

IZ STRANIH ČASOPISA

Acta Geodaetica et Geophysica Hungarica, Vol.47, No.3., 2012.

- The new fundamental gravimetric network of Slovenia. B. Koler, K. Medved and M. Kuhar. 217.-286.
- Risk and geodynamically active areas of the carpathian lithosphere on the base of geodetical and geophysical data. L. Pospíšil, J. Hefty and L. Hipmanová. 287.-309.
- Comparative deformation analysis for Abu Dabbab area, Egypt. A-M. S. Mohamed, M. Becker and M. Saleh. 310.-327.
- Random noise reduction capability of the hermit polynomial based Least Squares Fourier Transform method. P. Vass. 328.-343.
- One-dimensional P-wave velocity model for the territory of Hungary from local earthquake data. Z. Gráczér and Z. Wéber. 344.-357.
- Earthquake magnitude relationships in the region of the Carpathian-Pannonian Basin. T. Zsíros. 358.-376.

Allgemeine Vermessungs-Nachrichten, Vol.119, No.08-09., 2012.

- Rückführbare Messung langer Distanzen in der PTB. Karl Meiners-Hagen, Florian Pollinger.
- Distanzmessverfahren elektrooptischer Tachymeter. Martin Köhler.
- Bestimmung der Kalibrierbasis der UniBw München – Messungen mit dem Mekometer ME5000 des Lehrstuhls für Geodäsie der Technischen Universität München. Peter Wasmeier.
- Lasertrackermessungen des KIT Karlsruhe und der UniBw München zur Bestimmung der Sollstrecken der Kalibrierbasis der UniBw München. Christoph Herrmann, Wolfgang Liebl, Ingo Neumann.

Geoinformatica, Vol.16, No.4., 2012.

- Guest editorial: Integrated spatio-temporal analysis and data mining. Tao Cheng. 623.-624.
- Multi-scale decomposition of point process data. Tao Pei, Jianhuan Gao, Ting Ma, Chenghu Zhou. 625.-652.
- Cluster recognition in spatial-temporal sequences: the case of forest fires. Carmen Vega Orozco, Marj Tonini, Marco Conedera, Mikhail Kanveski. 653.-673.
- Assessing the changing flowering date of the common lilac in North America: a random coefficient model approach. Chris Brunson, Lex Comber Pages. 675.-690.

Geomatics Info Magazine (GIM International), Vol.26, No.9., 2012.

- Reducing the Costs of Geodetic Monitoring: Developing an Automatic WLAN-based GPS Monitoring System. Li Zhang, Mathias Stange, Volker Schwieger.
- Crowdsourced Geospatial Data: Crowdsourcing (2). Raj Singh.
- Archaeological Survey at Sandsfoot Castle: Recording One of Henry VIII's Castles. Paul Cripps.

Journal of Geodesy, Vol. 86, No.9., 2012.

- The Gauss–Listing geopotential value W_0 and its rate from altimetric mean sea level and GRACE. N. Dayoub, S. J. Edwards, P. Moore Pages. 681.-694.
- Reducing errors in the GRACE gravity solutions using regularization. Himanshu Save, Srinivas Bettadpur, Byron D. Tapley. 695.-711.

- On computing ellipsoidal harmonics using Jekeli's renormalization. Josef Sebera, Johannes Bouman, Wolfgang Bosch. 713.-726.
- Erratum to: On computing ellipsoidal harmonics using Jekeli's renormalization. Josef Sebera, Johannes Bouman, Wolfgang Bosch. 727.-728.
- Efficient and accurate high-degree spherical harmonic synthesis of gravity field functionals at the Earth's surface using the gradient approach. Christian Hirt. 729.-744.
- Recursive computation of finite difference of associated Legendre functions. Toshio Fukushima. 745.-754
- Reference frame stability and nonlinear distortion in minimum-constrained network adjustment. C. Kotsakis. 755.-774.
- Estimating rate uncertainty with maximum likelihood: differences between power-law and flicker-random-walk models. John Langbein. 775.-783.
- IAG Newsletter. Gyula Tóth. 785.-786.

SURVEY REVIEW, VOL.44, NO.327, 2012.

- A novel Stop&Go GPS precise point positioning (PPP) method and its application in geophysical exploration and prospecting. Zhang, X H; Guo, F; Li, X X. 251.-255.
- Analysis and filtering of the effect of tides on the hydrostatic levelling systems at CERN. Boerez, J; Hinderer, J; Jones, M A; Rivera, L. 256.-264..
- An approach to reliable rapid static GNSS surveying. Bakula, M. 265.-271.
- The establishment of a new gravity reference frame for Serbia. Odalović, O; Starcević, M; Grekulović, S; Burazer, M; Aleksić, I. 272.-281.
- Effect of Δ on xyz coordinates. Rollins, C M; Meyer, T H. 282.-284.
- Anomalous atmospheric refraction and comments on 'fast and accurate determination of astronomical coordinates ...' (Balodimos et al., 2003. Survey Review, 37(290): 269-275). Hirt, C. 285.-289.
- A case study of geo-ICT for e-government in Nigeria: does computerisation reduce corruption in the provision of land administration services? Akingbade, A O; Navarra, D D; Georgiadou, Y; Zevenbergen, J A. 290.-300.
- A change based framework for theory building in land tenure information systems. Barry, M; Roux, L. 301.-314.
- Extended S-transformation as a tool for deformation analysis. Even-Tzur, G. 315.-318.

ZEITSCHRIFT FUR GEODASIE, GEOINFORMATION UND LANDMANAGEMENT, VOL.137, NO.5., 2012.

- Geodaten im europäischen Umfeld. Clemens Kiepke. 271.-277.
- 3D-Geobasisinformationen. Birgit Elias. 278.-295.
- Akutuelles aus dem Bereich SAPOS[†] – Einblick in und aus Niedersachsen. Alexander Schenk. 286.-298.
- Geodateninfrastruktur Niedersachsen: Organisation, technische Umsetzung und die Einbindung der kommunalen Ebene. 299.-305.
- Meilensteine im Liegenschaftskataster in Niedersachsen. Klaus Kertscher und Siegmund Liebig. 306.-312.
- Bündelung von Instrumenten der Landentwicklung am Beispiel des Flurbereinigungswerfahrens "Großes Meer". Helgrid Obermeyer und Heike Brunken-Winkler. 313.-321.
- Landschaftmodelle und Kartographie unter AAA in Niedersachsen. Joachim Schulz, Heike Willgalis und Klaus Peter Wodtke. 322.-
