidence. The quantity of audit evidence needed is affected by the following:

- *Risk of material misstatement (in the audit of financial statements) or the risk associated with the control (in the audit of internal control over financial reporting).* As the risk increases, the amount of evidence that the auditor should obtain also increases. For example, ordinarily more evidence is needed to respond to significant risks.[2]
- *Quality of the audit evidence obtained.* As the quality of the evidence increases, the need for additional corroborating evidence decreases. Obtaining more of the same type of audit evidence, however, cannot compensate for the poor quality of that evidence.

6. Appropriateness is the measure of the quality of audit evidence, i.e., its relevance and reliability. To be appropriate, audit evidence must be both relevant and reliable in providing support for the conclusions on which the auditor's opinion is based.

---

[1] Auditing Standard No. 14, *Evaluating Audit Results*, establishes requirements regarding evaluating whether sufficient appropriate evidence has been obtained. Auditing Standard No. 3, *Audit Documentation*, establishes requirements regarding documenting the procedures performed, evidence obtained, and conclusions reached in an audit.

[2] Paragraph A5 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

Relevance and Reliability

7. *Relevance.* The relevance of audit evidence refers to its relationship to the assertion or to the objective of the control being tested. The relevance of audit evidence depends on:

a. The design of the audit procedure used to test the assertion or control, in particular whether it is designed to (1) test the assertion or control directly and (2) test for understatement or overstatement; and

b. The timing of the audit procedure used to test the assertion or control.

8. *Reliability.* The reliability of evidence depends on the nature and source of the evidence and the circumstances under which it is obtained. For example, in general:

- Evidence obtained from a knowledgeable source that is independent of the company is more reliable than evidence obtained only from internal company sources.
- The reliability of information generated internally by the company is increased when the company's controls over that information are effective.
- Evidence obtained directly by the auditor is more reliable than evidence obtained indirectly.
- Evidence provided by original documents is more reliable than evidence provided by photocopies or facsimiles, or documents that have been filmed, digitized, or otherwise converted into electronic form, the reliability of which depends on the controls over the conversion and maintenance of those documents.

9. The auditor is not expected to be an expert in document authentication. However, if conditions indicate that a document may not be authentic or that the terms in a document have been modified but that the modifications have not been disclosed to the auditor, the auditor should modify the planned audit procedures or perform additional audit procedures to respond to those conditions and should evaluate the effect, if any, on the other aspects of the audit.

Using Information Produced by the Company

10. When using information produced by the company as audit evidence, the auditor should evaluate whether the information is sufficient and appropriate for purposes of the audit by performing procedures to:[3]

- Test the accuracy and completeness of the information, or test the controls over the accuracy and completeness of that information; and
- Evaluate whether the information is sufficiently precise and detailed for purposes of the audit.

---

[3] When using the work of a specialist engaged or employed by management, see AU sec. 336, *Using the Work of a Specialist*. When using information produced by a service organization or a service auditor's report as audit evidence, see AU sec. 324, *Service Organizations*, and for integrated audits, see Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

Financial Statement Assertions

11. In representing that the financial statements are presented fairly in conformity with the applicable financial reporting framework, management implicitly or explicitly makes assertions regarding the recognition, measurement, presentation, and disclosure of the various elements of financial statements and related disclosures. Those assertions can be classified into the following categories:

- *Existence or occurrence*—Assets or liabilities of the company exist at a given date, and recorded transactions have occurred during a given period.
- *Completeness*—All transactions and accounts that should be presented in the financial statements are so included.
- *Valuation or allocation*—Asset, liability, equity, revenue, and expense components have been included in the financial statements at appropriate amounts.
- *Rights and obligations*—The company holds or controls rights to the assets, and liabilities are obligations of the company at a given date.
- *Presentation and disclosure*—The components of the financial statements are properly classified, described, and disclosed.

12. The auditor may base his or her work on financial statement assertions that differ from those in this standard if the assertions are sufficient for the auditor to identify the types of potential misstatements and to respond appropriately to the risks of material misstatement in each significant account and disclosure that has a reasonable possibility[4] of containing misstatements that would cause the financial statements to be materially misstated, individually or in combination with other misstatements.[5]

Audit Procedures for Obtaining Audit Evidence

13. Audit procedures can be classified into the following categories:

a. Risk assessment procedures,[6] and

b. Further audit procedures,[7] which consist of:

(1) Tests of controls, and

(2) Substantive procedures, including tests of details and substantive analytical procedures.

14. Paragraphs 15–21 of this standard describe specific audit procedures. The purpose of an audit procedure determines whether it is a risk assessment procedure, test of controls, or substantive procedure.

---

[4] There is a reasonable possibility of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in the FASB Accounting Standards Codification, Contingencies Topic, paragraph 450-20-25-1.

[5] For an integrated audit, also see paragraph 28 of Auditing Standard No. 5.

[6] Auditing Standard No. 12.

[7] Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

Inspection

15. Inspection involves examining records or documents, whether internal or external, in paper form, electronic form, or other media, or physically examining an asset. Inspection of records and documents provides audit evidence of varying degrees of reliability, depending on their nature and source and, in the case of internal records and documents, on the effectiveness of the controls over their production. An example of inspection used as a test of controls is inspection of records for evidence of authorization.

Observation

16. Observation consists of looking at a process or procedure being performed by others, e.g., the auditor's observation of inventory counting by the company's personnel or the performance of control activities. Observation can provide audit evidence about the performance of a process or procedure, but the evidence is limited to the point in time at which the observation takes place and also is limited by the fact that the act of being observed may affect how the process or procedure is performed.[8]

Inquiry

17. Inquiry consists of seeking information from knowledgeable persons in financial or nonfinancial roles within the company or outside the company. Inquiry may be performed throughout the audit in addition to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Evaluating responses to inquiries is an integral part of the inquiry process.[9]

> Note: Inquiry of company personnel, by itself, does not provide sufficient audit evidence to reduce audit risk to an appropriately low level for a relevant assertion or to support a conclusion about the effectiveness of a control.

Confirmation

18. A confirmation response represents a particular form of audit evidence obtained by the auditor from a third party in accordance with PCAOB standards.[10]

Recalculation

19. Recalculation consists of checking the mathematical accuracy of documents or records. Recalculation may be performed manually or electronically.

Reperformance

20. Reperformance involves the independent execution of procedures or controls that were originally performed by company personnel.

---

[8] AU sec. 331, *Inventories*, establishes requirements regarding observation of the counting of inventory.

[9] AU sec. 333, *Management Representations*, establishes requirements regarding written management representations, including confirmation of management responses to oral inquiries.

[10] AU sec. 330, *The Confirmation Process*.

Analytical Procedures

21. Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass the investigation of significant differences from expected amounts.[11]

Selecting Items for Testing to Obtain Audit Evidence

22. Designing substantive tests of details and tests of controls includes determining the means of selecting items for testing from among the items included in an account or the occurrences of a control. The auditor should determine the means of selecting items for testing to obtain evidence that, in combination with other relevant evidence, is sufficient to meet the objective of the audit procedure. The alternative means of selecting items for testing are:

- Selecting all items;
- Selecting specific items; and
- Audit sampling.

23. The particular means or combination of means of selecting items for testing that is appropriate depends on the nature of the audit procedure, the characteristics of the control or the items in the account being tested, and the evidence necessary to meet the objective of the audit procedure.

Selecting All Items

24. Selecting all items (100 percent examination) refers to testing the entire population of items in an account or the entire population of occurrences of a control (or an entire stratum within one of those populations). The following are examples of situations in which 100 percent examination might be applied:

- The population constitutes a small number of large value items;
- The audit procedure is designed to respond to a significant risk, and other means of selecting items for testing do not provide sufficient appropriate audit evidence; and
- The audit procedure can be automated effectively and applied to the entire population.

Selecting Specific Items

25. Selecting specific items refers to testing all of the items in a population that have a specified characteristic, such as:

- *Key items.* The auditor may decide to select specific items within a population because they are important to accomplishing the objective of the audit procedure or exhibit some other characteristic, e.g., items that are suspicious, unusual, or particularly risk-prone or items that have a history of error.
- *All items over a certain amount.* The auditor may decide to examine items whose recorded values exceed a certain amount to verify a large proportion of the total amount of the items included in an account.

---

[11] AU sec. 329, *Substantive Analytical Procedures*, establishes requirements on performing analytical procedures as substantive procedures.

26. The auditor also might select specific items to obtain an understanding about matters such as the nature of the company or the nature of transactions.

27. The application of audit procedures to items that are selected as described in paragraphs 25–26 of this standard does not constitute audit sampling, and the results of those audit procedures cannot be projected to the entire population.[12]

Audit Sampling

28. Audit sampling is the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class.[13]

Inconsistency in, or Doubts about the Reliability of, Audit Evidence

29. If audit evidence obtained from one source is inconsistent with that obtained from another, or if the auditor has doubts about the reliability of information to be used as audit evidence, the auditor should perform the audit procedures necessary to resolve the matter and should determine the effect, if any, on other aspects of the audit.

[12] If misstatements are identified in the selected items, see paragraphs 12–13 and paragraphs 17–19 of Auditing Standard No. 14.

[13] AU sec. 350, *Audit Sampling*, establishes requirements regarding audit sampling.

Appendix 9—Amendments to PCAOB Standards

Auditing Standards

AU sec. 110, "Responsibilities and Functions of the Independent Auditor"

Statement on Auditing Standards ("SAS") No. 1, "Codification of Auditing Standards and Procedures" section 110, "Responsibilities and Functions of the Independent Auditor" (AU sec. 110, "Responsibilities and Functions of the Independent Auditor"), as amended, is amended as follows:

> Within footnote 1 to paragraph .02, the reference to section 312, *Audit Risk and Materiality in Conducting an Audit*, is replaced with a reference to Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit.*

AU sec. 150, "Generally Accepted Auditing Standards"

SAS No. 95, "Generally Accepted Auditing Standards" (AU sec. 150, "Generally Accepted Auditing Standards"), as amended, is amended as follows:

a. Within paragraph .02, in the third standard of field work, the word "competent" is replaced with the word "appropriate."

b. Footnote 2 to paragraph .04 is deleted.

AU sec. 210, "Training and Proficiency of the Independent Auditor"

SAS No. 1, "Codification of Auditing Standards and Procedures" section 210, "Training and Proficiency of the Independent Auditor" (AU sec. 210, "Training and Proficiency of the Independent Auditor"), as amended, is amended as follows:

The last sentence of paragraph .03 is replaced with:

> The engagement partner must exercise seasoned judgment in the varying degrees of his supervision and review of the work done and judgments exercised by his subordinates, who in turn must meet the responsibilities attaching to the varying gradations and functions of their work.

AU sec. 230, "Due Professional Care in the Performance of Work"

SAS No. 1, "Codification of Auditing Standards and Procedures" section 230, "Due Professional Care in the Performance of Work" (AU sec. 230, "Due Professional Care in the Performance of Work"), as amended, is amended as follows:

a. The second and third sentences of paragraph .06 are replaced with:

> The engagement partner should know, at a minimum, the relevant professional accounting and auditing standards and should be knowledgeable about the client. The engagement partner is responsible for the assignment of tasks to, and supervision of, the members of the engagement team.[fn4]

b. Footnote 3 to paragraph .06 is deleted.

c. Within footnote 4 to paragraph .06, the phrase "See section 311.11" is replaced with, "See Auditing Standard No. 10, *Supervision of the Audit Engagement*."

d. Footnote 6 to paragraph .11 is deleted.

e. In the first sentence of paragraph .11, the word "competent" is replaced with the word "appropriate."

f. At the end of the fifth sentence of paragraph .12, the following parenthetical is added: "(See paragraph 9 of Auditing Standard No. 15, *Audit Evidence*.)"

AU sec. 310, "Appointment of the Independent Auditor"

SAS No. 1, "Codification of Auditing Standards and Procedures" section 310, "Appointment of the Independent Auditor" (AU sec. 310, "Appointment of the Independent Auditor"), as amended, is amended as follows:

a. Within footnote ** to the title of the standard, the sentence "(See section 313.)" is deleted.

b. Paragraph .02 is replaced with:

Audit planning is discussed in Auditing Standard No. 9, *Audit Planning*, and supervision of engagement team members is discussed in Auditing Standard No. 10, *Supervision of the Audit Engagement*.

c. In paragraph .03, the sentence "(See section 313)" is deleted.

d. Within footnote 3 to paragraph .06, the reference to Section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraph .04, is replaced with a reference to Paragraph A2 of Auditing Standard No. 14, *Evaluating Audit Results*.

AU sec. 311, "Planning and Supervision"

SAS No. 22, "Planning and Supervision" (AU sec. 311, "Planning and Supervision"), as amended, is superseded.

AU sec. 9311, "Planning and Supervision: Auditing Interpretations of Section 311"

AU sec. 9311, "Planning and Supervision: Auditing Interpretations of Section 311", as amended, is superseded.

AU sec. 312, "Audit Risk and Materiality in Conducting an Audit"

SAS No. 47, "Audit Risk and Materiality in Conducting an Audit" (AU sec. 312, "Audit Risk and Materiality in Conducting an Audit"), as amended, is superseded.

AU sec. 9312, "Audit Risk and Materiality in Conducting an Audit: Auditing Interpretations of Section 312"

AU sec. 9312, "Audit Risk and Materiality in Conducting an Audit: Auditing Interpretations of Section 312" is superseded.

AU sec. 313, "Substantive Tests Prior to the Balance Sheet Date"

SAS No. 45, "Omnibus Statement on Auditing Standards—1983" (AU sec. 313, "Substantive Tests Prior to the Balance Sheet Date"), as amended, is superseded.

AU sec. 315, "Communications Between Predecessor and Successor Auditors"

SAS No. 84, "Communications Between Predecessor and Successor Auditors" (AU sec. 315, "Communications Between Predecessor and Successor Auditors"), as amended, is amended as follows:

a. In the first sentence of paragraph .12, the word "competent" is replaced with the word "appropriate."

b. In the first sentence of paragraph .18, the word "competent" is replaced with the word "appropriate."

AU sec. 316, "Consideration of Fraud in a Financial Statement Audit"

SAS No. 99, "Consideration of Fraud in a Financial Statement Audit" (AU sec. 316, "Consideration of Fraud in a Financial Statement Audit"), as amended, is amended as follows:

a. The second sentence of paragraph .01 is replaced with:

> This section establishes requirements and provides direction relevant to fulfilling that responsibility, as it relates to fraud, in an audit of financial statements.[fn 2]

b. In footnote 1 to paragraph .01, delete the following information: (see section 312, *Audit Risk and Materiality in Conducting an Audit*," and the closing parenthesis at the end of that sentence.

c. Footnote 2 to paragraph .01 is replaced with:

> For purposes of this standard, the term "audit of financial statements" refers to the financial statement portion of the integrated audit and to the audit of financial statements only.

d. The following paragraph .01A is added:

> Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement,* establishes requirements regarding the process of identifying and assessing risks of material misstatement of the financial statements. Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement,* establishes requirements regarding designing and implementing appropriate responses to the risks of material misstatement. Auditing Standard No. 14, *Evaluating Audit Results,* establishes requirements regarding the auditor's evaluation of audit results and determination of whether he or she has obtained sufficient appropriate audit evidence.

e. In paragraph .02:

- The third through the sixth bullet points are deleted.
- The seventh bullet point is replaced with:

  Responding to fraud risks. This section discusses certain responses to fraud risks involving the nature, timing, and extent of audit procedures, including:

  - Responses to assessed fraud risks relating to fraudulent financial reporting and misappropriation of assets (see paragraphs .52 through .56).
  - Responses to specifically address the fraud risks arising from management override of internal controls (see paragraphs .57 through .67).

- The eighth bullet point is deleted.

f. Paragraph .03 is deleted.

g. Footnote 5 to paragraph .06 is replaced with:

> The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to accounting principles applicable to that company.

h. In the third sentence of paragraph .13, the term "the risk of material misstatement due to fraud" is replaced with the term "fraud risks."

i. Paragraphs .14 through .45 are deleted, along with the preceding heading, "Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud."

j. Footnotes 8 through 19 related to paragraphs .14 through .45 are deleted.

k. Paragraphs .46 through .50 are deleted. The heading preceding paragraph .46, "Responding to the Results of the Assessment," is replaced with the heading "Responding to Assessed Fraud Risks."

l. Paragraph .51 is deleted. The heading preceding paragraph .51, "Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed to Address the Identified Risks," is replaced with the heading "Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed."

m. Paragraph .52 is replaced with:

> Paragraph 8 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, states that "[t]he auditor should design and perform audit procedures in a manner that addresses the assessed risks of material misstatement due to error or fraud for each relevant assertion of each significant account and disclosure." Paragraph 12 of Auditing Standard No. 13 states that "the audit procedures that are necessary to address the assessed fraud risks depend upon the types of risks and the relevant assertions that might be affected."
>
> Note: Paragraph 71.b. of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, states that a fraud risk

is a significant risk. Accordingly, the requirement for responding to significant risks also applies to fraud risks.

n. In paragraph .53:

- The first sentence is replaced with:

  The following are examples of responses to assessed fraud risks involving the nature, timing, and extent of audit procedures:

- The fifth bullet point is replaced with:

  Interviewing personnel involved in activities in areas in which a fraud risk has been identified to obtain their insights about the risk and how controls address the risk. (See paragraph 54 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*)

- In the sixth bullet point, the term "risk of material misstatement due to fraud" is replaced with the term "fraud risk."

o. Footnote 20 to paragraph .53 is replaced with:

AU sec. 329, *Substantive Analytical Procedures*, establishes requirements regarding performing analytical procedures as substantive tests.

p. The heading preceding paragraph .54, "Additional Examples of Responses to Identified Risks of Misstatements Arising From Fraudulent Financial Reporting," is replaced with the heading "Additional Examples of Audit Procedures Performed to Respond to Assessed Fraud Risks Relating to Fraudulent Financial Reporting."

q. The first sentence in paragraph .54 is replaced with:

The following are additional examples of audit procedures that might be performed in response to assessed fraud risks relating to fraudulent financial reporting:

r. In paragraph .54:

- In the last sentence of the first bullet point, the term "risk of material misstatement due to fraud" is replaced with the term "fraud risk."
- In the first sentence of the second bullet point, the term "risk of material misstatement due to fraud" is replaced with the term "fraud risk."
- In the first sentence of the third bullet point and the accompanying paragraph to the third bullet point, the term "risk of material misstatement due to fraud" is replaced with the term "fraud risk."

s. Footnotes 21 and 22 to paragraph .54 are amended as follows:

- The text of footnote 21 is replaced with "AU sec. 330, *The Confirmation Process*, establishes requirements regarding the confirmation process in audits of financial statements."

- The text of footnote 22 is replaced with "AU sec. 336, *Using the Work of a Specialist*, establishes requirements for an auditor who uses the work of a specialist in performing an audit of financial statements."

t. The heading preceding paragraph .55, "Examples of Responses to Identified Risks of Misstatements Arising From Misappropriations of Assets," is replaced with the heading "Examples of Audit Procedures Performed to Respond to Fraud Risks Relating to Misappropriations of Assets."

u. In the first sentence of paragraph .55, the term "risk of material misstatement due to fraud" is replaced with the term "fraud risk."

v. In paragraph .56:

- The first and second sentences are replaced with:

  The audit procedures performed in response to a fraud risk relating to misappropriation of assets usually will be directed toward certain account balances. Although some of the audit procedures noted in paragraphs .53 and .54 and in paragraphs 8 through 15 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement,* may apply in such circumstances, such as the procedures directed at inventory quantities, the scope of the work should be linked to the specific information about the misappropriation risk that has been identified.

- In the third sentence, the words "design and" are added before the words "operating effectiveness."

w. The heading preceding paragraph .57, "Responses to Further Address the Risk of Management Override of Controls," is replaced with the heading "Audit Procedures Performed to Specifically Address the Risk of Management Override of Controls."

x. The third sentence of paragraph .57 is replaced with:

Accordingly, as part of the auditor's responses that address fraud risks, the procedures described in paragraphs .58 through .67 should be performed to specifically address the risk of management override of controls.

y. Footnote 23 to paragraph .58 is replaced with:

See paragraphs 28 through 32 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

z. In paragraph .61:

- In the first sentence of the first bullet point, the term "the risk of material misstatement due to fraud" is replaced with the term "fraud risk."
- In the second bullet point, the last two sentences are replaced with the following:

  Effective controls over the preparation and posting of journal entries and adjustments may affect the extent of substantive testing necessary, provided that the auditor has tested the controls. However, even though controls might

be implemented and operating effectively, the auditor's substantive procedures for testing journal entries and other adjustments should include the identification and substantive testing of specific items.

- In item (f) of the fifth bullet point, the term "risk of material misstatement due to fraud" is replaced with the term "fraud risk."
- The last sentence of the fifth bullet point is replaced with:

  In audits of entities that have multiple locations or business units, the auditor should determine whether to select journal entries from locations based on factors set forth in paragraphs 11 through 14 of Auditing Standard No. 9, *Audit Planning*.

aa. The last sentence of paragraph .63 is replaced with:

Paragraphs 24 through 27 of Auditing Standard No. 14, *Evaluating Audit Results,* discuss the auditor's responsibilities for assessing bias in accounting estimates and the effect of bias on the financial statements.

bb. Paragraphs .68 through .78 are deleted, along with the preceding heading "Evaluating Audit Evidence."

cc. Footnotes 26 through 36 related to paragraphs .68 through .78 are deleted.

dd. In the first sentence of paragraph .80, the term "risks of material misstatement due to fraud" is replaced with the term "fraud risks."

ee. The last sentence of paragraph .80 is replaced with:

The auditor also should evaluate whether the absence of or deficiencies in controls that address fraud risks or otherwise help prevent, deter, and detect fraud (see paragraphs 72–73 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*) represent significant deficiencies or material weaknesses that should be communicated to senior management and the audit committee.

ff. The first sentence of paragraph .81 is replaced with:

The auditor also should consider communicating other fraud risks, if any, identified by the auditor.

gg. In paragraph .83:

- The reference in the first bullet point to paragraphs .14 through .17 is replaced with a reference to paragraphs 52 and 53 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.
- The term "risks of material misstatement due to fraud" in the first sentence of the second bullet point is replaced with the term "fraud risks." The reference in the second bullet point to paragraphs .19 through .34 is replaced with references to paragraph 47, paragraphs 56 through 58, and paragraphs 65 through 69 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

- The third bullet point is replaced with:

  The fraud risks that were identified at the financial statement and assertion levels (see paragraphs 59 through 69 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*), and the linkage of those risks to the auditor's response (see paragraphs 5 through 15 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*).

- Within the fourth bullet point, the term "risk of material misstatement due to fraud" in the first sentence is replaced with the term "fraud risk," and the reference to paragraph .41 is replaced with a reference to paragraph 68 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

- The fifth bullet point is replaced with:

  The results of the procedures performed to address the assessed fraud risks, including those procedures performed to further address the risk of management override of controls (See paragraph 15 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatements*.)

- The reference in the sixth bullet point to paragraphs .68 through .73 is replaced with a reference to paragraphs 5 through 9 of Auditing Standard No. 14, *Evaluating Audit Results*.

hh. Paragraph .84 and the heading preceding this paragraph, "Effective Date," are deleted.

ii. The first sentence of paragraph .85 is replaced with:

> This appendix contains examples of risk factors discussed in paragraphs 65 through 69 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

AU sec. 317, "Illegal Acts by Clients"

SAS No. 54, "Illegal Acts by Clients" (AU sec. 317, "Illegal Acts by Clients") is amended as follows:

a. The last sentence of paragraph .13 is replaced with:

> For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.

b. In paragraph .19, the word "competent" is replaced with the word "appropriate."

AU sec. 319, "Consideration of Internal Control in a Financial Statement Audit"

SAS No. 55, "Consideration of Internal Control in a Financial Statement Audit" (AU sec. 319, "Consideration of Internal Control in a Financial Statement Audit"), as amended, is superseded.

AU sec. 322, "The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements"

SAS No. 65, "The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements" (AU sec. 322, "The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements"), as amended, is amended as follows:

a. In the first sentence of paragraph .02, the word "competent" is replaced with the word "appropriate."

b. Footnote 3 to paragraph .04, is replaced with:

> Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, describes the procedures the auditor performs to obtain an understanding of internal control over financial reporting.

c. In the first sentence of paragraph .18, the word "competent" is replaced with the word "appropriate."

d. Within footnote 5 to paragraph .18, the reference to section 326, *Evidential Matter*, paragraph .19c. is replaced with a reference to paragraph 8 of Auditing Standard No. 15, *Audit Evidence*.

e. Within footnote 8 to paragraph .27, the reference to section 311, *Planning and Supervision*, paragraphs .11 through .14 is replaced with a reference to Auditing Standard No. 10, *Supervision of the Audit Engagement*.

AU sec. 324, "Service Organizations"

SAS No. 70, "Service Organizations" (AU sec. 324, "Service Organizations"), as amended, is amended as follows:

a. In the first sentence of paragraph .07, the reference to Section 319, *Consideration of Internal Control in a Financial Statement Audit*, is replaced with a reference to Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

b. In the first sentence of paragraph .16, the reference to section 319.90 through .99 is replaced with a reference to paragraph 18 and paragraphs 29 through 31 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

c. In the second sentence of paragraph .23, the reference to section 312, *Audit Risk and Materiality in Conducting an Audit,* is replaced with a reference to Auditing Standard No. 14, *Evaluating Audit Results*.

AU sec. 326, "Evidential Matter"

SAS No. 31, "Evidential Matter" (AU sec. 326, "Evidential Matter"), as amended, is superseded.

AU sec. 9326, "Evidential Matter: Auditing Interpretations of Section 326"

AU sec. 9326, "Evidential Matter: Auditing Interpretations of Section 326," as amended, is amended as follows:

a. Paragraphs .01–.05 are deleted, along with the preceding heading "1. Evidential Matter for an Audit of Interim Financial Statements."

b. The reference in paragraph .10 to Section 326, *Evidential Matter*, paragraph .25, is replaced with a reference to Paragraph 35 of Auditing Standard No. 14, *Evaluating Audit Results*.

c. In the first and second sentences of paragraph .10, the word "competent" is replaced with the word "appropriate."

d. In the second sentence of paragraph .12, the word "competent" is replaced with the word "appropriate."

e. The last two sentences of paragraph .12 are deleted.

f. In the first sentence of paragraph .13, the word "competent" is replaced with the word "appropriate."

g. In paragraph .17, the word "competent" is replaced with the word "appropriate."

h. In the second sentence of paragraph .21, the word "competent" is replaced with the word "appropriate."

i. In the fourth sentence of paragraph .22, the word "competent" is replaced with the word "appropriate."

j. In paragraph .23, the word "competent" is replaced with the word "appropriate."

k. Paragraphs .24–.41 are deleted, along with the headings "3. The Auditor's Consideration of the Completeness Assertion" and "4. Applying Auditing Procedures to Segment Disclosures in Financial Statements."

AU sec. 328, "Auditing Fair Value Measurements and Disclosures"

SAS No. 101, "Auditing Fair Value Measurements and Disclosures" (AU sec. 328, "Auditing Fair Value Measurements and Disclosures"), as amended, is amended as follows:

a. In the first sentence of paragraph .03, the word "competent" is replaced with the word "appropriate."

b. The phrase in paragraph .11 "Section 319, *Consideration of Internal Control in a Financial Statement Audit*, as amended," is replaced with "Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*,"

c. The reference in paragraph .14 to Section 319 is replaced with a reference to Paragraph A5, second note of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

d. In the second sentence of paragraph .14, the reference "(see section 316, *Consideration of Fraud in a Financial Statement Audit*" is deleted.

e. Within paragraph .25, in the second sentence of the second bullet point and in the first sentence in the third bullet point, the word "competent" is replaced with the word "appropriate."

f. In the second sentence of paragraph .32, the word "competent" is replaced with the word "appropriate."

g. In the first sentence of paragraph .42, the word "competent" is replaced with the word "appropriate."

h. In footnote 8 to paragraph .43, the reference to section 431, *Adequacy of Disclosure in Financial Statements*, is replaced with a reference to "paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*."

i. In the second sentence of paragraph .44, the word "competent" is replaced with the word "appropriate."

j. The reference in paragraph .47 to section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraphs .36 through .41, is replaced with a reference to paragraphs 12 through 18 and 24 through 27 of Auditing Standard No. 14, *Evaluating Audit Results*.

AU sec. 329, "Analytical Procedures"

SAS No. 56, "Analytical Procedures" (AU sec. 329, "Analytical Procedures"), as amended, is amended as follows:

a. The title of the standard, "Analytical Procedures," is replaced with the title, "Substantive Analytical Procedures."

b. The text of paragraph .01 is replaced with:

> This section establishes requirements regarding the use of substantive analytical procedures in an audit.
>
> Note: Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement,* establishes requirements regarding performing analytical procedures as a risk assessment procedure in identifying and assessing risks of material misstatement.
>
> Note: Auditing Standard No. 14, *Evaluating Audit Results,* establishes requirements regarding performing analytical procedures as part of the overall review stage of the audit.

c. The last sentence of paragraph .03 is deleted.

d. The text of paragraph .04 is replaced with:

> Analytical procedures are used as a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions. In some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives.

e. Paragraphs .06–.08 and the preceding heading, "Analytical Procedures in Planning the Audit," are deleted.

f. At the end of paragraph .09, the following new sentence is added:

> (See paragraph 11 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.)

g. Within footnote 1 to paragraph .09, the reference to section 326, *Evidential Matter,* is replaced with a reference to Auditing Standard No. 15, *Audit Evidence*.

h. Footnote 2 to paragraph .20 is deleted.

i. In paragraph .21:

- In the fourth sentence, the word "likely" is deleted.

- The reference to section 316, *Consideration of Fraud in a Financial Statement Audit*, is replaced with a reference to Auditing Standard No. 14, *Evaluating Audit Results*.

j. Footnote 3 to paragraph .21 is deleted.

k. Paragraph .23 and the preceding heading, "Analytical Procedures Used in the Overall Review," and paragraph .24 and the preceding heading, "Effective Date," are deleted.

AU sec. 330, "The Confirmation Process"

SAS No. 67, "The Confirmation Process" (AU sec. 330, "The Confirmation Process"), is amended as follows:

a. The references in paragraph .02 to section 312, *Audit Risk and Materiality in Conducting an Audit*, and section 313, *Substantive Tests Prior to the Balance-Sheet Date*, are replaced with a reference to Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

b. The reference in paragraph .05 to Section 312 is replaced with a reference to Auditing Standard No. 8, *Audit Risk*.

c. The second sentence of paragraph .06 is replaced with:

> See paragraph 8 of Auditing Standard No. 15, *Audit Evidence*, which discusses the reliability of audit evidence.

d. In the first sentence of paragraph .11, the word "competent" is replaced with the word "appropriate."

e. In the third sentence of paragraph .11, the reference to Section 326 is replaced with a reference to Auditing Standard No. 15, *Audit Evidence*.

f. In the first sentence of paragraph .24, the word "competence" is replaced with the word "appropriateness."

g. In the last sentence of paragraph .27, the word "competent" is replaced with the word "appropriate."

AU sec. 332, "Auditing Derivative Instruments, Hedging Activities, and Investments in Securities"

SAS No. 92, "Auditing Derivative Instruments, Hedging Activities, and Investment in Securities" (AU sec. 332, "Auditing Derivative Instruments, Hedging Activities, and Investments in Securities"), as amended, is amended as follows:

a. The reference in paragraph .01 to section 326, *Evidential Matter*, paragraphs .03–.08, is replaced with a reference to paragraphs 11 and 12 of Auditing Standard No. 15, *Audit Evidence*.

b. Paragraph .06 is replaced with:

> Auditing Standard No. 9, *Audit Planning,* discusses the auditor's responsibilities for consideration of the use of persons with specialized skill or knowledge. Auditing Standard No. 10, *Supervision of the Audit Engagement*, discusses the auditor's responsibilities for supervision of specialists who are employed by the auditor. AU sec. 336, *Using the Work of a Specialist*, discusses the auditor's responsibilities for using the work of a specialist engaged by the auditor.

c. The first and second sentences of paragraph .07 are deleted. The third sentence is replaced with:

> The auditor should design and perform audit procedures regarding relevant assertions of derivatives and investments in securities that are based on and that address the risks of material misstatement in those assertions.

d. The reference in paragraph .09 to Section 319, *Consideration of Internal Control in a Financial Statement Audit*, is replaced with a reference to Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

e. The fourth sentence of paragraph .11 is replaced with "Paragraphs 28 through 32 and B1 through B6 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement,* discuss the information system, including related business processes, relevant to financial reporting."

f. In paragraph .15, the reference to section 319 is replaced with a reference to Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

g. The last sentence of paragraph .35 is replaced with:

> In addition, paragraphs 24 through 27 of Auditing Standard No. 14, *Evaluating Audit Results*, describe the auditor's responsibilities for assessing bias in accounting estimates.

h. In paragraph .43, subparagraph a., the word "competent" is replaced with the word "appropriate."

i. In paragraph .51, the last sentence is replaced with:

> (See paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*.)

j. In paragraph .57, subparagraph c., the word "competent" is replaced with the word "appropriate."

AU sec. 333, "Management Representations"

SAS No. 85, "Management Representations" (AU sec. 333, "Management Representations"), as amended, is amended as follows:

a. Footnote 4 to paragraph .06 is replaced with:

> Auditing Standard No. 14, *Evaluating Audit Results*, indicates that a misstatement can arise from error or fraud and also discusses the auditor's responsibilities for evaluating accumulated misstatements.

b. Within footnote 6 to paragraph .06, the reference to Section 312 is replaced with a reference to Paragraph 11 of Auditing Standard No. 14, *Evaluating Audit Results*.

c. Within footnote 7 to paragraph .06, the reference to section 316, *Consideration of Fraud in a Financial Statement Audit*, paragraphs .38 through .40, is replaced with a reference to section 316, *Consideration of Fraud in a Financial Statement Audit*, paragraphs .79 through .82.

AU sec. 334, "Related Parties"

SAS No. 45, "Related Parties" (AU sec. 334 "Related Parties"), is amended as follows:

a. In the second sentence of paragraph .09, the word "competent" is replaced with the word "appropriate."

b. In the first sentence of paragraph .11, the word "competent" is replaced with the word "appropriate."

c. In footnote 8 to paragraph .11, the reference to section 431, *Adequacy of Disclosure in Financial Statements*, is replaced with a reference to paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*.

AU sec. 9334, "Related Parties: Auditing Interpretations of Section 334"

AU sec. 9334, "Related Parties: Auditing Interpretations of Section 334," is amended as follows:

Within footnote 4 to paragraph .17, the reference to section 312, *Audit Risk and Materiality in Conducting an Audit*, is replaced with a reference to Auditing Standard No. 8, *Audit Risk*.

AU sec. 336, "Using the Work of a Specialist"

SAS No. 73, "Using the Work of a Specialist" (AU sec. 336, "Using the Work of a Specialist"), is amended as follows:

a. Footnote 1 to paragraph .01 is replaced with the following:

Because income taxes and information technology are specialized areas of accounting and auditing, this section does not apply to situations in which an income tax specialist or information technology specialist participates in the audit. Auditing Standard No. 10, *Supervision of the Audit Engagement,* applies in those situations.

b. Paragraph .05 is replaced with the following:

This section does not apply to situations in which a specialist employed by the auditor's firm participates in the audit. Auditing Standard No. 10, *Supervision of the Audit Engagement,* applies in those situations.

c. In the last sentence of paragraph .06, the word "competent" is replaced with the word "appropriate."

d. In the first and last sentences of paragraph .13, the word "competent" is replaced with the word "appropriate."

AU sec. 9336, "Using the Work of a Specialist: Auditing Interpretations of Section 336"

AU sec. 9336, "Using the Work of a Specialist: Auditing Interpretations of Section 336," is amended as follows:

a. In the second sentence of paragraph .04, the word "competent" is replaced with the word "appropriate."

b. In paragraph .05, the word "competent" is replaced with the word "appropriate."

c. In the second sentence of paragraph .11, the word "competent" is replaced with the word "appropriate."

d. The penultimate sentence of paragraph .15, is replaced with:

> Paragraph 6 of Auditing Standard No. 15, *Audit Evidence*, states, "[t]o be appropriate, audit evidence must be both relevant and reliable in providing support for the conclusions on which the auditor's opinion is based."

AU sec. 341, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern"

SAS No. 59, "The Auditor's Consideration of an Entity's Ability to Continue as Going Concern" (AU sec. 341, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern"), as amended, is amended as follows:

> The reference in paragraph .02 to section 326, *Evidential Matter*, is replaced with a reference to Auditing Standard No. 15, *Audit Evidence*.

AU sec. 342, "Auditing Accounting Estimates"

SAS No. 57, "Auditing Accounting Estimates" (AU sec. 342, "Auditing Accounting Estimates"), as amended, is amended as follows:

a. In the first sentence of paragraph .01, the word "competent" is replaced with the word "appropriate."

b. In the first sentence of paragraph .07, the word "competent" is replaced with the word "appropriate."

c. The text of footnote 3 to paragraph .07 is replaced with:

> See paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*.

d. The reference in paragraph .08 subparagraph b.1. to section 311, *Planning and Supervision*, is replaced with a reference to Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

e. Paragraph .14, is replaced with:

> Paragraphs 24 through 27 of Auditing Standard No. 14, *Evaluating Audit Results*, discuss the auditor's responsibilities for assessing bias and evaluating accounting estimates in relationship to the financial statements taken as a whole.

AU sec. 9342, "Auditing Accounting Estimates: Auditing Interpretations of Section 342"

AU sec. 9342, "Auditing Accounting Estimates: Auditing Interpretations of Section 342," is amended as follows:

> In the second sentence of paragraph .02, the word "competent" is replaced with the word "appropriate."

AU sec. 350, "Audit Sampling"

SAS No. 39, "Audit Sampling" (AU sec. 350, "Audit Sampling"), as amended, is amended as follows:

a. Within footnote 2 to paragraph .02, the reference to section 312, *Audit Risk and Materiality in Conducting an Audit*, is replaced with a reference to Auditing Standard No. 14, *Evaluating Audit Results*.

b. The last sentence of paragraph .03 is replaced with:

> Either approach to audit sampling can provide sufficient evidential matter when applied properly. This section applies to both nonstatistical and statistical sampling.

c. Paragraph .04 is deleted.

d. In paragraph .06:

- The first sentence is deleted.
- In the last sentence, the word "competence" is replaced with the word "appropriateness."
- The following note is added to the paragraph:

  Note: Auditing Standard No. 15, *Audit Evidence*, discusses the appropriateness of audit evidence, and Auditing Standard No. 14, *Evaluating Audit Results,* discusses the auditor's responsibilities for evaluating the sufficiency and appropriateness of audit evidence.

e. Paragraph .08 is deleted.

f. In paragraph .09:

- The sentence in paragraph .09 referring to section 313, which is in parentheses, is deleted.
- The following note is added to the paragraph:

  Note: Auditing Standard No. 8, *Audit Risk,* describes audit risk and its components in a financial statement audit—the risk of material misstatement (consisting of inherent risk and control risk) and detection risk.

g. In paragraph .11:

- The phrase "(see section 311, *Planning and Supervision*)" is deleted.
- The sentence "(See section 313.)" is deleted.

h. The second sentence of paragraph .15 is replaced with:

> See Auditing Standard No. 9, *Audit Planning*.

i. In the first bullet in paragraph .16, the phrase "(see section 326, *Evidential Matter*)" is deleted.

j. In the second bullet of paragraph .16, the phrase "Preliminary judgments about materiality levels" is replaced with the phrase "Tolerable misstatement. (See paragraphs .18–.18A.)"

k. Paragraph .18 is replaced with:

> Evaluation in monetary terms of the results of a sample for a substantive test of details contributes directly to the auditor's purpose, since such an evaluation can be related to his or her judgment of the monetary amount of misstatements that would be material. When planning a sample for a substantive test of details, the auditor should consider how much monetary misstatement in the related account balance or class of transactions may exist, in combination with other misstatements, without causing the financial statements to be materially misstated. This maximum monetary misstatement for the account balance or class of transactions is called *tolerable misstatement*.

l. Paragraph .18A is added:

> Paragraphs 8–9 of Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*, describe the auditor's responsibilities for determining tolerable misstatement at the account or disclosure level. When the population to be sampled constitutes a portion of an account balance or transaction class, the auditor should determine tolerable misstatement for the population to be sampled for purposes of designing the sampling plan. Tolerable misstatement for the population to be sampled ordinarily should be less than tolerable misstatement for the account balance or transaction class to allow for the possibility that misstatement in the portion of the account or transaction class not subject to audit sampling, individually or in combination with other misstatements, would cause the financial statements to be materially misstated.

m. Paragraph .20 is deleted.

n. The first sentence of paragraph .21 is replaced with the following sentence:

> The sufficiency of tests of details for a particular account balance or class of transactions is related to the individual importance of the items examined as well as to the potential for material misstatement.

o. Paragraph .23 is replaced with:

> To determine the number of items to be selected in a sample for a particular substantive test of details, the auditor should take into account tolerable misstatement for the population; the allowable risk of incorrect acceptance (based on the assessments of inherent risk, control risk, and the detection risk related to the substantive analytical procedures or other relevant substantive tests); and the characteristics of the population, including the expected size and frequency of misstatements.

p. Paragraph .23A is added:

> Table 1 of the Appendix describes the effects of the factors discussed in the preceding paragraph on sample sizes in a statistical or nonstatistical sampling approach. When circumstances are similar, the effect on sample size of those factors should be similar regardless of whether a statistical or nonstatistical approach is used. Thus, when a nonstatistical sampling approach is applied properly, the resulting sample size ordinarily will be comparable to, or larger than, the sample size resulting from an efficient and effectively designed statistical sample.

q. The last sentence of paragraph .25 is replaced with:

> The auditor also should evaluate whether the reasons for his or her inability to examine the items have (a) implications in relation to his or her risk assessments (including the assessment of fraud risk), (b) implications regarding the integrity of management or employees, and (c) possible effects on other aspects of the audit.

r. Footnote 6 to paragraph .26 is replaced with:

> Paragraphs 10 through 23 of Auditing Standard No. 14, *Evaluating Audit Results*, discuss the auditor's consideration of differences between the accounting records and the underlying facts and circumstances.

s. Within footnote 7 to paragraph .32, the phrase "(see section 319.85)" is deleted. In the first sentence of the footnote, the phrase "often plans" is replaced with the phrase "may plan." The last sentence of the footnote, which is in brackets, is deleted.

t. The last sentence of paragraph .38 is replaced with:

> When circumstances are similar, the effect on sample size of those factors should be similar regardless of whether a statistical or nonstatistical approach is used. Thus, when a nonstatistical sampling approach is applied properly, the resulting sample size ordinarily will be comparable to, or larger than, the sample size resulting from an efficient and effectively designed statistical sample.

u. The fifth sentence of paragraph .39 is replaced with:

> Paragraphs 44 through 46 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, describe the auditor's responsibilities for performing procedures between the interim date of testing and period end.

v. In paragraph .39, the last sentence, which is in brackets, is deleted.

w. In paragraph .44:

- The first sentence is replaced with:

  > In some circumstances, the auditor may design a sample that will be used for dual purposes: as a test of control and as a substantive test.

- The third sentence is replaced with:

  > For example, an auditor designing a test of a control over entries in the voucher register may design a related substantive test at a risk level that is based on an expectation of reliance on the control.

- The fifth sentence is replaced with:

  > In evaluating such tests, deviations from the control that was tested and monetary misstatements should be evaluated separately using the risk levels applicable for the respective purposes.

- The following Note is added to the paragraph:

  > Note: Paragraph 47 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*,

provides additional discussion of the auditor's responsibilities for performing dual-purpose tests.

x. The reference in paragraph .45 to paragraph .04 is changed to a reference to paragraph .03.

y. In item 2 of paragraph .48, the last sentence is deleted.

z. Within footnote 1 to item 4 in paragraph .48, the sentence "(See section 313.)" is deleted.

aa. The sentence in item 6 of paragraph .48 "(See section 313.)" is deleted.

AU sec. 9350, "Audit Sampling: Auditing Interpretations of Section 350"

AU sec. 9350, "Audit Sampling: Auditing Interpretations of Section 350," is superseded.

AU sec. 380, "Communication With Audit Committees"

SAS No. 61, "Communication With Audit Committees" (AU sec. 380, "Communication With Audit Committees"), as amended, is amended as follows:

In footnote 5 to paragraph .10, the reference to section 316A.38–.40 is replaced with a reference to AU secs. 316.79–.82; the reference to section 316A is replaced with a reference to section 316.

AU sec. 411, "The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles"

SAS No. 69, "The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles" (AU sec. 411, "The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles"), as amended, is amended as follows:

a. In paragraph .04, the reference in (c) to section 431 is replaced with a reference to paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*; in (d), the reference to section 431 is replaced with a reference to paragraph 31 of Auditing Standard No. 14.

b. The reference in footnote 1 to paragraph .04 to 312.10 is replaced with a reference to Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*.

AU sec. 431, "Adequacy of Disclosure in Financial Statements"

SAS No. 32, "Adequacy of Disclosure in Financial Statements" (AU sec. 431, "Adequacy of Disclosure in Financial Statements"), as amended, is superseded.

AU sec. 508, "Reports on Audited Financial Statements"

SAS No. 58, "Reports on Audited Financial Statements" (AU sec. 508, "Reports on Audited Financial Statements"), as amended, is amended as follows:

a. In paragraph 18C, the phrase "and in AU sec. 431" is deleted.

b. In subparagraph .20.a., the word "competent" is replaced with the word "appropriate."

c. In the second sentence of paragraph .22, the word "competent" is replaced with the word "appropriate."

d. In the third sentence of paragraph .24, the word "competent" is replaced with the word "appropriate."

e. In footnote 15 to paragraph .38, the first sentence is replaced with:

> In this context, practicable means that the information is reasonably obtainable from management's accounts and records and that providing the information in the report does not require the auditor to assume the position of a preparer of financial information.

f. The references in paragraph .49 to section 312, *Audit Risk and Materiality,* and to section 342, *Auditing Accounting Estimates*, are replaced with a reference to paragraph 13 of Auditing Standard No. 14, *Evaluating Audit Results*.

g. In the first sentence of paragraph .63, the word "competent" is replaced with the word "appropriate."

h. In paragraph .66, the second sentence is replaced with:

> (See paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*.)

AU sec. 9508, "Reports on Audited Financial Statements: Auditing Interpretations of Section 508"

AU sec. 9508, "Reports on Audited Financial Statements: Auditing Interpretations of Section 508," is amended as follows:

> In paragraph .02, the word "competent" is replaced with the word "appropriate."

AU sec. 530, "Dating of the Independent Auditor's Report"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 530, "Dating of the Independent Auditor's Report" (AU sec. 530, "Dating of the Independent Auditor's Report"), as amended, is amended as follows:

a. In the first sentence of paragraph .01, the word "competent" is replaced with the word "appropriate."

b. In the second note to paragraph .01, the word "competent" is replaced with the word "appropriate."

c. In the first sentence of paragraph .05, the word "competent" is replaced with the word "appropriate."

AU sec. 543, "Part of Audit Performed by Other Independent Auditors"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 543 "Part of Audit Performed by Other Independent Auditors" (AU sec. 543, "Part of Audit Performed by Other Independent Auditors"), as amended, is amended as follows:

a. The following note is added as the second note to paragraph .01:

Note: For situations in which the auditor engages an accounting firm or individual accountants to participate in the audit engagement and AU sec. 543 does not apply, the auditor should supervise them in accordance with the requirements of Auditing Standard No. 10, *Supervision of the Audit Engagement*.

b. Within paragraph .12:

- Subparagraph b. is replaced with:

  A list of significant risks, the auditor's responses, and the results of the auditor's related procedures.

- Subparagraph f. is replaced with:

  A schedule of accumulated misstatements, including a description of the nature and cause of each accumulated misstatement, and an evaluation of uncorrected misstatements, including the quantitative and qualitative factors the auditor considered to be relevant to the evaluation.

AU sec. 9543, "Part of Audit Performed by Other Independent Auditors: Auditing Interpretations of Section 543"

AU sec. 9543, "Part of Audit Performed by Other Independent Auditors: Auditing Interpretations of Section 543," as amended, is amended as follows:

a. Paragraph .16 is replaced with:

Interpretation—The principal auditor's response should ordinarily be made by the engagement partner. The engagement partner should take those steps that he or she considers reasonable under the circumstances to be informed of known matters pertinent to the other auditor's inquiry. For example, the engagement partner may inquire of engagement team members responsible for various aspects of the engagement or he or she may direct engagement team members to bring to his or her attention any significant matters of which they become aware during the audit. The principal auditor is not required to perform any procedures directed toward identifying matters that would not affect his or her audit or his or her report.

b. Footnote 4 to paragraph .16 is deleted.

AU sec. 722, "Interim Financial Information"

SAS No. 100, "Interim Financial Information" (AU sec. 722, "Interim Financial Information"), as amended, is amended as follows:

a. Within footnote 7 to paragraph .11, the first sentence is replaced with:

Paragraphs 10 through 23 of Auditing Standard No. 14, *Evaluating Audit Results*, require the auditor to accumulate and evaluate the misstatements identified during the audit.

b. The reference in paragraph .13 to section 319, *Consideration of Internal Control in a Financial Statement Audit*, is replaced with a reference to Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

c. Within the last sentence of paragraph .16, the title of section 329, "Analytical Procedures," is replaced with the title "Substantive Analytical Procedures."

d. Footnote 20 to paragraph .26 is deleted.

e. The reference in paragraph .56, subparagraph C5, to section 319 is replaced with a reference to section 316.

Auditing Standard No. 3, *Audit Documentation*

Auditing Standard No. 3, *Audit Documentation*, as amended, is amended as follows:

a. Within paragraph 3, subparagraph b. is replaced with:

> Supervisory personnel who review documentation prepared by other members of the engagement team.

b. Paragraph 9A is added:

> Documentation of risk assessment procedures and responses to risks of misstatement should include (1) a summary of the identified risks of misstatement and the auditor's assessment of risks of material misstatement at the financial statement and assertion levels and (2) the auditor's responses to the risks of material misstatement, including linkage of the responses to those risks.

c. Within paragraph 12:

- Within subparagraph a: (1) a footnote reference 2A is added at the end of the first sentence:

  > See paragraphs 12–13 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement,* and paragraphs .66–.67 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

  and (2) the second sentence of subparagraph a. is deleted.
- Subparagraph b. is replaced with:

  > Results of auditing procedures that indicate a need for significant modification of planned auditing procedures, the existence of material misstatements (including omissions in the financial statements), and the existence of significant deficiencies or material weaknesses in internal control over financial reporting.
- Subparagraph c. is replaced with:

  > Accumulated misstatements and evaluation of uncorrected misstatements, including the quantitative and qualitative factors the auditor considered to be relevant to the evaluation.
- Footnote 2B is added to subparagraph c.:

  > See paragraphs 10–23 of Auditing Standard No. 14, *Evaluating Audit Results*.
- Subparagraph d. is replaced with:

  > Disagreements among members of the engagement team or with others consulted on the engagement about final conclusions reached on significant accounting or auditing matters, including the basis for the final resolution of those disagreements. If an engagement team member

disagrees with the final conclusions reached, he or she should document that disagreement.

- Subparagraph f. is replaced with:

  Significant changes in the auditor's risk assessments, including risks that were not identified previously, and the modifications to audit procedures or additional audit procedures performed in response to those changes.

- Footnote 2C is added to subparagraph f.:

  See paragraph 74 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, and paragraph 36 of Auditing Standard No. 14, *Evaluating Audit Results*.

- Subparagraph f-1. is added:

  Risks of material misstatement that are determined to be significant risks and the results of the auditing procedures performed in response to those risks.

d. Within paragraph 19:

- Subparagraph b. is replaced with:

  A list of significant risks, the auditor's responses, and the results of the auditor's related procedures.

- Subparagraph f. is replaced with:

  A schedule of accumulated misstatements, including a description of the nature and cause of each accumulated misstatement, and an evaluation of uncorrected misstatements, including the quantitative and qualitative factors the auditor considered to be relevant to the evaluation.

e. Paragraph 21 and the preceding heading, "Effective Date," are deleted.

Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*

Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*, as amended, is amended as follows:

In the first sentence of paragraph 18, the word "competent" is replaced with the word "appropriate."

Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*

Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, is amended as follows:

a. In the second sentence of paragraph 3, the word "competent" is replaced with the word "appropriate."

b. In the first sentence of paragraph 9, the phrase "any assistants" is replaced with the phrase "the engagement team members."

c. Within footnote 10 to paragraph 14, the reference to paragraphs .19–.42 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, is replaced with a reference to Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

d. The reference in paragraph 15 to AU sec. 316.44 and .45 is replaced with a reference to paragraphs 65–69 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

e. Within footnote 11 to paragraph 20, the reference to AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, is replaced with a reference to Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*.

f. Within footnote 12 to paragraph 28, the reference to AU sec. 326, *Evidential Matter*, is replaced with a reference to Auditing Standard No. 15, *Audit Evidence*.

g. Within footnote 13 to the note to paragraph 31, the reference to AU sec. 312.39 is replaced with a reference to paragraph 14 of Auditing Standard No. 14, *Evaluating Auditing Results*. The reference to AU sec. 316.50 is replaced with a reference to paragraph 5 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

h. The references in paragraph 36 to paragraphs .16–.20, .30–.32, and .77–.79 of AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*, are replaced with references to paragraph 29 and Appendix B of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

i. In the first sentence of paragraph 51, the word "competent" is replaced with the word "appropriate."

j. In the first sentence of paragraph 89, the word "competent" is replaced with the word "appropriate."

k. Within the note to paragraph C6 in Appendix C, the word "competent" is replaced with the word "appropriate."

Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*

Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*, is amended as follows:

a. Footnote 3 to paragraph 4 is deleted.

b. In paragraph 10, the reference to AU sec. 431, *Adequacy of Disclosure in Financial Statements*, is replaced with a reference to paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*.

Auditing Standard No. 7, *Engagement Quality Review*

Auditing Standard No. 7, *Engagement Quality Review*, is amended as follows:

a. Footnote 3 to paragraph 5 is replaced with:

> The term "engagement partner" has the same meaning as the "practitioner-in-charge of an engagement" in PCAOB interim quality control standard QC sec. 40, *The Personnel Management Element of a Firm's System of Quality Control-Competencies Required by a*

Practitioner-in-Charge of an Attest Engagement. QC sec. 40 describes the competencies required of a practitioner-in-charge of an attest engagement.

b. In paragraph 10, the note following subparagraph b. is replaced with:

Note: A *significant risk* is a risk of material misstatement that requires special audit consideration.

