

Venus Facilities Workshop for Mission Support

Venus Chamber Specification Form

1. Facility Name and Location:

*Planetary Spectroscopy Laboratory (PSL)
located at the Institute for Planetary Research, DLR
Rutherfordstrasse 2, 12489 Berlin, Germany*

2. Picture of chamber:

3. Point of Contact(s):

*Dr. Alessandro Maturilli, Alessandro.maturilli@dlr.de, +49-30-67055-313
Dr. Jörn Helbert, joern.helbert@dlr.de, +49-30-67055-319*

4. Internal Chamber Dimensions, including volume (metric system):

500mm x 400mm x 380mm (volume 0.076 m³)

5. Chamber Composition:

Stainless steel EN 1.4401

6. Maximum Pressure (bar):

N/A (This chamber uses a vacuum system to minimize sample alteration)

7. Maximum Temperature (°C):

Maximum temperature approx. 600°C

8. List gas species that can be used in an experiment:

N/A

9. Longest run time:

N/A

10. Window: Yes No

View port on top of the chamber is free view on the heated sample. Window is selectable, default is currently KRS5

a. Live video feed? Yes No

11. Electrical Feedthrough: Yes No

USB, Ethernet and 20 wires connection

12. Is temperature and pressure recorded in real time: Yes No

13. Gas Monitoring Capabilities: Yes No

N/A

14. Gas boosting capabilities: Yes No

N/A

15. Planned Future Upgrades:

Second chamber, nitrogen purging system

16. Additional Capabilities (UV radiation, emissivity, internal scale, etc):

Measurement of emissivity from 0.8 µm to 200µm

17. Can it be operated by an outside researcher (or only by someone at the facility)?

Yes No

About a week of training based on experience of researcher

18. General Cost of Operation per month:

Cost breakdown: *Cost and Maintenance fees:*

Labor Fees:

Gas cylinder purchases:

Equipment upgrades:

Additional costs:

19. Experiments:

- a. List previously conducted experiments

Example of some previous external researchers conducting Venu experiments at PSL:

Dr. Sara Port, at that time University of Arkansas, USA

Dr. Erika Kohler, at that time University of Arkansas, USA

Prof. Darby Dyar, Mount Holyoke College and PSI, USA

Prof. Molly McCanta, University of Tennessee, USA

Dr. Claudia Stangarone, University of Pavia, Italy

Dr. Sabrina Ferrari, University of Padova, Italy

- b. List future planned experiments

Dr. Erika Kohler, NASA Goddard Space Flight Center

Prof. Darby Dyar, Mount Holyoke College and PSI

Dr. Ann Carine Vandale, Royal Belgium Observatory

c. Have you supported/plan to support a mission? Yes No

i. Which mission(s)?

Venus mission supported:

ESA Venus Express

NASA VERITAS

ESA EnVision

JAXA Akatsuki

Support planned for

NASA DAVINCI

ii. What type of experiments (technology, geology, atmosphere, astrobiology, other)?

Spectral database, instrument development, instrument calibration, technology development

iii. How many hours have you dedicated/plan to dedicate towards mission work?

About 75% of the Venus chamber work at PSL is dedicated towards mission support

20. Approximate duration for the submission and approval of safety permits, if applicable

N/A

21. Provide a chamber website link, if available

22. If applicable, list all publications that reference the chamber

Some selected publications and conference abstract:
