Meanwhile...

Google™
scholar beta

(launched Nov 2004)

Electronic Resources Review

- “To provide ease of searching and access for the user, whilst reducing the workload for Systems and Technical Services, and remaining within current budget levels.”
- “Make recommendations for future provision, e.g. for the next 5 years, taking into account system interoperability and future-proofing.”

“The Vision”

1. **First class search engine**
 - relevancy ranking, facets, fast results, etc
2. **The “one stop shop”**
 - reduce silos of data, personalisation, etc
3. **Improved systems management**
 - interoperability, usage stats, open standards, etc
4. **Improved value for money**

Electronic Resources Review

- Small selection of suppliers invited to give 45 minute product demos
- Products rated against “The Vision”
- Report to Library Management Group
 - 3 options for moving forward with pros & cons

1st UK Commercial Adoption

UNIVERSITY OF HUDDERSFIELD IS UK'S FIRST COMMERCIAL ADOPTION OF THE SUMMON™ SERVICE

Web-scale discovery for academic research continues global expansion

25 August 2009 (MILAN, ITALY) – Serials Solutions, a business unit of ProQuest, announced at the International Federation of Library Associations (IFLA) Conference that University of Huddersfield is the site of the first commercial adoption of the

“This is the transformational technology which has long been needed to meet student and academic staff expectations in an increasingly complex information environment.”

and academic staff expectations in an increasingly complex information environment. It is addressing the wide range of scholarly collections

Implementation

Inspiring tomorrow's professionals

University of
HUDDERSFIELD

Project Timescales

- Sep 2009 implementation starts
- Oct 2009 Summon instance delivered
- Feb 2009 360 Link goes live
- Mar 2010 Summon “soft launch”
- Aug 2010 Summon replaces MetaLib

Project Kick-Off

- Conference call with US staff
- MARC21 mapping spreadsheet
 - we went with the defaults
 - need to be able to give each record an ID
 - we add it to 999|a
- Initial customisation of Summon
 - <title> text, branding, etc

6 Week Implementation

- Initial training on populating 360 Core (Serials Solutions Knowledge Base)
- Company aimed to deliver Summon with:
 - Library catalogue (via MARC record uploads)
 - University Repository (via OAI-PMH)
 - journal articles (via 360 Core)

MARC Record FTP Uploads

- Initial export of all records from Horizon
- In-house scripts developed to upload records on a daily basis:
 - deletions (via LDR position 5 = "d")
 - changed records (via Horizon timestamp)
 - new records (via Horizon timestamp)
- Initial issues with deletions

MARC Record FTP Uploads

- Things to consider...
 - when does your LMS actually delete things?
 - do you really want to upload everything from the catalogue?
 - we don't upload ebooks, ejournals, fast adds, ILL temp records, records where the only items are on order or unavailable, etc

MARC Record FTP Uploads

- More things to consider...
 - do you want everything to be findable in Summon?
 - we create “dummy” MARC21 records for journal titles and popular e-resources
 - Summon will highlight **all** of your crappy cataloguing!
 - rogue cataloguers
 - copy cataloguing errors
 - etc, etc, etc!

Catalogue Availability

- **Initially, Summon scraped the OPAC**
 - potentially a great way to bring your OPAC server to it's knees!
- **Worked with the company to develop a better alternative**
 - implemented basic DLF web service
 - code will be released as part of #jiscilms project

360 Core Knowledge Base

- You need to populate and maintain the 360 Core KB, regardless of which link resolver you use
 - going with 360 Link makes life easier
 - n.b. Serials Solutions aren't paying me to say that ;-D
- Default is to use a proxy server
 - this fitted with our plans to use EZproxy more

360 Core Knowledge Base

- We've found 360 Core very easy to use
- In just 2 months, we activated twice as many journals as we'd managed to activate in 4 years with SFX
 - being able to tell staff/students they now had access to twice as many journals was good! ;-)

Burney Collection

Introduction

The newspapers and news pamphlets gathered by the Reverend Charles Burney (1757-1817) represent the largest single collection of 17th and 18th century English news media. The 700 or so bound volumes of newspapers and news pamphlets were published mostly in London, however there are also some English provincial, Irish and Scottish papers, and a few examples from the American colonies, Europe and India.

Availability: available, Huddersfield

Computing: an object oriented approach

Book

Corporate Authors: Open University. Computing : an Object Oriented Approach Course Team and Open University. Computing : an Object Oriented Approach Course Team
Date: 2005 Pages: Videocassette (30 mins.)
Subjects: Object-orientated programming (Computer science)
Call Num: 005.117 OPE

Other Content Added

- Links to digitised off-air recordings
 - DCXML format
 - unfortunately, new records haven't been processed since January 😞

Summon API

- **Closed (customer only) XML API**
 - can be used if you want to run the Summon interface locally or you could write your own interface
 - also works with VuFind
 - Virginia using API to provide an accessible/mobile friendly version of the OPAC
 - we've used it to help identify problem MARC records

What's in Summon today?

- 40m+ journal articles (inc. OA)
- 35,000+ journals (both print & electronic)
- All print material held in the Libraries
- University Repository
- Electronic books (inc. ebrary, Books24x7)
- UniTube Off-Air Recordings