Ethics Standards

ET sec. 102, "Integrity and Objectivity"

ET sec. 102, "Integrity and Objectivity," is amended as follows:

Footnote 1 to paragraph .05 is replaced with: See paragraph 5.b. of Auditing Standard No. 10, *Supervision of the Audit Engagement*, and paragraph 12.d. of Auditing Standard No. 3, *Audit Documentation*.

Appendix 10—Additional Discussion of Auditing Standards, Amendments to PCAOB Standards, and Comments on Reproposed Standards

This appendix discusses each of the auditing standards in Appendices 1–8 ("the risk assessment standards") and the related amendments to PCAOB standards in Appendix 9. In particular, this appendix provides additional background information for certain requirements in the standards. It discusses the Board's responses to comments on the standards reproposed on December 17, 2009 ("the reproposed standards"), including the basis for the Board's conclusions regarding certain requirements.

I. Discussion of Comments That Relate to Many of the Reproposed Standards

The following paragraphs discuss matters raised by commenters that relate to many of the reproposed standards. At the end of this appendix is a discussion of other topics raised by commenters on matters other than the risk assessment standards or the related amendments.

A. Consideration of Fraud in the Audit

Section I of the release discusses the Board's objectives regarding incorporating into its risk assessment standards the requirements for identifying and responding to risks of material misstatement due to fraud ("fraud risks") and evaluating audit results from AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.[1]

The number of comments received on this approach to incorporate the requirements from AU sec. 316 declined significantly from the original proposed standards.[2] The views of commenters continue to be mixed. One commenter supported the approach, and two commenters expressed concerns about the approach.

The risk assessment standards continue to include relevant requirements from AU sec. 316. The Board has observed from its oversight activities instances in which auditors have performed the procedures required in AU sec. 316 mechanically, without using the procedures to develop insights on fraud risk or to modify the audit plan to address that risk. The Board also has observed instances in which firms have failed to respond appropriately to identified fraud risks.

These observations suggest that some auditors may improperly view the consideration of fraud as an isolated, mechanical process rather than an integral part of audits under PCAOB standards. Integrating the requirements from AU sec. 316 into the risk assessment standards emphasizes to auditors that assessing and responding to fraud risks is an integral part of an audit in accordance with PCAOB standards, rather than a separate consideration. Such integration also

---

[1] The risk assessment standards incorporate paragraphs .14–.51 and .68–.78 of AU sec. 316. Accordingly, those paragraphs are removed from AU sec. 316 by means of a related amendment. See Appendix 9.

[2] As discussed in Section I of this release, the risk assessment standards were originally proposed on October 21, 2008. See PCAOB Release No. 2008-006, *Proposed Auditing Standards Related to the Auditor's Assessment of and Response to Risk*.

should prompt auditors to make a more thoughtful and thorough assessment of the risks affecting the financial statements, including fraud risks, and to develop appropriate audit responses. Furthermore, AU sec. 316, as amended, will continue to provide relevant information on determining the necessary procedures for considering fraud in a financial statement audit. (See section X.F.2. of this appendix for more discussion about AU sec. 316.)

B. Organization and Style of Standards (Including the Use of Notes and Appendices)

In response to comments on the original proposed standards, the Board presented the reproposed standards using an organization and style that is intended to be a template for future standards of the Board. The organization and style includes an objective for each standard, which provides additional context for understanding the requirements in the standard, and a separate appendix for definitions of terms used in each standard.

Commenters generally supported the organization and style of the reproposed standards, and some commenters suggested that existing PCAOB standards be revised to implement this organization and style. As stated in the release accompanying the reproposed standards, the organization and style used in the reproposed standards draws from previously issued standards of the Board, e.g., Auditing Standard No. 7, *Engagement Quality Review.* Also, the Board will apply this template in the course of its other standards-setting activities.

Commenters expressed concerns about including requirements in appendices and notes to the standard. Consistent with standards previously issued by the Board, the notes and appendices in the risk assessment standards are integral parts of the standards and carry the same authoritative weight as the other portions of the standards.

C. Use of Terms

PCAOB Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards*, sets forth the terminology that the Board uses to describe the degree of responsibility that the auditing and related professional practice standards impose on auditors. The original proposed standards used terms in the requirements in a manner that was consistent with Rule 3101.

Some comments received on the original proposed standards suggested revisions to the terms used in the requirements or asked for clarification about certain terms or phrases, e.g., "take into account." The reproposed standards reflected numerous revisions to the terms used in the standards, and the risk assessment standards reflect further refinements. For example, the standards use "should consider" only when referring to a requirement to consider performing an action or procedure, which is consistent with Rule 3101.

As explained in the release accompanying the reproposed standards, the phrase "take into account" has been used previously in PCAOB standards in reference to information or matters that the auditor should think about or give attention to in performing an audit procedure or reaching a conclusion.[3] Accordingly, the results of the auditor's thinking on the relevant matters should be reflected

[3] AU sec. 316.45 and paragraphs 14, 44, 59, and B12 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

in the performance and documentation of the respective audit procedure performed or conclusion reached. The accompanying standards continue to use "take into account" in the same way.

Some commenters asked about the meaning of certain terms, e.g., "assess," "evaluate," or "determine." Those commenters also stated that the Board should use those terms consistently throughout its standards. The Board has reviewed the use of each of those terms and has revised the standards as necessary to apply those terms more consistently. Subsequent sections of this appendix discuss specific revisions to the individual standards.

One commenter expressed concerns about statements that involve the use of present tense in the reproposed standards. As with standards that the Board previously issued, the present tense is used in the risk assessment standards for statements that are factual or definitional, e.g., to provide additional explanation of a required auditing procedure.[4] Subsequent sections of this appendix discuss specific instances of the use of present tense in the risk assessment standards.

D. Requirements and the Application of Judgment

Some commenters on the original proposed standards stated that the original proposed standards contained requirements that were "too prescriptive," limiting the auditor's ability to "use professional judgment or scale the audit," e.g., because of the number of requirements in the standards and because the standards did not explicitly refer to professional judgment in the requirements. In the release accompanying the reproposed standards, the Board discussed the importance of professional judgment in fulfilling the requirements of the standards. After examining each requirement, the Board revised certain provisions in the reproposed standards to streamline the presentation of those requirements.

Although the Board received fewer comments on the reproposed standard related to this topic, two commenters continue to express concerns about whether the reproposed standards made adequate allowance for the auditor to use professional judgment in assessing and responding to risk in an audit.

PCAOB standards recognize that the auditor uses judgment in planning and performing audit procedures and evaluating the evidence obtained from those procedures.[5] As under other PCAOB standards, auditors need to exercise judgment in fulfilling the requirements of the risk assessment standards in the particular circumstances. Making references to judgment in selected portions of the standards, however, could be misinterpreted as indicating that judgment is required only in certain aspects of the audit. Instead of referring to judgment selectively, the risk assessment standards set forth principles for meeting the requirements of the standards and allow the auditor to determine the most appropriate way to comply with the requirements in the circumstances.

---

[4] See, e.g., paragraph 21 of Auditing Standard No. 5 for an example of the use of the present tense for this purpose.

[5] See, e.g., paragraph .11 of AU sec. 230, *Due Professional Care in the Performance of Work*.

II. Auditing Standard No. 8—Audit Risk

A. Background

Auditing Standard No. 8 discusses audit risk and the relationships among the various components of audit risk in an audit of financial statements. The standard applies to integrated audits and to audits of financial statements only.

B. Objective

The reproposed standard stated that the objective of the auditor is to conduct the audit of financial statements in a manner that reduces audit risk to an appropriately low level. This objective provided important context for understanding how the concept of audit risk is applied in an audit.

One commenter observed that the reproposed standards sometimes used the phrase, "appropriately low level" and occasionally used the phrase "acceptably low level," and that commenter suggested revising the standards to use "acceptably low level" in each instance. The Board continues to believe the term "appropriately low level" is more suitable because it is aligned more closely with the degree of assurance described in the auditor's opinion, i.e., the auditor conducts the audit to reduce audit risk to an appropriately low level in order to express an opinion with reasonable assurance. In contrast, the term "acceptably low" is less clear and could be misinterpreted. The risk assessment standards have been revised to use the phrase "appropriately low level," as applicable.

C. Due Professional Care and Sufficient Appropriate Audit Evidence

The reproposed standard stated that, to form an appropriate basis for expressing an opinion on the financial statements, the auditor must plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement due to error or fraud. It also stated that reasonable assurance is obtained by reducing audit risk to an appropriately low level through applying due professional care, including obtaining sufficient appropriate audit evidence.[6]

A commenter suggested that due professional care is a responsibility throughout the audit, similar to professional skepticism and judgment, and need not be repeated throughout the Board's standards. The Board agrees that due professional care is a responsibility throughout the audit. On the other hand, existing PCAOB standards state that due professional care allows the auditor to obtain reasonable assurance,[7] and the statement in Auditing Standard No. 8 acknowledges that principle.

D. Audit Risk and Risk of Material Misstatement

Some commenters on the original proposed standard requested more explanation about risks at the overall financial statement level, e.g., by providing examples of such risks. The reproposed standard elaborated further on risks at the financial statement level.[8]

---

[6] Paragraph 3 of Auditing Standard No. 8.

[7] AU sec. 230.10.

[8] Paragraph 6 of Auditing Standard No. 8.

Commenters on the reproposed standard asked for more explanation regarding how financial statement level risks can result in material misstatement of the financial statements. The examples of financial statement level risks in Auditing Standard No. 8 have been expanded to illustrate how those risks can result in material misstatement of the financial statements.[9]

Some individual commenters offered suggestions for refining or clarifying the discussion of the risk of material misstatement and its components. For example, one commenter suggested that the description of the risk of material misstatement should state that the risk exists "prior to the audit" to more clearly indicate that it is the company's risk. The Board agrees that the risk of material misstatement exists irrespective of the audit, while the risk of not detecting material misstatement is the auditor's risk. However, the suggested phrase could be misinterpreted, e.g., as implying that the auditor need not consider the risk of misstatements occurring during the audit.

The reproposed standard included a statement that inherent risk and control risk are the company's risks; they exist independently of the audit. One commenter suggested that the statement was not informative and suggested revising the standard to state that inherent risk and control risk are functions of the company's characteristics, but influence the auditor's actions. The Board agrees that more discussion of the auditor's consideration of inherent risk and control risk is appropriate. Thus, Auditing Standard No. 8 has been expanded to discuss the sources of evidence the auditor uses when assessing inherent risk and control risk.[10] Also, the description of control risk in Auditing Standard No. 8 has been aligned with the discussion of internal control concepts in Auditing Standard No. 5.

One commenter expressed a concern that descriptions of inherent risk, control risk, and detection risk that included the phrase "that could be material, individually or in combination with other misstatements," may be misinterpreted by the auditor as a requirement to consider whether the combination of dissimilar risks will result in a material misstatement. The commenter suggested changing "combination" to "aggregate." However, the standard does not discuss the combination of risks but, rather, the risk of a misstatement that could be material, individually or in combination with other misstatements, which is consistent with the description of the auditor's evaluation of uncorrected misstatements in Auditing Standard No. 14, *Evaluating Audit Results.* Thus, the term "combination" was retained as proposed.

E. Detection Risk

The reproposed standard indicated that detection risk is reduced by performing substantive procedures. Some commenters stated that the discussion of detection risk should be modified to indicate that auditors can reduce detection risk through procedures other than substantive procedures (e.g., risk assessment procedures and tests of controls). A commenter also suggested changing the sentence in the standard to refer to "audit procedures" instead of "substantive procedures."

The Board acknowledges that auditors might obtain evidence of misstatements through procedures other than substantive procedures. However, that does not diminish the auditor's responsibility to plan and perform substantive procedures for significant accounts and disclosures that are sufficient to provide

[9] Ibid.

[10] Paragraph 8 of Auditing Standard No. 8.

reasonable assurance of detecting misstatements that would result in material misstatement of the financial statements. Changing "substantive procedures" to "audit procedures," as suggested by the commenter, is not consistent with AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit,* and could be misunderstood by auditors, resulting in inadequate substantive procedures.[11] To provide further clarification, Auditing Standard No. 8 has been revised to describe the role of risk assessment procedures and tests of controls in assessing the risk of material misstatement, which, in turn, affects the appropriate level of detection risk.[12]

Some commenters expressed concerns that the reproposed standard did not adequately link the concepts of inherent risk and control risk to detection risk. They stated that a discussion on the relationship of these concepts is necessary for the auditor to determine the acceptable level of detection risk for the financial statement assertions, which, in turn, is used to determine the nature, timing, and extent of substantive procedures. The following discussion, which is adapted from AU sec. 319, was added to paragraph 10 of Auditing Standard No. 8: "The auditor uses the assessed risk of material misstatement to determine the appropriate level of detection risk for a financial statement assertion. The higher the risk of material misstatement, the lower the level of detection risk needs to be in order to reduce audit risk to an appropriately low level."[13]

F. Integrated Audit Considerations

Auditing Standard No. 8 applies both to audits of financial statements only and to the financial statement audit portion of integrated audits. Audit risk in the audit of financial statements relates to whether the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated, while audit risk in an audit of internal control over financial reporting ("audit of internal control") relates to whether the auditor expresses an inappropriate audit opinion when one or more material weaknesses exist. The two forms of audit risk are related, however, and Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement,* indicates that the risk assessment procedures apply to both the audit of financial statements and the audit of internal control.

Some commenters suggested revisions to the first paragraph and the first footnote of the reproposed standard to clarify how the concepts of audit risk in this standard apply to audits of financial statements only and to integrated audits. The first paragraph has been revised to indicate that Auditing Standard No. 8 applies to either an audit of financial statements only or to an integrated audit. The first footnote also has been revised to clarify that, in integrated audits, the risks of material misstatement are the same for both the audit of financial statements and the audit of internal control.

---

[11] AU secs. 319.81–.82. AU sec. 319, along with AU sec. 311, *Planning and Supervision*, AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, AU sec. 313, *Substantive Tests Prior to the Balance Sheet Date*, AU sec. 326, *Evidential Matter*, and AU sec. 431, *Adequacy of Disclosure in Financial Statements*, are superseded by the risk assessment standards.

[12] Paragraphs 8–9 of Auditing Standard No. 8.

[13] Paragraph 10 of Auditing Standard No. 8.

III. Auditing Standard No. 9—Audit Planning

A. Background

Auditing Standard No. 9 describes the auditor's responsibilities for planning an integrated audit or an audit of financial statements only.

B. Planning and Supervision

The original proposed standard and the reproposed standard discussed both audit planning and supervision, similar to AU sec. 311. Some commenters observed that audit planning and supervision should be covered in separate standards.

The Board agrees that audit planning and supervision of engagement team members are distinct activities that should be covered in separate standards. Accordingly, the Board has divided the requirements of the reproposed planning and supervision standard into separate standards. Dividing the requirements for planning and supervision into separate standards does not affect the auditor's responsibilities for planning the audit or supervising the work of engagement team members.

C. Responsibilities of the Engagement Partner

AU sec. 311 stated, "The auditor with final responsibility for the audit may delegate portions of the planning and supervision of the audit to other firm personnel." Auditing Standard No. 9 uses the term "engagement partner" instead of "auditor with final responsibility for the audit" and states more directly that the engagement partner is responsible for properly planning the audit. The standard also allows the engagement partner to seek assistance from appropriate engagement team members in fulfilling his or her planning responsibilities. Because the requirements in Auditing Standard No. 9 apply to the engagement partner and engagement team members who assist the engagement partner in planning the audit, the standard uses the term "auditor," and a footnote was added to clarify that the requirements in the standard apply to the engagement partner and other engagement team members who participate in planning the audit.

D. Preliminary Engagement Activities

The reproposed standard included a note in paragraph 6 stating that the decision regarding continuance of the client relationship and the determination of compliance with independence and ethics requirements were not limited to preliminary engagement activities and should be reevaluated with changes in circumstances. One commenter expressed concern that the note did not describe the changes in circumstances for which it would be appropriate for the auditor to reevaluate these decisions. The acceptance and continuance of the client relationship are discussed in QC sec. 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice.* Other PCAOB standards discuss certain circumstances that warrant reevaluating the client relationship.[14] Auditors also may reevaluate their engagement acceptance decision for other reasons. However, because auditors must comply with independence and ethics requirements

[14] See, e.g., paragraphs .18–.21 of AU sec. 317, *Illegal Acts by Clients.*

throughout the audit, the note was moved in Auditing Standard No. 9 to modify paragraph 6.b. and revised to state that determination of compliance with independence and ethics requirements is not limited to preliminary engagement activities and should be reevaluated upon changes in circumstances.

E. Planning Activities

The reproposed standard stated that, as part of establishing the audit strategy and audit plan, the auditor should evaluate whether certain matters specified in the standard are important to the company's financial statements and internal control over financial reporting ("internal control") and, if so, how those matters would affect the auditor's procedures. The requirement in the reproposed standard was the same as in paragraph 9 of Auditing Standard No. 5, thus extending its application to an audit of financial statements.

Evaluation of the matters listed in paragraph 7 of Auditing Standard No. 9 can lead auditors to develop more effective audit strategies and audit plans. For example, evaluation of those matters can highlight areas that might warrant additional attention during the auditor's risk assessment procedures, which, in turn, could affect the audit procedures performed in response to the risks of material misstatement. Also, evaluation of the internal control related matters can help the auditor develop an appropriate audit strategy, e.g., in determining accounts for which reliance on controls might be appropriate in the audit of financial statements.

Some commenters suggested changes to the requirement, including deleting some of the matters discussed in the requirement, moving other matters elsewhere within the standard, or making specific revisions to the language of the standard. Also, some commenters suggested using "should consider" instead of "should evaluate."

The Board considered the suggested changes to the standard and determined that those changes would not substantially improve the standard. Also, it is important for the language in this requirement to be identical to the language in Auditing Standard No. 5 to emphasize that this required procedure is to be performed only once in an integrated audit, with the results of the procedure to be applied in planning both the financial statement audit and the audit of internal control. Also, reframing the requirement from "should evaluate" to "should consider" would weaken the requirement. Therefore, Auditing Standard No. 9 retains the wording from the reproposed standard.

F. Audit Strategy and Audit Plan

Auditing Standard No. 9 requires the auditor to take into account certain matters when establishing the overall audit strategy, including the reporting objectives of the engagement and the nature of the communications required by PCAOB standards; the factors that are significant in directing the activities of the engagement team; the results of preliminary engagement activities and the auditor's evaluation of certain important matters; and the nature, timing, and extent of resources necessary to perform the engagement.[15] These matters generally relate to information that auditors obtain through other required procedures. One commenter suggested that this requirement should discuss the need for specialists. Auditing Standard No. 9 was revised to include a reference to paragraph 16 regarding the requirement for the auditor to determine whether specialized skill or knowledge is needed to perform the engagement.

[15] Paragraph 9 of Auditing Standard No. 9.

The reproposed standard required the auditor to develop and document an audit plan that includes the planned nature, timing, and extent of the risk assessment procedures. One commenter suggested that it was unnecessary to document the timing of the risk assessment procedures because risk assessment is an ongoing process that occurs throughout the execution of the audit. Auditing Standard No. 9 retains the requirement to document the timing of the risk assessment procedures. Identifying and appropriately assessing the risks of material misstatement provide a basis for designing and implementing responses to the risks of material misstatement, so the timing of the risk assessment procedures is important to determine the timing of other audit procedures.

The reproposed standard also required the auditor to develop and document the planned nature, timing, and extent of tests of controls and substantive procedures. One commenter suggested that the requirement should specify that the audit plan include planned tests at the "relevant assertion level." Auditing Standard No. 9 retains the requirement as reproposed. Audit procedures are not performed only at the assertion level, e.g., certain general audit procedures and tests of certain entity-level controls in the audit of internal control over financial reporting. Therefore, it is not appropriate to update the standard with the suggested language.

G. Requirements for Multi-location Engagements

Auditing Standard No. 9 establishes requirements that apply to audits of companies with operations in multiple locations or business units. Auditing Standard No. 9 requires the auditor to determine the extent to which audit procedures should be performed at selected locations or business units to obtain sufficient appropriate evidence to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. This includes determining the locations or business units at which to perform audit procedures, as well as the nature, timing, and extent of the procedures to be performed at those individual locations or business units. The auditor is required to assess the risks of material misstatement to the consolidated financial statements associated with the location or business unit and correlate the amount of audit attention devoted to the location or business unit with the degree of risk of material misstatement associated with that location or business unit. Auditing Standard No. 9 also lists factors that are relevant to the assessment of the risks of material misstatement associated with a particular location or business unit and the determination of the necessary audit procedures. These requirements are risk-focused and aligned with the requirements in Auditing Standard No. 5.

An example was added to one of the factors in Auditing Standard No. 9 to highlight that the auditor's consideration of risks associated with a location or business unit includes whether significant unusual transactions are executed at that location or business unit, e.g., whether certain transactions were conducted at the location or business unit to achieve a particular accounting result. AU sec. 316 already requires the auditor to perform procedures regarding significant unusual transactions.

The reproposed standard included a statement similar to Auditing Standard No. 5, that "The direction in paragraph 5 of Proposed Auditing Standard, *The Auditor's Responses to the Risks of Material Misstatement,* regarding incorporating an element of unpredictability in the auditing procedures means that the auditor should vary the nature, timing, and extent of audit procedures at locations or business units from year to year." Some commenters stated that

the statement in the reproposed standard was unnecessarily prescriptive. After considering the comments received, the requirement regarding unpredictability was removed from the audit planning standard, and the requirements in Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, regarding incorporating an element of unpredictability were expanded to include discussion of varying the testing in the selected locations.[16] However, this does not change the requirements in Auditing Standard No. 5 regarding incorporating unpredictability in testing controls at individual locations in audits of internal control.[17]

The reproposed standard included a requirement for the auditor to determine the extent to which auditing procedures should be performed at selected locations or business units to obtain sufficient appropriate evidence to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatements. One commenter was concerned that the use of the term "consolidated financial statements" is inconsistent with the terminology used elsewhere in the standards and that the financial statements of companies with multiple divisions might not meet the definition of consolidated. The use of "consolidated financial statements" is consistent with the term used in Auditing Standard No. 5. The use of the term "consolidated" applies to situations in which the company has multiple locations or business units. Auditing Standard No. 9 retains the language as reproposed.

Some commenters requested clarification on how the requirements are expected to be applied in audits in which part of the work is performed by other auditors of financial statements of individual locations or business units that are included in the consolidated financial statements. A paragraph was added to Auditing Standard No. 9 to clarify that the auditor should apply the requirements in paragraphs 11–13 to determine the locations or business units for testing when the auditor plans to use the work and reports of other independent auditors who have audited the financial statements of one or more of the locations or business units (including subsidiaries, divisions, branches, components, or investments) that are included in the consolidated financial statements. AU sec. 543, *Part of Audit Performed by Other Independent Auditors,* describes the auditor's responsibilities when the auditor uses the work and reports of other independent auditors.[18]

H. Persons with Specialized Skill or Knowledge

Auditing Standard No. 9 indicates that the auditor should determine whether specialized skill or knowledge is needed to perform appropriate risk assessments, plan or perform audit procedures, or evaluate audit results. The responsibility has been extended from a similar requirement in AU sec. 311 regarding considering whether specialized information technology ("IT") skill or knowledge is needed in an audit. The requirement was extended to specialized skill or knowledge in areas besides IT, e.g., valuation specialists, actuarial specialists, income tax specialists, and forensic specialists, because of the prevalent use of such individuals by auditors.

The reproposed standard included a note that described the term "specialized skill or knowledge" as persons engaged or employed by the auditor who have specialized skill or knowledge. Some commenters suggested that this note be removed because paragraph 17 included a similar description. The note was

[16] Paragraph 5 of Auditing Standard No. 13.

[17] Paragraphs 61 and B13 of Auditing Standard No. 5.

[18] Paragraph 14 of Auditing Standard No. 9.

removed from Auditing Standard No. 9 because it was unnecessary and redundant.

One commenter suggested revising the standard to require the auditor to consider using a fraud specialist. The suggested requirement to consider using a fraud specialist was not added to Auditing Standard No. 9 because the requirement in the reproposed standard already covers fraud specialists, and the types of specialized skill or knowledge that might be needed on a particular audit depend on the particular circumstances and the skill and knowledge of the engagement team.

Some commenters suggested that the requirements relating to the involvement of specialists be reframed as "assisting" the auditor. Such a formulation is too narrow to describe the range of involvement of specialists, which could include providing assistance to the auditor or actually performing audit procedures.

Paragraph 17 of Auditing Standard No. 9 describes the required level of knowledge of the subject matter in terms of the general types of procedures that the auditor should be able to perform with regard to the person with specialized skill or knowledge. Paragraph 17, by itself, does not impose procedural requirements for working with persons with specialized skill or knowledge because those responsibilities already are described in either the supervision provisions of Auditing Standard No. 10, *Supervision of the Audit Engagement*, or AU sec. 336, *Using the Work of a Specialist*, as applicable.

IV. Auditing Standard No. 10—Supervision of the Audit Engagement

A. Background

Auditing Standard No. 10 sets forth requirements for supervising the audit engagement, including supervising the work of engagement team members.

Auditing Standard No. 10 retains the basic requirements regarding supervision from AU sec. 311, with changes to align the requirements more closely with the other risk assessment standards. Auditing Standard No. 10 does not change the responsibilities for supervision from those in the supervision section of the reproposed standard on audit planning and supervision. However, the language in the standard has been revised in certain respects to describe more directly the supervisory responsibilities of the engagement partner and engagement team members who assist the engagement partner in supervision. As discussed later in this section, the Board has separate standards-setting projects regarding specialists and principal auditors, which will likely result in changes to the auditor's responsibilities regarding the auditor's use of specialists and use of other auditors, and, in turn, may result in changes to Auditing Standard No. 10.

B. Planning and Supervision

As discussed in section III.B., the original proposed standard and the reproposed standard included requirements for both audit planning and supervision, similar to AU sec. 311. Some commenters observed that audit planning and supervision should be covered in separate standards.

The Board agrees that audit planning and supervision of engagement team members are distinct activities that should be covered in separate standards. Accordingly, the Board has divided the requirements of the planning and supervision standard into separate standards. Dividing the requirements for planning and supervision into separate standards does not affect the auditor's responsibilities for planning the audit or supervising the work of engagement team members.

C. Objective

When the requirements for planning and supervision were divided into separate standards, the objective for supervision of the work of engagement team members was adapted from the elements of proper supervision in the reproposed standard. Auditing Standard No. 10 states, "The objective of the auditor is to supervise the audit engagement, including supervising the work of engagement team members so that the work is performed as directed and supports the conclusions reached." The revised objective does not alter the supervision responsibilities included in the original proposed standard or the reproposed standard.

D. Responsibilities of the Engagement Partner

AU sec. 311 stated, "The auditor with final responsibility for the audit may delegate portions of the planning and supervision of the audit to other firm personnel." Auditing Standard No. 10 uses the term "engagement partner" instead of "auditor with final responsibility for the audit."

Auditing Standard No. 10 states that the engagement partner is responsible for the engagement and its performance. Accordingly, the engagement partner is responsible for proper supervision of the work of engagement team members and for compliance with PCAOB standards, including standards regarding using the work of specialists,[19] other auditors,[20] internal auditors,[21] and others who are involved in testing controls.[22] As discussed previously, as the Board considers changes to the auditor's responsibilities regarding the auditor's use of specialists and use of other auditors, it also may consider changes to Auditing Standard No. 10.

Auditing Standard No. 10 allows the engagement partner to seek assistance from appropriate engagement team members in fulfilling his or her responsibilities pursuant to the standard. Engagement team members who assist the engagement partner in supervision should comply with the relevant requirements of Auditing Standard No. 10. The requirements in PCAOB standards for assignment of responsibilities to engagement team members also apply to assignments that involve assisting the engagement partner with his or her responsibilities pursuant to the standard.[23]

E. Supervision of the Work of Engagement Team Members

Previously adopted PCAOB standards use either the term "engagement team members" or the term "assistants." Auditing Standard No. 10 uses "engagement team members," which is consistent with the other risk assessment standards. The Board is amending other PCAOB standards to conform to this terminology.

Auditing Standard No. 10 describes the required supervisory activities that should be performed by the engagement partner and, as applicable, by other engagement team members with supervisory responsibilities.[24] Those activities include informing engagement team members of their responsibilities and information relevant to those responsibilities, directing engagement team members to bring significant accounting and auditing issues arising during the audit to the attention of the engagement partner or other engagement team members performing supervisory activities, and reviewing the work of engagement team members as described in the standard.

Auditing Standard No. 10 describes the factors that should be taken into account in determining the necessary extent of supervision, i.e., the extent of supervision necessary so that the work of engagement team members is performed as directed and appropriate conclusions are formed based on the results of their work.[25] Factors that affect the necessary extent of supervision include the risks of material misstatement, the nature of work assigned to the engagement team member, and the nature of the company, which includes the organizational structure of the company and its size and complexity. The extent of supervision of the work of an individual engagement team member increases or decreases, but cannot be eliminated, based on those factors. For example, the extent of supervision should be commensurate with the risks of material

---

[23] See, e.g. AU sec. 230.06 and paragraph 5 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

[24] Paragraph 5 of Auditing Standard No. 10.

[25] Paragraph 6 of Auditing Standard No. 10.

misstatement, which means, among other things, that the higher risk areas of the audit require more supervisory attention from the engagement partner.

One commenter suggested that the standard provide examples of "levels of supervision in relation to review," such as face-to-face review when reviewing higher risk areas. Auditing Standard No. 10 does not prescribe a particular method of review, so the engagement partner can determine the most effective way to comply with the requirements regarding the necessary nature of supervisory activities and necessary extent of supervision.

F. Persons with Specialized Skill or Knowledge and Other Auditors, Accounting Firms, and Individual Accountants

Auditing Standard No. 10 states that the engagement partner is responsible for, among other things, compliance with PCAOB standards regarding using of the work of specialists and refers to AU sec. 336. AU sec. 336 applies to situations in which the auditor engages a specialist in an area other than accounting or auditing and uses the work of that specialist as audit evidence.[26] Paragraphs 5–6 of Auditing Standard No. 10 describe the nature and extent of the supervisory activities necessary for proper supervision of a person with specialized skill or knowledge who participates in the audit and is either (a) employed by the auditor or (b) engaged by the auditor to provide services in a specialized area of accounting or auditing. AU sec. 336 has been amended to clarify when the auditor should look to the supervisory requirements in Auditing Standard No. 10 instead of AU sec. 336.

AU sec. 543 describes the principal auditor's[27] responsibilities for using the work and reports of other independent auditors who have audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments included in the financial statements presented. The principal auditor should look to the requirements in AU sec. 543[28] in those situations. For situations in which the auditor engages an accounting firm or individual accountants to participate in the audit engagement and AU sec. 543 does not apply,[29] the auditor should supervise them in accordance with the requirements of Auditing Standard No. 10. AU sec. 543 has been amended to emphasize those points.

It should be noted, however, that the Board has separate standards-setting projects regarding specialists and principal auditors, which will include comprehensive reviews of AU sec. 336 and AU sec. 543, respectively, in light of, among other things, observations from the Board's inspection activities. Those projects will likely result in changes to the auditor's responsibilities regarding the auditor's use of specialists and use of other auditors, and, in turn, may result in changes to Auditing Standard No. 10.

G. Differences of Opinion within an Engagement Team

The original proposed standard included a requirement, adapted from AU sec. 311.14, that the engagement partner and other engagement team members

---

[26] AU sec. 336 also applies to situations in which the auditor uses the work of a specialist engaged or employed by management. The discussion in this section of the release focuses on the auditor's use of specialists who are employed or engaged by the auditor.

[27] AU sec. 543 uses the term "principal auditor" to refer to the auditor who issues the audit report on the financial statements presented.

[28] For integrated audits, see also paragraphs C8–C11 of Auditing Standard No. 5.

[29] Examples of situations that are not covered by AU sec. 543 include loan staff arrangements.

should make themselves aware of the procedures to be followed when differences of opinion concerning accounting and auditing issues exist among the engagement team members. Since the intention of including this provision was to require adequate documentation of disagreements, this paragraph was removed from the reproposed standard, and the documentation requirements from the original proposed standard were incorporated into an amendment to Auditing Standard No. 3, *Audit Documentation.*[30] The documentation requirements regarding disagreements among members of the engagement team or with others consulted on the engagement about final conclusions reached on significant accounting or auditing matters include documenting the basis for the final resolution of those disagreements. If an engagement team member disagrees with the final conclusions reached, he or she should document that disagreement.

One commenter indicated concern that the requirement for the engagement partner and other engagement team members to be aware of how disagreements should be handled has been removed. The commenter indicated that disagreements are a sensitive area and that it is important that engagement team members are aware of how disagreements should be handled. In connection with the requirement to direct engagement team members to bring significant accounting and auditing issues to the attention of the engagement partner or other engagement team members performing supervisory activities, Auditing Standard No. 10 also states that each engagement team member has a responsibility to bring to the attention of appropriate persons, disagreements or concerns the engagement team member might have with respect to accounting and auditing issues that he or she believes are of significance to the financial statements or the auditor's report regardless of how those disagreements or concerns may have arisen.[31]

[31] Note to paragraph 5.b. of Auditing Standard No. 10.

V. Auditing Standard No. 11—Consideration of Materiality in Planning and Performing an Audit

A. Background

Auditing Standard No. 11 discusses the auditor's responsibilities for applying the concept of materiality, as described by the courts in interpreting the federal securities laws, in planning the audit and determining the scope of the audit procedures. The standard applies to integrated audits and audits of financial statements only.

B. Materiality in the Context of an Audit

Auditing Standard No. 11 discusses the concept of materiality that is applicable to audits performed in accordance with PCAOB standards, which is the articulation of materiality used by the courts in interpreting the federal securities laws.[32] The Supreme Court of the United States has held that a fact is material if there is "a substantial likelihood that the . . . fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."[33]

Some commenters questioned the use of the court's articulation in the reproposed standard and suggested that this articulation might be difficult for auditors to apply. Also, some commenters asked whether the use of this articulation of materiality, in contrast to the quotation from a FASB Concept Statement[34] used in AU sec. 312 was intended to result in a change in audit practice.

Although the discussion of materiality in the accounting literature might help auditors understand how accounting standards-setters view materiality in the context of preparation and presentation of financial statements, the concept of materiality that is relevant for audits to which PCAOB standards apply is the concept used by the courts in interpreting the federal securities laws. Because the auditor has a responsibility to plan and perform audit procedures to detect misstatements that, individually or in combination with other misstatements, would result in material misstatement of the financial statements, it is important for the auditor to plan and perform his or her audit procedures based on the applicable concept of materiality. Accordingly, Auditing Standard No. 11 uses the concept of materiality articulated by the courts.

Because the courts' articulation of the concept of materiality is not new, using that articulation in Auditing Standard No. 11 is not intended to result in changes in practice for most auditors. Auditing Standard No. 11 emphasizes that an auditor's consideration of materiality should reflect matters that would affect the judgment of a reasonable investor.

[34] Financial Accounting Standards Board Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information.* FASB Concepts Statements are not included in FASB's Codification of Accounting Standards.

C. Establishing a Materiality Level for the Financial Statements as a Whole

Auditing Standard No. 11 requires the auditor to establish an appropriate materiality level for the financial statements as a whole.[35] This materiality level should be established in light of the particular circumstances based on factors that could influence the judgment of a reasonable investor. The standard states that this requirement includes consideration of the company's earnings and other relevant factors. This statement is intended to emphasize that a company's net earnings are often an important factor in the total mix of information available to a reasonable investor, but Auditing Standard No. 11 does not require the use of earnings as the basis for the established materiality level in all cases. Other factors besides earnings might be more relevant depending on the particular circumstances, e.g., based on a company's industry or situations in which the company's earnings were near zero. Auditors are expected to consider the factors that would be relevant to the judgment of a reasonable investor.

D. Qualitative Considerations

The concept of materiality involves consideration of both quantitative and qualitative factors.[36] Under Auditing Standard No. 11, qualitative considerations can affect the auditor's establishment of materiality levels in the following ways:

- Establishing a materiality level for the financial statements as a whole that is appropriate in light of the particular circumstances. This involves matters such as consideration of the elements of the financial statements that are more important to a reasonable investor and the level of misstatements that would influence the judgment of a reasonable investor.
- Establishing lower levels of materiality for certain accounts or disclosures when, in light of the particular circumstances, there are certain accounts or disclosures for which there is a substantial likelihood that misstatements of lesser amounts than the materiality level established for the financial statements as a whole would influence the judgment of a reasonable investor. The requirement in the standard[37] is consistent with the principle of considering the judgment of a reasonable investor when establishing materiality levels because it recognizes that, in certain circumstances, misstatements in some accounts might have more significant consequences than in other accounts. The following are examples of such circumstances:
  - — Laws, regulations, or the applicable financial reporting framework affect investors' expectations about the measurement or disclosure of certain items, e.g., related party transactions and compensation of senior management.
  - — Significant attention has been focused on a particular aspect of a company's business that is separately disclosed in the financial statements, e.g., a recent business acquisition.

---

[35] Paragraph 6 of Auditing Standard No. 11.

[36] Paragraph 3 of Auditing Standard No. 11.

[37] Paragraph 7 of Auditing Standard No. 11.

— Certain disclosures are particularly important to investors in the industry in which the company operates.

Auditing Standard No. 11 does not allow the auditor to establish a materiality level for an account or disclosure at an amount that exceeds the materiality level for the financial statements as a whole.

The reproposed standard included a statement, adapted from AU sec. 312, that ordinarily it is not practical to design audit procedures to detect misstatements that are material based solely on qualitative factors.[38] One commenter suggested removing the word "ordinarily" from the statement because, in the commenter's view, it is not practical to design audit procedures to detect misstatements that are material based solely on qualitative factors. Auditing Standard No. 11 retains the statement as proposed. This statement reflects the principle that judgments about whether a particular misstatement is material involve consideration of the particular circumstances, including the nature of the misstatement and its effect on the financial statements. Also, if an auditor is aware of potential misstatements that would be material based on qualitative factors, he or she has a responsibility to design audit procedures to detect such misstatements.

E. Tolerable Misstatement

The reproposed standard required the auditor to determine tolerable misstatement for purposes of assessing risks of material misstatement and planning and performing audit procedures at the account or disclosure level.[39] Tolerable misstatement is a concept used in determining the scope of audit procedures. AU sec. 350, *Audit Sampling*, indicates that tolerable misstatement is the maximum amount of misstatement in an account or a class of transactions that may exist without causing the financial statements to be materially misstated.[40] Tolerable misstatement is required to be set at an amount less than the materiality level for the financial statements as a whole and for particular accounts or disclosures, if lower materiality levels were established for particular accounts or disclosures.

Some commenters suggested replacing the term "tolerable misstatement" in the reproposed standard with the term "performance materiality," which is the term used in the International Standards on Auditing ("ISAs").

The Board decided to retain the term "tolerable misstatement" in its standards. The concept of tolerable misstatement is already understood by auditors, and the Board is not seeking to change the concept as described in PCAOB standards. Because the term "performance materiality" uses the word "materiality," it could be misunderstood, e.g., by nonauditors, as having a meaning other than that intended in the standard. The concept of materiality that applies to financial statements of companies that are audited in accordance with PCAOB standards is rooted in case law and reflects a reasonable investor's perspective. In contrast, tolerable misstatement is a concept used in audit scoping decisions at the account level, considering potential uncorrected and undetected misstatement.

One commenter stated that the requirement to establish tolerable misstatement eliminated the need to establish a lower level of materiality for particular accounts or disclosures. However, the two concepts are designed for different

[38] AU sec. 312.20.

[39] Paragraphs 8–9 of Auditing Standard No. 11.

[40] AU sec. 350.18.

purposes. The requirement to establish a lower materiality level is intended to address the need for a lower threshold when, in light of the particular circumstances, misstatements of lesser amounts have a substantial likelihood of influencing the judgment of a reasonable investor. As mentioned previously, tolerable misstatement is a concept used in audit scoping decisions at the account level, considering potential uncorrected and undetected misstatement.

The reproposed standard also required the auditor to take into account the nature, cause (if known), and amount of misstatements that were accumulated in audits of financial statements of prior periods. One commenter suggested that the Board should clarify its intent regarding this requirement and provide additional guidance regarding its application. Tolerable misstatement is affected by the expected level of misstatement in the account or disclosure, and the nature, cause, and amount of misstatements from prior periods are relevant to developing expectations about the level of misstatement. Generally, as the expected level of misstatement increases, the amount of tolerable misstatement decreases.

F. Consideration of Materiality for Multi-location Engagements

The reproposed standard included requirements for establishing materiality levels in multi-location engagements. The reproposed standard stated that when the auditor plans to perform procedures at selected locations or business units, the auditor should establish the materiality level for the individual locations or business units at an amount that reduces to an appropriately low level the probability that the total of uncorrected and undetected misstatements would result in material misstatement of the consolidated financial statements. The reproposed standard also stated that the materiality level for the selected locations or business units generally should be lower than the materiality level for the consolidated financial statements. Those requirements were an application of the fundamental principles to audits of consolidated financial statements of companies with multiple locations or business units.

Some commenters suggested removing the word "generally" as it could be misinterpreted as permitting the use of the materiality level for the consolidated financial statements as a whole for planning and performing audit procedures at the individual location or business unit level. Other commenters questioned how the requirements would be applied when a principal auditor makes reference to the report of another auditor in the auditor's report on consolidated financial statements in accordance with AU sec. 543.

After considering the comments, the Board has made certain clarifying revisions to the requirements for multi-location engagements.[41] First, the language in the standard has been revised to use term "tolerable misstatement" for an individual location to more clearly distinguish that term from the materiality level for the financial statements as a whole. In addition, the requirements were revised to state that tolerable misstatement for a location or business unit should be less than the materiality level for the financial statements as a whole. The word "generally" was removed from the requirements to reduce the risk of misinterpretation of the provision. Also, the phrase "to be used in performing audit procedures" has been removed from the requirement to determine tolerable misstatement for the individual locations or business units to avoid a misinterpretation about the principal auditor's responsibilities for situations in which the principal auditor makes reference to the report of the other auditor in accordance with AU sec. 543. Auditing Standard No. 11 requires the

[41] Paragraph 10 of Auditing Standard No. 11.

principal auditor to determine tolerable misstatement for the location or business unit audited by the other auditor, but the principal auditor is not expected to impose that determination of tolerable misstatement on the other auditor. Rather, tolerable misstatement for the location or business unit audited by the other auditor would be relevant to certain requirements under AU sec. 543[42] and in determining an appropriate amount of tolerable misstatement for the remaining locations or business units included in the consolidated financial statements.

G. Reevaluating the Materiality Level and Tolerable Misstatement

The reproposed standard stated that the established materiality level and tolerable misstatement should be reevaluated if changes in the particular circumstances or additional information comes to the auditor's attention that are likely to influence the judgment of a reasonable investor. In addition, the reproposed standard provided examples of situations that would require such reevaluation, and additional examples were discussed in the release accompanying the reproposed standards.

Some commenters suggested that the examples in the release should be included in the reproposed standard. The examples in Auditing Standard No. 11 have been revised to clarify the types of situations that would require reevaluation of the established materiality level and tolerable misstatement.

The reevaluation required by Auditing Standard No. 11 is important because if that reevaluation results in a lower materiality level or levels and tolerable misstatement than the auditor's initial determination, the standard states that the auditor should (1) evaluate the effect, if any, of the lower amount or amounts on his or her risk assessments and audit procedures and (2) modify the nature, timing, and extent of audit procedures as necessary to obtain sufficient appropriate audit evidence.[43]

Auditing Standard No. 11 does not allow the auditor to modify the established level or levels of materiality and tolerable misstatement solely because they are approximately equal to or are exceeded by the amount of uncorrected misstatements. Such a practice is inconsistent with the requirement to reevaluate the established materiality level or levels or tolerable misstatement if changes in the particular circumstances or additional information come to the auditor's attention that are likely to affect the judgments of a reasonable investor. Rather, Auditing Standard No. 14 establishes requirements for evaluating uncorrected misstatements[44] and describes the auditor's responsibilities in situations in which uncorrected misstatements approach established materiality level or levels used in planning and performing an audit.[45]

---

[42] For example, AU sec. 543.10 states that the auditor should adopt measures to assure the coordination of the principal auditor's activities with those of the other auditor in order to achieve a proper review of matters affecting the consolidating or combining of accounts in the financial statements.

[43] Paragraph 12 of Auditing Standard No. 11.

[44] Paragraphs 17–23 of Auditing Standard No. 14.

[45] Paragraph 14.b. of Auditing Standard No. 14.

VI. Auditing Standard No. 12—Identifying and Assessing Risks of Material Misstatement

A. Background

Auditing Standard No. 12 describes the auditor's responsibilities for the process of identifying and assessing risks of material misstatement in an audit of financial statements only and in an integrated audit. This process includes (1) performing information-gathering procedures, known as risk assessment procedures, and (2) identifying and assessing the risks of material misstatement using information obtained from the risk assessment procedures.

As discussed in the release accompanying the reproposed standards, the requirements in this standard are intended to improve the auditor's risk assessments and ability to focus on areas of increased risk in audits of financial statements only and in integrated audits. The effectiveness of a risk-based audit depends on whether the auditor identifies the risks of material misstatement and has an appropriate basis for assessing those risks. Inappropriate identification or assessment of risks of material misstatements can lead to overlooking relevant risks to the financial statements, e.g., business conditions that affect asset quality or create pressures to manipulate the financial statements, or assessing risks too low without having an appropriate basis for the assessment. In turn, these situations can lead to misdirected or inadequate audit work.

Auditing Standard No. 12 employs a top-down approach to risk assessment. Such an approach begins at the financial statement level and with the auditor's overall understanding of the company and its environment and works down to the significant accounts and disclosures and their relevant assertions. Also, the requirements for performing risk assessment procedures are designed to be scalable to companies of varying size and complexity.

In an integrated audit, the risks of material misstatement affect both the audit of financial statements and the audit of internal control, so the risk assessment process described in Auditing Standard No. 12 is for a single process that applies to both the audit of financial statements and the audit of internal control. Auditing Standard No. 12 seeks to enhance the integration of the audit of financial statements with the audit of internal control by aligning these risk assessment standards with Auditing Standard No. 5. Accordingly, Auditing Standard No. 12 reflects certain foundational risk assessment principles from Auditing Standard No. 5 that also apply to audits of financial statements. On the other hand, the provisions of this standard also are designed to be tailored for audits of financial statements only, e.g., the requirements relating to the understanding of internal control over financial reporting.

B. Objective

Some commenters recommended that the Board revise the objective in the reproposed standard to indicate that the auditor's identification and assessment of risks are through understanding of the company and its environment. The objective in Auditing Standard No. 12 was retained from the reproposed standard. The revision suggested by the commenters is too narrow because Auditing Standard No. 12 requires other risk assessment procedures beyond obtaining an understanding of the company and its environment.

C. Performing Risk Assessment Procedures

The overarching requirement for risk assessment procedures in Auditing Standard No. 12 is that the auditor should perform risk assessment procedures that are sufficient to provide a reasonable basis for the identification and assessment of the risks of material misstatement, whether due to error or fraud, and to design further audit procedures.[46] Auditing Standard No. 12 discusses the auditor's responsibilities for determining and performing the risk assessment procedures necessary to satisfy that overarching requirement.[47]

Risks of material misstatement may exist at the financial statement level or at the assertion level. Risks of material misstatement also can arise from a variety of sources, including external factors, such as conditions in the company's industry and environment, and company-specific factors, such as the nature of the company, its activities, and internal control over financial reporting. Since the risks of material misstatement come from various sources, the auditor's risk assessment procedures need to encompass both external factors and company-specific factors. Auditing Standard No. 12 requires the following risk assessment procedures:

- Obtaining an understanding of the company and its environment;[48]
- Obtaining an understanding of the company's internal control over financial reporting;[49]
- Considering information from the client acceptance and retention evaluation, audit planning activities, past audits, and other engagements performed for the company;[50]
- Performing analytical procedures;[51]
- Conducting a discussion among engagement team members regarding the risks of material misstatement;[52] and
- Inquiring of the audit committee, management, and others within the company about the risks of material misstatement.[53]

The reproposed standard required the auditor to perform risk assessment procedures that are designed to help the auditor identify the areas of greater risk, appropriately assess those risks, and design and perform further audit procedures to address risks of material misstatements in the financial statements, whether due to error or fraud. One commenter suggested adding the phrase "and to design further audit procedures focused on the areas of greatest risk" to the end of the sentence in paragraph 4. The suggested language is not included in Auditing Standard No. 12 because that principle is already addressed in Auditing Standard No. 13.

---

[46] Paragraph 4 of Auditing Standard No. 12. The phrase "design further audit procedures" applies to substantive procedures and to tests of controls in the audit of financial statements and the audit of internal control over financial reporting.

[48] Paragraphs 7–17 of Auditing Standard No. 12.

[49] Paragraphs 18–40 of Auditing Standard No. 12.

[50] Paragraphs 41–45 of Auditing Standard No. 12.

[51] Paragraphs 46–48 of Auditing Standard No. 12.

[52] Paragraphs 49–53 of Auditing Standard No. 12.

[53] Paragraphs 54–58 of Auditing Standard No. 12.

One commenter on the reproposed standard asked for more discussion of the connection between the components of audit risk and the risk assessment process. That discussion has been added to Auditing Standard No. 8.[54]

D. Obtaining an Understanding of the Company and its Environment

Like the reproposed standard, Auditing Standard No. 12 requires the auditor to obtain an understanding of the company and its environment to understand the events, conditions, and company activities that might reasonably be expected to have a significant effect on the risks of material misstatement ("obtaining an understanding of the company").[55] These requirements are an expansion of requirements that were in AU sec. 311 regarding obtaining knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics as part of audit planning.[56] The expanded requirements are intended to focus the auditor on the degree of "knowledge of the company" that is necessary for a risk-based audit and to explain how knowledge of the company informs the auditor's identification and assessment of risk.

Auditing Standard No. 12 requires that the understanding of the company and its environment include understanding the following:

- Relevant industry, regulatory, and other external factors;
- The nature of the company;
- The company's selection and application of accounting principles, including related disclosures;
- The company's objectives and strategies and those related business risks that might reasonably be expected to result in risks of material misstatement; and
- The company's measurement and analysis of its financial performance.[57]

Auditing Standard No. 12 requires the auditor to evaluate whether significant changes in the company from prior periods, including changes in its internal control over financial reporting, affect the risks of material misstatement.[58] This requirement builds on the requirement in paragraph 7 of Auditing Standard No. 9 to evaluate whether, among other things, the extent of recent changes, if any, in the company, its operations, or its internal control over financial reporting is important to the company's financial statements and internal control over financial reporting and, if so, how those changes will affect the auditor's procedures. PCAOB standards have recognized that many risks of material misstatement arise due to changes in the company. For example, AU sec. 319 listed the following examples of circumstances that can result in risks or changes to existing risks: changes in operating environment; new personnel; new or revamped information systems; rapid growth; new technology; new business models, products, or activities; corporate restructurings; expanded foreign operations; and new accounting pronouncements.[59]

---

[54] Paragraphs 8–11 of Auditing Standard No. 8.

[55] Paragraph 7 of Auditing Standard No. 12.

[56] AU secs. 311.06–.09.

[57] Paragraph 7 of Auditing Standard No. 12.

[58] Paragraph 8 of Auditing Standard No. 12.

[59] AU sec. 319.38.

Paragraphs 9–17 of Auditing Standard No. 12 explain more fully the necessary understanding of the preceding aspects of the company and its environment, e.g., what it means to obtain an understanding of the nature of the company. The discussion of relevant industry, regulatory, and other external factors is adapted from AU sec. 311. The discussion of the nature of the company is also adapted from AU sec. 311 and has been updated to reflect certain changes in business practices since AU sec. 311 was originally issued (e.g., to encompass alternative investments and financing arrangements and to recognize the development of new business models).

One commenter said that the requirement to obtain an understanding of the company and its environment should be revised because none of the aspects of the company and its environment listed in paragraph 7 is an event, condition, or company activity. However, the understanding of those aspects should lead the auditor to obtain an understanding of relevant events, conditions, and company activities. For example, obtaining an understanding of relevant industry, regulatory, and external factors helps an auditor understand the external conditions in which the company operates that represent risks of material misstatement at the financial statement level.

The reproposed standard contained a note about how the size and complexity of the company can affect the risks of misstatement and the controls necessary to address those risks. This note was intended to be a reminder to auditors that both size and complexity affect risks. One commenter stated that complexity rather than size is likely to heighten risk. Auditing Standard No. 12 retains the note as reproposed.[60] The size and complexity of the company can affect the risks of misstatement and the controls necessary to address those risks. Scaling the audit is most effective as a natural extension of the risk-based approach and applies to all audits, and the requirements in Auditing Standard No. 12 are intended to be scalable to companies of varying size and complexity. Auditing Standard No. 12 contains certain notes regarding scaling the audit based on a company's size and complexity.

1. Additional Procedures to Obtain an Understanding of the Company and its Environment

The reproposed standard presented a list of procedures that the auditor should consider performing as part of obtaining an understanding of the company and its environment. These procedures include reading public information about the company, observing or reading transcripts of earnings calls, obtaining an understanding of compensation arrangements with senior management, and obtaining information about significant unusual developments regarding trading activity in the company's securities. The auditor's decisions about whether to perform one or more of the additional procedures and the extent of those procedures depend on whether the matters addressed in those procedures are important to the company's internal control or financial statements and whether such procedures are necessary to meet the overall requirements for obtaining an understanding of the company and performing risk assessment procedures.

Members of the Board's Standing Advisory Group ("SAG") suggested that these matters could provide valuable information for identifying risks of material misstatement, e.g., to obtain information about business risks relevant to financial reporting or to identify incentives or pressures on management to manipulate financial results.[61] Also, the Public Oversight Board, *Panel on Audit*

[60] First note to paragraph 10 of Auditing Standard No. 12.

[61] February 16, 2005. Webcasts of SAG meetings are available on the Board's website at: http://www.pcaobus.org/News_and_Events/Webcasts.

Effectiveness, Report and Recommendations ("*PAE Report*"), recommended that auditors consider published analysts' reports and forecasts when gaining an understanding of the company's business and industry, assessing risks, and evaluating identified misstatements.[62]

Commenters requested clarification of the Board's expectations regarding these procedures and expressed concern that the broad language used to describe some of the procedures might lead auditors to expend considerable efforts to decide and document whether to perform certain procedures. This requirement is not intended to require auditors to make a specific determination about each bit of data to which a procedure might be applied, e.g., to document each individual item of publicly available information to decide whether it should be reviewed.

Instead, the intention is for auditors to consider whether and to what extent such procedures should be performed to achieve the objectives in paragraphs 4 and 7 of Auditing Standard No. 12. For example, observing the company's earnings calls and other meetings with investors are likely to provide important information about the measurement and review of the company's financial performance, particularly the performance measures monitored by investors and analysts. Likewise, an understanding of compensation arrangements with senior management often can provide important information about incentives or pressures on management to manipulate the financial statements.

Auditing Standard No. 12 was revised to clarify that considering whether to perform the procedures listed in paragraph 11 also includes consideration of the extent of the procedures.

2. Selection and Application of Accounting Principles, Including Related Disclosures

PCAOB standards require auditors to obtain an understanding of the accounting practices common to the industry and to evaluate the quality of a company's accounting principles as part of his or her response to fraud risks and in determining matters to be communicated to the audit committee.[63] Auditing Standard No. 12 imposes a responsibility to obtain an understanding of the applicable financial reporting framework and to evaluate whether the company's selection and application of accounting principles are consistent with the applicable accounting framework and the accounting principles used in the relevant industry.[64] Such procedures can provide important information for identifying relevant matters such as (1) accounts that are susceptible to misstatement, e.g., if an account balance is determined using accounting principles that are inconsistent with the applicable financial reporting framework or (2) more general conditions that affect risks of material misstatement, e.g., if the company's selection or application of accounting principles is more aggressive than prevailing practices in the relevant industry.

In connection with obtaining an understanding of the applicable financial reporting framework and evaluating the company's selection and application of accounting principles, including related disclosures, Auditing Standard No. 12 requires the auditor to develop expectations about the disclosures that are necessary for the company's financial statements to be presented fairly in conformity with the applicable financial reporting framework.[65] The language in this

---

[63] See AU sec. 316 and AU sec. 380, *Communication With Audit Committees*.

[64] Paragraph 12 of Auditing Standard No. 12.

[65] Ibid.

requirement was revised to clarify that the auditor should develop an expectation about the disclosures as part of the risk assessment procedures and that the expectations should be based on the disclosures necessary for the fair presentation of the financial statements in conformity with the applicable financial reporting framework.

Auditing Standard No. 12 also presents a list of matters that, if present, are relevant to the necessary understanding of the company's selection and application of accounting principles.[66] The amount of auditor attention devoted to an individual matter would depend on its importance in meeting the overall requirements for obtaining an understanding of the company and performing risk assessment procedures.[67]

3. Company Objectives, Strategies, and Related Business Risks

The reproposed standard required the auditor to obtain an understanding of the company's objectives, strategies, and related business risks in order to identify those business risks that could reasonably be expected to result in material misstatement of the financial statements. The *PAE Report* recommended that auditors be required to obtain an understanding of the company's business risks.[68]

Commenters on the reproposed standard requested additional discussion about business risks, including going concern risks, fraud risks, and how business risks can result in misstatements of the financial statements. Additional discussion has been added to Auditing Standard No. 8 and Auditing Standard No. 12.[69]

Auditing Standard No. 12 discusses how business risks can lead to misstatements and provides examples of business risks that may result in a risk of material misstatement of the financial statements.[70] However, the list of examples is meant to be illustrative rather than a checklist of factors to consider. Auditors would need to consider the business risks that are relevant to the particular company and industry. For example, in today's economic environment, business risks might include financing risks (e.g., access to necessary financing) or product risks (e.g., investments in certain financial products).

4. The Company's Measurement and Analysis of its Financial Performance

The risk assessment procedures in the reproposed standard included obtaining an understanding of the company's performance measures. The purpose of obtaining that understanding is to identify those performance measures, whether external or internal, that affect the risks of material misstatement. For example, understanding performance measures can help the auditor identify accounts or disclosures that might be susceptible to manipulation to achieve certain performance targets (or to conceal failures to achieve those targets) or to understand how management uses performance measures to monitor risks affecting the financial statements.

Commenters requested clarification regarding the examples of performance measures. A note was added to Auditing Standard No. 12 to explain the significance of the individual examples.[71]

E. Obtaining an Understanding of Internal Control Over Financial Reporting

Auditing Standard No. 12 describes the auditor's responsibilities for obtaining an understanding of internal control over financial reporting ("understanding of internal control"). Auditing Standard No. 12 requires the auditor to obtain a sufficient understanding of each component of internal control over financial reporting to (a) identify the types of potential misstatements, (b) assess the factors that affect the risks of material misstatement, and (c) design further audit procedures.[72] These requirements are, in substance, equivalent to those in AU sec. 319, but the formulation in the proposed standard is aligned more clearly with Auditing Standard No. 5. Like the requirements in AU sec. 319, the requirements in Auditing Standard No. 12 indicate that although the auditor's primary focus is on internal control over financial reporting, the auditor may obtain an understanding of controls related to operations or compliance objectives if they pertain to data that the auditor plans to use in applying auditing procedures.[73]

Auditing Standard No. 12 sets forth certain principles regarding the sufficiency of the auditor's understanding of internal control. The size and complexity of the company; the auditor's existing knowledge of the company's internal control; the nature of the company's internal controls, including the company's use of IT; the nature and extent of changes in systems and operations; and the nature of the company's documentation of its internal control over financial reporting affect the nature, timing, and extent of procedures necessary to obtain an understanding of internal control. For example, the auditor's procedures to obtain an understanding of internal control would be more extensive when the auditor plans to test controls more extensively (e.g., in an integrated audit), the company's internal control is more complex, or the company's controls have changed significantly.

The reproposed standard stated that the auditor's understanding of internal control includes evaluating the design of controls and determining whether the controls are implemented. Commenters observed that the reproposed standard stated that walkthroughs that include the necessary procedures ordinarily are sufficient to evaluate design effectiveness, but the reproposed standard did not make a similar statement about the use of walkthroughs to determine whether controls have been implemented. Auditing Standard No. 12 has been revised to include a statement that walkthroughs that include the procedures described in the standard ordinarily are sufficient to determine whether a control has been implemented.[74] Under Auditing Standard No. 12, as under AU sec. 319,[75] the amount of audit attention devoted to design and operating effectiveness will vary based on the auditor's plan for testing controls. For example, if the auditor plans to test controls, more attention should be devoted to controls that the auditor plans to test.

1. Obtaining an Understanding of Individual Components of Internal Control Over Financial Reporting

To describe the auditor's responsibilities for obtaining an understanding of internal control, it was necessary to describe the components of internal control over financial reporting. The components described in Auditing Standard No. 12

---

[72] Paragraph 18 of Auditing Standard No. 12.

[73] Paragraph 19 of Auditing Standard No. 12.

[74] Paragraph 20 of Auditing Standard No. 12.

[75] AU sec. 319.58.

are similar to those in AU sec. 319.[76] Auditing Standard No. 12 also states that auditors may use other suitable, recognized frameworks[77] in accordance with the provisions of the standard. If the auditor uses a suitable, recognized internal control framework with components that differ from those in the standard, the auditor should adapt the requirements in the standard for the components in the framework used.[78]

2. Control Environment

Auditing Standard No. 12 requires the auditor to assess the following matters as part of obtaining an understanding of the control environment:

- Whether management's philosophy and operating style promote effective internal control over financial reporting;
- Whether sound integrity and ethical values, particularly of top management, are developed and understood; and
- Whether the board or audit committee understands and exercises oversight responsibility over financial reporting and internal control.[79]

Although this requirement is aligned with a similar requirement in Auditing Standard No. 5 for evaluating the control environment, the auditor's process for assessing the control environment in an audit of financial statements only is not expected to be the same as that required when expressing an opinion on internal control over financial reporting. For audits of financial statements only, Auditing Standard No. 12 allows the auditor to base his or her assessment on evidence obtained as part of obtaining an understanding of the control environment and other relevant knowledge possessed by the auditor.[80]

Because of the importance of an effective control environment to address fraud risks, Auditing Standard No. 12 states that if the auditor identifies a control deficiency in the company's control environment, the auditor should evaluate the extent to which this control deficiency is indicative of a fraud risk factor.[81]

3. The Company's Risk Assessment Process

Auditing Standard No. 12 requires the auditor to obtain an understanding of management's risk assessment process for (a) identifying risks relevant to financial reporting objectives, including risks of material misstatement due to fraud, (b) assessing the likelihood and significance of misstatements resulting from those risks, and (c) deciding about actions to address those risks.[82] The standard also requires the auditor to obtain an understanding of the risks of material misstatement identified and assessed by management and the actions taken to address those risks.[83] Compliance with these requirements will help make sure that the auditor's risk assessments are appropriately informed by management's risk assessments and the controls that management put in place to address the risks.

[80] Ibid.

[81] Paragraph 25 of Auditing Standard No. 12.

[82] Paragraph 26 of Auditing Standard No. 12.

[83] Paragraph 27 of Auditing Standard No. 12.

4. Information and Communication

The reproposed standard required the auditor to obtain an understanding of the information system, including the related business processes, relevant to financial reporting. One commenter suggested removing the requirement to understand the company's business processes. The requirement was retained as reproposed.[84] Obtaining an understanding of the company's business processes assists the auditor in obtaining an understanding of how transactions are initiated, authorized, processed, and recorded. Also, the requirement to understand business processes is a recommendation in the *PAE Report*.[85] Auditing Standard No. 12 describes the necessary understanding of business processes to help auditors identify those business processes that are relevant to financial reporting.[86]

Auditing Standard No. 12 also contains requirements for understanding the period-end financial reporting process[87] and describes important elements of that process.[88] Because the period-end financial reporting process is a common source of potential misstatements, it is important for the auditor to have an adequate understanding of the aspects of the period-end financial reporting process in all audits, including audits of financial statements only. Auditing Standard No. 12 requires the auditor only to obtain an understanding[89] of the process, as compared to Auditing Standard No. 5, which requires the auditor also to evaluate that process in the audit of internal control.

To appropriately highlight the importance of IT risks in determining the scope of the audit, the standard requires the auditor to obtain an understanding of how IT affects the company's flow of transactions. The standard also contains a note that states that the identification of risks and controls within IT is not a separate evaluation. Instead, it is an integral part of the approach used to identify significant accounts and disclosures and their relevant assertions and, when applicable, to select the controls to test, as well as to assess risk and allocate audit effort.

Regarding the auditor's understanding of communication, one commenter suggested that the standard clarify that the auditor should understand how the company communicates financial reporting roles and responsibilities and significant matters relating to financial reporting. The requirement in Auditing Standard No. 12 has been revised to clarify that point.[90]

5. Control Activities

The reproposed standard required the auditor to obtain an understanding of control activities that is sufficient to assess the factors that affect the risks of material misstatement and to design further audit procedures. As under AU sec. 319, a more extensive understanding of control activities is needed in areas in which the auditor plans to test controls. Thus, for purposes of evaluating the effectiveness of internal control over financial reporting in an integrated audit, the auditor's understanding of control activities encompasses a broader range

---

[84] Paragraph 28 of Auditing Standard No. 12.

[85] *PAE Report,* p. 15.

[86] Paragraphs 28–32 of Auditing Standard No. 12.

[87] AU sec. 319.49 used the term "financial reporting process used to prepare the entity's financial statements," but Auditing Standard No. 12 uses the same term as used in Auditing Standard No. 5.

[88] Paragraphs 28 and 32 of Auditing Standard No. 12.

[89] Paragraph 20 of Auditing Standard No. 12 discusses procedures that the auditor performs to obtain an understanding of internal control.

[90] Paragraph 33 of Auditing Standard No. 12.

of accounts and disclosures than that which is normally obtained in an audit of financial statements only.

Some commenters expressed concern that the language in the requirement could be misinterpreted as requiring the auditor to obtain an understanding of all controls, even in an audit of financial statements only in which the auditor does not plan to test controls. A few commenters suggested framing the requirement in terms of understanding control activities relevant to the audit.

The Board did not intend to expand the auditor's responsibilities for obtaining an understanding of control activities beyond what is required in AU sec. 319. The discussion in Auditing Standard No. 12 on obtaining an understanding of control activities has been revised, primarily using language adapted from AU sec. 319, to clarify that the substance of the requirement has not changed.[91]

6. Performing Walkthroughs

The original proposed standard referred auditors to Auditing Standard No. 5 for a discussion of the performance of walkthroughs. Some commenters on the original proposed standard stated that the standard should include a discussion of walkthroughs rather than referring to Auditing Standard No. 5. The reproposed standard included a discussion of performing walkthroughs as part of meeting certain specified objectives, which paralleled a requirement in Auditing Standard No. 5[92] regarding understanding likely sources of potential misstatements. Some commenters expressed concerns that the discussion would lead to unnecessary walkthroughs, particularly in audits of financial statements only.

The intention of including the discussion of walkthroughs was to explain how to perform walkthroughs rather than to impose requirements regarding when walkthroughs should be performed. The standard has been revised to focus on how the auditor should perform walkthroughs, e.g., in connection with understanding the flow of transactions in the information system relevant to financial reporting, evaluating the design of controls relevant to the audit, and determining whether those controls have been implemented.[93] The discussion of the objectives for understanding likely sources of potential misstatements has been removed from Auditing Standard No. 12, so those objectives would continue to apply only to integrated audits.

7. Relationship of Understanding of Internal Control to Tests of Controls

Auditing Standard No. 12, like the reproposed standard, contains a discussion about the relationship between obtaining an understanding of controls and testing controls, including entity-level controls.[94] The requirements in Auditing Standard No. 12 clarify that the objective of obtaining an understanding of internal control as a risk assessment procedure is different from testing controls for the purpose of assessing control risk[95] or for the purpose of expressing an opinion on internal control over financial reporting in the audit of internal control.[96] The standard allows the auditor the flexibility of obtaining an understanding of internal control concurrently with performing tests of controls if he or she obtains sufficient appropriate evidence to achieve the objectives of both procedures.[97]

[96] Paragraph B1 of Auditing Standard No. 5.

[97] Paragraph 39 of Auditing Standard No. 12.

F. Information Obtained from Past Audits and Other Engagements

1. Information from Past Audits

The reproposed standard included a requirement for the auditor to incorporate knowledge obtained during past audits into the auditor's process for identifying risks of material misstatement. One commenter asked for clarification of the meaning of the term "incorporate." Two commenters stated that the most important issue is to determine whether information from past audits is still relevant.

The term "incorporate" is not new and should be familiar to most auditors. For example, it has been used in AU sec. 316 regarding the requirement to incorporate an element of unpredictability in the audit in response to fraud risks. The requirement in the reproposed standard was similar to a requirement in Auditing Standard No. 5 to incorporate knowledge obtained during past audits in subsequent year audits of internal control.[98] Accordingly the term has been retained in Auditing Standard No. 12.

Auditing Standard No. 12 also states that if the auditor plans to limit the nature, timing, or extent of his or her risk assessment procedures by relying on information from past audits, the auditor should evaluate whether the prior-years' information remains relevant and reliable.[99]

2. Information from Other Engagements

The reproposed standard included a requirement for the auditor to take into account relevant information obtained through other engagements performed by the auditor for the company[100] This requirement was intended to focus on the responsibility to take relevant information into account in identifying and assessing risks rather than to prescribe a particular method for obtaining that information.

Some commenters suggested that the requirement should be limited to consideration of other engagements performed by the engagement partner. The suggested change would weaken the standard. Limiting the consideration of information to engagements performed for the company by the engagement partner is too narrow because it omits other important information sources that are available to the engagement team. Also, limiting the consideration to engagements performed by the engagement partner is inconsistent with prior PCAOB standards. For example, AU sec. 311.04 stated that procedures the auditor may consider in planning an audit usually involve discussions with other firm personnel, and includes the following example "Discussing matters that may affect the audit with firm personnel responsible for non-audit services to the entity." Also, paragraph 03 of AU sec. 9311, *Planning and Supervision: Auditing Interpretations of Section 311*, stated:

> The auditor should consider the nature of non-audit services that have been performed. He should assess whether the services involve matters that might be expected to affect the entity's financial statements or the performance of the audit, for example, tax planning or recommendations on a cost accounting

---

[98] Paragraph 57 of Auditing Standard No. 5.

[99] Paragraph 43 of Auditing Standard No. 12.

[100] PCAOB Rule 1001, *Definitions of Terms Employed in Rules,* states that, when used in rules of the PCAOB, unless the context otherwise requires, "[t]he term 'auditor' means both public accounting firms registered with the Public Company Accounting Oversight Board and associated persons thereof."

> system. If the auditor decides that the performance of the non-audit services or the information likely to have been gained from it may have implications for his audit, he should discuss the matter with personnel who rendered the services and consider how the expected conduct and scope of his audit may be affected. In some cases, the auditor may find it useful to review the pertinent portions of the work papers prepared for the non-audit engagement as an aid in determining the nature of the services rendered or the possible audit implications.

Other commenters suggested that the requirement be revised to use more of the language from AU sec. 9311. The requirement in Auditing Standard No. 12[101] has been revised as follows:

> The auditor should obtain an understanding of the nature of the services that have been performed for the company by the auditor or affiliates of the firm[102] and should take into account relevant information obtained from those engagements in identifying risks of material misstatement.[103]

One commenter stated that audit firms will need to develop very costly reporting systems to enable them to convey relevant information about nonassurance engagements to audit engagement teams. Existing PCAOB and SEC rules already require firms to track and report nonaudit services provided to the company. Complying with these requirements would mean that the audit firms have a mechanism in place to track these services. For example, PCAOB Rules 3524[104] and 3526[105] require the auditor to describe to the company's audit committee, among other things, the scope of and the potential effect on independence of other services provided by the firm. It is expected that the system used to capture, track, and monitor these services for compliance with these PCAOB independence rules would also be applicable to comply with the requirements of Auditing Standard No. 12.

G. Performing Analytical Procedures

The reproposed standard retained requirements from AU sec. 329, *Analytical Procedures*, to perform analytical procedures during the planning phase of the audit.[106] Such analytical procedures are, in essence, risk assessment procedures, so the respective requirements and direction have been incorporated into Auditing Standard No. 12.[107] One commenter stated that it is unclear whether the PCAOB intends a change in practice regarding the execution of analytical procedures performed as risk assessment procedures, e.g., because the requirements in the reproposed standard discussed developing expectations and comparing them to recorded amounts. AU sec. 329, states that analytical procedures involve developing expectations and comparing those expectations to recorded amounts.[108]

Auditing Standard No. 12 states that analytical procedures performed as risk assessment procedures often use data that is preliminary or data that is aggregated at a high level and that in those instances such analytical procedures

---

are not designed with the level of precision necessary for substantive analytical procedures.[109] In those situations, the auditor's expectations in performing analytical procedures as risk assessment procedures do not require the same degree of precision as substantive analytical procedures.

H. Conducting a Discussion among Engagement Team Members Regarding Risks of Material Misstatement

Like the reproposed standard, Auditing Standard No. 12 includes a requirement that key engagement team members discuss (1) the company's selection and application of accounting principles, including related disclosure requirements and (2) the susceptibility of the company's financial statements to material misstatement due to error or fraud.[110] The standard explains that key engagement team members include the engagement partner and all engagement team members who have significant engagement responsibilities.[111] The term "significant engagement responsibilities" should be familiar to auditors because it is already used in AU sec. 316 regarding the appropriate assignment of engagement team members in the overall responses to fraud risks.

One commenter stated that the requirement for participation in the discussion among engagement team members on the reproposed standard should be revised to use the language in ISA 315, *Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and its Environment*, so that the engagement partner makes the determination of what needs to be reported to whom on a "need to know" basis.

The language in Auditing Standard No. 12 was retained as reproposed. The Board believes that the discussion among engagement team members is an important part of the auditor's risk assessment procedures. Through its oversight activities, the Board has observed deficiencies relating to discussions among engagement team members regarding fraud risks, including instances in which key engagement team members did not participate.[112]

1. Discussion of the Potential for Material Misstatement Due to Fraud

A number of comments were received regarding the requirements for discussing the risks of material misstatement due to fraud.

One commenter suggested that the standard should require the auditor to consider using a fraud specialist. The Board believes that this point is already covered by the requirement in Auditing Standard No. 9 to evaluate whether a person with specialized skill or knowledge is needed to assess risks.[113]

One commenter suggested that the requirement to discuss how the financial statements could be materially misstated through omitting or presenting incomplete disclosures also should include the possibility of presenting inaccurate disclosures. The requirement has been revised to include that topic.[114] Another commenter stated that the standard should provide more "guidance" about how fraud risks relate to disclosures. The manner in which management might intentionally omit disclosures or present inaccurate or incomplete disclosures to

---

[110] Paragraph 49 of Auditing Standard No. 12.

[111] Paragraph 50 of Auditing Standard No. 12.

[112] PCAOB Release 2007-001, *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities with Respect to Fraud* (January 22, 2007).

[113] Paragraphs 16–17 of Auditing Standard No. 12.

[114] Paragraph 52 of Auditing Standard No. 12.

commit or conceal intentional misstatement of the financial statements necessarily depends on the circumstances, including the incentives or pressures and the opportunities to manipulate the financial statements. The discussion of fraud risks required by the standard should prompt engagement team members to consider ways in which omissions or inaccuracies in disclosures might be involved with fraudulent financial reporting.

Another commenter stated that the requirement for the auditor to emphasize certain matters regarding fraud to the engagement team members during the fraud risk discussion does not assign the responsibility to a specific person. The requirement focuses on the communication of important matters rather than on the person communicating the matters. Since the engagement partner has the overall responsibility for the audit engagement, the engagement partner is likely to be the most appropriate person to make the communications. However, Auditing Standard No. 12 allows the communications to be made by another engagement team member, when appropriate.

2. Communication Among Engagement Team Members

Auditing Standard No. 12 states that communication among the engagement team members about significant matters affecting the risks of material misstatement should continue throughout the audit, including when conditions change. This requirement carries forward and builds upon a requirement in AU sec. 316.[115]

I. Inquiring of the Audit Committee, Management, and Others within the Company about the Risks of Material Misstatement

Like the reproposed standard, Auditing Standard No. 12 requires the auditor to make inquiries of the audit committee, or equivalent (or its chair), management, the internal audit function, and others within the company who might reasonably be expected to have information that is important to the identification and assessment of risks of material misstatement.[116] The requirement to inquire of others who "might reasonably be expected to have information" is similar to a requirement in AU sec. 316 for making inquiries of others about the existence or suspicion of fraud, and it establishes a principle to guide the auditor in determining those other persons to whom the inquiries should be addressed.[117]

1. Inquiries Regarding Fraud Risks

The reproposed standard also required the auditor to make inquiries of the audit committee (or its chair), management, the internal audit function, and others within the company about the risks of fraud. Commenters suggested that the requirements for identifying other individuals within the company to whom inquiries should be directed should include determining the extent of such inquiries. Auditing Standard No. 12 reflects the suggested revision to that requirement because inquiries of other individuals should be designed to obtain information relevant to identifying and assessing fraud risks.[118]

The reproposed standard included a requirement to take into account the fact that management is often in the best position to commit fraud when evaluating

---

[115] AU sec. 316.18.

[116] Paragraph 54 of Auditing Standard No. 12.

[117] AU sec. 316.24.

[118] Paragraph 57 of Auditing Standard No. 12.

management's responses to inquiries about fraud risks and determining when it is necessary to corroborate management's responses. One commenter stated that the requirement was unclear and the use of the term "take into account" did not seem consistent with the Board's explanation in the release accompanying the reproposed standards. This requirement has been revised to clarify the requirement and to use "take into account" in a manner that is consistent with the other PCAOB standards.[119]

Auditing Standard No. 12 requires that the auditor use his or her knowledge of the company and its environment, as well as information from other risk assessment procedures, to determine the nature of the inquiries about risks of material misstatement. This requirement carries forward and builds upon a requirement in AU sec. 316.[120]

Auditing Standard No. 12 includes an additional required inquiry of the internal auditor about whether he or she is aware of instances of management override of controls and the nature and circumstances of such overrides. Also, Auditing Standard No. 12 requires the auditor to make inquiries of management and the audit committee, or equivalent regarding tips or complaints about the company's financial reporting.[121] These required inquiries were added in light of research indicating that many incidents of fraud are uncovered through tips.[122] These inquiries can provide important evidence about fraud risks.

Auditing Standard No. 12 requires the auditor, when evaluating management's responses to inquiries about fraud risks and determining when it is necessary to corroborate management's responses, to take into account the fact that management is often in the best position to commit fraud. The standard also requires the auditor to obtain evidence to address inconsistencies in responses to inquiries. This requirement carries forward and builds upon a requirement in AU sec. 316.[123]

J. Identifying and Assessing the Risks of Material Misstatement

Auditing Standard No. 12 sets forth a process for identifying and assessing the risks of material misstatement using the information obtained from the risk assessment procedures and other relevant knowledge possessed by the auditor.[124] This process involves:

a. Identifying risks of misstatement using information obtained from risk assessment procedures and considering the characteristics of the accounts and disclosures in the financial statements.

b. Evaluating whether the identified risks relate pervasively to the financial statements as a whole and potentially affect many assertions.

---

[119] Paragraph 58 of Auditing Standard No. 12.

[120] AU sec. 316.24.

[121] Paragraph 56 of Auditing Standard No. 12.

[122] See, e.g., Association of Certified Fraud Examiners, *2008 Report to the Nation on Occupational Fraud & Abuse* (2008).

[123] AU sec. 316.27.

[124] Under Auditing Standard No. 12, the auditor has a responsibility to perform risk assessment procedures that provide an appropriate basis for his or her risk assessment. Auditing Standard No. 12 does not include the provision in the prior interim standards that allowed the auditor to assess risk at the maximum solely for efficiency reasons. Rather, the auditor needs to have a sufficient understanding of the company and its environment, including its internal control, in order to determine the risks of material misstatement and, in turn, to design effective tests of controls and substantive procedures.

c. Evaluating the types of potential misstatements that could result from the identified risks and the accounts, disclosures, and assertions that could be affected. This includes evaluating how risks at the financial statement level could affect risks at the assertion level.

d. Assessing the likelihood of misstatement, including the possibility of multiple misstatements, and the magnitude of potential misstatement to assess the possibility that the risk could result in material misstatement of the financial statements. In making this assessment, the auditor may take into account the planned degree of reliance on controls that the auditor plans to test, if the auditor performs tests of controls in accordance with PCAOB standards.

e. Identifying significant accounts and disclosures and their relevant assertions.

f. Determining whether any of the identified and assessed risks of material misstatement are significant risks.[125]

One commenter suggested that the word "material" should be inserted before the word "misstatement" in paragraph 56.a. of the reproposed standard. No change was made to Auditing Standard No. 12 because inserting the word "material" would inappropriately narrow the auditor's focus on only material risks too early in the process of identifying and assessing risks of misstatement, i.e., before assessing the likelihood and magnitude of potential misstatements related to the risks.

Commenters suggested that the standard should clarify that the likelihood and magnitude of potential misstatements should be considered in determining which risks are significant risks. Auditing Standard No. 12 includes an additional requirement that states, "To determine whether an identified and assessed risk is a significant risk, the auditor should evaluate whether the risk requires special audit consideration because of the nature of the risk or the likelihood and potential magnitude of misstatement related to the risk."[126] Also, the list of factors that should be evaluated in determining which risks are significant risks was expanded to include "the effect of the quantitative and qualitative risk factors discussed in paragraph 60 of the standard [on identifying significant accounts and disclosures and their relevant assertions] on the likelihood and potential magnitude of misstatements."[127] Including this new factor highlights the relationship between the identification of significant accounts and disclosures and their relevant assertions and the identification of significant risks. Specifically, risk factors that form the basis for identifying significant accounts and disclosures and their relevant assertions also inform the identification of significant risks, and significant risks affect one or more relevant assertions of significant accounts or disclosures.

Another commenter on the reproposed standard suggested that the term "likelihood" be defined more in terms of reasonable possibility as that term is used in Auditing Standard No. 5. However, that change would be inconsistent with the requirement to assess the likelihood of misstatements, i.e., the possibility that the risk would result in misstatement of the financial statements.

One commenter indicated that the requirement in the note to paragraph 59.c. of the reproposed standard "inappropriately infers that the auditor should,

---

[125] Paragraph 59 of Auditing Standard No. 12.

[126] Paragraph 70 of Auditing Standard No. 12.

[127] Paragraph 71 of Auditing Standard No. 12.

and can, associate the risks at the financial statement level with particular assertions in order to assess risks at the assertion level." Auditing Standard No. 8 states that risks of material misstatement at the financial statement level have a pervasive effect on the financial statements as a whole and potentially affect many assertions, and the standard provides examples of how risks at the financial statement level can result in misstatements.[128] It is important for the auditor to take into account risks of material misstatement at the financial statement level in order to evaluate types of misstatements that could occur.

Under PCAOB standards, significant accounts and disclosures and their relevant assertions are identified based upon their risk characteristics. Thus, the auditor needs to identify and assess the risks in order to identify the relevant assertions of significant accounts and disclosures in accordance with PCAOB standards. For example, Auditing Standard No. 5 requires the auditor to identify significant accounts and disclosures and their relevant assertions in integrated audits.[129] Also, AU sec. 319 required the auditor to perform substantive procedures for the relevant assertions of significant accounts and disclosures for all audits of financial statements, which implicitly required the auditor to identify those accounts, disclosures, and assertions.[130] Auditing Standard No. 12 imposes a more explicit requirement on the auditor to identify significant accounts and disclosures and their relevant assertions in all audits.

1. Factors Relevant to Identifying Fraud Risks

Auditing Standard No. 12 requires that the auditor evaluate whether the information gathered from the risk assessment procedures indicates that one or more fraud risk factors are present and should be taken into account in identifying and assessing fraud risks.[131] The reproposed standard included a paragraph that stated that the auditor should not assume that all of the fraud risk factors discussed in must be observed to conclude that a fraud risk exists. Commenters suggested that the language was not clear as to the action that auditors would need to take to "not assume." The paragraph has been revised to clarify that all of the conditions are not required to be observed or evident to conclude that a fraud risk exists.[132]

2. Consideration of the Risk of Omitted or Incomplete Disclosures

The reproposed standard stated that the auditor's evaluation of fraud risk factors should include an evaluation of how fraud could be perpetrated or concealed by omitting required disclosures or by presenting incomplete disclosures. One commenter stated that the requirement should also include consideration of the possibility of presenting inaccurate disclosures. Other commenters stated that the requirement should be revised to refer to disclosures required by the applicable financial reporting framework. The requirement has been revised to encompass inaccurate disclosures and to refer to disclosures required for the fair presentation of the financial statements in conformity with the applicable financial reporting framework.[133]

[131] Paragraph 65 of Auditing Standard No. 12.

[132] Paragraph 66 of Auditing Standard No. 12.

[133] Paragraph 67 of Auditing Standard No. 12.

3. Presumption of Fraud Risk Involving Improper Revenue Recognition

Like the reproposed standard, Auditing Standard No. 12 contains a requirement that the auditor should presume that there is a fraud risk involving improper revenue recognition and evaluate which types of revenue, revenue transactions, or assertions may give rise to such risks.[134] One commenter recommended rewording this paragraph to state that while revenue recognition should be presumed to be a higher level of risk, there are exceptions. The requirement was retained as stated in the reproposed standard because a significant number of financial reporting frauds relate to revenue recognition.[135]

K. Definition of Significant Risk

The reproposed standard defined significant risk as a risk of material misstatement that requires special audit consideration. Some commenters stated that the definition of "significant risk" in the reproposed standard should be revised to indicate that significant risks are "identified risks" and that they are determined using the "auditor's judgment" or risks that the auditor "determines." Adding a reference to the auditor's determination or auditor's judgment is unnecessary because those points are inherent in the requirements for identifying significant risks, e.g., in the required evaluation of the likelihood and potential magnitude of misstatements related to the risk. Similarly, the reference to "identified risks" is unnecessary because it is already mentioned in the requirement for determining significant risks. Accordingly, the definition of significant risk included in the reproposed standard is retained.

VII. Auditing Standard No. 13—The Auditor's Responses to the Risks of Material Misstatement

A. Background

Auditing Standard No. 13 establishes requirements for responding to the risks of material misstatement, including responses regarding the general conduct of the audit and responses involving audit procedures. Auditing Standard No. 13 applies to integrated audits and audits of financial statements only.

B. Linking Assessed Risks and Auditor's Responses

The reproposed standard included a requirement for the auditor to design and implement appropriate responses to the "assessed risks of material misstatement" to address comments received on the original proposed standard for improving the linkage between the auditor's responses and the identification and assessment of risks of material misstatement. Acknowledging the improvements in the reproposed standard, some commenters continued to suggest that the objective also should state that the auditor is to address the assessed risks of material misstatement.

In the Board's view, obtaining sufficient appropriate evidence to support the auditor's opinion requires the auditor to adequately respond to the risks of material misstatement. Accordingly, the title and objective of the standard continue to refer to responding to the risks of material misstatement. However, the Board recognizes that the appropriate identification and assessment of the risks of material misstatement in accordance with Auditing Standard No. 12 enable the auditor to effectively respond to the risks of material misstatement. Auditing Standard No. 13 continues to impose on auditors an unconditional responsibility to design and implement responses that address the risks of material misstatement identified and assessed in accordance with Auditing Standard No. 12.[136] As with the reproposed standard, noncompliance with the requirements in Auditing Standard No. 12 that leads to a failure to identify or appropriately assess a risk of material misstatement also could result in a failure to appropriately respond to the risk of material misstatement in accordance with this standard.[137]

C. Overall Responses to Risks

The reproposed standard included a requirement for the auditor to respond to the risks of material misstatement through overall responses and responses involving the nature, timing, and extent of audit procedures. Overall responses relate to the general conduct of the audit, e.g., appropriately assigning and properly supervising engagement team members, incorporating an element of unpredictability into the audit, evaluating the company's selection and application of significant accounting principles, and making pervasive changes to the audit. Such responses are required by AU sec. 316 in response to fraud risks, but the reproposed standard extended the requirement to apply to risks of material misstatement due to error or fraud. These responses, by their nature,

---

[136] Paragraph 3 of Auditing Standard No. 13.

[137] Failure to address a risk of material misstatement also might indicate a failure to comply with Auditing Standard No. 12.

are appropriate for addressing risks of material misstatement due to error or fraud.

Some commenters expressed concerns regarding the expansion of the requirement for incorporating an element of unpredictability to apply to risks of material misstatement other than fraud risks.

In the Board's view, although incorporating an element of unpredictability is intended primarily to address fraud risks, it also can enable the auditor to detect errors or control deficiencies that could otherwise remain undetected. In addition, the requirement to incorporate an element of unpredictability when testing controls already exists in Auditing Standard No. 5. Auditing Standard No. 13 continues to indicate that the auditor should incorporate an element of unpredictability as part of the response to the risks of material misstatement, including fraud risks.[138]

One commenter requested clarification regarding the differences between the first and third examples used to illustrate ways to incorporate an element of unpredictability in paragraph 5.c. of the reproposed standard. The first example in Auditing Standard No. 13 is intended to illustrate that the auditor may decide to perform audit procedures for a particular account, disclosure, or assertion even though the auditor's risk assessment did not identify specific risks associated with those accounts.[139] The third example is intended to illustrate that when sampling a particular financial statement amount, the auditor may consider selecting items with amounts lower than the threshold that the auditor had used in the past, or expanding the selection to other sections of the population that the auditor had not tested in the past.[140]

The reproposed standard required the auditor to evaluate whether it is necessary to make pervasive changes to the audit to adequately address the assessed risks of material misstatement. The reproposed standard did not require that pervasive changes be made in every audit. Instead, it required the auditor to evaluate whether pervasive changes that affect many aspects of the audit are needed to address the assessed risks of material misstatement. Commenters questioned the use of the term "pervasive" in the requirement. Auditing Standard No. 13 provides additional explanation of the types of circumstances in which pervasive changes might be necessary.[141]

Existing PCAOB standards require the auditor to apply professional skepticism as part of due care,[142] and Auditing Standard No. 13 states that the auditor's response to fraud risks involves the application of professional skepticism in gathering and evaluating audit evidence.[143] The requirement is intended to emphasize the importance of professional skepticism in responding to risks of material misstatement without limiting its application to the auditor's responses.

One commenter expressed concern that the reproposed standard did not explicitly require the auditor to implement overall responses to risks at the financial statement level. Such an explicit requirement would inappropriately limit the auditor's overall responses to risks at the financial statement level. Many of the overall responses also apply to risks at the assertion level, e.g., assigning more

[142] AU secs. 230.07–.09.

[143] Paragraph 7 of Auditing Standard No. 13.

experienced personnel or applying a greater extent of supervision to accounts or disclosures with higher risk.

D. Responses Involving the Nature, Timing, and Extent of Audit Procedures

The reproposed standard required the auditor to design and perform audit procedures in a manner that addresses the assessed risks of material misstatement for each relevant assertion of each significant account and disclosure. Auditing Standard No. 13 retained this requirement as reproposed. The requirement emphasizes that the auditor should focus on each relevant assertion of each significant account and disclosure and the risks of material misstatement associated with the relevant assertion when designing and performing audit procedures.

The reproposed standard also included requirements for the auditor to design the testing of controls to accomplish the objectives of both the audit of financial statements and the audit of internal control in an integrated audit. This requirement is aligned with Auditing Standard No. 5. One commenter suggested that that the requirement be removed because it relates only to integrated audits. The requirement was retained as reproposed because Auditing Standard No. 13 applies to integrated audits as well as audits of financial statements only, and tests of controls are a necessary response in the audit of internal control.[144]

E. Tests of Controls in an Audit of Internal Control

Auditing Standard No. 13 includes requirements for performing tests of controls in the audit of financial statements.[145]

In an integrated audit, the tests of controls performed in the audit of internal control are part of the auditor's responses to the risks of material misstatement, as indicated in paragraph 9–10 of Auditing Standard No. 13.[146] To help facilitate the integration of tests of controls in an integrated audit, the standard continues to use language similar to that of Auditing Standard No. 5 when describing analogous terms and concepts relating to the testing of controls.

F. Tests of Controls and Control Risk Assessment in the Audit of Financial Statements

1. Requirements on When to Test Controls

AU sec. 319 required auditors to obtain evidence about the design effectiveness and operating effectiveness of controls (a) when the auditor plans to rely on selected controls to reduce his or her substantive procedures and (b) in those limited circumstances in which the auditor cannot obtain sufficient appropriate evidence through substantive procedures alone.[147] Thus, except in those limited circumstances, AU sec. 319 provided auditors with flexibility to decide when or whether to test controls.

---

[144] Paragraph 9.c. of Auditing Standard No. 13.

[145] Paragraphs 16–35 of Auditing Standard No. 13.

[146] Paragraph 39 of Auditing Standard No. 5 states, "The auditor should test those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion."

[147] AU sec. 319.66.

Auditing Standard No. 13 does not change the requirements in AU sec. 319 regarding when testing controls is necessary in audits of financial statements only.[148] In those audits, auditors continue to have the same flexibility in deciding when or whether to test controls to reduce their substantive procedures.[149] Auditing Standard No. 13 includes additional statements that emphasize the flexibility that auditors have in making these decisions and provides additional examples, adapted from AU sec. 319.68, of situations in which auditors cannot obtain sufficient appropriate audit evidence through substantive procedures alone.[150]

2. Period of Reliance

Auditing Standard No. 13 states that when the auditor relies on controls to assess control risk at less than the maximum, the auditor must obtain evidence that the controls selected for testing are designed effectively and operated effectively during the entire period of reliance.[151] The concept of the period of reliance was introduced in Auditing Standard No. 5 and discussed further in the PCAOB staff guidance, *Staff Views: An Audit of Internal Control Over Financial Reporting That Is Integrated with an Audit of Financial Statements—Guidance for Auditors of Smaller Public Companies.* Auditing Standard No. 13 provides a definition of "period of reliance" that parallels the language in paragraph B4 of Auditing Standard No. 5.[152]

3. Evidence about the Effectiveness of Controls

Auditing Standard No. 13 describes the principle, adapted from AU sec. 319,[153] that the evidence necessary to support the auditor's control risk assessment depends on the degree of reliance the auditor plans to place on the effectiveness of a control. In applying that principle, Auditing Standard No. 13 requires the auditor to obtain more persuasive audit evidence from tests of controls the greater the reliance the auditor places on the effectiveness of a control. In addition, Auditing Standard No. 13 requires the auditor to obtain more persuasive evidence about the effectiveness of controls for each relevant assertion for which the audit approach consists primarily of tests of controls, including situations in which substantive procedures alone cannot provide sufficient appropriate audit evidence.[154]

4. Testing Operating Effectiveness

Auditing Standard No. 13 requires the auditor to determine, among other things, whether the person performing the control possesses the necessary authority and competence to perform the control effectively.[155] This requirement is intended to call to the auditor's attention that whether he or she possesses the appropriate level of authority and the knowledge and skills necessary to perform the control function is essential to whether a person can effectively perform the control. Thus, the auditor is required to make such determination before he or she can conclude about the effectiveness of the control.

---

[148] Certain clarifying revisions were made to the discussion of relying on controls to modify the auditor's substantive procedures, in response to comments on the reproposed standard. See footnote 12 to paragraph 16 of Auditing Standard No. 13.

[149] Paragraph 16 of Auditing Standard No. 13.

[150] Paragraph 17 of Auditing Standard No. 13.

[151] Paragraph 16 of Auditing Standard No. 13.

[152] Paragraph A.3 of Auditing Standard No. 13.

[153] AU sec. 319.90.

[154] Paragraph 18 of Auditing Standard No. 13.

[155] Paragraph 21 of Auditing Standard No. 13.

5. Timing of Tests of Controls—Evidence Obtained during an Interim Period

The reproposed standard stated that the auditor must obtain evidence about the effectiveness of controls selected for testing for the entire period of reliance. When the auditor tests controls during an interim period, additional evidence that is necessary concerning the operation of those controls for the remaining period of reliance depends on a series of factors listed in the reproposed standard, including, among other factors, the possibility of significant changes in internal control over financial reporting occurring subsequent to the interim date.

One commenter suggested adding "control environment" to the list of factors that could affect the auditor's determination of what additional evidence is necessary. The control environment has an important, but indirect, effect on the likelihood that a misstatement will be prevented or detected on a timely basis. Also, unlike monitoring controls, the control environment is not designed to identify possible breakdowns in other controls. Accordingly, the control environment, by itself, does not reduce the amount of evidence needed concerning controls over specific relevant assertions for the remaining period. The control environment is not included in the list of factors in Auditing Standard No. 13.

Another commenter suggested adding a requirement for the auditor to obtain, when applicable, audit evidence about subsequent changes to the controls tested during the interim period. A note has been added to Auditing Standard No. 13 requiring the auditor to obtain evidence about such subsequent changes, if significant.[156]

6. Timing of Tests of Controls—Evidence from Past Audits

Auditing Standard No. 13 states that the auditor should obtain evidence during the current year audit about the design and operating effectiveness of controls upon which the auditor relies.[157] This requirement is based on the principle that auditors should support their control risk assessments each year with current evidence. However, when the auditor has tested the controls in the past and plans to rely on the same controls for the current year audit, the amount of evidence needed will vary based on the relevant factors listed in the standard.[158] These additional factors generally relate to the degree of reliance on the control, the risk that the control will fail to operate as designed, and the nature and amount of evidence that the auditor has already obtained regarding the effectiveness of the controls. These requirements are consistent with Auditing Standard No. 5. Also, the standard allows the auditor to use a benchmarking strategy, when appropriate, for automated application controls for subsequent years' audits, as do the provisions of Auditing Standard No. 5. However, the standard does not permit testing controls once every third year because the standard requires evidence regarding the effectiveness of controls to be obtained each year.

Some commenters expressed concern that the requirements in the reproposed standard for determining the amount of evidence needed in the current year could be interpreted as requiring the auditor to consider each factor listed for each of the controls that the auditor tested in the past, regardless of whether or not the auditor plans to rely on those controls for purposes of the current year audit. The requirement was intended to apply when the auditor tested the controls in the past audits and plans to rely on those controls and use evidence

---

[156] Paragraph 30 of Auditing Standard No. 13.

[157] Paragraph 31 of Auditing Standard No. 13.

[158] Ibid.

about the effectiveness of those controls obtained in prior years for purposes of the current year audit. That requirement is clarified in Auditing Standard No. 13.[159]

7. Assessing Control Risk

Auditing Standard No. 13 requires the auditor to assess control risk for relevant assertions.[160] This requirement is not new. AU sec. 319 established requirements for the auditor to assess control risk, and Auditing Standard No. 5 discusses control risk assessment in the financial statement audit portion of the integrated audit.[161]

Auditing Standard No. 13 requires the auditor to assess the control risk at the maximum level for relevant assertions when the controls necessary to sufficiently address the assessed risk of material misstatement in those assertions are missing or ineffective or when the auditor has not obtained sufficient appropriate evidence to support a control risk assessment below the maximum level.[162]

One commenter expressed a concern that the reproposed standard seemed to indicate that no reduction of the control risk assessment should occur based on understanding the design effectiveness of controls. The commenter suggested that a control that does not exist or is not designed effectively should have a different impact on the auditor's testing than a control that is designed effectively but not tested by the auditor.

The risk assessment standards already address the points raised by the commenter regarding the effect of control deficiencies on the auditor's testing. Auditing Standard No. 12 requires the auditor to obtain an understanding of the design of the company's controls as part of his or her risk assessment procedures.[163] If the auditor identifies design deficiencies in the company's controls, the auditor would take that into account in identifying and assessing the risks of material misstatement, and Auditing Standard No. 13 requires the auditor to implement responses to address those risks of material misstatement. When deficiencies are detected during the auditor's testing of controls that the auditor plans to rely on, Auditing Standard No. 13 requires the auditor to (1) perform tests of other controls related to the same assertion as the ineffective controls, or (2) revise the control risk assessment and modify the planned substantive procedures as necessary in light of the increased assessment of risk.[164]

Another commenter suggested that the reproposed standard provide more direction about evaluating control deviations by adding a paragraph from Auditing Standard No. 5 regarding evaluating control deficiencies. The referenced paragraph does not apply specifically to assessing control risk in a financial statement audit, and Auditing Standard No. 13 requires the auditor to evaluate the evidence from all sources, including the results of test of controls, when assessing control risk for relevant assertions.[165]

[162] Paragraph 33 of Auditing Standard No. 13.

[163] Paragraph 20 of Auditing Standard No. 12.

[164] Paragraph 34 of Auditing Standard No. 13.

[165] Paragraph 32 of Auditing Standard No. 13.

G. Substantive Procedures

Auditing Standard No. 13 requires the auditor to perform substantive procedures for each relevant assertion of each significant account and disclosure, regardless of the assessed level of control risk.[166] By definition, a relevant assertion of a significant account and disclosure has a reasonable possibility of containing a misstatement or misstatements that would cause the financial statements to be materially misstated.[167] The requirement to obtain evidence from substantive procedures for each relevant assertion of each significant account and disclosure reflects the principle that the auditors need to implement appropriate responses to address the assessed risks of material misstatement.

Existing PCAOB standards indicate that some risks of material misstatement might require more evidence from substantive procedures because of certain inherent limitations of internal control.[168] For example, more evidence from substantive procedures ordinarily is needed for relevant assertions that have a higher susceptibility to management override or to lapses in judgment or breakdowns resulting from human failures. Observations from the Board's oversight activities have underscored the importance of this principle. Auditing Standard No. 13 includes this principle because it is particularly relevant to the determination of the nature, timing, and extent of substantive procedures. It is also consistent with the principles regarding detection risk discussed in Auditing Standard No. 8

H. Timing of Substantive Procedures

The reproposed standard included a requirement for the auditor to take into account certain factors in determining whether it is appropriate to perform substantive procedures at an interim date. One commenter suggested that another point be added to the standard to require the auditor to review "the internal control changes that have been made to date and the nature and extent of monitoring such changes by the client staff." Auditing Standard No. 13 requires the auditor to consider the effect of known or expected changes in the company, its environment, and its internal control over financial reporting during the remaining period on its risk assessments when determining whether to perform substantive procedures at an interim date.[169] This additional requirement recognizes that both changes in controls and other changes to the company and its environment can affect the risks of material misstatement and, thus, the effectiveness of interim substantive procedures. For example, significant changes in industry or market conditions near year end could increase the risk of material misstatement regarding the valuation of assets at year end, which, in turn, would require significant audit attention during the remaining period.

The reproposed standard stated that when an auditor performs substantive procedures as of an interim date, the auditor should perform substantive procedures, or substantive procedures combined with tests of controls, that provide a reasonable basis for extending the audit conclusions from the interim date to the period end. The reproposed standard also required that the auditor perform certain procedures that were adapted from AU sec. 313.

Some commenters suggested that the Board remove the mandatory procedures in the reproposed standard, arguing that the procedures should be determined

---

[166] Paragraph 36 of Auditing Standard No. 13.

[167] Paragraph A9 of Auditing Standard No. 5.

[168] See, e.g., paragraph .14 of AU sec. 328, *Auditing Fair Value Measurements and Disclosures*.

[169] Paragraph 44.a.(3) of Auditing Standard No. 13.

by the auditor based on professional judgment. Removing those requirements as suggested by the commenters would weaken PCAOB standards. Observations from the Board's oversight activities have included instances in which inadequate audit work was performed when extending the conclusion reached at the interim date to the end of the period covered by the financial statements. Therefore, retaining the mandatory procedures in this standard continues to be appropriate.[170]

I. Substantive Procedures Responsive to Significant Risks

Like the original proposed standard, the reproposed standard stated that the auditor should perform substantive procedures, including tests of details, that are specifically responsive to the significant risks. AU sec. 329 indicates that tests of details should be performed in response to significant risks.[171]

One commenter continued to express concern about imposing a presumptively mandatory responsibility for auditors to perform tests of details in response to significant risks. Auditing Standard No. 13 retains the requirement as reproposed.[172] The nature and importance of significant risks warrant a high level of assurance from substantive procedures to adequately address the risk. Also, analytical procedures alone are not well suited to detecting certain types of misstatements related to significant risks, including, in particular, fraud risks. For example, when fraud risks are present, management might be able to override controls to allow adjustments that result in artificial changes to the financial statement relationships being analyzed, causing the auditor to draw erroneous conclusions.

J. Dual-purpose Test

Auditing Standard No. 13 recognized that, in certain situations, the auditor might perform a substantive test of a transaction concurrently with a test of a control relevant to that transaction, i.e., a dual-purpose test. The auditor is required to design the dual-purpose test to achieve the objectives of both the test of the control and the substantive test. In addition, the auditor is required to evaluate the results of the test in forming conclusions about both the assertion and the effectiveness of the control being tested.[173] The standard refers the auditors to the relevant requirements in AU sec. 350, *Audit Sampling*, for determining the proper sample size in a dual-purpose test.

---

[170] Paragraph 45 of Auditing Standard No. 13.

[171] AU sec. 329.09.

[172] Paragraph 11 of Auditing Standard No. 13.

[173] Paragraph 47 of Auditing Standard No. 13.

VIII. Auditing Standard No. 14—Evaluating Audit Results

A. Background

Auditing Standard No. 14 describes the auditor's responsibilities regarding the process of evaluating the results of the audit and determining whether sufficient appropriate audit evidence has been obtained in order to form the opinion to be expressed in the auditor's report. This standard consolidates into one auditing standard the requirements that were previously included in five separate auditing standards.[174] The standard highlights matters that are important to the auditor's conclusions about the financial statements and the effectiveness of internal control.

B. Definition of Misstatement

The reproposed standard defined the term "misstatement" as follows:

> A misstatement, if material individually or in combination with other misstatements, causes the financial statements not to be presented fairly in conformity with the applicable financial reporting framework.[175] A misstatement may relate to a difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that should be reported in conformity with the applicable financial reporting framework. Misstatements can arise from error (i.e., unintentional misstatement) or fraud.

Some commenters indicated that the definition applied to "material misstatement" rather than "misstatement" and suggested revisions to the definition, e.g., moving the second sentence to the beginning of the definition.

Auditing Standard No. 14 carries forward the definition of "misstatement" as reproposed.[176] This definition is not a definition of the term "material misstatement." Rather, the definition emphasizes that misstatements prevent financial statements from being fairly presented in conformity with the applicable financial reporting framework, as discussed in AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. The phrase used in the definition, "if material individually or in combination with other misstatements," is equivalent to the phrase "In the absence of materiality considerations," which was used in the description of the term "misstatement" in an auditing interpretation of AU sec. 312.[177] The second sentence of the definition in Auditing Standard No. 14 describes the most common types of misstatements.[178]

---

[174] AU sec. 312, regarding evaluating audit results, including uncorrected misstatements; AU sec. 316, regarding fraud considerations that are relevant to evaluating audit results; AU sec. 329, regarding performing the overall review; AU sec. 326, regarding determining whether sufficient appropriate audit evidence has been obtained; and AU sec. 431, regarding the evaluation of disclosures.

[175] The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to accounting principles applicable to that company.

[176] Paragraph A2 of Appendix A to Auditing Standard No. 14.

[177] Paragraph .02 of AU sec. 9312, *Audit Risk and Materiality in Conducting an Audit: Auditing Interpretations of Section 312,* which is superseded by the risk assessment standards, stated "In the absence of materiality considerations, a misstatement causes the financial statements not to be in conformity with generally accepted accounting principles."

[178] See also paragraph A2 of Auditing Standard No. 14.

C. Performing Analytical Procedures in the Overall Review

Auditing Standard No. 14 adapted the requirements that were previously included in AU secs. 316 and 329 to read the financial statements and disclosures and perform analytical procedures in the overall review. The standard imposes on auditors a responsibility to read the financial statements and disclosures and perform analytical procedures to (a) evaluate the auditor's conclusions formed regarding significant accounts and disclosures and (b) assist in forming an opinion on whether the financial statements as a whole are free of material misstatement.[179] In particular, Auditing Standard No. 14 requires the auditor to evaluate whether (a) evidence gathered in response to unusual or unexpected transactions, events, amounts, or relationships previously identified during the audit is sufficient and (b) unusual or unexpected transactions, events, amounts, or relationships indicate risks of material misstatement that were not identified previously.[180] Performing analytical procedures in the overall review assists the auditor in assessing the conclusions reached and in evaluating the overall financial statement presentation.

Auditing Standard No. 14 adapted a requirement, which previously existed in AU sec. 316, for the auditor to perform analytical procedures relating to revenue through the end of the period.[181] These procedures are intended to identify unusual or unexpected relationships involving revenue accounts that might indicate a material misstatement, including a material misstatement due to fraud. Performing analytical procedures relating to revenue is important in light of the generally higher risk of financial statement fraud involving revenue accounts.

Auditing Standard No. 14 requires the auditor to corroborate management's explanations regarding significant unusual or unexpected transactions, events, amounts, or relationships. The standard also states that if management's responses to the auditor's inquiries appear to be implausible, inconsistent with other audit evidence, imprecise, or not at a sufficient level of detail to be useful, the auditor should perform procedures to address the matter.[182] Auditing Standard No. 15, *Audit Evidence,* states that inquiry of company personnel, by itself, does not provide sufficient audit evidence to reduce audit risk to an appropriately low level.[183] Therefore, obtaining corroboration of management's responses is important in obtaining sufficient appropriate audit evidence.

D. Clearly Trivial

Auditing Standard No. 14 requires the auditor to accumulate misstatements identified during the audit, other than those that are clearly trivial.[184] Like AU sec. 312, the standard allows the auditor to set a threshold for accumulating misstatements, provided that the threshold is set at a de minimis level that could not result in material misstatement of the financial statements, individually or in combination with other misstatements, after considering the possibility of further undetected misstatement.[185] The specific limitation on setting a threshold for accumulating misstatements is important to assure a

[180] Paragraph 6 of Auditing Standard No. 14.

[181] Paragraph 7 of Auditing Standard No. 14.

[182] Paragraph 8 of Auditing Standard No. 14.

[183] Paragraph 17 of Auditing Standard No. 15.

[184] Paragraph 10 of Auditing Standard No. 14.

[185] Paragraph 11 of Auditing Standard No. 14.

proper evaluation of the effect of uncorrected misstatements on the financial statements.

E. Accumulating Misstatements

The reproposed standard required the auditor to accumulate identified misstatements other than those that are clearly trivial. The reproposed standard also required the auditor to use his or her best estimate of the total misstatement in the accounts and disclosures that the auditor has tested, not just the amount of misstatements specifically identified. This includes misstatements related to accounting estimates and projected misstatements from substantive procedures that involve audit sampling.[186]

Commenters suggested that the standard should use terms such as "known and likely misstatement" or other terms to categorize the misstatements. Auditing Standard No. 14 uses the term "identified misstatement" to refer to misstatements that are identified during the audit and the term "accumulated misstatements" to refer to misstatements that are more than clearly trivial and, thus, should be accumulated by the auditor. Because Auditing Standard No. 14 requires the auditor to use his or her best estimate of the misstatements (which is how AU sec. 312 described "likely misstatements"), it is not necessary to use the term "known and likely misstatements."

F. Correction of Misstatements

Auditing Standard No. 14 requires that if management made corrections to accounts or disclosures in response to misstatements detected by the auditor, the auditor should evaluate management's work to determine whether the corrections have been recorded properly and to determine whether uncorrected misstatements remain.[187] The standard imposes on auditors a responsibility to determine whether misstatements identified by the auditor and communicated to management are correctly recorded in the accounting records.

G. Considerations When Accumulated Misstatements Approach the Materiality Level or Levels Used in Planning and Performing Audit Procedures

Auditing Standard No. 14 requires the auditor to determine whether the overall strategy needs to be revised when the aggregate of misstatements accumulated during the audit approaches the materiality level or levels used in planning and performing the audit. When the aggregate of misstatements approaches the materiality level or levels used in planning and performing an audit, there likely will be greater than an appropriately low level of risk that possible undetected misstatements, combined with uncorrected misstatements accumulated during the audit, could be material to the financial statements. If the auditor assesses this risk to be unacceptably high, he or she should perform additional audit procedures or determine that management has adjusted the financial statements so that the risk that the financial statements are materially misstated has been reduced to an appropriately low level.[188]

---

[186] Paragraphs 10–12 of Auditing Standard No. 14.

[187] Paragraph 16 of Auditing Standard No. 14.

[188] Paragraph 14 of Auditing Standard No. 14.

The reproposed standard stated that when the aggregate of accumulated misstatements approaches the materiality used in planning and performing the audit, the auditor should perform additional procedures or determine that management has adjusted the financial statements so that the risk of material misstatement has been reduced to an appropriately low level. One commenter suggested that it is not clear what the additional procedures are and that more work is not always the answer. The additional procedures that are necessary depend upon, among other things, the procedures performed by the auditor to date and the nature of the misstatements that were detected.

H. Requirement to Reevaluate the Materiality Level

Auditing Standard No. 11 includes a requirement to reevaluate the established materiality level or levels in certain circumstances. Auditing Standard No. 14 states that if the reevaluation of the materiality level or levels established in accordance with Auditing Standard No. 11 results in a lower amount for the materiality level or levels, the auditor should take into account that lower materiality level in the evaluation of uncorrected misstatements.[189] The requirements are intended to prevent the auditor from incorrectly concluding that uncorrected misstatements are immaterial because he or she used outdated financial statement information. However, the standard does not allow the auditor to establish a higher level or levels of materiality when uncorrected misstatements exceed the initially established level or levels of materiality.

Reevaluating the established materiality level or levels prior to evaluating the effect of uncorrected misstatements will cause audit results to be evaluated based on the latest financial information.

I. Evaluating Uncorrected Misstatements

The reproposed standard stated that the auditor should evaluate the uncorrected misstatements in relation to accounts and disclosures and to the financial statements as a whole, taking into account relevant quantitative and qualitative factors. The reproposed standard retained the provisions regarding qualitative factors that were included in an auditing interpretation to AU sec. 312,[190] with some minor revisions to align the factors more closely to the terminology in the reproposed standard and to omit qualitative factors that apply only to nonissuers. A commenter indicated that the term "profitability," which is included in the qualitative factors in Appendix B, is not defined, and the commenter suggested including examples of profitability in the reproposed standard. Although this term is not explicitly defined in Auditing Standard No. 14, it should be familiar to auditors because the related auditing interpretation was issued in 2000. Auditing Standard No. 14 carries forward the requirements and the related list of qualitative factors that are substantially the same as those in the auditing interpretation.[191]

Auditing Standard No. 14 requires an evaluation of the effects of both uncorrected misstatements detected in prior years and misstatements detected in the current year that relate to prior years.[192] The standard does not address

---

[189] Paragraph 17 of Auditing Standard No. 14.

[190] AU secs. 9312.15–.17.

[191] AU sec. 9312 and paragraph 17 and Appendix B of Auditing Standard No. 14.

[192] Paragraph 18 of Auditing Standard No. 14.

how to evaluate the effects of prior period misstatements because that is an accounting and financial reporting matter. For example, the SEC staff has provided guidance in SEC Staff Accounting Bulletin ("SAB") Topic 1.N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements,* on the effects of prior year misstatements when quantifying misstatements in the current year financial statements. This SAB provides the SEC staff's views regarding evaluating the quantitative and qualitative factors regarding the materiality of uncorrected misstatements and evaluating the effects of prior year misstatements.

Auditing Standard No. 14 states that the auditor cannot assume that an instance of error or fraud is an isolated occurrence and that the auditor should evaluate the nature and effects of the individual misstatements accumulated during the audit on the assessed risks of material misstatement.[193] This procedure is important to inform the auditor's conclusions about whether the auditor's risk assessments remain appropriate and whether he or she has obtained sufficient appropriate evidence to support his or her opinion.

The reproposed standard included a requirement to evaluate the nature and effects of the individual misstatements accumulated during the audit on the assessed risks of material misstatement. A commenter suggested that this evaluation should be performed at the time the misstatement is identified. In the Board's view, it is not necessary to prescribe the timing for the evaluation of the nature and effects of misstatements on the risk assessments. However, performing this evaluation during the course of the audit could allow the auditor to make the necessary modifications to his or her planned audit procedures on a more timely basis.

The reproposed standard required the auditor to evaluate whether identified misstatements might be indicative of fraud and, in turn, how they affect the auditor's evaluation of materiality and the related audit responses. This requirement is adapted from AU sec. 316.[194] One commenter suggested that when there is an indicator of fraud, the requirement should make clear that clearly trivial misstatements may need to be evaluated to determine if they should be included in the accumulated misstatements. Like AU sec. 316, the requirement in the reproposed standard was phrased in terms of identified misstatements rather than accumulated misstatements because fraud of relatively small amounts can be material to the financial statements.

Auditing Standard No. 14 retains the requirement as reproposed.[195] If an auditor detects a misstatement, he or she should evaluate whether the misstatement is indicative of fraud when deciding whether a misstatement is clearly trivial and thus does not warrant being included with accumulated misstatements. Additionally, in situations in which the auditor believes that a misstatement is or might be intentional and the effect on the financial statements could be material or cannot be readily determined, Auditing Standard No. 14 requires that the auditor perform procedures to obtain additional audit evidence to determine whether the fraud has occurred or is likely to have occurred. If the fraud has occurred or is likely to have occurred, the auditor is required to determine its effect on the financial statements and the auditor's report thereon.

---

[193] Paragraph 19 of Auditing Standard No. 14.

[194] AU sec. 316.75.

[195] Paragraph 20 of Auditing Standard No. 14.

J. Communication of Accumulated Misstatements to Management

The reproposed standard required the auditor to communicate accumulated misstatements to management on a timely basis to provide management with an opportunity to correct them. The reproposed standard also required the auditor to obtain an understanding of the reasons that management decided not to correct misstatements communicated by the auditor.

Some commenters suggested that the standard should specifically require the auditor to request management to correct the misstatements.

Auditing Standard No. 14 retains the requirement as reproposed.[196] It is not necessary to specifically require the auditor to request that management correct the misstatements because management has its own legal responsibilities in relation to the preparation and maintenance of the company's books, records, and financial statements. Section 13(i) of the Securities and Exchange Act of 1934, 15 U.S.C. §78m(i), requires the financial statements filed with the SEC to reflect all material correcting adjustments identified by the auditor.

K. Communication of Illegal Acts

Auditing Standard No. 14 requires the auditor to determine his or her responsibility under AU secs. 316.79–.82A, AU sec. 317, and Section 10A of the Securities and Exchange Act of 1934, 15 U.S.C. §78j-1, if the auditor becomes aware of information indicating that fraud or another illegal act has occurred or might have occurred.[197]

L. Evaluating the Qualitative Aspects of the Company's Accounting Practices

Auditing Standard No. 14 requires the auditor to evaluate the qualitative aspects of the company's accounting practices, including potential bias in management's judgments regarding the amounts and disclosures in the financial statements.[198]

Auditing Standard No. 14 also states that if the auditor identifies bias in management's judgments about the amounts and disclosures in the financial statements, the auditor should evaluate whether the effect of that bias, together with the effect of uncorrected misstatements, results in material misstatement of the financial statements. Also, the standard states that the auditor should evaluate whether the auditor's risk assessments, including, in particular, the assessment of fraud risks, and the related audit responses remain appropriate.[199]

The reproposed standard included an example of management bias, which was based on observations from the Board's oversight activities. This example indicated that when management identifies adjusting entries that offset misstatements identified by the auditor, the auditor should perform procedures to determine why the underlying misstatement was not identified previously. The auditor also should evaluate the implications on the integrity of management, and the auditor's risk assessments, including fraud risk assessments, and

---

[196] Paragraphs 15 and 25 of Auditing Standard No. 14.

[197] Paragraph 23 of Auditing Standard No. 14.

[198] Paragraph 24 of Auditing Standard No. 14.

[199] Paragraph 26 of Auditing Standard No. 14.

perform additional procedures as necessary to address the risk of further undetected misstatements. A commenter suggested using the phrase "identified misstatements other than those that are ... clearly trivial" instead of "identified misstatements." The requirement has been revised to refer to misstatements accumulated by the auditor as required by paragraph 10 of Auditing Standard No. 14.[200]

M. Assessment of Fraud Risks

The reproposed standard required the auditor to evaluate whether the accumulated results of auditing procedures and other observations affect the auditor's assessment of fraud risks made throughout the audit and whether the audit procedures need to be modified to respond to those risks.[201] The reproposed standard included a reference to Appendix C, which listed matters that might affect the assessment of fraud risks. Appendix C stated that if the matters listed in the appendix are identified during the audit, the auditor should determine whether the assessment of fraud risks remains appropriate or needs to be revised. This requirement was included because the evaluation provides additional insight regarding the fraud risks and the potential need to perform additional procedures to support the opinion to be expressed in the auditor's report.

Some commenters indicated that the requirement in Appendix C seems to indicate that the auditor is required to determine if each item identified during the audit individually affects the assessment of fraud risks, which appears to be inconsistent with paragraph 28. Those commenters suggested revisions to the first sentence of Appendix C. After considering these comments, the first sentence of Appendix C has been revised to state that if the matters listed in the appendix are identified during the audit, the auditor should take into account these matters in the evaluation of the assessment of fraud risks, as discussed in paragraph 28.[202]

One commenter suggested including in Appendix C specific procedures that the auditor could perform to evaluate fraud risk, such as evaluating journal entries with round numbers or amounts slightly below a specified threshold. This type of procedure could be appropriate for selecting journal entries for testing, but it is different in nature from the matters listed in Appendix C.

Auditing Standard No. 14 includes a requirement for the engagement partner to determine whether there has been appropriate communication with the other engagement team members throughout the audit regarding information or conditions that are indicative of fraud risks.[203] This requirement is adapted from the existing PCAOB standards.[204]

N. Evaluating Financial Statement Disclosures

The reproposed standard included a requirement, adapted from AU sec. 431, for the auditor to evaluate whether the financial statements contain the required disclosures and, if the required disclosures are not included in the financial statements, to express a qualified or adverse opinion in accordance with AU

---

[200] Paragraph 25 of Auditing Standard No. 14.

[201] Paragraph 28 of Auditing Standard No. 14.

[202] Paragraph C1 of Appendix C to Auditing Standard No. 14.

[203] Paragraph 29 of Auditing Standard No. 14.

[204] AU sec. 316.18.

sec. 508, *Reports on Audited Financial Statements*. The reproposed standard also stated that evaluation of disclosures includes consideration of the form, arrangement, and content of the financial statements (including the accompanying notes), encompassing matters such as the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth. These requirements were included in the reproposed standard because of the importance of disclosures to the fair presentation of financial statements.

Some commenters stated that the requirements regarding evaluation of disclosures should be qualified based on materiality considerations. Auditing Standard No. 14 states that the auditor should evaluate whether the financial statements contain the information essential for a fair presentation of the financial statements in conformity with the applicable financial reporting framework, which is aligned with an analogous requirement in AU sec. 508.41.[205] AU sec. 411 discusses the concept of materiality regarding the auditor's opinion that financial statements are presented fairly.[206]

Another commenter questioned whether the statement that "Evaluation of disclosures includes consideration of the form, arrangement, and content of the financial statements (including the accompanying notes), encompassing matters such as the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth" is a requirement. The statement in the reproposed standard, which is retained in Auditing Standard No. 14, explains that the scope of the auditor's required evaluation of the information disclosed in the financial statements includes matters such as the form, arrangement, and content of the financial statements.[207]

O. Evaluating the Sufficiency and Appropriateness of Audit Evidence

The reproposed standard required the auditor to conclude on whether sufficient appropriate audit evidence has been obtained to support his or her opinion on the financial statements. The reproposed standard also presented a list of factors that are relevant to the auditor's conclusion on whether sufficient appropriate audit evidence has been obtained. Consideration of the listed factors is essential to reaching an informed conclusion about whether sufficient appropriate audit evidence has been obtained. Accordingly, both the requirement and the list of factors contained in the reproposed standard have been retained.[208]

A commenter suggested that corrected adjustments also should be considered in concluding whether sufficient appropriate audit evidence has been obtained. Auditing Standard No. 14 already requires the auditor to evaluate the results of audit procedures in evaluating whether sufficient appropriate evidence has been obtained, and this would include misstatements identified by the auditor, regardless of whether they were corrected by management.[209]

The reproposed standard expanded the requirements regarding situations in which the auditor has not obtained sufficient appropriate audit evidence to include situations in which the auditor has substantial doubt about a relevant

---

[205] Paragraph 31 of Auditing Standard No. 14.

[206] AU sec. 411.04.

[207] Paragraph 31 of Auditing Standard No. 14.

[208] Paragraphs 33–34 of Auditing Standard No. 14.

[209] Paragraph 34 of Auditing Standard No. 14.

assertion. This additional provision was adapted from AU sec. 326. A commenter suggested that the requirement be revised to state that the auditor should attempt to obtain additional evidence if the auditor has not obtained sufficient appropriate evidence about a relevant assertion. The requirement has been retained as stated in the reproposed standard because it covers situations in which the evidence is inadequate and situations in which the auditor has concerns about whether an assertion is misstated.[210]

P. Evaluating the Results of the Audit of Internal Control

The reproposed standard included a section relating to evaluating audit results in the audit of internal control, which references Auditing Standard No. 5 for the requirements on evaluating the results of the audit of internal control.[211] A commenter suggested removing this paragraph from the reproposed standard. Auditing Standard No. 14 retains this paragraph, although it does not impose additional requirements. Including this paragraph emphasizes that, in integrated audits, the evaluation of audit results is an integrated process that affects both audits.

[210] Paragraph 35 of Auditing Standard No. 14.

[211] Paragraph 37 of Auditing Standard No. 14.

IX. Auditing Standard No. 15—Audit Evidence

A. Background

Auditing Standard No. 15 explains what constitutes audit evidence, establishes requirements regarding designing and performing audit procedures to obtain sufficient appropriate audit evidence to support the opinion in the auditor's report, and discusses methods for selecting items for testing.

B. Nature of Audit Evidence

The reproposed standard stated that audit evidence is all the information, whether obtained from audit procedures or other sources, that is used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence consists of both information that supports and corroborates management's assertions regarding the financial statements or internal control over financial reporting and any information that contradicts such assertions.

One commenter indicated that the meaning of the phrase "and any information that contradicts such assertions" was unclear. The commenter suggested that the Board clarify whether the requirement meant the auditor should look for such contradictory information, or if the requirement should apply only when such information comes to the auditor's attention.

PCAOB standards require the auditor to plan and perform the audit to obtain sufficient appropriate evidence to support an opinion about whether the financial statements are free of material misstatement and, in the audit of internal control, whether material weaknesses exist.[212] Thus, the auditor is required to perform the audit procedures necessary to test the accounts and controls, regardless of whether the results of those procedures support or contradict the assertions. The requirement in Auditing Standard No. 15 means that when contradictory evidence is obtained, the auditor should evaluate it when forming a conclusion on the financial statements and, in integrated audits, on internal control over financial reporting. To clarify the requirement, Auditing Standard No. 15 omits the word "any."[213]

C. Objective

The objective in the reproposed standard acknowledged the auditor's responsibility to plan and perform the audit to obtain sufficient appropriate audit evidence to support the opinion expressed in the auditor's report. Commenters suggested revising the wording in paragraph 4 of the reproposed standard to be consistent with the objective in paragraph 3 of the reproposed standard. The requirement in paragraph 4 of Auditing Standard No. 15 has been revised to be consistent with the objective of the standard.

D. Sufficient Appropriate Audit Evidence

The reproposed standard explained the meaning of the words "sufficient" and "appropriate" as used in the phrase "sufficient appropriate audit evidence." Commenters suggested that the Board provide formal definitions for terms like

---

[212] Paragraph 3 of Auditing Standard No. 8 and paragraph 3 of Auditing Standard No. 5, respectively.

[213] Paragraph 2 of Auditing Standard No. 15.

"sufficiency" and "appropriate" so the terms can be easily located within the standards. Adding definitions is unnecessary because Auditing Standard No. 15 already describes the terms "sufficiency" and "appropriateness" and explains the relevant characteristics of each.[214]

Commenters stated that the term "persuasive" was used in the reproposed standard, *The Auditor's Responses to the Risks of Material Misstatement,* and recommended that the Board clarify in the reproposed audit evidence standard the manner in which the persuasiveness of evidence affects the evaluation of audit evidence. The concept of "persuasiveness of evidence" is discussed in Auditing Standard No. 13.[215]

E. Relevance and Reliability

The reproposed standard contained a discussion about the relevance and reliability of audit evidence. The reproposed standard stated that the audit evidence must be both relevant and reliable to support the auditor's conclusions about the subject of the audit procedure. The reproposed standard stated that "[e]vidence provided by original documents is more reliable than evidence provided by photocopies or facsimiles, or documents that have been filmed, digitized, or otherwise converted into electronic form, the reliability of which depends on the controls over the conversion and maintenance of those documents."

One commenter suggested that the standard be revised to indicate that electronic information, subject to proper controls, is in many ways more reliable than physical documentation. The language from the reproposed standard was retained in Auditing Standard No. 15.[216] Although evidence sometimes is available only in electronic form and the reliability of electronic evidence depends on the controls over that information, an authentic original document generally is more reliable than an electronic form of that document.

The reproposed standard stated that the relevance of audit evidence refers to its relationship to the assertion or to the objective of the control being tested. The relevance of audit evidence depends on (a) the design of the audit procedure used to test the assertion or control, and (b) the timing of the audit procedure used to test the assertion or control. One commenter recommended the description of the term "relevance" should be expanded to include the following statements:

> Relevance deals with the logical connection with, or bearing upon, the purpose of the audit procedure and, when appropriate, the assertion under consideration. The relevance of information to be used as audit evidence may be affected by the direction of testing.

Auditing Standard No. 15 retains the description included in the reproposed standard because it is clearer than the suggested revision.[217]

The reproposed standard indicated that "[t]he auditor is not expected to be an expert in document authentication. However, if conditions indicate that a document may not be authentic or that the terms in a document have been modified but that the modifications have not been disclosed to the auditor, the auditor should modify the planned audit procedures or perform additional audit procedures to respond to those conditions and should evaluate the effect, if any, on the other aspects of the audit."

---

[214] Paragraphs 5–6 of Auditing Standard No. 15.

[215] Paragraph 39 of Auditing Standard No. 13.

[216] Paragraph 8 of Auditing Standard No. 15.

[217] Paragraph 7 of Auditing Standard No. 15.

One commenter suggested that the requirement for the auditor to modify the planned audit procedures or perform additional audit procedures in response to concerns about the authenticity of documents should be linked to professional skepticism. The commenter also stated that many modifications are routine. The requirement was not meant to require the auditor to perform unlimited procedures but, rather, to perform the procedures necessary to address the issue in the circumstances. Auditing Standard No. 15 retains this requirement as reproposed.[218] Although professional skepticism is important in these situations, it is not the only factor that determines the procedures necessary to address the matter.

F. Financial Statement Assertions

In representing that the financial statements are presented fairly in conformity with the applicable financial reporting framework, management implicitly or explicitly makes assertions regarding the recognition, measurement, presentation, and disclosure of the various elements of financial statements and related disclosures. Financial statement assertions are an important consideration for audits performed in accordance with PCAOB standards. For example, AU sec. 319 required auditors to perform substantive procedures for relevant assertions in audits of financial statements. Auditing Standard No. 5 requires auditors to obtain evidence about the design and operating effectiveness of controls over relevant assertions in audits of internal control.

The reproposed standard retained the five categories of financial statement assertions in AU sec. 326 and Auditing Standard No. 5. Two commenters suggested that the Board use different descriptions for financial statement assertions. One commenter suggested using other standard-setters' descriptions of financial statement assertions. The other commenter suggested using a different description of assertions. Auditing Standard No. 15 retains the categories of assertions as reproposed.[219] Like Auditing Standard No. 5,[220] Auditing Standard No. 15 allows auditors the flexibility to use categories of assertions that differ from the assertions listed in the standard under specified conditions.[221]

G. Inquiry

The reproposed standard stated that inquiry of company personnel, by itself, does not provide sufficient audit evidence to reduce audit risk to an appropriately low level for a relevant assertion or to support a conclusion about the effectiveness of a control. One commenter suggested that the note to paragraph 17 of the reproposed standard be revised to include "design and operating effectiveness of a control" and that the auditor should perform audit procedures in addition to the use of inquiry to obtain sufficient appropriate audit evidence. Auditing Standard No. 15 retains the language from the reproposed standard. The phrase "effectiveness of a control" encompasses both design and operating effectiveness. It is not considered necessary to add that the auditor should perform additional procedures, since Auditing Standard No. 15 states that inquiry, by itself, does not provide sufficient audit evidence.[222]

---

[218] Paragraph 9 of Auditing Standard No. 15.

[219] Paragraph 11 of Auditing Standard No. 15.

[220] See the note to paragraph 28 of Auditing Standard No. 5.

[221] Paragraph 12 of Auditing Standard No. 15.

[222] Paragraph 17 of Auditing Standard No. 15.

H. Confirmation

The reproposed standard stated that a confirmation represents audit evidence obtained by the auditor as a direct response to the auditor from a third party. Some commenters suggested that the reproposed standard clarify that a confirmation be written. Auditing Standard No. 15 has been revised to state that a confirmation response represents a particular form of audit evidence obtained by the auditor from a third party in accordance with PCAOB standards.[223] The Board has a separate standards-setting project on confirmations that, among other things, will address the use of written confirmation or other alternative forms of confirmation.[224]

I. Analytical Procedures

The reproposed standard described analytical procedures as an audit procedure for obtaining evidence. One commenter suggested adding "scanning" as part of analytical procedures. Scanning is a means for selecting items for testing, not a separate audit procedure. The description of analytical procedures in Auditing Standard No. 15 is retained as reproposed.[225]

J. Selecting Items for Testing to Obtain Audit Evidence

Auditing Standard No. 15 contains a section on selecting items for testing that is adapted from an auditing interpretation of AU sec. 350.[226] The standard also states that the auditor should determine the means of selecting items for testing to obtain evidence that, in combination with other relevant evidence, is sufficient to meet the objective of the audit procedure.[227]

The reproposed standard defined audit sampling as the application of an audit procedure to less than 100 percent of the occurrences of a control or items comprising an account for the purpose of evaluating some characteristic of the control or account. One commenter stated that the definition in the standard should be conformed to AU sec. 350. Auditing Standard No. 15 reflects revisions that align the standard with AU sec. 350.

K. Other Changes

As noted in the reproposing release, certain topics that were included in AU sec. 326 were not carried forward to the reproposed standard and Auditing Standard No. 15. AU sec. 326 discussed the use of audit objectives, and an appendix to that standard illustrated how auditors might use assertions to develop audit objectives and substantive tests of inventory. Such a discussion is not necessary because the auditing standards do not require auditors to establish audit objectives to link assertions to substantive procedures. However, omission of this discussion would not preclude auditors from using audit objectives in designing their audit procedures.

[225] Paragraph 21 of Auditing Standard No. 15.

[226] AU sec. 9350, *Audit Sampling: Auditing Interpretations of AU sec. 350.*

[227] Paragraph 22 of Auditing Standard No. 15.

X. Amendments to PCAOB Standards

A. Amendments to Auditing Standard No. 3

In the release accompanying the original proposed standards, the Board sought comment on the need for specific documentation requirements regarding the risk assessment procedures. Responses from commenters were mixed. Some commenters supported adding specific documentation requirements, other commenters stated that the requirements in Auditing Standard No. 3, *Audit Documentation,* were adequate, and one commenter was ambivalent.

After consideration of these comments and additional analysis, the amendments accompanying the reproposed standards included certain amendments to Auditing Standard No. 3 to (a) specify certain required documentation regarding the auditor's risk assessments and related responses, (b) align certain terms and provisions of Auditing Standard No. 3 with the risk assessment standards, and (c) incorporate the principles for documentation of disagreements among engagement team members. For example, the amendments indicated that the auditor's documentation should include the following:

1. A summary of the identified risks of misstatement and the auditor's assessment of risks of material misstatement at the financial statement and assertion levels; and
2. The auditor's responses to the risks of material misstatement, including linkage of the responses to those risks.

Also, the requirements regarding documentation of significant findings or issues and related matters were expanded to require documentation regarding the significant risks identified and the results of the auditing procedures performed in response to those risks.

A commenter indicated that the additional documentation requirement will result in "unnecessary linkage" and "a matrix-like mentality" to the audit documentation. The documentation requirements are intended to enhance the auditor's ability to link identified and assessed risks to appropriate responses and could help reviewers understand the areas of greatest risk and the auditor's responses to those risks. In addition to these documentation requirements, the auditor would continue to be responsible for preparing documentation as required by other provisions of Auditing Standard No. 3, e.g., to demonstrate that the engagement complied with the standards of the PCAOB.[228]

Some commenters suggested placing the documentation requirements in the respective risk assessment standards rather than amending Auditing Standard No. 3. The risk assessment standards are foundational standards; therefore, the required documentation related to the risk assessment standards is included in Auditing Standard No. 3.[229] Future decisions about the placement of new documentation requirements will be made during the course of the respective standards-setting projects.

B. Amendments to Auditing Standard No. 4

The amendment to Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist,* is limited to changing

---

[228] Paragraph 5.a. of Auditing Standard No. 3.

[229] Paragraphs 9, 12, and 19 of Auditing Standard No. 3, as amended.

the word "competent" to "appropriate" when that word is used in reference to audit evidence.

C. Amendments to Auditing Standard No. 5

The amendments to Auditing Standard No. 5 that accompanied the reproposed standards were limited to changing the phrase "any assistants" to "the members of the engagement team," changing the word "competent" to "appropriate" when that word is used in reference to audit evidence, and updating references to auditing standards that are being superseded or amended. These amendments are retained as reproposed.

One commenter suggested a series of additional amendments to Auditing Standard No. 5, which primarily involved removing certain paragraphs from Auditing Standard No. 5 that relate to risk assessment procedures or other requirements that are included in the risk assessment standards. The Board is not removing the requirements regarding risk assessment procedures from Auditing Standard No. 5 because those requirements are important to understanding the other provisions of Auditing Standard No. 5 for performing an audit of internal control.

D. Amendments to Auditing Standard No. 6

The amendments to Auditing Standard No. 6, *Evaluating Consistency of Financial Statements,* are limited to removing a footnote stating that the term "error" as used in Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections* ("SFAS No. 154"), is equivalent to "misstatement" as used in the auditing standards and updating a reference to a standard that is being superseded. This technical change is made because the footnote regarding misstatements in Auditing Standard No. 6 refers to SFAS No. 154, whereas the definition of "misstatement" in Auditing Standard No. 14 on evaluating audit results is neutral regarding the financial reporting framework. However, this technical change does not alter the fact that an error under accounting standards generally accepted in the United States is a misstatement under Auditing Standard No. 14.

E. Amendments to Auditing Standard No. 7

The amendments to Auditing Standard No. 7, *Engagement Quality Review,* update footnote 3 and the note to paragraph 10 to replace a reference to an interim standard that is superseded and to update the definitions of the terms "engagement partner" and "significant risk" to conform to the definitions in the risk assessment standards.

F. Amendments to Interim Auditing Standards

1. Superseded Sections

The risk assessment standards supersede the following sections of PCAOB interim auditing standards:

- AU sec. 311, *Planning and Supervision*
- AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*
- AU sec. 313, *Substantive Tests Prior to the Balance Sheet Date*

- AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*
- AU sec. 326, *Evidential Matter*
- AU sec. 431, *Adequacy of Disclosure in Financial Statements*

Similarly, the auditing interpretations of AU secs. 311, 312, and 350 have been incorporated into the risk assessment standards and thus are superseded. The auditing interpretations of AU sec. 326, except for Interpretation No. 2 (AU secs. 9326.06–.23), also are superseded.[230]

2. AU sec. 316, Consideration of Fraud in a Financial Statement Audit

The relevant requirements regarding identifying and assessing fraud risks, principally AU secs. 316.14–.45; responding to fraud risks, principally AU secs. 316.46–.50; and evaluating audit results, principally AU secs. 316.68–.78, have been incorporated into Auditing Standard Nos. 12, 13, and 14, respectively. The remaining portions of AU sec. 316 describe important principles regarding the auditor's responsibility with respect to fraud and more detailed requirements regarding the auditor's responses to fraud risks. Topics covered in the remaining portions of AU sec. 316, as amended, include the following:

- A description of fraud and its characteristics,
- The importance of exercising professional skepticism,
- Examples of fraud risk factors,
- Examples of audit procedures performed to respond to fraud risks involving fraudulent financial reporting and misappropriation of assets, and
- Requirements regarding procedures to further address the risk of material misstatement due to fraud involving management override of controls, including examining journal entries and other adjustments for evidence of possible material misstatement due to fraud; reviewing accounting estimates for biases that could result in material misstatement due to fraud; and evaluating the business rationale for significant unusual transactions.

3. AU sec. 329, Analytical Procedures

The discussion in AU sec. 329 regarding analytical procedures performed during audit planning, principally AU secs. 329.03 and 329.06–.08, is incorporated into Auditing Standard No. 12. Similarly, the requirements regarding analytical procedures in the overall review, principally AU secs. 329.23–.24, are incorporated into Auditing Standard No. 14. The remaining portion of AU sec. 329 relates to analytical procedures performed as substantive procedures. Therefore, AU sec. 329 is retitled, *Substantive Analytical Procedures,* which more accurately reflects the content of the amended standard.

A standard that focuses solely on substantive analytical procedures highlights more clearly the requirements that apply to analytical procedures performed for that purpose, including, the higher degree of precision in substantive analytical procedures needed to provide the necessary level of assurance. The Board has observed instances in which auditors performed substantive procedures to

[230] Interpretation No. 2 relates in part to AU sec. 336 and AU sec. 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments,* and it will be evaluated in connection with standards-setting projects related to those standards.

test accounts without meeting the requirements in AU sec. 329 for substantive analytical procedures.[231]

4. AU sec. 336, Using the Work of a Specialist

The text of footnote 1 to paragraph .01 and of paragraph .05 were amended to clarify that AU sec. 336 does not apply to situations in which persons who participate in the audit have specialized skills or knowledge in accounting or auditing (e.g., IT specialists and income tax specialists) and to specialists employed by the firm. Auditing Standard No. 10 applies to those situations. Those clarifications were previously included in the reproposed standard on audit planning and supervision.

5. AU sec. 350, Audit Sampling

The discussion in AU sec. 350 regarding audit risk and tolerable misstatement has been amended to align more closely with the terminology used in the risk assessment standards.

The reproposed standards included amendments to AU secs. 350.23 and 350.38, which explained more specifically the principles in the standard for determining sample sizes when nonstatistical sampling approaches are used. Some commenters expressed concern that the reproposed amendments would have required auditors who use nonstatistical sampling methods to compute sample sizes under both statistical and nonstatistical methods to demonstrate that the sample size under the nonstatistical method equaled or exceeded the sample size determined using a statistical method.

Commenters suggested that the standard should state that it is not necessary to compute sample sizes using statistical methods. Including such a sentence in the standard might be misunderstood by auditors and weaken the requirement of the amended standard. The reproposed amendments do not require auditors to compute sample sizes using statistical methods in all instances to demonstrate compliance with the requirements. For example, the use of a nonstatistical sampling methodology that is adapted appropriately from a statistical sampling method also could demonstrate compliance. However, calculating a sample size that is not based on the relevant factors in AU sec. 350 is not in compliance with the standard. Accordingly, the amendments are retained as reproposed.

6. AU sec. 543, Part of Audit Performed by Other Independent Auditors, and interpretations

A note was added to paragraph .01 to clarify that Auditing Standard No. 10 applies to situations not covered by AU sec. 543 in which the auditor engages other accounting firms or other accountants to participate in the audit. Paragraph .12 was amended to align AU sec. 543 with related amendments to Auditing Standard No. 3. Footnote 4 to paragraph .16 of AU sec. 9543*, Part of Audit Performed by Other Independent Auditors: Auditing Interpretations of Section 543,* is deleted because it refers to an interim standard that is being superseded.

7. Other Amendments to the Interim Auditing Standards

For the following interim auditing standards, the amendments are limited to conforming terminology to the risk assessment standards and updating references to auditing standards that are being superseded or amended:

---

[231] See, e.g., PCAOB Release 2007-010, *Report on the PCAOB's 2004, 2005, and 2006 Inspections of Domestic Triennially Inspected Firms* (October 22, 2007).

- AU sec. 110, *Responsibilities and Functions of the Independent Auditor*
- AU sec. 150, *Generally Accepted Auditing Standards*
- AU sec. 210, *Training and Proficiency of the Independent Auditor*
- AU sec. 230, *Due Professional Care in the Performance of Work*
- AU sec. 310, *Appointment of the Independent Auditor*
- AU sec. 315, *Communications Between Predecessor and Successor Auditors*
- AU sec. 317, *Illegal Acts by Clients*
- AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.
- AU sec. 324, *Service Organizations*
- AU sec. 328, *Auditing Fair Value Measurements and Disclosures*
- AU sec. 330, *The Confirmation Process*
- AU sec. 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*
- AU sec. 333, *Management Representations*
- AU sec. 334, *Related Parties,* and AU sec. 9334, *Related Parties: Auditing Interpretations of Section 334*
- AU sec. 9336, *Using the Work of a Specialist: Auditing Interpretations of Section 336*
- AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*
- AU sec. 342, *Auditing Accounting Estimates*, and AU sec. 9342, *Auditing Accounting Estimates: Auditing Interpretations of Section 342*
- AU sec. 380, *Communication With Audit Committees*
- AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*
- AU sec. 508, *Reports on Audited Financial Statements,* and AU sec. 9508, *Reports on Audited Financial Statements: Auditing Interpretations of Section 508*
- AU sec. 530, *Dating of the Independent Auditor's Report*
- AU sec. 722, *Interim Financial Information*

G. Amendments to Interim Ethics Standards

In the interim ethics standards, ET sec. 102, *Integrity and Objectivity,* the amendments are limited to updating references to auditing standards that are being superseded or amended.

XI. Other Topics Not Related to the Reproposed Standards

The comment letters on the reproposed standards included certain comments that relate to standards-setting matters other than the reproposed standards. The following paragraphs discuss those comments.

A. Comparison with the Standards of the International Auditing and Assurance Standards Board and the Auditing Standards Board of the American Institute of Certified Public Accountants

In developing its original proposed standards, the Board took into account, among other things, the risk assessment standards of the International Auditing and Assurance Standards Board ("IAASB") and the Auditing Standards Board of the American Institute of Certified Public Accountants ("ASB"). The release accompanying the reproposed standards included a comparison of the objectives and requirements of the reproposed standards to the analogous standards of the IAASB and ASB.

Some commenters requested additional details about differences between the reproposed standards and the IAASB or ASB standards or clarifications regarding specific requirements in the reproposed standards for which the language was not identical to IAASB or ASB standards.

In analyzing comments on the appendix to the reproposed standards that compared the reproposed standards to the analogous standards of the IAASB and ASB, the Board observed that a number of the explanations sought by commenters, e.g., the reasons for the differences in certain requirements were discussed elsewhere in the release accompanying the reproposed standards, e.g., in Appendix 9 to that release, which is analogous to this appendix (Appendix 10) to this release.

This appendix provides the principal discussion of the rationale for the objectives and requirements in the Board's standards. Appendix 11 of this release discusses certain differences between the objectives and requirements of the PCAOB standards and the analogous standards of the IAASB and ASB. When a difference between the Board's standards and the analogous standards of the IAASB and ASB is noted, Appendix 11 contains a reference to the discussion of the Board's requirements in this appendix (Appendix 10).

B. Standards-setting Process

Some commenters suggested changes to the Board's standards-setting process. These comments primarily relate to the extent to which the Board uses the standards of the IAASB and ASB in its standards-setting and the use of external task forces in drafting standards.

In previous releases on its proposed risk assessment standards, the Board has stated that it has sought to eliminate unnecessary differences with the risk assessment standards and those of other standards-setters. However, because the Board's standards must be consistent with the Board's statutory mandate,[232] differences will continue to exist between the Board's standards and the standards of the IAASB and ASB e.g., when the Board decides to retain an existing

[232] E.g., Section 101 of the Sarbanes-Oxley Act of 2002 (the "Act"), 15 U.S.C. §7211.

requirement in PCAOB standards that is not included in IAASB or ASB standards. Also, certain differences are often necessary for the Board's standards to be consistent with relevant provisions of the federal securities laws or other existing standards or rules of the Board. Also, the Board's standards-setting activities are informed by and developed to some degree, in response to observations from its oversight activities.

The Board has a number of means available to seek additional comments from external parties regarding its standards-setting activities, including meetings with its Standing Advisory Group ("SAG"), issuing concept releases or reproposing standards or rules, and conducting public roundtables. Although these are not the only means available to the Board, they have been used because they offer the Board the ability to obtain comments from a diverse group of interested parties through a public process.

The Board continually endeavors to improve its processes, including its standards-setting process, and considers comments from the public as it does so. For example, the Board has undertaken certain steps to enhance the transparency of its standards-setting process, including maintaining on its Web site its standards-setting agenda and discussing the status of projects in public meetings with the SAG. This release has also been expanded to provide additional discussion of and explanation for the Board's conclusions regarding the risk assessment standards. Some commenters acknowledged the Board's efforts to increase the transparency of its process.

C. Other Standards-setting Projects

Commenters on the reproposed standards also recommended a number of additional standards-setting or standards-related projects for the Board. Examples of such projects included creating a codification of the Board's standards; creating a glossary of terms used in the Board's standards, issuing a concept release for the review of the Board's interim standards, developing a standard describing the overall objectives of the audit, similar to ISA 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing,* and developing guidance related to how the Board would evaluate the reasonableness of judgments based on PCAOB auditing standards.

The Board continually assesses its standards-setting and related projects based upon the need for improvements in standards or additional guidance in response to current developments, observations from the Board's oversight activities, comments received from the public, and other factors. As mentioned previously, the Board's standards-setting agenda is maintained on the Board's website. The Board is considering these comments as it assesses its agenda.

Appendix 11—Comparison of the Objectives and Requirements of the Accompanying PCAOB Auditing Standards with the Analogous Standards of the IAASB and the Auditing Standards Board of the AICPA

This appendix discusses certain differences between the objectives and requirements of the PCAOB auditing standards accompanying this release and the analogous standards of the International Auditing and Assurance Standards Board ("IAASB") and the analogous clarified or proposed standards of the Auditing Standards Board ("ASB") of the American Institute of Certified Public Accountants ("AICPA"). This analysis does not cover the application and explanatory material in the IAASB standards or the ASB standards.[1]

This appendix is provided for informational purposes only. It is not a substitute for the PCAOB auditing standards themselves, which are presented in Appendices 1–8 of this release and discussed further in Appendix 10.

Appendix 10 to this release provides the principal discussion of the rationale for the objectives and requirements in the Board's standards. Thus, this appendix includes cross-references to the relevant explanation of the PCAOB requirements.

This analysis may not represent the views of the IAASB or ASB regarding their standards.

Auditing Standard No. 8—Audit Risk

Analogous discussions of the components of audit risk are included in the IAASB's International Standard on Auditing ("ISA") 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing* and the ASB's clarified Statement on Auditing Standards ("SAS"), *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Generally Accepted Auditing Standards*, respectively.

1. Audit Risk and Reasonable Assurance

PCAOB

Auditing Standard No. 8 states that to form an appropriate basis for expressing an opinion on the financial statements, the auditor must plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement due to error or fraud. Reasonable assurance

[1] Paragraph A59 of ISA 200 states that the Application and Other Explanatory Material section of the ISAs "does not in itself impose a requirement," but "is relevant to the proper application of the requirements of an ISA." Paragraph A63 of the SAS, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing*, states that although application and other explanatory material "does not in itself impose a requirement, it is relevant to the proper application of the requirements of an AU section."

is obtained by reducing audit risk to an appropriately low level through applying due professional care, including obtaining sufficient appropriate audit evidence.[2]

Auditing Standard No. 8 uses the phrase "appropriately low level" because the term "appropriately" is aligned more closely with the concept of reasonable assurance whereas "acceptable level" might be misunderstood as allowing auditors to vary the audit efforts based upon their personal tolerance for risk. Appendix 10 provides additional discussion regarding the use of the phrase "appropriately low level."[3]

Auditing Standard No. 8 also clarifies that obtaining sufficient appropriate audit evidence is part of applying due professional care. Appendix 10 provides additional discussion regarding due professional care and sufficient appropriate audit evidence.[4]

IAASB and ASB

The ISA states:

> To obtain reasonable assurance, the auditor shall obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion.

The SAS includes a requirement similar to the ISA's requirement.

2. Detection Risk and Substantive Procedures

PCAOB

Auditing Standard No. 8 states that as the appropriate level of detection risk decreases, the evidence from substantive procedures that the auditor should obtain increases. This requirement was adapted from AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*,[5] and it parallels a requirement in Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.[6] Appendix 10 provides additional discussion regarding detection risk.[7]

IAASB and ASB

The ISA and the SAS do not include an analogous requirement.

Auditing Standard No. 9—Audit Planning

In this section, the analogous IAASB and ASB standards are, unless indicated otherwise, ISA 300, *Planning an Audit of Financial Statements,* and the clarified SAS, *Planning an Audit*, respectively.

---

[2] AU sec. 110, *Responsibilities and Functions of the Independent Auditor,* and AU sec. 230, *Due Professional Care in the Performance of Work,* provide further discussion of reasonable assurance.

[3] Section II.B. of Appendix 10.

[4] Section II.C. of Appendix 10.

[5] AU sec. 319 is superseded by the risk assessment standards.

[6] Paragraph 37 of Auditing Standard No. 13.

[7] Section II.E. of Appendix 10.

1. Planning an Audit

PCAOB

Auditing Standard No. 9 contains a requirement to properly plan the audit. This requirement is consistent with the first standard of fieldwork in AU sec. 150, *Generally Accepted Auditing Standards.*

IAASB and ASB

The ISA and the SAS do not include an analogous requirement, although planning the audit is referenced in the objectives of the standards.

2. Audit Strategy and Audit Plan

PCAOB

Auditing Standard No. 9 requires the auditor to establish an overall audit strategy that sets the scope, timing, and direction of the audit and guides the development of the audit plan. When developing the audit strategy and audit plan, the standard requires the auditor to evaluate whether certain matters specified in the standard are important to the company's financial statements and internal control over financial reporting and, if so, how they will affect the auditor's procedures As discussed in Appendix 10, these matters are adapted from Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* and are important for both the audit of financial statements and an audit of internal control over financial reporting ("audit of internal control").[8]

In establishing the overall audit strategy, Auditing Standard No. 9 also requires the auditor to take into account certain matters, such as the reporting objectives and the factors that are significant in directing the activities of the engagement team, results of preliminary engagement activities and the auditor's evaluation of the important matters in accordance with paragraph 7, and the nature, timing, and extent of resources necessary to perform the engagement. Appendix 10 discusses this requirement with more detail.[9]

Auditing Standard No. 9 requires the auditor to develop and document an audit plan that includes a description of the planned nature, timing, and extent of risk assessment procedures; tests of controls, substantive procedures, and other audit procedures. The audit plan required by Auditing Standard No. 9 encompasses all of the audit procedures to be performed, i.e., it is not limited to procedures at the assertion level. Appendix 10 provides additional discussion regarding developing the audit strategy and audit plan.[10]

IAASB and ASB

The ISA and the SAS require the auditor to establish an overall audit strategy that sets the scope, timing, and direction of the audit and guides the development of the audit plan. Those standards do not have a requirement analogous to the Auditing Standard No. 9 requirement to evaluate specific matters in developing the audit strategy and audit plan.

---

[8] Section III.E. of Appendix 10.

[9] Section III.F. of Appendix 10.

[10] Ibid.

The ISA states:

> In establishing the overall audit strategy, the auditor shall:
>
> (a) Identify the characteristics of the engagement that define its scope;
>
> (b) Ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required;
>
> (c) Consider the factors that, in the auditor's professional judgment, are significant in directing the engagement team's efforts;
>
> (d) Consider the results of preliminary engagement activities and, where applicable, whether knowledge gained on other engagements performed by the engagement partner for the entity is relevant; and
>
> (e) Ascertain the nature, timing and extent of resources necessary to perform the engagement.

The SAS includes a requirement similar to the ISA's requirement.

Both the ISA and the SAS require the auditor to develop an audit plan that shall include a description of the nature, timing, and extent of planned further auditor procedures at the assertion level.

3. Multi-location Engagements

PCAOB

Auditing Standard No. 9 states that the auditor should determine the extent to which auditing procedures should be performed at selected locations or business units to obtain sufficient appropriate evidence to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. This includes determining the locations or business units at which to perform audit procedures, as well as the nature, timing, and extent of the audit procedures to be performed at those individual locations or business units. The auditor should assess the risks of material misstatement to the consolidated financial statements associated with the location or business unit and correlate the amount of audit attention devoted to the location or business unit with the degree of risk of material misstatement associated with that location or business unit. Auditing Standard No. 9 also provides a list of factors that are relevant to the assessment of the risks of material misstatement associated with a particular location or business unit and the determination of the necessary audit procedures.

The provisions in Auditing Standard No. 9 are applicable to all multi-location audits. Appendix 10 discusses the basis for the requirements and explains how the requirements should be applied in audits in which part of the work is performed by other auditors of financial statements of individual locations or business units that are included in the consolidated financial statements.[11]

IAASB and ASB

ISA 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors),* and the proposed SAS, *Audits of*

[11] Section III.G. of Appendix 10.

Group Financial Statements (Including the Work of Component Auditors), apply to group audits. Under ISA 600, group audits are defined as the audit of group financial statements, which are financial statements that include the financial information of more than one component, and the component auditor is an auditor who, at the request of the group engagement team, performs work on financial information related to a component for the group audit.

ISA 600 and the proposed SAS describe the scope of audit procedures to be performed at individual components, depending upon, among other things, whether the components are significant components as described in the respective standards.

Auditing Standard No. 10—Supervision of the Audit Engagement

In this section, unless indicated otherwise, the analogous IAASB standards are ISA 300, *Planning an Audit of Financial Statements,* and ISA 220, *Quality Control for an Audit of Financial Statements,* (collectively referred to in this section as "the ISAs"); and the analogous ASB standards are the clarified SAS, *Planning an Audit*, and the proposed SAS, *Quality Control for an Audit of Financial Statements*, (collectively referred to in this section as "the SASs").

1. Supervision

PCAOB

Auditing Standard No. 10 states that the engagement partner is responsible for supervising other engagement team members and may seek assistance from appropriate engagement team members. Auditing Standard No. 10 also requires the engagement partner, and engagement team members who assist the engagement partner in supervision, to properly supervise the members of the engagement team, describes the necessary elements of proper supervision, and describes the factors that affect the necessary extent of supervision. These requirements are adapted from AU sec. 311, *Planning and Supervision.*[12] Appendix 10 provides additional discussion regarding these requirements.[13]

The requirements in the ISAs and the SASs do not describe the elements of supervision or factors that affect supervision.

IAASB and ASB

The ISAs and the SASs require the auditor to plan the nature, timing, and extent of direction and supervision of engagement team members and review their work. The ISAs and SASs require the engagement partner to "take responsibility for the direction, supervision and performance of the audit engagement in compliance with professional standards and applicable legal and regulatory requirements and for the auditor's report being appropriate in the circumstances."

---

[12] AU sec. 311 is superseded by Auditing Standard No. 9 and Auditing Standard No. 10.

[13] Section IV.D. of Appendix 10.

2. Supervision of Engagement Team Members

PCAOB

Auditing Standard No. 10 requires the engagement partner and other engagement team members performing supervisory activities to: (a) inform engagement team members of their responsibilities, including the objectives of the procedures that they are to perform; the nature, timing and extent of procedures they are to perform; and matters that could affect the procedures to be performed or the evaluation of the results of those procedures, (b) direct engagement team members to bring significant accounting and auditing issues arising during the audit to the attention of the engagement partner or other engagement team members performing supervising activities, and (c) review the work of engagement team members to evaluate whether the work was performed, the objectives of the procedures were achieved, and the results of the work support the conclusions. Appendix 10 provides additional discussion regarding this requirement.[14]

IAASB

The ISAs state:

> The engagement partner shall take responsibility for:
>
> (a) The direction, supervision and performance of the audit engagement in compliance with professional standards and applicable legal and regulatory and legal requirements; and
>
> (b) The auditor's report being appropriate in the circumstances.
>
> The engagement partner shall take responsibility for reviews being performed in accordance with the firm's review policies and procedures.
>
> On or before the date of the auditor's report, the engagement partner shall, through a review of the audit documentation and discussion with the engagement team, be satisfied that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued.
>
> The auditor shall plan the nature, timing and extent of direction and supervision of engagement team members and the review of their work.

ASB

The SAS includes requirements similar to the ISAs' requirements.

3. Extent of Supervision

PCAOB

To determine the extent of supervision necessary for engagement team members to perform their work as directed and form appropriate conclusions, Auditing Standard No. 10 requires the engagement partner and other engagement team members performing supervisory activities to take into account the nature of company, the nature of the assigned work for each team member, the

[14] Section IV.E. of Appendix 10.

risks of material misstatement, and the knowledge, skill, and ability of each engagement team member. Appendix 10 provides additional discussion regarding this requirement.[15]

IAASB and ASB

The ISAs and SASs do not have an analogous requirement for the auditor to determine the extent of supervision necessary for engagement team members.

Auditing Standard No. 11—Consideration of Materiality in Planning and Performing an Audit

In this section, the analogous IAASB and ASB standards are ISA 320, *Materiality in Planning and Performing an Audit,* and the clarified SAS, *Materiality in Planning and Performing an Audit*, and the proposed SAS, *Audits of Group Financial Statements (Including the Work of Component Auditors),* respectively.

1. Definition of Materiality

PCAOB

Auditing Standard No. 11 requires the auditor to establish a materiality level for the financial statements as a whole that is appropriate in light of the particular circumstances, including consideration of the company's earnings and other relevant factors. The requirement in Auditing Standard No. 11 is based on the concept of materiality that is articulated by the courts in interpreting the federal securities laws. Appendix 10 discusses the concept of materiality used in Auditing Standard No. 11.[16]

IAASB and ASB

The ISA states, "When establishing the overall audit strategy, the auditor shall determine materiality for the financial statements as a whole."

The SAS has a requirement similar to the ISA's requirement.

2. Materiality in the Context of an Audit

PCAOB

Auditing Standard No. 11 requires the auditor to plan and perform audit procedures to detect misstatements that, individually or in combination with other misstatements, would result in material misstatement of the financial statements in order to obtain reasonable assurance about whether the financial statements are free of material misstatement. Appendix 10 discusses the concept of materiality in the context of an audit.[17]

---

[15] Ibid.

[16] Section V.B. of Appendix 10.

[17] Ibid.

IAASB

ISA 200 states:

> In conducting an audit of financial statements, the overall objectives of the auditor are:
>
> a. To obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, thereby enabling the auditor to express an opinion on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework; and
>
> b. To report on the financial statements, and communicate as required by the ISAs, in accordance with the auditor's findings.

ASB

The SAS includes an objective similar to the ISA's objective.

3. Tolerable Misstatement and Performance Materiality

PCAOB

Auditing Standard No. 11 requires the auditor to determine tolerable misstatement for purposes of assessing risks of material misstatement and planning and performing audit procedures at the account or disclosure level. Auditing Standard No. 11 uses the term "tolerable misstatement," which is also used in other PCAOB standards.[18] Appendix 10 discusses the use of the term "tolerable misstatement" in more detail.[19]

IAASB and ASB

The ISA and SAS require the auditor to determine "performance materiality" for purposes of assessing the risks of material misstatement and determining the nature, timing, and extent of further audit procedures.

4. Determining Tolerable Misstatement

PCAOB

Auditing Standard No. 11 contains a requirement to take into account the nature, cause (if known), and amount of misstatements that were accumulated in audits of the financial statements of prior periods when determining tolerable misstatement and planning and performing audit procedures. This requirement is adapted from AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*. Appendix 10 provides further discussion regarding this requirement.[20]

IAASB and ASB

The ISA and SAS do not have an analogous requirement.

---

[18] Paragraph .18 of AU sec. 350, *Audit Sampling*.

[19] Section V.E. of Appendix 10.

[20] Ibid.

5. Multi-location Determination of Tolerable Misstatement

PCAOB

In multi-location engagements, Auditing Standard No. 11 requires the auditor to determine tolerable misstatement for the individual locations or business units at an amount that reduces to an appropriately low level the probability that the total of uncorrected and undetected misstatements would result in material misstatement of the consolidated financial statements. The standard also requires the tolerable misstatement at an individual location to be less than the established materiality level for the financial statements as a whole. Appendix 10 provides further discussion regarding consideration of materiality for multi-location engagements.[21]

IAASB

ISA 600 requires the group engagement team to determine, among other things, component materiality. The ISA states:

> Component materiality for those components where component auditors will perform an audit or a review for purposes of the group audit. To reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements in the group financial statements exceeds materiality for the group financial statements as a whole, component materiality shall be lower than materiality for the group financial statements as a whole.

ASB

Proposed SAS, *Audits of Group Financial Statements (Including the Work of Component Auditors)*, requires the group engagement team to determine among other things, component materiality. The proposed SAS states:

> Component materiality for those components on which an audit or other specified audit procedures will be performed. To reduce the risk that the aggregate of detected and undetected misstatements in the group financial statements exceeds the materiality for the group financial statements as a whole, component materiality should be lower than the materiality for the group financial statements as a whole.

6. Reevaluating Materiality and Tolerable Misstatement

PCAOB

Auditing Standard No. 11 requires the auditor to reevaluate the established materiality level or levels and tolerable misstatement when there is a substantial likelihood that misstatements of amounts that differ significantly from the materiality level or levels that were established initially would influence the judgment of a reasonable investor. The requirement reflects the perspective of a reasonable investor, whereas the analogous requirements in the ISA and SAS reflect an auditor's perspective. Appendix 10 provides additional discussion regarding materiality from the perspective of a reasonable investor[22] and the reevaluation of materiality.[23]

---

[21] Section V.F. of Appendix 10.

[22] Section V.B. of Appendix 10.

[23] Section V.G. of Appendix 10.

IAASB and ASB

The ISA and the SAS require the auditor to "revise materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances, or disclosures) in the event of becoming aware of information during the audit that would have caused the auditor to have determined a different amount (or amounts) initially."

Auditing Standard No. 12—Identifying and Assessing Risks of Material Misstatement

In this section, the analogous IAASB standards are ISA 315, *Identifying and Assessing the Risks of Material Misstatement Through Understanding the Entity and Its Environment,* and ISA 240, *The Auditor's Responsibilities Relating to Fraud In An Audit of Financial Statements* (collectively referred to in this section as "the ISAs"). The analogous ASB standards are the clarified SAS, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatements* (Redrafted) and proposed SAS, *Consideration of Fraud in a Financial Statement Audit* (Redrafted) (collectively referred to in this section as "the SASs").[24]

1. Objective

PCAOB

The objective of Auditing Standard No. 12 is to identify and appropriately assess the risks of material misstatement, thereby providing a basis for designing and implementing responses to the risks of material misstatement. Auditing Standard No. 12 requires the auditor to perform other risk assessment procedures in addition to obtaining an understanding of the company and its environment. Appendix 10 provides additional discussion regarding the objective of the standard.[25]

IAASB and ASB

The ISAs state:

> The objective of the auditor is to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels, through understanding the entity and its environment, including the entity's internal control, thereby providing a basis for designing and implementing responses to the assessed risks of material misstatement.

The SASs include an objective similar to the ISAs' objective.

2. Performing Risk Assessment Procedures

PCAOB

Auditing Standard No. 12 states that the auditor should perform risk assessment procedures that are sufficient to provide a reasonable basis for identifying and assessing the risks of material misstatement, whether due to error or

[24] In June 2010, the ASB adopted as a final standard the SAS, *Consideration of Fraud in a Financial Statement Audit (Redrafted)* However, the ASB has not yet published this standard.

[25] Section VI.B. of Appendix 10.

fraud, and designing further audit procedures. The requirement establishes a principle for determining the sufficiency of the necessary risk assessment procedures, and it also links the risk assessment procedures to the design of the tests of controls and substantive procedures to be performed to respond to the risks. Appendix 10 provides additional discussion regarding performing risk assessment procedures.[26]

IAASB and ASB

The ISAs state:

> The auditor shall perform risk assessment procedures to provide a basis for the identification and assessment of risks of material misstatement at the financial statement and assertion levels.

The SASs include a requirement similar to the ISAs' requirement.

3. Obtaining an Understanding of the Company and Its Environment

PCAOB

Auditing Standard No. 12 includes a requirement to evaluate, while obtaining an understanding of the company, whether significant changes in the company from prior periods, including changes in its internal control over financial reporting, affect the risks of material misstatement. Appendix 10 provides additional discussion regarding obtaining an understanding of the company and its environment.[27]

IAASB and ASB

The ISAs and SASs do not include an analogous requirement.

4. Additional Procedures to Understand the Company

PCAOB

Auditing Standard No. 12 requires the auditor to consider performing certain procedures as part of obtaining an understanding of the company as required by paragraph 7 of the standard. These procedures include reading public information about the company, observing or reading transcripts of earnings calls, obtaining an understanding of compensation arrangements with senior management, and obtaining information about trading activity in the company's securities and holdings in the company's securities by significant holders. Appendix 10 provides additional discussion regarding this requirement.[28]

IAASB and ASB

The ISAs and SASs do not include an analogous requirement.

---

[26] Section VI.C. of Appendix 10.

[27] Section VI.D. of Appendix 10.

[28] Ibid.

5. Selection and Application of Accounting Principles, Including Related Disclosures

PCAOB

Auditing Standard No. 12 requires the auditor to develop expectations about the disclosures that are necessary for the company's financial statements to be presented fairly in conformity with the applicable financial reporting framework to identify and assess the risks of material misstatement related to omitted, incomplete, or inaccurate disclosures.[29] The standard also requires engagement team members to discuss how fraud might be perpetrated or concealed by omitting or presenting incomplete or inaccurate disclosures.[30] Additionally Auditing Standard No. 12 requires the auditor's evaluation of fraud risk factors to include how fraud could be perpetrated or concealed by presenting incomplete or inaccurate disclosures or by omitting disclosures that are necessary for the financial statements to be presented fairly in conformity with the applicable financial reporting framework.[31] Appendix 10 provides additional discussion regarding these requirements.[32]

IAASB and ASB

The ISAs and SASs do include analogous requirements regarding the disclosures that are necessary for the company's financial statements to be presented fairly in conformity with the applicable financial reporting framework.

6. Obtaining an Understanding of Internal Control Over Financial Reporting

PCAOB

Auditing Standard No. 12 requires the auditor to obtain a sufficient understanding of each component of internal control over financial reporting to (a) identify the types of potential misstatements; (b) assess the factors that affect the risks of material misstatement; and (c) design further auditor procedures. This requirement relates to the sufficiency of the required understanding of internal control over financial reporting. Appendix 10 provides additional discussion of this requirement.[33]

IAASB and ASB

The ISAs state:

> The auditor shall obtain an understanding of internal control relevant to the audit. Although most controls relevant to the audit are likely to relate to financial reporting, not all controls that relate to financial reporting are relevant to the audit. It is a matter of the auditor's professional judgment whether a control, individually or in combination with others, is relevant to the audit.

The SASs include requirements similar to the ISAs' requirements.

---

[29] Paragraph 12 of Auditing Standard No. 12.

[30] Paragraph 52 of Auditing Standard No. 12.

[31] Paragraph 67 of Auditing Standard No. 12.

[32] Section VI.D, H, and J respectively of Appendix 10.

[33] Section VI.E. of Appendix 10.

7. Control Environment

PCAOB

Auditing Standard No. 12 requires the auditor to assess the following matters as part of obtaining an understanding of the control environment:

- Whether management's philosophy and operating style promote effective internal control over financial reporting;
- Whether sound integrity and ethical values, particularly of top management, are developed and understood; and
- Whether the board or audit committee understands and exercises oversight responsibility over financial reporting and internal control.

This requirement is aligned with a similar requirement in Auditing Standard No. 5. Appendix 10 provides additional discussion regarding this requirement.[34]

Paragraph 25 of Auditing Standard No. 12 states that "[i]f the auditor identifies a control deficiency in the company's control environment, the auditor should evaluate the extent to which this control deficiency is indicative of a fraud risk factor." Appendix 10 provides additional discussion regarding the auditor's evaluation of an identified control deficiency in the control environment.[35]

IAASB and ASB

The ISAs state:

> The auditor shall obtain an understanding of the control environment. As part of obtaining this understanding, the auditor shall evaluate whether:
>
> (a) Management, with the oversight of those charged with governance, has created and maintained a culture of honesty and ethical behavior; and
>
> (b) The strengths in the control environment elements collectively provide an appropriate foundation for the other components of internal control, and whether those other components are not undermined by deficiencies in the control environment.

The SASs include requirements similar to the ISAs' requirements.

The ISAs and SASs do not have a requirement analogous to paragraph 25 of Auditing Standard No. 12.

8. The Company's Risk Assessment Process

PCAOB

Auditing Standard No. 12 states that:

> The auditor should obtain an understanding of management's process for:
>
> (a) Identifying risks relevant to financial reporting objectives, including risks of material misstatement due to fraud ("fraud risks"),

---

[34] Section VI.E.2. of Appendix 10.

[35] Ibid.

(b) Assessing the likelihood and significance of misstatements resulting from those risks, and

(c) Deciding about actions to address those risks.

The standard also states that obtaining an understanding of the company's risk assessment process includes obtaining an understanding of the risks of material misstatement identified and assessed by management and the actions taken to address those risks.

Those requirements focus on the matters that are important to the auditor's understanding of the company's internal control and on the auditor's risk assessments. Although the auditor can be informed by the company's risk assessment process, the auditor is still required to perform risk assessment procedures that are sufficient for identifying and assessing the risks of material misstatement rather than relying on the company's process.

Appendix 10 provides additional discussion regarding the company's risk assessment process.[36]

IAASB and ASB

The ISAs state:

The auditor shall obtain an understanding of whether the entity has a process for (a) Identifying business risks relevant to financial reporting objectives; (b) Estimating the significance of the risks; (c) Assessing the likelihood of their occurrence; and (d) Deciding about actions to address those risks.

If the entity has established such a process (referred to hereafter as the "entity's risk assessment process"), the auditor shall obtain an understanding of it, and the results thereof. If the auditor identifies risks of material misstatement that management failed to identify, the auditor shall evaluate whether there was an underlying risk of a kind that the auditor expects would have been identified by the entity's risk assessment process. If there is such a risk, the auditor shall obtain an understanding of why that process failed to identify it, and evaluate whether the process is appropriate to its circumstances or determine if there is a significant deficiency in internal control with regard to the entity's risk assessment process.

If the entity has not established such a process or has an ad hoc process, the auditor shall discuss with management whether business risks relevant to financial reporting objectives have been identified and how they have been addressed. The auditor shall evaluate whether the absence of a documented risk assessment process is appropriate in the circumstances, or determine whether it represents a significant deficiency in internal control.

The SASs include requirements similar to the ISAs' requirements.

9. Information and Communication

PCAOB

Auditing Standard No. 12 requires the auditor to obtain an understanding of how IT affects the company's flow of transactions. The standard also states that the identification of risks and controls within IT is not a separate evaluation. Instead, it is an integral part of the approach used to identify significant accounts and disclosures and their relevant assertions and, when applicable, to

[36] Section VI.E.3. of Appendix 10.

select the controls to test, as well as to assess risk and allocate audit effort. Appendix 10 provides additional discussion of this requirement.[37]

IAASB and ASB

The ISAs and SASs do not include analogous requirements.

10. Control Activities

PCAOB

Auditing Standard No. 12 requires the auditor to obtain an understanding of control activities that is sufficient to assess the factors that affect the risks of material misstatement and to design further audit procedures. Auditing Standard No. 12 requires the auditor to use his or her knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control over financial reporting in determining the extent to which it is necessary to devote additional attention to obtaining an understanding of control activities to assess the factors that affect the risks of material misstatement and to design further audit procedures. Appendix 10 provides additional discussion of this requirement.[38]

IAASB

The ISAs state:

> The auditor shall obtain an understanding of control activities relevant to the audit, being those the auditor judges it necessary to understand in order to assess the risks of material misstatement at the assertion level and design further audit procedures responsive to assessed risks. An audit does not require an understanding of all the control activities related to each significant class of transactions, account balance, and disclosure in the financial statements or to every assertion relevant to them.

ASB

The SASs state:

> The auditor should obtain an understanding of control activities relevant to the audit, which are those control activities the auditor judges it necessary to understand in order to assess the risks of material misstatement at the assertion level and design further audit procedures responsive to assessed risks. An audit does not require an understanding of all the control activities related to each significant class of transactions, account balance, and disclosure in the financial statements or to every assertion relevant to them. However, the auditor should obtain an understanding of the process of reconciling detailed records to the general ledger for material account balances.

11. Relationship of Understanding of Internal Control to Tests of Controls

PCAOB

Auditing Standard No. 12 requires the auditor to take into account the evidence obtained from understanding internal control when assessing control

---

[37] Section VI.E.4 of Appendix 10.

[38] Section VI.E.5. of Appendix 10.

risk and, in the audit of internal control, forming conclusions about the effectiveness of controls. Auditing Standard No. 12 also requires the auditor to take into account the evidence obtained from understanding internal control when determining the nature, timing, and extent of procedures necessary to support the auditor's conclusions about the effectiveness of entity-level controls in the audit of internal control. Appendix 10 provides additional discussion of these requirements.[39]

IAASB and ASB

The ISAs and SASs do not include analogous requirements.

12. Considering Information from the Client Acceptance and Retention Evaluation, Audit Planning Activities, Past Audits, and Other Engagements

PCAOB

Auditing Standard No. 12 requires the auditor to evaluate whether information obtained during a review of interim financial information in accordance with AU sec. 722, *Interim Financial Information,* is relevant to identifying risks of material misstatement in the year-end audit. The ISAs and SASs do not include an analogous requirement.

Auditing Standard No. 12 also states that the auditor should obtain an understanding of the nature of the services that have been performed for the company by the auditor or affiliates of the firm[40] and should take into account relevant information obtained from those engagements in identifying risks of material misstatement. The requirement in Auditing Standard No. 12 applies to services performed by the firm and affiliates of the firm and is not limited to services performed by the engagement partner. Appendix 10 provides additional discussion regarding these requirements.[41]

IAASB and ASB

The ISAs state, "[i]f the engagement partner has performed other engagements for the entity, the engagement partner shall consider whether information obtained is relevant to identifying risks of material misstatement."

The SASs include a requirement similar to the ISAs' requirement.

13. Performing Analytical Procedures

PCAOB

Auditing Standard No. 12 contains a series of requirements regarding performing analytical procedures as risk assessment procedures. These requirements were adapted from AU sec. 329, *Analytical Procedures*. Auditing Standard No. 12 requires the auditor to:

- Perform analytical procedures that are designed to (a) enhance the auditor's understanding of the client's business and the significant transactions and events that have occurred since the prior

[39] Section VI.E.7. of Appendix 10.

[40] PCAOB Rule 3501, *Definitions of Terms Employed in Section 3, Part 5 of the Rules.*

[41] Section VI.F.2. of Appendix 10.

year end; and (b) identify areas that might represent specific risks relevant to the audit, including the existence of unusual transactions and events, and amounts, ratios, and trends that warrant investigation.

- Perform analytical procedures regarding revenue as risk assessment procedures with the objective of identifying unusual or unexpected relationships involving revenue accounts that might indicate a material misstatement, including material misstatement due to fraud.
- Take into account analytical procedures performed in accordance with AU sec. 722 when designing and applying analytical procedures as risk assessment procedures. This requirement is unique to PCAOB standards.
- Use his or her understanding of the company to develop expectations about plausible relationships among the data to be used in the procedure.[42]
- Take into account unusual or unexpected differences from the auditor's expectations that are identified while performing analytical procedures as risk assessment procedures.

Appendix 10 provides additional discussion of these requirements.[43]

IAASB

The ISAs state:

> The risk assessment procedures shall include...[a]nalytical procedures...
>
> The auditor shall evaluate whether unusual or unexpected relationships that have been identified in performing analytical procedures, including those related to revenue accounts, may indicate risks of material misstatement due to fraud.

ASB

The SASs state:

> The risk assessment procedures should include...[a]nalytical procedures...
>
> Based on analytical procedures performed as part of risk assessment procedures and as part of substantive procedures, the auditor should evaluate whether unusual or unexpected relationships that have been identified indicate risks of material misstatements due to fraud. To the extent not already included, the analytical procedures and evaluation thereof should include procedures relating to revenue accounts.

14. Communication among Engagement Team Members

PCAOB

Auditing Standard No. 12 requires that the communication among the engagement team members about significant matters affecting the risks of material

---

[42] Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data.

[43] Section VI.G. of Appendix 10.

misstatement should continue throughout the audit, including when conditions change. Appendix 10 provides additional discussion of this requirement.[44]

IAASB and ASB

The ISAs and SASs do not include analogous requirements.

15. Discussion of the Potential for Material Misstatement Due to Fraud

PCAOB

Auditing Standard No. 12 requires a discussion among the key engagement team members of specified matters regarding fraud, including how and where the company's financial statements might be susceptible to material misstatement due to fraud, known fraud risk factors, the risk of management override of controls, and possible responses to fraud risks.

Auditing Standard No. 12 requires all key engagement team members to participate in the discussion. Auditing Standard No. 12 also states that key engagement team members include the engagement partner and other engagement team members with significant engagement responsibilities.

Auditing Standard No. 12 also includes a requirement to emphasize certain matters to all engagement team members, including the need to maintain a questioning mind throughout the audit and to exercise professional skepticism in gathering and evaluating evidence, to be alert for information or other conditions that might affect the assessment of fraud risks, and actions to be taken if information or other conditions indicate that a material misstatement due to fraud might have occurred.

Appendix 10 provides additional discussion of these requirements.[45]

IAASB

The ISAs state:

> The engagement partner and other key engagement team members shall discuss the susceptibility of the entity's financial statements to material misstatement, and the application of the applicable financial reporting framework to the entity's facts and circumstances. The engagement partner shall determine which matters are to be communicated to engagement team members not involved in the discussion.
>
> ...This discussion shall place particular emphasis on how and where the entity's financial statements may be susceptible to material misstatement due to fraud, including how fraud might occur.

ASB

The SASs have requirements similar to the ISAs' requirements. However, the SASs also include a requirement that the discussion regarding fraud include an exchange among engagement team members about how and where the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated. The SASs also include a requirement to emphasize certain matters to all engagement team

---

[44] Section VI.H.2. of Appendix 10.

[45] Section VI.H. of Appendix 10.

members, but those matters identified are less extensive than those required by PCAOB standards.

16. Inquiring of the Audit Committee, Management, and Others within the Company about the Risks of Material Misstatement

PCAOB

Auditing Standard No. 12 requires the auditor to make specified inquiries of management and the audit committee regarding tips or complaints about the company's financial reporting. Appendix 10 provides additional discussion of this requirement.[46]

IAASB and ASB

The ISAs and the SASs do not specify the nature of the required inquiries, except for certain inquiries regarding fraud, which are less extensive than those required by PCAOB standards.

17. Nature of Inquiries

PCAOB

Auditing Standard No. 12 requires the auditor to use his or her knowledge of the company and its environment, as well as information from other risk assessment procedures, to determine the nature of inquiries about risks of material misstatement. Appendix 10 provides additional discussion of this requirement.[47]

IAASB and ASB

The ISAs and SASs do not include analogous requirements.

18. Evaluating Management Responses to Inquiries

PCAOB

Auditing Standard No. 12 requires the auditor to take into account the fact that management is often in the best position to commit fraud when evaluating management's responses to inquiries about fraud risks. Auditing Standard No. 12 also requires the auditor to obtain evidence to address inconsistencies in response to the inquiries. Appendix 10 provides additional discussion of these requirements.[48]

IAASB and ASB

The ISAs and SASs do not include analogous requirements.

---

[46] Section VI.I. of Appendix 10.

[47] Ibid.

[48] Ibid.

19. Identifying and Assessing the Risks of Material Misstatement

PCAOB

Auditing Standard No. 12 requires the auditor to evaluate how risks at the financial statement level could affect risks of material misstatement at the assertion level. Appendix 10 provides additional discussion of this requirement.[49]

IAASB and ASB

The ISAs and the proposed SAS do not include an analogous requirement.

20. Identifying Significant Accounts and Disclosures and Their Relevant Assertions

PCAOB

Auditing Standard No. 12 requires the auditor to identify significant accounts and disclosures and their relevant assertions in identifying and assessing risks of material misstatement. PCAOB standards require auditors to perform substantive procedures for relevant assertions of significant accounts and disclosures in the audit of financial statements and tests of controls over relevant assertions of significant accounts and disclosures in the audit of internal control. Appendix 10 provides additional discussion regarding identifying significant accounts and disclosures and relevant assertions.[50]

IAASB and ASB

The ISAs and SASs do not have an analogous requirement.

21. Significant Risks

PCAOB

Auditing Standard No. 12 defines significant risk as a "risk of material misstatement that requires special audit consideration." This definition is different from the ISAs' definition because it omits two qualifying phrases, "an identified and assessed" and "in the auditor's judgment." Appendix 10 provides additional discussion regarding the definition of significant risks.[51]

IAASB and ASB

The ISAs and SASs define significant risk as "an identified and assessed risk of material misstatement that, in the auditor's judgment, requires special audit consideration."

Auditing Standard No. 13—The Auditor's Responses to the Risks of Material Misstatement

In this section, the analogous IAASB standards are ISA 330, *The Auditor's Responses to Assessed Risks*, and ISA 240, *The Auditor's Responsibilities Relating*

---

[49] Section VI.J. of Appendix 10.

[50] Ibid.

[51] Section VI.K. of Appendix 10.

to Fraud in an Audit of Financial Statements (collectively referred to in this section as "the ISAs"). The analogous ASB standards are the clarified SAS, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (Redrafted), and the proposed SAS, *Consideration of Fraud in a Financial Statement Audit* (Redrafted) (collectively referred to in this section as "the SASs").

1. Objective

PCAOB

The objective of the auditor in Auditing Standard No. 13 is "to address the risks of material misstatement through appropriate overall audit responses and audit procedures." The objective in the proposed standard emphasizes the auditor's responsibility for responding to the risks of material misstatements. Appendix 10 provides additional discussion regarding the objective of the standard.[52]

IAASB and ASB

The objective in the ISAs and the SASs is to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement, through designing and implementing appropriate responses to those risks.

2. Overall Responses to Risks

PCAOB

Auditing Standard No. 13 requires the auditor to design and implement certain overall responses (e.g., making appropriate assignments of specific engagement responsibilities, providing an appropriate extent of supervision, incorporating elements of unpredictability in selecting auditing procedures, and evaluating the company's selection and application of significant accounting principles) to address risks of material misstatement. These responses are not limited to addressing risks at the financial statement level. They are also intended to address risks at the significant account or disclosure level due to the nature of these specific overall responses. Appendix 10 provides additional discussion of this requirement.[53]

IAASB and ASB

The ISAs and the SASs include requirements to design and implement overall responses to address the assessed risks of material misstatement at the financial statement level and requirements for particular types of responses to the risks of material misstatement due to fraud at the financial statement level.

3. Determination of the Need for Pervasive Changes

PCAOB

Auditing Standard No. 13 requires the auditor to determine whether it is necessary to make pervasive changes to the nature, timing, or extent of audit

[52] Section VII.B. of Appendix 10.

[53] Section VII.C. of Appendix 10.

procedures to adequately address the assessed risk of material misstatement. Examples of such pervasive changes include modifying the audit strategy to increase the substantive testing of the valuation of numerous significant accounts at year end because of significantly deteriorating market conditions and to obtain more pervasive audit evidence from substantive procedures due to the identification of pervasive weaknesses in the company's control environment. Appendix 10 provides detailed discussions regarding making pervasive changes as an overall response to risks of material misstatement.[54]

IAASB and ASB

The ISAs and SASs do not include analogous requirements.

4. Application of Professional Skepticism

PCAOB

Auditing Standard No. 13 states that due professional care requires the auditor to exercise professional skepticism, requires that the auditor apply professional skepticism in gathering and evaluating audit evidence in response to risks of material misstatement, and provides examples of the appropriate application of professional skepticism. Appendix 10 provides additional discussion regarding application of professional skepticism.[55]

IAASB and ASB

The ISAs state

> ...the auditor shall maintain an attitude of professional skepticism throughout the audit, recognizing the possibility that a material misstatement due to fraud could exist, notwithstanding the auditor's past experience of the honesty and integrity of the entity's management and those charged with governance.

The SASs include a requirement similar to the ISAs' requirement.

5. Evidence about the Effectiveness of Controls

PCAOB

In discussing testing controls in an audit of financial statements, Auditing Standard No. 13 establishes the principle that the evidence necessary to support the auditor's control risk assessment depends on the degree of reliance the auditor plans to place on the effectiveness of a control. The greater the reliance on a control, the more persuasive evidence the auditor is required to obtain from the tests of controls.

In addition, the standard requires the auditor to obtain more persuasive evidence about the effectiveness of controls for each relevant assertion for which the audit approach consists primarily of tests of controls. Appendix 10 provides additional discussions of these requirements.[56]

---

[54] Ibid.

[55] Ibid.

[56] Section VII.F.3. of Appendix 10.

IAASB and ASB

The ISAs and the SASs include a requirement for the auditor to obtain more persuasive audit evidence the greater the reliance he or she plans to place on the effectiveness of a control, but they do not have an analogous requirement regarding situations in which the audit approach consists primarily of tests of controls.

6. Testing the Operating Effectiveness of a Control

PCAOB

Auditing Standard No. 13 requires the auditor to determine whether the control selected for testing is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively. The standard also discusses the procedures the auditor performs in testing operating effectiveness. To help facilitate the tests of controls in an integrated audit, the standard continues to use language similar to that of Auditing Standard No. 5 when describing analogous terms and concepts relating to the testing of controls. Appendix 10 provides additional discussion regarding this requirement.[57]

IAASB

The ISAs do not include an analogous requirement to determine whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

ASB

The SASs state:

> In designing and performing tests of controls, the auditor should:
>
> *a.* perform other audit procedures in combination with inquiry to obtain audit evidence about the operating effectiveness of the controls, including ...by whom or by what means they were applied, including, when applicable, whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

7. Tests of Controls in an Integrated Audit

PCAOB

Auditing Standard No. 13 requires the auditor to perform tests of controls in integrated audits to meet the objectives of both the audit of financial statements and the audit of internal control. Appendix 10 provides additional discussion of this requirement.[58]

IAASB and ASB

The ISAs and the SASs do not include an analogous requirement.

---

[57] Section VII.F.4. of Appendix 10.

[58] Section VII.D. of Appendix 10.

8. Rotational Testing of Controls

PCAOB

Auditing Standard No. 13 requires the auditor to obtain evidence during the current year audit about the design and operating effectiveness of controls upon which the auditor relies. Appendix 10 provides additional discussion of this requirement.[59]

IAASB and ASB

The ISAs and the SASs include requirements that apply to the use of evidence about controls obtained in prior audits and allow rotational testing of controls under certain conditions set forth in those standards.

9. Assessing Control Risk

PCAOB

Auditing Standard No. 13 requires the auditor to assess control risk for relevant assertions by evaluating the evidence from all sources, including the auditor's testing of controls for the audit of internal control and the audit of financial statements, misstatements detected during the financial statement audit, and any identified control deficiencies. The standard also requires that control risk be assessed at the maximum level for relevant assertions (1) for which controls necessary to sufficiently address the assessed risk of material misstatement in those assertions are missing or ineffective or (2) when the auditor has not obtained sufficient appropriate audit evidence to support a control risk assessment below the maximum level. Appendix 10 provides additional discussion of these requirements.[60]

IAASB and ASB

The ISAs and the SASs include requirements regarding evaluating the operating effectiveness of controls and identified control deviations, but those standards do not require a specific assessment of control risk.

10. Substantive Procedures

PCAOB

Auditing Standard No. 13 requires the auditor to perform substantive procedures for each relevant assertion of each significant account and disclosure, regardless of the assessed level of control risk. This requirement reflects the principle that the auditor needs to implement appropriate responses to address assessed risks of material misstatement. Appendix 10 provides additional discussion of this requirement.[61]

IAASB

The ISAs state, "Irrespective of the assessed risks of material misstatement, the auditor shall design and perform substantive procedures for each material class of transactions, account balance, and disclosure."

---

[59] Section VII.F.6. of Appendix 10.

[60] Section VII.F.7. of Appendix 10.

[61] Section VII.G. of Appendix 10.

ASB

The SASs state, "Irrespective of the assessed risks of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure."

The requirements in the ISAs and the SASs focus on the accounts and disclosures that are material, regardless of whether they are associated with identified risks of material misstatement.

11. Consideration of Confirmations

PCAOB

Auditing Standard No. 13 requires the auditor to perform substantive procedures for each relevant assertion of each significant account and disclosure. The standard also discusses how to determine the types and combination of substantive audit procedures necessary to detect material misstatements in relevant assertions.

AU sec. 330, *The Confirmation Process*, establishes requirements regarding the use of confirmation procedures.[62] The risk assessment standards discuss the auditor's responsibilities for designing and performing the substantive procedures necessary to address the risks of material misstatement.

IAASB and ASB

ISA 330 specifically requires the auditor to consider whether external confirmation procedures are to be performed as substantive audit procedures. The ASB has proposed to amend the SASs to require the auditor to consider whether external confirmation procedures are to be performed as substantive audit procedures and to require the use of external confirmation procedures for material accounts receivable.

12. Determining Whether to Perform Interim Substantive Procedures

PCAOB

Auditing Standard No. 13 requires the auditor to take into account a series of factors when determining whether it is appropriate to perform substantive procedures at an interim date. Appendix 10 provides additional discussion regarding timing of substantive procedures.[63]

IAASB and ASB

The ISAs and the SASs do not include an analogous requirement for the auditor to take into account the factors listed in Auditing Standard No. 13 when determining whether it is appropriate to perform substantive procedures at an interim date.

---

[62] The Board has a separate standards-setting project on confirmations.

[63] Section VII.H. of Appendix 10.

13. Substantive Procedures Covering the Remaining Period

PCAOB

Auditing Standard No. 13 states, "When substantive procedures are performed at an interim date, the auditor should cover the remaining period by performing substantive procedures, or substantive procedures combined with tests of controls, that provide a reasonable basis for extending the audit conclusions from the interim date to the period end." The standard contains a specific requirement to compare relevant information about the account balance at the interim date with comparable information at the end of the period to identify amounts that appear unusual. Appendix 10 provides additional discussion of this requirement.[64]

IAASB and ASB

The ISAs and the SASs include requirements to cover the period between the interim testing date and year end by performing substantive procedures, combined with tests of controls for the intervening period, or by performing further substantive procedures only if the auditor determines that doing so would be sufficient. The ISAs and SASs do not include an analogous requirement regarding the specific procedures to be performed.

14. Response to Significant Risks

PCAOB

Auditing Standard No. 13 requires the auditor to perform substantive procedures, including tests of details, that are specifically responsive to significant risks. Appendix 10 provides additional discussion of this requirement.[65]

IAASB and ASB

The ISAs state:

> If the auditor has determined that an assessed risk of material misstatement at the assertion level is a significant risk, the auditor shall perform substantive procedures that are specifically responsive to that risk. When the approach to a significant risk consists only of substantive procedures, those procedures shall include tests of details.

The SASs include requirements similar the ISAs' requirements.

15. Dual-purpose Tests

PCAOB

Auditing Standard No. 13 states that, when dual-purpose tests are performed, the auditor should design the dual-purpose test to achieve the objectives of both the test of the control and the substantive test. Also, when performing a dual-purpose test, the auditor should evaluate the results of the test in forming conclusions about both the assertion and the effectiveness of the control being tested. Appendix 10 provides additional discussion of this requirement.[66]

---

[64] Ibid.

[65] Section VII.I. of Appendix 10.

[66] Section VII.J. of Appendix 10.

IAASB and ASB

The ISAs and the SASs do not include analogous requirements.

Auditing Standard No. 14—Evaluating Audit Results

In this section, the analogous IAASB standards are ISA 450, *Evaluation of Misstatements Identified During the Audit,* ISA 330, *The Auditor's Responses to Assessed Risks,* ISA 520, *Analytical Procedures,* ISA 240, *The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements,* ISA 540, *Auditing Accounting Estimates Including Fair Value Accounting Estimates, and Related Disclosures,* and ISA 700, *Forming an Opinion and Reporting on Financial Statements* (collectively referred to in this section as "the ISAs"). The analogous ASB standards are clarified SAS *Evaluation of Misstatements Identified During the Audit, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained (Redrafted), Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement (Redrafted),* and proposed SAS *Consideration of Fraud in a Financial Statement Audit (Redrafted), Analytical Procedures (Redrafted),* and *Forming an Opinion and Reporting on Financial Statements* (collectively referred to in this section as "the SASs").

1. Performing Analytical Procedures in the Overall Review

PCAOB

In the overall review, Auditing Standard No. 14 contains specific requirements for the auditor to read the financial statements and disclosures and perform analytical procedures to (a) evaluate the auditor's conclusions formed regarding significant accounts and disclosures and (b) assist in forming an opinion on whether the financial statements as a whole are free of material misstatement. These requirements were adapted from existing requirements in PCAOB standards.[67] The conclusions formed from the results of the overall review of the audit are intended to inform the auditor's conclusions regarding significant accounts and disclosures and the opinion on the financial statements. Appendix 10 provides additional discussion of these requirements.[68]

IAASB

The ISAs state:

> The auditor shall design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion as to whether the financial statements are consistent with the auditor's understanding of the entity.

ASB

The SASs state:

> The auditor should design and perform analytical procedures near the end of the audit that are intended to corroborate audit evidence obtained during the audit of financial statements to assist the auditor in drawing reasonable conclusions on which to base the auditor's opinion.

---

[67] AU sec. 329.23.

[68] Section VIII.C. of Appendix 10.

2. Evaluating Evidence from Analytical Procedures

PCAOB

Auditing Standard No. 14 contains a requirement, which was adapted from an existing requirement in PCAOB standards,[69] for the auditor, as part of the overall review to evaluate whether (a) the evidence gathered in response to unusual or unexpected transactions, events, amounts or relationships previously identified during the audit is sufficient and (b) unusual or unexpected transactions, events, amounts, or relationships indicate risks of material misstatement that were not identified previously, including, in particular, fraud risks. Auditing Standard No. 14 also specifically requires the auditor to evaluate whether the evidence gathered during the audit is sufficient as part of the overall review.

Also, the requirements in Auditing Standard No. 14 relate to risks of material misstatement due to error or fraud, whereas the requirements in the ISAs and SASs are limited to fraud risks. Appendix 10 provides additional discussion of these requirements in Auditing Standard No. 14.[70]

IAASB

The ISAs state:

> The auditor shall evaluate whether analytical procedures that are performed near the end of the audit, when forming an overall conclusion as to whether the financial statements as a whole are consistent with the auditor's understanding of the entity and its environment, indicate a previously unrecognized risk of material misstatement due to fraud.

ASB

The SASs state:

> The auditor should evaluate whether the accumulated results of auditing procedures, including analytical procedures, that are performed during the audit, in the overall review stage, or in both stages, when forming an overall conclusion concerning whether the financial statements as a whole are consistent with the auditor's understanding of the entity and its environment, indicate a previously unrecognized risk of material misstatement due to fraud.

3. Analytical Procedures Regarding Revenue

PCAOB

Auditing Standard No. 14 includes a requirement, adapted from an existing requirement in AU sec. 316, for the auditor to perform analytical procedures relating to revenue through the end of the period. These procedures are intended to identify unusual or unexpected relationships involving revenue accounts that might indicate a material misstatement, including material misstatement due to fraud. Appendix 10 provides additional discussion of this requirement.[71]

IAASB

The ISAs state:

---

[69] AU sec. 329.23.

[70] Section VIII.C. of Appendix 10.

[71] Ibid.

> The auditor shall evaluate whether unusual or unexpected relationships that have been identified in performing analytical procedures, including those related to revenue accounts, may indicate risks of material misstatement due to fraud.

The ISAs do not specifically require the auditor to perform analytical procedures related to revenue through the end of the period.

ASB

The SASs require the auditor to perform analytical procedures related to revenue.

4. Corroborating Management Explanations

PCAOB

Auditing Standard No. 14 requires the auditor to corroborate management's explanations regarding significant unusual or unexpected transactions, events, amounts, or relationships. Auditing Standard No. 14 also states that if management's responses to the auditor's inquiries appear to be implausible, inconsistent with other audit evidence, imprecise, or not at a sufficient level of detail to be useful, the auditor should perform procedures to address the matter. Unlike the ISAs, Auditing Standard No. 14 specifically requires the auditor to corroborate management's explanations regarding significant matters. Appendix 10 provides additional discussion regarding corroborating management's explanations.[72]

IAASB and ASB

The ISAs and the SASs require the auditor to investigate the identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount by (a) inquiring of management and obtaining appropriate audit evidence relevant to management's responses and (b) performing other audit procedures as necessary in the circumstances. The ISAs and the SASs also include a requirement to investigate inconsistent responses to inquiries from management and those charged with governance.

5. Communication of Accumulated Misstatements

PCAOB

Auditing Standard No. 14 requires the auditor to communicate accumulated misstatements to management on a timely basis to provide management with an opportunity to correct them. Unlike the ISAs and the SASs, Auditing Standard No. 14 does not require the auditor to request management to correct the misstatements. Instead, PCAOB standards focus on communicating the misstatements to management, performing procedures to determine whether management corrected them, understanding the reasons why management might not have corrected the misstatements, and evaluating the effect of uncorrected misstatements on the financial statements and the audit. Appendix 10 provides additional discussion of this requirement.[73]

---

[72] Ibid.

[73] Section VIII.J. of Appendix 10.

IAASB and ASB

The ISAs and the SASs include requirements to communicate on a timely basis all misstatements accumulated during the audit to an appropriate level of management and to request that management correct those misstatements.

6. Correction of Misstatements

PCAOB

Auditing Standard No. 14 requires that if management has made corrections to accounts or disclosures in response to misstatements detected by the auditor, the auditor should evaluate management's work to determine whether the corrections have been appropriately recorded and determine whether uncorrected misstatements remain. Appendix 10 provides additional discussion of this requirement.[74]

IAASB and ASB

The ISAs and the SASs contain a requirement to perform additional audit procedures to determine whether misstatements remain, if at the auditor's request management has examined a class of transactions, account balance or disclosure and corrected misstatements that were detected.

The ISAs do not require the auditor to evaluate whether the misstatements that were communicated by the auditor to management have been appropriately corrected by management.

7. Evaluating Misstatements—Effect on Risk Assessments

PCAOB

Auditing Standard No. 14 contains a requirement to evaluate the nature and the effects of individual misstatements accumulated during the audit on the assessed risks of material misstatement in determining whether the risk assessments remain appropriate. Appendix 10 provides additional discussion of this requirement.[75]

IAASB and ASB

The ISAs and the SASs do not include an analogous requirement.

8. Evaluating Whether Misstatements Might Be Indicative of Fraud

PCAOB

Auditing Standard No. 14 requires the auditor to perform procedures to obtain additional audit evidence to determine whether fraud has occurred or is likely to have occurred, and, if so, its effect on the financial statements and the auditor's report if the auditor believes that a misstatement is or might be intentional, and

---

[74] Section VIII.F. of Appendix 10.

[75] Section VIII.I. of Appendix 10.

if the effect on the financial statement cannot be readily determined. Appendix 10 provides additional discussions of this requirement.[76]

IAASB and ASB

The ISAs require the auditor to evaluate the implications for the audit if the auditor confirms that or is unable to conclude whether financial statements are materially misstated as a result of fraud. The ISA does not explicitly require the auditor to perform audit procedures to obtain additional audit evidence to determine the effect of the misstatement on the financial statements.

The SASs include a requirement similar to the ISAs' requirement.

9. Communications Regarding Fraud

PCAOB

Auditing Standard No. 14 requires the auditor to determine his or her responsibility under AU secs. 316.79–.82A, AU sec. 317, *Illegal Acts by Clients*, and Section 10A of the Securities and Exchange Act of 1934, 15 U.S.C. §78j-1, if the auditor becomes aware of information indicating that fraud or another illegal act has occurred or might have occurred. AU sec. 316 requires that whenever the auditor has determined that there is evidence that fraud may exist, the auditor should bring that matter to the attention of an appropriate level of management.[77] Appendix 10 provides additional discussion of this requirement.[78]

IAASB and ASB

The ISAs state that if the auditor has identified a fraud or has obtained information that indicates that a fraud may exist, the auditor shall communicate these matters on a timely basis to the appropriate level of management.

The SASs include a requirement similar to the ISAs' requirement.

10. Evaluating the Qualitative Aspects of the Company's Accounting Practices

PCAOB

Auditing Standard No. 14 states that if the auditor identifies bias in management's judgments about the amounts and disclosures in the financial statements, the auditor should evaluate whether the effect of that bias, together with the effect of uncorrected misstatements, results in material misstatement of the financial statements. The standard also contains a requirement for the auditor to evaluate whether the auditor's risk assessments, including the assessment of fraud risks, and the related responses remain appropriate. Appendix 10 provides additional discussion of these requirements.[79]

IAASB and ASB

The ISAs and the SASs contain a requirement for the auditor to evaluate whether the financial statements are prepared, in all material respects, in

---

[76] Ibid.

[77] AU sec. 316.79.

[78] Section VIII.K. of Appendix 10.

[79] Section VIII.L. of Appendix 10.

accordance with the requirements of the applicable financial reporting framework. This evaluation shall include consideration of the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments.

11. Management's Identification of Offsetting Adjusting Entries

PCAOB

If mana{\BB g}ement identifies adjusting entries that offset misstatements accumulated by the auditor, Auditing Standard No. 14 requires the auditor to perform procedures to determine why the misstatements were not identified previously and to evaluate the implications on the integrity of management and the auditor's risk assessments, including fraud risk assessments. Auditing Standard No. 14 also requires the auditor to perform additional procedures as necessary to address the risk of further undetected misstatements. Appendix 10 provides additional discussion of these requirements.[80]

IAASB and ASB

The ISAs and SASs do not include analogous requirements.

12. Evaluating Conditions Relating to Assessment of Fraud Risks

PCAOB

Auditing Standard No. 14 requires the engagement partner to determine whether there has been appropriate communication with other engagement team members throughout the audit regarding information or conditions that are indicative of fraud risks. Appendix 10 provides additional discussion of this requirement.[81]

IAASB

The ISAs require a discussion among the engagement team members and a determination by the engagement partner of matters to be communicated to those team members not involved in the discussion.

ASB

The SASs contain a requirement for the engagement partner to ascertain that appropriate communication exists about the need for the discussion of fraud risks among team members throughout the audit.

Auditing Standard No. 15—Audit Evidence

In this section, the analogous IAASB and ASB standards are ISA 500, *Audit Evidence,* and the clarified SAS, *Audit Evidence (Redrafted)*, respectively.

---

[80] Ibid.

[81] Section VIII.M. of Appendix 10.

1. Objective and Overarching Requirement

PCAOB

The objective of the auditor in Auditing Standard No. 15 is to plan and perform the audit to obtain appropriate audit evidence that is sufficient to support the opinion expressed in the auditor's report. The objective of the standard, together with the related requirement regarding audit evidence, articulates the linkage between the auditor's responsibility to obtain sufficient appropriate audit evidence and to support his or her opinion. Appendix 10 provides additional discussion regarding the objective of the standard.[82]

IAASB and ASB

The ISA states:

> The objective of the auditor is to design and perform audit procedures in such a way as to enable the auditor to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions on which to base the auditor's opinion.

The ISA also states:

> The auditor shall design and perform audit procedures that are appropriate in the circumstances for the purpose of obtaining sufficient appropriate audit evidence.

The SAS includes an objective and a requirement similar to the ISA's objective and requirement.

2. Document Authentication

PCAOB

Auditing Standard No. 15 states that the auditor is not expected to be an expert in document authentication. However, if conditions indicate that a document may not be authentic or that the terms in a document have been modified but that the modifications have not been disclosed to the auditor, the auditor is required to modify the planned audit procedures or perform additional audit procedures to respond to those conditions and to evaluate the effect, if any, on the other aspects of the audit. Auditing Standard No. 15 omits protective language, such as "[u]nless the auditor has reason to believe the contrary, the auditor may accept records and document as genuine" that would weaken the requirement. Appendix 10 provides additional discussion regarding this requirement.[83]

IAASB and ASB

The ISA states:

> Unless the auditor has reason to believe the contrary, the auditor may accept records and documents as genuine. If conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document have been modified but not disclosed to the auditor, the auditor shall investigate further.

The SAS includes a requirement similar to the ISA's requirement.

---

[82] Section IX.C. of Appendix 10.

[83] Section IX.E. of Appendix 10.

3. Selecting Items for Testing to Obtain Audit Evidence

PCAOB

Auditing Standard No. 15 states that the auditor should determine the means of selecting items for testing to obtain evidence that, in combination with other relevant evidence, is sufficient to meet the objective of the audit procedure. This requirement links the selection of items for testing to the sufficiency of the audit evidence. Appendix 10 provides additional discussion of this requirement.[84]

IAASB and ASB

The ISA states:

> When designing tests of controls and tests of details, the auditor shall determine means of selecting items for testing that are effective in meeting the purpose of the audit procedure.

The SAS includes a requirement similar to the ISA's requirement.

[84] Section IX.J. of Appendix 10.

PCAOB Release No. 2012-004

Auditing Standard No. 16, Communications with Audit Committees; *Related Amendments to PCAOB Standards; and Transitional Amendments to AU Sec. 380*

PCAOB Release No. 2012-004
August 15, 2012
PCAOB Rulemaking
Docket Matter No. 030

Summary

The Public Company Accounting Oversight Board ("PCAOB" or the "Board") is adopting (i) Auditing Standard No. 16, *Communications with Audit Committees*, that would supersede the Board's interim standards AU sec. 380, *Communication With Audit Committees*, and AU sec. 310, *Appointment of the Independent Auditor*, (ii) transitional amendments to AU sec. 380, and (iii) related amendments to PCAOB standards.

Board Contacts

Jennifer Rand, Deputy Chief Auditor (202/207-9206, randj@pcaobus.org), Jessica Watts, Associate Chief Auditor (202/207-9376, wattsj@pcaobus.org), and Hasnat Ahmad, Assistant Chief Auditor (202/207-9349, ahmadh@pcaobus.org).

* * * * *

I. Introduction

With the passage of the Sarbanes-Oxley Act of 2002 (the "Act") and the establishment of the PCAOB, Congress acknowledged that auditors play an important role in protecting the interests of investors by preparing and issuing informative, accurate, and independent audit reports.[1] The audit committee[2] also plays an important role in protecting the interests of investors by assisting the board of directors in fulfilling its responsibility to a company's shareholders and others to oversee the integrity of a company's accounting and financial reporting processes and audits. The audit committee, among other things, serves as the board of director's principal interface with the company's auditors and

[1] *See* Section 101(a) of the Act, 15 U.S.C. §7211(a); Senate Report No. 107-206, at 5-6 (July 3, 2002).

[2] The term "audit committee," as defined in Auditing Standard No. 16, is a committee (or equivalent body) established by and among the board of directors of a company for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company; if no such committee exists with respect to a company, the entire board of directors of the company. For audits of nonissuers, if no such committee or board of directors (or equivalent body) exists with respect to the company, the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company.

facilitates communications between the company's board of directors, its management, and its independent auditors on significant accounting issues and policies. The roles of auditors and audit committees are critical to the efficiency and integrity of the capital markets.

Both the auditor and the audit committee benefit from a meaningful exchange of information regarding significant risks of material misstatement in the financial statements and other matters that may affect the integrity of the company's financial reports. Communications between the auditor and the audit committee allow the audit committee to be well-informed about accounting and disclosure matters, including the auditor's evaluation of matters that are significant to the financial statements, and to be better able to carry out its oversight role. Communications with the audit committee provide auditors with a forum separate from management to discuss matters about the audit and the company's financial reporting process.

The Board is adopting Auditing Standard No. 16, *Communications with Audit Committees* (the "standard"), and related amendments to improve the audit by enhancing communications between auditors and audit committees. Auditing Standard No. 16 will replace interim standards AU sec. 380, *Communication With Audit Committees* ("AU sec. 380"), and AU sec. 310, *Appointment of the Independent Auditor* ("AU sec. 310"). Adoption of the standard is in the public interest because the standard establishes requirements that enhance the relevance, timeliness, and quality of the communications between the auditor and the audit committee. The enhanced relevance, timeliness, and quality of communications should facilitate audit committees' financial reporting oversight, fostering improved financial reporting, thereby benefitting investors.

Auditing Standard No. 16 is aligned with the requirements of the Act. For many public companies, the Act served to strengthen and expand the role of the audit committee in the financial reporting process. For example, the Act requires that audit committee members of listed companies be independent and that audit committees be responsible for the appointment, compensation, and oversight of the work of the external auditor for the purpose of preparing or issuing an audit report or related work.[3] These requirements place the audit committee at the center of the relationship between management of a public company and its auditor.

Auditing Standard No. 16 is intended to improve the audit[4] by fostering constructive dialogue between the auditor and the audit committee about significant audit and financial statement matters. The standard requires the auditor to communicate certain matters regarding the audit and the financial statements to the audit committee, which should assist the audit committee in fulfilling its oversight responsibilities regarding the financial reporting process. Effective two-way communication between the auditor and the audit committee on such relevant matters also will benefit the auditor in performing an effective audit.

Auditing Standard No. 16 encourages effective two-way communication between the auditor and the audit committee throughout the audit to assist both parties in understanding matters relevant to the audit. Communications that are tailored to the circumstances and informative, rather than "boiler-plate" or

---

[4] For purposes of this release and standard, an audit is either an audit of internal control over financial reporting that is integrated with an audit of financial statements or an audit of financial statements only.

standardized, will enable the auditor and the audit committee to engage in a dialogue that is more likely to benefit both the audit committee, in conducting its oversight responsibilities, and the auditor, in conducting an effective audit. Effective communication between the auditor and the audit committee may involve many forms of communication, such as presentations, charts, written reports, or robust discussions.

AU sec. 380, which became effective in January 1989, indicated that audit committee communications are incidental to the audit and are not required to occur prior to the issuance of the auditor's report. In contrast, Auditing Standard No. 16 recognizes the importance of the auditor's communications with the audit committee in today's business and regulatory environment; therefore, Auditing Standard No. 16 requires the auditor to communicate the audit strategy and results of the audit to the audit committee in a timely manner and prior to the issuance of the auditor's report to provide an opportunity for the audit committee and the auditor to take appropriate action to address the matters communicated.

Timely communications with the audit committee help the auditor improve the audit by, among other things (i) informing the audit committee, which has responsibility for the oversight of financial reporting, about significant matters related to the audit and the financial statements, (ii) enabling the auditor to obtain the audit committee's insights and information about transactions and events, (iii) enabling the auditor to learn about complaints regarding accounting or auditing matters, and (iv) assisting the auditor in gaining a better understanding of the company and its control environment.

Auditing Standard No. 16 generally links the new communication requirements to the results of related audit performance requirements in other PCAOB standards, or the conduct of the audit. The standard does not otherwise impose new performance requirements, other than communications. Because other PCAOB standards already require the auditor to perform procedures underlying the communications required in Auditing Standard No. 16, and the standard primarily requires communication of the results of the auditor's procedures, the Board does not anticipate a significant increase in cost as a result of the implementation of the standard.

Some of the matters to be communicated under Auditing Standard No. 16 relate specifically to matters involving management's preparation of the company's financial statements. In many companies, management might communicate these matters or take the lead on communicating these matters to the audit committee. The PCAOB does not have the authority to require management to communicate to the audit committee. Additionally, certain communications by the auditor are mandated by federal securities laws and Securities and Exchange Commission ("SEC") rules.[5] Therefore, Auditing Standard No. 16 establishes required communications by the auditor to the audit committee but, at the same time, clearly recognizes and acknowledges that management might communicate to the audit committee certain matters related to the company's financial statements. In such circumstances, the auditor does not need to communicate those matters at the same level of detail as management, as long as certain conditions are met, as specified in the standard.

Auditing Standard No. 16 is scalable for audits of companies of various sizes and complexities. A company's size and complexity might affect the risks of misstatements, the audit strategy, and other significant matters that warrant

[5] *See e.g*, Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k); SEC Rule 2-07 of Regulation S-X ("SEC Rule 2-07"), 17 C.F.R. §210.2-07; and Rule 10A-3 under the Exchange Act, 17 C.F.R. §240.10A-3.

the attention of the audit committee. Based on the specific company's circumstances, the standard requires communications only to the extent that the matters are relevant to the audit of the financial statements of the company or of internal control over financial reporting. For example, an auditor of a smaller, less complex company with fewer difficult auditing or financial reporting issues may have fewer matters to communicate than the auditor of a larger, more complex company.

II. Background

On March 29, 2010, the Board proposed a standard, *Communications with Audit Committees* (the "original proposed standard"), to improve the audit by enhancing the relevance and effectiveness of the communications between the auditor and the audit committee.[6] The original proposed standard was informed by, among other things, the increased use of risk-based audit methodologies, the emphasis on judgments and estimates in the financial reporting frameworks and discussions with the Board's Standing Advisory Group ("SAG").[7]

The Board received 35 comment letters on the original proposed standard.[8] Most commenters were supportive of the original proposed standard, although several commenters suggested that additional outreach to stakeholders might be beneficial. The comments were discussed with the SAG on July 15, 2010.[9] Additionally, on September 21, 2010, the Board held a roundtable[10] to obtain insight from additional stakeholders, including investors, audit committee members, auditors, and preparers.[11] The roundtable discussion explored many key issues that commenters had raised in response to the original proposed standard regarding:

i. Communications beneficial to audit committees;
ii. Accounting policies, practices, and estimates;
iii. Effective two-way communication between the auditor and the audit committee;
iv. Balance between written and oral communications;
v. Audit committee responsibilities in the engagement letter;
vi. Management communications; and
vii. Uncorrected misstatements.

To provide all interested parties with an opportunity for additional comments on the topics discussed at the roundtable, the Board reopened the public comment period on the original proposed standard. The Board received nine additional comment letters during this extended comment period.[12]

---

[6] *Proposed Auditing Standard Related to Communications with Audit Committees and Related Amendments to Certain PCAOB Auditing Standards*, PCAOB Release No. 2010-001 (March 29, 2010).

[7] The SAG discussed the audit committee communications standard at a number of its meetings, including meetings on: June 21-22, 2004, June 8, 2005, October 5-6, 2005, and October 14-15, 2009.

[8] Comments on the original proposed standard are available at http://pcaobus.org/Rules/Rulemaking/Pages/Docket030Comments.aspx.

[9] A transcript of the portion of the meeting related to the original proposed standard is available at http://pcaobus.org/Rules/Rulemaking/Docket030/Communications_with_Audit_Committees.pdf.

[10] A listing of the roundtable participants is available at http://pcaobus.org/News/Releases/Pages/09162010_RoundtableParticipants.aspx.

[11] A transcript of the roundtable is available at http://pcaobus.org/Rules/Rulemaking/Docket030/Roundtable_Transcript.pdf.

[12] Comments on the original proposed standard are available at http://pcaobus.org/Rules/Rulemaking/Pages/Docket030Comments.aspx.

The original proposed standard was revised in response to comments received in comment letters and at the roundtable, and discussions with the SAG. The Board reproposed the standard for public comment on December 20, 2011 (the "reproposed standard") to seek comment on:[13]

- The revisions to the original proposed standard to align many of the audit committee communication requirements with the auditor performance requirements included in the risk assessment standards, which were adopted subsequent to the issuance of the original proposed standard;
- The applicability of the proposed standard to the audits of brokers and dealers; and
- The addition of the requirement to communicate significant unusual transactions to the audit committee and to communicate the auditor's understanding of the business rationale for such transactions.

The Board received 39 comment letters in response to the reproposed standard.[14] Commenters to the reproposed standard generally were supportive of the changes made to the original proposed standard to enhance the communications between the auditor and the audit committee. Commenters indicated that the changes made enhanced the quality of information exchanged between the auditor and the audit committee. Commenters also indicated that fuller and more relevant communications between the auditor and the audit committee would enable the audit committee to effectively fulfill its oversight responsibilities regarding the financial reporting process, and allow the auditor to perform a more informed, and thus more efficient and effective, audit.

Commenters on the reproposed standard specifically commented on, among other things, the following matters:

- The definition of audit committee in relation to nonissuers without an audit committee or board of directors;
- Management's communication of significant unusual transactions;
- The communication of the auditor's evaluation of the company's ability to continue as a going concern; and
- The application of the standard to the audits of brokers and dealers.

The Board took all comments received during this standard-setting project into consideration in revising the standard. The definition of audit committee was retained substantially in the form as reproposed, with additional clarification provided in Appendix 4 of this release. Auditing Standard No. 16 was revised to acknowledge that management might communicate certain matters related to significant unusual transactions and that the auditor would not have to communicate such matters at the same level of detail as long as certain criteria within the standard are met. Additionally, communication requirements related to the auditor's evaluation of the company's ability to continue as a going

[14] Comments on the reproposed standard are available at http://pcaobus.org/Rules/Rulemaking/Pages/Docket030Comments.aspx.

concern were revised to align the communications more precisely with the auditor's procedures related to such evaluation. Section IV below discusses the application of Auditing Standard No. 16 to the audits of brokers and dealers.

Significant comments received regarding the reproposed standard are addressed in detail in Appendix 4 of this release.

III. Overview of Auditing Standard No. 16

Auditing Standard No. 16 provides a definition of audit committee, retains or enhances existing communication requirements, incorporates certain SEC auditor communication requirements to audit committees, and adds new communication requirements that are generally linked to performance requirements in other PCAOB standards.

For audits of issuers, Auditing Standard No. 16 incorporates the Act's definition of audit committee as a committee (or equivalent body) established by and among the board of directors of a company for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company; if no such committee exists with respect to the company, then the audit committee is the entire board of directors of the company. For audits of nonissuers, the definition of audit committee contained in Auditing Standard No. 16 provides that if no audit committee or board of directors (or equivalent body) exists with respect to the company, then the audit committee is the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company.

AU sec. 310 requires the auditor to establish an understanding with the client regarding the services to be performed. Auditing Standard No. 16 requires the auditor to establish the understanding of the terms of the audit engagement with the audit committee. This requirement aligns the auditing standard with the provision of the Act that requires the audit committee of listed companies to be responsible for the appointment of the external auditor.[15]

Additionally, Auditing Standard No. 16 requires the auditor to record the terms of the engagement in an engagement letter and to have the engagement letter executed by the appropriate party or parties on behalf of the company and determine that the audit committee has acknowledged and agreed to the terms. These requirements are an expansion of the requirement in AU sec. 310 for the auditor to document the understanding in the working papers, preferably through a written communication with the client.

Auditing Standard No. 16 retains many of the communication requirements in AU sec. 380 and also incorporates the SEC communication requirements.[16] The standard improves the current communication requirements of AU sec. 380 by requiring the communications with the audit committee to occur before the issuance of the audit report. Additionally, the standard enhances certain existing auditor communication requirements by requiring the auditor to communicate:

- Certain matters regarding the company's accounting policies, practices, and estimates;
- The auditor's evaluation of the quality of the company's financial reporting;
- Information related to significant unusual transactions, including the business rationale for such transactions; and

---

[15] *See* Section 301 of the Act, and Sections 10A(m)(2) of the Exchange Act, 15 U.S.C. §78j-1(m)(2).

[16] *See* Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k) and SEC Rule 2-07(a)(1)-(3).

- The auditor's views regarding significant accounting or auditing matters when the auditor is aware that management consulted with other accountants about such matters and the auditor has identified a concern regarding these matters.

Auditing Standard No. 16 expands the inquiries of the audit committee required by Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement,* which requires the auditor to inquire of the audit committee regarding the matters important to the identification and assessment of risks of material misstatement and fraud risks. The additional inquiries in Auditing Standard No. 16 address whether the audit committee is aware of matters relevant to the audit, including, but not limited to, violations or possible violations of laws or regulations.

Additionally, Auditing Standard No. 16 adds new communication requirements that provide the audit committee with additional information about significant aspects of the audit. These communications are generally linked to the results of the audit procedures or the conduct of the audit. Under Auditing Standard No. 16 the auditor would be required to communicate:

- An overview of the overall audit strategy, including timing of the audit, significant risks the auditor identified, and significant changes to the planned audit strategy or identified risks;
- Information about the nature and extent of specialized skill or knowledge needed in the audit, the extent of the planned use of internal auditors, company personnel or other third parties, and other independent public accounting firms, or other persons not employed by the auditor that are involved in the audit;
- The basis for the auditor's determination that he or she can serve as principal auditor, if significant parts of the audit will be performed by other auditors;
- Situations in which the auditor identified a concern regarding management's anticipated application of accounting pronouncements that have been issued but are not yet effective and might have a significant effect on future financial reporting;
- Difficult or contentious matters for which the auditor consulted outside the engagement team;
- The auditor's evaluation of going concern;
- Departure from the auditor's standard report; and
- Other matters arising from the audit that are significant to the oversight of the company's financial reporting process, including complaints or concerns regarding accounting or auditing matters that have come to the auditor's attention during the audit.

In addition to the communication requirements included in Auditing Standard No. 16, other PCAOB standards and rules that require the auditor to communicate specific matters to the audit committee are referenced in Appendix B to Auditing Standard No. 16.

While the standard establishes certain requirements regarding auditor communications to the audit committee, Auditing Standard No. 16 does not preclude the auditor from providing additional information to the audit committee. Nor does the standard preclude the auditor from responding to audit committee requests for additional information from the auditor.

IV. Audits of Brokers and Dealers

Section 982 of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act")[17] gave the Board oversight of the audits of brokers and dealers registered with the SEC. In September 2010, the Commission issued interpretive guidance clarifying that the references in Commission rules and staff guidance and in the federal securities laws to generally accepted auditing standards ("GAAS") or to specific standards under GAAS, as they relate to nonissuer brokers or dealers, should continue to be understood to mean the auditing and attestation standards established by the American Institute of Certified Public Accountants ("AICPA"), but noted that it intended to revisit this interpretation in connection with a SEC rulemaking project to update the audit and attestation requirements for brokers and dealers in light of the Dodd-Frank Act.[18] On June 15, 2011, the SEC proposed to amend its rules, including SEC Rule 17a-5 under the Exchange Act, to require, among other things, that audits of brokers' and dealers' financial statements and examinations of reports regarding compliance with SEC requirements be performed in accordance with the standards of the PCAOB.[19]

If the SEC adopts its proposed amendments to SEC Rule 17a-5 or provides other direction that auditors of brokers and dealers are to comply with PCAOB professional standards, the Board's auditing, attestation, quality control, and, where applicable, independence standards would then apply to audits of brokers and dealers as required by Section 17 of the Exchange Act and SEC Rule 17a-5.[20]

Further, if the SEC adopts its proposed amendments to SEC Rule 17a-5 or provides other direction that auditors of brokers and dealers are to comply with PCAOB standards, prior to the effective date of Auditing Standard No. 16,[21] the Board's interim standard, AU sec. 380, would be in effect for audits of brokers and dealers conducted for periods prior to the effective date of Auditing Standard No. 16. The Board's interim standard, AU sec. 380, which was last amended in 1999, indicates that it is not applicable to the audit of a broker or dealer if the broker or dealer does not have an audit committee[22] or is registered with the SEC only because of Section 15(a) of the Exchange Act.[23] Conversely, the auditor communication requirements under GAAS, which are contained in Statement on Auditing Standards ("SAS") 114, *The Auditor's Communication With Those Charged With Governance,* which was issued by the Auditing Standards Board ("ASB") of the AICPA in 2006, are applicable to audits of all brokers

---

[17] Pub. L. No. 111-203, 124 Stat. 1376 (July 21, 2010).

[18] SEC, *Commission Guidance Regarding Auditing, Attestation, and Related Professional Practice Standards Related to Brokers and Dealers*, Exchange Act Release No. 62991 (Sept. 24, 2010).

[19] SEC, *Broker-Dealer Reports,* Exchange Act Release No. 64676 (June 15, 2011).

[20] 17 C.F.R. § 240.17a-5.

[21] As noted in Section VII of this release, the Board anticipates that Auditing Standard No. 16 will be effective, subject to SEC approval, for audits of fiscal years beginning on or after December 15, 2012.

[22] AU sec. 380.01 states that the communications required by AU sec. 380 are applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee (such as a finance committee or budget committee).

[23] *See* AU sec. 380.01, which states that the communications required by the standard "are applicable to . . . all Securities and Exchange Commission (SEC) engagements." As noted in footnote 2 to AU sec. 380.01, the audits of brokers and dealers do not fall within an SEC engagement as defined in AU sec. 380 if the broker or dealer is registered only because of Section 15(a) of the Exchange Act.

and dealers.[24] Because of this difference in the applicability of the auditor communication standards to the audits of brokers and dealers, there could be a gap in required audit committee communications if the SEC amendments to SEC Rule 17a-5 are adopted and become effective prior to the effective date of Auditing Standard No. 16. To eliminate this gap, the Board is amending AU sec. 380 to delete the current exception for audits of brokers and dealers that do not have an audit committee or are registered with the SEC only because of Section 15(a) of the Exchange Act. The transitional amendment, which is contained in Appendix 2 to this release, would eliminate the above-referenced gap in audit committee communications by making the communication requirements in AU sec. 380 applicable to audits of issuers and brokers and dealers, as those terms are defined in the Act, prior to the effective date of Auditing Standard No. 16.

If PCAOB standards are applicable to audits of brokers and dealers prior to the effective date of Auditing Standard No. 16, the communication requirements under Auditing Standard No. 16 would be applicable to the audits of brokers and dealers upon the effective date of the standard.

V. Emerging Growth Companies

Pursuant to Section 104 of the Jumpstart Our Business Startups Act ("JOBS Act"), any rules adopted by the Board subsequent to April 5, 2012, do not apply to the audits of emerging growth companies ("EGCs") (as defined in Section 3(a)(80) of the Exchange Act) unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation."[25] Auditing Standard No. 16 is the first auditing standard adopted by the Board subsequent to enactment of the JOBS Act and accordingly is subject to a separate determination by the SEC regarding its applicability to audits of EGCs.

Pursuant to Section 107(b) of the Act, the Board will file Auditing Standard No. 16 for approval by the SEC. The Board will also request that the SEC approve the application of Auditing Standard No. 16, and the related amendments, to the audits of EGCs.

VI. Appendices

Appendix 1 to this release contains the text of Auditing Standard No. 16, *Communications with Audit Committees,* which has three appendices:

(1) Appendix A—Definitions,

(2) Appendix B—Communications with Audit Committees Required by Other PCAOB Rules and Standards, and

(3) Appendix C—Matters Included in the Audit Engagement Letter.

Appendix 2 to this release contains the transitional amendments to AU sec. 380. Appendix 3 to this release contains amendments to other existing PCAOB

---

[24] *See* paragraph 1 of SAS 114 which states "[t]his statement . . . establishes standards and provides guidance on the auditor's communication with those charged with governance in relation to an audit of financial statements," and section 5.129 of the *AICPA Audit & Accounting Guide: Brokers and Dealers in Securities* (July 2010), which states, in part: "AU section 380, *The Auditor's Communication with Those Charged with Governance* . . . has been updated for the issuance of SAS No. 114 . . . . AU 380 is applicable to all broker-dealers being audited under GAAS, regardless of their governance structure or size."

[25] Pub. L. No. 112-106, 126 STAT. 306 (April 5, 2012). *See* Section 103(a)(3)(C) of the Act, 15 U.S.C. §7213 (a)(3)(C), as added by Section 104 of the JOBS Act.

standards. Appendix 4 provides additional discussion of Auditing Standard No. 16, the amendments to other PCAOB standards, and comments received on the reproposed standard. Appendix 5 to this release discusses certain significant differences between the objectives and requirements of Auditing Standard No. 16 and the analogous standards of the International Auditing and Assurance Standards Board ("IAASB") and the Auditing Standards Board of the AICPA. In developing the standard, the Board considered the requirements of the relevant standards of the IAASB and the ASB.

VII. Effective Date

The Board anticipates that the transitional amendments to AU sec. 380 included in Appendix 2 would be effective, subject to SEC approval, for the periods that PCAOB standards become applicable to audits of brokers and dealers, as designated by the SEC upon adoption of its amendments to SEC Rule 17a-5, if such periods precede the effective date of Auditing Standard No. 16.

The Board anticipates that Auditing Standard No. 16 and related amendments, included in Appendices 1 and 3, respectively, will be effective, subject to SEC approval, for audits of fiscal years beginning on or after December 15, 2012.

On the 15th day of August, in the year 2012, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.
/s/ Phoebe W. Brown
Phoebe W. Brown
Secretary

Appendix 1—Auditing Standard No. 16

Communications with Audit Committees

Introduction

1. This standard requires the auditor to communicate with the company's **audit committee**[1] regarding certain matters related to the conduct of an audit[2] and to obtain certain information from the audit committee relevant to the audit. This standard also requires the auditor to establish an understanding of the terms of the audit engagement with the audit committee and to record that understanding in an engagement letter.

2. Other Public Company Accounting Oversight Board ("PCAOB") rules and standards identify additional matters to be communicated to a company's audit committee (see Appendix B). Various laws or regulations also require the auditor to communicate certain matters to the audit committee.[3] The communication requirements of this standard do not modify or replace communications to the audit committee required by such other PCAOB rules and standards, and other laws or regulations. Nothing in this standard precludes the auditor from communicating other matters to the audit committee.

Objectives

3. The objectives of the auditor are to:

a. Communicate to the audit committee the responsibilities of the auditor in relation to the audit and establish an understanding of the terms of the audit engagement with the audit committee;

b. Obtain information from the audit committee relevant to the audit;

c. Communicate to the audit committee an overview of the overall audit strategy and timing of the audit; and

d. Provide the audit committee with timely observations arising from the audit that are significant to the financial reporting process.

Note: "Communicate to," as used in this standard, is meant to encourage effective two-way communication between the auditor and the audit committee throughout the audit to assist in understanding matters relevant to the audit.

Appointment and Retention

Significant Issues Discussed with Management in Connection with the Auditor's Appointment or Retention

4. The auditor should discuss with the audit committee any significant issues that the auditor discussed with management in connection with the

---

[1] Terms defined in Appendix A, *Definitions,* are set in **boldface type** the first time they appear.

[2] For purposes of this standard, an audit is either an audit of internal control over financial reporting that is integrated with an audit of financial statements or an audit of financial statements only.

[3] *See e.g.,* Section 10A(k) of the Securities Exchange Act of 1934 ("Exchange Act"), 15 U.S.C. §78j-1(k); Rule 2-07 of Regulation S-X, 17 C.F.R. §210.2-07; and Rule 10A-3 under the Exchange Act, 17 C.F.R. §240.10A-3.

appointment or retention of the auditor, including significant discussions regarding the application of accounting principles and auditing standards.

Establish an Understanding of the Terms of the Audit

5. The auditor should establish an understanding of the terms of the audit engagement with the audit committee. This understanding includes communicating to the audit committee the following:

a. The objective of the audit;

b. The responsibilities of the auditor; and

c. The responsibilities of management.

6. The auditor should record the understanding of the terms of the audit engagement in an engagement letter and provide the engagement letter to the audit committee annually. The auditor should have the engagement letter executed by the appropriate party or parties on behalf of the company.[4] If the appropriate party or parties are other than the audit committee, or its chair on behalf of the audit committee, the auditor should determine that the audit committee has acknowledged and agreed to the terms of the engagement.

Note: Appendix C describes matters that the auditor should include in the engagement letter about the terms of the audit engagement.

7. If the auditor cannot establish an understanding of the terms of the audit engagement with the audit committee, the auditor should decline to accept, continue, or perform the engagement.

Obtaining Information and Communicating the Audit Strategy

Obtaining Information Relevant to the Audit

8. The auditor should inquire of the audit committee about whether it is aware of matters relevant to the audit,[5] including, but not limited to, violations or possible violations of laws or regulations.[6]

Overall Audit Strategy, Timing of the Audit, and Significant Risks

9. The auditor should communicate to the audit committee an overview of the overall audit strategy, including the timing of the audit,[7] and discuss with

---

[4] Absent evidence to the contrary, the auditor may rely on the company's identification of the appropriate party or parties to execute the engagement letter.

[5] In addition to this inquiry, paragraphs 5.f. and 54-57 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, describe the auditor's inquiries of the audit committee, or equivalent (or its chair) regarding the audit committee's knowledge of the risks of material misstatement, including fraud risks. These inquiries include, among other things, whether the audit committee is aware of tips or complaints regarding the company's financial reporting.

[6] *See* AU sec. 317, *Illegal Acts by Clients*, for a description of the auditor's responsibilities when a possible illegal act is detected. For audits of issuers, *see also* Section 10A(b) of the Exchange Act, 15 U.S.C. §78j-1(b), and Rule 10A-1 under the Exchange Act, 17 C.F.R. §240.10A-1.

[7] *See* paragraphs 8-9 of Auditing Standard No. 9, *Audit Planning*, for a description of the auditor's responsibilities for establishing an overall audit strategy.

the audit committee the significant risks identified during the auditor's risk assessment procedures.[8]

Note: This overview is intended to provide information about the audit, but not specific details that would compromise the effectiveness of the audit procedures.

10. As part of communicating the overall audit strategy, the auditor should communicate the following matters to the audit committee, if applicable:

a. The nature and extent of specialized skill or knowledge needed to perform the planned audit procedures or evaluate the audit results related to significant risks;[9]

b. The extent to which the auditor plans to use the work of the company's internal auditors in an audit of financial statements;[10]

c. The extent to which the auditor plans to use the work of internal auditors, company personnel (in addition to internal auditors), and third parties working under the direction of management or the audit committee when performing an audit of internal control over financial reporting;[11]

d. The names, locations, and planned responsibilities[12] of other independent public accounting firms or other persons, who are not employed by the auditor, that perform audit procedures in the current period audit; and

Note: The term "other independent public accounting firms" in the context of this communication includes firms that perform audit procedures in the current period audit regardless of whether they otherwise have any relationship with the auditor.

e. The basis for the auditor's determination that the auditor can serve as principal auditor, if significant parts of the audit are to be performed by other auditors.[13]

11. The auditor should communicate to the audit committee significant changes to the planned audit strategy or the significant risks initially identified and the reasons for such changes.[14]

---

[8] Auditing Standard No. 12 requires the auditor to determine whether identified and assessed risks are significant risks. A significant risk is defined as a risk of material misstatement that requires special audit consideration.

[9] *See* paragraph 16 of Auditing Standard No. 9 for the requirement for the auditor to determine whether specialized skill or knowledge is needed to perform appropriate risk assessments, plan or perform audit procedures, or evaluate audit results.

[10] *See* AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, which describes the auditor's responsibilities related to the work of internal auditors.

[11] *See* paragraphs 16-19 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, which describe the auditor's responsibilities related to using the work of others in an audit of internal control over financial reporting.

[12] *See* paragraphs 8-14 of Auditing Standard No. 9, which discuss the auditor's responsibilities for determining the audit strategy, audit plan, and extent to which audit procedures should be performed at selected locations or business units involving multi-location engagements.

[13] *See* AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, which discusses the professional judgments the auditor makes in deciding whether the auditor may serve as principal auditor.

[14] *See* paragraph 15 of Auditing Standard No. 9, which discusses changes in audit strategy and the audit plan during the course of the audit.

Results of the Audit

Accounting Policies and Practices, Estimates, and Significant Unusual Transactions

12. The auditor should communicate to the audit committee the following matters:

a. Significant accounting policies and practices.[15]

(1) Management's initial selection of, or changes in, significant accounting policies or the application of such policies in the current period; and

(2) The effect on financial statements or disclosures of significant accounting policies in (i) controversial areas or (ii) areas for which there is a lack of authoritative guidance or consensus, or diversity in practice.

b. **Critical accounting policies and practices**. All critical accounting policies and practices to be used, including:[16]

(1) The reasons certain policies and practices are considered critical; and

(2) How current and anticipated future events might affect the determination of whether certain policies and practices are considered critical.

Note: Critical accounting policies and practices, as defined in Appendix A, are a company's accounting policies and practices that are both most important to the portrayal of the company's financial condition and results, and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain. Critical accounting policies and practices are tailored to specific events in the current year, and the accounting policies and practices that are considered critical might change from year to year.

c. **Critical accounting estimates**.

(1) A description of the process management used to develop critical accounting estimates;[17]

(2) Management's significant assumptions used in critical accounting estimates that have a high degree of subjectivity;[18] and

---

[15] *See, e.g.*, Financial Accounting Standards Board Accounting Standards Codification, Topic 235, Notes to Financial Statements, paragraph 235-10-50-1, which requires the entity to disclose a description of all significant accounting policies as an integral part of the financial statements, and paragraph 235-10-50-3, which describes what should be disclosed.

[16] *See also* Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k), and Rule 2-07(a)(1) of Regulation S-X, 17 C.F.R. §210.2-07(a)(1).

[17] *See* AU sec. 342, *Auditing Accounting Estimates*, which discusses the auditor's responsibilities to obtain and evaluate sufficient appropriate audit evidence to support significant accounting estimates in an audit of financial statements.

[18] *Id.*

(3) Any significant changes management made to the processes used to develop critical accounting estimates or significant assumptions, a description of management's reasons for the changes, and the effects of the changes on the financial statements.[19]

d. Significant unusual transactions.

(1) Significant transactions that are outside the normal course of business for the company or that otherwise appear to be unusual due to their timing, size, or nature;[20] and

(2) The policies and practices management used to account for significant unusual transactions.

Note: As part of its communications to the audit committee, management might communicate some or all of the matters in paragraph 12. If management communicates any of these matters, the auditor does not need to communicate them at the same level of detail as management, as long as the auditor (1) participated in management's discussion with the audit committee, (2) affirmatively confirmed to the audit committee that management has adequately communicated these matters, and (3) with respect to critical accounting policies and practices, identified for the audit committee those accounting policies and practices that the auditor considers critical. The auditor should communicate any omitted or inadequately described matters to the audit committee.

Auditor's Evaluation of the Quality of the Company's Financial Reporting

13. The auditor should communicate to the audit committee the following matters:

a. Qualitative aspects of significant accounting policies and practices.

(1) The results of the auditor's evaluation of, and conclusions about, the qualitative aspects of the company's significant accounting policies and practices, including situations in which the auditor identified bias in management's judgments about the amounts and disclosures in the financial statements;[21] and

(2) The results of the auditor's evaluation of the differences between (i) estimates best supported by the audit evidence and (ii) estimates included in the financial statements, which are individually reasonable, that indicate a possible bias on the part of the company's management.[22]

b. Assessment of critical accounting policies and practices. The auditor's assessment of management's disclosures related to the critical accounting policies and practices, along with any significant

[19] *Id.*

[20] *See* paragraph 71.g. of Auditing Standard No. 12.

[21] *See* paragraphs 24-27 of Auditing Standard No. 14, *Evaluating Audit Results*, which describe the auditor's responsibilities related to evaluating the qualitative aspects of the company's accounting practices.

[22] *See* paragraph 27 of Auditing Standard No. 14.

modifications to the disclosure of those policies and practices proposed by the auditor that management did not make.

c. Conclusions regarding critical accounting estimates. The basis for the auditor's conclusions regarding the reasonableness of the critical accounting estimates.[23]

d. Significant unusual transactions. The auditor's understanding of the business rationale for significant unusual transactions.[24]

e. Financial statement presentation. The results of the auditor's evaluation of whether the presentation of the financial statements and the related disclosures are in conformity with the applicable financial reporting framework, including the auditor's consideration of the form, arrangement, and content of the financial statements (including the accompanying notes), encompassing matters such as the terminology used, the amount of detail given, the classification of items, and the bases of amounts set forth.[25]

f. New accounting pronouncements. Situations in which, as a result of the auditor's procedures, the auditor identified a concern regarding management's anticipated application of accounting pronouncements that have been issued but are not yet effective and might have a significant effect on future financial reporting.

g. Alternative accounting treatments. All alternative treatments permissible under the applicable financial reporting framework for policies and practices related to material items that have been discussed with management, including the ramifications of the use of such alternative disclosures and treatments and the treatment preferred by the auditor.[26]

Other Information in Documents Containing Audited Financial Statements

14. When other information is presented in documents containing audited financial statements, the auditor should communicate to the audit committee the auditor's responsibility under PCAOB rules and standards for such information, any related procedures performed, and the results of such procedures.[27]

Difficult or Contentious Matters for which the Auditor Consulted

15. The auditor should communicate to the audit committee matters that are difficult or contentious for which the auditor consulted outside the

[23] *See* AU sec. 342, which discusses the auditor's responsibilities to obtain and evaluate sufficient appropriate audit evidence to support significant accounting estimates in an audit of financial statements.

[24] *See* paragraph .66 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

[25] *See* paragraphs 30-31 of Auditing Standard No. 14, which describe the auditor's responsibilities related to the evaluation of whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework. Other PCAOB standards, such as AU sec. 334, *Related Parties*, and AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, describe the auditor's responsibilities related to evaluation of specific disclosures in financial statements.

[26] *See also* Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k), and Rule 2-07(a)(2) of Regulation S-X, 17 C.F.R. §210.2-07(a)(2).

[27] *See, e.g.*, AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*. In addition to AU sec. 550, discussion of the auditor's consideration of other information is included in AU sec. 558, *Required Supplementary Information*, and AU sec. 711, *Filings Under Federal Securities Statutes*.

engagement team and that the auditor reasonably determined are relevant to the audit committee's oversight of the financial reporting process.

Management Consultation with Other Accountants

16. When the auditor is aware that management consulted with other accountants about significant auditing or accounting matters and the auditor has identified a concern regarding such matters, the auditor should communicate to the audit committee his or her views about such matters that were the subject of such consultation.

Going Concern

17. The auditor should communicate to the audit committee, when applicable, the following matters relating to the auditor's evaluation of the company's ability to continue as a going concern:[28]

a. If the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, the conditions and events that the auditor identified that, when considered in the aggregate, indicate that there is substantial doubt;[29]

b. If the auditor concludes, after consideration of management's plans, that substantial doubt about the company's ability to continue as a going concern is alleviated, the basis for the auditor's conclusion, including elements the auditor identified within management's plans that are significant to overcoming the adverse effects of the conditions and events;[30]

c. If the auditor concludes, after consideration of management's plans, that substantial doubt about the company's ability to continue as a going concern for a reasonable period of time remains:[31]

   (1) The effects, if any, on the financial statements and the adequacy of the related disclosure;[32] and

   (2) The effects on the auditor's report.[33]

---

[28] *See* AU sec. 341 for the requirements regarding an auditor's responsibility to evaluate whether there is substantial doubt about a company's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. Additionally, AU secs. 341.03a-c provide the auditor with an overview of the requirements for evaluating whether there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.

[29] *See* AU sec. 341.06, which provides examples of such conditions and events and AU sec. 341.07, which discusses the auditor's procedures if the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.

[30] *See* AU sec. 341.08, which discusses the auditor's responsibilities related to the auditor's evaluation of management's plans.

[31] *See* AU sec. 341.12, which describes the effects on the auditor's report. *See also* AU sec. 341.03c, which discusses the auditor's evaluation of factors that indicate there is substantial doubt about the company's ability to continue as a going concern.

[32] *See* AU sec. 341.10, which discusses the possible effects on the financial statements and the adequacy of the related disclosure.

[33] *See* AU secs. 341.12-.16, which discuss the auditor's consideration of the effects on the auditor's report when the auditor concludes that substantial doubt exists about the company's ability to continue as a going concern for a reasonable period of time.

Uncorrected and Corrected Misstatements

18. The auditor should provide the audit committee with the schedule of uncorrected misstatements related to accounts and disclosures[34] that the auditor presented to management.[35] The auditor should discuss with the audit committee, or determine that management has adequately discussed with the audit committee, the basis for the determination that the uncorrected misstatements were immaterial, including the qualitative factors[36] considered. The auditor also should communicate that uncorrected misstatements or matters underlying those uncorrected misstatements could potentially cause future-period financial statements to be materially misstated, even if the auditor has concluded that the uncorrected misstatements are immaterial to the financial statements under audit.

19. The auditor should communicate to the audit committee those corrected misstatements, other than those that are clearly trivial,[37] related to accounts and disclosures that might not have been detected except through the auditing procedures performed, and discuss with the audit committee the implications that such corrected misstatements might have on the company's financial reporting process.

Material Written Communications

20. The auditor should communicate to the audit committee other material written communications between the auditor and management.[38]

Departure from the Auditor's Standard Report

21. The auditor should communicate to the audit committee the following matters related to the auditor's report:

a. When the auditor expects to modify the opinion in the auditor's report, the reasons for the modification, and the wording of the report; and

b. When the auditor expects to include explanatory language or an explanatory paragraph in the auditor's report, the reasons for the explanatory language or paragraph, and the wording of the explanatory language or paragraph.

Disagreements with Management

22. The auditor should communicate to the audit committee any disagreements with management about matters, whether or not satisfactorily resolved,

---

[34] Footnote 13 to paragraph 20 of Auditing Standard No. 14 indicates that misstatements include omission and presentation of inaccurate or incomplete disclosures.

[35] *See* Section 13(i) of the Exchange Act, 15 U.S.C.§78m(i), which states, in part, that financial statements prepared in accordance with generally accepted accounting principles and filed with the Securities and Exchange Commission "shall reflect all material correcting adjustments that have been identified by a registered public accounting firm . . . ."

[36] Appendix B of Auditing Standard No. 14 discusses the qualitative factors related to the evaluation of the materiality of uncorrected misstatements.

[37] *See* paragraph 10 of Auditing Standard No. 14, which requires the auditor to accumulate misstatements identified during the audit, other than those that are clearly trivial.

[38] *See also* Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k) and Rule 2-07(a)(3) of Regulation S-X, 17 C.F.R. §210.2-07 (a)(3).

that individually or in the aggregate could be significant to the company's financial statements or the auditor's report. Disagreements with management do not include differences of opinion based on incomplete facts or preliminary information that are later resolved by the auditor obtaining additional relevant facts or information prior to the issuance of the auditor's report.

Difficulties Encountered in Performing the Audit

23. The auditor should communicate to the audit committee any significant difficulties encountered during the audit. Significant difficulties encountered during the audit include, but are not limited to:

a. Significant delays by management, the unavailability of company personnel, or an unwillingness by management to provide information needed for the auditor to perform his or her audit procedures;

b. An unreasonably brief time within which to complete the audit;

c. Unexpected extensive effort required by the auditor to obtain sufficient appropriate audit evidence;

d. Unreasonable management restrictions encountered by the auditor on the conduct of the audit; and

e. Management's unwillingness to make or extend its assessment of the company's ability to continue as a going concern when requested by the auditor.

Note: Difficulties encountered by the auditor during the audit could represent a scope limitation,[39] which may result in the auditor modifying the auditor's opinion or withdrawing from the engagement.

Other Matters

24. The auditor should communicate to the audit committee other matters arising from the audit that are significant to the oversight of the company's financial reporting process. This communication includes, among other matters, complaints or concerns regarding accounting or auditing matters that have come to the auditor's attention during the audit and the results of the auditor's procedures regarding such matters.[40]

Form and Documentation of Communications

25. The auditor should communicate to the audit committee the matters in this standard, either orally or in writing,[41] unless otherwise specified in this standard. The auditor must document the communications in the work papers, whether such communications took place orally or in writing.[42]

---

[39] *See* paragraphs .22-.32 of AU sec. 508, *Reports on Audited Financial Statements*, for a discussion of scope limitations.

[40] AU secs. 316.79-.81 and AU sec. 317.17 include specific communication requirements relating to fraud or illegal acts, respectively.

[41] *See* paragraphs .07-.11 of AU sec. 532, *Restricting the Use of an Auditor's Report*, which apply to certain written reports on matters coming to the auditor's attention during the course of the audit.

[42] Consistent with the requirements of Auditing Standard No. 3, *Audit Documentation*, the audit documentation should be in sufficient detail to enable an experienced auditor, having no previous connection with the engagement, to understand the communications made to comply with the provisions of this standard.

Note: If, as part of its communications to the audit committee, management communicated some or all of the matters identified in paragraphs 12 or 18 and, as a result, the auditor did not communicate these matters at the same level of detail as management, the auditor must include a copy of or a summary of management's communications provided to the audit committee in the audit documentation.

Timing

26. All audit committee communications required by this standard should be made in a timely manner and prior to the issuance of the auditor's report.[43] The appropriate timing of a particular communication to the audit committee depends on factors such as the significance of the matters to be communicated and corrective or follow-up action needed, unless other timing requirements are specified by PCAOB rules or standards or the securities laws.

Note: An auditor may communicate to only the audit committee chair if done in order to communicate matters in a timely manner during the audit. The auditor, however, should communicate such matters to the audit committee prior to the issuance of the auditor's report.

[43] Consistent with Rule 2-07 of Regulation S-X, 17 C.F.R. § 210.2- 07, in the case of a registered investment company, audit committee communication should occur annually, and if the annual communication is not within 90 days prior to the filing of the auditor's report, the auditor should provide an update in the 90-day period prior to the filing of the auditor's report, of any changes to the previously reported information.

Appendix A

Definitions

A1. For purposes of this standard, the terms listed below are defined as follows:

A2. Audit committee—A committee (or equivalent body) established by and among the board of directors of a company for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company; if no such committee exists with respect to the company, the entire board of directors of the company.

For audits of nonissuers, if no such committee or board of directors (or equivalent body) exists with respect to the company, the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company.

A3. Critical accounting estimate—An accounting estimate where (a) the nature of the estimate is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change and (b) the impact of the estimate on financial condition or operating performance is material.

A4. Critical accounting policies and practices—A company's accounting policies and practices that are both most important to the portrayal of the company's financial condition and results, and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain.

Appendix B

Communications with Audit Committees Required by Other PCAOB Rules and Standards

This appendix identifies other PCAOB rules and standards related to the audit that require communication of specific matters between the auditor and the audit committee.

- Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*, paragraphs 60, 62, and 64
- Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* paragraphs 78-81, 91, C7, and C14
- Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, paragraphs 5.f. and 54-57
- PCAOB Rule 3524, *Audit Committee Pre-approval of Certain Tax Services*
- PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting*
- PCAOB Rule 3526, *Communication with Audit Committees Concerning Independence*
- AU sec. 316, *Consideration of Fraud in a Financial Statement Audit,* paragraphs .79-.81
- AU sec. 317, *Illegal Acts by Clients*, paragraphs .08, .17, and .20
- AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements*, paragraphs 4-7 and 9
- AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, paragraph .50
- AU sec. 333, *Management Representations*, paragraph .05
- AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*, paragraphs .04 and .06
- AU sec. 711, *Filings Under Federal Securities Statutes*, paragraph .13
- AU sec. 722, *Interim Financial Information*, paragraphs .08-.09, .30-.31, and .33-.36

Appendix C

Matters Included in the Audit Engagement Letter

C1. The auditor should include the following matters in the engagement letter.[1] The auditor's description of these matters will vary depending on whether the auditor is engaged in a financial statement audit or in an audit of internal control over financial reporting that is integrated with an audit of financial statements ("integrated audit").

a. The objective of the audit is:

   1. Integrated audit: The expression of an opinion on both the effectiveness of internal control over financial reporting and the financial statements.

   2. Audit of financial statements: The expression of an opinion on the financial statements.

b. Auditor's responsibilities:

   1. The auditor is responsible for conducting the audit in accordance with the standards of the Public Company Accounting Oversight Board. Those standards require that the auditor:

      a. Integrated audit: Plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud, and whether effective internal control over financial reporting was maintained in all material respects. Accordingly, there is some risk that a material misstatement of the financial statements or a material weakness in internal control over financial reporting would remain undetected. Although not absolute assurance, reasonable assurance is a high level of assurance.

         Also, an integrated audit is not designed to detect error or fraud that is immaterial to the financial statements or deficiencies in internal control over financial reporting that, individually or in combination, are less severe than a material weakness. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.

      b. Audit of financial statements: Plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or

[1] Certain matters should not be included in an engagement letter; for example, under Securities and Exchange Commission, *Section 602.02.f.i. of the Codification of Financial Reporting Policies*, indemnification provisions are not permissible for audits of issuers.

fraud. Accordingly, there is some risk that a material misstatement would remain undetected. Although not absolute assurance, reasonable assurance is a high level of assurance. Also, a financial statement audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.

2. An audit includes:

   a. Integrated audit: In fulfillment of the responsibilities noted above, the auditor communicates:

      1. To the audit committee and management: all material weaknesses in internal control over financial reporting identified during the audit, in writing.
      2. To the audit committee: all significant deficiencies identified during the audit, in writing, and informs the audit committee when the auditor has informed management of all internal control deficiencies.
      3. To management: all internal control deficiencies identified during the audit and not previously communicated in writing by the auditor or by others, including internal auditors or others within the company.
      4. To the board of directors: any conclusion that the audit committee's oversight of the company's external financial reporting and internal control over financial reporting is ineffective, in writing.

   b. Audit of financial statements: Obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed.[2] An audit of financial statements is not designed to provide assurance on internal control or to identify internal control deficiencies. However, the auditor is responsible for communicating:

      1. To the audit committee and management: all significant deficiencies and material weaknesses identified during the audit, in writing.
      2. To the board of directors: if the auditor becomes aware that the oversight of

[2] AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements*, provides direction on control deficiencies identified in an audit of financial statements.

the company's external financial reporting and internal control over financial reporting by the audit committee is ineffective, that conclusion, in writing.

c. Management's responsibilities:
    1. Management is responsible for the company's financial statements, including disclosures.
    2. Management is responsible for establishing and maintaining effective internal control over financial reporting.
    3. Management is responsible for identifying and ensuring that the company complies with the laws and regulations applicable to its activities.
    4. Management is responsible for making all financial records and relevant information available to the auditor.
    5. At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.
    6. Management is responsible for adjusting the financial statements to correct material misstatements relating to accounts or disclosures and for affirming to the auditor in the representation letter that the effects of any uncorrected misstatements aggregated by the auditor are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

C2. In connection with a review of interim financial information, to confirm and document the understanding, the auditor should either: (a) document in the audit engagement letter the nature and objectives of the engagement to review interim financial information and the responsibilities of management and the auditor or (b) issue a separate engagement letter that addresses such matters.[3]

[3] Paragraphs .08-.09 of AU sec. 722, *Interim Financial Information*, discuss the auditor's responsibilities related to establishing an understanding with the audit committee in connection with a review of the company's interim financial information.

Appendix 2

Transitional Amendments to AU sec. 380, Communication With Audit Committees

Auditing Standard

AU sec. 380, "Communication With Audit Committees"

SAS No. 61, "Communication With Audit Committees" *(*AU sec. 380, "Communication With Audit Committees"), as amended, is amended as follows:

a. The last sentence of paragraph .01 is replaced with:

> The communications required by this section are applicable to the audits of (i) issuers and (ii) brokers and dealers, as those terms are defined in the Sarbanes-Oxley Act of 2002, as amended.[2]

b. Footnote 2 to paragraph .01 is replaced with:

> *See* Sections 2(a)(7), 110(3), and 110(4) of the Sarbanes-Oxley Act of 2002.

Appendix 3

Amendments to PCAOB Standards

Auditing Standards

Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*

Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*, as amended, is amended as follows:

a. The following sentence is added at the end of paragraph 80:

> This communication should be made in a timely manner and prior to the issuance of the auditor's report on internal control over financial reporting.

b. The following sentence is added after the first sentence of paragraph 81:

> The auditor should communicate this information to the audit committee in a timely manner and prior to the issuance of the auditor's report on internal control over financial reporting.

Auditing Standard No. 9, *Audit Planning*

Auditing Standard No. 9, *Audit Planning*, is amended as follows:

a. Paragraph 6.c. is replaced with:

> Establish an understanding of the terms of the audit engagement with the audit committee in accordance with Auditing Standard No. 16, *Communications with Audit Committees*.

b. Footnote 4 to paragraph 6 is deleted.

c. In footnote 7 to paragraph 9.a., the references to AU sec. 310 and AU sec. 380, *Communication with Audit Committees*, are replaced with a reference to Auditing Standard No. 16, *Communications with Audit Committees*.

Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*

Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, is amended as follows:

The note to paragraph 5.d. is deleted.

AU sec. 310, "Appointment of the Independent Auditor"

SAS No. 1, "Codification of Auditing Standards and Procedures" section 310, "Appointment of the Independent Auditor" (AU sec. 310, "Appointment of the Independent Auditor"), as amended, is superseded.

AU sec. 316, "Consideration of Fraud in a Financial Statement Audit"

SAS No. 99, "Consideration of Fraud in a Financial Statement Audit" (AU sec. 316, "Consideration of Fraud in a Financial Statement Audit"), as amended, is amended as follows:

a. The third sentence of paragraph .79 is replaced with:

> Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to the audit committee in a timely manner and prior to the issuance of the auditor's report.

b. The second sentence of paragraph .81 is replaced with:

> Such a communication may be a part of an overall communication to the audit committee of business and financial statement risks affecting the entity and/or in conjunction with the auditor communication about the qualitative aspects of the entity's accounting policies and practices (see paragraphs 12–13 of Auditing Standard No. 16, *Communications with Audit Committees*). The auditor should communicate these matters to the audit committee in a timely manner and prior to the issuance of the auditor's report.

c. Within footnote 10 to paragraph .88, the reference to section 380, *Communication With Audit Committees*, is replaced with a reference to Auditing Standard No. 16, *Communications with Audit Committees*.

AU sec. 317, "Illegal Acts by Clients"

SAS No. 54, "Illegal Acts by Clients" (AU sec. 317, "Illegal Acts by Clients"), as amended, is amended as follows:

a. The fourth sentence of paragraph .08 is replaced with:

> The auditor should make inquiries of management and the audit committee[1] concerning the client's compliance with laws and regulations and knowledge of violations or possible violations of laws or regulations.

b. Footnote 1 is added to paragraph .08 after the term "audit committee":

> For this standard, audit committee is defined as a committee (or equivalent body) established by and among the board of directors of an entity for the purpose of overseeing the accounting and financial reporting processes of the entity and audits of the financial statements of the entity; if no such committee exists with respect to the entity, the entire board of directors of the entity. For audits of nonissuers, if no such committee or board of directors (or equivalent body) exists with respect to the entity, the person(s) who oversee the accounting and financial reporting processes of the entity and audits of the financial statements of the entity.

c. The first sentence of paragraph .17 is replaced with:

> The auditor should assure himself that the audit committee is adequately informed as soon as practicable and prior to the issuance

of the auditor's report with respect to illegal acts that come to the auditor's attention.

d. Footnote 1 to paragraph .17 is deleted.

AU sec. 328, "Auditing Fair Value Measurements and Disclosures"

SAS No. 101, "Auditing Fair Value Measurements and Disclosures" (AU sec. 328, "Auditing Fair Value Measurements and Disclosures"), as amended, is amended as follows:

Paragraph .50 is replaced with:

Paragraphs 12-13 of Auditing Standard No. 16, *Communications with Audit Committees*, require the auditor to communicate to the audit committee matters related to critical accounting estimates, which may include fair value measurements.

AU sec. 333, "Management Representations"

SAS No. 85, "Management Representations" (AU sec. 333, "Management Representations"), as amended, is amended as follows:

The following sentence is added as the last sentence of paragraph .05:

The auditor should provide a copy of the representation letter to the audit committee if management has not already provided the representation letter to the audit committee.

AU sec. 341, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern"

SAS No. 59, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern" (AU sec. 341, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern"), as amended, is amended as follows:

Paragraph .17A is added, along with the heading preceding this paragraph:

Communications with Audit Committees

Paragraph 17 of Auditing Standard No. 16, *Communications with Audit Committees*, describes matters an auditor is required to communicate to the audit committee related to the auditor's evaluation of a company's ability to continue as a going concern for a reasonable period of time.

AU sec. 380, "Communication With Audit Committees"

SAS No. 61, "Communication With Audit Committees" (AU sec. 380, "Communication With Audit Committees"), as amended, is superseded.

AU sec. 9380, "Communication With Audit Committees: Auditing Interpretations of Section 380"

AU sec. 9380, "Communication With Audit Committees: Auditing Interpretations of Section 380," is superseded.

AU sec. 532, "Restricting the Use of an Auditor's Report"

SAS No. 87, "Restricting the Use of an Auditor's Report (AU sec. 532, "Restricting the Use of an Auditor's Report"), as amended, is amended as follows:

In the second bullet point of paragraph .07, the reference to Section 380, *Communication With Audit Committees*, is replaced with a reference to Auditing Standard No. 16, *Communications with Audit Committees*.

AU sec. 550, "Other Information in Documents Containing Audited Financial Statements"

SAS No. 8, "Other Information in Documents Containing Audited Financial Statements" (AU sec. 550, "Other Information in Documents Containing Audited Financial Statements"), as amended, is amended as follows:

a. The sixth sentence of paragraph .04 is replaced with:

   If the other information is not revised to eliminate the material inconsistency, he should communicate the material inconsistency to the audit committee and consider other actions, such as revising his report to include an explanatory paragraph describing the material inconsistency, withholding the use of his report in the document, and withdrawing from the engagement.

b. The second sentence of paragraph .06 is replaced with:

   He should communicate the material misstatement of fact to the client and the audit committee, in writing, and consider consulting his legal counsel as to further appropriate action in the circumstances.

AU sec. 711, "Filings Under Federal Securities Statutes"

SAS No. 37, "Filings Under Federal Securities Statutes" (AU sec. 711, "Filings Under Federal Securities Statutes"), as amended, is amended as follows:

The last sentence of paragraph .13 is replaced with:

In either case, the accountant should communicate the matter to the audit committee and also consider withholding his consent to the use of his report on the audited financial statements in the registration statement.

AU sec. 722, "Interim Financial Information"

SAS No. 100, "Interim Financial Information" (AU sec. 722, "Interim Financial Information"), as amended, is amended as follows:

a. The heading preceding paragraph .08, "Establishing an Understanding With the Client" is replaced with the heading, "Establishing an Understanding with the Audit Committee."

b. Paragraph .08 is replaced with:

   The accountant should establish an understanding of the terms of an engagement to review interim financial information with the audit committee or others with equivalent authority and responsibility (hereafter referred to as the audit committee).[6] This understanding includes the objective of the review of interim financial information, the responsibilities of the accountant, and the responsibilities

of management. Such an understanding reduces the risk that either the accountant or the audit committee may misinterpret the needs or expectations of the other party. The accountant should record this understanding of the terms of the engagement in an engagement letter and should provide the engagement letter to the audit committee. The accountant should have the engagement letter executed by the appropriate party or parties on behalf of the company. If the appropriate party or parties are other than the audit committee, or its chair on behalf of the audit committee, the accountant should determine that the audit committee has acknowledged and agreed to the terms of the engagement. If the accountant believes he or she cannot establish an understanding of the terms of an engagement to review interim financial information with the audit committee, the accountant should decline to accept, continue, or perform the engagement.

c. Footnote 6 to paragraph .08 is replaced with:

See paragraph .16 of QC sec. 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*.

d. In the first sentence of paragraph .09, the word "client" is replaced with the words "audit committee."

e. Paragraph .30 is replaced with:

If management does not respond appropriately to the accountant's communication within a reasonable period of time, the accountant should communicate these matters to the audit committee as soon as practicable and prior to the registrant filing its periodic report with the SEC. The communications to the audit committee should be made and documented in accordance with paragraph 25 of Auditing Standard No. 16, *Communications with Audit Committees*.

f. The following sentence is added at the end of paragraph .33:

The accountant should communicate significant deficiencies or material weaknesses of which the accountant has become aware to the audit committee or those responsible for oversight of the company's financial reporting in a timely manner and prior to the registrant filing its periodic report with the SEC.

g. Paragraph .34 is replaced with:

When conducting a review of interim financial information, the accountant also should determine whether any of the matters described in Auditing Standard No. 16, *Communications with Audit Committees*, as they relate to interim financial information, have been identified. If such matters have been identified, the accountant should communicate them to the audit committee in a timely manner and prior to the registrant filing its periodic report with the SEC. For example, the accountant should communicate a description of the process management used to develop the critical accounting estimates; a change in a significant accounting policy affecting the interim financial information; misstatements that, either individually or in the aggregate, could have a significant effect on the entity's financial reporting process; and uncorrected misstatements aggregated by the accountant that management determined to be immaterial, both individually and in the aggregate, to the interim financial statements taken as a whole.[23] As part of its communications to the audit committee, management might communicate some or all of the matters related to the company's accounting policies, practices, estimates, and significant unusual transactions described in paragraph 12 of

Auditing Standard No. 16, *Communications with the Audit Committees*. If management communicates any of these matters, the accountant does not need to communicate them at the same level of detail as management, as long as the accountant (1) participated in management's discussion with the audit committee, (2) affirmatively confirmed to the audit committee that management has adequately communicated these matters, and (3) with respect to critical accounting policies and practices, identified for the audit committee those accounting policies and practices that the accountant considers critical. The accountant should communicate any omitted or inadequately described matters to the audit committee.

h. Footnote 23 to paragraph .34 is replaced with:

The schedule of uncorrected misstatements related to accounts and disclosures provided to the audit committee should be the same schedule that was included in or attached to the management representation letter that is described in paragraph .24(*k*) of this section.

i. The last two sentences of paragraph .35 are replaced with:

Therefore, any communication the accountant may make about the entity's accounting policies, practices, estimates, and significant unusual transactions as applied to its interim financial reporting, generally would be limited to the effect of significant events, transactions, and changes in accounting estimates that the accountant considered when conducting the review of interim financial information. Further, interim review procedures do not provide assurance that the accountant will become aware of all matters that might affect the accountant's judgments about the qualitative aspects of the entity's accounting policies and practices that would be identified as a result of an audit.

j. Paragraph .36 is replaced with:

If the accountant has identified matters to be communicated to the audit committee, the accountant should communicate such matters to the audit committee, or at least its chair, in a timely manner and prior to the registrant filing its periodic report with the SEC. The communications to the audit committee should be made and documented in accordance with paragraph 25 of Auditing Standard No. 16, *Communications with Audit Committees*.

Appendix 4

Additional Discussion of Auditing Standard No. 16, Related Amendments to PCAOB Standards, and Comments on the Reproposed Standard

This appendix discusses Auditing Standard No. 16, *Communications with Audit Committees* (the "standard"), presented in Appendix 1, and the related amendments to PCAOB standards in Appendix 3.[1] In particular, this appendix provides additional background information for certain requirements in the standard and related amendments.

The standard was originally proposed on March 29, 2010[2] (the "original proposed standard"), a roundtable was held on September 21, 2010,[3] and the standard was reproposed on December 20, 2011[4] (the "reproposed standard"). This appendix also discusses the Board's responses to significant issues raised by the comments on the reproposed standard, as well as the basis for the Board's conclusions regarding certain requirements.

I. Definition of Audit Committee (Paragraph A-2 of Auditing Standard No. 16)

Auditing Standard No. 16 defines an audit committee as a committee (or equivalent body) established by and among the board of directors of a company for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company; if no such committee exists with respect to the company, the entire board of directors of the company. This definition largely incorporates the definition of "audit committee" from the Sarbanes-Oxley Act of 2002 (the "Act").[5] The parenthetical phrase "or equivalent body" after the term "committee" clarifies that entities with bodies performing a function similar to that of an audit committee would fit within this category.

The standard modifies the Act's version of the definition of an audit committee as it relates to audits of nonissuers. Specifically, for audits of nonissuers, Auditing Standard No. 16 states that, if no such committee or board of directors (or equivalent body) exists with respect to the company, the audit committee would be considered the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company. This modification was made to recognize that some nonissuers, including brokers and dealers, may have governance structures that do not include boards of directors or audit committees. In those cases, the auditor would identify those

[3] A transcript of the roundtable is available at http://pcaobus.org/Rules/Rulemaking/Docket030/Roundtable_Transcript.pdf.

[4] *Proposed Auditing Standard Related to Communications with Audit Committees; Related Amendments to PCAOB Standards; and Transitional Amendments to AU sec. 380*, PCAOB Release No. 2011-008 (Dec. 20, 2011).

[5] Section 2(a)(3) of the Act, 15 U.S.C. § 7201.

persons at the nonissuer company who oversee the company's accounting and financial reporting processes and audits. This modification is meant to indicate that senior persons in an oversight role in such circumstances would be the recipients of the auditor communications.

Using the definition of "audit committee," the auditor would identify the bodies or persons that oversee the company's accounting, auditing, and financial reporting processes to find the appropriate recipient of the communications under the standard.[6] For issuers, the definition is the same as the definition included in the Act.[7] For nonissuers, the definition contains three categories of bodies or persons. The first two categories (audit committee and the entire board of directors of the company) are the same as those included in the definition of audit committee for an issuer. The third category covers situations in which the company does not have an audit committee, board of directors, or equivalent body, such as certain non-public brokers and dealers. The parenthetical phrase "or equivalent body" after the term "board of directors" clarifies that entities with bodies performing a function similar to that of a corporate board of directors would fit within this category.

The reproposed standard required the auditor to communicate to those persons designated to oversee the financial reporting processes of the company in situations in which a nonissuer does not have an audit committee, board of directors, or equivalent body. Some commenters indicated that, for certain nonissuers, the person designated to oversee the accounting and financial reporting processes of the company could be the chief financial officer, in which case the communication would be made to the person preparing the financial statements. Therefore, commenters suggested that the auditor should make relevant communications to the chief executive officer, or equivalent officer of the company.

The definition was revised to focus on the person(s) identified by the auditor as responsible for overseeing the accounting and financial reporting processes of the company. However, the definition was not revised to exclude from the definition of audit committee those persons with oversight responsibility who also have management responsibilities for the preparation of the financial statements of the company. As adopted, for nonissuers with no existing audit committee or board of directors (or equivalent body), the auditor would be expected to identify senior persons at the company who have decision-making authority and responsibility to oversee the accounting and financial reporting processes of the company and audits of the financial statements, and to make the required communications to those persons. For example, in an owner managed entity, the person with oversight of financial reporting within the company could be the owner. Under a limited partnership, the person with oversight of financial reporting within the company could be the managing or general partner responsible for preparation of the financial statements and oversight of the partnership's audits.

Nevertheless, if all persons identified by the auditor as having responsibility for oversight of the company's accounting and financial reporting processes and audits also have management responsibilities for the preparation of the financial statements, then the auditor could also make the communications specified in the standard to other individuals at the company. For example the auditor

---

[6] The Board's proposed definition is not intended to conflict with or affect any requirements, or the application of any requirements, under federal law, state law, foreign law, or an entity's governing documents regarding the establishment, approval, or ratification of board of directors or audit committees, or the delegation of responsibilities of such a committee or board.

[7] Section 2(a)(3) of the Act, 15 U.S.C. § 7201.

might identify that the chief executive officer has oversight responsibility for the company's accounting and financial reporting processes; therefore, in those circumstances communications to the chief executive would be in compliance with the audit committee definition in Auditing Standard No. 16. Additionally, the auditor might identify others in charge of the company's operations and performance, who may benefit from the communications.

Some commenters suggested that the standard should clarify to whom the auditor should communicate when the company is a subsidiary of another entity. Auditing Standard No. 16 does not require communication outside the governance structure of the audited entity because the standard designates the appropriate party to receive the auditor communications within the audited entity. If directed by the audit client, or if the auditor otherwise deems it appropriate, the auditor could also communicate to a parent company audit committee or equivalent body.

II. Objectives (Paragraph 3 of Auditing Standard No. 16)

Auditing Standard No. 16 states that the objectives of the auditor are to (a) communicate to the audit committee the responsibilities of the auditor in relation to the audit and establish an understanding of the terms of the audit engagement with the audit committee; (b) obtain information from the audit committee relevant to the audit; (c) communicate to the audit committee an overview of the overall audit strategy and timing of the audit; and (d) provide the audit committee with timely observations arising from the audit that are significant to the financial reporting process. The objectives of the standard are intended to highlight the overall context for the requirements in the standard.

III. Significant Issues Discussed with Management in Connection with the Auditor's Appointment or Retention (Paragraph 4 of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to discuss with the audit committee any significant issues that the auditor discussed with management in connection with the appointment or retention of the auditor, including significant discussions regarding the application of accounting principles and auditing standards. This requirement was retained from AU sec. 380.[8]

This requirement is included in the standard because the audit committee might ask management for its views concerning the appointment or retention of the auditor. Management's views might be influenced by the interaction between the auditor and management and the auditor's evaluations and conclusions regarding the application of accounting principles or auditing standards.

Some commenters suggested that these discussions should include a robust fee discussion or a discussion about the results of the auditor's considerations during the client acceptance and continuance process, such as the auditor's views of the entity's accounting and financial reporting practices or management's integrity. The standard was not revised to include such additional matters because the requirement in the standard specifically addresses the auditor's discussions with management related to accounting and auditing matters in

[8] AU sec. 380.15.

connection with the appointment or retention of the auditor. However, Auditing Standard No. 16 requires the auditor to communicate any matters arising from the audit to the audit committee that the auditor believes are significant to the audit committee's oversight of the company's financial reporting process.[9]

IV. Establish an Understanding of the Terms of the Audit (Paragraphs 5-7 of Auditing Standard No. 16)

Auditing Standard No. 16 includes a specific requirement for the auditor to establish an understanding of the terms of the audit engagement with the audit committee. Having a mutually clear understanding of the terms of the engagement, including the objectives of the audit, the responsibilities of the auditor, and the responsibilities of management in connection with the audit, should benefit both the auditor and the audit committee.

The requirement in Auditing Standard No. 16 is similar to the requirement in AU sec. 310, *Appointment of the Independent Auditor* ("AU sec 310"), which requires the auditor to establish an understanding with the client regarding the services to be performed. However, Auditing Standard No. 16 more specifically requires that the understanding be with the audit committee due to the audit committee's financial reporting and audit oversight role, rather than with the "client," which could be understood to mean others besides the audit committee in certain circumstances.

Auditing Standard No. 16 also requires the auditor to record the understanding of the terms of the audit engagement in an engagement letter. Appendix C of Auditing Standard No. 16 describes matters that should be included in an engagement letter, including the objective of the audit and the responsibilities of the auditor and management. This is an expansion of the requirement in AU sec. 310, which requires the auditor to document the understanding of the engagement in the working papers, preferably through a written communication with the client.

Some commenters indicated that the engagement letter should describe the responsibilities of the audit committee related to the audit. The Board considered this suggestion and did not change the standard to include the responsibilities of the audit committee, as those responsibilities are governed by the rules of other organizations, such as the Securities and Exchange Commission ("SEC") and the national securities exchanges.[10] However, the standard does not prohibit the auditor from including other matters in the engagement letter, as agreed upon by the auditor and the audit committee, so long as those matters are not in violation of other standards or rules, for example, independence requirements.

Auditing Standard No. 16 requires the auditor to provide the engagement letter to the audit committee annually. Additionally, the auditor should have the engagement letter executed by the appropriate party or parties on behalf of the company.[11] The standard also states that if the appropriate party or parties are other than the audit committee, or its chair on behalf of the audit committee, the auditor also should determine that the audit committee has acknowledged

---

[9] Paragraph 24 of Auditing Standard No. 16.

[10] *See, e.g.,* New York Stock Exchange, Listed Company Manual at Section 303A.07, Audit Committee Additional Requirements.

[11] Absent evidence to the contrary, the auditor may rely on the company's identification of the appropriate party or parties to execute the engagement letter.

and agreed to the terms of the engagement. This acknowledgment may be obtained in a variety of ways, such as obtaining the audit committee members' signatures, or its chair's signature on behalf of the audit committee, or obtaining another form of acknowledgement and agreement by the audit committee regarding the terms of the audit engagement. Obtaining this acknowledgement reduces the risk that either the auditor or the audit committee might misinterpret the needs or expectations of the other party. An acknowledgement by the audit committee, the signatures of the audit committee members, or the signature of its chair on behalf of the audit committee on the engagement letter is not intended to conflict with or affect any requirements, or the application of any requirements, under federal law, state law, foreign law, applicable exchange requirements, or the company's governing documents, regarding the authority or lack of authority of the audit committee to enter into any contract or agreement with the auditor.

Several commenters suggested that the standard should specify that the engagement letter should be executed by management in addition to the audit committee or by management alone, along with a representation that it has the authority to do so on behalf of the audit committee. The Board considered these comments and decided that, absent evidence to the contrary, the auditor may rely on the company's identification of the appropriate party or parties to execute the engagement letter. Therefore, the standard does not specify the party that should execute the engagement letter on behalf of the company.

Some commenters suggested that the standard should indicate that the audit committee's acknowledgement can be either written or oral. Other commenters suggested that the audit committee's acknowledgement should be written, either evidenced by a signature on the engagement letter or in the audit committee's minutes, to avoid the potential for subsequent misunderstandings of whether the audit committee's acknowledgement has been obtained.

The Board considered these comments and determined that the audit committee's acknowledgement may be provided in writing, such as a signed engagement letter or through the minutes of the audit committee meeting, or orally. The primary focus of this requirement is that the auditor receives acknowledgment and agreement from the audit committee rather than the method the audit committee uses to provide that acknowledgement; therefore, a change to the standard was not warranted. The reproposed standard did not specify the form of acknowledgment and, therefore, the standard was not revised. However, the auditor could request that the audit committee acknowledge the terms of the audit engagement in writing. If the audit committee's acknowledgement is received orally, in accordance with paragraph 25 of Auditing Standard No. 16, the auditor is required to document the acknowledgement in the auditor's work papers.

V. Obtaining Information Relevant to the Audit (Paragraph 8 of Auditing Standard No. 16)

Auditing Standard No. 16 includes a requirement for the auditor to inquire of the audit committee about whether it is aware of matters relevant to the audit, including, but not limited to, violations or possible violations of laws or regulations. This inquiry contributes to a two-way dialogue between the auditor and the audit committee concerning matters relevant to the audit. This inquiry would complement the requirement for the auditor to make inquiries of the audit committee (or its chair) about risks of material misstatement, including inquiries related to fraud risks, in accordance with Auditing Standard No. 12,

Identifying and Assessing Risks of Material Misstatement.[12] This requirement is included in the standard because, in addition to the inquiries required as part of the risk assessment procedures, audit committees may be aware of other matters relevant to the auditor in performing audit procedures.

Auditing Standard No. 16 does not include the reference to "complaints or concerns received by the audit committee regarding financial reporting matters" previously included in the reproposed standard. This change is not intended to signal a change in the scope of this communication between the audit committee and the auditor. Rather, the Board notes that such inquiry by the auditor of the audit committee is already included in paragraph 56.b(3) of Auditing Standard No. 12, which requires the auditor to inquire of the audit committee about tips or complaints regarding the company's financial reporting.[13] Since the inquiry in the reproposed standard was similar to the inquiries in Auditing Standard No. 12, Auditing Standard No. 16 was revised to remove the inquiry regarding complaints or concerns.

Auditing Standard No. 16 does not provide specific timing for these inquiries to be made. Depending on the circumstances of the audit, it may be appropriate for the auditor to conduct such inquiries of the audit committee at the outset of the audit and/or at other various stages of the audit. For example, the auditor may want to conduct these inquiries early in the audit to consider any information received from the audit committee in designing the nature, timing, and extent of audit procedures. In other circumstances, as the audit progresses, an auditor may want to inquire of the audit committee as to whether any additional matters or concerns relevant to the audit have come to the attention of the audit committee not previously discussed with the auditor.

The reproposed standard required the auditor to inquire of the audit committee about "whether it is aware of matters that might be relevant to the audit." One commenter raised concerns about this provision of the reproposed standard as being "too broad and overreaching," which could obscure information that is truly relevant to the audit. Other commenters suggested that the inquiries of the audit committee should be expanded to include other matters, such as the audit committee's awareness of significant changes in company conditions or activities.

After considering the comments received on the scope of the information to be communicated under this provision, the term "might be" was excluded from this paragraph of the standard. The deletion of the term "might be" is appropriate to avoid an overly broad interpretation of the standard to require discussion of matters that may not be directly connected to the audit.

Although the Board did not revise the requirement to list all the matters of which the auditor could inquire in this provision, the requirement in the standard is not meant to be limited only to matters that are related to violations or possible violations of laws. The Board did not consider it practical to revise the requirement in an attempt to list all the matters of which the auditor could inquire in this provision. Such matters can and should vary from audit to audit. Rather, the inclusion of such matters was meant to serve only as an example of a matter that the auditor should discuss with the audit committee.

The same commenter who objected to the breadth of the inquiry also raised concerns related to the audit committee providing information to the auditor

---

[12] *See* paragraph 5.f. and 54-57 of Auditing Standard No. 12.

[13] Auditing Standard No. 12 also includes inquiries regarding the audit committee's views about fraud risks, its knowledge of fraud, and the audit committee's response to tips or complaints regarding the company's financial reporting, and how the audit committee exercises oversight of the company's assessment of fraud risks. *See* paragraphs 56.b(1)-(4) of Auditing Standard No. 12.

about violations or possible violations of laws or regulations and complaints or concerns received regarding financial reporting matters contained in the reproposed standard. The commenter indicated that the audit committee's communication of such information could cause the information to lose its confidentiality status with potential significant harmful consequences to the company, such as reducing the candor and chilling communications between management, employees, and the audit committee. The commenter also indicated that if the audit committee discloses information covered by privileged attorney-client communications or attorney work product to the auditor as part of this communication, the company may face a risk that a court may later deem the company to have waived the protection of such privilege or work product doctrine.

The Board did not change the requirement to exclude inquiries regarding violations or possible violations of laws or regulations that are relevant to the audit. Limiting the scope of information that the audit committee might provide to the auditor could severely affect the auditor's ability to conduct an effective audit.

The purpose of this requirement is to enable the auditor to have the information necessary to conduct the audit to support the auditor's opinion on the company's financial statements. Due to the audit committee's oversight responsibilities, it is appropriate for the auditor to ask the audit committee for information relevant to the audit, including matters related to violations or possible violations of laws or regulations. Without such inquiry, the auditor may not have information that could influence the performance of the audit.

The same commenter also indicated that if the audit committee provides information relevant to the audit, the audit committee's role would change fundamentally from overseeing the accounting and financial reporting process of the company and audits of financial statements to becoming the original source of information for the auditor and guarantor of the accuracy and completeness of the financial statements, a role that historically has been that of management. It is possible, that in some situations, the communication from the audit committee is the first instance in which a matter is brought to the attention of the auditor. For example, in some situations the audit committee may have unique insight into management's performance. By providing the opportunity for the audit committee to discuss information with the auditor, the standard enables the auditor to obtain the audit committee's perspective on matters which may be different from management's perspective.

VI. Overall Audit Strategy, Timing of the Audit, and Significant Risks (Paragraphs 9-11 of Auditing Standard No. 16)

Auditing Standard No. 16 includes a requirement for the auditor to communicate to the audit committee an overview of the overall audit strategy, including the timing of the audit, and to discuss with the audit committee the significant risks[14] identified during the auditor's risk assessment procedures. Under this requirement, the auditor communicates to the audit committee the results of audit procedures performed in accordance with other PCAOB standards, such as Auditing Standard No. 9, *Audit Planning,* which requires the auditor to establish an overall audit strategy that sets the scope, timing, and direction of the audit and guides the development of the audit plan. As part of the auditor's

[14] *See* paragraph A5 of Auditing Standard No. 12, which defines significant risk as a risk of material misstatement that requires special audit consideration.

risk assessment process, the auditor is required to identify and assess the risk of material misstatement, including significant risks.[15]

The timing of communications related to the audit strategy may vary from audit to audit based on the facts and circumstances. However, early communication of these matters might enable the audit committee to understand the auditor's views regarding risk and thereby provide an opportunity for the audit committee to communicate insights regarding additional risks that the auditor did not identify and allow the auditor to more effectively incorporate the additional risks into the audit strategy.

Some commenters indicated that the requirement for the auditor to communicate the audit strategy might result in the audit committee second guessing the auditor's strategy and the scope of the audit. These commenters suggested that the standard should emphasize that the auditor should not disclose details about the audit strategy that would allow management or the audit committee to take steps that could reduce the effectiveness of the audit strategy. Another commenter suggested the standard should require the auditor to provide specific details about the type and timing of procedures. Auditing Standard No. 16 includes a note, which indicates that the overview of the audit strategy is intended to provide information about the audit, but not specific details that would compromise the effectiveness of the audit procedures. Communicating certain details might reduce the effectiveness of those audit procedures. The Board considers that the language in Auditing Standard No. 16 strikes the appropriate balance; therefore, the standard was not revised.

Some commenters suggested that significant risks should be communicated throughout the audit rather than communicating just those significant risks identified during the auditor's risk assessment procedures. It is not the intent of the standard for the auditor to communicate only the significant risks that are identified during the auditor's risk assessment procedures. Paragraph 11 of Auditing Standard No. 16 requires the auditor to communicate significant changes to the planned audit strategy or the significant risks initially identified and the reasons for such changes.

A commenter suggested that the communication of risks be expanded to include business risks and the auditor's views of the company's internal controls, in addition to the significant risks of material misstatement to the financial statements. As part of obtaining an understanding of the company and its environment, Auditing Standard No. 12 requires the auditor to obtain an understanding of the company's objectives, strategies, and related business risks that could reasonably be expected to result in risks of material misstatement.[16] Under Auditing Standard No. 16, the auditor is required to communicate significant risks to the audit committee. If the auditor determines that a business risk results in a significant risk of material misstatement, the auditor should communicate the significant risk to the audit committee. Additionally, under Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* and AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements,* the auditor is required to communicate to the audit committee material weaknesses and significant deficiencies in internal control over financial reporting identified during the audit.[17] Therefore, the standard was not revised.

Auditing Standard No. 16 also requires communications regarding others involved in the audit, such as persons with specialized skill or knowledge, internal

---

[15] *See* paragraphs 59, 70, and 71 of the Auditing Standard No. 12.

[16] *See* paragraph 14 of Auditing Standard No. 12.

[17] *See* paragraphs 78 and 80 of Auditing Standard No. 5 and paragraph 4 of AU sec. 325.

audit, and other firms or persons performing audit procedures. Communications of others involved in the audit might be important for an audit committee to understand as part of the audit committee's oversight of the financial reporting process.

A. Specialized Skill or Knowledge (Paragraph 10.a. of Auditing Standard No. 16)

Auditing Standard No. 16 includes a requirement for the auditor to communicate to the audit committee the nature and extent of specialized skill or knowledge needed to perform the planned audit procedures or evaluate the audit results related to significant risks. This requirement is designed for the auditor to communicate the determination the auditor is required to make as part of developing the audit strategy in Auditing Standard No. 9.[18] Many audit firms have employees with specialized skill or knowledge that the engagement team can utilize. However, other firms might not have such in-house expertise. The focus of this requirement is on the communication about the need for specialized skill or knowledge, regardless of whether the specialist is from within the firm or outside the firm.

B. Internal Audit (Paragraphs 10.b. and 10.c. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee the extent to which the auditor plans to use the work of the company's internal auditors in an audit of financial statements, including when internal audit provides direct assistance to the auditor. In addition, Auditing Standard No. 16 requires the auditor to communicate the extent to which the auditor plans to use the work of internal auditors, company personnel (in addition to internal auditors), and third parties working under the direction of management or the audit committee when performing an audit of internal control over financial reporting.

Auditing Standard No. 9 requires the auditor to establish an overall audit strategy that sets the scope, timing, and direction of the audit and guides the development of the audit plan, including the nature, timing, and extent of resources necessary to perform the engagement.[19] Other standards, including AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, and Auditing Standard No. 5, provide additional requirements and impose limits on the use of internal audit staff. The requirement in Auditing Standard No. 16 is to communicate to the audit committee the extent to which the auditor plans to use the work of the company's internal auditors and others as determined in the audit plan.

C. Other Firms or Persons Performing Audit Procedures (Paragraph 10.d. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee the names, locations, and planned responsibilities of other independent public accounting firms or other persons, who are not employed

---

[18] *See* paragraph 16 of Auditing Standard No. 9 for the requirement for the auditor to determine whether specialized skill or knowledge is needed to perform appropriate risk assessments, plan or perform audit procedures, or evaluate audit results.

[19] *See* paragraphs 8-9 of Auditing Standard No. 9.

by the auditor, that perform audit procedures in the current period audit. The standard includes a note stating the term "other independent public accounting firms" includes firms that perform audit procedures in the current period audit regardless of whether they otherwise have any relationship with the auditor.

In planning and performing the audit, the auditor determines whether to use other auditors or other persons to perform audit procedures at individual client locations, business units, or to perform work related to specific audit areas or procedures. Those other auditors might be affiliated firms, non-affiliated firms, or other persons not employed by the auditor.

The note to Auditing Standard No. 16 was revised from the reproposed standard to clarify that the communication regarding other independent public accounting firms is not based on the type of relationship the auditor otherwise has with the other firms. Rather, the requirement for the auditor to communicate the names, locations, and planned responsibilities of other independent public accounting firms and other persons is to provide information to the audit committee regarding the parties involved in the audit. This requirement also might facilitate a discussion of how the work of other parties would affect the audit.

The reproposed standard also required the auditor to communicate to the audit committee the "planned roles" of others involved in the audit and the "scope of audit procedures." One commenter suggested that the requirement to communicate the "scope of audit procedures" should be clarified in the standard. Another commenter suggested that the communication should be expanded to be more robust when other participants are used to audit foreign components of a company. Auditing Standard No. 10, *Supervision of the Audit Engagement,* requires the auditor to inform engagement team members of their responsibilities[20] and AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, discusses situations in which the auditor uses the work and reports of other independent auditors who have audited financial statements of one or more subsidiaries, divisions, branches, components or investments included in the financial statements.[21] To align with these requirements, the standard was revised to require the auditor to communicate only the "planned responsibilities" of other participants involved in the audit, the requirements to communicate the "planned roles" of others involved in the audit and the "scope of audit procedures" were removed from the standard, and the standard was not expanded to include other considerations.

Many commenters suggested that the standard provide a threshold for determining when to make communications regarding others involved in the audit, such as when another auditor performs procedures related to a percentage of the company's total assets or addresses significant risks. Others suggested that the communication include only non-affiliated accounting firms. The standard was not revised because audit committees have oversight of the entire audit engagement, which includes work performed by other auditors. The audit committee should be aware of all the participants in the audit. This communication regarding other participants in the audit would enable the audit committee to inquire or otherwise determine, for example, whether the other participants are registered with the Board and are subject to PCAOB inspections and whether they have disciplinary history with the Board or other regulators.

This communication requirement is intended to be scalable. For example, the amount of detail the auditor generally would communicate to the audit committee regarding the participation of other auditors would be greater for

---

[20] *See* paragraph 5.a. of Auditing Standard No. 10.

[21] *See* AU sec. 543.01.

participants that perform a significant portion of the audit or that perform procedures related to significant risks.

D. Principal Auditor (Paragraph 10.e. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee the basis for the auditor's determination that the auditor can serve as principal auditor, if significant parts of the audit are to be performed by other auditors. This communication requirement is based on the auditor's determination that the auditor can serve as the principal auditor in accordance with AU sec. 543. This communication would enable the audit committee to evaluate the extent of work performed by the principal auditor in relation to work performed by other auditors.

The reproposed standard included a note to describe situations where such communications would be required. The Board determined that this note was not necessary because AU sec. 543, governs the determination of whether the auditor can serve as the principal auditor.

VII. Accounting Policies and Practices, Estimates, and Significant Unusual Transactions (Paragraph 12 of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee certain matters related to the company's accounting policies and practices, estimates, and significant unusual transactions. However, the standard recognizes that management also might make communications to the audit committee regarding these matters and that the auditor might not need to communicate the information at the same level of detail as management as long as the auditor meets certain criteria specified in the standard. In such circumstances, the auditor should communicate any omitted or inadequately described matters to the audit committee.

A. Accounting Policies and Practices (Paragraphs 12.a. and 12.b. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee certain information regarding the company's significant accounting policies and practices and also critical accounting policies and practices.

The standard uses the terms "significant accounting policies and practices" and "critical accounting policies and practices." The Financial Accounting Standards Board's ("FASB") Accounting Standards Codification ("ASC") and the International Accounting Standards Board ("IASB"), require that companies disclose a description of all significant accounting policies as an integral part of the financial statements.[22] For example, the FASB ASC recognizes that an

[22] *See* FASB ASC, Topic 235, Notes to Financial Statements, section 235-10-50. As part of this disclosure, the entity is required to disclose accounting policies and to describe the accounting principles followed by the entity and the methods of applying those principles that materially affect the determination of financial position, cash flows, or results of operations. Additionally, *see* paragraph 117 of International Accounting Standard 1, *Presentation of Financial Statements*, which requires the entity to disclose the summary of significant accounting policies, including the measurement basis used in preparing the financial statements and other accounting policies that are relevant to understanding the financial statements.

entity's description of its significant accounting policies is an integral part of the financial statements.[23] Additionally, the term "significant accounting policies and practices" is consistent with the term used in AU sec. 380 and understood in practice and, therefore, has not been separately defined.

The definition of "critical accounting policies and practices" in Auditing Standard No. 16 is based on the SEC's description of the term "critical accounting policies and practices" as a company's accounting policies and practices that are both most important to the portrayal of the company's financial condition and results and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain.[24] The selection of significant accounting policies and practices involves a broader range of transactions and events over time, while the selection of critical accounting policies and practices is tailored to specific events in the current year. Therefore, critical accounting policies and practices might be viewed as a subset of significant accounting policies and practices.

1. Significant Accounting Policies and Practices (Paragraph 12.a. of Auditing Standard No. 16)

Auditing Standard No. 16 generally retains the requirements from AU sec. 380 related to communication of the company's significant accounting policies and practices, including:

- Management's initial selection of, or changes in, significant accounting policies or the application of such policies in the current period; and
- The effect on financial statements or disclosures of significant accounting policies in (i) controversial areas or (ii) areas for which there is a lack of authoritative guidance or consensus, or diversity in practice.

Auditing Standard No. 16 requires the auditor to communicate to the audit committee certain matters related to significant accounting policies and practices, whereas, AU sec. 380 required the auditor only to determine that the audit committee was "informed." This change in wording is intended to indicate that the auditor should make these communications, rather than determine that the audit committee was informed, as required in AU sec. 380. However, the note to paragraph 12 of Auditing Standard No. 16 acknowledges that such communications may be made by management, and if the auditor meets certain conditions, these communications need not be duplicated by the auditor.

Some commenters suggested that it was unclear whether the communication of the initial selection of, or changes in, significant accounting policies or the application of such policies in the current period would require communication annually if there is no change. Another commenter indicated that the auditor may not be in a position to provide information on areas for which there is diversity in practice because the auditor may not be knowledgeable of accounting practices used by other entities.

Auditing Standard No. 16 was not revised in response to these comments. The standard indicates that the auditor should communicate to the audit committee the initial selection in the current period of significant accounting policies. The standard also indicates that the auditor should communicate to the audit

---

[23] *See* FASB ASC paragraphs 235-10-50-1 through 235-10-50-6.

[24] *See* SEC, *Strengthening the Commission's Requirements Regarding Auditor Independence*, Securities Act Release No. 8183 (Jan. 28, 2003).

committee changes in those policies or changes in the application of those policies in the current period if they differ from those policies that management previously utilized or how they were previously applied.

Additionally, the auditor's responsibility to communicate the effect of significant accounting policies includes (i) controversial areas or (ii) areas for which there is lack of authoritative guidance or consensus, or diversity in practice. The auditor should be aware of diversity in practice related to significant accounting policies and practices used by the company because Auditing Standard No. 12 requires the auditor to evaluate whether the company's selection of and application of accounting principles are appropriate for its business and consistent with the applicable financial reporting framework and accounting principles used in the relevant industry.[25] Based on this evaluation, the auditor should be in a position to make such communication.

2. Critical Accounting Policies and Practices (Paragraph 12.b. of Auditing Standard No. 16)

Auditing Standard No. 16 incorporates the Securities Exchange Act of 1934's ("Exchange Act") requirement for the auditor to communicate to the audit committee all critical accounting policies and practices to be used.[26] Auditing Standard No. 16 also requires the auditor to communicate the reasons certain accounting policies and practices are considered critical and how current and anticipated future events might affect the determination of whether certain policies and practices are considered critical.[27]

Some commenters recommended deleting the requirement for the auditor to communicate how anticipated future events might affect the determination of whether certain policies and practices are considered critical since the auditor cannot predict the future. The standard retains the SEC requirement regarding communication of anticipated future events related to critical accounting policies and practices, as this is a component of the required communication the SEC identified in adopting SEC Rule 2-07.[28] The standard notes that critical accounting policies and practices are tailored to specific events in the current year and that the accounting policies and practices that are considered critical might change from year to year. For example, a significant merger or acquisition may result in the related accounting policy being considered critical in the current year in which the related transaction occurs, but not in subsequent years. Auditing Standard No. 16 is aligned with the SEC requirement, therefore the standard was not revised.

B. Critical Accounting Estimates (Paragraph 12.c. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate the following matters related to critical accounting estimates:

---

[25] Paragraph 12 of Auditing Standard No. 12.

[26] Section 10A(k) of the Exchange Act, 15 U.S.C. § 78j-1(k), requires the auditor to report this information to the audit committee. *See also* SEC Rule 2-07 of Regulation S-X ("SEC Rule 2-07"), 17 C.F.R. §210.2-07.

[27] *See* Securities Act Release No. 8183, which describes the SEC's expectations regarding the discussion related to critical accounting policies and practices. In this release, the SEC indicated that it anticipated that the discussion of accounting policies and practices would include how current and anticipated future events might affect the determination of whether certain policies and practices are considered critical.

[28] *Id.*

(1) A description of the process management used to develop critical accounting estimates;

(2) Management's significant assumptions used in critical accounting estimates that have a high degree of subjectivity; and

(3) Any significant changes management made to the processes used to develop critical accounting estimates or significant assumptions, a description of management's reasons for the changes, and the effects of the changes on the financial statements.

As the term "critical accounting estimate" implies, the communication is not designed to encompass a long list of accounting estimates resulting from the application of accounting policies that cover a substantial number of line items in the company's financial statements. Rather, Auditing Standard No. 16 defines the term "critical accounting estimate" as an accounting estimate where (a) the nature of the estimate is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change and (b) the impact of the estimate on financial condition or operating performance is material.

The definition of "critical accounting estimate" is based on SEC interpretive guidance in connection with management's discussion and analysis ("MD&A") of the company's financial condition and results of operations.[29] The alignment of the term critical accounting estimates in PCAOB standards with the same term in the SEC's interpretive guidance allows auditors to use the same concept under SEC requirements and PCAOB standards when communicating matters to the audit committee. The term critical accounting estimate is used to help focus the communication to the audit committee on those estimates that might be subject to a higher risk of material misstatement, such as certain fair value estimates. The definition of a critical accounting estimate is intended to replace the term "particularly sensitive" in AU sec. 380.[30]

The requirement to communicate the process management used to develop critical accounting estimates is adapted from the requirement in AU sec. 380 related to particularly sensitive accounting estimates.[31] Additionally, the communication requirements are designed to communicate the results of the auditor's performance requirements under AU sec. 342, *Auditing Accounting Estimates*, which requires the auditor to evaluate the reasonableness of accounting estimates. In evaluating the reasonableness of the accounting estimate, AU sec. 342 also requires the auditor to obtain an understanding of how management developed the estimate.[32] AU sec. 342 also states that in evaluating the reasonableness of an estimate, the auditor normally concentrates on key factors and assumptions that are (a) significant to the accounting estimate, (b) sensitive to variations, (c) deviations from historical patterns, and (d) subjective and susceptible to misstatement and bias.[33]

One commenter suggested that the communication requirement also include how management subsequently monitors critical accounting estimates and, when critical accounting estimates involve a range of possible outcomes, how the recorded estimates relate to the range and how various selections within

---

[29] *See* SEC, *Interpretation: Commission Guidance Regarding Management's Discussion and Analysis of Financial Condition and Results of Operations,* Securities Act Release No. 8350 (Dec. 19, 2003).

[30] *See* AU sec. 380.08, which stated in part, "[c]ertain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments."

[31] AU sec. 380.08.

[32] *See* AU sec. 342.10.

[33] *See* AU Sec. 342.09.

the range would affect the company's financial statements. Although these requirements are not included in Auditing Standard No. 16, the Board notes that the SEC has stated that management should disclose the company's critical accounting estimates in MD&A.[34] According to the related SEC release, management's discussion should present, among other matters, the company's analysis of the uncertainties involved in applying a principle at a given time or the variability that is reasonably likely to result from its application over time and analyze an estimate's specific sensitivity to change based on other outcomes that are reasonably likely to occur and would have a material effect.[35] The commenter's concerns, therefore, may be addressed through a company's MD&A disclosures.

AU sec. 550, *Other Information in Documents Containing Audited Financial Statements,* requires the auditor to read the other information, such as MD&A in documents containing audited financial statements, and consider whether the information, or the manner of its presentation, is materially inconsistent with information in the financial statements or is a material misstatement of fact.[36] Auditing Standard No. 16 includes a requirement for the auditor to communicate to the audit committee the results of such procedures (see Section IX of this appendix, "Other Information in Documents Containing Audited Financial Statements," for further discussion). Accordingly, no change was made to the standard.

C. Significant Unusual Transactions (Paragraph 12.d. of Auditing Standard No. 16)

Auditing Standard No. 16 includes requirements for the auditor to communicate to the audit committee (1) significant transactions that are outside the normal course of business for the company or that otherwise appear to be unusual due to their timing, size, or nature;[37] and (2) the policies and practices management used to account for significant unusual transactions. Communication of significant unusual transactions would enable the audit committee to gain the auditor's insight into those transactions and to take any appropriate action.

The requirement in the standard for the auditor to communicate the policies and practices management used to account for significant unusual transactions is similar to the requirement in AU sec. 380.[38] Under Auditing Standard No. 16, such communication also would include the identification of significant unusual transactions.

The reproposed standard required the auditor to communicate significant unusual transactions, of which the auditor is aware, that are outside the normal course of business for the company or otherwise appear to be unusual due to their timing, size, or nature. Many commenters indicated that management also might communicate matters related to significant unusual transactions to the audit committee and that the standard should acknowledge that management might make the communications related to significant unusual transactions. The standard was revised to recognize that management might make these communications to the audit committee and that, in those situations, the auditor might not need to communicate the information at the same level of detail as

---

[34] *See* Securities Act Release No. 8350.

[35] *Id.*

[36] AU secs. 550.04-.05.

[37] *See* paragraph 71.g. of Auditing Standard No. 12.

[38] AU sec. 380.07.

management as long as certain criteria specified in the standard are met. However, the auditor should communicate any omitted or inadequately described matters to the audit committee.

Additionally, some commenters suggested that the communication should be limited to significant unusual transactions that are considered significant risks. While a significant unusual transaction might also be considered a significant risk, this communication provides the audit committee with additional information regarding the significant unusual transactions and the policies and practices management used to account for such transactions, even if such transactions do not constitute significant risks. Significant unusual transactions, at times, have been considered to be a contributing factor in attempts to mislead investors about a company's financial condition. Therefore, providing the audit committee with information regarding significant unusual transactions could benefit the audit committee in its oversight of the financial reporting process.

Some commenters suggested that the standard include a definition of the term "significant unusual transactions." Auditing Standard No. 16 describes significant unusual transactions as significant transactions that are outside the normal course of business for the company or that otherwise appear to be unusual due to their timing, size, or nature, which is consistent with the description of this term in other PCAOB standards, such as Auditing Standard No. 12.[39] Therefore, the standard was not revised to further define significant unusual transactions.

D. Consideration of Communications Made by Management (Note to Paragraph 12 of Auditing Standard No. 16)

Auditing Standard No. 16 retains the substance of the communication requirements in AU sec. 380 regarding accounting policies, practices, and estimates. The requirement in the standard for the auditor to communicate critical accounting policies and practices is consistent with Section 10A(k) of the Exchange Act, which requires auditors of issuers to report all critical accounting policies and practices to the issuer's audit committee.[40] In addition, Auditing Standard No. 16 includes a new requirement related to the communication of significant unusual transactions.

Many commenters suggested that the standard should recognize that management has the primary responsibility for reporting to the audit committee and that the auditor's responsibility should be to confirm that management has appropriately communicated. No change was made in response to this comment because, similar to AU sec. 380, Auditing Standard No. 16 acknowledges that management also may be communicating certain matters related to the financial reporting process to the audit committee. The Board recognizes that management as well as the auditor might discuss accounting policies, practices, estimates, and significant unusual transactions with the audit committee and that it would not be cost-effective or practical for the audit committee to listen to essentially the same presentation twice. Therefore, Auditing Standard No. 16 indicates that, in situations in which management communicates matters in paragraph 12, the auditor's communication requirement under the standard would be met if the auditor: (1) participates in management's discussion with the audit committee,[41] (2) affirmatively confirms to the audit committee that

---

[39] Paragraph 71.g. of Auditing Standard No. 12.

[40] *See also* SEC Rule 2-07.

[41] The auditor's participation in management's discussion with the audit committee could be satisfied in person or via audio or video conference.

management has adequately communicated these matters, and (3) with respect to critical accounting policies and practices, identifies for the audit committee those accounting policies and practices that the auditor considers critical. In addition, the auditor should communicate any omitted or inadequately described matters to the audit committee.

In situations in which management makes those communications to the audit committee, in order to satisfy the communication requirement in Auditing Standard No. 16, the auditor would be required to participate during discussions between management and the audit committee regarding accounting policies, practices, estimates, and significant unusual transactions, which may include discussions of the importance of critical accounting policies, practices or estimates, or the difficult, subjective, or complex nature of the judgment involved in significant unusual transactions, or the selection or application of accounting policies, practices, or estimates. If the auditor to identifies the accounting policies and practices that the auditor considers critical to the portrayal of the company's financial condition and results and affirmatively confirms that management has adequately communicated the accounting policies, practices, estimates, and significant unusual transactions to the audit committee in a meeting in which the auditor participated the auditor would be deemed to satisfy the requirement for the auditor to report all critical accounting policies and practices to the audit committee, without the need for the auditor to repeat management's presentation on the same topic.

Conversely, if the auditor (1) did not participate in management's meeting with the audit committee in which communication regarding accounting policies, practices, estimates, and significant unusual transactions occurred, (2) did not affirmatively confirm that accounting policies, practices, estimates, and significant unusual transactions had been discussed adequately by management, or (3) with respect to critical accounting policies and practices, did not identify those accounting policies and practices that the auditor considers critical, then the auditor would be required to communicate to the audit committee the matters described in paragraph 12 of Auditing Standard No. 16, regardless of any management communication regarding those matters.

VIII. Auditor's Evaluation of the Quality of the Company's Financial Reporting (Paragraph 13 of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate certain matters to the audit committee regarding the auditor's views of the audit and the financial statements as described below.

A. Qualitative Aspects of Significant Accounting Policies and Practices (Paragraph 13.a. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate the results of the auditor's evaluation of, and conclusions about, the qualitative aspects of the company's significant accounting policies and practices, including situations in which the auditor identified bias in management's judgments about the amounts and disclosures in the financial statements. This requirement is similar to certain communication requirements that have been superseded. AU sec. 380 required the auditor to discuss with the audit committee the auditor's judgments about the quality, not just the acceptability, of the company's

accounting principles.[42] Additionally, AU sec. 9312, *Audit Risk and Materiality in Conducting an Audit: Auditing Interpretations of Section 312*, required the auditor to consider whether matters related to management bias should be communicated to the audit committee.[43]

The requirement in Auditing Standard No. 16 is designed for the auditor to communicate the results of the auditor's procedures under Auditing Standard No. 14, *Evaluating Audit Results*, which requires the auditor to, among other things, evaluate the qualitative aspects of the company's accounting practices,[44] including potential bias in management's judgments about the amounts and disclosures in the financial statements.[45]

Additionally, Auditing Standard No. 16 requires the auditor to communicate to the audit committee the results of the auditor's evaluation of the differences between (i) estimates best supported by audit evidence and (ii) estimates included in the financial statements, which are individually reasonable, that indicate a possible bias on the part of the company's management. This communication is designed for the auditor to discuss the results of the auditor's evaluation of these matters as required under Auditing Standard No. 14.[46] Linking the communication requirements with performance requirements in Auditing Standard No. 14 provides context regarding the matters to be communicated.

Some commenters suggested that the standard should retain the requirement in AU sec. 380 for the auditor to discuss with the audit committee the auditor's judgments about the quality, not just the acceptability, of the entity's accounting principles. Auditing Standard No. 16 modifies the requirement from AU sec. 380 by requiring the auditor to communicate to the audit committee the results of the auditor's evaluation of, and conclusions about, the qualitative aspects of the company's significant accounting policies and practices, while linking the communication requirement to the performance requirement in Auditing Standard No. 14. Therefore, no change was made in response to these comments.

B. Assessment of Critical Accounting Policies and Practices (Paragraph 13.b. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee the auditor's assessment of management's disclosures related to the critical accounting policies and practices, along with any significant modifications to the disclosures of those policies and practices proposed by the auditor that management did not make. This requirement is based on the Exchange Act's requirement that the auditor report to the audit committee all critical accounting policies and practices.[47] In the release adopting the SEC's related rule, the SEC indicated that it anticipated that the auditor's communications to the audit committee regarding critical accounting policies would include an assessment of management's disclosures along with any significant proposed modifications by the auditor that were not included in those disclosures.[48]

---

[42] AU sec. 380.11.

[43] Following the original proposal of this standard, AU sec. 9312 was superseded when the Board adopted the risk assessment standards. The performance requirement of AU sec. 9312, however, was substantially included in the risk assessment standards.

[44] *See* paragraphs 24-27 of Auditing Standard No. 14.

[45] *Id*.

[46] *See* paragraph 27 of Auditing Standard No. 14.

[47] *See* Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k); and SEC Rule 2-07.

[48] *See* Securities Act Release No. 8183.

C. Conclusions Regarding Critical Accounting Estimates (Paragraph 13.c. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate the basis for the auditor's conclusions regarding the reasonableness of the critical accounting estimates. This requirement is similar to a requirement in AU sec. 380.[49] This requirement is designed to require the auditor to communicate the results of the auditor's procedures regarding critical accounting estimates under PCAOB standards, such as AU sec. 342.[50] Communicating these results will provide the audit committee with the auditor's assessment of the critical accounting estimates based on the auditor's procedures.

D. Significant Unusual Transactions (Paragraph 13.d. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee the auditor's understanding of the business rationale for significant unusual transactions. This communication requirement is aligned with the performance requirement in AU sec. 316, *Consideration of Fraud in a Financial Statement Audit,* which requires the auditor to gain an understanding of the business rationale regarding significant transactions that are outside the normal course of business or that otherwise appear unusual.[51] This communication would provide the audit committee with an opportunity to receive the auditor's perspective of such transactions.

In a separate rulemaking project, the Board has proposed amendments to AU sec. 316 that would require the auditor to design and perform procedures to obtain an understanding of the business purpose (or lack thereof) of each significant unusual transaction and evaluate whether the business purpose (or the lack thereof) indicates that the significant unusual transaction may have been entered into to engage in fraudulent financial reporting or conceal misappropriation of assets.[52] If, at the conclusion of that rulemaking project, the Board adopts the proposed amendments to AU sec. 316, the Board will consider, as appropriate, amending Auditing Standard No. 16 to align the communication with any new performance requirements.

E. Financial Statement Presentation (Paragraph 13.e. of Auditing of Auditing Standard No. 16)

Similar to AU sec. 380.11, Auditing Standard No. 16 requires the auditor to communicate to the audit committee the results of the auditor's evaluation of whether the presentation of the financial statements and the related disclosures are in conformity with the applicable financial reporting framework, including the auditor's consideration of the form, arrangement, and content of the financial statements (including the accompanying notes), encompassing matters such as the terminology used, the amount of detail given, the classification of items, and the bases of amounts set forth. This communication requirement

---

[49] *See* AU sec. 380.08.

[50] *See* AU secs. 342.04, 09-.10.

[51] *See* AU sec. 316.66.

[52] *Proposed Auditing Standard - Related Parties*, *Proposed Amendments to Certain PCAOB Auditing Standards Regarding Significant Unusual Transactions*, *and Other Proposed Amendments to PCAOB Auditing Standards*, PCAOB Release No. 2012-001 (Feb. 28, 2012).

relates to the auditor's evaluation of whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework, as required by Auditing Standard No. 14.[53]

Some commenters suggested that the standard should retain the requirement in AU sec. 380 for the auditor to discuss with the audit committee the auditor's views about the clarity and completeness of the company's financial statements and disclosures. However, commenters on the original proposed standard indicated it was not clear what was meant by the clarity and completeness of the company's financial statements and related disclosures. Commenters also expressed concern as to what should be included in the communications to the audit committee. The communication requirement in Auditing Standard No. 16 avoids possible confusion regarding the meaning of the phrase "clarity and completeness" by linking it to the auditor performance requirements included in Auditing Standard No. 14 for the auditor to evaluate the presentation of the financial statements, including disclosures. The performance requirements in Auditing Standard No. 14[54] provide context regarding the matters to be communicated under Auditing Standard No. 16.

F. New Accounting Pronouncements (Paragraph 13.f. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee situations in which, as a result of the auditor's procedures, the auditor identified a concern regarding management's anticipated application of accounting pronouncements that have been issued but are not yet effective and might have a significant effect on future financial reporting. This requirement is based on the situations in which, as a result of the auditor's procedures, the auditor has identified a concern regarding the anticipated application of a new accounting pronouncement. Auditing Standard No. 16 does not require the auditor to perform additional procedures to identify such concerns.

Some commenters noted that management generally discloses in the financial statements the potential effects of adoption of new accounting standards and that this auditor communication to the audit committee should be related to the auditor's evaluation of management's disclosures related to new accounting pronouncements. The intent of the required communication to the audit committee is not meant to provide an additional evaluation of management's disclosures. Rather, the intent is to inform the audit committee when the auditor "has identified a concern" regarding the planned implementation of a new accounting pronouncement or whether management has devoted adequate resources to prepare its accounting and disclosure processes, and other financial reporting systems, for the timely implementation of the new accounting pronouncement. This communication might inform the audit committee's oversight of the company's financial reporting process. Requiring the discussion of such matters is intended to allow the audit committee to properly consider the auditor's concerns regarding future financial statements. Accordingly, no change to the standard was made.

---

[53] See paragraphs 30-31 of Auditing Standard No. 14, which describe the auditor's responsibility relating to the evaluation of whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework.

[54] *Id.*

G. Alternative Accounting Treatments (Paragraph 13.g. of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate all alternative treatments permissible under the applicable financial reporting framework for policies and practices related to material items that have been discussed with management, including the ramifications of the use of such alternative disclosures and treatments, and the treatment preferred by the auditor. This requirement is consistent with Section 10A(k) of the Exchange Act and with SEC Rule 2-07, which requires the auditor to report to the audit committee all alternative treatments that are related to material items, were discussed with management, and are permissible under the applicable financial reporting framework.[55]

IX. Other Information in Documents Containing Audited Financial Statements (Paragraph 14 of Auditing Standard No. 16)

Auditing Standard No. 16 retains the requirement from AU sec. 380.12 for the auditor to communicate to the audit committee the auditor's responsibility under PCAOB rules and standards for other information presented in documents containing audited financial statements, any related procedures performed, and the results of such procedures. Such other information would include documents described in AU sec. 550, AU sec. 558, *Required Supplementary Information,* and AU sec. 711, *Filings Under Federal Securities Statutes*.

The auditor's responsibility under AU sec. 550 requires the auditor to read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, in the financial statements.[56] One commenter suggested that Auditing Standard No. 16 should also include a requirement to communicate any identified material inconsistencies or misstatements of facts, including the auditor's response to such matters.

Auditing Standard No. 16 requires the auditor to communicate the results of the auditor's procedures related to other information in documents containing audited financial statements, which would require the auditor to communicate identified inconsistencies or misstatements of facts to the audit committee. The Board is amending AU sec. 550 to require the auditor to communicate to the audit committee the material inconsistency between the other information and the financial statements in situations in which the information is not revised to eliminate the material inconsistency. The Board also is amending AU sec. 550 to require the auditor to communicate to the client and the audit committee, in writing, a material misstatement of fact in the other information. Thus, it was not necessary to revise the standard in response to commenters. Appendix 3 of the release provides the amendments to PCAOB standards as a result of the adoption of Auditing Standard No. 16.

[56] *See generally*, AU secs. 550.04-.07, which require that the auditor read the information and consider whether it is materially inconsistent with information in the financial statements or whether it contains any material misstatements of fact.

X. Difficult or Contentious Matters for which the Auditor Consulted (Paragraph 15 of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee matters that are difficult or contentious for which the auditor consulted outside the engagement team and that the auditor reasonably determined are relevant to the audit committee's oversight of the financial reporting process. The required communications of difficult or contentious matters are based on the results of the procedures the auditor performed regarding such matters during the course of the audit and do not require the performance of new or additional procedures.

Many matters that arise during an audit can be complex or unusual, and the auditor might consult on such matters with the firm's national office, industry specialists, or external parties. Difficult or contentious issues can arise in various stages of the audit, including in the auditor's evaluation of management's judgments, estimates, accounting policies, or assessment of identified control deficiencies. Difficult or contentious issues generally are the critical matters that concern the auditor when he or she is making the final assessment of whether the financial statements are presented fairly.

A difficult issue might not always be synonymous with a contentious issue. Rather, a difficult issue might be a matter that requires consultation. A contentious issue might be a matter that not only requires consultation but also leads to significant points of disagreement, debate, or deliberation between the auditor and management. Audit committees might better appreciate the importance of difficult or contentious matters if they are aware that such consultations took place.

During the course of the audit difficult or contentious issues might arise for which the auditor did not consult, but which the auditor believes are relevant to the audit committee's oversight of the financial reporting process. Auditing Standard No. 16 does not preclude the auditor from communicating to the audit committee difficult or contentious matters for which the auditor did not consult outside the engagement team.

Some commenters suggested that the standard should define difficult or contentious matters. The term "difficult or contentious matter" is used in Auditing Standard No. 7, *Engagement Quality Review.* Therefore, the term "difficult or contentious matter" is not defined in this standard.

Some commenters suggested that the standard should exclude the discussions between the auditor and the engagement quality reviewer from communications to the audit committee regarding consultation outside the engagement team on difficult or contentious matters. The communication to the audit committee in Auditing Standard No. 16 focuses on the difficult or contentious matters on which the auditor consulted, not on the parties involved in the consultation. Therefore, the standard was not revised.

XI. Management Consultation with Other Accountants (Paragraph 16 of Auditing Standard No. 16)

When the auditor is aware that management consulted with other accountants about significant auditing or accounting matters and the auditor has identified a concern regarding such matters, Auditing Standard No. 16 requires the auditor to communicate to the audit committee the auditor's views about such

matters that were the subject of such consultation. This requirement is similar to a requirement in AU sec. 380.[57] Communicating matters that were the subject of consultations only when the auditor has identified a concern about those matters should allow the audit committee to focus its efforts on important accounting and auditing issues.

Some commenters suggested that communicating management consultations with other accountants should be management's responsibility and that the standard should clarify that the auditor should comment only on what management has communicated regarding such consultations. The standard does not impose a communication requirement on management. The requirement in Auditing Standard No. 16 is specifically related to the auditor's responsibilities when management has consulted with other accountants and only when the auditor has a concern regarding the accounting and auditing matters that were the subject of management's consultations. Therefore, Auditing Standard No. 16 was not revised.

As part of the comment process, the Board asked whether the requirement to communicate about consultations should be expanded to include consultations on accounting or auditing matters with non-accountants, such as consulting firms or law firms. Some commenters suggested that communication regarding management's consultations with non-accountants should be required, while others suggested that communication about these consultations should be made at the auditor's discretion depending on the facts or circumstances and the significance of the consultation to the financial statements. However, many commenters indicated that this communication should not be expanded to include consultations with non-accountants, as the auditors would not be in position to know about all management consultations with non-accountants. Some commenters indicated that this requirement could result in the auditor expending significant effort to identify and evaluate management's consultations with non-accountants. After consideration of these comments, the standard was not revised to require the auditor to communicate management's consultation with non-accountants.

XII. Going Concern (Paragraph 17 of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee certain matters related to the auditor's evaluation of the company's ability to continue as a going concern. The communication requirements in Auditing Standard No. 16 are based on the auditor's performance requirements under AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, which requires the auditor to evaluate whether there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.[58] The auditor's communication to the audit committee regarding the auditor's evaluation of the company's ability to continue as a going concern can serve to further inform the audit committee, in certain circumstances, regarding difficult conditions and events that the company is encountering.

---

[57] AU sec. 380.14.

[58] *See* AU sec. 341.06, which provides examples of such conditions and events and AU sec. 341.07, which discusses the auditor's procedures if the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.

Auditing Standard No. 16 requires the auditor to communicate the conditions and events the auditor identified that, when considered in the aggregate, lead the auditor to believe that there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time. Information about such conditions and events is obtained from the application of auditing procedures planned and performed to achieve audit objectives that are related to management's assertions in the financial statements.[59] Examples of such conditions and events include, but are not limited to, negative trends, other indications of possible financial difficulties, internal matters, or external matters that have occurred.[60]

Under AU sec. 341, if after considering the identified conditions and events, in the aggregate, the auditor believes that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should consider management's plans for dealing with the adverse effects of the conditions and events.[61] Additionally, the auditor should obtain information about the plans and consider whether it is likely that the adverse effects will be mitigated for a reasonable period of time, and that such plans can be effectively implemented.[62] Auditing Standard No. 16 requires that if the auditor concludes, after consideration of management's plans, that substantial doubt about the company's ability to continue as a going concern is alleviated, the auditor should communicate to the audit committee the basis for the auditor's conclusion, including elements the auditor identified within management's plans that are significant to overcoming the adverse effects of the conditions and events.[63]

Under AU sec. 341, if the auditor concludes that substantial doubt about the company's ability to continue as a going concern for a reasonable period of time remains, the audit report should include an explanatory paragraph to reflect the auditor's conclusion that there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.[64] Additionally, Auditing Standard No. 16 requires that if the auditor concludes that substantial doubt about the company's ability to continue as a going concern for a reasonable period of time remains,[65] the auditor should communicate to the audit committee: (1) the effects, if any, on the financial statements and the adequacy of the related disclosure;[66] and (2) the effects on the auditor's report.[67]

The reproposed standard required the auditor to communicate the conditions and events the auditor identified that, when considered in the aggregate, indicate that there "could be" substantial doubt about the company's ability to continue as a going concern for a reasonable period of time. Some commenters

---

[59] *See* AU sec. 341.02.

[60] *See* AU sec. 341.06, which provides examples of such conditions and events.

[61] *See* AU sec. 341.07, which discusses the auditor's procedures if the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.

[62] *See* AU sec. 341.03b.

[63] *See* AU sec. 341.08, which discusses the auditor's responsibilities related to the auditor's evaluation of management's plans.

[64] *See* AU sec. 341.12.

[65] *See* AU sec. 341.03c, which discusses the auditor's evaluation of factors that indicate there is substantial doubt about the company's ability to continue as a going concern.

[66] *See* AU sec. 341.10, which discusses the possible effects on the financial statements and the adequacy of the related disclosure.

[67] *See* AU secs. 341.12-.16, which discuss the auditor's consideration of the effects on the auditor's report when the auditor concludes that substantial doubt exists about the company's ability to continue as a going concern for a reasonable period of time.

suggested that the threshold for communication to the audit committee should be when the auditor believes there "is" substantial doubt about the company's ability to continue as a going concern, rather than when there "could be" substantial doubt. Those commenters suggested that threshold because, under AU sec. 341, the auditor is required to consider management's plans for addressing the adverse effects of the events and conditions when the auditor believes there "is" substantial doubt.

Auditing Standard No. 16 was revised to require the threshold for the auditor's initial communication to the audit committee to be when the auditor "believes there is" substantial doubt about the company's ability to continue as a going concern. This aligns more closely the communication requirement about the conditions and events with the other communication requirements in paragraph 17 of Auditing Standard No. 16. Under paragraph 17 of Auditing Standard No. 16 the auditor is required to communicate conditions and events, along with the auditor's conclusion regarding whether either management's plans alleviate the adverse effects of the conditions and events (item b) or substantial doubt remains (item c).

XIII. Uncorrected and Corrected Misstatements (Paragraphs 18-19 of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to provide the audit committee with the schedule of uncorrected misstatements[68] relating to accounts and disclosures that was presented to management. Several commenters indicated that audit committees would not find value in information presented at the same level of detail as presented to management, and that the auditor, therefore, should provide a summary of misstatements to the audit committee.

The Board decided to retain the requirement because presenting a schedule that shows only a summary of the uncorrected misstatements rather than the individual misstatements might not be informative for the audit committee. In addition, the requirement in Auditing Standard No. 16 is not a significant change from AU sec. 380.10, which required the presentation to the audit committee of a schedule of uncorrected misstatements.

The schedule of uncorrected misstatements required by Auditing Standard No. 16 is similar to the summary of uncorrected misstatements included in or attached to the management representation letter.[69] Additionally, the Exchange Act and SEC Rule 2-07 require the auditor to provide to the audit committee other material written communications between the auditor and management, which would include the schedule of unadjusted audit differences and a listing of adjustments and reclassifications not recorded, if any.[70]

Auditing Standard No. 14 requires the auditor to accumulate misstatements identified during the audit, other than those that are clearly trivial, and to communicate those to management on a timely basis.[71] According to Auditing Standard No. 14, a misstatement may relate to a difference between the amount, classification, presentation, or disclosure of a reported financial statement item

---

[68] Footnote 13 to paragraph 20 of Auditing Standard No. 14 indicates that misstatements include both omissions and the presentation of inaccurate or incomplete disclosures.

[69] *See* paragraph .06g of AU sec. 333, *Management Representation*.

[70] *See* Section 10A(k)(3) of the Exchange Act, 15 U.S.C. §78j-1(k)(3), SEC Rule 2-07(a)(3) and Securities Act Release No. 8183.

[71] *See* paragraphs 10 and 15 of Auditing Standard No. 14.

and the amount, classification, presentation, or disclosure that should be reported in conformity with the applicable financial reporting framework.[72] The requirement in Auditing Standard No. 16 to communicate misstatements related to accounts and disclosures relates only to those misstatements that the auditor has accumulated throughout the audit that are not clearly trivial and have been reported to management.

Auditing Standard No. 16 also requires the auditor to discuss with the audit committee, or determine that management has adequately discussed with the audit committee, the basis for the determination that the uncorrected misstatements were immaterial, including the qualitative factors[73] considered. In addition, the auditor also should communicate to the audit committee that uncorrected misstatements or matters underlying those uncorrected misstatements could potentially cause future-period financial statements to be materially misstated, even if the auditor has concluded that the uncorrected misstatements are immaterial to the financial statements under audit.

Auditing Standard No. 16 also requires the auditor to communicate those corrected misstatements, other than those that are clearly trivial, related to accounts and disclosures that might not have been detected except through the auditing procedures performed and discuss with the audit committee the implications that such corrected misstatements might have on the financial reporting process.

One commenter suggested that the standard should require the auditor to communicate management's adjusting entries recorded at the end of the period or other entries to reconcile accounts. The release accompanying the original proposed standard included a question that asked whether all corrected misstatements, including those detected by management, should be communicated to the audit committee. Many commenters responding to the question were not supportive of the auditor communicating misstatements detected by management or management's period-end adjusting entries, because the auditor may not have knowledge of all such adjustments due to the nature of a company's financial statement close process and the timing of the auditor's procedures. Commenters suggested that such a requirement would likely result in the auditor expending significant effort to identify misstatements or adjusting entries that the company's internal controls previously identified in the financial close process. Accordingly, the standard does not include a requirement for the auditor to communicate misstatements detected by management.

Some commenters suggested that the standard should be revised to require the auditor to communicate only corrected misstatements that individually or in the aggregate could be significant to the company's financial statements. As noted previously, Auditing Standard No. 14 requires the auditor to accumulate misstatements identified during the audit, other than those that are clearly trivial. The misstatements the auditor accumulated and management corrected are those that are other than clearly trivial and could be significant to the company's financial statements, either quantitatively or qualitatively. Auditing Standard No. 16 also requires the auditor to communicate those corrected misstatements that might not have been detected except through the auditing procedures performed. The intent of this requirement is to inform the audit committee of misstatements, which might have certain implications

---

[72] *See* paragraph A2 of Auditing Standard No. 14.

[73] *See* Appendix B of Auditing Standard No. 14, which discusses the qualitative factors related to the evaluation of the materiality of uncorrected misstatements.

on the company's financial reporting process, that were detected only through audit procedures. Therefore, Auditing Standard No. 16 was not revised.

Another commenter suggested that the standard should specifically require the auditor to request management to correct the uncorrected misstatements. The Board did not make this change because management has its own legal responsibilities in relation to the preparation and maintenance of the company's books, records, and financial statements. Section 13(i) of the Exchange Act requires the financial statements filed with the SEC to reflect all material correcting adjustments identified by the auditor.[74]

XIV. Material Written Communication (Paragraph 20 of Auditing Standard No. 16)

Auditing Standard No. 16 incorporates the Exchange Act's requirement for the auditor to communicate other material written communications between the auditor and management to the audit committee.[75] This requirement is intended to capture other possible material written communications that might occur but are not addressed by requirements in the standard or by other PCAOB standards, such as the management representation letter.[76]

XV. Departure from the Auditor's Standard Report (Paragraph 21 of Auditing Standard No. 16)

Auditing Standard No. 16 includes a requirement for the auditor to communicate to the audit committee when the auditor expects to modify the opinion in the auditor's report or include explanatory language or an explanatory paragraph in the auditor's report.[77] The auditor is required to communicate the reasons for and the wording of the modification, explanatory language, or explanatory paragraph. The requirement is intended to provide the basis for a discussion between the auditor and the audit committee in those circumstances in which the auditor expects to add explanatory language or modify the opinion in the auditor's standard report.

As part of overseeing the audit and the financial reporting process, it might be important for the audit committee to understand the reasons an auditor adds explanatory language or modifies the opinion in the auditor's standard report. Such communication enables the audit committee to be aware of the nature of any specific matters that the auditor expects to highlight in the auditor's report. In addition, these communications provide the audit committee with an opportunity to obtain further clarification from the auditor about the modification. This communication also provides the audit committee with an opportunity to provide the auditor with further information and explanations regarding the matters that are expected to be included in the auditor's report.

---

[74] Section 13(i) of the Exchange Act, 15 U.S.C. § 78j-1(m)(i).

[75] Section 10A(k)(3) of the Exchange Act, 15 U.S.C. § 78j-1(k)(3), requires the auditor to report this information to the audit committee; *see also* SEC Rule 2-07.

[76] *See* Securities Act Release No. 8183 for a discussion of the substance of other material written communications.

[77] *See* paragraphs .11-.74 and .76 of AU sec. 508, *Reports on Audited Financial Statements*.

XVI. Disagreements with Management (Paragraph 22 of Auditing Standard No. 16)

Auditing Standard No. 16 includes a requirement for the auditor to communicate to the audit committee any disagreements with management about matters, whether or not satisfactorily resolved, that individually or in the aggregate could be significant to the company's financial statements or the auditor's report. This requirement is retained from AU sec. 380.13.

Examples of disagreements might include disagreements with management about the application of accounting principles to the company's specific transactions and events and the basis for management's judgments about accounting estimates. Disagreements might also arise regarding the scope of the audit, disclosures to be made in the company's financial statements, or the wording of the auditor's report. For purposes of Auditing Standard No. 16, disagreements do not include differences of opinion based on incomplete facts or preliminary information that are later resolved by the auditor obtaining additional, relevant facts or information prior to the issuance of the auditor's report.

One commenter suggested that disagreements that are satisfactorily resolved should not be communicated to the audit committee unless the auditor determines that these matters warrant the audit committee's attention. As noted previously, this communication requirement is not new. As part of conducting the oversight of the audit and the financial reporting process, it might be important for the audit committee to know the areas of tension between the auditor and management regarding matters that could be significant to the company's financial statements, such as accounting principles and practices, financial statement disclosures, auditing scope or procedures, or similar matters. Accordingly, no change was made in response to this comment. Additionally, SEC Form 8-K requires that a registrant report certain disagreements between management and the auditor, whether or not such disagreements are satisfactorily resolved, when there is a change in the auditor.[78] The requirement in Auditing Standard No. 16 provides the audit committee with information regarding important matters that might need to be reported subsequently in an SEC filing.

XVII. Difficulties Encountered in Performing the Audit (Paragraph 23 of Auditing Standard No. 16)

Auditing Standard No. 16 includes the requirement from AU sec. 380.16 for the auditor to communicate to the audit committee any significant difficulties encountered during the audit. Significant difficulties encountered during the audit include, but are not limited to:

- Significant delays by management, the unavailability of company personnel, or an unwillingness by management to provide information needed for the auditor to perform his or her audit procedures;
- An unreasonably brief time within which to complete the audit;

---

[78] *See e.g.,* Exchange Act Form 8-K, Item 4.01. *See also* Item 304(a)(1)(iv) of Regulation S-K, 17 C.F.R. §229.304(a)(1)(iv), and Instructions 4 and 5 to that item, which require disclosure of disagreements, or differences of opinion, at the "decision-making level," that, if not resolved to the auditor's satisfaction, would have caused the auditor to make reference to the subject matter of the disagreement in connection with his or her report.

- Unexpected extensive effort required by the auditor to obtain sufficient appropriate audit evidence;
- Unreasonable management restrictions encountered by the auditor on the conduct of the audit; and
- Management's unwillingness to make or extend its assessment of the company's ability to continue as a going concern when requested by the auditor.

XVIII. Other Matters (Paragraph 24 of Auditing Standard No. 16)

Auditing Standard No. 16 requires the auditor to communicate to the audit committee other matters arising from the audit that are significant to the oversight of the company's financial reporting process. This communication includes, among other matters, complaints or concerns regarding accounting or auditing matters that have come to the auditor's attention during the audit and the results of the auditor's procedures regarding such matters. Communication of the other matters is based on the results of audit procedures or the conduct of the audit and does not require the auditor to perform new or additional procedures beyond the communication itself.

The Act requires that audit committees of listed companies establish procedures for the receipt, retention, and treatment of complaints received by the company regarding accounting, internal accounting control, or auditing matters, and for the confidential, anonymous submission by employees of the company of concerns regarding questionable accounting or auditing matters.[79]

Auditing Standard No. 12 requires the auditor to inquire of the audit committee regarding tips or complaints received by the audit committee regarding financial reporting matters. The auditor might become aware of complaints or concerns regarding financial reporting matters that were not received through the audit committee's process, and, therefore, are unknown to the audit committee. The audit committee might be better able to exercise its oversight activities if the auditor informed the audit committee of these matters. Paragraph 24 of Auditing Standard No. 16 requires the auditor to communicate these matters to the audit committee.

AU sec. 380 required the auditor to ensure that the audit committee receives additional information regarding the scope and results of the audit that may assist the audit committee in overseeing the financial reporting and disclosure process. Auditing Standard No. 16 enhances the requirement in AU sec. 380 for the auditor to communicate to the audit committee the results of the audit procedures regarding the accounting or auditing matters that have been the subject of complaints or concerns.

The standard acknowledges that there might be other matters known to the auditor that may be beneficial to the audit committee's oversight of the financial reporting process. This communication could provide the audit committee with an opportunity to better understand management's intentions regarding such matters.

Several commenters suggested that Auditing Standard No. 16 should require the auditor to communicate to the audit committee the results of PCAOB inspection findings and any necessary remediation by the audit firm. With respect

[79] *See* Section 301 of the Act, and Section 10A(m)(4) of the Exchange Act, 15 U.S.C. §78j-1(m)(4).

to inspections, the Act restricts what the Board may publicly disclose,[80] and the Act makes no exception for disclosure to an audit committee even if a Board inspection has reviewed an audit of the financial statements overseen by that audit committee. The Board cannot compel a firm to disclose nonpublic inspection information to an audit committee. This need not prevent an audit committee from discussing inspection results with its auditor. The Board encourages firms to communicate effectively with audit committees about inspection matters. The Act does not restrict a firm from disclosing to an audit committee nonpublic information regarding PCAOB inspections (including quality control deficiencies and the firm's remediation of those deficiencies) or PCAOB disciplinary matters.[81]

XIX. Form and Documentation of Communications (Paragraph 25 of Auditing Standard No. 16)

Auditing Standard No. 16 retains from AU sec. 380 the ability for auditors to communicate to the audit committee either orally or in writing, unless otherwise specified in the standard. Some commenters suggested that the standard should require all communications to be in writing, while other commenters indicated that the standard should continue to provide flexibility in the manner of communication.

Auditing Standard No. 16 was not revised to require all communications to be in writing. The Board's intention is to promote effective two-way communication between the auditor and the audit committee, whether through presentations, written reports, or interactive discussions. Written communications might provide the auditor with a basis to lead an active two-way discussion with the audit committee.

In addition, the form of communication may depend on the nature of the matter to be communicated. For example, written information often makes it easier for the audit committee to understand highly complex information (for example, information about critical accounting estimates). However, having a dialogue on key matters often is an important factor in effective communications between the auditor and the audit committee.

Auditing Standard No. 16 also requires the auditor to document the communications in the work papers, whether such communication took place orally or in writing. The standard further requires the auditor to include a copy of or a summary of management's communications provided to the audit committee in the audit documentation if, as part of its communications to the audit committee, management communicated some or all of the matters identified in paragraphs 12 or 18 and, as a result, the auditor did not communicate these matters at the same level of detail as management.

XX. Timing (Paragraph 26 of Auditing Standard No. 16)

The Board considers communications with audit committees to be an integral part of the audit process. AU sec. 380 stated that audit committee communications are incidental to the audit and are not required to occur before the

---

[80] *See* Section 104(g)(2) of the Act (providing that the Board shall make inspection reports available to the public in appropriate detail "subject to," among other things, the broad disclosure restrictions of Section 105(b)(5)(A)).

[81] *See Information for Audit Committees About the PCAOB Inspection Process*, PCAOB Release No. 2012-003 (Aug. 1, 2012).

issuance of the auditor's report on the entity's financial statements so long as the communications occur on a timely basis.[82] Auditing Standard No. 16 requires the auditor to communicate the matters required by the standard in a timely manner and prior to the issuance of the auditor's report. This requirement aligns the timing of communications with SEC Rule 2-07, which requires the auditor to communicate matters to the audit committee prior to the filing of the auditor's report with the SEC.[83] The appropriate timing of a particular communication to the audit committee depends on factors such as the significance of the matters to be communicated and corrective or follow-up actions needed, unless other timing requirements are specified by PCAOB rules or standards or the securities laws.

The reproposed standard specified that all communications be made in a timely manner and prior to the issuance of the auditor's report, unless other timing requirements are specified by PCAOB rules or standards or the rules or regulations of the SEC. One commenter suggested that the "rules and regulations of the SEC" should be modified to the "federal securities laws," since timing of certain communications to the audit committee also is specified in securities laws. The standard was updated to reference "securities laws."[84]

Commenters generally agreed that audit committee communications should occur in a timely manner and prior to the issuance of the auditor's report. Some commenters suggested that the standard should specify the timing of the communication about certain matters, such as during planning or prior to the earnings release.

Auditing Standard No. 16 does not emphasize the specific timing of certain communications because the appropriate timing might vary depending on the circumstances. As noted in the standard, the appropriate timing of a particular communication to the audit committee depends on factors such as the significance of the matters to be communicated and any corrective or follow-up action needed, unless other timing requirements are specified by PCAOB rules or standards or the securities laws. However, in all events, the timing of the communication should be prior to the issuance of the auditor's report.

Providing communications required by Auditing Standard No. 16 to the audit committee in a timely manner and prior to the issuance of the auditor's report will allow the audit committee and the auditor the opportunity to take any action they may deem appropriate to address the matters communicated prior to the issuance of the auditor's report.

The reproposed standard noted that an auditor may communicate to only the audit committee chair if done in order to communicate matters in a timely manner during the audit; however, the auditor should communicate such matters to the full audit committee prior to the issuance of the auditor's report. Several commenters suggested that the auditor's responsibility to subsequently communicate to the "full" audit committee was an unnecessary burden and that the word "full" should be deleted to allow the auditor to communicate to the audit committee when a quorum is present. The standard was revised accordingly to eliminate the word "full."

---

[82] AU sec. 380.04.

[83] *See* SEC Rule 2-07.

[84] The term "securities laws" is defined in section 2(a)(15) of the Act, 15 U.S.C. § 7201, to mean the provisions of law referred to section 3(a)(47) of the Exchange Act, 15 U.S.C. § 78c(a)(47), as amended by the Act, and includes the rules, regulations, and orders issued by the SEC thereunder.

XXI. Adequacy of the Two-Way Communication Process

The original proposed standard included a requirement for the auditor to evaluate whether the two-way communication between the auditor and the audit committee was adequate to support the objectives of the audit. The requirement was included to emphasize that effective two-way communication is beneficial to achieving the objectives of the audit.

Many commenters on the original proposed standard noted that an evaluation of the adequacy of the two-way communications can only be effective if both parties are involved in the evaluation. These commenters also suggested that if only the auditor evaluates the effectiveness based on his or her understanding of what was communicated, that evaluation would not provide information about the audit committee's understanding of that communication. In response to commenters, the Board removed this requirement in the reproposed standard.

Some commenters on the reproposed standard indicated that the Board should reinstate the requirement for the auditor to evaluate the adequacy of the two-way communication between the auditor and the audit committee to encourage the auditor to determine whether there is effective two-way communication. Additionally, some commenters suggested that the standard should be revised to change certain requirements for the auditor to communicate "with" the audit committee instead of "to" the audit committee in situations in which two-way discussion would be appropriate for the auditor to obtain information on particular matters relevant to the audit.

The note in paragraph 3 of Auditing Standard No. 16 states that the requirement for the auditor to "communicate to" the audit committee is meant to encourage effective two-way communication between the auditor and the audit committee throughout the audit to assist in understanding matters relevant to the audit. The importance of effective two-way communications remains in the standard; therefore, no change was considered necessary.

In addition, as part of understanding the company's control environment in Auditing Standard No. 12, the auditor assesses whether the board or audit committee understands and exercises oversight responsibility over financial reporting and internal control.[85] Other PCAOB standards require that, in an audit of financial statements, if the auditor becomes aware, or in an integrated audit, if the auditor concludes that the oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, the auditor must communicate that information in writing to the board of directors.[86] Not including a requirement for the auditor to evaluate the adequacy of a two-way communication in this standard does not change the auditor's responsibility for assessing the audit committee's effectiveness under existing PCAOB standards.

XXII. Audits of Brokers and Dealers

The release accompanying the reproposed standard posed a question about whether the standard should apply to the audits of all brokers and dealers. Many commenters supported the requirement for the standard to apply to the audits of all brokers and dealers. However, some commenters suggested that it may not be practicable to communicate the matters in the standard because they may not be applicable to all brokers and dealers due to the varying size and

---

[85] *See* paragraphs 23-24 of Auditing Standard No. 12.

[86] *See* paragraph 79 of Auditing Standard No. 5 and paragraph 5 of AU sec. 325.

nature of the brokers and dealers as well as the difference in their governance structures. Some commenters suggested that these brokers and dealers may not have an audit committee, board of directors, or equivalent body, or that the individual designated to oversee the financial reporting process and audits of the company might be the same person preparing the financial statements. They suggested, therefore, that the standard should apply only to certain types of brokers and dealers, such as carrying brokers or dealers. Other commenters suggested that the standard should not be applicable to the audits of brokers and dealers.

The Board acknowledges that there are smaller, less complex brokers and dealers that do not have an audit committee, board of directors, or equivalent body, but that communicating matters about the audit and the financial statements to those overseeing the financial reporting process is important. The governance structure of brokers and dealers does not change the value of the information regarding the audit or the company's financial statements.

Therefore, as discussed in Section I of this appendix, the definition of audit committee was revised for audits of nonissuers to recognize that if no such committee or board of directors (or equivalent body) exists with respect to the company, the communication should be made to the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company.

The release accompanying the reproposed standard posed a question about whether there are any communication requirements specific to the audits of all brokers and dealers that should be added to the standard. Some commenters suggested that the standard should require additional communication to the audit committee related to the additional attestation reporting to be required for brokers and dealers as proposed in pending SEC amendments to its Rule 17a-5.[87] Once the amendments to Rule 17a-5 are adopted in final form, the Board may consider adding requirements for communication to the audit committee pertaining to such matters.

XXIII. Amendments to PCAOB Standards

With the adoption of Auditing Standard No. 16, the Board adopted related communication requirements to other PCAOB standards. These amendments were made to the following standards, among others:

- Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*;
- AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*;
- AU sec. 317, *Illegal Acts by Clients*;
- AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*; and
- AU sec. 722, *Interim Financial Information*.

The Board is amending AU sec. 722 to be consistent with Auditing Standard No. 16. Some commenters suggested that the amendments to AU sec. 722 should clarify that the accountant ("accountant" is the term used in AU sec. 722) is not

[87] SEC, *Commission Guidance Regarding Auditing, Attestation, and Related Professional Practice Standards Related to Brokers and Dealers*, Exchange Act Release No. 62991 (Sept. 24, 2010).

required to repeat communications that were made as part of the annual audit. Other commenters suggested that the amendments to AU sec. 722 should become effective for interim periods following the first annual period in which Auditing Standard No. 16 becomes effective and that, otherwise, implementing the amendments prior to the first annual communication under Auditing Standard No. 16 would likely result in unnecessarily expanding the communication requirements related to the auditor's review of interim information.

The objective of a review of interim financial information pursuant to AU sec. 722 is to provide the accountant with a basis for communicating whether the accountant is aware of any material modifications that should be made to the interim financial information for it to conform with generally accepted accounting principles.[88] Procedures for conducting a review of interim financial information generally are limited to analytical procedures, inquiries, and other procedures that address significant accounting and disclosure matters relating to the interim financial information to be reported.[89] A review may bring to the accountant's attention significant matters affecting the interim financial information, but it does not provide assurance that the accountant will become aware of all significant matters that would be identified in an audit.[90]

AU sec. 722.18 requires the accountant to make inquiries of members of management who have responsibility for financial and accounting matters, including but not limited to, matters concerning unusual or complex situations that may have an effect on the interim financial information. Examples of situations about which the accountant would ordinarily inquire of management include, among other things, significant, unusual, or infrequently occurring transactions; application of new accounting principles; changes in accounting principles or the methods of applying them; and trends and developments affecting accounting estimates.[91]

An amendment to AU sec. 722 states that when conducting a review of interim financial information, the accountant also should determine whether any of the matters described in Auditing Standard No. 16, as they relate to interim financial information, have been identified.[92] This requirement is similar to the current requirement for the accountant to refer to AU sec. 380 for matters to communicate to the audit committee when conducting an interim review.[93]

Additionally, the amendments to AU sec. 722 recognize that management might communicate some or all of the matters related to the company's accounting policies, practices, estimates, and significant unusual transactions described in paragraph 12 of Auditing Standard No. 16. If management communicates any of these matters, the accountant does not need to communicate them at the same level of detail as management, as long as certain criteria are met. However, any omitted or inadequately described matters should be communicated to the audit committee.

The amendment to AU sec. 722.35 also indicates that any communication the accountant may make about the entity's accounting policies, practices, estimates, and significant unusual transactions as applied to its interim financial reporting generally would be limited to the effect of significant events, transactions,

[92] Amendment to AU sec. 722.34.

[93] *Id*.

and changes in accounting estimates that the accountant considered when conducting the review of interim financial information. The amendments to AU sec. 722 do not require that the communications to the audit committee repeat the annual communications but, rather, that the communication be related to the accountant's findings while performing the interim review procedures.

The Board determined not to defer the effective date for quarterly reviews as suggested by some commenters. Deferral of the effective date would result in AU sec. 380 continuing to apply to communications relevant to quarterly reviews, while Auditing Standard No. 16 simultaneously would require communications relating to the annual audit. Auditing Standard No. 16 requires timely communications of matters in connection with the annual audit to be made throughout the year under audit. These communications would, therefore, be made at or near the time that related communications are required in connection with quarterly reviews. Applying Auditing Standard No. 16 for the annual audit and AU sec. 380 for quarterly reviews could cause some degree of complexity because auditors would be required to apply two different standards when communicating important information to the audit committee. Therefore, the Board is making Auditing Standard No. 16 effective for quarterly reviews of fiscal years beginning on or after December 15, 2012.

In addition to avoiding having two co-existing and differing standards, implementing Auditing Standard No. 16 in the first quarter of 2013 should benefit audit committees by providing for the communication of significant information during the most current period. Also, and as discussed above, the objective of a review of interim financial information differs significantly from that of an audit, and any communication the accountant would make pertaining to interim financial reporting would be limited, as discussed in AU sec. 722, to matters the accountant considered when conducting the review of interim financial information.

The proposed amendments to other PCAOB standards accompanying the reproposed standard included an amendment to AU sec. 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents.* This amendment would have required the auditor to communicate to the audit committee material misstatements if the client did not agree to revise the accompanying information. This amendment was removed from the amendments accompanying Auditing Standard No. 16 because the Board has proposed to supersede AU sec. 551 as part of its standard-setting project related to auditing supplemental information.[94]

QC sec. 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*, states that to minimize the risk of misunderstandings regarding the nature, scope, and limitations of services to be performed, policies and procedures should provide for obtaining an understanding with the client regarding those services.[95] To align with Auditing Standard No. 16, the reproposed standard proposed an amendment to QC sec. 20 to change "client" to "audit committee." One commenter indicated that QC sec. 20 applies to attest engagements as well as to audit engagements. This commenter suggested that instead of replacing "client" with "audit committee," a clarifying footnote be added to the word "client" to indicate that with respect to a financial statement audit

[94] *See Proposed Auditing Standard, Auditing Supplemental Information Accompanying Audited Financial Statements and Related Amendments to PCAOB Standards.* PCAOB Release No. 2011-005 (July 12, 2011).

[95] QC sec. 20.16.

or an audit of internal control over financial reporting, the auditor is required to establish an understanding of the terms of the audit engagement with the audit committee. The Board considered this comment and decided not to amend QC sec. 20 at this time. Changes to the Board's quality control standards will be considered as part of the Board's quality control standard-setting project.

Appendix 5

Comparison of the Objectives and Requirements of Auditing Standard No. 16, *Communications with Audit Committees*, to the Analogous Standards of the International Auditing and Assurance Standards Board and the Auditing Standards Board of the American Institute of Certified Public Accountants

Introduction

This appendix compares certain significant differences between the objectives and requirements of Auditing Standard No. 16, *Communications with Audit Committees,* and the analogous standards of the International Auditing and Assurance Standards Board ("IAASB") and the Auditing Standards Board ("ASB") of the American Institute of Certified Public Accountants.

The analogous IAASB standards are:

- International Standard on Auditing ("ISA") 210, *Agreeing the Terms*
- ISA 260, *Communication with Those Charged with Governance.*

The analogous ASB standards[1] are:

- AU-C Section 210, *Terms of Engagement*, and
- AU-C Section 260, *The Auditor's Communication With Those Charged with Governance.*

Other standards of the IAASB and the ASB, respectively, were considered in this comparison to the extent that they include comparable requirements, including:

- ISA 240, *The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements*,
- ISA 450, *Evaluation of Misstatements Identified during the Audit*,
- ISA 570, *Going Concern,*
- ISA 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors),*
- ISA 720, *The Auditor's Responsibilities Relating to Other Information in Documents Containing Audited Financial Statements,*
- AU-C Section 240, *Consideration of Fraud in a Financial Statement Audit*,
- AU-C Section 450, *Evaluation of Misstatements Identified During the Audit,*

[1] In October 2011, the ASB issued Statement on Auditing Standards ("SAS") No. 122, *Statements on Auditing Standards: Clarification and Recodification*, which contains the Preface to Codification of Statements on Auditing Standards, *Principles Underlying an Audit Conducted in Accordance with Generally Accepted Auditing Standards*, and 39 clarified SASs. SAS 122 identifies the section within the AICPA codification with "AU-C" section numbers. *See* http://www.aicpa.org/RESEARCH/STANDARDS/AUDITATTEST/Pages/audit%20and%20attest%20standards.aspx.

- AU-C Section 600, *Using the Work of Others —Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors),*
- SAS 118, *Other Information in Documents Containing Audited Financial Statements*, and
- SAS 126, *The Auditor's Consideration of An Entity's Ability to Continue as a Going Concern* (Redrafted).

The information presented does not cover the application and explanatory material in the IAASB standards or ASB standards.[2]

This appendix is provided for informational purposes only. It is not a summary of or a substitute for Auditing Standard No. 16 itself, which is presented in Appendix 1 of this release. This comparison may not represent the views of the IAASB or ASB regarding the interpretation of their standards.

Objectives

PCAOB

Auditing Standard No. 16 supersedes AU sec. 310, *Appointment of the Independent Auditor*, and AU sec. 380, *Communication With Audit Committees*. Given the responsibility of many audit committees for the appointment and retention of the auditor, Auditing Standard No. 16 combines the requirements from the Board's standards, AU secs. 310 and 380, into one auditing standard.

Auditing Standard No. 16 includes four objectives for the auditor, which reflect both the appointment and retention of the auditor as well as the overall communication responsibilities. The objectives of the auditor are to:

a. Communicate to the audit committee the responsibilities of the auditor in relation to the audit and establish an understanding of the terms of the audit engagement with the audit committee;
b. Obtain information from the audit committee relevant to the audit;
c. Communicate to the audit committee an overview of the overall audit strategy and timing of the audit; and
d. Provide the audit committee with timely observations arising from the audit that are significant to the financial reporting process.

IAASB and ASB

ISA 210 and AU-C Section 210 both include an objective to establish whether the preconditions for an audit are present. Auditing Standard No. 16 does not include this objective, because some of the related requirements in the ISA

[2] Paragraph A59 of ISA 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing,* indicates that the application and other explanatory material section of the ISAs "does not in itself impose a requirement," but "is relevant to the proper application of the requirements of an ISA." Paragraph A63 of AU-C Section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Generally Accepted Auditing Standards*, states that although application and other explanatory material "does not in itself impose a requirement, it is relevant to the proper application of the requirements of an AUC section."

and SAS are not applicable to audits performed under PCAOB standards, such as determining whether the financial reporting framework is acceptable. For audits performed under PCAOB standards, the auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

Both ISA 260 and AU-C Section 260 include an objective for the auditor to promote effective two-way communication between the auditor and those charged with governance. Although Auditing Standard No. 16 does not include a similar objective, the standard encourages effective two-way communication between the auditor and the audit committee. As stated in Auditing Standard No. 16, "communicate to," is meant to encourage effective two-way communication between the auditor and the audit committee throughout the audit to assist in understanding matters relevant to the audit.

Appointment and Retention

Significant Issues Discussed with Management In Connection with the Auditor's Appointment or Retention

PCAOB

Auditing Standard No. 16 requires the auditor to discuss with the audit committee any significant issues that the auditor discussed with management in connection with the appointment or retention of the auditor, including significant discussions regarding the application of accounting principles and auditing standards.

IAASB and ASB

ISA 210 and AU-C Section 210 do not include a similar requirement.

Establish an Understanding of the Terms of the Audit

PCAOB

Auditing Standard No. 16 requires the auditor to establish an understanding of the terms of the audit engagement with the audit committee. This understanding includes communicating to the audit committee the objective of the audit, the responsibilities of the auditor, and the responsibilities of management. Paragraph 6 of Auditing Standard No. 16 requires the auditor to record the understanding of the terms in an engagement letter and provide the engagement letter to the audit committee annually. In addition, paragraph 6 of Auditing Standard No. 16 includes a requirement for the auditor to have the engagement letter executed by the appropriate party or parties on behalf of the company. If the appropriate party or parties are other than the audit committee, or its chair on behalf of the audit committee, the auditor should determine that the audit committee has acknowledged and agreed to the terms of the engagement.

Additionally, Auditing Standard No. 16 requires the auditor to decline to accept, continue, or perform the engagement if the auditor cannot establish an understanding of the terms of the audit engagement with the audit committee.

IAASB and ASB

ISA 210 and AU-C Section 210 require the auditor to agree on the terms of the audit engagement with management and, where appropriate, those charged with governance.

ISA 210 and AU-C Section 210 require the engagement letter to be in writing, although there is no requirement that the engagement letter be given to the audit committee or that it be signed by the audit committee, or its chair on behalf of the audit committee, or that it otherwise be acknowledged by the audit committee. Additionally, ISA 210 states that for recurring audits, the auditor shall assess whether circumstances require the terms of the audit engagement to be revised and whether there is a need to remind the entity of the existing terms of the audit engagement. Accordingly, ISA 210 permits the auditor to not send a new audit engagement letter or other written agreement each period.

AU-C Section 210 requires the auditor to assess whether circumstances require the terms of the audit engagement to be revised. If the auditor concludes that the terms of the preceding engagement need not be revised for the current engagement, the auditor should remind management of the terms of the engagement, and the reminder should be documented.

Both ISA 210 and AU-C Section 210 also establish requirements for the auditor to determine whether the preconditions for an audit exist. Auditing Standard No. 16 does not include similar requirements, as these requirements were either not applicable to audits performed under PCAOB standards or were addressed through the requirements in Auditing Standard No. 16 for establishing an understanding of the terms of the audit engagement with the audit committee.

ISA 210 requires the auditor to determine whether there are any conflicts between the financial reporting standards and additional requirements supplemented by law or regulation. AU-C Section 210 does not include similar requirements. Auditing Standard No. 16 also does not include similar requirements as they are not relevant to the audits performed under PCAOB standards.

ISA 210 and AU-C Section 210 also include requirements regarding limitation of scope prior to audit engagement acceptance, other factors affecting audit engagement acceptance, and acceptance of a change in the terms of the audit engagement. Auditing Standard No. 16 does not include such requirements as they are not applicable to audits performed under PCAOB standards.

AU-C Section 210 also includes requirements regarding initial audits and reaudits. Auditing Standard No. 16 does not include similar requirements, although similar requirements are included in the Board's standard, AU sec. 315, *Communications Between Predecessor and Successor Auditors*.

Additionally, ISA 260 and AU-C Section 260 include a requirement for the auditor to communicate with those charged with governance the form, timing, and expected general content of communications. Auditing Standard No. 16 does not include this requirement; however, Auditing Standard No. 16 does not preclude the auditor from communicating these matters to the audit committee.

Obtaining Information and Communicating the Audit Strategy

Obtaining Information Relevant to the Audit

PCAOB

Auditing Standard No. 16 requires the auditor to inquire of the audit committee about whether it is aware of matters relevant to the audit, including, but not

limited to, violations or possible violations of laws or regulations. This requirement complements the requirement in Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement,* for the auditor to make inquiries of the audit committee, or equivalent (or its chair) about risks of material misstatement, including inquiries related to fraud risks.[3]

IAASB and ASB

ISA 260 and the AU-C Section 260 do not contain a similar requirement for the auditor to inquire of matters that might be relevant to the audit, including, but not limited to, knowledge of violations or possible violations of laws or regulations. However, ISA 240 and AU-C Section 240 require the auditor to make inquiries of those charged with governance to determine whether they have knowledge of any actual, suspected, or alleged fraud affecting the entity.

Overall Audit Strategy, Significant Risks, and Timing of the Audit

PCAOB

Auditing Standard No. 16 requires the auditor to communicate to the audit committee an overview of the overall audit strategy, including the timing of the audit, and discuss with the audit committee the significant risks identified during the auditor's risk assessment procedures. As part of communicating the overall audit strategy, paragraph 10 of Auditing Standard No. 16 requires the auditor to communicate the following matters to the audit committee, if applicable:

a. The nature and extent of specialized skill or knowledge needed to perform the planned audit procedures or evaluate the audit results related to significant risks;

b. The extent to which the auditor plans to use the work of the company's internal auditors in an audit of financial statements; c. The extent to which the auditor plans to use the work of internal auditors, company personnel (in addition to internal auditors), and third parties working under the direction of management or the audit committee when performing an audit of internal control over financial reporting;

d. The names, locations, and planned responsibilities of other independent public accounting firms or other persons, who are not employed by the auditor, that perform audit procedures in the current period audit; and

e. The basis for the auditor's determination that the auditor can serve as principal auditor, if significant parts of the audit are to be performed by other auditors.

In addition, Auditing Standard No. 16 requires the auditor to communicate to the audit committee significant changes to the planned audit strategy or the significant risks initially identified and the reasons for such changes.

IAASB and ASB

ISA 260 and AU-C Section 260 require the auditor to communicate an overview of the planned scope and timing of the audit. However, ISA 260 and AU-C Section 260 do not require the auditor to communicate significant changes to the planned scope and timing of the audit. Further, ISA 260 and AU-C Section 260

[3] Paragraphs 5.f. and 54-57 of Auditing Standard No. 12.

do not include requirements for the auditor to communicate information about specialized skill or knowledge needed to perform the planned audit procedures or evaluate the audit results related to significant risks, the auditor's use of the work of internal auditors, or the auditor's use of the work of other company personnel and third parties working under the direction of management or the audit committee.

ISA 260 and AU-C Section 260 do not include requirements for the auditor to communicate information about the names, locations, and planned responsibilities of other independent public accounting firms or other persons, who are not employed by the auditor, that perform audit procedures in the current period audit.

However, ISA 600 and AU-C Section 260, include requirements for the auditor to communicate certain matters to those charged with governance including: an overview of the type of work to be performed on the financial information of the components; an overview of the nature of the group engagement team's planned involvement in the work to be performed by the component auditors on the financial information of significant components; instances where the group engagement team's evaluation of the work of a component auditor gave rise to a concern about the quality of that auditor's work; any limitation on the group audit; and fraud or suspected fraud involving group management, component management, employees who have significant roles in group-wide controls or other where the fraud resulted in a material misstatement of the group financial statements. In addition, AU-C Section 260 also includes a requirement for the auditor to communicate the basis for the decision to make reference to the audit of a component auditor in the auditor's report on the group financial statements.

Results of the Audit

Accounting Policies and Practices, Estimates, and Significant Unusual Transactions

PCAOB

Auditing Standard No. 16 requires the auditor to communicate certain matters relating to accounting policies and practices, estimates, and significant unusual transactions. However, Auditing Standard No. 16 acknowledges that if management communicates matters related to accounting policies and practices, estimates, and significant unusual transactions to the audit committee, the auditor does not need to communicate these matters at the same level of detail as management as long as the auditor (1) participated in management's discussion with the audit committee, (2) affirmatively confirmed to the audit committee that management has adequately communicated these matters, and (3) with respect to critical accounting policies and practices, identified for the audit committee those accounting policies and practices that the auditor considers critical. In addition, the auditor is required to communicate any omitted or inadequately described matters to the audit committee.

Matters to be communicated include:

a. Significant accounting policies and practices—(1) management's initial selection of, or changes in, significant accounting policies or the application of such policies in the current period; and (2) the effect on financial statements or disclosures of significant accounting policies in (i) controversial areas or (ii) areas for which

there is a lack of authoritative guidance or consensus, or diversity in practice.

b. All critical accounting policies and practices to be used, including: (1) the reasons certain policies and practices are considered critical; and (2) how current and anticipated future events might affect the determination of whether certain policies and practices are considered critical.

c. Critical accounting estimates—(1) a description of the process management used to develop critical accounting estimates; (2) management's significant assumptions used in critical accounting estimates that have a high degree of subjectivity; and (3) any significant changes management made to the processes used to develop critical accounting estimates or significant assumptions, a description of management's reasons for the changes, and the effects of the changes on the financial statements.

d. Significant unusual transactions—(1) significant transactions that are outside the normal course of business for the company or that otherwise appear to be unusual due to their timing, size, or nature; and (2) the policies and practices management used to account for significant unusual transactions.

IAASB

ISA 260 requires the auditor to communicate the auditor's views about significant qualitative aspects of the entity's accounting practices, including accounting policies, accounting estimates and financial statement disclosures.

ASB

AU-C Section 260 requires the auditor to communicate the auditor's views about qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures. AU-C Section 260 also provides that, when applicable, the auditor should determine that those charged with governance are informed about the process used by management in formulating particularly sensitive accounting estimates, including fair value estimates, and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.

The ISAs and the AU-Cs do not include a similar requirement for communicating significant unusual transactions.

Auditor's Evaluation of the Quality of the Company's Financial Reporting

PCAOB

Auditing Standard No. 16 requires the auditor to communicate the following matters to the audit committee:

a. Qualitative aspects of significant accounting policies and practices.

   1) The results of the auditor's evaluation of, and conclusions about, the qualitative aspects of the company's significant accounting policies and practices, including situations in which the auditor identified bias in management's judgments about the amounts and disclosures in the financial statements; and

2) The results of the auditor's evaluation of the differences between (i) estimates best supported by the audit evidence and (ii) estimates included in the financial statements, which are individually reasonable, that indicate a possible bias on the part of the company's management.

b. Assessment of critical accounting policies and practices. The auditor's assessment of management's disclosures related to the critical accounting policies and practices, along with any significant modifications to the disclosure of those policies and practices proposed by the auditor that management did not make.

c. Conclusions regarding critical accounting estimates. The basis for the auditor's conclusions regarding the reasonableness of the critical accounting estimates.

d. Significant unusual transactions. The auditor's understanding of the business rationale for significant unusual transactions.

e. Financial statement presentation. The results of the auditor's evaluation of whether the presentation of the financial statements and related disclosures are in conformity with the applicable financial reporting framework, including the auditor's consideration of the form, arrangement, and content of the financial statements (including the accompanying notes), encompassing matters such as the terminology used, the amount of detail given, the classification of items, and the bases of amounts set forth.

f. New accounting pronouncements. Situations in which, as a result of the auditor's procedures, the auditor identified a concern regarding management's anticipated application of accounting pronouncements that have been issued but are not yet effective and might have a significant effect on future financial reporting.

g. Alternative accounting treatments. All alternative treatments permissible under the applicable financial reporting framework for policies and practices related to material items that have been discussed with management, including the ramifications of the use of such alternative disclosures and treatments and the treatment preferred by the auditor.

IAASB

ISA 260 requires the auditor to communicate the auditor's views about significant qualitative aspects of the entity's accounting practices, including accounting policies, accounting estimates, and financial statement disclosures. The ISA provides that, when applicable, the auditor shall explain to those charged with governance why the auditor considers a significant accounting practice, that is acceptable under the applicable financial reporting framework, not to be most appropriate to the particular circumstances of the entity.

The ISAs do not include a similar requirement for communicating the auditor's understanding of the business rationale for significant unusual transactions.

ASB

AU-C Section 260 requires the auditor to communicate the auditor's views about qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures. When applicable the auditor should:

a. Explain to those charged with governance why the auditor considers a significant accounting practice that is acceptable under

the applicable financial reporting framework not to be most appropriate to the particular circumstances of the entity, and

b. Determine that those charged with governance are informed about the process used by management in formulating particularly sensitive accounting estimates, including fair value estimates, and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.

The AU-Cs do not include a similar requirement for communicating the auditor's understanding of the business rationale for significant unusual transactions.

Other Information in Documents Containing Audited Financial Statements

PCAOB

When other information is presented in documents containing audited financial statements, Auditing Standard No. 16 requires the auditor to communicate to the audit committee the auditor's responsibility under PCAOB rules and standards for such information, any related procedures performed, and the results of such procedures.

AU sec. 550, *Other Information in Documents Containing Audited Financial Statements,* requires that if the auditor identifies a material inconsistency in the other information presented in documents containing audited financial statements, and the other information is not revised by management to eliminate the material inconsistency, the auditor should communicate the material inconsistency to the audit committee. The auditor should also consider other actions, such as revising the audit report to include an explanatory paragraph describing the material inconsistency, as described in paragraph .11 of AU sec. 508, *Reports on Audited Financial Statements*, withholding the use of the report in the document, and withdrawing from the engagement. The auditor should also communicate a material misstatement of fact to the client and the audit committee, if the material misstatement of fact is not corrected.

IAASB

ISA 720 requires that if the auditor identifies a material inconsistency in the other information in documents containing audited financial statements and revision of the other information is necessary and management refuses to make the revision, then the auditor shall communicate this matter to those charged with governance and (a) include in the auditor's report an Other Matter(s) paragraph describing the material inconsistency in accordance with ISA 706, *Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report*; or (b) withhold the auditor's report; or (c) withdraw from the engagement, where withdrawal is possible under applicable law or regulation. ISA 720 also requires the auditor to notify those charged with governance of the auditor's concern regarding the other information and take any further appropriate action if there is a material misstatement of fact in the other information which management refuses to correct.

ASB

SAS 118 contains similar requirements to those in Auditing Standard No. 16.

Difficult or Contentious Matters for which the Auditor Consulted

PCAOB

Auditing Standard No. 16 requires the auditor to communicate to the audit committee matters that are difficult or contentious for which the auditor consulted outside the engagement team and that the auditor reasonably determined are relevant to the audit committee's oversight of the financial reporting process.

IAASB and ASB

ISA 260 and AU-C Section 260 do not include a similar requirement.

Management Consultation with Other Accountants

PCAOB

When the auditor is aware that management consulted with other accountants about significant auditing or accounting matters and the auditor has identified a concern regarding such matters, Auditing Standard No. 16 requires the auditor to communicate to the audit committee his or her views about such matters that were the subject of such consultation.

IAASB

ISA 260 does not include a similar requirement.

ASB

AU-C Section 260 requires the auditor to communicate to those charged with governance the auditor's views about matters that were the subject of management's consultations with other accountants on accounting or auditing matters when the auditor is aware that such consultations occurred.

Going Concern

PCAOB

Paragraph 17 of Auditing Standard No. 16 includes a requirement for the auditor to communicate to the audit committee, when applicable, certain matters relating to the auditor's evaluation of the company's ability to continue as a going concern. These matters include (a) If the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, the conditions and events that the auditor identified that, when considered in the aggregate, indicate that there is substantial doubt; (b) If the auditor concludes, after consideration of management's plans, that substantial doubt about the company's ability to continue as a going concern is alleviated, the basis for the auditor's conclusion, including elements the auditor identified within management's plans that are significant to overcoming the adverse effects of the conditions and events; (c) if the auditor concludes, after consideration of management's plans, that substantial doubt about the company's ability to continue as a going concern for a reasonable period of time remains, the effects, if any, on the financial statements and the adequacy of the related disclosure and the effects on the auditor's report.

IAASB

ISA 570 requires the auditor to communicate events or conditions identified that may cast significant doubt on the entity's ability to continue as a going concern. This communication includes whether the events or conditions constitute a material uncertainty; whether the use of the going concern assumption is appropriate in the preparation and presentation of the financial statements; and the adequacy of related disclosures in the financial statements.

ASB

SAS 126 requires the auditor to communicate with those charged with governance the nature of the conditions or events identified, the possible effects on the financial statements and the adequacy of related disclosures in the financial statements, and the effects on the auditor's report if, after considering identified conditions or events in the aggregate and after considering management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains.

Uncorrected and Corrected Misstatements

PCAOB

Auditing Standard No. 16 requires the auditor to provide the audit committee with the schedule of uncorrected misstatements related to accounts and disclosures that the auditor presented to management. Auditing Standard No. 16 also requires the auditor to discuss with the audit committee, or determine that management has adequately discussed with the audit committee, the basis for the determination that the uncorrected misstatements were immaterial, including the qualitative factors considered. Additionally, Auditing Standard No. 16 requires the auditor to communicate that uncorrected misstatements or matters underlying those uncorrected misstatements could potentially cause future-period financial statements to be materially misstated. Auditing Standard No. 16 also requires the auditor to communicate to the audit committee those corrected misstatements, other than those that are clearly trivial, related to accounts and disclosures that might not have been detected except through the auditing procedures performed, and discuss with the audit committee the implications that such corrected misstatements might have on the company's financial reporting process.

IAASB and ASB

ISA 450 and AU-C Section 260 include requirements for the auditor to communicate uncorrected misstatements and the effect that they, individually or in aggregate, may have on the opinion in the auditor's report. The auditor's communication shall identify the material uncorrected misstatements individually. Additionally, under ISA 450 and the AU-C Section 260, the auditor is required to communicate the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole.

ISA 450 and AU-C Section 450 require the auditor to request that uncorrected misstatements be corrected. Auditing Standard No. 16 does not require the auditor to make this request, because under SEC rules the financial statements are required to reflect all material correcting adjustments identified by the auditor.

ISA 450 does not include a requirement for the auditor to communicate corrected misstatements to those charged with governance. AU-C Section 260 requires the auditor to communicate material, corrected misstatements that were brought to the attention of management as a result of audit procedures.

Material Written Communication

PCAOB

Auditing Standard No. 16 requires the auditor to communicate to the audit committee other material written communications between the auditor and management.

IAASB and ASB

ISA 260 and AU-C Section 260 require the auditor to communicate to those charged with governance written representations the auditor is requesting.

Disagreements with Management

PCAOB

Auditing Standard No. 16 includes a requirement for the auditor to communicate to the audit committee any disagreements with management about matters, whether or not satisfactorily resolved, that individually or in the aggregate could be significant to the company's financial statements or the auditor's report. Auditing Standard No. 16 also states that disagreements with management do not include differences of opinion based on incomplete facts or preliminary information that are later resolved by the auditor obtaining additional relevant facts or information prior to the issuance of the auditor's report.

IAASB

The ISAs do not include a similar requirement.

ASB

AU-C Section 260 requires the auditor to communicate disagreements with management, if any.

Other Matters

PCAOB

Auditing Standard No. 16 includes a requirement for the auditor to communicate to the audit committee other matters arising from the audit that are significant to the oversight of the financial reporting process. This communication includes, among other matters, complaints or concerns regarding accounting or auditing matters that have come to the auditor's attention during the audit and the results of the auditor's procedures regarding such matters.

IAASB and ASB

ISA 260 and AU-C Section 260 include a similar requirement for the auditor to communicate other matters to those charged with governance that, in the auditor's professional judgment, are significant and relevant to the oversight of the financial reporting process.

Form and Documentation of Communications

PCAOB

Auditing Standard No. 16 requires the auditor to communicate the matters in the standard to the audit committee, either orally or in writing, unless otherwise specified in Auditing Standard No. 16. In addition, the standard also requires the auditor to document the communications in the work papers whether such communications took place orally or in writing. Auditing Standard No. 16 also requires the auditor to include a copy of or a summary of management's communication provided to the audit committee in the audit documentation, if as part of its communications to the audit committee, management communicated some or all of the matters related to accounting policies and practices, estimates, significant unusual transactions, or uncorrected misstatements to the audit committee, and, as a result, the auditor did not communicate these matters at the same level of detail as management.

IAASB

ISA 260 requires the auditor to communicate in writing with those charged with governance regarding significant findings from the audit if, in the auditor's professional judgment, oral communication would not be adequate. Written communication need not include all matters that arose during the course of the audit.

ASB

AU-C Section 260 requires the auditor to communicate in writing with those charged with governance significant findings or issues from the audit if, in the auditor's professional judgment, oral communication would not be adequate. This communication need not include matters that arose during the course of the audit that were communicated with those charged with governance and satisfactorily resolved.

Timing

PCAOB

Auditing Standard No. 16 requires the communications to the audit committee to be made in a timely manner and prior to the issuance of the auditor's report.[4]

IAASB and ASB

ISA 260 and AU-C Section 260 require that the auditor should communicate with those charged with governance on a timely basis.

---

[4] Auditing Standard No. 16 includes the following exception for registered investment companies – Consistent with SEC Rule 2-07 of Regulation S-X, 17 C.F.R. §210.2-07, in the case of a registered investment company, audit committee communication should occur annually, and if the annual communication is not within 90 days prior to the filing of the auditor's report, the auditor should provide an update, in the 90-day period prior to the filing of the auditor's report, of any changes to the previously reported information.
